Subject: Request for Release of Imported Foods for Distribution in October 1949

MAF No. 147 - '49

Date 24 Sept. 1949

1. The Japanese Goverment wishes to request the immediate release of the following imported foods totalling 78,184 metric tons (inclusive of Siamese rice) in broun rice equivalent (75,177 metric tons in polished rice equivalent) and the "Substitute Rice" totalling 72,350 metric tons in brown rice equivalent for distribution in October 1949.

2. The imported foods and the substitute rice under request for release in the preceding paragraph shall be distributed as a part of the standard staple food ration for the normal consumers and partial self-suppliers and of the supplementary rations for the essential workers through the normal channels in accordance with the following plan by prefecture.

MEMO FOR RECORD:

1. To increase indigenous milk production, corn and soy bean cake were imported into Japan as feed for dairy cattle. However, in certain areas of Japan, notably Hokkaido where, during the summer months, indigenous feed is less scarce than in other areas of Japan, about 4000 metric tons of corn planned for this area has met with farmer resistance. The comparatively favorable price of soy bean cake (¥964.34 for 60 kgs.) as compared with that of corn (¥1611.5 per 60 kgs.) plus the present money shortages of farmers has made it impossible to dispose of this surplus quantity of corn for dairy cows in other areas of Japan. On the other hand, chicken breeders have been pressing for additional quantities of chicken feed, corn in particular. The number of chickens in Japan since the war has decreased sharply as the result of a shortage of feed:

1931 - 40 average	50,497,000
1946	15,369,000
1948	17,401,000
1949	16,355,000
1950 (Est. as of Feb. 1st)	23,880,000

PH&W has emphasized strongly the animal protein deficiency in the Japanese diet, particularly marked in rural areas. Since eggs and chickens are both valuable sources of animal protein it is considered desirable to release corn for breeding chickens not only to increase the number of chickens in Japan, but to develop another permanent import market for corn which is likely to be in abundant and cheap supply in the U. S. for a considerable period of time.

2. This section releases 4,029.2 metric tons of imported corn of which all but 15 metric tons will be distributed as feed for breeding chickens during the 2nd quarter of FY 1950. The remaining 15 metric tons will be allocated to National Livestock Breeding Stations as feed for breeding chickens.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46)ESS/PD, dated 13 Aug 48, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

M.A.F. No.I36 '49 September 20,1949

TO : General Headquarters, Supreme Commander For The Allied Powers

Subject: Request for Release of Imported Corn

The Japanese Government hereby wishes to request an immadiate release of 4,029.2 metric tons of imported corn.

The above amount of corn will be distributed in accordance with the following plan:

I. For breeding chicken:

4,014.2 metric tons of the corn is to be alloted for breeders of breeding chicken through out the country (excluding of Hokkaido) as pre delivery of feed quotas for the 3rd quarter.

Allocation to each prefecture is stated in the Annexed Table No. No. I. .I

2. For breeding chicken of the National Livestock Breeding Station:

I5 metric tons of the corn is to be distributed to the above station.

Allocation to each staton is stated in the Annexed table No. 2.

3. The above amount of corn will not be pulverized unless consumers desire so.

SUBJECT: Release of Imported Wheat for Processing

TO: Ministry of Agriculture and Forestry, No. 11, 1 Chome, Yurakucho, Chiyodaku, Tokyo

File Sept Release

1. References are:

a. Ministry of Agriculture and Forestry memorandum number 141 - '49, dated 31 August 1949, subject: Request for Release of Imported Wheat for Industrial Use.

b. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 430(11 Apr 46) ESS/PC, dated 11 April 1946, SCAPIN 960-A, subject: Maintenance of Records of Storage and Distribution of Imported Foodstuffs.

PDF-126

2. No objection is offered to the release of 1,370 metric tons of unhulled wheat to be milled at the rate of 75 per cent into 1,027 metric tons of flour and 315.1 metric tons of wheat bran (shobaku). The flour will be processed into about 22.61 metric tons of mono-sodium glutamate for export, 595.95 of starch for textiles and 369.72 metric tons of 2.0 N content amino acid (by-product of mono sodium glutamate) in accordance with the plan as outlined in the memorandum referred to in paragraph 1a above.

3. A written report will be submitted to the Economic and Scientific Section of General Headquarters, Supreme Commander for the Allied Powers providing the information cited in paragraph 1 of the memorandum referred to in paragraph 1b above.

MEMO FOR RECORD:

1. The export of mono sodium glutamate is a valuable source of foreign exchange. Imports of wheat have been scheduled by ESS/FT for its production. The wheat is purchased with commercial funds.

2. This action releases 1,370 metric tons of unhulled wheat to be milled at the rate of 75 per cent into 1,027 metric tons of flour and 315.1 metric tons of wheat bran (shobaku). The wheat bran will be allocated for the processing of shoyu sauce, the flour will be processed into about 22.605 metric tons of mono sodium glutamate and its by-product, 362.72 metric tons of 2.0 N content amino acid and 595.95 M/Ts of starch to be used in the manufacture of textiles.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46)ESS/FD, dated 18 Aug 48, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

SUBJECT: Distribution of American Duck to Japanese Manufacturers of Jikatabi

TO: Economic Stabilization Board, Kasumigaseki, Chiyoda-ku, Tokyo

1. The Economic Stabilization Board is authorized to release 150,690 yards of United States Army surplus duck cloth, which is in the custody of the Seni Boeki Kodan, to manufacturers of jikatabi.

2. This cloth will be distributed to the factories specified in the allocation plans submitted by the Ministry of Commerce and Industry and the Economic Stabilization Board.

3. This material will be sold to the manufacturers at the official prices set by the Price Board and no import duty or commodity tax will be levied.

4. Manufacturers will be required to deliver to registered wholesalers all the jikatabi made from this material at the official prices set by the Price Board. The Economic Stabilization Board will require all handlers of these goods to keep accurate records of all the material received and on the distribution of all articles manufactured from this material. All necessary action will be taken to assure that these articles are distributed to the wholesalers through official channels and do not appear in illegal or unofficial sales.

5. The jikatabi manufactured from this cloth are to be distributed only through incentive goods programs approved by the Economic and Scientific Section, General Headquarters, Supreme Commander for the Allied Powers.

6. The Economic Stabilization Board will submit a report on the distribution of this material as soon as feasible. Monthly reports on the items manufactured will be made until the entire lot of material is exhausted and the products are delivered to eligible wholesalers.

10 September 1949

SUBJECT: Release of Imported Sugar

TO: Ministry of Agriculture and Forestry, No. 11, 1 Chome, Yurakucho, Chiyodaku, Tokyo

1. References are:

a. Ministry of Agriculture and Forestry memorandum number 137- '49, dated 30 August 1949, subject: Request for Release of Imported Sugar.

b. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 430(11 Apr 46) ESS/PC, dated 11 April 1946, SCAPIN 960-A, subject: Maintenance of Records of Storage and Distribution of Imported Foodstuffs.

2. No objection is offered to the release of 75.34 metric tons of imported brown sugar, to be replaced by the same quantity of indigenous refined sugar, to be used in the manufacture of cigarettes during the period ending December 1949 in accordance with the plan as outlined in the memorandum referred to in paragraph 1a above.

3. A written report will be submitted to the Economic and Scientific Section of General Headquarters, Supreme Commander for the Allied Powers providing the information cited in paragraph 1 of the memorandum referred to in paragraph 1b above.

MEMO FOR RECORD:

1. For the Japanese FY 1949, 6 per cent of all tax revenue is planned to be collected from the sale of cigarettes. To insure sales sufficient to provide this revenue, a reasonably satisfactory cigarette must be produced. It is considered essential for a satisfactory cigarette that a small quantity of sugar be used in its manufacture.

2. This action releases 75.338 metric tons of imported brown sugar to be used in the manufacture of cigarettes through the period ending December 1949. Imported brown sugar has been requested as it is not necessary to use the higher priced domestic white sugar. The quantity of imported sugar released will be replaced by indigenous refined sugar.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46) ESS/PD, dated 16 Aug 47, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

SUBJECT: Release of Molasses for Processing Yeast

TO: Ministry of Agriculture and Forestry, No. 11, 1 Chome, Yurakucho, Chiyodaku, Tokyo

File: Sept Releases

1. References are:

a. Ministry of Agriculture and Forestry memorandum number 135 -'49, dated 27 August 1949, subject: Request for Release of Imported Molasses as Raw Material of Yeast.

b. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 430(11 Apr 46) ESS/PC, dated 11 April 1946, SCAPIN 960-A, subject: Maintenance of Records of Storage and Distribution of Imported Foodstuffs.

2. No objection is offered to the release of 1,240 metric tons of molasses to be processed at the standard rate of 1,100 pounds of yeast per metric ton of molasses having a 50 per cent sugar content in accordance with the plan as outlined in the memorandum referred to in paragraph 1a above.

3. A written report will be submitted to the Economic and Scientific Section of General Headquarters, Supreme Commander for the Allied Powers providing the information cited in paragraph 1 of the memorandum referred to in paragraph 1b above.

6 September 1949

MEMO FOR RECORD:

1. The importation of wheat has made necessary large scale baking of bread which in turn requires yeast. It is considered more economical to import molasses and produce the yeast in Japan than to import yeast.

2. This action releases 1240 metric tons of molasses to be processed at the standard rate of 1,100 pounds of yeast per metric ton of molasses of a 50% sugar content. The yield of yeast is lower where the sugar content of molasses falls below 50 per cent (the converse is also true). The present release of 1,240 metric tons of molasses will produce 1,364,000 pounds of yeast if the average sugar content of the molasses is 50 per cent.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46)ESS/PD, dated 18 Aug 48, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

Food Branch

FLW/HFS/BSA/ge
2 September 1949

MEMO FOR RECORD:

1. Burmese gram requires highly specialized handling because of a natural cyanide content. Gram was imported as a staple food. However, it has been considered advisable since cases of poisoning have occured to discontinue its distribution as a staple food and to have this gram processed by manufacturers familiar with necessary methods for cyanide removal, under the supervision of PH&W.

2. This action releases 633,501 metric tons of gram to be processed at four plants under close supervision of PH&W into approximately 360.103 metric tons of powdered bean jam, ("An"). Distribution plans will be submitted by the Ministry of Agriculture and Forestry after PH&W has approved the processed food as safe for human consumption.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46)ESS/PD, dated 18 Aug 48, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

B. S. Appleton, 57-8395

FLW

ALLOCATION OF RELEASED IMPORTED BURMESE GRAM, PDF - 125.

The released imported Burmese Gram is being stocked in warehouses in Kobe, Osaka and Wakayama.

Allocation of the Burmese Gram to be processed into Powdered Bean Jam, PDF - 125, is as follows:

Name and Address	Allocation (Unit: MT)	Bean Jam to be processed Metric Ton)
Harima Shokuryo Kogyo K.K. No. 194, Eiga, Shikama-ku, Himeiji-shi, Hyogo-ken.	585.216	351.120
Miyako Seian Jyo No. 10, 2-chome, nishi, Shikano, Ikuno-ku Osaka-shi.	20.0	12.0
Eiwa Shokuhin Kogyo K.K. No. 44, 2-chome, Eiwa, Fuse-shi, Osaka.	16.6	9.96
Wakayama Kanzume K.K. No. 2687, Iwasa-machi, Arita-gun, Wakayama. Wakayama.	11.694	7.020
Total	633.51	380.1

Temporarily, Powdered Bean Jam which will be processed from imported Burmese Gram is estimated it's outputabout 60% of allocation quantities, butoutput percentage may be changed by the result of experimental processing.

The distribution plan of Powdered Bean Jam to be processed from Burmese Gram will be decided after release of distribution issued.

From: Imported Foods Sec't, MAF on 13 Sept 1949

Ministry of Agriculture and Forestry

Japanese Government

M.A.F. No. 139 - '49 August 30, 1949

TO : General Headquarters of the Supreme Commander for the Allied Powers

SUBJECT : Request for Release of Imported Burmese Bean

The Japanese Government wishes to request a release for distribution of 633,5 kilograms of the imported Burmese beans for the purpose of manufacturing powder bean jam in accordance with the plan as set forth in the annexed paper.

For the Ministrer

Official in charge

Imported Food Section,
Food Agency.

Annexed Paper

Imported Burmese Beans Processing Plan For
Powder Bean Jam Manufacturing Purpose.

1. Item and quantity:

Imported Burmese beans: 633,504.546 kilograms;

Itemized:

Stored at Hyogo Prefecture	585,213.800 kg.
Stored at Osaka Fu	36,598.751 kg.
Stored at Wakayama Prefecture	11,691.995 kg.

2. Period for processing:

During the period from September to October;

3. Plan for processing:

Name of processing plant	Location	Allotted quantity of raw materials	Proposed output of finished products
Harima Shokuryo K.K.	Himeji City, Hyogo Prefecture	585,213.800	351,128.280
Miyake Seiansho	Osaka City	20,000.000	12,000.000
Eiwa Shokujin Kogyo K.K.	Osaka City	16,598.751	9,959.251
Wakayama Kanzume K.K.	Wakayama City	11,691.995	7,015.197
Total		633,504.546	380,102.728

The selection of the processing plants as listed above was made upon recommendation of prefectural governors so as to avoid long distance transportation, of raw materials and to make it feasible to process in applant which is located near the place w where the beans are stored in view of the fact that these Burmese beans had previouly given rise to disastrous poisoning cases.

It may be added that the processing rate of the finished products has been estimated at 60 per cent and over-all computation was made on this basis.

4. Price: Pursuant the price as notified by the Price Agency;

5. Experiments to be conducted on finished products:

Competent prefectural or public sanitary experiments stations will conduct analytical experiment on the sample of finished products every time when these beans come to be processed. At the same time, a sample containing 100 cc. of finished product together with written results of analytical test as every time of processing will be submitted to P.H.W., GHQ, SCAP and the Ministry of welfare to determine as to whether it can meet sanitary requirements or not.

Note: The distribution of the finished goods is to be made upon permission of G.H.Q.

30 June 1949

SUBJECT: Release of Imported Food for Distribution during August and September 1949

TO: Ministry of Agriculture and Forestry, No. 11, 1 Chome, Yurakucho, Chiyodaku, Tokyo

1. References are:

a. Ministry of Agriculture and Forestry memorandum number 104 -'49, dated 29 June 1949, subject: Request for Release of Imported Foods for Distribution in August and September 1949.

b. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 430(11 Apr 46) ESS/FC, dated 11 April 1946, SCAPIN 960-A, subject: Maintenance of Records of Storage and Distribution of Imported Foodstuffs.

2. No objection is offered to the distribution of the following amounts of imported cereals and indigenous rice stored in substitution for imported food previously released. The distribution will start on the dates indicated below as part of the staple food ration and will be in accordance with the plan as outlined in the memorandum referred to in paragraph 1a above. All quantities are in brown rice equivalents.

a. Distribution beginning as of 1 August 1949:

	Metric Tons
Imported Cereals (inclusive of Siamese rice)	200,000
Substitute Rice	268,900

b. Distribution beginning as of 1 September 1949:

Imported Cereals (inclusive of Siamese rice)	200,000
Substitute Rice	210,050

3. A written report will be submitted to the Economic and Scientific Section of General Headquarters, Supreme Commander for the Allied Powers providing the information cited in paragraph 1 of the memorandum referred to in paragraph 1b above.

SUBJECT: Release of Imported Feed

TO: Ministry of Agriculture and Forestry, No. 11, 1 Chome, Yurakucho, Chiyodaku, Tokyo

File Aug. Release 1949

1. References are:

a. Ministry of Agriculture and Forestry memorandum number 130 - '49, dated 24 August 1949, subject: Request for Release of Imported Feed.

b. Ministry of Agriculture and Forestry memorandum number 133- '49, dated 24 August 1949, subject: Application for Permission to Release Imported Feedstuffs.

c. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 430(11 Apr 46) ESS/PC, dated 11 April 1946, SCAPIN 960-A, subject: Maintenance of Records of Storage and Distribution of Imported Foodstuffs.

2. No objection is offered to the release of 600 metric tons of imported rapeseed cake and 800 metric tons of imported soybean cake to be mixed with 2,600 metric tons of indigenous raw materials into 4,000 metric tons of feed of which 2,000 metric tons will be distributed for draft animals, and 2,000 metric tons for livestock breeding at ¥341.80 per 60 kilograms in accordance with the plans as outlined in the memorandum referred to in paragraph 1a above. In addition, no objection is offered to the release of 3,180 metric tons of imported linseed and 43 metric tons of imported soy bean cake. Of these cakes, 171.2 metric tons of linseed cake will be linked with 13,685 koku of fluid milk at the rate of 12.5 kilograms per koku, another 712.8 metric tons of linseed cake will be linked with 75,000 koku of milk used largely for cheese and butter at the lower rate of 9.5 kilograms per koku; 2,271 metric tons of linseed cake will be distributed as feed for milk-goats and the remaining 25 metric tons of linseed cake and the 43 metric tons of soy bean cake will be allocated to National Breeding Stock Farms in accordance with the plan as outlined in the memorandum referred to in paragraph 1b above.

3. A written report will be submitted to the Economic and Scientific Section of General Headquarters, Supreme Commander for the Allied

Powers providing the information cited in paragraph 1 of the memorandum referred to in paragraph 1a above.

MEMO FOR RECORD:

1. Since indigenous feed is altogether insufficient to satisfy minimum feed requirements for the draft and dairy animals in Japan imports of oil cakes have been programmed for this purpose. In addition residual oil cakes from oil bearing materials processed in Japan are allocated for feed where their use for foodstuff is not required in order to prevent the diversion of edible indigenous cereals such as wheat and barley to feed.

2. This action releases 600 metric tons of imported rape seed cake and 800 metric tons of imported soy bean cake which will be mixed with 2,600 metric tons of indigenous feed to produce 4,000 metric tons of mixed feed, half of which will be allocated to draft animals for the July, August, September period and half of which will be allocated for livestock breeding. In addition, this action releases 3,180 metric tons of linseed cake and 43 metric tons of soy bean cake of which 171.2 metric tons of linseed cake will be linked with the delivery of 13,685 koku of milk in designated areas at the rate of 12.5 kilograms per koku, 712.8 metric tons will be linked with the delivery of 75,000 koku of milk at the rate of 9.5 kilograms per koku in non-designated areas; 2271 metric tons of linseed cake will be allocated as feed for milk goats and the balance of 25 metric tons of linseed cake and 43 metric tons of soybean cake will be allocated to National Breeding Stock Farms.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46)NSS/FD, dated 18 Aug 48, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

Ministry of Agriculture and Forestry

Japanese Goverment

M.A.F. NO. I33 August 24, 1949

TO: GENERAL HEADQUARTERS OF THE SUPREME COMMANDER FOR THE ALLIED POWERS

FROM: MINISTRY OF AGRICULTURE AND FORESTRU

SUBJECT: Application for permission to Release Imported Feed-stuffs

As it is intended to distribute the under mentioned imported soy bean cake, and linseed cake produced in extracting oil from imported linseeds, it is hereby requested that you will give us your permission to release them as follows.

Quantities applied to be released

Kind	Quantity, metric ton
Linseed cake	3,I80
Soy bean cake	43
Total	3,223

Distribution Program

The distribution program for the above mentioned feedstuffs is as follows:

I. Link use for drinking cow milk (designated areas of under 79 points):-

I7I.2 tons of linseed cake will be distributed for the link use for drinking cow milk (under 79 points) for the 2nd quarter.

These being for I3,685 koku of cow milk, the distribution quantity per koku will be I2.5 kilogram.

2. For the use of drinking cow milk and material cow milk for butter and cheese in areas other than the designated:-

712.8 ton of linseed cake will be allocated for the use of drinking cow milk and for milk-cows in the butter and cheese zones in those areas other than fhe designated for the 2nd quarter. These beimg for 75,000 koku of cow milk, the distribution quantity per koku will be 9.5 kilogram.

3. For the use of milking-goat:

2,271 tons of linseed cake will be allocated as the feedstuff for milk-goats for the 2nd quarter.

4. Allocation for National Breeding Stock-Farms:-

25 tons of linseed cake and 43 tons of soy bean cake will be allocated as the feedstuffs for the use of ability examination of milk-cows in the National Breeding Stock-Farms.

5. The allocation program by each prefecture for the foregoing 1 and 2 is as shown in Table 1.

The allocation program by each prefecture for the foregoing 3 is as shown in Table 2.

The allocation program by each breeding stock-farm for the foregoing 4 is as shown in Table 3.

Ministry of Agriculture and Forestry
Japanese Government

M.A.F. No. I30 - '49

August 24, 1949

TO : GENERAL HEADQUARTERS OF THE SUPREME COMMANDER FOR THE ALLIED POWERS

FROM : Ministry of Agriculture and Forestry

SUBJECT: Request for Release of Imported Feed

The Japanese Government hereby to request a release of the proviously imported rapeseed cake and soy bean cake, which are to be distributed in accordance with following plan.

Amount Requested for Release:

I.	Rapeseed cake	600 metric tons
2.	Soy bean cake	800 " "
	Total	I,400 " "

The imported amount by veseals of the said feed and its decreased amount is set forth in the annexed paper No.3.

The said feed is to be distributed in accordance with the following plan.

I. The rapeseed cake and soy bean cake totalling I,400 metric tons plus 2,600 metric tons of the home-produced feed will be allotted for manufacture of 4,000 metric tons of mixed feed for cattles at the rate of mixture given below, which is to be distributed among draft oxen and horses and livestock breeding use throughout the country.

Mixing rate of said feed.

	Imported feed			Home-produced feed					
	Rapeseed cake	Soy-bean cake	corn	Wheat bran	Oil-extracted rice bran	Oil extracted rice embryo	Carbonate of lime	Salt	Total
Rate of Mixture(%)	I5	20	5	30	I5	I0	3	2	I00
Amount (M/T.)	600	800	200	I,200	600	400	I20	80	4,000

2. Selling price:

The selling price of this mixed feddaand the computing base thereof are set forth in the annexed paper No.2.

3. Allotment Plan:

(A) For draft ozan and horses:

2,000 metric tons of the said mixed feed is to be alloted for the second quarter.

(B) For livestock breeding:

The remaining 2,000 metric tons of mixed feed is tobe allotted for the second quarter.

(C) The allotment amount by each prefecture of the said is set forth in the annexed paper No.I

MEMO FOR RECORD:

1. This action releases 43.5 metric tons of sugar to be distributed to three factories for the production of condensed milk during a one month period required for repair work on their powdered whole milk units. This emergency release of sugar is to prevent the spoilage of fluid milk delivered daily to these factories and which could not be processed without an allocation of sugar. The sugar will be used in processing 4,964 cases of 48 cans each (397 grams to the can) at the rate of 8.4 kilograms per case.

2. The Ministry of Agriculture and Forestry was instructed to promote experiments in producing processed foods utilizing corn flour. This action releases .85 metric tons of onion powder which will be combined with 10 metric tons of corn flour, and other ingredients in the production of 18.9 metric tons of soup powder which is to be distributed in Tokyo at the rate of 100 grams per household to determine consumer reaction.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46)ESS/PD, dated 18 Aug 48, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

Japanese Government

M.A.F. NO. 132 - '49 August 19, 1949.

TO: GENERAL HEADQUARTERS OF THE SUPREME COMMANDER FOR THE ALLIED POWERS

FROM: Ministry of Agriculture and Forestry

SUBJECT: Request for Release of Imported Canned Food

The Japanese Government wishes to request a release of 850 kilograms of the class-H imported canned food (onion powder), which is to be distributed, based upon the plan given in the annexed papers, as sub-materials for manufacture of soup powder.

For the Minister

S. Katayanagi.

Official in charge
Takaoka
Imported Food Section,
Food Agency.

Proposed Distribution Plan of Raw Materials
for Soup Powder Manufacturing

1. Item for distribution and quantities thereof:

Class-H imported canned food (onion powder): 850 Kg;

2. Period for distribution: September;

3. Distribution price: Official price;

4. Manufacturing plan:

(1) Name of plant: Mishima Foodstuff Mfg. Plant of Morinaga Foodstuff Industry Co., Ltd. ("Morinaga Shokuryō Kōgyo K.K.");

(2) Manufacturing:

Ingredients to be used as raw materials	Quantities
Onion powder	850 Kg.
Corn powder	10,300
Table salt	276
Pepper	69
Amino acid	6,200
Mustard	103
Extract of meat	138
Oleomargerine	620
"Aji-no-moto" (A kind of patented seasoning containing mono-sodium glutaminate)	138
Curry powder	215
Total	18,909 Kg.

Processing rate ..... 53.20 per cent
Amount of finished products
..... 10,080 Kg.

5. Guiding principle for distribution:

Trial distribution shall be made for use in every ordinary household in Tokyo Metropolitan District at the ratio of 100 grams per household;

6. Method of distribution:

In accordance with such method as may be determined by the Governor of Tokyo Metropolitan Government, based on the Ministry of Agriculture and Forestry Instructions.

SUBJECT: Release of Imported Oil seeds, Oil and Oil cake

TO: Ministry of Agriculture and Forestry, No. 11, 1 Chome, Yurakucho, Chiyodaku, Tokyo

1. References are:

a. Ministry of Agriculture and Forestry memorandum number 111-'49, dated 16 July 1949, subject: Request for Authorization of Using 1946 - 1947 Antarctic Whale Oil.

b. Ministry of Agriculture and Forestry memorandum number 129-'49, dated 9 August 1949, subject: Request for Release of Imported oil stuff and the like.

c. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 430(11 Apr 46) ESS/PC, dated 11 April 1946, SCAPIN 960-A, subject: Maintenance of Records of Storage and Distribution of Imported Foodstuffs.

2. No objection is offered to the release of 165.7 metric tons of "bottom of the tank" 1947-48 antarctic whale oil to be processed into 4,346,000 pieces of 50 gram cakes of soap for incentive goods or to the release of 3422.3 metric tons of 1948-1949 antarctic whale oil to be processed into household soap and glycerine or to the release of 304 metric tons of imported rape seed to be processed into 94.2 metric tons of oil and 167.2 metric tons of cake or to the release of 177 additional metric tons of rape seed held in reserve (the total of 271.2 metric tons of rape seed oil to be used for textile emulsion) or to the use of the 167.2 metric tons rape seed cake, plus 168.6 metric tons of rape seed cake held in reserve and 645.2 metric tons of castor cake as incentive goods for surplus oil purchases by the Fats and Oil Kodan, or to the release of 407.0 metric tons of linseed cake for the production of acetone butanol, and other industrial uses or to the release of 171 metric tons of refined peanut oil and 386 metric tons of crude peanut oil for the production of textile emulsion. All of the above materials released will be distributed in accordance with the plans as outlined in the memoranda referred to in paragraphs 1a and 1b above.

3. A written report will be submitted to the Economic and Scientific Section of General Headquarters, Supreme Commander for the Allied Powers providing the information cited in paragraph 1 of the memorandum referred to in paragraph 1h above.

MEMO FOR RECORD:

FLW/HPS/BSA/go
24 August 1949

1. The shortage of indigenous oil for both industrial and edible use has necessitated imports of oil seeds and oil. Both indigenous and imported oil stuffs are used (where physical availabilities permit) for the purposes for which they are best suited: that is for edible or industrial use, within the limits of the overall programs.

2. This action releases 165.7 metric tons of crude, "bottom of the tank" whale oil left over from the 1947-48 antarctic whale expedition to be processed into 4,346,000 pieces of soap weighing 50 grams each to be linked with the collection of oil seeds. In addition, this action releases 3422.3 metric tons of whale oil from the 1948 - 49 whaling expedition to be processed into soap for household use and glycerine for dynamite. Also, released by this action are 304 metric tons of rapeseed to be processed into 94.2 metric tons of oil (rate of oil extraction excessively low, 30.9%, stated to be due to 10% by weight of sand and gravel contained in this rapeseed imported from China), and 167.2 of rape seed cake. The rape seed oil plus 82.8 metric tons of rape seed oil (from 348 metric tons held in reserve) in conjunction with indigenous spindle, sperm and castor oil will be processed into 519.6 metric tons of textile soap emulsion. The 167.2 metric tons of rape seed cake and 162.6 metric tons of rape seed cake held in reserve, plus 645.2 metric tons of castor oil cake also released by this action will be linked with excess collections of rape seeds for seed purposes. This action also releases 407 metric tons of linseed cake for industrial use and will be replaced by 204 metric tons of indigenous soya bean cake. In addition, this action releases 171 metric tons of refined peanut oil and 386 metric tons of crude peanut oil (total in terms of crude oil of 566 metric tons) to be processed into fatty acids and glycerine, the former for the manufacture of textile emulsion, the latter for dynamite. The use of refined peanut oil for soap emulsion has been approved by ESS/IND.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46)ESS/PD, dated 15 Aug 48, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

4. Concurrences: ESS/IND, Mr. Rackus

Ministry of Agriculture and Forestry

Japanese Government

TO : GENERAL HEADQUATERS OF THE SUPREME COMMANDER FOR THE ALLIED POWERS

FROM : Ministry of Agriculture and Forestry

SUBJECT : Request for Authorization of Using 1946-1947 Anterctic Whale Oil

M.A.F. No. 111-49 July 16, 1949

1. Reference is:

Memorandum for the Japanese Government from the General Headquarters, Supreme Commander for the allied Powers AG 434 (24 Nov., 1948) ESS/PD P. D. F. -40 Subject; "Release of Oilstuffs and Edible Oils".

2. Due to the good office of SCAP, 17,800 tons of Whale oil Produced by the Second Whaling expedition in the Antarctic Ocean (1947-48) was released for domestic consumption. Of the above, permission has not be received for 165.7 tons but this is the residue oil at the bottom of tanks, the quality being very bad as can be seen from the sample submitted, is unfit for general use. As a result of conference among ESB, MAP and MCI, the conclusion has been reached that the most appropriate use for this is as raw material for making soap to be used as incentives for increasing production and collection of oil stuff.

3. The production and distribution schedule of the above soap are as follows.

Production target for fatty acid

165.7 (metric tons) (of whale oil) X 0.82 = 135.8 (metric tons) (of fatty acid)

Production target for soap

135.8 (metric tons) (of fatty acid) X 1.6 = 217.3 (metric tons)

The said soap of 217.3 metric tons is supposedly equivalent to 4,346,000 pieces of grams (No. 1) soap.

The distribution program therefor is given as follows:

		Collection target	Additional distribution Standard	Required amount of soap
1.	For securing collection of flaxseed, tung nut and mustardseed	85,000 bags	5 pieces of soap per bag	425,000 pieces
2.	For securing collection of fish oils	15,000 metric tons	2.5 pieces of soap per can (containing 16.5 kilograms)	2,250,000 "
3.	Reserve			1,671,000 "
	Total			4,346,000 "

Ministry of Agriculture and Forestry

Japanese Government

M.A.F. No. 129 - '49 August 9, 1949.

Subject : Request for release of Imported Oil Stuff and the like.

To : General Headquarters of the Supreme Commander for the Allied Powers.

1. References are made to:

(a) Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, A G 434 (30 Apr. 49) E S S/P D, P. D. F-26, subject: Release of Oil Stuff and Oil Cake.

(b) Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, A G 434 (5 June 49) E S S/P D, P.D.F-104, subject: Release of Oil and Oil Stuff.

(c) Ministry of Agriculture and Forestry memorandum number 118-'49, dated 15 June 1949, subject: Request for Authorization on the Use of the imported Peanut Oil.

2. The Japanese Government wishes to request an immediate release of 3,422.3 metric tons of Antarctic Whale Oil, 304 metric tons of Imported Rape-seed, 645.2 metric tons of Castor Cake, 407 metric tons of Linseed Cake, and 566 metric tons of Imported Peanut Oil as oil stuffs.

3.

(a) 3,422.3 metric tons of Antarctic Whale Oil will be used for hydrolysis in accordance with the plan set forth in the attached table No. 1 and fatty acid produced as the result of that hydrolysis for household soap, and glycerine for dynamite glycerine.

(b) 304 metric tons of Imported Rape-Seed will be used for extraction of oil. 94.2 metric tons of the said Rape-Seed oil will be added to 348 metric tons of the retained Rape-Seed Oil as mentioned in the reference memorandum 1 (a) above, and of this title amount 177 metric tons will be used for the production of textile oil material according to the attached table No. 2. The remaining 265.2 metric tons will be reserved.

167.2 metric tons of Rape-Seed Cake plus 162.6 metric tons of the reserved Rape-Seed cake shown in the reference memorandum 1 (a), will be used for purchase of surplus returned oil together with 645.2 metric tons of Castor cake according to the attached table No. 3.

(c) Out of 407 metric tons of Linseed Cake, 357 metric tons will be used as nitrogen resource for Aceton Butanol fermentation industry.

204 metric tons of indigenous Soya Bean cake thus replaced by the above Linseed Cake will be used for the production of Miso and Shoyu.

50 metric tons of Linseed Cake will be used for experimental use as nitrogen resource for absorbing the starch.

(d) Out of 622.7 metric tons of refined Peanut Oil reserved in accordance with the reference memorandum 1 (b) above, 171 metric tons (equivalent to crude oil 180 metric tons) and 386 metric tons of the Peanut Crude Oil reserved in accordance with the reference memorandum 1 (c) above will be used for the hydrolysis and the fatty acid for the textile soap and the glycerine for the dynamite glycerine with the plan set forth in the attached table No. 1.

451.7 metric tons of the refined Peanut Oil will be used for the distribution in the next quarter.

For the Minister

Official in Charge
Baba
Oil and Fat Section
Food Agency

Attached table No. 1

(Unit: One metric ton)

Crude Oil	hardening		hydrolysis		
	crude oil amount	hardening oil output	amount for hydrolysis	fatty acid output	glycerine output
Whale Oil	3,422.300	3,251.185	2,897.888	2,695.036	237.627
Crude Peanut oil			566.053	526.429	46.416

Due to the adoption of the subscription system, the allotment of the oil and fats as raw materials for the hydrolysis to each factory cann't be decided before the subscription ticket is returned. Therefore the receipt of products by the consumer is so dellayed, that the Japanese Government wishes to be authorized to adopt the method to request for release without stating the allotment plan to each factory and to report the allotment immediately after the whole allotment to each factory is completed.

The balanced amount between hardened oil output and oil for hydrolysis will be used in hardened oil, for general industry.

MEMO FOR RECORD:

1. Yeast is required for baking of rationed wheat flour that is distributed as bread. It is considered more economical to import molasses and process yeast in Japan than to import the required yeast.

2. This action releases 360.0 metric tons of imported molasses to be processed into 389,000 lbs. of yeast at the rate of 1,100 lbs. of yeast per metric ton of molasses provided the sugar content of the molasses is not less than 50%. The official price of molasses is set at ¥ 7,250 per metric ton for 50% sugar content. The price will be increased or decreased by ¥100 for each 1% increase or decrease of sugar content from the standard of 50%.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46)ESS/PD, dated 18 Aug 48, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

MEMO FOR RECORD:

1. To increase production of indigenous milk for controlled distribution to vulnerable categories of the population, feed has been imported to supplement inadequate indigenous supplies. To improve sanitary standards of fluid milk, a link system has been adopted that provides a higher rate of feed per koku of milk than the standard rate for those plants passing a certain sanitary standard.

2. This action releases 930.9 metric tons of soy bean cake, 1521.6 metric tons of corn, 388.0 metric tons of wheat bran and 214 metric tons of rice bran to be distributed at the rate of 15.3 kgs. of soy bean cake, 25 kgs. of corn and 36 kgs. of wheat or rice bran per 1 koku of milk. (The rice bran and wheat bran will be distributed from indigenous supplies for all except 5 prefectures). This release will be linked with the delivery of 56,244 koku of fluid milk delivered in the 1st quarter of FY 1950 and with 1709 koku delivered in the last quarter of FY 1949.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46)ESS/PD, dated 18 Aug 48, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

Aug. 2, I949

Subject: Request for release of Imported Feeds.

To General Headquarters of the Supreme Commander for the Allied Powers.

I. The JapaneseGovernment wishes to request an immediate release of 930.9 metric tons of importedsoy bean cake, I52I.6 metric tons of maize, 388. metric tons of wheat bran, and 2I4metric tons of rice bran as feeds.

2. The allotmentplan of the abovefeeds is as follows:

(I) As the link goods for the superior drinking milk delivery in the second quarter,

(a). Soy bean cake and Maize.

Soy bean cake of 904.8 metric tons and maize of I,478.9 metric tons is to be alloted for the delivery ofsuperior drinking milk (soy bean cake I5.3 kilograms and maize 25 kilograms per one koku of deliverdd milk.

(B). wheat bran and rice bran.

Wheat bran (or rice bran etc.) of 36 kilograms is to be alloted per one koku of milk adding to the feeds stated in item (a).

The imported rice bran is to be alloted for Kanagawa Prefecture, Tokyo to, and the imported wheat bran is to be alloted for Hyogo prefecture, Osaka Fu, KyotoFU, and indigenous wheat bran is to be alloted for other prefectures.

3. The supplementary allotment for the first quarter.

The soy bean cake of 26.I metric tons, and maize of 42.7 metric tons and wheat bran of 6I.6 metric tons are to be alloted as the supplementary allotment for the superior drinking milk delivery in Osaka Fu in the first quarter.

This supplementary allotment is for the milk delivery of I,709 koku.

4. the allotment quantity stated in 3 and 4 to each to, do, Fu and prefecture is as set forth in the annexed paper.

Chief, Price and Distribution Division

ECONOMIC AND SCIENTIFIC SECTION
PRICE AND DISTRIBUTION DIVISION
Food Branch

FLM/HFS/BSA/ge
9 August 1949

MEMO FOR RECORD:

1. Since foreign exchange rather than the availability of cereals and pulses is the limiting factor in Japan's food imports, it is believed desirable to release raw materials for processing into foods for export where the export price offers a reasonable net gain over the import cost of the raw materials.

2. This action releases 383 metric tons of imported whole soy beans and 279 metric tons of imported wheat to be distributed to three producers of shoyu sauce on a proportionate basis to their exports to date. A production schedule for the Japanese FY 1949 of 13,500 koku of shoyu has been approved by ESS/FTC. Total imported raw materials required for this production schedule are 1,100 metric tons of whole soy beans and 1269 metric tons of wheat. The 13,500 koku of shoyu is equivalent to 2,935 metric tons with an estimated export value of $5,250 per metric ton. This action releases the raw materials for the 1st quarter, FY 1950 production schedule. Indigenous shoyu sauce is processed from defatted soy bean cake and wheat bran. Production period of export shoyu averages one year - consequently releases of raw materials will bear a close relationship to current exports, increasing or decreasing as the export pattern develops.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46)ESS/PD, dated 18 Aug 48, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

SUBJECT: Release of Imported Sugar for Whole Powdered Milk Processing

TO: Ministry of Agriculture and Forestry, No. 11, 1 Chome, Turukucho, Chiyodaku, Tokyo

File: aug Release

1. References are:

a. Ministry of Agriculture and Forestry memorandum number 127-'49, dated 5 August 1949, subject: Request for Release of Imported Sugar.

b. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 430(11 Apr 46) ESS/PD, dated 11 April 1946, SCAPIN 960-A, subject: Maintenance of Records of Storage and Distribution of Imported Foodstuffs.

2. No objection is offered to the release of 641.8 metric tons of imported refined sugar of which 199.1 metric tons will be used in the production of 221,226 cases of whole powdered milk (12/450 gram cans to the case) at the rate of 0.9 kgs. per case, during August and September '49; 195.6 metric tons will replace sugar borrowed from July 1st to date from condensed milk allocation and 247.0 metric tons will remain as stock on hand at processing plants in accordance with the plan as outlined in the memorandum referred to in paragraph 1a above.

3. A written report will be submitted to the Economic and Scientific Section of General Headquarters, Supreme Commander for the Allied Powers providing the information cited in paragraph 1 of the memorandum referred to in paragraph 1b above.

FOR THE CHIEF, ECONOMIC AND SCIENTIFIC SECTION:

FLOYD L. WHITTINGTON
Chief, Price and Distribution Division

ECONOMIC AND SCIENTIFIC SECTION
Price and Distribution Division

FLW/HFS/BSA/ee
6 August 1949

MEMO FOR RECORD:

1. The processing of whole powdered milk from indigenous fluid milk for distribution to vulnerable groups is considered desirable. Whole powdered milk without the addition of sugar is more liable to spoilage from bacteria growth. A small percentage of plants only have technical equipment of a standard high enough to permit the correct processing of whole powdered milk that will not be liable to spoilage. The addition of 15% sugar is considered a sufficient safeguard. Whole milk powder without the addition of sugar will be processed wherever technical proficiency of plants permit.

2. This action releases 641.8 metric tons of refined sugar which will be used at the rate of 0.9 kgs. per case of 12/450 gram cans of whole powdered milk during the 2nd quarter of FY 1950. While only 199.1 metric tons of sugar will be used in processing 221,226 cases, the decision as to the minimum sugar requirements delayed this quarters release and resulted in a minus stock position of 195.6 metric tons of sugar (borrowed from sugar allocated for processing of condensed milk). In addition, this release includes a carry-over of 247.0 metric tons as of the end of this quarter.

3. Surveillance is covered by letter to Commanding General, Eighth Army, from General Headquarters, Supreme Commander for the Allied Powers, file AG 400.703(15 May 46)ESS/PD, dated 18 Aug 48, subject: Surveillance over the Distribution of Imported Food and Incentive Goods.

Japanese Government

M.A.F. No. 123 '49

July 29, 1949.

TO: General Headquarters of the Supreme Commander for the Allied Powers.

SUBJECT: Release of Common Vetch Seed.

1. Thanks to the good offices of the General Headquarters, the Common Vetch seeds as green manure seeds have been imported from the United States as follows:

Name of ship	Landing port	Date of import
Citos	Yokohama	June 24 1949
Variety	**Quantity**	**Name of agency**
Common Vetch Seeds	264,636 M.T.	Tokyo Ryokuhi K.K.

Location of agency

No. 5, Komagome Kami-Fujimae-cho
Bunkyo-ku, Tokyo-to.

2. The Japanese Government has set up the allocation plan of the said seed by prefecture as per papers attached hereto so as to be in time for sowing fall green manure, expecting the immediate approval by your office for the release of the said seeds.

FOR THE MINISTER

S. Katayanagi.

S. Katayanagi
