SUBJECT: Destruction of Special Purpose Machinery and Equipment

TO: Commanding Officer
Tokai-Hokuriku Military Government Region
APO 710

1. Reference: paragraph 17f of Operational Directive 5/12 for 1946, Headquarters Eighth Army, dated 14 November 1947. The plan submitted by the Japanese Government for the destruction of Special Purpose Equipment has been approved and destruction operations will begin at once. Inclosed herewith for information are instructions given by the Japanese Government to effect the destruction.

2. The discovery of Special Purpose Equipment not under custody for reparations is covered by Cabinet Order No. 244, promulgated 22 November 1947 by the Japanese Government, which provides for reporting the possession of such equipment and sets penalties for evasion or obstruction of the destruction program.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Inclosure 1 to letter Headquarters Eighth Army, subject: "Destruction of Special Purpose Machinery and Equipment," dated 5 Dec 1947

INSTRUCTION FOR DESTRUCTION OF
THE SPECIAL PURPOSE MACHINE

1. Principle of Destruction

1. Essentially Special Purpose Machine and Equipment.

a. Machine and Equipment of which form and mechanism are designed for special purpose.

In case machine or equipment is essentially designed only for production of certain parts or constituents of combat equipment products the machine bed, tool head, work head etc. should be completely destroyed lest the machine should be reconstructed into other machines of similar purpose.

Example:---

(1) Rifling Machine.
Machine bed and Tangent bar equipment should be destroyed.

(2) Gun-barrel Reaming Machine.
Machine bed should be destroyed.

(3) Rifle Broaching Machine.
Machine bed and Carriage should be destroyed.

(4) Gun-barrel Drilling Machine.
Machine bed should be destroyed.

(5) Gun-barrel Lapping Machine.
Frame work should be destroyed.

(6) Chambering Machine.
Machine bed and Turret tool holder should be destroyed.

(7) Automatic Percussion-cap Press.
Frame work should be destroyed.

(8) Percussion-cap Caking Press.
Machine bed should be destroyed.

(9) Percussion-cap Fitting Press.
Machine bed should be destroyed.

(10) Cartridge-case Sizing Machine.
Frame work should be destroyed.

(11) Specially designed Cartridge-case Annealing Furnace.
Furnace body should be destroyed.

(12) Specially designed Cartridge-case Drilling Machine.
Machine bed should be destroyed.

(13) Percussion-cap Sizing Machine.
Frame work should be destroyed.

(14) Profile Miller for Aircraft Propeller.
Table guide way and cutter head should be destroyed.

(15) Reforming Machine for Aircraft Propeller-blade.

Incl 1a

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Twisting devices should be destroyed.

(16) Traverse Miller for spar.
Slide head and Cutter head should be destroyed:

b. Special purpose machine and equipment with Standard Power Unit.

In case machine or equipment is specially designed for production of certain parts or constituents of combat equipment products, but Standard Power Unit, e.g. Standard Milling Unit, Drilling Unit, Boring Unit, Grinding Unit etc (e.g. Excello, John Barnes, Natoto, Toyoda Hitachi etc.) is adopted in its construction, the specially designed machine bed, tool head, work head, jig and fixture etc. should be destroyed.

The Standard Power Unit is a constructional element of machine tool, as electric motor, and is available to other purposes as it is, so the Prefectural Government will explain this regard to the Military Government Team of own district and preserve the Standard Power Unit undestroyed with their approval.

examples---

(1) As for the special purpose Duplex Milling Machine adopting Standard Power Units, the specially designed Machine bed, Jig and Fixture etc. should be destroyed provided that the Standard Milling Units are left undestroyed.

In case the Machine bed is not specially designed and has ordinary form, destruction of the Machine bed itself is not required.

(2) As for the specially designed Boring and Facing Machine for certain type of aircraft engine crank case, specially designed Machine bed and Jig and Fixture etc. should be destroyed excepting the Boring Unit --- i.e. Standard Power Unit.

2. General purpose Machine tool utilized without major structural change as special purpose Machine by virtue of adapting nothing but specially designed Jig and Fixture, Special Holder.

In case General purpose Machine regardless of type or form utilized as production Machine for certain part or constituent of combat equipment products by means of adapting specially designed Jig and Fixture or Special Holder, the Machine should be restored to General purpose Machine by virtue of dismantling the special Jig and Fixture or Special Holder from

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

the machine, the dismantled special Jig and Fixture or Holder should be destroyed simultaneously.

By reason that machine tools belonging to this category are essentially general purpose machine tools, consequently, they should not be understood as special purpose machines, they are completely restored to general purpose machines by means of the abovementioned treatment. Hereupon, the Prefectural Government will keep close connection with the Military Government Team of own district in order to have them fully understand in this regard. In case the machines belonging to this category have been inventoried as of machines the Prefectural Government will make application to the Military Government Team of own district for exception of these machines from the 5a machine group after the abovementioned treatment is finished.

example:---

(1) Multi-drill -head Drilling Machine (e.g. Natco, Barnes type) utilitzed as single purpose machine tool for certain part or constituent of aircraft engine by means of adapting special Jig and Fixture or special holder.

(2) Studding Machine, Tapping Machine or certain type of Lapping Machine to which special Jig or fixture is adapted.

(3) Ordinary Press to which noting out special Jig or fixture is adapted.

11. Method of Destruction

General:

As to the destruction of machine it is fundamental that the machine to be destroyed should be broken into pieces and put in a state that the machine cannot be restored by any means, so thorough consideration should be paid in order that the destruction is put in practice most efficiently and economically.

Prior to the destruction more component parts or auxiliary equipments having utility value for general use, e.g. Ball bearing, Pipes, Pumps, electric motors, electric equipments etc., should be dismantled of the machine to be destroyed.

(1) Machine Bed:

As a general rule the bed should be drilled or severed by hammering, but in case hammering is not available acetylene burner cutting may be preferable.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(2) Tool head, work head, jig or Fixture:

These are to be destroyed by hammering or cold chiseling at their principal parts.

(3) Steel Plate:

Destruction by hammering is desirable, but method of hammering is not available acetylene burner cutting may be adopted.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Inclosure 11 to Letter, Headquarters, Eighth Army, Subject: "Destruction of Special Purpose Machinery and Equipment, dated 9 December 1947

I hereby promulgate the Cabinet Order concerning the destruction of special purpose machinery and equipment, based on the Imperial Ordinance No. 542 of 1945 relating to Orders to be issued consequent upon the acceptance of the Potsdam Declaration.

Signed : HIROHITO, Seal of the Emperor
This twenty second day of the eleventh month of the twenty-second year of Showa (November 22, 1947)

Prime Minister

MINAMI TETSU

Cabinet Order No. 244

Art. 1. Special purpose machinery and equipment, as mentioned in the present Cabinet Order, means industrial machinery and equipment which, by virtue of initial design or construction (including major structural change), are, as individual items, in nature and functionality, limited to use in connection with combat equipment products.

Combat equipment products mentioned in the preceding paragraph, are defined as "weapons, ammunition, missiles and explosives used for military purposes; chemical or bacterial warfare agents; ultra-shortwave radio equipment (limited to radar); naval combatant vessels; armored vehicles or aircraft."

Art. 2. The owners of special purpose machinery and equipment or, in the case where such machinery is not possessed by owners, its possessors (hereinafter to be called "the owners, etc.") shall report the undermentioned data to the Metropolitan or Prefectural Governors with jurisdiction over the location of the said machinery not later than December 11, 1947:-

(1) The names or appellations of the owners and possessors of such machinery, and their addresses.

(2) The names, kinds, patterns, purposes, quantities of such machinery, and its location.

(3) The plan for the destruction of such machinery.

Incl 2*

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(4) The inventory code numbers of such machinery in the case where it belongs to plants and establishments as designated under Article 1 of Ordinance No. 1 of the Ministry of Commerce and Industry, and of Education of 1946, or of Ordinance No. 32 of the Ministry of Transportation of 1946 (hereinafter be simply called "designated plants and establishments").

Art. 3. The owners, etc. must, as ordered by the Metropolitan or Prefectural Governors concerned, destroy or scrap in such a manner that they can not be reconstituted into other machines or equipment, all special purpose industrial machinery and equipment products, as mentioned in the reports submitted in accordance with the provisions of the preceding Article.

After when the owners of the special purpose machinery and equipment belonging to the designated plants and establishments, etc., have received the order mentioned in the preceding paragraph, the provisions of Art. 1 of Ordinance No. 1 of the Ministry of Commerce and Industry, and of Education of 1946, or of Ordinance No. 32 of the Ministry of Transportation of 1946 are not applicable with respect to the said machinery and equipment.

Art. 4. The owners, etc., must remove, in spite of the provision of the preceding Article, Par. 1, from the special purpose machinery and equipment such component parts and auxiliary equipment as can, by their nature, be used for general purposes other than the special, report without delay the names, kinds, patterns, prices and manufacturers of the said component parts and auxiliary equipment to the Metropolitan or Prefectural Governors and hold pending further instructions issued by them, when they destroy or scrap the said machinery and equipment in accordance with the preceding Article, Par. 1.

Art. 5. The competent Ministers or the Metropolitan or Prefectural Governors concerned may issue necessary orders or take necessary steps concerning the destruction, scrapping or other disposals of special purpose machinery and equipment.

Art. 6. When the destruction or scrapping of all special purpose machinery and equipment under the provision of Art. 3, Par. 1, has been completed, the owners shall make a report at its respective factory or workshop (including laboratory), and submit it within a week with items mentioned in Art. 2, items 1, 2 and 4, and the following items to the Metropolitan or Prefectural Governors.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(1) Date and method of destruction or scrapping and details of expenses required for the purpose.

(2) Tonnage of various grades of ferrous scrap recovered.

(3) Weights of non-ferrous scrap recovered (Brass, Bronze, Copper, Lead).

(4) Proceeds from the sale of scrap (Iron, Brass, Bronze, Copper, Lead) and the value of unsold portion.

Art. 7. The competent Minister or the Metropolitan or Prefectural Governor is authorized to receive a report on special purpose machinery and equipment from the persons concerned or to send an official in charge or a clerk in charge to the spot to let him examine the conditions of destruction or scrapping of special purpose machinery and equipment, or examine books, documents and other things.

In case of the official or the clerk being sent to the spot for examination he shall carry with himself a card of identification of the form illustrated on the attached paper.

Art. 8. The authorities of the Metropolitan or Prefectural Governors, stipulated in this Cabinet Order, shall be exercised by Minister of Transportation in case of special purpose machinery and equipment in the factory or workshop under the control of the General Railway Bureau, Transportation Ministry, and by "director of the Marine Bureau" in case of special purpose machinery and equipment in the factory or workshop under the control of the General Marine Bureau, Transportation Ministry respectively.

Art. 9. The competent Minister may provide the forms of reports under the provisions of arts. 2, 4, 6 and 7, par. 1.

Art. 10. Any person, who falls under one of the following items, shall be sentenced to penal servitude for not exceeding three years or to a fine not exceeding 30,000 yen.

(1) Any person who does not submit a report in violation of the provisions of art. 2 or who has submitted a false report.

(2) Any person who violates the provisions of art. 3, par. 1 and art. 4.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(3) Any person who violates the orders or dispositions under the provisions of Art. 5.

Art. 11. Any person, who falls under one of the following items, shall be sentenced to penal servitude for not exceeding one year or to a fine of not exceeding 10,000 yen.

(1) Any person who does not submit a report in violation of the provisions of Art. 6 or who has submitted a report with false entries.

(2) Any person who does not submit a report in violation of Art. 7, Par. 1, or who has submitted a false report.

(3) Any person who refuses, obstructs or evades the examination of the official or the clerk provided in Art. 7, Par. 1.

Art. 12. In case the representative of a juridical person, or the agent of a juridical person or of a person, or any other employee acts in violation of the above two articles concerning the work of the juridical person or of the person, not only the offender shall be punished, but also the juridical person or the person shall be fined as provided in the above two articles.

Supplementary regulation

This ordinance shall become effective on and after the day of its promulgation.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

GIFU
MILITARY GOVERNMENT TEAM
APO 25 Unit 2 (Gifu, Honshu)

31 July 1947

SUBJECT: Dispersed Reparations Machinery Located in Tokai-Hokuriku Military Government Region

TO: Commanding General, Headquarters I Corps, APO 301

In compliance with AG 004-134, Hq I Corps, dtd 17 July 47, this headquarter has inspected the machinery in question and all directives on custory, inventory and maintenance are being adhered to. The report on the advisability of centralizing such equipment is submitted as follows:

1. Code No.	Name	Location
13-16	Kawasaki Sangyo KK, Akashi Kitai Kojo dispersed location.	
	Ogaki Tekkosho Kagamigahara Kojo	Nigakino Sohara-cho, Inaba-gun Gifu-ken

Prior action has been taken to move this machine, (lathe, Code No. 13-16-766) to Hyogo Prefecture.

2. Code No.	Name	Location
13-76	Nippon Seitetsu KK, Hirohata Iron Works dispersed location.	
	To-no Railway Co.	1, Motomachi, Tajimi-shi, Gifu-ken

The Nippon Seitetsu K.K. has two locomotives in Gifu Prefecture which are being used by To-no Railway Co., Tajimi-shi, Gifu-ken. A private railroad concern. The inventory numbers of these locomotives are S310(VIAI-11) and S315(VIAI-16). These engines are being used to transport ceramics products, raw materials and passengers. Removal of these locomotives would seriously impair industry in the area and add to the destitute transportation conditions that already prevail.

This headquarters recommends that these locomotives remain in their present location and under the circumstances outlined above, it is further recommended that these locomotives be removed from the reparations list. Reference is made to inclosure No. 1, Japanese application, Subj: "Exemption of Locomotives from Reparations".

BASIC: Ltr, Gifu Military Government Team, APO 25, Unit 2, dtd 31 July 1947, Subj: "Dispersed Reparations Machinery Located in Tokai-Hokuriku Military Government Region

3.	Code No.	Name	Location
	13-7	Kawanishi Kokuki Konan Plant	dispersed location
		Ibuki Seiki Kogyo KK	Nizuka, Niki-mura, Annachi-gun Gifu-ken

The Kawanishi Plant of Hyogo Prefecture has 33 dispersed machines in this area, Code No. 13-7-2540 to 13-7-2572. The machinery is in second class condition, it is aged and its operating capacities are limited, majority of the machinery is in need of repair. The factory is manufacturing knitting, spinning and fertilizer machinery. The above mentioned reparations machines constitute the major portion of the Ibuki Plant.

In lieu of the above and the circumstances as per inclosure 2, Japanese petition, Subj: "Exemption of Reparations Machines", this headquarters recommends it inadvisable to remove the machinery and further recommends that it be exempted from the reparations list.

Subject: Petition for Exemption of Loaned Locomotives from Reparation.

1. Name of loaner firm: Japan Steel Mfg Co., Ltd.

2. Name of loaned locomotives: S310(VIAI-11) S315(VIAI-16)

3. Date of loan: April 1946.

4. Present place of usage: Tono Railroad Dachi Line.
(between Tokitsu and Dachi)

5. Reason for petition:

Owing to the impossiblity of the usage of locomotives over 40 tons, because of the feebleness of the rail and bridges, we had been running the Dachi Line from the outset, with two 21 ton carriges manufactured in 1920 by the Amanomiya Mfg Co., and one 24 ton carriage manufactured in 1920 by the Japan Vehicles (Nippon Sharyo).

However, the three locomotives later dilapidated and proved to be useless in the steep slopes and curves. We hereby demanded the Transportation Bureau and the Japan Railraod Association to impart us the neccessary locomotives, new or old. Our demand was granted and we were able to loan from the Hirohata Plant of Japan Steel Mfg. Co., Ltd., 2 Sform Locos which have been working as the main power of transportation of the line uptill to-day.

With the appointment of the Japan Steel Mfg Co., as an indemnity factory, the above locomotives might also be included in the reparation.

We planned the construction of new locomotives and also petitioned to the Transportation Bureau (Unyusho) and the Japan Railroad Association (NipponTetsudokai) for the loan of appropriate locomotives, but both plans being frustrated, we here demand you to exempt the locomotives now in our use from

1 incl

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

EXPLANATION OF THE COMPANY'S STANDING CONDITION

25 July, 1947.

1. Name and Address of the Company:

   a. Head Office: Tono Tetsudo K. K.
   (The Tono Railroad Company Ltd.)
   No 1 Honmachi Tajimi-shi, Gifu Pref.

   b. Business Office: 1. Dachi Line Office
   Dachicho, Toki-gun, Gifu Pref.
   2. Kasahara Line Office,
   Nakanogo Tajimi-shi, Gifu Pref.

2. Lines:

   a. Dachi Line (Tokitsu - Dachi)
   b. Kasahara Line (Tajimi - Kasahara)

3. Date of Establishment of the Company and Lines as well as Date of Business Commence:

   a. Regarding Dachi Line: Dachi Railroad Co., Ltd. established in Aug. 1918.

   b. Regarding Kasahara Line: Kasahara Railroad Co., Ltd. established in April, 1924.

   c. Amalgamation of the Two Companies:
   The two companies were amalgamated in March, 1944 and the namesof the Company were changed into The Tono Railroad Co., Ltd.

   d. Regarding Establishment of Dachi Line:
   1. The traffic was opened between Tokitsu and Oroshi in Oct. 1922.
   2. The traffic was opened between Oroshi and Dachi in Spt. 1924.

   e. Regarding Establishment of Kasahara Line:
   The traffic was opened whole line between Tajimi and Kasahara in July, 1929

4. Outline of the Equipments of the Lines:

(a) Equipments of the Dochi Line:

1. Locomotives 5

1 (24 W.T.) made in 1920
2 (21 W.T.) " " 1921
The above three are too old to be used, now in course of repair, but cannot be expected favourable.
2 (3 form. W.T. 35) loaned from Hirohata Plant, now in use.

2. Gasolin cars .....3 for passengers.
Seating capacity 40 - 60.
very old but now in use.

3. Freight cars 7

4 (10 F.T.)
3 (15 F.T.)

(b) Equipments of the Kasahara Line:

1. Locomotives .....2 (24 W.T.) made in 1936.
2. Gasolin car ..... 1 for passengers
Seating capacity 40
3. Passenger cars ..... 4 ([illegible])
Seating capacity 44
4. Freight cars .....2 (7 F.T.)
Break Vans are used for freight cars.

For Information

Cars belonging to the Transportation Bureau (Unyusho) are used on our lines for the goods outwards the Governmental Lines.

5. Amount of Transportation after conclusion of War & Future Estimation:

(a) Regarding the Dochi Line:

1. Amount of Transportation during 1946.
As seen in Chart 1 attached.
2. Monthly amount of Transportation during 1947.
As seen in Chart 2 attached.
3. Estimation after June till December, 1947.
As seen in Chart 3.

(b) Regarding the Kasahara Line:

Item 5 will be omitted, because this line has no direct connection with the Petition.

For Information
carried forward

PETITION

25 July 1947

To : Commanding Officer
Gifu Mil Govt Team

Subj: Petition for Exemption of Two S Form Locomotives from Reparation

To explain our present situation the Tono Railroad Co., Ltd. have loaned from the Hirohata Plant of Japan Steel 2 (two) S Form Locomotives No.'s310/315(weight tons: 35) and transplanted them on the Dachi Line where they have been working as the sole power of transportation until today. However as the result of the appointment of the Hirohata Plant as an indemnity factory, the aforesaid two locomotives which belong to the Plant have naturally been included in the reparation.

The Tono Railroad Co., Ltd. originally possessed three small size locomotives of old style one(weight tons:24) manufactured in 1920 and two(weight tons:21) manufactured in 1921, but they have dilapidated with use and age and proved to be an impediment to the transportation of the line. This is the reason of the loan made from the Plant. Such being the situation, the death or life of the industry of this district solely depends upon the yes or no of the confiscation of the two S form locomotives.

The towns on the Dachi line which are the center of the ceramic industry of the district possess both abundant resources and a historical technique, and now as the manufacturing center of reparation goods, they maintain the most important position in the foreign trade of the prefecture. Hence the decline of the power of transportation is an immense blow to the industry and welfare of this district. We hereby entreat you to exempt the two S Form Locomotives from the reparation, and pray that you will understand our desparate situation and listen to the ardent appeal of the people of towns on the Dachi Line.

Representatives
of
the Towns and the Ceramic Industry Association
on the Dachi Line

INFORMATION OF THE CERAMIC INDUSTRY
(of the towns on the Dachi Line)

1. Dachi Town:

a. Population	8,200	
b. Workers	3,000	
c. Factories	54	
d. Quantity of china wares manufactured, fuels & other materials transported mostly on the Dachi Line	4,144 tons	(monthly)
e. Selling amount	Yen 18,000,000	(monthly)

2. Oroshi Town:

a. Population	6,500	
b. Workers	2,100	
c. Factories	90	
d. Quantity of china wares manufactured, fuels & other materials transported mostly on the Dachi Line	2,072 tons	(monthly)
e. Selling amount	Yen 10,000,000	(monthly)

3. Tsumagi Town:

a. Population	6,000	
b. Workers	1,900	
c. Factories	78	
d. Quantity of china wares manufactured, fuels & other materials transported mostly on the Dachi Line	2,094 tons	(monthly)
e. Selling amount	Yen 12,000,000	(monthly)

4. Tokitsu Town:

a. Population	8,000	
b. Workers	3,900	
c. Factories	110	
d. Quantity of china wares manufactured, fuels & other materials transported mostly on the Dachi Line	1870 tons	(monthly)
e. Selling amount	Yen 18,000,000	(monthly)

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

5. Besides the towns mentioned on the other page, there are two more villages producing materials and china wares transported sometimes on the Dechi Line.

6. Twenty percent of the above production are for export at present, but most of the factories are now making preparation for export and they can produce 60% for export in the near future.
   The approximate total amount of sale at present is Yen 58,000,000 monthly and export amount in the near future is expected about Yen 36,000,000 monthly.

7. The above productions are transported day and night mostly by the two S Form Locomotives and by trucks and horse cars.

APPLICATION FOR EXEMPTION FROM REPARATION

The attached list shows the machines which have been evacuated during the time of war from the Kawanishi Kokuki K.K. in Hyogo Ken to Ampachi Gun near Ogaki.

At the time the bombing was at its worst, and many of the factories were hardly able to do work under the severe air raid. Kawanishi factories too, were struck in some places, and they were obliged to evacuate their machines as much as possible.

At that time the writer proposed to evacuate to Ogaki, the machines that were lying about rusty and broken unable to be used, upon which they gladly agreed and said: "Take the machines and do as you will with them. We can't do much production, and these machines will all be destroyed anyway."

Under the most critical moments, and with the hardest of struggle, the writer manage to get space on the railway and to loan and get the machines under way, all the time exposed to the danger of being air raided.

When at last the machines reached us, rusty and broken as they were, needed considerable repairing and overhauling; and it was a long time before we could complete the repairs, put the machines in order and set up for use - to say nothing of the expense and the work involved. Parts are still being made and replaced or added on to the machines in order to do a larger capacity of work.

Since the reconversion permit, it has been our earnest desire to set the factory on running basis and to contribute our work toward the economic recovery from the present crisis. These machines are being used to make knitting machinery, spinning machinery parts, fertillzer machinery parts, botan (charcoal balls) machinery, finishing of valves and cocks, etc.

As the major part of our factory consists of these machines and are the most important factors of our production, we sincerely ask for the exemption from reparation. It is impossible for us to continue work without them.

APO 301 (Kyoto, Honshu)

AG 004 - BA

SUBJECT: Woodworking Machines Located in Arsenals, Aircraft and Munitions Plants Designated for Reparations.

TO: See Distribution.

1. Section 1, paragraph A, inclosure 1 to Operational Directive No. 5/4, Headquarters Eighth Army, dated 22 August 1946, indicates that only metal working machinery, electrical machinery and apparatus, and general purpose industrial machines and equipment (engines and turbines, compressors and pumps, miscellaneous machinery and equipment such as power boilers and cranes) of aircraft factories, arsenals and privately-owned munitions plants, are to be inventoried for reparations. However, in many instances, woodworking machines have been inventoried in error, and consequently requests for withdrawal of inventory sheets previously submitted for machinery of this type, have been submitted to higher headquarters.

2. To assist military government regional and team commanders in making decisions on petitions by the Japanese for the release of woodworking machines, the following extract of an indorsement from the Supreme Commander for the Allied Powers is quoted:

> "Inventory sheets for all woodworking machine heretofor submitted will be withdrawn but it is not considered necessary to return same. It is impossible from data furnished to identify the particular inventory sheets mentioned, but in view of the fact that all will be withdrawn, it is not considered necessary to furnish identification for all these sheets."

AG 004 (Rep) - BA

SUBJECT: Survey of Reparations Machinery and Equipment

TO: See Distribution

1. Military government team commanders are directed to report to this headquarters the number of inventoried items subject to reparations located in non-integrated facilities (aircraft plants, arsenals, and privately owned munition plants) in prefectures under their jurisdiction. This report will be broken down by classification of machinery and will cover only "pooled" machinery and equipment. The installations involved will be identified by code number. Totals will be given, both for individual plants and prefectures.

EXAMPLE:

AICHI KOKUKI KOGYO (Aircraft) 01-1
Atsuta Kojo

Class #1	305	
Class #2	210	
Class #3	75	
Total	590	Grand total, Aichi Pref. 49,362

2. Items reported for individual installations will be totaled and the grand total for the prefecture will be included as the last item of the report.

3. The above report will be submitted to reach this headquarters not later than 30 August 1947.

SUBJECT: Maintenance and Disposition of Reparations Machinery and Equipment.

TO: See Distribution

1. The following instructions will serve to augment and clarify current directives pertinent to the maintenance and disposition of Class 3 and Special Purpose machinery and equipment in military arsenals, naval arsenals, privately owned munitions plants and aircraft plants under custody for reparations.

a. Cannibalization of Class 3 Machinery and Equipment.

(1) It is both permissible and desirable that Class 3 reparations machinery and equipment be cannibalized, and every available part and accessory used therefrom for the repair and servicing of Class 1 and Class 2 equipment.

(2) Class 3 machinery and equipment will, when stripped of parts and accessories presently needed for such repair and servicing of Class 1 and Class 2 equipment, be held for further disposition or cannibalization, and not reclassified or reduced to scrap.

(3) This provision for cannibalization of Class 3 machinery and equipment does not apply to special purpose (SP) machinery and equipment.

b. Maintenance and Disposition of Class 3 Machinery and Equipment.

(1) Class 3 machinery and equipment will not be repaired, reconditioned or rehabilitated in the manner designated for Class 1 and Class 2 machinery and equipment. It will be sufficient henceforth to preserve the status quo - as to maintenance - of this type of equipment, preventing any further deterioration from rust, or

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

exposure to the elements, dirt, etc. This will entail continuing exterior lubrication and other preservation measures.

c. Maintenance and Disposition of Special Purpose (SP) Machinery and Equipment.

(1) Special purpose (SP) machinery and equipment will not be repaired, reconditioned or rehabilitated in the manner designated for Class 1 and Class 2 machinery and equipment. It will be sufficient henceforth to preserve the status quo of this type of equipment, preventing any further deterioration from rust, or exposure to the elements, dirt, etc. This will entail continuing exterior lubrication and other preservation measures.

(2) Special purpose (SP) machinery and equipment will not be cannibalized, or parts and accessories thereof used for the repair or service of any other machinery or equipment in reparations custody, nor will any special purpose (SP) machinery and equipment be reclassified to scrap. Such machinery and equipment will be maintained as is, pending further disposition.

IMPLORE RE TRANSFER OF REPARATION MACHINERY

I4 June I948

Subject : Permission of Transfering Inventoried Machinery from KOMANO Plant (09-20) to KUWANA Plant (23-I9)

To : GIFU Military Government Team.

Thru : Commerce and Industry Section GIFU Prefecture.

Being the rehabilitation of Japanese industries to date on such a remarkable pace under the most thankful guidance of the Occupation Forces ball and roller bearing demand has been also excited.

Our company is now striving to answer for the keen requirements at our Kuwana plant, Mie pref. wherein we received emergent P.D. order from Nissan Jukogyo Co. Ltd. of alien motor vehecle bearings for the Occupation Forces. Our Kuwana plant therefor is now on the verge of necessities of production set for minor size bearings mostly because of the equipment unbalance resulted by the bombing damage and in reality the only way to surpass the bottle neck is to rearrange machineries' listed on later sheet,which has been designated as reparation machines at our Komano plant.

Items : -

I) Reasons desired to transfer the machinery to Kuwana Plant.

A) Our Kuwana plant now on running supplies ball and roller bearings for textile ,rolling stock,mining machinery,automobiles

Incl'

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

industries etc.,which are the framework of the reconstruction of Japan . Furthermore we are ordered to manufacture alien motor vehecle bearings. Then it seriously became innevitable to increase minor size production equipments.

B) The bombing damage of Kuwana plant (65 %) resulted production sbility unbalance especially for minor size bearings.

C) The Komano plant had been sole installed for middle and minor size bearings.

D) Our company has signed against Naigaimen Spinning Co,. Ltd. to sell the Komano plant asset exclusive reparation equipments which has been gathered and inventoried. It should be most inefficient to reopen such small scale production in this plant.

E) As the machinery concerned can never be available through market, it should be only way to utilize them for the planned rearrangement.

F) Our Kuwana plant being the core factory since the establishment of our company,technically and from the standpoint of efficiency,we seriously endeavored for the reconstruction immediately after the surrender. We therefor are sure to realise far more efficient production when permitted to reinforce the Kuwana plant with above mentioned machineries ,than reopen production in the Komano plant.

II) Plant & Location from which Machineries Removed.

Toyo Bearing Mfg.Co.,Ltd.Komano Plant.

No.778,Yunoki,Komano,Shirotsume-mure,Kaizu-gun
Gifu Pref.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

III) Plant & Location to which Machinery Transfered.

Toyo Bearing Mfg.Co.,Ltd. Kuwana Plant.

No. 2454, Tsuchishima,Higashikata,Kuwana City,
Mie Prefecture.

IV) Machineries Desired to be Transfered.

Kind of Machines	Maker & Specification	Number of MAchine	Inventory No.
Internal Grinding Machine	Heald No.8I	I	IA5-60
"	Toyo Kogyo No.8I	2	" -62,59
Centerless Grinding Machine	Cincinnati No.2	I	" -270
"	Lidkoping No.4	I	" -22

KOMI BRANCH (a Part of former No. 3 Works)

June 3, 1947

TO : Commanding Officer
Gifu Military Government Team
SUBJECT: Movement of Machinery

Dear Sir:

Our No. 3 Works was designated for reparations custody in Mie Prefecture. However due to misunderstanding in procedure on our part as well as an uncertainty in the responsibility of administration on part of the prefectures concerned, forty-eight machinery and equipment in our dispersed shop located in Tajimi-shi, Gifu-ken had been overlooked on the recent inventory.

We, therefore, wish to move these machinery to Oye Plant of our former No. 5 Works for better custody and control as well as to return the rented area in Tajimi Shop and inventory them under successive numbers of Oye Plant. Oye Plant is suitable for custody with adequate space and personnel. We have consulted the authorities of Aichi Military Government Team and have received their approval on receiving these machinery into this prefecture.

We request your consideration and favorable action on this matter.

Sincerely yours
Hiroshi Kato Manager

AG 004 (Rep) - BA

SUBJECT: Repair of Reparations Machinery to Raise Classification

TO: See Distribution

1. At the Atami Economic and Scientific Conference, it was stated verbally that Class III reparations machinery could be cannibalized for the repair of Class II and Class I machines.

2. This headquarters has received written verification from higher headquarters confirming these instructions. In the event such action is taken by your headquarters, you will submit notification of withdrawal of inventory sheets to [illegible] and Scientific Section, Industry Division, Reparations Branch, Supreme Commander for the Allied Powers.

19 February 1947

SUBJECT: Application for Partial Exemption

THRU : The Japanese Liaison Office

TO : Kayaba Sangyo K.K.

1. The application of the Kayaba Sangyo K.K. for removal of machinery listed for reparations was not favorably considered by higher headquarters.

2. The Kayaba Sangyo Plant was primarily engaged in the manufacture of aircraft parts. Its construction in 1943 and the fact that it produced 100% aircraft items brings it within the criteria for selection as an aircraft factory as established by the Supreme Commander for the Allied Powers.

3. This headquarters will allow the temporary use of this equipment as specified in the original reconversion permit (Reconversion from War Production and for Resumption of Production of Essential Civilian Commodities), dated 26 December 1945. Proper care and maintenance will be provided and no modification will be permitted. The acquisition of materials, parts and sub-assemblies, as well as the disposition of finished products and establishment of sales prices, will be in accord with the regulations of the Imperial Japanese Government.

AG 004 (Rep) - BA

SUBJECT: Inventory Instructions for Machine Tool and Ball and Roller Bearing Plants

TO: See Distribution.

1. References:

a. Operational Directive No. 5/4, pages 1 and 2, appendix to Inclosure 1, Headquarters Eighth Army, dated 22 August 1946.

b. Memoranda for the Imperial Japanese Government from General Headquarters, Supreme Commander for the Allied Powers.

(1) File AG 387.6 (13 Aug 46)ESS/IN, (SCAPIN-1133), dated 13 August 1946, subject: "Reparations Selection Within the Machine Tool Industry."

(2) File AG 387.6 (14 Aug 46) ESS/IN, (SCAPIN-1136), dated 14 August 1946, subject: "Reparations Selection Within the Precision Bearing Industry."

(3) File AG 387.6 (30 Jan 47) ESS/IN, (SCAPIN-1499), dated 30 January 1947, subject: "Inventory Instructions for Machine Tool and Ball and Roller Bearing Plants."

2. Attached as Inclosures 1 and 2 are lists of Machine Tool Plants and Ball and Roller Bearing Plants in your area to be inventoried. Inclosure #3 is sample copy of Inventory Sheets, a supply of which is being sent under separate cover.

3. All items indicated in reference 1a, above, which are located in listed plants (Inclosure 1 and 2) that are presently operable or economically repairable will be counted, marked and recorded on the inventory forms which have been forwarded (Inclosure #3).

4. Upon completion of the inventory, three (3) inventory forms for each plant listed will be forwarded to Headquarters Eighth Army (Attention: Military Government Section), through channels, and one copy placed on file in the prefectural office.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

5. The identifying code is based on reference 1a, above. It will show for each item the category (Roman numeral), the class (Capital letter), and the type (Arabic numeral). For example, Planers-IA8 (Roman numeral I identifies a metal working machine, Capital letter A identifies an individual machine tool and Arabic identifies an individual planer).

6. Separated from the code mark by a dash (-) will be an identification number. Such number will follow in numerical order the identification numbers of similar items; the highest number assigned indicates the aggregate number of a given type of equipment in the specified plant. Thus, if the planer cited in the example in paragraph 5 above were the fifteenth one assigned an identification number, its final numbering would be IA8-15.

7. Each individual item of equipment tallied will be marked in a conspicuous location, in a size easily read, and in a contrasting color of paint to that of the equipment.

8. The identifying of equipment as explained herein is all the details necessary. It will not be necessary to paint on the machine the prefecture and plant code number identification.

18 November 1947

SUBJECT: Release of Land and Building from Plant Listed for Reparations

TO : Commanding General, Headquarters I Corps, APO 301 (Attm: Military Government Section)

1. Forwarded herewith is an application for the partial release of land and buildings of the proposed Gifu Cotton Spinning Mill, 3883 Yanaizu-mura, Hashima-gun, Gifu Prefecture.

2. Attached map indicates the section of the Yanaizu plant (enclosed in red line) that is requested for use. This particular plant prior to the outbreak of war was an established spinning mill for the Chuo Cotton Spinning Co., Ltd. The land and buildings was converted into the Nagoya Arsenal for the production of machines guns in August 1944 and now listed for reparations.

3. At the present time the section of the building enclosed in red line houses reparation machinery but all the machines can be moved into the other half of the unused portion of the building thereby centralizing all machinery listed for reparations.

4. In view of the above mentioned and the case as presented in the enclosed application, this Headquarters recommends that the portion of the building indicated on the map be released to the Home Ministry for return to rightful owners.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Application as to the Installing and
Operating of Gifu Cotton Spinning Mill

Nov. 15th 1947

To; The Commanding Officer of Gifu Millitary Goverment.

Through; Laison Office, Gifu.

From; Kiyoshi Umemura (Representative of Founders,)
25 Saigo Hanada-cho Toyohashi-city.

Here we have the honour to make application to you as to the installing of Gifu Cotton Spinning Mill, for which you would kindly favour us with your esteemed benefaction, through your kind understanding.

Location; 3883 Yanaizu-mura Hashima-gun Gifu-prefecture.

Name of the Mill; Gifu Cotton Spinning Mill.

Name of President; Kiyoshi Umemura. (Shall be)

History of the Factory;

This factory was, at first, established as an cotton spinning mill for Chuo cotton spinning Co. Ltd. While this was combined with Toyoda Automobiles Manufacturing Co. Ltd., in accordance with the request of the Controlling Law of Commerce and Industory, issued by our goverment, on Nov. 1943. By the outbreak of War, this was again obliged to sell all land, buildings, annexes, machinery and equipments, so that to be converted into Nagoya Arsenal for the production of munition industory, by the oppress of our goverment, on Aug. 1944. This munition industory had been continued to the day of Japanese Surrender.

G.H.Q.gave this factory the order instructing to keep all substances for National Reparetion safe and sound, on Jan. 1946, and this order has been obeyed sincerly, till now.

On Nov. 17th 1947, Gifu Pref. Office of Nagoya Finance Bureau made application to you as to the exemption of O.D.5 Factory for Gifu Cotton Spinning Mill which shall be installed within the factory of old Nagoya Arsenal.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Our Plan.

1. Capitalization in Yen 80,000,000-
None of us are Zaibatsu, so our mill shall be a real share holding company.

2. Land, Building and Annexes.
As above mentioned, this factory was established as an cotton factory at first, so this fas all necessary constructions and equipments in spinning industory, and more over, under such difficult economical condition, as now a day, it will be impossible to make such fine and nice constructions and equipments as this. In textile industory, the constructions and equipments deel with the efficiency and result in high degree. From this point of view, this is most desirable plant for our plan.

3. Machinery
The number of spindles which we are now going to installe are 30,000 complete. The neccessary floor space for 30.000 spindles complete are 3,354 Tubo in the main factory, where 6938 Tubo are whole mesure. While, in this main factory, there are, also, the Machinerys for National Reparation, waiting the despatch, so we hope to get your permission as to the removal of these Machinery to anther space within this factory, enabling us to install our spinning machines. We hope you would kindly understand our plan, and you would favour us with your esteemed benefaction.
Our machinery mentioned on the separate sheet are now under construction in Toyoda Automatic Looms Manufacturing Co., at Kariya-sho Hekkai-gun Aichi-pref., and will be delivered to us on and from Dec. this year. They are the most efficient and fine machinery now a day in our country.

4. Skill and Labour
Our plan has been expected by the neighbour eargerly and sincerly. We already accepted many proposal to get the position in our mill from them, and some of them had been engaged in the former mill. Among the promotors, some of them were engineers of spinning industory. So it will be easy to get skilfull and sufficient experts and labours.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Remarks.

By the permmision of G.H.Q., Japan can install cotton spinning spindles up to 4,000,000. We made application to our Goverment to install 30,000 spindles. Our Goverment will give permmision to some applicants up to 4.000,000 spindles, examinning the four itens mentioned above.

Considering the said 4 items, we are sure that we will get permission from our goverment.

To make the peaceful Japane and to promote the civilian industorywhich will restore the economical society, now suffering under difficult depression, cotton spinning industory is and will be most suitable one, we belive. Kindly understand our intention of making this application, we heartly hope that you would favour us your esteemed permission, so that we could start our civilian industory, very soon.

I certify that the information contained herein is true to the best of my knowledge and belief. I am authorized to sign for this application.

GIFU
MILITARY GOVERNMENT TEAM
APO 25, Unit 2 (Gifu, Honshu)

3 November 1947

SUBJECT: Release of Land and Buildings from Plants Listed for Reparations

TO : Japanese Liaison Office, Gifu Prefecture

The land and buildings of the Ogaki Tekkosho Code No. 09-13,480 Imajuku Miki-mura, Ampachi, Gifu Ken, that are not required for housing of reparations machines, as presented in the inclosed Japanese petition for "Partial Release of Plants", are hereby released to the Home Ministry for return to its rightful owner.

FOR THE COMMANDING OFFICER:

1 Incl:
Japanese Petition

C. E. GEISER
Major, TC
Executive Officer

Distribution:
1 Japanese Com. & Ind. Section
2 Gifu Kosakki Seizosho Co, Ltd.
1 Governor of Gifu Prefecture

Angle

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Application for Partial Exemption of
Designated Facilities for Reparation

TO: Gifu Military Government Team

FROM: Taichi Ohashi. President
Ogaki Tekkosho Inc.

I. Name of the Plant: Ogaki Iron Works Inc.
Ogaki Plant

Code No. 09-13

II. Location of the Plant: #480 Imajuku, Miki-Mura,
Ampachi-Gun, Gifu-Ken.

III. Reason for Applying:

1) To centralize all the reparations machinary in one section for better maintenance and custory.
As shown on the attached map.

2) Making use of the land and buildings released, we should like to be helpful for rise of textile industry and for the mechanization of Japans' farming method, by manufacturing (1) rope making machine (2) straw-beating machine (3) oil-extracter press and (4) production and repair special parts of textile machinary, the shortage of which is now the common suffering, of our textile industry. In addi[illegible] we are going to start a spinning and weaving mill in a small scale.

3) By the earnest request of local people, we like to use one part of our building for the New Junior High School.

4) I should like to enclude the feeling of uneasiness for losing their job of our employees who have been in the Companys' service for many years,

IV. Status of Reparation Machinary.

All the necessary space for custody and control of reparations machines will be segregated and prudently guarded and maintained. (a) building is a vacant and not being used but will be used when it is necessary for dismantling and packing of machines for removal. Therefore, this partial release of land and building will never affect the custody and maintenance of the machines for reparations at all.

Incl 1

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

V. Total land and buildings of the plant.

Land 1,407 tsubo (1,15 acres)

Buildings 41 (as per attached map)

Installed facilities None

VI. Land and Buildings applying for release.

Land 1,196 tsubo

Building 36 (as per attached map)

Installed facilities None

VII. Proposed plan of Production and Use of building after the release.

1) Items to be manufactured and estimated monthly production.

(a) Machines for farming use monthly.

Rope making machine 150
Straw beating machine 200
Oil extracting press 50
Wheat husking machine 2

(b) Spinning Machine's Parts

Acid proof roller
Refining roller
Gears (Special type)
Other parts

(c) Wood Working Machine

"Excelsior" mfg machine 5
Wood lathe 2
Circular saw machine 2
Mortise cutting machine 1
Wood planer 1
Also General Repair & c.

(d) Number of employees 85

2) Part of the released building will be remodeled and used for the New Junior High School.
