ANTI-GOUTY ELIXIR
OF
HIPPOLYTE BRIEUGNE,
INVENTOR OF THE ANTI-RHEUMATISMA
Tropical Balm.

TILL now all medical science has had no power over the GOUT, this terrible disease which has ever made so many victims all over the earth, and still tears daily so many thousands from their occupations to give them up to the most painful sufferings. It is useless to recall to our minds the symptoms of this disease too well known to its numerous sufferers. It suffices to name them to appreciate the value of such a remedy against their return. Such is the effect of the ANTI-GOUTY ELIXIR, which is the result of the laborious searches of M. HIPPOLYTE BRIEUGNE, already known by the discovery of the anti-rheumatismal TROPICAL BALM, that has had down to this day so great a success. The ANTI GOUTY ELIXIR, particularly designed for curing the fits of the gout, possesses a power no less great, warranted by a long and personal experience of the inventor, and by repeated essays upon its numerous victims.

The ANTI-GOUTY ELIXIR is easy to take, and its taste is in no way disagreeable. It can be taken pure or mixed with two or three spoonfuls of tea or coffee. Its effects are felt after a few hours, whatever may be the intenseness of the fit. In twelve hours at most the sufferings disappear, and all its symptoms vanish away.

THIS Establishment, founded in 1838, has long held a high position in public opinion, as one of the leading institutions in the South of the United States.

The plan comprises a general and extensive system of education. Pupils are admitted at six or seven years of age, and continue till they are prepared for their future pursuits in life. They are distributed into classes, according to their capacities and acquirements.

The premises are, perhaps, the best to be found in the city, with ample space for exercise and recreation, and every convenience for an institution of learning.

The Professors are gentlemen of talent, chosen with care. Good order reigns in the establishment, and strict attention is paid to the moral conduct and improvement of the pupils.

DAY AND BOARDING SCHOOL
FOR YOUNG LADIES,
UNDER THE DIRECTION OF
MADAM CHARPAUX,
At the corner of Bayou and Claiborne streets.

THIS SEMINARY, whose existence dates some six years back, has met with a success that proves, beyond all cavil, the capacity of those who have charge of it.

Determined to merit the confidence of parents, Madj Charpaux will spare no pains to make her seminary equal to the best institutions of the kind in New Orleans, and in order to do this, she has employed the ablest teachers.

Madam Charpaux has purchased a large and airy edifice on one of the highest pieces of ground in the city and the better to consult the health of her pupils she has had spacious and elevated apartments built on purpose for school and sleeping rooms, through which there will be a constant circulation of air from many windows.

Great attention will be paid to the improvement of scholars in the English language. For this purpose, American ladies of acknowledged capacity, as teachers, will constantly reside in the Seminary.

The English, French and Spanish languages, geography, arithmetic, and in short all the branches of a polite education, will be taught in the Seminary.

As religion should be the foundation of all sound education, it will be carefully attended to by Madam Charpaux, who will conduct to church and preliminary catechisms all her young ladies who may have their first communion to make.

Music having become a most desirable branch of the education of young ladies, Mr. Charpaux, from the best musical school in Paris, and ex-artist of the Orleans Theatre, will devote all his time to teaching music. All the Scholars, besides their regular lessons, will practice daily under the eyes of the professor. The study of the notes will precede the performances, when Mr. Charpaux will put the pupils through the execution of the regular keys and notes, and this will be attended with no extra charge.

In order to kindle emulation among the pupils, and improve their singing, on the morning of the last Saturday in every month there will be a musical examination and a distribution of rewards.

Madam Charpaux, in order to complete the education of her scholars, has opened a class where will be taught all the useful and ornamental branches of needle-work.

During the summer the classes will open at 8 o'clock, and close at 3. Re-open at 4 and close at 6 o'clock, P. M. In winter, they will open at 8½, and close at 3. Re-open at 4½ and close at 6 o'clock, P. M.

MME. PARENT'S INSTITUTION,
Corner Royal and Hospital streets.

DAY AND BOARDING SCHOOL FOR YOUNG LADIES.

THIS establishment has been removed to corner Royal and Hospital streets. The building is vast, well ventilated and well distributed for class rooms, dormitories, &c. Madame Parent avails herself of this occasion to thank the numerous families who have so largely patronized her institution, and would assure them that their daughters will receive the same maternal care as heretofore. The long known reputation of her institution is the best guarantee to that effect. The course of study embraces the same system, in both English and French, as that employed in the first class institutions in the North and in Europe. Music, instrumental and vocal, including Solfege, is taught by the most eminent Professors, also Drawing and Painting; Dancing by Professor Vegas.

MADAME PARENT will remove her institution across the Lake during the summer months, but will keep the school open in the city throughout the year. Finally, there will be nothing wanting to complete a literary as well as refined education; also to excite in the hearts of young persons that pure morality which is the fundamental base of the institution, combining that easy elegance of manner so necessary for young persons. For further information address Madame Parent, Mandeville, until 15th OCTOBER; afterwards in the city at the Institution, where prospectuses can be obtained. oc4

Notice.
DR. L. DUPERRON,
DENTIST,
60.......ROYAL STREET.......60

HAS the honor to inform his friends and the public that he has just received a composition for plugging teeth, which possesses peculiar advantages over any hitherto discovered. This composition, invented by Dr. WRIGHT, when introduced into the cavity of the tooth, with a light pressure, adheres tenaciously to the inside and immediately becomes as hard as the tooth itself, and, in a short time, assumes its color and polish. Persons whose teeth are black or discolored by other modes of filling, can, by the use of this composition, have their teeth restored to their natural color.
