PLAN FOR THE ESTABLISHMENT OF A STEEL INDUSTRY IN KURE BY

THE NICHIYA STEEL MFG. CO, LTD.

1. Capacity of Facilities

Planning Term	Facilities to be established	To be established or existing	Productivity per year.	Manufactured goods: Description of Products	Manufactured goods: Size (mm)
The 1st Term	Rolling Mill for Broad Hoop Iron	Bldgs...existing Machines...to be set up	150,000 ton	Broad Hoop Iron	Thickness 1-5 Width 150-400
(a)	Cold Rolling Mill for Broad Hoop Iron	Bldgs...existing Machines...to be set up	100,000 ton	Finished High Class Hoop Iron	Thickness 0.1-3 Width 150-400
The 2nd Term					
(b)	Mfg. Machine for Broad Tin-Plate	Bldgs...existing Machines...to be set up	50,000 ton	Broad Tin-Plate	Thickness 0.1-1.2 Width 150-400
(a)	Steel Mfg. Equipments	Open Furnace-Exist. Repaired Electric Furnace to be set up	200,000 ton	Steel Ingot	Various Kinds
(b)	Blooming Mill	Bldgs...existing Machines...transferred & increased	250,000 ton	Billet	"
(c)	Rolling Mill for Large Medium-Sized Hoop Iron	Bldgs...existing Machines...transferred	70,000 ton	Large Medium-Sized Hoop Iron	Thickness 0.9-3.8 Width 50-200
The 3rd Term					
(d)	For Small-Sized Hoop Iron	Bldgs...existing Machines...to be transferred	20,000 ton	Small-Sized Hoop Iron	Thickness 0.9-3.0 Width 19-50
(e)	Medium Sized Rolling Mill	Bldgs...existing Machines...to be transferred	120,000 ton	Steel Bar Steel-Sheet	Various Kind

ANNEX 16

2. Construction Term & Expected Time to Inaugurate Production.

Planned to start Construction Work in the beginning of 1950 fiscal year, and to be completed in 1954.

A four year plan is tabulated as under:

Planning Term	Description of Facilities to be constructed	Construction Term	Time to begin Production
The 1st Term	Rolling Mill for Broad Hoop Iron	From June 1950 To Nov. 1951	Dec. 1951
The 2nd Term	Cold Rolling Mill for Broad Hoop Iron Broad Tin-Plate Mfg. Facilities	From Oct. 1951 TO Mar. 1953	Apr. 1953
The 3rd Term	Steel Mfg. Facilities Blooming Mill Medium Sized Rolling Mill Rolling Mill for Large, Medium Sized. Hoop Iron Rolling Mill for Small Sized Hoop Iron	From Oct. 1952 To Mar. 1954	Apr. 1954

3. Funds Requested for the Construction Work and Source of Finance.

Funds needed for the Construction Work is amounted to ¥ 1,755,250,000 in total, which is enumerated by the constructing term and kind of facilities as follows:

(in ¥ 1,000)

Planning Term		Total Amount of Fund Need	Financed with Foreign Investment	Source of Finance	
The 1st Term	Rolling Mill & its Accessories for Broad Hoop Iron	699,000	250,000	Counterpart Fund Loan Other Borrowing	400,000 299,000
The 2nd Term	(a) Cold Rolling Mill & its Accessories for Broad Hoop Iron	233,000	120,000	Counterpard Fund	400,000
	(b) Broad Tin-Plate Mfg. Machines	237,000	230,000	Loan & others Borrowing	189,000
	(c) Accessories in General	19,000			
	Sub-total	589,000	350,000		
The 3rd Term	Steel Mfg. Facilities	117,250		Loan & other Borrowing	467,250
	Blooming Mill	189,000			
	Medium-Sized Rolling Mill	55,000			
	Rolling Mill for large, Medium-Sized Hoop Iron	44,800			
	Rolling Mill for Small-Sized Hoop Iron	28,200			
	Accessories in General	33,000			
	Sub-total	467,250			
	Grand Total	1,755,250	600,000	Counterpart Fund Loan & other Borrowing	800,000 955,250

	Total		1,404.5	"

(2) Period:

For 5 years from the date of permission for using (Extention of Period will be required when expired)

(3) Reason for Using

1. Kinds of Operations:

Our Company was refining imported crude oil and selling it with those areas west of Kansai until the surrender. After the War the total consumed amount throughout the country has reached up to about 6,000 kilo-litres monthly and about 2,000 kilo-litres consumed in this area included in the above-mentioned figure.

ANNEX 17

The Shimozu Oil Mfg. Plant has an ability of producing 7,000 barrels (1,110 kilo-litres) of Crude oil and 2,000 barrels (300 kilo-litres)of lubricating oil respectively daily, but being permitted to reopen the plan by a memorandum of GHQ the plant began to produce 3,000 barrels(490 kilo-litres) of crude oil daily from the end of March. While the Matsuyama Oil Mfg. plant has an ability of producing 2,000 barrels (300 kilo-litres) of lubricating oil daily. There is much probability that the plant be permitted to reopen before long. Our company concluded a contract for wholesale with the Union Oil Co. U.S.A. in Oct. 1949. As a result it is scheduled that more than fixed quantity of crude oil and manufactures will be supplied us.

As mentioned above, we will center the selling of a large amount of fuel oil and lubricating oil upon Kure City and bring in about 10,000 kilo-litres of fuel oil and lubricating oil monthly in the future and put in practice manufacturing, repairing and cleaning of drums and oil cans as well as carrying out the oil, whether wrapped packed in drums or not, to Chugoku and Kyushu districts by sea and land.

2. Kinds of facilities (we shall use the present facilities and use materials on hand as the greater part of necessary materials for facilities)

Heavy Oil Tanks..	12,500 kilo-litres	being applied to be used	1 tank
	12,000 kilo-litres	to be rebuilt	1 "

	100 kilo-litres	to be rebuilt	1 "
	140 kilo-litres		

Total 15,260 kilo-litres

The above are all the loading facilities and its incidental facilities, manufacturing, repairing and cleaning equipments of drums and its incidental facilities.

3. Number of employees:

Regular employees for the base .... about 60

4. Beginning of construction work and schedule:

The construction work will be started with its permission.

It will take about 3 months and about 28,900,000 yen.

(4) Company's affairs:

Capital.....	500,000,000 yen (at present)
