1. The Takata Aluminium Co., Ltd., 3200 Nirehara, Hosoiri-Mura, Nei-Gun, Toyama Ken has been placed under reparational control and custody as an aircraft factory by SCAPIN 1263, dated 11 October 1946, and subsequently given the code number, 42-5.

2. Application for the exclusion of land and buildings for Takata Aluminium Co., Ltd., is submitted for the following reasons:

a. The buildings outlined in map (attached to enclosed application) are not necessary for the preservation and maintenance of machines under reparational control and custody.

b. The buildings being of poor construction will not withstand the heavy snow of this coming winter in their present condition.

c. If these buildings are dismantled before heavy snows collapse them, practically all lumber will be saved and be put to a good use.

3. This headquarters recommends approval of subject application. Inspection of buildings, referred to in application, by personnel of this headquarters revealed that subject buildings are not required for custody and control of reparational items.

4. Reference is made to paragraph c 2, Letter AG 602-BA, Hq I Corps, subject: "Release of Equipment from Military and Naval Arsenals, Laboratories, Aircraft and Munition Plants Listed for Reparations," dated 10 July 1947.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

TOYAMA
LIAISON OFFICE

Sept. 5, 1947

SUBJECT: Recommendations on the Application for Exclusion of the Buildings of the designated Institute.
THROUGH: Commanding Officer, Toyama Mil Govt Team.
FROM : Governor of Toyama Ken.
TO : Commanding General, the 8th Army.

The written Application has already been submitted for the partial exclusion of buildings of the designated institute within Toyama Plant, Takata Aluminium Co., Ltd at 3,200 Nirehara, Hosoiri-mura, Nei-gun, Toyama Ken. as per attached list by the same company at 1-5 Minami-ikushima-cho, Sakai City, Osaka Pref. In our postscript to that application, we solicit you will assist the exclusion of these buildings from the designated custody with your special favor, taking into consideration the peculiar circumstances as stated below.

(1)

The new dinning hall and lumber mill are going to be sold to Kamioka Mining Office of the Mitsui Mining Co., Ltd, which was burned down on Jun. 14, 1947.

(2)

Although the old dining hall and the 2nd assembly plant have often been required so that they may withstand heavy snowfall, there still exists a fear of collapse in winter season because they are so brittle, and we are intending to dismantle them.

(3)

All buildings of the plant are constructed with saw -teeth style roofing on them which is most accepted in warm districts, neverthless they are located at mountain district having much snowfall, and stillworse no attention has been paid for the snowfall nor have any countermeasure been taken therefor. Thus the buildings have become brittle in general, on account of snowfall, every year.

(4)

Although the snowfall last year was very little compared with that in recent years and the repairing works had been enforced, there could still be seen some of the buildings destroyed. For this reason we admit that all the buildings except those necessary for the custody and control of designated machines and equipments are to be either sold or dismantled.

FROM : Governor of Toyama Ken.
TO : Commanding General, the 8th Army.

The written Application has already been submitted for the partial exclusion of buildings of the designated institute within Toyama Plant, Takata Aluminium Co., Ltd at 3,200 Nirehara, Hosoiri-mura, Nei-gun, Toyama Ken. as per attached list by the same company at 1-5 Minami-ikushima-cho, Sakai City, Osaka Pref. In our postscript to that application, we solicit you will assist the exclusion of these buildings from the designated custody with your special favor, taking into consideration the peculiar circumstances as stated below.

(1)
The new dinning hall and lumber mill are going to be sold to Kamioka Mining Office of the Mitsui Mining Co., Ltd, which was burned down on Jun. 14, 1947.

(2)
Although the old dining hall and the 2nd assembly plant have often been required so that they may withstand heavy snowfall, there still exists a fear of collapse in winter season because they are so brittle, and we are intending to dismantle them.

(3)
All buildings of the plant are constructed with saw -teeth style roofing on them which is most accepted in warm districts, neverthless they are located at mountain district having much snowfall, and stillworse no attention has been paid for the snowfall nor have any countermeasure been taken therefor. Thus the buildings have become brittle in general, on account of snowfall, every year.

(4)
Although the snowfall last year was very little compared with that in recent years and the repairing works had been enforced, there could still be seen some of the buildings destroyed. For this reason we admit that all the buildings except those necessary for the custody and control of designated machines and equipments are to be either sold or dismantled.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

2. We are producing such items for Occupation party and it is very hard to meet their demand by making its parts by hand or primitive method, for that reason we wish your thoughtful permission for moving out the above mentioned machineries and equipments.

3. We also are producing the house holding utensils by order of our Commerce & Industrial Dept. for releif supplies of those War damaged and evacuated families. In order to increase the durability of utensils, its surface of Aluminium must be coated by electrolysis or by the other method. With our present equipments in Sakai Factory, it is impossible to meet such demands, and so we wish an additional electrical installation.

II. In The Takada Aluminium Works Ltd. Komatsu Factory,--location, Jikata-Yokkaichi, Komatsu City, Ishikawa Pref,--- we are producing the agricultual tools mainly, and in order to increase its capacity we badly need more machineries and equipments.

THE END.
