PLATINA CEMENT

DR. ACHILLE LION, Dentist, of the Faculty of Paris, after many researches, has discovered this valuable composition, which he applies with the utmost success in stopping the teeth, and consolidating tooth-ache. The composition of the Platina Cement, which is entirely mineral, is unalterable in moist and cold climates, is hard as rock, and speedily acquires the hardness and consistency of the enamel of the tooth when in its purity. It will last for many years, not only as a preservative of the tooth, but also to render extraction unnecessary.

Apply at No. 106 Royal street, between Conti and St. Louis streets, fronting the Louisiana Bank. 19
