2. The occupation forces are doing a good job in Japan. The majority of newsworthy effort is currently being performed by Military Government Teams. It is important that this work be kept before the eyes of the American public. Timely first hand accounts by persons on the spot are of national interest.

3. To insure a more thorough and accurate news coverage of Military Government activities in the I Corps Zone the following procedure is prescribed.

a. Commanders are responsible for all information concerning Military Government activites disseminated to Japanese news media. Actual release of information will be made by the unit Civil Information Officer who will review statements and speeches prior to release. Statements will be made in the name of the commander, speeches will be credited to the person making them. The appearance of Military Government personnel, including dependents, before Japanese organizations is often construed as lending support to that organization. Background and aims of all organizations which invite speakers should be carefully investigated.

b. In any publicity attendant to the success of programs initiated and controlled by Japanese Prefectural and City Governments full credit will be given to the Japanese Agency concerned and not to Military Government Teams or personnel. Examples of such programs are: Crop Collection, Tax Collection, Land Reform, Fish and Vegetable Distribution Control and Civil Liberties.

c. The Japanese press will be continually encouraged to secure from and attribute to Japanese Prefectural officials the news pertaining to activities of the Japanese Government.

d. All features and news stories, written by Military Government Team personnel and intended for other than the Japanese press, will be released through the I Corps Public Information Office.

Operational Directive 5, this headquarters, 10 January 1947, subject as above, is amended by adding the following paragraph:

"4. Study on Land Reclamation by Yoron Kagaku Kyokai.

a. At the request of the Ministry of Agriculture and Forestry, the Yoron Kagaku Kyokai (Public Opinion Scientific Society) has arranged to carry on the study of land reclamation in Japan in all prefectures except Hokkaido. The plan for this study has been submitted to General Headquarters, Supreme Commander for theAllied Powers, and is considered to meet approved standards both as to content and method. The proposed study is considered non-political and therefore not contrary to the provisions of paragraph 2 above.

b. The purpose of the study is to examine the progress of work in land reclamation, based on the 'Five-Year Plan' instituted in September 1945, under the direction of the Land Development bureau of the Ministry of Agriculture andForestry. The results of the survey are expected to make possible new, and more accurate estimates of the amount of land which can be reclaimed within a given period, the number of households which can be settled on reclaimable land, and the amount of inter-village land which existing farming communities can reclaim.

The survey is expected to unearth specific problems which have arisen in the execution of the original plan of September 1945 and which may account for failure in some areas to make the progress expected."

SUBJECT: Inspection of Commodity Prices

TO : See Distribution

1. It has recently been brought to the attention of this headquarters that volunteer commodity price control inspectors are being orgnized in prefectures to check on posted prices on meats, vegetables, and other commodities as compared with official prices for such commodities. Where discrepancies exist the matter is to be reported to police officials.

2. In discussing the matter with inspectors in Kyoto Prefecture, it has been found, that in instances police officials fail to take punitive action against reported violators.

3. In order that the system will be effective, inspectors have been instructed to obtain specific facts to include names, addresses, dates and prices concerning violations as wéll as names of police officials to whom the reports were made and who failed to take corrective action against reported violators. This information when obtained should be presented to the military government unit concerned which whould in turn call on approprite prefectural officials to determine (a) why no corrective action was taken, and (b) to instruct them to initiate punitive action against both the merchant and the delinquent police officials. Court officials should alsobbe instructed that sentences, to include confinement, should be levied in such cases in place of inconsequential fines that have been administered in the past.

4. After convictions have been obtained extensive publicity should be arranged outlining the facts of the case. The name of the inspector should be anonymous in order that they will not incur the ill will of the police officials nor be recognized by the merchants.
