Nippon Express Co.	50

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDS NO.

CURRENT LABOR ANALYSIS

19 August 1949

Conclusion:

The labor relations situation is currently quiet. No major disputes are underway possible because radical elements have experienced several set backs in their attempts to capitablize on wage and rationalization issues. Nevertheless, economic indicators point to a continuing declining employment trend and reduced average earnings for the non-agricultural labor force while living costs are continuing their slow rise.

The indices are consistent in pointing to increasing pressure on workers' livelihood and standards of living which will only be relieved by expanding employment opportunities and increased purchasing power derived from an improved economic outlook. The use of Counterpart funds will undoubetedly contribute towards stabilizing the current situation. Present long-range public works or short-term work relief programs will only partially relieve the pressure occasioned by unemployment or under-utilization of labor force skills. Continuance of these downward trends may have serious consequences on workers welfare within the next few months and provide fertile soil for extremists, possibly leading to considerable labor unrest.
