WILLIAM W. THOMPSON'S PATENT IMPROVED LEADEN PIPES.

THE manufacturer, resuming in St. Louis, Missouri, invites the attention to the excellence of his leaden pipes made by a new and patent process, (to which he has the exclusive right to the entire district of country west and south-west of the Allegheny Mountains) of a better quality than can be produced by any other known method.

The patent pipes are remarkable for its uniformity of thickness, the accuracy of the bore, the perfect polish of the interior surface, the absence of scales and flaws, the very long length without joints, for its unusual strength—These advantages will be evident to any body upon examination.

Besides his usual sizes from one-eighth to five inch in bore, he manufactures also, for the use of farmers and others, very light leaden pipes for conducting water, of spring of long distances under slight pressure or head of water, and for other purposes.
