DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

DIGEST OF WEEKLY REPORT OF COMMUNICABLE DISEASE IN JAPAN FOR THE WEEK ENDED 2 APRIL 1949

During the fourteenth week ended 2 April 1949 there were reported 22,013 cases of communicable disease compared with 18,320 cases in the preceding week. Reports were received from all prefectures in both weeks.

The number of diphtheria cases this week (331) changed only slightly from the preceding week (323). There were 38 deaths compared with 24 last week. Current cases were approximately the same as those (339) in the fourteenth week of 1948 and less than half the number (701) in the corresponding 1947 period. The number of cases decreased from last week in 22 prefectures, increased in 19, and did not change in 5. The current and cumulative case rates were 21.6 and 24.6 respectively. The corresponding death rates were 2.5 and 2.6.

Dysentery cases this week (62) increased nearly 20 percent from last week (52). Deaths (14) were the same in both periods. The current number of cases was 55 percent greater than in the same week of last year (40) but was nearly 10 percent below the corresponding figure for 1947 (68). There were increases over last week in 17 prefectures, decreases in 11, and no change in 3. The remaining 15 prefectures had no cases in either week. Current cases were distributed among 23 prefectures, Tokyo-to having 17 cases and the other 22 prefectures from 1 to 8 cases each. The current and cumulative case rates for all Japan were 4.0 and 2.6 respectively. The corresponding death rates were 0.9 and 0.7.

There was a 7 percent decrease in the number of typhoid fever cases, from 70 last week to 65 currently. Deaths numbered 17 this week compared with 8 previously. Current cases were 7 percent less than those (70) in the same period of 1948 and 60 percent less than the figure (162) for the corresponding week of 1947. Fifteen prefectures reported fewer cases this week than last week, 12 had more, and in 4 the number did not change. The remaining 15 prefectures had no cases in either week. There were from 1 to 8 cases in each of 22 prefectures this week, and there were no cases in the other 24 prefectures. The current and cumulative case rates were 4.2 and 5.7 respectively. The corresponding death rates were 1.1 and 0.7.

The number of paratyphoid fever cases this week (23) was approximately the same as in the preceding week (22). There were 3 deaths currently compared with 2 previously. In the fourteenth weeks of 1948 and 1947 cases numbered 21 and 28 respectively. Current cases were distributed among 14 prefectures, Tokyo-to having 7 and the other 13 prefectures either 1 or 2 cases each. The current and cumulative case rates were 1.5 and 2.1 respectively. The corresponding death rates were 0.2 and 0.1.

The number of smallpox cases (2) and deaths (1) remained the same as last week. In the fourteenth week of 1948 there were no cases, but in the corresponding period of 1947 there were 4. Ehime Prefecture reported one of the current cases and the one death, and the other case was in Kanagawa Prefecture. The current and cumulative case rates were both 0.1. The corresponding death rates were 0.1 and less than 0.1 respectively.

Four typhus fever cases were reported this week compared with 1 case in the preceding week. There were no deaths in either period. In the fourteenth weeks of 1948 and 1947 cases numbered 2 and 19 respectively. Three of the current cases occurred in Miyagi Prefecture, and the other case was in Kumamoto Prefecture. The current and cumulative case rates were both 0.3. The cumulative death rate was less than 0.1.

There were 28 cases of malaria and no deaths this week compared with 22 cases and one death last week. Current cases were 45 percent of the number (62) recorded for the same week of last year and only 16 percent of the corresponding 1947 total (171). Cases this week were distributed among 15 prefectures. Shiga Prefecture reported 7 cases, and the other 14 prefectures had from 1 to 3 cases each. The current and cumulative case rates were 1.8 and 1.6 respectively. The cumulative death rate was less than 0.1.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

No Japanese "B" encephalitis cases or deaths have been reported since early March. There were no cases or deaths in the fourteenth weeks of 1948 and 1947. The cumulative case and death rates as of 2 April 1949 were both less than 0.1.

The number of scarlet fever cases this week (74) was more than 10 percent below that (83) for the preceding week. There was one death currently compared with none last week. Current cases were nearly 50 percent greater than those (50) in the corresponding week of last year and nearly twice the 1947 figure (38) for the same period. Thirteen prefectures reported fewer cases this week than last week, 12 had more cases, and the number in 6 did not change. The other 15 prefectures had no cases in either week. Nearly 40 percent of the current number of cases was in Tokyo-to (18) and Hokkaido (11). The remaining cases occurred in 21 additional prefectures where they numbered from 1 to 5 each. The current and cumulative case rates were 4.8 and 5.7 respectively. The corresponding death rates were both 0.1.

Epidemic meningitis cases this week (47) were approximately the same as in the preceding period (45). Deaths numbered 16 compared with 13 previously. The current case figure was only slightly different from that (49) for the same week of last year and was 30 percent of the corresponding 1947 total (158). The number of cases increased since last week in 12 prefectures, decreased in 7, and did not change in 4. Half (23) of the prefectures had no cases in either week. Current cases occurred in Tokyo-to (10) and in 19 additional prefectures where they numbered from 1 to 6 each. The current and cumulative case rates were 3.1 and 2.0 respectively. The corresponding death rates were 1.0 and 0.5.

There continued to be no cholera or plague.

There was an additional increase of 27 percent in measles cases, from 4,625 last week to 5,885 currently. Cases this week were more than three and a half times the number (1,636) in the fourteenth week of last year but were approximately the same as the corresponding 1947 total (5,892). Cases increased over last week in 38 prefectures and decreased in only 8. The largest numeric increases were in Shimane Prefecture (224) and Kyoto Prefecture (203). Other prefectures having large increases (from 77 to 112 cases each) were Hokkaido, Tokyo-to, Aichi, Mie, Shiga, Saga, and Kumamoto. The only large decrease was 92 cases in Wakayama Prefecture. The sum of the cases in 9 prefectures amounted to nearly 60 percent of the total number. These prefectures were: Fukuoka (603), Tokyo-to (524), Kyoto (520), Shimane (428), Hokkaido (388), Osaka (295), Hiroshima (247), Oita (242), and Saga (227). Ten additional prefectures had cases numbering from 104 to 193 each. Altogether, the 18 prefectures had nearly 85 percent of all the cases. The current and cumulative case rates for all Japan were 383.7 and 174.5 respectively.

Whooping cough cases increased 15 percent, from 1,244 last week to 1,434 currently. Cases this week were more than two and a half times those (553) in the same period of 1948 but were only approximately a third of the corresponding total for 1947 (4,116). Twenty-five prefectures had more cases this week than last week, 18 had fewer, and 2 did not change. Tokushima Prefecture reported it had no cases in either week. The current and cumulative case rates were 93.5 and 86.5 respectively.

The number of tuberculosis cases this week (9,636) was 26 percent higher than last week (7,630). Current cases were 54 percent greater than those (6,256) in the fourteenth week of last year and 68 percent above the figure (5,742) for the corresponding period of 1947. The current and cumulative case rates were 628.2 and 488.7 respectively.

There were 4 percent more cases of pneumonia this week (4,267) than there were in the preceding week (4,116). Current cases were 20 percent higher than those (3,552) in the same week of 1948 but were approximately 40 percent below the corresponding 1947 total (7,042). There were increases this week in 22 prefectures and decreases in 24. Prefectures having the largest numeric increases were Hokkaido (112 cases), Miyagi (87 cases), Niigata (69 cases), and Mie (50 cases). Aichi and Ibaraki had decreases of 70 and 56 cases respectively. The current and cumulative case rates were 278.2 and 236.5 respectively.

For the second consecutive week influenza cases increased sharply. Current cases (155) were more than 80 percent greater than last week (85). The current figure was 9 percent higher than that (142) in the same week of last year. In Osaka Prefecture cases increased from 7 last week to 88 in the current period. and

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

* These diseases are diphtheria, dysentery, typhoid fever, paratyphoid fever, smallpox, typhus fever, malaria, scarlet fever, epidemic meningitis, Japanese "B" encephalitis, cholera and plague.

** February and March 1949 and March 1948 were all 4 week periods. March 1947 was a 5 week period. Rates for 1947 are based upon the estimated population as of 1 July 1947 and for 1948 and 1949 upon the estimated population as of 1 July 1948. Comparisons of monthly data should be based upon rates rather than numbers where there are differences in period of time included or in the base population.

*** These diseases are measles, whooping cough, tuberculosis, pneumonia and irfluenza.
