PARISH OF ORLEANS—Court of Probates—The State of Louisiana.—To all whom these presents may concern,—greeting: Know ye that Samuel Herman, Senr., a resident of the city of New Orleans, has applied to me W F C Duplessis, register of wills, in and for the parish and city of New Orleans, and ex-officio clerk of the Court of Probates, in and for the parish and city of New Orleans aforesaid, for a Monition or Advertisement, in conformity to the Act of the Legislature of the State, entitled "An Act for the further assurance of titles to purchasers at Judicial Sales" approved on the 10th March 1834, and it being to me known that the said Samuel Herman, Senr, became the purchaser of the following described property by me sold on the 10th day of April, in the year of our Lord one thousand eight hundred and thirty-five, and the 59th year of the Independence of the United States of America, by virtue of and in obedience to an order from the honorable the Court of Probates in and for the parish and city of New Orleans, State of Louisiana, bearing date the 6th day of January 1835, and rendered in the suit of Charles A Jacobs and William Lambeth, assignees of certain heirs of Robert Lewis vs. Sarah P Lewis, and other heirs of said Robert Lewis, deceased; as also by virtue of a family meeting of the minor heirs of the late Robert Lewis, deceased, duly held before A Mazureau, notary public, on the 19th day of December 1834, whose deliberations have been duly homologated by the aforesaid Court of Probates on the 6th day of January 1835.

Description of the Property as given in the Judicial Transfer:—

A lot or parcel of Ground, together with the warehouse and buildings thereon, situate in Gravier street, in the suburb St Mary, in square bounded by Gravier, Carondelet, Camp and Magazine streets, measuring 100 ft 9 inches front on Gravier street, 102 feet 4 inches front on the side next to Camp st., 96 feet front on the back next to Carondelet street, and 97 feet 9 inches on the side next to Magazine street, acquired by the deceased Robert Lewis, from Wm Nott & Co. per act before G R Stringer, notary public on the 17th day of December 1827. The aforesaid described lot or parcel of Ground, together with the warehouse and buildings thereon were adjudicated to Samuel Herman, Senr., for the price of thirty thousand and one hundred dollars.

Terms of sale—6, 12, 18 and 24 months, for approved endorsed notes secured by special mortgage

Wherefore all persons who can set up any right, title or claim in and to the property herein described, in consequence of informality in the order, decree or judgment before recited and under which the sale was made, or any irregularity or illegality in the appraisements or advertisements, in time or manner of sale, or for any other cause or defect whatsoever, are hereby cited and admonished to show cause within thirty days from the publication hereof why the sale so made as aforesaid, should not be confirmed and homologated in accordance with the applications of said purchaser.

Witness my hand and the seal of said Court of Probates, this 18th day of April, A D 1835.

D. T. EVENS,

*DENTAL SURGEON,*

No. 14 CHARTRES STREET,

TAKES this method of informing his friends and the citizens of New Orleans, that he still continues the practice of Dentistry, and is at all times prepared to perform the various operations on the teeth and diseases of the gums; also, the irregularities of children's teeth; natural and artificial teeth inserted from one to a full set, on plate or otherwise as may be required; diseased teeth extracted with the least possible pain, with Mr E.'s late improved key-instrument; a diagram of which is shewn above. The advantage of this instrument over any other now in use are these, viz.—1st, the application of the spring attached to the shaft of the instrument and resting on the top of the hook, thereby preventing the possibility of its ever slipping from the tooth when applied, but when the least rotary motion is given, the tooth is loosened and drawn perpendicularly out without the aid of the forceps. From the flattering manner in which such of the faculty as have seen it, have spoken of the same and the decided advantage it has over similar instruments, he deems it useless to degress any further on its merits.

The impossibility of shewing by a draft of the instrument to be understood by all who read, he therefore respectfully invites all those desirous, to come and judge for themselves.

ICE CREAM & SHERBETS.

THE flattering patronage I was honored with, by the ladies particularly, during last summer, has induced me to select a place where, whatever be the state of the atmosphere, ladies and gentlemen may enjoy the ice creams and sherberts so sweet and salutary in the heat of summer. My establishment will not have the least appearance of a coffee house; no other beverage will be served but those fit for the most delicate lady; and it is intended as a fashionable place of resort, as those in Paris, so much frequented by the fair.

Besides ice creams and sherbets, we have selected a great variety of all sorts of syrups, such as gasons, gose berries, orangeades and all cooling fruit juices.

The establishment will be open on Sunday, 12th inst.

## MINT AT NEW ORLEANS.

*To Architects and Builders.*

PROPOSALS will be received by Martin Gordon, Esq., at New Orleans, until the 15th day of May next ensuing, for the construction of the following described building, viz:

The plan of the building consists of a centre 90 feet in front, with two wings, each 96 feet, making the whole dimensions 282 feet by 81 feet. The elevation consists of three stories resting on a sub-basement of 2 feet in height; the basement 11 feet; the Principal Story 16 feet and the third or attic story 14 feet in height. The whole to be covered with a slate roof.

FOUNDATIONS.—The foundations are to be laid on plank at the depth of 4 feet below the surface of the pavement; these planks are to be placed in a trench 6 feet in width, one layer in a longitudinal, and the other in a transverse direction closely fitted together and perfectly level throughout. The foundation walls are to be of brick work, 3 feet 4 inches in breadth, laid in the middle of the planked bottom, which is to have at least 16 inches of an offset, both inside as well as outside of the wall.

SUB-BASEMENT.—The sub-basement, or water table course, is to be of granite at least one foot on the bed, and laid in lengths from 3 feet to 8 feet. This course of stone is to be washed back from the face at least 3 inches, which is the offset to the face of the wall of the basement story. This basement is to extend along the whole front and ends, where it is to be returned at the end of the wings and under the piazzas in the rear of the building.

BASEMENT.—The brick work of the basement story is to be carried up 3 feet in thickness to the springing line of the groined arches, which is to be at least 6 feet above the level of the water table, or floor line of this story. The groin arches are to be composed of paving or hard bricks 9 inches in thickness, the rise 4 feet, and the spandrils to be filled up level with the top or crown of the arches. The entire area of this story is to be filled up with good clean gravel or sand, and flagged over with flags at least 3 inches in thickness, which flags are to form the first floor of the building throughout; the flag stones to be composed of granite or hard sand stone. The basement is to be surmounted by a belting course of granite, one foot in height, and washed back at least 3 inches on the top. It is to be 1 foot in breadth on the bottom bed, and is to extend all round the building, with a projection of 2 inches from the face of the wall of this story.

The windows are to be revealed frames, 3ft 8 by 6 feet in height, made of the best heart pine. The sash to be also of the best heart pine, three lights wide by four in height; glass, the best crown or Boston, in lights of 12 inches by 16 inches. The sills and heads of the windows to be of granite, 4 feet in length for the sill, and 5 feet for the head, the sills to be at least 10 inches in width, and 5 inches in thickness, the whole finished with outside shutters. The windows of the basement story all round the building to be guarded with iron of at least one inch square, placed in a vertical direction and 4 inches apart.

PRINCIPAL STORY.—The principal story walls to be 27 inches in thickness and carried up ten feet to the springing line of the groined arches—these arches to be 9 inches in thickness and to rise 4 feet; the spandrils to be filled up level with the crown of the arch, to receive a flag stone floor. The whole area of this story is to be flagged over with the exception of the rooms No 1, 2, 3, 4, 5 and 9, as marked in the plan of the principal story. The rooms marked 6, 7, 13, 14, 15, 34, 35, 36, 40, 41, 42, are not to be arched, but they are to be floored over and laid with boards 1 1-4 inches in thickness, and the joist are to be 4 inches by 12 inches in depth, laid 13 inches apart, they are to be of the best pine or cypress.

The windows of this story are to be made in revealed frames, 3 feet 8 inches by 8 feet in height, made of the best heart pine. The sash 3 lights in width by 4 in height, in lights of 12 inches by 22 inches of the best kind, as described in the basement story The sills and heads of the windows to be of granite as described above, the whole finished with inside shutters.

ATTIC STORY—The attic story walls are to be 18 inches in thickness, and carried up to the square of the building, or 14 feet in height to the ceiling. This story is not to be arched, but roofed with good red cypress or white pine, planed and rafted. The offices to be at least 4 inches by 12 inches at the heel, and 9 inches at the head. The girders and joist 4 inches by 14 inches to project across the piazzas and to rest upon a string piece to be laid on the cast iron columns of the piazzas. The roof is to be sheathed with good pine boards, 1 inch in thickness, well nailed into the rafters, which are not to be placed at a greater distance apart than 2 feet. There is to be a wooden cornice all round, to project 16 inches from the face of the wall, the top of which is to be covered with lead turned over the gutter pole and continued at least 18 inches under the slate of the roof.

The windows of this story are to be revealed frames, 3 feet 8 inches in width by 5 feet 6 inches in height made of the best heart pine—sash 3 lights in width by 4 in height, in lights of 12 by 14 inches of the best Boston glass; the heads and sills to be of granite, as heretofore described in the lower stories.

The floor of this story to be laid with flag stones, with the exception of Nos 29, 30, 31, 32, 33, 34, 35, 40, 41 and 42, which are to be laid with the best inch and a quarter heart pine flooring boards, tongued and grooved together.

The floors of all the halls and piazzas of each of the stories are to be laid of the best heart pine flooring boards.

DOORWAYS AND DOORS—The doorways from the passages and halls, and those communicating with the various rooms are to be four feet in width by 7 feet 6 inches in height, they are to be plain, jamb cased, with a 2 inch bead put on to receive the plastering and to form an architrave surrounding the door way. The doors are to be 3 inches in thickness, panneled with stiles of 6 inches and rails of 10 inches in breadth; they are to be furnished with the best American mortised locks and butt hinges.

The doors of all the vaults and fire proof closets are to be double and let into a stone sill and head well clamped into the halls. Their dimensions to be 2 ft 8 inches in width by 6 ft 6 inches in height, plain panelled in wrought iron, 8-4 of an inch in thickness.

COLUMNS OF THE PIAZZAS—The columns of the piazzas for each story are to be of cast iron 10 inches in diameter, with a cap and base; their height, of course must correspond with the elevation of each floor from story to story.

COINS OR PILASTERS—Each angle of the building is to contain a pilaster of granite, 2 feet 9 inches on each face, extending from the belting course to the under side of the architrave of the building, which is 24 feet above this course. The pilasters are to have plain moulded capitals of 18 inches in depth, and the body of the pilaster is to project 3 inches from the face of the building when rough cast. These pilasters are to be laid in courses of 12 or 20 inches in height and at least one foot on the bed, breaking joint alternately in the centre of each face.

FRONT PORTICO AND STEPS—There are to be 4 columns of 3 ft in diameter in front of the centre building; these are to be flanked by Antae, or pilasters, of 2 ft 9 inches square, showing a single faced pilaster towards the columns. These columns are to be made of brick and rough cast, having stone bases and capitals of the Ionic order. The whole depth of the portico from the line of the street, containing behind the check blocks upon which the columns and Antae rest, a flight of granite steps leading from the pavement to the floor of the principal story. These steps to be 8 feet each in length in the clear, having a bearing upon the wall of the basement and upon the check block of at least 9 inches. They are to be 7 1-2 inches rise and a foot on the tread, leading to a platform which is to be upon a level with the floor of the principal story, and as wide as the main entry, which is 12 feet. The architrave is to be of granite, 3 feet 2 inches in height by 2 feet 9 inches in width; extending across the whole front of the portico, breaking joint over the centre of each column; the friezo to be constructed with brickwork and the cornice of wood. The portico to be covered on a level with the cornice, with a flat roof of lead or zinc.

ROOF, GUTTERS & CONDUCTORS—The roof is to be covered with the best milled Welsh slate, laid in courses of at least 14 inches. The eave and valley gutters to be of lead, 2 feet 10 inches in width; the eave pipes of lead, the conductors of 5 inch cast iron pipes, of which there are to be 8 in number, 4 in front and four in the rear of the building at the inner angles of the piazzas; to be covered with lead.

INTERIOR STAIRS—There are to be two flights of interior stairways of stone, and two of wood. One in the hall or centre of the building and one on the extreme ends of the wings, these are to be of stone. The centre flight of steps to be 5 feet in width, each step to be 7 1-2 inches rise by 1 foot in the tread; each flight, from the basement to the attic story is to be furnished with iron balusters at least 1 inch square, and a hand rail of mahogany, 5 inches in diameter. The wooden flights are to be constructed from the basement story to the rolling room, and from the rolling room to the drawing and cutting room in the attic story, and from thence into the garret or roof of the centre building.

Over the central flight of stairs leading to the attic story there is to be a sky light of 16 feet square, formed on the ridge of the roof to give light and ventilation to the halls of the principal and attic stories, this sky light to be formed of thick glass plate on each side of the ridge of the roof of the centre building.

PLASTERING—The whole of the interior of the building is to be plastered with three coats of plain plaster, with plain cornices at the ceilings of the principal and attic stories; a centre piece or rosette is to be formed in the centre of the hall opposite the central stair way, for the purpose of hanging a lamp or chandelier in each of the stories. The ceiling of the piazzas of each story is to be plastered with three coats of plain plastering.

that of the granite used in the building of the portico and pilasters.

PAINTING AND GLAZING—All the wood work of every description as well as the iron work, is to be painted with three coats of paint of the best white lead, and all the sash are to be glazed with the best glass; the front windows to be glazed with the best English crown glass, and those of the rear in the wings and under the piazzas, of best Boston glass; all the sash to be well bedded in putty and painted with 3 coats of white lead.

IRON RAILING—The whole lot upon which the building is to be erected is to be enclosed with a dwarf wall and iron railing. The dwarf wall is to be composed of granite 2 feet in height by 14 inches in thickness, which is to support an iron rail let into the stone of 5 feet in height. This rail is to be of wrought iron, round, and 1 inch in diameter by 5 feet in height, with a plain spear head above the top rail, which is to be 3 inches in breadth by 3-4 of an inch in thickness.—There are to be two gateways formed of wrought iron, 8 feet in width on the ends of the building, opposite to the passage through the basement story; these gates are to have stone sills of the breadth or thickness of the dwarf wall, and are to be laid flush with the top of the pavement of the street. This railing is to be painted with three coats of paint.

All the scaffolding and hoisting machinery is to be found by the contractor, and no charge whatever is to be made for jobbing in the final completion of the work in every particular, according to the plans and elevations of the building.

The whole of the workmanship is to be done in the most substantial manner and of the best materials, and in accordance with the designs and delineations referred to below, and to be completed within a period not exceeding 12 months from the time of the acceptance of the proposals being communicated to the party whose offer shall have been preferred. Every person making proposals will specify the time within which he will contract to execute the work.

Bonds with sureties satisfactory to the commissioner will be required for the fulfilment of the contract in all particulars.

Payments will be made by the commissioner on behalf of the United States, on account of materials delivered and work executed, in the proportion of three fourths of the estimated value thereof. The balance to be paid when the work shall have been completed.

The requisite designs and elevations of the building, with a delineation of the several stories may be seen at the mint in Philadelphia; at New York in the hands of the hon C P Waine, and at New Orleans in the hands of the commissioner. The several apartments in each story are numerically designated for the ease of reference. To these designations the various numbers above specified have respect.

The proposals are to be sealed and directed to Martin Gordon Esq commissioner of the branch mint, New Orleans.
