GARLEPIED & CO.

Braziers, Pump-makers, Water-engine-makers, and Mechanicians, Conde street: No. 48, between Hospital and St. Philipp streets:—

HAVE the honor to inform the Planters of Louisiana that they make all kinds of kettles; sugar-kettles; cooking kettles, refining kettles; lamps; spoons and sugar skimmers, etc. etc.

They have bought from France the last mode of making the apparatus for distilling, which has been perfected by the best distillers, such as Derone, Baglioni, Derosie, Zie. Adam, Bernard, etc. etc.

They are themselves the inventors and proprietors of a new apparatus for distillers, which though not so expeditious as that of Derone and Baglioni, offers to the distillers of Rum and Tafia, the same results as to quantity, quality, and for the rectification of alcohol, there is greater security in the working of it without the constant care which other apparatus indispensably require. They make all kinds of alembics, such as centre, chaptal, balm, etc. etc.

They are also the inventors and proprietors of a new rectifying still, giving two results at one, in the same space of time.

For the kettles, distilling apparatus, and alembics, they will put them up, and see them go into operation and give instructions therefor, until those who have the care of them are sufficiently instructed.

They will make all kinds of pumps, such as fire pumps, carriages mounted, aspirant well-pumps, Feculantera and elevatory (English sucs,) vorgacion pumps, throwing a great deal of water with a very little force; in consequence of these pumps being without pistons or any kind of friction, they cannot easily be deranged. They are constructed in the same manner to pump up sirup, or any other boiling liquid. There is nothing omitted to make them serviceable, and their solidity is guaranteed against all derangements.

They also make wash-bottles or inodorous valve hydrolics, which do not let evaporate any odor, the feculent matter being retained for a month or more.

They also make filtering-stones, which purifies in a very short space of time a sufficient quantity of water without the intermixture of any strange body. And likewise, beer kettles, tainted kettles, tallow kettles, wax kettles, boilers with three cylinders, do, with furnaces, all kinds of bathing establishment for public and private houses; kitchen utensils of copper and iron; covering for houses; troughs; tunnels, and cocks to furnish water throughout a house, the same as established in all the great hospitals in Bordeaux.

They charge themselves with repairing all kinds of kettles coverings of all kinds of pieces and with the fabrication of every thing that can be made of copper, iron, and zinc.

The moderate prices they charge, and the solidity and superior workmanship of every thing that comes out of their shop, assures them that satisfaction will be given to all who may favor them with their confidence. sept 9
