What you can do

Find contacts in your region

Find your counterparts – Wikimedia affiliates or ICH coordinators – and explore **Ideas for activities** together.

Can you help organize a Wiki Loves Living Heritage Bazaar in your region?

Explore inventories and elements

See pages for heritage elements on the **UNESCO Lists and registers** of Intangible Cultural Heritage, the locally maintained **inventories** as well as **country** pages that feature all of these plus elements that have been nominated by the editors.

Add translations and images

At the end of each list page, you find grey boxes with tasks that you can do. Choose the **simple tasks** to translate inventory or heritage element names and descriptions to your language and to add missing images.

Help to add your inventory

Learn about the benefits of opening content on Wikimedia projects and read the FAQ for safeguarding organizations.

Once you are convinced, the article **How to import an inventory** will guide you further.

Hack for living heritage

Learn what it takes to import an inventory.

How to feature a heritage element you like.

Join us at the **hackathon** at Wikimania!
