DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Some of the things Tokai-Hokuriku Civil Affairs Region would like to see covered in monthly activities report for January. 1951.

It should be pointed out that there are no special requirements Tokai-Hokuriku Civil Affairs Region has placed on information to be contained in Kencho Welfare Section Monthly Activities reports. In fact it has been pointed out to Welfare officials in each ken in this Region that what is put into the report is entirely up to them. The only advice was to keep the report brief and put in only information the section chief considers important.

Evidently what is considered important by the welfare chief is somewhat at variance with what is considered important by Tokai-Hokuriku Civil Affairs Region, because the reports contain some statistics on Child Welfare and Social Insurance, and little else. For example:

A. Public Assistance, which is considered the most important program in Public Welfare is dismissed in one sentence, stating the increase in number of persons assisted and expenditures this reporting period over last reporting period. There is no breakdown of reasons why 600 more people required assistance, ie: unemployment, widows with children, illness of family head, etc. while the amount of increase or decrease is interesting and needed information, it is of little valve either to Tokai-Hokuriku Civil Affairs Region or to the Kencho officials concerned unless the reason for the increase or decrease is known, and something is known about the types of families or individuals who are being forced to apply for aid, and why a large number (600 persons) suddenly found themselves faced with the necessity of applying for Public Assistance. while this information is of valve to Tokai-Hokuriku Civil Affairs Region it is not for our purposes alone that such information is requested. It is felt that it is the type of information Kencho welfare officials would want to know themselves so they could better analyse trends in their program, make plans for budget and staff needs in light of increasing or decreasing case load, and most important of all, know what is happening and why it is happening to the people in communities whose welfare they are responsible for.

Generally the same things can be said for the second section of the report; Administrative Review. The report says simply that a town, a district and 33 other communities were reviewed and that generally the results were good, and where not good were corrected. Nothing is said about the types of errors found and what means are being taken to correct these errors. If deficiencies are found the staff must have been

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

dificient. Such deficiency can only be corrected by supervision and training. If the types of deficiencies were discussed briefly and the steps the Kencho is taking to raise the standards of work and decrease deficiencies were noted, this section of the report would have some valve both to Tokai-Hokuriku Civil Affairs Region and to the Kencho welfare officials responsible for the supervision and training and improvement of eficiency of operations of gun and machi.

Child Welfare has and Social Insurance is covered by some interesting statistics, and while a paragraph or two analyzing these statistics and describing trends in the over all program would be of valve, the report is adequate as it stands.

There is no mention anywhere about Administrative Organization, and this should be the body of the report. Under this section comes all the important work of the welfare department. What problems are being encountered in carrying out new laws, such as the S.W.S. law? For example how many Social Welfare Secretaries have been hired; how many have been reclassified and remained on the same job they have always done; what problems have been met in securing budget for additional staff, where are additional staff needed, and why; what is the ken doing about analyzing the needs of the staff (results of administrative reviews) and providing training and supervision to meet the needs of the staff; what generaly administrative changes are needed and being planned in all welfare programs.

If there are no plans, no problems, and nothing is going on in the field of administration, then nothing need he said in the report. But a welfare administration in which there are no problems and nothing is needed to improve the administration, is inconceivable, and the Bucho who has such a sound administration is to be envied indeed.

It is not intended that the monthly activities report should go into lengthy details and be long and complex. A listing of problems met, plans made,and in the process of being carried out; brief analysis of trends, new procedures adopted, and otherwise truly important things of an administrative nature, take only a brief paragraph devoted to each such iterm, and would go far helping the Bucho to keep his thinking clear and complete on matters pertaining to his own program, and he of assistance to this office and both higher headquarters and the ministry with whom higher headquarters shares responsibility for a sound welfare program in Japan.
