11. Desired items for the settlement of bottlenecks now confronting to the present status and future development of this plant.

a. Originally by SCAP memorandum our plant was established for the purpose of melting the scrapped war implements scattered on the spot (Kure Naval Arsenal and neibourhood). But owing to the stringent shortage of scraps in this country, these scraps are now carrying away by the steel makers in other areas. If this circumstances continue in future, our priority of establishment of plants in this city will be lost. Accordingly we wish your kind attention for the reserve of 6,000 tons scraps in minimum which are needed for the running of plants for 6 months to come.

b. Approximately 300 workers who are engaged in the dissection and cutting of scraps (those workers were originally engaged in the custody, maintenance and transportation of reparations machines) have lost their jobs to do and in view of their efficiency are impossible to transfer them to other industrial departments and we fear the dismissal of them are unavoidable. If we are appointed as the contractor of operations of dissection and cutting of destroyed buildings now in question by the Finance Ministry, we will be able to solve the question of dismissal of these workers for the time being and also will be able to solve the question of reserve of scraps mentioned in the above column (a).

c. Owing to the unfavorable electric circumstances we have changed our leading business from the steel making by the electric furnaces to the casting department two years ago and also hereafter will strive the enlargement of this department both in workers and output. But due to the severe production competition of castings, we will have to realize the rationalization to a considerable degree.

d. We have the plan to advance from the making of castings themselves to the machining and assembling of them in future.

e. By the above reasons, we hope the earliest approval for the permission of temporary use of 135 reparations machines for which we have applied the petition on 20 March 1950 through Finance Ministry (Kure Finance Bureau Letter No. 341 dated 18 April 1950).
