

Enclosure No. 2 to Despatch No. 1341
dated June 6, 1938, from the American
Embassy, Moscow, U.S.S.R.

Moscow, November 8, 1937.

Memorandum for Mr. Chipman, Mr. Durbrow, and the
Economic Section:

Will you please assign someone, such as Mr.
Shiffer, to procure certain data for me. I will
want to talk to him and to you after you have
examined the memorandum.

What I desire to do is obtain accurate facts
upon which I can base a perspective survey of various
phases of the activities and developments of the Soviet
Union in comparison with other countries and in com-
parison with conditions in 1928 and conditions now.

The data can be procured, I take it, from the
published statistical sources of the Soviet Union,
and then for purposes of comparison perhaps we could
use either the London TIMES Almanac or the New York
TIMES Almanac.

The following are some of the questions which
I want answered:

I

GENERAL AND POPULATION

1. Area of USSR compared to the American Continent north
of the Panama Canal.

Area of the U.S.S.R.	8,195,000 square miles
---------------------------	------------------------

Area of American Continent north of Panama Canal ...	8,000,000	"	"
---	-----------	---	---

Area of American Continent including all of Panama ...	8,002,687	"	"
---	-----------	---	---

Area of the U.S.A. exclud- ing possessions	2,973,776	"	"
---	-----------	---	---

2. Distance of most remote part of Russia from Moscow and what point a similar distance would strike in the United States west from Moscow.

Distance of most remote part
of the U.S.S.R. from Moscow -

Moscow to the Kamchatka
Peninsular approximately 5,000 miles

A similar distance to the West
from Moscow would reach a point
just north of Portland, Maine.

3. Latest census figures as to population.

Population of the U.S.S.R.
(latest estimate Jan. 1, 1933) 165,700,000

4. Density of population per square mile in comparison with United States and European countries.

Density of population of the
U.S.S.R. (1933) 12.5 per sq. mile

Density of population of
U.S.A. (1930) 41 per sq. mile

Density of population of
European countries:

England	668	per	sq.	mile
Germany	363	"	"	"
Italy	355	"	"	"
France	197	"	"	"

5. Rate of birth increase and actual birth increase in U.S.S.R. in contrast with other European countries.

Rate of birth increase in the U.S.S.R.
(no complete statistics are published
regarding the birth rate in the U.S.S.R.
However, an article in IZVESTIYA on May 14,
1937, stated that the birth rate in Ukraine,
which has the largest birth rate amounted
to about 23, therefore, the rate for the
country is most likely about 20 per 1000)

.....	20	per	1000
France (1934)	16.1	"	"
England (1935)	17.8	"	"
Italy (1935)	23.3	"	"
Germany (1935)	18.9	"	"

6. Latitude

6. Latitude of Moscow and Black Sea in comparison with Labrador and Philadelphia.

Latitude of Moscow	- $55^{\circ}45'20''$ (southern tip of Alaska)
Latitude of Odessa (Black Sea)	- $46^{\circ}28'37''$ (New York City)
Latitude of Labrador (Southern Boundary)	- 52° (about Kiev)
Latitude of Philadelphia	- $39^{\circ}58'2''$ (south of Batumi).

7. Number of constituent republics.

The U.S.S.R. is composed of 11 constituent republics.

8. Number of different nationalities.

There are about 180 different nationalities in the U.S.S.R.

9. Number of different languages.

Approximately 150 different languages or dialects are spoken in the country.

10. Number of Jews in the population and percentage thereof.

There are approximately 2,600,900 Jews in the country. They compose about 1.8 percent of total population.

II

NATURAL RESOURCES

1. Brief survey of the principal natural resources.

Natural Resources of Certain Principal Minerals in the U.S.S.R. as of 1956

1. Iron ore	10.6 billion tons
2. Manganese ore ...	about 560,000,000 tons
3. Chromium	13,750,000 tons (developed about 1,000,000 tons)
4. Copper	9,400,000 tons
5. Lead and zinc ores	about 20,000,000 tons
6. Tin reserves are very negligible	
7. Nickel (metal) ..	about 36,000 tons
8. Coal, total reserves of which developed	1,654,361 million tons 131,299 million tons
9. Petroleum, total estimated reserves of which	3,877,000,000 tons 232,620,000 tons positive or probable reserves.

III

INDUSTRIAL DEVELOPMENT

1. Total fixed capital investment in industrial development since 1928.

Total fixed capital investment in industrial development during the period of 1929-1936 (inclusive) amounted to 70,856,000,000 rubles (not in rubles of 1926/27 value)

2. Total industrial output in 1936 in contrast with 1928.

Total industrial output in 1936 in contrast with 1928 (only large-scale industry).
(in rubles of 1926/27 value)

1928 - 16,860,000 rubles

1936 - 80,800,000 rubles.

3. Comparison of total industrial output with other countries of the world.

Comparison

Comparison of the Production of Basic
Industries in the U.S.S.R. in 1928 and
1936 With the Production of these Products
in Leading Industrial Countries in 1935

(In gross tons or barrels)

Countries	Year	Coal	Pig iron	Steel	Pétrolium (barrels)	Iron ore
U.S.S.R.	1928	33,960,792	3,229,808	4,038,336	-	5,271,288
	1936	114,981,975	14,169,600	16,068,720	176,700,000 (1935)	27,490,894
U.S.A.	1935	420,327,000	21,373,000	34,093,000	993,900,000	30,484,000
England	1935	222,520,000	6,426,000	9,842,000	-	10,895,385
Germany	1935	140,714,000	12,144,538	15,589,000	-	5,947,000
France	1935	45,476,000	3,573,000	3,187,000	-	31,600,000
Venezuela	1935	-	-	-	149,100,000	-
Rumania	1935	-	-	-	61,400,000	-

4. Steel industry:

a. Volume of production.

Volume of production (in metric tons)

	<u>1928</u>	<u>1937</u>
Pig iron	3,282,300	14,550,000
Steel	4,250,900	17,800,000
Rolled products	3,408,400	12,900,000

b. Where located:

The steel industry is concentrated in the main in the Ukrainian Republic (Dnepropetrovsk, Zaporozhe), Urals (Sverdlovsk), and Western Siberia. A comparatively small number of blast furnaces and steel mills is also located in the central part of the Soviet Union (Moscow, Gorki).

c. Comparison

c. Comparison of increase.

(See above)

d. Number of employees of industry and principal individual units.

Number of employees in 1928 - 194,500

as of January 1, 1936 - 318,467.

5. Machine tools:

a. Volume of production.

1928 - 1,738 units

1936 - 32,408 units

b. Where located.

The machine tool industry is concentrated in Moscow, Leningrad, Kharkov, Sverdlovsk (Urals).

c. Comparison of increase.

(See above).

d. Number of employees of industry and principal individual units.

Number of employees is not indicated separately but is shown together with the number of employees of general machine building industry.

6. Tractors:

a. Volume of production.

1928 - 1,272 units

1936 - 115,595 units.

b. Where located.

The tractor industry is located in Kharkov, Chelyabinsk (Urals), and Stalingrad.

c. Comparison

c. Comparison of increase.

(See above).

7. Agricultural Machinery:

a. Volume of production.

	<u>1928</u>	<u>1936</u>
Tractor ploughs	7,190	82,300
Combines	None	42,500
Sowing machines (tractor driven)	2,799	72,500

b. Where located.

The agricultural machine building industry is located in Rostov, Moscow, Kharkov, Saratov, Gorki.

c. Comparison of increase.

(See above).

8. Electrical equipment:

a. Volume of production.

	<u>1928</u>	<u>1936</u>
(in thousands of kilowatts)		
Electric generators	92,600	744,000
Power transformers (kwa)	403,200	3,203,000
Electric motors	343,200	1,652,900

b. Where located.

The electrical equipment industry is located in Moscow, Kharkov, Leningrad, Sverdlovsk.

c. Comparison of increase.

(See above)

9. Manufacture

9. Manufacture of clothing.

a. Volume of production.

	<u>1928</u> (in meters)	<u>1936</u>
Cotton cloth	2,870,693,000	3,256,700,000
Woolen cloth	84,292,000	98,100,000
Silk and artificial silk cloth	10,293,000	51,220,000

b. Where located.

The manufacture of clothing is located
in Moscow, Ivanovo-Voznesensk, Leningrad,
Barnaul (Kazakhstan).

c. Comparison of increase.

(See above)

d. Number of employees of industry and principal
individual units.

	<u>1928</u> (as of Jan. 1)	<u>1936</u>
Cotton textile	512,200	448,338
Woolen textile	68,500	68,931
Silk textile	not available	not available

10. Rubber and automobile tires.

a. Volume of production.

	<u>1928</u> (in metric tons)	<u>1936</u>
Artificial rubber	none	25,589 (in 1935)
Automobile tires (units)	82,000	2,197,800

b. Where located.

The rubber and automobile tires industry
is located in Moscow, Leningrad, Yaroslavl,
and Voronezh.

c. Comparison

c. Comparison of increase.

(See above)

11. Automobiles.

a. Volume of production.

	<u>1928</u>	<u>1936</u>
(all trucks)	671	136,572

b. Where located.

The automobile industry is located in
Moscow, Gorki, and Yaroslavl.

c. Comparison of increase.

(See above)

12. Telephone lines.

a. Volume of production.

Kilometers of telephone and telegraph
lines put in operation

1928 - 40,200 (total kilometers in
operation 886,000)

1936 - 125,200 (total kilometers in
operation 2,150,000)

13. Coal.

a. Volume of production.

1928 1936
(in metric tons)

35,510,000 126,001,800

b. Where located.

The coal industry is located in Don Basin,
Kuznetsk (Siberia), and Moscow.

c. Comparison of increase.

(See above)

d. Number of employees of industry and principal
individual units.

As of Jan. 1, 1928 - 253,500
 1936 - 427,570

14. Electric

14. Electric power.

a. Volume of production.

1928 - 5,007,000,000 kwh.

1936 - 33,000,000,000 kwh.

b. Where located.

Largest hydro-electrical plants are located on Dnepr, Svir, and Volkhov (Leningrad).

c. Comparison of increase.

(See above)

d. Number of employees of industry and principal individual units.

1928 - 19,000

As of Jan. 1, 1936 - 57,257

15. Aluminum production.

a. Volume of production.

1928 - none

1936 - 36,000 metric tons.

b. Where located.

The aluminum industry is located in Zaporozhe, Urals, Leningrad (Volkhov).

c. Comparison of increase.

(See above)

IV. TRANSPORTATION

IV.

TRANSPORTATION AND COMMUNICATION

1. Telephone lines.

a. Comparisons of 1928 and 1936; also comparison with other countries.

<u>Country</u>	<u>Year</u>	<u>Total length of telephone lines (in miles)</u>
	1928	556,100
U.S.S.R.	---	-----
	1936	1,343,750
U.S.A.	1936	79,373,000
England	1936	11,111,851
Germany	1936	16,162,767
France	1936	5,155,051

2. Railroads.

a. Pre-war - 1917, 1928, and 1936, with number of miles per population.

<u>Year</u>	<u>Total length of railroads (in kilometers)</u>
1917	68,760
1928	76,887
1936	85,400

Approximately 5 kilometers per every 10,000 of population.

3. Canals.

a. Principal facts with reference thereto.

Until 1934 there existed in the U.S.S.R. 3 waterway systems (canals): Mariinski, Tikhvinski, and Vyshnevolotski, with a total

length

length of 5,730 kilometers. In 1933-34 the White Sea-Baltic Canal totalling 227 kilometers was put into operation, while in 1937 the Moscow-Volga Canal totalling 128 kilometers was completed.

Thus the total length of canals introduced after 1917 amounts to 355 kilometers.

b. Total length of waterways.

Total length of inland waterways was in
1936 - 92,700 kilometers.

c. Comparison 1917 and 1936.

1917 - 72,000 kilometers
1936 - 92,700 kilometers

4. Airways.

a. Number of miles and significant facts.

The extension of air lines:

1929 - 15,426 kilometers
1936 - 52,020 kilometers

Number of airplane-kilometers covered:

1929 - 3,207,400
1936 - 56,432,000

Metric tons carried:

1929 - 1,068.7
1936 - 60,592.0

5. Roads

a. Number of miles and significant facts.

In 1935 there were artificial (gravel, concrete, stone, et cetera) roads and highways

totalling

totalling 44,335 kilometers as compared to 15,000 in 1917.

The above figure for 1935 includes:

Gravel roads	- 10,979 kilometers
Stone roads	- 13,706 "
Crushed stone highways	- 16,498 "
Asphalt highways	- 1,062 "
High-class concrete highways	- 140 "

6. Radios.

Significant facts.

Number of telegraph-telephone service transmitters:

1928 - 65

1936 - 273

Number of radio broadcasting stations:

1928 - 23

1936 - 78

Number of radio receiving sets in operation in

1936 - 350,000.

V.

LIVING CONDITIONS

1. Facts as to housing.

Living quarters in cities
(in square meters)

1928 - 166,900,000.

1936 - 204,380,000.

2. Clothing

2. Clothing production, increases therein.

Production of clothing
(in meters)

	<u>1928</u>	<u>1936</u>
Cotton cloth	2,870,693,000	3,256,700,000
Woolen cloth	84,292,000	98,100,000
Silk and artificial silk fabrics	10,295,000	51,220,000

3. Production in the food industries, increases
therein.

Production of food industry
(in rubles of 1926-27)

1928	3,686,000,000
1936	9,810,000,000

VI.

EDUCATION

1. Illiteracy - percentage pre-war and latest available
figures.

1913 - 67 percent of the population

1937 - it is asserted that practically
illiteracy has been altogether
eliminated.

2. Number of elementary schools.

1914 - 106,400

1936 - 164,100

3. Number of colleges and higher technical schools.

1915 - 91

1936 - 592

4. Average number of years required for elementary and
university training.

Elementary training - 10 years.

University training - 5 years.

5. Number

5. Number of teachers to students.

In 1935 (the latest available figure)

one teacher per every 33 students.

6. Population attending schools.

28,842,000 in 1936.

7. Number of books published annually in contrast
to other countries.

Number of books published annually
in the U.S.S.R.

1913 - 26,174 titles - 86,700,000 copies

1936 - 43,348 " - 571,000,000 "
(mostly political and technical books).

8. Access to kindergartens, creches, manual training.

1,029,700 children attended kindergartens in 1936.

No information on creches.

In 1935 there were 1,712 schools for manual train-
ing with a total number of students - 246,288.

VII. AGRICULTURE.

VII.

AGRICULTURE

1. Percentage of population engaged in agriculture.

About 65 or 70 percent.

2. Total area under cultivation.

In 1937 about 367,170,949 acres.

3. Comparisons of productivity and volume of area since 1928.

Cereal Crop for 1937

The latest data on this year's cereal crop that have come to my attention are contained in an article in the BOLSHEVIK, No. 21, November 7, 1937, by D. Lure. The first definite preliminary estimate to appear on the subject was in the Moscow PRAVDA, No. 289, of October 19, 1937, which gave the same figure as Lure. The total crop is estimated to be 6.8 billion poods or approximately 111,384,000 metric tons.

According to Lure last year's crop was particularly small because of "unfavorable climatic conditions in the entire southeastern part of the U.S.S.R."

The size of the cereal crop of 1936 has never been officially revealed. However, as reported in the Riga Legation's despatch No. 600, of May 26, 1937, certain fragmentary information on yields per hectare has made it possible roughly to estimate the 1936 crop as between 76.8 million and 82.8 million tons.

4. Grain.

- a. Actual volume compared with world grain production; also comparison with 1928 with different grains set forth and volumes of production with reference to the United States, compared both in area and amount.

	Soviet Union			
	Grain			
	(In millions of metric tons)		Wheat only	
	Total grain		Biological	Actual
	crop	crop	crop	crop
1913 (old figures)	-	94.1	-	30.6
1913 (new figures)	-	80.1*	-	no data
1933	89.8	72.0	27.7	19.6
1934	89.4	77.0	30.4	24.0
1935	90.1	81.0	30.8	26.7
1936 Between 76.8-82.8**	-	-	-	-
1937	111.3***	-	-	-

* Figures given in all Soviet statistical sources published subsequent to 1933.

** Only fragmentary data on yields and acreage have been published. Because of climatic conditions 1936 was a bad crop year in respect of grains.

*** Preliminary estimate.
