BASIC: Ltr, Hq 24th Infantry Division, APO 24, subj: "Control of Prostitution and Veneral Disease" dtd 5 Jun 48, cont'd.

6. Area commanders will take appropriate steps to publicize rules and regulations issued, among the Japanese to insure knowledge by potential violators of the regulations they are expected to obey.

7. Where trial by provost court is directed, the provost court will note that the consensus of judicial opinion among provost court judges generally is that, in normal cases, a sentence to confinement in the case of a veneral disease contact accomplishes less than a reprimand or suspended sentence combined with firm arrangements for adequate medical treatment.

8. If not tried by provost court, an infected contact may be arrested, booked and photographed by the Japanese Police and given treatment in accordance with circular 33, Headquarters Eighth Army, dtd 26 May 1948, and upon completion of such treatment, may be reprimanded and warned that she now has a police record and that any further crime will be punished severely. Copies of the police record in such cases will be forwarded to area provost marshals concerned.

AG 726.1-G

SUBJECT: Reduction, Separation from the Service, and Punishment related to Venereal Disease.

TO : Commanding Officers, Organic and attached Units.

1. Reference: Messageform, Headquarters Eighth Army, subject: "Venereal Disease", dtd 14 June 1948, file number AGDH 726.1.

2. Punishment is not authorized for contraction of venereal disease (Par 23 F (2) AR 40-210).

3. Failure to report contraction of venereal disease may be punished but only upon competent proof of the following facts:

a. That accused was infected with a venereal disease.

b. That symptoms existed and were of such a nature that the accused, or any reasonably prudent man, should have recognized the presence of a disease. (Medical Officer's testimony)

c. That the accused failed to report the existance of such symptoms.

d. That accused had received instructions of a nature which should acquaint the ordinary soldier with the symptoms of venereal disease.

(NOTE: The essence of the offense is that a soldier, knowing he may have a venereal disease, fails to report it. Venereal disease is contagious and an active, untreated case constitutes a menace to the health of these with whom the infected man associates. He is not being punished for contracting the disease but for knowingly and wilfully endangering the health of his accociates).

4. Reduction of Noncommissioned Officers:

a. The reduction of a noncommissioned officer solely for the contraction of one or two cases of venereal disease is of doubtful validity under present Department of the Army policy.

b. When a noncommissioned officer contracts venereal disease, his commander will carefully and thoroughly inquire into his record, manner of performance of duty, and further will determine whether or not the man conducts his provate life in such a manner which tends to undermine discipline and respect for command. If such inquiry discloses facts which, in addition to the contraction of venereal disease, indicate that the noncommissioned officer lacks the necessary qualifications for leadership and has failed to set a proper example for his subordinates and associates in the service, reference to a reduction board is warranted.

c. The contraction of two new cases of vernereal disease will warrant the reduction of a noncommissioned officer unless his efficiency, performance of duty and personal conduct, other than as evidenced by the disease, is outstanding.

5. Separation Pursuant to AR 615-368 and 615-369:

a. The contraction of one or two new cases of venereal disease is not alone sufficient to warrant discharge under the above cited Army Regulation: Contraction of vernereal disease is, however, strong evidence of undesirability. Nevertheless, additional evidence must be adduced to insure that upon review, the proceedings will not be disapproved. Such additional evidence may consist of repeated disciplinary infractions (whether supported by conviction by court-martial, punishment under AW 104, or not), habitual intemperance, or recurrent

instances of other personal misconduct which effects detrimentally the perfermance of duty and usefulness to the service of the person concerned.

b. When discharge is recommended pursuant to AR 615-368, the board report must contain evidence of rehabilitation attempts.

c. Discharge under AR 615-369 may be supported by the reasons cited in "a" above and the alternate reason that the soldier concerned cannot abserb further military training. The test as to the applicability of AR 615-368 or 615-369 is the gracity of the undesirable conduct involved, and the fairness of separating the soldier as undesirable. War Department Circular 93, 1947 series states the applicable policy and will be followed in this command as modified by reference, paragraph 1 hereof.

6. Punishment for Offenses Incidental to the Contraction of Venereal Disease:

a. Frequently, investigation will disclose that a soldier at the time he contracted a venereal disease had committed an offense punishable under the Articles of War. Such offerse may be a violation of standing orders, wrongful disposition of government property, or a similar crime. When the viclation of an Article of War is capable of proof, a noncommissioned officer or private first class may be tried and if found guilty sentenced to be reduced to the grade of private, in addition to other appropriate punishment.

b. In investigating contraction of venereal disease, the restrictions set out in Article of War 24 will be strictly adhered to.

7. Board Proceedings:

a. Boards will be conducted and reported according to AR 420-5. The members of the board will make full inquiry into the subject soldier's qualifications and fitness for the Service and will faithfully report all of the testimony received. Boards are cautioned that their proceedings are reviewed by various agencies and that failure to incorporate in their written report all essential information upon which they base their findings may result in reversal or injustice to the government or the soldier concerned.

JUN 18 1948 08 31

HEADQUARTERS, CAMP HAKATA
FUKUOKA, KYUSHU, JAPAN
APO 24

11 June 1948

SUBJECT: June Meeting of Area VD Council Meeting

TO : Commanding General
24th Infantry Division
APO 24

1. The meeting of the Area VD Control Council was called to order by the President at 0930 hours, 10 June 1948.

2. The following members were present:

Major Arthur G. Drew, FA	Post Adjutant
Captain B.F. Johnson, FA	Ass't Provost Marshal
1st Lt Micheal J. Pavlo, MC	118th Stations Hospital
1st Lt L.B. Fierman, MC	F.M.G.T.
1st Lt G.O. Phleeger, FA	Spec. Serv. Officer

Absent:

Major Martin S. Ryan, FA (Reason: Leave to U.S.)	Provost Marshal
Captain Frank G Elliott, Ch. (Reason: Unknown)	Chaplain
Captain Louis L. Prewitt, Ch. (Reason: Unknown)	118th Station Hospital
Major George E. Donnellon, Ch. (Reason: TDY)	Chaplain

Also attending meeting were:

Colonel D.C. Hawkins	1st Engr. Const. Group
Captain B.B. Zillers	Hq 315th Composite Wing

3. The record of the last meeting was read as approved by the area commander.

4. The minuets of the VD Control Council Meeting for May, Headquarters, 24th Infantry Division were read as approved and discussed.

5. Discussion

a. Minutes of the Enlisted Men's VD Control Council Meeting, dated 1 June 1948 were read and emphasis was placed on the following:

(1). That the ration of beer in the cabarets in Fukuoka city be given consideration.

(2) That bus or rail transportation between Fukuoka city and Camp Hakata be increased and on a schedule that would permit troops in Fukuoka to visit Camp Hakata which is now the center of recreation with the present bowling alley, riding stables, swimming beach, boat and theater.

(3) That provision be made in a club or hall of some type in Camp Hakata and Fukuoka city, where enlisted men of all grades can attend a dance or party at least weekly or twice a month and invite Japanese women.

(4) That provisions be made for enlisted men from outlying areas to be rationed and quartered in Fukuoka city on Wednesday, Saturday, Sunday, Holidays, or for pass purposes. The part pertaining to thequarters was vetoed by the council.

(5). That wider distrivation be given to such letters pertaining to Venereal Disease and Venereal Disease tracing and contact.

b. Minutes of the 1st Engineer Construction Group and 118th Station Hospital were read as approved.

c. Following subjects were discussed by the council:

(1) That all units in the Fukuoka Area would cooperate with Division Artillery, with respect to subject letter: V.D. Control, dated 22 May 1948, Headquarters, 24th Infantry Division and that the outline and information sheet on enlisted men contacting Venereal Disease be forwarded by each unit so as to reach the president in time for study and for presentation at monthly meeting.

(2) That provisions be made available at Camp Hakata such as a club or building whereby enlisted men can attend dances and invite Japanese women as their guests.

6. Recommendation

a. That beer rationing in the city of Fukuoka be continued.

b. That bus or rail transportation between Fukuoka city and Camp Hakata be increased and scheduled so as to permit troops in Fukuoka to visit Camp Hakata for redreational activities such as boating, swimming beach, stables, bowling alley and theater.

c. That provisions be made in a club or hall of some type in Camp Hakata, where enlisted men of all grades can attend a dance or party at least weekly or if not possible, twice a month and invite Japanese women as their guests.

d. That provisions be made available in the city of Fukuoka whereby troops on pass on Wednesday, Saturday, Sunday and Holidays could eat evening meal.

e. That wider distrubution to units be given to letters pertaining to VD apprehension program and VD contact tracing.

f. That the outline and information sheet on Enlisted Men contacting VD be forwarded by each unit so as to reach the president in time for study and for presentation at Monthly Meeting.

7. The meeting adjourned at 1030 hours to meet at the call of the president.

s/A. G. Drew,
t/A. G. DREW,
Major FA,
Acting President

HEADQUARTERS 24TH DIV ARTY, APO 24, Unit 4, Camp Hakata, Kyushu, 14 Jun 1948

TO: Commanding General, 24th Infantry Division, APO 24.

1. Rationing of beer in City of Fukuoka will be continued unless C.O. 315th Composite Wing requests otherwise. Nineteen out of twenty enlisted men attending cabarets and beer halls in Fukuoka are members of the Air Force.

2. An effort will be made to arrange for train service. This headquarters cannot furnish motor transportation. It is suggested that a unit transport personnel in the unit's vehicles.

3. Attempt will be made to have one night open house at Bayside Cabaret.

4. Grill will be available at Rainbow Club soon.

5. Wider distribution will be given to information on V.D.

1. Rescissions:

a. Letter, this headquarters, file 319.1, subject: Medical Department Reports", dated 24 March 1947.

b. Letter, this headquarters, file 200.3, subject "Employment of Public Health Personnel in Kinki Region", dated 25 July 1947.

2. In order to insure that future Medical Department Reports submitted through this headquarters are uniform and correct, the following instructions will be complied with in their preparations:

a. Monthly Sanitary Report (Reports Control Symbol MED-3)

(1) References: AR 40-275; par 7b, FEC Circular 80, 1947; Eighth Army Circular 296, 1946.

(2) Submitted as of the last day of each month in two (2) copies to this headquarters.

(3) The report itself is the basic communication, with the signature of the Public Health Officer in the lower right hand corner of Section VII, Recommendations.

(4) The first indorsement with specific approval or disapproval signed by the Commanding Officer, will be at the top of page 4. (Note: Use no unnecessary space). No other letter or indorsement will be used.

Figures 7 & 8 - Copy of

b. Venereal Disease Statistical Report (Reports Control Symbol M-7) RESTRICTED.

(1) References: AR 40-210; Eighth Army Circular 184, 15 June 1946.

(2) Submitted as of the last Friday of each month in five (5) copies to this headquarters.

(3) Must be signed by Medical Officer.

(4) The report itself is the basic communication. The first indorsement with specific approval or disapproval signed by the Commanding Officer, will indicate all venereal disease control measures effected if the rate is over 50 per 1,000 per Annum.

c. Insect and Rodent Control Report (Reports Control Symbol N-24).

(1) This report is temporarily suspended.

(2) References: Eighth Army Circular 319, 1946; DA Circulars 14 and 161, 1947; Eighth Army Messageform AG 319.1 (NI), 13 Nov 1947.

(3) Submitted as of the last day of each month in three (3) copies to this headquarters.

(4) Must be signed by Insect and Rodent Control Officer.

(5) The report itself is the basic communication. The first indorsement with specific approval or disapproval, is signed by the Commanding Officer.

d. ~~Report of Medical Department Personnel (Reports Control Symbol MED-34).~~

Resc. by Ltr. 319.21 (12 June 48)

~~(1) References: NMC Cir 66, 7 June 1947; Eighth Army Circular 123, 23 July 1947.~~

~~(2) Submitted as of the last day of each month. The original to Commander-in-Chief, Far East,~~

APO 500, Attention: Surgeon. One copy to Commanding General, Eighth Army, APO 343, Attention: Surgeon. One copy (less roster of medical department officers) to The Surgeon General, Department of the Army, Washington 25, D.C. All copies direct.

(3) Only medical department officers and enlisted personnel whose basic branch of service is medical department will be included in this report, regardless of duty assignment.

3. Reports Control Symbol will appear in the upper right hand corner of all pages on each report, including indorsements thereto.

4. Other Medical Department Reports which are not routed through this headquarters will continue to be submitted in accordance with current directives.

HEADQUARTERS 24TH DIVISION ARTILLERY
APO 24, (Camp Hakata, Kyushu)

Memorandum
Number 4

1 March 1948

CONTROL OF TRAFFIC IN POISONOUS BEVERAGES

1. Reference: Operational Memorandum No. 2, Headquarters 24th Infantry Division, dated 12 February 1948.

2. Purpose:

a. To control the traffic in poisonous beverages in Kyushu.

b. To ensure that occupation personnel purchase spiritous liquors and beverages only from approved sources.

3. Responsibility:

a. The Division Artillery Commander is responsible for the elimination of traffic in poisonous beverages in the Fukuoka Prefecture less Kokura Metropolitan area.

b. The Provost Marshal is responsible for the elimination of traffic in poisonous beverages in the Fukuoka Metropolitan area and the enforcement of the provisions of this directive.

c. Unit commanders of all units within the Fukuoka area are responsible for the elimination of traffic of poisonous beverages within their unit areas.

4. General:

a. All occupation force personnel are forbidden to purchase any whiskey or other beverages whose alcoholic content is greater than 30 proof from any source except an approved Locker Fund.

b. Occupation personnel are permitted to purchase Japanese manufactured Saki and beer only at establishments authorized by this headquarters.

c. A list of approved brands and establishment from which purchases may be made will be published at least once each quarter and will be given area-wide distribution.

5. The Provost Marshal will:

a. Coordinate the following provisions with the Commanding Officer, Fukuoka Military Government Team.

(1) Require the prefectural government to register and regularly inspect all distilleries, producers, wholesalers, and vendors of intoxicating beverages in its prefecture and enforce provisions of SCAP IN - 871.

(2) Require the prefecture to maintain an adequate laboratory for testing beverages. Frequent inspections will be made of this laboratory to insure that analysis of samples are performed as outlined in inclosure #1.

(3) Require prefectural authorities to submit a report of all distilleries, producers, wholesalers, and vendors in the prefecture to be used as a guide for spot checking such establishments for compliance with directives.

(4) Require that all distilleries and producers of intoxicating beverages number each lot of beverage produced, labeling the 1st number on each bottle so that the testing authority may place an official stamp on each bottle of an approved lo

b. Report any lots reported by Prefectural Government which do not meet the standards outlined in Operational Directive No. 30, Hq 8th Army, dated 17 May 1946 to the Div Arty Surgeon and to this headquarters and require the Prefecture Government to give publicity through Japanese channels to:

(1) The provisions of Japanese laws prohibiting sale or traffic in any poisonous beverage.

(2) The punishment provided by Japanese law for violation.

(3) The fact that such offenses are also punishable by provost court.

c. Assisted by Div Arty Surgeon, inspect all distilleries, wholesalers and establishments to insure that poisonous beverages do not become available to occupation force personnel.

d. Assist Japanese Police in any "Raid" necessary to sieze suspected poisonous liquors and beverages and have them tested for tolerances provided in Incl 1 hereto. Poisonous beverages and liquors will be turned over to the Japanese police and will be destroyed.

e. Insure that all offenders are prosecuted in accordance with Operational Directive No. 29, Hq 8th Army, 11 March 19

f. Make frequent inspections of "on limits" approved Japanese establishments to insure that all bottles are properly stamped with lot number and are approved by testing authorities. Japanese police will be included in the inspection team.

g. Remove from sale immediately, beverages bearing no tax number or with one reported as substandard.

h. Close any establishment violating the provisions of this directive and supervise the destruction by Japanese Police of all contraband liquor found on the premises. Such places will be posted "OFF LIMITS" and will be permitted to reopen only on approval of this headquarters.

6. The Div Arty Surgeon will:

a. Assist the area Provost Marshal as indicated in par 5c.

b. Make frequent inspections of all establishments to insure compliance with this directive, obtain samples of beverages and liquors and have them tested as outlined in Incl 1, hereto.

c. Report results of inspection to this headquarters listing establishments with address, brands and lot number of alcoholic beverages and liquors manufactured or sold by them.

7. This headquarters will:

a. Maintain records pertaining to this activity.

b. Publish a list of "on limits" establishments quarterly.

MEMO No 4, Hq 24th Div Arty, APO 24, dtd 1 Mar 48, 7c cont'd.

c. Report violations of this directive to higher headquarters.

Location of Breweries & Distilleries

(Kessler's reagt. - See TM 8-227).

Cyanides:

To 3 ml of distillate add 5 drops NaOH; add 3 drops ferrous chloride (sat.). Heat to boil, add excess 10 % sulfuric acid; add 5 drops ferric chloride (sat.). Cyanides give intense blue precipitate. Acceptable liquors contain no cyanides.

Fusel Oil:

Mix 20 cc of whiskey with 20 cc of distilled water and shake the mixture with 10 cc of ether. Allow the mixture to stand until separation takes place. Separate the ether layer and allow it to evaporate spontaneously on a watch glass. The residue has no disagreeable or irritating odor.

Heavy Metals:

Evaporate 10 cc of whiskey to 5 cc and dilute with 10 cc of distilled water. Acidulate with 5 drops of HCL and add 5 cc of hydrogen sulfide T. S. No precipitate is formed before or after rendering the mixture alkaline with ammonia T. S.

(Hydrogen sulfide T. S. - Saturated aqueous solution H_2S. Pass H_2S through cold distilled water. Keep in small amber bottles. Should have strong H_2S odor and form precipitate of sulfur with ferric chloride.

Ammonia T. S. - 395 ml ammonia water Merck QS 1000 cc.

Alkaloids:

Acidulate 10 cc of whiskey with 5 drops dilute HCL. Evaporate to 5 cc, Dilute with distilled water to 10 cc and filter. Add a few drops of mercuric potassium iodide T. S. (Mayer's reagt) The mixture develops no precipitate.

(Mercuric potassium iodide T. S. - Dissolve 1.358 gm mercuric chloride in 60 cc of distilled water. Dissolve 5 gm potassium iodide in 10 cc water. Mix: QS 100 cc).

Beverages containing any of the following ingredients are considered unsafe for consumption:

(1) Methyl alcohol in amounts in excess of 1.00 mg/ml or 0.1%
(2) Phenols.
(3) Chloral hydrate.
(4) Cyanides.
(5) Heavy metals.
(6) Aldehydes in amounts in excess of 0.20 mg/ml or 0.02 per cent.
(7) Ketones in excess of USP standards for whiskey.
(8) Fusel oil, in excess of USP standards for whiskey.

INCLOSURE #1 to MEMO No. 4, HQ 24TH DIV ARTY, 1 Mar 48

"METHODS OF ALCOHOLIC BEVERAGE ANALYSIS"

Place 50 ml of whiskey in a distilling flask, add 50 ml water, mix, and using an efficient condenser, slowly recover 50 ml of distillate.

TESTS TO BE PERFORMED ON DISTILLATE:

Methanol:

To 5 ml of sample add 2.5 ml potassium permanganate 2%, 0.2 ml conc sulfuric acid; let stand three minutes. Add 2 ml 5% exalic acid, 1.0 ml sulfuric acid, and shake until decolorized. Add 5 ml of Schiff's reagt., let stand 1 hour. Read against standards prepared simultaneously with the unknown and containing 0.4, 0.6, 0.8, 1.0 and 1.2 mg. Methanol/ml in 5 cc of a 45% solution of ethyl alcohol in water. These are most easily prepared by diluting the appropriate quantity of a stock solution containing 2 mg. Methanol/ml of 45% ethyl alcohol solution to a total quantity of 5 cc., using 45% ethyl alcohol as the diluent.

(Schiff-Elvove Reagt. - Dissolve 0.5 gm basic fuchsin in 200 ml hot water, and cool. Dissolve 6 gm sodium bisulfite in 100 cc conc HCL. Qs 500 cc. Let stand until solution is a pale straw color; store in amber bottle. Will keep for two to three weeks).

Acceptable liquors are liquors with less than 1.0 Methanol/ml

Aldehydes:

Make 1 : 100 dilution of distillate. To 5 cc of diluted liquid add 0.25 ml Schiff-Elveve solution. Place in incubator at 37degrees C for ten minutes. Acceptable liquors will be colorless or have a very faint pink color. Definite pink or violet color is not acceptable, (Sensitivity - 1 : 5000 on diluted distillate).

Ketones, acetone, isopropyl and tertiary butyl alcohols:

To 2 cc of distillate add 3 cc distilled water and 10 cc mercuric sulfate T. S. (Donige's reagt.): heat on boiling water bath for 3 minutes. No precipitate forms in three minutes if liquor is acceptable.

(Mercuric sulfate T. S. - 5 gm yellow mercuric oxide in 40 cc distilled water. Add while stirring 20 cc conc sulfuric. Add 40 cc distilled water; let stand until dissolved).

Sensitivity - 1 : 1000.

Phenols:

To 3 ml distillate add 2 ml Millen's reagt. Heat on water bath for three minutes. Acceptable solution will have no color.

(Millon's reagt. - Dissolve 50 gm mercury in 50 cc conc nitric acid. When solution is complete add 100 cc distilled water).

Chloral hydrate:

To 3 ml of distillate add 1.5 cc Kessler's reagt. Heat to boil. Chloral hydrate gives a bright red precipitate in a clear green solution. Acceptable liquors contain no chloral hydrate.

(Note: Orange or grey precipitates are due to aldehyde and or alcohols, and will be disregarded).

(Kessler's reagt. - See TM 8-227).

Cyanides:

To 3 ml of distillate add 5 drops NaOH; add 3 drops ferrous chloride (sat.). Heat to boil, add excess 10 % sulfuric acid; add 5 drops ferric chloride (sat.). Cyanides give intense blue precipitate. Acceptable liquors contain no cyanides.

Fusel Oil:

Mix 20 cc of whiskey with 20 cc of distilled water and shake the mixture with 10 cc of ether. Allow the mixture to stand until separation takes place. Separate the ether layer and allow it to evaporate spontaneously on a watch glass. The residue has no disagreeable or irritating odor.

Heavy Metals:

Evaporate 10 cc of whiskey to 5 cc and dilute with 10 cc of distilled water. Acidulate with 5 drops of HCL and add 5 cc of hydrogen sulfide T. S. No precipitate is formed before or after rendering the mixture alkaline with ammonia T. S.

(Hydrogen sulfide T. S. - Saturated aqueous solution H_2S. Pass H_2S through cold distilled water. Keep in small amber bottles. Should have strong H_2S odor and form precipitate of sulfur with ferric chloride.

Ammonia T. S. - 395 ml ammonia water Merck QS 1000 cc.

Alkaloids:

Acidulate 10 cc of whiskey with 5 drops dilute HCL. Evaporate to 5 cc. Dilute with distilled water to 10 cc and filter. Add a few drops of mercuric potassium iodide T. S. (Mayer's reagt.) The mixture develops no precipitate.

(Mercuric potassium iodide T. S. - Dissolve 1.358 gm mercuric chloride in 60 cc of distilled water. Dissolve 5 gm potassium iodide in 10 cc water. Mix: QS 100 cc).

Beverages containing any of the following ingredients are considered unsafe for consumption:

APO 24, (Camp Hakata, Kyushu)

MEMORANDUM: 1 March 1948

REVISED CONTACT TRACING PROCEDURE

1. Reference is made to Eighth Army Circular 13, 28 January 1947.

2. The following revised contact tracing procedure is published for the information and guidance of all concerned.

3. Contact Tracing Form N-27, is to be filled out at the dispensary when a diagnosis of gonorrhea or penile lesion is made, and the dispensary medical officer will initiate contact tracing.

4. A Japanese contact tracer will be assigned to the dispensary for the purpose of apprehending the suspected contact, or will be available at the Japanese venereal clinic in that area.

5. Military Police will be notified by the dispensary medical officer to report to the dispensary with jeep and interpreter and when necessary, a Japanese contact tracer from local Japanese venereal disease clinic.

a. The patient accompanied by the Military Police, Japanese contact tracer and interpreter will attempt to apprehend the contact or contacts.

b. Military Police authority is limited to that of only protecting the Japanese from GI interference.

c. Results of contact tracing will be entered on the contact tracing form. If history is insufficient to enable contact tracing the medical officer will so state on the form.

6. The suspect, if apprehended, will be brought to the venereal disease clinic servicing the area and confined for three days for diagnostic procedures. If there is a positive diagnosis she will be confined and treated.

7. After the girl is apprehended or after contact tracing proves unsuccessful, the completed contact tracing form is to be forwarded to the Fukuoka Military Government Team, Public Health Office, except in cases of penile lesions, when the form will be sent with the patient to the 118th Station Hospital, from where it will be forwarded after a diagnosis is made.

OPERATIONS MEMORANDUM)
:
NUMBER 2)

CONTROL OF TRAFFIC IN POISONOUS BEVERAGES

1. References:

(a) Operation Memorandum #1, Hq I Corps, 8 Jan 48.

(b) Operational Directive #50, Hq Eighth Army, 17 May 46, SCAPIN - 871, 9 April 1946.

2. Purpose

a. To control the traffic in poisonous beverages on KYUSHU.

b. To ensure that occupation personnel purchase spiritous liquors only from approved sources.

3. Responsibility

Major area commanders are responsible, within their respective areas, for the slimination of traffic in poisonous beverages.

4. General

a. All occupation personnel on KYUSHU are forbidden to purchase any whiskey or other beverage whose alcoholic content is greater than thirty (30) Proof from any source except an approved Locker Fund.

b. Occupation personnel are permitted to purchase brands of Japanese manufactured Saki or beer approved by the major area commander. Such purchases will be permitted obly from "on limits" establishments which have been approved for the sale of beer and/or Saki by the major area commander.

c. Each major area commander will publish at least once quarterly the brands of Japanese Saki and beer which are approved for purchase and consumption by occupation forces in his area.

d. Each major area commander will publish at least once quarterly the Japanese "on limits" establishments which are authorized to sell approved brands of Japanese Saki and beer to occupation personnel.

e. Normally, the purchase of Japanese manufactured beer, by occupation personnel, will be authorized only at unit Post Exchanges, unit beer halls, night clubs and dance halls operating under the direct supervi sion of unit Special Service or A & R Officers.

5. To assist area commanders in the control of the traffic in poisonous beverages, Military Government units have been directed to:

a. Require each prefectural gocernment to register and regularly inspect all distilleries, producers, wholesalers, and vendors of intoxicating beverages in its prefecture and enforce provisions of SCAPIN - 871.

b. Require that each prefecture maintain an adequate laboratory for testing beverages. Frequent inspections will be made of this laboratory to insure that analysis of samples are performed as outlined in inclosure #1.

c. Require prefectural authorities to submit a report of all distilleries, producers, wholesalers, and vendors in the prefecture to be used as a guide for spot checking such establishments for compliance with directives cited in Paragraph 2.

d. Require that all distilleries and producers of intoxicating beverages number each lot of beverages produced, labeling the 1st number on each bottle so that the testing authority may place an official stamp on each bottle of an approved lot.

e. Report any lots reported to them by Japanese Government that do not meet the standards outlined in Operational Directive No. 30, Headquarters Eighth Army, 17 May 1946, to surgeon and the procost marshal of the area concerned.

f. Require prefectural government to give publicity through Japanese channels to:

(1) The provisions of Japanese laws prohibiting sale of traffic in any poisonous beverage.

(2) The punishment provided by Japanese law for violation.

(3) The fact that such offenses are also punishable by provost court.

6. In their control procedures, area Commanders will:

a. Assist prefectural authorities in the inspection of all distilleries, producers, wholesalers, and vendors of intoxicating liquors to insure that poisonous beverages do not become available, will be included in unit inspection team.

b. Seize suspected poisonous liquors and have them tested for tolerances as provided in Incl 1 hereto. Liquors found to be poisonous in laboratory tests will be turned over to the Japanese police and destroyed. " Riads " will be conducted by Japanese police, accompanied by Area Military Police where deemed necessary by Area Commander.

c. Prosecute personnel possessing or selling poisonous beverage liquors (Operation Directive #29, Hq Eighth Army, 11 March 1946)

d. (1) Publicize through TI&E and PIO information concerning the dangers of consuming poisonous or unapproved liquors procured from unlicensed dealers:

(2) This subject will be periodically included as a part of Troop Information Hours.

e. (1) Hold frequent inspections of "on limits" Japanese installations authorized to sell intoxicating beverages of Japanese origin to insure that all bottles are properly stamped with a lot number and are approved by testing authorities Japanese police will be included in inspection team.

(2) Remove from sale immediately beverages bearing no lot number or with one reported as sub standard.

f. Frequently have unit medical personnel pick up samples from approved distilleries and producers in their area, and have them tested in US Army laboratories as outlined in Incl 1 hereto.

7. a. Alcoholic beverages intended for sale to occupation force personnel will be secured only from US Army inspected distilleries, or from licensed prefectural stores selling packaged liquors (acquired from those inspected distilleries) by Japanese authorities to dispense liquors.

8. a. The Provost Marshal, 24th Inf Div will, within his presently assigned area of jurisdiction, perform the duties directed in Pars 6a, b, c, e, and 4c and d above.

b. The Division Surgeon will, within the jurisdiction of the 24th Inf Div Provost Marshal, perform the duties directed in Par 4c and Pars 6a and f above.

9. Area Commanders are authorized to close any place of business violating the terms of this directive and to supervise the destriction by Japanese police of all liquor found on the premises. Such places of business will be permitted to reopen only with the approval of the Commander closing them.

10. Records and reports.

a. Inspection records pertaining to this activity will be kept on file at the major unit headquarters.

b. Formal report will be made to this Headquarters (Attention AG of S, G-3) of any violations of this directive or of any punitive action against Japanese for violation of any provisions of this directive.

INCLOSURE #1 TO OPERATIONS MEMORANDUM NO. 2, HEADQUARTERS 24TH INFANTRY DIVISION, 12 FEBRUARY 1948

" METHODS OF ALCOHOLIC BEVERAGE ANALYSIS"

Place 50 ml of whiskey in a distilling flask, add 50 ml water, mix and using an efficient condenser, slowly recover 50 ml of distillate.

TESTS TO BE PERORMED ON DISTILLATE:

Methanol:

To 5 ml of sample add 2.5 ml potassium permanganate 2%, 0.2 ml cone sulfuric acid; let stand three minutes. Add 2 ml 5% exalic acid, 1.0 ml sulfuric acid, and shake until decolorized. Add 5 ml of Schiff's reagt, let stand 1 hour. Read against standards prepared simultaneously with the unknown and containing 0.4, 0.6, 0.8, 1.0 and 1.2 mg. Methanol/ml in 5 cc of a 45% solution of ethyl alcohol in water. These are most easily prepared by diluting the appropriate quantity of a stock solution containing 2mg. Methonal/ml of 45% ethly alcohol solution to a total quantity of 5 cc., using 45% ethly alcohol as the diluent.

(Schiff-Elvove Reagt. - Dissolve 0.5 gm basic fuchsin in 200 ml hot water, and cool. Dissolve 6 mg sodium bisulfite in 100 cc cone HCl. Qs 500 cc. Let stand until solution is a pale straw color; store in amber bottle. Will keep for two to three weeks).

Acceptable liquors are liquors with less than 1.0 Methanol/ml

Aldehydes:

Make 1 : 100 dilution of distillate. To 5 cc of diluted liquid add 0.25 ml Schiff-Elveve solution. Place in incubator at 37° C for ten minutes. Acceptable liquors will be colorless, or have a very faint pink color. Definite pink or violet color is not acceptable, (Sensitivity - 1 : 5000 On diluted distillate).

Ketones, acetone, isopropyl and tertiary butyl alcohols:

To 2 cc of distillate add 3 cc distilled water and 10 cc mercuric sulfate T. S. (Donige's reagt): heat on boiling water bath for 3 minutes. No precipitate forms in htree minutes if liquor is acceptable.

(mercuric sulfate T. S. - 5 gm yellow mercuric oxide in 40 cc distilled water. Add while stirring 20 cc cone sulfuric. Add 40 cc distilled water; let stand until dissolved).

Sensitivity - 1 : 1000.

Phenols:

To 3 ml distillate add 2 ml Millen's reagt. Heat on water bath for three minutes. Acceptable solution will have no color.

(Millon's reagt. - Dissolve 50 gm mercury in 50 cc: cone nitruc acid. When solution is complete add 100 cc distilled water).

Chloral hydrate:

To 3 ml of distillate add 1.5 cc Kessler's reagt. Heat to boil. Chloral hydrate gives a bright red precipitate in a clear green solution. Acceptable liquors contain ni chloral hydrate.

(Note: Orange or grey precipitates are due to aldehyde and/or alcohols, and will be disregarede).

(Kessler's reagt. - See TM 8-227).

Cyanides:

To 3 ml of distillate add 5 drops NaOH; add 3 drops ferrous chloride (sat.). Heat to boil, add excess 10 % sulfuric acid; add 5 drops ferric chloride (sat.). Cyanides give intense blue p precipitate. Acceptable liquors contain no cyanides.

Fusel Oil:

Mix 20 cc of whiskey with 20 cc of distilled water and shake the mixture with 10 cc of ether. Allow the mixture to stand until separation takes place. Separate the ether layer and allow it to evaporate spontaneously on a watch glass. The residue has no disagreeable or irritating odor.

Heavy Metals:

Evaporate 10 cc of whiskey to 5 cc and dilute with 10 cc of distilled water. Acidulate with 5 drops of HCl and add 5 cc of hydrogen sulfide T. S. No precipitate is formed before or after rendering the mixture alkaline with ammonia T. S.

(Hydrogen sulfide T. S. - Saturated aqueous solution H_2S. Pass H_2S through cold distilled water. Keep in small amber bottles. Should have strong H_2S odor and form precipitate of sulfur with ferric choride.

Ammonia T. S. - 395 ml ammonia water Merck QS 1000 cc.

Alkaloids:

Acidulate 10 cc of whiskey with 5 drops dilute HCl. Evaporate to 5 cc. Diltute with distilled water to 10 cc and filter. Add a few drops of mercuric potassium iodide T. S. (Mayer's reagt) The mixture develops no precipitate.

(Mercuric potassium iodide T. S. - Dissolve 1.358 gm mercuric chloride in 60 cc of distilled water. Dissolve t gm potassium iodide in 10 cc water. Mix: QS 100 cc).

c. Beverages containing any of the following ingredients are considered unsafe for consumption:

(1) Methyl alcohol in amounts in excess of 1.00 mg/ml or 0.1%
(2) Phenols.
