Justification for request:

These buildings were originally established as semi-permanent ones in wooden frame in 1941.

As the time went by, however, we have hadto try to have them repaired as there were seen many leaks in the roof whenever storms came up.

With possible means, we have made temporery repairs for them also on account of considerable damages suffered by the typhoon on last September 13.

Considering that it will be difficult to repair them after next storm, we are afraid of custody and maintenance of them.

Therefore this Repair Work should be performed by all means to have absolute custody and maintenence of the buildings.
