ORIZINE,

A NUTRITIVE CREAM,

SUPERIOR to Arrowroot and the feculae generally used.

The Orizine contains the alimentary principle par excellence. Physicians prescribe it for the most delicate constitutions, and especially for children who digest it more easily than Arrowroot, Salep, or any other feculae, which, as they do not always agree with the mother's milk, bring about vomiting, diarrhea, &c. Good health is restored to children by using the Orizine, which is easily prepared according to directions.

Notice.

DR. L. DUPERRON,
DENTIST,
60 ..... ROYAL STREET 60

HAS the honor to inform his friends and the public that he has just received a composition for plugging teeth, which possesses particular advantages over any hitherto discovered. This composition, invented by Dr. Perron, when introduced into the cavity of the tooth, with slight pressure, adheres tenaciously to the inside and immediately becomes as hard as the tooth itself, and, in a short time, assumes its color and polish. Persons whose teeth are black or discolored by other modes of filling, can, by the use of this composition, have their teeth restored to their natural color. nov25tf
