INFO: DA WASH DC.....ROUTINE

CX 54563 CH ADM FLD HQS TERPACIS GUAM.....ROUTINE

Ourmsg C-54296 dtg 050811Z Jan 50 and urmsgs 140301Z and 140304Z NOTAL. This msg in three parts

Part one. No objection to proposed changes in paras three and seven of Angaur Mining Agreement as outlined in urmsg 140301Z. Concur that para eight of Angaur agreement, covering details on the disposition of principal and income from the Trust Fund does not affect the agreement between SCAP and HICOMTERPACIS.

Part two. Japanese Government at this time is not a sovereign entity and cannot therefore enter into or conclude contracts or agreements with other governments except through SCAP. Therefore, changes in the Angaur agreement outlined in ourmsg C-54296 dtg 050811Z are necessary for the administration of the mining operation. SCAP cannot conclude agreements guaranteeing performance on contracts by the Japanese Government after conclusion of the Japanese peace treaty.

NOTE FOR RECORD:

1. HICOMTERPACIS msg 140301Z to SCAP proposes that para 3, line 16 of the Angaur Mining Agreement be changed to read "No excavation shall be made nearer than 75 yards from the northwest edge of the runway at any point." This modification is requested to insure that the air strip will not be damaged by quarrying of coral rubble from along the Angaur air strip taxiway for use as back fill.

a. No objection is seen to this proposed change since adequate coral rubble is available in the remaining areas.

2. Part "B" of subject msg requests that the intent to base the value of Angaur phosphate for tax purposes on the FOB value of Florida rock, be specified by adding a

sentence to para 7 of the agreement reading, "Determination of value of Angaur rock be based on Florida rock FOB mine, on date of shipment from Angaur."

a. This addition spells out the intent of the original agreement. No objection is seen to this action. In addition, the value of Florida rock has not changed within the last 12 months. Specifying the date of valuation, therefore, is not considered to be an important factor.

3. Part "C" of the subject msg notes that para 8 of the Angaur agreement on the administration of the native Trust Fund, does not cover the subject in a manner satisfactory to HICOMTERPACIS. A supplemental agreement between HICOMTERPACIS and Angaurese will therefore be required. It notes further that the administration of the Trust Fund does not affect the agreement between SCAP and HICOMTERPACIS.

a. SCAP has no authority over the disposition of the Trust Fund but the administration of the native Trust Fund is a matter of primary concern to HICOMTERPACIS. Details of Trust Fund management must be worked out between HICOMTERPACIS and the Angaurese.

4. HICOMTERPACIS msg 140304Z Jan 50 to SCAP refers to changes in the Angaur agreement requested by SCAP msg C-54296 dtg 050811 Jan 50 to HICOMTERPACIS that para 4, lines 2 and 6, and para 5, line 3 of Angaur Mining Agreement be changed to show that SCAP has administrative responsibility for the Angaur Phosphate Mining Project rather than the Japanese Government; also to indicate that details of the operation will be worked out between HICOMTERPACIS and SCAP rather than between HICOMTERPACIS and DA. HICOMTERPACIS agrees to proposed changes on condition that SCAP guarantee that terms of the Angaur agreement will be carried out in the event of a peace treaty with Japan before termination of mining operations.

a. SCAP cannot conclude agreements guaranteeing performance by the Japanese Government on contractual matters after conclusion of the Japanese peace treaty. Matters of this nature are of interest to Dept of State.

5. Instant msg transmits SCAP concurrence in changes proposed by HICOMTERPACIS msg 140301Z. HICOMTERPACIS is advised that changes in Angaur agreement outlined in SCAP msg C-54296 are necessary for the administration of the

mining operations because the Japanese Government is not, at this time, a sovereign entity. HICOMTERPACIS is further advised that SCAP cannot conclude agreements guaranteeing performance by the Japanese Government on contractual matters after the conclusion of the Japanese peace treaty. It is stated that the tentative Angaur agreement as modified by changes recommended by HICOMTERPACIS and SCAP will be transmitted to DA for discussions leading to concurrence from Dept of Navy.

6. Approved by Chief of Staff, 22 Jan 50.

FROM: CINCFE (G-2) TOKYO JAPAN

TO : DA (CSGID) WASH DC

C-54559 Reference your W 96675 the subject matter is covered in Daily Intelligence Summary Nos 2680, pp 6, par 1; 2681, pp 4, par 1; 2682, pp6, par 1; 2683, pp 5, par 1; 2684, pp 4, par 1; 2685, pp 4, par 1; 2687, pp 5, par 2; 2688, pp 5, par 1; 2689, pp 5, par 1; 2690, pp 5, par 1; 2691, pp 5, par 3, and press analysis nos 1310 thru 1328. Reply your subject radio in paragraph sequence:

A. Fully half of the Cominform attack on NOSAKA is occupied with the portrayal of the United States as an imperialist power determined to get full economic control of Japan, and to make Japan a front-line base for American battle against Soviet Communism. U.S. is accused of smothering all democratic forces in Japan and of remilitarising Japan with the aid of Japanese reactionary elements.

Against this background of alleged U.S. imperialism and militarism, NOSAKA, and the JCP, are accused of two sins: 1) NOSAKA's argument that the aims of Communism can possibly take place under an "Imperialist" occupation, or that cooperation with the U.S. occupation is permissable, and 2) misleading the Japanese Party and masses by preaching that Communist objectives can be attained through peaceful parliamentary means, instead of by the orthodox method of violent revolution. For taking this stand, NOSAKA has apparently fallen out of favor with the Cominform.

INFORMATION COPY

B. First official JCP statement in reply to Cominform charges, issued on 12 Jan 50, was equivocal and face-saving. Tenor of statement was that defects charged against NOSAKA's moderate policies by Cominform had already been corrected

SECRET

Govt Sec

8

by JCP, but that Cominform had not been fully informed. Cominform also evidently not informed of difficult occupation conditions under which JCP had been forced to use evasive tactics and language which to Cominform might seem unorthodox. JCP shouldered blame for not having kept Cominform well informed and promised not to allow such a situation to occur again.

C. Cominform motive in making charges seems to have been complex. With regard to the JCP alone, the charges may be considered a reprimand to the JCP for not having taken a stronger part in the recently stepped-up world struggle; may also be a general warning against the possibility of Titoism. Internationally, the charges are well timed to combat the Colombo Conference of British Commonwealth nations and the current formulation by the U.S. of a new Far Eastern policy, both presumably indicative of a stronger anti-Communist stand in the Orient.

Earliest reports of Expanded Central Committee meeting held 18-20 Jan especially to discuss problems arising out of Cominform charges indicate that JCP intends to make changes in policy in line with Cominform criticism, while keeping an eye on internal conditions in Japan. Changes not to be drastic pending possible future developments in international field, such as Peace Treaty, or the participation by Red China delegate in the Allied Council For Japan. Some emphasis placed on transferring main party struggle from the Diet to the masses.

There are no indications that the JCP will not accept the Cominform criticism. There does exist some resentment of the fact that the Cominform charges were evidently made on insufficient information and without prior consultation with the JCP.

D. Effect on Japanese public has been to make it quite clear that the JCP, which has been posing as their social saviour, is actually a tool of the Cominform and/or Kremlin. JCP has suffered a real set-back as far as possibilities of its appeal to the general public are concerned. In this connection, the impact of the unresolved repatriation issue is also derogatory to JCP prestige.

SECRET

Routine Outgoing Msg fr CinCFE (G-2), to DA (CSGID) Wash, 21 Jan 50

E. Louis Saillant sententiously included Japan in the list of "oppressed countries" in whose behalf he voiced the protests of the November WFTU sponsored Conference in Peiping. Note that WFTU follows the same line as its predecessor, the Pan Pacific Trade Union Secretariat, Shanghai, 1933 as covered in Sorge Report. (See also paragraphs 16 and 19 of Inclosure 1 to Summary of Information, dated 19 December 1949, subject: "The Japan Communist Party and the Cominform (Tenth Interim Report)" forwarded to MID on 28 December 1949). Cominform charge stressed necessity of JCP giving proper leadership to working masses against capitalism; this aspect of the Cominform attack ties in closely with the Peiping Conference emphasis on the development of the struggle to overthrow the anti-Communist "colonial and imperialist powers" in the Far East. WFTU affiliate in Japan, the National Liaison Council of Labor Unions (Zenroren), which is a Communist front, has already given strong support to 21 December letter of Lt. Gen. Derevyanko, Soviet Member, Allied Council for Japan, attacking Occupation labor policies, and has also approached the Soviet Member with a request for his "continuation of intensified struggles for Japan's democratization" as outlined in his letter. JCP newspaper Akahata played up this action of Zenroren, as well as Zenroren's appeal to the WFTU for help in the struggle to protect basic rights of Japanese labor.

Analysis of the Cominform attack and JCP and other Japanese reaction to it up to 17 January 1950 was forwarded to you per letter of 21 January 1950, subject: "The Japan Communist Party and the Cominform (Eleventh Interim Report)". Special Report on Zenroren's role in WFTU activities was forwarded to you per letter of 7 January 1950, subject: "Japanese Participation in WFTU Activities".

Please pass to Department of State.

CIVAD PALAUS KOROR.....DEFERRED

CH OF ADM FLD HQS TERPACIS GUAM.....DEFERRED

Zx34417 Urmsg 050141Z Jan 50. This rad in four parts.

Part one. Pending receipt of approval of Angaur agreement by DA and Navy Dept, mining of Area 3 authorized by ltr Ch Adm Fld Hqs TerPacIs to SCAP, FF12(1)/60, Ser 013, 24 Dec 49, is to be carried on in accordance with precautions outlined in Angaur agreement. ETD Japan of well drilling equipment 13 Jan 50. Back filling of Area 3 to be carried on simultaneously with mining.

Part two. Para 3 of Angaur agreement did not contemplate immediate simultaneous back filling of existing lakes. Back filling of existing lakes in areas authorized for mining under Angaur agreement other than Area 3, will be carried out as agreed but back filling of each lake can start only after phosphate is mined from the bottom of the lake.

INFORMATION COPY

Part three. Back filling of lakes in areas not authorized for mining to be carried out as equipment becomes available. Action being taken to obtain necessary equipment. Test wells and back filling in Area 3 will provide protection for Area 1 pending initiation of back filling.

Part four. SCAP proposes to work out plans relative to sequence of mining of authorized areas, well drilling and other remedial action, and back filling, in accord with provisions of para 3 of Angaur agreement and following sound engineering practice. Such plans will be forwarded to HICOMTERPACIS for comment and constructive suggestions. Suggest that details of implementation of such plans be worked out by SCAPLO and Trust Territory staff hydrologist at Angaur, with any insoluble differences arising in the implementation of the plans being submitted to SCAP and HICOMTERPACIS jointly for arbitration

NOTE FOR RECORD:

1. HICOMTERPACIS rad 050141Z to SCAP concurs tentatively in mining Area 3 at Angaur on condition that back filling operations are carried on simultaneously in existing lakes created by mining operations and that test wells be established as provided in the Angaur agreement. msg also requests that future plans involving scope of mining operations at Angaur be submitted to HICOMTERPACIS for concurrence.

2. SCAP rad Z33344 dtg 310417 Dec 49 to SCAPLO authorizes mining in Area 3 on completion of mining in Area 2, under authority contained in ltr FF12(1)/60, Ser 013, 24 Dec 49, fr Ch Adm Fld Hqs TerPacIs SCAPLO is instructed to mine from south to north, back filling as mining progresses.

a. Para 3 of Angaur agreement stated "...provided that all lakes now existing or hereafter created by the mining operations in these areas...shall be filled in..." In no place does the agreement state that back filling in all existing lakes shall be carried on simultaneously.

b. Lakes in Areas 2, 7, 9 and 11 are in areas authorized for mining by Angaur agreement and contain substantial mineable ore reserves. Back filling of these lakes cannot begin until mining in the lake has been started, at which time back filling will be carried out in conjunction with mining. Plant capacity prohibits mining in all areas simultaneously.

c. Lake in Area 1, which area is not authorized for mining, will be filled under terms of Angaur agreement but sufficient equipment is not available at this time to permit filling of active mining areas as well as the lake in Area 1. Arrangements are being made to obtain such equipment.

d. According to the findings of the hydrologic survey team, groundwater and soil of Area 1 have not been damaged. Protection of this area during mining of Area 3, will be insured by the presence of test wells established under terms of Angaur agreement and by back filling of Area 3. Well drilling equipment is being sent to Angaur on the Santo Maru, ETD Japan 13 January. SCAPLO has been instructed on back filling of Area 3

3. General terms of mining operations at Angaur are

RECEIVED 16 JAN 1950
DISPATCH 12 JAN 1950

covered by para 3 of Angaur agreement, copy of which is being forwarded through HICOMTERPACIS to CNO . Para 4 of the Angaur agreement provides that HICOMTERPACIS is authorized to make all necessary agreements with DA, to implement this agreement and to work out all details of the operation so that the protective recommendations of the survey team will be carried out.

a. Provided that general provisions of the Angaur agreement are complied with and that general plans relative to sequence of mining of authorized areas, well drilling and other remedial action, and back filling, are agreeable to HICOMTERPACIS, implementation of the general plans are operational details which can be worked out at Angaur by SCAPLO and Trust Territory staff hydrologist.

b. For SCAP and HICOMTERPACIS to attempt to prescribe details of mining operations would be a source of constant delay and would involve both Headquarters in constant negotiation on matters which can satisfactorily be worked out only at the operational level.

4. SCAP msg informs HICOMTERPACIS that authority for mining of Area 3 was received from Ch Adm Fld Hqs TerPacIs; that back filling of Area 3 will be carried out in accordance with precautions outlined in the Angaur agreement pending receipt of final DA approval of agreement; that simultaneous back filling of all lakes was not a provision in the Angaur agreement but back filling of lakes will be carried out in conjunction with mining in the lakes; that drilling equipment for test wells will depart Japan o/a 13 January 1950. HICOMTERPACIS is also informed that general plans for Angaur mining and for carrying out of protective measures are being made in accord with para 3 of the Angaur agreement. It is stated that these plans will be forwarded to HICOMTERPACIS for comment and constructive criticism upon completion. It is suggested that detailed implementation of the general plans be made the responsibility of the SCAPLO and Trust Territory staff hydrologist, with disagreements over implementation being submitted to SCAP and HICOMTERPACIS jointly for arbitration.

5. Approved by the Chief of Staff, 11 Jan 50.

NOTE FOR RECORD:

1. Mining agreement between representatives from HICOMTERPACIS, SCAP and Angaur natives resulting from conferences at Angaur 20-22 December 1949, shows improper organization and administrative channels for administering the Project. Under para 4 of the agreement as written, HICOMTERPACI is shown to be responsible for negotiating with Department of the Army on carrying out basic provisions of the agreement, rather than with General Headquarters, Supreme Commander for the Allied Powers. Further, paras 4 and 5 of the agreement indicate that primary responsibility for mining operations rests with the Japanese Government, rather than with General Headquarters, Supreme Commander for the Allied Powers, and places HICOMTERPACIS in the anomalous position of negotiating with the Japanese Government.

2. Inst msg to Chief Administrator Fld Hqs Trust TERPACIS as HICOMTERPACIS representative, requests that paras 4 and 5 of the mining agreement signed at Angaur be changed to conform with organizational and administrative procedures.

Confidential

Conferred

FROM SCAP TOKYO JAPAN TO CHF ADM FLD HQS TRUST TERPACIS, NR-MG, HGS/RYG/MBN/de, 5 Jan 50

a. It is requested that the words "General Headquarters, Supreme Commander for the Allied Powers" be substituted for "Department of the Army" in par 4 of the agreement.

b. The words "General Headquarters, Supreme Commander for the Allied Powers" are to be substituted for "Japanese Government" wherever they appear in paras 4 and 5.

3. Approved by Chief of Staff, 4 Jan 50.

FROM: SCAP TOKYO JAPAN

TO: DA WASH DC..... .....ROUTINE

C-54294

For SGUSA FAOA. This rad in eight parts.

Part 1. Angaur Phosphate Project hydrologic survey and conference on continued mining completed 24 December 1949. Radmsg 240220Z Dec 49 from Ch Adm of Fld Hqs Trust TERPACIS to SCAP is quoted in whole:

"An agreement providing for continued mining with no reservations on the part of any parties thereto and subject to approval by higher authority was reached between the people of Angaur AFICOMTERPACIS and SCAP representatives. Agreement is consistent with hydrological report and takes cognizance of all other considerations. Formal agreement to be air mailed today. A brief of the agreement follows. Continued mining subject to conditions in part recommended by hydrologic survey team and in part demanded by Angaurese as follows:

A. Test wells will be made and readings taken as stipulated.

CONFIDENTIAL

Unclassified

INFORMATION COPY

DECLASSIFIED EO 12356 SEC 3.(E) AND 3.(D) OR (E) NNDG # 775 012

B. All lakes caused by mining to be filled to height of 1 foot above mean water table.

C. Fill to be taken from taxiway and parking area including land between parking areas on northwest side airstrip.

D. This land to be dug only to 1 foot above mean water table and left in smooth condition.

E. Hydrological survey wells and lakes and results of readings therefrom to be under surveillance HICOM Hydrologist, if and when it is determined preventive measures (which are to proceed concurrently with mining) are not effective mining to be terminated. However, hydrologic team believes that with complete restoration steps demanded by Angaurese it is extremely unlikely preventive measure will fail.

F. Starting 1 January severance fee $2 per long ton adjusted to 32% P 2 O 5.

G. Processing tax of 15% of Florida value of phosphate to be paid to Treasurer Trust Territory.

H. Severance fees to be used to establish trust fund for Angaurese people. 2/3 of revenue therefrom to be paid in monthly payments equitably to clans owning phosphate areas. 1/3 of revenue to be paid to municipality for distribution in part to

clans with no phosphate land but who have supported people evicted from their lands by mining operations and balance for municipal purposes.

I. Starting 1 January and continuing until all severance money is paid into trust fund $15,000 per year (estimated income from final trust fund) will be used to make the monthly payments as stipulated above.

J. The balance of the $5,000 fund presently in the bank account of the Angaurese people to remain at their immediate disposal.

K. Also out of severance funds available on 1 January $50,000 to be made available to Angaurese for business ventures considered economically suitable for them. These ventures subject to approval by HICOM.

L. $25,000 of the fund will be made available as a calamity fund.

M. After discussion with SCAPLO it was decided mining to continue with caution pending approval or disapproval this agreement. Running notes of Angaur conference will be air mailed as soon as transcribed."

Part 2. Reference conditions A-E. Cost of test holes and back filling of lakes to be borne by Japanese Government. Back fill cost estimated to be about $0.15 per long ton. Fill for lakes to be obtained from Angaur airstrip taxiway.

DECLASSIFIED E.O. 11652 SEC. 3(E) AND 3(B) OR (E) NNDG # 775 012

Unclassified

FROM SCAP TOKYO JAPAN TO DA WASH DC, NR-MG, HGS/RYG/de, 5 Jan 50

Airstrip and taxiway released by army, airforce, and navy units.

Part 3. Reference Condition F. Severance fee of $2 per long ton, effective 1 January 1950, compensates for past low severances fees of $0.25 and $0.60. Total estimated payment to Trust Fund will be $818,000 for 730,000 dry long tons of phosphate rock shipped July 1946-December 1952, or $1.12 per long ton.

Part 4. Reference condition G. Processing tax of 15 percent based on current Florida pnosphate rock price payable to Trust Fund will be about $0.90 per dry long ton. Florida price published periodically by Engineering and Mining Journal, Metals and Minerals Markets provides fair average value.

Part 5. Estimated total cost of Angaur phosphate rock to U.S. Government under new agreement will be about $3.60 per dry long ton, including severance fee, processing tax, petroleum supplies, and native wages.

Part 6. Reference conditions H-L. Details of administration of Trust Fund in subject msg are not the concern of SCAP or DA but it is believed here that plan is essentially fair to Angaurese as indicated by acceptance of plan by Angaurese. It is also considered that plan largely eliminates possibility of further native opposition during life of project.

Part 7. Copy of formal agreement signed at Angaur will be air mailed soonest for review and approval. Navy Dept receiving copy of agreement from HICOMTERPACIS.

NOTE FOR RECORD:

1. Radmsg 240220Z, 25 Dec 49, from Ch Adm of Fld Hqs Trust TERPACIS to SCAP, informs of agreement reached at Angaur Phosphate Project with regard to continued mining.

2. Ltr FF12(1)/60, A11/CJ;mbd, Ser 013, 24 Dec 49 from Ch Adm of Fld Hqs Trust TERPACIS to SCAP, transmits copy of agreement for continuance of phosphate mining on Angaur Island.

3. The agreement is based in part on the findings of the hydrologic survey team which indicate the absence of a unified behavior of fresh water lens in the phosphate mining area. The team findings do not deny the principle of the Ghyben-Herzberg balance as a factor which may be seriously altered by further mining.

a. The survey team recommended as a condition to continued mining that a minimum of 15 test holes varying in depth from 5-35 feet be drilled in the form of an arc in the area lying to the north of "J" (No 3 area) and between "J" (No 3 area) and "C" (No 1 area) areas. Periodic tests for chloride content from each of these test holes are to be made by the Trust Territory staff hydrologist, to serve as a guide to water conditions.

b. As a further condition to continued mining, the hydrologic survey team recommended back filling, with coral

~~Unidentified~~
Unclassified

rubble, of lakes caused by mining be started at once. The back filling would be suspended when a drop in the salt content of the water was observed.

c. At the insistence of the Angaurese, it was subsequently decided that lake areas would be filled completely so that, in time the lake areas would be restored to agricultural productiveness.

4. Cost of bore hole drilling is negligible. Estimated cost of back filling will amount to about $0.15 per long ton. These costs will be borne by the Japanese Government.

a. The increased cost of the Japanese Government will be more than offset by the reduced mining costs made possible by systematic mining which can now be undertaken as a result of the agreement for mining of specified areas and the removal of mining area restrictions in effect heretofore.

5. Coral rubble for back fill is to be obtained from the taxiway and revetments on the north side of the Angaur airstrip.

a. The airstrip has been abandoned by the Air Force.

b. Permission has been granted by Ch Adm Fld Hqs TERPACIS in para 3 of the Angaur agreement for the use of coral rock from the taxiway and revetments.

6. The severance fee of $2.00 per long dry ton containing 32 percent P_2O_5 represents, in a sense, a retroactive payment for all phosphate rock removed from Angaur under American operation in addition to payment for the remaining 350,000 tons to be mined under the Angaur agreement.

a. Approximately $818,000 will be paid for a total of about 730,000 dry long tons of phosphate rock which will have been removed from Angaur when areas covered by the Angaur agreement are mined out. This represents an average severance fee of $1.12 per long dry ton. This is slightly in excess of severance fee paid land owners in Florida - $0.75 - $1.00 for phosphate rock of comparable quality. The level of the Florida severance fee is governed to some extent by a competitive market which does not exist at Angaur.

7. Payment of the 15 percent processing tax to the Trust Territory, based on the FOB cost of dry Florida pebble phosphate as reported weekly in the Engineering and Mining Journal, Mineral and Metal Market provides a firm basis for calculating value and is in accord with normal ore or rock purchase procedure.

/Urmsg Dec W 98011 -- Import System is subject.

This radio is in 4 parts.

1. Re correspondent relationships of Japanese foreign exchange banks with banks in the United States, following message was dispatched by Foreign Exchange Control Board to correspondents in United States selected by Japanese banks:

"Japanese banks now authorized by SCAP establish correspondent relations with U. S. banks. Proposed to establish with you account in name Foreign Exchange Control Board (agency of Japanese Government) and to arrange for Bank of Japan and following Japanese banks, who have selected you as their correspondent, to operate such accounts, under specific authority:

Bank_____
Bank_____
Bank_____

"For time being, and until you receive notice to contrary, all operations by Foreign Exchange Control Board will be for account of and under supervision and responsibility of SCAP in accordance with power of attorney being forwarded airmail.

"For your information initial accounts have been established by SCAP for FECB with local foreign banks to extent of fifty-three million dollars under provisions of letter of authorization to be airmailed.

"It is proposed you open, or confirm, L/C at request of Japanese banks. FECB will agree to maintain in above account balances which at all times shall be not less than fifty per cent (50%) of all unutilized balances of L/C or other

RESTRICTED

INFORMATION COPY

Handling and transmission of literal plain text of this message as correspondence of the same classification has been authorized by the War Department in accordance with the provisions of paragraphs 16-C, 18-E, 53-A, 53-D (1) (2) (3), and 60-A (1) (2) (3) (4), AR 380-5, 6 March 1946

obligations outstanding and will authorize FECB account to be charged immediately upon negotiation by you of drafts and documents drawn under such L/C for which purpose FECB will have provided full cover.

"Desired to know:

a. If basis of operations agreeable to you.

b. Your commission or other charges will be including charges if any for collection of export documentary bills or other items remitted you.

c. What signing authorities, etc., you would require.

"Request earliest cable reply upon receipt of which final negotiations will be undertaken, including opening of account.

FECBOARD

Care of Bank of Japan Kuden, Tokyo"

SCAP (ESS) representative Lt. Col. W. T. Ryder will confer on technical aspects of normalizing banking arrangements upon arrival. ETA Washington, 5 January 1950.

2. Prior to finalizing arrangements indicated above it is anticipated that Japanese branches of American banks will accord appropriate facilities to their Japanese correspondents on at least the same terms SCAP has received in the past.

3. Re para 2B urmsg Japanese Government License permits continuation of present banking practice.

4. Japanese banks have selected all three American banks as domestic correspondents. Following is a list of American banks abroad and Japanese banks selecting them as correspondents:

Guaranty Trust Company of New York: Dai Ichi Bank, Chiyoda Bank

Wells Fargo Bank & Union Trust Company : Dai Ichi Bank, Nippon Kangyo Bank

Restricted

FROM: SCAP, TO DA ESS/BFE WFM/FJG/RHM/WNR/md

Manufacturers Trust Company	: Tokai Bank, Daiwa Bank, Bank of Tokyo, Chiyoda Bank, Bank of Kobe, Nippon Kangyo Bank, Fuji Bank, Sanwa Bank, Bank of Osaka
Irving Trust Company	: Tokai Bank, Daiwa Bank, Bank of Tokyo, Chiyoda Bank, Bank of Kobe, Nippon Kangyo Bank, Fuji Bank, Sanwa Bank, Bank of Osaka
Bankers Trust Company	: Teikoku Bank
Chemical Bank & Trust Company	: Teikoku Bank
J. Henry Schroder Banking Corporation	: Daiwa Bank, Bank of Tokyo, Bank of Kobe, Sanwa Bank, Bank of Osaka
Bank of the Manhattan Company	: Teikoku Bank, Fuji Bank
The First National Bank of Chicago	: Dai Ichi Bank, Tokai Bank

In practical operations it is believed that Japanese banks will of necessity (limited exchange availability) confine themselves to a maximum of three correspondents.
