Ministry of Welfare Notification No. 108

December 28, 1948

Part of Ministry of Welfare Notification No. 66 of February, 1943 (Methods of Calculation of the Amounts of the Expenses needed for the Medical Treatments in accordance with the Provisions of Health Insurance Law and Seamen's Insurance Law) shall be amended as follows and applied on and after December 15, 1948:

Minister of Welfare
HAYASHI Joji

A. In the Table of Points for Medical Fees in the Appendix, Department of Hospital Charges:
"Note 7. In Hokkaido the witer fuel expenses shall be added one point a day. But the term demanded the fuel expenses shall be from last November to next April," shall be abolished.

B. In the Table of Points for Dental Fees in Appendix, Department of Hospital Charges:
"Note 4. In Hokkaido the winter fuel expenses shall be added one point a day. But the term demanded the fuel expenses shall be from last November to next April," shall be abolished.

Ministry of Agriculture and Forestry Notification No. 275

December 28, 1948

The Regulations for Chemical Analysis Entrusted to the Live Stock Experiment Station of the Ministry of Agriculture and Forestry shall be provided af follows, and the Live Stock Experiment Station's Chemical Analysis and Testing Regulations (Ministry of Agriculture and Commerce Ordinance No. 1 of 1920) shall hereby be abrogated:

Minister of Agriculture and Forestry
SUDO Hideo

Regulations for Chemical Analysis Entrusted to the Live Stock Experiment Station of the Ministry of Agriculture and Forestry

Article 1. Any person who intends to entrust the analysis of materials concerning stock-raising to the Live Stock Experiment Station shall apply to said Station by presenting a requisition for analysis according to the Attached Form together with the samples of materials for analysis.

Article 2. The quantities per subject of samples of materials for analysis which are to be presented together with the requisition for analysis in accordance with the provisions of the preceding Article shall be as follows; provided that the Chief of the Live Stock Experiment Station may, if he finds it necessary to do so, cause to increase the prescribed quantities to be presented:

Feeding stuffs	
1. Dry grass	2 kg.
2. Raw grass	3 „
3. Leafy vegetables	3 „
4. Root crops	5 „
5. Kinds of straw	2 „
6. Rice bran, wheat bran and other husks	2 „
7. Fruits and seeds	500 g.
8. Kinds of less and refuse	500 „
9. Stalks and leaves of plants as not mentioned in any of the preceding items (dried ones)	2 kg.
10. Stalks and leaves of plants as not mentioned in Items 1 to 9 inclusive of the present Article (not dried ones)	3 „
Live-stock products and processed goods thereof	
1. Milk	1 litre
2. Butter, condensed milk and other milk products	500 g.
3. Meat	500 „
4. Canned meat and other meat products	500 „

Article 3. The quantities to be presented of samples of materials other than those mentioned in the preceding Article shall be designated by the Chief of the Live Stock Experiment Station in accordance with the provisions of the preceding Article with the necessary modifications.

Article 4. Those who intend to make requests for analysis shall pay fees according to the following classification:

1. Qualitative analysis	
Feeding stuffs	
For each component of a subject	¥ 100
Live-stock products and processed goods thereof	
For each component of a subject	100
Analysis for extraordinary component of any of the abovementioned materials	
For each component of a subject	300
2. Quantitative analysis	
Feeding stuffs	
For one component of a subject	200
For each additional component	100
Live-stock products and processed goods thereof	
For one component of a subject	300
For each additional component	200
Analysis for extraordinary component of any of the abovementioned materials	
For each component of a subject	1,000

2 The amounts of fees for analysis of other materials than those mentioned in each of the preceding items shall be determined by the Chief of the Live Stock Experiment Station in accordance the provisions of each of said items with the necessary modifications.

Article 5. When an analysis work has been finished, the Chief of the Live Stock Experiment Station shall deliver to the requester a record of the analysis.

Article 6. A person who intends to ask for duplicate copies of a record of analysis shall state to that effect in the requisition for analysis.

Article 7. A person who asks for duplicate copies of a record of analysis shall pay a fee of 20 *yen* per copy. If such duplicate

copies are to be made out in an European language, a fee of 50 *yen* per copy shall be paid.

Article 8. The fee shall be paid in revenue stamps.

2 Such revenue stamps shall be affixed on the requisions for analysis.

Article 9. The Chief of the Live Stock Experiment Station may reject a request for analysis, if he considers it unnecessary to effect such analysis.

Article 10. Samples presented for analysis are not returned; but the requests for analysis which have been rejected are returned when and only when requests for returning of them have been made within two weeks from the day on which notices of such rejection were made. In this case, necessary expenses for returning the samples presented shall be borne by the applicant.

Article 11. If it has been decided to comply with a request for analysis an official in charge of the analysis shall affix a cancellation stamp to the revenue stamp.

Additional Provision:

The amounts of fees as prescribed in the Imperial Ordinance No. 31 of 1920 (concerning Fees for Analysis and Testing to be made in the Live Stock Experiment Station) shall be deemed to have been revised by the present Notification.

AMOUNT OF CATCH FISHERY

(1) Fishery in sea waters

Matters to be attended to for nothing down

1 Fishery in sea waters means fishery performed in sea waters and includes fishery performed in waters of low salinity where tide meets river current. Accordingly the catch of fish in the estuary, the lagoon and the like which are situated near the sea and in which tide runs are also computed in fishery in sea waters.

2. In this table the catch in the case of fish culture in paddy field, of culture of aquatic products, of fishery managed by the Government, of Norwegian whaling, of floating factory fishery, of trawl fishery, and of Danish seine fishing in waters at the west of longitude 130° E. shall be excluded.

3. How to note down in "Part 1. Amount of catch for each species of fish."

A. In the blank columns of (49), (50), (51), (52) and (53), the species of fish caught especially in abundance and their amounts of catch among the fish which are excluded from the items notified in this table, summarized and computed in "(54) other species of fish" shall be investigated and noted down. The governor of the Metropolis, Hokkaido or prefecture or the chief of their branch shall sum up and note down the amount of catch of five species of fish caught especially in abundance based on the reports submitted by the mayor of city, the headman of town or village.

B. "Tengusa" (89) includeds "obusa," "hirakusa," "obakusa" and "onikusa."

4. How to note down in "Part 2. Amount of catch for each kind of fishing."

A. In this table the amount of catch for each kind of fishing in sea water shall be investigated and noted down for each kind of catch mentioned in the items.

B. In this table the amount of catch of fish other than that described in each item mentioned in the following shall coincide with the amount of catch described in the corresponding column in "Part 1. Amount of catch for each species of fish.": The column (u) indicating the total amount of catch for each kind of fishing of "other fish" (45), "crab" (54) and "others" (55).

5. Explanation of each kind of fishing.

A. Gill net fishing.

This is the fishing such that the fish are caught by being sticked in the meshes of the net or by being wrapped up in it when the net of band type is stretched at the place where fish move and pass. The fishing gears used for this purpose are classified into three kinds according to the method of fishing, namely, drifting gill net, floating gill net and bottom gill net.

(a) Drifting gill net fishing.

This is the fishing using the drifting gill net which is generally called drift net. The floats are put near water surface (the net is rarely drifted on water bottom), the net is stretched down in a straight line, in a hook shape or in a wave form and in drifted in water current and the fish which swim upstream and downstream are caught by being sticked in the meshes of the net. Such floating fish as bluefin tunas, dog salmons, salt water trouts, flying fish, mackerel pikes, common mackerels, Spanish mackerels, herrings, etc. are thus caught.

(b) Other gill net fishings.

These are the fishings using other gill net than drifting gill net: that is, floating gill net or bottom gill net. In either the fishing gear in placed in a fixed position. Drifting gill net is stretched near water surface while bottom gill net is sunk on water bottom. Herrings, codfish, bastard halibuts, flounders, sharks, yellowtails, shrimps, etc. are thus caught.

B. Set net fishing.

This is the fishing using the net of circular, triangular or quadrilaternal ground furnished with frame of wood, bamboo or metal. The fish are caught by pulling up the net which is set in water when they come naturally on the net or are collected on it by inducement, menace, etc. This is classified into floating set net and bottom set net, the former is set near water surface while the latter is set on water bottom.

(c) "Boke" net fishing.

"Boke" net belongs to floating set net and is of square or rectangular shape. The net is projected with timber, bamboo, etc. over the gunwale, stretched against tidal current and spread in gulf form. The fish are caught by pulling up the net when baits are scattered and fish are collected in the net. The fishing performed on a large scale with powered fishing boats in included in this fishing. The fishing using all kinds of "boke" net, "yatsude" net. etc. also belong to this fishing. Such floating fish as horse mackerels, common mackerels, sardines and frigate mackerels are thus caught.

(d) Other set net fishings.

The greater part of these is bottom set net fishing "shiso-hari" net, "hachida" net, "ikanago" (sand lance) net, etc. being to bottom set net. These fishings differ from that using "boke" net. The net is sunk on water bottom and the fish are caught by pulling up the net when they come on it.

C. Purse net fishing.

The common method of fishing using purse net is as follows: The fish are surrounded with the net of band shape and the enclosure is gradually contracted until the fish are caught. This type of net is generally of rectangular band shape and furnished with some floats. Some bags are attached to a portion of net or sometimes no bag is furnished according to the convenience of fishing, the former is called purse net with bags while the latter is called purse net with no bag.

(e) Pulling-up and winding purse net fishing.

The purse net with no bag is used. This purse net is furnished with some metallic circular rings at its skirt. A rope for binding the net is passed through the rings. As soon as a school of fish is surounded with the net, the rope is tightened to the shape of a bag by dropping the weights so as to tighten a purse with a cord and then the net is pulled up. The pulling-up and winding net for catching sardines, the purse seine, the "rokunin" net, the "gochi" net, the "tobiuo-maki-ami" for catching flying fish, the pulling-up and winding net and the purse seine for catching mackerel pikes and thread herrings, etc. belong to this kind of net.

(f) Other purse net fishings.

The principal kind of these fishings is performed with this purse net with bags. The representatives are the binding net for catching sea breams and Spanish mackerels, the pulling-up and winding net for bluefin tunas and bonitoes, the "kojita" net for sardines, "yasaka" net, etc. The method of fishing performed with any kind of these nets is as follows: The fish are surrounded, the enclosure is contracted, the school of fish is driven into the net and then the net is pulled up. Besides the nets mentioned above there are the nets which are to be properly called purse gill net, "kakehi" net etc. as considered from the shape of net used, but the method of fishing with these net being similar to that of purse net fishing, the amount of catch performed with these nets shall be computed in the column of catch with purse net.

D. Drag net fishing.

This method of fishing is such that the total fishing gears are dragged in order to drive the fish into the net. The drag nets are commonly furnished with wing nets on both sides of bag net, but some drag nets are furnished with bag nets only and some are as flat as planks. The drag nets are classified as follows according to the method of fishing:

Drag collect net.

The round haul net which is hauled up to shore, the boat drag net which is dragged towards the boat placed in a fixed position, the "teguri" net, etc. belong to this kind of net.

Drag around net.

The trawl net which is dragged about close to water bottom by a boat, the Danish seine, etc. belong to this kind of net.

(g) Round haul net fishing.

The fish are arrounded with the net which is commonly furnished with a bag and two wings (sometimes with no bag) and are caught by collecting them in the net which is hauled up with a long drag rope to shore. Thus the greater part of coastal fish is caught.

(h) Boat drag net fishing.

The boat drag net is similar to the round haul net in shape and in being furnished with a bag and two wings, but is commonly smaller than the round haul net. This net is held from sinking to water bottom by using some floats attached to the net and s dragged close to water surface towards the boat which is placed in a fixed position.

(i) "Teguri" net fishing.

The "teguri" net resembles the preceding two but is still smaller. The method of fishing performed with this net resembles that of boat drag net fishing but differs from that of boat drag net fishing in that the whole net is sunk on water bottom and all the sinkers are continually dragged close to water bottom. Accordingly most demersal fish are caught with "teguri" net while floating fish are caught with boat drag net.

(j) "Utase" net fishing.

This is performed with drag around net while the preceding three are performed with drag collect net. The bag net furnished with "sodeami" (sleeve net) is sunk on water bottom, dragged about by moving the boat transversally and the fish caught in the bag. Various kinds of fish, shellfish, shrimps, etc. are thus caught.

(k) Eastern waters small trawling.

This is the fishing performed with drag around net and in waters to the east of longitude 130° E. among the fishings prescribed in the provisions of Article 1 of the Regulation for Control of Danish Seine Fishing. Accordingly the Danish seine fishing performed in waters to the west of longitude 130° E. shall be excluded.

(l) Other drag net fishings.

These are the other drag net fishings than those mentioned above.

E. Fixed net fishing.

This is the fishing which is performed with the net placed in a fixed position during a fixed period. Although the principal kinds of this belong to the fixed net fishing prescribed in Fishery Law, there are not a few kinds belonging to fixed net fishing besides it. Only the "ami-eri" fishing among the fishing performed with "eri," "yana," etc. prescribed in the Fishing Law is the one described here as fixed net fishings. The fishing in the case of setting some fishing gear other than net is not the fixed net fishing described here, even though it is called the fixed net fishing.

(m) "Dai-ami" fishing.

The "dai-ami" consists of two parts, namely, bag net, and fence net or of three parts, namely, bag net, enclosure net and fence net. The n t used for leading and entrapping the fish directly into bag net is called "dai-ami." The fishing performed with "dai-ami" is called "dai-ami" fishing. The fishing using bluefin tuna pound net, yelowtail pound net, sardine pound net, etc. belong to "dai-ami" fishing.

(n) "Otoshi-ami" fishing.

The "otoshi-ami" consists of three parts, namely, fence net, enclosure net and bag net, or of four parts, namely, fence net, enclosure net, flag net and bag net. The fishing using yellowtall "otoshi-ami," sardine "otoshi-ami," "kodai-ami," codfish "hyo-ami," etc. belong to "otoshi-ami," fishing.

(o) "Masu-ami" fishing.

The "masu-ami" consists of three parts, namely, fence net, enclosure net, and top bag net called "rou" (trap) or bottom bag net called "tsubo" (pot) either which is put at the bending portion of enclosure net. The fishing using various kinds of "masu-ami," "tsubo-ami," etc. belong to this fishing.

(p) Fishings performed with other kinds of fixed net than the preceding three.

The greater part of these is the fishing using "tate-ami," "dashi-ami," "hari-ami" and "ami-eri" among "eri," "yana" etc. in the fixed net fishings prescribed in the Fishery Law.

Price Board Notification No. 1313

December 28, 1948

Price Board Notification No. 647 of August, 1948 (concerning the designation of the controlled selling prices of processed aquatic products) is partly revised as follows:

This revision was publicly announced in the Nippon Keizai Shimbun, the Sangyo Keizai Shimbun as well as the Chubu Keizai Shimbun by Price Board Public Announcement No. 78 of December 26, 1948, in lieu of formal notification in conformity with the proviso of Art. 4 of the Enforcement Regulations of the Price Control Ordinance.

Director-General of Price Board
pro tempore
Minister of State
SUDO Hideo

III. In the controlled selling prices of frozen fishes, ¥ 24.00, the price (C) of the controlled selling prices of retailer of C grade articles, shall be revised to ¥ 26.00.

The third clause of No. 7 (A) of the statement attached to Item III, stipulating that "'Shomi' shall mean the fish removed of its head, intestines, back-bone and tail as well as slices thereof" shall be amended as "'Kirimi' shall mean the fish removed of its head, intestines, back-bone, fins, 'kama' (bones at the base of the neck) and tail or slices thereof. When 'maru' is sold in slices of less than 100 *momme* each, the back-bone may be left unremoved."

The fourth clause of the same item, stipulating that "'Seiniku' shall mean the fish removed of its head, intestines, tail and skin as well as slices thereof" shall be amended as "'Seiniku' shall mean the fish removed of its head, intestines, back-bone, fins, 'kama', skin and tail, and slices thereof. In the case of 'aburazame' and 'tsunozame' their 'seiniku' may retain the back-bone".

The passage in the first clause of No. 7 (B) of the statement attached to Item III, stipulating that "—and the controlled prices of 'seiniku' shall be raised by 60 per cent over the controlled prices in this list respectively" shall be amended as "—the controlled prices of 'kirimi' and 'seiniku' (except whales and dolphins) shall be raised by 60 per cent over the controlled prices in this list and the controlled prices of 'seiniku' of whales cut into pieces of less than 20 'momme' each shall be raised by 15 per cent over the controlled prices in this list".

The following shall be added after No. 12 of the statement attached to Item III:

13. Notwithstanding the controlled selling prices stipulated in the price list, the prices of "renko-dai" and "buri" shall be as follows for the time being effective from December 26, 1948:

Controlled selling price

	Wholesaler per *kan*			Retailer per 100 *momme*		
	Price (A)	Price (B)	Price (C)	Price (A)	Price (B)	Price (C)
"Renko-dai"	¥ 336.00	¥ 363.00	¥ 407.00	¥ 38.70	¥ 41.60	¥ 47.00
