7. Statement as to the major economic trends observed in prefecture.

In this month we got informations as followes.

| | | |
|---|---|---|
| 1. Textile (Clothes) | 16 | cases |
| 2. Rubber ("chika-tabi") | 5 | " |
| 3. Fertilizer | 3 | " |
| 4. Sugar | 4 | " |
| 5. Miso & Soy | 3 | " |
| 6. Soap (in cluded caustic soda) | 3 | " |
| 7. Iron | 2 | " |
| 8. Non-ferrous metals | 1 | " |
| 9. Mesecellaneous | 3 | " |
| Total | 40 | " |

Above 40 cases, major economic trends are as folbwes.

1. Concerning price of nickel

(1) Production of our whole country amounts about 5 tons a month, BESSHI Mining Co., also ~~also~~ almost depends on re-production from scrap amounts only 1 ton a month, its depends on SHIMURA chemical Ind. Co., (Tokyo-to) Now, there's no price control, but only route control.

(2) Price & Demand & Supply

Now, at BESSHI Mining Co., Quotations are ¥ 2.000.000 at ton, but market price are about ¥ 3.000.000.

Demand & Supply of its problem are extremely unbalance, so first class wholesalerss endeavoured changed into goods, but only 500 kg are maximum, then we are wishing to take proper action from imports treatment, but owing to the military expansion, its rather difficuet, so demand & supply of this case are very scarce now.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

2. Receipt of raw materials of Miso & Soy now-a-days.

(1) From July 1950 price control of miso & soy were abolished, so each maker workhard come to hand raw materials, especially. Oct. 20 1950 shimmed bean's control were abolished, its prices run over two times of fixed price, but March 1 1951 price of beans abolished, so that price of skimmed bean also come down, now about ¥ 40.000.

(2) Receipt conditions of raw materials (mostly beans) in Tokyo area makers.

(a) Miso Traders (Tokyo-to Miso Ind. Cooperative Union)

| Date of receipt | Quantity | Price (@ ton) | Reference |
|---|---|---|---|
| Oct.'50 | 10.000 kg | ¥ 28.880.00 | |
| Nov. | 365 " | ¥ 32.187.67 | |
| Dec. | 190.5 " | ¥34.845. | Purchased from TOKYO RYOKOKU |
| " | 131.35 " | ¥ 54.627.91 | GARIOA Fund |
| Feb.'51 | 1.370 " | ¥ 57.598.35 | 4th Bit |
| " | 670 " | ¥55.528.51 | 5th Bit |
| March'51 | 2.400 " | ¥ 48.566.66 | Made by HOKKAIDO |
| " | 666 " | ¥ 62.800.00 | Purchased by Civil trade |
| " | 308 " | ¥ 48.000.00 | Made by Hokkaido |
| Total | 7060.850 " | | |

Conclusion reached

a. Present situation : Beans are optimistic about the future.

b. Aim of using raw materials in Tokyo area in a month :

Bean 1.300 kg crashed rice 700 kg

c. Amount of one month production :

1.000.000 kan

d. Present production : 850.000 kan.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(b) "Shoyu" Soy traders (Tokyo-To SHOYO Ind. Cooperative Union).

| Date of receipt | Quantity | Price (@ ton) | Reference |
|---|---|---|---|
| 13 th | 34 kg | | |
| 14 th | 158 ton | | |
| 15th | 63 " | | Additional |
| " | 44 " | | 4 th Bit |
| Feb. '51 | 30 " | ¥54.600 | |
| " | 110 " | ¥61.000 | 4 th Bit |
| " | 51 kg | ¥57.000 | Mate by Hokkaido |
| March '51 | 60 " | ¥54.500 | 5 th Bit |
| " | 150 tbn | ¥56.500 | " |
| " | 270 kg | ¥48.000 | Allocated beons made by Hokkaido |
| " | 500 " | ¥48.000 | Civil trade |
| Total | 1.470 kg | | |

Conclusion reached :

Supply of soy in Tokyo area.....20 % (All Japan)

Forecast of "MISO" trade are not so good.

3. Open hearth makers & scrap.

(1)Product planning of iron & steel during year of 1951

Pig iron.....3.200.000 T

Steel.....4.000.000 "

MITI (Iron & Steel Bureau) decided above figures, but they are now discussing more increasing products.

On this in creased production, broblem, Open hearth makers & iron steel makers, there's a crash of interests.

From April, pig-iron control were abolished, so demand & supply, and prices are perfectly catched by iron & steel makers, so the open hearth makers can't earn any interest if the iron makers should not be sold them.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(2) Difficult receipt of scraps.

Open hearth makers depend upon scraps very much, then now-a-days (date of Feb. 20) amount of scraps about 2450.000 T in all Japan, its prices ¥23.000 (@ ton) ) 1st class scrap.

Scraps are decreasing year by year, but demand of iron & steel are increasing day by day, so the scrap traders are very bullish.

So the open hearth makers faces very difficult condition of receipt scraps, then we consider import of scraps are very necessary to solve ~~to solve~~ this problem.

4. Real state of imported Banana

(1) Import route of Banana

(a)Non exchange import

(b)Escrow Barter system.

(3) Price

(A) Import price

C.I.F.....100 pounds 7.5 $

(B) Wholesale price (100 pounds) 8 - 10 $

(C) Retailer's price( " ) 3 - 14 $

Blackmarket price equals Eserow Barter System.

Wholesale (100 poinds).....¥5.000 - ¥6.000

Retailers (100 momme).....¥ 80-4 ¥ 100

Conclusion reached :

Realstate of sell & buy of banana, there's no sold at S.P.S. Shop, mostly blakmarketeering into illegal channels.

(1)To transfer of Lisence

(2)Blackmarketeering at the time of non pass custome's inspection (B/L)

(3)Blackmarketeering at non processed finishing goods.

5. Real state concerning after the standard price of raw silk were decided

| Present | ¥ 250.000 |

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

You will see above figures that the price advance is very high, date of Feb 20. about ¥300,000.

Peason are as followes

a. World inflation

b. England purchased raw silk

c. Owing to the price advance of textile goods (especially in staple fibre)

(2) Endition concerning price advance of silk fabrics

Item unet yen.

| | Mon ameshi | Irezake-Meisen | Ringu | Makor Prue | Market price |
|---|---|---|---|---|---|
| July | 5000 | 1450 | 2200 | 145,873 | 150,000 |

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

7. Statement as to the major economic trends observed in prefecture.

On this problem major-economic trends observed in our office as followes.

( (1) Item : About the decision of rese in price of soy

Outline : KIKKOMAN NODA SHOYU (SOY)Co., (dated Feb. 27)

declared to wholesalers rice in price as followes.

a. Maker price

| Quantity | Present price (Cost yen) | New price | Percentage |
|---|---|---|---|
| 1 cask | 830 | 960 | 15 % |
| 1 Bottle (2 Lt. 10 Bottles) | 1.300 | 1.440 | 13 % |

b. Wholesale price

| | | | |
|---|---|---|---|
| 1 cask | 865 | 1.000 | 15.7 % |
| 1 Bottle | 1.345 | 1.500 | 11.6 % |

c. Retail price

| | | | |
|---|---|---|---|
| 1 cask | 1.000 | 1.150 | 15 % |
| 1 Bottle | 1.500 | 1.200 | 13.3 % |

Now the traders say that the production of future are fovourable, also cost of the raw material are mostly fixed, so the retailer's price may be fixed, but we can't say positively.

(2) Item : About the real state of knitted goods traders

Outline : (1) Number of traders in TOKYO area

Traders which were received distributed cotton.....112

Received allocation of raw materials.....18

Work without distributed cotton.....about 50

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(2) Whole quantity of dispribution

Concerning Knitted goods in Tokyo area

2nd quarter of 1950.....99.200 pounds

3rd " .....67.260 "

4th " .....about two times of 3rd quarter

(3) Change of products price from Korean upheaval & present price

| | @ 1 kan (Products Price) yen | Free price (#20 Cotton yarn) |
|---|---|---|
| July | 4.000 | 132.000 |
| Aug. | 5.800 | 265.000 |
| Sep. | 5.300 | 190.000 |
| Oct. | 5.300 | 195.000 |
| Nov. | 5.400 | 195.000 |
| Dec. | 5.000 | 170.000 |
| Jan. '51 | 5.000 | 175.000 |
| Feb. | 6.300 | 340.000 |

From Korean upheaval, prices of textile goods go up very high, but knitted goods are not so rise compare with textile goods, because stocks in all Japan released great deal of them. So the present product price still remains 30 % high of supreme price of 1950.

(4) Forecast

1. In creased distributed cotton yarn.
2. Present price consider at the limit point of pur chasing power of all Japanese consumers.
3. Taxation

From above terms, we consider that present price are maximum.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(5) Item : Present situation & termenal price of secondary product of clothes.

Outline : For example

(1) Yshirt.....terminal price.....¥1.503

Fixed ©yds.....¥90
Free price.....¥180

180 X 25yds + 144 (sundrées) = 594 (maker's cost)

594 + maker's margin + retailer's maigin = Retailer's price (about ¥800)

So if we use best material, it can not be over terminal price, but if we purchare blackmarketeering price and processed it, there's no profit in sale price of secondary product.

(2) Cooking clothes.

Present wholesale price.....¥350-380

Quantity of using matemals.....1.8 yds.

Processing Cost.....¥500

Fixed price 90 X 1.8 + 50 = 212

Free " 180(Free price) X 1.8 + 50 = 382

Change into goods of coupon are very difficult, so the traders use de ccntrolled matemals.

(6) Item : Real state of Socks traders concerning price

Outline : (1) Number of traders in Tokyo area

a. Over 100 persons

I NAIGAI AMIMONO K.K.

II DAINIHON SENI "

III NAKAJIMA MERIYASU K.K.

IV NIHON KUTSUSHITA "

V NIHON MERIYASU "

VI TOKYO KUTSUSHITA "

VII SANKYO KEORI

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

b. TOKYO-TO Socks Business Cooperative Union.....263

c. Works but not entere & Union..... about 50

Remarks : Total sum 30o, but ther's no distribution of cotton such as newly entered traders & not entered Union (50)

(2) Grand total of quantity of cotton which were distributed to Union (Tokyo area)

3rd quarter.....26.520 pounds

4rd quanter.....65.500.....(For general)
18.210.....(For labourer)

Total.....83.710 pounds

(3) Trend of blackmarketeering cotton yarn

Above mentioned 76 shops are not dispributed cotton yarn, so they depend on blackmarkeeting cotton yarn only,

Then we think about two times of rationed yarn may be divert into illegal channel.

(4) Present sale price & blackmarketeering price.

Now the present price differ between department-store retailer shop and stalls also there are great difference by quality & using quantity of cotton yarn.

12 socks : 1200 pounds (@ ¥100)

Quantity of using cotton yarn

1st class(maker).....145 monme(1 monme means 0.1325 ounces)
2nd " ( " ).....120 "
3rd " ( " ).....100 "

| | | |
|---|---|---|
| Retailer's price | (12 socks) | ¥1200 |
| Wholesaler's | " | ¥900 |
| Maker | " | ¥765 |

Conclusion reached

Traders which were distributed cotton yarn shall be purchase rather high cost yarn by combined rationed & blackmarkeyeering yarn. Traders without ration yarn also shall be gain sufficient margin if he sale retailers dire ctly

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

1.Outline of discussions:

(1).Present of the handing over of Food Distribution Corporation's business to Private deallers.

With regard to this matter, Food Section Chief Kataoka explained as follows:

Necessary measures are being taken gradually pertaining to the handing over of the corporation's business. We, the authorities concerned, are specially careful to take appropriate and fair measures in placing the food distribution under private management. The success or failure of the operation of the new system will have a great effect upon the general situation. The inappropriateness of operation will hinder food distribution and will cause a rise in the black market prices of foodstuffs resulting in the activity of black marketeering.

Owing to the recent postponement for one month of the commencement of purchase of foodstuffs for retail business, rationing was delayed in a certain part of the metropolis, and furthermore, the difficulty caused in communications by the recent snowfall upset the food transportation plan. Under these circumstances, black-market prices of staple food rose in some localities of this city. The food controlling authorities are therefore, desired to do the best they can in coping with the situation.

After the above statements, the Food Section Chief asked for an explanation about the present aspect of rice distribution by private dealers in Tokyo-to and also about the future policy of the Metropoletan authorities.

In reply, the chief of the Foodstuff Section, the Metropolitar Office, stated:

With regard to rice-cleaning mills, the regulations governing their business were enacted on January 16 and under these regulations a rice mill is required to be equipped with a motor of not less than 2 hp. and any person exclusively engages in rice-cleaning is required to have a business office not less than 8 tsubo in floor space. It is expected

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

that private dealers will gradually become able to have their own rice mills.

As regards the measure of the Metropolitan Office for controlling private dealers, mayors of cities and headmen of wards, towns, villages will send competent officials to rice-shops once or twice each month to inspect the quantity handled and various books. In addition to the simultaneous inspections to be made by the Metropolitan Office twice a year, the National Rural Police and the Investigation Bureau of the Metropolitan Police Headquarters are desired to inspect retail rice-shops from time to time.

In respect to the wholesale dealers, there were conflicts among them before their recent registration and various types of firms competed one another and therefore, it is considered difficult to form 21 firms into one organization. The cooperation of various authorities concerned in this matter is earnestly desired.

After the Chief of the Tokyo District Economic Investigation Bureau confirmed that there was no more query among those present, the meeting took up Item (2).

(2).Control of restaurants:

Food Section Chief Katacka Stated:

The control of black market peddlers and prevention of the illegal serving of guests with staple food by restaurants are impertant measures to check the flow of staple food into illegal trade and to ensure the control of such food. As Tokyo is the greatest city of consumption in this country and the flow of staple foos into this city through illegal channels and its consumption here will have important bearings, because of its enormous quantity upon the effective control of staple food in this country.. In view of the fact, various authorities are making every effort to rectify the existing situation and the measures so far taken have produced desired effects to some

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

extent. However, as the regulating law now in force will lose effect on and after May 1 this year, it is desirable to discuss control measures after that date though future measures are said to be considered by the Economic Stabilization Board and the Ministry of Agriculture and Forestry.

By so saying, the Food Section Chief explained the reasons for introducing Item (2).

The representative of the Metropolitan Police Headquarters said that they would inspect places of amusement once a week with a view to controlling staple food while the representative of the National Rural Police exlained that though they were takingcontrol measures independently of the Metropolitan Police Headauarters, food control was companied with considerable difficulties.

On the other hand, the representative of the Public Prosecutor's Office express the following view:

We have heard that the Government reached a decision in respect to the regulating law, but those against whom legal proceedings are now being taken, will have to be acquitted unless the Government takes a definite step pertaining to the law. We are, therefore, watching future development with much concern. If only small persons fall into the meshes of the said law as in the past, its extension is considered to be unnecessary.

The Foodstuffs Section of the Metropolitan Office was of the opinion:

As the competent authorities who take administrative measures againt offenders, they feel the law is inconsistent with actual situation in certain respects, but the extension of the law for some time to come is desired in view of the existing food situation.

The Chief of the Tokyo District Economic Investigation Bureau explained that as long as the law was in force the control should be exercised effectively and that the fundamental question might be considered in future.

(3).Revision of Regulations concerning Distribution of the Imported Necessaries of Life on the Designated List.

Sudo, the Chief of the Second Materials Section gave explanations on the subject. It was revealed, according to his statement, that the sugar for foreigners' use imported by foreign firms on a non-drafting basis was not being duly delivered to the third power nationals, who are its intended consumers, but was mostly channeled to Japanese consumption at illegal prices, and that the illegal deals were estimated to involve several billions of yen per annum. Since November last year, the authorities concerned have been conducting inquiries into the matter and found the basic causes of such illegal deals in the following two factors:

1. Deficiencies in the management of the system, such as the absence of restrictions on the volume of import and on the issuance of licenses for making the S.P.S. registration:

2. Deficiencies in the Regulations concerning Distribution of the Imported Necessaries of Life on the Designated List, which are designed to control the activities of this kind.

The shortcomings of the relative regulations have long been recognized. Only, it has not been possible to gather the concrete facts on which to base the revision. However, the investigation conducted by the E.I.A. over a period of three months has produced numerous data to prove and substantiate such shortcomings, and paved the way for an early revision of the relative regulations. As the result, the revised regulations were announced on February 24 to come into force immediately. Then Sudo explained on the revised requirements for the registration.

(4).Opening of a Bureau to Deal with Complaints about Necessaries of Life.

Takano, the Chief of the First Division, stated that in view of the recent tendency of marked rises in the prices of the necessaries of life the local offices throughout the country started on February 23

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

a public contact business to have the consumers' complaints about prices laid before them, and to take immediate and appropriate steps to cope with the situation. For the time being, he desired to deal with nine articles under the proposed scheme, and to take thoroughgoing controlling measures by applying the regulations concerning exorbitant prices and the like to such articles for daily use as were not officially priced, and giving judgement on any case of excessive profiteering in the light of personal experiences in each instance. Thus he explained the outline of his proposed scheme. In answer to this, the Public Procurators' Office gave expression to its views that, while the proposal was certainly a noteworthy one, the idea of excessive price varied with the prevailing social conditions and had to be defined with utmost caution, that the real trouble lay therein that the controlling measures of the Government lost force at the consumer level, so that efforts should more properly be directed to the eliminationof bottlenecks at such level in order to contribute to the satisfactory enforcement of the measures of the Government, and that it would be premature to accept complaints and to suspect the existence of offences. Thereupon, Takano, the Chief of the First Division, thanked the Public Procurators' Office for its suggestive counsel, and asked the authorities concerned to give cooperation in enforcing the controls. As there was no other concrete proposals for the present, it was decided to leave the subject for deliberation at the next opportunity. Having finished with all the subjects on the agenda, and with the agreement of the majority of those present, the meeting was adjourned.
