Japanese name	English name	Method of dissection	Minimum quality standards: From April to October	Minimum quality standards: From November to March	Conversion Rate
Katsuo (including soda-katsuo) namari	Half broiled & dried benito	Meat boiled and lightly dried	No salt, under 40% water content	No salt	45%
Soboshi karei	Dried Flatfish	Open, with head, entrails removed (with entrails when less than 3 inches large)	No salt under 25% water content	No salt	20%
Soboshi kasube	Dried Skate	Open, with head, entrails removed (with entrails when less than 3 inches large)	No salt, under 30% water content	No salt	30%
Yaki-zame	Baked shark	Fillet	Over 2% salt, under 40% water content	Over 2% salt	30%

* Conversion rate refers to the proportion of the weight of fresh fish which the processed fish should represent. For instance, 100 kan of fresh horse mackerel (aji) cannot make more than 30 kan of salted and dried horse mackerel (enkan aji); 100 kan of yellowtail (buri) cannot make more than 65 kan of salted yellowtail (enzo buri) - if both are properly processed. (over)

This rate will also be applied to determine whether the shipment program is fulfilled. For instance, if the program calls for the shipment of 1,000 kan of fresh fish, 300 kan of salted and dried horse mackeral (enkan aji) or 650 kan of salted yellowtail (enzo buri) may be shipped as a substitute therefore provided conditions do not permit shipment of fish in their fresh state.
