THE LUZENBERG HOSPITAL,
(NEW DR. LAYTON'S)

Is being duly fitted for all classes of diseases—medical treatment and medicines furnished. Conducted on the plan of the Houses of Refuge in Paris, it will unite to the advantages of the Hospital, the comfortable home of a home, and avoid the impure air of crowded hospitals by receiving a limited number only. Its attendants will be employed for the cure of not only Syphilis, but also Scrofula, Rheumatism, Gravel, Dropsy, Fever and Ague, etc. It has all the advantages of a country retreat, while it is at the same time of easy access to all of the city. Terms of admission, $1 per day. A deposit of ten dollars required on entering. Extra accommodations for half a dollar. Stages will be accommodated and attended to. Hospital portions are furnished without extra charge—those for interior alone excepted. ... until ly

POLITICAL EXAGGERATIONS.

The political press of the United States has been accused of a proclivity to gross exaggeration, if not absolute mendacity. The charge is not without a foundation in truth. We take it that the conductors of the American journals are, in point of honesty and moral standing, about on a par with the members of other professions; but the lucubrations by which those who devote themselves to party are surrounded are well nigh irresistible. No sooner does the year of a Presidential election begin than the effervescence and excitement of active politics are inaugurated. Enthusiastic partisans make the welkin ring with praises of their candidates, and vituperations of their opponents. The people of the United States become for the nonce political fanatics, and will neither hear nor believe any thing unfavorable either to the character or prospects of their favorites. The press naturally enough catches the infection, and weaves daily more ardent and zealous, until, in the overwhelming excitement of the occasion, whatever is hoped for becomes an article of faith, and whatever is feared is dismissed as incredible and impossible. None of us are perhaps wholly above the intoxicating influences of this quadrennial excitement. There are a few who manage to preserve some sobriety and self-control in the midst of the hubbub and disorder, and who are, therefore, justly regarded as trustworthy authorities.

We were led to the foregoing remarks by witnessing a day or two ago a conversation between two gentlemen—both warm politicians—the one a Bell and Everett man, the other an adherent of BRECKINRIDGE. The latter expressed his indignation at the want of candor in the Constitutional-Union journals. "Look," said he, "at the columns of ——. Do they not teem with assurances of the election of BELL and EVERETT? To listen to the editor, would not any one imagine that there was not the slightest chance of the success of any other candidate? This I call positively dishonest." "Very true," replied his friend; "but is not this exaggeration somewhat pardonable? Is it not the result of party zeal, which uncon-sciously induces those whom it animates to make the wish father to the thought? If, however you feel inclined to deal harsh by with such minor delinquents, what punishment is too severe for those political organs which habitually and deliberately falsify the truth and deceive their readers on points of vast importance. For instance, anything is more common than for the Breckinridge party to assume that their candidate is making immense progress in the North and Northwest. Nay, some of them have even coolly asserted that he would probably carry such States as New York, Pennsylvania, New Jersey, &c., and have indulged in calculations of the electoral votes, in which these States were conceded to Mr. BRECKINRIDGE. This is unpardonable, because no intelligent observer is ignorant of the fact that throughout the non-slaveholding States, with the possible exception of California and Oregon, Mr. DOUGLAS is the prominent candidate of the Democracy; that but for the influence of the Administration Mr. BRECKINRIDGE would scarcely be heard of, and that under no conceivable circumstances will he receive more than one-fourth of the Democratic votes in the States referred to. It is not, therefore, clear and palpable that the pressing of the claims of Mr. BRECKINRIDGE in the North and West does not advance his prospects one iota, but merely improves those of LINCOLN, already looking up most formidably? We thought the Bell and Everett man had the best of the argument.

The truth is, however, that the people themselves are so accustomed to the overcoloring and overcharging of the party press, that they are somewhat disposed to hold their credulity of allegiance. Inevitably they make considerable allowances for self-deception; and are not to be carried away by wholesale assertions which are unsupported by convincing evidence. Hence it is that one of the most common resorts of party journals—that of accusing the adversary of every species of political or sectional heresy—is probably the least effective of the weapons in use. We have seen the statement paraded with great emphasis that JOHN C. BRECKINRIDGE did not own a slave—as if forsooth the circumstance was one of portentous import, implying a secret attachment on his part to free soil doctrines. Such a course is just about as silly as that which would endeavor to affright the South from supporting JOHN BELL because, though he owns two hundred slaves, he was twenty years ago inclined to believe that Congress had power over slavery in the District of Columbia. Logic in neither instance are the citizens greatly affected by such poor and stale devices.

NEW BOOKS.—Our thanks are due the publishers, Harper & Brothers, through T. L. White, No. 105 Canal street, for the following new works:

The Three Clerks. One of the most entertaining and cleverly narrated productions of that capital writer, Anthony Trollope.

Lovel, the Widower. A story by Thackeray, written in his usual mannerisitic style, and abounding in his peculiar dry humor.

Castle Richmond. This is another of Trollope's novels, and a very successful effort to delineate Irish character, customs and manners.

Right at Last, and other tales, by Mrs Gaskell. Most of these touching and well constructed stories appeared in Dickens's House hold Words. We are pleased to see them collected and republished.

Natural History. For the use of Schools and families. By W. Horker. This is an excellent elementary treatise on zoology, and seems well adapted to engage the interest of the young. It is finely illustrated with numerous wood cuts.

Paley's Euripides, a carefully corrected edition, with a copious index.

The steamship Philadelphia, Captain Baxter, left her wharf yesterday morning, at 8 o'clock, for New York, via Havana, with the following passengers:

FOR NEW YORK.—E J Mollett, Mrs H M Burke and four children, Mrs Waterman, Mrs Roberts, Mr Roberts, John G Hoffman, Mrs A Roques, seven children and servant, and 21 in the steerage.

FOR HAVANA.—Miss J Pairet, P Perret, M Martinez, A Martinez, V S Trepagnier, and 2 in the steerage.

PRESIDENTIAL ELECTION AT THE HOUSE.—In case of the election of President by the House of Representatives, the seventeen smallest States can elect a President. Three of these minor States have only a single representative—six have only two; three have three; three have four; one has five and another six, so that *thirty-seven* members of Congress, being a majority of the delegation from a majority of the States, can elect a President, if no election is made by the electors chosen by the popular vote.

Mr. Jerome Napoleon Bonaparte, of Baltimore, sailed in the Africa for Europe on Wednesday. It is said he goes to Paris to advocate his claims as heir of the late Prince Jerome Bonaparte.

BEQUEST TO THE CHILDREN OF JUDGE DOUGLAS.—By the death last week of the mother of Judge Douglas's first wife, who was a Miss Martin, of North Carolina, his two boys, his only children, come into possession of a large fortune. The judge has been sent for by his connections in North Carolina, and after his New England tour will probably visit the old North State.

NEW YORK, August 3.—Robert Lockie, a Scotchman, for many years an insurance broker in New York, attempted suicide this morning.

Brevet-Major Fairchild, who served with the New York volunteers in the Mexican war, is dead.

A morning train on the Long Island Railroad was thrown from the track near Bedford by a cow. The following, as far as could be ascertained, is a list of the killed and wounded: Jas Erich, fireman, residing in Indiana, killed; Daniel Olden, engineer, badly bruised about the loins, and injured internally; John McGowan, baggage-master, badly injured in the breast; Samuel Chester, conductor, right leg badly sprained; Thos Freeman, passenger, shoulder dislocated; Wm. Baldwin, passenger, head cut; a passenger, whose name could not be learned, had his arm broken, and several others who immediately left for the city, and whose names could not be ascertained, sustained slight injuries.

LANDOR AND GARIBALDI.—Walter Savage Landor writes, without date, to the *Athenæum* the following abstract of Garibaldi:

You have occasionally given a well merited place to the remarks of an observant and eloquent writer on Florentine politics. I would occupy a narrower space with what lies before you.

Inscription for the Porta Romana at Florence.

For both portals inscriptions set when
Garibaldine Italian Millions, I choose,
For an Inscription on Garibaldi's House at Nice.
His is neither house nor Garibaldine,
Millions whom he set free,
Who, free, shout, applaud, and pray for him.

Those inscriptions will be made by the heads of the Italian nation, but since Garibaldi is known personally to the Italians, I venture to hope that a few lines from his pen, in his own language, will be accepted with thankfulness. Garibaldi is a man of strong, clear, and simple intellect, with a great share of worldly wisdom, and a great share of worldly knowledge. Nothing can be more simple than his language, and nothing more sagacious than his conduct. He has been accused of being a republican, and he is a republican, but he knows that the time for a republic is not yet, and he knows that the Italians are not yet fit for it. He knows that the Italians are not yet fit for it. He knows that the Italians are not yet fit for it. He
