(I) Oyama-cho : As home of former owner : Oyama Evacuated Installation

6 Recommendations :

Company (A) has been continuing with research work, and chose this installation as their mass production factory of chemicals, made from "colloid" which is a necessity in the development of medical treatment and artificial nutrition.
(B) is co-operating in the building of rehabilitation houses in this prefecture and desire to use the building as their office.
(C) wish to use the building as agricultural products manufacturing factory and also as their office.
(D)(E)(F)(G) Their offices have been destroyed in the air-raids so they would like to use the mentioned buildings as their private offices and governmental offices.

As for the attached residences, the Numazu City authorities plan to make use of them as city-owned homes for the burnt-out victims.

Formerly, the Oyama Evacuated-Installation was privately owned, but the Military Authorities bought it for their use so the former real owner wants it back as his home.

We consider the purposes mentioned above as all being reasonable so we would appreciate it very mich if you would give them your fair consideration and grant them the release of this installation.
