REGARDING THE WATER POLICE AND
THE MARITIME SAFETY BOARD

1. Problem of transfer of boats following the abolition of the water police

With the inauguartion of the new police system in March this year, the water police was placed under the jurisdiction of the N.R.P. and all the boats which haddbeen held by the prefectural police were turned over to the N.R.P. However, at the end of August it was decided that the water police be dissolved and the function be taken over by the Maritime Safety Board. As a result the transfer of the boats under the control of the N.R.P. was made necessary.

There were altogether 84 boats held by the N.R.P. in Chugoku and Shikoku Region at the end of August. They are being transfered or disposed of as follows.

	Total	Maritime Safety Board	Municipal Police and Prefectural Government	Auction	Out of commission
Hiroshima	23	7	14	0	2
Yamaguchi	15	5	7 (3 more under negotiation for transfer)	0	0
Okayama	13	1 (under negotiation)	11	0	1
Tottori	1	1	0	0	0
Shimane	5	3	2	0	0
Kagawa	11	1	10	0	0
Ehime	6	3	1	2	0
Tokushima	3	0	3	0	0
Kochi	7	0	5	0	2
Total	84	21	53	2	5

Remark: One of 21 boats transfered to the Maritime Safety Board goes to the Moji Maritime Safety Hqs.

DECLASSIFIED E.O. 12065 SECTION 3 402/NNDS NO.

The boats which were constructed at the national expenditure are all transfered to the Maritime Safety Board without compensation except the expenses for the repairs done. The other boats were constructed at the prefectural expenditure or by contributions and most of them are transfered free of charge to municipal police and prefectural governments (for the use of fishery section), but some of them are transfered to the Maritime Safety Board with compensation.

Among the boats transfered to the Hiroshima Maritime Safety Hqs 7 are former military boats at the national expenditure and the other 12 boats are constructed at the prefectural expenditure or by contributions. (4 from Hiroshima, 1 from Tottori, 3 from Shimane, 1 from Kagawa, 3 from Ehime). Sixteen of them have been formally transfered and are now being used. Among 53 boats to be transfered to municipal police and to prefectural governments there are more than 30 boats which municipal police, for financial reasons, allows the Hiroshima Maritime Safety Hqs. to use on ~~con~~seas of the nearby respective municipal police.

2. Present conditions on activity of Hiroshima Maritime Safety Hqs.

(1) Organization.

	Direct control by Hqs	(Hiroshima, Ehime, Part of Yamaguchi)	Onomichi Maritime Safety Office.
			Imabaru " (under organization).
			Tokuyama "
Hiroshima Maritime Safety Hqs	Takamatsu Maritime Safety Department	(Kagawa, Okayama)	Takamatsu Maritime Safety Office.
			Tamano " (under organization).
	Sakai Maritime Safety Department	(Tottori, part of Shimane)	
	Hamada Maritime Safety Department	(Part of Shimane and Yamaguchi)	Hagi Maritime Safety Office.

(2) Personnel

	Number of personnel	Those holding the rank of the maritime safety officer
Crew of inspection and harbour boats.	188	21

DECLASSIFIED E.O. 12333 SECTION 3.402/NNSS NO. [illegible]

Hiroshima Maritime Safety Hqs	129	44
Light-houses	80	50
Maritime safety departments	48	24
Port master offices (Kure Iwakuni, Sakai, Hamada, Hagi, Sakaide, Niihama, Imabaru, Tamano, Hiroshima)	16	9
Total	461	158

The Maritime Safety Board is charged with the execution of the maritime laws and ordinances besides the guard on the sea, but only those who hold the rank of the maritime safety officer are authorized to execute these duties on the spot. Moreover the maritime officials attached to the light houses and port master offices are doing their job only within the narrow area of their respective jnrisdiction. Consequently the remaining broad sea area is left in charge of only 99 maritime safety officers. Taking into account that the maritime safety officials attached to the Hiroshima Maritime Safety Hqs and each Maritime Safety Department have the job on land as well, the available force on the sea is still weaker. It must be noted that the former water police had the strength of 600-700. The Hiroshima Maritime Safety Hqs, therefore, are now asking for an increase of 360 persons required for both on land and sea.

(3) Boat.

The number of boats formally owned by the Hiroshima Maritime Safety Hqs is 27 (16 are those transferred from N.R.P. and 11 are those originally assigned to them from other sources) and they are stationed at the following places.

Hiroshima	11	(including 1 inspection boat of 321 tons)
Ondo	3	
Onomichi	1	
Tokuyama	2	~~(including 1 inspection boat of 50 tons)~~

DECLASSIFIED E.O. 11652 SECTION 3 (E)/NND NO.

Imabaru	3	(including 1 inspection boat of 50 tons)
Sakai	3	(" 2 " of 137 and 80 tons)
Hamada	2	(" 1 " of 80 tons)
Takamatsu	2	(" 1 light ship" of 64 tons)

In connection with the use of these boats it seems that GHQ desires to place importance on the execution of the Maritime laws and ordinances, while the Military Government Authorities put mone emphasis on the supervision over crimes. The military government, therefore, is especially keen that the boats are always ready for immediate action. However since the boats have to be repaired one after another and much time is taken for it the boats available and ready for action at a time are only 50 to 60 percent of the total number. Owing to the small number of boats now in possession, this is a tremendous handicap to the execution of duties. If only for the patrol on the sea for execution of the maritime laws and ordinances, an increase of the number of the boats would serve the purpose, but if the supervision over crimes must be carried out more extensively, an increase of bases besides an increase of boats would be necessary.

(4) Present activities.

The following is the number of cases concerning crimes, violations of the maritime laws and ordinances, repairs of light-houses and salvages handled by the Hiroshima Maritime Safety Hqs until the end of October since it was established on 1 May.

	General crimes	Violation of the Maritime laws and ordinances	Salvages	Repairs of Light-houses.
May	1 (Illegal entry)	0	0	0
June	3 (")	0	0	0
July	1 (")	13	0	22
August	5 (")	0	0	0
September	23 (Violation of the economic control laws 21; Accidental injury 2)	1	0	44
October	11 (Violation of the economic control laws)	0	4	50

DECLASSIFIED E.O. 12065 SECTION 3 NARA NO.

It would not be appropriate to comment on the activities of the Hiroshima Maritime Safety Hqs. only from the number of cases handled, but there seems to be left much to be done in view of the fact that its jurisdiction widely spreads and covers the Inland Sea of Seto where there is much traffic.
Cooperation with the police authorities in matters of the guard on the sea goes on smoothly. The five-year plan for the communications system, which is far inferior to the Police at present, has been established but the problem of equipping armament is still left unsolved, the Maritime Safety officers are entitled, on the face of the law, to take a weapon, but actually they are not provided with weapons. Therefore, the request has to be made that armed police men be aboard whenever necessary.
The general survey by area ~~and~~ under the jurisdiction shows that things are fairly satisfactory in Hiroshima, Yamaguchi and Ehime Prefectures, but in the areas of Kagawa, Okayama and the coast of the Japan Sea more stregnthening of coast guard is needed.

DECLASSIFIED E.O. 12958 SECTION 3.3(NND) NO.

ALLOWANCES TO POLICEMEN OF N.R.P. IN
FWE PREFECTURAL IN CHUGOKU REGION

1. Service place allowance

A class	20% of total of basic salary and family allowance.
B class	10% of total of basic salary.

Those who work at serive places except the montioned above are not paid this allowance.

2. Over-time service allowance.

There are four kinds of allowances, over-time service, midnight service, day and night-duty allowances. They are paid on the base of Law-No. 167, dated 12 of December 1947.
The average sum of those allowances per policeman, N.R.P. is 450 yen per month.

3. Family allowance.

250 yen per head of the family.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. [illegible]

27 Dec. 1948

REGARDING THE WATER POLICE AND
THE MARITIME SAFETY BOARD

Chugoku Region

1. Problem of transfer of boats following the abolition of the water police

With the inauguartion of the new police system in March this year, the water police was placed under the jurisdiction of the N.R.P. and all the boats which had been held by the prefectural police were turned over to the N.R.P. However, at the end of August it was decided that the water police be dissolved and the function be taken over by the Maritime Safety Board. As a result the transfer of the boats under the control of the N.R.P. was made necessary.

There were altogether 84 boats held by the N.R.P. in Chugoku and Shikoku Region at the end of August. They are being transfered or disposed of as follows.

	Total	Maritime Safety Board	Municipal Police and Prefectural Government	Auction	Out of commission
Hiroshima	23	7	14	0	2
Yamaguchi	15	5	7 (3 more under negotiation for transfer)	0	0
Okayama	13	1 (under negotiation)	11	0	1
Tottori	1	1	0	0	0
Shimane	5	3	2	0	0
Kagawa	11	1	10	0	0
Ehime	6	3	1	2	0
Tokushima	3	0	3	0	0
Kochi	7	0	5	0	2
Total	84	21	53	2	5

Remark: One of 21 boats transfered to the Maritime Safety Board goes to the Moji Maritime Safety Hqs.

09.020

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDS NO. [illegible]

The boats which were constructed at the national expenditure are all transfered to the Maritime Safety Board without compensation except the expenses for the repairs done. The other boats were constructed at the prefectural expenditure or by contributions and most of them are transfered free of charge to municipal police and prefectural governments (for the use of fishery section), but some of them are transfered to the Maritime Safety Board with compensation.

Among the boats transfered to the Hiroshima Maritime Safety Hqs 7 are former military boats at the national expenditure and the other 12 boats are constructed at the prefectural expenditure or by contributions. (4 from Hiroshima, 1 from Tottori, 3 from Shimane, 1 from Kagawa, 3 from Ehime). Sixteen of them have been formally transfered and are now being used. Among 53 boats to be transfered to municipal police and to prefectural governments there are more than 30 boats which municipal police, for financial reasons, allows the Hiroshima Maritime Safety Hqs. to use on ~~con~~ the nearby seas of respective municipal police.

2. Present conditions on activity of Hiroshima Maritime Safety Hqs.

(1) Organization.

Hiroshima Maritime Safety Hqs	Direct control by Hqs	(Hiroshima, Ehime, Part of Yamaguchi)	Onomichi Maritime Safety Office.
			Imabaru " (under organization).
			Tokuyama "
	Takamatsu Maritime Safety Department	(Kagawa, Okayama)	Takamatsu Maritime Safety Office.
			Tamano " (under organization).
	Sakai Maritime Safety Department	(Tottori, part of Shimane)	
	Hamada Maritime Safety Department	(Part of Shimane and Yamaguchi)	Hagi Maritime Safety Office.

(2) Personnel

	Number of personnel	Those holding the rank of the maritime safety officer
Crew of inspection and harbour boats.	188	21

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. [illegible]

Hiroshima Maritime Safety Hqs	129	44
Light-houses	80	50
Maritime safety departments	48	24
Port master offices (Kure Iwakuni, Sakai, Hamada, Hagi, Sakaide, Niihama, Imabaru, Tamano, Hiroshima)	16	9
Total	461	158

The Maritime Safety Board is charged with the execution of the maritime laws and ordinances besides the guard on the sea, but only those who hold the rank of the maritime safety officer are authorized to execute these duties on the spot. Moreover the maritime officials attached to the light houses and port master offices are doing their job only within the narrow area of their respective jnrisdiction. Consequently the remaining broad sea area is left in charge of only 99 maritime safety officers. Taking into account that the maritime safety officials attached to the Hiroshima Maritime Safety Hqs and each Maritime Safety Department have the job on land as well, the available force on the sea is still weaker. It must be noted that the former water police had the strength of 600-700. The Hiroshima Maritime Safety Hqs, therefore, are now asking for an increase of 360 persons required for both on land and sea.

(3) Boat.

The number of boats formally owned by the Hiroshima Maritime Safety Hqs is 27 (16 are those transferred from N.R.P. and 11 are those originally assigned to them from other sources) and they are stationed at the following places.

Hiroshima	11	(including 1 inspection boat of 321 tons)
Ondo	3	
Onomichi	1	
Tokuyama	2	(including 1 inspection boat of 50 tons)

Imabaru	3	(including 1 inspection boat of 50 tons)
Sakai	3	(" 2 " of 137 and 80 tons)
Hamada	2	(" 1 " of 80 tons)
Takamatsu	2	(" 1 light ship of 64 tons)

In connection with the use of these boats it seems that GHQ desires to place importance on the execution of the Maritime laws and ordinances, while the Military Government Authorities put mone emphasis on the supervision over crimes. The military government, therefore, is especially keen that the boats are always ready for immediate action. However since the boats have to be repaired one after another and much time is taken for it the boats available and ready for action at a time are only 50 to 60 percent of the total number. Owing to the small number of boats now in possession, this is a tremendous handicap to the execution of duties. It only for the patrol on the sea for execution of the maritime laws and ordinances, an increase of the number of the boats would serve the purpose, but if the supervision over crimes must be carried out more extensively, an increase of bases besides an increase of boats would be necessary.

(4) Present activities.

The following is the number of cases concerning crimes, violations of the maritime laws and ordinances, repairs of light-houses and salvages handled by the Hiroshima Maritime Safety Hqs until the end of October since it was established on 1 May.

	General crimes	Violation of the Maritime laws and ordinances	Salvages	Repairs of Light-houses.
May	1 (Illegal entry)	0	0	0
June	3 (")	0	0	0
July	1 (")	13	0	22
August	5 (")	0	0	0
September	23 (Violation of the economic control laws 21 Accidental injury 2)	1	0	44
October	11 (Violation of the economic control laws)	0	4	50

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDS NO.

It would not be appropriate to comment on the activities of the Hiroshima Maritime Safety Hqs only from the number of cases handled, but there seems to be left much to be done in view of the fact that its jurisdiction widely spreads and covers the Inland Sea of Seto where there is much traffic.
Cooperation with the police authorities in matters of the guard on the sea goes on smoothly. The five-year plan for the communications system which is far inferior to the Police at present has been established but the problem of equipping armament is still left unsolved, the Maritime Safety officers are entitled, on the face of the law, to take a weapon, but actually they are not provided with weapons. Therefore, the request has to be made that armed police men be aboard whenever necessary.
The general survey by area ~~and~~ under the jurisdiction shows that things are fairly satisfactony in Hiroshima, Yamaguchi and Ehime Prefectures, but in the areas of Kagawa, Okayama and the coast of the Japan Sea more stregnthening of coast guard is needed.

FIXED AND ACTUAL NUMBER OF POLICEMEN OF

LDG Doc.

REGIONAL HEADQUARTERS
HIROSHIMA NATIONAL RURAL POLICE
Office of Director

June 4th, 1948.

SUBJECT: RE INVESTIGATION INTO THE EXISTING CONDITIONS OF WATER-POLICE

TO : COMMANDING OFFICER, Hq. of Chugoku Gov't. Region.

I have the honour to report you the results of the investigation into the existing conditions of the Water - Police throughout the Prefectures under my control as follows:-

1. The reasons why the National Rural Police wants Patrol-Boats.

(1) The region under my control has a very long coast-line.

(2) The said region contains so many islands.

(3) Many peoples live in those islands; while very few policemen are stationed there for guard.

(4) The above-mentioned areas must be reinforced by policemen conveyed on boats to meet the criminal cases and other accidents even at ordinary times, to say nothing of emergency time; because those areas are almost under the control of National Rural Police.

(5) The civil ferry-boats plying on there count next to nothing, and even if we could find a ferry-boat stationed, we can't take advantage of her owing to a scanty number of times of sailing.

(6) The area which M.P. controls is almost limitted to land and the coast-line under its control is extremely short to the exclusion of the inside of harbour. So, much more convenience would be given to N.R.P. if we could get possession of boats.

DECLASSIFIED E.O. 12958 SECTION 3 NND 763027

(4) The above-mentioned areas must be reinforced by policemen conveyed on boats to meet the criminal cases and other accidents even at ordinary times, to say nothing of emergency time; because those areas are almost under the control of National Rural Police.

(5) The civil ferry-boats plying on there count next to nothing, and even if we could find a ferry-boat stationed, we can't take advantage of her owing to a scanty number of times of sailing.

(6) The area which M.P. controls is almost limitted to land and the coast-line under its control is extremely short to the exclusion of the inside of harbour. So, much more convenience would be given to N.R.P. if we could get possession of boats.

(7) Moreover, it is far more convenient for us to have boats stationed there especially when the reinforcement is needed by the reason that all the polices are to be put under the control of the Director General, Headquarters of N.R.P. and the Regional Director of N.R.P. Headquaters to provide for the crisis of our country.

(8) Some of the Military Governments are said to be in financial difficulties, which prevents them from possessing boats.

No. of crime was:

Theft.....	3 cases..	(3 persons)
Usurpation.....	3 "	(6 ")

All others were violations of economical control laws or ordinances.

2. Peculiar crimes.

1). In Yamaguchi Pref., Yanai Water Police Station arrested a Chinese smuggling boat which was loaded with sugar, cloth materials, canvas shoes with rubber in bottom, and others, and handed over them to O.F. at Iwakuni.

2). Too, in Yamaguchi Pref., 58 Koreans who intended to smuggle to Korea, were arrested.

3. Accidents in the course of the control.

On April 30, in Okayama Pref., while ~~officers~~ a patroling boat (fishing boat with engine which was borrowed from civilians) loaded with 9 police officers was approaching to a cargo boat to inspect it personnally sending stopping signals, the patroling boat stopped due to an accident of engine. Just then, the cargo-boat clashed into it's on its side, and the patroling boat was sunken.

At Kagawa Pref., while the patroling-boat (fishing boat borrowed from civilians) having 8 police officers on its board, was approaching to a half engine half sailing-boat to inspect its after ordered to lie, the patroling-boat was turned ~~up~~ over by miss steering.

At the above 2 accidents, there was no death or injury among police officers and the crews. The damage was slight. The sunken boat also was refloated and there was no damages.
