AGMORM 471.86

20 January 1949

SUBJECT: Manufacture and Use of Industrial Explosives

TO : Commanding General, IX Corps, APO 309

1. Reference is memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 471.86 (7 Dec 48) GSB/IND, SCAPIN 1955, dated 5 January 1949, subject as above, which authorizes the Japanese to manufacture limited quantities of industrial explosives and accessories during the period from 1 January 1949 to 31 December 1949 (inclosure 1).

2. The inclosed list of plants and amounts of production for each plant constitutes the plan of the Japanese Government for the manufacture of the explosives authorized, as approved by General Headquarters, Supreme Commander for the Allied Powers. Manufacture of industrial explosives in excess of the amounts authorized under the provisions of the above reference memorandum will not be permitted.

3. Permits will be issued as indicated in inclosure number 2 to the manufacturers who are located within the area of your responsibility. A system of inspections and controls will be established to assure adherence to the plan for production of explosives as authorized by this communication.

MEMORANDUM FOR: JAPANESE GOVERNMENT

SUBJECT : Manufacture and Use of Industrial Explosives

1. References are:

a. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 471.06 (29 Dec 47) ESS/IN, SCAPIN 1836, subject: Manufacture of Industrial Explosives and Accessories, 29 December 1947.

b. Letter, CLCC No. 4069 (2P), to General Headquarters, Supreme Commander for the Allied Powers, subject: Application for Permission for Manufacture and Use of Industrial Explosives and Accessories for 1949, 7 December 1948.

2. Manufacture of the following types and quantities of explosives, to be used for industrial purposes only, is authorized for the period from 1 January 1949 to 31 December 1949:

Type of Explosive	Quantity Authorized
Gelatin Dynamite and Nagi Dynamite	8,700 metric tons
Ammonia Dynamite and Ammonium Nitrate Explosives	9,100 metric tons
Carlit	2,500 metric tons
Reprocessed Military High Explosives	95 metric tons
Black powder	510 metric tons
Smokeless Powder	10 metric tons
	20,915 metric tons

A maximum of 15 metric tons of black powder may be utilized in the production of fireworks and party devices.

3. Authorization is granted to manufacture the following types and quantities of explosives accessories during the from 1 January 1949 to 31 December 1949:

Type of Accessory	Quantity Authorized
Fuse	63,000 kilometers
Incl #1: Blasting Caps for Use with Fuse and Electric Detonators	100,000,000 pieces

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

AG 471.86 (7 Dec 48) NSS/IND, 5 Jan 49, SCAPIN 1955

Type of Accessory	Quantity Authorized
Electric Detonators	40,000,000 pieces
Percussion Caps	6,400,000 pieces
Friction	22,500 pieces
Detonating Fuse	480 kilometers
Flame Signal Fuses for Railways	250,000 pieces
Signal Detonators for Railways	250,000 pieces
Signal Firing Devices for ships	19,000 pieces
Caps for Starting Signal Cap Pistols	20,000,000 pieces
Shotgun Shells for Pest Extermination	450,000 pieces

4. The Japanese Government will submit to the Commanding General, Eighth Army, application for authority to operate plants necessary for the manufacture of the explosives and accessories authorized by this memorandum.

SUBJECT: Manufacture and Use of Industrial Explosives

TO: Commanding Officer
Shizuoka Military Government Team
APO 1007

1. Reference is Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 471.86 (7 Dec 48)ESS/IND, SCAPIN 1955, dated 5 January 1949, subject as above, which authorizes the Japanese to manufacture limited quantities of industrial explosives and accessories during the period from 1 January 1949 to 31 December 1949 (Inclosure 1).

2. The inclosed list of plants and amounts of production for each plant constitutes the plan of the Japanese Government for the manufacture of the explosives authorized, as approved by General Headquarters, Supreme Commander for the Allied Powers. Manufacture of industrial explosives in excess of the amounts authorized under the provisions of the above reference memorandum will not be permitted.

3. Permits will be issued as indicated in inclosure number 2 to the manufacturers who are located within the area of your responsibility. A system of inspections and controls will be established to assure adherence to the plan for production of explosives as authorized by this communication.

a. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 471.86(29 Dec 47) ESS/IN, SCAPIN 1836, subject: Manufacture of Industrial Explosives and Accessories, 29 December 1947.

b. Letter, CLCO No. 4060(2P), to General Headquarters, Supreme Commander for the Allied Powers, subject: Application for Permission for Manufacture and Use of Industrial Explosives and Accessories for 1949, 7 December 1948.

2. Manufacture of the following types and quantities of explosives, to be used for industrial purposes only, is authorized for the period from 1 January 1949 to 31 December 1949:

Type of Explosive	Quantity Authorized
Gelatin Dynamite and Hagi Dynamite	8,700 metric tons
Ammonia Dynamite and Ammonium Nitrate Explosives	9,100 metric tons
Carlit	2,500 metric tons
Reprocessed Military High Explosives	95 metric tons
Black Powder	510 metric tons
Smokeless Powder	10 metric tons
TOTAL	20,915 metric tons

A maximum of 15 metric tons of black powder may be utilized in the production of fireworks and party devices.

3. Authorization is granted to manufacture the following types and quantities of explosives accessories during the period from 1 January 1949 to 31 December 1949:

Type of Accessory	Quantity Authorized
Fuse	63,000 kilometers
Blasting Caps for Use with Fuse and Electric Detonators	100,000,000 pieces

Incl 1

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

AG 471.86(7 Dec 48)ESS/IND, 5 Jan 49, SCAPIN 1955

Type of Accessory	Quantity Authorized
Electric Detonators	40,000,000 pieces
Percussion Caps	6,400,000 pieces
Friction Tubes for Whaling	22,500 pieces
Detonating Fuse	480 kilometers
Flame Signal Fuses for Railways	250,000 pieces
Signal Detonators for Railways	250,000 pieces
Signal Firing Devices for Ships	19,000 pieces
Caps for Starting Signal Cap Pistols	20,000,000 pieces
Shotgun Shells for Pest Extermination	450,000 pieces

4. The Japanese Government will submit to the Commanding General, Eighth Army, application for authority to operate plants necessary for the manufacture of the explosives and accessories authorized by this memorandum.

SUBJECT: Disposal of Explosives

HEADQUARTERS KANTO MILITARY GOVERNMENT REGION, APO 201
14 October 1948

TO: Commanding General, 1st Cavalry Division, APO 201

1. Attention is invited to the basic communication and inclosure thereto.

2. In telephone conversation with Bomb Disposal officer your headquarters on 28 April 1948 at approximately 1530 hours he said that Saitama Prefecture was area of 2nd Cavalry Brigade and that this headquarters should contact 2nd Cavalry Brigade headquarters on removal of explosives in Saitama Prefecture.

3. A telephone call was made to 2nd Cavalry Brigade headquarters on 28 April 1948 at approximately 1550 hours. This headquarters requested that responsible personnel be sent to Saitama Military Government Team to make arrangements to dispose of explosives listed in inclosure 1. 2nd Cavalry Brigade Headquarters stated that there was a shortage of personnel to do this work but that they would contact Saitama Military Government Team and make the necessary arrangements to dispose of the explosives listed in inclosure 1.

4. Request that this headquarters be informed as to when explosives will be disposed of by members of your command.

SUBJECT: Japanese Poison Gas Containers

TO : Commanding Officer, Hokkaido Mil Govt District, APO 468
Commanding Officer, Tohoku Mil Govt Region, APO 309
Commanding Officer, Kanto Mil Govt Region, APO 201
Commanding General, 11th Airborne Div, APO 468
Commanding General, 1st Cavalry Division, APO 201

1. Recently several Japanese poison gas drums have been discovered along the seacoast of Japan. The finding of these containers at widely separated points along the coast indicates that the Japanese hurriedly dumped their stores of chemical munitions into the sea at the termination of the war without regard to the possibility that the containers might roll in or drift on to the shore. Because of this it is anticipated that additional containers will be found along the coasts in the future.

2. In the event that Occupation Force personnel come in contact with any of these containers, attention is invited to section 1 of Circular Number 193, Headquarters Eighth Army, 23 December 1947, subject: "Disposition of Explosive Ordnance Material", which provides that such material will not be handled by other than qualified bomb and mine disposal personnel and lists the procedure for laymen to report same.

3. Approximate measurements and weight of these containers:

Weight (filled)	200 lbs.
Volume	30 gals.
Length	3 fts.
Diameter	18 Inches

4. Photographs of a Japanese mustard gas container found on the seacoast of shiquoka Prefecture are attached as inclosure.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

NAGASAKI MILITARY GOVERNMENT TEAM
Nagasaki, Kyushu, Japan

File: 004.1

SUBJECT: Dynamite Fishing in Tsushima Island

APO 24 Unit 3
3 February 1948

TO : Commanding Officer
Kyushu Mil Govt Region,
Hq & Hq Det., APO 929

1. The following report was made by the prefectural government officials, to this headquarters on the illegal use of dynamite fishing:

a. Around the shoreline of Tsushima Island, approximately 400 boats of all classes, are engaged in dynamite fishing. This si especially noted at this time due to the heavy running of mackeral during this season.

b. The boats are reportedly from Tsushima, Fukuoka, Shikoku, Yamaguchi and other ports. The fish are gathered by small boats, and transferred or sold to larger boats or carrier boats.

c. The amount of fish recovered after each explosion is usually 100 to 200 kan, or about 10% to 20% of the number of fish killed.

d. All the fish recovered are sold through blackmarket channels.

e. Approximately ten persons lose their lives per season in this activity. Many other are mained or blinded.

f. The prefecture is sending two patrol boats to patrol the area for 30 days, in an attempt to stop this method of fishing.

2. This headquarters has taken the following action regarding the above report:

a. One of the Price Control and Rationing Teams assigned to this headquarters has been instructed to aid the Japanese official in every possible way to stop this method of fishing. This because of:

(1) Enormour loss of fish, i.e. those killed and not recovered.

(2) Disruption of fishing grounds for legal methods.

(3) Illegal outlet of receovered fish.

b. Records of explosives delivered used and in stock in mines (including the lead and zinc mine in Tsushima), will be examined in order to ascertain the source of supply to the fishermen. The Japanese officials believes the source of supply is from the mines.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

3. It is requested that:

a. Price Control and Rationing Teams in other prefectures be notified to especially watch for the entry of these fish into their areas. Fish killed by this method is easily detected by ap;earance.

b. Public Health authorities be on the alert for the fish.

c. Controls be tightened on the use of explosiversin mines, etc.

d. Higher headquarters request the Central Government to aid Nagasaki Prefecture in stopping this method of fishing.

TO : Commanding General, Eighth Army, APO 343

1. Reference is made to inclosure 1 and 2, letter, your Headquarters, file AG 471 (MG-EM) subject: "Production of Cap for Starting Signal Cap Pistols," dated 1 August 1947.

2. Kanto Dokasen Seisakusho, the authorized manufacturer, reported to this headquarters that caps for starting signal cap pistols are also being manufactured by Tsuruse Kako Seizo K.K. at 596 Fujikubo, Miyoshi-mura, Iruma-gun, Saitama-ken for sale by Nihon Taiikukai (Japan Amateur Athletic Association).

3. Tsuruse Kako Seizo K.K. has manufactured 5,600 boxes of caps against on order for 20,000 boxes placed by Mr. Juri Morita, director of the Japan Amateur Athletic Association. Each box of caps was sold with a cap postol manufactured by Goi Sangyo Co., 2-chome, Shinkawa, Chuo-ku, Tokyo.

4. Mr. Juri Morita states that production listed in paragraph 3 above was ordered after receiving the verbal approval of Capt. J.W. Miller, Tokyo Provost Marshall Office. Capt. Miller states that he did not give permission.

5. Since Tsuruse Kako is located outside the jurisdiction of this headquarters, above information is forwarded for information and possible action.
