This book is dedicated to my Denver friends, whose words of encouragement and appreciation have so greatly aided me during my two years of work with them.

PREFACE

In publishing the third edition the author has added many more pages, and wholly reconstructed it, profiting by the experience gained from the previous editions.

Knowing the difficulty of cooking in a high altitude the author, in this book, has endeavored to give the public the benefit obtained from teaching and housekeeping in Denver, making high altitude cooking a special study. Water boils at sea level at 212° . In Denver, where the air is much lighter, it boils at 202° . Therefore, it does not reach as great a heat and boiling requires a longer time. It has been the wish to make the recipes practical and easily followed by the most inexperienced cooks. She has not attempted giving much information on chemistry and food values, leaving that for the cooking schools. No girl's education is complete without such a course. An intelligent knowledge of cooking will enable them to feed their family with less expense and giving them the variety the family requires.

Food for invalids should be selected and cooked with the greatest care. A chapter is devoted to that kind of cooking. Scientific cooking should fill an important part in the training of a nurse.

The desire of the author will be obtained if the book proves helpful to all who use it and inspires them with the wish for more knowledge in the art of cooking.

BREADS.

All measurements level, with the exception of baking powder, which is measured rounding with the side of the can. Sift flour before measuring.

One-half the amount of yeast can be used in the following receipts if preferred, allowing more time. In all of the receipts given for bread or rolls with the amount of yeast used the bread or rolls can be started in the morning and finished by noon.

ROMAN WAR BREAD.

Put in a mixing bowl two cups of Roman meal, one cup of graham meal, and one-half cup of white flour, two teaspoonfuls of salt. Pour over it two cups of scalded milk, or half potato, or rice water, hot. Add one yeast cake that has been dissolved in a half cup of lukewarm water. Beat thoroughly for a few minutes, put in a warm place to rise over night; in the morning add enough white flour to knead. After a thorough kneading, set to rise well covered, until double the bulk. Make out in loaves, let rise again twice the size, bake one hour. This amount will make two loaves of bread and a pan of biscuits.

WAR CORN MEAL BREAD.

Into a sauce pan put one cup of milk and one cup of water that potatoes or rice have been boiled in. Add one cup of water. Let this come to a boil, adding two teaspoonfuls of salt, one tablespoonful of sugar. Then stir in one cup of yellow corn meal, cook for five minutes, stirring, dissolve one yeast cake in half

a cup of lukewarm water. When the corn meal mixture is cool add the dissolved yeast, cover, set in a warm place to rise over night.

In the morning stir in one cup of corn meal, one of whole wheat flour, and one-half cup of white flour, if needed. Take out on the board, knead until bubbly, let rise double the bulk, make into loaves, let rise double the bulk again. Bake one hour in moderate oven.

MILK BREAD.

2 cups of milk (scalded).	2 teaspoonfuls salt.
1 cake of compressed yeast, dissolved in half a cup of lukewarm water.	1 tablespoonful of sugar.
	Flour enough to make a stiff dough—6 or 7 cups.

Pour the hot milk over the sugar and salt. When cool add the dissolved yeast cake, then with a knife cut in the flour and knead for twenty minutes. Put in a warm place to rise. When risen twice the bulk, cut down and let rise again. Make out in two loaves and a pan of biscuits, rise double the bulk in the pan. Bake the bread forty-five minutes.

MILK BREAD (With Sponge).

Pour two cups of scalded milk onto one tablespoonful of sugar, two teaspoonfuls of salt. When cool add one yeast cake dissolved in one-half cup of lukewarm water. Stir in three cups of flour, beat well. Let rise until light and bubbly, about an hour, then add enough flour to knead, and knead twenty minutes. Let rise and bake the same as milk bread.

WATER BREAD.

2 tablespoonfuls butter.		2 cups boiling water.
2 teaspoonfuls salt.		1 yeast cake.
1 tablespoonful sugar.		

Put butter, sugar and salt in mixing bowl, add the boiling water; when cool add dissolved yeast cake, then put in enough flour to knead. Knead and let rise the same as directed for milk bread.

The milk is scalded and cooled. Mix the yeast with the one-fourth cup of milk. Add the rest of the milk with the salt, molasses and dates, chopped rather coarse. Then stir in the flour. At first put in two cups of whole wheat flour then add as much more as is required. When double in bulk shape into a loaf and when again light raise and bake one hour.

WALNUT BREAD.

Stir one cup of chopped walnuts in a sponge for two loaves of bread, and proceed as above. Either of these two breads are good to serve with salads or Dutch luncheon.

WHOLE WHEAT BREAD.

2 cups of milk scalded.	1 cup white flour.
1 tablespoonful sugar.	5 or 6 cups of whole wheat
2 teaspoonfuls salt.	flour, or enough to knead.

Soften one yeast cake in half a cup of lukewarm water. Stir in flour enough to make a stiff dough. Knead and shape into a ball, score on the top in two parallel cuts. Put the dough in a bowl of lukewarm water, the cuts upward, and set aside in a warm place. Add two teaspoonfuls of salt and flour to make a stiff dough, knead fifteen minutes. Set aside until it has risen twice the bulk, then shape in rolls. Take a small ball of the dough, roll under the hand to give an oblong shape with pointed ends. Set some distance apart on the baking pan and let rise to double the bulk. Cereals contain a large per cent of starch, so should have a rapid cooking in boiling water for a few minutes when first started. Then they may be put inside the double boiler to continue to cook more slowly. Care should be taken that the cereal does not stick to the dish when it is having its first hard boiling.

TO BOIL RICE.

Wash thoroughly one-half cup of rice. Have two quarts of water boiling hard in the kettle, with one teaspoonful of salt. Throw in the rice and allow to boil rapidly without a cover until tender, then drain through a colander. Put on the stove to dry, lifting the rice apart to allow the steam to escape. Rice that is cooked in this way will have every kernel separate.

STEAMED RICE.

Put in double boiler two and one-half cups of milk or water or a part of each. Add to it one-quarter teaspoonful salt, set the inside of the boiler on top of the stove. When it comes to a boil add one-half cup well washed rice. Let it boil hard for five minutes. Then replace it in the double boiler, and let cook until soft. The time of cooking depends on the age of the rice.

SOUPS.

GENERAL RULES FOR SOUP STOCK.

Meat and bones for soup stock should be allowed to soak in cold water fully one hour before putting on the stove, to extract the juices. Soup stock should simmer on the back of the stove and not boil hard. The meat should be cut in small pieces and washed clean. Soup meat, when cooked, has no nutrition left in it. If properly made, the goodness of the meat is in the stock.

Use one quart of cold water to every pound of meat and bones. Add seasoning in the following proportions:

For every quart of water, one even teaspoonful of salt, three peppercorns, or a little ground pepper, two cloves, a celery root or the outside stalk, a sprig of parsley, a tablespoonful each of onion, carrot and turnip, a part of a bay leaf, a pinch of sage, summer savory, thyme and marjoram. It is not necessary to have all the herbs. A very nice flavored soup can be made with the vegetables alone.

If you wish to have a dark-brown stock, reserve part of the lean meat and part of the vegetables, and brown them in a little fat taken from the meat. A tablespoonful of browned sugar or caramel will also give a brown color to the stock. Do not remove the seum from the soup while it is cooking, as that is the albumen of the meat. As soon as the soup is done strain at once and set aside until cold and the fat has formed a cake on top. Remove the fat and reheat.

Soup stock should cook from six to eight hours.

Whole rice is sometimes served in a white soup. Boil the rice until tender then add to the soup.

CARAMEL FOR COLORING SOUPS AND GRAVIES.

Melt one cup of sugar with two tablespoonfuls of water in a sauce pan. Stir until it is a dark brown color. Add one cup of boiling water, let simmer for fifteen minutes. Bottle for use, when cool.

TO CLEAR SOUP STOCK.

Remove the fat. Allow the white of an egg to every quart of stock. Mix the beaten white with the cold stock. Set on the fire, stirring all the time until it reaches the boiling point, then let it boil without stirring for ten minutes, draw it on the back of the stove and add one-half cup cold water. Let it stand for ten minutes, strain through a cheese cloth and colander.

GARNISHES FOR SOUPS.

Croutons.—Cut stale bread into cubes and brown in butter in an omelet pan, or butter first, cut in cubes and brown in the oven. Serve with thick soups.

Egg Balls.—Rub to a paste with a wooden spoon the yolks of hard-boiled eggs. Season with salt, pepper or paprika and melted butter, add enough raw yolk or white to mould them. Roll them in white of egg, slightly beaten, and dip in flour. Have them about one-half the size of a yolk. Fry them in butter. Serve one to each person.

Marrow Balls.—Melt a tablespoonful of the marrow, beat it until creamy, then add to it a well-beaten egg and a little salt and pepper and as much soft

bread crumbs as it will take. Mould in little balls and cook them in boiling water for ten minutes. Place them in the tureen first before serving.

Noodles.—Two eggs slightly beaten, mix with them two tablespoonfuls of water, one-quarter teaspoonful of salt and enough flour to make a stiff dough. Knead it well for fifteen minutes, then cut off small pieces at a time and roll them as thin as wafers. When very thin sprinkle with flour and roll into a tight roll, cut from the end into thin slices or threads for the soup. Let them dry in a slightly warm oven for an hour. These can be cut before rolling into fancy shapes with the vegetable cutter. Before serving put them in boiling salted water and let them boil for fifteen minutes. Serve in thin soups.

Lemon cut in thin slices is served, a slice to each person.

Macaroni, Spaghetti and Vermicelli is broken in three or four-inch lengths and put on to cook in boiling salted water until tender, then remove from the water in a colander; let the cold water run through. Place on a board and cut in one-inch pieces. If the large-size macaroni is used, cut into one-fourth inch pieces, thus forming rings. Put in the tureen just before serving.

FISH.

Fish, to be palatable and nutritious, should be fresh, well cleaned and thoroughly cooked. When fresh, the eyes are bright, the flesh firm and elastic to the touch. Fish should be cleaned, washed in cold water and dried (not soaked) as soon as it reaches us and put directly on the ice or in a cold place. It should not be put in the compartment with milk or butter, as they absorb the odors very quickly. Frozen fish should be laid in cold water until they become limber.

TO SKIN AND BONE A FISH.

Cut through the skin, down the back bone, taking of the fins. Beginning at the head, loosen the skin and strip it down. Use a knife to help loosen the skin, and a little salt on the fingers enables one to get a firmer hold. Then slip the knife under the flesh, keeping it close to the bone, to remove the flesh or fillets. They can be served whole or divided in uniform pieces if the fish is large.

TO BOIL A FISH.

Put the fish into a kettle of boiling water, enough to cover, with a teaspoonful of salt and a tablespoonful of vinegar or half the juice of a lemon. This hardens it. Do not let the water boil rapidly after the fish is put in, as that breaks it; let it simmer on top of the stove. A little celery, onion, bay leaf and peppercorns put in the water improves the flavor of white fish. Allow fifteen minutes to a pound. If a fish ket-

tle is not used, place the fish in a plate and tie the plate in a cloth before putting in the kettle. Prepared in this way it is much easier to remove from the kettle.

TO BROIL FISH.

Clean the fish, wash and wipe dry. Cover with a little softened butter, season with salt and pepper. Rub the broiler with salt pork or butter. Broil first the flesh side until brown before turning. A thick fish should cook about twenty minutes, a thin one less time. Try with a fork. When done, place on a hot platter, season with butter, salt and pepper and a little chopped parsley. Garnish with lemon or water cress or serve with a sauce.

TO BAKE FISH.

Place in the bottom of the pan two or three thin slices of salt pork to prevent the fish from sticking, or on the rack, if rack is used. If part of a fish is to be baked, wash it and wipe dry, cover the fish with buttered cracker crumbs that have been well seasoned with salt, pepper, lemon juice, chopped parsley and a little onion juice, or sprinkle with flour; or, salt and pepper, little pieces of butter, and five minutes before removing from the oven cover the top with grated cheese, seasoned with a little salt and paprica.

STUFFING FOR FISH.

1 cup of powdered cracker crumbs.	1 teaspoonful onion juice.
1 teaspoonful salt.	$\frac{1}{4}$ cup melted butter.
A little pepper.	2 teaspoonfuls of pickles, chopped, or, one of capers and one of pickles.
1 teaspoonful chopped parsley.	

If not moist enough, use a little hot water. An egg may be used, but it is not necessary. This should be a dry stuffing.

TO BAKE A WHOLE FISH.

Stuff and sew up the fish. Place the fish upright in the pan. If broad and short they may be kept in place by propping up. If not the right shape to prop, skewer in the shape of the letter S. If prepared in this way will keep their shape after cooking. Place when done on a hot platter. Pour a sauce around it, place a slice of lemon in the mouth. Before baking, cut gashes (three or four) across the back and place in each a slice of salt pork. *The head and tail* should be left on.

FISH CHOWDER.

When it is available, cod or haddock is used, but halibut makes a very good chowder. Have the fish cut in serving pieces. Cut salt pork in tiny squares. Fry until brown, with one finely chopped onion; put in a kettle with the fish. Cover with boiling water, add a little salt. Cook until the fish is tender. Cook sliced potatoes until tender. Add those to the chowder, and one cup of rich milk. Melt two tablespoonfuls of butter, stir into it one of flour; use one cup of the hot liquid to make a sauce, stirring gradually into the butter and flour, then add this to the chowder, season with pepper and salt to taste; put a few crackers on top when ready to serve.

TO COOK SMELTS.

Clean,, wash and dry them, season with salt and pepper, dip in fine granulated corn meal or flour.

Fasten together with a toothpick forming a ring (or fry without). Place in as many as will cover the bottom of a frying basket, dip in smoking hot fat and cook for one minute. *Or*, fry out in frying pan half a dozen slices of salt pork. Cook the smelts in this, first on one side and then the other, until they are brown. Serve with tartare sauce.

FILLETS BAKED WITH TOMATOES.

Any kind of fillets or sliced fish can be cooked in this way. Place on the bottom of the pan four slices of salt pork, one onion cut in slices, wash and wipe the fish dry, cover the top with butter-seasoned crumbs. Place in the pan on top of the pork and onions. Wipe clean half a dozen tomatoes (or enough to serve one to each person), place them around the fish. Cook in a hot oven until the fish is done, basting several times, both the tomatoes and fish with the fat in the pan. When done place the fish carefully on a hot platter and arrange the tomatoes around it. Serve with Hollandaise, white or Bearnaise sauce.

STUFFED FILLETS OR SLICED FISH.

Wash and wipe the fish dry, season with salt and pepper, spread a layer of "stuffing for fish" over the pieces, about an inch thick. Roll up and tie securely with a string. Place in a buttered pan or on slices of salt pork. Cover the top and sides with buttered crumbs. Cook in a hot oven three-quarters of an hour. Serve with maitre d'hotel butter or a white sauce made from the fat in the pan.

BOILED SALMON.

Prepare and cook as for boiled fish. Serve on a hot platter with Hollandaise sauce and the little ball potatoes, placing some of the potatoes on top of the fish to form a bunch of grapes.

SALMON CUTLETS.

One cup of cold fish minced fine, season with one teaspoonful of salt, a little pepper, one teaspoonful chopped parsley, two teaspoonfuls lemon juice. Mix with one-half cup of thick white sauce. (See sauces.) When cold shape in cutlet form. Roll in crumbs and egg and crumble again. Fry in deep hot fat until brown. Serve with the paper ruffles stuck in the small end of each, placing the large end to the center of the platter. Pour around them a Hollandaise or white sauce. Any left-over whitefish is delicious prepared in this way.

FISH TIMBALE.

Cut one pound of raw fresh whitefish in small pieces, chop or pound to a pulp, press through a coarse sieve. To every cup of the fish pulp add one tablespoonful of fine bread crumbs that have soaked in a third of a cup of milk or cream until soft. One teaspoonful of salt, one-eighth teaspoonful of pepper, one-half teaspoonful of onion juice, the yolk of one egg well beaten. Beat all well together for five minutes, then fold in lightly the stiffly beaten white. Butter a mould or bowl; fill it not over two-thirds full; set it in a pan of hot water. Cover the mould with a greased paper and set in a moderate oven. Cook until the center is firm, from twenty minutes to one hour.

according to size of the timbale. Turn from the mould and surround with a lobster, shrimp or tomato sauce.

PLANKED SHAD AND POTATO ROSES.

Place the shad that has been prepared as for broiling on a thick hardwood board; hold it down with a few tacks. Season it with salt and pepper and cover with buttered crumbs. Shape hot mashed potato through a pastry bag and tube, in the form of roses around the fish, brush over with the yolk of egg that has been slightly beaten. Cook in a hot oven for twenty-five minutes.

CASSEROLE OF FISH.

Line a mould or baking dish with seasoned mashed potato, first buttering it well. Fill up the mould with any kind of highly seasoned creamed fish, or fish that has been mixed with tomato sauce. Cover the top over with an inch layer of mashed potato, brush over with a beaten yolk of egg. Bake in a hot oven for fifteen minutes.

CREAMED FISH SERVED IN MASHED POTATO CASE.

Line a baking dish with mashed potato. Cover with the beaten yolk of egg. Set in a hot oven to brown, then serve in it any kind of creamed fish. A good luncheon dish. Creamed meats are also good served in this way.

CREAMED SALT FISH.

Cook the salt fish in boiling water until tender, changing the water once. Pick in small pieces and

mix with a white sauce. Serve on toast or on a platter garnished with broiled sweet or white potatoes.

SALT FISH BALLS.

1 cup raw salt fish.		1 egg.
2 cups potatoes.		Little pepper.

Pick the fish in small pieces, free from bones. Pare the potatoes, cut in quarters. Cook the potatoes and fish together in boiling water until tender. Drain off the water and mash until very light; add the pepper and when a little cool, the egg, well beaten. Drop from a tablespoon into *smoking hot* fat. Fry until brown. Cook only three or four at a time, as too many cool the fat. Drain on soft paper. Serve with a white sauce. It is better not to form the mixture into shapes, as it makes them heavy.

SALMON FISH BALLS.

Mix one-half cup of salmon with one cup of mashed potato. Season and add one egg. Shape in little flat cakes. Cover with melted butter and broil, or fry in salt pork fat. Brown on one side and then the other. The salt pork gives a very nice flavor.

SHELL FISH.

OYSTERS RAW.

Oysters to be served raw should be very fresh, and should not be served at all from the first of May to September, as their flavor is not as good and they are not so healthful. For serving raw, the small oysters should be used. Look them over carefully to see that there are no pieces of shells. Leave them on the deep half of the shell and arrange regularly around the plate, giving six to each person. Have a little ice in the center of the plate, chipped fine. Place on the ice a little parsley or watercress and a quarter of a lemon on that. Serve with them paprica or tobasco sauce, horseradish, thin slices of brown bread buttered or crackers.

OYSTERS COOKED IN THE SHELL.

These are very delicious and should be served as soon as ready. They make a very palatable dish for Sunday night supper.

Wash the shells clean, put them in a pan with the round side down to hold the juice, and cook in a hot oven until the shells break open. Remove the upper shell. Season to taste when served.

Clams are delicious cooked in this way, in their own juices.

OYSTERS SERVED IN ICE.

Have fresh, small oysters that have been well picked over. Make a cavity in a smooth block of ice

with a hot brick, or pail or can of hot water. Place the ice on a platter with colored tissue paper under it if you want the color effect. Surround it with parsley or watercress and quarters of lemon, then place in the oysters.

Oyster Cocktail is very nice served in this way.

Individual cakes of ice can be made in the same way.

FRIED OYSTERS.

Select large oysters for frying. Pick them over carefully to see that none of the shell adheres. Put them in a strainer and let the cold water run through them just to rinse them. Drain well, season finely rolled cracker crumbs with salt and pepper, dip the oysters in the crumbs, then into egg, which has just been beaten slightly, to mix it, and has two table-spoonfuls of water added to it, then into the crumbs again. Put five or six at a time in the frying basket and plunge in the smoking hot fat. Cook until a golden brown. These should not be fried until time to serve. Pickles, horseradish, chow-chow, tartare sauce or celery salad can be served with them, either as a garnish or separately. Fried oysters may be prepared some time before cooking.

BROILED OYSTERS.

Prepare the oysters as for fried. Dry them well. Dip them in melted butter, rub a fine wire broiler with butter or salt pork, place them on the broiler over hot coals and cook until the juice flows. Place them on rounds or squares of toast, three or four on each piece. Pour a little melted butter over them, season with pepper. Serve any kind of pickles with them.

CREAMED OYSTERS.

Cook one pint of oysters in their own liquor until plump and their edges curl. Drain off the liquor. Make a sauce by melting two tablespoonfuls of butter and stirring into it two tablespoonfuls of flour, one-fourth teaspoonful of salt (or more if needed), a little pepper or paprica. Stir slowly into this one-half cup of oyster liquor to one-half cup of cream or milk. Cook ten minutes and add the oysters. Let them reheat in the sauce for five minutes. Serve on toast or in patty shells, timbale cases or bread boxes.

OYSTERS IN SHELLS OR RAMQUIN DISHES.

Cook the oysters and make the sauce the same as for *Creamed Oysters*. Remove the sauce from the

fire, add the oysters and the beaten yolks of two eggs, butter the shells or dishes and fill about two-thirds full. Cover the top with buttered bread crumbs and bake in a hot oven for five minutes, or until the crumbs are brown.

To Butter Crumbs.—Melt one tablespoonful of butter, add to it two tablespoonfuls of crumbs, stir them into the butter.

SCALLOPED OYSTERS.

Wash and pick over the oysters. Butter a baking dish and place in a layer of oysters. Sprinkle them with salt, pepper and bits of butter and a layer of cracker crumbs. Before putting on the top layer of crumbs add three tablespoonfuls of sherry, if liked. Cover the top with buttered crumbs. (Buttered crumbs given in the preceding receipt.) Bake for twenty minutes in a hot oven or try the oysters in the center and see if the edges are curled.

PIGS IN BLANKET.

Season large oysters with salt and pepper an hour before using, then wrap each oyster in a thin slice of bacon and fasten with a wooden toothpick. Cook on a hot spider or frying pan or in the chafing dish until the bacon is brown. Serve on small pieces of buttered toast.

Peel and slice potatoes. Cook until tender. Add to the clam liquor with the pork scraps and onion. Add the clams. Melt two tablespoonfuls of butter. Stir into it two of flour and mix with some of the hot liquor. Then stir all into the chowder. Add one cup of rich milk. Serve with crackers. Canned clams may be used in place of fresh ones.

ROASTED CLAMS.

Roast the same as oysters.

STEAMED CLAMS.

Wash the shells until clean and free from grit. Put them in a kettle without water, cover closely and cook until the shells open. Serve hot in the shells, with melted butter. Serve a small glass of the clam water to each person.

CLAMS IN BATTER.

Cook the same as for steamed clams. Cut off the head (the black tip) and dip in batter; fry in smoking hot fat until brown. (See fritter batter.) The clams may be chopped before adding to the batter if desired.

CLAMS A LA TOURINE.

Twelve clams chopped fine or one small can of minced clams. Loaf of bread. Remove the bread

from the crust and soak in milk until soft. Add one tablespoonful of onion chopped fine. One tablespoonful of melted butter. Pepper and salt to taste.

Mix all together. Add clam juice if not moist enough. Bake in shells with buttered crumbs on top.

SCALLOPS.

Wash quickly, dry between cloths, dip in cracker crumbs that have been seasoned with salt and pepper, then in slightly beaten egg that has two tablespoonfuls of water added to it, and in the crumbs again. Place them in a frying basket, immerse it in smoking hot fat for one minute. Drain on brown paper. Serve with tartare sauce.

CRABS.

Crabs are at their best during the months of May, June, July and August. Crabs, like lobsters, shed their shell once a year. When the shell is forming they are soft shell crabs.

SOFT SHELL CRABS.

Soft Shell Crabs should be used only when fresh. Remove the sand bag, gills and intestines. Wash and wipe dry. Roll in cracker crumbs, egg, and crumbs again, immerse in smoking hot lard for two minutes or roll in flour and sauté in hot butter on both sides. Serve with tartare sauce.

BOILED CRABS.

Plunge them head first in hot water (not boiling), then add one tablespoonful of salt; boil for twenty minutes. When cold remove the outside shell and take out the meat carefully.

DEVEILED CRABS.

Mince the meat fine and mix with half the amount of white sauce; season with salt, paprica or a little cayenne, teaspoonful chopped parsley, teaspoonful lemon juice, yolk of hard-boiled egg. Replace in the shell, cover with buttered crumbs and brown in a hot oven.

LOBSTERS.

Lobsters are difficult to digest and should only be eaten when fresh. Select a heavy lobster for the size. These will be found to be the most meaty.

·TO BOIL A LOBSTER.

Have enough water in a kettle to cover, and before the water gets very hot put in the lobsters. This seems the most merciful way, as it smothers them at once. Add two tablespoonfuls of salt, cover and boil for thirty minutes.

TO OPEN A LOBSTER.

When the lobster is cold, break off the large claws, separate the tail from the body. Remove the small claws. Save the coral and the green liver. Break the tail by pressing the sides together; then open and take out the meat and remove the intestinal canal, which runs the full length. Break off the gills. The gills, stomach and intestines are the only parts not used. Break the body in the middle and pick the meat from the joints. Hammer the claws near the edges, so as not to break the meat. Remove the meat. If the body of the shell is to be used for serving, cut down the underside with a sharp knife.

TO BROIL A LIVE LOBSTER.

With a sharp knife cut quickly down the back, remove the intestines and stomach. Broil over a moderate fire for thirty minutes, shell side down. Spread a little butter over it when broiling to keep it moist. When done, break the claws, season with salt, pepper and melted butter.

PLAIN LOBSTER.

Remove the meat from the shell, place on a platter, garnish with the little claws and parsley. Season individually with salt, pepper, vinegar and oil or melted butter.

SAUTE' LOBSTER.

Break the lobster meat in small pieces, heat in hot butter in saucepan or chafing dish, season with salt, pepper and a little vinegar. Cook for about five minutes.

CREAMED LOBSTER.

Cut the meat quite fine, reheat in a white sauce, seasoned with salt, pepper or paprica, lemon juice. Serve on toast or in patty cases, timble cases, bread boxes, or in shells or ramquin dishes, baked for five minutes in the oven with the buttered crumbs on top.

DEVEILED LOBSTER.

Chop the lobster very fine season highly with lemon juice, paprica, a little chopped celery, two small pickles chopped fine, salt. Mix with a white sauce, using half as much sauce as meat. Fill the tail of the lobster shells with the mixture, setting them in the pan with the meat side up. Cover the top with

buttered crumbs. Bake for fifteen or twenty minutes in a hot oven. Place two tails together lengthwise, the crumbs side up and garnish with the claws and parsley or watercress.

LOBSTER A LA NEWBURG.

Cut the meat from a two-pound lobster in inch pieces. Melt in the chafing dish or sauce pan two tablespoonfuls of butter, add the lobster and one-fourth teaspoonful of salt, a speck of cayenne or paprika. (A truffle chopped fine may be added.) Cover and let cook for five minutes, then add one-fourth cup of sherry or madeira, or half sherry and half brandy, and cook for five minutes. Beat the yolks of two eggs and mix them well with a cup of cream, add this and stir until it thickens. Serve at once or the eggs may cause it to curdle.

LOBSTER SOUFFLÉ.

2 tablespoonfuls butter.		1 cup of very finely chopped
2 tablespoonfuls flour.		lobster meat.
1 cup milk.		Salt, paprika and little
3 eggs.		onion juice.

Melt the butter. Stir into it the flour and gradually the milk. Then the lobster and seasonings and the beaten yolks of the eggs. Cook for five minutes after the yolks are put in. Remove from the fire when cool. Add the stiffly beaten whites. Bake in a buttered pan in hot water until firm.

OYSTER SOUFFLÉ.

Make the same as lobster soufflé. Use one cup of oysters that have been cooked and chopped fine. One-half cup of the oyster juice and one-half cup of milk.

MEATS.

The cheaper cuts of meat should have a long, slow cooking to break up the fiber. A cheap cut of meat often contains more nourishment than an expensive cut. For example, there is more nourishment in a well-cooked piece of round than in a well-cooked fillet. Tough meats are better boiled, as a lower degree of heat can be used and slower cooking.

TO ROAST BEEF.

Beef should be well streaked with fat, of a bright red color, elastic to the touch, and have a thick outside layer of fat. Put the meat in the pan which has been heated hot on top of the stove, then sear the meat in the hot pan on all sides, turning it with a fork. Then place it in the pan on a rack, sprinkle first with flour, then with salt and pepper. Put two tablespoonfuls of drippings in the pan if you have them, but no water, as water steams the meat. Cook in a very hot oven for ten minutes, then reduce the heat, basting often with the fat in the pan. Roast ten minutes to a pound, if liked rare, and fifteen minutes if liked well done.

Rolled Roast—Should be cooked a little longer.

Searing—First cooking the meat in a hot oven hardens the outside and keeps the juices in. Place on the platter with the fat side up. Carve in thin slices across the grain.

GRAVY FOR ROAST BEEF.

Pour the fat from the pan in a bowl, then pour about a pint of hot water or stock in the pan, to get all of the settlings. Put four tablespoonfuls of hot fat in a sauce pan, stir into it two tablespoonfuls of flour, well mixed, stir in the hot water or stock from the pan. Season to taste with salt, pepper, Worcester-shire sauce, ketchup or mushrooms. Cook for ten minutes.

YORKSHIRE PUDDING.

Beat two eggs very lightly, add one-half teaspoonful of salt and one cup of milk. Stir this gradually on three-fourths cup of flour, beat until smooth. Pour in hot gem pans that have in them drippings from the roast beef. Bake in a hot oven thirty minutes, basting twice with beef drippings, but not until they have been baking for fifteen minutes. Serve around the roast beef. This is a much better way than baking it in a pan.

FILLET OF BEEF.

Have your butcher remove the fat veins and trim into shape. The best way of cooking it is to lard it. If you do not care to do that, first place it in the pan on several slices of pork and cover the top with thin, narrow strips, dredge with flour, salt and pepper, or cover the top of the fillet with buttered, seasoned crumbs. Place around the fillet one carrot, turnip and onion cut in thin slices, and a couple of stalks of celery. Cook in a hot oven for thirty minutes. After ten minutes' cooking pour into the pan one cup of stock. Baste frequently. The fillet should be served rare. Put in a sauce pan a couple of tablespoonfuls

of butter and two of flour. When melted, stir slowly in the gravy from the pan, which has been strained from the vegetables, and the fat skimmed off. Pour into it a half can of mushrooms that have been drained from the liquor. Cook ten minutes. Pour around the fillet. If this does not make gravy enough add a little hot water to it.

BRAISED BEEF OR POT ROAST.

Four to six pounds of beef from the lower part of the round or rump. Place on the bottom of the pan six thin slices of salt pork and on the pork lay one-half cup each of carrot, turnip, onion and celery, cut in small slices. On the vegetables place the meat. Dredge well with flour, pepper and salt. Place in a hot oven for fifteen minutes. Then add two cupfuls of stock or hot water. Place slices of vegetables on top of the meat, cover closely with a pan. Cook slowly for four hours. When done, garnish the platter with vegetables, after being strained from the gravy. Melt two tablespoonfuls of butter, stir into it one of flour and slowly add the gravy. Cook ten minutes. Serve as a gravy with the meat. This way of cooking beef may be done in a pot, then it is called a pot roast.

BEEF A LA MODE.

Use five or six pounds of beef from the lower part of the round, cut thick. Lard it well with a larding needle, or make incisions into the meat with a sharp-pointed knife. Press into them thin strips of salt pork. This is called daubing. It can be done by the butcher. Put several thin slices of pork or two tablespoonfuls of drippings in the pot. When hot, put in

the meat and brown it on all sides by turning it, then dredge with flour, salt and pepper, half cover the meat with boiling water. Add to it one-half cup each of carrot, turnip, onion, cut in slices, and a sprig of parsley. Cover the pot tight and simmer slowly for four or five hours; add more water when necessary, having about a cup of the liquor when the meat is done. Place the meat on a hot platter, thicken the gravy a little with the vegetables, pour around it. This is very good cold.

BEEF STEW WITH DUMPLINGS.

The cheaper cuts of meat can be used for a stew. The aitch-bone, or two or three pounds from the shin, or flank, or upper part of chuck rib. Stew can be made from cooked meat, the flank from a roast or leftover pieces of fresh meat. Remove the meat from the bones, cut in two-inch pieces, season with flour, salt and pepper, brown all over with fat from the meat or drippings. Put in the stew pan, add one onion cut in thin slices, one good-sized turnip, two carrots. Add boiling water enough to cover. Cook slowly for two hours, then add six potatoes that have been pared, sliced thin and soaked in cold water for half an hour. Cook for five minutes, then add the dumplings, having the liquor come up even with the potatoes and the dumplings resting on top. Cover closely and cook for ten minutes. Put the meat in the center of the platter, the vegetables and dumplings around the outside. Thicken the gravy a little and pour around the vegetables. Season the gravy more if desired.

DUMPLINGS.

1 cup flour.		1 teaspoonful baking
$\frac{1}{4}$ teaspoonful salt.		powder.

Mix with one-half cup of milk into a dough soft enough to handle. Pat out in small cakes or roll and cut with a small biscuit cutter. Cook for ten minutes in the boiling stew, being careful that the water does not boil on them, as that would make them soggy.

MEAT PIE.

Lay in a baking dish a few thin slices of cold meat, grating of onion, salt and pepper, a layer of thin-sliced potatoes. (Cold cooked potatoes can be used, cut in thicker slices.) Fill up the dish with these layers. Pour over it any cold gravy, tomato sauce, or soup stock. Cover the top with pastry, rolled a half inch thick. Bake in a hot oven for about one-half hour. Any kind of meat can be used in this way, and other vegetables used if desired.

WARMED-OVER BEEF.

Cut the beef in small, thin slices. Make a gravy of two tablespoonfuls of butter and one of flour; when browned a little, add a cup of stock or gravy and one teaspoonful of Worcestershire sauce and one tablespoonful of catsup. Season with salt and pepper. Add the meat. Simmer for fifteen minutes. Place on a hot platter, garnish with three-cornered pieces of toast or little ball potatoes.

ROLLED STUFFED FLANK.

Take the inside flank, wipe it clean and dry, remove the fat, spread it evenly with a bread stuffing,

highly seasoned, about an inch thick. Roll it up and tie securely with a white twine. Cut into slices an onion, carrot and turnip. Place them in the pan, lay the meat on them and dredge with flour, salt and pepper. Add a bay leaf, sprig of parsley and the root or stalk of celery, one cup of water or stock. Cook for fifteen minutes in a very hot oven; then cover with another pan and cook slowly for four hours, basting frequently. It must have a long, slow cooking to be tender. When done, strain out the vegetables, make a gravy of the liquor and serve with the meat.

BOILED DINNER.

Select a piece of corn beef that is well streaked with fat. Wash it in cold water, put on to boil in cold water enough to cover. When it begins to boil, skim. Allow it to *simmer* slowly, until tender, about forty minutes to a pound. Scrape, wash and quarter the carrots, peel and quarter parsnips, peel and slice in inch slices the turnips, quarter the cabbage, peel the potatoes and cook whole. About one hour before the meat is done add the turnips, carrots and parsnips and a half hour before done add the potatoes. Tie the cabbage in a piece of cheese cloth and cook it in a separate kettle in some of the liquor from the corn beef. Cook one hour or until tender.

Cook the beets separately in boiling water. When done plunge them into cold water and rub off the skin. Serve hot or cold. Place the corn beef in the center of the platter and the carrots, turnips, parsnips and potatoes around. Serve cabbage and beets in separate dish.

PRESSED CORN BEEF.

Remove the beef from the bones, pick in rather small pieces, put layers of lean and fat in a round baking dish. Cover the top with a plate and press down with a brick or flat iron for several hours. Then slice thin. Serve with baked potatoes and pickles.

CORN BEEF HASH.

Half corn beef and half mixed vegetables. Chop all together until fine. Season with a very little salt and pepper; moisten with a little stock or gravy. Put one tablespoonful of drippings in the frying pan. When hot add the hash. When brown, cover the top with a plate; quickly turn the hash into it by turning the frying pan upside down. Put another tablespoonful of drippings in the pan and brown the hash on the other side. Remove to a hot platter, garnish with pickles cut lengthwise in half, or parsley.

VEGETABLE HASH.

Equal parts of all the left-over vegetables. Put into the frying pan a tablespoonful of drippings, add the vegetables and cook until heated through, stirring often. This is very nice served with the cold corn beef.

SPICED BEEF.

Select a piece from the middle cut of shin or the round. Wash the meat quickly and cut in four pieces. Cover with boiling water. After it has boiled for one-half hour, add the following seasonings, tied in cheese cloth: Six cloves, twelve peppercorns, one bay leaf, half teaspoonful sage, half teaspoonful thyme, three or four celery roots or stalks. Simmer slowly

now until the meat falls apart, pack and press. (See corn beef.) When cold, serve in thin slices.

BROILED BEEFSTEAK.

Cut off the flank end to use in other ways, as that is toughened by broiling. Grease the broiler with a little fat from the meat. Broil over red-hot coals, turning at first every ten seconds (to sear the outside and keep the juices in). If liked rare, broil eight minutes; well done, twelve minutes. Select a steak one inch and a half or two inches thick. Serve on a hot platter, season with butter and salt, maitre d'hotel sauce or mushroom sauce.

SPANISH STEAK.

For this use round steak cut one and one-half or two inches thick; sear it on both sides by turning it in a hot pan, then season with salt, pepper, a bit of butter and about one-half cup of water or stock. Cook in a hot oven for one-half hour, then cover with slices of raw onions. Add a few more pieces of butter; cook another one-half hour, then add a layer of sliced tomato, cook for another one-half hour, then cover with grated cheese. When brown, serve with a gravy made from the liquor in the pan.

SWISS STEAK.

Select a slice of round steak cut about two inches thick. Pound into the steak on both sides as much flour as it will take up (one cup). Brown the meat on both sides in bacon or salt pork fat. Cover with boiling water and let simmer about two hours. Peel an onion for each person to be served. Let cook five

minutes in boiling water. Drain and rinse in cold water and set cooking around the meat. Mushrooms may be added. Season with salt and pepper.

BROILED FILLET OF BEEF.

Cut the fillet in slices three-fourths an inch thick. Grease the broiler well. Broil over clear coals for six minutes, turning every ten seconds, at first. Place on rounds of toast the size of the slices. Season with salt, pepper and butter and garnish with peas or with mushroom sauce.

HAMBURG STEAK.

Use one pound from the round or the ends of steak. Put through a meat grinder or chop very fine. To it add:

1 tablespoonful of onion juice.		¼ teaspoonful of pepper.
1 teaspoonful of salt		1 beaten egg.

Form into flat cakes, dredge with flour and sauté in a little hot butter or drippings. Brown well on both sides. Remove to a hot platter, stir into the hot fat left in the frying pan one tablespoonful of flour. When brown, stir slowly into it one cup of stock or hot water. Season to taste with pepper and salt and add a few mushrooms or peas, or cubes of carrot that have first been cooked. Heat through and pour around the steaks.

PLANK STEAK.

The steak should be cut about an inch and a half thick. Have ready a hot broiler well oiled. Cook the steak over the coals about eight minutes, turning sev-

eral times. Then place on a hot plank. Pile hot mashed potatoes around the edge of the plank. Brush over the edges of the potato with the yolk of an egg beaten and diluted with a little milk, and set the plank into a hot oven to brown and reheat the potato. Remove from the oven. Fill the space between the plate and the potato with cooked peas, stringed beans and thin strips of carrot. Season with salt, pepper and butter.

BEEF TONGUE.

Smoked Tongue.—Soak for one hour in cold water, pour off the water and put on to cook in cold water. Let it come to a boil, pour off the water again. Put on in fresh cold water and boil until tender. Remove the skin, roots and fat. Serve hot or cold. If hot, serve with tomato sauce.

Fresh Tongue.—Wash and cook in boiling salted water until tender. Remove the skin and fat.

TONGUE IN JELLY.

Cut the tongue in slices and hold in shape. Place in a mould or dish the right size to hold it in place. Pour around it half inch thick of aspic jelly. When that is nearly firm, cover with the jelly. Serve when cold and firm. (See aspic jelly.)

PORK.

ROAST PIG.

Select a pig from three to five weeks old. Wash well and stuff with a potato stuffing.

Stuffing.—Two cups mashed potato, season with one-fourth cup of butter, two tablespoonfuls of chopped onion, one-fourth teaspoonful of pepper, one teaspoonful of salt, one teaspoonful sage, stuff and sew.

Skewer the fore legs forward and the hind ones backward. Rub over with softened butter, sprinkle with flour, salt and pepper. Put in a hot oven with a little water in the pan. Baste often with melted butter at first to soften the skin. Bake about three hours or until tender when tried with a fork. Arrange on the platter in a bed of parsley, with a slice of lemon in the mouth. Serve with apple sauce or fried apples.

ROAST PORK.

The loin, spare-rib and shoulder are best for roasting. Sprinkle well with flour, salt, pepper and sage. Cook in a hot oven, allowing twenty-five minutes to a pound. Pork should be well cooked. It requires five hours for digestion, and is more easily digested when cold.

PORK CHOPS.

To fry or sauté them, have them cut one-half inch thick, dredge with a little flour, sage, salt and pepper, and cook until brown on both sides. It will take

about twenty minutes. Serve on a hot platter, garnished with fried apples.

BACON.

Slice very thin, remove the rind, place in a hot frying pan. Cook until crisp. Drain on soft paper.

FRIED APPLES.

Cut slices of sour apples, one-half inch thick. Do not remove the skin. Sauté in beef drippings, pork fat or butter until tender.

BROILED HAM AND EGGS.

Have the ham cut in very thin slices. Place it in hot water for three or four minutes to take out a little of the salt. Wipe dry; broil over hot coals for about five minutes. Fry out several slices of salt pork, add the eggs and cook until the white is firm, basting them with the fat from the pan.

FRIED HAM.

Put the slices on a hot frying pan, brown on both sides. Remove, and cook the eggs in the fat left in the pan. Place the eggs around or on top of the ham.

BOILED HAM.

If salt, soak for several hours. Wash thoroughly, trim off any of the black part. Cover with cold water and let it cook slowly, allowing one-half hour to a pound. Remove from the fire, let it remain in the water over night, then cut off the skin. Press into the fat a number of whole cloves, sprinkle the top

with cracker crumbs and brown sugar. Bake in quite a hot oven for fifteen minutes. A half glass of sherry wine may be added to the boiling ham just before it is done.

BAKED VIRGINIA HAM.

Soak the ham two days in cold water, changing the water four times. Then put in fresh cold water, bring to the boiling point, and let simmer for four to six hours until tender, when pierced with a fork. When cool remove the skin, stick with cloves, cover with brown sugar and sprinkle with fine cracker crumbs. Brown in the oven.

BAKED HAM.

Prepare the ham the same as for boiling. Let it simmer slowly for four hours, then remove it and cut off the skin. Press cloves into the fat. Bake in a moderate oven for two hours, basting at first with one-half cup of sherry wine, and then with the fat in the pan. Fifteen minutes before it is done cover with cracker crumbs and one-fourth cup of brown sugar. Serve hot or cold. If serving hot, make a gravy of two tablespoonfuls of the fat in the pan. Stir into it one tablespoonful of flour and one cup of brown stock.

HAM COOKED IN CIDER.

Boil and prepare the ham for baking. Baste it every few minutes with a quart of hot cider.

SAUSAGES (Mrs. Lincoln).

Use sweet fresh pork. Take one-third fat and two-thirds lean. Chop or grind very fine; season for

every pound of meat and fat two teaspoonfuls of salt, two teaspoonfuls of sage, one-half teaspoonful of pepper. Make cotton bags, one-half yard long and four inches wide. Dip them in strong salt and water and dry. Crowd the meat into them, tie the bag tightly and keep in a cool place. When wanted for use turn the end of the bag back, cut off the meat in half-inch slices, fry in hot frying pan until brown on both sides.

PHILADELPHIA SCRAPPLE.

Cook a pig's head in boiling water until the flesh slips easily from the bones. Take out the bones, and when cold chop the meat fine. When the liquid is cold remove the fat and reheat the liquid to the boiling point. Add a teaspoonful of salt to each quart of liquid. Then sift in through the fingers of one hand, while stirring with the other, enough corn meal to give the consistency of mush. Let boil hard several minutes. Then set back to cook more slowly for an hour. Stir occasionally. At last stir in the chopped meat and turn into bread pans and set aside in a cool place. When ready to use cut in slices half an inch thick and brown in fat.

TO TRY OUT LARD.

Cut the leaves in small pieces, remove all flesh. Put a few pieces in the kettle first. When they are tried out put in the remainder. Cook slowly until the scraps are crisp, strain through cheese cloth into pails.

Many like to add one pound of suet to every five of the leaves. This makes a firmer lard.

BOSTON BAKED PORK AND BEANS.

Soak two cups of pea beans in cold water over night. In the morning drain off the water, put on fresh cold water and parboil them on the stove until the skin breaks, or you can pierce them with a pin. Then drain them through a colander, and pour cold water over them. Place in the pot. Clean one-fourth pound of salt pork, cut the top in gashes, place on top of the beans, pressing it down in them until the rind just shows. Mix one-half teaspoonful of salt, one-fourth teaspoonful of mustard, one tablespoonful of molasses in one cup of hot water and pour over the beans. Keep water enough in them to come to the top of the beans. Bake in a slow oven for eight hours. One small onion can be baked in the beans if the flavor is liked. The bean pot should be earthen, with bulging sides and have a close cover.

MUTTON AND LAMB.

Good mutton should have thick, white, hard, fat, fine-grained red meat.

ROAST LEG OF MUTTON.

Have the bone cut short, wipe it all over with cold water, dredge with flour, salt and pepper. Place in a hot oven for fifteen minutes, then add to the pan one cup of hot water, baste frequently, allowing ten minutes to a pound if liked rare, and fifteen minutes if liked well done. Garnish the end of the bone with a paper frill or a bunch of water cress or parsley.

ROAST LOIN OF MUTTON.

Remove the fat and kidney. Have the joints cracked, so as to be easily carved. Roast the same as the leg. Serve with mint sauce.

CROWN ROAST.

This can be prepared by your butcher and makes a very handsome and delicious roast. Cut a full loin, trim the rib bones as for French chops and chop them to a uniform length; then roll the loin backwards into a circle and tie securely. Tie around each bone a slice of salt pork so they will not burn. Baste frequently with the fat in the pan. Allow fifteen minutes to a pound. Cover each bone with a paper ruffle, fill up the center with potato chips and garnish around the roast with them, or, garnish with timbale cases filled with creamed peas, or pea timbales.

ROAST SADDLE OF MUTTON.

The saddle is the back; if split it is the loin. Remove the pink skin, as that contains the strong flavor, and the fat and kidneys from underneath. Roll the flank under and tie it into a good, round shape. Dredge with flour, salt and pepper. Cook in a hot oven, baste frequently, allowing ten minutes to a pound if liked rare, and fifteen minutes if liked well done. Carve slices parallel to the back bone, then slip the knife under and separate them from the ribs. After the top is carved, turn the saddle and carve the tenderloin, which lies underneath.

ROAST LEG OF MUTTON STUFFED.

Remove the bone, sprinkle the inside with salt and pepper, stuff and sew. Cook the same as roast leg of mutton.

Stuffing.—One cup of stale bread crumbs, one-fourth cup melted butter, one-fourth teaspoonful each salt, pepper, marjoram and sage, a teaspoonful of onion juice if desired and hot water if not moist enough.

BOILED LEG OF MUTTON.

Put the mutton into boiling water to cover, boil for fifteen minutes, then set aside and simmer, allowing twenty minutes to a pound. One-half hour before removing the meat add turnip cut in half-inch slices. Remove the meat to a hot platter, garnish with the turnip, cover the top with chopped parsley or capers. Serve with caper sauce. Save the water to use with the bone and left-over pieces for soups.

RAGOUT OF MUTTON.

2 lbs. from the neck or flank.	½ can peas.
2 tablespoonfuls butter.	2 cups of water or stock.
1 tablespoonful flour.	1 clove.
1 onion.	Sprig of parsley.
1 carrot.	Salt and pepper to taste.

Put the butter into the frying pan. When melted add the flour and brown. Then add the carrot and onion cut in small dice and the seasonings and mutton. Cook, stirring frequently until all are brown; then add the stock or water and meat. Cover closely, let simmer for two hours, add the peas just before serving.

NECK OF LAMB IN CASSEROLE.

Cut small pieces for serving. Wipe with a damp cloth and roll in flour. Brown in salt pork fat. Then place in a casserole. Add hot water to cover and let cook about three hours or until tender. Add one-half dozen peeled onions that have been parboiled. Half dozen small carrots cut up in fine pieces. One-half dozen small potatoes cut in slices. Cover and let cook until the vegetables are done. Add a can of peas drained from the water. Salt and pepper. Serve very hot.

CURRY OF MUTTON.

Fry one large onion cut in thin slices in two tablespoonfuls of butter. Mix with two tablespoonfuls of flour, one teaspoonful of curry powder, one teaspoonful salt, one-fourth teaspoonful of pepper. Stir into the butter and onion. Add gradually two cups of stock. Cut two pounds of lean mutton in two-inch pieces, add them to the sauce and simmer until tender. Place the meat on a hot platter with a border of rice around it.

MUTTON AND LAMB CHOPS.

Broil the chops over hot coals, turning every ten seconds, the same as steak, thus searing over the chops and keeping the juice inside. When the meat looks puffy it is done. It requires ten minutes to broil chops one inch thick; if liked rare, eight minutes. Place on a hot platter, season with salt, pepper and butter, garnish with points of toast and a little parsley or watercress, or with peas, French-fried potatoes, potato balls or straws.

French Chops.—Have the meat and fat scraped from the bone. When served, the bone is usually covered with a ruffle.

CHOPS IN PAPER CASES.

Place the chop on well-greased heavy writing paper, season with salt and pepper, fold the paper over the chop and turn the edges over twice to hold them securely. Broil over a moderate fire, turning frequently. These may be served in the paper. These are very delicate to serve to invalids.

ROAST SPRING LAMB.

Spring lamb is divided into fore and hind quarters, the whole of either not being too much to roast at one time. The fore quarter is less expensive than the hind. It should be fresh and thoroughly cooked. Roast in a hot oven, season with flour, salt and pepper. After fifteen minutes' cooking add one cup of hot water, baste frequently, allowing about twenty minutes to a pound. Serve with mint sauce and green peas or asparagus and new potatoes.

BOILED LAMB TONGUES (Mrs. Lincoln).

Boil six tongues in salted water with the juice of half a lemon until tender. Serve cold with tartare sauce, or pickle them by covering with hot-spiced vinegar.

VEAL.

The flesh of veal should be pink and firm; if it has a white or blue tinge it is unwholesome. It contains less nourishment than any other meat and less flavor, so should be highly seasoned, and, like lamb, should be thoroughly cooked.

ROAST VEAL.

The loin, breast and fillet (a thick piece from the upper part of the leg) are best for roasting. Remove the bone from the fillet and stuff with a highly seasoned bread stuffing; skewer into shape. To prepare the veal for roasting, cover the top with thin strips of salt pork, or lard with a larding needle; season with flour, salt and pepper. Allow twenty-five minutes to a pound. Make a gravy from the drippings in the pan. Horseradish is very acceptable to serve with veal.

STUFFED SHOULDER OF VEAL.

Have the blade removed and fill the space with a highly seasoned stuffing; sew up the opening and truss with strips of salt pork. Allow thirty minutes to a pound.

STUFFING.

To one cup of stale bread crumbs add one-half tablespoonful of salt, sage, thyme, one teaspoonful lemon juice, of chopped salt pork, one-quarter teaspoonful pepper, one-quarter cup melted butter, one egg beaten until light, and if too dry add a little hot water.

VEAL CUTLETS.

Dredge the cutlets with salt and pepper, dip in fine cracker crumbs, then in egg, then again in the crumbs. Sauté in hot fat, either salt pork or beef drippings. Brown well on both sides, place on a hot platter and surround with a tomato or Bernaise sauce or make a gravy by adding one tablespoonful of flour to the fat, adding one cup of stock, and season with salt, pepper and a teaspoonful of lemon juice, or season with butter, salt and pepper and pass with them tartare sauce.

VEAL CUTLETS WITH CREAM.

Divide the cutlets into sections. Dip them in cream, then sprinkle with flour, salt and pepper. Sauté in hot butter until well browned on both sides. Remove to a hot platter and surround with a sauce made by adding one tablespoonful of flour to the fat and cream left in the frying pan and one cup of cream. Cook for five minutes, season to taste and add to the sauce a handful of fresh mushrooms, if you have them, and allow them to cook five minutes in the sauce.

VEAL STEW.

The ends of the ribs, the neck and knuckle may be used for the stew. Cut about two pounds of the meat in two-inch pieces. Cover the meat with boiling water. Let simmer until tender. Add one onion sliced thin, two teaspoonfuls of salt, one-fourth teaspoonful of pepper, two carrots sliced, one turnip sliced one-half inch thick, when the meat is put on to cook; twenty minutes before the meat is done add four good-sized potatoes that have been sliced and

soaked in cold water for an hour. Remove the meat and vegetables on a platter, thicken the gravy with one tablespoonful of flour and season with two tablespoonfuls of butter and one-half cup of milk or cream.

For Veal Pot Pie add dumplings with the potatoes, the same as for beef stew.

VEAL LOAF.

5 pounds of veal.	1 teaspoonful summer
1 cup finely powdered cracker crumbs.	savory.
½ cup of stock.	1 teaspoonful salt.
3 eggs.	1 teaspoonful pepper.
1 tablespoonful finely chopped onion.	¼ cup of salt pork chopped fine, or
1 teaspoonful thyme.	2 tablespoonfuls of melted butter.

Chop the veal fine, add cracker crumbs and seasonings, stock and eggs slightly beaten. Form with the hands into a loaf, cover the top with slightly beaten egg, and a layer of cracker crumbs. Place in a baking pan on four thin strips of salt pork. Bake for three hours, basting frequently with butter and hot water. This is better served cold.

SCALLOPED VEAL.

Cut cooked veal in thin slices or cubes. Put in a baking dish alternate layers of veal and buttered crumbs, seasoning each layer of meat with salt and pepper. Over the top pour a tomato sauce and sprinkle over with a layer of buttered crumbs. Bake for half an hour.

BRAISED CALF'S LIVER.

Lard it in three rows, or place several strips of salt pork over the top. Cut into slices one carrot, one turnip, one onion and two slices of salt pork; put them in the baking pan. Place the liver on them. Add one cup of stock or hot water, one teaspoonful of salt and four peppercorns, a sprig of parsley. Cover with another pan and cook in a moderate oven two hours and a half, basting often. Add more stock or water, if necessary. Make a gravy by melting in a sauce pan two tablespoonfuls of butter, stirring into it one of flour. When brown gradually stir in one cup of the stock left in the pan that has been strained from the vegetables. Season with more salt and pepper, if necessary. Pour around the liver.

BROILED LIVER.

Slice in three-fourth inch slices. Soak in cold water for five minutes to draw out the blood. Wipe dry. Dip in melted butter. Broil from five to eight minutes, turning at first every ten seconds. Season with butter, pepper and salt. Broiled bacon is often served with it.

CALF'S HEART ROASTED.

Wash the heart clean and wipe. Fill with a cracker or bread stuffing seasoned with melted butter, salt, pepper, onion and sage. Bake for two hours. Season the outside with salt and pepper, and sprinkle with flour. Baste with hot water and butter. Make a gravy from the liquid in the pan. Garnish around with boiled onions or stuffed tomatoes.

CALF'S HEAD WITH BRAIN SAUCE.

Soak the head in cold water for two hours. Take out the brains. Scrape the head very clean, then pin in a floured cloth. Put on to boil in salted, boiling water enough to cover. After boiling two hours, add the brains, which have first been pinned in a floured cloth, liver and lights, and boil two hours longer. Remove the cloth from the head and the large bones will slip out. Lay on the platter with the skin side up.

To Make the Brain Sauce.—Take one quart of liquor that the head has been boiled in, one-third of the liver chopped fine; also the brains chopped fine. Melt one-half cup of butter, stir into it five tablespoonfuls of flour. When smooth add the hot liquor, a little at a time. Stir in the chopped brains and liver, then add two tablespoonfuls of vinegar, a half cup of white and red wine. Salt and pepper to taste. A little grated nutmeg, if cared for. Cook ten minutes. Skin the tongue and slice the remainder of the liver, and surround the head with them. Pour over a part of the gravy. Garnish with slices of lemon and radishes cut to represent roses. Send the remainder of the gravy to the table in a dish.

SWEETBREADS.

Sweetbreads are two large glands lying along the back of the throat and in the breast. Those found in veal are considered the best. They spoil very quickly and should be put in cold water for one-half hour and parboiled before using in any form.

To Prepare Sweetbreads.—Put them in cold water. Remove the pipes and membranes. Cook in

boiling salted water with one tablespoonful of lemon juice or one-half tablespoonful of vinegar, for twenty minutes, then plunge in cold water for ten minutes to harden.

FRIED SWEETBREADS.

Cut the parboiled sweetbreads in slices. Dip in egg, crumb and egg again. Fry in deep fat for one minute, or season the slices with salt and pepper. Sauté in hot butter. Garnish with parsley and olives or pickles and slices of lemon.

LARDED SWEETBREADS.

Lard the parboiled sweetbreads in even rows, and bake in the oven until brown, first sprinkling with flour, salt and pepper.

Creamed.—Cut in cubes and serve in white sauce, on toast, patty cases, bread boxes or timbale cases. They may be served in the same way with poulette sauce.

SWEETBREADS SERVED IN RAMQUIN DISHES OR SHELLS.

Cut the sweetbreads in small pieces, mix with a cream or poulette sauce. Butter well the dishes, fill two-thirds full, cover with buttered crumbs and bake in a hot oven for eight minutes. Serve at once. Mushrooms or oysters can be added to them.

TRIBE.

Soak tripe for one-half hour in cold water, changing the water twice, then cook in boiling water for twenty minutes *before cooking in any form.*

BROILED TRIPE.

Dry it after boiling. Dip into melted butter, then season with salt and pepper, and broil for ten minutes. Season again and serve.

TRIPLE IN BATTER.

Cut the boiled tripe in two-inch pieces, dip in batter and fry one minute in deep fat. Or fry out several pieces of salt pork and brown in the fat.

Batter.—One egg, one-fourth cup of cold water, one teaspoonful of lemon juice, one-fourth teaspoonful salt, and flour to make a drop batter (a batter that will drop from the spoon, not pour).

POULTRY.

POULTRY AND GAME.

Poultry should be drawn as soon as killed, to be perfectly wholesome. That custom is not used in our markets, but it should be made compulsory for the good of the meat. To tell the age of poultry, press the end of the breast bone. If it is soft and bends easily the bird is young. If the end is hardened it is over a year old. Pin feathers indicate a young bird, and long hair an old one. The skin should be firm, smooth and white. Geese and ducks should not be over a year old, have soft yellow feet, tender wings and thick, hard breast. Wild ducks have reddish feet.

TO CLEAN AND TRUSS POULTRY.

Singe the hair and down by holding the fowl over the gas, or over a roll of lighted paper held over the fire. Cut off the necks close to the body, leaving skin enough to fold over on the back (if to be roasted). Remove the windpipe and crop, then remove everything from the inside that can come out. Be sure that the lungs are taken out. They lie close to the backbone, and are a bright-red, spongy mass. Next take the leg; bend it back slightly, and carefully cut the skin on the joint just enough to expose the sinews without cutting them. Run a fork or skewer under them, pulling them out. The drumstick is much improved by removing the sinews or tendons. Cut out the oil bag in the tail. Wash out the inside very quickly with cold water, and with a bowl of water

and cloth wash the outside. Do not allow them to soak in water, as that will extract the flavor and nourishment.

Cut the gall carefully from the liver. Cut the outer coat of the gizzard and draw it carefully away from the inner sack. Open the heart and wash away the clot of blood. The heart, gizzard and liver are the giblets. All poultry and game are cleaned in this way. Wild ducks, coot and geese should be washed thoroughly with soap and water, as the skin is very oily and can not be cleaned without.

TO STUFF AND TRUSS A FOWL FOR ROASTING.

After the fowl has been prepared as given above, place it in a bowl or platter, put a little of the stuffing in the opening at the neck, the rest in the body, filling out the breast until plump; then draw the neck skin over on the back and sew it, and if the opening of the body is full, sew that up with a coarse thread; if it is not, it is not necessary. Press the legs close to the body and cross over the tail, and tie firmly with twine. Put a long skewer through the thigh into the body and out through the opposite thigh, and another *through* the wings, drawing them close to the body. Wind a string from the tail to the skewer in the thigh, then up to the one in the wing, across the back to the other wing, then down to the other thigh, and tie around the tail. If you have no skewers, the legs and wings can be kept in place by tying firmly to the body with string. Put the fowl on a rack in a pan, rub well with softened butter, dredge with flour, salt and pepper. Put in a hot oven for fifteen minutes, then reduce the heat, add a little hot water to the pan to prevent burning. Baste with butter and hot water

until brown, then baste frequently with the fat in the pan. Cook until the legs will separate from the body. Draw out the skewers and cut the strings. Allow about three hours for an eight pound turkey. Serve cranberry sauce or jelly with roast turkey, currant jelly with roast chicken and game, apple sauce with roast goose.

STUFFING FOR ROAST TURKEY OR CHICKEN.

For two cups of fine bread crumbs add one-fourth cup of melted butter, one small onion chopped fine, one teaspoonful salt and two teaspoonfuls of mixed herbs, a little pepper. This makes a dry stuffing; if liked moist, add a little hot water or milk.

GIBLET SAUCE.

Boil the giblets in salted water until tender, chop them quite fine, put a tablespoonful of flour in the pan in which the fowl was roasted. Let it brown; then add, stirring constantly, one cupful of the water the giblets were cooked in. Season with salt and pepper, strain and add the chopped giblets, and serve in a gravy boat.

TO DRESS FOWLS OR BIRDS FOR BROILING.

Singe, wipe off with a cloth and cold water, split down the middle of the back, lay open, and remove the contents from the inside.

TO BONE A BIRD, FOWL OR TURKEY.

The skin should be firm and unbroken, and the bird should not be drawn. Remove the head, wash and singe. Remove the tendons from the legs as

directed, loosen the skin around the end of the drum sticks. The work of boning is not difficult, but requires time and patience. Use a small pointed knife. A regular boning knife is the best. Cut the skin down the full length of the back, scrape the meat away from the bone, beginning at the neck, until you feel the shoulder blade, loosen the flesh from this, and then follow the bone to the wing joint, and to the middle joint in the wing. Care must be taken to avoid cutting through the skin at these places, as the skin is very near the bone. Leave the first bone in the wing, then remove the flesh from the breast. Be careful and do not cut through the skin at the ridge, or to cut through the membrane into the inside. Remove the flesh around the second joint, then the drumstick, turning the flesh wrong side out. Turn the bird and do the same on the other side. When the meat is free from the carcass lay the bird on a board, skin side down. Place the flesh in place, sprinkle it with salt and pepper, stuff out the legs and wings with the force meat and fill the bird with it. Draw the skin up and sew it together; turn it over and skewer and tie the legs and wings in position of a trussed fowl; press and tie the body into natural shape, dredge with flour, salt and pepper; cover with several slices of salt pork. Roast, allowing twenty-five minutes to a pound. Baste frequently. Make a gravy by using six tablespoonfuls of the drippings in the pan, one of flour and a cup of cream or white stock. Season.

FORCEMEAT FOR STUFFING BONED FOWLS.

Use the cooked or uncooked meat of another fowl or veal, or a part of both; chop fine. To every cup of meat add one-fourth cup of bread or cracker crumbs,

one-fourth cup of melted butter, one teaspoonful chopped parsley, one teaspoonful of onions, chopped fine, one-fourth teaspoonful each of sage, thyme, pepper, one-half teaspoonful salt, one stalk of celery, chopped fine. Moisten with stock the meat was cooked in, or leftover gravy.

TO BOIL FOWL.

Boiled fowl are sometimes cooked with oysters, bread or chestnut stuffing, but as the stuffing is apt to get wet and soggy, they are better cooked without it. Clean, sprinkle the inside with salt and pepper, put on to cook in boiling water enough to cover, with one teaspoonful of salt and one whole small onion. Simmer until tender. (The time depends upon the age and size of the fowl.) Serve with oyster, celery or caper sauce, using some of the liquor the fowl was boiled in for the sauce. Pour the sauce around the fowl, or garnish with a border of rice.

BRAISED CHICKEN.

Take an old chicken, prepare it for roasting. Dredge with flour, salt and pepper. Brown all over in hot butter or chicken fat, then place in the roasting pan on a bed of sliced onion, carrot, turnip and celery. Cover the top with four slices of salt pork, add two cups of water, cover closely with another pan, roast for three hours, basting often and replenishing the water so as to keep about two cups in the pan. Remove the fowl on a platter, garnish with vegetables and make a gravy of the liquid in the pan. Season to taste. Cook in a pot on top of the stove, if liked.

BROILED SPRING CHICKEN.

Split down the back, remove the entrails and breast bone and the oil bag from the tail. Wipe clean with a cloth and cold water. Rub with soft butter, sprinkle with salt and pepper. Place on a broiler the inside down; broil over a slow fire for twenty-five minutes. When nearly done turn and let the skin side brown. Place on a hot dish, spread with butter, or with maitre d'hotel sauce. Garnish with watercress or parsley and slices of lemon.

TO BROIL A TURKEY.

Select a very small, fat, young one, weighing not over five pounds. Have it split as you would a chicken for broiling. Place it in the roasting pan seasoned with salt, pepper and butter, with a half cup of water in the pan. Cook until the meat is tender, then broil over a rather slow fire. When brown put on a hot platter, spread with butter and season with salt. Save any liquid left in the pan for chestnut sauce to pour around it. If the turkey is unusually young and tender it can be broiled without cooking in the oven.

PANNED CHICKEN.

Prepare the chickens as for broiling. Place them in a pan, skin side up; rub with softened butter; dredge with flour, salt and pepper; put in a hot oven. After ten minutes baste with butter and a *little* hot water. Cook for thirty minutes, baste three times, using not over a half cup of water, the rest butter. Remove to a hot dish and make a gravy from the fat in the pan. Add to it one tablespoonful of flour. When brown, add a cup of thin cream or white stocks.

Cook until smooth, stirring all the time; pour around the chicken.

FRICASSEE CHICKEN.

Cut the chicken in small pieces for serving, put in the pot with warm water enough to cover, one teaspoonful of salt and two stalks or roots of celery. Cook slowly until tender; remove the chicken and strain the celery from the liquor. Fry out half a dozen slices of salt pork, and one onion sliced thin in the frying pan. Butter or chicken fat can be used in place of the pork. When the fat is hot put in the chicken and brown on all sides. Arrange on the platter. Remove the onion from the fat, add two tablespoonfuls of flour to it, and two cups of the liquor gradually. When smooth, add one-half can of peas or the same amount of mushrooms drained from the liquor, cook for five minutes, pour around the chicken and garnish with points of toasted bread or toasted crackers.

CHICKEN STEW WITH DUMPLINGS.

An old chicken is the best. Have it cut in four pieces, and make the same as beef stew.

(See Dumplings, under Beef Stew.)

CHICKEN CURRY (Mrs. Lincoln).

Cut the chicken at the joints, and remove the breast bone, wipe, season with salt and pepper, dredge with flour, and brown in *hot butter*. Put in a stew pan. Fry one large onion, cut in thin slices, in the butter left in the pan till colored, not browned. Mix one large tablespoonful of flour, one teaspoonful of

sugar and one teaspoonful of curry powder, and brown them in the butter. Add slowly one cup of water or stock and one cup of strained tomatoes, or one sour apple chopped, and salt and pepper to taste. Pour this sauce over the chicken and simmer one hour or until tender. Add one cup of hot milk or cream. Boil one minute longer and serve with a border of boiled rice. Rabbit, veal and lamb may be curried in the same way.

SPANISH CHICKEN.

Split tender broilers in halves, rub with salt, sprinkle over with finely chopped cloves and Spanish peppers. Over all put thin strips of bacon or salt pork. Bake in a hot oven till the chicken is tender. Watch carefully that it does not burn. If necessary, add a little water. When tender remove from the pan, add two tablespoonfuls of flour to the fat left in the pan and one cup of thin cream, one-fourth cup of water; cook on top of the stove for five minutes, stirring all the time. Season to taste if salt or pepper is required. Pour around the chickens.

CHICKEN JULIENNE.

Split the chickens down the back as for broiling, lay them breast down in a baking pan, filling the depression inside the ribs with equal quantities of finely minced onion, carrot, celery and peas; season with salt, a little pepper, and several small pieces of butter, add one-half cup of hot water; cook in a hot oven for one-half hour, or till the vegetables are tender; remove the vegetables and turn the chickens over to brown, then make a sauce by adding flour to the

liquid in the pan, and the vegetables and one-half cup of cream; pour around the chicken and garnish with sweet potato croquettes.

CHICKEN FRITTERS.

Cut cold chicken or turkey off the bones in as large pieces as possible. Sprinkle with salt and pepper, dip in fritter batter and fry in deep fat until a good brown, drain on brown paper. Serve with poulette, Bernaise or tartare sauce.

STUFFED CHICKEN OR TURKEY LEGS.

Remove the tendons from the drum sticks, remove the bone, stuff the leg with a force meat. (See force-meat for boned chicken or turkey.) Draw the skin over the ends and sew securely, keeping the shape. Lay them in a baking pan, cover with boiling water and simmer in the oven until tender—about an hour and a quarter. Remove from the water, let cool, take out the stitches, roll in beaten egg and seasoned fine bread crumbs, then in egg again, and fry in deep fat for one minute. Serve with olive, tartare, celery or currant jelly sauce.

CHICKEN A LA MARYLAND.

Clean the chicken, remove the head and legs. Put on to cook in a pot of warm water, enough to cover. Cook with it one sliced onion, carrot, turnip, one bay leaf, two cloves, six peppercorns, two celery roots or two or three stalks of celery. Cook slowly until the chicken is tender, then remove the meat from the bones. Cut in two-inch pieces. Cook the stock down to one cup, heat and strain one cup of

tomatoes, melt in a sauce pan two tablespoonfuls of butter, add one tablespoonful of flour. When smooth stir in slowly the cup of stock, then the tomato, and the chicken. Cook for ten minutes. Surround with points of toast or serve in fried bread baskets or timbale cases. This can be made in the chafing dish by having the chicken prepared before.

CHICKEN SOUFFLÉ.

Chicken, veal or lamb may be cooked in this way:

2 tablespoonfuls of butter.		1 cup of milk, or chicken
1 tablespoonful of flour.		stock.
¼ teaspoonful salt.		1 cup of finely chopped
A little pepper.		chicken.
1 teaspoonful of chopped		10 drops onion juice.
parsley.		2 eggs.

Make a sauce by melting the butter, then adding flour, salt and pepper. Cook for ten minutes, stirring until smooth. Add the rest of the seasonings to the chicken, mix the sauce and chicken together, then stir in the well-beaten yolks. Stir over the fire for five minutes. Set aside to cool. When cool beat very stiff the whites of the eggs, stir them lightly into the chicken. Put in a buttered pudding dish, bake in a hot oven for twenty minutes. Serve at once in the same dishes. This can be baked in individual ramquin dishes or shells.

PLANQUETTE OF CHICKEN.

An old chicken will do as well as a young one. Cook until tender in boiling water, with a teaspoonful of salt, a small onion, and two stalks of celery. Strain the stock and cook down to one cup. Melt two tablespoonfuls of butter, stir into it one of flour. When

smooth, stir gradually into the stock and one-half cup of cream. Cook ten minutes, then add two well-beaten yolks of eggs, cook five minutes, but do not boil, as it might curdle. Remove from the fire, add two teaspoonfuls of lemon juice; cut the chicken in small pieces, add to the sauce. Serve on toast, surrounded by a border of rice.

CHICKEN A LA BÉCHAMEL.

Melt two tablespoonfuls of butter. Stir into it one of flour, one-fourth teaspoonful of salt, a little pepper, then add one-half cup each of chicken stock and cream. Stir until smooth, cook for five minutes, then remove from the fire, and beat into it three well-beaten eggs and two cups of chopped chicken. Turn into buttered ramquin dishes or in a baking dish, and bake standing in a pan of hot water about twenty minutes. The water should not boil. Salmon or any kind of white fish can be used in this way.

CHICKEN PIE.

One good-sized, old chicken. Put it in the pot and cover with warm water (use warm water so that part of the nourishment may be in the gravy), add to it two teaspoonfuls of salt, six peppercorns, one onion, sliced, three stalks of celery or the celery root, one carrot and one turnip, sliced. Cook slowly for two hours, or until the meat will leave the bones. Boil the liquor down to two cups. Melt in a sauce pan one-fourth cup of butter, stir into it one tablespoonful of flour, and gradually the two cups of liquor. When that is smooth, stir in one-half cup of thick cream, season with salt and pepper. Pick the chicken mostly from

the bones, leaving a few of the small bones to hold up the pie. Put a layer of the chicken in the bottom of the baking dish, then cover with a layer of the gravy. In the center of the dish place the breast bone to hold up the crust, fill up with the layers, and put a crust on top three-fourths of an inch thick, cutting a slit in the center to let out the steam. Layers of thin-sliced potatoes may be added to the pie, a few truffles or mushrooms, or alternate layers of chicken, oysters and the gravy. The baking dish is often lined with a thin layer of pastry, but it is very apt to be soggy. Bake three-quarters of an hour. To cover the pie use plain pastry, chopped puff pastry, or a rich baking powder biscuit dough.

Veal Pie can be made in the same way.

ENTRÉES.

Entrées are served between courses, and for regular course.

CROQUETTES.

Croquettes are made of nearly all kinds of meat, fish, vegetables, cheese, eggs and nuts. When shaped flat like a chop they are called cutlets. To prepare them the materials should be cooked tender, well seasoned and finely chopped (a meat chopper is best to use for meat croquettes), mixed together with a creamy sauce, moulded, rolled in bread or cracker crumbs, dipped in slightly beaten egg, rolled in crumbs again (this prevents the fat from getting inside), and fried a rich brown in clear smoking hot fat. They are usually surrounded with a sauce or peas. If not, should be garnished with celery tips, parsley, watercress or small leaves of lettuce.

CHICKEN CROQUETTES.

An old chicken can be used. They are cheaper than young ones, and the flavor is better. Clean the chicken well, and plunge in a kettle of boiling salted water. Place the kettle on the stove where it will have a slow cooking. Add to it one good-sized onion cut in slices, eight peppercorns, two or three roots of celery, or a few of the outside stalks (celery seed may be used in place of celery). A small amount of thyme and bay leaf can be used if desired. Let cook until tender. Remove from the liquid and when *old* chop fine and mix with a cream sauce. The liquid

should be strained and when cold remove the fat and use for the sauces. *Veal* or *lamb* can be cooked in this way for croquettes.

SAUCE FOR CROQUETTE MIXTURE.

All Croquettes Are Mixed With a Sauce.

1 cup milk, cream or stock.		$\frac{1}{2}$ teaspoonful salt.
2 tablespoonfuls butter.		$\frac{1}{8}$ teaspoonful pepper.
3 tablespoonfuls flour.		

A dash of nutmeg can be used. When stock is used, take one-half cup of milk or cream. Scald the cream, milk or stock in a double boiler, melt the butter in a sauce pan, stir into it the flour and seasonings. When smooth, add it to the scalded milk. Cook ten minutes, stirring frequently. Add it to the chopped mixture, and when cool mould in shape, and dip first in crumbs, then in egg, then in crumbs again. When meat is used, allow about one-half as much sauce as meat. It is well to add the sauce to the meat gradually, so as not to get the mixture too thin. It should be as thin as possible to mould. The beauty of a croquette is to have it creamy inside.

TO PREPARE THE EGG AND CRUMBS FOR CROQUETTES.

Beat the egg slightly until it is thoroughly mixed. Add to it two tablespoonfuls of cold water or milk. Put the bread or crackers through a meat grinder, or roll them. Always sift them. Bread should be thoroughly dry before rolling.

TO MOULD CROQUETTES.

Take a tablespoonful of the mixture, roll lightly between the hands in a ball, roll the ball lightly in

bread crumbs and mould with the hands in any shape you like. Dip in the egg, and see that all parts are covered (this prevents the fat from getting inside), lift out on the blade of a knife and again roll in the crumbs. Set aside if possible fully one hour before frying. Croquettes can be made up the day before frying if kept in a cool place and covered.

TO FRY CROQUETTES.

Have a good, clean fat. Let it become smoking hot. It can be tested by a piece of bread. If it colors while counting twenty it is right. Place four or five at a time in the frying basket, plunge in the hot fat and cook until brown. Remove them to a soft paper to drain. Have the fat smoking hot each time before immersing the basket. Croquettes can be fried without the basket, it being much more convenient to use it.

SWEETBREAD CROQUETTES.

Clean the sweetbreads. Cook in boiling salted water with two tablespoonfuls of lemon juice (or one tablespoonful to each pair) until tender. When cold cut in small cubes and mix with sauce. Add one beaten egg to the sauce five minutes before removing from the stove. A couple of tablespoonfuls of finely chopped chicken can be used with the sweetbreads. Chicken or veal stock can be used with the milk to make the sauce, or the milk used alone.

MUSHROOM CROQUETTES.

Peel the mushrooms, break in small pieces. Cook in sauce pan with two tablespoonfuls of water and a

litte salt. Let boil for five minutes, drain from the liquid and use it with *cream* to make the sauce. Add one egg to the sauce. Mushrooms and sweetbreads are often used together. Chicken may be added to either the sweetbreads and mushrooms.

NUT CROQUETTES.

Brazil, English walnuts or pecans can be used. One cup of chopped chicken or veal, one-half cup of nuts chopped fine. Mix with sauce.

EGG CROQUETTES.

Cook eggs in water, just off the boil, for thirty minutes. When cold remove from the shell. Chop the whites fine, sift the yolks, mix together with one egg slightly beaten. Season with salt and pepper and finely chopped parsley or chives. A few cooked mushrooms can be added. Mix with heavy white sauce. Set aside until cold, then mould, dip in the crumbs and egg. Fry. Serve with a white sauce alone or add a few peas, small beans, mushrooms or asparagus tips.

CHEESE CROQUETTES.

One-half cup grated Parmesan cheese, one cup American cheese, grated or cut in small pieces, mix together with a slightly beaten egg. Stir until smooth then add one-fourth cup of grated cheese and one cup of cold boiled rice (boiled so as to leave the grains whole, but well done). When cold form in croquettes. Beat one egg, add a tablespoonful of water, brush over the croquettes thoroughly with the egg, roll in sifted bread crumbs and fry in deep fat.

HOMINY OR RICE CROQUETTES.

Add to one cup cooked hominy or rice while warm one teaspoonful of sugar, the beaten yolk of an egg, a little hot milk or cream to moisten, one-fourth teaspoonful of salt, or moisten with a little tomato sauce. After shaping, press a cavity in the center of each and put in half a teaspoonful of jelly or marmalade. Close the rice over it, mould, dip in crumbs and egg, the same as other croquettes. These croquettes are nice to serve with game.

Corn Meal Mush.—Sliced in plain or fancy shapes, dipped in crumbs, egg and crumbs again and fried in deep fat, is served with game. Before the mush is quite cool it can be molded in croquette shapes, crumbed and egged.

MACARONI AND SPAGHETTI CROQUETTES.

Break in small pieces, plunge in boiling salted water, cook until tender, drain, cool, then cut in small rings. Add to each cupful one tablespoonful of grated cheese, one-fourth teaspoonful of paprica and

mix together with a very little heavy white sauce, just enough to hold the mixture together. When cool mould and dip in crumbs, egg and crumbs. Serve with tomato, poulette or mushroom sauce.

OYSTER CROQUETTES.

Pick over carefully, so as to remove all pieces of shell. Rinse through a strainer. Allow them to cook five minutes in their own liquor. Drain. When cool cut in small pieces. Mix with a sauce made of one-half cream and the rest of liquid the oysters were strained from. Melt two tablespoonfuls of butter in a sauce pan, add to it three tablespoonfuls of flour, one-fourth teaspoonful salt, a speck of pepper. Serve with Hollandaise or cucumber sauce.

LOBSTER CUTLETS.

These can be formed in the shape of a croquette or cutlet. Buy a cooked lobster, remove the meat, cut in fine pieces, mix with the heavy white sauce that

has an egg cooked in it for five minutes, mould and crumb. Fry. Stick into the small end of the cutlet a claw. Serve surrounded with peas, a white or Hollandaise sauce.

Salmon Cutlets.—Are made in the same way, with the addition of lemon juice and a little chopped parsley. White fish can be used the same.

CLAM CROQUETTES.

One cup of minced clams drained from the liquid. Mix with heavy white sauce made of half cream and half the liquor from the clams. Season with salt and pepper. When cool, mould, egg and crumb. Serve with Bearnaise or tartare sauce.

Roll in crumbs and egg and crumbs. Fry in smoking-hot fat.

POTATOES IN SURPRISE.

Use for these sweet or white potato croquette mixture. Take one tablespoonful and mould it flat in the hand, about half an inch thick. Drop into the center of it one teaspoonful of creamed chicken, mushrooms or sweetbreads that have been highly seasoned, fold the potato over it and mould, egg and crumb, like other croquettes. Serve with poulette sauce.

CELERY CROQUETTES.

Cut well-cleaned celery in very small pieces, cook until soft in boiling salted water. Cook for ten minutes, stirring, then add a slightly beaten egg. Cook five minutes, mix with the celery, mould, egg and crumb. These are delicious served with the roast or game course.

TO PREPARE MUSHROOMS.

Mushrooms contain almost as much nutrition as meat. The simplest way of cooking mushrooms is the best. Sherry and madeira are sometimes used with them for flavoring, but to many their flavor, alone, is far preferable. They decay quickly and should not be used unless fresh. Use silver knife for peeling. Wash them, remove the stem and peel the caps. The stems can be boiled separately and the water used to flavor sauces or soups.

Saute Mushrooms.—Cut or break the caps in pieces, put them in a sauce pan or chafing dish with some butter. Let cook in the butter for ten minutes. Season with salt and pepper and a little sherry if you like. Serve on toast.

The wine can be omitted. Put the meats in a kettle just covered with cold water and simmer for five hours. An hour before removing from the fire, add seasonings and vegetables that have been browned in marrow from the soup bone or butter, strain the stock; it should be cooked down to two quarts. When cold remove *all* the fat, and stir into it the beaten whites of two eggs, clear as you would clear soup

stock, then add the gelatine, which has been softened in cold water. *Aspic jelly* can be made from any soup stock by clearing it and adding gelatine.

Fasten each piece in place with a few drops of jelly, and when hard, add a little more jelly to cover. Then place whatever you wish to mould in the center carefully, pour in a little more jelly to hold it; when hard fill up the mould with the jelly. To decorate on the sides, dip the ornaments in the jelly and place on the sides after the mould is very cold. All kinds of meat, game or fish can be moulded in this way, either in one large mould or in individual moulds. A whole tongue is very nice moulded in Aspic.

Drop the batter from the tip of the spoon into smoking-hot fat; cook until brown; drain on soft paper. Serve with white sauce or cabbage salad.

TERRAPIN.

The best terrapin are the "Diamond Back," from Chesapeake Bay. Very good ones are taken from Long Island waters and along the seacoast. The season for eating them is from December to April.

TO PREPARE TERRAPIN.

Drop the live terrapin into boiling hot water; let them remain for twenty minutes; remove the skin from the head and feet by rubbing with a cloth; wash in several waters; then put into fresh boiling water; cook until tender. This is shown by pressing the feet between the fingers. If they are not tender in an hour's cooking they probably are not good; the meat will be stringy and tough. Remove as soon as tender. When cold cut off the nails, remove the shells, very carefully take the gall sacks from the liver (if the sacks be broken, so the liquid touches the liver or meat, it will give a very disagreeable, bitter taste). Remove the entrails, lights, heart, head, tail and white muscles; separate the pieces from the joints, divide the meat in pieces an inch and a half long. Do not break the bones. Place the meat, terrapin eggs and liver in a stew pan, cover with boiling water and boil until the meat is ready to drop from the bones.

This batter will keep several days.

ful of olive oil, one cup of flour, or enough to make a thin batter. Let it stand for two or three hours before using. Have a kettle of hot fat, place the iron in the fat until it is very hot, or until the fat smokes, letting the iron heat up with the fat; remove the iron from the fat and quickly wipe a little of the fat from the mould; dip it in the batter until it is coated, place again in the hot fat, cook a delicate brown, drain on soft paper. Be careful in cooking them that the iron does not touch the bottom of the kettle, as that will break them at the bottom. Use them to hold creamed meats, mushrooms, vegetables, fish or anything that you care to serve individually.

BREAD BOXES.

For these use stale bread; cut from a loaf slices an inch and a half thick, trim off the crusts, making a trim, thick slice; cut a square from this inside, making a box to hold creamed meats or vegetables. Cover the boxes with melted butter and brown in the oven. These can be cut in rounds, squares, hearts, diamonds or any fancy shapes.

VEGETABLES.

When convenient, vegetables should be freshly picked and thoroughly washed. The most simple ways of cooking them are the best; they then retain their own flavor. Most all vegetables should be cooked in boiling salted water, and removed from the stove as soon as done, as over-cooking will make them soggy. Green vegetables keep their color better by cooking without a cover. The time for cooking depends upon their freshness and the altitude. A high altitude requires a longer cooking. They should be seasoned with salt, pepper, butter, cream and sauces. Fresh green vegetables that contain sugar should have a *small quantity* of sugar added to the seasoning to replace that which is boiled away in the water. *One vegetable*, besides the potato, is served with the meat course; other vegetables, like egg plant, stuffed tomatoes and peppers, artichokes, mushrooms, macaroni and many others, can be served as a separate course.

POTATOES.

To Boil Potatoes.—Wash them well with a brush, pare them and drop at once in cold water, having them uniform size so they will be done together. Put them on to cook in boiling salted water, about half a teaspoonful of salt to a quart of water, boil slowly till they are done (as violent boiling breaks them). Then drain off all the water, return to the back of the stove, shake gently to allow the steam to escape, sprinkle with a little salt and serve on a hot dish.

Potatoes cooked in this way will always be light and palatable.

OLD POTATOES.

In the spring of the year the potatoes become withered (the water evaporates from them); they should then be pared and allowed to soak in cold water two or three hours before cooking, so that they may take in some of the water they have lost.

NEW POTATOES.

New potatoes are boiled with the skin on. As soon as they are done peel them and dry on the stove; season with salt alone, or cover them with a little melted butter and a sprinkling of finely chopped chives or parsley; just a little cream, pepper and salt make a nice dressing, or cover with cream sauce.

MASHED POTATOES.

Boil and dry the potatoes as directed, mash them in the same dish in which they are boiled. For two cups of potato use one-half cup of milk or cream, heated with two tablespoonfuls of butter and a teaspoonful of salt; add slowly to the potato, beating all the time; when very light and foamy, pile into a hot serving dish, but do not smooth them over, as that will make them heavy.

Garnish broiled meats or fish.

MACARONI, SPAGHETTI AND VERMICELLI.

Macaroni and spaghetti are used as a vegetable, vermicelli for soups and puddings. They are made from flour and water and should be combined with sauces or cheese. Cheese is most palatable cooked or served with it, as it supplies the fat which the macaroni does not contain. Combined with cheese and sauce it makes a most nutritious dish, and should enter into our diet more extensively.

If the macaroni or spaghetti is to be used for a garnish or timbales, do not break it, but place the long pieces carefully in boiling salted water. When to be used in other ways, break in inch pieces. Cook in boiling salted water till tender, drain in a colander and pour cold water over it. This prevents it from being sticky. Serve at once on hot squares or rounds of toast or crackers.

SAUCES.

It is very easy to make good sauces if the proper care is taken at the beginning by first melting the butter and stirring the flour into it, thus forming the roux—or thickening. For white sauces the flour is not changed. For brown sauces the flour is cooked in the oven until brown. Sauces are a great improvement to the dishes they accompany, especially so to made-over dishes. Save every scrap of meat and bone. It takes a very little to make the stock for a sauce. The flavor of vegetables can be obtained by sautéing them in butter before the flour is added. White sauces should be cooked in a double boiler to prevent the milk from burning. A sauce that is made by melting the butter, then stirring into it the flour, and gradually the liquid, cannot help being a smooth sauce, if quickly stirred. It is safer to strain all sauces before serving. If you do not have stock on hand beef extract can be used in place. In that case sauté the vegetables first in the butter.

SALADS.

Salads should form an important part in our menu. The oil which we use with them aids digestion and is one of the best forms of fat we can use. The green salads are the most easily prepared, and with a French dressing most appropriate for a dinner salad, often with the addition of some other fresh vegetable. Almost all kinds of meat, fish, vegetables and eggs with the addition of some kind of greens make good salads. It only requires a little thought in making the combination to always have a palatable salad.

TO PREPARE THE GREENS.

All greens should be carefully washed in cold water and all poor leaves thrown aside, for the beauty of a salad is to have it perfectly fresh. Let the leaves remain in ice-cold water for twenty minutes or so, then swing them in a wire basket to free them from the water, or dry each leaf with a napkin.

TO PREPARE MEAT FOR SALAD.

Meat for salads should be cut in dice, not smaller than a half inch, and should be marinated for one hour before serving. Meat salads are the only kind that are improved by marinating.

TO MARINATE.

Mix the meat with a French dressing one hour before serving. Before mixing the salad together, drain off any of marinate which has not been absorbed in the meat.

SOME THINGS THAT CAN BE SERVED WITH A SALAD.

Nut, cheese, olive, pickle, nasturtium, lettuce, watercress, cucumber, ginger, mint and plain sandwiches, made from all kinds of bread, rolls and crackers. Different kinds of cheese, either toasted or plain, served with crackers or bread and butter sandwiches, cheese soufflé, frozen cheese, cheese croquettes, cheese balls and cheese in any palatable form, is permissible with salads. Wine or orange jelly moulded with nuts or fruits, or plain, is very delicious served with a salad.

Radish Roses.—For these use the small, round ones. Cut the radish in scallops in two layers. Soak in ice water two hours before serving.

Radish Tulips.—Select small ones of oblong shape, cut them in quarters nearly down to the stem. Soak.

FRENCH DRESSING.

$\frac{1}{2}$ teaspoonful salt.		1 tablespoonful of vinegar
$\frac{1}{8}$ teaspoonful paprica.		or lemon juice.
3 tablespoonfuls of oil.		

Mix in the order given, adding the oil slowly, stirring all the time. A little tarragon vinegar with the other is considered a great improvement by many. One-fourth teaspoonful of dry or made mustard can be added, and a little onion juice. The onion juice is a great improvement when the dressing is to be used for *potato salad*.

MAYONNAISE DRESSING.

1 teaspoonful mustard.		Yolks of four raw eggs.
$\frac{1}{2}$ teaspoonful salt.		2 cups olive oil.
$\frac{1}{4}$ teaspoonful paprica or a		2 tablespoonfuls of vinegar.
little cayenne.		2 tablespoonfuls lemon juice.

When used for fruit salad take four tablespoonfuls of lemon juice, without the vinegar. Mix the dry seasonings and the egg yolks well together, add the oil a drop at a time until it begins to thicken, then it can be added a little more quickly. When it gets very thick, thin it with a little lemon juice or vinegar, then alternate the oil, vinegar and lemon juice until it is all used up. Just before serving add one-half cup of whipped cream. A wooden spoon, fork or Dover egg-beater are used to mix the dressing with, but the best of all to use is the mayonnaise mixer. With this mixer the dressing can be made much quicker, easier and lighter. Mayonnaise dressing can be colored any color you wish by using the vegetable colorings.

Use only the tender leaves. Wash each leaf and let them stand in ice water a few minutes before using. Dry them, arrange in a bowl with the largest leaves on the outside, sprinkle over with chives chopped fine, or new onions sliced very thin. Sliced pickles or olives are sometimes used with the lettuce. Rub the bowl with garlic before putting in the lettuce, if liked. Mix with a French dressing. Garnish with radishes cut to represent roses or tulips.

CELERY SALAD.

Use only the tender stalks (the outside can be saved for soups and sauces). Scrape and wash each stalk, let stand in ice-cold water a half hour before using. Dry in a towel and cut in one-fourth inch pieces or into straws one inch long. If cut into straws put in ice water for twenty minutes before serving to curl them. Mix with either French or mayonnaise dressing and garnish with lettuce leaves. Celery salad is often served with game.

STUFFED CELERY SALAD.

Clean the tender stalks of celery, put in cold water a few minutes, dry and fill the crevice with the following mixtures: Fill the stalks with tartare sauce, place three or four on lettuce leaves and serve. Or they may be stuffed with Roquefort cheese that has been mashed fine with a spoon and a little sherry wine added to it. Or filled with Neufchatel cheese that has been creamed and chopped nuts mixed with it.

CHICKEN SALAD.

Cook a chicken or fowl until tender in boiling water enough to cover, with a tablespoonful of salt, six peppercorns, one clove, a small bay leaf, one onion, several stalks of celery, or two or three of the roots. Remove from liquid and when cold cut the meat in half-inch pieces. (Save the liquid and bones and add to your soup stock. Cut the celery in half-inch pieces using half as much celery as meat. One-half cup of walnuts or olives cut in small pieces and added to two cups of the chicken and one of celery is an improvement.

Marinate the chicken and celery one hour before serving, drain off any marinate that is left in the dish, mix the nuts or olives or both, with the celery and chicken. Arrange in a salad dish, first mixing a part of the mayonnaise dressing with the salad. Cover the top with mayonnaise, garnish with celery leaves, olives, lettuce or hard-boiled eggs sliced. In the summer, when celery is out of season, cucumber cut in cubes can be used in place of it. Garnish with lettuce or watercress.

MOULDED CHICKEN SALAD.

Put the chicken on to cook in warm water with all the seasonings and vegetables as for chicken salad. Cook until tender, then cook the stock down to two cups. Strain and when cold remove the fat. Clear the stock (see clearing soup stock), and add to it two tablespoonfuls of granulated gelatine that has been softened in one-half cup of cold water. Reheat for a few minutes to dissolve the gelatine; prepare the chicken and celery as for chicken salad. Season with salt and pepper. When the stock begins to get cold and thicken, beat into it one cup of whipped cream and the chicken and celery. Pour into a mould that has been decorated with hard-boiled eggs, cut to represent daisies, or slices of egg, truffles or olives. The decorations can be held in place by a little of the stock. After the gelatine has been added mould in individuals or one large mould. Remove on salad dish. Garnish with lettuce or celery leaves and serve with mayonnaise dressing.

MOULDED CHICKEN SALAD (No. 2).

Garnish individual moulds or one large one. After the garnish is set with a little of the jelly, then add a layer of jelly one inch thick. When that has hardened, place the salad in carefully and cover it with a thin layer of the jelly to hold it firm. When that has hardened fill up the mould with the jelly, making three layers, with the salad between. Garnish with greens, lettuce, watercress or celery leaves. Serve with mayonnaise.

MOULDED CHICKEN SALAD (No. 3).

Mould in a double mould. If one is not at hand, use any two moulds or tins of the same shape, one of which is an inch or so smaller than the other. Place the larger one on ice, decorate it and hold in place with a little of the jelly, then pour enough of the jelly to make a layer the same thickness as the width of space between the two moulds. When it is set fill the smaller mould with ice and set inside of it and fill the space between the two with jelly. When that is set remove with a spoon the ice from the mould and pour into it a little warm water (not hot). The mould can then be easily removed. Fill up the space with the chicken salad. Hold it in place with more jelly. Remove from the mould when cold. Garnish and serve with mayonnaise.

MOULDED CHICKEN SALAD (No. 4).

Mould in tomato jelly instead of the chicken jelly.

MOULDED CHICKEN SALAD (No. 5).

Use half the quantity of walnuts as of celery. Clean and cut the celery in half-inch pieces. Cook the walnuts for ten minutes in boiling salted water with a slice of onion, a clove and three peppercorns. Cut in small pieces. Mix the celery and walnuts with just enough mayonnaise to hold them together. Mould the same as chicken salad, either chicken, tomato or wine jelly.

MOULDED SWEETBREADS AND CUCUMBER SALAD.

(Boston Cooking School).

Simmer one pair of sweetbreads twenty minutes in boiling, salted, acidulated water, with a bit of bay leaf, a slice of onion and a blade of mace. Cool and cut in dice. There should be three-fourths of a cup. Soak one-fourth tablespoonful of gelatine in a tablespoonful of cold water and dissolve in two tablespoonfuls of boiling water. Add one tablespoonful and a half of lemon juice and a half cup of cream beaten thick. Add the cubes of sweetbreads, one-fourth of a cup of cucumber cubes and season with salt and paprika. Turn into moulds, chill and serve on lettuce leaves with French or mayonnaise dressing.

and dissolved in as little water as possible. One cucumber cut in fine cubes. One-half cup of shredded pineapple.

Any kind of salad can be moulded in the jellies the same as chicken salad. Garnish with the greens and serve with mayonnaise, cooked, or sour cream dressings.

TO GARNISH WITH CURLED CELERY.

Cut the stalks of celery in one or two-inch lengths, then cut each piece in strips nearly to the center, beginning at each end, leaving enough whole to hold together. Set in ice water one hour before using.

TO UNMOULD JELLY.

Place the mould quickly in warm water, remove, put the serving dish over the top of the mould and invert them together. A very little heat will melt gelatine.

TOMATO JELLY.

1 cup of any kind of strong soup stock.	1 teaspoonful salt.
2 cups tomatoes.	1 teaspoonful sugar.
1 slice of onion.	1 teaspoonful catsup.
1 clove.	2 tablespoonfuls granulated gelatine.
4 peppercorns.	

Boil all together for one-half hour or until the tomatoes are soft. Soften the gelatine in one-half cup of cold water, then stir it into the tomato when dissolved, and mould. A very pretty effect is obtained by moulding it in a ring mould. Have celery salad in the center mixed with mayonnaise or a cooked dressing, and surround it with lettuce. Or, mould with a salad moulded inside, or in small moulds, and garnish a salad around with them.

Another nice way to serve it is to mould in the shape of a cup and fill with a salad, resting on lettuce. This is done the same as Moulded Chicken Salad No. 3 by placing one mould or cup inside of another.

GRAPE FRUIT JELLY.

Put one-third cup of sugar and one-third cup of water in a sauce pan. Boil three minutes. Remove and add one and a half tablespoonfuls of granulated gelatine that has been soaked in two tablespoonfuls of cold water. One-half cup of grapefruit juice.

2 cups celery cut in ½-inch pieces and the roots cut fine.	3 peppercorns.

Cook slowly until the celery is very tender, keeping about a cup of water in it all the time. When tender, mash through a strainer. To two cups of celery, after it is strained, add one tablespoonful of granulated gelatine that has been softened in two tablespoonfuls of cold water. Reheat until the gelatine is dissolved, then pour in moulds. Mould as you would chicken or tomato jelly.

Scald and skin them, select all as near the same size as possible. Place on ice until half an hour before serving, then scoop out the center (saving the pieces for soup stock, or a sauce). CUCUMBER SALAD (To Serve with Fish).

Peel the cucumbers, place them in ice-cold water to become crisp. (Do not add salt, as that wilts them). Wipe them dry, place on a flat dish and slice very thin without destroying the shape of the cucumber. Garnish with cress or lettuce. Pour over it all a French dressing.

CUCUMBER SALAD.

Peel and place in ice water, then cut the cucumbers across in lengths of three inches, scoop out the inside to form a cup to hold the following salad: Equal parts of sweetbreads, cucumbers and English walnuts mixed with mayonnaise. CUCUMBER SALAD (No. 2).

Pare and chill a cucumber, cut in half lengthwise, remove the seeds and dry. Fill with the following: Chop fine the solid part of a peeled tomato, a thin slice of new onion, or a few sprigs of chives and a couple of stalks of tender celery. Mix with Bearnaise sauce, French or mayonnaise dressing.

CUCUMBER AND TOMATO SALAD.

Place a bed of crisp lettuce in a salad dish, then a layer of sliced cucumber and one of tomatoes sliced. Use a French or mayonnaise dressing. A good dinner salad.

EGGS.

Eggs are very valuable food, being highly nutritious and easily digested. Almost any of the following receipts can be prepared in the chafing dish on the table.

EGGS COOKED IN THE SHELL (No. 1).

To cook the eggs soft, place in boiling water. Set on the back of the stove where it will not boil, for eight minutes, at a high altitude, one minute less for sea level.

EGGS COOKED IN THE SHELL (No. 2).

Another way of cooking the egg soft is to place it in cold water on the stove, remove as soon as they reach the boiling point. Cooking eggs either by No. 1 or No. 2, you will find the albumen is creamy and easily digested. Boiling eggs makes the albumen hard and horny, not easily digested.

EGGS COOKED IN THE SHELL (No. 3).

To cook an egg hard, place in boiling water, set on the back of the stove from twenty minutes to a half hour.

POACHED EGGS.

Place in a frying pan as many muffin rings as you have eggs to poach, drop an egg in each ring, then turn in enough boiling water to cover them. Add a little salt, cook slowly on the side of the range. It should take from ten to fifteen minutes to cook them.

Remove carefully, using a pancake turner, or a wide-bladed knife, onto a round piece of toast; remove the rings. Season with a little salt, pepper and a piece of butter. Serve on a platter. Garnish with water-cress or parsley. Before toasting the bread cut the slices into rounds with a large sized biscuit cutter. *To poach* the eggs without rings break carefully in the boiling salted water.

POACHED EGGS (No. 2).

Add a little salt to the white of the egg, and beat to a stiff froth, place in a cup, and carefully drop the yolk (so as not to break it) into the center. Set the cup in a dish of boiling water, cover and boil four minutes. At sea level three minutes would be long enough. Season with a little butter, salt and pepper. Serve in the cup. A good way to serve an egg to an invalid.

POACHED EGGS (No. 3).

Spread the toast with creamed chicken, minced ham, anchovy or sardine paste, and place a poached egg on top. Or, serve poached eggs with boiled ham or bacon.

FRIED EGGS.

a sauce pan a tablespoonful of butter; when it bubbles add the eggs and stir constantly until they set. They should be just a little firm, but not hard. They can be mixed with chopped meats, chives, tomato that has been cooked, parsley, or anything that one has, to give a good flavor.

Lining with a thin layer, break in the egg and cook the same as shirred eggs. When done cover the top with a little cream, tomato, or béchamel sauce, and sprinkle with chopped parsley.

OMELETS.

It is better to make several small omelets than one large one. An omelet should be served at once, and let the family wait for the omelet rather than the omelet for the family. With a little care one can soon become an expert at making them. They should cook slowly, be a delicate brown when done. Avoid burning.

OMELET No. 1.

Beat the yolks of two eggs until light and foamy, add one-fourth teaspoonful of salt, a little pepper and a tablespoonful of milk for every egg used. Beat the whites stiff, fold lightly into the yolks, melt a teaspoonful of butter in an omelet pan (it is best to keep this pan for omelets alone). Let the butter cover the pan; when bubbling turn in the omelet, cook slowly and carefully until brown on the bottom, then set the pan on the upper grate in the oven for a minute to dry. When the center is dry as you cut into it, run a knife around the edge, then under the half nearest the handle, and fold over to the right; then invert the omelet on a hot platter; garnish with parsley.

CHEESE OMELET.

Make the same as No. 1 or 2. Add one-fourth cup of grated cheese to the yolks of two eggs, and a little paprika.

RUM OMELET.

Make the same as omelet No. 1. Have the omelet slightly underdone; just before sending to the table pour two tablespoonfuls of brandy around it, dip a

Mix chopped parsley, chives, chervil and tarragon with the eggs before cooking.

HAM OMELET.

Stir into omelet No. 1 two tablespoonfuls of finely chopped ham. The same amount of chicken can be used, or mushrooms.

PEAS OMELET.

Cover the omelet just before folding with a layer of creamed peas.

Add one cup of tomatoes, and cook altogether until the mixture has evaporated. Add a tablespoonful of sliced cooked mushrooms. One-fourth teaspoonful of salt, a little pepper. This is used as a filling and garnish for the omelet.

Beat four eggs and add four tablespoonfuls of milk, a little salt and pepper. Put one tablespoonful of butter in an omelet pan and cook. Surround with the sauce.

Make the same as No. 1; omit the pepper; allow a teaspoonful of powdered sugar to each egg; when

The burnt sugar gives the omelet a delicious flavor.

PINEAPPLE OMELET.

Make the same as omelet No. 1; omit the pepper and part of the salt; add to the yolks two tablespoonfuls of powdered sugar, and one-half cup of grated pineapple. When done sprinkle with powdered sugar and score the same as for orange omelet. Garnish if you like with slices of pineapple. Orange and pineapple omelets make delicious and quickly prepared desserts.

Pour a cream tomato or mushroom sauce around omelets.

A good change is to mix chopped chives or parsley with the omelet before putting in the pan.

EGGS COOKED IN WHOLE TOMATOES.

With a pointed knife take out the center of the tomato, season with salt and pepper, drop into it a whole egg, cover the top of the egg with a little cream

Make a white sauce by using two tablespoonfuls of flour and butter, one-half cup of cream and the same amount of the water the celery was cooked in (letting the water cook down to that amount), one-fourth teaspoonful salt, a little pepper. After the sauce has cooked over hot water ten minutes, add the cooked celery, reheat and serve.

EGG BALLS TO SERVE IN SOUP.

Mash the cooked yolks of four hard-boiled eggs through a sieve, season with a little salt and pepper, one-half teaspoonful of melted butter and enough raw yolk of an egg to make the mixture the right consistency to mould in little balls. Some of the shapes may be cut in squares, rounds (with a biscuit cutter), triangles, hearts or rolled. *To keep sandwiches moist* cover with a damp napkin. The butter for sandwiches can be either salted or unsalted, and should be creamed before spreading, as it then will spread evenly without breaking the bread. *Seasoning* of chopped mint leaves or parsley, spinach juice that has been crushed and pressed through a cloth, a little tarragon vinegar, onion juice if cared for, capers, pickles, nasturtiums, or olives finely chopped can be added to the butter.

Cut the bread in very thin slices, trimming off the crust before slicing, the crust and the trimmings can be dried for crumbs. Have the slices fit evenly one upon the other. *Bread for sandwiches* should be fine grained and a day old. *Rolls* used for sandwiches should be fresh and small.

PASTRY.

The pie, although greatly abused, has more friends than any other dessert. In New England, not many years ago, it was the custom to make up enough mince pies a week before Thanksgiving to last a good part of the winter. In many homes the custom is still carried out. It was no unusual sight to see forty or fifty pies all ready for the brick oven. The beauty of a pie is to have the pastry light and flaky and well browned.

A well made plain pastry is good enough for most any pie. But the puff paste greatly improves a mince pie, especially for special occasions, like Thanksgiving or Christmas. *The puff paste* is used mostly for paté shells, tarts, cheese straws, etc.

PLAIN PASTRY (Enough for One good-sized Pie).

1½ cups of flour.		⅛ teaspoonful of salt.
½ cup of lard.		Ice water.
2 tablespoonfuls of butter.		

Sift the flour and salt together, cut in the lard with a knife or rub in with the tip of the fingers, then cut in just enough ice water to hold it together. In putting in the water add only a few drops at a time, so as not to get too much. The pastry should be dry. Flour the board well, and roll out the pastry lightly, patting it with the rolling pin to get in shape to roll. Cover it over with one tablespoonful of butter cut in little bits; sprinkle a little flour over the butter. (The pastry should be rolled in an even square). Fold over the two sides to nearly meet in the center, then fold

the ends over to the center, and the ends over again on over the other, making a square piece of pastry; pat and roll out again, place the other tablespoonful of butter and roll and fold in the same way; roll and fold once more, making three times in all. The pastry is then ready for use. *All pastry* is better to remain on the ice some time before using. It can be kept a week or more in this way.

PUFF PASTE (Mrs. Lincoln).

Four cups of flour (or one pound), two cups of butter (or one pound), one-fourth teaspoonful of salt, ice water. This amount makes about twelve paté shells.

Put the butter in a bowl of ice water, work it with the hands or wooden spoon until it becomes smooth and waxy. This is to wash out the salt and make it lighter. Then knead it in a napkin to get out all the water, pat it in half a dozen flat thin strips, lay it flat on a napkin in a pan; place this pan between two pans that are filled with cracked ice. This is done to thoroughly chill the butter. Sift the flour and salt together, mix it to a stiff dough with ice water, using a knife and only a few drops of water at a time. Then knead it on the board until it is smooth, place on the ice for thirty minutes. Then flour the board well and toss the ball of dough on it, using a knife; then roll out in a long sheet. Take one piece of the butter from the ice, roll it in a little flour, cut in thin strips and place on the pastry; fold over the sides of the pastry, letting the edges just meet in the center. Then fold the ends over to the center and double it over again; pound gently in a flat cake and roll out again. Roll each piece of butter in the same way.

After the butter is all in, roll and fold once more, or as many more times as you care to do it. Should the paste become soft and sticky, put it on the ice for a while, then flour the board well and roll out. *The paste* should be folded and rolled till no streaks of butter remain. Then place it on the ice to chill, or cut out in the shapes to be used, place in the pans and chill on the ice for thirty minutes before baking.

TO BAKE PUFF PASTE.

The dough should be ice cold before putting in the oven. The oven should be hot, the greater heat at the bottom so the paste may rise before browning. It is well to place an asbestos mat or paper on the grate above them so they will not brown too soon. A brown crust over the top will hold them down and prevent them being as light. *Paté* cases should bake about twenty-five minutes, and tarts fifteen minutes.

TO MAKE PÂTÉ SHELLS FROM PUFF PASTE.

Roll the paste to a quarter of an inch thickness. Cut into rounds with a fluted or plain cutter. Use the circles or rounds for one *paté* shell; cut a hole in the center of two with a small cutter. Moisten the edge of each circle with a *very* little water, as too much water will hold the edges down and make them heavy. Place the two rings with the holes cut in them on top of the whole round, pressing the edges lightly together. Glaze them on the top with an egg if you like; the egg must not go over on the edges. Use the small pieces that are cut from the rounds for covers after the cases are filled. Bake them in a separate pan, as they do not require as long a baking.

Tarts are made with the two layers, cutting one in a circle and placing it on the round the same as for a *paté*. Fill with jelly, jam, preserves or lemon cream, the same as for lemon pie, first cooking the lemon cream in a double boiler. When cool fill the tart shells. Serve cold.

VOL-AU-VENT.

Can be cut in any shape required, a large round being most often used. Roll out the puff paste one-half inch thick; turn a pie plate upside down on the paste, press it down to make a marking, and cut out with a sharp knife. Put two or three rims around the edge as you would a pie, only thicker; place in a large pan on a paper; bake in a hot oven forty-five minutes. Fill with any kind of cream, meats, mushrooms or oysters, or serve as a dessert, filled with stewed fruits covered with whipped cream.

PUFF PASTE STRIPS.

Roll out the paste one-fourth an inch thick, cut in strips with a pastry wheel one inch wide and four inches long; bake in a hot oven for fifteen minutes. On a papered pan spread a strip with apricot or raspberry jam, cover with a strip, place a meringue over the top, brown in the oven and serve as a dessert. Cut puff paste in a three-inch square, bring the four corners to the center, moisten them a little to keep in place. Bake for twenty minutes and put a little jam or jelly in each corner, with a little whipped cream on the jelly.

TO GLAZE PASTRY.

Beat an egg slightly, then mix with it a table-spoonful of water. Brush over the pastry with a brush very lightly, and dust with a very little powdered sugar. This gives a brown and glossy look.

CHEESE STRAWS.

Roll puff paste thin, sprinkle with grated cheese and a little paprika. Fold and roll out, sprinkle and fold twice more; roll the last time one-half inch thick, cut into straws, place in the pans, put on the ice for half an hour; bake in a hot oven for ten or fifteen minutes.

APPLE PIE.

Cut sour apples in quarters, peel and core, and slice. Place them evenly in the plate, piling a little in the center. Cover with half a cup of sugar; season with one-half teaspoonful cinnamon or grated nutmeg, and a teaspoonful of butter. In the spring of the year when the apples have lost their flavor, season with lemon juice and a little of the grated rind. Cut slits in the upper crust for the steam to escape, dampen the edges of both upper and under crust, press them together. Place around edge a half inch strip of the pastry; moisten it before putting on so it will cling to the crust. Bake about thirty minutes in a hot oven, try the apples to see if done, with a straw or fork.

COLD DESSERTS.

GARNISHING.

For garnishing cold desserts use fancy cakes, icings, fresh or candied fruits, compotés, jellies, nuts, currants, raisins, angelica, spun sugar, which can be made in nests, balls or to encircle a dish. Fresh flowers and leaves also make a most attractive decoration. Angelica can be cut in strips, then in little diamond shapes, making very effective decoration, and especially so when combined with candied cherries, sugared rose leaves or sugared violets or lilac blossoms. Angelica is not expensive—a ten-cent piece will last quite a while.

FLAVORING.

Essences of fruit, flowers and nuts make some of the best flavoring. They cost about twenty cents a bottle. Vanilla is most commonly used, but many other flavors should help to take its place. It is not considered wholesome. Oranges and lemons are always a pleasant flavor, using the juice or grated yellow of the peel (not the white). The preserved peel makes a delicious flavor as well as a pretty garnish.

LIQUEURS AND WINES.

Liqueurs and cordials are rich syrups of different flavors, with only enough alcohol to keep them. They give a very delicate and pleasant flavor and are inexpensive, as a bottle will last a long time. Maraschino has the flavor of bitter cherry, noyan of peach,

curacao of orange peel. Rum, brandy and wine, either madeira, sherry or port, are used a great deal and impart a very agreeable flavor, if not too generously used.

COLORING.

Use the vegetable coloring paste; it comes twenty-five cents a bottle. A bottle will last a long time, as it requires a very little to give the delicate coloring that you wish to use. Dilute a little in milk or water before using.

2 cups milk.		Speck of salt.
Yolks of four eggs.		Flavor with nutmeg, vanilla,

Pour the hot milk slowly into the egg (stirring all the time), pour back in the double boiler and cook until it is thick like cream, or till it coats the spoon. As soon as it thickens, remove from the stove *at once*, as too long cooking will cause it to curdle. Watch and stir it all the time it is cooking, then strain through a fine strainer and flavor. Using only the yolks gives a much smoother custard. Three yolks can be used, but four makes a much richer custard.

Chocolate Custard.—Melt one-half ounce of Baker's chocolate with a tablespoonful of milk, stir into boiled custard just before straining, flavor with vanilla.

Watch carefully. Bake or steam in cups or moulds if desired.

BAKED OR STEAMED CARAMEL CUSTARD.

Mould, garnish with whipped cream and glacé chestnuts.

CHERRY CREAM.

One and one-half tablespoonfuls of granulated gelatine softened in one-fourth cup of cold water, then add one-half cup of boiling water, one-half cup of sugar (the amount of sugar depends upon the acidity of the fruit), one cup of cherry juice, juice of half a lemon. When this is cold enough to hold together, add one cup of whipped cream. This is very pretty moulded in individual moulds and served on sponge drops.

1 cup chopped pecans.		1 teaspoonful baking
1 cup sugar.		powder.

Mix all well together. Bake in a buttered pudding dish one-half hour. Serve cold in glasses with whipped cream on top.

FROZEN DESSERTS.

Frozen desserts are much more acceptable in warm weather than hot desserts. They can be prepared several hours before using, which is often greatly in their favor. Every household should be supplied with an ice cream freezer, and the art of making frozen desserts (which is very simple), should be acquired.

Proportions of Salt and Ice.—The ice should be cracked very fine. Use coarse rock salt. In freezing ice cream or sherbets, three measures of ice to one of salt is used. Place the can inside the freezer with the mixture in it, put on the cover and adjust the crank firmly, turn the crank to see that it is in proper working order, pack the three measures of ice and one of salt around the can and so on till the freezer is full. Turn slowly at first (this makes it fine grained); turn constantly until the mixture stiffens—this you can tell by the way the crank moves. Before removing the cover wipe off all the ice and salt, remove the paddle, pack down the mixture solid with a spoon, replace the cover, put a cork in the hole, drain off the water and if not to be used at once, pack the freezer full with ice and salt. Cover the top with an old piece of carpeting or thick cloth.

Mousses, Parfaits, are whipped cream flavored with or without eggs, packed in ice and salt. To pack them use two measures of ice to one of salt.

To Unmould Frozen Desserts—Dip the mould in cold water, wring out a cloth in warm water, wrap around it and invert on the serving dish.

DIRECTIONS FOR MAKING CAKE.

The baking of cakes is more affected by the high altitude than anything else we cook. Our sea level receipts can be used in high altitudes by adding one more egg, not changing the receipt in any other way, in this way making a rich, moist cake.

Baking Cake.—The oven should be slow, and enough fire to last until the cake is done. Grease the pans with lard, as butter burns very quickly, making the cake black.

Preparing the Materials for the Cake.—The butter and sugar should be creamed together very lightly, making a creamy, soft mixture. A great deal depends upon creaming the butter and sugar properly. The eggs should be beaten light and foamy. When the whites are to be beaten alone, put them in a flat dish—a plate or platter—and beat with the Daisy beater; they beat up much quicker beaten in this way, although if one cares to, they can beat the whites in a bowl with the Dover beater before beating the yolks, thus having the beater to wash but once. Sift salt and baking powder with the flour. When fruit is used, roll it in flour and add it last. When a cake cracks open in baking, too much flour has been used. It is hard to give the exact amount of flour a cake will take, as some flour will take more moisture than others. Layer cakes require a hotter oven than thick cakes.

When a cake browns before it has raised, the oven is too hot. Any loaf cake can be baked as a layer cake. All cakes should be baked as soon as they are made. Mix cake in an earthen bowl and beat with a wooden spoon. Do not use a cheap quality of butter or stale eggs. For cake making use a very fine granulated sugar; the coarse sugar makes cake heavy and coarse-grained. Have everything ready before beginning to make the cake. Cakes are divided into two classes—cakes with butter, and cakes without butter.

SPONGE CAKE.

4 eggs.
 $\frac{3}{4}$ cup of sugar.
 1 cup of flour.

$\frac{1}{2}$ teaspoonful of salt.
 1 tablespoonful lemon juice.

(In making this cake at a low altitude, use one whole cup of sugar.) Separate the whites from the yolks, putting the yolks in the mixing bowl; beat them until creamy and gradually beat in the sugar; add lemon juice. Beat the whites till stiff; sift the salt with the flour, add one-fourth of the whites to yolks; sift over it one-half of the flour, then add another fourth of the whites; fold in, sift in the rest of the flour, then fold in the remainder of the whites. Bake in a slow oven about thirty minutes, or until the cake leaves the side of the pan. If you care for a sugary top, sprinkle a little sugar over it before putting in the oven. This cake can be baked in loaf, layer or drop cakes.

BOILED SPONGE CAKE.

5 eggs.
 1 cup sugar.

1 cup flour.
 Salt

Boil the sugar with one-third cup of hot water until a thick syrup or until it will thread and fly. Then beat it gradually onto the yolks that have been beaten lightly. Beat until thick. Add the grated rind of half a lemon, the sifted flour and the stiffly beaten whites. Bake in a tube pan one hour. This is moist and delicious.

BERWICK SPONGE CAKE.

Beat seven eggs two minutes (at a low altitude use six eggs); add three cups of sugar, beat five minutes, two cups of flour sifted with one teaspoonful of baking powder; beat two minutes; one cup of cold water, beat one minute; one-fourth teaspoonful of salt sifted in two cups of flour, beat three minutes; grated rind and juice of one lemon, beat one minute. ANGEL CAKE.

One cup of flour, sifted; mix with one teaspoonful of cream of tartar and sift four times. Beat the

whites of twelve eggs until stiff. (Eleven eggs can be used in a low altitude.) Add one cup and a half of fine granulated sugar and beat again. Add one teaspoonful of vanilla or almond, then mix in the flour quickly and lightly. Bake in a funnel cake pan; line the bottom with paper, not greased; pour in the mixture and bake fifty minutes.

MARSHMALLOW ANGEL CAKE.

Spread over it a layer of flavored and sweetened whipped cream that has one-half cup of marshmallows cut in small pieces and whipped with the cream. Cover with the cake and spread a little of the cream on top, with the whole marshmallows for garnish.

CAKES WITH BUTTER.

By changing the receipts a little, various cakes can be made from one receipt, simply by adding spices, fruits, chocolate and different flavorings. When the fruits are used, roll in flour first. Where chocolate is used, vanilla combines with it to give the best flavoring.

When cool, remove the soft part, fill with ice cream, sherbet or whipped and flavored cream; put two together. Place on the paper in oblong shape, for meringues; for kisses, drop from a teaspoon in any shape.

COMPOTES, PRESERVING, JELLIES AND PICKLES.

COMPOTES OF APPLES, PEARS, PEACHES AND APRICOTS.

Pare, core or stone the fruit, cut in quarters or halves, according to the size of the fruit. Make a syrup of one-half as much water as sugar. When the syrup is quite thick, put in the fruit and cook until tender. Do not use over-ripe fruits—rather a little under-ripe. Then remove from the syrup with a skimmer, lay carefully on a serving dish in a circle, or letting each piece overlap the other. Boil the syrup down till thick; pour over the fruit. Serve cold. Compotes are very delicious when used to surround moulds of rice or cornstarch, decorated with whipped cream.

BAKED APPLES.

Core and pare sour apples; put in a shallow agate or earthen dish, fill the cavities with sugar, chopped nuts, chopped dates, or figs. In place of the sugar maple syrup can be used. When nuts or fruit are used to fill them, use sugar or syrup, too. Add water to cover the bottom of the dish. Cook in a quick oven till tender. Remove carefully on the serving dish. Let the syrup cook down until quite thick. Pour over the fruit. A little mound of whipped cream can be served on each apple. Pears and quinces can be baked in the same way. A little lemon juice or some of the grated rind can be used for flavoring.

BAKED PEACHES.

Remove stones and fill the space with a paste of sugar, butter and cinnamon. Bake slowly, basting with a syrup of lemon juice and sugar. When tender cover with meringue. Brown and serve hot or cold.

STEWED RHUBARB.

Wash, and if the rhubarb is a little tough, peel, cut in inch pieces. Cook till tender in a granite saucepan. Use one cup sugar to two of the fruit, and enough water to well cover the bottom of the dish.

STEWED PRUNES.

Wash very carefully, soak in cold water for two hours. If they seem soft and fresh, do not soak them. Put in porcelain kettle with boiling water to cover. Boil until tender, then add a tablespoonful of sugar to every cup of prunes. Boil ten minutes longer. Lemon juice may be added.

CRANBERRY SAUCE AND JELLY (Mrs. Lincoln).

Put three pints of washed cranberries in a granite sauce pan. On top of them put three cups of sugar and three gills of water. After they begin to boil, cook them ten minutes, closely covered and do not stir them. To make the jelly, add equal quantities of sugar and cranberries.

FIRM CRANBERRY JELLY.

Pick over, wash and measure the cranberries. Add to them half their amount of hot water. Cover and cook until soft. Do not add more water. Mash through a strainer. Add to the pulp the same amount

of sugar as water. Stir well together and put at once into the mold. This does not require more cooking.

WHITE GRAPE FRUIT COCKTAIL.

Remove the skins from white grapes and cut in halves and remove the seeds. Chill and place in cocktail glasses. Sprinkle with powdered sugar and sherry wine or orange juice. Place a brandied cherry on top. Serve as a first course at luncheon. Pieces of pineapple, orange or grapefruit may be mixed with the grapes if desired.

BLUSHING APPLE.

Select bright red apples. Peel all but a band around the center. Core. Boil the apples and skins together with a little sugar. When the fruit is tender remove carefully from the water and place on a serving dish. Drain out the skins. Add more sugar to the syrup and cook until thick. If not as red as desired add a little red vegetable coloring. Pour over the apples.

PRESERVING.

Select the best of fruits. Have them ripe and fresh. The cans should be carefully washed and filled up with hot water. Wash the covers and put in hot water. Use new rubbers every year to prevent any air reaching the fruit.

PEACHES AND APRICOTS.

Peel the peaches by placing in a wire basket and plunging into boiling water, then the skins will slip

easily. Halve them or leave them whole. Use a few of the pits—they improve the flavor. Weigh the fruit and use three-fourths or one-half (just as you prefer) as much sugar as you have fruit. Make syrup by adding half as much water as you have sugar. Cook down until quite thick (about as thick as molasses), then add the fruit. Cook until transparent; remove the scum as it forms. Skim the fruit from the syrup and fill the jars. If the syrup seems a little thin, cook down; pour into the jars, filling full to overflowing. Tightly screw on the covers; turn bottom side up, and as they cool, the covers can be tightened.

BRANDIED PEACHES OR APRICOTS.

Prepare and cook the peaches as above, leaving them whole. Fill jars with the fruit; to every pint jar of the peaches, add to it one-fourth cup of brandy. Cook the syrup down very thick, fill up the jars with it and seal.

PRESERVED PLUMS.

Prick the fruit with a fork in several places; this prevents the skin from breaking somewhat, or they may be skinned the same as the peaches. Cook in the same way.

BRANDIED PLUMS.

Make the same as brandied peaches.

PRESERVED QUINCES AND PEARS.

Pare and quarter, removing the core; preserve the same as peaches. Pears are improved by cooking in the syrup a little of the yellow rind of oranges or lemons.

PRESERVED PINEAPPLE.

Pare and remove the eyes; use a silver fork to shred it, or cut in slices or inch pieces, not using the core. Preserve the same as peaches.

GRAPES.

Wash and press the pulp from each grape; boil the pulp till tender; press through a sieve to remove the seeds, add the pulp to the skins, measure, add two cups of sugar to every three cups of the fruit. Boil all together until quite thick and seal while hot like the other preserves.

CITRON.

Pare and core the citron, cut in cubes or in fancy shapes, or scallop the edges. Cook the same as peaches, tie a little ginger root in a piece of cheese cloth and cook in the syrup to flavor, or a little of the yellow rind of lemon.

CHERRIES.

Wash, remove the stones and preserve the same as peaches.

PRESERVED STRAWBERRIES, RASPBERRIES, BLACKBERRIES, GOOSEBERRIES AND CURRANTS.

Wash, remove from the stems and preserve the same as peaches.

SUNSHINE STRAWBERRIES, RASPBERRIES, BLACKBERRIES, GOOSEBERRIES AND CURRANTS.

Select and hull three pounds of perfect fruit. Cook three pounds of fine granulated sugar and two

cups of boiling water until a light thread is formed. Do not stir the sugar after it begins to boil. Cook the fruit in the syrup ten minutes. After it begins to boil, then pour out in platters and let stand in the sun for two days. Cover with cheese cloth. Put in the jars cold, have them fresh scalded. Berries are delicious done in this way; they absorb the syrup, making them plump and full.

CANNING.

Prepare the fruit the same as for preserving. Canning differs from preserving only in the amount of sugar used, and often no sugar at all is used. The proportion of sugar used is one-fourth as much as fruit, and a pint of water to a pound of sugar in making the syrup. Another way of canning is to pack the fruit tightly in the jars, fill the jars with the syrup, place the jars in a kettle of hot water, resting the bottles on slats of wood or folded paper. Do not let them touch. Cover the boiler, let them cook till the fruit is tender. The fruit will shrink a little, so the jars will have to be filled up. It is well to reserve a little syrup for this purpose. Place on the tops and seal at once. Another way is to cook them in their own juices. Fill the jars with the fruit, put on in the kettle with cold water to reach half way up the jars. Raise to the boiling point and cook until the fruit is tender. Let stand in the water till cold again. If the fruit has shrunken, fill up the jars, using the contents of one to do it.

The fruit may be cooked without sugar and will keep as well by thoroughly cooking in a little water and sealing immediately.

CANNING TOMATOES.

Remove the skins by first dipping the tomatoes in boiling water. Cut in small pieces, reject the pith or any bad specks. Cook them until soft, without adding water, then put in the jars at once; have the jars hot and freshly scalded.

STRINGED BEANS.

Remove the strings from the beans. Leave them whole or cut them in inch lengths if preferred. Wash in cold water. Then fill into sterilized jars. Set the filled jars into the steam cooker. Put lukewarm water into the cooker. Cover and let the jars heat gradually. Then fill each jar to overflowing with boiling water. Cover and let cook until the beans are tender enough to serve. Adjust the rubbers. Add salt, one teaspoonful to a quart. Set the lids in place and cook again for twenty minutes. Store in a dark place.

ASPARAGUS.

Use only the tender portions of freshly cut asparagus. Wash carefully. Set the stalks head up in sterilized jars. Put lukewarm water in the cooker. Cover and when boiling adjust rubbers. Fill the jars with salt boiling water. Set the covers in place and cook about half an hour. Then tighten the covers. Cook about ten minutes longer.

PEAS OR SHELLED BEANS.

Shell the peas or beans when fresh. Wash and pack into jars shaking down meanwhile. Set the cans over lukewarm water on a rack. Put on the

covers and let stand until the water boils. Then fill each jar to overflowing with boiling salt water and cook until the vegetables are tender. Adjust the rubbers and set the lids in place. Then cook ten minutes. Remove and tighten the lids.

JAMS OR MARMALADES.

Use equal quantities of fruit and sugar. Pare, core and cut in small pieces the large fruits; the small ones wash and hull, place in the preserving kettle the fruit and sugar in layers. Let stand half an hour to extract the juice. Cook it slowly. When it becomes clear, put a little on a cold plate, if it hardens it is done; put in glasses or jars and cover.

ORANGE MARMALADE.

1 dozen oranges.
4 grape fruit.

| 3 lemons.

Slice the fruit very thin. Remove the seeds, weigh it, to every pound, or two cups, allow three cups of water; put in a crock and let stand twenty-four hours, then put on the fire and boil one-half hour. Return it to the crock and let remain another twenty-four hours, then measure. To every pint add two and one-fourth cups of sugar, then boil until it jellies slightly. This amount will make about twelve quarts.

CANDIED ORANGE PEEL.

Cut rind of orange in thin strips. Soak two days in cold water. Cover well with water and change fully ten times a day. Drain, put on the stove cov-

ered with cold water. Let come to a boil, then drain. Make a thick syrup, cook the straws in the syrup till it hairs, then remove from the syrup and roll in granulated sugar.

RHUBARB MARMALADE.

One quart of red rhubarb cut in pieces. Four oranges, pulp and grated rind. One lemon, juice and rind. Three cups sugar. Cook all together until thick.

JELLIES.

To make clear jelly, select perfect fruit, wash it and put in a porcelain lined kettle with water enough to cover. Cook slowly till the fruit is tender, strain through a flannel bag, measure the juice, allow one cup less of sugar than you have of juice. Warm the sugar in the oven, but do not allow it to burn. Boil the juice twenty minutes, then add the hot sugar, stir until the sugar is dissolved, skim thoroughly and cook about ten minutes, or until it jellies when a little is dropped on a cold plate. Turn at once in glasses, let remain to settle twenty-four hours, then cover the tops with melted paraffine. Over-ripe fruit will not jelly.

CURRENT JELLY.

Wash the currants, pick off any that are not perfect, but do not stem them. A few boxes of raspberries cooked with the currant gives a delicious flavor. Four boxes of raspberries to twenty-four boxes of currants give a delicate flavor of the raspberries. Proceed with making the jelly as directed above.

CRABAPPLE AND APPLE JELLY.

Wash, cut in quite small pieces, but do not pare. Barely cover with cold water, cook till soft, then strain. A little of the yellow of lemon or orange peel improves the flavor, cooked with the apples, or a little of the root ginger.

QUINCE JELLY.

Make the same as apple jelly.

GRAPE JELLY.

Select under-ripe grapes; the wild grapes give the best flavor. Wash them, add a quart of cold water to twelve boxes of grapes, cook until they are tender and well broken apart and proceed the same as directed.

PLUM JELLY.

Make the same as grape jelly, using the wild plums if convenient.

PICKLES.**TO SWEET-PICKLE FRUIT AND BERRIES (Mrs. Lincoln).**

Eight pounds of fruit, four pounds of best brown sugar, one quart of best vinegar, one cup of mixed whole spices, stick cinnamon, cassia buds, allspice and cloves, less of the latter than of the former. Tie the spices in a bag and boil with the vinegar and sugar. Skim well, then add the fruit. Cook till the fruit is clear. Remove carefully from the syrup and put in a jar or a crock. Boil the syrup down nice and thick and pour over the fruit. Seal.

PEACHES.

Scald to remove the skins, leave them whole, cook without breaking. Do not stick with cloves.

PEARS.

Pare them, leave them whole with the stem on.

CUCUMBERS, WATERMELON AND CANTALOUPE.

Pare them, remove the soft part from inside, cut in pieces to serve. Cook in boiling water for ten minutes, drain and cook in the hot syrup till clear and tender.

PINEAPPLE.

Pare, remove the eyes, cut in serving pieces or slices and cook in the syrup till clear.

CURRENTS, GRAPES AND ALL BERRIES.

Remove from the stems, wash and cook in the syrup until they form the consistency of jam. Prepare the grapes for the syrup, as given for preserving.

PICKLED WALNUTS (Boston Cooking School).

Take the walnuts when they are well filled out and tender, pierce each one with a strong needle three or four times and lay them in a brine which completely dissolves its salts, changing for fresh every day for nine days, then spread the nuts in the air until they become black. Put them in crocks and pour over them this mixture, boiling hot: A gallon of vinegar, an ounce each of ginger root, allspice, mace and whole cloves, and two ounces of peppercorns, boil all together for ten minutes. Cover, press-

ing the nuts under the vinegar with a plate. Let them stand six weeks before using.

APPLE CHUTNEY (Boston Cooking School).

Pare and core a dozen sour apples, peel a mild onion and seed one cup of raisins, chop the apples, onions, raisins and three green peppers very fine, add one pint of cider vinegar, half a cup of currant jelly and let simmer an hour. Then add two cups of sugar, the juice of four lemons, one tablespoonful of ground ginger and a tablespoonful of salt, and cook another hour, stirring almost constantly. Store as canned fruit.

GINGER APPLE.

Five pounds of sour apples chopped fine, three pounds brown sugar, one ounce ground white ginger root, one cup of water. Cook slowly three or four hours or till transparent.

UNCOOKED PICKLES.

Use medium-sized pickles, cut in slices one-fourth inch thick; pack them in quart jars, with three medium-sized onions sliced very thin, and one hot red pepper to each jar; add one tablespoonful of salt and fill up with water. Add one-half teaspoonful of pulverized alum. Let stand over night, then drain off the water and rinse. Fill the jars full of the pickles, and add two tablespoonfuls of olive oil and fill with a good, sharp vinegar. Seal.

PICKLED CUCUMBERS.

Make a brine of one pint of coarse salt and six quarts of boiling water, boil and skim clear, wash

one hundred and fifty small cucumbers, put in the brine and let remain forty-eight hours, covered, then drain. Soak in cold water for two hours, drain and put them in a crock. Stick one large onion full of cloves, an ounce of horseradish root and several little red peppers, and put with the cucumbers and a piece of alum the size of a pea. Fill a muslin bag with one cup of mixed spices, celery seed, white mustard seed, whole cloves, allspice, peppercorns, stick cinnamon, boil this in vinegar enough to cover the cucumbers for ten minutes. Put the bag in the crock with the vinegar, pour off the vinegar the third day, reheat it and return to the pickles. Do not use for three weeks.

MIXED PICKLES.

Anything that you wish to use can be added to the cucumbers in the brine—pieces of cauliflower, small onions, nasturtium seeds, watermelon, beans. All make good pickles.

CUCUMBER AND ONION PICKLES.

Four hundred small cucumbers. Two pounds of pickling onions. Spices. Soak cucumbers in salt brine over night. Drain. Rinse well with cold water and dry in a towel. Place in an earthen crock layers of cucumbers and onions and spices. Then cover with boiling hot vinegar. These will be crisp and ready for use after three weeks.

MUSTARD PICKLES.

Equal quantities of small cucumbers, button onions, cauliflower picked apart, sliced green tomatoes and two or three sliced green peppers. Soak in

the brine and drain, as given in *Pickle Cucumbers*. Prepare enough of the following mixture to cover: To one quart of vinegar, use one cup of brown sugar, one-half cup of flour and one-half cup of ground mustard. Boil the sugar and vinegar for five minutes, skim, mix the mustard and flour together, pour the hot vinegar slowly onto it, stirring until smooth. Pour hot over the pickles. They will be ready to use in three weeks.

DILL PICKLES.

Fill a quart jar with pickles about the size of a finger. Between the pickles put in a piece of dill or more if desired. When the jar is full add a level tablespoonful of salt. Pour in cold water. Put dill on top and seal air tight. Place the jars in the sun each day until the water is cloudy. When the water looks clear again the pickles are ready for use. A few whole peppers may be added.

PICCALILLI OR CHOW-CHOW.

8 lbs. of green tomatoes.		1 tablespoonful whole cinnamon, broken up.
1 cup of salt.		1 tablespoonful of whole allspice.
2 cups brown sugar.		1 tablespoonful mustard seed.
8 small onions.		2 quarts best vinegar.
2 heads of celery.

Chop or slice the tomatoes, sprinkle the salt over them and let stand over night, in the morning drain off the water and chop the onion and celery, place all in a porcelain lined kettle, sprinkle with sugar, tie the spices in a bag, add those and the vinegar, cook slowly all day. Put in jars or earthen crock.

CHILI SAUCE.

Make the same as the chow-chow, only using ripe tomatoes and chop them quite fine. To eight pounds of the tomatoes use one pound of onions chopped fine. Salt over night and proceed the same as the above receipt.

TOMATO CATSUP (Mrs. Campbell.)

Boil one bushel of ripe tomatoes, skins and all. When soft, mash through a colander to remove the skins and seeds. WATERMELON PICKLE.

Cut rind in inch pieces, and soak in a weak brine over night. In the morning rinse well and drop in strong boiling alum water. (One tablespoonful of powdered alum to two quarts of water). Let stand fifteen minutes. Then drop in ice water. Let remain until cold. Make a syrup of cup of sugar and one quart of water. When boiling drop melon in and simmer six to eight hours. Pour off this syrup and drop the melon into a syrup made of two cups of vinegar and six cups of sugar. Add spices tied in a cheese cloth. Let boil thoroughly and remain over night in the syrup. Next morning fill the jars full of the melon boiling down the syrup and pour into the jars. Seal.

CONFITURE.

5 boxes of cherries.
5 lbs. sugar.

| 5 oranges.
| 2 lbs. raisins.

Grate rind of half the oranges; peel the rest and slice in thin pieces; chop raisins; stone cherries; first add the sugar and let remain until the other things are prepared, then mix together and boil hard thirty minutes.

CANDIES.

FONDANT.

Fondant is the basis of all French cream candies and can be kept any length of time, if air tight and in a cool place. A great variety of bonbons and chocolates can be made from it by using different flavorings, nuts and fruits, and also makes a delicious icing for small and large cakes. White grapes and strawberries with the hulls on dipped in the fondant makes a delicious bonbon.

To Make Mints.—When the fondant is rather a thin cream, flavor with mint, drop on buttered slab or rice paper from a teaspoon.

VEGETABLE COLORING.

The vegetable colorings are perfectly harmless; use only a small quantity, as a little will color a large amount of fondant.

TO MAKE FONDANT.

2 cups of sugar.
 ½ cup of water.

| ⅛ teaspoonful of cream of
 tartar.

Do not stir after it begins to boil; let it cook until it reaches the soft ball stage; the thermometer registers at that stage 236° — 238° , or try a little in cold water, and if it forms a soft ball in the fingers, it is done, and must be removed at once. Let it cool until it forms a crust; if stirred while too warm it will grain. Stir until it becomes thick and creamy. If it

becomes grainy, cook again with a little cool water. Various candies can now be made by using the different flavorings, nuts and fruits. Fondant is used for creaming nuts, figs and dates.

COATING FOR CHOCOLATE.

Place equal quantities of fondant and chocolate with a few drops of vanilla, over hot water, stirring constantly until melted. Dip, place on rice paper, allow to harden. If the chocolate gets thick, add a few drops of hot water, also place the dish that holds the chocolate in warm water while dipping to keep from hardening.

GLACÉ ORANGES, GRAPES, NUTS, ETC.

2 cups sugar.

| ½ cup water.

Boil together without stirring, until the thermometer registers 340°, or until the syrup crackles and breaks when a little is put in cold water. Remove from the fire, drop the pieces into the syrup one at a time with a candy wire, or two forks, place on an oiled slab or rice paper to dry.

To glacé oranges, divide the sections carefully, allow them to dry several hours before dipping. To glacé grapes, wipe the grapes dry and leave the little stem on to prevent them from getting moist.

CHOCOLATE FUDGE.

2 cups fine granulated
sugar.

½ cup cream.

| 2 squares of Baker's choco-
late or 2 tablespoonfuls
of cocoa.

| 2 tablespoonfuls of butter.
Speck of salt.

Stir until the ingredients are melted, but not after it begins to boil. Cook until it forms the soft-ball stage when tried in cold water. Remove from the fire. When cool, stir until thick and creamy, pour into a pan and when cold cut in squares. One-half cup of chopped nuts can be added just before taking from the fire.

MAPLE FUDGE.

2 cups thick maple syrup.		2 tablespoonfuls butter.
½ cup of cream.		Speck of salt.

Make the same as chocolate fudge. If the syrup is not very thick, cook down before putting in the other ingredients.

PANOCHA.

2 cups brown sugar.		Speck salt.
½ cup cream.		½ cup chopped walnuts.
2 tablespoonfuls butter.		

Make the same as fudge, add the nuts just before removing from the fire.

OPERA CARAMELS.

3 cups fine white sugar.		¼ teaspoonful of cream of
1 cup of cream.		tartar (scant).

CHOCOLATE CARAMELS.

½ cup white sugar.		2 squares Baker's chocolate.
½ cup brown sugar.		¾ cup of cream or milk.
½ cup molasses.		

If milk is used, add two tablespoonfuls of butter. Stir the mixture constantly while cooking. When it snaps and cracks tried in cold water, remove from the fire, pour in buttered pans, add chopped nuts before removing from the fire, if desired.

BUTTER SCOTCH

½ cup cream.		

Cook all together until it snaps when tried in cold water. Pour in buttered pans, cut in little squares before quite cold.

PEANUT CANDY.

Fill a tin one-half inch deep with the nuts. Cook sugar with a little water until it crackles when tried in cold water, pour over the nuts.

VINEGAR CANDY

2 cups sugar.		3 tablespoonfuls vinegar.
½ cup water.		4 tablespoonfuls butter.

Cook all together until it hardens when tried in cold water. Pour in a buttered pan. When cool enough to handle pull until it is white and creamy looking, cut in squares or sticks.

MOLASSES CANDY.

2 cups molasses.		¼ cup of butter.
1 cup of white or brown sugar.		

Cook until it hardens when tried in cold water. Pour in buttered pans. When cool enough to handle pull till light colored. Cut in sticks. One cup of chopped nuts may be added just as you take it from the stove.

BEVERAGES.

To make good, bright-tasting tea and coffee, the water should be freshly boiled. Water that has been boiled for some time loses its life and gives a dull taste to drinks. Before making tea or coffee, scald the pot.

TEA.

Put the tea in a strainer and wash with cold water, then put in the scalded pot and pour on the freshly boiled water, let remain on the back of the stove for five minutes, then pour the tea from the leaves into a hot pot and serve, often the tea is left to remain on the leaves, it then soon becomes bitter. The proportion used depends upon the strength required, and the kind of tea used. Tea is considered by some to be better if made very strong and diluted with boiling water. When a quantity of tea is to be made, as for a reception, tie the tea in muslin bags, put the bag in the boiling water, let remain for five minutes, then remove.

Tea Ball.—The boiling water is poured from the samovar into the cup, the ball is placed in the cup, removed when the right color is attained.

Russian Tea.—Is made by adding sugar and a thin slice of lemon to each cup.

Tea Punch.—Is made by first soaking the sugar in rum or brandy and adding the lemon.

Iced Tea.—Make the tea several hours before using. When cool, put on ice. If not cold enough when wishing to serve, put cracked ice in each glass, one tablespoonful lemon juice, sugar to taste, added when hot.

COFFEE.

To Make Coffee.

Oftentimes the coffee leaves its flavor in the kitchen by too long a cooking. There are now many reliable coffee cookers that can be used on the table. Coffee made in this way is preferable, as it is served as soon as made. The coffee pot should be kept scrupulously clean and aired. Great care should be taken to have the spout free from grains. Coffee will go much farther if finely ground, and should always be freshly made.

BOILED COFFEE.

The white of one egg is sufficient to clear one cup of ground coffee. Use one level tablespoonful of coffee for every cup. Mix the coffee in a bowl with the white of egg and a very little cold water (one-fourth cup to a cup of ground coffee), put into the scalded pot and pour on the boiling water; let boil three minutes. Remove to the back of the stove, add two tablespoonfuls of cold water, let settle for ten minutes, pour the coffee from the grounds and send to the table. If stronger coffee is required, increase the proportion of coffee.

DRIP COFFEE.

Use one rounding tablespoonful of coffee to a cup, put the coffee in a flannel bag, lay on the strainer and

pour the boiling water over it. Have the pot hot to begin with and stand in a pan of hot water while dripping.

BREAKFAST COFFEE (Mrs. T. L. Watson).

This is to be mixed the night before. Mix six tablespoonfuls of coffee with the white of an egg (or smaller quantity if you like). Put into a small covered earthen dish, pour over it two cups of cold water, cover tightly, a preserve jar would do, and the next morning put into the coffee pot, pour the boiling water over it, using a cup to every tablespoonful, let it boil up just once, pour into it half a cup of cold water, let settle a few minutes before serving. This can be made for after-dinner coffee by preparing in the morning.

TURKISH COFFEE.

Have the coffee very finely ground, using a tablespoonful to a cup, put in a pot, add cold water. When it touches the boiling point it is ready to serve. The Turk does not use cream or sugar.

BLACK COFFEE.

Is made by any of the above receipts, using about double the proportion of coffee.

ICED COFFEE.

Iced coffee is served in glasses. Add cream and sugar to the coffee and chill on the ice several hours before serving.

CHOCOLATE.

Scald two cups of milk in double boiler, then add to it one square of Baker's chocolate that has been broken up in pieces, two tablespoonfuls of sugar and a pinch of salt. When the chocolate has dissolved, add a few drops of vanilla if you like. Beat with a Dover egg beater for a few minutes and serve at once. Put a teaspoonful of whipped cream in the cup before pouring in the chocolate.

MAILLARD'S CHOCOLATE.

For each cup of chocolate use one cupful of milk and one bar of chocolate. Put the milk in a sauce pan, porcelain-lined, break the chocolate in small pieces, add to the milk, stir constantly with a wooden spoon until the chocolate is dissolved, and the milk has boiled up once. Add more hot milk if too rich. Beat vigorously. Serve at once.

COCOA.

Dissolve one tablespoonful of cocoa in two of water. Add to two cups of boiling milk, let boil up once. Sweeten to taste, beat well and serve.

SHELLS.

Steep one cup of shells in one quart of boiling water three hours, adding more water as it boils away. Strain, serve with cream and sugar.

LEMONADE.

Allow the juice of two lemons to three glasses of lemonade. Sweeten with sugar, or better still, sugar

syrup. Add the water and cracked ice, put a thin slice of lemon in each glass.

ORANGEADE.

To the juice of two oranges add the juice of a half of a lemon. Sweeten, add water and ice, half a thin slice of orange for each glass.

EGG LEMONADE.

Beat an egg thoroughly, beat in four tablespoonfuls of sugar and the juice of two lemons, three cups of water, two tablespoonfuls of maraschino, if liked, ice and serve.

SUMMER DRINK.

<p>4 quarts of lemonade. 1 pint of pineapple juice. 1 pint of strawberry or raspberry juice.</p>		<p>A few thin slices of lemon and a few of the berries.</p>
--	--	---

FRUIT PUNCH.

Boil a grated pineapple, four cups of sugar and four cups of water twenty minutes, add one cup of strong tea, then strain. When cold, add the juice of five lemons, six oranges, one pint of strawberry, raspberry or grape juice, half a pint of maraschino cherries, six quarts of water and a big piece of ice. When ready to serve, a bottle of apollinaris water, or ginger ale, mint leaves, pieces of pineapple or berries can also be used, with or without the cherries.

COBBLERS.

Cobblers are made by filling a glass with cracked ice, adding any kind of wine, and a little water if de-

sired. Sweeten with sugar syrup, add a strawberry, raspberry, bit of pineapple, slice of orange, maraschino cherry, or any fruit you happen to have.

CLARET CUP.

1 pint of claret.		Slice of cucumber.
1 pint of soda water.		Sweeten with sugar syrup.
Juice of one lemon and orange.		Bunch of mint.
1 glass of curacao.		Have it well iced.

CHAMPAGNE CUP.

1 quart of champagne		1 pint of apollinaris.
1 glass of sherry.		Slice of cucumber.
1 glass white curacao.		Bunch of mint.
Juice of one orange and lemon.		Large piece of ice.

GINGER ALE PUNCH.

Juice of six lemons and six oranges, two quart bottles of ginger ale, one pint of champagne, sweeten with sugar syrup, a large piece of ice and thin slices of lemon and orange.

SAUTERNE PUNCH.

The juice of six oranges and lemons, two quarts of sauterne, one pint of sherry, one cup of curacao, one pint of soda water, sweeten with sugar syrup, add a few pieces of any kind of fruits and a large piece of ice.

EGG-NOGG.

Beat the yolk of one egg and one teaspoonful of sugar until very light and thick, beat the white to a stiff foam, mix together, turn into a glass, add a teaspoonful of rum or brandy, or both may be used, stir or shake all together, add a little grated nutmeg.

Whipped cream may be used instead of the milk. Add more sugar and rum if desired.

BALTIMORE EGG-NOG.

Yolks of five eggs well beaten. One cup of powdered sugar beaten into the yolks. Then slowly one pint of rum and one cup of brandy. Then one quart of milk and one quart of cream. One grated nutmeg. Beat the whites of the eggs stiff and fold into the mixture. Prepare the day before using.

MILK PUNCH.

Add to a glass of milk a tablespoonful of sherry, rum or brandy, sweeten to taste, shake, or mix well, put a little nutmeg on top.

GRAPE JUICE.

Add one quart of water to four quarts of grapes that have been washed and removed from the stems. Let them come slowly to the boiling point and remain on the stove for fifteen minutes, then strain through a thick cloth, return the liquid to the fire, let it come to the boiling point, turn into glass jars and seal.

RASPBERRY VINEGAR.

Turn over four quarts of ripe raspberries one quart of vinegar. Let remain for twenty-four hours, then strain through a cheese cloth, turn the liquor over four quarts more of fresh raspberries; let stand for twenty-four hours; again strain out the juice, and to each two cups of juice add two cups of sugar. Boil for twenty minutes, turn into bottles, cork when cold. When used, dilute, using three parts of water.

INVALID COOKERY.

Nothing but the best of cooking should be served to the sick.

First.—The greatest care should be taken in selecting the best materials.

Second.—The greatest care should be taken in cooking them.

Third.—The food should be served on the daintiest of china and glass, and the freshest of linen.

Fourth.—Those whose profession it is to care for the sick are not competent to cook for them until they have had thorough instruction in the art by a professional teacher. Cooking should be an important adjunct of nurse training. A very great deal depends upon the patient being properly nourished during convalescence, and if the food is not well cooked it can not easily be digested, the materials are spoiled, and the result of nourishing the patient is not obtained. Cooking eggs in various ways, broiling (see broiled steak), bread making, soups, fancy dishes and ices are found in the book.

TO MAKE TOAST.

Select bread that is fully twelve hours old (if newer bread has to be used, cut in thin slices and set in the oven to dry out the moisture before toasting; if moist bread is used to toast, the inside will be soft and indigestible), cut in thin slices, cut off the crust

unless preferred on, toast slowly a delicate brown on both sides, butter while warm, and *serve only while it is fresh.*

CREAM FOR CREAM TOAST.

Scald one cup of milk in the double boiler; melt in a sauce pan two tablespoonfuls of butter; when melted stir into it two tablespoonfuls of sifted flour (level), pour onto it a little of the hot milk, stirring until smooth, then the rest of the milk; turn all back in the double boiler and cook ten minutes. This way the flour is thoroughly cooked, and if well stirred can not be lumpy.

TO MAKE TEA.

Use only freshly boiled water. Scald the teapot. Put the dry tea into a strainer and let the cold water run through to wash out the dust. Put the tea in the teapot, pour the boiling water over it; set on the back of the stove to steep five minutes. Pour the tea from the grounds into a hot pot and serve at once. The amount of tea to be used depends upon the strength required.

COCOA.

Heat two cups of milk in the double boiler; when scalded add two tablespoonfuls of cocoa, one of sugar and a few grains of salt. Dissolve the cocoa, sugar and salt in a little boiling water, stir into the hot milk, cook for fifteen minutes, beat with the Dover beater for a minute and serve at once.

TO COOK AN EGG IN THE SHELL.

If the egg is to be served soft in the shell (the white cooked and the yolk soft), place the egg in a

sauce pan, cover with water that has come to the boil, set on the back of the stove for ten minutes (where it won't boil), or cover the egg with cold water, place on the front of the stove and allow it to just reach the boiling point; remove from the water at once. Eggs cooked in this way are easily digested; the white is of a jelly-like consistency, not hard and horny as when boiled. To cook the egg hard, let remain in the water longer.

TO COOK CEREALS.

Cereals should be thoroughly cooked. It is best to use a double boiler, as cereals being starchy will easily stick on. Put the cereal in the double boiler, with a little salt, a half teaspoonful to a cup of the dry cereal, cover with boiling water and cook fast on the top of the stove for five minutes, stirring a little to prevent sticking; then place in the boiler and cook for a half hour, anyway. Some cereals require longer cooking. Now many of them go through a steaming process before being put on the market, so that the five minutes of hard boiling and the half hour cooking in the double boiler is all that is required. The cooking of rice and all kinds of cereals are given in the book.

TO COOK CORN STARCH OR TAPIOCA.

Heat the milk in double boiler; when scalded add the corn starch that has been mixed smooth the thickness of cream with a little cold milk and a little salt. Stir into the hot milk and cook for twenty minutes before sugar or eggs are added. Various ways for cooking corn starch and tapioca are given in the book.

Wash the tapioca and add to the hot milk, stirring frequently.

CORN STARCH GRUEL.

Scald two cups of milk in a double boiler; mix a tablespoonful of corn starch with a little cold milk and an eighth of a teaspoonful of salt; stir into the hot milk and cook for twenty minutes; stirring frequently. If too thick, add a little hot milk. Flavor with a little sugar and nutmeg, or lemon or orange juice.

Make *Arrowroot Gruel* the same as corn starch.

MILK PORRIDGE.

1 cup of milk.		1 dozen raisins, quartered.
1 tablespoonful of flour.		$\frac{1}{8}$ teaspoonful of salt.

Scald the milk in double boiler, rub the flour to thin paste with a little cold milk, add to the hot milk with the salt, stir till smooth; cook twenty minutes. The raisins should be washed in cold water, quartered and boiled for ten minutes, letting the water boil out, then add to the milk after the flour has been put in. Flavor with a little sugar and nutmeg.

CRACKER GRUEL.

Brown fresh crackers in the oven until a light brown is reached. Roll very fine; use two tablespoonfuls of the powdered cracker, one-half cup boiling water and one-half cup hot milk, speck of salt; stir the cracker crumbs in the milk and water, add salt, let boil for *one* minute. A little sugar and flavoring may be added.

CORN MEAL GRUEL.

2 tablespoonfuls of corn meal.		$\frac{1}{2}$ teaspoonful of salt.
1 tablespoonful of flour.		2 cups of hot milk or water.

If milk is used, heat in double boiler to prevent burning. Mix the meal, flour and salt to a smooth paste with a little cold water, pour onto it the milk or boiling water, a little at a time, stirring rapidly. When smooth the liquid can be added more rapidly. Let cook for thirty minutes. It can be thinned with hot milk and flavored with a little sugar, nutmeg or lemon.

OATMEAL GRUEL.

2 cups boiling water.		$\frac{1}{4}$ teaspoonful salt.
2 tablespoonfuls oatmeal.		

Boil all together for one hour; add more boiling water if necessary, strain. Serve with hot milk or cream.

RICE WATER.

1 tablespoonful of rice.		$\frac{1}{4}$ teaspoonful of salt.
1 quart of cold water.		

Put the well-washed rice and salt in the cold water; let cook for one hour, or until it is soft. A little cream, sugar and flavoring may be added.

BARLEY WATER (Mrs. Lincoln).

1 tablespoonful pearl barley.		$\frac{1}{2}$ lemon.
3 blocks of sugar.		1 quart boiling water.

Wash the barley in cold water; put barley, sugar and lemon into the boiling water; let it stand covered on the back of the stove for three hours, then strain it and serve. Currant jelly or orange juice

may be used instead of the lemon. This is a valuable for colds and affections of the chest.

TOAST OR CRACKER WATER.

Toast in the oven bread crumbs or crackers very brown, but do not burn. To a cup of crumbs or crackers add one cup of cold water; let stand for one hour, then strain; add cream and sugar to taste.

SLIPPERY ELM TEA.

Pour one cup of boiling water over one teaspoonful of the powdered slippery elm, or a little of the bark. When cool, strain, flavor with lemon juice and sugar. Serve cold.

BEEF TEA.

Remove the fat from one pound of *round* steak, cut in small pieces, put in a glass jar, add one cup of cold water; set the jar in cold water, after being closely covered; heat very slowly, taking fully an hour or more, or till the meat is white; strain, pressing the meat to obtain all the juice; season with salt.

BEEF JUICE.

Remove the fat from a slice of the round of beef, wipe with a cloth that has been dipped in warm water. Broil for a few seconds to start the juice. Cut the meat in small pieces, press through a meat press. Pour boiling water through the press just before using it. Season with salt.

LAMB BROTH.

Cut lean, juicy meat in inch pieces, cover with cold water; let stand for half an hour, then put on the stove and heat gradually. Cook slowly after it begins for a half hour. Salt, peppercorns and a small onion may be added when it is put on the stove. Strain, season if more is needed, add a little well-cooked rice. The fat should be all skimmed off before serving. Do not skim until the broth is strained.

CHICKEN BROTH.

The best flavor and most nourishment is obtained from an old chicken. Cut apart the joints, remove all the fat that is possible. Cover the chicken with cold water, let stand for a half hour, then put on the stove where it will heat slowly. Simmer till the meat is cooked from the bones; add salt, peppercorns and a small onion when put on the stove. Strain before serving. Remove the fat and add a little well-cooked rice.

ACID DRINKS.

Pour boiling water onto any kind of acid berries; when cold, serve, or dissolve acid jelly in cold water. Barberry and currant are especially good.

TAMARINDS WATER.

Boil one-half cup of tamarinds in three pints of boiling water for one hour; cool; sweeten a little if cared for.

LEMONADE.

Juice of a small lemon, cutting off a thin slice to put in the glass; one glass of ice water, one table-

spoonful of sugar, or, much better, a little sugar syrup.

ORANGEADE.

Make the same as lemonade, using the juice of half a lemon and half an orange.

FLAXSEED LEMONADE (Mrs. Lincoln).

Pour one quart of boiling water over four table-spoonfuls of whole flaxseed and steep three hours; strain, add the juice of two lemons, sweeten to taste; add a little more water if the liquid seems thick. This is soothing to colds.

ALBUMENIZED WATER.

Beat the white of one egg slightly; mix with a glass of cold water; flavor with brandy, wine, lemon or orange juice, as directed.

ALBUMENIZED MILK.

Shake the white of an egg and a glass of milk in a jar or shaker until they are mixed thoroughly; sweeten, and flavor to taste.

MUSTARD POULTICE.

Use one-fourth as much corn meal as mustard; mix to a consistency to spread with warm water.

FLAXSEED POULTICE.

Mix the ground flaxseed with hot water.
