Notes:

1. The controlled prices for those having the number of meshes other than that stipulated in this list shall be the amounts added with the amounts multipled the price differentials between those for the both sides of the said number of meshes by the ratio of the difference between the said number of meshes and that in its next superior grade against the difference between the number of meshes of the both sides to the controlled prices of those having the number of meshes in its next superior grade.

   However, the controlled prices for those having the number of meshes with fractions less than 1 knot shall be applied by the controlled prices for those having the number of mesh with the number of knots adjusted by making 0.5 or more fractions as one knot, disregarding the rest of fractions.

2. The controlled prices for those of 30 counts shall be the amounts added by 20 per cent to the controlled prices for those of 20 counts in the same largeness as the goods in question or the controlled prices for those of 20 counts in the largeness in the nearest superior grade in this list. The controlled prices for those of 40 counts shall be the amounts added by 40 per cent to the controlled prices of 20 count in the same largeness as the goods in question or the controlled prices for those of 20 counts in the largeness in the nearest superior grade in this list. The controlled prices for those of 60 counts shall be the amounts added by 70 per cent to the controlled prices of 20 counts in the same largeness as the goods in question or the controlled prices for those of 20 counts in the largeness in the nearest superior grade in this list. The controlled prices for those of fine counts, 61 counts or over, shall be subject to the controlled prices for those of 60 counts in the same largeness as the goods in question.
3. The controlled prices for those of 10 counts shall be subject to the controlled prices for those of 20 counts having double the number of threads as those of the goods in question.
4. The controlled prices for those of 16 counts shall be subject to the controlled prices of 20 counts having the number of threads multiplied the number of threads of the goods in question by 5-fourths (in case, however, there is not mentioned in this list of the number of threads mulitiplied by 5-fourths, the number of threads in the nearest superior grade).
5. The controlled prices for those of the count other than those in this list and mentioned in 2, 3 and 4 shall be subject to the controlled prices for those of the nearest bigness in the nearest count.
6. With regard to the goods over 100 fathoms, the controlled prices for those over 100 fathoms shall be applied by the amounts added by 4 per cent to the amounts multiplied the controlled prices, for those of 100 fathoms by the ratio of the said number of fathoms against 100 fathoms.
