DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Subject: Re Permission to build Church on former Japanese Naval Property at Ube town, Yamaguchi Prefecture.

To U.S. MILITARY GOVERNMENT, YAMAGUCHI shi, YAMAGUCHI ken.

I. History of Proposal.

The Catholic Mission at Ube, although started some 8 years ago, did not make much progress until the end of the war, mostly on account of the rising tide of nationalism. With this situation completely changed after the war, and because of the special need for missionary work in a new and large industrial town as Ube, plans were set up in October 1945 for the construction of a suitable church in the place of the present temporary chapel. When it was found that the present site would be too small for a sufficiently large building, a proposal was made to turn the present site together with the buildings thereon over to a religious congregation in order to be used for some charity or social work, and apply for a new site to be obtained from the near-by Naval Factory grounds.

This proposal met with the hearty approval of the then Military Governor at Yamaguchi, Lt. Sadler, who directed me to the Prefectural Authorities of Yamaguchi ken, in order to file a formal application with the Japanese Finance Ministry to which the grounds had been turned back already. After obtaining the further support of the Ube city-authorities, the formal application was sent in December 1945. An informal approval of the project was obtained from the Tôkyô Finance Ministry authorities on the 8th January 1946, and in the end of the same month a verbal, yet formal reply was given by the local prefectural as well as Finance Ministry authorities to the effect, that although the formal written decision would take some time we would be allowed to use the grounds as our own and build thereon whatever we deemed suitable.

The building site for the new church having thus been determined, materials were acquired and stored on the future building site with a view of starting building as soon as possible.

However an altogether new situation arose, when the former Naval Factory at Ube was designated as property set aside for reparation purposes. On enquiry with the Japanese Police authorities it was learned that the former arrangements had been cancelled or at least temporarily suspended by this order, and if we wanted to proceed with our building plans it would be necessary to obtain the consent of the U.S. Military Authorities.

II. Contents of Proposal.

Object of petition: A building site for a church with necessary annexes.

Size of site required: front opening 35 ken (cc. 70 yards), depth 30 ken (cc. 60 yards).

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Location: Ube Branch Factory of the former "Kure Naval Factory". The lot nearest to the present entrance, after cutting off parts to be used for the projected construction of public roads.

III. Reasons for the Proposal.

1. Missionary work in a big industrial town like Ube has bright prospects for future development and demands a church suited for a congregation of about 1000.

2. The present site of the Catholic Church at Ube being too small for such a purpose could properly be used for the establishment of some charity work, so much needed in a town like Ube and so heartily welcomed by all the authorities concerned.

3. The new site asked for would be most suitable, as it is near the present site, resp. the site of the future charity work, and as there are no buildings on it that would have to be removed or destroyed, nor would it in any way impede the use of the remaining factory grounds and buildings. A small guard's lodge, which stands partly on the desired site partly on ground needed for the construction of projected roads, would in no way impede our plans nor would its use be a hindrance to us. Application had already been filed with the Japanese authorities for the grant of this lodge, as soon as it would not be used anymore by official guards.

The undersigned, as missionary of the Ube Catholic Church, humbly asks permission to build a church and all the other necessary buildings on the afore-said site, and if possible that property rights be given to the legal holder of all church property in this district, i.e. "The Nippon Hiroshima Kyôku Senkyôshi Shadan" ("The Corporation of Missionaries of the Hiroshima Diocese in Japan"). The head of this Corporation is at present Rev. Akira Ogihara, the Apostolic Administrator of this diocese, whose headquaters are at: Hiroshima ken, Hiroshima shi, Nobori chô, Catholic Church.

Yamaguchi, 6th April 1946.

To: - U.S. MILITARY GOVERNMENT, Yamaguchi ken, Yamaguchi shi.

It is hereby certified that permission was granted to Father Peter Heidrich, Missionary of Ube Catholic Church, in January 1946, to acquire a building site for a new church at the former "Ube Branch Factory of the Kure Naval Factory". The site was to be adjoining the present entrance after cutting off parts to be used for the construction of public roads, 1050 Tsubo in size (opening 35 ken=cc.70 yards; depth 30 ken= cc.60 yards).

APPLICATION FOR MOVEMENT AND AUTHORIZED USE
OF DESIGNATED REPARATION MACHINERY AND EQUIPMENT

DATE : 27 MARCH 1951

TO : MINISTER OF INTERNATIONAL TRADE AND INDUSTRY

FROM : Akira TAWARADA, President of Ube Kosan K. K.

Address : 1976-1, Kogushi, Ube City,
Yamaguchi Prefecture

1. Name and Location for the plant which intends to use designated reparation machinery and equipment :

Ube Iron Works, Ube Kosan K. K.
1978-19 Kogushi, Ube City, Yamaguchi Prefecture

2. Name (Code No.) and Location of the plant where designated reparation machinery and equipment to be used actually exist :

1) Hikari Naval Arsenal (Code No. 45-4)
Hikari City, Yamaguchi Prefecture

2) Hiro Naval Aircraft Factory
(Code No. 11-6 (8))
Kure City, Hiroshima Prefecture

3) Ube Branch Factory of Kure Naval Arsenal
(Code No. 45-3)
Ube City, Yamaguchi Prefecture

3. List of designated reparation machinery and equipment to be moved and used :

Stated in the attached list No. 1

4. Necessity for movement and use of machinery and equipment :

Main efforts of Ube Iron Works, Ube Kosan K.K. has been directed on the production and repair of pulverized coal combustion equipment, loading equipment, transportation machines, machinery and equipment for the chemical products, such as cement, ammonium sulphate and soda, various kinds of machines and tools for coal mines, etc.

The Works has already presented its specifications for production covered by the special procurement orders. Under the current economic situations, it is planning to rehabilitate its facilities which have been superannuated by wear and tear caused by use for a long time since they were installed 30 years ago, and to improve them to cope with the presumed rush of orders under the special procurement and from foreign firms.

MANUFACTURING AND INDUSTRY FILE 45-3 Sect II

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

The designated reparation machinery and equipment desired herein should be used for the production of those machinery mentioned above. The main purposes of use of the desired machinery and equipments shall be stated in Annex No. 2.

A) Reasons :

As stated above, the Works has been manufacturing the commodities which are most important materials for rehabilitation and reconstruction of Japan. However, the Works' facilities are superannuated by use for a long time since they were installed 30 years ago, and 40% of which are now almost unavailable because of wear and tear, causing bitter headache on the way of rationalization of the plant.

Since the end of war, the Works seeked and tried to pick up suitable facilities among the designated reparation machinery and equipments which could be used for improvement of its own old facilities, in the civilian factories, but failed. Even the competent authorities agree that it is almost impossible to get such precision machinery from any other sources for a time being.

The designated reparation machinery and equipments desired to use herein shall be replaced with the old facilities. They might realize the development of quality of products, cutting down of products' cost, to raise of efficiency of the plant, and shortening of the term of delivery. Rationalization of the enterprise and improvement of products' quality shall make the Works powerful enough to tackle to the production under special procurement and for exportation.

Location of the plant where the desired machinery and equipment is to be used:

Ube Iron Works, Ube Kosan Co., Ltd.
1978-19, Kogushi, Ube City, Yamaguchi Prefecture

B) Outline of undertaking plans and results in the past :

The monthly output of 37,000,000 yen on an average under the current system shall be increased about 15% more than that, if the Works can get the desired machinery and equipment.

The desired machinery and equipment are mainly composed of shapers, plainers and cutters for the precision parts of the products. They must save the overload upon the facilities under the present situations, which in effect enable the Works to shorten the term of delivery and which might, furthermore, bring the Works more credit.
