PREFACE

This Gazetteer presents an alphabetical list of names of geographic features of Japan, including Karafuto, Chishima Retto (Kuril Islands), Nanpo Shoto (Southern Islands), and Nansei Shoto (Southwestern Islands), with the limits shown on the chart following this page.

The provisional publications H. O. Pub. No. 894X (Gaz. No. 14X), Ryukyu Retto and Nanpo Shoto, and H. O. Pub. No. 894Y (Gaz. No. 14Y), Chishima Retto, are included in this gazetteer. AMS Gazetteer to Maps on Japan, 1st edition, dated November, 1944 has also been included for names in the interior of Japan.

All names listed are transcribed exactly as they appear on the source chart or in the AMS gazetteer. Alternative names are printed in *italic*, but no preference in usage is indicated by distinction in type or arrangement.

The coordinates accompanying each name are obtained from the source chart and are given to the nearest full minute unless enclosed by brackets to indicate less precision. Place names taken from the AMS Gazetteer are given to the nearest corner of a two minute quadrangle. All longitudes are from Greenwich. No attempt has been made to reconcile differences in coordinates of the source material.

Hydrographic charts of the various countries were examined in the preparation of the gazetteer. The code designating the source from which the name was taken is opposite that name, and identifications of the 782 charts and maps are given in the "List of Sources" at the end of the Gazetteer.

It is requested that errors or omissions noted in this publication be referred to the Hydrographic Office, Navy Department, Washington, D. C.
