CHECK SHEET

(Do not remove from attached sheets)

Lt Col Fry
74-1157 Ext 24

File No.: Subject: Mortar Training Ammunition

Note No. 1. From: CAS(Anx)-L To: G-4 Date: 6 July 1951

1. Reference C/N CAS to G-4, Subject: Mortar Training Ammunition, dated 5 May 1951, copy attached.

2. Preliminary training of NPRJ personnel in the 60-mm mortar has been initiated, but it cannot progress beyond the elementary stage unless training ammunition is made available. Although 25,000 rounds of shell HE, 60-mm, have been approved for issue to CAS, this cannot be used for preliminary training for the following reasons:

a. Adequate ranges are not available at NPRJ camps.

b. Proficiency of crews must be demonstrated with training ammunition prior to service practice with HE ammunition.

c. Location of NPRJ units makes it impractical to move units at this time to the few areas in Japan where HE mortar ammunition can be fired.

3. GHQ Ordnance Officer's comments on referenced C/N indicated that all training ammunition on hand had been allocated to Reserve Corps units and additional training ammunition was expected within 60 days, for other units training in Japan and Korea.

4. Since the limitations on use of HE ammunition for preliminary training apply more to NPRJ units than to Occupation Force units, who have adequate ranges and previously trained personnel, a higher priority for issue of training ammunition should be established for NPRJ.

5. Request reconsideration of the allocation of training ammunition, and immediate issue to CAS of the following ammunition:

Cartridge, ignition	204,000 rounds
Shell, training, M69 (60 mm)	3,360 each
Fin Assembly, M5	6,720 each

SECURITY INFORMATION

CHECK SHEET

(Do not remove from attached sheets)

Lt Col Weetman
74-1157 Ext 24

File No.:

Subject: Mortar Training Ammunition

Note No.

From: CAS(Anx)-L To: G-4 Date: 5 May 1951

1. Request that 60-mm mortar ammunition listed below in the amounts and types shown be authorized for NPR training program. These allowances are based on the following paragraphs of AR 775-10, dated 17 September 1947: 9 a(1), 9 b(1), 9 b(3)(a)5, 9 b(3)(b), 30, 39, and 55.

Units Authorized To Fire	Cartridge Ignition	HE-PD	WP	Practice
60-mm Mortars Sections of Ordinary Companies	67,200	3,240	3,240	35,100
81-mm Mortar Platoons	28,800	1,440	1,440	20,340
81-mm Mortar Squads of Region Patrol Companies	2,400	120	120	1,260
4.2 Mortar Companies	28,800	1,440	1,440	20,880
Counter Mortar Radar Sections of Special Bn Hq				4,800
Special Units	76,800	3,840	3,840	71,560
TOTAL	204,000	10,080	10,080	153,940

2. NPR is to receive only 60-mm mortars at the present time. In order to provide for the training of all units for which mortars are authorized, whether 60-mm, 81-mm, or 4.2 inch, the 60-mm mortar will be distributed to all such units. It is therefore necessary to substitute 60-mm mortar ammunition for the 81-mm and 4.2 inch mortar ammunition based on allowances prescribed for 60-mm mortar units. Special units have not been issued their primary weapons. Training with the 60-mm mortar for these units has been authorized. An additional amount of 60-mm mortar ammunition has been included for special units on the same basis as for ordinary units.

3. Shells, Training and Fin Assemblies are authorized in Ord 7 SNL A-42, dated Nov 47 (See organizational spare parts and equipment section, stock numbers R-004-9010011 and R-004-9010060). It is further requested that the following items be authorized:

a. 3360 Shells, Training, M69 (10 per mortar).
b. 6720 Fin Assemblies, M5 (20 per mortar).

SECRET SECURITY INFORMATION

18 July 1951

MEMORANDUM FOR RECORD

1. Attended conference on 17 July at Headquarters JLC on the subject of handling and storage of special FECOM reserve equipment. Present at the conference were Col Fry and Maj Johnson of CAS, Col Spengler, G-4 JLC, representatives of all technical services, JLC, and representative of Comptroller, JLC.

2. JLC was informed that the following items authorized for loan to NPR in a GHQ letter of 2 July will not be drawn immediately:

Mortar, 81-mm
Pistol
Rifle, M1
Rifle, Snipers
Launcher, grenade, M7A1

3. JLC questioned the advisability of issuing vehicular radio sets prior to receipt of the vehicles. They were told that CAS expected vehicular radios to be installed in vehicles on arrival. If the installation is not done by DA, it must be done by JLC. They were informed that a study is now being made by CAS to determine which types of radios are to be installed in each vehicle.

4. JLC was informed that CAS will prepare shipping instructions for FECOM reserve equipment as soon as possible in order to avoid unnecessary storage.

5. JLC plans to request a new storage area at the Nakajima Aircraft Factory at Omiya, 10 miles north of Tokyo Ordnance Depot. About 537,000 square feet of covered storage area is available in this factory. A rail siding is available within 1/2 mile of the warehouses. JLC Ordnance estimates a requirement for 31,000 square feet to store the equipment which is expected in August and September. JLC was informed that storage requirements for special FECOM reserve equipment should be computed on the basis of the Taylor Report, Column 8. After return to Tokyo, this basis was confirmed by Col Griffin, G-4 GHQ.

6. JLC expects to submit a request for PD and necessary rehabilitation work for the Nakajima Factory in a few days. JLC Comptroller is making a study of the arrangements necessary to charge the operation of this storage area to TOW funds.

SUBJECT: Request for Training Aids for Tactical Demonstrations.

TO : SUPREME COMMANDER FOR THE ALLIED POWERS
ATTN: Chief, Civil Affairs Section (Logistics)
APO 500

1. Request that the following be procured for the GG School Center by 16 July 1951 for use in battalion tactical demonstrations for the Special (6th) Staff Class, and for use in training the Officers' Training Class:

a. 500 pounds of TNT one-pound blocks (or substitute).

b. 1000 electrical detonating caps.

c. 20 circuit breakers.

d. 100 smoke pots (large).

2. Previously requested for this same training were thirty .30 caliber blank firing attachments for light and heavy machine guns, and 50,000 rounds of .30 caliber blank ammunition.

3. It is also requested that 4,000 rounds of .45 caliber ammunition be shipped to Camp Kurihama prior to 25 July, to supplement camp stocks which will be used for the First Officer Training Class range firing. Justification of this request was included in 2nd indorsement, 6 July 51 to Ltr 471 (11 June 51) CAS-SC, subject: Ammunition requirement for School Center, 11 June 51 (incl: 1) which contained details regarding all of the officer training firing and requested delivery of the ammunition after 4 Aug.

Mortar Training Ammunition

CAS(Anx)-L G-4 6 July 1951

1. 1. Reference C/N CAS to G-4, Subject: Mortar Training Ammunition, dated 5 May 1951, copy attached.

2. Preliminary training of NPRJ personnel in the 60-mm mortar has been initiated, but it cannot progress beyond the elementary stage unless training ammunition is made available. Although 25,000 rounds of shell HE, 60-mm, have been approved for issue to CAS, this cannot be used for preliminary training for the following reasons:

a. Adequate ranges are not available at NPRJ camps.

b. Proficiency of crews must be demonstrated with training ammunition prior to service practice with HE ammunition.

c. Location of NPRJ units makes it impractical to move units at this time to the few areas in Japan where HE mortar ammunition can be fired.

3. GHQ Ordnance Officer's comments on referenced C/N indicated that all training ammunition on hand had been allocated to Reserve Corps units and additional training ammunition was expected within 60 days, for other units training in Japan and Korea.

4. Since the limitations on use of HE ammunition for preliminary training apply more to NPRJ units than to Occupation Force units, who have adequate ranges and previously trained personnel, a higher priority for issue of training ammunition should be established for NPRJ.

5. Request reconsideration of the allocation of training ammunition, and immediate issue to CAS of the following ammunition:

Cartridge, ignition	204,000 rounds
Shell, training, M69	3,360 each
Fin Assembly, M5	6,720 each

Date: 27 June 1951

1. Recommend disposition of items listed in DA Message 93663 is attached as Inclosure #1.

2. Quantities listed in Column 2 (Incl 1) for:

a. Ordnance Items: Are required for full T/E allowance, except for Grenade Launcher M8 which is 268 short of approved T/E.

b. Signal Items: Are required for T/E. Sets exceeding present T/E allowance will be used as substitutes for other T/E sets. Quantities listed do not satisfy complete T/E requirements.

c. Engineer Items: Are to be used for major NPRJ Headquarters and Advisory Staffs.

d. Medical Items: Are expendable supplies for which NPRJ storage facilities are available.

3. Quantities listed in Column 3 (Incl 1) are either over current T/E requirements, or are for items not desired for issue at this time.

4. Quantities listed in Column 4 (Incl 1) are for partial replacement of equipment previously issued to CAS from JLCOM stocks. Complete replacement is not possible because quantities to be shipped from ZI do not meet T/E requirements in some cases.

From: G-4 To: CAS(Anx)L Date: 6 June 51

9 1. 50,000 rounds, shell, 60mm HE-PD are authorized for the NPRJ training program. The CG JLCOM has been directed to supply 25,000 rounds of this ammunition to the Chief CAS.

2. In the event training and/or practice ammunition becomes available in the future, a substitution of suitable quantities will be made for the HE ammunition.

3. At such time as the additional 25,000 rounds of 60mm mortar ammunition are required, request that the requisition be processed through G-4 for supply action.

Lt Col Weetman
74-1157 Ext 24

File No.: Subject: Mortar Training Ammunition

Note No. 1.

From: CAS(Anx)-L To: G-4 Date: 5 May 1951

1. Request that 60-mm mortar ammunition listed below in the amounts and types shown be authorized for NPR training program. These allowances are based on the following paragraphs of AR 775-10, dated 17 September 1947: 9 a(1), 9 b(1), 9 b(3)(a)5, 9 b (3)(b), 30, 39, and 55.

Units Authorized To Fire	Cartridge Ignition	HE-PD	WP	Practice
60-mm Mortars Sections of Ordinary Companies	67,200	3,240	3,240	35,100
81-mm Mortar Platoons	28,800	1,440	1,440	20,340
81-mm Mortar Squads of Region Patrol Companies	2,400	120	120	1,260
4.2 Mortar Companies	28,800	1,440	1,440	20,880
Counter Mortar Radar Sections of Special Bn Hq				4,800
Special Units	76,800	3,840	3,840	71,560
TOTAL	204,000	10,080	10,080	153,940

2. NPR is to receive only 60-mm mortars at the present time. In order to provide for the training of all units for which mortars are authorized, whether 60-mm, 81-mm, or 4.2 inch, the 60-mm mortar will be distributed to all such units. It is therefore necessary to substitute 60-mm mortar ammunition for the 81-mm and 4.2 inch mortar ammunition based on allowances prescribed for 60-mm mortar units. Special units have not been issued their primary weapons. Training with the 60-mm mortar for these units has been authorized. An additional amount of 60-mm mortar ammunition has been included for special units on the same basis as for ordinary units.

3. Shells, Training and Fin Assemblies are authorized in Ord 7 SNL A-42, dated Nov 47 (See organizational spare parts and equipment section, stock numbers R-004-9010011 and R-004-9010060). It is further requested that the following items be authorized:

a. 3360 Shells, Training, M69 (10 per mortar).
b. 6720 Fin Assemblies, M5 (20 per mortar).

2	1. Ordnance: Request information concerning the availability of ~~equipment~~ items listed in C/N 1. 2. G-3: Request comment as to the operational necessity for the ~~equipment~~ items listed in C/N 1. G. L. E. 7889
3	Captain Beaman, 57-8196 FROM: ORD O TO: G-4 THRU: G-3 DATE: 8 May 1951 1. Status of 60-mm mortar ammunition requested is indicated below:

	Combat Reserve	On Hand
HE w/PDF	1,696,912	2,107,477
WP	203,196	47,810

Practice)
Cart., Ignition)
shell, training)
Fin assemblies)

Total quantities of these items on hand have been allocated for training of GHQ Reserve Corps units. Requisitions have been placed on the ZI for additional quantities of these items and until receipt, no items will be available for CAS.

2. Due to the limited quantity of 60-mm WP ammunition available for support of combat operations, it is recommended none of this item be utilized for training purposes until such time as the stock position improves.

3. Recommend that training ammunition requirements for units operating under the control of CAS be forecast far enough in the future to permit supply from the zone of interior, as many times sufficient quantities are not on hand in the FEC to meet requests. As a matter of information, the order and shipping time between Japan and the zone of interior has been established at 120 days.

File No: Subject: Mortar Ammunition for Training of NPR

Note No. 6. (Cont'd)

From: Ord O To: G-4 Date: 24 May 1951

81mm Mortars	AVAIL ZI RFI	PRODUCTION SCHEDULE ZI	REMARKS
W.P.	0	June 51 15,000	In production with steady increase indicated.
4.2 Mortar			
HE	0	May 51 200,000	In production with steady increase indicated.
WP	26,005	May 51 100,000	In production with steady increase indicated.

2. There is no information available as to the stocks of practice and training items in the ZI. However, informal information from JLCOM indicated that training ammunition is due in within the next 60 days which was requisitioned for other units training in Japan and Korea.

3. During the informal discussion with JLCOM it was ascertained that a representative of CAS visited their office this month and stipulated his requirements for training as follows:

1000 each, shell, T.P., for 60mm Mortars.
1000 each, cartridge ignition, for 60mm Mortars.
1000 each, Primers, ignition, for 60mm Mortars.
2000 each, Grenades, hand, simulated.

4. The above items were requisitioned for CAS and the ETA is approximately August 1951.

CHECK SHEET

SECURITY INFORMATION

(Do not remove from attached sheets)

File No.: Subject: Mortar Ammunition for Training of NPR

Note No. 6. (Cont'd)

From: Ord O To: G-4 Date: 24 May 1951

81 mm Mortars	AVAIL ZI RFI	PRODUCTION SCHEDULE ZI	REMARKS
W.P.	0	June 51 15,000	In production with steady increase indicated.
4.2 Mortar			
HE	0	May 51 200,000	In production with steady increase indicated.
WP	26,005	May 51 100,000	In production with steady increase indicated.

2. There is no information available as to the stocks of practice and training items in the ZI. However, informal information from JLCOM indicated that training ammunition is due in within the next 60 days which was requisitioned for other units training in Japan and Korea.

3. During the informal discussion with JLCOM it was ascertained that a representative of CAS visited their office this month and stipulated his requirement s for training as follows:

1000 each, shell, T.P., for 60mm Mortars.
1000 each, cartridge ignition for 60mm Mortars.
1000 each, Primers, ignition, for 60mm Mortars.
2000 each, Grenades, hand, simulated.

4. The above items were requisitioned for CAS and the ETAis approximately August 1951.
