TO PERSONS WEARING SPECTACLES
THERE is not a personal matter, but merely a friendly advice to my customers and all those who wish to preserve their sight unimpaired. The visual organs are the finest instruments to require the proper care in the selection of glasses when one is compelled to resort to spectacles. My a most conscientious and high conscientiously recommended pebbled by Spaldings, who are very little for the eyes of purchasers, and whose only object is to sell an article recommended as of extraordinary value.
Purchasers must not suffer themselves to be deceived by a pair of spectacles which make things look larger beyond measure. Our sight is always altered, sooner or later, by our seeing too clearly. The glasses must be sufficiently strong, and others ought not to be taken rather the change cannot possibly be avoided.
I am of opinion that every one has a perfect right to dispose of his goods as he chooses, but I take down it my duty to caution those whose confidence I have enjoyed for many years, against passpoys articles about new discoveries, such as "Brazilian Pebbles," "Africanus Pebbles," &c., &c. Those names are only given for the purpose of attracting public attention, and there is not a word of truth in what is said. There is but one kind of good spectacle glasses, whether made of ordinary or pebble glasses, it is those which are well finished, and pass, and suit the eyes without fatiguing them.
I am entitled that physicians, and competent persons generally, assume to the above expressed opinions.
C. DURAMEL, Optician,
