SUBJECT: Policy on Consumption of Japanese Food Products

TO: Commanding Officer
Kinki Military Government Region
APO 25

1. Your attention is invited to the following letter received by this headquarters from the Commanding General, Eighth Army, subject as above:

"1. Since the beginning of the Occupation, there have been a number of directives prohibiting procurement of Japanese food products except those obtained from authorized sources. Exchanges and commissaries are the only places where the purchase of this type of indigenous food is authorized. The Japanese products sold there are listed in official publications.

"2. A tendency has been observed amongst personnel of all ranks and categories to purchase and consume Japanese seafoods. This practice is clearly beyond any reasonable interpretation of existing regulations. I desire that any distortion of the meaning of the published regulations which, through misinterpretation, neglect, or disregard, may have been allowed to become a practice, be stopped at once.

"3. This directive will be enforced through military channels as a command function. Where appropriate, disciplinary action will be taken against violators.

SUBJECT: Incentive Goods for Marine Products.

TO: Commanding Officer
Kinki Military Government Region
APO 301

1. The difference in eligibility for incentive goods between fishermen from Class A and Class B ports has been the object of much criticism by the Class B port fishermen.

2. In many cases, Class B port fishermen work in the same waters, with similar equipment, and for the same fish products as the Class A fishermen, yet they are discriminated against in the incentive goods program.

3. During both the 1946 - 1947 and 1947 - 1948 fishing seasons, the total catch of Class B ports in Hyogo Prefecture exceeded the total catch of Class A ports. The catch is shown below:

Season	Class A	Class B
April 1946 - March 1947	1,993,524 kan	3,686,380 kan
April 1947 - March 1948	2,748,486 "	3,544,377 "

4. The following table illustrates the difference in the bases for eligibility for incentive goods:

Incentive Item	Allocation per 1,000 kan of fish shipped: Class A ports	Class B ports
Cigarettes	333 ea	250 ea
Sake	3.3 sho	2 sho
Salt	50 kan	50 kan
Lumber	3.3 koku	2 koku
Nails	3.3 kg	2 kg
Textile and Rubber Goods	100 points	66 points

Points establish eligibility to purchase such items as work gloves (5pts), Jikatabi (1 pt), rubber boots (25 pts), and half length boots (16 pts).

Ltr, Hyogo Mil Govt Team, APO 317, file 319.16, subj: "Incentive Goods for Marine Products," 49/E/NR/1, dtd 8 Jan 49, cont'd.

5. If the Class B ports operated on the same basis for eligibility for incentive goods, it is believed that the total fish catch would increase. It has been consistently reported for several months that fish is generally more available in the six largest cities of Japan than in the smaller cities and towns which are usually supplied by Class B ports. Further incentives for Class B port fisherman should serve to improve this situation.

6. It is recommended that a more equitable system of distribution to Class B ports of incentive goods for fish products be considered.
