DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

GENERAL OUTLINE OF PROGRAM FOR IMPROVEMENT OF
CD HOSPITALS AND NURSING ISOLATION TECHNIQUES THROUGHOUT KANTO REGION

I. Introduction

This much needed program has been in existence in Kanto Region for about one year. It was initiated right after the typhus epidemic which hit Kanagawa Prefecture the first part of 1950.

It was found by a survey of CD hospitals at that time throughout the region that some very shocking conditions existed and that nowhere in Kanto Region was there a CD hospital that approached the minimum standards for safe operation nor administered proper nursing care to the patient. Neither was there a suitable place for A class nurse affiliation.

II. CD Training Course for Nurses in Tokyo

It was decided that a month's training course be given to certain selected nurses through the Region. Following is the generalized outline for plans of the course:

1. Place:

a. Tokyo Medical University (for classroom demonstrations and doctor's lectures).

b. 361st American Station Hospital (for ward participation and observation).

2. Sponsored by KaCAR with assistance and cooperation of Tokyo-To Health Department Nursing Division.

3. Object: To aid in the betterment of present CD ward set-ups and nursing isolation techniques in contagious disease hospitals and wards.

4. Number of Students and Qualifications: Two from each prefecture (twenty in all) one to be selected from the nursing division prefectural health department--and the other to be chosen if possible from a CD hospital or from an A class nursing school. Both nurses preferably should have a qualified background with some experience as an instructor or assistant instructor

5. Instructors: Dr. Nagaki - Director of Ebara CD Hospital, Dr. Shikata - Specialist in bacteriology from Tokyo Medical University, Miss Kaneko - Graduate of St Lukes' College of Nursing, Mrs. Yamamoto - Graduate of St Lukes' College of Nursing. The nurses, prior to teaching this course, accompanied the KaCAR nurse to various CD hospitals to observe and note suggestions and advice given regarding improvements of these installations.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

6. Curriculum:

a. Communicable disease lectures-6 hours - Dr. Nagaki with visual aids and demonstrations.

b. Bacteriology lecture-6 hours - specialist in bacteriology with showing of microscopic slides and participation of students in simple laboratory experiements explaining the basic concepts of germ theory.

c. Basic Nursing Arts-23 hours and 10 hours - classroom demonstrations with emphasis on the patient with a contagious disease.

d. CD Nursing-20 hours and 10 hours - classroom demonstrations. Each contagious disease or group of contagious diseases to be studied, with individual instruction and attention given in classroom demonstrations.

e. Observation and participation at the 361st Station Hospital for each student for two weeks.

Following this training, it was to be expected that the nurses would return to their respective prefectures and plan a CD nursing program based on the principles learned at the Tokyo course.

III. Tokyo Prefecture Follow-Up:

Work on the follow-up of this prefectural program is stressed not only because of its geographical accessibility to KaCAR, but also due to the fact that it will inevitably be used as a pattern by other prefectures.

After visiting the five CD installations in Tokyo, Ebara CD Hospital was selected jointly by Tokyo-To and KaCAR as the most suitable one for reconstruction, repair, equipping, etc. The hospital staff exhibited more enthusiasm toward the program, and from a financial viewpoint, less money would have to be expended for improvements.

A conference was held with the Director, Chief of General Affairs and Chief Nurse of Ebara Hospital. An itemized estimate was made for needed repairs, reconstruction, equipment and additional personnel. (Ebara Hospital is a 3 story construction and the estimate came to around 10,000,000 Yen). This in turn was submitted to the Medical Preventive Section, Tokyo-To Health Department. An appeal was also made to the governor for expedition of funds for this project.

To date, 5,000,000 Yen has been alloted and spent for reconstruction and repair of the hospital. Another 4,000,000 Yen has been allocated by the health department budget for equipment. This, as yet, has not been utilized. All of the hospital staff nurses and a good deal of the other personnel have been in training for several months now with the aid of Miss Kaneko and Miss Nagata, Ebara Hospital staff nurse who took the Tokyo CD course. They are learning new techniques, and assisting in the set-up of proper ward facilities.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

In the near future the hospital will be ready to accept affiliating students for courses and ward training in correct CD nursing procedures. Doctors, nurses and health officials have already traveled from many parts of Kanto Region to visit Ebara even before its completion to observe and take notes, with an eye toward improving their own prefectural CD hospitals. There is every indication that these visits will continue.

IV. Prefectural Follow-Up

Follow-up of the program, to date, in the remaining prefectures has not revealed such gratifying success as that in Tokyo. A few prefectures viz: Gumma, Saitama, and Chiba are in the process of making hospital improvements and nursing courses are being given in all prefectures without benefit of ward experience as there are no suitable hospitals at present. This type of training has not been approved by KaCAR.

V. Problems Encountered

At this time it might be well to present the problems encountered during the one year existence of the program.

1. Financial limitations of prefectural and municipal budgets have been a great factor in deterring projects. A large part of this is due to insufficient interest and cooperation by other medical and administrative officials and this certainly includes some lack of insight to the problem by the Ministry of Welfare.

2. Following along this line, KaCAR nurses have not possibly had sufficient time to concentrate, review, reemphasize and encourage outside interest in this program in every single prefecture. This was done in Tokyo and the results prove that with much time and patience, and frequent visits, desired results can be obtained.

3. Another problem encountered is the fact that many of the nurses working in CD hospitals throughout the region do not have suitable background qualifications for learning new systems and techniques. They do not even have the basic concepts of the nursing arts. This entails the planning of a much longer and slower course in many instances for desired results. This in itself invites complications such as more time off from hospitals to spend in courses, more money needed, the longer the course, etc.

4. In prefectures where some interest has been shown difficulties have arisen insofar as that nursing courses are not coordinated with hospital ward experience. In other words, nurses are studying academic subjects and theoretical procedures without the actual practical working experience which is a vital part of the learning program. This is due in great part to insufficient interest on part of those who are in a position to assist and lack funds to improve CD hospitals.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

5. There has also been the problem of reading blueprints for building of new CD hospitals or for reconstruction of old buildings. The Ministry of Welfare has an architectural consultancy, but advice given from this department is based on old style systems, neglecting entirely such items as admitting rooms, observation rooms, arrangement of facilities for convenience of nurses, etc.

VI. Future Plans for Phases of the Uncompleted Program

1. Completion of Ebara CD as a training center for Tokyo prefectural area, finishing ward set-ups, purchasing of needed equipment, planning of affiliation courses, etc.

a. A training film had been contemplated in the future which would be made at Ebara Hospital. It would demonstrate correct isolation nursing procedures in care of the CD patient, proper ward set-ups and necessary equipment for safe operation of an installation of this type. This could be loaned to other prefectures for teaching purposes or duplicated for distribution.

2. Follow-up by KaCAR on the CD nursing program in all ten prefectures, giving guidance where indicated and encouraging interest of officials and public figures who may contribute support for further continuance of the project.

3. The program for improvement or condemnation of isolation units not connected to hospitals throughout the region has only just begun. It has been started in only one prefecture, viz: Chiba because of their interest and cooperation in the project. KaCAR has held meetings and conferences with the chief nurses and directors of all the health centers throughout Chiba Prefecture to discuss the need for improvement of these many isolation units scattered about in their areas. KaCAR made out a list of the minimum requirements and standards for safe operation of these units, and had them translated into Japanese. The plan is to have the two Chiba nurses who took the CD training course in Tokyo visit each health center in the prefecture and hold a short 2-3 day session with the chief nurse and her staff. During this time she will explain with the aid of the list prepared by KaCAR the bare essentials in safe CD nursing and the minimum amount of necessary reconstruction and equipment needed in these isolation units. She will demonstrate her teachings by visits to one or two of these installations, showing where improvements are indicated.

Written reports (standard forms to be used--not designed yet) on each of these units, itemizing the extent of repair, equipment, training of nurses, etc. It is hoped that with the completion of this survey some concerted action will be taken by the proper authorities to improve where improvements are indicated (i.e. with an eye toward finances involved) or to eliminate these installations entirely where they are a community hazard. Plans for teaching improved techniques to private duty nurses who usually work in these isolation units have not been formulated as yet.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

4. The program for the training of health center nurses throughout the region and their instruction of the family in home care of the contagious diseased patient has not even been started.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Alleged contact was located by Japanese
health authorities without aid of patient
on 13 January 1951, examined at
Yokosuka Health Center and found to
be non-infected.

Should be reinvestigated
with culture.

WHAT

DOES

IT

MEAN

TO

YOU ?

Translation

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

PICTURE

What is V D ?

VD is a general word for diseases transmitted by sexual intercourse. There are four main type:

1. Syphilis
2. Gonorrhoea
3. Soft Chancre
4. Lympho-granuloma inguinale

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

SYPHILIS

Syphilis is caused by a small germ called Spirocheta Pallidum. When the individual is first infected a sore or chancre develops on the man or woman's private parts. The germ then spreads throughout the body and causes many people to finally become insane, crippled for life with lung or heart disease or a chronic sufferer, who is always ill with the disease. If the disease is treated early then the individual can be cured. Later in the disease the only methods of diagnosing the disease may be by a blood test. Many people have syphilis now and do not know it.

PICTURE

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

GONORRHOEA

PICTURE

Gonorrhoea is caused by another small germ, the gonococcus, which is harbored in the private parts of many men and women. In the male the germ invades the urethra, prostate gland and Epididymis and other organs in the pelvis and may in later years causes stricture, chronic prostatitis and joint disease. In the female the germ invodes the lining of the uterus, vaginal glands, ovaries and ovarian tubes. The result may be sterility or chronic pelvic disease. It is important to treat gonorrhoea as soon as possible to avoid these dreaded complications of the disease.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

SOFT CHANCRE

This disease is caused by a small germ called the Ducrey Bacillus. It causes a sore on the privates which if not treated may remain for a long time. It is important to see a doctor as soon as possible to make sure that one does not have syphilis.

PICTURES

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

LYMPHOGERNULOMA INGUINALE

PICTURE .

This disease is caused by a small germ. In men the disease produces enlargement of the glands in the grain and pus and large masses of infected tissue. In women the disease spreads rapidly and if not treated may cause stricture of the rectum, chronic pain and infection in the grain.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

LYMPHOGERNULOMA INGUINALE

PICTURE

This disease is caused by a small germ. In men the disease produces enlargement of the glands in the grain and pus and large masses of infected tissue. In women the disease spreads rapidly and if not treated may cause stricture of the rectum, chronic pain and infection in the grain.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

WHAT TO DO ABOUT V D

1. See your doctor as soon as possible and have a complete examination. You may have VD now and not know it.

2. Go to Heian Hospital where you may be treated free for Venereal Disease with American Medicines. Do not hesitate for a free examination.

3. Do not expose yourself to Venereal Disease.

4. If you think you have VD see a doctor immediately for treatment before is is too late.

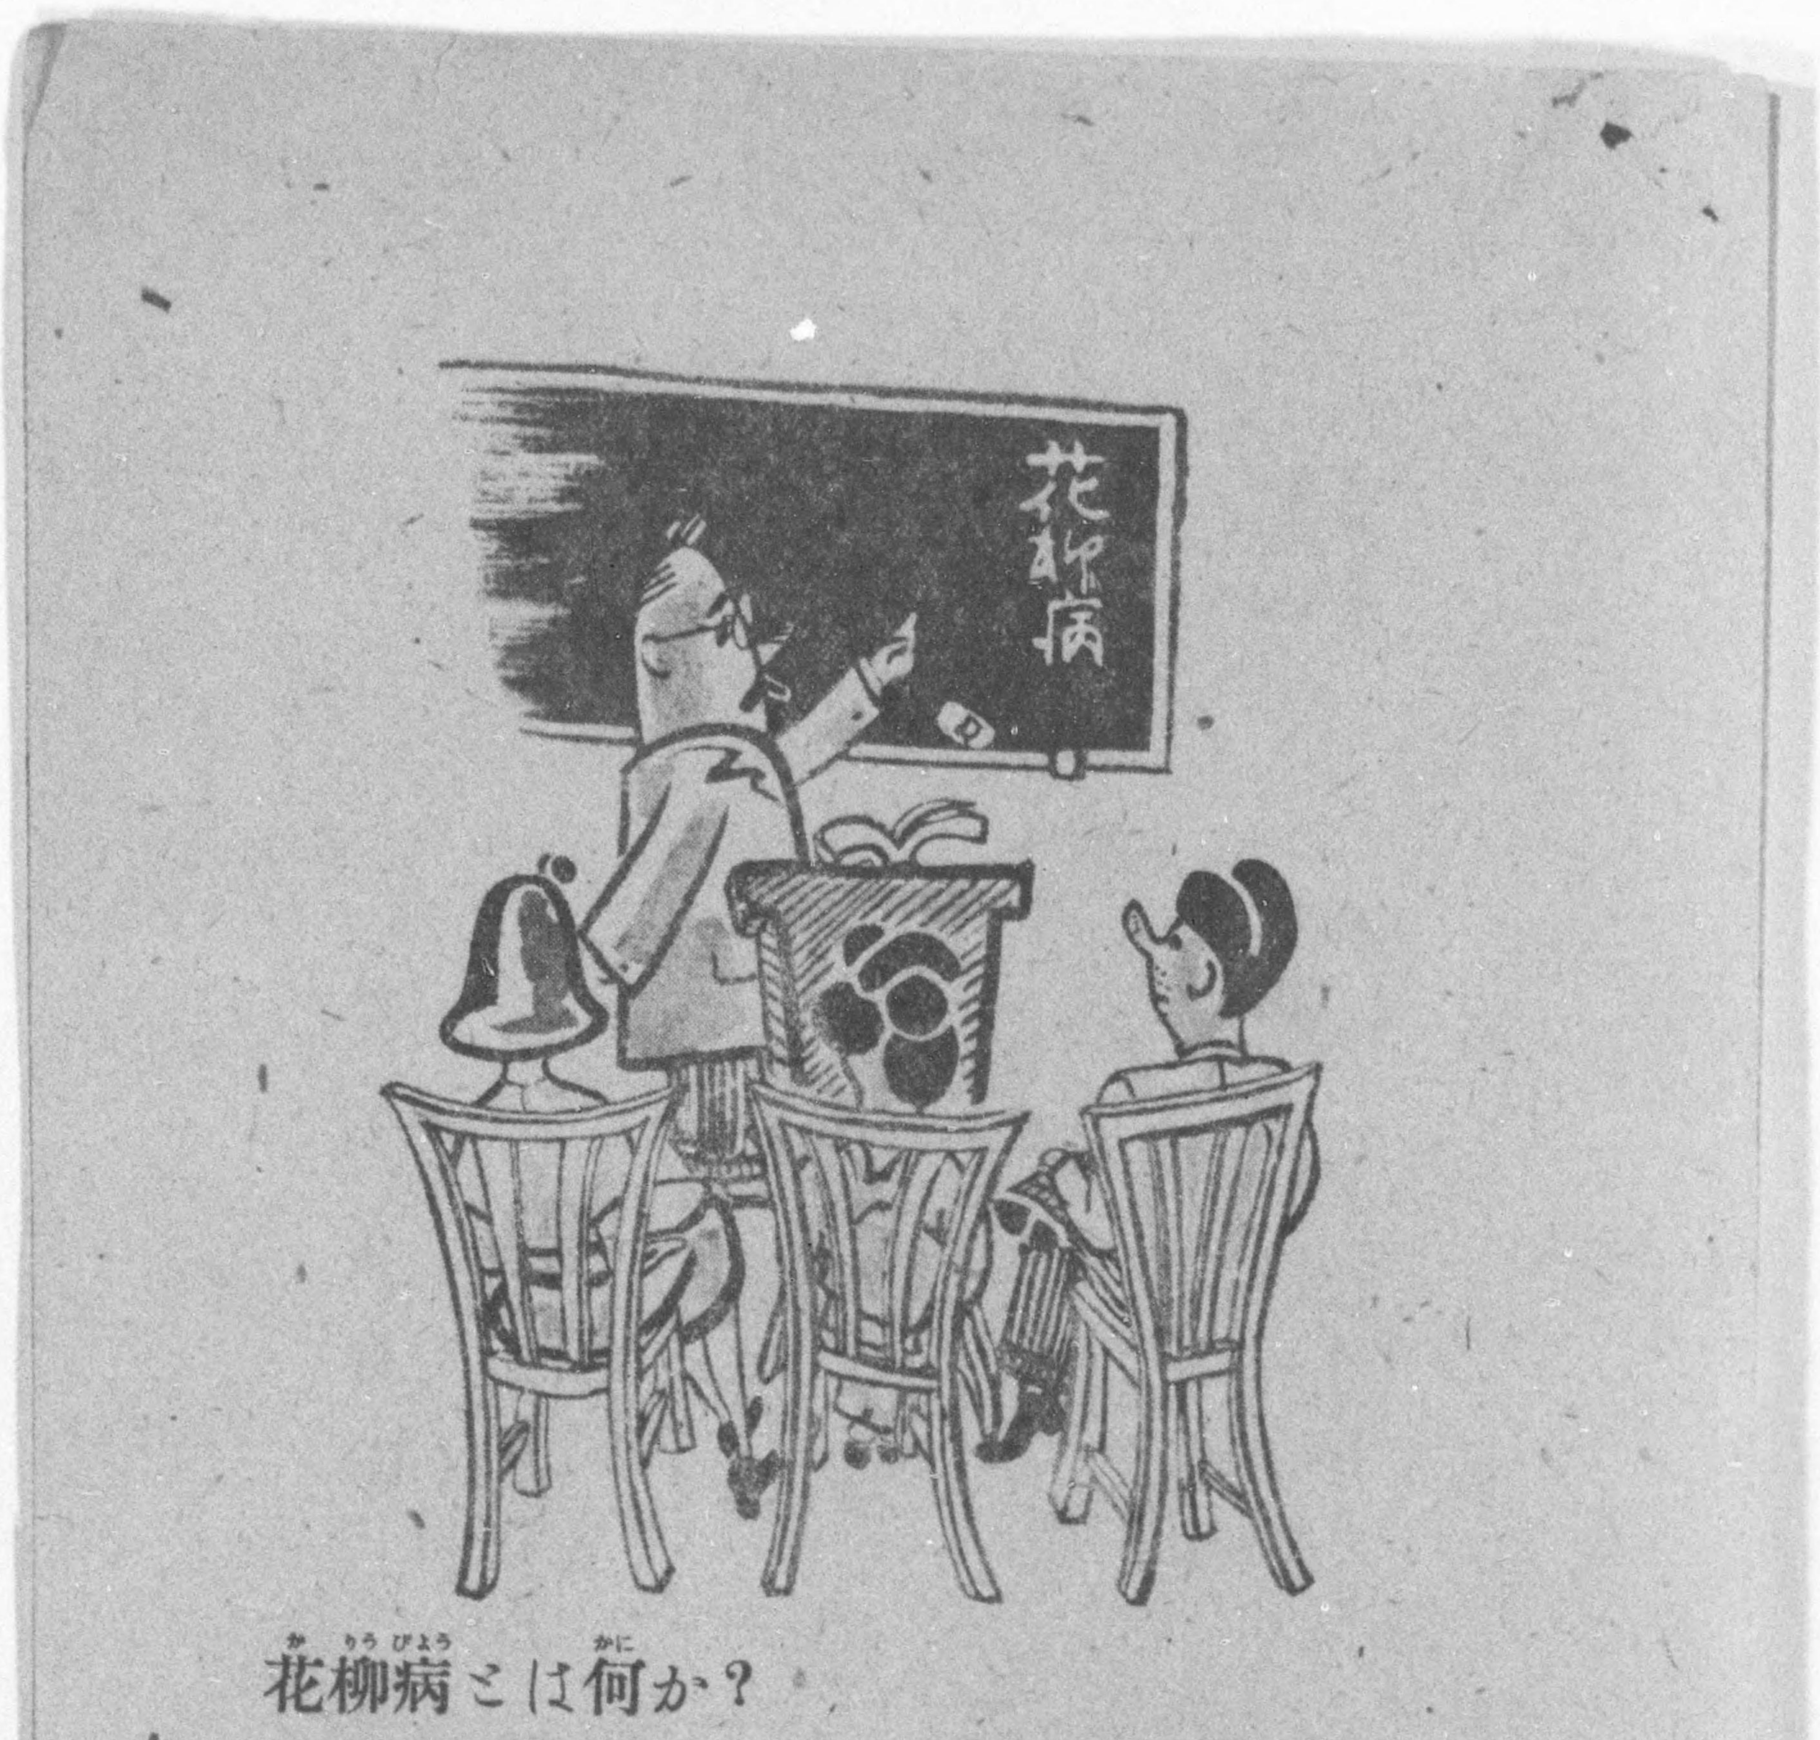
花柳病とは—

どんなものか

御存ですか

？

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013



花柳病とは何か？

花柳病とは一般に性行爲に依つて傳染する病氣の總稱です.

その主なものに次の四種類があります.

(1) 黴　　毒

(2) 淋　　病

(3) 軟性下疳

(4) 第四性病

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

黴毒

黴毒はスピロヘータ・パリーダと云ふ菌に依つて傳染します．之に感染すると先づ腫物又は疳(傷)が陰部に發生し，そこから菌が全身に擴がつて，遂には發狂し骨又は心臟を冒されて癈人となる者或ひは慢性患者となつて生涯この病氣に惱む者も少くありません．

併し手當が早ければ全治出來ます．病氣が潜んでしまへばその檢診法としては恐らく血液檢査より他にはないでせう．

多くの人々は黴毒にかゝつてゐながら，それに氣附かずにゐます

＊　＊
＊　＊

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

淋病

淋病は男女の陰部に巣喰ふ淋菌と云ふ細菌に依つて傳染します男子に於ては菌は尿道，攝護腺，副睾丸其の他骨盤内の諸器管を侵し後年に至つて狭窄，慢性攝護腺炎，關節炎などを惹起します．女子の場合は菌は尿道膀胱を侵す外子宮内面，卵管を侵し，その結果不妊症や慢性骨盤炎を惹き起します．

一刻も早く手當を受けて之等恐るべき併發症を未然に防ぐことが何よりも大切です．

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

軟性下疳

この病氣は ジユークレー 菌と云ふ細菌に依つて傳染します. 之に罹ると非常に痛い傷が出來, 鼠蹊腺が腫れます. 手當を怠たると容易に癒りません. よく黴毒性の傷と一緒に出來ますから出來る丈早く醫者に診て貰つて黴毒に罹患してゐないかを確かめる事が大切です.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

第四性病

この病氣は殊に少さな細菌で起り傷から入ります.

横痃が腫れて破れると仲々治りません.

横痃には靜かにして居る事が一番大切です.

此外横痃は色々の病氣で出來ますから良く醫者に相談して治療する事です.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

花柳病はどう處置すればよいか

(1) 罹らぬ様に豫防するのが一番ですが罹つたら早く醫者の治療を受け人に傳染させない事が大切です.

(2) 豫防にはサックや塗劑を使ひ事前事後に充分よく洗滌を行ひなさい.

(3) 治療は徹底的に行はないと反つて後で病氣が惡くなり治り難くなります.

(4) 檢診は進んで受けなさい, 平安病院では米國の藥品ですつかり治療してくれます.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

HEADQUARTERS
TOKYO LABOR LIAISON OFFICE
APO 500

21 March 1951

SUBJECT : Small-pox Immunization.

TO : All Labor Using Units of Tokyo-to Area.

REFERENCE: Section II 2 d Circular 24 Hq 8th A 15 April 1950, Subject: Physical Examination and Immunization of Japanese and Foreign Nationals Employed by Occupation Forces.

1. In view of established public health practices and in order to safe guard the health of all persons concerned in the Tokyo Prefecture an accelerated program of small-pox immunization is initiated at once.

2. Attached is a copy of the schedule of hospitals and dispensaries, showing dates when employees of the using unit are to receive small-pox immunization.

3. All labor officers are requested to make arrangements by calling the hospital official to coordinate the date and time for this immunization and also to arrange for the most expeditious method either by having the medics report into the unit to administer the inoculation or to have the employees report to the hospital or dispensary.

4. All Japanese and Foreign National employees working for the Occupation Forces (L.R) shall receive the small-pox immunization regardless of whether or not he has received a small-pox immunization.

5. Attention of labor officers is called to ascertain that all inoculations are read by the Japanese doctor after 2 to 3 days and a record is made on the health card of a successful vaccination.

6. JLC Form #54 Physical Inspection Receipt must be accomplished by the labor officer for this medical service. To expedite this procedure 3 copies with a roster attached is all that is necessary for each using unit to prepare.
