SUBJECT: Prevention of Fires Resulting from Spontaneous Combustion in Pyrite Concentrate Stockpiles.

TO : Commanding General
I Corps
APO 301

1. Reference is Operational Directive #49, this headquarters, 21 June 1947, subject: "Pyrite Production."

2. Attached instructions (inclosure 1) regarding the cause and prevention of fires in pyrite stockpiles is forwarded for your information and for dissemination to the pyrite mine operators of the mines listed in paragraph 2 of referenced Operational Directive and to the regional and prefectural authorities concerned with pyrite mining.

BY COMMAND OF MAJOR GENERAL RYDER:

1 Incl:
Causes and Prevention of Firest in Pyrite Stock-Piles, 10 copies.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

CAUSES AND PREVENTION OF FIRES IN PYRITE STOCKPILES

1. Fires resulting from spontaneous combustion have caused serious losses in large pyrite concentrate stockpiles. Inadequate allocations and disruptions of transportation facilities are failing to meet shipping requirements of the increasing pyrite mine outputs in some areas. Large stockpiles of pyrite concentrates are accumulating and subject to fire hazard.

2. Information about fires caused by spontaneous combustion in pyrite concentrate stockpiles is summarized:

a. Fires in stockpiles result from abnormally accelerated rate of oxidation of sulfide minerals.

b. Normal oxidation begins immediately upon stockpiling of concentrates. As oxidation progresses an outer layer of iron oxide forms on the stockpile, thereby retarding the rate of active oxidation underneath. Some oxidation continues, but it is less than that required to cause combustion.

c. Any rupture of the protective oxidized layer, allowing air to enter, will provide the oxygen required to start combustion. A transfer or shipment of part of the stockpile will allow free circulation of air; this tends to start fires in both the remaining stockpile and concentrates in the shipment.

3. Recommendations for the prevention of fires are made:

a. The only practical preventative measure at present is the maintenance of 10 percent moisture content in the stockpile. Water in proper quantities excludes air and prevents combustion.

b. Evaporation in open-air storage is rapid, and continual addition of water is required to maintain the proper protective moisture content. Evaporation is less in bin storage, but owing to compaction, which results in air spaces along bin walls, liberal quantities of water must be used.

c. Freshly exposed faces of stockpiles from which shipments have been made, as well as car loadings of concentrates, must be thoroughly sprayed with water to exclude air from the hot pyrite undergoing retarded oxidation. This is most important because natural compaction of dry concentrates prevents water from percolating more than a few feet below the surface.

d. Unfiltered concentrates, unless poured into a retaining pond, will drain rapidly when stockpiled in the open or in bins. Air will replace the voids formerly occupied by water and provide the oxygen to advance the rate of oxidation, unless more water is added continually.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

4. Research is continuing on methods of applying protective coatings on concentrate particles during ore dressing operations. However, until a practical process is found, maintenance of moisture content will be the most practical prevention of fires.

C. O., Fukuoka Signal Center
Area Engineer
Provost Marshal
A. P. O. 929

1. The attached Fire Regulations have been prepared by, and forwarded to, the undersigned by the 24th Division Artillery Fire Marshal for the information and guidance of all concerned.

2. A Fire Alarm system will be installed in the near future upon completion of which additional instructions will be issued. Additional fire fighting appratus will also be furnished as well as evacuation signs indicating routes of escape.

3. It is requested that the general provisions of the enclosed Fire Regulations be complied with and that adequate dissemination of the information contained therein be made among your personnel. It is further requested that any comments or suggestions relative to Fire Regulations in general or as particularly applicable to the Chiyoda Building be addressed to the 24th Division Artillery Fire Marshal, through this Office, in order that a more comprehensive Fire Regulation system may be prepared upon completion of steps outlined in par 2.

F-O-R-E R-E-G-U-L-A-T-I-O-N-S

CHIYODA BUILDING (FUKUOKA)

FIRE ALARM

A FIRE ALARM SYSTEM WILL BE INSTALLED AND ALL PERSONNEL INSTRUCTED IN ITS USE.

FIRE STATIONS

ALL FIRE STATIONS WILL BE NUMBERED AND SUFFICIENT PERSONNEL FROM OFFICES ON THAT FLOOR WILL BE DESIGNATED AS FIREMEN AND INSTRUCTED IN THE OPERATION OF THOSE STATIONS.

EVACUATION OF PERSONNEL

COORDINATED PLANS FOR THE EVACUATION OF PERSONNEL WILL BE MADE WITH PRIORITY GIVEN TO PERSONNEL ON UPPER FLOORS, DIRECTION ARROWS WILL BE PLACED IN HALLS AND STAIRWAYS INDICATING ROUTES OF ESCAPE.

EVACUATION OF RECORDS

A RESPONSIBLE PERSON IN EACH OFFICE WILL BE DESIGNATED TO EVACUATE, OR SUPERVISE THE EVACUATION OF RECORDS, IN ORDER OF THEIR PRIORITY.

HEATING SYSTEM

DURING PERIODS WHEN HEATING SYSTEM IS IN OPERATION, A QUALIFIED FIREMAN WILL BE ON DUTY IN FURNACE ROOM AT ALL TIMES.

NO SMOKING

AS FUMES FROM SULPHURIC ACID ARE EXPLOSIVE, NO SMOKING SIGNS WILL BE POSTED AT ENTRANCE TO AND INSIDE OF STORAGE BATTERY ROOM. IN OFFICES WHERE SMOKING IS PERMITTED, ASH TRAYS OR BUTT CANS WILL BE PROVIDED AND METAL WASTE BASKETS USED.

COMBUSTABLES AND EXPLOSIVES

NO COMBUSTABLES OR EXPLOSIVES WILL BE STORED INSIDE MAIN BUILDING, ALL SHAVINGS WILL BE REMOVED FROM CARPENTER SHOP AND HEATER DISCONNECTED AT CLOSE OF EACH DAY.

ELECTRICAL

NO ELECTRICAL CONNECTIONS WILL BE MADE EXCEPT BY PERSONS AUTHORIZED BY THE AREA ENGINEER.

FIRE DRILLS AND INSPECTIONS

FIRE DRILLS WILL BE HELD AT LEAST ONCE EACH MONTH UNTIL PROFICIENT.

FREQUENT INSPECTIONS WILL BE MADE TO INSURE FIRE REGULATIONS ARE BEING COMPLIED WITH.

SUBJECT: Accidental Explosion of Munition

TO : Supreme Commander for the Allied Powers, General Headquarters, Far East Command, APO 500

1. In compliance with par 12, FEC Cir 32, Reporting of Accidental Explosions and Fires dated 19 March 47. The following report is submitted:

(1) (a) Date of explosion: 17 June 47
(Delayed report from Jap. sources)

(b) Time: 1900 hours

(c) Place: 1489 Mogushi, Ushibuka-machi, Amakusa-gun.

(d) Probable cause:

(A) The victim's father repaired furnace of out door bath with mud from the field.

(B) The field was former Japanese Army maneuver area.

(C) The heat is believed to have caused explosion.

(2) All known munition completely destroyed.

(3) (a) Believed to be one grenade.

(b) No munitions known to remain in this area.

(4) One explosion. (No intervals)

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

FILE

(5) No barricades.

(6) Only damaged immediate area.

(a) Destroyed foundation to out door bath.

(b) None

(c) All damage repairable.

(d) No glass breakage.

(e) Approximate 20 yards.

(f) 1. Only one explosion.
2. No other explosions known to be in area.

(7) No crater.

(8) One Japanese national: Miyoshi Iwahashi age 21, male, died of abdomen wound from shrapnel.

(9) Water available.

(10) Does not apply.

(11) Police were instructed to search for other grenades or munitions and to alert people in the area.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

HEADQUARTERS I CORPS
APO 301 (Kyoto, Honshu)

AG 471-R 15 May 1947

SUBJECT: Reporting of Accidental Explosions and Resultant Fires.

TO : See Distribution.

1. Reference is made to:

(a) Paragraphs 12 and 13, GHQ FEC Circular Number 32, subject: Storage and Handling of Ammunition and Explosives dated 19 March 1947. These paragraphs are quoted below for your information:

"12. Reporting of Accidental Explosions and Fires.

a. Specific information regarding ammunition fires or explosions is desired by the War Department, in order that a continuous study may be made for the improvement of safety measures and safe quantity-distance requirements.

b. An investigation will be made of every accidental explosion or fire involving ammunition or explosives, either of United States or Japanese origin, while in storage or in transit, in areas under the control of the Far East Command. This investigation will be initiated by the commanding officer of the unit exercising physical control of such ammunition or other explosives at the time of accident. Reports will be forwarded in triplicate to General Headquarters, Far East Command, through the appropriate command channels.

c. The following information will be included in such reports, together with such other general information that may be available:

(1) Date, time, place and probable causes, with any other pertinent information.

(2) Extent of loss, Differentiate between quantities actually destroyed and those rendered dangerous.

(3) Quantity, by type, of ammunition involved, and quantities remaining serviceable in the area.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

2 Bn Mar

MAY 19 1947 11 01

(4) Time intervals, if measurable, between explosions.

(5) Number and kind of barricades and the effect upon them. Also report of the existence of any hills, forests, or other objects intervening between site of explosion and areas acted upon.

(6) Range and extent of damage. Include a map or sketch to show following data (photographs are desirable):

(a) Radius of complete destruction; namely, structures blasted to the ground with very little left standing.

(b) Radius of structural damage beyond economical repair.

(c) Radius of repairable structural damage.

(d) Range of general glass breakage.

(e) Distance to which most missiles were projected, with kind and weight of important missiles.

(f) Distance between locations if explosions occurred at more than one location, i.e. actual distances between stacks and Field Storage Units. If afloat, distance between ships or other vessels affected, and distances to nearby ships or vessels not affected.

(7) Approximate shape and dimensions of crater.

(8) Casualties, if any.

(9) Adequacy of fire fighting equipment.

(10) Departure, if any, from the established safety regulations which may have been allowed in supply points, storage areas, and/or in the hands of troops, and reasons for any such variations.

(11) Measures being taken to clear the area of duds or other hazardous materials.

d. Reports Control Symbol QOR-03 is assigned the "Report of Accidental Explosion or Fire."

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

13. Preliminary Reports of Accidental Explosions and Fires. In addition to the detailed report required by paragraph 12, an immediate preliminary report of every accidental explosion or fire involving ammunition or explosives will be made by radio to General Headquarters, Far East Command. The preliminary report will include the location, date, and time of accident, type material involved, number of casualties, and brief description of loss and damage."

(b) Message, Headquarters Eighth Army dated 10 May 1947 which states in part, "Pending revision of paragraph 12d, Far East Command. Circular 32 dated 19 March 1947, Reports Control Symbol ORD-7 instead of QOR-03 is assigned the 'Report of Accidental Explosion or Fire'."

2. Service, Military Government and tactical units are responsible for rendering an immediate, preliminary radio report as required by paragraph 13 of reference 1 (a). Briefly, this means that the first unit to learn of an accidental explosion will be responsible for forwarding a preliminary radio report in compliance with paragraph 13 of referenced Circular.

3. Information copies of all radio reports will be sent to Headquarters Eighth Army (Attn: G-2, Ordnance Officer), Headquarters I Corps (Attn: G-2, Ordnance Officer, Military Government, Provost Marshal), the Division headquarters concerned (Attn: G-2, Ordnance Officer) and the Military Government and tactical unit in whose zone of responsibility the accident took place.

4. When information of an accidental explosion reaches Division headquarters, an ordnance disposal technician will be dispatched to examine the area for unexploded ordnance and to prepare a preliminary written report. This report will be forwarded to this Headquarters (Attn: Ordnance Officer) through Technical Channels with copies to the appropriate tactical, Military Government and service units.

5. Upon receipt of the preliminary report described in paragraph 4 of this letter, the tactical unit in whose area the explosion occurred will prepare a detailed, written report as required by paragraph 12 of reference 1 (a) and submit this report through Command Channels to The Commander-in-Chief Far East.

Captain McGovern:

I am sorry to say that I was unable to complete the reverse side of the Injury Summary Report for Kyushu MG Region. I have therefore left for you copies of the Injury Summary Reports from the two teams involved and also the two Report of Injury forms. Possibly the information found on them will be sufficient for you.

Raymond F. Druhan

Raymond F. Druhan
WOJG

For Your Info.

I am returning one copy of your Injury Summary Report so your file copy will agree with mine. Think the analysis is about right. Also returning Report of Injury forms for your file

HEADQUARTERS I CORPS
APO 301 (Kyoto, Honshu)

CHT/i.w

AG 014 - BA

5 November 1946

SUBJECT: Personal Injury to Japanese or Property Damage to Japanese Property Caused by Occupation Forces.

TO: See Distribution

1. Your attention is invited to the provisions of SCAPIN 1195 (inclosure 1), stating that SCAP recognizes no legal basis for liability with respect to claims for damages caused by allied military personnel and accepts no responsibilities for the adjustment and payment thereof.

2. However, Eighth Army Circular No. 296, dated 13 November 1945, as amended by Circulars No. 43, dated 4 February 1946 and No. 172, dated 8 June 1946 (inclosure 2, 3, and 4) are still in effect. Accordingly, all unit commanders will investigate and report all injuries to or deaths of Japanese, and all damage to Japanese property, caused by members of their commands.

3. TCS Form No. 3 (Rev) (inclosure 5), will be used for such reports. In subject cases the term "no recommendation" may be inserted under paragraph 12 of this report.

4. The responsibility for conducting such investigations and the preparation of reports rests upon the unit causing the personal injury or property damage. Military Government units will only conduct such investigations when the injury or damage is caused by the unit's own personnel. In their liaison capacity, Military Government units will assist the local prefectural liaison offices in placing injured parties in contact with the claims officer of the unit causing the injury or damage.

5. It will be especially noted that this letter refers only to injuries or damage to Japanese or to their property. All other claims will be handled as provided by the appropriate Army

SECTION II - CLAIMS AND ACCIDENT INVESTIGATIONS
* * * * * * * * *

E X T R A C T

* * * * * * * * * *

Section II - Claims and Accident Investigations.

1. a. Investigations and reports on damages, injuries or death to Japanese caused by United States armed forces will be made and forwarded as required in this circular.

b. To protect the interests of the Government should a claim be filed at some later date, all accidents and incidents which may give rise to claims by or against the United States will be promptly and thoroughly investigated by an officer authorized to make such investigations under Army Regulations 25-20. Such officer must conduct his investigation as soon as possible after the incident in order to get sworn statements from witnesses before they become scattered or returned to the United States, and in order to view the scene before it has become materially changed. Routine Military Police investigations and reports are valuable and frequently form the basis of the formal investigation required but they do not take the place thereof.

2. Immediate responsibility for claims investigation rests with the corps, division, regimental and subordinate commanders of the unit most directly involved. Commanders of all appropriate units will appoint Claims Officers pursuant to the provisions of paragraph 7d, AR 25-20.

3. a. All such accidents and incidents will be investigated and processed as provided by AR 25-20. USAFFE Regulations 1-75 and USAFFE Claims Manual; also AR 25-25, 25-90, 25-100 and 25-220 as applicable. Injuries sustained by civilian employees in Japan will be investigated and reported under AR 25-20 and 25-90 until other policies are announced respecting such civilian employees. No representation will be made by any Claims Officers or other military

Incl 2

SECTION II - Claims and Accident Investigations.

Paragraph 3 b, Section II, Circular No. 296, this headquarters, 13 November 1945, subject as above, is rescinded and the following substituted therefor:

"3. b. All claims, and all claims officer's reports and reports of investigation of accidents and incidents even though a claim is not filed will, after action by the appointing authority, be forwarded in triplicate to the commanding general of the major command to which the unit is assigned or attached.

c. The commanding general of the corps or division or of USASCOM C will examine reports of investigating officers or claims officers of units under the direct control of their respective headquarters to determine that all available evidence has been obtained and that such reports are complete before forwarding. No formal opinion will be required. Such reports will then be forwarded in triplicate direct to the Commanding General, USASCOM C, APO 404, Attention: Claims Service Section. (AG 150) (Y)."

HEADQUARTERS 24TH INFANTRY DIVISION
Office of the Commanding General
(Kokura, Kyushu)

AG 671.3-E

APO 24
21 Oct 46

SUBJECT: Fire Precautions by Japanese Contractors in the 24th Infantry Division Areas.

TO : Commanding Officer, Kyushu Regional Military Government, APO 929

1. It has come to the attention of this office that proper precautions are not being taken to eliminate fire hazards by Japanese contractors employed in the 24th Division areas on Kyushu.

2. It is requested that steps be initiated by your office to inform all Japanese contractors so employed that they will initiate the following precautions immediately and are directly responsible that these precautions are followed by all employees of their organizations.

a. Open fires of any type are prohibited in any building and / or within 20 feet of any building in the area in which the contractor is working.

b. All open fires for burning trash, cooking, clearing, ect. will be attended at all times or will be completley out at end of work day.

c. Areas around buildings, and within buildings, on which work is being done, will be cleaned up daily and all combustible wastes disposed of by the end of the work day.

d. Oils, greases, gasoline and similar inflammable materials will not be stored within building except those designated for such storage.

e. Water barrels with pails, sand boxes or similar fire fighting equipment will be provided on all construction projects.
