MEMORANDUM FOR: Ministry of International Trade and Industry,
Mining Bureau, Petroleum Administrative Section,
No. 2-Chome, Kasumigaseki, Chiyoda-ku, Tokyo

SUBJECT: Processing of Applications Requesting Permission for Altering Petroleum Storage Tanks as Submitted in Compliance with SCAPIN 1920 and Amendment Thereto

1. References are:

a. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, AG 678(30 Nov 46)ESS/IND, SCAPIN 1920, subject: Petroleum Storage Tank Facilities, 9 July 1948 and Amendment thereto, SCAPIN 1920/1, 20 April 1950.

b. Memorandum for Ministry of Commerce and Industry, Mining Bureau, Petroleum Section from General Headquarters, Supreme Commander for the Allied Powers, Economic and Scientific Section, 463.8(18 Apr 49) ESS/IND, subject: Processing of Applications Requesting Permission for Altering Petroleum Storage Tanks as Submitted in Compliance with SCAPIN 1920, 18 April 1950.

2. Paragraphs 2, 3, and 4 of reference 1b are hereby rescinded.

3. Paragraph 5 of reference 1b is modified to read as follows:

"The Ministry of International Trade and Industry will submit a monthly report with six copies to the Economic and Scientific Section, General Headquarters, Supreme Commander for the Allied Powers, on or before the tenth day of the following month on all applications processed during the month and will include the following information for each tank altered:

a. Identification - indicate name and location of installation and number or other identifying mark of the tank.

b. Owner - indicate by name the owner, e.g., Japanese National, Japanese Government, other than Japanese, on each of the following dates - 6 Dec 1941; 15 August 1945, present, where applicable.

- C O P Y -

157 IC

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 115015

463.8(22 Apr 50)ESS/IMD, 22 April 1950
Subj: Processing of Applications Requesting Permission for Altering Petroleum Storage Tanks as Submitted in Compliance with SCAPIN 1920 and Amendment Thereto.

c. Nature of Change - indicate as repaired, relocated, (from where, to where), newly constructed, etc.

d. User

e. Use - incidate product to be stored and/or the tank use, e.g., distribution, feed tank, process tank, etc.

f. Type of Construction - indicate as aboveground, underground, type of design (horizontal, conventional, etc.) type of construction (bolted, welded, riveted).

g. Capacity - indicate capacity in barrels (42 U.S. gals), dimensions, number of rings or courses.

h. Present Condition - indicate serviceability.

i. Accessories - indicate availability of valves, ladders, foam boxes, etc.

j. Dates of submission and approval or disapproval."

4. Paragraph 6 of reference 1b is modified to read as follows:

"The Ministry of International Trade and Industry will submit to the Economic and Scientific Section, General Headquarters, Supreme Commander for the Allied Powers, a report of completion on all alterations to petroleum storage facilities accompanied by necessary data and sketches to reflect tanks dismantled, repaired or constructed, showing capacity and location in each case."

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

# APPLICATION FOR PERMIT OF TANKAGE REGULATION

TO : MINISTER OF FOREIGN TRADE AND INDUSTRY

DATE: 22 MARCH 1950

This is to Apply for a Permit according to the Provisional Rule for Tankage Regulation.

1. APPLICANT, NAME AND ADDRESS

Taiyo Petroleum Company Limited (Taiyo Sekiyu Kabushiki Kaisha), No. 1581, Yawatahama, Ehime Pref.

2. CONSTRUCTOR, NAME AND ADDRESS

Taiyo Petroleum Company, No. 1581, Yawatahama, Ehime Pref.

3. OWNER AND USER, NAME AND ADDRESS

Taiyo Petroleum Company, No. 1581, Yawatahama, Ehime Pref.

4. LOCATION OF TANKAGE TO BE BUILT

B-1358, Tane, Kameoka-mura, Ochi-gun, Ehime Pref. (On the premises of the Kameoka-Factory of the Taiyo Petroleum Company.)

5. INTENDED USE OF TANKAGE

Storage of Crude petroleum, Fuel oil, Gas oil, or Lubricating oil.

6. SCHEDULE OF CONSTRUCTION

Work to be started soon after permission; finished in 4 months.

7. NECESSITY OF CONSTRUCTION

The applied tankage is a part of the original plan of constructing the said Kameoka Factory, of 1941. The plan has been delayed owing to the Japanese Government's suspension of crude supply since in October 1941, though the tankage is an essential part of the refinery to start its operation.

8. CATEGORY

Construction of Fresh Tankage.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175015

9. DETAILS OF CONSTRUCTION

a. Number of Tanks to be built and Capacity of each:
4 tanks - 2,000 kilolitres each.

b. Type and Construction:

Vertical; party-underground; reinforced concrete.
(Plan as per attached sheet)

c. Arrangement - as per attached sheet.

d. Schedule by month:

| | Major work |
|---|---|
| 1st month | First two tanks started |
| 2nd month | A third started; first and second continued. |
| 3rd month | A fourth started; the first finished; two others continued |
| 4th month | All tanks finished; pipe-lines and other accessories completed. |

e. Estimated Expenditure:

| | | |
|---|---|---|
| Tanks | ¥10,000,000 | To be borrowed from the Shikoku Bank |
| Accessories | 3,000,000 | |
| Total | ¥13,000,000 | |

10. PREVIOUS APPLICATION FOR PERMIT OF ANY OTHER LAW OR REGULATION, if any

None

PLEDGE:

I vow that the statement contained in this application is true.

DATE: 17 March 1950

SUBJECT: Field Trip to Pacific Coast and Arsenal Refineries,
Travel Order # LO 48-4

TO: Chief, ESS

THRU: Chief, Industry Division

1. Mission of visit: To examine state of rehabilitation and initial operation of Pacific Coast Refineries and utility of Arsenal Refineries equipment.

2. I reported to the following local military officials:

| NAME | GRADE | ORGANIZATION |
|---|---|---|

Upon arrival:

NONE

Upon departure:

NONE

3. Variations from approved itinerary:

NONE

4. Personnel interviewed:

| Name | Position | Organization |
|---|---|---|
| T. Kuwahara | Refinery Supt. | Kudamatsu Refinery |
| T. Sasano | Chief of Refining Section | " " |
| A. Jochi | Director and Manager | Koa Oil Co., Ltd. |
| Y. Wakisaka | Ass't. Manager | Marusen Oil Co. |
| M. Manders | Consulting Engineer | Union Oil Co. |
| S. Yoshino | Managing Director | Toa Nenryo |
| Tsukuda | Chief of Refining Section | " " |

5. BRIEF SUMMARY OF RESULTS AND ACCOMPLISHMENTS OF THIS TRIP:

The period 1 March 1950 to 6 March 1950 was devoted to travel and visits to points at which tetra ethyl lead is stored. The writer participated in the visits but as Mr. C. D. Carter is submitting a complete report on this phase of the trip no comment seems necessary.

On 7 March 1950 Tokuyama Arsenal Refinery was inspected. In general appearance it was in a much better state of preservation than that at

- COPY -

Field Trip to Pacific Coast and Arsenal Refineries, by Mr. Joe Kelsey.

Yokkaichi. Most standing equipment was painted and in good condition. The towers, furnaces and exchanges of most units appeared to be usable as is or with only minor repairs. Particular attention was given to the propane deasphalting and barisol dewaxing plants. These, too, were very complete, nearly intact and appeared to be usable with only very minor repairs.

The Due-Sol and benzol-ketone dewaxing equipment, other than the towers had been moved to the arsenal warehouse and time did not permit its inspection.

The Kudamatsu refinery of the Nippon Oil Co., was also inspected on 7 March 1950. Rehabilitation was complete except for their vacuum distillation unit and lube refining equipment which is scheduled for July, 1950 completion. They reported difficulty in the manufacture of turbine oil 140. They were getting a pour 5°0. above specification, a demulsibility of 50 sec. and too dark a color. It is the writer's opinion that the high pour is due to poor fractionation, e. g., the cut is too wide and includes waxy elements that should be left in the residuum. The demulsibility difficulty seems to be due to the oil only being acid treated and neutralized. This situation should be improved in the near future when their contact plant is completed. Filtration will also correct the high color. Plant operators were orally advised of the above opinions and agreed to try to improve fractionation pending the completion of their filter plant.

Fire protection was not considered adequate. The fire water distribution loop covered the whole plant and hydrants were frequent and well located. They have an old pumper truck well located and also two portable foam carts strategically well placed. They do not have hand extinguishers located on the operating units and pump houses. Fog nozzles are installed on all inflammable tanks. They have an organized fire fighting squad on all three shifts but the writer does not believe they are sufficiently drilled in their duties. Recommendation was made that hand extinguishers be conveniently located on all operating units and that more frequent fire drills be held.

This refinery is also subject to two power holidays on different days each month. They advised that they usually receive twenty-four hours notice prior to having their power cut off.

The Marifu refinery of the Koa Oil Co.. was visited on 8 March 1950. Their rehabilitation program was well along toward completion. It was noted, however, that although plans call for them to crack topped crude their topping unit was now completed and their cracking unit will not be completed until about 1 June. It was also noted that their boiler in service was burning fuel oil, No work appeared to be done in equipping their boilers for coal firing. Their present tankage does not appear to be adequate for continuous operation.

- COPY -

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175613

- COPY -

Field Trip to Pacific Coast and Arsenal Refineries, by Mr. Joe Kelsey.

Koa's fire protection is inadequate. They have a satisfactory water distribution loop with sufficient hydrants completed but no provision for fighting small fires or tank fires. No hand extinguishers nor portable equipment were seen. When this was pointed out to local management they agreed to order an adequate quantity. They also advised that fog nozzles for tank protection had been ordered.

The Maruzen Oil Co. refinery at Shimotsu was visited on 10 March 1950. The progress made in the rehabilitation of this refinery is excellent. The work has been done in an orderly fashion and with modern technique. Due attention has been given to promote safety of personnel and equipment. Instrumentation is good - equal to anything the writer has seen in Japan. This should ensure excellent quality and quantity control during operations.

Their boilers are equipped for burning coal. Fire protection, both fixed and portable is of first class quality, sufficient quantity and correctly located.

From the quality of the work the writer is sure that rehabilitation will be completed on schedule. Laboratory facilities were also first class - adequate to give necessary operational control.

The Wakayama refinery of the Toa Nenryo Oil Co. was visited on 10 March 1950. Progress on rehabilitation of equipment was not up to expectations. At present rates of progress the topping unit will not be ready to operate before 1 June 1950 and the cracking unit before 1 July 1950. No preparation for lube manufacture was in evidence and this was attributed by management to lack of action on the part of the Japanese Government.

Fire protection is receiving consideration. They have a usable pumper truck with 2 dry powder foam generators and a fair supply of powder. Their water loop is complete with an adequate number of hydrants. Portable and hand extinguishers to be located on all operating units recommended and agreed to by management. It was specified that this equipment should be in place before the first crude was received.

The Yokkaichi refinery of the Daikyo Oil Co. was visited on 12 March 1950. The fire protection measures recommended on the writer's visit of 23/24 Feb 50 had been carried out. Their boilers burn coal.

They are still producing 36% of heavy wax distillate from their N. S. F. charge stock. The processing change proposed to reduce this yield was tried and was unsuccessful. A sample of this heavy stock was dewaxed and acid treated in their laboratory and it produced a very good grade of 60/65 V. I. lubricant. As Daikyo equipment cannot dewax this

- COPY -

Field Trip to Pacific Coast and Arsenal Refineries, by Mr. Joe Kelsey.

oil and it is a product which should be recovered an attempt is being made to find unoccupied dewaxing and acid treating facilities in some refinery. If such are found an attempt will be made to have Daikyo sell the distillate to another refinery who will finish and market it. About 225/250 bbls. per day of high grade lube are involved. Toa Nenryo's Shimizu refinery and Nippon's Kudamatsu refinery are investigating this possibility. Maruzen will be asked to investigate as soon as the proper people can be contacted.

The Shimizu refinery of Toa Nenryo was visited on 14 March 1950. They have not and are not running at their rated capacity of 4000 BPD. For their first 29 days of operation they averaged 1380 BPD and from 1 March to 12 March 1950, 2000 BPD. This is attributed to asphalt production from crude being beyond their capacity to handle it.

Their rehabilitation program is progressing and B/A dewaxing plant should be completed by 15 May 1950. They were asked to anticipate this date if possible to process Daikyo heavy wax distillate and are now investigating this possibility.

Fire protection recommendations made on an earlier visit have been carried out.

SUBJECT: Removal of Oil Storage Tanks Belonging to Commercial Oil Company

TO: Chief
Shikoku Civil Affairs Region
APO 1050

1. As directed by letter, GHQ, FEC, AG 095 (30 Aug 49) CPC/FP, 30 August 1949, subject: "Removal of Oil Storage Tanks Belonging to the Standard-Vacuum Oil Company," and letter, Headquarters Eighth Army, AGPFL 463.7, 21 October 1949, subject: "Removal of Oil Storage Tanks Belonging to Commercial Oil Companies."

| Tanks | Type | Capacity | Commercial Oil Co. | Present Location |
|---|---|---|---|---|
| 3 | Vertical | 12,800 Tons | Standard-Vacuum Oil Company | Japanese Army Fuel Arsenal, Omishima, Ehime-ken |

2. It is desired that the Commanding Officer responsible for this area be notified of this fact and that the Japanese agencies responsible for such dismantling and transportation be permitted free access to this property for such purpose.

3. Notification will be forwarded to this headquarters upon completion of the removal of the tanks.

4. Release of subject tanks will be handled in accordance with Section II, Circular 2, Headquarters Eighth Army, 4 January 1949, subject: "Authority to Dispose of Real Property."

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

Shikoku Trade & Industry Bureau

2 Feb. 1950

SUBJECT: Construction of Oil Storage Tanks

TO: Economic Section
Shikoku Civil Affairs Region

I hereby report re the above subject ordered formerly by you as in separate papers.

Is the form of monthly report in separate papers O K? Please tell us if there is any point necessary to be reported regarding the condition of construction. We will report in changed form from Feb.

Note:

1. The words " large one " in a separate paper means that the capacity of 1 tank is more than 50 kilo-liter or that of one installation is more than 1,500 kilo-liter and the works are approved of by GHQ or Trade & Industry Ministry.

2. The words, "Small one " in another paper means that one tank contains less than 50 kilo-liter and that the works are approved of by this bureau.

3. We inclosed a report from Jan to Dec 1949 and a report for the month of Jan 1950 as it is the first time for us to submit such reports.

Chief of Shikoku Trade & Industry Bureau
