SUBJECT: Funds for Reparations Facilities

TO : CO, Chugoku Military Government Region, APO 248
CO, Kinki Military Government Region, APO 25
CO, Kyushu Military Government Region, APO 24-5
CO, Shikoku Military Government Region, APO 1050

Forwarded herewith for your information is a quotation from a letter from GMG on funds for payment of custody and maintenance of reperations facilities.

"1. The Japanese Government, under strict supervision of Supreme Commander for the Allied Powers, has recently revised its standards of payment for maintenance and custody of reperations plants; these standards have been effective since 1 April 1949. Reduction of personnel will be accomplished under the new point system because the number of personnel per set number of points has been reduced. The point system is not based on a minimum number of employees per point integral but on a maximum allowable number of employees per alloted index points. Variations in plants due to minimum or optimum conditions of maintenance are expected. In formulating standards for payment the external deviations from the norm cannot be taken into account. The policy for payment is set up for the greatest number of plants approaching a statistical mean. The deviations from the mean must be adjusted by local military government and Japanese Government prefectural authorities as local conditions warrant.

2. Funds for the payment of reparations facilities are paid on the basis of total index points; however, in approving standards for disbursement of reparations payments the Japanese Government is now required to audit expenses periodically at each reparations plant and also to audit the funds paid to the Prefectural Government for reparations expenses. Any funds in excess of the amount actually used for salaries and other approved expenses must be returned to the Central Reparations Account.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Barry

Subj: Funds for Reparations Facilities

3. The Japanese Government has been directed to submit copies of the new set of standards to local military government team commanders; these standards should be reviewed and adjustments made for plants that are not specifically embodied in them."

SUBJECT: Excess Personnel Employed in Reparations Facilities

TO : See Distribution

1. The Chief of Reparations Section, Commerce and Industry Ministry, Tokyo, issued a letter (No. 818), 26 June 1948, to the governors of various prefectures. This letter established regulations which were to govern the number of employees required for the maintenance of various reparations facilities.

2. The number of personnel prescribed in the regulation is to be construed as a maximum and should be reduced if feasible. With a view to implementing the economic stabilization of Japan, military government teams should direct a reduction in custodial and maintenance personnel in reparations plants, if considered excessive, in accordance with provisions of paragraphs 2b and 3b Operational Directive 21, dated 30 March 1948.

1. Reference:

Annex 7, to Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, subject: "Responsibilities of the Japanese Government for the Packaging, Transfer, and Delivery of Equipment and Records Allocated to Claimant Nations Under the Reparations Program", file AG 387.6 (22 Jul 47)REP (SCAPIN 1751), dated 22 July 1947, as amended.

2. Reports received from claimant nations reveal that reparations items have arrived at their destination damaged in such a manner as to indicate deliberate carelessness in packaging.

3. In order to fix a definite responsibility for packaging of reparations items the appropriate agency of the Japanese Government will be instructed to include the following additional information on the packing lists prepared for items being removed.

a. The destination of the package will be shown in the upper section of the packing list following the entry of Package.

b. In the space under ITEM on the packing list an entry will be made and signed by a competent inspector representing the Japanese Government prior to closing the package. This entry will note discrepancies in condition such as broken, damaged or missing parts (See inclosure 1).

c. In case no discrepancies are noted a condition of satisfactory will be entered (See inclosure 2).

d. The foreman immediately in charge of the packing and crating will sign the packing list above the name of the contractor indicated at the bottom of the Packing List as the Packer.

4. Two sample packing lists are enclosed for your guidance.

SUBJECT: Clarification of Policy on Replacement of Parts of Reparations Equipment

TO : See Distribution

1. References:

a. Letter, Headquarters I Corps to all military government regions and teams, AG 004-BA, subject: "Exempt Equipment in Reparations Installations", 19 November 1948.

b. Memorandum for the Japanese Government from Supreme Commander for the Allied Powers, AG 387.6 (28 Oct 48), SCAPIN 1938, subject: "Exempt Equipment in Reparations Installations".

2. The Samban Steam Power Plant, Nippon Hassoden, an installation listed for reparations in Okayama prefecture, recently submitted a petition requesting authority to replace a steel conveyor located in the plant, with a rubber belt. The question was raised as to whether the status of the new equipment would be that of "EX" equipment as covered by SCAPIN 1938, or whether the new conveyor belt would be considered an integral part of the equipment and subject to reparations. The reply from Headquarters Eighth Army is quoted for your information.

> "2. New parts installed in individual machines in use, to replace unserviceable parts become identified with the major unit itself and from a practical standpoint, cannot be considered exempt. For instance, a new armature installed in an electric motor would not be exempt. In the case of integrated equipment consisting of a series of connected major units, a new major unit is to be considered as exempt. The installation of new bearings or gears in major units of the system would not be considered as coming within exemption requirements. Furthermore, a motor or other major unit which has been replaced by an exempt item as explained above, cannot be disposed of but must be retained in custody under storage maintenance conditions as subject to reparations removal.

fle

Ikemoto 4 Feb 49

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Ltr, Hq I Corps, AG 413-Ba, subj: "Clarification of Policy on Replacement of Parts of Reparations Equipment", dtd 8 Jan 49, , cont'd.

"3. Decisions must necessarily be made by military government teams in individual cases, using their best judgement to arrive at a fair solution. They should not be too lenient in this matter as it should be borne in mind that "the burden of proof" is upon the Japanese to obtain exemptions. Also, as the Japanese are being allowed the use of reparations equipment, it is to be expected that they must have a routine maintenance program and that a certain amount of replacement is necessarily involved through fair wear and tear and obsolescence. Exemptions are primarily intended to be used in cases of expansion, modernization, or improvement to increase efficiency.

"4. The conveyor belt, when installed, is to be considered as coming under the provisions of SCAPIN 1936 and will be marked exempt (EA)."

Commanding Officer, Saga Mil Govt Team, APO 929

1. Reference 1 to basic letter drew a clear distinction between maintenance of reparations machines to protect machines from deterioration and constant recleaning of machines to "pass inspections". It pointed out that the mere fact that small spots of rust or considerable dirt gathered on machinery did not mean that machines were not being properly maintained. This letter had been used by some teams in Kyushu as official maintenance policy. Recently, however, this letter was shown to Mr. Laffin, SCAP Reparations Inspector, who believes machines should also be maintained on "inspection standards" and regreased at least once each three months to prevent rust and dirt spoiling appearance.

2. It is felt that basic letter means that the SCAP view was held by Mr. Laffin has prevailed over the I Corps view as expressed in reference 1 to basic letter. All teams will, therefore, guide themselves accordingly.

AG 412 - BA Oct 25 1948

SUBJECT: Maintenance of Reparation Equipment

TO: Commanding Officer
Kyushu Military Government Region
APO 929

1. Reference is made to letter, Headquarters I Corps, subject: "Maintenance of Reparations Machines", dated 18 November 1947, file AG 004-BA and second indorsement thereto, this headquarters, dated 3 December 1947.

2. Paragraph 2 of the above referenced 2nd indorsement directs attention to an indorsement from Headquarters Eighth Army, and interprets Eighth Army's indorsement to mean that machine tools designated for reparations need only be disassembled, cleaned, and oiled one time. However, the same paragraph also directs team economics officers to use common sense and good judgment as a ruling factor in carrying out the policy expressed by Eighth Army in the 1st indorsement to the above reference.

3. While the above referenced correspondence definitely states that machine tools need only be disassembled, cleaned, and oiled one time, common sense and good judgment dictate that in the event a machine is held in storage for a long period of time and the metal begins to rust under the coating of grease and oil, it is necessary that the machine be re-cleaned and re-oiled. It will be necessary to re-clean and re-oil machines as frequently as rust and dirt gains a foothold underneath the protective coating. In the event the rust cannot be removed without disassembling the machine, then the machine must necessarily be disassembled more than once.

4. The above information is furnished in interpretation and clarification of the reference of paragraph 1, above.

AG 004 - BA

18 November 1947

SUBJECT: Maintenance of Reparations Machines

TO : Commanding General
Eighth Army
APO 343
ATTENTION: Military Government Section

1. References:

a. Operational Directive 5, Hq Eighth Army, dated 19 March 1946, as amended.

b. Memorandum for the Imperial Japanese Government, SCAPIN 1219, GHQ, SCAP, subject: "Responsibilities of Imperial Japanese Government for Preservation and care of Plants Equipment and Records taken into Custody for Reparations Purposes by the Supreme Commander for the Allied Powers," dated 20 September 1946.

c. Memorandum for the Imperial Japanese Government SCAPIN 1751, GHQ, SCAP, subject: "Responsibilities of the Japanese Government for the Packaging, Transfer, and Delivery of Equipment and Records Allocated to Claimant Nations Under the Reparations Program," dated 22 July 1947.

2. Numerous inspections in the field by representatives of this headquarters indicate that the Japanese Government is expending large sums of money, consuming critical materials, and using excess manpower in performance of maintenance work which is unnecessary, does not improve the value of the equipment, and in some instances actually injures the equipment and reduces its degree of accuracy. Examples of this type of maintenance is the removal of rust from sheaves and pulleys, use of abrasives on precision working surfaces, scraping of gears, scraping of lathe pans, bases, and frames, polishing of control handles, etc.

3. Military government team economic officers report that both the Japanese government, custodial personnel, and military government personnel realize that this type of work is wasteful and unnecessary. However, inspectors have in many instances severely criticized both the Japanese and military government personnel for spots of rust, so that at present rust is being removed, by the use of abrasive, from

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

every part of reparations machines and equipment. In the case of sheaves, this work serves only to increase belt slippage at such time as the machine is put in use. In instances where machines have been subjected to airraids, damaged by fire, and later exposed to the weather for several months before being taken into custody for reparations, rust can only be removed by the use of abrasives to such an extent that the accuracy of the machine to produce precision work is impaired. The machines, after disassembly and cleaning, were coated with grease or light oil. Naturally, dust settled on the machines and in some cases small spots of rust formed under the protective coating. The machines were then criticized as being "dirty and rusty."

4. As a result some reparations machines have been disassembled, cleaned, rust removed, and re-oiled as many as 3 times. In the event machines are not shipped within 2 or 3 months, dust will again settle on the machines and rust will from under the protective coating. It will then be necessary to clean the machines again, at great cost, in order to have the machines ready for inspection. No rust preventative greases are available in Japan which will completely stop rust. Some teams have endeavored to use pater hoods to keep dust off machines. This plan has been abandoned because of the paper shortage and because the paper hoods had a tendency to draw moisture.

5. Inview of the above facts it is recommended that protective maintenance be held to a minimum and only such work done as is necessary to protect the machinery from deterioration. In no case should maintenance be done solely from the standpoint of being able to pass an inspection. It is fruther recommended that machines which have been reconditioned once and coated with grease be allowed to stand "as is" until immediately prior to packing, when final processing, as directed by SCAPIN 1751, will be accomplished.

AG 386.3 - BA

SUBJECT: Letting of Contracts for Packing, Crating and Shipping of Reparations

TO : See Distribution

1. References:

a. SCAPIN 1789, 2 October 1947.

b. SCAPIN 1894, 14 May 1948.

c. Paragraph 8(1), Operational Directive 21, 30 March 1948.

2. Until this date the Japanese Government has been permitted to continue packaging of reparations equipment as directed in reference 1a above without requiring contracts for such packaging to be made by the Special Procurement Board of the Japanese Government (Tokubetsu Chotatsu Cho).

3. The Japanese Government has been informed this date that the provisions of reference 1b are now in effect and the Special Procurement Board will be responsible for letting contracts for all reparations removals.

4. Non-compliance with reference 1c above will be reported to Headquarters Eighth Army by the most expeditious means.

SUBJECT: Wind Tunnels

TO: See Distribution

1. Reference is made to sub-paragraph 9e of Operational Directive No. 21, dated 30 March 1948.

2. All wind tunnels in Japan having a Machine number of .75 or more and a throat diameter of 43 inches or more or those with a Machine number greater than 1.0 irrespective of throat diameter are hereby declared to be special purpose equipment, functionally limited to use in connection with combat equipment products and are to be destroyed in accordance with instructions contained in paragraph 9, Operational Directive No. 21, except that destruction need not be completed by 21 April 1948, but will be accomplished without delay and with reasonable facility.

3. The Machine number of a wind tunnel is the ratio of the wind velocity in the tunnel to the velocity of sound in the tunnel under the same conditions of temperature, pressure and air density. A Machine number of one (1) means that the maximum wind speed in the tunnel is approximately 1170 feet per second.

4. Disposition of wind tunnels not meeting criteria established in paragraph 2 above will be subject of instructions which will be issued in the near future.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

INSTRUCTION FOR DESTRUCTION OF THE SPECIAL PURPOSE MACHINE

I. Principle of Destruction

1. Essentially Special Purpose Machine and Equipment.

   a. Machine and Equipment of which form and mechanism are designed for special purpose.

In case machine or equipment is essentially designed only for production of certain parts or constituents of combat equipment products the machine bed, tool head, work head etc should be completely destroyed lest the machine should be reconstituted into other machines of similar purpose.

Example: - - -

(1) Rifling Machine.
Machine bed and Tangent bar equipment should be destroyed.
(2) Gun-barrel Reaming Machine.
Machine bed should be destroyed.
(3) Rifle Broaching Machine.
Machine bed and Carriage should be destroyed.
(4) Gun-barrel Drilling Machine.
Machine bed should be destroyed.
(5) Gun-barrel Lapping machine.
Frame Work should be destroyed.
(6) Chambering Machine.
Machine bed and Turret tool holder should be destroyed.
(7) Automatic Percussion-cap Press.
Frame work should be destroyed.
(8) Percussion-cap Calking Press.
Machine bed should be destroyed.
(9) Percussion-cap Fitting Press.
Machine bed should be destroyed.
(10) Cartridge-case Sizing Machine.
Frame Work should be destroyed.
(11) Specially designed Cartridge-case Annealing Furnace.
Furnace body should be destroyed.
(12) Specially designed Cartridge-case Drilling Machine.
Machine bed should be destroyed.
(13) Percussion-cap Sizing Machine.
Frame work should be destroyed.
(14) Profile Miller for Aircraft Propeller.
Table guide way and Cutter head should be destroyed.
(15) Reforming Machine for Aircraft Propeller-blade.
Twisting devices should be destroyed.
(16) Traverse Miller for spar.
Slide head and Cutter head should be destroyed.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

b. Special purpose machine and equipment with Standard Power Unit.

In case machine or equipment is specially designed for production of certain parts or constituents of combat equipment products, but Standard Power Unit, e.g. Standard Milling Unit, Drilling Unit, Boring Unit, Grinding Unit etc. (e.g. Excello, John Barnes, Natoco, Toyoda Hitachi etc.) is adopted in its construction, the specially designed machine bed, tool head, work head, jig and fixture, etc. should be destroyed.

The Standard Power Unit is a constructional element of machine tool, as electric motor, and is available to other purposes as it is, so the Prefectural Government will explain this regard to the Military Government Team of own district and preserve the Standard Power Unit undestroyed with their approval.

Examples - - -

(1) As for the special purpose Duplex Milling Machine Adopting Standard Power Units, the specially designed Machine bed, Jig and Fixture etc. should be destroyed providing that the Standard Milling Units are left undestroyed.
In case the Machine bed is not specially designed and has ordinary form, destruction of the machine bed itself is not required.

(2) As for the specially designed Boring and Facing Machine for certain type of aircraft engine crank case, specially designed Machine bed and Jig and Fixture etc. should be destroyed excepting the Boring Unit --- i.e. Standard Power Unit.

2. General Purpose Machine Tool utilized without major structural change as special purpose machine by virtue of adapting nothing but specially designed Jig and Fixture, Special Holder.

In case General Purpose Machine regardless of type or form utilized as production machine for certain part or constituent of combat equipment products by means of adapting specially designed Jig and Fixture or special Holder, the machine should be restored to general purpose machine by virtue of dismantling the special Jig and Fixture or special Holder from the machine, the dismantled special Jig and Fixture or Holder should be destroyed simultaneously.

By reason that machine tools belonging to this category are essentially general purpose machine tools, consequently, they should not be understood as special purpose machines, they are completely restored to general purpose machines by means of abovementioned treatment. Hereupon, the Prefectural Government will keep close connection with the Military Government Team of own district in order to have them fully understand in this regard. In case the machines belonging to this category have been

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

inventoried as SP Machines the Prefectural Government will make application to the Military Government Team of own district for exemption of those machines from the SP Machine group after the abovementioned treatment is finished.

Example:---

(1) Multi-drill-head Drilling Machine (e.g. Nateco, Barnes type) utilized as single purpose machine tool for certain part or constituent of aircraft engine by means of adapting special Jig and Fixture or Special Holder.
(2) Studding Machine, Tapping Machine or certain type of Lapping Machine to which special Jig or Fixture is adapted.
(3) Ordinary Press to which nothing but special Jig or Fixture is adapted.

II. Method of Destruction

General:

As to the destruction of machine it is fundamental that the machine to be destroyed should be broken into pieces and put in a state that the machine cannot be restored by any means, so thorough consideration should be paid in order that the destruction is put in practice most efficiently and economically.

Prior to the destruction work component parts of auxiliary equipments having utility value for general use, e.g. Ball Bearings, Pipes, Pumps, Electric Motors, Electirc equipments etc., should be dismantled of the machine to be destroyed.

(1) Machine Bed:

As a general rule the bed should be drilled and severed by hammering, but in case hammering is not available acetylene burner cutting may be preferrable.

(2) Tool head, Work Head, Jig or Fixture:

These are to be destroyed by hammering or cold chiseling at their principal parts.

(3) Steel Plate:

Destruction by hammering is desirable, but method of hammering is not available acetylene burner cutting may be adopted.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

I hereby promulgate the Cabinet Order concerning the destruction of special purpose machinery and equipment, based on the Imperial Ordinance No. 542 of 1945 relating to Orders to be issued consequent upon the Acceptance of the Potsdam Declaration.

Signed: HIROHITO, Seal of the Emperor This Twenty-second day of the eleventh month of the Twenty-second year of Showa (November 22, 1947)

Prime Minister

KATAYAMA TETSU

Cabinet Order No. 244

Art. 1. Special purpose machinery and equipment, as mentioned in the present Cabinet Order, means industrial machinery and equipment which, by virtue of initial design or construction (including major structural change), are, as individual items, in nature and functionally, limited to use in connection with combat equipment products.

Combat equipment products mentioned in the preceding paragraph, are defined as "weapons, ammunition, missiles and explosives used for military purposes; chemical or bacterial warfare agents; ultra-shortwave radio equipment (limited to rader); naval combatant vessels; armored vehicles or aircraft."

Art. 2. The owners of special purpose machinery and equipment or, in the case where such machinery is not possessed by owners, its possessors (hereinafter to be called "the owners, etc") shall report the undermentioned data to the Metropolitan or Prefectural Governors with jurisdiction over the location of the said machinery not later than December 11, 1947:-

(1) The names or appellations of the owners and possessors of such machinery, and their addresses.

(2) The names, kinds, patterns, purposes, quantities of such machinery, and its location.

(3) The plan for the destruction of such machinery.

(4) The inventory code numbers of such machinery in the case where it belongs to plants and establishments as designated under Article 1 of Ordinance No. 1 of the Ministry of Commerce and Industry, and of Education of 1946, or of Ordinance No. 32 of the Ministry of Transportation of 1946 (hereinafter be simply called "designated plants and establishments").

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Art. 3. The owners, etc. must, as ordered by the Metropolitan or Prefectural Governors concerned, destroy or scrap in such a manner that they can not be reconstituted into other machines or equipment, all special purpose industrial machinery and equipment products, as mentioned in the reports submitted in accordance with the provisions of the preceding article.

After when the owners of the special purpose machinery and equipment belonging to the designated plants and establishments, etc., have received the order mentioned in the preceding paragraph, the provisions of Art. 1 of Ordinance No. 1 of the Ministry of Commerce and Industry, and of Education of 1946, or of Ordinance No. 32 of the Ministry of Transportation of 1946 are not applicable with respect to the said machinery and equipment.

Art. 4. The owners, etc., must remove, in spite of the provision of the preceding Article, par. 1, from the special purpose machinery and equipment such component parts and auxiliary equipment as can, by their nature, be used for general purposes other than the special, report without delay the names, kinds, patterns, prices and manufacturers of the said component parts and auxiliary equipment to the Metropolitan or Prefectural Governors and hold pending further instructions issued by them, when they destroy or scrap the said machinery and equipment in accordance with preceding Article, Par. 1.

Art. 5. The competent Ministers or the Metropolitan or Prefectural Governors concerned may issue necessary orders or take necessary steps concerning the destruction, scrapping or other disposals of special purpose machinery and equipment.

Art. 6. When the destruction or scrapping of all special purpose machinery and equipment under the provision of Art. 3, Par. 1, has been completed, the owners shall make a report at its respective factory or workshop (including laboratory), and submit it within a week with items mentioned in Art. 2, items 1, 2 and 4, and the following items to the Metropolitan or Prefectural Governors.

(1) Date and method of destruction or scrapping and details of expenses required for the purpose.

(2) Tonnage of various grades of ferrous scrap recovered.

(3) Weights of non-ferrous scrap recovered (Brass, Bronze, Copper, Lead).

(4) Preceeds from the sale of scrap (Iron, Brass, Bronze, Copper, Lead) and the value of unsold portion.

Art. 7. The competent minister or the Metropolitan or Prefectural Governor is authorized to receive a report on special purpose machinery and equipment from the persons concerned or to send an official in charge or a clerk in charge to the spot to let him examine the conditions of destruction or scrapping of special purpose machinery and equipment, or examine books, documents and other things.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

In case of the official or the clerk being sent to the spot for examination he shall carry with himself a card of identification of the form illustrated on the attached paper.

Art. 8. The authorities of the Metropolitan or Prefectural Governors, stipulated in the Cabinet Order, shall be exercised by Minister of Transportation in case of special purpose machinery and equipment in the factory or workshop under the control of the General Railway Bureau, Transportation Ministry, and by "director of the Marine Bureau" in case of special purpose machinery and equipment in the factory or workshop under the control of the General Marine Bureau, Transportation Ministry respectively.

Art. 9. The competent minister may provide the forms of reports under the provisions of Arts. 2, 4,6 and 7, Par. 1.

Art. 10. Any person, who falls under one of the following items, shall be sentenced to penal servitude for not exceding three years or to a fine not exceeding 30,000 yen.

(1) Any person who does not submit a report in violation of the provisions of Art. 2 or who has submitted a false report.

(2) Any person who violates the provisions of Art. 3, Par. 1 and Art. 4.

(3) Any person who violates the orders or disposals under the provisions of Art. 5.

Art. 11. Any person who falls under one of the following items, shall be sentenced to penal servitude for not exceeding one year or to a fine of not exceeding 10,000 yen.

(1) Any person who does not submit a report in violation of the provisions of Art, 6 or who has submitted a report with false entries.

(2) Any person who does not submit a report in violation of Art. 7, Par. 1, or who has submitted a false report.

(3) Any person who refuses, obstructs or evades the examinations of the official or clerk provided in Art. 7, Par. 1.

Art. 12. In case the representative of a juridical person, or the agent of a juridical person or of a person, or any other employee acts in violation of the above two articles concerning the work of the juridical person or of the person, not only the offender shall be punished, but also the juridical person or the person shall be fined as provided in the above two articles.

Supplementary regulation

This ordinance shall become effective on and after the day of its promulgation.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

AG 004 - BA

19 March 1947

SUBJECT: Deficiencies in Care of Reparations Equipment

TO : See Distribution

1. Reference: letter, Imperial Japanese Government, Central Liaison Office, subject: "Operations to be Performed in the Servicing and Repair of Machinery and Accessories to Implement SCAPIN 1219," a copy of which is attached hereto as Inclosure 1.

2. Representatives from the Office of the Supreme Commander for the Allied Powers have recently visited a number of reparations plants located in the area of jurisdiction of I Corps. As a result of these inspections, numerous deficiencies with respect to the care of reparations equipment have been brought to the attention of this headquarters. The following irregularities are cited for your information:

a. Guards posted at entrances to reparations plants were not always properly instructed. The guards frequently failed to stop visitors and require presentation of authenticated passes, before entry to the plant was permitted. All visitors to reparations plants, including Military Government officers, should have in their possession proper passes, prior to entry to these plants.

b. Considerable divergence was noted with respect to the classification of machinery in reparation plants. In some instances, machines were designated as Class II, although they were in operation; in other instances, machines which were inoperable were classified as Class I. Your attention is directed to the provisions of Section III, Paragraph H, Inclosure 1 to Operational Directive No. 5/4, Headquarters Eighth Army, dated 22 August 1946. All machines which are operable or can be placed in operation by means of minor servicing are to be classified as Class I. It is anticipated that the classification of many machines will be subject to change, as additional labor and material are expended. Classification of machinery located in reparations plants should be subject to constant review by Military Government officers.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

c. Reference letter, paragraph 1, consists of a copy of instructions issued by the Central Liaison Office of the Imperial Japanese Government, and provides for implementation of the provisions of SCAPIN 1219. Although distribution was made through Japanese channels, it has been found that all Japanese prefectures have not received this letter. It is directed that Japanese Liaison Offices in each prefecture be contacted, to insure that information contained in reference letter has been brought to the attention of appropriate Japanese officials, and corrective action taken.

BY COMMAND OF MAJOR GENERAL WOODRUFF:

/s/ Lawrence E. Nobles
/t/ LAWRENCE E. NOBLES
Colonel AGD
Adjutant General

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

IMPERIAL JAPANESE GOVERNMENT

CENTRAL LIAISON OFFICE

SUBJECT: Operations to be Performed in the Servicing and Repair of Machinery and Accessories to Implement SCAPIN-1219.

As regards the above mentioned subject, the standards of operations to be exercised have long been protracted and the concerned organs have often stressed the necessity to improve the conditions of custody and maintenance. Since, based on the advice of General Headquarters and Eighth Army, we have decided to put it into execution by the ways stated in the attached paper No. 1 and No. 2, it is requested that you should notify the matters to every concerned organ civil or official. Furthermore, much attention should be paid to the following matters in regard to this execution. Especially in respective prefecture there may be some diversities between the standards stated below and the requirements of local military government teams but the standards to be performed have been fixed after consulting with the Headquarters Eighth Army.

1. In performing the operations necessary in the service and repair of machinery and equipment, only the machines of which inventory has been drawn up will first be put into execution.

2. The service and repair will be performed for unactive machines in principle from A class and then to B class. As regards the machines which are now operating, much attention will be paid to cleaning or handling of the machines to put them in proper working order on principle stated in the attached papers.

3. The requirement of expenditure necessary for these operations is to be submitted to the Ministry of Finance as usual process.

4. Concerning the materials necessary in the operations, the utilization of the earmarked objects will be taken into consideration.

5. Regarding the attached paper No. 2.

(1) It is desirable that the organization of operating teams be taken into consideration as a reference. The above teams will work at a unit of a designated plant. As per about 100 sets of machines, the members of the first and second unit will be suitable and at most about 100 members will be desirable.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(2) The competent technicians in every special field will be selected as the leaders of the operating units.

(3) Concerning the third unit, it will be unnecessary to form a new group if the necessary members are now well organized.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

0 8

SUBJECT: Operations to be Performed in the Servicing and Repair of Machinery and Accessories of Class 1 and 2 Machines.

1. Level - in order to custody and maintain in the perfect condition put machine in level position before maintenance is begun.

2. Accessories and attachments - detach all removable accessories such as chucks, face plates, steady rests, tool holders, wheel dressers, counter shafts, etc. to expedite the cleaning process and much attention be paid to the internal cleaning.

3. Clean

a. External - all chips, dirt and other foreign matter should be removed and surfaces cleaned with a suitable solvent (kerosene, diesel oil, etc.) applied either by brush or clean rag. All surfaces should then be thoroughly dried. Removal of rust on finished surfaces should not be attempted except in extreme cases. Belts (rubber, leather, fiber) will be cleaned and protected from further exposure to oil and grease.

b. Internal - drain coolant system if present and clean reservoir, pump and connecting pipes. Perform same operations on hydraulic system if present.

c. Accessories - accessories will be cleaned as in (a) above.

4. Lubricate - service machine with suitable lubricants necessary to custody and maintain in the suitable condition.

5. Operation - connect to power supply if power line is perfect or easily taken in, otherwise by hand and perform all movements of operation. Need not connect motors to unactive machines when they are taken away and put in protective maintenance, but attention be paid to connect and operate them as testing.

6. Check.

a. Electric equipment.

(1) Motors - check all motors present on machine including those operating hydraulic, coolant and similar systems for proper operation and make repairs as good as possible in the subject plants if necessary (such as drying). Test them by suitable method such as insulator testing if power supply is unobtainable.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(2) Miscellaneous electric equipment - all wiring, connector boxes, fuse, switch and control units should be checked and put in proper order.

b. Pumps and related items such as pipes, flexible hose, valves, etc., in hydraulic and coelant systems will be cleaned and checked for worn parts, leaks, etc., and necessary repairs made in the limit possible in the subject plants.

c. Traversing mechanisms - i.e. feed screws, will be checked for back lash and adjustment or repair made wherever possible in the subject plants.

d. Gears - check gear case covers and check for worn gears, shafts, bearings and bushings and replace worn parts as good as possible in the subject plants.

e. All other moving parts such as counter shafts, bearings and bushings of all types check for wear and make adjustment and replacement if possible.

f. After completion of above operations a competent mechanic should make a list for each machine, of the accessories or parts not present and make clear special matters of machines such as damaged parts, peculiarities, and an attempt made to secure these missing items from machines designated as Class 3 of the subject plants.

7. All accessories and loose parts belonging to a machine will be collected and stored marking the name of machines to be attached to.

I Corps - 19 Mar 47

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

SUBJECT: Proposed T/O Necessary to Perform Service and Repair as Outlined in Memo for Imperial Japanese Government

To perform the operations necessary in the service and repair of machinery and equipment the personnel should be grouped as a team and divided into three (3) working units.

1. The first unit will be composed of those workers necessary to accomplish operations as specified in paragraph 1, 2 and 3 of Memorandum No. 1 (Leveling, cleaning and removal of attachments). Personnel for this unit should be experienced insofar as maintenance and operation of equipment are concerned. Suggested number required, five (5).

2. The second unit of the team should be composed of personnel capable of inspecting, testing and making the necessary repair as suggested under paragraph 6 of Memorandum No. 1. As stated in Memo for Imperial Japanese Government it is desirable that these services be performed by mechanics associated with the particular plant. Suggested number required, four (4). One electrician, three mechanics.

3. The third unit will consist of a qualified supervisor and the necessary labor to properly process the necessary labor, to properly process the equipment for preservation during storage and shipment.

SUBJECT: Equipment in Arsenals, Laboratories, Aircraft Factories, and Privately-Owned Munitions Plants

TO: See Distribution

1. Reference letter, AG 386.3 - BA, this headquarters, subject: "Equipment in Arsenals, Laboratories, Aircraft Factories and Privately-Owned Munitions Plants," dated 10 February 1948.

2. Paragraph 1 is amended to read:

"Pending revision of Operational Directive 5, as amended, arsenals, laboratories, aircraft factories and privately-owned munitions plants under custody for reparations will be inspected to identify specific items of machinery and equipment authorized for use by proper authority and currently necessary to support permitted operations. Items in use only for custody and maintenance purposes are not considered to be in the above category. Items which are impractical to mark will be listed for record. This list may include such items as furniture, hand tools, accessories and expendible supplies not subject to release as raw materials (cutting tools, grinding wheels, etc.)."

SUBJECT: Reparations Plants in Authorized Operation

TO : See Distribution

1. It is desired that each military government team submit to this headquarters on or before 15 April 1948, a one time report which will furnish the following information:

a. A list of reparations plants within the prefecture which have been either fully or partially authorized for operation.

b. The percentage of total capacity to which each plant on the above list has been converted or reconverted to peacetime operation (i.e. percentage of the total number of machines and equipment in the plant in use at the present time).

c. The total number of employees engaged in operating plants listed under sub-paragraph a. above.

d. The total number of employees who would become unemployed in the event reparations plants listed under sub-paragraph a. above were removed in their entirety from Japan.

2. It is further desired that such supplementary information and comments be furnished this headquarters which will be of value in determining the impact and extent of unemployment in the Corps area in the event that reparations removals of plants now in authorized operation are made.

1. Pending revision of Operational Directive Number 5 for 1946, as amended, no further action will be taken in connection with the inventory of arsenals, laboratories, aircraft factories and privately owned munitions plants except as directed below.

2. No additional inventory sheets or integrated facilities reports will be submitted with the exception that inventory sheets previously returned for correction will be resubmitted to General Headquarters, Supreme Commander for the Allied Powers, without delay.

3. No further shipment of scientific or technical equipment, or notification of such equipment located, will be made to the Technical Intelligence Detachment, General Headquarters, Supreme Commander for the Allied Powers.

4. In accordance with recent changes in policy, machinery located within arsenals, munitions plants and aircraft plants will be allocated by plants instead of individual pieces of equipment. An inventory and evaluation of the equipment in arsenals, aircraft and private munitions plants will be made by committees of the Japanese Government, working under the supervision of personnel of General Headquarters, Supreme Commander for the Allied Powers. This work will begin about 1 March 1948. Inventory code numbers assigned reparations plants and equipment will still be used in connection with this project.

SUBJECT: Guarding of Reparations Installations

TO : See Distribution

1. This headquarters has been informed by Headquarters Eighth Army that the present system of utilizing Japanese police officers for guarding reparations installations will be changed in the near future in connection with the decentralization and reorganization of the Japanese police system.

2. The guarding of reparations installations continues to be a responsibility of the Japanese Government, and reorganization of the police force will not be accepted as an excuse for failure to properly protect reparations equipment.

3. The Japanese government has been directed on a national level to submit detailed plans for continued guarding of reparations installations to each local military government team for approval prior to making any changes in the present manner of safeguarding such installations. On receipt of such plans, local military government team commanders may approve or disapprove proposed changes in the present system.

SUBJECT: Packing of Reparations Equipment

TO : See Distribution

1. References:

a. Memorandum for the Japanese Government from General Headquarters, Supreme Commander for the Allied Powers, file AG 387.6 (22 Jul 47)REP, (SCAPIN 1751), dated 22 July 1947, subject: "Responsibilities of the Japanese Government for the Packaging, Transfer, and Delivery of Equipment and Records Allocated to Claimant Nations under the Reparations Program".

b. Operational Directive 5/11, Headquarters Eighth Army, dated 6 October 1947.

2. Provisions of reference 1a above will be interpreted to allow shipment of selected equipment without packaging either in the form of exterior wooden protection and/or protective grease or paint. Equipment designated at the plant for shipment without packaging will be of a type that will not:

a. Suffer harmful corrosion from exposure to the elements and/or suffer damage from lack of protection by exterior wooden frame.

b. Present a problem in handling and loading in an uncrated condition.

3. In view of the interpretation expressed in paragraph 2 above, certain types of equipment may be shipped without complete packaging provided that specific component parts and/or surfaces requiring the protection afforded by complete packaging are properly packaged.

SUBJECT: Packing of Reparations Items

TO : See Distribution

1. References:

a. SCAPIN 1751, dated 22 July 1947.

b. SCAPIN 1751/6, dated 3 December 1947.

2. Paragraph 4h of reference 1 a provides for storage of equipment awaiting shipment. The claimant nations may designate more than one destination for equipment being shipped from a port. Therefore, when equipment is stored awaiting shipment, it will be segregated by nations and destinations to facilitate future movement.

3. Annex 1 to reference 1b changes certain units of measure used in reference 1 a from English to Japanese units. These changes are of minor importance except in relation to the thickness of top and side sheathing (paragraphs VI2c (3) (e) and VI2c (4) (f).) Annex 1 to reference 1b also shows only Figures 11 and 15 of Annex 6 to SCAPIN 1751, using Japanese units of measure. Changes in the dimensions on other Figures may be made by dividing inches by the factor 1.2, to arrive at "sun" and substituting the equivalent BWG nail sizes for penny sizes.

4. In case of any damage to reparations items resulting from dismantling, packing or moving, which cannot be readily corrected, the fact will be immediately reported by the contractor or other agent of the Japanese Government to local military government personnel. The military government team will investigate, report the details to this headquarters, and make recommendations as to placing responsibility in case of negligence, bad judgement or sabotage. If the accident resulted from factors

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

beyond the power of the contractor to foresee, or if reasonable precautions were taken to avoid accident, the report will so state.

AG 004 - EA

SUBJECT: Clarification of Status of Oil Storage Facilities Presently in Use by the Occupation Forces

TO: See Distribution

1. Reference is paragraph 3 of Operational Directive 5/12, Headquarters Eighth Army, 14 November 1947. The following extract of an indorsement by Supreme Commander for the Allied Powers to correspondence requesting clarification of the status of the subject installations presently in use by the Occupation Forces is quoted for your information and guidance:

> "Oil storage tanks owned by the Japanese Army and Navy which are currently in use by the occupation forces may continue to be so used as long as necessary to the furtherance of the mission of the occupation forces or until directed otherwise by General Headquarters, Supreme Commander for the Allied Powers. However, such facilities should be placed under custody. Currently in use may be interpreted to mean 30 November 1947."

2. Commanding officers of occupation force units now using subject installations will be informed: that the installation have been placed under custody for reparations; that the user is responsible for custody and maintenance; and that, upon termination of use, the installations will be returned to the Japanese Government, but will be continued under custody and control by the local Military Government Team as directed by Operational Directive 5.

3. Installations now in use by the occupation forces according to information thus far received are marked on the attached list by double asterisks (**). The following information will be furnished this headquarters with regard to these facilities (and to any others which are in use by the occupation forces and have not yet been so reported):

a. Name and address of facility.

Asst, Adj Gen

Mr Goldsby
Nagasaki Mil Gov

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Inclosure1 to letter headquarters Eighth Army, subject: "Destruction of Special Purpose Machinery and Equipment," dated 5 Dec 1947

INSTRUCTION FOR DESTRUCTION OF
THE SPECIAL PURPOSE MACHINERY

1. Principle of Destruction

1. Essentially Special Purpose Machine and Equipment.

a. Machine and Equipment of which form and mechanism are designed for special purpose.

In case machine or equipment is essentially designed only for production of certain parts or constituents of comcet equipment products the machine bed, tool head, work head etc. should be completely destroyed lest the machine should be reconstituted into other machines of similar purpose.

Example:---

(1) Rifling machine.
Machine bed and Tangent bar equipment should be destroyed.

(2) Gun-barrel Rooming machine.
Machine bed should be destroyed.

(3) Rifle Broaching machine.
Machine bed and Carriage should be destroyed.

(4) Gun-barrel Drilling machine.
Machine bed should be destroyed.

(5) Gun-barrel Lapping Machine.
Frame work should be destroyed.

(6) Chambering machine.
Machine bed and turret tool holder should be destroyed.

(7) Automatic Percussion-cap Press.
Frame work should be destroyed.

(8) Percussion-cap Caulking Press.
Machine bed should be destroyed.

(9) Percussion-cap Fitting Press.
Machine bed should be destroyed.

(10) Cartridge-case Sizing Machine.
Frame work should be destroyed.

(11) Specially designed Cartridge-case Annealing Furnace.
Furnace body should be destroyed.

(12) Specially designed Cartridge-case Drilling Machine.
Machine bed should be destroyed.

(13) Percussion-cap Sizing Machine.
Frame work should be destroyed.

(14) Profile Miller for Aircraft Propeller.
Table guide key and cutter head should be destroyed.

(15) Reforming Machine for Aircraft Propeller-blade.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Twisting devices should be destroyed.

(16) Traverse Miller for spar.
Slide head and Cutter head should be destroyed.

b. Special purpose machineand equipment with Standard Power Unit.

In case machine or equipment is specially designed for production of certain parts or constituents of combat equipment products, but Standard Power Unit, e.g. Standard Milling Unit, Drilling Unit, Boring Unit, Grinding Unit etc (e.g. Excello, John Barnes, Natoco, Toyoda Hitachi etc.) is adopted in its construction, the specially desrgned machine bed, tool head, work head, Jug and fixeure etc. Should be destroyed.

The Standard Power Unit is a constructional element of machine tool, as electric motor, and is available to other purposes as it is, so the Prefectural Government will explain this regard to the military Government Team of own district and preserve the Standard Power Unit undestroyed with their approval.

Examples---

(1) As for the special purpose Duplex Milling Machine Adopoing Standard Power Units, the specially designed machine bed, jig and fixture etc. should be destroyed provides that the standard Milling Units are left undestroyed.
In case and Machine bed is not specially designed and has ordinary form, destruction of the Machine bed itself is not required.

(2) As for the specially designed Machine Facing Machine for contain type of aircraft engine crank case. specially designed Machine bed and jig and fixture etc. should be destroyed excepting the boring shit --- i.e. Standard Power Unit.
