AG 386.3 (MG-Em)

SUBJECT: Reparation Selections of Steam-Electric Power Generating Plants

TO : Supreme Commander for the Allied Powers APO 500
Attn: Reparations Branch, ESS/IN

1. In compliance with paragraph 5 of letter, General Headquarters, Supreme Commander for the Allied Powers, AG 387.6 (13 August 1946) ESS/IN, 13 August 1946, subject, "Reparation Selections of Steam-Electric Power Generating Plants", there is submitted herewith in duplicate a report of the Imperial Japanese Government covering the shut-down arrangements for Steam-Electric Plants.

2. The following recommendations are submitted:

a. That the plants listed below be deleted from reparations selections at the present time in order to insure at all seasons the distribution of sufficient electric power to satisfy existing demands in each supply area until completion of the other phases of the interim program.

Ainoura	Sanban
Tabata	Shikamako
Minato	Meiko
Anoda	Kizugawa
Saka	Ajigawa

b. That the remaining plants be permitted to continue operation pending definite decision as to interim reparations, allocations and removals in this category.

3. Attention is invited to the following adverse conditions which exist:

Incl. 1

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 115013

a. Thermal plants not selected for reparations have deteriorated to such an extent as to require more than a year for repairs before return to their rated capacity.

b. Due to lack of suitable coal for which the plants were designed the rated capacity cannot be reached until such time as higher grade coal is produced or secured.

c. The exceedingly dry year has reduced hydro plant capacity, making the use of thermal plants necessary as an emergency measure.

d. The requirements of the occupation forces have been retarded materially due to the already acute shortage of electric power, both hydro and thermal.

4. It is further recommended that prior to the shutdown or removal of electric plants, a detailed and comprehensive study be made by competent electrical engineers of the overall requirements for electric energy. This study should include the final industrial, household, commercial and occupation requirements as modified by the reduced industrial demand consequent upon completion of all other phases of the interim reparations program.

5. Attention is invited to the inclosed petitions and separate recommendations submitted by lower units pertaining to the plants recommended for deletion in paragraph 2a above.

SUBJECT: Surveys of Reparations Plants Producing for Occupation Forces

TO : Commanding Officer, Shikoku Military Government Region, APO 317

1. Reference is made to paragraph 2 (1) (2) of Operational Directive No. 5/7 this headquarters, dated 4 November 1946, which requires submission of information regarding "types and quantities of raw materials remaining on hand on completion of all such production."

2. Information referred to above has not been included on Expeditor's Report Form MGP 30's submitted to this headquarters to date. While the form itself contains no such heading, the directive is specific in requiring the addition of this information.

3. It is desired that supplementary reports containing the required information be furnished on all plants for which MGP 30's have already been submitted and that the provisions of the reference mentioned above be adhered to in the future.

SUBJECT: Removal of Plant from Reparation Selection

TO : Commanding Officer, Shikoku Military Government Region, APO 317

To assist commanders in making decisions on petitions by the Japanese for the release of installations from reparations removal the following extract of an indorsement from the Supreme Commander for the Allied Powers is quoted. The plant in question was recommended for removal since it had only 24 servicable machines.

"Paucity of machinery is not considered sufficient reason for reparation deletion".

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

HEADQUARTERS
TOKUSHIMA MILITARY GOVERNMENT TEAM

APO 317
30 September 1946

SUBJECT: Removal from Reparation List (SCAPIN 1131)

THROUGH: Channels

TO : Commanding General, AFPAC, APO 500

1. Full investigation by the Commerce and Industry Section this Headquarters, has shown the facts as stated in the inclosed petition and allied papers to be true.

2. The retary condensers of the Tokushima Coal Power Plant of the Nippon Hasso Den Co., Ltd. operate in a full-time capacity, as do the transformers. In addition, it is frequently (an average of 25% of the time over a five-year period) necessary to bring in the plant's generators to supplement the output of the hydro-electric power station. Such emergencies arise during each dry season regularly and when breaks occur in the 100-Km. long transmission lines, especially frequent during the typhoon season.

3. There are no other coal power plants in the prefecture. Therefore, no system can be devised to rearrange the dispatching of the power load in the area served by this plant (SCAP 1131, par. 6), short of constructing another similar plant in this area. With the present shortages of material and labor, this is all but impossible in our opinion. It is not necessary to elaborate on the resultant chaos in the economy of the Tokushima Prefecture, which would be occasioned by the partial or complete disruption of the electric power system in this, the only big industrial, area.

4. The petition enclosed has been signed by an additional 25,000 persons who would be immediately affected by a shut-down of this plant. This list has not been enclosed because it is too voluminous.

5. Recommendations. Inview of the substantiated facts in 2 and 3 above and in the petition and allied papers, it is the considered opinion of this Hq. and is strongly recommended that this plant be removed from the Reparations Selections List (Incl. SCAP 1131). Request approval or disapproval.

FOR THE COMMANDING OFFICER:

JAMES D. O'DONNELL
Captain, Cav
Adjutant

1. Nippon Hassoden K.K. is considered by this Headquarters to be essential to the economy of Shikoku.

2. In addition, at a conference of all governors & staffs of Shikoku, Nippon Hassoden and Toa Chemical Industry K.K., Kagawa Ken, were recommended by all present as being essential. A petition to that effect was sent through Japanese Channels. No other reparations factories on Shikoku were recommended by all present at the conference.

3. Approval of removal from Reparations List is recommended.

SUBJECT: Request for Numbers of Reparations Plants.

TO : Commanding Officer, Shikoku Military Government Region, APO 317.

1. The Kure Arsenal located in Hiroshima Prefecture has machinery dispersed in areas coming under the jurisdiction of your headquarters as shown on inclosed list.

2. The equipment will be inventoried by your headquarters and the plant numbers of the installations will be as follows:

a. For locations in Ehime Prefecture - 05-6.

b. For locations in Kochi Prefecture - 20-1.

c. For locations in Kagawa Prefecture - 17-7.

d. For locations in Tokushima Prefecture - 40-4.

e. When there is more than one dispersal location of the subject installation in any prefecture a parenthetical letter or number will be added.

BY COMMAND OF LIEUTENANT GENERAL EICHELBERGER:

AG 386.3 (MG) 2nd Ind

Kagawa Military Government Team, APO 317, 6 November 1946.

TO : Commanding General, Headquarters Eighth Army.
Attention: Military Government Section.

THROUGH: Commanding Officer, Shikoku Military Government Region
Hq & Hq Detachment, APO 317.

1. In compliance with Operational Directive Number 5/4, Headquarters Eighth Army, dtd 22 August 1946, forwarded herewith is an inventory of machinery of the Kure Naval Arsenal that is dispersed in areas coming under the jurisdiction of this Headquarters.

2. The inventory is arranged under three plant cover sheets, since there are three dispersal locations of the subject installation in this prefecture. However there were four locations given on the inclosed list of basic communication.

3. Investigation by this Headquarters revealed the following:
   a. There is nothing to correspond to four machines loaned to Ken Tosei Kogyo Kumiai as shown in letter, Kagawa Prefectural Government.
   b. Besides machinery listed on the inclosed list of basic communication, there are eight more machines of the Kure Naval Arsenal that are dispersed in this prefecture.
   c. Yamato Iron works on the inclosed list of basic communication was changed to Yamamura Iron Work.

4. Inventory of Machinery referred to in par 3b will be carried out by this Headquarters.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

30 August 1946.

NOTES ON REPARATIONS LISTS

1. SCAPIN 1129 -- Soda Ash and Caustic Soda Plants.

Permit operation of all plants designated. If production or planned production of part of the equipment is not essential to the Japanese economy, forward recommendations to SCAP for shutting down equipment in question.

Plants not taken have ample capacity for Japanese needs. Existing shortages are due to lack of raw materials.

Listed plants may process existing stock of raw materials, but should not get new raw material except in very exceptional cases.

SCAP estimates complete shut-down within three months.

Removal of factory facilities not a part of the soda ash and caustic soda industry should be permitted in order that the Japanese may shift away from the seized plants. Upon shut-down, be sure all corrosive gases and materials are removed from the equipment. Inventory instructions later.

2. SCAPIN 1130 -- Iron and Steel Plants.

Permit continued operation for manufacture of iron and steel products essential for Occupation Forces and civilian economy. Shut down or permitted to continue completion of unfilled orders as directed by Eighth Army.

All major units and auxiliary equipment to be taken except those composed of masonry or not cased in metal frame work to prevent loosening of masonry during transportation.

No buildings to be used for reparations or destroyed except in special cases, such as buildings whose frame forms an overhead crane way and has an easily movable steel skeleton.

Buildings not likely to be dismantled may be released to the Japanese.

Japanese should arrange production so as to reduce inventories of raw materials and sundry finished products with the idea that a complete shut-down will have a minimum disruptive effect.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

Japanese should select custodial personnel previously employed who are familiar with the equipment and methods of maintenance.

Inventories instructions later.

3. SCAPIN 1131 - Steam Electric Power Generating Plants.

All facilities, indoor and outdoor including coalhandling, switchgear, transformers.

Continued operation authorized, however, plants must be held in readiness for shut-down within sixty days of ~~12~~ 24 August. Operation confined to stand-by for emergencies. Emergency operation should not be necessary if the Japanese effectively rearrange the power load distribution. Japanese required to submit written reports on each plant within thirty days, outlining difficulties in rearranging the load distribution.

Japanese directed to expedite delivery of machinery needed to complete those plants under construction.

Japanese must be prepared to furnish a report of undelivered purchase orders.

It is especially important that Japanese preserve all records pertaining to construction and operation of these plants. See paragraph 11 of information sheet, SCAPIN 1131.

Plants that continue operation should not transfer experienced personnel. Experienced personnel should be used to maintain equipment, even where the plants will not be operated. Japanese should be instructed to preserve all blue prints, spare parts, instruments and tools located in the plants.

Instructions for additional reports and inventories will be issued later.

4. SCAPIN 1132 - Sulphuric Acid Plants.

Continued operation permitted. If production or planned production of part of the sulphuric acid sets is not essential, Eighth Army should forward recommendations for shutting down. (Two sets to go in one plant, one set to go in one plant). Sets not yet designated.

There should be no temporary disruption of the production of fertilizers, drugs and artificial sweetners, but a gradual shift must occur in the use of sulphuric acid facilities from designated plants to equipment retained by the Japanese.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

Some retained equipment requires repair. Such repairs should be encouraged except repairs so extensive as to constitute virtual rebuilding. SCAP contemplates detailed instructions later covering shift and the degree of rebuilding to be permitted. SCAP estimates average of three months to take plants out of operation, but this will vary considerably depending upon stocks of raw materials, local demands for the product and similar factors.

Removal of factory facilities not a part of the contact sulphuric acid sets should be encouraged, since this removal may be required as part of the shift.

Upon shut-down Japanese should take special precautions to avoid damage resulting from corrosive action. All units should be purged of corrosive gases.

Inventory instructions will come later.

5. SCAPIN 1133 - Machine Tool Plants.

Continued operation authorized to produce consumers' goods and to complete machine tools for which major parts are in stock. Manufacture of new machine tools will not be permitted. Items in these factories considered suitable for reparations are: machine tools, production machinery, heat treating equipment, furnaces, cranes, conveyors, precision testing and research equipment and power equipment. Expendable parts, such as special dies, jigs and fixtures, bolts, nuts and small parts, should remain with the factory.

No definite classification can be made but the use of good judgment is necessary in preserving for reparations removal items suitable for this purpose. The Japanese should be allowed to use that portion of the remainder which will contribute to needed civilian production.

It is not contemplated that buildings will be used for reparations or destroyed except in special cases, such as, where part of the building frame forms a track for overhead cranes. Buildings not necessary for safeguarding reparations materials may be released to the Japanese.

Custodial personnel should be those previously employed who are familiar with the equipment.

Inventory instructions later.

Products of machines can be released as consumer's goods

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 173013

6. SCAPIN 1136 - Precision Bearing Plants.

Continued operation permitted. Companies owning listed plants have been advised that thirty days following the publication of the list, they are subject to removal without advance notice. Facilities suitable for reparations are all major units and auxiliary equipment, except those composed principally of masonry. Buildings not to be used for reparations or destroyed except in special cases, such as tracks for overhead cranes that are part of the building frame. Buildings not necessary for safeguarding reparations material may be released to the Japanese.

Japanese will be left with a capacity to manufacture 32-5/10 million Yen worth of bearings based on 1943, 1944 prices. Plants listed are considered excess to 32-1/2 million Yen capacity, but may be permitted to continue operations, knowing they are subject to shut-down and removal without advance notice.

Custodial personnel should be from those previously employed who are familiar with each factory.

Inventory instructions later.

7. SCAPIN 1134 - Privately owned Munition Plants.

Continued operation is authorized if the plants are producing items necessary to civilian economy. All machinery equipment and accessories which by virtue of initial design construction or major structural change are as individual items special purpose in nature, and functionally limited to use in connection with the manufacture of equipment or supplies for war or warlike purposes, will be held pending disposition.

SCAP desires recommendations for additions and deletions to this list.

SCAP letter - 13 March 1946.

"For your guidance the following criteria are established in designating such plants:

a. Arms and armament are interpreted to be bombs, rockets, torpedoes, mines, depth charges, guns of all sizes, grenades, bullets and shells, and armored vehicles.

b. Plants containing under 50 machine tools will not be included in this list.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

c. No inflexible rule regarding factory construction date is established, but generally plants in this category built after 1937 are not considered essential to the civilian economy.

d. Production figures should indicate that arms were a principal product; those plants which produced arms before 1941 should be considered ahead of those which converted from other production to arms after that year."

It is indicated that these factories should be treated similar to aircraft factories, etc., now under custody and control. Closing down of factories not required by this directive, but production should be arranged so that shut-down, when necessary, will have the minimum disruptive effect on the overall civilian economy.

Custodial personnel should be individuals previously employed who are familiar with the factories.

Inventory instructions later. Will probably be the same as the inventory now in progress.

Review on new criteria.

Privately-Owned Munitions Plants are defined as follows:-

"Privately-Owned Plants and establishments primarily engaged in manufacture of weapons, missiles, ammunition, and military explosives."

Recommendations made to General Headquarters for the removal or addition of Privately-Owned Munitions Plants will be based on the following criteria:-

a. All facilities within this category that were originally organized for munitions production, or were converted to munitions production through such major change in the volume and character of their equipment as to render them unsuitable for reconversion to peace-time purposes, will be available for claim.

8. SCAPIN 1125. Shipbuilding Plants.

Continued operation is authorized for construction and repair of vessels essential to the Occupation Forces and civilian economy. Facilities suitable for reparations are all major units and auxiliary equipment, except those composed of masonry and which are not sufficiently enclosed in metal frame work as to prevent loosening of the masonry during

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 175013

transportation to another site (this problem will arise in the transportation of brass and iron foundries within the shipyard).

Buildings will not be destroyed or used for reparations except in such cases where the building frame forms an overhead crane way. Buildings not necessary for safeguarding reparations equipment may be released to the Japanese.

Primary reason for permitting continued operation is to meet the needs of the Occupation Forces and civilian economy. Insofar as possible all production and repair work in these shipyards should be arranged so as to reduce inventories of steel plates, raw materials and other shipbuilding materials to practicable working minimum, so that shut-downs, when necessary, will have the minimum disruptive effect on the overall civilian economy.

Inventory instructions later.

9. New criteria for Aircraft Factories.

Aircraft factories are defined as follows:-

"Plants and establishments primarily engaged in the manufacture or assembly of finished aircraft, airframes, aircraft engines and aircraft propellers or in supplying fabricated materials, semi-finished or finished parts, components or accessories (exclusive of arms and armaments, instruments and communications equipment) especially designed for incorporation in finished aircraft."

Recommendations made to General Headquarters for the removal or addition of Aircraft Factories will be based on the following criteria:-

a. All facilities in plants and establishments originally designed, constructed and equipped, or converted through major change in the nature of installed machinery and equipment to serve in this category should be made available for claim.

b. Plants and establishments within this category, other than those covered in paragraph a. above, the use of whose products by the aircraft industry, represents merely a diversion during the war without major change in character of product from peace time civil consumption, or in the nature of installed machinery and equipment, should not be made available for claim pending Allied decision as to the final disposition of the industry with which they are normally associated.

5403

24 August 1946

AG 004.04

SUBJECT: Inventory of Evacuated Machinery.

TO : Commanding General, Eighth Army.
ATTN: Military Government Section.

1. Reference is made to 1st indorsement file AG 386.3 (MG) by your Headquarters to letter this Headquarters, dtd 17 July 1946, subject: "Evacuated Machinery in Ehime Ken."

2. 1st indorsement referred to in paragraph 1 stated that machinery evacuated to Ehime Ken will be inventoried under the supervision of this headquarters.

3. Besides this machinery, there is machinery possessed by Osaka Military Arsenal and Kawatana Arsenal, and evacuated to other prefectures in Shikoku.

4. Japanese Takamatsu Finance Bureau was notified by Osaka Finance Bureau after a conference with Lt. Col. Nelson, ESS, I Corps, that the inventory of machinery evacuated to various areas will be carried out by Military Government units in areas where parent plants are situated.

5. It is requested that this Headquarters be informed as to the action to be taken with regard to machinery referred to in paragraphs 2 and 3.

FOR THE COMMANDING OFFICER:

Ivan L. Bogert
IVAN L. BOGERT
1st Lt., SnC
Adjutant.
