Summary of Comment on Film:

This picture shows the advanced situation of health institues in the United States. In this country, too, it is desirable that such public health institutes as union hospitals should be arranged completely. This picture contribute very much to the promotion of the knowledge of health of the public and the establishment of the cultural nation. This film gives many suggestions to the school health as well the public sanitation.

Summary of Comment on Film:

This picture is the best kind of educational film on account of its having relativity to our daily life. It seems that this picture gave deep impressions to spectators, though any special comments on it were not made.

This kind of picture is desirabe for the education of adults. In addition to educational pictures, world news or cartoons should also be given, it is hoped by spectators.

This is such an enlightening film, which clearly shows how American women are taking an actual part in political, social and cultural fields and how they are trying their best in opening a way toward female employment, that the still feudalistic-minded Japanese women will be greatly struck at seeing the film and be brought to awakening of emancipated womanhood. It is desired that more films of this kind should be released to Japanese women in future.

Summary of Comment on Film:

In view of the importance of traffic regulation in a country like Japan, this film "Lincoln Tunnel" is far-sighted enough to give an invaluable hint to the governmental authorities concerned regarding how to effectively mitigate the congestion of traffic. It is highly desired that Japan, being so small, should have such long-range plans materialized as soon as possible. It is feared, however, that unlike in America so rich in natural resources, the fatal shortage of materials in this poor country of our own will greatly hamper such projects, actual implementation of which, accordingly, will be a matter of far-off future.

This is, indeed, a film very instructive to governmental policy-makers.

No country is possible, except America to carry out such big scale enterprise as Freedom train carrying the history of America to the remote country for general citizens' perusal by making a round trip.

Even in Japan we are in earnest desire that such enterprise whould be carried out to improve the mind of study of the people and to contribute something to the reconstruction of truly democratic Japan by showing such valuable data concerning our own history and other informations to the general citizens in the secluded village as well as the gaiety city, throughout Japan. But it is only a dream for the present Japan to put such enterprise into action. At any rate it may be said that good points should be requested to learn. In this meaning the planning of moving library or books will provably be instructed by this picture, I think.

All attendants were simply impressed with these scenes of which they had not ever recognized in their daily life.

It seems more effective if we have had another film showing the real condition of the relief for Japan by U.S.A. in food matters as well as this film. And it will be a proper measure to accept the gratitudes and reverences of all Japanese for American aid. However, it is especially fine, I think, that this film includes the most interesting scene of the fund raising for relief. At any rate, this film is effective 100%.
