SUGGESTIONS
IN
Punctuation and Capitalization.

Uniform with this book. Price 25 cents.

The want of a simple volume of this character has long been recognized. The present work has had flattering appreciation. Written concisely, without resort to obscure language, it may be comprehended by anyone who has ordinary knowledge of composition. Especially should the subjects treated of be studied by whoever writes for publication, since printers, to whom the responsibility is usually left, are frequently unable to decide intelligently, and have no access to the author for information. Then the employment of shorthand and type-writing clerks is becoming general, and in this direction the opportunity to qualify themselves has not been afforded. Type writing makes all errors more marked, and every effort should be put forth to have a clear understanding of the matter no less than to have correct orthography.

Sent post-paid on receipt of price.

ABBREVIATED LONGHAND.

INTRODUCTORY REMARKS.

IN the august presence of a myriad of much more elaborate treatises which speak lengthily of the history of Stenography, and proclaim rather loudly respecting its indispensability, and each of which, by the way, dwells to no mean extent upon the particular advantages of its own views, we shall confine ourselves humbly to merely making one or two remarks, and then proceeding to develop our system, always being particularly careful to use as few and as plain words as possible. We shall, indeed, as Shakespeare says, "imitate the honorable Romans in brevity," on every point, well knowing, on the authority of the same great bard, that by so doing we shall approach as near as is in our meager power to the soul of wit.

Of the origin of Stenography we can only repeat tradition, and say that a series of arbitrary characters was compiled by the great Xenophon himself, which constituted the first attempt at abbreviated writing among the Greeks; while among the Romans, a worthy encyclopædia informs us, Ennius invented a system of Brachygraphy consisting of one thousand one hundred different signs, to begin with, all of which were perfectly original. This little list was to be supplemented by further hieroglyphics as occasion required, and as the poet's brain grew collective.

448303

It would be superfluous to adduce any facts or arguments with the view of proving that at the present time Shorthand is totally indispensable as regards the Press; and but little assurance is requisite to give the conviction that it has now come to be almost equally indispensable in commerce. As ample verification of this, it will be sufficient to give reference to the advertisement columns of a daily newspaper. This will show that it is now nearly an absolute necessity that clerks in particular should become acquainted with one system or another; and when the fact is considered that this acquaintance, consequent upon the demand, is rapidly growing universal, the prediction that in a short time success, and perhaps even subsistence itself, will, without it, border very closely upon an impossibility, will not appear too extremely unreasonable. Even now it is often the case that employers will engage only those who know Shorthand, not because its practice will be required, but because they consider, and not without good and just sense, that one who has attained an art demanding so much intellectual vivacity is not likely to be of a slow disposition in any other direction, and also because they know no great difficulty is experienced in procuring those with such a knowledge.

There are many systems of Shorthand in existence, and much do they vary as to their approach to perfection. Some are good, some are bad; many are the most misnamed things on the earth when called systems of *shorthand*, while one or two are for brevity all that can be desired, and such as will not, in every probability, be excelled. Much, however, as these previous methods differ, they are all in unity on one point, and that is the extreme difficulty of mastery. With many persons it is known to be quite labor in vain to attempt the study, and it may be fearlessly asserted that out of twenty who really determine (at starting) to succeed, not more than one, on

the average, reaches so far as moderate perfection. The length of time obligatory, the extremely close application demanded, the great sense of monotony, and the discouragement experienced by having had hours of study and weeks of practice with no apparent progress, are rather natural excuses for despair and ultimate discontinuance.

What, then, is wanted is a system *easy to learn*, and it is with no small spirit of pride that we introduce our method as competent to meet this important requirement. In reviewing a former edition of this book, a popular phonographic periodical expresses the opinion that the system is so simple as to be learnable in *ten minutes*. We do not profess this, but confidently assert that with two hours' study and a fortnight's practice it can be so completely attained as to enable the student to, by its use, take condensed reports of speeches, sermons, lectures, etc. The supposition must not be entertained that this system pretends to vie with the more complicated methods in regard to swiftness in application, and we plainly acknowledge that it would not be sufficiently brief for *verbatim* reporting. Our principal principle is not rapidity in action, but the extremely small amount of study and practice sufficient for thorough mastery, and it is in this particular that superse-
dence over all former systems is claimed.

The greatest help to that extreme simplicity of which this system boasts, is contained in the fact that, instead of the usual perplexing lines and heartrending curves, and dots which dazzle the eye with their unfathomable brilliancy, and demi-semi-circular monstrosities which generally give one the idea of nothing more nor less than bosh, the ordinary manuscript letters of the alphabet are used.

Although this system is mostly intended for adoption in mercantile matters, even the professional shorthand writer, notwithstanding the fact that he may already know a more

intricate method, will derive much benefit from the devotion of a little time to the study of our rules ; for, besides the unquestionable acquisition of being able to use it for transcriptions in the place of the ordinary longhand (seeing that any compositor, with but a glance at the instructions, could *read* the abbreviated writing), he could successfully adopt it where only condensed reports are required, and thus save the labor of translation altogether.

INSTRUCTIONS.

1. IN the outset it may be well to summarize the characteristics of this system by simply explaining that in all cases we write only the letters which are prominently sounded ; use such prefixes, affixes, and understood representations as will be found in the tabulated alphabetical arrangement on a subsequent page ; and introduce just a few arbitrary significations to make short work of certain much used words and phrases.

2. METHOD OF SPELLING.—The following few examples will sufficiently illustrate the manner in which simple words are to be spelt : Head, *hd* ; express, *xprs* ; water, *wtr* ; accord, *akrd* ; reference, *rfrns* ; oblige, *obl* ; good, *gd*.

3. VOWELS.—As a rule, vowels will be entirely omitted ; but there are cases where, for the purpose of expeditious transcribing, it is most necessary to insert them. These occur generally when the word commences with a vowel, but the system to be observed is only to write them when prominently sounded.

4. DIPHTHONGS will also be written only when distinctly pronounced.

5. FIGURES are to be represented in the ordinary manner.

6. The following Alphabetical Table must be carefully studied, and the significations, prefixes, and terminations committed to memory :

ABBREVIATED LONGHAND.

Letters.	Words.	Prefixes.	Terminations.
a	after		
b	but		-ably
c	certain	circum-	-brance
d	delay	dis-, discon-	{ -ford, -hood, -tude, -stand, -ward
E	Each		
f	from	for-	
g	give		-ing
H	have	hypo-	-with
I	Indeed		
J	Just		
K	know, acknowl- edge	{ con-, com-, accom-	-kind
l	all		-able
m	much	magni-	-dom
N	Nothing, Enclose	{ under-, inter-, intro-	-tion, -sion
O	only, oblige		
P	please	pre-, pro-	-ship
Q	Question		
R	are, reply	recom-	-ember
S	Sure	super-	{ -gress, -less, -ness
T	that	trans-	{ -ment, -stract, -struct
U	you, understand		
V	value		-tive
W	which		
X	express	extra-	
Y	your		-ary, -ity
Z	thank you		

7. PREFIXES.—The letters representing the various prefixes should be separated from the body of the word by a dash; but where unusual swiftness is required this slight incumbrance can be dispensed with. It is advisable, however, to attend to this rule wherever practicable, and, as it constitutes the correct way, our exercises are written accordingly.

8. TERMINATIONS.—The letters when signifying affixes should be written slightly above the foregoing portion of the word; in the same manner, in fact, as is adopted when abbreviating ordinary writing.

9. SPECIAL LIST OF TERMINATIONS.—The following terminations can be represented by their respective significations written in CAPITAL LETTERS:—

-ingly Y		-fulness S
-lessly L		-fully F
-tionable T		-tivity V
-ability B		-ishness I

In these cases the affix will be placed upon the line.

10. NAMES should generally be written in full, but where old acquaintance exists abbreviations may be used. This rule and exception refers also to the names of countries, towns, etc.

11. PUNCTUATION.—It is not absolutely necessary that any points whatever be inserted, as they can be fully expressed by leaving a small extra space between the words where they should in longhand appear. When there is time, however, it is best to introduce the stops, and also to commence a fresh paragraph where required.

12. CAPITALS.—Capital letters can be used in the same order as in ordinary manuscript; but it is better to be sparing with them, as, as a rule, they are more difficult to form than small letters. Where single letters represent words,

they can be written in either capitals or smalls, according as is easiest in each case.

13. MISCELLANEOUS ABBREVIATIONS.—There are many words and phrases which, on account of their frequent occurrence, demand special application. The list here given may be added to by the student as found requisite, but great care must be exercised so that, in an over anxiety to make things short, they are not made uncommonly long.

with which we	w/w	Three months	3/m
yesterday	y/d	Three days	3/D
To-day	T/d	Three weeks	3/w
To-morrow	T/m	Three years	3/y
without	w/-	Four months, &c.	4/m &c.
To-night	T/N	with reference to	R/T
Half an hour	H/H	I beg to say	B/S
Quarter of an hour	Q/H		

14. "OF THE."—The word "of," being greatly used, can be understood by the sign of a line drawn thus \, and the word "the" by a stroke in the opposite direction, thus /. By this arrangement the very frequent double "of the" can be joined so as to form a cross, thus X.

15. The word "and" will be best represented by its usual sign "&."

16. Where a preposition and an affix form the whole of a word, only one must be represented by its letter signification, the remainder being spelt as sounded.

EXERCISES.

A fox, very hungry, chanced to come into a vineyard,
a fx, vri ungrī, chnsd t km nto a vnyrd,
 where hung branches of charming ripe grapes, but nailed

VERBATIM REPORTING.

Lengthy instructions as to what words are to be written, and what not, would be superfluous. Nothing further is needed than the general rule that all words not affecting the sense of the sentences should be omitted; and a short example will be found of more service than all the precept in the world.

In the following, the words printed in *italics* can be safely omitted, and, if necessary, many others. It is, however, always advisable to be as full as possible.

Now, Giant Despair had a wife, *and her name was Diffidence*. So, when *he was gone to bed*, *he told his wife what he had done*; to wit, *that he had taken a couple of prisoners, and cast them into his dungeon, for trespassing on his grounds*. Then *he asked her also what he had best to do further to them*. So she asked *him what they were, whence they came, and whither they were bound; and he told her*. Then she counselled him *that, when he arose in the morning, he should beat them without any mercy*.
