He lays bare with unsparring skill the manifold stupidities and tyrannies of the governing classes in the German fatherland that is so dear to him, and revels in the delights of the freedom to be enjoyed in France. The ideal that he strives for is a united Germany, freed from the bonds and shackles of medieval kingships, princeships, and lordships, living in close bonds of amity with France; and he vindicates violent revolution to secure the rights of the people.

It is easy to understand, considering conditions in Germany even to-day, seventy years later, what a furor these letters created. Periodicals were filled with controversial writings, and pamphlets and works were issued in quick succession controverting or defending the ideas of Börne; the most important being those of Meyer and Wurms of Hamburg, and Willibald Alexis, the novelist of Berlin.

One of the bitterest of Börne's critics, however, was the historian Menzel, who appealed to the baser sentiments of his readers by denouncing Börne as unpatriotic, as being more of a Frenchman than a German, and as loving France better than Germany. To him Börne addressed the last work that he produced, the virulent controversial treatise "Menzel, der Franzosen-Fresser, Paris, 1836."

The long and severe illness of which he was the victim at last overcame him, and he died, as stated, on Feb. 12, 1837. He was buried at Père Lachaise, Wenedey and Raspail pronouncing the last words over his grave. The spot is marked by a statue executed by the sculptor David, which, besides the head of Börne, bears a relief representing France and Germany extending their hands to each other under the blessing of Freedom. The best portrait of him is that by Moritz Oppenheim. The house in which he was born bore, until it was demolished, a memorial tablet. In 1842 there appeared in Paris "Fragments Politiques et Littéraires" from Börne's writings, with a prefatory note by M. de Cormenin. As late as 1862 there was published at Hamburg a new complete edition of his works in twelve volumes.

**BORNSTEIN, ARTHUR:** German author; born at Breslau March 23, 1867; studied at Breslau, Berlin, and Bern; and passed the state examination in Berlin in 1888. He adopted the profession of dental surgery, but devoted himself as well to literature. A volume of his short stories was published

under the title "Klippen," at Berlin in 1894. In the following year appeared his drama, "Der Theaterarzt." He has since published a number of short stories, humorous sketches, learned articles, and poems. His "Vergnügte Geschichten" was published in 1900 (Hinrichs, "Bücher-Verzeichnis"). He is a member of the Deutsche Schriftsteller-Genossenschaft.

BIBLIOGRAPHY: *Das Geistige Berlin*, s.

M. Co.

**BORNSTEIN, PAUL:** German author; born in Berlin April 8, 1868; educated in and graduated from the university in that city, receiving the degree of doctor of philosophy. He has since lived in the German capital. His first published work was the "Memoiren des Cagliostro," Berlin, 1892, which was one of the volumes of the "Memoiren-Bibliothek" (in 15 vols.). This was reprinted separately in 1894 under the title "Abenteuer des Geistes." In 1896 his novel, "Aus Dämmerung und Nacht," was published. In the same year he founded the "Monatsschrift für Neuere Litteratur und Kunst," which he edited and to which he contributed, besides a number of literary reviews and poems, the following essays: "Vom Weibe," "Boulevard-Hellenismus," "Ein Satirisches Capriccio," "Die Ehe im Modernen Roman," "Maurice Maeterlinck," "Yvette Guilbert." The first number of the "Monatsschrift" appeared in Oct., 1896; and with the issue for Sept., 1898, the publication was discontinued.

In 1899 appeared his critical work, "Die Dichter des Todes in der Modernen Litteratur," and his "Gesammelte Essays"; and in the following year his monograph on Maeterlinck was republished. He has also translated a number of works from the French; among others, from Jeanne Marini: "Pariser Droschken," "So Sind Nun die Kinder," "Grossstadtplänzchen," and "Die Memoiren des Herzogs von Lauzun."

The most important work with which Bornstein is identified is the encyclopedic review of achievements in every sphere of activity and thought in Germany during the nineteenth century, the publication of which, under the title "Am Ende des Jahrhunderts," was begun in 1898; Bornstein, as editor, being aided by a large staff of young and enthusiastic scholars notable in their respective fields of learning and research. To date (1902) there have appeared twenty-three volumes, the third of which, entitled "Juden und Judentum im Neunzehnten Jahrhundert," is a substantial contribution to Jewish literature and history, by S. Bernfeld.

**BORODAVKA, or BRODAVKA, ISAAC:** Lithuanian farmer of taxes and distillery privileges; lived in the sixteenth century at Brest-Litovsk. He is first mentioned in a grant issued by King Sigismund August, Jan. 1, 1560, to David Shmerlevich of Brest-Litovsk, and his partners, Isaac Borodavka and Abraham Dlugach, entitling them, for the term of seven years, to collect the duties on goods and merchandise passing through Minsk, Wilna, Novgorod, Brest, and Grodno. For this they

were required to pay into the royal treasury 6,808 copes annually. During Easter of the following year Borodavka, among others, was granted the salt monopoly for seven years, and several weeks later, on Saint Margaret's day (June 27), the king signed an edict permitting Borodavka and Jacob Dlugach to build breweries in Byelsk, Narva, and Kleschtscheli. They were to be sole brewers for these towns until Jan. 1, 1566, when the breweries built by them were to be delivered to the king. They were also to pay into the royal treasury 60 copes each year.

Borodavka and his partners were unpopular among their Polish competitors, who were covetous of the same "privileges"; and this enmity, fed and encouraged by race prejudice, was not slow in manifesting itself in acts injurious to the Jews. On Sept. 10, 1565, David Schmerlevich and Isaac Borodavka succeeded in wresting the lease holdings in Volhynia from the Christian farmers Borzobogaty by offering to the crown 600 copes a year in excess of the amount paid by the latter. One of the Borzobogatys and a certain Zagorovski appear as the principal witnesses in a claim preferred by Prince Yanush Andrashovich, bishop of Lutzk and Brest, against Schmerlevich and Borodavka for unlawfully collecting taxes from his subjects, the commoners of Torchin, Volhynia.

Decrees were repeatedly issued by the crown urging the subjects of the king to assist in every way the royal farmers of taxes and their "servants" in the collection of duties on goods and of royalties on distilleries. These decrees, or "universals," were invariably the reply of the crown to the complaints of Isaac Borodavka and other Jewish leaseholders that "goods were carried up and down the rivers Bug, Mnkhavetz, Bobyer, and Narew," past the established custom-houses, and no duty paid. This mutual animosity led even to acts of violence. Abraham Dlugach was mercilessly beaten and robbed by the "servants" of the widow of Ivan Bogovitonovich Kozirutski. David Schlomich, "servant" of Schmerlevich and Borodavka, was cruelly beaten and robbed by the "servants" of Peter Chekhoski, another farmer of taxes.

Very soon there were accusations of shedding innocent Christian blood. In Narva, Byelsk, and Rosokhi, "servants" of the tax-collectors were accused of murder. The most rigid investigation proved these accusations to be groundless; not, however, before one of the accused had paid for them with his life.

In the records for July 13, 1564, it is stated that the royal chamberlain, Andrei Rozhnovski, an eye-witness of the hanging of Bernat Abramovich at Byelsk, deposes that he had heard the doomed man solemnly declare (on the gallows), before the face of his God, that he had not killed any little girl at Narva, nor received any orders for assassination from his master, Isaac Borodavka; and that Yezoph, his comrade and companion in misfortune, then under arrest in the castle, was not guilty of the crime, but had made a confession of guilt to the authorities in the prison because he could not endure the torture of being burned with candles. He furthermore asserted that their accusers desired thus to revenge themselves upon Borodavka. Thereupon King

Sigismund August, by special decree (1564), ordered that in the future all such accusations against the Jews should be laid before him for his personal examination, the accused in the mean time to be exempt from torture.

Two years later Nakhim, another "servant" of Isaac Borodavka, and the subcollector of taxes in Rosokhi, or Rososhi, was accused of the murder of a Christian child. A second decree of the king (1566), entered on the records, required that all Jews accused of murdering Christians or of defiling the Eucharist should be brought to him for trial, and the accused were to suffer the penalty of the crime, in the event of their failure to prove the accused guilty, according to the accepted practise of legal procedure. Ten years later (1576) King Stephen Báthori confirmed the Jews, his subjects ("who tarry in our dominions, the great dukedom of Lithuania"), in the rights and privileges granted them by Sigismund August.

**BOROFSKY, SAMUEL HYMAN:** Born at Wolkovyshki, government of Suvalki, Russian Poland, April, 1865. He was educated in the schools of his native place, and afterward in the Jews' Free School at Manchester, England, to which place he had been taken in 1874. In 1876 he was apprenticed to a cabinet-maker, and in 1879 removed to Boston, Mass., where his mother and the rest of his family had preceded him.

Borofsky has been a justice of the peace since Sept. 15, 1891, a notary public since April 10, 1894, and was a member of the Boston city council in 1898, and captain of the sixth company infantry, Massachusetts provisional militia, in 1898 and 1899. In 1900 he was elected a member of the Massachusetts house of representatives. He drafted and assisted in the enactment of what is known as the "Five-Cent Ice Bill," which compels ice-dealers, under penalty of \$100 fine, to sell ice in five-cent pieces to all desiring such, thus conferring a great boon upon the poor in summer.

In 1901 Borofsky presented a bill to exempt persons observing the seventh day of the week as the Sabbath from any penalty for keeping shops open or for performing secular business and labor on the first day of the week. The bill was defeated in the house of representatives on April 12, but three days later it was reconsidered and passed. On being referred to the committee on judiciary of the senate it encountered great opposition, and on May 29 the Senate rejected it by a vote of 21 to 6 (see "Boston Herald," April 15, 1901; "Boston Globe," April 26, 1901; "Jewish Comment," May 10, 1901).

Borofsky in 1899 organized and successfully established The Helping Hand Temporary Home for Destitute Jewish Children. He is a contributor on social and Jewish questions to several Boston newspapers.

A.

**BOROWSKI, ISIDOR:** Soldier under Bolivar y Ponte, and, later, a Persian general; born at Warsaw, Poland, 1803; killed at the siege of Herat in

1837. This military adventurer in Persia and Afghanistan was a Polish Jew who was reared in the United States, and who sometimes claimed to be the illegitimate son of Prince Radziwill by a Jewish mother, and at other times professed to be simply a Polish nobleman. He served under Bolivar, then under Mehemet Ali in Egypt, where in 1829 he supported himself by giving lessons in mathematics and in English. In 1831 he was in Bushire, Persia; and was afterward recommended by Sir John Campbell, the British minister, to Prince Abbas Mirza, the son of Shah Fath Ali, as a useful and talented man. Borowski developed great military abilities in the service of that warlike prince, and took for him the strong town of Cochan in Khorassan. Later he took the castle of Sarakhs and made prisoner the leader of the Turkomans. After the death of Abbas in 1833, Borowski gave most essential assistance to Abbas' son, Mohamed Mirza, and enabled him to ascend the throne of his grandfather. The English were behind most of the military undertakings of the Persians in those days, and Borowski was looked upon as an English general, and even wore the uniform. But he forsook the interests of the British government and joined the Russian party in Persia, and was shot at the siege of Herat. His wife, a Georgian captive of war, received a pension from Mohamed Shah on account of her husband's distinguished services.

**BORROW.** See **COMMERCE AND TRADE.**

**BORROWER** (שׁוֹאֵל): One who receives, at his own request, the property of another, for free use, upon the agreement that it shall be returned to the owner (Kid. 47b). He is distinguished from the borrower of money, the "loweh" (לוֹוֶה), in that the latter need not return the property which he has received, but may return it in kind.

The Biblical law concerning the liability of the borrower (Ex. xxii. 13, 14; R. V., 14, 15) holds such person to the strictest accountability

**Biblical Law.** for the property borrowed. Inasmuch as it is given him at his request for use without pay, the law requires of him not merely the ordinary care that must be given to property in the hands of a bailee, but it holds him absolutely responsible for its return to the owner; and if it is lost by him or stolen from him, or if it consist in cattle which die while in his possession, he is not permitted to offer any defense to the claim of the owner, but must make absolute restitution.

The Biblical law cites one exception to this general rule; namely, if the owner accompanies the property into the possession of the borrower, the latter is not obliged to make restitution. Thus the Mishnah says, "If one borrows a cow and borrows or hires the owner with her, or if he borrows or hires the owner, and then borrows the cow and the latter dies, he is not liable; but if he borrows the cow, afterward either borrowing or hiring the owner, and the cow dies, he is liable" (Mishnah B. M. viii.). In the former case the decision is based on the fact

that the owner is with her at the time that she goes into the borrower's possession; in the latter case the owner is not with her at such time.

The Talmudic law established several other exceptions, based upon a proper interpretation of the

**Talmudic Ex-ceptions.**

Biblical text. Inasmuch as the property was borrowed to be used, the borrower ought not to be held responsible for any depreciation in value, or for any damages which result to the property, from the legitimate use for which it was borrowed. Rab therefore decided that the borrower of the cow was not responsible for what in modern law would be called "reasonable wear and tear," or, as the Talmudic phrase more tersely expresses it, מֵתָהּ מֵחֵמֶת מֵלֵאכָה, "if she died from work." "Not only if she is wasted in flesh through labor, is he not liable, but if she dies from the labor, he is not liable, for the borrower may say, 'I did not borrow her to seat her on a chair'" (B. M. 96b); and in a case where a man borrowed an ax which was broken while in use, Rab decided that if the borrower could prove that he did not put it to any extraordinary use, he was not liable (B. M. *ib.*).

Other exceptions whereby the borrower is released from making restitution are the following: If he borrows the article for a specific time, he is not liable for a casualty after the time has expired (B. M. 81a), although ordinarily he is responsible for the article until it has actually been returned to the owner (Mishnah B. M. viii. 3). If he borrows an article and at the same time the other borrows an article from him, his responsibility is changed to that of a bailee for hire (B. M. 81b). Finally, he may make a special agreement with the owner of the article, releasing himself from liability (Mishnah B. M. vii. 10). Unless a specific time has been fixed between the borrower and the owner, the borrower must return the article as soon as he has ceased to use it (Maimonides, "Yad," She'elah, i. 5; Hoshen Mishpat, 341, 1); and he has no right to loan the borrowed article to another (*ib.* 342, 1).

The rights and liabilities of the borrower begin, first, when the object is actually taken into his pos-

session by "drawing" it toward him,

**Beginning** according to R. Eleazar: "As they decreed 'drawing' for purchaser, so also

**Extent of** they decreed 'drawing' for bailees";

**Liability.** and, second, when he has begun to use

it. R. Huna said, "If one borrows an ax and splits wood with it, he has acquired it, and, if he does not split, he does not acquire it" (B. M. 99a). The liability of the borrower is limited only to the value of the injured property (B. M. 94b); hence when a man borrowed an ax and through carelessness broke it, R. Kahana and R. Assi decided that he must return the pieces to the owner after they have been valued, paying an additional sum sufficient to cover the full value of the ax as he received it (B. M. 97a).

As the borrower is one of the four classes of bailees mentioned in Ex. xx. 7-15, the subject will be further elucidated by reference to articles **BAILMENT**, **HIRING**, and **LETTING**. For borrower of money see **LOAN** and **INTEREST**. For borrower giving pledge see **PLEDGE** and **MORTGAGE**.

I. BER.

**BOSHETH** ("shame," "disgrace"): Used concretely by the Prophets as "the shameful thing" to designate the BAALIM and their images. (See Hosea ix. 10 and Jer. iii. 24, xi. 13, where the word is parallel with "the Baal" [compare Jer. iii. 24]). Later usage adopted the epithet to such an extent that "Bosheth" became a sort of euphemism for "Baal," as is learned from the proper names "Ish-bosheth" (with which Jastrow [see Bibliography] compares a Babylonian name, "Mati-bashti") and "Mephibosheth," the former being written "Esh-baal" in I Chron. viii. 33, ix. 39, and the latter occurring as "Meri-baal" in I Chron. viii. 34 and ix. 40. The manuscript of the Septuagint, known as 93 Holmes, has *εισβααλ*, and the old Latin version has "Isbaalem" for "Ish-bosheth." So also in II Sam. xi. 21, "Jerubbe[*o*]sheth" is given for "Jerubbaal."

The opinion now so prevalent that the name of the god Molech was changed from "Melek" in imitation of the vowels of "Bosheth" is not altogether acceptable. It is possible to regard "Molech" as the regularly formed Hebrew equivalent of "Mālik," the name of an Assyro-Babylonian god (Rawlinson, "Cuneiform Inscriptions of Western Asia," iii. 7, 18), which is also a common epithet ("Decider") of several divinities. From this point of view the word is really a survival of the oldest form of "Malk" ("Melek"), king. Another explanation of "Bosheth," proposed by Jastrow, makes the name the distortion of a deity who bore the name "Basht" or "Bashta."

J. F. McC.

**BOSKO, AGRON MACHIMOVITSCH.** See LITHUANIA.

**BOSKOVITZ, WOLF:** The first rabbi of the congregation of Budapest; died 1818. In 1787 the Jewish community at Pest was sufficiently large to rent a hall where divine services could be held, though all religious questions were at this time still submitted to Moses Münz in Buda. As Pest and Buda were not, however, at that time connected by a bridge, and as it became rather irksome, more particularly during the winter, to cross the river to Buda whenever the rabbi there had to be consulted, the announcement that Boskovitz, who was well known as a Talmudist, was to settle in Pest in 1793 as rabbi was eagerly welcomed by the Jewish community of that city. But as Moses Münz vig-

orously objected to the arrangement, Boskovitz was compelled to leave Budapest in 1796. He also left Hungary, but returned in 1809 to Bonyhád, acting as rabbi there until his death. Boskovitz, who enjoyed great popularity as a rabbi, was the author of the following works, all of which were published posthumously: "Seder Mishnah" (on Maimonides, *Yad ha-Hazakah*); "Ma'amar Esther" (sermons); and "Notes on the Talmud" (published in the Vienna edition of the Talmud, 1830). Compare also "Ozar ha-Sifrut," part 2, iii. 22.

S.

L. V.

**BOSKOWITZ:** Town in Moravia, about 21 miles to the north of Brünn. It has one of the oldest and most important communities in the province, though in numbers it had dwindled to 1,967 Jewish inhabitants in 1880. Even in early times there was at Boskovitz a systematically organized model school, many pupils of which became famous.

The most eminent person of Boskovitz was Samuel Levi Kolin, who wrote a commentary to the ritual codex "Magen Abraham," and is generally known by the name of his work, "Mahzitz ha-Shekel." The cabalist R. Nathan Adler must also be mentioned: he was elected rabbi of Boskovitz in 1783. He was followed, later, by his pupil, Moses Sofer of Frankfort, who subsequently became rabbi at Presburg. Adler introduced the Sephardic ritual, abolished the piyyutim, and as a "Cohen" himself pronounced the "priestly benediction" ("birkat kohanim") daily during the service. He was arraigned before the government by a farmer of the excise on account of his undue severity in insisting upon the minutest details of ritual observance in slaughtering animals for food, and had to leave Boskovitz, where his ideals were not acceptable. The scholars trained along the lines of the "Mahzitz ha-Shekel" were too practical to follow his religious extravagances, and they embarrassed him by their acumen. J. B. Bloch of Hamburg, the author of the "Binat Yissakar," was also rabbi in Boskovitz; he likewise came in conflict with them. During a halakic discourse he was once pressed so hard by the turbulent arguments of the laymen that he angrily resigned his office in the midst of his discourse.

Bloch was succeeded by Moses Präger-Karpeles, the great-grandfather of A. Schmiedl and of Gustav KARPELES. He resigned the rabbinate in Kremser on account of a dispute with Raphael Kohn regarding the pronunciation of the priestly blessing on the Day of Atonement. L. R. Beneth criticizes in a responsum the novella of Moses Karpeles, "Torat Mosheh Emet" (The Law of Moses Is Truth). Karpeles was succeeded by Abraham Placzek, who was appointed provisional district rabbi by the government. Placzek enjoyed universal esteem on account of his kindness and peaceful disposition. He died Dec. 10, 1884. The present incumbent is Dr. S. Funk.

Boskovitz possesses several richly endowed foundations instituted by the family Löw-Ber.

D.

A. F.-G.

**BOSKOWITZ, HAYYIM BEN JACOB:** Palestinian author; lived about the middle of the eighteenth century. He wrote the "Toze'ot Hay-

yim" (Life's Issues), a commentary on the Pentateuch (Amsterdam, 1764, printed with the text), which deals chiefly with the moral precepts that may be drawn from the Bible stories.

## I. BER.

**BOSLANSKI** (or **BASLANSKI**), **YOM-TOB LIPMAN HA-KOHEN** (R. Lipele Mirer): Rnsian rabbi; born 1824; died in Mir, government of Grodno, Dec. 26, 1892. In his younger days he was rabbi in Khaslavich and other communities; but for the last eighteen years of his life he stood at the head of the Jewish community in Mir, and was recognized as one of the greatest rabbinical authorities in Russia. He visited St. Petersburg several times as representative of the Jews. He was one of the first "Ijobe Zion," and sided with the rabbis who permitted the colonists in Palestine to work in "shemittah" (fallow year) and who prohibited the use of citrons ("etrogin") from Corfu in Russia for the Sukkot festival. In 1889 Boslanski attempted to organize a society for the purchase of land and the foundation of a new colony in Palestine, and visited Paris to enlist the assistance of Baron Edmund Rothschild in the project.

Boslanski is the author of a collection of responsa entitled "Malbushe Yom-Tob," Wilna, 1881, with an appendix on the laws of contracts and of arbitration.

## P. WE.

**BOSNIA:** Province of the Balkan peninsula, on the frontier of Austria and of Montenegro. Formerly under Turkish rule, it came under the protection of Austria by the Treaty of Berlin, 1878.

According to some historians, the first Jews settled in Bosnia in 1575; Don Joseph Nasi and his aunt, Dona Gracia, using their influence with the sultan Suleiman the Magnificent to that effect. The inscriptions on some tombstones at Sarajevo, however, bear the Jewish date of 5311, or 1551 C.E.; hence Jews were living in Bosnia thirty-five years before the date mentioned above.

From a manuscript in the Mohammedan library at Sarajevo, written in Turkish, it is evident that thirty or forty Jews engaged in business at Bosna-Seraï (the present Sarajevo) under the governor, Hadim-Ali-Bey, in the year 958 of the Hegira (1541 C.E.). These merchants entered the country without their families and lived in a sort of caravansary, the majority being natives of Salonica. During the great religious festivals they returned home. When their number increased, the governor, Ghazi-I-Iassan-Pasha, ordered them to settle definitely in that region or to leave the country. Fearing the fanaticism of the populace, they sought refuge at Ragusa and in Hungary, which latter was then a Turkish province. Thence they sent representatives to Bosnia, with letters to the governor, in order to collect their outstanding credits. In 1614, when the ex-grand vizier of Constantinople, Baltaji-Mehmed-Pasha, was appointed governor, he brought in his suite Naphtali Mandjor (Maggioro?), a rich Jewish banker of Constantinople. The latter successfully interceded for the return of the Jews. Thirty families returned

immediately, but these lived scattered in various streets in Sarajevo.

After much trouble the Jews in 1645 obtained permission from the governor, Slavous Pasha (ex-grand vizier), to reside in a special quarter, about 2,000 square meters in extent; and thereupon they erected houses. In the center of this quarter, which was named after the governor, a well was dug. Each Jew received a deed of ownership. A small annual tax of a few aspers (one asper =  $\frac{1}{12}$  of a cent) was imposed upon them, to be paid to a neighboring mosque—a custom that still prevails. At the same time Suleiman the Magnificent granted them by firman the permission to establish a cemetery on a hill named Verbania, the Jews being also required to pay for this privilege a tax for the benefit of another mosque of the city. In this way the Jews definitely established themselves in Bosnia; and in time they settled in other localities besides Sarajevo.

In 1901, in a total population of 1,357,000, there were in the province about 7,500 Jews. Of these, 4,000 lived at Sarajevo, 250 at Bosna-Brod, a similar number at Mostar (Herzegovina), and the remainder in small communities. The Jews of Bosnia, to which those of Herzegovina must be added, have an official representative at Sarajevo. They have also an official organ, "La Alborada," written in Judæo-Spanish and in rabbinic characters, published at Sarajevo since 1901 under the direction of a committee of editors. See **MOSTAR**, **SARAJEVO**, **TURKEY**.

## M. FR.

**BOSOR: 1.** A city of Gilead, which Judas Maccabeus conquered (1 Macc. v. 26, 36). It may be identified with the modern "Busr el-Bariri" (Buhl, "Geographie des Alten Palästina," p. 253). **2.** The Septuagint reading for BESOR (1 Sam. xxx. 9).

J. JR.

## G. B. L.

**BOSORA.** See **BOZRAL**.

**BOSPORUS, CIMMERIAN:** Name of the ancients for the strait of Yenikale or of Theodosia; on the eastern coast of the Black Sea. The country on both sides of the Cimmerian Bosphorus formed in ancient times the kingdom of Bosporus, the latter name being the reading of the Vulgate for Sepharad (ספראד). Jerome adopted it from his Jewish teacher, who considered it to be the place to which Hadrian had transported the captives from Jerusalem. But Jewish communities existed in Bosporus long before the destruction of the Temple. King Agrippa I., in a letter addressed to Caius Caligula, speaks of the Jews established in the Greek colonies of Pontus (Philo, "Legatio ad Cajum"). Among many Greek inscriptions unearthed in 1830 on the banks of the Bosphorus, two are of especial interest for the history of the Jewish settlement in that Greek colony. One of these, found at Pantikapæum (the modern Kertch) and dated 377 of the Bosporian (81 of the common) era, is a declaration of the liberation by a Jewess named Creste of her slave Heraclius. The deed is said to have been drawn up in the synagogue of Pantikapæum. The second, unearthed in Gorgippia and dating from 338 of the Bosporian (41 of the common) era, is indeed a pagan

inscription; but the Biblical name of God used at the head of it shows the influence exercised by the Jews upon their fellow-citizens.

A quite recent discovery of Jewish Greek inscriptions was announced Jan. 12, 1901, to the Imperial Russian Geographical Society. A young explorer, A. L. Pogodin, discovered and deciphered new inscriptions in Kertch and other places in South Russia, from which it is clearly evident that Jews settled in the Bosporus as early as the fourth century B.C., and were an important section of the Greek colony. They had their cemeteries, synagogues, and other communal institutions. In trade as well as in social life they mingled freely with the Greeks, as is evidenced by the fact that the language of the inscriptions is Greek. Other inscriptions show that, in the first century B.C., the Jews founded in the Bosporus a colony of their own. In the inscriptions of the third century of the common era Jewish religious symbols and sepulchral inscriptions are found. In the same century the Jews even took part in religious persecutions ("Budushchnost," 1901, No. 3, p. 46).

There are no records describing the condition of the Jewish communities before the occupation of Kertch by Russia under Peter the Great in 1771: It may be supposed that they escaped many misfortunes that befell their coreligionists in other European countries where Christianity had established its dominion. At the beginning of the eighth century the Jewish communities in the Bosporus were greatly increased by the arrival of many Jews from the Byzantine empire, who sought refuge from the persecutions of Emperor Leo. Toward the middle of the same century the Jews became practically the rulers of the country by the conversion to Judaism of Bulan, the king of the Chazars. Concerning the history of the Jews of Bosporus from the time of its occupation by the Russians, see CHAZARS, CRIMEA, INSCRIPTIONS, and KERTCH.

I. BR.—H. R.

**BOSTANAI** or **BUSTANAI** (בוסטנאי): First exilarch under Arabian rule; flourished about the middle of the seventh century. The name is Aramaized from the Persian "bustan" or "bostau" (as proper name see Justi, "Iranisches Namenbuch," p. 74). Almost the only exilarch of whom anything more than the name is known, he is frequently made the subject of legends. He was the son of the exilarch Hananiah (compare EXILARCH). Hai Gaon, in "Sba'are Zedek," p. 3a, seems to identify Bostanai with Haimai, and tells that he was given for wife a daughter of the Persian king Chosroes II. (died 628), by the calif Omar (died 644). (See Rapoport, in "Bikkure ha-'Ittim," x. 83; B. Goldberg, in "Ha-Maggid," xiii. 363). Abraham ibn Daud, however, in his "Sefer ha-Kabbalah" (Neubauer's "Medieval Jewish Chronicles," i. 64), says that it was the last Sassanid king, Yezdegerd (born 624; died 651-652; see Nöldeke, "Tabari," pp. 397 *et seq.*), who gave his

daughter to Bostanai. But in that case it could have been only Calif Ali (656-661), and not Omar, who thus honored the exilarch (see "Ma'aseh Bet David"). It is known also that Ali gave a friendly reception to the contemporary Gaon Isaac (Sherira II.'s "Letter," ed. Neubauer, *ib.* p. 35; Abraham ibn Daud, *ib.* p. 62); and it is highly probable, therefore, that he honored the exilarch in certain ways as the official representative of the Jews. The office of the exilarch, with its duties and privileges, as it existed for some centuries under the Arabian rule, may be considered to begin with Bostanai.

The relation of Bostanai to the Persian princess (called "Dara" in "Ma'aseh Bet David," or "Azdadwar" (Nöldeke, "Isdudad"), according to a recently discovered genizah fragment, had an unpleasant sequel.

**The Dispute Among His Heirs.** The exilarch lived with her without having married her, and according to the rabbinical law she should previously

have received her "letter of freedom," for, being a prisoner of war, she had become an Arabian slave, and as such had been presented to Bostanai. After the death of Bostanai his sons insisted that the princess, as well as her son, was still a slave, and, as such, was their property. The judges were divided in opinion, but finally decided that the legitimate sons of the exilarch should grant letters of manumission to the princess and her son in order to testify to their emancipation. This decision was based on the ground that Bostanai had probably lived in legitimate marriage with this woman, and, although there were no proofs, had presumably first emancipated and then married her. Nevertheless, the descendants of the princess were not recognized as legitimate 300 years afterward (Hai Gaon, *l.c.*). The statement in the genizah specimen (see bibliography below) is doubtless dictated by enmity to the exilarch; Abraham ibn Daud's statement (*l.c.*) is contrariwise prejudiced in favor of the exilarch; but compare genizah fragment published by Schechter in "Jew. Quart. Rev." xiv. 242-246.

The name "Bostanai" gave rise to the following legend: The last Persian king (Hormuzd), inimical to the Jews, decided to extinguish the royal house of David, no one being left of that

**Legends.** house but a young woman whose husband had been killed shortly after his marriage, and who was about to give birth to a child. Then the king dreamed that he was in a beautiful garden ("bostan"), where he uprooted the trees and broke the branches, and, as he was lifting up his ax against a little root, an old man snatched the ax away from him and gave him a blow that almost killed him, saying: "Are you not satisfied with having destroyed the beautiful trees of my garden, that you now try to destroy also the last root? Truly, you deserve that your memory perish from the earth." The king thereupon promised to guard the last plant of the garden carefully. No one but an old Jewish sage was able to interpret the dream, and he said: "The garden represents the house of David, all of whose descendants you have destroyed except a woman with her unborn boy. The old man whom you saw was David, to whom you promised that you would take care that his

house should be renewed by this boy." The Jewish sage, who was the father of the young woman, brought her to the king, and she was assigned to rooms fitted up with princely splendor, where she gave birth to a boy, who received the name "Bostanai," from the garden ("bostan") which the king had seen in his dream.

The figure of the wasp in the escutcheon of the exilarch was made the subject of another legend.

The king had taken delight in the clever boy, and, spending one day with him, saw, as he stood before him, a wasp sting him on the temple. The blood trickled down the boy's face, yet he made no motion to chase the

insect away. The king, upon expressing astonishment at this, was told by the youth that in the house of David, of which he had come, they were taught, since they themselves had lost their throne, neither to laugh nor to lift up the hand before a king, but to stand in motionless respect (Sanh. 93b). The king, moved thereby, showered favors upon him, made him an exilarch, and gave him the power to appoint judges of the Jews and the heads of the three academies, Nehardea, Sura, and Pumbedita. In memory of this Bostanai introduced a wasp into the escutcheon of the exilarchate. The genizah fragment says that the incident with the wasp occurred in the presence of the calif Omar, before whom Bostanai as a youth of sixteen had brought a dispute with a sheikh, who filled his office during the exilarch's minority, and then refused to give it up. Bostanai was exilarch when Persia fell into the hands of the Arabians, and when Ali came to Babylon Bostanai went to meet him with a splendid retinue, whereby the calif was so greatly pleased that he asked for Bostanai's blessing. The calif, on learning that Bostanai was not married, gave him Dara, the daughter of the Persian king, as wife; and the exilarch was permitted to make her a Jewess and to marry her legitimately. She bore him many children, but their legitimacy was assailed after their father's death by the exilarch's other sons ("Ma'aseh Bostanai," several times printed under different titles; see "Benjacob," *s. v.*). This legend was made known only in the sixteenth century (compare Isaac AKRISH), but the Seder 'Olam Zutā, composed in the beginning of the ninth century, drew upon the legends of the garden and the wasp (see MAR ZUTRA II.).

The name "Dara" for the Persian princess in Christian sources occurs also as that of Chosroes' daughter (Richter, "Arsaciden," p. 554, Leipzig, 1804). The legend glorifying Bostanai probably originated in Babylon, while the genizah fragment, branding all the descendants of Bostanai as illegitimate, being descendants of a slave and unworthy to fill high office, comes from Palestine. This latter view is of course erroneous, as may be gathered from Hai's remark, above mentioned, for the post-Bostanaite house of exilarchs was not descended from the princess. It is true, however, that the Bostanaïtes were hated by the scholars and the pious men, probably in part because ANAN, founder of the Karaite sect, was a descendant of Bostanai (see Sherira's "Letter," ed. Neubauer, i. 33).

Benjamin of Tudela says that he was shown the grave of Bostanai near Pumbedita.

**BOSTON:** Capital and chief city of the state of Massachusetts in the United States.

Nothing definite is known of Jews in Boston prior to 1842. In that year there was established the first congregation, whose founder and first president was William Goldsmith. In 1843 this congregation purchased the first cemetery for Jews in East Boston. The second congregation, now known as the Temple Adath Israel, was organized in 1853.

The first election of any Jew to public office was in 1875 when Godfrey Morse was elected to the school committee of the city of Boston. Leopold Morse was elected a member of the United States House of Representatives in 1876. The first Jew in the common council was Isaac Rosnosky, elected in 1878, who was also the first Jew to be elected (1883) to the Massachusetts legislature. Godfrey Morse was elected president of the common council in 1883.

Bunker Hill Monument, the most notable memorial in Boston, owes its erection in part to the generosity of Judah Touro, who donated for the purpose the sum of \$10,000, nearly one-fifth of the entire amount received from private sources ("Pub. Am. Jew. Hist. Soc.," No. 3, pp. 98-100).

The principal congregations are the two mentioned above and Beth Israel, Beth Jacob, and Mishkan Tefilah. The leading charitable associations are the United Hebrew Benevolent Association, founded 1864; the Hebrew Women's Sewing Society, founded 1869; the Leopold Morse Home for Infirm Hebrews and Orphanage, founded 1888; the Free Burial Association; and the Free Employment Bureau, which five societies constitute the Federation of Jewish Charities of Boston. There are also the Benoth Israel Sheltering Home, the B'nai Zion Educational Society, the Hebrew Industrial School, the Helping Hand Temporary Home for Destitute Jewish Children, the Talmud Torah Hebrew Free School, the Young Men's Hebrew Association, the Young Women's Hebrew Charitable Association, and the Louisa Alcott Home.

The principal social organizations are the Elysium Club, Harmony Club, Progress Club, Purim Association, and the Utopian Club.

The principal rabbis have been Revs. Nathan, Aaron Ginsberg, Falk Vidaver, Raphael Lasker, and Samuel Hirschberg of Congregation Ohabei Shalom; the Revs. Joseph Sachs, Joseph Shouin ger, Solomon Schindler, and Charles Fleischer of Temple Adath Israel. Other notable rabbis are M. Z. Margolis and Hyman S. Shoher.

In the total population (500,000) there are about 40,000 Jews, mostly Russian, who have made their homes in Boston within the last ten years. There is a small percentage of German, Polish, English, and

Portuguese Jews. There are also many native-born American Jews in the city. Many of the Boston Jews are engaged in mercantile and manufacturing pursuits; there are several physicians, musicians, and lawyers; but the majority are carpenters, painters, builders, masons, plumbers, etc.

**BOTANY:** The science that treats of plants. Like grammar and other sciences based on logical thought, scientific botany originated with the Greeks, and from them found its way to the Jews. Agriculture, gardening, and popular medicine naturally led to a knowledge of the plant world and of the most remarkable phenomena of plant life; and the natural impulse toward nomenclature led to naive classifications of the plant world. Biblical language is not poor in designations for plants (נטע, צמח) and their various parts. In illustration may be mentioned the different expressions, עקר, שרש, for "root"; יונק, חוטר, זמורה, דלית, נוע, בר, אב, for "root"; סעפות, סרעף, סנסנים, סלסלת, סור, נצר, נטישה, בפה, ענף, שבלת, שלוחת, שרג, שתיל, קציר, צמרת, פארת, ענף, for "stem," "slip," "stalk," "shoot," and "twigs"; as well as טרף, עלה, עפאים, for "leaves" and "foliage"; נין, פרה, סמדר, נצה, נין, "blossom," and "blossom-stalk"; בכר, איטבול, for "fruit," "fruit-stalk," and "seed"; many of which designations were in reality only used by the farmer and gardener as technical terms. The Biblical classification of plants—with which life on earth begins (Delitzsch on Gen. i. 11)—is contained in the passage which tells of their creation: "And God said. Let

**Early Classification.**

the earth bring forth grass (דשא), the herb yielding seed (עשב), and the fruit-tree (עץ) yielding fruit . . . whose seed is in itself upon the earth; and it was so" (Gen. i. 11). The term

דשא is explained as embracing, besides the grasses, the cryptogamous plants, in contrast to עשב; although the Bible never mentions the cryptogamia elsewhere (Keil on Gen. *l.c.*). But this is a forced use of the word somewhat similar to the limitation of fruit-bearing trees to fruit-trees by Jewish exegetes, according to whom the forest-trees, with "thorns and thistles," were created only after the fall of man and the cursing of the earth. They also claim, according to Gen. R. v. 9, that the earth had previously brought forth only fruits and wood bereft of any fruit-taste, in place of fruit-like wood (in Mishnaic diction עץ had come to mean "wood"; אין was the word for "tree"). Herewith ended the classification of plants. Language had designated certain groups, like grain-plants (בר, דגן); and only when the study of the Law was taken up in post-Biblical times did it become necessary to establish some uniformity regarding correlated groups, although the method of classification was not a particularly happy one. Herein also Maimonides acted as a systematizer (L. Löw, "Graphische Requisiten," i. 93), deducing the following division from Talmudical writings ("Yad," Kil. i. 8, 9): "Plants are classified as: (1) אילנות ('trees'); (2) זרענים ('vegetables'). The former consist of: אילני מאכל ('fruit-trees') and אילני סרק ('barren trees'). To vegeta-

bles belong: (a) תבואה ('grain'), comprising the five familiar species; (b) קטנית ('small grain') and all seeds that are eaten, with the exception of large grain, as, for instance, the leguminous plants, beans, peas, lentils, rice, sesame, poppy [Maimonides, פרנים]; (c) זרעוני נח (garden-plants') (Kil. ii. 2; Tosaf. i. 74), the seeds of which are not edible, but which bear edible fruits; for example, the onion, garlic, leek, nutmeg, turnip, etc.; flax also belongs to this group. Some of these garden-seeds are grown in fields on a large scale, and are then called מיני זרעים ('seed species'), as, for example, flax and mustard; others, grown only in small beds, as turnips, radishes, beets, onions, coriander, celery, lettuce, are called ירקות ('herbs')."

Maimonides' classification is repeated later on by others; for example, in "Kaftor wa-Ferah," ed. Berlin, lvi. 119b; Caleb Afendopolo, 14a.

**Later Classifications.** in "Alderet Elijahu," Appendix, 14a. Afendopolo adds to the above, "fruits of the ground," as cucumbers, water-melons, the castor-oil plant, and those medicinal plants which are not used for foods.

For purposes of the ritual blessing there is but one classification; namely, fruit of the tree and fruit of the soil, in addition to which mushrooms and truffles form a group by themselves, as, according to Jewish belief, they are nourished by the air (Maimonides, "Yad," Ber. viii. and the ritual codices). As a curiosity of more modern times, the fact may be mentioned that Azulai speaks of fifty-five kinds of "fruits of the soil," for which reason, he says, the Hebrew benediction reads: האדמה ("of the earth"), the numerical value of the letters in this word being 55! ("Birke Yosef, Shiyyure Berakah, Orah Hayyim," 203.) This classification was not easily arrived at, as is shown by Ber. 6, as in Tosef., Ber. vi. 8, 27, זרעים, דשא, ירקות ("grains," "grasses," and "herbs") are distinguished (Israel Lewy, "Fragmente der Mischna des Abba Sani," p. 10). For the classification תבואה, קטנית, אילנות, ירק, see Sifra 87b and parallels, and compare Rev. viii. 7, ix. 4, where χῆρος = דשא, χλωρός = ירק, and δένδρον = אילן.

From the standpoint of the value of the soil's products, those used for maintaining life (for example, wine, oil, flour, fruit) are distinguished from others less important, as caraway-seeds and spices ('Ab. Zarah iv. 465, 25 *et seq.*; "Sheiltot," No. 32). Israel is compared with wheat, and not with nutmeg or pepper; for the world could well exist without the latter, but could not do so without the former (Pesik. R. 10 [ed. Friedmann, p. 35a] and parallel passages). Separate categories are formed of the seven plants characteristic of Palestine (see PALESTINE, FLORA OF) and of those used for incense, medicine, and dyestuffs (סמנים).

Besides the plants of Palestine and Egypt the Bible only mentions spices and condiments, coming from southern Asia and its groups of islands. These found their way, partly by land, partly by sea, to the peoples of foreign countries, and were used especially in their sacrificial offerings (Gildemeister and Hoffmann, "Die Aetherischen Oele," pp. 4 *et seq.*, Berlin, 1899).

The entire plant world is called in the Mishnah צמחי ארמה (Sifre, Num. 84 [ed. Friedmann, p. 23a];

Deut. 11 [ed. Friedmann, p. 67b]); Targum, צמחים מיני צמחה דארעה (Kil. ii. 5); the young nursery or vineyard is נטיעה (Sheb. i. 8; Tosef. i. 61); נטע is "to plant" (Tosef., Bek. vi. 541; Tosef., B. B. vii. 408; Yer. Meg. i. 70b.); קציץ נטיעות is "to fell plantations" (Ned. iii. 5; Tosef. ii. 277; B. K. viii. 6;

**Post-Biblical Period.**

Tosef. iii. 349; Tosef., Sanh. iv. 423; in an applied sense Tosef., Hag. ii. 234). The term נטיעה is opposed to נחיתה in Mek., Beshallah, 10 (ed. Friedmann, p. 43b); opposed to זקנה in Tosef., Sheb. i. 61; זמורה לנטיעה is "grapes" (Tosef., Shab. viii. 121; Gen. R. xxxi. 14); but in the Targum נצבה is used also for "plant."

For the different parts of the plant the language of the Mishnah is so rich in synonyms as to make it impossible to reproduce them here. Some of the designations are for particular products, as יתר for "branch of a fig-tree"; נרופיה for "branch of the olive and sycamore"; וזמורה for "branch of a vine" (Gen. R. xxxi. 14). All the different parts of the plant are enumerated by the Zohar, which proceeds to mention the seven parts—root, bark, pith, twig, leaf, blossom, and fruit—in order to draw parallels to the seven different ways of interpreting the Bible (iii. 202a).

The rich flora and the fertility of Palestine (see PALESTINE, FLORA OF) are lauded as highly by the Talmud and the Bible as in secular literature. "The vegetation of Palestine was always a very rich one; its fruits were the finest and most easily cultivated. But on two occasions its productivity reached the highest pitch: at the time when our fathers took possession of the country, and at the time of their going into exile" (Sifre, Deut. 37 [ed. Friedmann, p. 76b]; 316, 317 [ed. Friedmann, p. 135b]; Pesik. R. 132a; Yalk., Yer. 328). Still greater shall be its fertility at the time of the Messiah: "On the day of sowing, the fruit will ripen as at Creation, yea, even the wood of the fruit-trees will become edible." Wonderful was also the harvest at the time of Queen Salome; the wheat-kernels grew to the size of kidneys; barley was as large as olives; peas were as large as golden dinars; and, accordingly, samples of them all were preserved for later generations, to show what would be the deteriorating consequences of sin! (Sifra, Behukkotai, ed. Weiss, p. 110d, and parallel passages). "Unseemly, yea, even insolent, it is of the land which has been manured and cultivated by its owners, not to deny its harvest to the conquerors after the destruction of Jerusalem" (Yer. Ta'an. iv. 69b; Lam. R., Introduction, end).

The total number of plant-names found in the Bible (100) does not correspond with the excessively rich vegetation of Palestine. But this will not be a matter for surprise, considering that the legislative part of the Bible is, on account of the food restrictions contained therein, very copious in names of animals, and that there is little occasion to consider plants in such connection, these being only occasionally mentioned in poetical and prophetic writings. The literature of the Mishnah enriches the Biblical list of plant-names to the extent of about 180 good Hebrew words; so that it may be inferred that a very large proportion of the Hebrew botanical vocabulary has been preserved.

Halakic writers often had occasion to mention plants. The establishment of the ritual blessings for the various kinds of vegetable food and for the first-fruits of the season (ישהיינו);

**Halakah.** agrarian legislation on the rights of the poor to participate in the harvest; the rules for tithes, for the priest's portion, and for the "hallah" (offering of dough); the regulations concerning the mixture of heterogeneous plants; the rules for the Sabbatical year; the law forbidding the fruit during the first three years of the tree's growth; the establishment of the particular kinds of grain to be used for the making of unleavened bread; the salads to be used with the Passover roast; the components of the festal garland for Tabernacles; the covering of the Tabernacle itself; the use of botanical words in vows; the proper material on which to write letters of divorce; sacrifices from the plant world; the ingredients for incense; the kinds of hyssop to be used in the sacrifice of the Red Heifer; the laws of Levitical impurity in relation to plants—all these are far from exhaustive of the occasions where plants are concerned. Custom and usage demanded certain vegetable foods on certain days, and created new relations to the plant world, as life constantly raised new halakic botanical questions, of which rabbinical literature treats. The throwing of hurs on the fast-day of the Ninth of Ab; the custom of plucking up grass after a funeral, believed to be a symbol of the resurrection ("Shibbole ha-Lekef," p. 373a; Responsa of MaBIT, i. 250; Lewysohn, "Me'kore Minhagin," p. 134); lotion-plants from which a kind of milk runs (Responsa of RaSIIA, No. 248); the chewing of mastic on Passover (RaDBaZ, ed. Fürth, No. 582); beans which may be washed with soap (Responsa of YaBeZ, No. 156); oats for stuffing geese ("Zemah Zedek," p. 17); the feeding of silkworms with mulberry-leaves on Sabbath ("Yakin u-Boaz," ii. 18; "Bet Yosef" and Shulhan "Aruk. Oraḥ Hayyim. 324, 12, and other sources), are only a few topics taken at random from the later casuistic literature, in which reference to new plant products, such as sugar-cane, lemons, coffee, tea, chocolate, Indian meal, eggplant, potatoes, tobacco, camphor, and spices, may be traced.

Europe received most of its cultivated plants from the Orient. Some plant-names, like that of the balsam, it returned to the East later; but the Orient also

owes many new terms to the Greeks and Romans. The preponderating culture of the former, and the commerce and luxury of Roman life, led

the Jews to adopt the names of many plants long before they were known in Palestine. Through the Greeks podded "grains" (pulse) came to the East: the words *δέριμος*, *λίβια*, *φάσηλος*, *πιασι*, became familiar to the Jews and other Semites, while many fine sorts of fruit were known by the names which the Roman consumer gave them, as, for example, "plums of Damascus" (*Δαμασκηνά*), two sorts of dates (*νικόλαος*, *καρνωτός*), a celebrated brand of figs, called *φιζάλεως*, the fine eating olive (*κολυμβάς*), etc. The names of the peach (*περσικά*), the quince (*μελίμυλα*), the kind of pear known as *Crustuminum pírurum*, the cembra-nut (*στροβίλος*), and the fruit of the *Cordia myra* (Linneus) indicate the influence of

**Foreign Plant-Names.**

the Greeks on the fruit trees and fruit-markets of Palestine. The cabbage, kale, and mustard (*καψάρι*) came from Europe; the turnip, carrot (*σολιανία*), parsnip, leek (*κεραλωτόν*), parsley, artichoke, and sugar-melon are known by Greek designations. The ash (*αελία*), of which three kinds are now found in Palestine, bears a Greek name; even for the indigenous cedar the word *κείδος* maintains itself; while the wood of the native box-tree is also designated by the Greek word *πίσινος*.

Passages indicating where various plants were especially cultivated abound in the Mishnaic and Talmudic literature; but these belong rather to a description of the agriculture of Palestine than to botany. R. Simon b. Gamaliel, however, shows an accurate knowledge of the special habitats of plants when he says: "Of mountains, the ash is characteristic; of ravines ["ghor"], the date-palms; of water-courses ["wadis"], the reeds; and of lowlands ["shefelah"], the sycamore" (see Tosef., Sheb. vii.; Yer. ix. 38d; Pes. 13a; Bacher, "Ag. Tan." ii. 327; and "Kaffor wa-Perah," p. 107a; Vogelstein, "Landwirtschaft in Palästina," i. 7; Kaplan, "Erez Kedumim," p. 34).

In other passages also R. Simon b. Gamaliel shows an interest in botanical questions (Frankel, "Darke ha-Mishnah," p. 184); and the interpretation of the Biblical קרי as the resin of the balsam-dropping trees ("kaṭof") is said to have originated with him. He determines the length of time between the leafing of the fig-tree and the ripening of its fruit (Tosef., Sheb. xiv. 67; Yer. *ib.* 35d); describes minutely a certain

**Ritual**  
**Mention of**  
**Plants.** kind of onion (Tosef., Ma'as. R. iii. 85; Yer. *ib.* 52a); declares that rice is not grain (Tosef., Hal. ii. 98); allows only the fruit of the palms of Jericho to be offered in the Temple as first-fruits (Tosef., Bik. i. 100); and maintains that there is nothing square in nature, in opposition to which statement it is pointed out that mint, like all labiate flowers, has a four-edged stem (Löw, "Aramäische Pflanzennamen," p. 260). He mentions also (Tosef., Tebul Yom, i. 684) a peculiar kind of bean (*nigella*), the leek, and senna (שננונית?).

R. Johanan ben Nuri, a contemporary of R. Akiba, mentions an otherwise unknown inferior and probably only wild grain, the קרמית; and the "kurreim" or "kurreim," still found in Palestine, makes it probable that this was the *Hordeum bulbosum* (Linneus) (Post, "Flora of Syria," etc., p. 902: "found in grassy places"). According to Johanan, this קרמית makes a dough which is subject to the law of HALLAH, and may be leavened; but with this view other teachers disagree, each claiming that his opinion is founded on experience (Tosef., Hal. i. 97; Yer. *ib.* i. 57a; Tosef., Pes. i. 157; *ib.* Yer. 29a). Rice, too, he tried, though unsuccessfully, to classify as a grain; and this difference of opinion leads to the inference that Indian rice—which was unknown to the Bible, and appeared only after Alexander the Great—was not naturalized in Palestine much before his time (Pes. 35a, 114b; Ber. 37a; see also RICE). Saffron-seed cakes (הלות הריעי), usually taken as delicacies before the meal, Johanan would not class as food; consequently they were not to be bought with money from the second tithe, which

was reserved for food. His opposition to Akiba extended to still other kinds of spices (Tosef., Ma'as. Sh. i. 87).

Nor was the appreciation of the beauty of nature entirely lacking in the time of the Mishnah teachers; for the latter, although engrossed in study, and probably immersed in the explanation of details of sacrificial rites, were so astounded at the wonders of nature—as, for instance, trees, in all their majesty—that they would exclaim: "How magnificent this tree is!" Such direct appreciation of nature had probably become so foreign to that period and its manner of feeling that it was condemned as an interruption of the study of the Law (Ab. iii. 7).

On the other hand, on reviewing the splendors of creation, the Jew is to praise not creation but the Creator; at sight of beautiful human beings or trees he is to extol God, who permits these creatures to exist in the world (Tosef., Ber. vii. 15; Talmud Bab. *ib.* 58b), and who created them (Yer. ix. 13b).

By R. Judah b. Ezekiel of Pumbedita this thought was condensed into the command: "He who walks abroad in Nisan and sees the blossoming trees shall repeat the blessing: 'Praised be He who allows nothing to be wanting in His world: who created beautiful beings and trees, to delight men'" (Ber. 43b and parallels; Tur and Shulhan 'Aruk, Oraḥ Hayyim, 226). Closer casuistic details are given by Azulai, who, with a perfect absence of all feeling for nature, adds that this blessing should be pronounced with especially impressive reverence for the benefit of those souls which may be wandering through trees and plants, and that God's mercy should be begged for them ("Moreh be-Ezba," Nos. 198, 199; Palaggi, "Mo'ed le-Kol Hai," i. 6-9).

The same command is extended to flowers ("Leḳaḥ Tob," in "Paḥad Yizḥaq," I, 58a). Instead of choosing the early-blooming almond-tree as the occasion for saying this blessing, one is commanded to wait until other trees are in bloom. The question as to whether this blessing may be pronounced as early as Adar and as late as Iyyar is the subject of casuistic debate (Alkalai, "Zekor le-Abraham," Oraḥ Hayyim, 21a; Responsa of Joel Zebi Roth Huszt, "Bet ha-Yozer" on Oraḥ Hayyim, No. 13).

The miserable condition of the roads of the Holy Land, when pilgrims discontinued their annual journey to Jerusalem, was shown in the briars that overgrew the paths (Lam. R., Introduction, 26; [ed. Buber, p. 30]; Yalk., Isa. 302; "Leḳaḥ Tob" on Lam. i. 4); and it was a pathetic sight to behold weeds growing in forsaken synagogues (Tosef., Meg. iii. 225; Talmud Yer. and Bab. *l.c.*).

The Biblical idea that just as man extols God for the wonder of His creation, so, too, creation itself praises its Maker, is not lost even in later times. Thus the month of Shebat is said to boast that during its duration "the trees grow higher, open their mouths, and with their leaves praise

**Haggadah.** the living God" (Targ. Yer. Ex. xii. 31). This same poetical thought is reflected also in the "Perek Shirah," where it is applied to the individual phenomena and parts of the creation: "The trees rejoice over Israel's

redemption" (Isa. xlv. 23), applied haggadically in Mek., Beshallah, ed. Friedmann, p. 40b. King Og was rude enough to designate Abraham and Sarah as beautiful trees growing by the waterside but bearing no fruit; therefore he was punished by being conquered by the great nation descended from them (Targ. Yer. on Num. xxi. 34). By fruits are meant the Patriarchs; by blossoms, the tribes of Israel (Lam. R., Introduction, 2 [ed. Buber, p. 3]). David, like Moses, a faithful shepherd, reserved the young and tender pasture for the lambs of his flock; the older growth was given to the older sheep, the roots to the fully grown animals, thereby showing his fitness to be a shepherd of Israel (Midr. Teh. on lxxviii. 21 [ed. Buber, p. 357]). God and the Torah are compared to plants; thus the Torah is likened to the fig, the vine, flax, and wheat, while Israel (Ex. R. xxxvi. 1) is compared to all the nobler trees (the vine, fig, walnut, myrtle, olive, apple, palm, willow, and cedar).

There was a dispute as to which of the trees thus compared with Israel furnished the wood for Haman's gallows (Abba Gorion and "Leḳaḥ Tōb," on Esth. vii. 10 [ed. Buber, pp. 41, 48]). Just as the entire Song of Solomon is symbolical of God and Israel, so, too, are the individual plants mentioned in it, such as meadow-saffrons and lilies. Israel and the peoples of Canaan suggest a vineyard wherein both cedars and briars grow: the former are uprooted, while the latter remain to protect the vineyard (Yalk., Judges xli. 8a).

The significance attributed in Ber. 56-57 to various plants (citron, fig, barley, pomegranate, pumpkin, olive, palm, date, reeds, and vines) in interpreting dreams is made to rest on Biblical verses or on a play upon words. Solomon Almoli's collection in his dream-book, "Pitron Ḥalomot," rests partly on Talmudic passages, partly on foreign folk-lore and his own imagination. Thus to dream of spinach is said to signify happiness, riches, and honor; of ginger, honor and renown (see Steinschneider, "Cat. Boll." No. 6896, 3).

In a figurative sense the names of certain plants, or, more specifically, fruit-trees, are used to designate similar objects (לֶחֶם שֶׁל סֵרָה, תְּפוח, עֵרֶשָׁה, טְלוּפָחָא). **Figurative Uses of Plant-Names.** see Löw, *l.c.* p. 375; Steinschneider, "Hebr. Uebers." pp. 319, 395; Gen. R. xxviii. 3; "Monatsschrift," xxxviii. 25; Tan., Ḥayye Sarah, ed. Buber, pp. 7, 51.

Metaphors and comparisons from the plant world appear in Talmudic literature continually, and many pass into the most diverse languages and literatures. In man—as the microcosm—the hair is said to represent the woods, while the bones correspond to the trees (Ab. R. N. xxxi. יַעֲקֹב = both "hair" and "foliage"; see also Peah ii. 3; Theocritus, "Idyls," i. 131). According to Nahmanides ("Terumah," 71b), "the holy language always compares all forms with man. That which is at the top is called the head; that below, the feet." Nevertheless, the words "roots," "branches," "stems," and "fruit" are frequently used metaphorically. The human body is likened to the earth; the bones, to the mountains; the hair, to plants (Dieterici, "Die Anthropologie der Araber," 1871, p. 15). "The roots are the soul,

the stem is the body," is a Mishnaic saying (Tosef., Sanh. xiii. 434). On the other hand, Arabic philosophy is reflected in Ibn Ezra's dictum on Ps. i. 3 (see "Monatsschrift," xliii. 239), that the most perfectly formed soul is that fruit of the body which is picked at the time of maturity.

The words עֵקֶר ("root") and עֵנָף ("branch"), as designating fundamental law and deduced ordinances, are found in Shtira (Neubauer, "Chronique Samaritaine," i. 19), but earlier also in the Mishnaic usage of עֵקֶר, meaning the chief matter, as opposed to טַפְּסָל, that of secondary nature (Sifre, Num. 89 [ed. Weiss, p. 24b]); סְבִיבָא דְרַבֵּי עֵקֶרָא שְׁלֵי דְרַבֵּי מַלְתָּא (Yer. Ber. ix. 13c). "Man is an inverted tree, and a tree is an inverted man," said Aristotle ("De Part. An." iv. 10), and after him all writers of the Middle Ages—Jews, Mohammedans, and Christians. Judah Muskato ("Nefuzot Yehudah," sermon 15) and Samuel Yafe Ashkenazi ("Yefeh Mareh" on Ber. i. 4), both of the sixteenth century, were familiar with this comparison; but so also was Gershom b. Solomon (see below). The simile is worked out in detail in "Aggadat 'Olam Ḳaṭon" (Jellinek, "B. H." v. 58; see also "Monatsschrift," xiii. 227). "At the time of the resurrection the bones will be drawn from the earth; the hair from trees; the power of life from fire, as was the case at the time of the original Creation" ("Bundeshesh," in Spiegel, "Die Tradit. Literatur der Parsen," p. 116). Joseph ibn Zaddik ("Olam Ḳaṭon," p. 22) and Clément Mullet (Introduction to his translation of Ibn Awwâm, p. 22) also say: "Assyrian agriculture sees in man an inverted tree, while, on the other hand, the tree is an inverted man." Of Mohammedans, Kazwini may be mentioned; of Christians, the following passage: "Physicists say man is an inverted tree" (Migne, "Patrologie Cursus Completus," Latin series, p. 185, col. 107; Guerrius Abbas, "Sermo," ii.).

Steinschneider was the first to collect the Hebrew typology of botany (Kobak, "Jeschurun," German ed., viii. 65). To this belong such state-

**Types.** ments as that mustard-seed grains (גֵּרָנִי, הַרְרִי) represent the smallest of things in contrast to the largest (כְּרֹר הַעֲלִיץ, "Zunz Jubelschrift," p. 107), or to ostriches' eggs (Steinschneider, "Hebr. Uebers." p. 16, note 107; *idem*, in "Jeschurun," *l.c.*), or to the ocean ("Monatsschrift," 1879, p. 354, note). Steinschneider understands sesame-seed as representing something very small. Similar usage to represent "nothing," figuratively, is found in many other languages (Hofer, "Germania," 1873, xviii. 19). Comparisons of cedars and reeds, and instances of the use of the latter as illustrations of weakness, are also found (see REED).

Expressions to the effect that the soul is the tree, and wisdom its fruit; that wisdom is the tree, and deeds are its fruit; that intelligence without morality is a tree without fruit (Gabirol), and similar quotations ("Naḥal Ḳedunim," p. 34; see Steinschneider, "Hebr. Uebers." p. 882), all come from the Arabic (concerning the "Fruit of wisdom" see Steinschneider, in "Zunz Jubelschrift," p. 1, note, and *idem*, "Hebr. Uebers." p. 156).

Of the scientific expressions of the Arabic period of civilization mention may be made of גִּלְמֵי אֱלוֹהִי for "cone" ("Hebr. Bibl." vii. 90 *et seq.*), צוּרָה

**אֶשְׁתְּרוּבִילִית**. Judah Tibbon (Steinschneider, "Hebr. Uebers." p. 445, note, where also *al gatabri* = **גַּטְבִּי** = **אֶשְׁתְּרוּבִילִין**; see Barzillai, "Yezirah," pp. 222, 347).

The baggadie pictures drawn from the plant world are chiefly types taken from the Bible, such as cedar and reeds, cedar and hyssops, etc. (see the articles under these respective captions).

The tree as an emblem of human life is a favorite metaphor in the Bible, and is frequently so used in later literature (L. Löw, "Gesammelte

**Man Compared to Trees.** **Man** is compared in the Bible to the palm and to trees in general. The just man is likened to a tree in a clean place

with a branch overhanging an unclean spot; the wicked man, to the reverse (Ab. R. N. xxxix. 119). "Plant" (**צֶמַח**) is a Biblical word for the Messiah (Heilprin, "Erke ha-Kinnuyim," s. v.); salvation is a quickening anew of all that is green (Cant. R. on ii. 2; Targ. Yer. on Isa. vi. 13); the plant springing from the seed, a picture of resurrection (Num. R. xviii.). The seed is confided to the earth naked; but the latter returns it to man clothed in fruit (Sanh. 90b; Eecl. R. v.; Pirke R. El. xxxiii.).

Of fables, the following may be mentioned: "The Trees and the Iron" (Gen. R. v., end; Sachs, "Stimmen vom Jordan und Euphrat," ii. 111), and "Hadrian and the Old Man Planting Trees" (Lev. R. xxv. 5).

The beginnings of scientific botany, preserved in the Jewish literature of the Middle Ages, consist chiefly of echoes of Aristotle, with now and then information derived from Theophrastus; all of them transmitted through Arabic channels, and especially either directly or indirectly from Averroes (concerning Dioscorides, on whom Asaf relies, see Steinschneider, "Hebr. Uebers." pp. 239, 650). Any one familiar with the fragments of Aristotelian botany contained in Meyer ("Gesch. der Botanik," i. 94 *et seq.*) will in exceptional cases only find anything new in Jewish botanical

**Scientific Botany.** treatises. The questions of the relationship between animals and plants, of

the life of the plant, its soul, its own heat, its nourishment and propagation, occupied the thought of the entire Middle Ages, and are answered in an Aristotelian style. True, in general botany the Arabs did not greatly surpass Aristotle; but in speaking of the Arabian and late Greco-Roman literature, Meyer (*l.c.* iii. 326) rightly says: "The sum of special knowledge concerning plants considerably decreased among the Greeks and Romans, but increased among the Arabians. The Arabs sought in nature itself the plants commended by the ancients, and expended much energy on the criticism of synonyms." In this, Jewish literature made the Arabic its model (see **PLANTS**); but the literature of synonymy belongs rather to Jewish pharmacology than to botany. In 1197 Pseudo-Galen's "De Plantis" was translated into Hebrew by an anonymous writer from Orange (Steinschneider, "Hebr. Uebers." pp. 142, 972). The book of Pseudo-Aristoteles, "De Plantis," demonstrated by Meyer to have been written by Nicolaus Damascenus, was translated into Hebrew (Steinschneider, *ib.* p. 141). In 1314 Kalonymus ben Kalonymus translated a book on plants

containing undoubtedly the entire text of Pseudo-Aristoteles and the commentary of Averroes, with probably the supercommentary by Levi b. Gerson (Steinschneider, *ib.* p. 142; Renan-Neubauer, "Les Ecrivains Juifs Français," p. 83). According to

Steinschneider (*ib.* p. 836), a book on herbs in the Vatican consists of an alphabetical list of remedies. A so-called "Book on Plants" is also mentioned by this scholar (*ib.* pp. 359, 743).

Macer Floridus' book on botany (about 1161) was also translated into Hebrew (*ib.* p. 809).

The article on botany in the encyclopedia "Sha'ar ha-Shamayim," by Gershom b. Solomon of Arles (Gross, in "Monatsschrift," xxviii. 126; *idem*, "Gallia Judaica," p. 82; Renan-Neubauer, "Les Rabbinis Français," p. 589; Steinschneider, "Hebr. Uebers." p. 9), is probably taken from Averroes' commentary on the Pseudo-Aristotelian book. It treats of the soul of the plant; passes on to consider its nourishment, growth, blossoming, and fructification; and then takes up the influence upon it of the sun's heat, of exposure, and of climate. The hot spices—pepper, calamus, and ginger—grow only under the "second" climate, that is, where it is hot and dry; the sugar-cane under the "fourth," the moderate climate. In France the tropical fruits—figs, olives, and pomegranates—will not grow toward the limits of the "sixth" climate; only the grape endures, for the coldness of this zone can not overcome this plant's natural heat. In England even the grapevine does not survive the "seventh" climate. The herbs, too, are not everywhere the same, each having its particular locality or habitat. Plants are heavy, light, or medium. The lightest and weakest are those of the pulse family, which, therefore, ripen earliest, just as weaker woman matures before stronger man. Barley ripens later, and wheat later still.

According to Aristotle, the plant's development keeps pace with the course of the sun, and reaches

its highest point when the sun is in Cancer. Averroes distinguishes between perfect and imperfect plants. Some of the imperfect ones are controlled by one or other of the elements;

thus, aquatic plants by water, and sponges by the earth. He says also that most plants live longer than animals, for they are more nearly allied to the minerals, and their composition does not contain the great antagonisms found in the animal world. According to gardeners the moon, according to "modern" teachers the stars, exercise a great influence over growing plants. Plants consist of the four elements, but principally of air, as is evident from the small quantity of ashes remaining after they are burned. According to Averroes, however, the earthy constituents outweigh the water in some plants which sink in water, such as ebony. Then follow the division of fruits (based upon the edibility of their interiors or exteriors), a passage on evergreen trees, and one on the colors of plants.

Gershom also contends that plants are green either because standing water assumes that color or because water and black earth combine to form green. Like man, plants, except the upright palm, stand inverted. Therefore, the palm dies if its head, its pin-

nacle, be cut off. Only palm-trees show a distinction in sex, but there are other fruit-trees that bear no fruit unless other trees of their kind are in their vicinity. Some botanical notes to be found in Gershom are: a short description of the balsam-tree ("Sha'ar ha-Shamayim," p. 20b); of the sunflower (*solsega*); the pumpkin is said to cry out as it grows in the moonlight; the growth of cucumbers should be furthered by blowing the shofar at the time of the setting of the fruit (Duran, "Magen Abot," 36a).

**Uses of Plants.** Gershom also says that from one tree come cinnamon (the rind), mace (the blossom), and nutmeg (the fruit); cloves also are said to be buds of the same tree.

Only two original botanical remarks are found in Gershom: First, that seedless fruit-trees and grapes may be cultivated, just as "in our city" (Arles) there is a tree called שרביים ("sorbier"), the fruit of which has no seeds. Gershom alludes to either a definite tree in Arles or to the so-called beam-tree (*Sorbus torminalis*). Secondly, he says: "Not far from us there grows a tree the fruit of which is as large as half a bean and as hard when ripe as a stone, so that it can not be softened by cooking. This fruit seems to mark the transition from the plant kingdom to the mineral kingdom, as do corals, mushrooms, and truffles." Mention, of course, is made of the BARNACLE-GOOSE. The work closes with a description of the various savors of plants and of their admixture.

Simon b. Zemah Duran (1444) wrote an exhaustive treatise on the relations between plants and animals ("Magen Abot," 35d, Leghorn). In spite of the poetical passages in the Holy Scriptures speaking of the rejoicing, exultation, or sadness of plants, they have no feeling—possessing, according to Aristotle, only a self-nourishing

power. Earth, water, sun, and air contribute to their growth. Differences in plants are due to the varying combinations of the four elements, to heat and cold, to dampness and dryness. They grow (1) from seeds; (2) from the decay of other materials (Anatoli, "Mamad," 5a), as the saprophytes; (3) from water; (4) from slips; (5) or parasitically, *i. e.*, on other plants. In addition to the fable that birds grow on trees, Duran states that in India a woman grows on a tree, falls with a loud cry when she is ripe, and dies. Duran also compares the parts of plants to the organs of animal bodies; classifies them as trees, bushes, herbs, and grasses, as wild and cultivated trees, and as fruit- and forest-trees; and treats of their varying longevity, of sex (the artificial fertilization of palm- and fig-trees, sometimes, however, effected by the wind), of the value of plants as means of nourishment and as remedies, poisons, and odors, and of various plant-juices and their different tastes. The only specifically Jewish reference is the statement that, according to Jewish scholars, there are 1,290 kinds of plants, since every

herb has its own particular star, and there are 1,290 stars, not 1,022 as the astronomers maintain (Abravanel on Gen. xv. 5). In the commentary on the "Sefer Yezirah" the number of the varieties of plants was estimated at 2,100, corresponding to the

numerical value of ארץ: א = 1,000; ר = 200; ק = 900. The statement introduced by Maimonides ("Moreh Nebukim," ii. 10), "There is no herb on earth without a constellation in heaven that governs it, fosters it, and calls to it, 'Grow on,'" comes from R. Simon b. Pazzi (see Gen. R. x. 6; Bacher, "Ag. Pal. Amor." ii. 473; Löw, *l. c.* p. 6). It is found also in the Midrash Koneh; but there an angel is substituted for the constellation (Jellinek, "B. II." ii. 27; "Sefer Razi'el," ed. Schwarz; "Tikvat Enosh" on Job xxxviii. 31). Chwolson ("Ssabier," ii. 467) also states: "Every plant has its demon." Such opinions resulted in statements that the number of plant varieties equals that of the stars (so Gerson b. Solomon, and Duran with more detail).

Nahmanides relies on Simon's statement to establish a better foundation for the Biblical prohibition against mixing heterogeneous plants (commentary on Gen. i. p. 4c; on Lev. xix. p. 100b; see Löw, *l. c.* p. 6). R. Simon's idea was far too welcome to the spirit of the Cabala not to be continued further. Thus, to mention two extremes: the Zohar reproduces it repeatedly, sometimes in combination with the prohibition of mixed seeds (ii. 15b, 171b; iii. 86a); and Azulai interprets it as follows: "Everything in the world is dependent upon things of a higher scale: even a little blade of grass is related to higher leaves, developed roots, stems, seeds, blossoms, and petals, to height, breadth, length, form; in fact, to everything of higher significance. Even its connection with its angel, and the connection of this angel with his own sefirah, and of this sefirah with the Infinite [*En Sof*], illustrate the fact. So that he who partakes of anything without a benediction, wantonly tears it from its ultimate connection with the Deity" ("Midbar Kedemot," letter ג. No. 20; compare letter ג, No. 13). The thought has also penetrated into non-Jewish circles. Thus Paracelsus says: "Every star in heaven is a spiritual growth to which some herb on earth corresponds, and by its attractive power, the star draws on the herb on earth corresponding to it; so that every herb is an earthly star, just as every star is a spiritualized herb" (Friedreich, "Die Symbolik und Mythologie der Natur," p. 193, Würzburg, 1859; Meyer, "Gesch. der Botanik," iv. 430). An Oxford manuscript mentions herbs corresponding to single planets (Steinschneider, in "Monatsschrift," pp. 42, 364).

Aristotle's idea of the vegetative soul (הנפיש הצומחת) governs almost the entire Arabian and Jewish philosophy (Dieterici, "Die Anthropologie der Araber," 1871, pp. 8,

**The Vegetative Soul.** Isaac b. Solomon Israeli (middle of the tenth century; Steinschneider,

"Hebr. Uebers." p. 388); in the "Book of Definitions" (Steinschneider, "Zunz Jubelschrift," p. 137); in Baṭalyusi, whose influence on Jewish philosophy is pointed out by Kaufmann ("Al-Baṭalyusi," p. 10 and gate iv. 51); and in Gabirol (S. Hlorovitz, "Die Psychologie ibn Gabirol's," p. 115, Breslau, 1900), who states in his allegorical exegesis: "Adam signifies the reasoning or human soul; Eve, the living or animal soul; the snake, the desiring or vegetative soul, the lowest grade in animated nature." The seed of Eve is to crush the head of the serpent,

while the latter is to smite the heel of the former, illustrating the close and unbroken interconnection between the natural and psychological worlds. Where the animal soul ceases, the plant soul begins: the serpent, typifying the plant soul, gets its nourishment from the dust (Kaufmann, "Studien über Salomon ibn Gabirol," p. 70, Budapest, 1899). Abraham ibn Daud's teachings (Steinschneider, "Hebr. Uebers.," p. 369) on plant and animal souls have been concisely presented by Rosin ("Die Ethik des Maimonides," p. 48, note, Breslau, 1876), and exhaustively treated by Guttman ("Monatsschrift," xxvii. 164). "In plants, as in sleeping bodies," says Ibn Daud, "there is life" ("Emunah Ramah," p. 15). "According to Aristotle, the coral shows the transition from plants to animals" (*ib.* p. 31). He makes special mention of opium and the aloe. Similarly Ibn Ezra speaks of the plant's soul as its nourishing principle for growth and propagation (Rosin, in "Monatsschrift," xlii. 448). Ibn Ezra devotes considerable care to elaborating Gabirol's allegory mentioned above (see Rosin and Kaufmann, *l.c.*). Maimonides characterizes the nutrient function of the soul as corresponding to the plant soul, but does not mention the latter in the first of the "Eight Chapters" (Scheyer, "Das Psychologische System des Maimuni," p. 10; Rosin, "Die Ethik des Maimonides," p. 47). Mose de Leon (thirteenth century) knew of the plant soul (Jellinek, "Mose de Leon," p. 18, note), as did Bahya ben Asher ibn Halawa, who says: "The soul of reason is immortal, but the animal soul is not, and the plant soul is even farther removed from immortality. The latter is the lowest; therefore Holy Scripture says that earth brought forth the plants, while of animals it says that God created them" (commentary on Gen. i. 12; Bernstein, "Die Schrifterklärung des Bahya," 1891, p. 63; Arama, "Akedat Yizhak," iii. 1, 29b). In comparing man and trees, Aarou b. Joseph, the Karaite, says: "All this on account of the plant soul" ("Mibhar," 18a). See also Shem-Tob ibn Falaquera of the thirteenth century (Venetianer, "A Fokozatok Koenyve," p. 58, Szegedin, 1890; *idem*, "Das Buch der Grade von Shem-Tob ben Josef ibn Falaquera," Berlin, 1894); Hayyim Vital of the seventeenth century ("Sha'are Kedushah," i. 2); Steinschneider, in "Z. D. M. G." xxvii. 557, note; and *idem*, "Hebr. Uebers.," p. 903, note.

Among general references to plants may be mentioned those by Bahya ben Joseph ibn Pakuda:

"Plants created for the perfection and

**General** use of man are a testimony of divine **References.** wisdom. The love of God caused man to come forth from an original nothing composed of the elements; then to become plant-material, then sustenance which is converted into seed and blood, and finally into life and a living man" ("Hobot ha-Lebabot," ii. 4 [ed. Baumgarten, p. 7]; *ib.* ii. 5 [ed. Baumgarten, p. 8a]). Jeshua b. Judah, the Karaite, of Jerusalem (middle of eleventh century), has the following: "The Jews said that if it had not been written in the Holy Scriptures: 'And God said: Behold, I have given you every herb that bears seed, as food,' they would not have been allowed to use herbs and plants for food." Jeshua, however, thinks this opinion untenable, since "plants

feel no pain" (Schreiner, "Studien über Jeshua b. Jehuda"). Finally, Judah ha-Levi remarks:

"Since minerals originated solely through commixture, they do not need the God-granted form necessary to plants and animals, to which a soul has been assigned. The finer the commixture is made, the nobler is its form, revealing more and more of divine wisdom, until it becomes a plant, which possesses a certain degree of feeling and perception. Forthwith it penetrates into the earth, and, nourished by good, damp soil and sweet water, and avoiding their opposites, it grows, and remains standing after having brought forth its kind and produced seed. This seed devotes itself to a similar activity, in accordance with its wonderful intuitive wisdom, called by the philosophers Nature itself—meaning the powers that care for the preservation of the species; for a body that is a composite of various substances can not be preserved indefinitely in its individuality. Nothing possessing only the powers of growth, reproduction, and nourishment has any motion. According to philosophers, these powers are directed by Nature; but in reality, whether ascribed to Nature or soul, force or angel, these successive stages are directed by God. If the commixture is still more refined, and capable of divine wisdom, it will be fit to adopt a higher form than one possessing mere natural power. That is to say, it will be able to obtain nourishment from a distance; in other words, it will possess organic limbs, moving according to its own volition. It will command its members more than plants are able to do, which latter can not protect themselves from harm or seek what is useful, and are played with by the wind. Thus, the animal possesses limbs by which he is transported. The form granted him in addition to the natural life is called a soul" ("Cuzari," v. 10 [ed. Hirschfeld p. 246]).

On the necessity of a knowledge of botany, Judah ha-Levi (*ib.* ii. 64 [ed. Cassel, p. 169; ed. Hirschfeld, p. 94]) says: "When a member of the Sanhedrin died, another of equal birth could succeed him, for

the sciences were familiar among the **Knowledge** people." This was necessarily so, **of Botany.** since one needed a knowledge of all the sciences for the complete observance of the Law; of the physical ones, for instance, for the agricultural laws, as in distinguishing mixed seeds, in avoiding the products of the Sabbatical year and of new orchards, and in separating various plants from one another, so that each might be kept with its original species, and that one class might not be confused with another. It is extremely difficult to determine whether Greek barley (*χβββββ*; see Löw, *l.c.* pp. 104, 164; B. Bahul, 878; according to Ibn Awwâm, a variety of spelt) is a form of barley, or spelt a variety of wheat, or cauliflower (Löw, *l.c.* p. 214) a variety of cabbage. To do so one must know the qualities and the measure of the spread of the roots in the earth, as well as what does and does not remain over for the next year, in order that one may know how much room and interval of time are to be left between one crop and another.

In a list of foods Meir Aldabi of Toledo mentions sixty-five plants, only one of which, פלפסין ("egg-plant"), has a grammatical interest. None of these lists has more than a slight value. For years they were ascribed to Galen and Avicenna.

Neither Todros nor Cavailon wrote on botany (Steinschneider, "Jüdische Literatur," p. 446 [p. 305 of Hebrew edition]; *idem*, "Hebr. Uebers.," p. 783; Gross, "Gallia Judaica," p. 539). In his medical work, "Ma'aseh Tobiyah," printed in 1697, Tobia Cohen of Metz (Zunz, "G. S." i. 193) also touches on cures, and in one appendix treats of forty plants as foods and remedies; while in another he gives a

glossary of simple remedies written in several languages. In the first he mentions the following trees and plants: apple, birch, pear, box, cypress, date, oak, ivy, ash, fig, pine, oak-apple, elder, linden, laurel, mulberry, pomegranate, walnut, olive, poplar, brook-willow, peach, plum, rose, rosemary, elm, sandalwood, tamarisk, fir, willow, vine, וואטליך ("juniper"), plane, פיינטן בוים (*Pino salvaticum*, pine-tree).

Tobia Cohen also deserves mention among Jewish botanists because he illustrated a variety of the orchid in his work (p. 143a).

The superficiality of the barren period between Mendelssohn's death and the appearance of Rapoport is shown in the chapter on botany, said to be written, according to some German

**Later Developments.** text-book on natural history, by Baruch Lindau for his encyclopedia "Reshit Limmudin," Berlin, 1788.

He gives a short article on botany in forty pages, and, owing to his lack of Jewish learning, makes mistakes in the Hebrew nomenclature of plants.

Phineas Elijah b. Meïr of Wilna (Steinschneider, "Cat. Bodl." No. 6753; Zunz, "G. S." i. 196) was more intimately acquainted with the Jewish knowledge of the Middle Ages. He derives his natural philosophy from Ḥayyim Vital, and describes the three powers of the plant soul; viz., those that nourish, those that promote growth, and those that propagate. He knows that modern botany regards all plants as growing out of the seed, though in many cases this is microscopic in size. He also mentions that plants have male and female organs of reproduction that are sometimes united in the same individual, and sometimes divided between two, in which latter case the wind carries the pollen to the female part, though bees also, in collecting the pollen on their feet, assist in the fertilization of the blossoms they afterward visit.

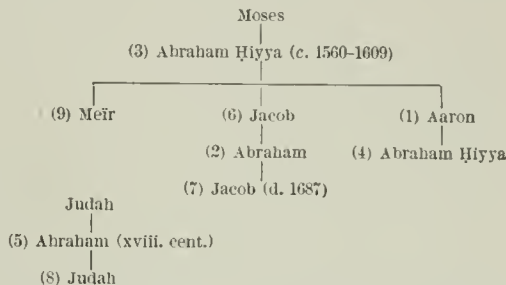

The microscope discloses the wonders of God in nature, and one sees—as Phineas repeatedly asserts—the whole plant pictured in the seed. Not only is the next generation represented, but, according to some modern botanists, all the later generations lie folded up in the seed from the time of its creation. This, however, has not been proved, and is only a hypothesis. It may be, he says, that each generation produces only the seed of the next. Phineas adopts the latter view, since experience shows that the unripe seed is not capable of propagation, though, in view of the minute wonders disclosed by the microscope, the former can not be called impossible. As he learns from botany that there are 20,000 known plants, while Jewish tradition counts only 2,100, he considers these latter as so many plant families, and subdivides these into many classes. Then follow some remarks on plants turning toward the sun. Among the plants mentioned are the sunflowers (זונע בלום) and quite correctly the Talmudic אדאני (should be אר) or "mallow." Of the brantgoose he treats earlier in speaking of moving plants, such as אל תנע בי ("touch-me-not" or "Impatiens"). But the most striking botanical reference is the following (xi. 4f. 63a): "In 1744 it was discovered that when flying insects touch the plant

פאליפּעס ("polyps"), growing in Europe in pools among reeds and rushes, it folds its leaves together, seizes the insect, and, crushing it into dust, feeds on it." Phineas adds: "How great are the wonders of our God!" For further information on botany, see FOLK-LORE, MEASURES, NAMES, PLANTS.

E. C. I. Lö.

**BOTAREL (BOTERELLO, BOTRI, BOTRELLI), MOSES.** See MOSES BOTAREL.

**BOTON:** Spanish family, which immigrated to Salonica, Turkey, in 1492, and which has produced many eminent rabbis and Talmudists. Jews bearing the name are still to be found in Constantinople, Salonica, Safed, and other cities of the East. The following genealogical chart gives the more important members of the family, the figures in parentheses corresponding to the numbers of the biographical notices in the text:

**1. Aaron de Boton:** Talmudic scholar; rabbi at Gallipoli, European Turkey, in the latter part of the sixteenth century and at the beginning of the seventeenth; son of Abraham Ḥiyya (No. 3).

**2. Abraham de Boton:** Rabbi at Salonica in the seventeenth century; son of Jacob (No. 6) and grandson of Abraham Ḥiyya (No. 3).

**3. Abraham Ḥiyya de Boton:** Talmudist and rabbi; born about 1560; died between 1603 and 1609. The name "Ḥiyya" was given him during a dangerous sickness (Ḥiyya = "life"; "may he live!"). He was a pupil of Samuel de Medina, and later dwelt for the most part at Salonica as rabbi and leader of a Talmudic academy. For a time he was rabbi at Polia (Michael, "Or ha-Ḥayyim," p. 95); in 1601 he lived in Palestine (Conforte, "Ḳore ha-Dorot," pp. 47b, 51a); and in 1603 was at Constantinople (Michael, *ib.*).

Even during his lifetime Boton was distinguished as a Talmudist of wide learning and acumen, though he himself did not have a work printed. His chief work is "Lehem Mishneh" (Double Bread; also Dispute of the Mishnah), Venice, 1609; it bears also the title "Mishneh Torah." It is a commentary on Maimonides' Yad ha-Ḥazaqah, or Mishneh Torah, especially on those passages which apparently contradict the Talmud. He not only refers to such passages as had been previously noticed, but discovers a large number of others. At the same time Boton endeavors to establish harmony between the seeming discrepancies by every possible method of interpretation. "Lehem Mishneh" also contains many remarks on "Maggid Mishneh," Don Vidal de Tolosa's commentary on the Yad ba-Ḥazaqah. The work is now widely spread, and is incorporated with most

editions of the *Yad ha-Hazakah* that have appeared in the last two centuries. Conforte relates (*ib.* p. 45a) that his teacher Mordecai Kalai told him and other pupils that the "Lehem Mishneh" was the joint work of Kalai and Boton, who were fellow-students; and Kalai is even reported to have said that most of the observations in "Lehem Mishneh" were his own. This aspersion loses force through the fact that though Kalai lived in the same city, he never made this claim against Boton publicly.

Another work of Boton's was "Lehem Rab" (Great Meal, or Great Dispute), responsa, published by his grandson Abraham (No. 4), Smyrna, 1660.

**BIBLIOGRAPHY:** Conforte, *Kore ha-Dorot*, pp. 37b, 43a, 43b, 44a, 45a, 48a, 50b, 51a; Azulai, *Shem ha-Gedolim*, ed. Benjacob, i, 7; Michael, *Or ha-Hayyim*, No. 182; Benjacob, *Ozar ha-Sefarim*, p. 260; idem, *Lehem Mishneh*, Amsterdam, 1763. The novella on *Baba Kamna* in Abraham Akra's *Me-ha'ere Nemerim* must be the work of another and earlier Abraham de Boton.

**4. Abraham Hiyya de Boton:** Eminent rabbi; born about 1625 at Gallipoli, province of Adrianople; died about 1700 at Jerusalem; son of Aaron (No. 1) and grandson of Abraham Hiyya (No. 3). He at one time lived at Smyrna, where he was a member of Joseph Eskapa's college of rabbis, and in which city he published (1660) his grandfather's "Lehem Rab." Toward the end of his life he settled in Jerusalem, accepting the post of rabbi in the divorce court.

**BIBLIOGRAPHY:** Michael, *Or ha-Hayyim*, No. 40.

**5. Abraham ben Judah de Boton:** Talmudist of the eighteenth century. He wrote "Mahazeh Abraham" (The Vision of Abraham), Salonica, 1796, comprising responsa and Talmudic discussions. The work contains some additions by his son Judah (No. 8).

**BIBLIOGRAPHY:** Azulai, *Shem ha-Gedolim*, ii, 79.

**6. Jacob de Boton:** Rabbi at Salonica in the latter part of the sixteenth century or at the beginning of the seventeenth; son of Abraham Hiyya (No. 3).

**7. Jacob de Boton:** Talmudist, and rabbi at Salonica, where his father, Abraham (No. 2), and grandfather, Jacob (No. 6), had held the same position; died there 1687.

Jacob was the author of "Edut be-Ya'akob" (Witness in Jacob), responsa, published in Salonica, 1720, with a supplement entitled "Liḳḳuṭim" (Fragments), containing Talmudic collectanea and fragments of his lost work on the "Sefer ha-'Ittur" of Isaac ben Abba Mari.

**BIBLIOGRAPHY:** Azulai, *Shem ha-Gedolim*, ed. Benjacob, i, 86; Steinschneider, *Cat. Bodl.* No. 5513.

**8. Judah de Boton:** Talmudist of the second half of the eighteenth century. He wrote some Talmudic essays as an appendix to "Mahazeh Abraham" (Salonica, 1796), a work of his father, Abraham (No. 5).

**BIBLIOGRAPHY:** Azulai, *Shem ha-Gedolim*, ii, 78.

**9. Meir de Boton:** Talmudist of the seventeenth century; son of Abraham Hiyya (No. 3). Meir was rabbi at Gallipoli, and wrote a number of works, of which only his responsa were published (Smyrna, 1660), together with some novelle on the

Talmud. Other responsa by Meir were included in the works of his contemporaries.

**BIBLIOGRAPHY:** Conforte, *Kore ha-Dorot*, pp. 43a, 44b, 48b, 51b; Azulai, *Shem ha-Gedolim*, ed. Benjacob, i, 118; Steinschneider, *Cat. Bodl.* No. 6235; Benjacob, *Ozar ha-Sefarim*, p. 559.

L. G.

I. BER.—A. P.

**BOTTLE:** The Authorized Version (partly after the example of the Vulgate, which uses "lagena." I Sam. x. 3; "laguncula," Lam. iv. 2) introduced the incorrect translation "bottle" for various words

that in reality signify "skins for holding liquids" ("hemet," Gen. xxi. 14 *et seq.*, for water; "nod," Judges iv. 19, for milk; I Sam. xvi. 20, Josh. ix. 4, 13, for wine; Ps. lvi. 8 [Hebr. 9], for water; "ob," Job xxxii. 19, for wine; "nebel," I Sam. i. 24, x. 3, etc., for wine). The R. V. corrects this only sporadically; compare I Sam. x. 3, margin; Ps. cxix. 83; while in Jer. xiii. 12 the marginal reading substitutes "jar."

The various words in all these passages have reference to the skin, usually of a goat, sometimes of a

MODE OF FILLING JARS FROM  
WATER-BOTTLES.  
(From a photograph by Bonfils.)

sheep, in exceptional cases of an ox. The animal is skinned without making a hole in the body; the four holes where the lower legs have been cut off are closed by being sewn together, while the hole caused by the cutting of the head is bound together and serves as an aperture. The hairy side is frequently the inside, though in other cases it is left outside. To keep the skin tight it is greased or smeared with pitch. (On the habit of smoking it (Ps. cxix. 83) see WINE.) The mending, patching, and tying up, necessary with bursting skins, are referred to in Josh. ix. 4, 13: "bottles old, and rent, and bound up." The easy bursting ascribed to new skins with wine (Job xxxii. 19) is, evidently, due to an error of the text (compare the N. T. saying, Matt. ix. 17 *et seq.*). The further reading is: "like skins filled with new wine, it is about to burst" (see Budde's commentary, *ad loc.*).

The skin is the most practical vessel for wandering nomads, who were probably the first to use it. However, it was in very general use among the classical nations. Its employment still survives to some extent in Spain and Greece, while the custom in the Mohammedan world has in nowise diminished.

It is questionable whether the translation of the Authorized Version is correct in the case of the "bottle [margin for "vessel"] of potters" (Isa. xxx. 14). The expression "nebel" (rendered "[earthen] pitcher," Lam. iv. 2) seems to refer in this passage to

a large earthen jar holding perhaps as much as an ordinary skin. From the present knowledge of the vessels for storing wine among the various ancient nations the form of a bottle is certainly excluded. In Jer. xix. 1 (compare 10), "a potter's earthen bottle," the word "bakbuk" (Syriac, *bagbug*, perhaps from a root signifying "to gurgle") seems to mean a vessel with a narrow neck. In 1 Kings xiv. 3 (A. V., "cruse," margin "bottle") it is used for honey. The Septuagint renders this word, however, by βίκος (a broad jar with handles and narrow neck) and by σταινός (jar). On the other hand, the Greek and

hence also בוליוטוס, βουλευτής = "senator"; Git. 37a; Sem. viii., "the boulés or senates of Judea"). According to Yer. Ned. iii. 2; Shab. iii. 8; Pesik. R. xli.; Ab. R. N. xx. (ed. Schechter, p. 72), there were twenty-four boulés in the south of Judea, which passed out of existence on account of the general disregard of the sanctity of the oath. Compare SANHEDRIN and PROSEUL.

GOATSKIN WATER-BOTTLES, NOW IN USE IN PALESTINE.

(From a photograph by the Palestine Exploration Fund.)

Latin words for bottle (*ζάγγος*, *lagena*, etc.) seem to be of Semitic origin. Moreover, the bottle-form, for which glass is specially suitable, was never much used in antiquity, least of all in the Orient. The specimens of Egyptian and Phœnician glass bottles that have been found seem, on account of the costliness of glass (compare Job xxviii. 17; "crystal," A. V., parallel with "gold"), all to have been intended for perfumes. No Biblical mention of them is known.

**BOULÉ** (בול, plural בוליות and בולאות; Greek, βουλή = "council"); Court of justice, or Sanhedrin; also the seat of the senate (Josephus, "B. J." v. 4, § 2;

**BOUNDARIES**: Limits of a tract of land. When the Hebrew tribes gave up their nomadic life and settled in Palestine in agricultural communities, the most important matter was the fixing of definite boundary-lines to separate the lands of the different tribes and of the families within the tribes. The importance of this is sufficiently shown in the Book of Joshua (xv.-xxi.), where a careful record is made of the boundaries of the tribes and their families (B. B. 56a).

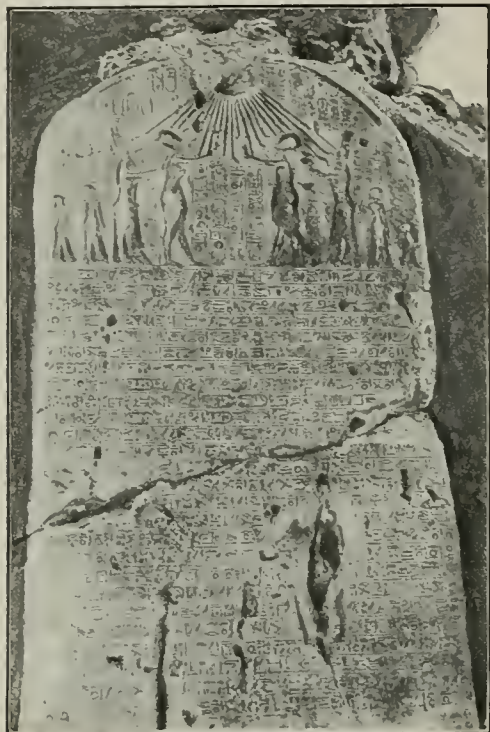

The Biblical law does not enter upon the details of the law concerning boundaries, contenting itself with expressing in general terms its disapproval of the crime of removing the boundary-marks. Of the important branch of the law dealing with the details of boundary-lines, party lines and walls,

fences, and the like, the Bible apparently knows nothing. These form an important part of Talmudic law.

The Biblical law solemnly prohibited any tampering with the landmarks: "Thou shalt not remove thy neighbor's landmark, which they

**Biblical Law.** of old time have set in thine inheritance, which thou shalt inherit in the land that the Lord thy God giveth thee

to possess it" (Deut. xix. 14); and this law became proverbial (Prov. xxii. 28, xxiii. 10).

Boundary-Stone at Tell Arnania.  
(From Steindorff, "Blütezeit des Pharaonenreiches.")

During the time of the Kings the primitive notions concerning the sacredness of the boundary-mark disappeared. The princes were among the

to take care that no landmark be removed ("Bar Mahwanita," B. B. 68; "Meshoha'ah," B. M. 107b). The law was likewise inculcated by moral injunction. Sifre (Deut. 188) after quoting the text, Deut. xix. 10, says: "Has the Bible not already said, 'Thou shalt not rob' (Lev. xix. 13)? Why does it now say, 'Thou shalt not remove'? It is to teach that he who uproots the boundary-mark of his neighbor is guilty of two crimes, robbery and removal of the landmark." In a similar strain Maimonides ("Yad," Genebah, vii. 11) and the Hoshen Mishpat (376, 1) say: "He who removes his neighbor's landmark, and thus appropriates a portion of his neighbor's property, be it even a finger's breadth, if he does it with violence is a robber, and if he does it secretly is a thief." Solomon ben Adret decided that a trespasser building on the land of his neighbor may have his house razed because the owner of the ground is not obliged to part with it or "to take money for his inheritance," but may insist upon repossession of his ground (Be'er Hagolah to Hoshen Mishpat, *ib.*).

**Removal Equal to Theft.** He who removes his neighbor's landmark, and thus appropriates a portion of his neighbor's property, be it even a finger's breadth,

if he does it with violence is a robber, and if he does it secretly is a thief." Solomon ben Adret decided that a trespasser building on the land of his neighbor may have his house razed because the owner of the ground is not obliged to part with it or "to take money for his inheritance," but may insist upon repossession of his ground (Be'er Hagolah to Hoshen Mishpat, *ib.*).

The greatest care was, therefore, taken to insure accuracy of measurement in fixing the boundary-lines, especially when a field was about to be sold. The form of conveyance of the field of Makpelah (Gen. xxiii. 17) shows great care in the formal terms, and refers to the "gebul," the boundary-lines of the estate. In Talmudic times, as stated above, official surveyors were appointed. In measuring two fields the surveyor was not permitted to measure the one in summer and the other in winter, because the measuring-line shrinks in summer (B. M. 61b; Shulhan 'Aruk, Hoshen Mishpat, 231, 18). In measuring the lines of land to be divided among brothers or tenants in common, the law enjoins great care, because in measuring lands the space of a finger's breadth is as valuable as if it were sown with crocus (B. M. 107b; Hoshen Mishpat, *l.c.* 16). The lines and angles of the field had to be described, and in the deed the names of the owners of the adjoining land were given (Hoshen Mishpat, 219, 1-5, based on B. B. 62a *et seq.*).

When a division of dwelling grounds held by tenants in common was made, a dividing-wall had to be built of such material as the local custom prescribed. Each of the parties had to contribute one-half of the strip on which the wall was built (B. B. i. 1). When

BOUNDARY-STONE OF GEZER, DISCOVERED BY M. CLERMONT-GANNEAU.  
With the inscription גזר גזר ("Limit of Gezer.")

first to set at naught the ancient law (Hosea v. 10; Job xxiv. 2). The rabbinical authorities, however, reestablished and enforced it. They appointed surveyors familiar with the boundaries of each estate,

the owners of two adjoining fields desired to build a dividing-fence, they built it on the party line, and each erected a sign on his side to indicate his ownership up to that point (*ib.* 2). If only one of them

wished to build the fence, he had to build it entirely on his own ground (*ib.*). The owners of fields were not compelled by law to build boundary-fences except where local custom so prescribed, but the owners of gardens were compelled to do so (*ib.*; Hoshen Mishpat, 158, 1). The prescribed height of such fences was ten handbreadths, or four ells (Hoshen Mishpat, *l.c.* 3; "Yad," Shekenim, ii, 16),

Babylonian Boundary Stone, dated 1120 B. C.  
(From J. de Morgan, "Recherches Archéologiques.")

and the width was determined by the local custom (Hoshen Mishpat, 157, 4). Such a fence might not have any opening in it; it must be a dead wall (*ib.*).

Where the boundary-fence was built to separate the lands of tenants in common, which laws had been partitioned, both parties shared the expense; and if the wall or fence fell, the materials were divided between them (*ib.* 3, 5).

The law of party walls in cities was quite well developed, its principles being substantially those prevailing in modern law. A party wall between two houses might be used by both owners; each might dig on his side, and put joists into the wall; but he must take care not to overload it. The weight of the material laid upon it was determined by local regulations (B. B. 6a; Hoshen Mishpat, 153, 14, and gloss). If the wall was owned by one of the adjoining owners, the other had not the right to use it (B. B. *l.c.*; Hoshen Mishpat, *l.c.* 15); but if he did use it, he might acquire a legal right by prescription (B. B. *l.c.*; Hoshen Mishpat, *l.c.* 16).

If the wall was owned by one of the adjoiners, and in building it he had made holes in it on his neighbor's side, this did not give his neighbor the right to use them without the owner's consent. They might have been made as a matter of convenience simply; so that, if the neighbor was permitted to use the wall, he need not cut into it, and thus weaken it (B. B. *l.c.*; Hoshen Mishpat, *l.c.* 19). See EASEMENTS, NEIGHBORS.

**BOURGAS:** City of eastern Rumelia (southern Bulgaria) and port on the Black Sea; six hours distant from Constantinople. The Jews of Bourgas came originally from Yambol and Carnabat, the first family settling in 1879. There are a synagogue, a Talmud Torah, and a school for girls, with about 80 pupils, under the management of the Alliance Israélite Universelle. The Presente family of Bourgas is the richest in Bulgaria. In 1901, in a total population of 5,000, there were 550 Jews, mostly Greek.

M. FR.

**BOURGES:** Capital of the department of Cher, France. From the beginning of the Middle Ages Jews dwelt in Bourges. It is recorded that in 568, and again in 624, attempts were made to convert them to Christianity ("Gallia Christiana," ii, 13, folio ed., 1716; "Vita Sulpicii," ii., ch. 3). After an interval of more than five centuries, during which little or no trace has been left of their presence in the city, it is chronicled that the French king, Philip Augustus, delivered over to Grand Master Matthew the house of the Jew Isaac Uradis at Bourges (Leopold Delisle, "Cat. des Actes de Philippe-Auguste," No. 121; "Hebr. Bibl." xx, 14). A short time afterward (1204), in a list of the Jews authorized to reside at Châtelet, near Paris, occurs the name of Benedictus Bituricensis, a native of Bourges, as his name implies (Delisle, *ib.* No. 890). Toward the end of the same century the Jews of Bourges had become somewhat numerous, judging from the many entries against their names on the royal tax-list (Lazard, in "Rev. Et. Juives," xv, [not xiv, as given by Gross, *s.v.*] 240, 246, 248, 258), and were in a prosperous condition.

A decree of Philip V. ("the Fair"), issued to the magistrates of the province Jan. 24, 1310, regulated the procedure for the recovery of debts due to Jews within the bailiwick of Bourges (Siméon Luce, "Cat. des Documents du Trésor de Chartres," in

"Rev. Et. Juives," ii. 62) as follows: (1) Suit by a Jew for the recovery of a debt outstanding twenty years or more was prohibited, unless it was established that before the expulsion of the Jews legal steps had been taken for enforcing payment; (2) any record of payment was taken as proof of discharge of the debt; (3) the simple oath of a debtor attested by a single witness, was a sufficient answer before the court from a debtor to his creditor in all cases wherein the debtor was of good repute and the debt did not exceed ten pounds; (4) no Christian debtors of Jews were to be imprisoned if they were willing to mortgage their property for a sum equivalent to their debts; and lastly (5) magistrates were to deal leniently with debtors of Jews appealing from adverse decisions, and were to receive their appeals. We have no record of learned Jews at Bourges. Mention is made of a certain Tosa'ist (glossarist of the Talmud) (R. H. 24b), Elia b. Solomon of נוריניט, which word may possibly be a mistake for בוריניט, according to the reading of the "Kore ha-Dorot," folio 15b.

**BOVO BUCH.** See BABA BUCH.

**BOW.** See WEAPONS.

**BOWL.** See DRINKING-VESSELS.

**BOX-TREE** (Hebrew, תאשור): Judging by Isa. lx. 13, the box-tree (A. V. "box") is a tree of the Lebanon, promised for the rebuilding of the Temple, together with the "fir-tree and pine." In Isa. xli. 19 there is a prophecy that the fir-tree, the pine, and the box-tree (R. V., margin, "cypress") would flourish in what was then the desert. In Ezek. xxvii. 6 the Revised Version, adopting a better division of the consonants, translates "boxwood from the isles of Kittim" as parallel to fir, cedar, and oak, used for ship-building. In Ezek. xxxi. 3 Ewald emends "the Assyrian" (אשור) to read "a box-tree" (תאשור) ("Behold a box-tree was in Lebanon"). Compare Cornill's Ezekiel, *ad loc.*

The tree in question is called "te'ashshur," a word occurring only in Hebrew. That Aquila and Theodotion simply transliterate the word throws a suspicion on the tradition; likewise that the Septuagint ("cedar," Isa. lx.) evidently makes a poor guess. Symmachus, as well as the Vulgate, wavers between the renderings "box-tree" (Isa. xli.) and "pine" (Isa. lx.). Peshitta (*shurbinta*) and Saadia understand that the *sharbin*-tree of modern Arabic is meant. This seems to be the *shurmenu* of the Assyrians, which, according to a geographical list (Delitzsch, "Wo Lag das Paradies?" p. 101), was the characteristic tree of the Lebanon. At present the *sharbin* of the Lebanon (called a cypress by some, a kind of juniper by others) is a pine-tree, extending its branches widely at a small angle with the stem, and bearing very small fruit-cones (Seezen, "Reisen," i. 167). I. Löw ("Aramäische Pflanzennamen," pp. 387-388) distinguishes this *Juniperus oxycedrus* or *Phanicea* from Syriac *sharvaina*, *Cupressus sempervirens* (Targumic *shurbina*, Syriac *shurbinta*, a differentiation which is followed at present by few writers). Hoffmann ("Ueber Einige Phönizische Inschriften," p. 21) tries to assimilate the

Hebrew "te'ashshur" with the word "shurbin" by a series of emendations. But for the testimony in form of the traditional view furnished by the Hexaplar, this identification would be acceptable. The identification with the box-tree, on the other hand, is supported by Theodotion and the Targumic *eshker'o'a*, which, after the Syriac *eshkar'a*, is the *Burus sempervirens* (Löw, *ib.* p. 63); not the *Burus longifolia*, which, besides being too low, is a shrub, and does not occur in Phenicia. The fact that it came from Kittim (Cyprus) does not help toward the solution of the difficulties involved. Possibly both branches of the tradition rest only on the graphic similarity; but with the scanty material at disposal no decision between the two explanations is possible. See CYPRESS.

J. JR.

W. M. M.

**BOZECCHI** or **BUZECCHI** (בוציקי): Prominent Italian family, the members of which when settling at Rome called themselves after their native place, Buzecchio, in the province Forli. Traces of the family may be found as far back as the thirteenth century. A synagogue built by members of a family of this name existed as early as 1240. By the end of the fourteenth century the name had disappeared and had become incorporated with that of ANAW, of which family the Bozechis were an offshoot. Four members of this family deserve mention:

1. **Benjamin ben Judah**: Exegete, grammarian, and philosopher; born at Rome about 1295; died there about 1335. He was the disciple of Joab ben Benjamin ben Solomon. Although his activity lay in the fields of exegesis and grammar, the poet Immanuel of Rome represents him as an accomplished scientist and philosopher. He was the author of the following works: (1) a commentary on Chronicles and Proverbs, still extant in manuscript (Codex de Rossi, 308<sup>1</sup>, 691, 728<sup>3</sup>; Paris, 214<sup>3</sup>; Oxford, 221<sup>2</sup>, 364<sup>1</sup>, 714<sup>3</sup>), in which he endeavors to avoid all haggadic explanations, condemning them and adhering to the literal interpretation based upon grammar and lexicography (he frequently quotes Ibn Gannah, Ibn Ezra, and Kimhi, who served him as models); (2) a supplement to Isaiah Trani's unfinished commentary on Kings (Codex Angel 1); (3) glosses to the greater part of the Bible (compare Berliner, in "Hebr. Bibl." xiv. 69); (4) "Mebo," an introduction to a Hebrew grammar which, published with Kimhi's "Mohalak," was Pesaro, 1560, enjoyed great success, and was often reprinted.

2. **Judah ben Benjamin**: Physician, probably son of the former; lived at Rome in the fourteenth century. He was the friend of Immanuel, who praises him in his "Mahberot" (xxii. 94).

3. **Menahem**: Probably an uncle of Benjamin; mentioned by the latter in the glosses to Isa. xxxiii.

4. **Shabbethai ben Menahem**: Praised, together with his father, by Immanuel (*l.c.* xxviii.).

I. BR.

**BOZRAH** (LXX., *Bosoppa* and *Bosop*, translated "wall"; Vulgate, "Bosra").—**Biblical Data:** 1. According to Isa. xxxiv. 6, lxiii. 1; Amos i. 12; Jer. xlix. 13, 22, one of the principal cities, or perhaps the capital, of Edom. Gen. xxxvi. 33 (= I Chron. i. 44) states that the Edomite king Jobab, son of Zerah, came from Bozrah; and in accordance with Gen. xxxvi. 42, "Mibzar" is perhaps to be read "from Bozrah." In Micah ii. 12 "the sheep of Bozrah" has been understood as a proverbial expression for a great multitude; but the term admits of other and more plausible interpretations. Most modern translators understand "Bozrah" here as "sheepfold," while the Septuagint ("in [their] crowd") and the Vulgate ("in the fold") interpret the word as a common noun with a preposition prefixed. Eusebius ("Onomasticon") locates Bozrah "in the mountains of Idumaea." Most probably, therefore, it is the modern village Buṣṣera (Buṣṣereh), on the road between Tuffile (ancient Tophel?) and Shōbek, with fifty houses and some insignificant ruins (Baedeker-Socin, "Palestine and Syria," 2d ed., p. 151).

2. Jer. xlviii. 24 mentions another Bozrah, by the side of Kerioth in Moab, from which it would appear that the place usually known as BEZER is meant.

Care must be taken not to confound with these, as has often been done, the great city **Bosra** (Greek *Bosrupa*) in the Haurān, the capital of that region during Roman supremacy (when it was called "Bosra Nova Trajana"), and even under Arab dominion. This place now shows considerable Roman ruins. It is mentioned (I Macc. v. 26, 28) as "Bosora," a strong and great city of Gilead, captured by Judas Maccabeus, evidently with the help of the Nabateans (*ib.* v. 25), who at a later period possessed the place.

**BIBLIOGRAPHY:** Buhl, *Edomiter*, 37; idem, *Geographie des Alten Palästina*, pp. 231 et seq.; Benzinger, in Pauly-Wissowa, *Real-Encyclopädie der Classischen Altertumswissenschaft*, v. 789.  
J. JR.

W. M. M.

—**In Rabbinical Literature:** According to some scholars, there was only one Bozrah; and the contradiction in the statements that the city belonged both to Edom and to Moab is explained as follows: The Moabite Bozrah was the birthplace of the Edomite king (Gen. xxxvi. 33) when Edom no longer produced men fit to be rulers. For this reason also, the Prophets included Bozrah in their prophecies against Edom because that city furnished kings to Edom (Gen. R. lxxxiii. 3). Other scholars, however, among them the Syrian Aphraates ("Homilies," ed. Wright, p. 212), distinguish two cities by the name of "Bozrah," the birthplace of King Jobab thus being Edomitish (Num. R. xiv. 8). Bozrah is Job's legendary birthplace or residence (compare **JOB IN RABBINICAL LITERATURE**).

**BIBLIOGRAPHY:** Ginzberg, *Die Haggada bei den Kirchenvätern*, 1900, pp. 124, 125.

L. G.

**BOZZOLO, HAYYIM OBADIAH BEN JACOB OBADIAH DI:** Talmudist and cabalist; lived at Salonica in the middle of the sixteenth century; probably a native of Bozzolo in Italy, wherefore Conforte ("Kore ha-Dorot," ed. Cassel, p. 39a) calls him "Di Bozzolo," while Nepi-Ghirondi ("Tole-

dot Gedole Yisrael," No. 15) has the name in the corrupt form of **רוכס** ("Dukes" or "Rukes"), from **ריבויטל**.

Bozzolo was a prolific writer. Many of his halakic decisions are scattered throughout the later responsa. A more extensive work in two volumes, entitled "Be'er Mayim Hayyim" (Well of Living Water), the first having the separate title "Ez Hayyim," the second "Me'or Hayyim," contains cabalistic explanations of the ritual laws (Salonica, 1546).

I. BR.

**BRACELETS:** Ornaments in the form of rings for the arm, worn by the Hebrews, as well as by all ancient peoples. Besides serving as ornaments they were also worn, like earrings and amulets, as a protection against demons (W. R. Smith, "Religion of the Semites," 2d ed., p. 453), and intended to protect the upper arm and the wrist, on which they were usually worn, from wounds. The women commonly adorned themselves thus; but Num. xxxi. 50 and

Gold Bracelet from Cyprus.

(From the Cesnola collection in the Metropolitan Museum of Art, New York.)

II Sam. i. 10 show that men, especially men of rank, also wore such ornaments. An illustration printed in Layard's "Nineveh and its Remains" (p. 125, ed. 1849) shows that both arms were decorated, as is occasionally the custom with the Arabians to-day (Niebuhr, "Travels in Arabia and the Surrounding Countries," 1778, p. 164). The styles probably varied; and the bracelets may often have been coiled, like a snake (Wilkinson, "Ancient Egyptians," ii. 342; Riehm, "Handwörterbuch," i. 115). Three words for "bracelet" occur in the Bible: (1) "ez'adah" (Num. xxxi. 50; II Sam. i. 10), for which Wellhausen proposes to read "hazze'adah"; but compare Nestle, "Marginalien," p. 15, who defends the Masoretic text (in II Kings xi. 12 probably "hazze'adot" must be read instead of "ha'edut"); (2) "zamid" (Gen. xxiv. 22, xxx. 47; Num. xxxi. 50; Ezek. xvi. 11, xxiii. 42; compare "šamadu"—to join, to tie together—which seems to denote the bracelet worn

around the wrist; while "ez'adah" or "ze'adah" was worn on the upper arm; compare Gen. xxiv. 30, 47; Num. xxxi. 50; (3) "sherah" (Isa. iii. 19; compare Targum, "shere yadayya," which does not mean "necklaces" but "bracelet," like the Arabic "siwar"). "Sher" in the Mishnah denotes not only the bracelet worn by men and women, but also the chain around the neck of a horse. To these may perhaps be added "rumaz" (Ex. xxxv. 22; Num. xxxi. 50); compare Arabic "kumzat" = little ball, and often meaning little golden balls strung together, which, according to Diodorus Siculus, the Arabs were in the habit of wearing around the wrist. Others take it to mean a kind of necklace, which Diodorus also mentions.

J. JR.

W. N.

**BRAFMAN, JACOB:** Jewish convert to Christianity; born in Russia; died in the last quarter of the nineteenth century. After having tried many professions, among them photography, tuition, and commerce, he embraced Christianity. Supplied with his certificate of baptism, which entitled him to an official position, he was appointed professor of Hebrew in the seminary at Minsk, and at the same time was charged by the Holy Synod to devise means of spreading Christianity among the Jews.

In 1866 Brafmann made his first appearance as a publicist, and at once exhibited the characteristics which made him notorious among the Russian anti-Semites. "In the last years," he says in the "Wilenski Vyestnik" (1866, No. 149), "there is among the Jews of Minsk a great religious movement favorable to Christianity." This remarkable statement at once brought forth many polemics in the Russian press. Anticipating a conversion en masse of the Jews of Minsk, the press investigated the reasons for such an unexpected triumph of Christianity among the Jews. Brafmann, encouraged by this brilliant debut, thereupon undertook a systematic campaign of slander against his former coreligionists. He published a series of articles entitled "Yevreiskiya Bratstva v Gorodakh Zapadnoi Rossii," in which he endeavored to convince the reader that there existed in every town of western Russia a Jewish confraternity having for its object the acquisition and exploitation of power over the non-Jews, and possessing unlimited means to carry out this object ("Wilenski Vyestnik," 1867, Nos. 135, 137; reprinted in book form, Wilna, 1869). This series was soon followed by a work entitled "Kniga Kahala" (Wilna, 1869). It is divided into four parts: (1) The transactions of the kahala of Minsk ("kahal," derived from the Hebrew קהל = "community," assumed in Russian the significance of "board of the community"). The documents, which Brafmann claimed to have found in the archives of the board of education of Wilna, extended from 1794 to 1803. (2) Annotations on the transactions, in which the author interpreted them arbitrarily, asserting that all the illegalities contained therein are in constant vogue among the kahals, and are in consonance with the very principles of the Jewish religion. (3) Exploitation de jure. (4) Exploitation de facto.

As its author expected, the "Kniga Kahala"

created a great sensation; and the Russian press devoted many columns to it. But impartial critics dissected the book and discovered that the "transactions" were simple forgeries. Among many proofs of their falsity the most interesting is that given by Shereshevski, who pointed out that a third of the transactions were dated on Saturdays or feast-days, when writing is prohibited.

**BIBLIOGRAPHY:** Shereshevski, *O Knigje Kahala*, St. Petersburg, 1872; Brashin, *Kniga Kahala*, Wilna, 1870; *Vjestnik Yevropi*, 1872, pp. 11 *et seq.*; Orshanski, *Yevrei v Rossii*, pp. 346-368; Seiberling, *Gegen Brafmann's Buch des Kahal*, Vienna, 1881; *Ha-Shahar*, iv, 321, xl, 242.

I. BR.

**BRAGADINI:** Family of printers at Venice. After the decline of the BOMBERG printing-press a fierce rivalry grew up at Venice among the patrician families who wished to profit by printing Hebrew books. Among these, two distinguished themselves by the bitterness of their struggles, the Bragadini and the Giustiniani. The first of the Bragadini to engage in the trade was **Aloisio I.** Among the consequences of their rivalries were the denunciation of the Talmud and the confiscation of many Hebrew books in 1553. As Giustiniani ceased to print in 1552, Bragadini remained master of the field; even in the beginning of the eighteenth century, Hebrew books could be printed at Venice only under the name and authority of the Venetian nobleman Bragadini ("Stamperia Bragadina"), who received payment in return for his patronage. The first Hebrew book issued by Bragadini was Maimonides' "Mishneh Torah" (Venice, 1550), with notes by Meir Katzenellenbogen of Padua. When Giustiniani also issued an edition of this work in 1550-51, Katzenellenbogen, who at that time was associated with Bragadini, appealed for protection to Moses Isserles of Cracow, who decided in favor of Bragadini's edition. Aloisio Bragadini continued to print until 1575, his last work being the "Mishneh Torah," published in 1574-75. The first work of his son **Juan** was Abarbanel's Pentateuch commentary, 1579; in 1614 he issued an edition of the Bible. **Pietro Bragadini** printed an edition of the Mishnah in 1614 and another work as late as 1649. The presses were idle from 1631 until 1638, but after 1639 his brothers were associated with Pietro. The following members of the Bragadini family were also printers at Venice: **Lorenzo**, 1615-30, 1639-50; **Aloisio II.**, 1624-30, 1639-50; **Vicenzio I.**, 1639-49; **Nicolaus**, 1639-50; **Giacomo**, 1639-50; **Girolamo**, 1639-67; **Vicenzio II.**, 1697-98, and his brother **Aloisio III.**, who worked alone as late as 1710. The Christian printers in whose establishments work was done for the Bragadini, or the "Stamperia Bragadina" itself printed, were: Gara, Zanetti, Cajon, Pradoto, Vedelago, Doriguzzi, Ambrosini, Bona, and Paoli.

A. F.

**BRAGANÇA:** City of Portugal, in the province of Tras-os-Montes. In 1250 nineteen of the Jews living there were accused of usury. They increased to such an extent that a few years before their expulsion they paid 30,000 reis in taxes. Many of the

Jews that were expelled from Spain went to Bragança, which afterward became the home of a large number of Maranos. Manuel de Pina, Jacob de Castro Sarmiento, and others were born here.

S. J.

**BRAHAM, JOHN** (the theatrical name of **John Abraham**): English singer; born in London 1774; died there Feb. 17, 1856. His parents dying in his childhood, he became a chorister at the Duke's Place

John Braham.

Synagogue, till one of his former companions in the choir, named Leoni, adopted him. Under him Braham studied and made such progress that on April 21, 1787, he made his debut at Covent Garden Theater. Two years later Leoni became bankrupt, and Braham was thrown on his own resources until he met Abra-

ham Goldsmid, a man of wealth who became his patron. Next he went to Bath, where he sang under Rauzzini till 1796, when he was engaged by Storace at Drury Lane Theater to sing in his new opera, "Mahmoud" (April 30, 1796). Here Braham was so successful that he was at once engaged for the Royal Italian Opera House, as well as for the annual oratorios and at the Festival of the Three Choirs at Gloucester.

In 1797 Braham determined to go to Italy to study singing. On arriving at Paris he and Nancy Storace gave a series of successful concerts under the patronage of Josephine Beauharnais, which delayed their arrival in Italy till the following year. There they sang at all the chief cities, including Florence, Milan, Genoa (where Braham studied under Isola, and sang with Marchesi), Leghorn, and Venice, whence they proceeded to Trieste, Vienna, and Hamburg.

In 1801 Braham reappeared at Covent Garden, and from this point his career was an unbroken succession of triumphs. On Feb. 9, 1802, was produced "The Cabinet," the libretto of which was written by Thomas Dibdin, and the music by Braham. Then came "The Siege of Belgrade" (March 15) and "Family Quarrels" (Dec. 18, 1802), the work of Dibdin, with the music of Braham, Moorhead, and Reeve, in both of which Braham appeared. On Dec. 13, 1803, he sang in "The English Fleet," the entire music of which was Braham's own composition; in this opera he introduced the duet "All's

Well," which has become one of his best-known works. He wrote also the score of "The Paragraph," and on Dec. 10, 1804, sang in "Thirty Thousand," in the production of which he collaborated with Reeve and Davy. On March 27, 1806, he appeared at the King's Theater as *Sesto*, in Mozart's opera "Clemenza di Tito," the first performance of any of Mozart's operas in England.

Braham succeeded to Drury Lane in 1805, and produced there most of his operas. Among these were "False Alarms," on the score of which he was assisted by King (Jan. 3, 1807); "Kais," jointly with Reeve (Feb. 11, 1808); "The Devil's Bridge" (Oct. 10, 1812); "Narensky," with the assistance of Reeve (Jan. 11, 1814); "Zuma," in conjunction with Bishop. Of other operas may be mentioned "The Americans," by Braham and King, produced at the Lyceum April 27, 1811, and in which occurred his famous song, "The Death of Nelson"; "Isidore de Merida" (1827), and "The Taming of the Shrew," both in conjunction with T. B. Cooke as librettist, in the following year.

In 1810 he joined Mrs. Billington in a tour of the provinces, and on his return the next year he appeared at the Lyceum. For two years Braham was engaged with Reeve in composing; and in 1816 he reappeared in Italian opera at the King's Theater in Mozart's "Clemenza di Tito," singing his old part, *Sesto*. This opera was followed by "Cosi fan Tutte," by the same composer, in which Braham sang *Guglielmo*. In the same year he married Miss Bolton of Ardwick, in Lancashire.

Braham published, in concert with I. Nathan, "A Selection of Hebrew Melodies, Ancient and Modern," in 1815, for which Lord Byron wrote his famous "Hebrew Melodies."

When Weber's "Freischütz" was first produced in England (at the Lyceum July 20, 1824), Braham created the part of *Max*; and in the same composer's "Oberon," presented at Covent Garden Theater April 12, 1826, he interpreted the part of *Sir Huon*, and was especially strong in the scena "O 'tis a glorious sight to see!" written expressly for him.

Braham was also actively engaged at concerts, oratorios, and provincial festivals, and for more than a generation was regarded as the national singer. His voice was of extraordinary power, sweetness, and compass (19 notes in natural tone, with a falsetto ranging from D to A in alto). Though he could sing in faultless style and taste, rarely did he resist the opportunity for sensational effects.

Braham amassed a large fortune during his forty years of professional life; but he subsequently lost it by disastrous speculation. In 1831 he bought the Colosseum in Regent's Park, London, and four years later he built the St. James's Theater. Both ventures proved ruinous; and in 1839 Braham found himself compelled to return to the stage and concert-room. In 1840 he went to America on a tour which proved unsuccessful. For several years Braham continued to sing at concerts and provincial festivals, and he did not retire until March, 1852.

**BRAHE, TYCHO.** See GANS, DAVID.

**BRAHM, OTTO (Abrahamsohn):** German dramatic critic and manager; born in Hamburg Feb. 5, 1856. He studied philosophy, German philology, and the history of art, at Berlin, Heidelberg, and Strasburg, and was a pupil of Wilhelm Scherer, the historian of literature. Among his writings are "Das Deutsche Ritterdrama des Achtzehnten Jahrhunderts" (1880), and biographies of Gottfried Keller (1883), Il. von Kleist (1884, 3d ed., 1892), Ibsen (1887), and Schiller (1888-92). Interested in the modern so-called "naturalistic" school, he, in conjunction with several others, established Die Freie Bühne, a society designed to promote the production of the works of Ibsen and his associates.

In connection with this society, Brahm published a periodical also entitled "Die Freie Bühne," in which he defended the views of the modern naturalistic school. Upon the retirement of L'Arronge from the directorship of the Deutsches Theater it was leased to Brahm, who, with a very good cast, began to produce the works of Ibsen, Gerhard Hauptmann, Sudermann, Halbe, and Hirschfeld. Gerhard Hauptmann's "Die Weber" was performed more than one hundred times at this theater.

**BRAILA.** See RUMANIA.

**BRAILOV:** Town in the district of Vinitza, government of Podolia. The population at the census of 1897 was 8,972, including 3,924 Jews. Of the latter a few are engaged in agriculture, the pursuit of which was nearly closed to them by the laws of 1882. Three hundred and eighty-nine Jews are engaged in manufacturing peasants' shoes, which are sold at the markets of the Kherson and Bessarabian governments. The economic condition of these Jews is getting worse every year, as may be seen by the increasing number of families asking for charity at Passover (120 families in 1898). Fifty children attend the Talmud-Torah.

**BRAININ, RUBEN:** Hebrew publicist and biographer; born in Russia in the last half of the nineteenth century; is now (1902) living in Berlin. At different times Brainin contributed to "Ha-Meliz," "Ha-Zefirah," "Ha-Maggid," and "Ha-Shiloah." In 1895 he issued a periodical under the title "Mi-Mizrah u-Mi-Ma-arab" (From East and West), of which only four numbers appeared.

Brainin is the author of several pamphlets, the most important of which are his sketch of Perez Smolenskin's life and works, Warsaw, 1896; and a translation of M. Lazarus' essay on Jeremiah, Warsaw, 1897. He has also written about one hundred biographical sketches of modern Jewish scholars and writers.

To "Aḥiasaf" Brainin has contributed the following articles: "Hane Sraḥ" (Barren Trees) (i. 32); "Bar Ḥalafṭa" (ii. 71); "Dappim Mekuṭṭa'im"

(Loose Leaves) (v. 120). He has also contributed to the same periodical the following biographical sketches: M. Lazarus (iv. 214); M. Güdemann (iv. 219); Theodore Herzl (v. 222); Israel Zangwill (v. 233); and Max Nordau (v. 247).

**BRAININ, SIMON:** Russian physician; born at Riga, Livonia, July 15, 1854. He graduated from the gymnasium of his birthplace; studied medicine at the universities of Dorpat and Berlin; held the position of physician of the Jewish community of Riga; and was one of the directors of the community, the last independent Jewish "kahal" in Russia, until this institution was abolished by the government. He was a member of the committee of the government to investigate the rights of the Jews of the city of Riga, 1885; delegate from the government of Poltava to the rabbinical conference at St. Petersburg, 1892; and a member of the Society for the Promotion of Culture Among the Jews of Russia. In 1895 he emigrated to New York, where he is now (1902) a practising physician, and member of the county medical and German medical societies, of the Harlem Medical Association, and of the New York Historical Society. Brainin is the author of: "Orah la-Hayyim," a work on popular medicine, in Hebrew, Wilna, 1883; "Der Aerztliche Führer," Riga, 1885; "Ueber Kefyr," Vienna, 1886; and many articles in various periodicals.

H. R.

**BRAMBLE:** A prickly shrub. The word serves as a translation for two Hebrew terms and a Greek one, all of which, however, should receive other renderings.

(1) "Aṭad" (אֲטָד = the Assyrian "eṭīdu") figures in the parable of Jotham. It is the last tree to which the other trees came in quest of a king for themselves (Judges ix. 14, 15). In Ps. lviii. 10 "aṭad" is translated "thorns" (compare Gen. i. 11, "goren ha-aṭad"). The plant is one of the rhamnus group.

(2) "Ḥolal" (חֹלָל) is only once translated "bramble"; elsewhere it is rendered "thorns."

(3) *Báros*, out of twelve times that it occurs, is once translated "bramble" (Luke vi. 44). See THORNS AND THISTLES.

E. C.

G. B. L.

**BRAMSON, LEO:** Russian jurist and writer; born at Kovno April 17, 1869; graduated from the Moscow University as a "candidatus juris." He is a member of the St. Petersburg Pedagogical Society, secretary of the Jewish Colonization Association (St. Petersburg branch), initiator and member of the school committee of the Society for the Promotion of Culture Among the Jews of Russia, of the St. Petersburg Jewish industrial schools, member of the Educational Census, 1895-1900, and of the Imperial Free Economic Society. He was also the delegate of the Society for the Promotion of Culture Among the Jews to the Pan-Russian Exhibition of 1896, and one of the directors of the reorganized Jewish industrial schools of St. Petersburg.

He wrote: "O Razvitiĭ Russkoi Industrii," Moscow, 1896; "V Yuzhnykh Yevreiskikh Koloniakh,"

St. Petersburg, 1894; "K Istorii Pervonachalnavo Obrazovaniya Russkikh Yevreyev," St. Petersburg, 1896; as well as many articles in "Voskhod" (1891-1900) on education and Jewish colonization. He was one of the editors of the "Sistematicheski Ukazatel Russkoi Literatury o Yevreyakh, 1708-1889," St. Petersburg, 1892.

**BRANDEIS, BARUCH JUDAH (HA-LEVI):**

Bohemian rabbi and author; lived in the second half of the eighteenth and the beginning of the nineteenth century at Prague, where he was assistant rabbi (dayyan). He was the son of Bezaleel Brandeis, rabbi in Jung-Bunzlau, whose work, "Zedah-Baruk," he published. Brandeis wrote "Leshon Hakamim," Prague, 1815, in two parts, a work intended as a reference-book on regulations governing the reading of the Torah, *qaddish*, burial of the dead, and mourning observances. The book, however, is incomplete and fragmentary, and is written in a heavy, ambiguous style.

I. BER.

**BRANDEIS, FREDERICK:**

Musician; born at Vienna July 5, 1832; died at New York May 14, 1899. He studied at the University of Vienna, and received instruction in the piano from Fischhof, Czerny, and Pyrkert, and in composition from Rufinatscha. During the Revolution of 1848 Frederick's father, Emanuel Brandeis (afterward a prominent teacher in New York; died 1873), lost his fortune and emigrated to America. There the son was at once thrown upon his own resources. His talents, however, secured for him the recognition of artists; and he soon received engagements as a pianist, in which capacity he made several tours throughout the country, notably one with William Vincent Wallace, the famous violinist, in 1849.

In about the year 1850 Brandeis settled for a

short time in Cleveland, Ohio, but a few years later removed to New York, where he devoted himself assiduously to composition. There, also, he formed the friendship of Julius Schubert, the well-known publisher, who gave him great encouragement, and sent some of his earlier efforts to Schumann and Spohr, both of whom expressed themselves in highly laudatory terms in regard to the young composer. About this time he played a sonata of his own composition at one of the chamber concerts given by Theodore Thomas. In 1860 he received the appointment of organist at the Church of St. John the Evangelist, and, upon the destruction of that church by fire in 1872, a similar position was offered to him at St. James's Roman Catholic Church, which he held until 1886, from which time until his death he was identified with the Church of St. Peter and St. Paul. Brandeis was also organist of the synagogue Shaaray Tefila (West 44th St.) from 1879 to 1892, and composed six hymns for the synagogal service. He was a member of the Manuscript Society from its inception; and several of his productions were performed under its auspices, among which the song, "Fly Not Thus, My Brow of Snow" (words by Heine), received the prize offered by the society for the best composition.

Brandeis produced 104 works in all, of which the following are generally considered the most popular: song, "My Love Is Like the Red, Red Rose" (words by Burns), a beautiful composition which immediately became popular upon its publication in the early fifties; trio for violin, piano, and cello; funeral march, "Humpty Dumpty," for orchestra (also arranged for piano); "Danse Héroïque," for orchestra; polonaise for piano, op. 52; gavot for piano, op. 53; "The Ring," op. 58, ballad for soli, chorus, and orchestra; the quartets "Sunken Cloister" and "Echoes," op. 64; song, "Wunsch," op. 36; "Observe When Mother Earth Is Dry," drinking-song from "Anacreon."

The religious music composed by Brandeis includes the above-mentioned "Six Hymn-Anthems," op. 85 (quartet or chorus); "Vespers," op. 92, for soli, chorus, and organ; and "Tantum Ergo," op. 63. Among his other works may be mentioned: "Prelude to Maria Stuart," for orchestra (performed by the Manuscript Society); suite for string orchestra; "Sechs Klavierstücke"; and "The Bards," duet for tenor and bass, with orchestral accompaniment. In conjunction with F. de Sola Mendes as librettist, he was writing an oratorio, "Moses in Egypt," when he died.

**BRANDEIS, MOSES** (surnamed *Harif* = "The Keen Talmudist"): German rabbi and Talmudic teacher; born about 1685; died June 24, 1761, in Mayence. As his surname indicates, he was famous in his time as a Talmudic dialectician, but he left no writings. His father, Jacob Brandeis, was rabbi in Zorek, Russia Minor (perhaps Zaryechye in the province of Poltava; see Walden, "Shem ha-Gedolim le-*Hadash*," I. 61). Moses studied at the yeshibah of Abraham Broda in Prague, and then directed a yeshibah in Fürth, Bavaria, which was supported

by his father-in-law, Gabriel ha-Levi, a rich philanthropist of that place. At the same time he performed the functions of a rabbi at Schnittach, a small place near Fürth. In 1717 he went to Jung-Bunzlau, Bohemia, as chief rabbi, and in 1733 became rabbi of Mayence. Moses was also a cabalist, observing strictly the rules of life laid down by Isaac Luria.

His sons were: Bezaleel Brandeis; Gabriel Brandeis, rabbi in Prague; and Jacob Brandeis, rabbi in Düsseldorf.

**BRANDENBURG:** Province of Prussia. In documents of the thirteenth century Jews are mentioned as living in the mark of Brandenburg and carrying on commerce there. In Belitz they were accused of having desecrated the host in 1243; and a similar charge caused a persecution at Pritzwalk in 1287. In 1294 the magistrate of Frankfort-on-the-Oder issued an agreement between the butchers and Jews of that city. So many Jews were living at Stendal by 1297 that a special Jews' regulation was issued. The Jews of Spandau are first mentioned in 1307, in a regulation regarding slaughtering issued by the margrave Herrmann; and Jews are similarly mentioned at Brandenburg and Eberswalde in 1315. In 1320 the margravine Agnes transferred to Berlin and Cologne her rights over the Jews in those cities, and in the same year the dukes of Pomerania did the same in regard to Prenzlau. The Jews' tax was regulated at Neu-Ruppin in 1323.

The Jews of the mark were highly favored, and their number was greatly increased under the rule of the Bavarian margraves, especially

**Early Settlements.** under Ludwig (1323-51). The latter gave letters of protection to the Jews at Havelberg, Arneburg, Pritzwalk, Seehausen, Werben, and Kyritz in 1334, to those at Salzwedel in 1344, and to those at Perleberg in 1345. In 1346 he granted to the butchers of Strausberg certain privileges in regard to slaughtering among the Jews. In 1348 the margrave enfeoffed a citizen of Luckau with the Jews of Guben, and pledged the Jews of Luckau with him for 150 marks silver. In 1349 the Jews of Berlin, Stendal, Angermünde, and Spandau were severely persecuted by the flagellants, among whose victims were the rabbis Joseph and Solomon, sons of Rabbi Jacob. The Jews were driven from Königsberg in 1351. Margrave Ludwig pledged the Jews of Müncheberg with the city in 1353; in 1356 he permitted the city of Mittelwalde to receive four Jews; Margrave Otto allowed the city of Rathenow to keep two in 1371. A Jews' street is mentioned at Stendal as early as 1369; Jobst of Moravia presented the site of the former Jews' school at Salzwedel to the Georgeshospital of that city in 1401.

The privileges that Margrave Ludwig had granted were confirmed in 1420 by Friedrich I., the first prince of the house of Hohenzollern, at Brandenburg. Conditions changed under his successors. In 1446 all the Jews of the mark were suddenly imprisoned at the command of the elector Friedrich II., and their property was confiscated. In 1509 thirty-

eight Jews of Spandau, Brandenburg, and Stendal were accused of having bought a host from a thief of Bernau, and were burned at Berlin;

**Under the** the remainder were expelled from  
**Hohen-** the country. The elector Joachim  
**zollerns.** II. again admitted several Jews in

consideration of 400 marks, and 3,000 marks silver paid annually to the mints at Berlin and Stendal respectively for protection. He especially favored the Jew LIPPOLD; but his successor had Lippold executed on the pretense of having poisoned the elector, and again expelled the Jews. In 1671 fifty Jewish families, who were among the emigrants from Wiener-Neustadt, were granted permission to reside in the mark for a space of twenty years by the great elector Friedrich Wilhelm. They were exempted from the poll-tax on the payment of 400 thalers in 1684. In 1685 they numbered eighty-six families; there were 116 families in 1690; and in 1692 they had increased to 177. In 1714 King Friedrich I. issued new regulations for his protected Jews, who by that time had obtained permanent residence.

In the beginning of the eighteenth century (1703) they were much harassed on the accusation of having reviled the founder of the Christian religion in their prayers. The General Regulations for the Jews ("General Juden-Reglement") of the year 1750 contained a clause to the effect that every protected Jew should take the oath of allegiance. In 1765 the question of increasing the payment for protection was considered. Toward the end of the Seven Years' war, and later, a number of influential and wealthy Jews were granted, free of charges, the same rights as Christian merchants, on account of their services to the state. Frederick the Great used the Jews arbitrarily for his purposes. In 1779 the Jews living in the mark numbered 5,782, of whom 3,409 came from Berlin. In 1899 they numbered 18,394. See also BERLIN; PRENZLAU; PRUSSIA.

**BRANDES, CARL EDUARD COHEN** (generally known as **EDUARD BRANDES**): Danish author and politician; born at Copenhagen, Oct. 21, 1847; brother of George Brandes. At the age of eighteen he entered the university of his native city, and at first diligently followed courses in Oriental and comparative philology, devoting himself especially to the study of Persian and Sanskrit. His taste for dramatic art, however, soon got the better of his philological pursuits, and upon graduation from the university he gave himself over entirely to writing, beginning his new career by the translation of two dramas from the Sanskrit. Gradually he developed an intense interest in politics, and while he continued to devote himself with undiminished enthusiasm to dramatic art and criticism, he plunged into an active political life, which resulted in his election in 1880 to the Folkething by the Democrats of Rudkjöbing. About this time

appeared his volume of character-sketches and studies on Danish dramatic art, "Dansk Skuespilkunst," Copenhagen, 1880, followed by a series on foreign dramatic art, "Fremmed Skuespilkunst," *ib.* 1881.

Brandes wrote a number of excellent plays, the chief merit of which lies in the psychological analysis and clever delineation of the characters involved. The following were the most successful of his productions that were performed on the Danish stage: "Lägemidler," 1880; "Gnygende Grund," 1882; "Et Besög," 1882 (a second edition of this play was published in 1884, and was later translated into German by Hoffory, Berlin, 1889); "En Forlovelse," 1884; "Et Brud," 1885; "Kjærlighed," 1887; "Overmagt," 1888; "Under Loven," 1891; "Asgerd" and "Mohammed," 1895; "Primadonna," 1901; besides his dramatization, in 1883, of the Norwegian novel "Garman and Worse" by A. L. Kjelland.

Brandes is also the author of a novel, "En Politiker," 1889, and of a political review, "Fra '85 till '91," 1891, both of them reflecting the same ultraradical opinions that he as a member of the extreme left (opposition) was accustomed to express in the Chamber of Deputies. His openly professed atheism gave rise to a much-discussed incident. Upon the election of Brandes to the Folkething the president of the Chamber deemed it proper to address the new member through the channels of a newspaper, asking him if his religious views stood in the way of his taking the customary oath. Brandes, while indignantly protesting against this intrusion upon the privacy of his personal views, expressed a willingness to comply with the custom. Until December, 1883, he published, in collaboration with Hörup and Berg, the "Morgenbladet," the organ of the democratic party. He was also connected with the publication of the "Nineteenth Century," a review of which his brother Georg was the editor-in-chief from 1874 till 1875. Since Feb. 1902 he has been sole editor of the daily "Politiken."

A. S. C.

#### BRANDES, ERNST IMMANUEL COHEN:

Danish economist; born at Copenhagen Feb. 1, 1844; died there Aug. 6, 1892. He was a brother of the critic Georg Brandes and of the author Eduard Brandes. His avocation was that of banker, but he retired soon from that pursuit and devoted himself to journalistic work. Articles on banking were written by him in "Politiken," "Tilskueren," and, during the last years of his life, in "Börstidningen," of which last he was the editor. In 1885 he published an extensive work on social questions, entitled, "Samfundsspørgsmaal," published in two parts, of which the first part treats of Malthus' "Essay on Population," and the second of the theory of value and other economic and social questions. This latter part especially is characterized not only by its clear and elegant style, but also by views differing from the current economic ideas and bearing the impress of the author's individuality.

**BIBLIOGRAPHY:** Salmonsen, *Store Illustrerede Konversationsleksikon*.

A. M.

#### BRANDES, GEORG MORRIS COHEN:

Danish author and critic; born in Copenhagen, Denmark, Feb. 4, 1842. He graduated in 1859, and for a short time studied law, but soon determined to devote his life to literature and philosophy. Brandes gained the university gold medal for his essay "The Idea of Fate Among the Ancients," in 1863; and the next year he took the degree of "candidatus magisterii." He spent the years 1866-67 in Paris, and was in Germany during 1868. From 1865 onward he had been in the midst of the conflict that raged around the burning questions of the day raised by Sören Kierkegaard and the Neo-Hegelians. Brandes entered into a three-cornered controversy between Bishop Martensen representing orthodoxy as

Georg Brandes.

against Rasmus Nielsen with his attempted harmonization of science and faith, and Bröchner on the side of science and philosophy. Brandes sided with Bröchner, whom he called his master, and expressed

himself in a pamphlet entitled "The Dualism in Modern Philosophy" (1866). The authorship is Brandes', but the ideas in it are not his own only, but also those of a group of younger men, who had chosen him as their spokesman. The pamphlet reveals Brandes as a declared advocate

of free thought and as a radical opponent of the current thoughts of the day; it maintains the impossibility of squaring orthodoxy with science and philosophy, and shows the trend of Brandes' future work.

In esthetics he did not attain self-consciousness so quickly. For many years he could not liberate himself from the ruling esthetic ideas of the day—those of F. W. Hegel and P. A. Heiberg, H. Hertz, and Hostrup. Here it was French poetry and criticism that brought him freedom and clearness of thought. His practical philosophy, which was utilitarian and naturalistic, came from John Stuart Mill, whom he knew personally and greatly admired, and from positivism. His method of literary criticism he got from Hippolyte Taine; but its color is a reflex from Musset, Mérimée, and St. Beuve.

Studies, controversies, and natural growth brought Brandes maturity; and in 1870 he took his Ph.D. degree, his thesis being "The French Esthetics of Our Day—An Essay on Taine." He left Denmark immediately after and spent 1870-71 abroad, visiting Taine, Mill, and Renan. When he returned in the fall of 1871 he was a mature thinker, a realist, and a literary revolutionist, entirely free from theological ethics, metaphysics, and romantic notions in esthetics. But Brandes was and is more than a radical. That he is a reformer in the best sense is

proved by his constant demand for truth, by the evolution of his genius, and by his strong personality. His history has proved the need of just such a person in the Danish community and in the north in general.

In the autumn of 1871 he began his famous series of lectures, "Main Currents in Nineteenth-Century Literature." Brandes talks much about foreign literature, but aims always at the Danish; charging it justly as being childish, insignificant, and disconnected with universal literature. As reasons for the

decay, he points frequently to the political degradation of the country, and shows how it has stood still out-  
**His** "Main Currents." side the main currents of civilization and has failed in originality. The charge of lack of originality is not quite correct. Brandes fails altogether to recognize the value of the revival of the Old Norse, as that, for instance, was brought about by Öhlenschläger and Grundtvig. He ridicules the prevailing German and Thorvaldsen ideas of antiquity, the northern family life and sex prudery, the state church, and he defines all things as mere products of climate, time, and race. But he also shows how completely modern life has broken with orthodoxy and romanticism. He fights for "free thought in research, and full sway of the human in art."

Altogether, the lectures were a bold presentation of French radical realism in all its strength and weakness. They aroused an enormous opposition from among the orthodox and reactionary, but gave Brandes a large following, especially of younger students and academic citizens, who understood the necessity of turning their thoughts into the universal currents. Brandes defended himself brilliantly in special pamphlets and in "Nyt Dansk Maanedskrift," which he edited together with Vilhelm Möller, and later in "Det Nittende Aarhundrede," which he, together with his brother Eduard, edited from 1874 to 1877. Brandes represents the introduction of the scientific method into the study of literature, and the exclusion of the then current so-called moral and esthetic standards represented by the Church, narrow-minded lawgivers, social conventionality, and political trammels. Though the lectures suffered considerably from loose statements, false views, and misrepresentations of historic facts, and though Brandes was not always true to his own genius, they nevertheless made him the father of modern Danish literary and art criticism, and carried his influence throughout the entire north.

In 1877 Brandes published a literary characteristic of "Sören Kierkegaard" and a masterly psychological treatise on "Danish Poets." In the same year he left Denmark and settled in Berlin. For the time being he had become tired of polemics, and was chagrined because the university had refused him

the chair in esthetics, left vacant by the death of Hauch. His farewell was  
**Considered** "a German of the Germans." an ovation and a triumph. In Berlin Brandes was considered "a German of the Germans," and he put himself in perfect rapport with German "Kultur." He contributed to the magazines, wrote several monographs, such as "Lassalle" (1877) and

"Disraeli" (1880), and edited a German edition of his "Main Currents."

In 1882 he returned to Denmark on the invitation of friends who had provided funds for a professorship for him. Conditions proved favorable, and he saw the seed he had sown in literature, art, and politics bearing good fruit. In fact, Danish politics had assumed a character in perfect harmony with his teachings, which result must be ascribed largely to his own influence and to that of his brother Eduard. But Brandes himself was a different person. He was as fiery and many-sided as before, but he paid more attention to the personality of his subjects than formerly, and tried less to represent them as results of the natural environment. The new views appear in lectures delivered at the university and published under the title "Young Germany" (1890); in books like "Modern Representative Men" (1883); "Ludvig Holberg" (1884); "Impressions of Russia" (1888); "Impressions of Poland" (1888); and several collections of essays of the same period. In all these studies can be seen how the influence of Mill and Taine has vanished, and how Brandes' independent study of Lassalle, Renan, Goncourt, Nietzsche, and others has transformed him and created in his mind an appreciation of personality previously entirely lacking. In opposition to the views of the day, he proclaims himself

**Proclaims** an aristocrat, and he reveals a wider  
**Himself an** and sounder view of esthetics. The  
**Aristocrat.** natural result of these changed views was a conflict with several of his former adherents and friends. Thus, in 1885 he became involved, on the question of marriage, in a polemical fight with the author of "A View of Life Founded on Love," a pupil of Mill and Spencer. In 1887 he was engaged in a similar conflict with Björnson; and in 1889 he disputed with Höfding about Nietzsche.

Brandes has written a large work on Shakespeare, which is translated into many languages, and is still (1902) a contributor to the magazines, and his subjects are most varied. In all his articles he presents new and genial views. He is more careful than in younger days, when he often gave his enemies opportunity to attack him on account of second-hand information and defective memory.

The best estimate of Brandes can be formed from the numerous congratulations that came to him on his sixtieth birthday (Feb. 4, 1902), in which he was characterized as "a genial polemic," an "insurrectionist par excellence," and one who had "given us freedom to build upon, fresh courage to breathe, and a light to lighten for us."

By the will of the late Consul Albert Berendsen a fund was bequeathed for a prize essay on "The Significance of Georg Brandes in Danish Society and Spiritual Life." By royal "patent conferring rank" of May 7, 1902, Brandes was made professor, a title which gives him precedence and is a victory for him of unusual importance.

s.

C. H. B.

**BRANDES, LUDVIG ISRAEL:** Danish physician; born in Copenhagen Oct. 26, 1821; died

there Sept. 17, 1894. In 1839 he entered the University of Copenhagen, and was graduated in medicine in 1845. After having spent some time in foreign countries, he studied for two years at the hospitals of Copenhagen, chiefly at the Almindelig Hospital, and in 1848 became assistant surgeon during the insurrection in Sleswick-Holstein. The same year he took the degree of licentiate, and in 1850 that of M.D. at the University of Copenhagen. Subsequently he became assistant physician at the Almindelig Hospital, and later at the Frederiks Hospital, and for some years practised medicine in Copenhagen, being also district physician. In 1863 he was appointed chief physician in the first division of the Almindelig Hospital, and in 1869 received the title of professor.

Brandes showed the greatest energy in philanthropic work. He was especially instrumental in founding, in 1859, the Kjöbenhavn's Sygehjem, a home for incurables and the aged of both sexes in Copenhagen, and was its medical director for a number of years. He also founded a society for seamstresses, which, in addition to giving relief, provided for the intellectual improvement of its members. He was for five years trustee of the Jewish congregation of Copenhagen.

From 1873 Brandes endeavored, by means of classes and lectures, to improve nursing both in the hospitals and privately. Whereas formerly only women in the lower ranks of life had been employed as hospital nurses, Brandes induced those of the upper classes to take up the work. His paper on the use and abuse of alcoholic beverages, published in 1877, has made the restriction of their abuse a leading question.

The most important of Brandes' scientific works is his handbook on internal diseases, "Haandbog i Sygdomsloren," 4 vols., Copenhagen, 1859-66.

s. A. M.

**BRANDÈS, MARTHE** (Marthe-Joséphine Brunschwig): French actress; born in Paris Jan. 31, 1862. She first studied design, sculpture, and music, and, finally, the drama. Successful in private theatricals, she entered the Paris Conservatoire and studied under Gustave Worms. In 1882-83 she won prizes; and Alexandre Dumas *filz* was so struck by her histrionic talent that he engaged her for the Théâtre du Vaudeville. From the first (1884), through her interpretation of *Diane de Lys*, Brandès became a favorite actress with the Parisian public. As *Georgette* in Sardou's play, in the "Renée" of M. W. Busnach (1887), and in Moreau's "Gérant," she obtained distinguished successes as a comédienne.

Brandès' first appearance at the Comédie Française (Sept. 27, 1887) was in the part of *Francine de Rivecourt* in Dumas the younger's "Francillon." She excelled also in classical parts, such as in "Andromaque" and "Iphigénie en Aulide," and especially in "Princesse Georges" (Feb. 27, 1888), Fr. Coppée's "Passant," and Dumas the elder's "Henri III. et sa Cour" (Jan. 5, 1889).

Returning to the Vaudeville in 1890, Brandès recreated many parts, and gained splendid triumphs

in "Liliane" (Feb. 24, 1891), in Jules Lemaitre's "Révoltée" (April, 1891), as *Hélène Rousseau* in Ibsen's "Hedda Gabler," and in Paul Hervieu's "Les Paroles Restent." On Nov. 17, 1892, she went back to the Théâtre Français.

Henceforth Miss Brandès became the interpreter par excellence of the plays of Dumas the younger and Paul Hervieu. She excelled in the portrayal of the modern woman of the world, self-willed and nervous. De Curel's "L'Amour Brode" and Parodi's "Reine Juana" (1893) won for her an individual position as an actress. Her great successes were in Pailleron's "Cabotins" (1894) and Hervieu's "Les Tenailles" (Sept. 28, 1895). She was elected a "sociétaire" in 1896, despite some slight opposition. Her powers as an actress were further developed in these years. She played in Meilhac's "Grosse Fortune," Lavedan's "Catherine" (1898), and in most of the stock plays of the Comédie (e.g., Hugo's "Ruy Blas" and "Hernani," Molière's "Tartuffe," Emile Augier's "L'Aventurière," and Beaumarchais's "Le Mariage de Figaro").

s. E. A.

**BRANDES, MORDECAI BEN ELIEZER**: German Talmudist; lived at Frankfort-on-the-Main in the middle of the eighteenth century. Engaged by the Jewish community as "porsler" (פּוֹרְשֵׁר), one who extracts from a slaughtered beast those sinews that are proscribed as food, he published on this subject a valuable work (Frankfort-on-the-Main, 1750); and was also the author of the works: "Zikron Ma'aseh" (A Memento of the Affair), reconciliatory advice to dissenting parties in the congregation of Frankfort-on-the-Main (*ib.* 1753); and "Zikron Teru'ah" (Memorial of the Trumpet), directions in regard to blowing the shofar.

k. I. Br.

**BRANDES, REUBEN ASHER**: Hebrew novelist and journalist; born at Wilna, Russia, 1851. Educated on the usual Talmudical lines, he came early under the influence of the MASKILIM, who made it their sole aim to enlighten the Jews.

In 1868, when but seventeen years of age, Brandes was asked to become a regular contributor to "Ha-Lebanon" (הַלְבָנוֹן), a Hebrew weekly published by Brill in Mayence, and for several years he devoted his pen to topics of the day and to criticism.

It was as a novelist, however, that he was to make a mark in Hebrew literature. In 1874 he published in "The Dawn" (הַשָּׁחַר), a monthly edited by Smolenskin at Vienna, his first story, entitled "The Mysteries of the Zephaniah Family" (מִסְתֵּרֵי בֵּית צְפַנְיָה), a tale of great promise from its style and vivid descriptions. The next year appeared in book form his second novel, called "The Repentant" (מִוֵּדָה וְעֹשֵׁב), which was followed by a voluminous novel treating of Jewish life called "Religion and Life" (הַדָּת וְהַחַיִּים). This remarkable work appeared in "The Morning Light" (הַבֹּקֶר אֹרֵר), published by Gottlobler at Lemberg in 1875.

Another novel of great merit, "The Two Extremes" (שְׁתֵּי הַקְּצוּוֹת), appeared in Lemberg in 1885. In this Brandes pictures in vivid colors the Orthodox and Reformed camps in modern Israel.

In 1882, at the time of the anti-Semitic riots in Russia, Brandes plunged into the Zionist movement and became one of its foremost advocates. To foster this idea he went to Rumania, and began the publication at Bueharest of a weekly in Judæo-German under the title "Yehudit." At the end of two years, however, Brandes was expelled from the country.

In 1891 he went to Cracow, Galicia, and started a weekly in Hebrew which he called "The Time" (עֵת). This paper existed for nine months, when, for lack of funds, its publication was suspended. Nothing of importance has appeared from his pen in recent years.

L. G.

M. RA.

**BRANDON, BENJAMIN RAPHAEL DIAS:** Dutch Talmudist and Hebrew author; died about 1750 at Amsterdam, where he was cantor. He wrote: "Orot ha-Mizwot" (Lights of the Precepts), on the purpose of the Biblical and the Talmudic precepts (Amsterdam, 1753); and "Emek Binjamin" (Valley of Benjamin), on halakic problems suggested by his friends in Amsterdam (*ib.* 1753). In very sharp contrast to the pure and simple language of his works is their content. For instance, the use of wine at "kiddush" and "habdalah" is to Brandon a proof that, as wine is a product of much skilled labor, so the world is not an original essence, but the work of a master ("Orot ha-Mizwot," 9b). Brandon wrote also "Keter Torah" (Crown of the Torah), a poem on the marriage of the Hebrew poet David Franco-Mendez of Amsterdam.

L. G. I. BER.

**BRANDON, JACOB ÉMILE ÉDOUARD:** French genre painter; born at Paris July 3, 1831. A pupil of Picot, Montfort, and Corot, he entered the Ecole des Beaux Arts April 5, 1849. Upon his graduation from that institution he assiduously devoted himself to the practise of his art.

Among the principal works exhibited by Brandon in the Salon have been: "La Canonisation de Sainte Brigitte" (1861); "La Jettatura di Borgo San Spirito" (1861); "La Dernière Messe de Sainte Brigitte" (1863); "La Charité de Sainte Brigitte" (1863), a design in encaustic for the oratory of the Church of St. Bridget at Rome; "Le Dimanche de la Pièbe Romaine au Traustévère" (1865; medal), a water-color; "Le Baiser de la Mère de Moïse" (1866); "Le Sermon du Daian Cardozo à la Synagogue d'Amsterdam, le 29 Juil. 1866" (1867; medal); "Les Fils de M. Octave Feuillet," portraits (1869); "La Leçon de Talmud" (1869); "Le Sabbat" (1870).

Brandon, who did not exhibit so frequently after 1870, is represented at the Museum of Lille by the pictures "The Improviser" and "A Scene in the Campagna." These, in common with his other genre pictures, are characterized by great fidelity to nature, and a powerful, vivid, though somewhat heavy coloring.

**BRANDON, JULES BENJAMIN:** French officer and scion of an ancient Sephardic family that went to France from Spain after the exodus of 1492; born Sept. 24, 1833, at Paris; died May 22, 1871. After studying at the Collège St. Barbe, he went to the Ecole Polytechnique in 1853, and entered the artillery. He married, in Aug., 1866, the eldest daughter of Colonel Salvador, nephew of the Jewish historian Joseph Salvador. At the outbreak of the Franco-Prussian war (1870) Brandon, who was then instructor (with the rank of captain) at the Ecole Polytechnique, immediately requested to be transferred to active service. He joined the army, was made a prisoner at Sedan, and was sent to Germany, his wife following him. As soon as the armistice was signed, and he received news of the events of the eighteenth of March and of the proclamation of the Commune, Brandon was one of the first to avail himself of the permission granted to the officers to return to France. He hastened to offer his services to the leaders of the army of Versailles. Though the troops at that time were disorganized, he rapidly reformed his battery; but on entering Paris, May 22, 1871, he was killed by a stray ball fired from a window. General Berkeheim placed the name of Brandon, as one of the best and bravest officers of the second army corps, at the head of the list of captains to be read at daily roll-call, in order that this tribute should be "a title of glory that will be preserved in his family."

M. BL.

**BRANDSTÄDTER, MORDECAI DAVID:** Galician novelist; born Feb. 14, 1844, in Brzesko, Galicia. He received a good Talmudical education, and after his marriage (at the early age of fourteen) settled in the home of his wife's parents in Tarnow, pursuing his rabbinical studies for about six years longer. During that time he also became acquainted with Neo-Hebraic and German literature. At the age of twenty he established himself in business in Tarnow, and is now (1902) one of the most prominent manufacturers in the district.

Brandstädter's first attempt at literature was the translation into Hebrew of L. Philippson's pamphlet, "Haben die Juden Wirklich Jesum Gekreuzigt?" (Berlin, 1865), which was published in the Hebrew periodical "Ha-Ibri" in Brody. But his real literary activity began at the time he visited Vienna in 1869 and there made the acquaintance of P. Smolenskin, who had just started his monthly, "Ha-Shahar." Smolenskin recognized Brandstädter's talent and encouraged him to write novels. The first sketch from his pen, "Eliyahu ha-Nabi" (The Prophet Elijah), appeared in No. 1 of "Ha-Shahar," and was soon after translated into Polish and published in the "Israelita" of Warsaw. "Mordecai Kisovitz" (the story of the life of a Galician Jew) appeared in the second issue of the same paper, and was later translated into Russian and English. "Reshit Madon" (The Beginning of a Quarrel), describing the life of the quasi-enlightened Jews of Galicia, appeared the same year, and "Ha-Niflaot me-'Ir Zidutschub" (The Wonders of the City of Zidutschub) came out in No. 3 of the same periodical. About half a dozen more short stories were subsequently pub-

lished in "Ha-Shahar" and "Ha-Meliz." Some of them went through several editions in book form, and several were translated into German and other languages. His collected novels, "Kol Sippure," in two volumes, containing ten short stories in prose and three in verse, were published in Cracow, 1890-91. He has also written several short stories since that time.

Brandstädter displays remarkable skill in telling simple humorous stories, and in mercilessly exposing the weaknesses of the fanatical Hasidim, on the one hand, and of the conceited progressive aristocracy, on the other.

P. Wl.

**BRANN, MARCUS:** German historian; born in Rawitsch July 9, 1849; son of Rabbi Solomon Brann. He studied at the University of Breslau, attending at the same time the rabbinical seminary of that city, and was graduated from the university in 1873 and from the seminary in 1875. Subsequently he acted as rabbi and teacher in various places, until 1891, when, on the death of Professor Graetz, he was called to the chair of history and Biblical exegesis in the Breslau seminary.

Brann has written: "De Herodis Magni Filiis, Patrem in Imperio Secutis" (part i., Breslau, 1873)—his doctoral dissertation, of which the second part appeared in German under the title, "Die Söhne des Herodes" (1873); "Geschichte der Gesellschaft der Brüder [HEBRAH KADDISHAH] in Breslau," 1880; "Geschichte der Juden und Ihrer Literatur," a textbook of Jewish history (vol. i. 1893, 2d ed. 1896; vol. ii. 1894, 2d ed. 1899); "Geschichte des Rabbinats in Schneidemühl," 1894; "Ein Kurzer Gang Durch die Jüdische Geschichte," 1895; "Ein Kurzer Gang Durch die Geschichte der Jüdischen Literatur," 1896; "Lehrbuch der Jüdischen Geschichte" (vol. i. 1900; vol. ii. 1901; vol. iii. 1902); "Geschichte der Juden in Schlesien," 3 parts, 1895-1901.

Since 1890 Brann has edited a Jewish almanac, "Jahrbuch zur Belehrung und Unterhaltung," and from 1892 until the death of David Kaufmann was joint editor with him of the "Monatsschrift für Geschichte und Wissenschaft des Judenthums," which had been discontinued for several years; since 1899 he is sole editor. In 1900 Brann edited, with F. Rosenthal, a memorial volume in honor of his colleague, "Gedenkbuch zur Erinnerung an David Kaufmann," Breslau, 1900.

D.

**BRANN, SOLOMON:** German rabbi; born in Rawitsch, Nov. 3, 1814. He attended for several years the yeshibah in Lissa, and continued his studies in the Berlin University. In 1839 he was elected a member of the rabbinical board of his native city, where he was a pioneer of German preaching. Since 1853 he has been rabbi at Schneidemühl. Brann has contributed largely to scientific German periodicals, such as "Orient," "Monatsschrift," and "Jüdisches Literaturblatt." His notes on the Talmud Yerushalmi are to be found in the Krotoschin edition of 1866.

**BRASCH, MORITZ:** German philosopher and litterateur; born at Zempelburg, West Prussia, Aug. 18, 1843; died at Leipzig Sept. 14, 1895. He was educated at the universities of Berlin, Greifswald, and Jena, settling at the first-mentioned place on the completion of his studies. Finally he went to Leipzig, where he became (1874-79) the chief editor of Brockhaus' "Konversations-Lexikon."

Brasch ranked high among the modern philosophical essayists of Germany. He published the following works: "Benedictus von Spinoza's System der Philosophie," 1870; "Lichtstrahlen aus Mendelssohn's Schriften nach der Ethica Dargestellt," 1875; "Die Klassiker der Philosophie," 3 vols. 1883-86; "Gesammelte Essays und Charakterköpfe zur Neuern Philosophie und Litteratur," 2 vols. 1885-86; "Philosophie der Gegenwart" (vol. iv. of "Klassiker der Philosophie"), 1887; "Welt- und Lebensanschauung Friedrich Überwegs," 1888; "Philosophie und Politik: Studien über Lassalle und Johann Jacoby," 1890; "Gesch. der Leipziger Universität von ihrem Ursprung bis zur Gegenwart," 1890; "Lehrbuch der Gesch. der Philosophie," 2d ed. 1893; "Wesen und Ziele der Ethischen Bewegung," 1894; "Leipziger Philosophen im 19. Jahrhundert—Porträts und Studien," 1894; "Die Facultätenfrage und die Stellung der Philosophie," 1895. He edited: Moses Mendelssohn's "Werke zur Metaphysik, Religionsphilosophie und Aesthetik," 2 vols. 1880, 2d ed. 1881; Überweg's "Schiller als Philosoph und Historiker," 1885; Schopenhauer's works, 2 vols., 1891; Aristotle's "Politica" (German transl. with introduction and notes), 1894.

**BRASLAW, NAHMAN.** See NAHMAN B. SIMHAH OF BRASLAW.

**BRASS:** A composition of copper and zinc. The application of the word in the Bible is uncertain, as instruments of copper and bronze were often used where brass is mentioned. Copper, bronze, and other metals were known to the Egyptians before the Exodus. In the Old Testament brass is referred to both actually and symbolically. In Ex. xxxviii. 2-8 the altar of burnt offering is overlaid with brass. All the vessels of the altar are made of brass. In Num. xxi. 9 Moses makes a serpent of brass. In I Sam. xvii. 5 Goliath is clad in an armor of brass. In II Sam. viii. 8 King David takes "exceeding much brass" from Bethah and Berthai. In I Kings vii. 7 is the reference to Hiram, king of Tyre, "a worker in brass." In II Kings xxv. 13, 14; Jer. lii. 17, the brazen vessels and pillars carried away by the Chaldeans, and in I Chron. xv. 19 "cymbals of brass," are mentioned.

Brass is often referred to symbolically in Hebrew Scripture: Deut. xxviii. 23, "Thy heaven that is over thee shall be brass" (without clouds and rain); Job vi. 12, "Is my flesh brass?" (enduring, insensible); Dan. ii. 32, "Belly and thighs of brass" (expressing brilliancy); Dan. x. 6, "His feet like in color to burnished brass."

T. F. S.

**BRATZLAV** or **BRASLAVL**: A town in the government of Podolia, Russia, situated on the right bank of the southern Bug. It was founded in the fourteenth century. It was at different times subject to Poland, Lithuania, Russia, and the Tatars. In 1479, when the Tatars conquered and destroyed Bratzlav, more than 600 inhabitants, among them 400 Jews, were slain in one day. In 1551, when it was besieged by the Crimean khan Devlyet Girei, and the entire garrison and a large part of the population fled, the Jews heroically defended the town against the enemy. In 1569, at the time of a religious uprising of the Cossacks, the hetmans Nalivaiko and Kossinski repeatedly attacked the city, plundering and murdering without mercy; the Jews, of course, not being exempted.

But the most terrible year for the Jews was 1648, when the alderman Martin Kalinovski delivered Bratzlav into the hands of Chmielnicki, who seized the town and massacred all the Jews. In 1664 the Russians slaughtered the Poles and Jews of Kameletz-Podolsk, Miedzybodz, and Bratzlav. When the hetmans Voynaravski and Orlik plotted with the Tatars against Peter the Great, Bratzlav became the scene of horrible cruelties perpetrated upon the Jews. The town has been a place of shelter for the followers of Shabbethai Zebi and other sects, especially the Frankists and the Hasidim.

In the town of Bratzlav in 1895 the Jews numbered 2,460, or 39.2 per cent of the total population; and in the district of that name there were 31,000, or about 15 per cent of the total population. They have a synagogue and six houses of prayer in the town.

H. R.

**BRAUDO, ALEXANDER**: Russian author; born in 1864. From 1889 until 1892 he was reviewer of literature on Russian history for the "Jahresbericht der Geschichtswissenschaft" and the "Istoricheskoye Obozrenie," published by the University of St. Petersburg; he translated sources for Russian history, as Grevnbruch's "Tragoedia Moscovitica," 1606 (history of the false Dmitri); and Neuville's "Relation Curieuse," 1689 (history of the riot of the Stryeltzy). He wrote a number of articles in "Russki Bibliograficheski Slovar," published by the Historical Society of the University of St. Petersburg, and a series of reviews in the "Zhurnal Ministerstva Narodnava Prosvyeshcheniya." In the "Voskhod" for 1896 there appeared his reviews of the works of Bershadski on the history of the Jews. While secretary of the Society for the Promotion of Education Among the Jews of Russia, he succeeded in directing the activity of that organization toward the encouragement and development of elementary education among the Jews. At present he is a member of the advisory board of the Jewish Colonization Association.

**BRAUN, JOSEF**: Austrian journalist, dramatist, and librettist; born at Budapest, May 5, 1840. Braun was educated for the profession of medicine

at the University of Vienna, but abandoned his medical studies in 1860 to join the editorial staff of Isidor Heller's "Fortschritt," on which he was trusted with Hungarian affairs. Next he joined the staffs of the "Wanderer," "Morgenpost" (as editor-in-chief), "Debatte," and in 1869 the "Tagespresse." From 1869 to 1870 he managed the humoristic illustrated paper "Der Floh"; in 1871 he founded the "Bombe," which he sold to establish, in 1881, the "Wiener Caricaturen." Among his works are: "Emporkömmlinge," a romance, published in 1874 in the "Bombe"; "Lustige Weiber von Wien," 1881; and the following plays and libretti: "Flotte Bursche," 1861 (music by Suppé); "Die Pagen von Versailles," 1862; "Die Keusche Diana," 1864 (the first opera composed by Millöcker); "Carneval in Rom," 1877 (music by Johann Strauss); "Hector in der Tinte"; "Bibiana und Leodegar"; "In den Flitterwochen"; and "Während der Quadrille."

**BRAUN, SOLOMON**: French lieutenant of artillery; born at Paris, 1868; died in Togbao, Sudan, in 1899. His father, a poor pedler, observing Solomon's capacity for learning, made the greatest sacrifices to give him a good education. Solomon successfully passed the competitive examination for the Ecole Polytechnique, whence he graduated as lieutenant of artillery. In 1897 he obtained permission from the minister of war to join the perilous expedition for the exploration of Lake Tchad under Major Bretonnet. The expedition was surprised, and every member slaughtered by the Tuaregs.

**BRAUNSCHWEIG (BRUNSCHWIG), ABRAHAM B. ELIEZER**: Reviser of the rabbinical Bible published by the printer König of Basel in 1619; and assistant to Johannes Buxtorf, both the father and the son. At the request of Buxtorf, senior, Braunschweig was permitted to settle at Basel. Upon the circumcision of a son, in 1619, at which several Jews were present, he was fined 400 fs., König and Buxtorf 100 fs. each, and all the Jews who had been present at the celebration were imprisoned for some days. Braunschweig lived later at Lengnau (Aargau) and in Zurich, and attended the fair at Zurzach. He traded in Hebrew books, which he obtained on his journeys through Alsace. In the correspondence between Johannes Hottinger of Zurich and Johannes Buxtorf of Basel, Braunschweig took an important part. He was still living in 1644. Whether he was related to Joseph ben Jacob Braunschweig, whose name appears on the title-page of "Sod ha-Neshamah," printed at Basel in 1608, is not known.

M. K.

**BRAUNSCHWEIG, JACOB ELIEZER**: German rabbi and Talmudic author of the seventeenth and the eighteenth century; died in Vienna April 16, 1729. Of his life very little is known. He was rabbi at first in Kanitz, province of Moravia, Austria, and subsequently in Vienna, where he

found a Mæcenas in Samson Wertheimer, who engaged him as his chaplain, because the Jews of Vienna were not permitted to engage a rabbi. Braunschweig wrote: "Siah 'Abde Abot" (The Language of the Servants of the Fathers), a concordance to the Talmud and the Midrashim; "Tame ha-Torah" (The Reasons of the Law), an exegetical work on the Pentateuch; "Sefer Sekar we-Onesh" (The Book of Reward and Punishment), which seems to have been an index of all Talmudic passages bearing on divine retribution; "Gematriot u-Periferaot la-Hokmah" (The Gematria and Peripheries of Wisdom), a cabalistic work on the Pentateuch; and Gematriot on the Torah, both exegetical and cabalistic, being an index of all Talmudic rabbinical interpretations of the Pentateuch. None of his works was published, and, as far as known, only the first-mentioned is extant in manuscript. It is in the Berlin Library, and has been wrongly ascribed by Steinschneider to Lazar Fried, rabbi at Kanitz. Braunschweig's family later adopted the name "Deutsch"; and one of his descendants is Gotthard Deutsch of Cincinnati.

**BRAUNSCHWEIG, MOSES BEN MORDECAI:** Polish Talmudist; lived about the middle of the sixteenth century at Cracow. He wrote a commentary on Jacob Weil's widely known codex on the slaughtering of animals and the inspection of slaughtered animals ("Hilkot Shehitot u-Bedikot"). The commentary, which was printed with Weil's text under the title "Tikkune Zebah" (Prague, 1604), consists of several sections having special subtitles.

**BRAVERY.** See COURAGE.

**BRAVO, ABRAHAM:** A financier living in London in 1710. He was a descendant of a Spanish-Portuguese family, and one of the earliest Anglo-Jewish poets. Bravo eulogized in English verse the work, "Espejo Fiel de Vidas" (London, 1720), written by his friend Daniel Israel Lopez Laguna, the Spanish-Jewish translator of psalms.

Another Abraham Bravo, undoubtedly a kinsman of the foregoing, lived in Jamaica in 1773. Benjamin and David Bravo, who went from London to Jamaica, were naturalized there in 1740.

M. K.

**BRAY-SUR-SEINE:** Small town situated between Provins and Montreuil, in the department of Seine-et-Marne; belonged formerly to Champagne. In the twelfth century it had an important Jewish community, including such rabbis as Jacob the Tosafist, and R. Isaac. Several commentators were born here: R. Matathia, Phineas, and Menahem (it is possible that the latter two are identical); and there were also some very rich Jews in the city.

An Israelite having been assassinated in 1191 by a subject of the king of France, his coreligionists obtained permission of the countess Blanche of Cham-

paigne to hang the murderer, and in commemoration of the hanging of Haman they selected the day of Purim. According to Christian reports, they tied the hands of the murderer behind his back, and after having placed a crown of thorns upon his head, led him through the city, beating him with a stick. Philip Augustus, king of France, taking advantage, perhaps, of the fact that the Christian was his subject invaded the domain of the countess of Champagne, placed guards at the gates of the castle of Bray, and seized the Jews and burned more than eighty of them at the stake, among whom were the rabbis Jacob and Isaac aforementioned. According to a contemporary, R. Ephraim of Bonn, the attempt had first been made to convert them to Christianity. Only children under thirteen years old escaped the persecution.

This massacre did not put an end to the community, however, for documents show that there were still some Jews in the city in the twelfth century. Among the best known may be mentioned Matathia or Eliab, son of R. Isaac, who died in 1191; Deodatus or (Dieudonné) and Hély, bankers, who were at the Petit Châtelet in Paris in 1204-6, and in 1221 at Provins. In that year Thibaut IV., count of Champagne, was in their debt. All traces of this community have been lost since the fourteenth century. No Jews live there to-day.

I. L.

**BRAZEN SEA.**—**Biblical Data:** The brazen laver of the Mosaic ritual; made by Solomon out of bronze captured by David at Tibhath and Chun, cities of Hadarezer (I Chron. xviii. 8). It served the same purpose for the officiating priests of Solomon's Temple as did the laver for those officers at the tabernacle. The dimensions of the sea (I Kings vii. 23-26) were as follows: height, 5 cubits; circumference, 30 cubits (consequently it was about 10 cubits in diameter); and a handbreadth in thickness. It was capable of holding 2,000 "baths"; on the smallest calculation, about 17,000 gallons. "Under the brim of it round about there were knobs which did compass it, for ten cubits compassing the sea round about; the knobs were in two rows, cast when it was cast" (*ib.* 24). This great brazen vessel was set on the backs of twelve brazen oxen; three of them facing each cardinal point, and all of them facing outward; see illustration, p. 358.

The humiliation of Ahaz before Tiglath-pileser III. and his desecration of the Temple and all sacred things led him to take this sea down from its position on the oxen, and to set it upon a pavement of stone (II Kings xvi. 17). It was finally (II Kings xxv. 13) broken into pieces at the capture of Jerusalem by the Chaldeans, and the material was carried to Babylon.

J. JR.

I. M. P.

—**In Rabbinical Literature:** The laver contained water sufficient for 150 ritual baths ("mikwaot"), if forty seals be taken as the legal measure

of such bath. The laver was not entirely round, as might be inferred from Scripture (I Kings vii. 23): the upper two-fifths were round; but the lower three were square ('Er. 14a. b). The symbolism of the brazen sea is described in detail in the MIDRASH TADSHÉ. The sea represented the world; the ten ells of diameter corresponded to the ten Sefirot; and it was round at the top (according to the Talmud passage above cited) as the heavens are round. The depth of the sea was five ells, corresponding to the distance of five hundred years' journey between heaven and earth (compare Hag. 13a). The band of thirty ells around it corresponded to the Ten Commandments, to the ten words of God

were sent against them, and very many died of their poisonous bites. On their showing repentance Moses was bidden to put upon a lofty pole an image in bronze of such a serpent, which, according to II Kings xviii. 4, was known as "nehushtan." The sufferers, when they looked upon the image from any part of the camp, were healed of their sickness (Num. xxi. 4-9). This "brazen serpent" became an object of adoration to Israel, and so remained until Hezekiah destroyed it by breaking it into fragments (II Kings xviii. 4).

—In Rabbinical Literature: Inasmuch as the serpent in the Talmud stands for such evils as talebearing and defamation of character (Gen. iii. 4, 5),

THE BRAZEN SEA OF SOLOMON'S TEMPLE.—WITH VIEW OF SECTION.  
(Restored according to Calmet.)

at the creation of the world, and to the ten Sefirot: for the world can exist only when the Ten Commandments are observed; and the ten Sefirot as well as the ten words of God were the instruments of the Creation. The two rows of colocynths (knops) below the rim were symbolic of the sun and the moon, while the twelve oxen on which the sea rested represented the zodiac ("mazzalot"). It contained 2,000 baths (cubic measures), for the world will sustain him who keeps the Torah, which was created 2,000 years before the world (Midrash Tadshe ii., ed. Epstein, in "Mi-Kadmoniyot ha-Yehudim," xvi., xvii.; Yalk., Kings, 185).

J. SR.

L. G.

**BRAZEN SERPENT** (נחשיתן). — **Biblical Data:** An image set up by Moses which is said to have healed those who looked upon it. When the people of Israel, near the close of the desert wanderings, were marching southward to go around Edom to the east of Palestine, they murmured against God and against Moses. As a punishment "fiery serpents" (compare Isa. xiv. 29; xxx. 6) of the region

the Midrash finds in the plague of the fiery serpents a punishment for sins of the evil tongue (Num. xxi. 5). God said: "Let the serpent who was the first to offend by 'evil tongue' inflict punishment on those who were guilty of the same sin and did not profit by the serpent's example."

One of the complaints in this case was dissatisfaction with the manna. Whereas the manna is believed to have had any taste desired by the person eating it, to the serpent all things had the taste of dust, in accordance with the words: "And dust shalt thou eat all the days of thy life" (Gen. iii. 14). It was very appropriate, therefore, that they who loathed the food which had given any taste desired, should be punished by means of that creature to which everything has the same taste (Tan., ed. Buber, Hukkat. xlv. [337]; Midrash R. Num. xix. 22).

The Mishnah does not take literally the words "Every one who was bitten by a serpent would look at the serpent and live," but interprets them symbolically. The people should look up to the God of heaven, for it is not the serpent that either brings to life or puts to death, but it is God (Mish-

nah R. H. 29a). In the course of time, however, the people lost sight of the symbolical meaning and regarded the serpent itself as the seat of the healing power, and they made it an object of worship, so that Hezekiah found it necessary to destroy it (II Kings xviii. 4; see also Ber. 10a).

K.

I. HU.

—**Critical View:** It is not necessary to discuss here the nature of the serpents (see SERAPHIM) that attacked the pilgrims in the desert; for it is not specifically said that one of these, but merely a "serpent," not further defined, was represented in bronze.

The question of the form of representation is, however, of importance as a matter of religious history. In this narrative ascribed to J and E modern criticism sees an account of the way in which the serpent-worship, surviving till the days of Hezekiah, took its rise. What was its motive? Evidently the serpent in this special cult was regarded as beneficent, as was frequently the case among the Semites generally (compare ANIMAL WORSHIP). But at the same time the serpent was becoming odious, as a type of subtlety and seductiveness (Gen. iii.), and the two conceptions were felt to be inconsistent. The wilderness narrative does justice historically to both of these aspects of serpent nature and the corresponding beliefs. Add to this, that all sorts of image-worship were being discouraged by prophetic influence. In this special instance it was particularly obnoxious to the reforming party in Judah; because Isaiah, who was its main inspiration, had already spiritualized the idea of the "flying serpent" (Isa. vi.), seeing in the "seraphim," or swiftly changing lightning and cloud-shapes of the sky, a mode of the divine self-manifestation similar to that of the CHERUBS. The name "nehushtan" suggests some interesting questions. To judge from the form, the name belongs to an old period of the language, but the explanation of it as a "brazen" object appears to be due to a species of popular etymology, "nahash" signifying in Hebrew "brass" as well as "serpent." It is likely that nehushitan as an object used in the ancient Semitic cult was a species of totem-pole, surmounted by the reproduction—perhaps in wood—of a serpent, and was placed before tents or rude dwellings as a means of driving off evil spirits, who were supposed to be lurking everywhere.

**BRAZIER.** See COAL.

**BRAZIL:** The largest of the South American states, extending from lat. 5° N. to 33° 45' S., long. 35° to 74° W., with an area of 3,209,878 square miles. It was discovered by Vincente Yanez Pinzon in 1499, and independently in 1500 by Pedro Alvarez de Cabral, a Portuguese, whose country claimed the

southeastern coast by right of discovery, and made the first permanent settlement in 1531.

The history of the Jews in Brazil begins almost simultaneously with the history of the country itself. As early as 1548 Jews were banished by the Portuguese Inquisition to Brazil, and in the same year it is stated that Portuguese Jews transplanted the sugar-cane from the island of Madeira to Brazil.

The Inquisition was never officially established in Brazil, but it had its agents there from the very start. At an early date mention is made of Neo-Christians or Maranos being sent back from Brazil to Europe to stand trial before the Holy Office. This practise became more frequent after 1580, when Portugal itself came under the dominion of Spain, and the Inquisition became supreme in both countries. The Maranos of the New World were therefore compelled to wear the mask just as they had in the Old.

As early as 1610 mention is made of the physicians of Bahia in Brazil, who are described as being mainly Neo-Christians, and who prescribed pork to lessen the suspicion of the charge of Judaism. Pyrad, the historian, who visited the place in 1610, says that a rumor was then afloat that "the king of Spain desires to establish the Inquisition here, on which account the Jews are greatly frightened." Certain it is, however, that these persons did not openly profess their faith.

These secret Jews, besides acquiring wealth, became very numerous at the beginning of the seventeenth century. They were then among the wealthiest inhabitants, some being worth from 60,000 to 100,000 crusados. "But they were despised by their narrow-minded countrymen, and were in constant danger of losing their property through the agents of the Holy Office" (Southey's "Brazil").

In the second decade of the seventeenth century the Dutch commenced their ambitious schemes for the conquest of Brazil. In connection with some of the earliest intrigues, special mention is made of one Francisco Ribiero, a Portuguese captain who is described as having Jewish relatives in Holland.

The secret Jews welcomed and assisted the Dutch in 1618, particularly as at that time they had good reason to dread the introduction of the Inquisition, which had recently arrested in Oporto almost all merchants of Jewish extraction. Many of the victims were engaged in the Brazilian trade, and the inquisitor-general applied to the government to assist the Holy Office to recover such part of their effects as might be in the hands of their agents in Brazil. Accordingly Don Luiz de Sousa was charged to send home a list of all the Neo-Christians in Brazil, "with the most precise information that can be obtained of their property and places of abode." It was the Dutch war alone that prevented the introduction of the Holy Office. It was at this period particularly that the Neo-Christians of Brazil threw off the mask and appeared as distinctive members of the Jewish faith.

The Dutch relied upon this large Jewish population for assistance when they prepared their plans for the conquest of the country. The Dutch West India Company was formed in 1622 in furtherance of the project, and it is significant that one of the

arguments in favor of the organization was "that the Portuguese themselves—some from their hatred of Castile, others because of their inter-marriages with Neo-Christians, and their consequent dread of the Inquisition—would either willingly join or feebly oppose an invasion, and all that was needful was to treat them well and give them liberty of conscience."

The Dutch were not mistaken. When their fleet was sent against Bahia all necessary information was obtained from the Jews. The city was captured in 1624; and true to the policy mentioned, Willekens, the Dutch commander, at once issued a proclamation offering liberty, free possession of their property, and free enjoyment of their religion to all who would submit. This brought over about 200 Jews, "who exerted themselves to make others follow their example." Unfortunately for the Jews, Bahia was recaptured by the Portuguese in 1625; and though the treaty provided for the safety of other inhabitants, the Neo-Christians who had placed such trust in the Hollanders were abandoned, and five of them were put to death. Many of the Maranos seem to have remained, however; for they are mentioned again in 1630. See **BAHIA**.

The Dutch soon gained another foothold and spread their conquests. The Portuguese city of Recife, or Pernambuco, was captured by the Dutch in 1631; and immediately most of the Jews and Neo-Christians from Bahia and elsewhere removed to that city, although it had a large Jewish population of its own, as it had been principally settled by Jews. The Dutch endeavored to secure colonists, and appealed to Holland for craftsmen of all kinds. Many Portuguese Jews of Holland came to Brazil in response to the call; for now that the country offered them full religious liberty, it also gave them the additional advantage of dwelling among a population where they could speak their own language. Southey asserts that these Jews made excellent subjects.

"Some of the Portuguese Brazilians gladly threw off the mask which they had so long been compelled to wear, and joined their brethren of the synagogue. The open joy with which they now celebrated their ceremonies attracted too much notice: it excited the horror of the Catholics; and even the Dutch themselves, less liberal than their own laws, pretended that the toleration of Holland did not extend to Brazil." The result was an edict by which the Jews were ordered to perform their rites more privately.

At this period the Jews in Recife alone were numbered by thousands; and one of them, Gaspar Diaz Ferreira, was considered one of the richest men in the country. Nor was the Jewish population confined to Pernambuco. Great numbers of Jews resided throughout Brazil, particularly at Tamarico, Itamaraca, Rio de Janeiro, and Parahiba.

Recife, however, was the great center of Jewish population, and soon became famous not only in the New World, but also in the Old, for its important congregation and the distinguished scholars numbered among its inhabitants. An evidence of this is found in the fact that the author Manasseh ben Israel of Amsterdam dedicated the second part of his "Con-

ciliador" to the prominent men of the congregation of Recife. Manasseh ben Israel himself at one time intended going there.

In 1642 about 600 Portuguese Jews left Amsterdam for Brazil; with them were two distinguished scholars, Isaac Aboab da Fonseca and Moses Raphael de Aguiar. The former soon became the **hakam**, and the latter the **hazan**, or reader, for the congregation at Recife. The congregation at Tamarico had at its head Jacob Lagarto; while one Jacob de Aguiar is also mentioned as a Brazilian rabbi at this period.

Among the Jewish writers born in Brazil may be mentioned Elijah Machorro and Jacob de Andrade Velosino.

"Among the free inhabitants of Brazil in 1640," writes Nieuhoff, "the Jews were the most considerable in number. They had a vast traffic beyond all the rest; they purchased sugar-mills, and built stately houses in the Recife."

At Bahia, on the other hand, and in that portion of Brazil retained by the Portuguese, the most intense bigotry prevailed. After 1631, Jews are met with at Bahia in isolated cases only, and then invariably in connection with their transportation for trial by the Inquisition at Lisbon. The most famous instance of this is the case of Isaac de Castro Tartas, who left Dutch territory to visit Bahia in 1646. He was at once seized and transported for Judaizing, and was burned at an *auto da fé* at Lisbon.

When in 1645 Joam Fernandes Vieyra was inciting the Portuguese to reconquer Brazil, he pointed particularly to Pernambuco, or Recife, expressly calling attention to the fact that "that city is chiefly inhabited by Jews, most of whom were originally fugitives from Portugal. They have their open synagogues there, to the scandal of Christianity. For the honor of the faith, therefore, the Portuguese ought to risk their lives and property in putting down such an abomination."

When the conspiracy was in its infancy the Dutch authorities were slow to realize what was happening; "but the Jews of Recife were loud in their expressions of alarm." "They had more at stake than the Dutch; they were sure to be mas-

**Attempt to** sacred without mercy during the insur-  
**Seize** rection, or roasted without mercy if  
**Recife.** the insurgents should prove successful." They therefore besieged the council with warnings and accusations.

Vieyra, too, recognized the importance of the Jewish element, for at the very beginning of the insurrection he promised the Jews protection provided they remained peaceably in their houses.

The Jews, however, were loyal to the Dutch; and in 1646, when the war was raging, they raised large donations for the service of the state. So influential were they that, when in 1648 the Portuguese contemplated the purchase of Pernambuco, they considered the advisability of making the clause concerning the Jews a secret article, before even broaching the subject to Holland.

The war continued unabated; and after a desperate struggle of several years the Dutch régime was

doomed. The story of the sufferings and fortitude of the Jews of Recife during its terrible siege, when general famine prevailed, has been told in a poem written by Isaac Aboab, an eye-witness.

Though the first siege was unsuccessful, Recife was again besieged, and when it became evident that the city could not hold out, the Jews clamored for a capitulation, knowing that otherwise no mercy would be shown them. By the terms of the capitulation the Jews were especially mentioned; and an amnesty was promised them by the Portuguese "in all wherein they could promise it."

More than 5,000 Jews were in Recife at the time of the capitulation. Many of these removed to Surinam; while many others, under the leadership of Aboab and Aguilar, returned to Amsterdam. Some went to Guadeloupe and other West Indian islands; while a few of the refugees reached New Amsterdam, as New York was then called.

Despite the ending of the Dutch régime, some Neo-Christians continued to reside in Brazil. Their number was largely increased toward the end of the seventeenth century, when Portugal again banished to Brazil the Maranos who had become reconciled. These transportations continued from 1682 to 1707; and the Jews again came to be known as a distinct class. They were closely watched, however, and many were sent back to Lisbon from time to time, to be tried by the Inquisition. Many Jews from Rio were burned at an *auto da fé* at Lisbon in 1723. Several of these martyrs were men of great repute, the most prominent being the famous Portuguese poet and dramatist Antonio José da Silva, a native of Rio de Janeiro, who was burned as a Jew at Lisbon in 1739. In 1734, Jews appear to have been influential in controlling the price of diamonds in Brazil.

Toward the middle of the eighteenth century, Jews or Neo-Christians were again a numerous class in Brazil, and transportation to Lisbon for Judaizing had again become so common and was carried on to such an extent that, as the historian relates, "so wide a ruin was produced that many sugar-mills at the Rio stopped in consequence." The influential Marquis de Pombal, with all his power, did not venture to proclaim toleration for the Jews; but he succeeded in having laws enacted making it penal for any person to reproach another for his Jewish origin, and removing all disabilities of Jewish blood, even from the descendants of those who had suffered under the Inquisition. He prohibited public *autos da fé*, and required all lists of families of Jewish extraction to be delivered up, making it penal to keep such lists. These statutes deprived the Inquisition of its most important means of accusation; and as a result the Maranos were ultimately absorbed in the Catholic population of Brazil.

Since then the Jews have not been known as a distinctive class in Brazil. Those living there today are not descended from the Neo-Christians, but are mainly recent immigrants from Germany, Russia, Rumania, and other European countries. Many are settled in Rio Grande do Sul.

In 1900 a number of Rumanian Hebrews went to Brazil, but effected no permanent settlement.

The Bureau of American Republics has recently

published a list of the leading merchants of the various cities in Brazil; and these lists disclose a large number of Jewish names, though most of them seem to be of German origin.

The constitution of Brazil guarantees to the inhabitants liberty both of conscience and of worship; but in spite of these liberal provisions there are no Jewish congregations of consequence in the country.

L. II.

### BREACH OF PROMISE OF MARRIAGE

(בִּשְׁבֻעַ): The refusal of either party to a contract of marriage to fulfil it. In order that there may be a breach of promise, there must be a contract cognizable by the law. Unlike the law in many modern systems of jurisprudence, mere mutual promises of a man and a woman to marry do not constitute such a contract in Jewish law, which requires a written agreement embodying the terms of the contract and specifying the amount of damages ("kenas") payable by either party to the other upon

**Nature of Contract** its breach. Such contracts are commonly called "shiddukin" or "tenaim to Marry." rishonim" (first stipulations), and contain explicitly a statement of the amount of damages payable by either party to the other in case of breach of the contract.

For the purpose of insuring greater security, promissory notes are deposited by both parties with a third person. These notes are drawn for a specific sum, to become due and payable upon the non-fulfilment of the contract, and are coupled with the condition that upon the consummation of the marriage the notes shall ipso facto become null and void. In case the promise of marriage is made secretly it is necessary that all these provisions be fully complied with in order to entitle the innocent party to a right of action against the party guilty of the breach; but if the contract is publicly entered into, damages may be claimed for the breach even though all the formalities have not been complied with, because an additional consideration enters into the contract by reason of its publicity. In such cases breach of the contract would result in shame and disgrace to the innocent party; and this is sufficient consideration for the recovery of the damages.

If, after the execution of the contract, the parties mutually agree to rescind it, there is no breach of promise, and the parties are released from all obligations to each other; all gifts must be returned unless there has been a specific agreement to the contrary; and the parties stand in the same relation

to each other as though no contract had been entered into. In case it becomes impossible for one of the parties to fulfil the contract,

**Contract** the other is released. For instance, if  
**May Be** one of the parties has agreed to give  
**Mutually** a certain amount of dowry, and is un-  
**Rescinded.** able to fulfil this condition because of  
having become impoverished, the other  
party, if not choosing to do so, is not bound to fulfil  
the contract. Where one of the parties is obliged  
to remove from the place where they had intended  
to take up their residence, the other is not obliged  
to follow, but may declare the contract annulled.

If the near relations of either of the parties, by  
reason of misconduct or improper life, bring dis-  
grace upon the family, or if one of the contracting  
parties is guilty of such fault, the other party is  
released; and if either party becomes insane, or  
apostatizes, a like result follows.

The obligations assumed by the respective parties  
to the contract are binding upon their heirs.

If the father of the prospective bride has entered  
into the contract with the prospective groom, and  
the girl then refuses to be married, her father is  
released from his obligation by reason of the impos-  
sibility of fulfilling the contract, provided, of course,  
there is no fraud or collusion between himself and  
his daughter.

It is generally decided by the rabbinical authorities  
that specific performance of the contract to marry  
can not be enforced after the party guilty of the  
breach of promise has paid the pecuniary damages  
specified in the contract.

In case a pledge is given by either party to the  
other at the time when the promise to marry is made,  
as security for the payment of the damages that may  
be recovered for

**When** the breach of contract, it is necessary  
**a Pledge Is** that the delivery of the pledge be ac-  
**Given.** companied by an express agreement  
specifying that, in case the contract is broken, the  
pledgee shall be entitled to a specific sum out of the  
proceeds of the sale of the pledge. If the party  
guilty of the breach of promise can not pay the pen-  
alty, recourse may be had to the surety, and if the  
latter is obliged to pay the damages, he may have re-  
course against his principal at any time in the future.

As stated at the beginning of this article, all these  
provisions are applicable only in case the promise  
of marriage has been reduced to writing, and the  
proper formalities have been complied with. If  
there have been merely oral promises with the un-  
derstanding that the agreement in writing shall be  
executed, the parties are at liberty to retract at any  
time before the written agreement has been signed  
by the witnesses; and, in case of such retraction,  
no breach of promise in the technical sense occurs;  
the parties are not bound in any way, and are free  
from all the obligations and responsibilities of the contract.

D. W. A.

**BREACH OF TRUST:** Violation by fraud or  
omission of any duty lawfully imposed upon a  
trustee, executor, or other person in a position of

trust. It is thus a branch of criminal law, and  
under this aspect will be considered in the present  
article.

Moral basis for the laws against breaches of trust  
may be found in such texts as: "Ye shall not steal,  
neither deal falsely, neither lie one to another" (Lev.  
xix. 11); "Thou shalt not withhold anything from

[A. V., "defraud"; R. V., "oppress"]  
**Moral** thy neighbor, neither rob him" (*ib.* 13);  
**Basis.** "Ye shall not afflict any widow, or  
fatherless child" (Ex. xxii. 21 [22]):

"Thou shalt not see thy brother's ox or his sheep go  
astray, and hide thyself from them; thou shalt in  
any case bring them again to thy brother. . . . In  
like manner shalt thou do with his ass . . . and  
with any lost thing of thy brother's, which he hath  
lost and thou hast found" (Deut. xxii. 1, 3). In  
these texts may be found the germs of the law relat-  
ing to the duties of bailees, trustees, and guardians;  
and in the law of trusts, the later Talmudic and rab-  
binical law was somewhat hampered in its logical  
development by the dominance of these ethical  
views. For instance, instead of compelling the  
guardian to render an account at the end of the term  
of his administration of the orphans' estate, the law  
required nothing of him except the delivery to the  
orphans of the balance of the estate in his hands. If  
they doubted the integrity of their guardian they  
could not compel him to account, but appealed to  
his religious sentiment. In such cases, instead of  
giving a legal account, he was required to take  
the rabbinical oath of purgation "that he had not  
stretched forth his hand unto the goods." And with  
this oath he was discharged (Maimonides, "Yad,"  
Sheluhin, ix. 1; Nahalot, xi. 5, 12; Shulhan 'Aruk,  
Hoshen Mishpat, 93 1; 290, 17). There is no doubt  
that this appeal to the good faith of the guardian  
has resulted in the conscientious administration of  
orphans' estates under the Jewish law (Frankel,  
"Der Gerichtliche Beweis," pp. 64, 65).

The only Biblical laws on the subject of breach  
of trust are those in relation to bailees (see **BAIL-**  
**MENTS**).

As stated above, the trustee, at the end of the term  
of his administration, is not obliged to account.  
When orphans attain their majority, they are en-  
titled to receive their inheritance; and the guardian,  
without accounting, gives them the balance of their  
estate left in his hands after his maintenance of them  
during their minority. If the guardian was ap-  
pointed by the court, and the heirs have reason to  
suspect that he has been guilty of a breach of trust,  
he must take the oath of purgation. If he was ap-  
pointed by the father of the orphans and is what in  
modern law would be called a testamentary guar-  
dian, he can not, in case of mere suspicion of mal-  
feasance, be compelled to swear (Mishnah Git. v. 4;  
"Yad," Nahalot, xi. 5; Hoshen Mishpat, 290, 16).  
Later authorities are of the opinion that, inasmuch  
as the testamentary guardian need not take the oath,  
he may be compelled to render an account (gloss to  
Hoshen Mishpat, *ib.*); and if the guardian is  
appointed by the non-Jewish court, he must ren-  
der an account of his trust "because that is their  
law" (*ib.* 17).

By analogy with the case of the guardian, all other

persons in positions of trust are obliged, at the end of their administration of the trust estate, to take the oath of purgation if suspected of having been guilty of a breach of trust. This applies to partners (at dissolution of the partnership); to those who rent farms, paying the rent with a portion of the products; to women having charge of their husbands' business; to a "son of the house" who manages the father's affairs (Mishnah Shebu. vii. 8; "Yad," Sheluḥin, ix. 1;

Iḥoshen Mishpat, 93, 1); to agents appointed to buy or to sell for their principals (*ib.* 93, 4; "Yad," Sheluḥin, ix. 5); and to the committee of an idiot or a deaf-mute (Ket. 48a; Yeb. 113a; "Yad," Mekilah, xxxix. 4; Nahalot, x. 8; Iḥoshen Mishpat, 290, 27). A son of the house, unless he really manages the father's estate, can not be compelled to take the oath to clear himself of a suspicion of breach of trust (Shebu. 48b), nor a guardian appointed by the father (see above), nor a woman who was not a guardian during her husband's lifetime and who had no charge of his business after his death (Mishnah Ket. ix. 6; "Yad," Sheluḥin, ix. 4).

Biblical sanction for employing the oath of purgation to clear the trustee of the charge of breach of trust is found in the text: "If a man deliver unto his neighbor an ass, or an ox, or a sheep, or any beast, to keep; and it die, or be hurt, or driven away, no man seeing it: an oath of the Lord shall be between them both that he hath not put his hand unto his neighbor's goods" (Ex. xxii. 9 [10] *et seq.*). The rabbinical reason for extending the oath to other persons standing in a fiduciary position is stated by Maimonides (*l.c.* 1) as follows: "Because these [various kinds of trustees] excuse themselves [for their breach of trust by the plea] that what they take of the property of the owner is due to them because they were doing business for him and were put to much trouble, hence the sages ordained that they were liable to take an oath to meet a charge of doubt [as to whether they had faithfully accounted for the property in their possession] so that they should perform all their duties in righteousness and good faith."

The oath of purgation was not administered unless the amount with which the trustee was charged exceeded the value of two silver meahs (Shebu. 48b). The predecessors of Maimonides decided that the heirs of a dead partner could not compel the surviving partner to take the oath, because they could not be certain as to the amount which the deceased suspected his partner of misappropriating. But Maimonides himself was of the opinion, following other authorities, that in such cases of doubt the heirs could compel the surviving partner to take the oath ("Yad," Sheluḥin, *l.c.* 3; followed in Iḥoshen Mishpat, 93, 3).

The punishment for breach of trust on the part of a bailee guilty of theft is thus stated in the Bible: "Whom the judges shall condemn, he shall pay double to his neighbor" (Ex. xxii. 3 [9]). If he is

**Punish-ment.** guilty of lying or deceit concerning the bailment and swears falsely concerning it, "he shall restore it in the principal and add the fifth part more thereto . . . and shall bring his trespass-offering unto the Lord" (Lev. v. 24, 25 [vi. 5, 6]).

The distinction between the two cases is thus stated in the Mishnah (B. K. ix. 7, 8): If the bailee, upon being asked to account for the property entrusted to him, pleads that it is lost, and swears to it, and witnesses then prove that he himself consumed it, he must pay the value of the principal only; but if there are no witnesses and he admits that his oath was false, he is obliged to pay the principal plus one-fifth, and to bring a trespass-offering. If he pleads that it was stolen from him and swears to it, and it is then proven that he himself stole it, he must double its value. If there are no witnesses, and he admits that his oath was false, he is obliged to pay the principal plus one-fifth, and to bring the trespass-offering (for further details see BAILMENTS).

In those cases in which an oath of purgation cannot be imposed in spite of suspicious circumstances, the court may try to bring pressure to bear upon the bailee's conscience by proclaiming a general ban of excommunication on all persons who may be guilty of unlawful conduct in connection with the estate under consideration. This is implied in the Talmud where R. Ashi says, concerning the appointment of a guardian for orphans: "The court selects a man whose property is not under dispute, and who is of good repute and law-abiding, and who fears the ban of rabbinical excommunication, and gives him the money of the orphans to administer it" (B. M. 70a). It is clearly expressed by Alfasi (in Shebu. vii., end), Maimonides ("Yad," Sheluḥin, ix. 9), and Bet Joseph, citing R. Simon ben Adret (gloss to Iḥoshen Mishpat, 290, 16).

If a bailee having the bailment in his possession, denies having it, and his deceit is proven, he is rendered incompetent to act as witness and to take an oath (B. K. 105b *et seq.*; Iḥoshen Mishpat, 92; 294, 1). See BAILMENTS, EXECUTORS, FINDER OF PROPERTY, GUARDIAN AND WARD, OATHS, TRUSTS AND TRUSTEES.

D. W. A.

**BREAD** (Hebrew, "lehem," occasionally "pat" [piece], from "pat lehem" = piece of bread; Aramaean, "rifla"); Bread was the principal article of food among the Hebrews, while meat, vegetables, or liquids served only to supplement the meal (Gen. xxv. 34, xxvii. 17; Ruth ii. 14; I Sam. xxviii. 24; Gen. xviii. 7). Originally the ears of barley or wheat were simply roasted, and this

**Preparation of Bread.** primitive custom of using "kali" (parched corn, Ruth ii. 14; I Sam. xvii. 17) was retained for the offering of the firstlings (Lev. ii. 14, xxiii. 14; Josh. v. 11). The primitive bread of the Hebrew, as with all Bedouins, was unleavened and was called "mazzot" (unleavened cakes, Judges vi. 29; Gen. xix. 3); hence it was retained for the ancient Passover ritual as "the bread of affliction" (Deut. xvi. 3). The ordinary bread consisted of dough ("bazeḳ") mixed with fermented dough ("se'or"), which raised themass into "ḥamez" (soured bread), while in the "misheret" (kneading-trough, Ex. xii. 34, 39). The shape of the bread was round—therefore "kikkar lehem," a circular loaf of bread (Ex. xxix. 23; Judges viii. 5).

also "uggah" (cake, Gen. xviii. 6; I Kings xix. 6); while "hallah" (Lev. viii. 26; Num. xv. 20) is probably a perforated or punctured cake, and "lebibah" (II Sam. xiii. 6) a folded or rolled cake. The bread was baked by women. It could be taken as food on a journey (Gen. xxi. 14; I Sam. ix. 7); when kept too long it became dry and moldy (Josh. ix. 5). The **SHOWBREAD** was kept for a whole week and then eaten by the priests, while the fresh bread was offered anew every Sabbath (Lev. xxiv. 8, 9; I Sam. xxi. 7).

In the time of Herod, bakers furnished the people with bread (Josephus, "Ant." xv. 9, § 2), if such did not already exist in the time of Jeremiah and Nehemiah (Jer. xxxvii. 21; Neh. iii. 19, xii. 38). The priests of Bet Garmo possessed special skill in baking the showbread, but were blamed for keeping their secret to themselves (Yoma iii. 11). In Talmudical times the housewife baked the bread for the week every Friday (Ta'an. 24b, last line; see **BAKING**).

"Bread" is often used in the Bible for food in general, as in Gen. iii. 19: "In the sweat of thy face shalt thou eat bread" (compare Gen. xxxix. 6, xivii. 12; Ex. xxiii. 25; Lev. xxi. 8; Num. xix. 9; Job xxiv. 5; Ps. cxlvii. 9 [A. V. "food"]; I Sam. xx. 24 *et seq.*; Prov. vi. 8; Isa. lxxv. 25 [A. V. "meat"]); but as a rule "lehem" denotes bread, while in the Arabic it signifies meat. In Ex. xvi. 8 and I Kings xvii. 6 it is contrasted with "basar" = flesh. It is the "food" which comes forth from the earth (Ps. civ. 14; Job xxviii. 5; Isa. xxx. 23,

**Figurative** lv. 10), and, being solid, sustains (A. V. **Use of** "strengtheneth") man's heart (Ps. civ. "Bread." 15; Judges xix. 5 [A. V. "comfort"]); thus becoming a "staff of bread" (Lev. xxvi. 26; Ezek. iv. 16) or "stay of bread" (Isa. iii. 1), the "breaking" of which means famine. On the other hand, "fulness of bread" (Ezek. xvi. 49), or "fatness of bread" (Gen. xlix. 20) is plenty. Giving or breaking bread to the hungry (Isa. lviii. 7; Ezek. xviii. 7; Prov. xxii. 9) is charity; to withhold it from the hungry (Job xxii. 8) is inhuman. To invite the stranger to eat bread and to prepare it for him quickly is hospitality (Ex. ii. 20; Gen. xviii. 5), the lack of which meets with due punishment (Deut. xxiii. 4; Judges viii. 15). The seed of the righteous shall not "beg bread" nor "be in want of bread" (Ps. xxxvii. 25, cxxxii. 15; Isa. li. 14), whereas the children of the wicked "shall not be satisfied with bread" (Job xxvii. 14; compare I Sam. ii. 36; II Sam. iii. 29). Abstinence from "bread" signifies fasting (II Sam. iii. 35).

A special benediction was instituted for bread: "Blessed be He who bringeth forth food out of the earth," after Ps. xiv. 14 (Ber. vi. 1). The one who presided at the table broke the bread and said the blessing (Ber. 46a; Matt. xiv. 19, xv. 36, xxvi. 26 *et seq.*; Acts xxvii. 35); and where three ate together, grace was also said in common (Ber. 50a). Divine blessing rested on the bread which Sarah baked, for she was careful to guard the dough against Levitical impurity (Gen. R. lx.). There is, however, a mark of divine favor in every piece, for when Adam heard the words: "Thou shalt eat the herbs of the field" (Gen. iii. 18), he shed tears and

said: "O Lord of the Universe, must I and my ass eat out of the same manger?"; but when God said:

"In the sweat of thy face shalt thou eat bread" (Gen. iii. 19), he felt re-

**Blessing of** **the Daily** **Bread.** "the bread from heaven," was typical of the daily bread received by man from the hand of God; even the sweat of labor was not wanting in the former (Mek., Beshallah, Wavyassa. 2 and 3). "He who, having bread in his basket, still says, 'What shall we eat to-morrow?' is one of those of little faith," says R. Eliezer of the first century (Soṭah 48b), a saying corresponding with that of Jesus: "Take no thought for your life what ye shall eat" (Matt. vi. 25-30), and the prayer: "Give us this day our daily bread" (vi. 11; compare Ber. 29b).

Simeon ben Yohai said: "A loaf of bread and a rod were handed down from heaven tied together as if to say: If ye observe the Law, there will be the loaf of bread for you to eat; if not, there will be the rod for you to be punished with" (Ber. 29b). Bread with salt, the poor man's food (Ber. 2b), should be sufficient for the student of the Law (Abot vi. 4); of him it is said, "The Lord will bless thy bread" (Ex. xxiii. 25; B. K. 92b). He should be satisfied even with barley-bread (Shab. 140b). However, bran-bread is not so nourishing as fine wheat-bread (Pes. 42a), which feeds the intellect. "The tree of knowledge Adam ate of was wheat," says R. Judah (Sanh. 70b). It is best eaten with some other kind of food. "The Babylonians who eat bread together with pastry are fools" (Bezaḥ 16a). "Herbs together with bread promote the appetite" ('Er. 140b). Bread should be treated with special regard. Raw meat should not be placed upon it, nor

**Treatment** **of Bread.** an overflowing wine-cup be allowed to spoil it; it should not be thrown across the table nor used to hold up any other thing (Ber. 50b; Mas. Derek Erez. viii.). There is an evil spirit of poverty by the name of Nibbul ("bread-spoiler"), who has power over him who spoils bread; and there is a good spirit by the name of Naqid ("cleanliness"), who blesses him with plenty who lets not crumbs of bread lie on the ground (Pes. 111b; Hul. 105b).

It was considered improper to hang up bread in a basket. "He who hangs his bread-basket hangs his support," was the common saying (Pes. 111b); however, to have bread in his bread-basket lessened one's hunger (Yoma 74b). "Eat thou not the bread of him that hath an evil eye" (Prov. xxiii. 6).

Whenever Rab Huna broke (or folded) bread for the meal, he first opened his door and said, "Let every one in need come and eat" (Ta'an. 20b). The virtuous woman of the Bible does not eat "the bread of idleness" (Prov. xxxi. 27), and in Talmudical times she broke her bread to the poor (Ta'an. 23b). Micah, the idolater (Judges xvii.), provided the poor on the road with bread, and was therefore not counted among those who have no share in the world to come (Sanh. 103b). The men of Sodom passed a law not to give bread to the needy, and when one maiden, moved to compassion, handed some in a jar to the poor, her countrymen on discovering it besmeared her body with honey, and

placed her thus upon the roof, where bees came and stung her to death, and her cry "made the sin of Sodom and Gomorrah very grievous before the Lord" (Sanh. 109b, after Gen. xviii. 20). "He who does not leave some crumbs of bread for the poor deprives himself of God's blessing; but he must not leave them to a 'guardian spirit,' after the fashion of the heathen" (Sanh. 92a). During the Middle Ages the Jew took an oath by "the bread from God" (Tend-lau, "Sprichwörter und Redensarten Deutsch-Jüdischer Vorzeit," p. 105).

"Cast thy bread upon the waters, for thou shalt find it after many days" (Ecc. xi. 1), is illustrated in Ab. R. N. iii., ed. Schechter, p. 17, and in Ecc. R., by the story of a man who suffered shipwreck and was saved by a spirit appearing to him personifying his charities; other similar stories are given in Ecc. R. A more drastic illustration is given by a story reproduced by Dukes' "Rabbinische Blumenlese," 1844, p. 73, from Diez, "Denkwürdigkeiten von Asien," i. 106, quoting Cabus. A man, in order to test the truth of this verse, cast each day into the water several hundred loaves with his name printed thereon. They reached the son of Calif Mutawakkil of Bagdad, who, while bathing, had become imprisoned beneath a rock and remained there for seven days, feeding on these loaves, no one knowing where he was until he was discovered by a diver. Of course, the man who had thus saved the prince from starvation was richly rewarded.

#### BRÉAL, MICHEL JULES ALFRED:

French philologist; born of French parentage at Landau, Rhenish Bavaria, March 26, 1832. He received his education at Weissenburg, Metz, and Paris. In the last-named city, after his studies at the Lycée Louis-le-Grand were completed, he entered the Ecole Normale. He continued his studies at Berlin under Albrecht Weber and Franz Bopp, the founder of the science of comparative grammar. Returning to France in 1859, Bréal became professor at the Lycée Louis-le-Grand and afterward an assistant in the department of Oriental manuscripts at the Bibliothèque Impériale, Paris, where he succeeded Ernest Renan and remained until chosen in 1866 to fill the chair of comparative grammar at the Collège de France, the duties of which he had already discharged for two years. In 1863 he had presented two theses to the Faculté des Lettres of Paris, "Hercule et Cacus" and "De Nominibus Persicis apud Scriptores Græcos," to obtain the title of *Docteur et Lettres*. When the Ecole Pratique des Hautes Etudes was founded in 1868, Bréal became director of the section of comparative grammar, and seven years later (1875) was elected a member of the Académie des Inscriptions et Belles-lettres. From 1879 to 1888 he was inspector-general of higher education; and the rank of officer of the Legion of Honor was conferred on him in 1881. He has been commander since 1888.

Bréal did not confine his energy to comparative linguistics, but has written (in the "Revue des Deux Mondes") on comparative mythology and pedagogy, as well as on subjects of more general interest. As a linguist he follows his old teacher Bopp, whose comparative grammar he translated under the title

"Grammaire Comparée des Langues Indo-Européennes," 5 vols., Paris, 1867-78. This work, to which the translator added valuable introductions and notes, is somewhat remarkable as being one of the few instances in which a translation, rather than the original text, is generally regarded as the standard of reference. Like many scholars of Latin Europe, Bréal has devoted his attention rather to the psychological than to the mechanical side of linguistics. This trend of his thought is clearly shown by his articles, "Les Lois

Intellectuelles du Langage, Fragment de Sémantique," in "Annuaire de l'Association des Etudes Grecques," 1883; "Comment les Mots Sont Classés dans Notre Esprit" ("Comptes Rendus de la Séance Annuelle de l'Institut," 1884); and most of all by his last important work, the "Essai de Sémantique" (Paris, 1897; 2d ed., 1899; also translated into

Michel Bréal.

English by Mrs. Henry Cust, London, 1900), in which he sets forth the science of the development of different significations possessed by a word.

In the individual languages of the Indo-Germanic group Bréal's work has been more particularly in the Greek and Italic dialects. It will suffice to mention his paper "Sur le Déchiffrement des Inscriptions Cypriotes," in the "Journal des Savants," 1877; his work on the Euguvin Tablets, published with texts, translations, and notes as a volume of the "Bibliothèque de l'École des Hautes Études" (Paris, 1877); and his "Dictionnaire Étymologique Latin" (Paris, 1885), written in cooperation with Anatole Bailly, who was also joint author with him in his "Leçons de Mots: les Mots Latins" (1881-82); while L. Person assisted him in the preparation of "Les Mots Grecs" (1882). He has done little work in languages outside the Indo-Germanic group; his brief note on an "Inscription Etrusque Trouvée à Carthage," in the "Journal des Savants," 1899, being almost his only study in this category.

Bréal has also contributed much to comparative religion. In 1862 he published a memoir, "Etude des Origines de la Religion Zoroastrienne," which was crowned by the French Institute; and in his "Hercule et Cacus," which first appeared in the following year, he sought to show the value of linguistics in the solution of problems of comparative mythology. His study, "Sur le Mythe d'Œdipe," in the "Revue Archéologique," 1863, was an attack on the symbolic mythologists by an adherent of the analogical school.

Of Bréal's contributions to pedagogics, his essays, "Quelle Place Doit Tenir la Grammaire Comparée dans l'Enseignement Classique?" (1872), "De l'Enseignement des Langues Anciennes" (1890), "La Réforme de l'Orthographe Française" (1890), and

"Quelques Mots sur l'Instruction Publique en France" (1872; 3d ed., 1881), as well as his "Excursions Pédagogiques" (1882), are especially noteworthy. Bréal's briefer contributions on linguistic subjects have appeared chiefly in the "Mémoires de la Société de Linguistique," of which he has been the secretary since 1867. He has published but one paper outside of France, a contribution "On the Canons of Etymological Investigation," in the "Transactions of the American Philological Association," 1893. Twelve of his briefer essays have been reprinted in his "Mélanges de Mythologie et de Linguistique" (Paris, 1877; 2d ed., 1882).

**BREASTPLATE:** A rendering of the Hebrew "shiryon" or "siryon," which would be more correctly translated "coat of mail" or "cuirass." The kings of Israel used in warfare (I Kings xxii. 34) such body-protectors as were in vogue among their neighbors (compare Goliath's "coat of mail," I Sam. xvii. 5). The character of this piece of armor, as seen on the monuments of Egypt, Assyria, and later in Rome, would indicate that it was a coat of various lengths, often, if not always, made of overlapping plates of metal (compare I Sam. xvii. 5; Deut. xiv. 9). It protected the breast and the back, and in some cases reached as far down as the knees. In certain passages (for example, II Chron. xxii. 14; Neh. iv. 16) the exact character of the armor specified can not be determined. It may be that some such piece of armor served the illustrative purpose of the Prophet Isaiah (lix. 17) and of the apostle Paul (Eph. vi. 14).

**BREASTPLATE OF THE HIGH PRIEST** ("hoshen").—**Biblical Data:** A species of pouch, adorned with precious stones, worn by the high priest on his breast when he presented in the Holy Place the names of the children of Israel. The etymological significance of the Hebrew word is uncertain, but the directions for the making of the breastplate, in Ex. xxviii. 13-30 and xxxix. 8-21, are sufficiently clear.

This breast piece was to be made in part of the same material as the Ephod. The directions specify that it was to be made "of gold, of blue, and of purple, and of scarlet, and of fine twined linen" (Ex. xxviii. 15). "Foursquare it shall be, being doubled; a span shall be the length thereof, and a span shall be the breadth thereof" (*ib.* xxviii. 16); thus before it was doubled it was a cubit long and a half-cubit wide. On the front face of this square were set, in four rows, twelve precious stones, on each of which was engraved the name of one of the twelve tribes of Israel. These jewels in gold settings were (Ex. xxviii. 17-19): in the first row, "a sardius [margin, "ruby"], a topaz, and a carbuncle [margin, "emerald"]; in the second row, "an emerald [margin, "carbuncle"], a sapphire, and a diamond [margin, "sardonyx"]; in the third row, "a jacinth [R. V.: margin, "amber"], an agate, and an amethyst"; and in the fourth row, "a beryl [margin, "chalcedony"], and an onyx [margin,

"beryl"], and a jasper." The exact identification and the order of these stones, as well as the tribe represented by each, are matters of speculation. The breastplate was worn over and fastened to the ephod. It hung over the breast of the wearer, and was secured to the shoulders of the ephod by gold cords (or chains). These cords of "wreathen work," tied in the gold rings at the top corners of the outer square of the breastplate, were fastened toouches

Breastplate of the High Priest.

on the shoulder-pieces of the ephod. The lower part of the breastplate was fastened to the ephod at some point below the shoulders by a blue ribbon, which passed through gold rings at the lower corners of the inner square. As well as being a means of securing in its place this most important portion of the dress of the high priest, these fastenings formed a brilliant decoration. The term "breastplate of judgment" (Ex. xxviii. 15, 29, 30) indicates that the name was given to this portion of the priestly dress because of its use in connection with the mysterious URIM AND THUMMIM.

I. M. P.

—**In Rabbinical Literature:** The Rabbis explain that the breastplate of the high priest is called in Scripture **הישן משפט** ("breastplate of judgment") because it was intended to work atonement for errors in pronouncing judgment (Zeb. 88b; Yer. Yoma vii.

44b; compare also Targ. Yer. to Ex. xxviii. 15; Philo and the Septuagint have instead of **מִשְׁפַּט** the Greek *λόγον* or *λογείον*, which example Rashi follows in the passage to Ex. *l.c.*, translating **מִשְׁפַּט** by "raisonnement"; similarly also Tobiah b. Eliezer in *Lekah Tob* on the passage). Aaron and his successors wore the breastplate on the heart (Ex. xxviii. 29) as a reward, because Aaron was "glad in his heart" (Ex. iv. 14) when Moses returned to Egypt, and was not envious because his younger brother was chosen by God to deliver Israel (Shab. 139a; Ex. R. iii. end).

According to the Talmud, the breastplate was made of the same material as the ephod and in the following manner: The gold was beaten into a leaf and cut into threads; then one golden thread was woven with six azure (**תְּכֵלֶת**) threads, and another golden thread with six purple (**אַרְבָּנִים**) threads, and similarly with the scarlet wool (**תּוֹלַעַת שָׁנִי**) and the byssus. Thus there were four combinations of six-fold threads, with one golden thread woven through each; and, when these were twisted together the strand consisted of twenty-eight threads (Yoma 71b). The breastplate was fastened to the ouches (**מִשְׁכָּנֹת**) of the ephod by means of threads of woven gold, passed through rings attached to the right and left of the upper part of the ephod. Furthermore, two rings were attached to the lower ends of the breastplate, from which azure cords passed through two rings at the lower points of the two shoulderbands of the ephod, where they joined the girdle; so that the lower part of the breastplate was connected with the girdle of the ephod, and could neither slide up nor down, nor be detached (Rashi to Ex. xxviii. 6, in many editions also at the end of Ex.; Maimonides, "Yad," *Kele ha-Mikdash*, ix. 6-9).

The twelve precious stones with which the breastplate was decorated contained the names of the twelve tribes; each name being fully engraved on one stone, in order that, when the high priest came before Him, God might be mindful of

**The Stones of the Breastplate.** the piety of the patriarchs (Ex. R. xxxviii. 8; Lev. R. xxi. 6). No chisel was to touch the stones, nor was it permitted to mark the names of the twelve patriarchs on the stones by means of paint or ink. The engraving was done by means of the *SHAMIR*, which was placed on the stone, and had the marvelous power of cutting it along the lines of the letters of the proper names, which were first traced with ink (Soṭah 48b). In addition to the names of the twelve tribes, the stones also contained, at the head, the names Abraham, Isaac, and Jacob, and at the end the words: **יִשְׁרָאֵל שְׁבַטֵי יִשְׂרָאֵל** " [all these are] the tribes of Jeshurun " (Yoma 73b, where the first two words are not found, while Yer. Yoma vii., end, 44c has them, and also **יִשְׂרָאֵל** instead of **יִשְׁרָאֵל**; Maimonides, *l.c.* 7, seems to have used a source differing both from Bab. and Yer., as his version has the words **יִשְׁבַּטֵי יְהוָה** = "tribes of God"). These words could not be omitted from the breastplate, since the whole Hebrew alphabet had to be included, in order that, on consulting the *Urim and Thummim*, the high priest might be enabled to form words from the different

colors of the individual letters on the stones of the breastplate, and hence might be able to answer questions put to him (Yoma, *l.c.*).

Even in early times there were various opinions on the order of the names of the twelve patriarchs on the stones; and Baraitas existed that discussed the matter. The latter, however, have evidently been lost; for the opinions therein contained are known only through quotations found in the early authors. A Baraita, quoted by Tobias b. Eliezer in his work "*Lekah Tob*"

on Ex. xxviii. 10, says that the order corresponded to that given in Ex. i. 2-4, except that Zebulun was followed by Dan, not by Benjamin, and that the last two names were Joseph and Benjamin (compare Soṭah 36a, b). This corresponds in part with the order in Num. R. ii. 7, except that there Gad precedes Naphtali; while Ex. R. xxxviii. 8 and Targ. on Cant. v. 14 correspond with the above-mentioned Baraita. According to the Targ. Yer. on Num. ii. 2 *et seq.*, however, the names on the stones of the breastplate followed in the same sequence as that observed by the tribes when marching in the wilderness (Num. ii. 2-21). Targ. Yer. on Ex. xxviii. 17 *et seq.* agrees with Josephus ("Ant." iii. 7, § 5) in saying that the names of the twelve patriarchs followed in the sequence of their ages, while Maimonides (*l.c.*) and Tobias b. Eliezer (*l.c.*) assert that the names of the patriarchs were engraved on the first stone and the words **כָּל אֱלֹהֵי יְהוָה** on the last, Bahya b. Asher and Hezekiah b. Manoah say, in their commentaries on Ex. *l.c.*, that each stone contained only six letters, selected from the name of the respective tribal-patriarch, together with one or more letters of the names of the three national patriarchs or of the words **יִשְׁרָאֵל שְׁבַטֵי יִשְׂרָאֵל**. Hence the letters on the whole of the stones numbered seventy-two, corresponding with the number of letters in the *SHEM HA-MEFORASH*. Compare *EPHOD*, *PRECIOUS STONES*, and *URIM AND THUMMIM*.

**BREATH.** See *SOUL*; *SPIRIT*.

**BRECHER, ADOLPH:** Austrian physician; born at Prossnitz, Moravia, in 1831; died at Olmütz April 13, 1894. He was the son of the physician Gideon Brecher. Adolph Brecher, after attending the gymnasium at Presburg and Prague, studied in Nikolsburg and at the University of Prague, where he devoted himself first to Jewish studies, then to the study of medicine. In 1859 he took up his residence at Olmütz, and practised as a physician there until his death.

Brecher was popular and respected as a general practitioner and as a consummate master of diagnosis. He was physician for all railroads with terminals at Olmütz. Moreover, he took an active and useful part in the public affairs of the city, serving for twenty years as director of the German Association (*Deutscher Verein*), and sharing in the management of the musical society. The Jewish community at Olmütz chose him as their vice-presi-

dent for more than a quarter of a century, and the Jewish community at Prossnitz made him an honorary member in recognition of his many services.

Brecher had a noble and richly endowed temperament; he was a clear thinker, a brilliant speaker, and a sympathetic poet full of sparkling humor and deep earnestness. He spoke and wrote in several languages, and developed a prolific and many-sided literary activity. Among his publications are: a book of riddles, "Sphinx," signed "A. B."; and later some collections of humorous poems, of which the following met with greatest favor: "Bunter Kram"; "In Müssigen Stunden," Berlin, 1890; and "Im Schaukelstuhle," Berlin, 1891. He contributed largely to the "Fliegende Blätter" of Munich. In his later years he was permanent collaborator of "Humoristische Deutschland," edited by Julius Stettenheim; "Berliner Wespen," edited by the same; and "An der Blauen Donau," Vienna. In addition to his contribution of poems to these three publications he made a number of translations into German. From the Hungarian he translated Petöfi's poems; from the Czech, Vrchlicky's; and he enriched Jewish literature by an excellent poetical rendition of the Psalms into German, "Die Psalmen Metrisch Uebersetzt," Vienna, 1862. He also revised and published the book his father left unfinished on the proper names found in the Bible, "Eleh ha-Ketubim be-Shemot," Frankfurt, 1877.

E. N.

**BRECHER, GIDEON (GEDALIAH B. ELIEZER):** Austrian physician and author; born at Prossnitz, Moravia, Jan. 12, 1797; died there May 14, 1873.

Brecher, who was the first Jew of Prossnitz to study for the medical or any other profession, attained the degree of master of surgery and obstetrics in Budapest in 1824, and the doctor's degree from the University of Erlangen in 1849, with the thesis "Das Transcendentale, Magie und Magische Heilarten im Talmud," Vienna, 1850. His fame in Jewish literature rests principally on this work and upon his lucid commentary on the "Cuzari" of Judah ha-Levi, which appeared with the text in four parts (Prague, 1838-1840). Brecher's correspondence with S. D. Luzzatto about this commentary is published in part in the second volume of the work itself, and in part in Mendel Stern's "Kokebe Yizhak" (v. 28-34, vi. 95-100, vii. 77-80). The commentary is modern in its tone; and in the preface the author openly states that he attempts to explain metaphysical questions in the light of modern philosophy, and he is not afraid to criticize axioms or formulas which were accepted at the time of the author of the "Cuzari," but were shaken or rejected by later researches. He also utters the opinion, bold for his time, that philosophy is the best check to religion, preventing it from degenerating into superstition and idolatry.

In addition to many contributions to scientific and literary periodicals and collections, and some important "Gutachten" (expert opinions) on social and religious questions submitted to him by imperial and local government officials, Brecher is the author of a monograph on circumcision, "Die Beschneidung der

Israeliten," etc., Vienna, 1845, with an introduction by R. Hirsch Fassel of Prossnitz, and an appendix on "Circumcision Among the Semitic Nations," by M. Steinschneider, who is a nephew of Brecher. Brecher also wrote "Die Unsterblichkeitslehre des Israelitischen Volkes," Vienna, 1857, of which a French translation appeared in the same year by Isidore Cahen; and "Eleh ha-Ketubim be-Shemot," a concordance of Biblical proper names, part of which was revised and published after his death by his son Adolph Brecher.

**BREGENZ.** See TYROL.

**BREGMAN, ELIEZER B. MOSES:** Russian financier and philanthropist; born in Indura (commonly called by Russian Jews "Amdur"), government of Grodno, in 1826; died in Teplitz, Bohemia, Sept. 3, 1896. He was a prominent business man of Grodno, where he settled early in life, and was known over Russia as the farmer of the Korobka (meat-tax) in many of the large cities of the empire. The government rewarded him for his various business enterprises and charities with a gold medal and with the title of hereditary honorary citizen. He spent more than 100,000 rubles for charitable institutions.

**BREIDENBACH, MORITZ WILHELM AUGUST:** German jurist; born at Offenbach-on-the-Main Nov. 13, 1796; died at Darmstadt April 2, 1857. He first attended the gymnasium at Frankfurt, and then the University of Heidelberg, from which he was graduated in 1817 as LL.D. After a supplementary course at Göttingen he began the practise of law at Darmstadt in 1820. In 1831 he became counselor of the treasury in the Ministry of the Interior, and in 1836 counselor of the cabinet, in which capacity he officiated as commissioner of the Hessian government in the Landtag. He became a member of the council of state in 1848, but was compelled to resign this office upon the outbreak of the Revolution. He was recalled, however, in 1849 as chief counselor of education, which position he held until his death. Breidenbach displayed exceptional ability in every capacity, whether as a jurist, official, or popular representative. But he was frequently opposed by those who admired his learning, because of his pronounced monarchical views. He was the principal author of the penal code of Hesse, and actively participated in framing the "Allgemeine Deutsche Wechsel- und Handelsrecht." His principal literary work is his commentary on the Hessian legal code. He was the son of Wolf Breidenbach.

**BREIDENBACH, WOLF:** German court agent and champion of Jewish emancipation; born in the village of Breidenbach, Hesse-Cassel, 1751;

died in Offenbach Feb. 28, 1829. He went to Frankfurt-on-the-Main as a poor boy, and for a time was a *bahur*, being supported by others while he studied Talmud and rabbinical literature. He also secretly acquired the knowledge of Neo-Hebrew, German, and some scientific subjects, besides being the best chess-player in the town. This accomplishment attracted the attention of a wealthy nobleman, who was so impressed by the young Talmudist's intelligence and honesty that he entrusted him with the management of his financial affairs. Breidenbach proving himself astute and trustworthy, his employer lent him a large sum of money, with which he embarked in the banking and in the jewelry business. He prospered, and gained the confidence of the small German princely courts with which he had business, becoming "Hoffaktor" of the elector of Cassel, and "Kammeragent" of the prince of Isenburg, besides holding similar positions under the rulers of various other principalities.

Breidenbach used his wealth and influence to benefit his oppressed coreligionists. His untiring efforts to abolish the Jewish "Leibzoll"—an obnoxious toll which Jews had to pay on entering towns where they did not dwell or had no special privileges—place him among the foremost champions of Jewish emancipation. He effected its abolition in Isenburg April 25, 1803, and in Homburg Nov. 1 of the same year. Aschaffenburg, Schönberg, and finally Frankfurt itself (Aug. 24, 1804) abolished the toll through his exertions; and the princely courts of Nassau-Usingen, Nassau-Weilberg, Löwenstein, Wertheim, Leiningen, as well as the court of Ehrbach, followed their example. In some cases Breidenbach acted as the syndic or attorney for various Jewish communities. He made an unsuccessful effort to induce the Diet of Ratisbon to abolish by a single act the "Leibzoll" in all the German states, and only succeeded in having it abrogated in that city itself and in Darmstadt (Jan. 19, 1805).

Breidenbach was the friend and protector of the grammarian and publisher Wolf Heidenheim of Rödelheim, and is said to have translated several hymns for Heidenheim's German edition of the *Mahzor*.

He had three children: one daughter, Sarah, who married Abraham Gans of Cassel, and two sons, MORITZ and ISAAC (Julius), both of whom embraced Christianity after his death. The first was a grand-ducal "Ministerialrath," the second became ambassador in Stuttgart.

Juden*, p. 92, and *Judenemancipation*, p. 269; M. Friedländer, *Geschichtsbilder aus der Nachtalmudischen Zeit*, iv. 25 *et seq.*, Brünn, 1887.

P. Wl.

**BREIER, EDUARD:** Austrian writer; born at Waraslin in Croatia Nov. 3, 1811; died at Zaiwitz near Znaim, Moravia, June 3, 1886. His first novel, "Der Fluch des Rabbi," published in 1840, was written in eleven days, during his furlough while an artilleryman. This work at once brought him into prominence and caused him to decide to become a journalist and a writer of fiction. He assumed charge of the "Prager Zeitung," which he continued to edit

until the paper was suppressed in 1848. He then settled in Vienna, where he soon became a popular writer of Jewish and Austrian tales. His Jewish novels, in addition to the one mentioned, were: "Die Sendung des Rabbi," "Die Sabbathianer," and "Alt- und Jung-Israel." He wrote many tales dealing with Austrian history, which are strikingly national in sentiment, the most characteristic among them being perhaps "Wien und Rom" and "Kaiser Joseph."

BIBLIOGRAPHY: *Jüdisches Athenäum*, p. 30, Leipzig, 1851.  
S. A. M. F.

**BREITENSTEIN, MAX:** Austrian writer and translator; born at Iglau, Moravia, Nov. 10, 1855. He attended the gymnasium of his native city and the University of Vienna. In 1876 he turned to journalism and founded the weekly "Alma Mater," which he conducted till 1881. Breitenstein compiled: "Akademischer Kalender der Oesterreichischen Hochschulen"; "Kommersbuch der Wiener Studenten," 1880, 3d ed. 1890; "Sammlung der Bedeutendsten Reden des Oesterreichischen Parlaments." He is also the author of several pamphlets, essays, humorous sketches, and of translations from the English, and was the editor of the "Wiener Correspondenz" and the "Allgemeine Juristen-Zeitung."

**BREITHAUPT, JOHN FREDERICK:** Christian Hebraist and rabbinical scholar at the beginning of the eighteenth century; aulic counselor

John Frederick Breithaupt.  
(From Breithaupt's "Rashi.")

to the emperor and to the duke of Gotha. He produced an elaborate edition of Yosippon with a Latin version, under the title "Josephus Gorionides" (Gotha, 1707). The detailed subject index at the end still renders it of value for reference. A still

greater exploit was his Latin translation of the commentary to the whole Bible of Rashi, whom he calls "Jarchi," which work appeared in three thick volumes (Gotha, 1710-13). Breithaupt takes note of the various readings of Rashi's text; and, on the whole, produced a version of considerable accuracy, considering the circumstances under which he wrote.

**BIBLIOGRAPHY:** Wolf, *Bibl. Hebr.* i. 1096 (who declares his ignorance of any details of this writer); Steinschneider, *Cat. Boll.* No. 4625.

J.

**BREMEN:** Free city of the German empire; remarkable as one of the places where few Jews have ever dwelt. A baptized Jew, Paulus, is said to have taught alchemy there to Archbishop Adalbert about the middle of the eleventh century. Reference is also made to the Jew Ludbert in 1324. Even the Jews traveling through Bremen were hampered in their movements. They could remain in the city only one night, and had to report to the burgomaster, and to pay the Jews' tax. Only during the "Freimarkt" were they allowed to stay longer, and to do business; and for this privilege they had to pay a special tariff. From the sixteenth century, when many of their coreligionists were settling in the districts of Hanover, the Jews made frequent attempts to obtain permission to live in Bremen. Individual Jews were often expelled.

In the beginning of the nineteenth century Bremen, and also certain villages, received some Jewish inhabitants; but they, too, were expelled in 1803 on complaints of the merchant guild of the city. About thirty families settled in the city during the French occupation (1811-13), a period most favorable to the Jews. But these also were banished after the year 1814 in consequence of the Vienna convention, though their expulsion was not totally effected until six years later.

The citizens became more tolerant after 1848, in which year a small Jewish community was founded. In 1864 it numbered only 179 persons in the city and 255 in the whole district of Bremen, or 2 per cent of the entire population. At present (1902) there are 947 Jews in the city and 1,057 in the district. M. Levinger is preacher of the community. The synagogue was inaugurated Sept. 13, 1876. Dr. Leopold Rosenak was chosen rabbi in 1896.

A. F.

**BRENZ, SAMUEL FRIEDRICH:** Anti-Jewish writer; born at Osterburg, Bavaria, in the latter half of the sixteenth century; date and place of death unknown. He was converted to Christianity in 1610 at Fenchtwangen, and wrote "Jüdischer Abgestreifter Schlangenbalg" (The Jewish Serpent's Skin Stripped), in which he bitterly attacked his former coreligionists, whom he accused of hating "the most pious and innocent Jew, Jesus Christ," and in which he denounced their religious literature. This book, divided into seven chapters, appeared at Nuremberg in 1614, 1680, and 1715.

Against him Solomon Zebi Hirsch of Aufhausen (not Offenhausen nor Ufhausen) wrote "Der Jüdische Theriak" (The Jewish Theriak or Antidote), Hanau, 1615. For the use of Christians as well as

Jews he had it printed in German and in Hebrew, and the work was successful in refuting the false accusations of Brenz. A new edition of the "Theriak" appeared at Altorf in 1680, and a Latin translation by Johann Wülfer, together with the Schlangenbalg, was published at Nuremberg in 1681.

Wülfer strongly defended the Jews against Brenz, whose crass ignorance, hatred, falsehood, and pernicious fanaticism, as well as his plagiarism of Pfcferkorn, he exposed. A Hebrew translation under the title "Ia-Yehudim," by Alexander ben Samuel, is extant in manuscript in the library of the University of Leyden.

S. MAN.

**BRESCH or BRES, JUDAH LÖW BEN MOSES NAPHTALI** (Paulus Æmilius?)

Translator of the Pentateuch into Judæo-German; lived in Germany in the sixteenth century. He is known only from De Rossi (s.v. "Guida Figlio di Mose Naftali Bres"; Hamberger, s.v. "Bress"), who credits him with the translation which first appeared in Cremona in 1560 and was reprinted in Basel in 1583, and which, besides the Pentateuch, contains a translation of the Haftarat and the five Megillot with extracts from Rashi's commentary. But the preface to the translation states plainly that it is the work of Paulus Æmilius, a converted Jew residing in Rome; it seems probable therefore that this was the name assumed by Bresch after his conversion, although Steinschneider ("Sitzungsberichte der Phil.-Philol. K. der K. Bayerischen Akademie der Wissenschaften," 1875, part 2, p. 185) says that the former Jewish name of Paulus Æmilius is not known. Fürst, who probably had no other source than De Rossi, knows only of Bresch, but the more critical Benjacob expresses some doubt on the matter. According to some authorities, the translation was reprinted in Basel in 1603, and in Prague in 1610, and there is also a quarto edition without date, which appeared in Augsburg. The translation is said to follow closely that of Elias Levita, which first appeared in 1544.

P. Wl.

**BRESCIA** (Hebrew, בְּרִיטָה): City and province of Lombardy, Italy. The Jews first settled there during Roman times. A commemorative stone, dating from the fifth century, probably comes from a synagogue. In the Middle Ages definite information concerning the settlement of the Jews in Brescia dates from the period of the Venetian rule over the cities of Lombardy, beginning in 1426.

As in all its other possessions, Venice permitted the Jews to live under the same conditions in the communities around the Garda lake. In 1434 a Jew was solemnly baptized in Brescia. The population, however, already unfavorably disposed toward the Jews, was incited against them by fanatic monks; and the Senate of the republic was repeatedly called upon to protect the Jews, especially during the

disturbances after the alleged murder of Simon of Trent in 1475. They were required to wear a badge. The old statutes of the town refer to them in the column "Malefictorum Criminalium," "Statuti Vivili," Brescia, 1557. They gained their living by money transactions, and, as the Christians complained about their dealings, it was left to Brescia, in 1481, by the authority of Venice, to permit the Jews to remain or to expel them. During the short time of the French rule, 1509-12, the Jews were plundered and then expelled. In 1516 they were again admitted by Venice; but after the battle of Lepanto in 1571 the Senate determined to expel them, and since that time it seems that Jews have lived at Brescia only occasionally, and chiefly as money-lenders. They are mentioned in documents of 1596, 1680, and 1787. Heinrich Heine, in 1844, saw a synagogue there ("Italienische Reise," vol. i., end).

The city has no Jewish community at present (1902). In the province of Brescia there are Jews in the Riviera of Lago di Garda. There was an old settlement at Salò, and Jews were also living at Iseo, Gavardo, Palazzuolo, Gottolengo, Lazzaro, and Barco.

Brescia is famous for the printing establishment which Gershon b. Moses Soncino conducted at that city and at Barco in the same province (1491-96), publishing especially celebrated editions of the Bible (De Rossi, "Annales," i. 39, 41, 46-48, 51; ii. 30, 31). The Cod. Turin 45 was sold at Brescia in 1509, shortly before the expulsion. Among the places in the province, Salò deserves especial mention as the birthplace of Moses Sefardi b. Abraham of Salò, 1320, and of Nathan da Salò, 1487.

**BRESLAU.** See SILESIA.

**BRESLAU, ARYEH LÖB BEN HAYYIM:** German Talmudist and rabbi; born in 1741 at Breslau, Prussia; died April 22, 1809, at Rotterdam, Holland. He lived at Lissa, Posen, and later at Berlin, where he was an inmate of the bet ha-midrash of the philanthropist Daniel Jafe. From Berlin he went to Emden, Prussia, as city and district rabbi. In 1781 he was called as chief rabbi to Rotterdam. Breslau was highly reputed as Talmudist, as is shown by his many responsa, and by the fact that such celebrated men as Phineas Hurwitz, Isaiah Berlin, and David Tevle Schiff referred Talmudic questions to him. He was also distinguished by his knowledge of the secular sciences. He enjoyed great popularity in Holland, and his reputation was not confined to Jewish circles, but many Christian scholars and theologians were also among his friends. He was buried with great ceremony, many delegates from the various Jewish communities attending his funeral. His memory is still revered among the Dutch Jews.

Breslau is the author of a volume of responsa, "Pene Aryeh" (Lion's Face), Amsterdam, 1790, which is distinguished by its logical method and reveals a thorough knowledge of the Talmud. Recognizing the latter work as the highest authority, he always applied common sense to the elucidation of Biblical and Talmudic precepts. While respecting the post-Talmudic authors, he wrote entirely inde-

pendently of them and without prejudice (Nos. 14, 63). Aside from Talmudic questions, the "Pene Aryeh" also contains answers to other matters, which bring out the author's thorough knowledge of Hebrew linguistics. The style of the responsa is simple and clear, the language being that of the Mishnah with an admixture of pure Hebrew phraseology, without rhetorical flourishes. The work on the whole reveals a serious scholarly mind.

When the French revolutionary army came into Holland, in 1793, Breslau wrote a series of prayers for the synagogue, which were translated into Dutch, and were published with a detailed preface by the Christian minister Jan Karp. Some fragments of Breslau's posthumous works are still preserved in the bet ha-midrash of Rotterdam. A poem that can hardly be characterized as successful, "Mizmor le Shabbat" (Psalm on the Sabbath), has recently been published by Dr. Ritter, chief rabbi in Rotterdam. Breslau's three sons, who took the family name Löwenstamm, were Abraham, rabbi in Meseritz, and later in Emden; Hayyim, rabbi at Leeuwarden; and Mordecai, assistant rabbi in Rotterdam, all known as Talmudists and Neo-Hebraic writers. His grandson, Menahem Mendele ben Hayyim, was chief rabbi at Rotterdam.

BIBLIOGRAPHY: Ritter in *Ozar ha-Sifrut*, v. 265 et seq.; Roest's *Israelitische Letterbode*, iv. 109; *Ha-Messef*, 1809, p. 209; *Allg. Zeit. des Jud.* 1837, p. 448; Steinschneider, *Cat. Bodl.* No. 4432. I. G.

**BRESLAU, JOSEPH B. DAVID:** German Talmudist and rabbi; born (probably at Breslau) in 1691; died Jan. 22, 1752, at Bamberg. He was at first a rabbi at Grabfeld near Fulda, then rabbi of Bamberg, 1743-52, where his brother-in-law, Moses b. Abraham Broda, had officiated, 1718-33. Breslau wrote the following works: (1) "Shoresh Yosef" (Joseph's Root), Amsterdam, 1730, on the legal term *Miggo*; (2) "Hok Yosef (Joseph's Law), *ib.* 1730, a partial commentary on Joseph Caro's *Shulhan 'Arukh*, Orah Hayyim, on the passages treating of the Passover; (3) "Ketonet Yosef" (Joseph's Robe), Fürth, 1769, pilpulistic *Haggadah*, arranged according to the weekly lessons of the year. Breslau was an apt pupil of his father-in-law, Abraham Broda, like whom he is distinguished for the great acuteness and wit shown in his writings. His first work, which especially shows these characteristics, may be considered as the most important Talmudic work that was produced by the school of Abraham Broda.

One of Breslau's sons, Abraham, was a learned merchant of Mühlhausen in Alsace. He issued the posthumous work of his father, to which he added his grandfather's work, "Toledot Abraham."

BIBLIOGRAPHY: Eckstein, *Gesch. der Juden in Bamberg*, pp. 171-173 (contains also Breslau's epitaph). I. G.

**BRESLAU, MARCUS HEYMANN:** Author and journalist; born at Breslau, Germany; died in London May 14, 1864. He went to London as a youth, and for a time taught Hebrew and was attached to a synagogue. He then became connected with the "Hebrew Review," edited by Dr. M. J. Raphall. A few years later, when the "Jewish Chronicle" was started, he conducted that periodical for a number

of years, in conjunction with the proprietor, and on the death of the latter became sole proprietor and editor, though he sold it a few months afterward. Being well versed in Hebrew and possessed of considerable energy and activity, he had a share in nearly every movement of the Anglo-Jewish periodical press and in several other literary undertakings started by foreign Hebraists in England. Some years later he tried to revive the "Hebrew Review," but failed, and he then retired from active work.

Breslau was the author of a Hebrew grammar and dictionary. From the German he translated devotional exercises for women, and copied various Hebrew manuscripts in the collection at Oxford. He helped to translate into English the two volumes of "Miscellanea" from the Bodleian, edited by H. Edelmann. Breslau stood forth as the ready scribe and, to some extent also, the Hebrew poet of the community. A public subscription and testimonial were presented him during his later years, in recognition of a thirty-year literary activity.

**BRESLAUER, HERMANN**: Austrian neuropath; born at Duschnik, Bohemia, Nov. 10, 1835. He was educated at the gymnasium at Pilsen and the University of Vienna, graduating from the latter as doctor of medicine in 1860. Establishing himself as a physician in the Austrian capital in the same year, he was assistant to Professor Leidersdorf from 1861 to 1872, when he, with Dr. Fries, founded a private hospital for mental and nervous diseases at Inzersdorf, near Vienna.

s.

F. T. H.

**BRESLAUER, MAX**: German chemist; born at Trebnitz, Prussian Silesia, June 19, 1856. He received his education at the universities of Leipzig, Heidelberg, and Breslau, graduating with the degree of doctor of philosophy. In 1880 he was appointed judicial and police chemist in Lissa, Prussia, and in 1882 chief of the experimental bureau of the board of health in Brandenburg-on-the-Havel. Four years later he was called to Berlin to fill the same position on the board of health of the German capital, which he holds at present (1902).

Breslauer has written many essays and reports in the professional journals of Germany. Among his works may be mentioned: "Einfache Methoden zur Trinkwasser-Untersuchung," 1884; "Chemische Untersuchung der Luft für Hygienische Zwecke," 1885; "Die Anwendung des Lactodensimeters zur Milchkontrolle," 1886; "Practische Anleitung zur Untersuchung der Frauenmilch," 1892; and "Chemische Beschaffenheit der Luft in Charlottenburg und Berlin," 1894.

F. T. H.

**BRESLAUER, EMIL**: German musician and writer on musical pedagogics; born at Kottbus May 29, 1836. He first attended the gymnasium in his native city, and later the seminary at Neuzelle. Upon his graduation from that institution he became preacher and religious instructor in the Jewish con-

gregation of Kottbus. In 1863 he removed to Berlin in order to take a four-year course in music at Stern's Conservatory, studying with Jean Vogt and H. Ehrlich (piano), Fl. Geyer, Fr. Kiel (composition), H. Schwantzer (organ), and J. Stern (score-reading and conducting).

For eleven years (1868-79) Breslauer was teacher at Prof. Th. Kullak's "Neue Akademie der Tonkunst," his special department being the pedagogics of pianoforte-playing. Shortly after leaving the academy he formed a society among the music-teachers of Berlin, which in 1886 developed into the "Deutscher Musiklehrer-Verband." Breslauer is also the founder and director of a piano-teachers' seminary.

A work published by Breslauer in 1874, entitled "Die Technische Grundlage des Klavierspiels," obtained for him the title of professor. In 1883 he was appointed choirmaster of the Reformed Synagogue of Berlin, which position he still (1902) holds. In addition to his contributions as musical critic of the "Spensersche Zeitung" and the "Fremdenblatt," Breslauer has published the following theoretical and pedagogical works: "Die Technische Grundlage der Klavierspiels" (1874); "Führer Durch die Klavierunterrichts-Litteratur"; "Zur Methodischen Uebung des Klavierspiels"; "Der Entwickelnde Unterricht in der Harmonielehre"; "Ueber die Schädlichen Folgen des Unrichtigen Uebens"; "Klavierschule," 3 vols., 18th ed., 1898; a compilation entitled "Methodik des Klavierunterrichts in Einzelsätzen" (1887); "Melodiebildungslehre auf Grundlage des Harmonischen und Rhythmischen Elements" (1896); "Sind Originale Synagogen- und Volksmelodien bei den Juden Geschichtlich Nachweisbar" (Breitkopf and Härtel)—a pamphlet devoted to the discussion of the melodies of the Jewish liturgy.

Since 1878 Breslauer has published a pedagogical periodical entitled "Der Klavierlehrer." He edited the eleventh edition of Schubert's "Musikalisches Konversations-Lexikon" (1892), and he is the author of a number of choruses (several of them for the synagogue service), songs, and pianoforte pieces.

**BRESNER, ISAAC BEN ELIJAH LEVI** (called "Melammed" [teacher]): Austrian educator; lived at Prague in the second half of the seventeenth century and the beginning of the eighteenth. In 1795 Bresner published at Prague, under the title "Iggeret Yizhak" (The Letter of Isaac), an order of confession, compiled from Gerundi's "Sefer ha-Yirah" and from Isaiah Hurwitz's "Shene Luhot ha-Berit," and now inserted in many rituals. He also published in Judaeo-German a compilation of maxims entitled "Dibre Musar" (The Words of Ethics), Prague, 1812.

I. Br.

**BRESNITZ, HEINRICH**: Austrian author and journalist; born at Czernowitz, Bukowina, Austria-Hungary, 1844. In 1867 he established in Vienna a periodical, "Der Osten," and in 1869 a political journal, "Der Patriot." From 1879 to 1886 he was the proprietor and chief editor of the "Morgen-

Post." He is the author of the following political pamphlets: "Die Verfassungspartei und das Ministerium Hohenwart," and "Betrachtungen über den Ausgleich." In 1893 Bresnitz went to Bulgaria.

s. M. Co.

**BRESSELAU, MEÏR ISRAEL:** German notary and secretary of the Reform congregation of Hamburg; born 1785 (?); died in Hamburg Dec. 25, 1839. He was identified with the Reform movement in Hamburg from its beginning, and when the Orthodox party attacked the Hamburger Tempelverein in the pamphlet "Eleh Dibre ha-Berit" (These Are the Words of the Covenant; Altona, 1819), Bresselau wrote as a reply his polemical work, "Hereb Nokemet Neqam Berit" (A Sword That Revengeth the Quarrel of the Covenant; Dessau, 1819). The magnificent Hebrew style of the latter publication is praised even by Grätz ("Gesch. xi. 385), and it ranks among the ablest literary productions of the controversy between the orthodox and reform parties. Bresselau was also joint author with Isaac Säckel Fränkel of "Seder ha-'Abodah" (Ritual of the Service), the Hebrew-German prayer-book of the Hamburg Reform Temple, Hamburg, 1819. But Fürst ("Bibliotheca Judaica," i. 131) errs in ascribing to him the allegorical drama "Yaldut u-Baharut" (Childhood and Youth; Berlin, 1786), which was written by Mendel BRESSLAU, who died in 1829. Bresselau's successor as secretary of the Temple congregation was Gabriel Riesser.

Post-Mendels*, s.v. *Sulamith*, viii., parts 7, 8, p. 276; *Allgemeine Zeitung des Judenthums*, 1840.

s. P. Wl.

**BRESSLAU, HARRY:** German historian; born in Dannenberg, Hanover, March 22, 1848. He studied history in Göttingen from 1866 to 1869; became teacher of the real-school in Frankfort-on-the-Main; afterward occupied a similar position in Berlin, and at the same time began his academic career as privat-docent in the university in that city. In 1877 he was appointed assistant professor at the same university, and in 1890 professor at the University of Strasburg, which position he still (1902) occupies. In 1887 he became corresponding member of the Munich Academy of Sciences. In 1888 he was elected a member of the board of editors of the "Monumenta Germanie Historica," a publication which has for its object the collection of all the ancient sources of German history. For this series he edits the periodical devoted to its interests, the "Neues Archiv der Gesellschaft für Aeltere Deutsche Geschichtskunde."

Bresslau also took a very important part in the foundation of the society for the investigation of the sources of the history of the Jews in Germany (Historische Commission für Geschichte der Juden in Deutschland), whose president he is (1902); and its magazine, "Zeit. für die Gesch. der Juden in Deutschland," contains a number of valuable essays from his pen. The most important are those proving that the story according to which Charlemagne called Rabbi Kalonymus from Lucea to Germany as chief rabbi of all the Jews, was a fabrication, and that

the charter of Henry IV. given to the Jews of Speyer was spurious. A number of valuable works on German history have been written by Bresslau, among which are: "Die Kanzlei Kaiser Konrads II." (Berlin, 1869); "Diplomatas Centum" (*ib.* 1872); "Jahrbücher Kaiser Heinrich II." (*ib.* 1875); "Der Sturz Zweier Preussischer Minister" (*ib.* 1879); "Jahrbücher des Deutschen Reiches Unter Konrad II." (Leipzig, 1879-84); "Handbuch der Urkundenlehre für Deutschland und Italien" (*ib.* 1889).

s. D.

**BRESSLAU** (also **BRESSLAUER** or **BRESLAUER**), **MENDEL BEN HAYYIM JUDAH:** Bookseller at Breslau (died 1829); author of articles in the periodical "Ha-Meassef," and of an allegorical ethical dialogue, "Yaldut u-Baharut" (Childhood and Youth), Breslau, 1786. He also wrote "Gellilot Erez Israel," a geography of Palestine with two maps (Breslau, 1819), and "Reshit ha-Keriah," a Hebrew reader and grammar with the phonetic method (Breslau, 1834).

**BIBLIOGRAPHY:** Fürst, *Bibl. Jud.* i. 131; Steinschneider, *Cat. Bibl.* col. 1743; Zeitlin, *Bibl. Post-Mendels*, pp. 40, 41; Zanz, *G. S.* i. 198.

s. S. MAN.

**BREST-LITOVSK** (in Polish, *Brzesc*; in Russian documents, *Brestye*, and, later, *Berestov*; and in Jewish writings, *Brisk* [בריסק] or *Brisk de-Lita* = "Brisk of Lithuania"): A fortified town in the government of Grodno, Russia, at the junction of the Mukhovetz river with the western Bug; capital of the district of the same name. The Jewish population of the city in 1897 was 30,252, in a total population of 46,542; that of the district (including the city) was in the same year 45,902, in a total of 218,366, or 21.02 per cent.

Brest was the largest and the most important of the first five Jewish settlements in Lithuania, dating from the second half of the fourteenth century, and continued in that leading position till the rise of Wilna in the seventeenth century. According to Bershadski, the well-known charter of Grand Duke Vitold, dated July 2, 1388, was originally granted to the Jews of Brest only, and was extended subsequently to the other Jewish communities of Lithuania and Volhynia. Brest-Litovsk soon became the center of trade and commerce, as well as of rabbinical learning, and the seat of the administration of the Jewish communities of Lithuania and Volhynia.

The fifteenth and sixteenth centuries must be regarded as the golden age in the history of the Jewish community of Brest. In the charter of Casimir Jagellon, granted Aug. 14, 1447, to all Jews in Lithuania and Poland, Brest is mentioned, among other important provincial towns, as controlling many territories. In 1463 the same king presented a Jew named Levan Shalomich with several estates in the district of Brest, and leased to him certain villages ("Russko-Yevreiski Archiv," i., No. 5).

When, in 1472, merchandise belonging to Itzek (Isaac) of Brest, collector of taxes, was arbitrarily seized in Prussia, the bishop of Wilna and six secular

councilors of the king interceded in his behalf before the grand master Henry Richtenberg (*ib.* No. 6). From the edicts of King Casimir IV., dated May 30, 1487, and May 12, 1489, and of Grand Duke ALEXANDER JAGELLON, Oct. 14, 1494, it appears that the customs duties of Brest and its districts were farmed by Jews of Brest and Lutzk (*ib.* Nos. 14-25). During the reign of Casimir all the important commercial and financial operations of Lithuania were concentrated in the hands of the Jews, especially of those of Brest, among them the brothers Danke, Pesah, and Lazar Enkovich (*ib.* Nos. 34, 46). In 1495 Alexander banished the Jews of Brest and other Lithuanian cities to Poland, whence they were permitted by him to return in 1503. During the banishment the synagogue of Brest was presented by Alexander to the Christian inhabitants of Brest to be used as a hospital ("Słownik Geograficzny," *s.v.*); but when the Jews returned it was given back to them.

In 1507 the community of Brest was the object of the special attention of Sigismund I.; and its history of that period is intimately connected with the brothers JESOFOVICH. The eldest of these, ABRAHAM JESOFOVICH, who embraced Christianity, filled several high offices and was secretary of the treasury under Sigismund during 1510-19. His two brothers, Michael and Isaac, who remained true to the faith of their fathers, also received important favors. In 1513 they were farmers of the customs duties of Brest, Lutzk, and Vladimir, and afterward held leases of the taxes on salt and wax, fumage (chimney-money), taverns (Mohilev and Vitebsk), and many other objects of revenue. An event of the highest importance in the life of the brothers Jesofovich, as well as for the community of Brest and for the Jews of Lithuania, was the ap-

**"Senior" pointment (Feb. 27, 1514) of Michael of Brest.** Jesofovich as the "senior" of all the Lithuanian Jews (R. Y. A. i., No. 60).

The power of a "senior" was, as Harkavy and Bershadski have shown, of a purely temporal nature; the appointment having been actuated by economic and utilitarian motives, as the king considered it to be the best means of securing from the Jews prompt and regular payment of taxes (Grätz, "Gesch. der Juden," Hebrew transl. vii. 313, note 1). In 1519 a certain Aaron the Blind was tried for the murder of Ivan Pralovich by the Brest city court, because the Jews of Brest refused to have anything to do with the accused, who was described as a "tramp and murderer, who had lost his eyesight through stealing grapes." They even would not offer bail for him when bail was allowed. Aaron was accordingly tried by the city authorities. After the trial Michael Jesofovich and the Brest Jews, realizing the danger of creating a precedent in relinquishing the power of jurisdiction granted them by the king, brought suit against the magistrate and other authorities of Brest for interference in a matter pertaining to their jurisdiction. In 1525 the king raised Michael to the hereditary nobility—an unprecedented honor for a Jew in the sixteenth century.

In 1576 (Dec. 6) King Stephen Bathori relieved the Jews of Brest from all taxes on account of serious losses sustained by them through fires ("Akty Wilenskoj Archeograficheskoi Kommissii," v. 139).

About half a century after the death of Michael Jesofovich there lived in Brest-Litovsk another remarkable personage, named Saul Wahl or Wol, concerning whom authentic information is so scanty that it is difficult to separate legends from historical facts. The identity of Saul Judich, "the king's servant"—a most influential Jew under Stephen Bathori and Sigismund III.—with Saul Wahl, the legendary king of Poland who reigned for one night, has, however, been satisfactorily proved by Bershadski in his article, "Yevrei Korol Polski" (in "Voskhod," 1889, Nos. i.-v.). In 1580 the Jewish community of Brest entrusted him with the conduct of the very important and complicated case, before the commissioners of the king, against the Christian merchants of Brest, who would not allow the community the proportion (one-quarter) of city revenues which had been granted to the community by charter. For a detailed account of his activity in the Brest community see SAUL WAHL.

From records of the custom-house of Brest-Litovsk (published in "Archeograficheski Sbornik," iii. 289-322, iv. 252-260) it is evident that

**Commercial Activity.**

the greatest part of the merchandise imported from Germany and Austria via Lublin, or exported from Lutzk via Lublin to Gnesen, in 1583 and the following years, belonged to the Jews of Brest. They imported, among other merchandise, wax, furs, leather, olives, hats and caps, paper, nails, iron, paint, locks, knives, mirrors, mohair-yarn, cinnamon, muscatel, neckties, and wire; from Hungary, linen; from Glogau, nnts, plums, lead, needles, pins, ribbons, wine, velvet, black silk, pepper, cards, bells, sugar, raisins; and from Moravia, cloth. The exports consisted of Moscow mittens, soap, furs, bridles and harness (both black and mounted in brass), copper belts, lumber, and grain.

From a document dated Dec. 14, 1584, it is evident that Isaac (Isaiko) Shachovich, a Jew of Brest, visited Moscow on business in 1581, notwithstanding the prohibition of Ivan the Terrible, and en route stopped in Mohilev at the house of his friend, the tax-collector Isaac Jacobovich.

Of the importance of the Jewish community of Brest, there are many proofs in the official documents of Lithuania; thus in 1567, when the Lithuanian Jews were taxed by King Sigismund Augustus with a special "loan" of 4,000 "kop groschen," the share that Brest was required to furnish was 1,300 kop groschen, almost a third of the loan ("Aktovaya Kniga Metriki Litovskoi: Publichnyya Dyela," No. 7, p. 163; "Russko-Yevreiski Archiv," ii., No. 265). However, on the appeal of Jacob Jugilovich and Rubin Agronovich of Brest, acting in the name of all the Jewish communities of Lithuania, the total loan was reduced to 3,000 kop groschen ("Aktovaya Kniga Metriki Litovskoi: Zapisei," No. 48, p. 112; "Russko-Yevreiski Archiv," ii., No. 266).

From the "Pinkes" (Jewish Archives) of Lithuania it appears that the Jewish communities of the grand duchy at that time were indebted to the Jewish community of Brest to the amount of 2,143 kop groschen (in 1655 the indebtedness had increased to 32,912 kop groschen, not including interest to the amount of 14,015 kop groschen). In 1566 Brest-

Litovsk had 106 Jewish house-owners, out of a total of 852 ("Aktovaya Kniga Metriki Litovskoi: Perepisei," No. 15A; "Russko-Yevreiski Archiv," ii., No. 231). The houses were small, insignificant frame

buildings, although they were inhabited by some families that consisted of fourteen persons ("Litovskie Yevrei," p. 335). The only synagogue was also a frame building. In 1569 a brick synagogue and brick houses were built, as appears from a lawsuit of the contractor against the Jews for not paying him in time ("Russko-Yevreiski Archiv," ii., No. 305). Wealthy farmers of customs, like the brothers Enkovich, had more commodious residences on their estates out of town ("Litovskie Yevrei," p. 404).

But Brest was the leading city, not as regards wealth alone, but also in learning and refinement; so that none of the rabbis or representatives of the other Lithuanian communities would render any decision of importance without the consent of the Brest community. According to tradition, the ascendancy of Brest-Litovsk extended as far as the Baltic sea and the German frontier. Students came from Germany and Italy to the yeshibah of Brest. The government held the Jews of Brest in special favor. Thus, under Sigismund Augustus the wealthiest farmers of taxes and other revenues, Isaac BORODAVKA, Abraham DLUGACH, David and Lipman Shmerlevich, were Jews of Brest; while Joseph Shalomich was the contractor of the mint, and the Isaacovich family was favored with special privileges by the king.

Among the prominent scholars of Brest in the sixteenth century who were not rabbis, the following may be mentioned: David Drucker, son-in-law of Saul Wahl; Phoebus, the teacher of Joel Särkes ("Bah"); Fishel of Brest, author of notes on the "Turim"; Joseph of Brest, brother of Moses ISSEILLES; Moses ben Hillel, grandfather of Hillel ben Naphtali, the author of "Bet Hillel"; and Samuel Heller.

The Jewish merchants of Brest, like those of the rest of Lithuania, had Russian names and spoke and wrote the Russian language. They had friendly intercourse with their Christian fellow-citizens, and did not need a "speaker" before the courts, as the German merchants did (*ib.* p. 395).

With the beginning of the seventeenth century Brest lost some of its importance as the center of wealthy farmers of taxes and other government leases. Prominent persons like Michael Jesofovich and Saul Wahl were unknown; they were succeeded in the arrangement of Jewish affairs

**Decline of** by the LITHUANIAN COUNCIL ("Waad Brest. ha-Medinah be-Lita"). There were eminent rabbis, Talmudists, and other scholars, such as Moses, grandson of Rabbi Heshel; Elijah Lipschütz, father-in-law of Rabbi Abraham ha-Darshan; Abraham ben Benjamin Ze'eb Brisker; Elijah ben Samuel of Lublin, author of "Yad Elijah"; Jacob ben Joel, author of "She'erit Ya'akov"; Zebi-Hirsch ben Eliezer Levi, mentioned in the "Teshubot Bah." But there were no communal workers of the type of those named above, to act as mediators between the Jews and the government, and

having the power to protect them in cases of emergency. The leaders of the Lithuanian Jews seemed to be more occupied with religious laws and with the preservation of the inner life of their community than with general politics. The collecting of taxes and the customs duties was leased to the secretary of the treasury of the grand duchy of Lithuania, who, in turn, sublet it for a term of two years to the Jew Getzko Meerovich ("Akty Wilenskoj Archivnoi Kommissii," vi. 308).

In 1638 a lease of the city hall place was granted by the municipal government of Brest to Nachman Shlomovich (*ib.* p. 312). In 1641 the municipal government leased the cellar under the city hall to Simon Shlomich for three years at an annual rental of thirty florins (*ib.* p. 395).

Of the forty-two Jewish Lithuanian councils held from 1623 to 1761, nineteen met at Brest or at one of the cities in its district.

That the Jews were still protected by the king is evident from the privileges granted them by Sigismund III. (March 9, 1615), under which they were exempt from quartering the Polish nobility and retainers at their houses (*ib.* v. 141); by John Casimir (Feb. 17, 1649), confirming privileges granted by King Vladislav IV. (Feb. 15, 1633, and Dec. 31, 1646); and by Sigismund III. (Oct. 10, 1592) (*ib.* p. 144). By an order issued June 23, 1655, King John Casimir forbade his subjects to build roadside inns or mills or to sell liquors, on the ground that the interests of the Brest leaseholders of the king were injured by such practices; and he warned them that all such establishments would be confiscated (*ib.* p. 153). By an order dated July 30, 1661, the same king relieved the Jews of Brest from all military duties; giving as his reason that the city of Brest and the Jews of that place were ruined by the invasion of the Moscovites (*ib.* p. 161). By a second edict (Aug. 8, 1661) he proclaimed that the Jews of Brest were released from all obligations for four years. He also released them from paying rent for the monopoly of the sale of liquors (*ib.* p. 162). In the same edict the king notified the Voyevoda of Polotzk that, on account of the losses inflicted on them by the invasion of "the enemy" (the Moscovites), the Jews of Brest were not able to pay their creditors, and that the king gave the Jews an "iron" or irrevocable charter freeing them from the payment of their debts for three years (*ib.* p. 163).

That even the factor of King John Casimir, Jonas Moizheshovich, was not very wealthy, and had to pawn his jewels and other property to the Christian merchant Vasili Proskurnich, is evident from an order issued by the king May 22, 1662, from which it appears that, having paid half of the debt, Jonas wished to pay the balance and to receive back his pledge, but that Proskurnich could not be found. The king considered that Proskurnich was trying to avoid the return of the pledge; he, therefore ordered all the clerical and other authorities to arrest Proskurnich wherever found, that he give satisfaction to Moizheshovich (*ib.* p. 164).

During the uprising of the Cossacks under CHMIELNICKI, 2,000 Jews were killed in Brest-Litovsk in 1649; the others escaped to Great Poland and Danzig (Kostomarov, "Bogdan Chmielnitzky,")

i. 341; Hanover, "Yaven Mezulah"). From a report of Gregory Kunakov, a courier of the czar, it appears that in this year Brest was utterly destroyed by the Cossacks and Tatars, that the Poles and Jews with their wives and children were all slain, and that all the palaces and stone walls were destroyed, the wooden buildings burned, and the city razed to the ground ("Regesty," No. 847).

From the instructions given to the delegates to the congress of the nobility of Volhynia, held at Brest in 1653, it is evident that taxes could not be collected from the Jews for the reasons above stated, and because some Jews had become victims of the pestilence, while others had fled to other countries (*ib.* No. 941). During the invasion of Brest by the Muscovites in 1660, all the deeds relating to the privileges and contracts of the Jews were lost (*ib.* No. 975).

That their relations with their Christian neighbors were not as friendly as formerly may be seen from a quarrel between the Christian citizens and the Jews over property lost by the latter during a fire at Brest in 1637. The case was, however amicably settled on the following conditions: (1) The city government ordered the citizens to return to the Jews their lost property wherever found, and to declare the amounts of debts due to the Jews. (2) Thereafter all lawsuits relating to property or documents destroyed by the fire, to cease; the Jews to have the right to take away all of their property wherever found. (3) The citizens to assist the Jews in capturing escaped criminals. (4) Both Jews and Christians to have the right to rebuild their stores and houses, but only on the old sites and according to the original plans. (5) To preserve order in the future, a guard to be organized consisting of Jews and Christians in equal numbers. (6) Steps to be taken by the city authorities to quell any future disorders ("Akty Wilenskoj Archivnoj Kommissij," vi. 289).

Another case is cited in 1621, viz., where the Christian murderer of a Jew was released from prison by a priest in consideration of the present of a casket of money taken by him from the house of the murderer. The authorities, by removing the guards from the prison, allowed the murderer to escape; and the many citizens who saw him break away did not help the Jews to capture him (*ib.* v. 14).

Lawsuits between Jews and Christians on account of property are of frequent occurrence, as is evident from the case (in 1639) of Joseph

**Lawsuits.** Zelmanovich of Brest against the merchant Friedrich of Thorn (*ib.* vi. 324); of the merchant Matvei Strepkovich against the deputy of Brest, accusing him of bribery for taking the part of Jacob Josephovich, a Jew of Brest (*ib.* p. 326); and of one Kornilovich against the same deputy, for declining to register in the city records his complaint of slander against the Jews of Brest—among them Zalaman, the agent of the KAHAL (*ib.* p. 336).

Of a more serious nature were the conflicts between the Jews and the Catholic and the Greek Orthodox clergy. The education of the Lithuanian Cath-

olic youth at that time was practically under the control of the Jesuits, as had been the case in Poland for a century. As a result of the encouragement among the pupils of a spirit of mischief directed against the Jews, the latter were constantly subjected to annoyances by the students from the so-called "Schülergelauf." The Jews at times retaliated upon the students. On one occasion the rector and the superintendent of the Jesuit college of Brest asked that a formal protest might be recorded against the unbelieving Jews of the city of Brest, who, it was stated, had, "in their hatred of Christian blood," insulted and beaten the students on many occasions. In 1643 it was alleged that they "had attacked little children of the officials of the Brest voeyvodship with a heavy club, still preserved in the college as a proof of their insolence." On March 8, 1644, a student named Nesetzki asserted that he had been attacked by Jews when passing the house of Pinkes Samuclovich in the Jewish street, and narrowly escaped with his life (*ib.* v. 17).

From a document dated Feb. 10, 1662, it appears that the general commissioner of the monastic order of the Augustines directed the return of the Brest Jews of six yards of ground taken from them by the father superior of the monastery (*ib.* v. 24).

**Church Dispute.** to the Brest Jews of six yards of ground taken from them by the father superior of the monastery (*ib.* v. 24).

In 1656 the Russian bishop Petei writes to Trotz-covich, priest of Brest, requesting him to make an effort to build a church on the ground whereon the church of Kozmo-Demyan had stood in former years, and whereon Jewish houses were then located; and to give notice to the Jews forthwith to clear the ground (*ib.* iii. 55). But from a document addressed to the kahal of Brest by the alderman of the city, it is evident that from ancient times the Jews had had a lease, at an annual rent of 20 florins, of the site of the Kozmo-Demyan church, on the Russian street, with the right to build houses (*ib.* p. 68). Notwithstanding this, the matter was not settled until 1679, when Bishop Zalenski issued a document stating that "the Jews had the right to build on that place."

On Aug. 21, 1669, the priest of the Russian church made a complaint against the Jews of Brest for reconverting to Judaism a baptized

**A Re-conversion.** Jewess of the name of Judith, whose baptismal name was Anastasia, a daughter of Shemuel, at one time leascholder of taxes (*ib.* v. 44). From a case between the kahal of Brest and some Russian priests of the city (Dec. 30, 1669) it appears that the latter caused much damage to the Jews of Brest, and that during the religious processions riots took place in which Jewish property was stolen and Jews were murdered or wounded by priests as well as by others (*ib.* p. 41).

Cases of outrages on the part of the Polish nobility are not wanting. On Feb. 10, 1665, a case was tried in the city court of Brest between the kahal and Vespasian and Chrysostom Kostiusko and Voitech Orinovich, the charge being that the defendants rode on horseback into the synagogue with their retainers, followed by a mob with drawn swords; that they cut almost to pieces the Jew Jovskei Aronovich, and severely wounded the agent

of the kahal, Leib Itzkovich. The court condemned the Kostiuskos to death and to a payment of 200 kops for the murdered Jew. Chrysostom did not appear in court, but sent notice that he was called to the war. There is no account of his having been punished (*ib.* v. 28, 31).

In 1669 the nobility of Brest instructed their delegates to the Diet to bring in a law prohibiting Jews from employing Christian servants, "as the working classes, who like easy work, prefer to be employed by the Jews" (*ib.* iv. 49).

The hetman of the grand duchy of Lithuania had to warn his subordinates repeatedly that the Jews of Brest must be freed from all military duties and must not be blackmailed (*ib.* v. 180). It appears from another order of the hetman (Aug. 7, 1669) that the city of Brest was charged with the duty of supplying the army with provisions (*ib.* iv. 70). The city authorities of Brest also forced the Jews to pay extra taxes and local contributions "in violation of their privileges and agreements," as is evident from an edict issued by King Michael Nov. 5, 1669 (*ib.* v. 249).

From a safe-conduct given to the Jews of Brest by the aldermen of Brest (April 2, 1668), it is apparent that they were often annoyed, attacked, mobbed, and robbed. The officials are warned, under a penalty of 10,000 kops, not to do any further harm to the Jews (*ib.* p. 183).

From a list of the year 1662 of the Jewish merchants of Brest for the apportionment of subsidiary taxes instituted by the Diet of Warsaw it appears that the highest valuation of goods in the fifteen stores of the Jews of Brest was 650 florins; the lowest, 30 florins. The collection from the pedlers is assessed at the sum of 150 florins.

From the beginning of the seventeenth century the Jewish community of Brest, like all the other communities of Lithuania, was obliged to contract debts; borrowing money from various religious institutions, such as churches, colleges, monasteries, and religious orders. The loans were mostly perpetual, and were secured by the real estate of the kahal. In this way most of the property of the community was under continuous mortgage.

In the middle of the eighteenth century the kahals of Lithuania became insolvent. When the committee of the Diet began to liquidate the Jewish debts in 1766, it appeared that the kahal of Brest then consisted of 3,175 persons; it had a debt of 122,723 florins (Bershadski, "Litovskie Yevrei," p. 8). The chief creditors were: the Jesuit college of Brest, 26,233 florins; the college of Neswizh, 2,800; the mission of Koden, 9,600; the provost of Kobrin, 400; Alter Shereshveski, 4,000; the Trinitarians of Brest, 1,000; the Dominicans of Brest,

**Debts of Community.** 11,516 florins, 14 groschen; the Augustinians of Brest, 32,300; the Bridget nuns of Brest, 7,700; the communist priests of Lomaza; 8,000; the Cistercians of Wislitzy, 1,000; the Paulinists, 7,200; the Bernardines of Brest, 2,300; the Greek Orthodox Dizunites, 1,000; the Carthusians of Bereza, 3,200; the provost Chernovitzki, 2,000; in all, 122,723 florins (*ib.* p. 170).

The total income of the kahal of Brest was then 31,200 florins. It was derived from taxes on salt, tobacco, herrings, tar, mills, taverns, breweries, etc.; licenses of Jewish artisans; a certain percentage on dowries, and from the meat monopoly (*ib.* p. 9). The expenses were: salary of the superintendent or agent, who received, in addition, certain articles in kind, such as meat, fish, sweets, etc.; salaries of the rabbi and judges; supplies for the army during its movements through the district of Brest, consisting of candles, oil, paper, sealing-wax, meat, fish, etc.

When the nuncio of the pope visited the city, the kahal presented him with a hog'shead of sugar. The officiating priest received a pound of sugar; the clerk, a flask of liquor.

With the fall of the Polish-Lithuanian kingdom the decline of Brest was hastened. Frequent fires, wars, and the plunder of the armies utterly destroyed the city. With the second partition of Poland, Brest, which had been rebuilt, came into the possession of Russia, and in 1796 was made a district town of the government of Slonim. In 1797 it was annexed to the Lithuanian provinces, and in 1801 was made a district town of the government of Grodno. In 1802 a fire destroyed a large part of the Jewish quarter. In 1828 fire also destroyed a great number of the Jewish buildings of Brest, among them five houses of prayer.

In the first half of the nineteenth century Brest had not improved, owing to the competition of other Jewish communities of Lithuania which had developed rapidly. By order of Nicholas I., **Nineteenth Century.** Brest, in 1832, was made a first class fortress, in consequence of which many historical buildings in the Jewish quarter and the ancient synagogue had to be demolished, others being erected on new sites, the government making partial compensation. By order of Rabbi Jacob Meir Padua, a descendant of Saul Wahl, the architect Ferdinand Schafir made a sketch of the old synagogue, which was presented to Dennis Samuel of London, also a descendant of Wahl. In the course of work on the fortress the cemetery was destroyed; and the monuments, when removed to the new cemetery, could not be deciphered.

In 1838 the Jewish Hospital, with forty beds and a pharmacy, was erected. It then had an income of five hundred rubles from the meat-tax and from voluntary contributions. In 1851-61 the new synagogue was built; and in 1866 an asylum for widows was founded by Rabbi Orenstein. In 1877 a dispensary, poorhouse, and lodgings for the poor were built; also a Talmud-Torah for 500 pupils. All these institutions are still (1902) maintained by voluntary contributions.

Notwithstanding numerous conflagrations, Brest, in 1860, contained 812 houses and 19,342 inhabitants. In 1889 there were 2,063 buildings and 41,615 inhabitants, of whom 27,005 were Jews; of the latter, 4,364 were artisans, 1,235 licensed merchants, and 1,000 employed in manufacturing.

At present the Jews control most of the trade and industries of Brest. There are four tobacco factories. The main articles of export (mostly to Danzig) are grain, flax and flaxseed, tar, lumber, and cattle.

On May 17, 1895, on the occurrence of another

large fire, the Jewish working classes were in great distress; and the minister of ways and communications permitted them free passage on the railroads for twelve days, to seek employment.

On May 11, 1901, another disastrous fire took place, resulting in a serious loss of life and property. In consequence the number of Jewish poor was largely increased.

Among prominent Jews of Brest, besides rabbis, may be mentioned: in the eighteenth century, Jacob Levi, author of "Hiddushe-Mahari"; JERUTIEL OF WILNA, physician, pupil of Rabbi Moses Hayyim

Luzzatto; Mordecai, author of "May-Prominent vim-'Ammukkim"; Joel, grandson of Per-Joel Särkes, and pupil of Lipman

sonalities. Heller; in the nineteenth century, Aaron ben Meïr, author of "Minhat-Aharon"; Meïr ben Aaron, author of "Tebnat She-mesh"; on Maimonides, Abraham Isaac ben Joseph, author of "Peshet Dabar"; Abraham Isaac, author of "'Arba' Kosot"; Samuel Pusitz (died 1838); Iser-Judel ben Nehemiah, author of "Nehamat-Yehudah," chief dayyan with Jacob Meïr Padua (died in Jerusalem); Isaac ben Hayyim of Kamenetz, chief dayyan with Zebi Ornstein (died 1878); Isaac ben Aba, author of "Me'ore bet-Yizhak"; Lipman ben David, author of "Ma'agalot Or"; Zebi-Hirsch Berls, author of "Or ha-Zebi"; Judah Epstein, author of "Kina-mon-Bosem"; Meïr Jonah, chief dayyan, author of "Sha'ar he Hadash," on Isaac b. Abba Mari's "Ittur."

The following is a list of the rabbis who officiated in Brest-Litovsk:

Jehiel, son of Aaron Luria, said to have officiated about 1470, but probably was only a private scholar then.

Moses Raskovich, about 1514; wanted to marry his daughter to the son of a rabbi of Cracow, but King Sigismund prohibited the match because the prospective bridegroom was under suspicion of having been mixed up in political affairs, and the latter was banished from Poland.

Mendel Frank, 1529.

Joseph ben Moses, 1546.

Rabbi Kalonymus, about 1560; mentioned in the Responsa of Solomon Luria, No. 36. Mordecai Reiss and Rabbi Simon were at the head of the yeshibah at the same time.

Solomon Luria (d. 1574).

Naphthali Hertz, called "Hirtz der Brisker" (compare Naphthali Shor).

Judah Liwa ben Obadiah Eilenburg, 1570.

Loeb, rabbi of Brest and of all Lithuania.

Moses Lipschütz, author of "Zikaron Mosheh" (Lublin, 1611), about 1563.

Bejnush Lipschütz, son-in-law of Saul Wahl (possibly he was the son of Moses Lipschütz).

Hirsh Shor (or Hirsh Elsasser).

Ephraim Solomon Shor.

Joel Särkes. In 1618 he left Brest for Cracow.

Ze'eb-Wolf, son-in-law of Saul Wahl; previously rabbi of Lomaz.

Joseph Casas, son-in-law of Wahl.

Abraham (Abrashky), son of Saul Wahl; was president of the yeshibah.

Meïr Wahl, son of Saul Wahl; officiated till 1631. He founded the Lithuanian Council in 1623, by permission of Sigismund III., of whom his father was a favorite.

Jacob ben Ephraim Naphthali Hertz.

Abraham ben Meïr Epstein, 1637.

Abraham ben Benjamin Aaron Solnik, 1639.

Joshua ben Joseph, author of "Magine Shelomeh."

Solomon Zalman, son of Jeremiah Jacob. His last signature in the Lithuanian Pinkes occurs under date of 1645.

Jacob Kahana, president of the yeshibah.

Jacob ben Ephraim Solomon Shor; last signature in the Pinkes under 1655.

Moses ben Judah Lima. Died before 1657.

Aaron Samuel Kaidanover (about 1657-60).

Joshua Heshel ben Jacob.

Zebi Hirsch ben Moses Jacob; last signature in the Pinkes under 1664.

Judah of Tropau; his signature in the Lithuanian Pinkes under 1664.

Mordecai Günzburg; officiated at Brest until 1685.

Mordecai Süskind ben Moses Rothenburg; his last signature in the Pinkes, 1691.

Saul ben Heshel, from 1691; last signature in the Pinkes, 1695.

Saul ben Moses of Cholim, grandson of Meïr Wahl; formerly rabbi at Pinczov.

Moses ben Pesah ben Tanhum of Cracow, grandson of the author of "She'erit Joseph," and son-in-law of Meïr Wahl.

Moses ben Mordecai Süskind Rothenburg.

Menahem ben Benjamin Katz.

David Oppenheim; accepted the rabbinate of Brest in 1698, but did not officiate there.

Judah-Löb, grandson of Joel Särkes.

Abraham ben Solomon, 1711.

Samuel Zebi Hirsch ben Aryeh Loeb, about 1714.

Nahman ben Samuel Zebi Hertz, Sirkia, 1718-53.

Israel Isser ben Moses, 1757-60.

Abraham ben David Katzenellenbogen of Kaidan; was rabbi at Slutsk, 1752. In Brest he officiated for forty-four years (1760-1804).

Joseph ben Abraham Katzenellenbogen, 1804.

Nahman Heilprin.

Aryeh Löb ben Joseph Katzenellenbogen, 1798-1837.

Isaac ben Israel of Pinsk, 1837-40.

Jacob Meïr Padua, 1840-55.

Zebi Hirsch Orenstein, 1855-64. Was expelled from Russia as a foreign Jew, he having been born at Lemberg.

Joshua Löb Diskin, 1864-67.

Joseph Bar Soloveitschik, 1869-92.

Hayyim Soloveitschik, son of Joseph Bar; is now (1902) officiating as rabbi.

**BRESTOVITZA**: Town in the district and government of Grodno, Russia, about forty miles south of the capital. From a record of a lawsuit between Paul Moskovich, parson of Brestovitz (Berestovee), and the Jew Moisei Isaacovich Khoroshenki of Grodno, brought before the court on Feb. 24, 1541, it is evident that Jews lived there before that date. The Jewish population in 1890 was 665.

**BREUER, JOSEPH**: Austrian physician; born Jan. 15, 1842, at Vienna. He studied medicine at the University of Vienna, whence in 1863 he graduated with the degree of doctor of medicine and surgery. The same year he entered the service of the Vienna General Hospital (*Allgemeines Krankenhaus*); remaining there until 1866, when he was appointed assistant to Oppolzer. Five years later he resigned that position, and soon after became privat-docent at the University of Vienna.

In 1890 Breuer gave up his docentship to devote himself entirely to the practise of his profession and to writing on medicine. He has been a frequent contributor to the medical and physiological journals of Austria and Germany; his special subject of study having been the physiology and pathology of the nervous system. Jointly with Hering he wrote "Die Selbststeuerung der Athmung Durch den Nervus Vagus" (in the "Sitzungsberichte der Wiener Akademie der Wissenschaften," 1868, lviii.). In 1873

his monograph on the function of the semicircular canals in the labyrinth, "Ueber die Function der Bogengänge des Ohrlabyrinthes," appeared in the "Wiener Medicinische Jahrbücher." In this monograph he broached a complete theory of equilibrium; maintaining that the peripheral apparatus of the sense of equilibrium has its seat in the semicircular canals. He has contributed to the literature of the static sense, in "Beiträge zur Lehre vom Statischen Sinne." Breuer has also written a number of articles that have appeared chiefly in Pflüger's "Archiv" and other medical papers, and jointly with Sigmund Freud he published "Studien über Hysterie," Leipzig and Vienna, 1895.

**BRIBERY:** The offer or receipt of anything of value in corrupt payment for an official act done or to be done.

The moral basis for the Jewish law against bribery is clearly expressed in Deut. xvi. 19-20; see also Ex. xxiii. 8. Divine sanction for the injunction against bribery is found in another passage in Deuteronomy, wherein God is described as the perfect Judge who regardeth not persons, nor taketh reward, and who executes the judgment of the orphan and the widow (x. 17-18).

These general statements are applied clearly and forcibly by King Jehoshaphat in his charge to the new judges whom he appointed to preside in the courts of the various cities of Judah: "Take heed what ye do, for ye judge not for man but for the Lord who is with you in the judgment; wherefore, now let the fear of the Lord be upon you; take heed and do it; for there is no iniquity with the Lord our God, nor respect of persons, nor taking of bribes" (II Chron. xix. 6, 7); and in a similar spirit he charged the Levites and the priests and the chief of the fathers of Israel (*ib.* 9). These admonitions seem to be a reflection of the words of Jethro in the plan which he offered to Moses for the constitution of courts, to assist the latter in judging the people. He sums up the qualifications of the judges in these words: "Thou shalt provide out of all the people able men, such as fear God, men of truth, hating gain" (Ex. xviii. 21).

The Biblical law nowhere provides a penalty for this crime. It is mentioned among the crimes for which the curse was pronounced on Mount Ebal (Deut. xxvii. 25). According to the later law it was punished by the infliction of thirty-nine stripes, following the general maxim that wherever the punishment for a crime is not specifically mentioned in the Bible, corporal punishment is to be inflicted.

It is well known that the temptation to bribery is especially strong in Oriental countries, where public opinion is not well organized and where great, almost irresponsible, power is lodged in the hands of the judges; and it appears from numerous passages in the Bible that the judges and the princes of Israel, especially during the period of kingship, freely sold judgment for money. It needs but one quotation to illustrate this condition of things: "Thy princes

are rebellious, and companions of thieves; every one loveth bribes and followeth after rewards; they judge not the fatherless, neither doth the cause of the widow come unto them" (Isa. i. 23, v. 23, xxxiii. 15). Other prophets accuse them of taking bribes even to shed blood (Ezek. xxii. 12; Amos v. 12; Micah iii. 1, vii. 3). The bribe-taker is condemned not only by the Law and the Prophets, but also by the Psalmist (Ps. xv. 5) and the proverbial wisdom of the people (Prov. xvii. 23).

The only case of actual bribe-taking recorded in the Bible is that of the sons of Samuel, of whom it is said: "His sons walked not in his ways, but turned aside after lucre and took bribes, and perverted judgment" (I Sam. viii. 3); and it appears that this condition of things was the cause of the gathering of the elders of Israel for the purpose of electing a king who, the people fondly hoped, would put an end to this and other evils existing in the commonwealth (*ib.* iv. 22).

The Talmudic law went beyond the Biblical law in its condemnation of bribery and in its regulations concerning it. The case of **Ḳarna**, a Talmudic criminal judge of Babylonia (contemporary of Rab and Samuel), appears to have been the leading case on the question of the right of a judge to be paid for his services. **Ḳarna** took a stater from each of the parties before he tried a case, to pay him for his loss of time; and the Talmud, after considerable argument for and against, justifies his action on that ground (Ket. 105a). Rab Huna similarly would not try a case until the litigants had furnished a substitute to do his work while he was acting as judge (*ib.*).

The Mishnah lays down the broad rule that if a judge takes pay for rendering a judgment, the judgment is void (Mishnah Bekorot iv. 6). This, according to the reasoning in **Ḳarna's** case, seems to mean that if pay is taken after the judgment is rendered, or if it is taken from only one of the parties litigant, the judgment is void; and such a view may be harmonized with the view of the Talmud, that the judge is entitled to be paid for his loss of time, provided that both of the parties contribute, and provided the money is paid to him before he tries the case.

The moral sense of Talmudists is illustrated by the following statement in the Sifre to Deut. xvi. 19: "'Thou shalt not take a bribe' is not an injunction against taking it for the purpose of clearing the guilty and convicting the innocent; this wrong is covered by the prohibition 'Thou shalt not wrest judgment,' but even to convict the guilty and acquit the innocent, thou shalt not take a bribe" (see also Mek., Mishpatim, 20; Maimonides, "Yad," Sanh. xxiii. 1). Raba asked, "Why is it forbidden to take a bribe to free the innocent?" and he answers the question himself, saying: "As soon as one accepts a bribe, he inclines to favor the donor and considers himself 'one with him'; and no man will find himself guilty" (Ket. 105b). As it is impossible to determine judicially who is innocent and who is guilty, before the trial has taken place, the acceptance of the bribe before the trial, for the purpose of acquitting the innocent, is in itself tantamount to declaring who is innocent without going through the

formality of a trial. This would seem to be the meaning of Raba's answer.

Raba's statement that the person accepting the bribe considers himself as one with the briber, leads the Talmud to a fanciful interpretation of the word שוהר ("bribe"). שוהר is compounded of two words, הוהר ("he is one"; that is, he, the judge, "is one" with the litigant, Ket. *ib.*). Rab Papa expresses this thought in other words: "A judge should not try the case of one whom he loves or hates, because he will find no guilt in his friend and no innocence in his foe" (Ket. *ib.*). The Talmud cites a number of instances where judges refused to try cases in which the parties litigant were persons who had befriended them. There was no question of bribery in the form of money involved in such cases, but the judges refused to try them upon the broad ground that one might be bribed, by kind

words or by feelings of friendship, to incline the scales of justice in favor of one of the parties; and that therefore, in order to preserve absolute impartiality, the judge should not stand on intimate footing with either of the parties litigant.

Abba Arika refused to try a case in which the innkeeper at whose inn he usually lodged was a party, and appointed another to try it (Sanh. 7b); Mar Samuel declined the case of a man who gave him his hand to assist him in landing from a ferry. Amemar refused to act as judge for a man who had picked a feather from his hair that had been lodged there by the wind; and Mar 'Ukba, for a man who had trodden his spittle in the dust. The Talmud justifies their views upon strictly legal grounds. The law is, "Thou shalt not take a bribe," not, "Thou shalt not take gain or money"; hence one may be bribed even by kind words.

The most interesting case is that of R. Ismael bar Jose. It was his custom to receive every Friday from his own garden a basket of fruit, which his gardener carried to him. On one occasion the gardener brought the fruit on Thursday, that being court day. When R. Ismael asked him why he brought it on Thursday instead of the accustomed day, the gardener replied, "I have a lawsuit to-day, and I thought I would bring the fruit with me," presumably as a matter of convenience to save him the journey on the following day. But R. Ismael refused to act as judge in his case, appointing two other rabbis to try it. During the progress of the case he thought, "If my gardener will only say thus and so, he will win his case," whereupon he said, "May the souls of those who take bribes be destroyed. If I, who did not even take the basket of fruit, and who would after all only have been taking my own property, am so prejudiced in favor of this man, how much more partial must be the judge who really accepts a bribe" (Ket. 105b).

Maimonides states the matter broadly in these words: "A judge may not sit to try the case of one to whom he is favorably inclined, even though such person may not be a relative or an intimate friend, nor may he try the case of one whom he dislikes, even though such person may not be his enemy nor does not seek to do him harm; for both litigants must stand equal before the judge, and must be

considered equal in heart" ("Yad," Sanh. xxiii. 6). An offensive practise of the judges, of conducting their business so that the fees of the court attendants and scribes were unduly increased, was considered a species of bribe-taking, and was condemned as such (Shab. 56a; "Yad," Sanh. xxiii. 3; Shulhan 'Aruk, Hoshen Mishpat, 9, 4).

If the judge nevertheless tries the case of a person who has sent him a gift before the summons issued, the other party can not attack the jurisdiction of the court on this account, for the judge is not legally disqualified from acting in such a case. It is, however, his duty, under the opinions expressed by the authorities, to refuse to try the case because of a possible prejudice in favor of the person who sent him the gift (*ib.* 9, 2). If a judge has borrowed something from a person who afterward appears before him as a litigant, he is not permitted to try the case, unless it appears that he is a man of means or has property which the lender may borrow from him ("Yad," Sanh. xxiii. 4; Shulhan 'Aruk, Hoshen Mishpat, 9, 1).

The bribe-giver and the bribe-taker are equally guilty before the law (*ib.*; "Yad," Sanh. xxiii. 2); and the bribe must be returned if the donor demands it (*ib.* xxiii. 1; Shulhan 'Aruk, Hoshen Mishpat, *ib.*). The difficulty which formerly existed by reason of the fact that judges were not paid for their services, was removed under the later

**Under the law.** An annual tax was levied on the community for the purpose of paying the judges a proper salary for their services; and the moneys given or bequeathed for sacred uses were likewise appropriated to this purpose (*ib.* 9, 3). R. Moses Isserles thought it was best to levy these taxes for payment of the judges' salaries at the beginning of the year, in order that they might be assured of their support for the entire period, and that they need not be beholden to any person (gloss, *ib.*).

The frequent allusion in the Law to the fact that bribe-taking has the effect of blinding the eyes of the wise, did not escape the attention of the haggadists, who said: "Every judge who takes a bribe and perverts judgment will not die before his eyes have grown dim, as it is written: For a bribe blindeth the eyes of those who can see" (Mishnah Peah viii. 9; see also Midrash Tan., Shofetim, 8).

Maimonides summarizes the question of bribery most impressively in the following words: "The judge must conduct himself as though a sword were lying on his throat and Gehinnom open at his feet; he must know whom he is judging, before whom he is judging, and who will demand an account from him as to the justice of the judgment" ("Yad," Sanh. xxiii. 8). See JUDGE; JUSTICE AND EQUITY, PRINCIPLES OF.

E. C.

D. W. A.

[The following example is given in the Talmud of the venality of the non-Jewish judges: Imma Shalom, R. Gamaliel's sister, wishing to expose a judge (probably a Christian) who had the reputation of being proof against bribes, presented him with a golden candlestick, with the request to award to her a portion of her parents' estate. His decision was: "Since you [the Jews] have been banished from your coun-

try, the law of Moses is no longer applicable, but another law has been given that says: "The son and the daughter shall inherit equally." On the following day, however, after R. Gamaliel had presented the judge with a Libyan ass, the judge said: "I have been looking over the conclusion of the new law, where it says: 'I am not come to destroy the law of Moses, but to complete it' [see Matt. v. 17], and there it is said, 'A daughter shall not inherit with the son.'" Imma Shalom then said to the judge: "Let your light shine like a candlestick," reminding him of her present; but R. Gamaliel answered, "An ass came and overthrew the candlestick" (Shab. 116a, b; see also Pesik. xv. 122b *et seq.*, and parallels in Buber's notes). In one passage of the Talmud it is said that the Persians, especially the Ghebers, took bribes and relented in the execution of discriminating laws against the Jews if they were paid for it (Yeb. 63b; compare also B. K. 117a).

The Halakah with reference to not taking fees frequently gave rise to violent controversies in the Middle Ages, when the communities began to appoint permanent rabbis with salaries; since it was considered unlawful to pay a rabbi who was also judge. See FEES; see also Güdemann, "Religions-geschichtliche Studien," pp. 65-88.]

**BRICHANY:** Town in the government of Besarabia, Russia, with (in 1898) 7,303 Jewish inhabitants in a total population of 8,094. The Jewish artisans number 972, most of whom are furriers who export fur overcoats and caps to the extent of 25,000 per annum. About twenty-five families are occupied in the culture of tobacco and in gardening. About 700 Jews are day laborers, earning from 10 to 30 copecks per day.

S. J.

**BRICK:** The expression "brick" (לִבְנָה); translated once "tile" in A. V., Ezek. iv. 1) designates both the burnt and the sun-dried brick. However, there is only one certain passage in which the first kind is referred to—viz., Gen. xi. 3—and there the Babylonian custom of "burning brick thoroughly" (thus A. V.; "thoroughly" should be omitted) seems to be treated as not less foreign to Palestine than is the use of bitumen (R. V.) for mortar. Apparently, all other passages mean the unburnt mud-brick, dried solely by the sun. This practise is current in the ancient Orient and in the modern East likewise, which still has in general a great preference for unbaked clay as building material. The A. V. in II Sam. xii. 31; Nahum iii. 14; Jer. xliii. 9, speaks of the brick-kiln, but the rendering is not correct. The first passage—which was formerly considered as a strong proof of the barbarous cruelty of David's time—is most likely to be translated, "David made them [the captives] labor with the brick-mold" (compare R. V. margin on this slight emendation). Similarly, R. V. margin in Nahum, in accordance with the Peshitta. In Jer. xliii. 9 the R. V. substitutes "brickwork" (margin, "pavement or square"; so also the Pesh. and Hoffmann; the former translation was defended by Hitzig and others). No version offers any support to the idea

of a kiln in these passages (see G. Hoffmann, in Stade's "Zeitschrift," 1882, ii. 53 *et seq.*).

Indeed, burnt bricks in Oriental ruins seem to date from Roman times. Egypt—in which the sun-dried brick from Nile mud formed the material for all secular buildings and even for many tombs (in earliest time, for all the royal tombs and pyramids) seems to furnish the best analogue. The only means employed by the Egyptians to give greater durability to this material was the admixture of straw and stubble with the clay; mentioned in Ex. v. 7. This seems to have been a purely Egyptian custom. On Egyptian monuments there are found scenes representing brickmaking; and among these some showing captive Semites at work with the brick-mold, who have often erroneously been taken for Israelites.

In Babylonia (see above on Gen. xi.) burnt bricks were often employed for the outer layers of important public constructions, because of the copious winter rains of the country. This led to a high development of the ornamentation of buildings with glazed and painted bricks and tiles; so, for example, Nebuchadnezzar's palace at Babylon. In Egypt only a few instances of the employment of such methods can be found (Tell el-Amarna, Tell el-Yehudiye); while the Persians still used such bricks in the Babylonian manner, for instance, in the palace of Susa. But, by the side of this, the unburnt brick always played the greater part. It may be mentioned that the size of Babylonian and Egyptian bricks was larger than that of the modern brick, often enormous. In both countries the brick-mold—that is, the open box with a handle—often furnished a royal or official stamp for the bricks, stating the date, and the building for which the bricks were determined, etc. Of none of these higher developments of brick-manufacturing have examples been found in Palestine, which country offered rich material in stones for public buildings. The unburnt bricks of which the Palestinian mounds exhibit numerous examples seem to have formed the principal building material for private houses, except for a few of the most wealthy (Isa. ix. 9; Amos v. 11). See CLAY; and on the use of a "tile" for sketching (Ezek. iv. 1) see WRITING.

J. JR.

W. M. M.

**BRIDE.**—In **Mystic Lore:** The allegorical use of the name "Bride" for "Israel" is based upon Hosea ii. 19-20; "I will betroth thee forever," and, in conjunction with Ezek. xvi. 8, gave rise to the allegorical interpretation of the Song of Solomon as typifying the espousal of God as the King of Peace (Solomon) and Israel (the Shulamite), at the redemption from Egypt and the erection of the tabernacle (see Pesik. Ia, 6a; Pesik. R., ed. Friedmann, v. 17b, 21b; Cant. R. to lv. 8-12, where the expression "kallah" [bride] is referred to Israel). However, according to Origen ("Cantic. Canticoe." Homily iv.; compare also "Tehilat Perush Shir la-Shirim" in "Steinschneider Festschrift" and ALLEGORICAL INTERPRETATION), the Palestinian Jews gave the Song of Solomon a mystical interpretation, allowing it to be studied only by men of mature age. This would indicate that, like the "merkabah" of Ezekiel and

the Creation story, the Song of Solomon served as a basis for Gnostic mysteries such as Paul suggests in Eph. v. 32, where he finds in the union of husband and wife "a sacred mystery," obviously of cosmological character. Accordingly, the bride and bridegroom were important in the Gnostic mysteries. See Irenæus, "Adversus Hæreses," i. vii. 1; "Hakamot (Sophia), the mother, after all her seed had been perfected, enters the pleroma as bride and receives the Savior or Demiurge as her spouse," which "mystery of conjunction" these heretics dramatically imitated in their illicit marriages.

Yet these mysteries borrowed the anthropomorphic form of the Deity from the Song of Solomon (Schmidt, "Gnostische Schriften in Koptischer Sprache," 1892, pp. 279-281, where Cant. iii. 11 is quoted), exactly as did the Jewish cabalists when measuring the dimensions of the Deity in the "Shi'ne Komah" (Gaster, "Monatschrift," 1893, p. 216).

In conformity with this idea Malkut, "the Kingdom," the lowest of the Ten Sefirot, is called the bride, because she desires, but has not attained, the union with Ze'er Anpin, the creative power or "Microprosopus" (the Lesser Countenance); whereas Binah ("the Intelligence"), as the Mother Supernal, is actually united with the Father, "the Ancient One," the Ereḳ Anpin ("the Vast Countenance," or "Macroprosopus") in the Upper Sphere of the Ten Sefirot (Zohar, in Idra Zutta, pp. 267-279). See SEFIROT.

The union therefore of the bride or matron ("matronita") with her celestial spouse, that is to lift the created world into the sphere of the supremeness of glory (the pleroma of Paul in Eph. iii. 19), by doing works of goodness and holiness, is the object of life, according to the cabalists—a truly spiritual view in itself, yet one which led the erring to all sorts of abuse, exactly as the ancient Gnostic mystery of SIMON MAGUS and many Christian heretics had done in the second and third centuries. Shabbethai Zebi and his followers in the seventeenth century were entangled in sensualism of the worst character. Compare SABBATH. See also BETROTHAL.

K.

**BRIDEGROOM AND BRIDEGROOM'S FRIENDS.** See BETROTHAL; MARRIAGE.

**BRIDEGROOM OF GENESIS** (Ḥatan Bereshit). See BRIDEGROOM OF THE LAW.

**BRIDEGROOM OF THE LAW** (Ḥatan Torah): The somewhat poetic designation of Bridegrooms of the Law and of Genesis are given to the persons called up in the synagogue to the reading of the chapters ending and beginning the Pentateuch respectively (Deut. xxxiii. 27-xxxiv. 12; Gen. i. 1-ii. 3). This takes place on Simḥat Torah, or the Rejoicing of the Law festival, which is the second day of the Shemini 'Azeret, or Eighth Day of Solemn Assembly, in those communities in which the second-day festival is observed. It is considered a privilege to be the one to whom the concluding or the opening portion of the Law is read; and those persons upon whom the choice of the congregation falls are esteemed as specially honored. The honor of the bridegroom of the Law is greater than that of the bridegroom

of Genesis. Other privileges are conferred upon the recipients of these dignities in order to increase the distinction of their station. They are not called to the Law by the ordinary formula, "Ya'amod" (Let N. N. arise)—which is otherwise used—but by a special, poetic invocation, beginning (in the Ashkenazic ritual) with the words *מְרִישׁוֹת הָאֵל הַגְּדוֹל הַגְּבוֹר* ("by permission of the great, almighty, and tremendous God") for the Ḥatan Torah; and *מְרִישׁוֹת הַיְיָ* ("by permission of Him who is exalted above all blessing and song") for the Ḥatan Bereshit. The bridegrooms of the Law and of Genesis usually make large money offerings to the synagogue, in recognition of the honor conferred upon them, and entertain the congregation at a more or less elaborate banquet, either in the meeting-room or the basement of the synagogue or at their private residences. See TABERNACLES, and SIMḤAT TORAH. For the origin of the name and the custom see CROWN OF THE LAW.

A.

B. D.

**BRIDEGROOM OF THE TORAH.** See BRIDEGROOM OF THE LAW.

**BRIDLE:** A term used in the English versions of the Bible interchangeably with bit to represent the three Hebrew words *מָתְנֵי*, *רֶסֶן*, and *מַחְסוֹם*, which, however, do not as a rule denote the usual head-gear of a horse or other beast of burden, consisting of a head-stall, a bit, and reins. In many passages "halter"—i. e., a simple rope or leather strap wherewith to hold the animal in check—would seem to be the more appropriate rendering.

No description of the head-harness is found in the Hebrew Bible. As horses came into use only at a late period, and then more for purposes of luxury than utility, the pictures of steeds with elaborate head-gear found on the Assyrian monuments (see Layard, "Nineveh") can not be held to throw any light on the contrivances employed by the Hebrews, though the arrangement with bells mentioned in Zech. xiv. 20 was in all probability adopted in imitation of Assyrian fashion. The ox, the ass, as well as the mule, and to a less extent the camel, took the place of the horse. To guide and control the first-mentioned animal the goad sufficed; and, if Arabic custom may be supposed to retain the primitive habits of the ancient Hebrews, the camel was led by a rope attached to a ring of either copper ("burrah"), or hair ("hizamah"), which was passed through one of the nostrils.

Still, bridles were not altogether unknown, as distinct names for them were employed according as they were used for the horse or the camel. These bridles were very simple affairs, often made of mere twine; while the bits were, at least in pre-Mohammedan days, of wood ("sajarah"). Even among the modern Arabs the iron bit passes underneath the chin (jaws) of the horse, or is in front of the mouth (see Socin, "Diwan aus Central-Arabien," i. 288). This arrangement explains some passages in which the usual translation by "bridle" has produced

PROCESSION OF BRIDEGROOM OF THE LAW ON THE EVE OF THE REJOICING OF THE LAW.  
(From Picart, 1733)

confusion. Job xxx. 11, R. V., "they have cast off the bridle," refers to the slipping of the halter. Isa. xxx. 28, "bridle in the jaws" should be rendered "halter (or bridle with iron) on the jaws." A bridle with a ring arrangement through the nose is meant in II Kings xix. 28 by the Hebrew word הָרִי ("in thy nose"), to which כֹּתְנֵי ("over thy lips") is a parallel. See also Prov. xxvi. 3; Isa. xxxvii. 29, A. V.; Ps. xxxii. 9, R. V., "bit and bridle"; more accurately, "bridle and halter."

In Ps. xxxix. 2 (A. V., 1) מַחְסוּם is properly translated in the Revised Version by "muzzle." The allusion there is to the use of a basket-like network which was passed over the head of the animal and fastened behind the ears and around the neck; enveloping the mouth as with a bag, to prevent the bearer biting the yoke-mate or other animals in the caravan. In the psalm it is the tongue which thereby is hindered from "biting." As this "muzzle" also interfered with the taking of food, the humane law of Dent. xxv. 4 forbade its being put over the mouth of the ox while on the threshing-floor.

E. G. H.

**BRIEG**: Town in Silesia; formerly the capital of the duchy of the same name. Jews settled there about 1324, chiefly because it was situated on the commercial route to Breslau, in which place a colony of Jews had long resided. The Jewish community of Brieg had its separate place of worship from early times. In the fourteenth century the Jews of Brieg were persecuted on account of their usurious practices; and in 1392 it was claimed that all debts of the duke had been discharged by the payments to Jacob, the son of Moses, a Jew of Brieg, of a certificate of indebtedness. In 1398 the Brieg Jews bought a letter of protection from the duke, whereby they were guaranteed the peaceful possession of their privileges. But in 1401 they were driven from the city, except Jacob and Seman von Reichenbach, who had received a patent of protection from the duke's council for six years from May 1, 1399. Solomon, a capitalist, lent large sums of money to royal houses in the fifteenth century.

With the decline of Breslau as a trade center, the Jews of Brieg became little more than an isolated community; and in modern times they shared the lot of the other Silesian Jews. They carried on insignificant trade operations as a rule. The conquest of Silesia by Frederick the Great wrought but slight change in their condition.

At the present time (1902) Brieg has a Jewish community of 310 souls, of whom 55 are house-owners. Three charitable societies exist, for the care of the poor, for burying paupers, and a woman's league. Brieg is included in the union of congregations of the districts of Breslau and Liegnitz.

A. M. F.

**BRIEGER, LUDWIG**: German physician and medical writer; born at Glatz, in Prussian Silesia, July 26, 1849. He received his education at the gymnasium of his native town and at the universities of Breslau and Strasburg. From the latter he was graduated as M.D. in 1875. After a post-

graduate course at Vienna and Berlin, he became assistant at the private ophthalmic hospital of Cohn at Breslau, at the same time studying under Cohnheim at the pathological institute of the university. Leaving Breslau in 1876, he went to Bern as assistant to Quincke at the medical hospital of the university.

From Bern, Brieger removed in 1878 to Berlin, attending the physiological laboratory. In 1879 he became assistant to Frerichs, and later to Leyden at the First Medical Hospital, Berlin. From 1881 he was privat-docent, and from 1887 titular professor in the University of Berlin. In 1890 he opened a private dispensary and hospital. The same year he was elected assistant professor, and in 1891 was appointed chief physician of the university hospital and dispensary for contagious diseases. In 1897 he occupied the chair of pathology and therapeutics as substitute for Professor Ehrlich. Since 1899 he has occupied the chair of general therapeutics. The following year he received the title of "Geheimer Medizinalrath."

Brieger is a contributor to numerous medical journals, and has written many essays and books dealing with pharmacology, pharmaceutical chemistry, bacteriology, pathology, and therapeutics, and is considered an authority on each of these subjects.

Of his many essays and books the following may be mentioned: (1) "Zur Physiologischen Wirkung der Abführmittel," in "Archiv für Experimentale Pathologie und Therapie," 1877; (2) "Ueber die Aromatischen Producte der Fäulniß im Eiweiss," in "Zeitschrift für Physikalische Chemie," 1879; (3) "Zur Kenntnissnahme des Physiologischen Verhältnisses des Brenzcatechin, Hydrochinon, und Resorcin" in Du Bois-Reymond's "Archiv für Physiologie," 1879; (4) "Beiträge zur Lehre von der Fibrösen Hepatitis," in Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin," 1879; (5) "Ueber Einige Bestandtheile des Jauchigen Eiters des Menschen," in "Zeitschrift für Physikalische Chemie," 1881; (6) "Beitrag zur Schrecklähmung," in "Zeitschrift für Klinische Medizin," 1881, pp. 121 *et seq.*; (7) "Ueber Febris Recurrens," in the "Charité Annalen," 1881, pp. 136-150; (8) "Ueber Spaltungs-Producte der Bacterien," in "Zeitschrift für Physikalische Chemie," 1884; (9) "Ueber Pto-maine," Berlin, 1885-86 (in this work, consisting of three volumes, the author proves that the bacteria develop their injurious qualities through a specific poisonous product of the toxins and toxalbumins); (10) "Ueber das Vorkommen von Tetanie bei einem Wundstarrkrampf Erkrankten Individuum," in "Berliner Klinische Wochenschrift," 1888, pp. 329 *et seq.*; (11) with Stadthagen, "Ueber Cystinurie, Nebst Bemerkungen über einen Fall von Morbus Maculosus Werlhofii," *ib.* 1889, pp. 344 *et seq.*, 455 *et seq.*; (12) with C. Fränkel, "Untersuchungen über Bakteriengifte," *ib.* 1890, pp. 241 *et seq.*, 268 *et seq.*; (13) with Ehrlich, "Ueber die Uebertragung der Immunität Durch Milch," in "Deutsche Medizinische Wochenschrift," 1892, pp. 393 *et seq.*; (14) "Ueber die Klinische Bedeutung des Elsnerischen Typhus-Nachweises," *ib.* 1895, No. 50; (15) "Klinische Beobachtungen an Zwei Leprösen," in "Berliner Klinische Wochenschrift," 1896, pp. 1105 *et seq.*; and (16)

"Ueber Versuche der Uebertragung der Syphilis auf Thiere und über Serumtherapie bei Syphilis," in "Klinisches Jahrbuch," 1899.

**BRIELI** or **BRIEL** (בריאלי), **JUDAH LEON BEN ELIEZER** (also known in rabbinical literature under the contraction **MaHaRIL**): Rabbi in Mantua; born about 1643; died in 1722.

Brieli, besides being a high Talmudical authority, as is shown in the responsa of his contemporaries Ishmael Coen, Mordugo, and others who asked his opinion on halakic questions, was well versed in the secular sciences, which he zealously cultivated. Being highly esteemed by the Sephardic community of Amsterdam on account of his learning, his character, and his great age, he was asked by Zebi Ashkenazi (Hakam Zebi) and his followers for his support in their campaign against HAYYUN and his cabalistic vagaries. Brieli, who was opposed to the Cabala in general, could have but little sympathy with Hayyun. He accordingly addressed two letters to Hakam Zebi (the first was published in "Mishnamot Adonai"), three to Ayllon, two to the board of the Amsterdam community, and one to Benjamin Finzi, in all of which he condemned Hayyun and approved the suppression of his book. Hayyun in his pamphlet against Hakam Zebi, entitled "Ha-Zad Zebi," says that Brieli is a Latinist and philosopher, but knows nothing about the Cabala; that he (Brieli) denies to Simeon ben Yoḥai the authorship of the Zohar; that he (Brieli), contrary to the Jewish law, has never married, and wears no beard.

Brieli was the author of the following works: (1) "Shefer Kelale ba-Dikduk" (The Beauty of the Grammatical Rules), a Hebrew grammar; (2) "Hassagot 'al Sifre ha-Sheleḥim" (Criticisms on the Books of the Apostles); (3) "La Sinagoga Disingannata dagli Inganni del Padre Pinamonti"; (4) "Esame delle Riflessioni Teologiche," on the miracles. Of these only the first-named was published (Mantua, 1724); the others are still extant in manuscript (Dei Rossi, Nos. 22, 23; Neubauer, "Cat. Bodl. Hebr. MSS." s.v.). Brieli also translated into Hebrew the letters of Seneca ("Kerem Homel," ii. 119).

An elegy on Brieli was published by his pupil Cohen Modon, under the title "Zir ha-Zirim," in which Brieli's knowledge of mathematics, logic, and natural history is highly praised.

**BRIER.** See BRAMBLE.

**BRIGHT, JOHN:** English statesman and orator; born at Greenbank, Nov. 16, 1811; died in Rochdale March 27, 1889. It has been stated that his mother, Martha Jacobs, was a Jewess; but this statement is erroneous, such Biblical names being not uncommon among the English peasantry. During his long public career he more than once distinguished himself as an unflinching advocate of the political emancipation of the Jews of England, on

the ground of what he designated "justice to the Jewish population of the country." On May 14, 1849, on the introduction of the Parliamentary Oaths' Bill—which dealt with the question of the right of Jews to sit in Parliament—Bright delivered a powerful speech in the House of Commons, fervently advocating the claims of the Jewish race and declaring that he "should vote for the bill, as far as it goes, because it admitted Jews into Parliament." On many other occasions he took the same position, as, for instance, in 1851, when the question of Jewish disabilities was raised in Parliament by the action of Alderman Salomons. But in his speech delivered in the House of Commons on April 15, 1853, during the debate on the **JEWISH DISABILITIES BILL**, Bright gave the most vigorous expression to his principles of religious equality as applied to the Jews. His attitude toward the Jews was independent of any personal feeling, and was a direct outcome of his religious and political principles.

**BRILL, AZRIEL:** Hungarian rabbi and author; lived in the first half of the nineteenth century; assistant rabbi (dayyan) at Pest, Hungary. He wrote: "Hadrat Kodesh" (Beauty of Holiness), containing the Mishnah treatises, Rosh ha-Shanah, and Yoma, with a commentary and German translation; a collection of the prescriptions and prayers for the ten penitential days; also an essay on the Temple ritual for the Day of Atonement, and a Jewish calendar up to 6000 (Ofen, 1827).

I. BER.

**BRILL, JEHIEL:** Russian journalist. According to Zeitlin he was born in 1836 in Tultschin, Russian Poland; but Fuenn, who knew him well, states that he was born in British India. He died in London Nov. 12, 1886. Taken to Constantinople when quite young, and later brought to Jerusalem, he grew up in the latter city and there received a Talmudical education and the strictly Orthodox training common to natives of Russia living in Palestine. In 1863, with the assistance of his father-in-law, the traveler Jacob Safir, he established the Hebrew monthly "Ha-Lebanon," which, after the appearance of the twelfth number, was suppressed by the Turkish government. After many tribulations Brill went to Paris, where he again commenced to publish the "Lebanon," first as a semi-monthly (1865-68), and later as a weekly (1868-70). The Franco-Prussian war and the siege of Paris, by cutting off communication with his readers—practically all of whom were outside of France—forced him to suspend the publication of his journal for the second time. He went to Mayence, where he established a Hebrew printing-office and renewed the publication of the weekly "Lebanon," this time as a Hebrew edition of the "Mainzer Israelite," edited by M. Lehmann, who occupied in German Jewry a position corresponding to the one occupied by Brill among the Jews of eastern Europe.

In Mayence the publication of the "Lebanon" was continued from 1872 to 1881. This journal became the acknowledged organ of ultra-conservative Jews; and many pious rabbis contributed to and took an interest in its Talmudical literary department, the "Yarkete Lebanon." During part of this time Brill also edited and published a Yiddish or Judæo-German weekly entitled "Ha-Yisrael," which, like his Hebrew publication, circulated mainly in Russia. The Orthodox class, however, never evinced sufficient interest in journalism in general to make its organ a financial success; and the "Lebanon" had for the third time to be discontinued.

When the movement to establish colonies in Palestine or its vicinity was inaugurated, after the outbreak of persecutions in Russia, Brill, who was well acquainted with the Holy Land and with the languages spoken there, was, through the recommendation of Rabbi Samuel Mohilever, chosen by the Alliance Israélite Universelle and by Baron Edmond de Rothschild to conduct from Russia to Palestine a small group of experienced farmers, who were to be established in or near the Alliance colony, Miłwech Israel. He started from Rosinói, Russian Poland, with eleven men—ten farmers and a "mekumed" (teacher)—Nov. 21, 1882, and arrived at Palestine the following month. The story of his journey and of its results is given in detail in his work, "Yesod ha-Ma'aleh" (The Base of the Slope), which Brill published in 1883 in Mayence, whither he had returned a sadly disappointed man. In 1884 Brill settled in London, and there established a new Yiddish weekly newspaper, the "Sulamith." In 1886 he started, for the fourth time, to publish the "Lebanon," but was forced to announce its suspension after the publication of a few numbers. He died suddenly in London the same year.

"Yesod ha-Ma'alah" is the only book written by Brill. He published, while in Paris, three works containing inedited manuscripts from the library of Baron Günzburg, which are described in Zeitlin, "Bibliotheca Hebraica Post-Mendelssohniana," p. 42. He also published, with an introduction, an old anonymous manuscript, "Be'er ha-Golah," on Jewish archeology (Mayence, 1877), with notes by Jacob Tarpower and Reuben Rapoport.

**BRILL, JOEL.** See LOEWE, JOEL.

**BRILL, JOSEPH** (also known under the pseudonym of "Ayob" [איוב contracted from Ani Joseph Brill]): Russian teacher and Hebrew writer; born at Gorki, near Mohilev, on the Dnieper, 1839. He studied Talmud at the yeshibot of Shklov and Vitebsk, and later settled in Minsk, where he opened a school for Jewish boys, and in which town he is still active as teacher and writer.

Brill's first articles appeared in the early sixties in the Hebrew periodicals "Ha-Maggid," "Ha-Meliz," and "Ha Karmel." An excellent Hebrew style and a fine humor are the chief characteristics of his writings. Besides numerous articles in Hebrew year-books and periodicals, he has published: "Ish Jehudi" (The Jew), a translation from the English

of the five-act drama by Richard Cumberland, Wilna, 1884; "Kizzur Shulhan 'Aruk" (Satirical Instructions for Teachers and Pedagogues), in the collection "Ozar ha-Sifrut," Cracow, 1890; "Midrash Soferim," satirical characteristics of contemporary Hebrew writers, in "Ha-Shaḥar," Vienna, 1879; "Lefanim" (In Times of Old), a sketch in "Ozar ha-Sifrut," 1892, iv. He has prepared for publication a volume of poems, a volume of aphorisms, proverbs, and a volume of stories. Some of his correspondence with Hebrew writers is published in H. Rosenberg's "Ozar Miktabim we-Sippurim," St. Petersburg, 1882.

BIBLIOGRAPHY: *Ozar ha-Sifrut*, iv. 643-650, Cracow, 1892.

H. R.

**BRILL, SAMUEL LÖW:** Hungarian rabbi and Talmudical scholar; born Sept. 14, 1814, in Budapest; died April 8, 1897. He was carefully educated by his father, Azriel Brill (1778-1853), who was teacher and associate rabbi at Pest, and the author of several works in the Hebrew language. After having been carefully grounded at home in Hebrew studies, and graduating with honors from the Protestant Lyceum of his native city, he attended the Talmud schools at Eisenstadt (1832) [under M. J. Perls], Presburg (1834-35) [under Moses Sofer], and Prague (1836), where he obtained, at the age of twenty-two, his rabbinical degree. In 1842-43 he was registered in the University of Berlin, where he attended the courses of famous teachers, such as Boeckh, the classical philologist; Ritter, the geographer; Leopold Ranke, the historian; Schelling, and others, and associated with Leopold Zunz and Michael Sachs.

Returning to his native city, he was appointed assistant rabbi in 1843, and associate rabbi in 1850. Although he did not come before the public at large either in print (his only publication was an anonymous necrology of his teacher Moses Sofer, in the "Allg. Zeit. des Judenthums," 1838) or on the platform, he soon became widely known by his Talmudic lectures, which he enlivened with material drawn from Hebrew and general literature. Among his earliest pupils were W. Bacher and I. Goldziher.

Brill was highly esteemed not only by his coreligionists, but also by the Hungarian government, and was its first counselor when it was preparing to institute a rabbinical seminary (see Moritz Bloch [BALLAGI]). He was also one of the founders of the Jewish Theological Seminary ("Landesrabbinerschule"), inaugurated in 1877, in which institution he held the position of teacher of Talmud from 1877 till 1887, having previously (since 1872) been president of the rabbinical college of Budapest. He also took part in the Israelitic county-congress of 1868-69. During Brill's lifetime a number of subtle extracts from his Talmudic glosses were published in the "Monatsschrift," 1896-97, and the "Magyar Zsidó Szemle," of the same years, by Ludwig Blau. A few sermons have also been printed in the last-named periodical.

Brill's valuable Hebrew library became the property of the seminary at Budapest.

**BRIMSTONE:** Sulfur in a solid state. It is found in Palestine, in the region along the banks of the Jordan and around the Dead Sea, both in combination with other elements and in its pure state. In the latter condition it is still employed medicinally for skin-diseases by the wandering Arab tribes, who make further use of it in the preparation of gunpowder. Brimstone is also found in the hot springs that line both shores of the Dead Sea. In one of these springs (at Callirrhoe), Herod took baths in the hope of finding a cure for his ailment (Josephus, "Ant." xvii. 6). Besides these two sources there was still a third which was known in Bible times. The two passages in Isaiah (xxx. 33, xxxiv. 9) point clearly to sulfur produced by volcanic eruptions. Sulfur is very inflammable; and this accounts for the fact that it is nearly always mentioned in connection with fire (Gen. xix. 24; Deut. xxix. 23; Ps. xi. 6; Ez. xxxviii. 22).

Biblical writers do not refer to the useful qualities of brimstone; whenever it is mentioned it is always as an instrument of God in exacting the penalty from the wicked (besides the above passages see Job xviii. 15); and this idea is continued in the New Testament (Rev. xiv. 10, xix. 20, xx. 10). This may be due in a measure to the recollection of the traditions of the destruction of Sodom and Gomorrah; the large quantities of brimstone found in the region suggesting it as the agent of destruction.

G. B. L.

**BRINDISI** (Hebrew, פּרְנִדִּים): Seaport on the coast of Calabria, Italy, whence the ancient Romans embarked for the East. Jews undoubtedly settled there at a very early period. In the Talmud (Er. iv. 1) it is recounted that four illustrious Mishnaic doctors (tannaim), among whom was R. Gamaliel, returned from this city to their home. Benjamin of Tudela says that at his time ten Jewish families were living there, all engaged in the art of dyeing.

**BRISK.** See BREST-LITOVSK.

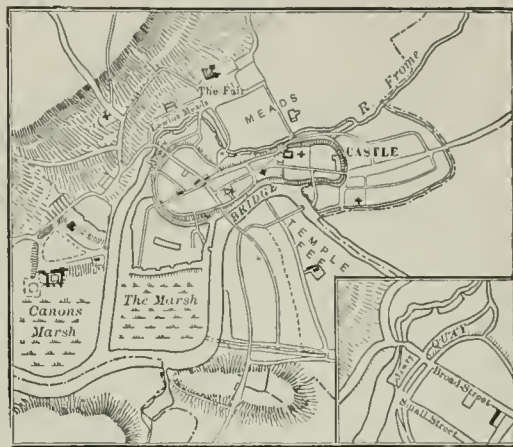

**BRISKER, AARON B. MEÏR.** See AARON B. MEÏR OF BREST.

**BRISTOL:** Commercial seaport city in the counties of Gloucester and Somerset, England. Jews settled very early at Bristol, which was the center of the slave-trade between England and Ireland, until its discontinuance, under the influence of St. Wimibald, (?) in 1172, after the conquest of Ireland by Henry II. The names are known of no fewer than eighteen Jews of the twelfth century who lived in Bristol. Of these the most important was Moses of

Bristol, father of Yom-Tob, the author of "Sefer ha-Tannaim," and grandson of Rabbi Simon of Trier (Treves), a martyr of the Second Crusade. In Richard of Devizes' account of English cities, as given by a French Jew, Bristol is described as a city of soap-boilers (Jacobs, "Jews of Angevin England," p. 149). After the decline of the slave-trade in Bristol, many Jews left the town; Moses going

to Oxford, others to Nottingham and London. When, however, John imprisoned and fined all the Jews of England in 1210, it was from a Jew of Bristol, Abraham, that he extorted no less than 10,000 marks by extracting the victim's teeth successively till he consented to give up his wealth (Matthew Paris, "Chronica Majora," ed. Luard, ii. 528).

The Jewry was situated on the quay between Broad street and Small street, outside the inner but within the outer wall of the city. The synagogue

Plan of City of Bristol, Showing Position of Jewry, About 1250 C.E. (After William Hunt, "Bristol.")

was in Small street, under the building which was afterward St. Giles's Church. As far as can be ascertained, no Jews were in Bristol at the time of the Expulsion, no houses of Jews falling into the king's power at that time. On the other hand, Jews resided there during a considerable portion of the thirteenth century, as an ARCHA was retained there to hold their deeds.

**BIBLIOGRAPHY:** Jacobs, *Jews of Angevin England*, p. 374; Hunt, *Bristol*, pp. 27-30; Seyer, *Bristol*, i. 527-529; Pryce, *Bristol*, pp. 72-73.

J.

There is no record of congregational life earlier than about the middle of the eighteenth century. At that time the congregation, which included not a few families which since then have become most eminent in the English Jewry—that of Jessel, for instance—was able to build a syna-

**Since the** gogue which was regarded as one of **Eighteenth** the ornaments of the old town. It **Century.**

was situated in the very center of the present city, in the main thoroughfare, Temple street. A local topographical description, dated 1794, states that "the Jews' synagogue is very well fitted up, painted, and furnished with altar-piece, branches, candlesticks, etc., in such a style that though it is not one of the largest, it is one of the handsomest places of worship in Bristol." The present synagogue is situated in Park row, and is a commodious and well-fitted building. It was opened in 1870.

In the middle of the nineteenth century Bristol was one of the foremost provincial congregations in the British Isles, and it has been served by a succession of able ministers, many of whom have since

achieved distinction in larger spheres of work. The earliest known of these were the Rev. David M.

**Rabbis.** Isaacs (afterward minister and professor at Liverpool and Manchester) and the Rev. Abraham Barnett (afterward of the New Synagogue, London).

The Rev. Aaron Levy Green, afterward eminent as minister of the Central Synagogue, London, was stationed at Bristol from 1838 to 1851, taking locally a share in the emancipation struggle which attracted the notice of Sir Moses Montefiore, and preaching occasional English sermons, at that time a very rare feature of Anglo-Jewish devotions. Among other Jewish divines attached to the congregation may be mentioned the Rev. Isaac Samuel (now minister of the Bayswater Synagogue, London); the Rev. Meyer Mendelssohn (afterward minister at Kimberley, Cape Colony); the Rev. Burman Berliner (afterward minister of the St. John's Wood Synagogue, London); the Rev. Joseph Leonard Levy, B.A. (late attached to Congregation Keneseth Israel, Philadelphia, and now rabbi of Congregation Rodeph Shalom, Pittsburg); the Rev. Moses Hyamson, B.A., LL.B. (afterward minister of the Dalston Synagogue, and now dayan of the United Synagogue, London); the Rev. Lewis Mendelssohn, B.A. (afterward of Dublin); and the Rev. Joseph Abelson, B.A., the present minister.

Of recent years, and concurrently with the revival of the West-Indian trade and the enterprising enlargement of the port, an increase of the Jewish population has become evident, and much activity is again being brought to bear on communal work. In addition to the Ladies' Benevolent Society, dating from about 1860, there exist a board of guardians (founded 1894); a Hebrew school (founded 1890), the classes of which are attended by seventy children; a literary and social society (founded 1894), with fifty-one members; and a Zionist association (1899). Jewish organization is not confined to the residents in the city itself. At the great public school, Clifton College, situated in the suburbs, there has been for some years a Jewish house—that is, one of the residences forming part of the collegiate buildings—the domestic life of which is carried out in accordance with Jewish custom. The master presiding over this house is the Rev. Joseph Polack, B.A., previously minister of the Liverpool (Old) congregation. It has existed long enough to form a tradition in the college; and its first generation of students has already taken a leading position in Anglo-Jewish communal life.

F. L. C.

**BRITISH MUSEUM, London:** Chief library and museum of the United Kingdom. It contains many books and objects of Jewish interest.

**The Hebrew MSS.:** The Hebrew manuscripts in the British Museum already fully catalogued or briefly described number about 1,200. This total includes fifty recently assigned to fragments belonging to the collection brought from Cairo. Between eighty and a hundred additional ones are likely to be obtained from the remainder of the same interest-

ing collection. There are also thirty Hebrew characters (business deeds of the Anglo-Norman period) in the Museum; and if the seventy-one Samaritan manuscripts and the very ancient Aramaic papyrus (marked evi.\*, 2d century B.C.) be treated as part of the Hebrew collection, the entire library may be estimated to contain close upon 1,400 numbers.

Of these over 1,050 are briefly described in the "Descriptive List of Hebrew and Samaritan MSS. in the British Museum," which appeared in 1893. A rough classification into subjects shows that in the total just mentioned Biblical texts are represented by 165 numbers; Biblical commentaries by 175; Midrashim and Midrashic discourses by 45; Talmud and Halakah by 190; liturgies by 115; cabalistic manuscripts by 130; ethics, philosophy, and poetry by an aggregate of 84; philology, mathematics, and astronomy by 75; medicine by 20; miscellaneous manuscripts by 73; characters by 30; and Samaritan literature by 64. The later acquisitions may be assumed to show a similar proportion of subjects, with the very notable additions, however, of a large number of letters and other historical documents forming part of the collection brought from the Cairo GENIZAH.

The distribution of Hebrew manuscripts among the earlier Museum collections is as follows: The Sloane and Harley collections, which formed the nucleus of the British Museum at its opening in 1753, respectively contained twelve and ninety-five Hebrew manuscript volumes. The Old Royal Library, presented to the Museum by King George II. in 1757, included seven Hebrew numbers. A like contingent was contributed by the great library collected by Thomas Howard, earl of Arundel, Surrey, and Norfolk. Three Hebrew manuscripts were presented (together with a much larger number of printed books; see below) by

**Sources of the Collection.** Solomon da Costa in 1759, and two other numbers of the collection have been filled up with his own catalogue of the printed books and manuscripts thus presented. The Lansdowne collection (purchased in 1807) and the library formed by King George III. (presented to the nation by King George IV. in 1823) contained one Hebrew volume each; and the Egerton collection (bequeathed in 1829) included three Hebrew numbers.

Of the 520 Hebrew volumes embodied in what is known as the Additional Series of manuscripts, no less than 323 came from the famous collection of Joseph Almanzi; and the few Hebrew manuscripts which form part of the Rich collection (acquired in 1829) are also included in the total of 520 just mentioned. The series which followed the Additional, and into which fresh acquisitions are now constantly being incorporated, is the Oriental. The latter now contains about 550 Hebrew numbers. A large proportion of these (not less than 260 volumes) was purchased from M. W. SHAPIRA between the years 1877 and 1883. The rest came to the Museum in smaller consignments through the agency of the late Fischel Hirsch and other booksellers.

The sources from which the Museum collection became from time to time enriched also include man-

uscripts purchased at the duke of Sussex's sale in 1844; the collection of ten important Biblical manuscripts which were in the possession of the families of Schultens, John van der Hagen, and Dr. Adam Clarke successively; four Megillah scrolls once the property of Sir Moses Montefiore; and several numbers formerly owned by Dr. Adolf Neubauer, Dr. C. D. Ginsburg, F. D. Mocatta, and S. J. A. Churchill (British consul at Teheran).

It will now be useful to note some of the more important features of the collection, and in doing so the classified order adopted in the "Descriptive List" published in 1893 will be followed.

**I. Biblical Texts.**—(a) *Scrolls*: None of these is, unfortunately, of any great antiquity, the oldest (MS. Harley, 7619) probably belonging to the fourteenth century. Mention should, however, be made of a number of Yemenite Pentateuch rolls exhibiting what are technically called "dry points," employed to mark pauses, and to distinguish some words of equal spelling but dissimilar pronunciation. As the writing of synagogue scrolls is strictly limited to the consonantal text, this device of impressing a small inkless circle was adopted (with the permission of the Yemenite rabbis?) as a help to the reader. One roll of the collection (Add. 19,250) was written (probably in the eighteenth century) for the use of the Jews at Kai-Fung-Fu in China.

(b) *Biblical Texts in Book Form*: Special mention may be made of MS. Or. 4445, which was brought from Teheran, and probably belongs to the ninth century. It is at any rate not later than the famous codex of the Prophets preserved at St. Petersburg, which is dated 916 C.E. This Museum manuscript contains, however, only the Pentateuch. The oldest dated copy of the entire Bible in the Museum (Or. 2201) belongs to A.M. 5006 (1246 C.E.), and was written at Toledo. A very fine specimen of Spanish calligraphy and marginal illumination is the Bible in three volumes, numbered Or. 2626-28. It was written in 1483. Of very considerable interest and importance are a number of codices (mostly Yemenite) exhibiting what is known as the super-linear, or Babylonian, punctuation. The collection generally contains excellent specimens of almost all styles of writing and all Masoretic schools (Spanish, Italian, German, North African, etc.). One codex of the Pentateuch (Or. 2451) was written at Kum in Persia A. ER. 1794 (1483 C.E.). Of the Karaite codices special attention should be directed to Or. 2540, belonging to the tenth century. The Hebrew text is there written in an archaic form of the Arabic character, the Hebrew vowel-points and accents being added in colored ink. This manuscript is also provided with ancient Oriental ornamentations.

**II. Biblical Commentaries**: In this section a great wealth of material for the study of early Karaite literature will be found. Special mention may be made of commentaries on the Pentateuch and other Biblical books by Abu Yusuf Ya'akub al-Kirkisani, Salmon b. Jeroham, David b. Boaz, and Abu al-Faraj Furkan ibn Asad. Japheth is most amply represented. Noteworthy is the fact that a copy of his commentaries on Ruth and the Song of Songs (Or. 2554) is dated Ramlah, A.H. 395 (1004-5 C.E.), and that the reference to Japheth in the colophon shows

clearly that the manuscript was written in the author's lifetime.

The collection of Rabbinite commentaries is also a very good one. The principal unique texts are: (1) the commentary on the Second Book of Samuel by Isaac b. Samuel ha-Sefardi (eleventh to twelfth century); (2) a commentary on the Pentateuch by Rabbi Meyuhas b. Elijah (probably a Greek writer of the twelfth century); and (3) fragments of a Persian commentary (Hebrew character) on a portion of the Prophets.

**III. Midrashim and Midrashic Discourses**: These include copies of the three important Yemenite Midrashic compilations known as the "Midrash ha-Gadol," "Midrash ha-Ifez," and "Nur al-Zulum." Unique are the texts contained in Add. 27,292, and probably also Harley 5704 (containing a Midrash on the Minor Prophets in the style of the Yalkut ha-Makiri). One may notice, besides, Midrashic discourses by David b. Abraham Maimuni and Sa'id ibn Da'ud al-'Adani.

**IV. Talmud and Halakah**: In the older British Museum collections only one volume of Talmudic texts of the twelfth and another of the fourteenth century are contained; but by the latest acquisitions from the Cairo Genizah three other important fragmentary numbers have been added to the library. Of the Jerusalem Talmud the Museum possesses three volumes of the sixteenth century, with the commentary of Joseph Syrillo. Noteworthy for its antiquity is a volume containing Rashi's commentary on Baba Mezi'a, dated 1190 C.E.

The Halakah portion of this section is very rich in interesting and valuable codices, including five copies of the *Yad ha-Hazakah* of Maimonides, important copies of the *Shulhan Arukh*, Alfasi, and various responsa. As unique may be noted the additions of Samuel b. Meir (RaSHBaM) to Alfasi, contained in Add. 17,049-50 (mistaken by Leopold Dukes for notes by Samuel Schletstatt). A fine specimen of richly illuminated title-pages and headings is presented by Harley 5698-99 (Maimonides, "Mishneh Torah").

Karaite Halakah is also represented; e.g., by Yusuf al-Bagri's "Questions and Answers," Kirkisani's "Book of Commandments," and Samuel al-Maghrebi's "Al-Murshid," not to mention several other works which still await a thorough investigation.

**V. Liturgy**: This section is also a very rich and important one. It includes very fine specimens of almost all important rites. Margoliouth's study of a number of these manuscripts has revealed many features that were unknown to the great liturgiologist Leopold Zunz. Very many hymns will have to be added to the known list when these manuscripts are fully catalogued. Special mention may here be made of several fine copies of the illustrated *Haggadah*, belonging to the Spanish school of the fourteenth century. It may also be noted that a fine copy of the North African Liturgy (Or. 5600) was recently acquired by the trustees at the sale held at Amsterdam of the late D. H. de Castro's library. The Karaite ritual is also fairly well represented.

**VI. Cabala**: It has already been stated that this section contains no less than 130 numbers. It in-

cludes Abraham Abulafia's commentary on the "Moreh Nebukim" (perhaps unique), and works by Joseph Gikatilla, Moses b. Shem-Tob of Leon, Moses Cordovero, and Moses Hayyim Luzzatto (Add. 27,110 being his autograph). Some interesting additions to the section are supplied by the Cairo Genizah.

**VII.-IX. Ethics, Philosophy, and Poetry:** These sections are small; but specialists will no doubt find in them a number of interesting codices for collation. The most noteworthy manuscripts are: in ethics, the unique "Ge' Hizayon" of Abraham b. Jacob, and two copies of a Persian version in Hebrew characters of Abraham b. Hasdai, "Ben ha-Melek we-ha-Nazir" (Balaam and Josphat); in philosophy, four manuscripts of early Karaite speculations, besides some important codices of well-known Rabbinite works; in poetry, a copy of Al-Harizi's "Taḥkemoni," dated 1282 C.E., a unique volume of poems by Joseph b. Tanhum Yerushalmi, and Bible stories in Persian verse (Hebrew characters) by Mollah Shahin.

**X. Philology:** This section contains fifty-three numbers. Noteworthy are a fine early copy of Abu al-Walid's "Kitab al-Uṣul" (which came from Yemen), several good though fragmentary copies of Nathan b. Jehiel's "Sefer ha-'Aruḳ," two early copies of the "Maḥberet" of Menahem b. Saruḳ (1091 and 1189 C.E.), and the "Mushtamil" of the early Karaite grammarian Abu al-Faraj Harun.

**XI.-XIII. Mathematics, Astronomy, and Medicine:** These sections can, of course, be properly appreciated by specialists only. On account of the language in which it was written, Add. 7701 may be noted here, containing works on astronomy and the calendar in Persian (Hebrew characters).

**XIV. Miscellaneous MSS.:** This section is full of interesting matter of various kinds. Special mention should, perhaps, be made of the controversial works (Jews and Christians, Rabbinites and Karaites). But the gem of the section is no doubt Add. 11,639, containing a great variety of works written partly in the body of the page and partly on the margin. It is accompanied by fine pictorial illuminations of the French school of the thirteenth century (latter half).

Of the charters it need only be said that they nearly all belong to the thirteenth century (some few being earlier), and that besides throwing some light on the circumstances of the time immediately preceding the expulsion of the Jews from England in 1290, they give a good idea of Anglo-Hebrew caligraphy of the time.

The latest noteworthy addition to the interesting and important Samaritan collection is a fine copy of the Samaritan liturgy, dated 1258 C.E.

**The Printed Books:** The collection of Hebrew printed books in the Museum now consists of about 15,000 volumes. Of these upward of 10,100 are described in Zedner's "Catalogue of the Hebrew Books in the Library of the British Museum," published in 1867, and the greater part of the remainder are entered in S. Van Straalen's "Catalogue of Hebrew Books in the British Museum Acquired During the Years 1868-92."

The distribution of volumes among the more important classes of books described in Zedner's cata-

logue is as follows: Bibles, 1,200 volumes; commentaries on the Bible, 510; Talmud, 730; commentaries on the Talmud, 700; codes of law, 1,260; grammars and dictionaries, 450; poetry and criticism, 770.

Of the 4,650 volumes described in Van Straalen's catalogue the greater part was published within the last fifty years. This large contingent is rich in specimens of works in the Judæo-German dialect, and in modern Hebrew belles-lettres, such as the publications of Mapu, Smolenskin, Gordon, and Lebensohn, and also Hebrew translations of works by Shakespeare, Milton, Schiller, Lessing, and other European writers. The numbers of volumes to be assigned to the classes mentioned above must, therefore, necessarily be smaller in proportion than those given in connection with Zedner's catalogue.

The history of the acquisition of the printed books is naturally not so varied as that of the manuscripts. In 1753, when the Museum was first opened to the public, the editio princeps of the Talmud was the only Hebrew work in the collection. **Printed Books, Whence Acquired.** forming part of the royal library presented by King George II. But Solomon da Costa, a Jewish merchant who had immi-

migrated from Holland, and whose name has already been mentioned above in the account of the manuscripts, presented to the Museum in the same year a collection of no less than 180 volumes, containing some of the most valuable works of Rabbinic literature. From the preface to Zedner's catalogue we further learn that "during the succeeding eighty-nine years the Hebrew books increased to about 600." But the great importance of the Hebrew library dates from the year 1848; for it was then enriched by the addition of 4,420 volumes purchased from the famous collection of H. J. Michael of Hamburg. "This acquisition gave," to use the words of the preface of 1867 just mentioned, "an impetus to this branch of the library, which has been constantly maintained" ever since, "and has resulted in making the national collection of Hebrew books the largest in the world."

The next notable addition to the library came from the collection of the late Joseph Almanzi, which had first passed into the hands of Asher of Berlin, and from which the trustees of the British Museum were able to select such works as were not already in the Museum library. The books acquired since that time came to the Museum gradually through the ordinary medium of booksellers, among whom the late Fischel Hirsch of Berlin was one of the most frequently employed.

The list of early printed books and other rare works in the collection is a pretty large one. The following statement relates to the books described in Mr. Zedner's catalogue:

1. Of works of the fifteenth century, mentioned by De Rossi, there were then 65 in the Museum.
2. Of works printed from 1500 to 1540, mentioned by De Rossi, there were 27.
3. Of works printed from 1480 to 1540, not mentioned by De Rossi, 32.
4. Of books of which no other copy, or only one or two copies, was known to exist, 38.

It has already been stated that the greater number of books described in Van Straalen's catalogue were

printed in recent times. The proportion of early books must, therefore, be necessarily small. There are, however, to be noticed such works as Jacob b. Asher's code, printed at Mantua in 1476 (with MS. notes by G. B. de Rossi); the Pentateuch, printed at Bologna in 1482 (also with MS. notes by De Rossi); the Talmudical tractate Bezah, printed at Soncino in 1483; the Pentateuch, printed at Faro in 1487; the books of Isaiah and Jeremiah, printed at Lisbon in 1492.

It may finally be mentioned that the trustees recently acquired a rather curious copy of the Talmudical tractate Ketubot which probably belongs to the sixteenth century, and appears to have been printed at Salonica. It is specially noteworthy that the foliation of this copy differs from the uniform arrangement adopted in the editions generally.

The antiquities contained in the Museum also include many objects of Jewish interest, notably a fine series of ancient Jewish coins in the department of coins and medals.

**BRITTANY** (French, *Bretagne*): Ancient province of France corresponding to the present departments of Finistère, Côtes-du-Nord, Morbihan, Ile et Vilaine, and Loire-Inférieure. The name occurs in Hebrew writings under various forms, such as *בִּרִיטַנְיָה*, *בִּרִיטַנְיָה*, *בִּרִיטַנְיָה*. Little information can be gathered concerning the epoch of the settlement of Jews in Brittany, where they were never numerous. The first official documents referring to the Jews there date from the beginning of the thirteenth century. These are two charters, one dated April, 1209, and the other March, 1235. In the first the Jews are indirectly mentioned as creditors of Guillaume de Marcil; the second is a receipt delivered to the prior of Donege discharging him from all debts to the Jews Creisson and Bonastru of Guérande.

There were Jews also at Clisson, Auenis (where a street still exists called "Rue de la Juiverie"), Segré, and Nantes, the last-named place being, according to Michael Guimar, the center of the Jews of Brittany. There they possessed a large synagogue in the street above-mentioned, and their own tribunal, where disputes among themselves were adjusted according to the Mosaic law. The chief occupation of the Jews of Brittany was money-broking, and many interested parties eagerly sought a pretext to rid themselves of their creditors. This pretext soon presented itself in the new crusade preached by Gregory IX. in 1235. In order to win believers, Gregory granted the crusaders and the promoters of the crusade full indulgence, and forbade their creditors, both Jews and Christians, to take any interest from them. The crusaders of Brittany, however, not willing to pay even the principal, demanded the banishment of the Jews. They not only forbade them to claim what was due, but forced them to return the goods given in pledge; then, in order to

make sure of their complete riddance of these creditors, they massacred most of the Jews in 1236, soon after Easter. Three years later, at the request of the barons and prelates, Duke Jean le Roux issued a decree enacting the following: (1) the banishment of the Jews from Brittany, and prohibition of their entering his lands or those of his subjects; (2) the abolition of all debts, of whatever nature, contracted with Jews; (3) the return to the debtors or their heirs of both personal property and real estate given in pledge; (4) the interdiction of commitment for trial on the charge of having murdered a Jew; (5) the confirmation of this decree by the king of France. The duke engaged himself by an oath to observe the provisions of this decree during his life, and bound his successors to a similar fulfilment.

Some years later, however, it seems that Jews again settled in Brittany, and were banished thence only in 1391, when Brittany became a definite French province. In the early part of the seventeenth century, Jews, and especially Portuguese Maranos, sojourned there notwithstanding the decree of their banishment issued April 23, 1615, by Louis XIII.

**BRIVIESCA** (not *Birviesca* or *Briviasca*): The ancient *Virovesca*; city in Old Castile, not far from Burgos. A Jewish community dwelt there, which in 1290 was taxed 11,700 maravedis. At the request of his sister, the Infanta Doña Berenguella, Don Ferdinand III. of Castile presented to the convent San Maria la Real of Burgos, in perpetuity, the taxes of several Jews living in the quarter San Cecilia in Briviesca, including those of Abraham del Bao, Judah Mocaniz, and Moses, his son-in-law, and others, and their descendants. In the internecine war between Don Pedro and Henry of Trastamare the Jews valorously defended the walls of the city, until they were attacked in the rear by the troops of Bertrand du Guesclin, and were either killed or taken prisoners. According to Samuel Zarza's account not a single one of the two hundred heads of families that had lived there remained alive; "their corpses became food for the birds of heaven and the beasts of the field." In 1455 Don Mosse was living at Briviesca as farmer of taxes.

M. K.

**BROCINER, JOSEF B.:** President of the Union of Hebrew Congregations of Rumania; born in Jassy, Rumania, Oct., 1846. From 1864 to 1866 he studied law at the university of his native city, and during that time cooperated with Dr. Landesberg and others in founding the Unimea Israelita, a Jewish defensive publication society. In 1867 Brociner settled at Galatz as a merchant. He joined (1868) the Galatz Lodge of the Masonic Order (Grand Orient de France), and as a Freemason was active in bringing about a modification of rituals, finally obtaining for himself the thirty-third degree. Up to the present time (1902) he is the only Jew

among the eighty-four Freemasons of the Grand Orient who has attained this degree.

In 1873 Brociner was chosen president of the local committee of the Alliance Israélite Universelle.

Together with Dr. Leopold Stern of Bucharest, he was delegated in 1876 to represent Rumania at the conference of the Alliance Israélite Universelle for the defense of Jews in the Orient, held under the chairmanship of Adolphe Crémieux at Paris. During the war of Russia and Rumania against Turkey in 1877, Brociner was secretary of the committee for maintaining ambulances on the battle-field; and in April and May, 1878, he accompanied Dr. Adolph Stern to Budapest, Vienna, and Berlin to obtain the cooperation of their coreligionists in championing the cause of the Rumanian Jews at the Berlin Congress. In June he was a member of the commission sent to Berlin to furnish the congress of the European powers with information on the Rumanian question. In August, 1878, with the late Benjamin F. Peixotto, American consul-general at Lyons, he represented the Rumanian Jews at the second conference of the Alliance Israélite Universelle, held at Paris.

Brociner accompanied his brother, Dr. Marco Brociner (another brother, Maurice, is secretary to King Charles of Rumania), to Vienna, Berlin, and Paris (1879), in order to further the interests of the Rumanian Jews in these cities. At that time he obtained from Professor Bluntschli of Heidelberg the famous juristic brochure "L'Etat Roumain," in favor of the Rumanian Israelites. He was president of the Jewish community of Galatz in 1874, 1878, 1884, and 1893. In 1884 he was vice-president of the Galatz committee for establishing the colonies in Palestine which were afterward taken under the protection of Baron Edmond de Rothschild of Paris.

The Union of Rumanian Jewish Congregations was due to Brociner's initiative, and in recognition of his services he was unanimously elected first president. In addition to many articles on the Jewish question, and various reports published by the B'nai B'rith Lodge, Brociner wrote a pamphlet entitled "Law of Mo'adim" (Days of Meeting), for the Independent Order of B'nai B'rith, which was well received.

**BRODA, ABRAHAM BEN SAUL:** Bohemian Talmudist; born about 1640 at Bunzlau; died April 11, 1717, at Frankfurt-on-the-Main. Saul Broda sent his son to Cracow to pursue his Talmudic studies with Rabbi Isaac ben Ze'eb Harif of that city, in order to withdraw him from the evil influences of Shabbethaism, at that time spreading throughout Bohemia. After receiving his rabbinical diploma, Broda returned to his native city, but was soon called as rabbi to Lichtenstadt, and thence to Raudnitz. Even then his reputation was so great that Shabbethai Bass asked for his approbation to a book that Bass had written. Hence, when the office of chief rabbi of Prague became vacant about 1693, it was offered to Broda, who accepted it, although it was probably not very remunerative in consequence of the great fire of 1689, which impoverished many members of the congregation. This office,

from which he had doubtless expected much pleasure, involved him, on the contrary, in many difficulties; for when a difference arose between Broda and Zebi Ashkenazi in regard to a ritual question, all the rabbis of Prague took sides against the former.

It was probably this that induced Broda, who disliked quarrels, to seek another position. He was called to Metz. The documents available are conflicting as to the date of his entry into office; but the contract of the community of Metz with Broda, dated Oct. 30, 1708, has been discovered by Kaufmann, from which it is evident that Broda went to Metz in 1709, as claimed by Carmoly, and not in 1703, as Cahen assumed. Here, as at Raudnitz and Prague, Broda's chief activity consisted in founding and directing a yeshibah; it is said that he had an excellent method of initiating into the study of the Talmud those who had never before pursued such study. His stay at Metz was of short duration; for in 1713 he was called to Frankfort-on-the-Main, where, also, he founded a yeshibah. This had a large attendance, many of his pupils becoming eminent rabbis.

Broda's collected works appeared after his death. They include: (1) "Hiddushe Geonim" (Offenbach, 1723), consisting of scholia to the treatises Baba Kamma, Baba Me'zia, and Sanhedrin; (2) "Hiddushe Halakot," on Giṭṭin, Wandsbeck, 1731; (3) "Shema'ta Hadta," on Ketubot and Giṭṭin, Frankfort-on-the-Main, 1722; (4) "Eshel Abraham," on Pesachim, Hullin, Baba Batra, Frankfort-on-the-Main, 1747; (5) "Toledot Abraham," on Kiddushin and Ketubot, Fürth, 1764; (6) "Halikot 'Olam," the Jewish laws in the German language, Budapest.

Aside from these works written by him, many of his explanations of different questions are found in the works of other scholars, as in Nathaniel Weil's "Korban Netanel," Carlsruhe, 1755; and Zebi Ashkenazi's "Hakam Zebi," *et seq.*

**BRODA, ABRAHAM B. SHALOM:** Russian rabbinical author; born in Wilna about the beginning of the nineteenth century; died there after 1860. His father, R. Shalom b. Aaron, who was quite young at the time of his death (1805), was one of the leaders of the community (see R. Israel Ginzburg's approbation to "Bet Wa'ad"). R. Abraham is known as the author of two works: "Bet Wa'ad," a collection of regulations which refer to sitting down and standing up during various religious exercises, with an appendix relating to weights and measures, Wilna, 1832; "Bayit ha-Gadol," a commentary on Pirke Rabbi Eliezer, which is published with the text, Wilna, 1838. At the end of the work the author states that he has also written a commentary on the Mekilta, but does not possess the means to publish it. The commentary has no distinguishing feature except the numerous corrections made in the original text, which had been corrupted by various copyists and printers.

**BRODA, BENJAMIN B. AARON:** Lithuanian rabbi and Talmudist; died Sept. 1, 1818, at Grodno. He was the best-known Talmudist of the five sons of Aaron Broda, an eminent Talmudist and rabbi of the old Polish community of Kalvarien. Owing to his wealth and family connections—he was a direct descendant of the famous Abraham b. Saul Broda—Benjamin, in 1791, secured appointment to the rabbinate of Grodno, one of the oldest and most important communities of Lithuania, as successor of R. Eliezer b. Zebi, who had recently died. Although the letters of appointment had been signed by the king Poniatowski himself, Broda's nomination gave rise to a warm dispute in the community; many members having favored the appointment of R. Tamhum, son of the late Rabbi Eliezer, who had officiated as "rosh bet-din" (head of the court) even during his father's lifetime. The quarrel, which lasted until almost the end of Broda's incumbency, was so bitter that at his death it was decided, in order to avoid a recurrence of similar quarrels, to leave the office of the chief rabbi forever vacant. Among Broda's sons, **Hayyim Broda** may be mentioned, the author of the work "Torah Or we-Derek ha-Hayyim" (Grodno, 1823), a detailed commentary to the sixty chapters of Caro's "Yoreh De'ah."

**BIBLIOGRAPHY:** Friedenstern, *Tr Gilyonim*, pp. 55, 56, 73.

**BRODSKI:** A family which has produced many rabbis and notable men in the last three hundred years. It is a branch of the Schor family. **Meir Schor** of Brody, Galicia, married and settled in Zlatopol, government of Kiev, Russia, where he assumed the name "Brodski" (from Brody). His father, **Alexander Hayyim Schor**, was a son of Deborah Babad, daughter of R. Alexander Schor, author of "Simla Hadashah," who lived in Zolkiev in the latter part of the seventeenth century. Meir had five sons, all of whom became very wealthy; and the Brodskis are now considered the richest Jewish family in Russia. **Israel** (b. 1823; d. 1889), who surpassed his brothers in wealth and philanthropy, settled in Kiev, where his sons, **Lazar** and **Leon**, who are practically at the head of the sugar industry in Russia, now reside. They own 22 sugar factories, including 3 refineries. They are both councilors of commerce, and have been decorated by the Russian government and by the French government with the order of the Legion of Honor.

The best known of the other sons of Meir was **Abraham**, who was born in 1816 and settled in Odessa in 1858. He, too, was prominently identified with the sugar industry and other large enterprises, and was for many years the most influential member of the city council of Odessa, occupying for a long time the position of vice-mayor. He, like his brother Israel, distributed large sums for various charitable and educational purposes, and founded important benevolent institutions in Odessa and in Zlatopol, where he died Oct. 28, 1884. His son **Samuel** (b. 1846; d. Dec. 28, 1896) married a daughter of the journalist and author Ossip (Joseph) Rabinovitch. He was also a member of the Odessa city council (by appointment, for no Jew can be elected to that position).

**BIBLIOGRAPHY:** H. D. Friedberg, *Toledot Mishpatat Schor*, pp. 19-20, Frankfort-on-the-Main, 1901; *Ahissaf*, 5658; *Ozar ha-Sifrut*, v. 327-328; *Ha-Asif*, ii. 78, 755; *Ha-Meliz*, xiv. No. 9, xx. No. 84; Efrati, *Dor ve-Jorshaw*, p. 45, Wilna, 1889; *Allg. Zeit. des Jud.*, 1878, p. 237; *Jewish Messenger*, March 14, 1902. A genealogy of the family is presented by Wolf Kratuschinsky in his *Ateret Tiferet Israel*, Vienna, 1883; but it deals only with Israel, not even mentioning the other brothers. The work is imperfectly done.

P. Wl.

**BRODSKY, ADOLPH:** Russian violinist; born in Taganrog March 21, 1851. At the age of nine he played in a concert at Odessa, attracting much attention. He received his musical education from Professor Helmesberger in Vienna, where he played in his teacher's quartets and in the Vienna court orchestra. After a concert tour in Russia he was appointed (1875) professor at the Moscow Conservatory of Music. In 1879 he directed the symphony concerts in Kiev; and since 1882 has been professor at the Conservatory of Leipzig. The quartet composed of Brodsky, Hans Becker, Novacek, and Julius Klengel has a wide reputation. In 1891 Brodsky went to the United States, where he toured for three seasons. Returning to Germany, he accepted the position of head teacher at the Manchester Royal College of Music and leader of the Hallé concerts. After Sir Charles Hallé's death in 1895, Brodsky was appointed his successor as principal of that college. The quartet arranged by him, and comprising himself, Rawson Briggs, S. Speelman, and Carl Fuchs, has become well known in England.

H. R.

**BRODY.** See GALICIA.

**BRODY, HEINRICH:** Austrian rabbi; born May 21, 1868, at Ungvár, Hungary; descendant of **Abraham Broda**. Educated in the public schools of his native town, and at the rabbinical colleges of Tolesva and Presburg, Hungary, Brody also studied at the Hildesheimer Theological Seminary and at the University of Berlin, being an enthusiastic scholar of the Hebrew language and literature.

He was for some time secretary of the literary society Mekize Nirdamim, and in 1896 founded the "Zeitschrift für Hebräische Bibliographie," of which he is coeditor with A. Freiman.

Brody is now (1902) rabbi of the congregation of Nachod, Bohemia. He has taken great interest in the Zionist movement.

Brody is author or editor of the following works: "מכתב שפתים. Hebräische Prosodie von Imm. Frances, mit Einleitung und Anmerkungen," Cracow, 1892; "השלמה ס. Hachlamah zum Talm. Tractat Berachot, von R. Meschullam b. Mose," Berlin, 1893; "שלמה ראפיארה ר. Beiträge zu Salomo da-Piera's Leben und Wirken," Berlin, 1893; "תולדות ר"ד קאסר. David Cassel's Biographie," Cracow, 1893; "כוח לבני ושמעי." Ein Dialog von Imm. Frances," Cracow, 1893; "Offener Brief an Herrn Prof. M. Hartmann," Berlin, 1894; "מטמוני מפתחים." Literarhistor. Mitteilungen," No. 1, Cracow, 1894; "Studien zu den Dichtungen Yehuda ha-Levi's," i.; "Ueber die Metra der Versgedichte," Berlin, 1895;

"עשר שירות כספרי רמ"ב, Zehn Gedichte aus dem Diwān Moses ibn Esra," Leipsic, 1896; "ריוטן," Der Diwān des Jehuda ha-Levi," vols. i. and ii. 1, 1894-1901; "שיר הישרים," Weltliche Gedichte des Abu' Ajjub Soleiman b. Yahja (Solomon) ibn Gabirol," No. 1-2, Berlin, 1897-98; "מקרא קריש," Arnold B. Ehrlich, Mikra ki-Peschuto Kritisch Beleuchtet," Cracow, 1902; "Mikra Kodesch," 1902.

He has also published, under the assumed name of Dr. H. Salomonsohn, "Widerspricht der Zionismus Unserer Religion?" 1898, and is a contributor to "Ha-Maggid," "Israelitische Monatsschrift," "Magazin für die Wissenschaft des Judenthums," "Monatsschrift für Geschichte und Literatur des Judenthums," "Allgemeine Zeitung des Judenthums," "Evkönyv," "Ha-Eshkol," "Ha-Shiloah," etc.

s.

F. T. II.

**BRÓDY, SÁNDOR:** Hungarian author and journalist; born at Erlau in 1863. After attending the schools of that city he devoted himself entirely to literature. From 1888 to 1890 he was editor of the "Erdélyi Hiradó," published at Klausenburg, and was also connected with the "Erdélyi Képes Ujság" and the political daily "Magyarság." Since 1890 he has been a member of the "Magyar Hirlap," and since 1882 a prolific contributor of articles, feuilletons, stories, and novels to the leading literary publications of Hungary. In his works he depicts the dark side of life, and is a disciple of the modern French realistic school.

The following are his principal works: "Regény-tárgyak," tales, 1892; "A Kétkelő Asszony," novel, 1893; "Az Egri Diákok," 1894; "Nyomor," stories, 1884; "Faust Orvos," novel, 1888-90; "Don Quixote Kisasszony," novel, 1888; "Emberek," stories, 1888; "Szinészvér," stories, 1891; "Hóféléрке," novel, 1894; "Apró Regények," 1895; "Két Szőke Asszony," novel, 1895; "Ejszaka," stories, 1895; "Rejtelmek," stories, 1895; "Az Asszonyi Szépség," 1897; "Tündér Ilona," novel, 1898; "Az Ezüst Keeske," de luxe edition, 1898; "Egy Férfi Valomásai," 1899; "Fehér Könyv," 1900-01. Bródy justly enjoys a wide popularity. All his works have been translated into German, and many of his shorter productions have also appeared in French, English, Danish, Croatian, Rumanian, and Servian newspapers and other periodicals. His contributions to the "Magyar Hirlap" are mostly of a political or critical nature. In 1901 he essayed the drama in his preparation of a play founded upon his novel "Hóféléрке"; this has been frequently performed with marked success at the National Theater at Budapest.

**BRÓDY, SIGMUND:** Hungarian journalist, and member of the Upper House of the Hungarian Parliament; born Nov. 15, 1840, at Miskolcz. He attended the gymnasium at Budapest, and later studied law at the university. He began his journalistic activity early in life, and in 1859 published his first leader. As early as 1860 he occupied the post of editor of the "Pesti Hölgydivatlap," and in conjunction with Károly Grosz founded the German periodical "Pannonia," whose purpose was the pub-

lication of Hungarian literature in the form of critical studies and translations. In 1859-60 he wrote some poems, as well as a number of hymns for the Jewish congregation which are still in use. As collaborator on the "Magyar Sajtó," he became very widely known as a journalist of the first rank.

After the compromise with Austria (1867), Bródy was associated with Sigmund Kemény as editorial writer on the "Pesti Napló"; and this was the most brilliant period of his career as publicist, his sound logic and comprehensive views being especially noticeable. In 1872 he became secretary at the Ministry of the Interior, but voluntarily resigned this position; a year later he purchased the "Neues Pester Journal," which paper under his management attained an unprecedented circulation throughout the country.

Bródy is also a distinguished philanthropist, and on the anniversary of his fiftieth birthday he donated 100,000 gulden to journalistic institutions. Further donations to the amount of 250,000 gulden were made in memory of his wife. In 1896 he was appointed a life member of the Hungarian Upper House.

**BROGLIE, VICTOR-CLAUDE, PRINCE DE:** French statesman; opponent of Jewish emancipation; born at Paris, 1757; beheaded in 1794 for intriguing against the French Revolution. He wrote "Opinion sur l'Admission des Juifs à l'Etat Civil" (Paris, 1791), in which he argues against the admission of the Jews into French citizenship simply because the reformed Jewish oath is sufficient proof of the complete renunciation of the rights of citizenship. De Broglie found a vigorous and bitter opponent in the representative Prugnan, who signally defeated his exclusion bill (Sept. 27, 1791).

Prugnan's chief argument against his opponent was that the civil laws of the Jews were identified with their religious laws, and, consequently, that their reformed oath had absolutely nothing to do with the conditions necessary for French citizenship, which were fixed by the constitution. After De Broglie's death a legend circulated among the Jews of Avignon, Dijon, and Carpentras to the effect that De Broglie had been beheaded soon after having issued his book against the Jews, and that, in the last moments of agony, he had asked forgiveness for his anti-Jewish sentiments. There is no historical basis for this legend, which the present writer heard for the first time in 1881 from Lazare Isidor, the grand rabbi of France, and from Michel Erlanger.

**BROKER:** One who acts as middleman between seller and buyer, or makes it his business to bring buyer and seller together; also one who acts as agent for hire. The Neo-Hebrew word for broker is "sirsur." It occurs with the former and more proper meaning in the Mishnah (B. B. v. 8, very briefly commented on in the Babylonian Gemara 87a), where the case is put of a package of oil or wine breaking while being measured, and "if a broker stands be-

tween the parties the loss falls on him," by reason of the doubt whether title to the goods has passed from the seller to the buyer. In the codes the word is defined in the latter sense—that of one who acts as agent for hire; and illustrations are given as well of purchasing agents as of men employed to sell. This occupation of a paid agent was rather infrequent, in Palestine and Babylonia, in the time when the Mishnah and Gemara were evolved, as the nation was still mainly engaged in farming and grazing; hence the references to the Talmud made by the codes on this subject are rather far-fetched.

The broker (says Maimonides in *Hilkot Sheluhin* ii. 6) is a paid agent; hence, if he deviates from the intent of the owner, he must make good the loss caused. Thus, if *A* gives an article to *B*, the broker, and says, "Sell this for me for not less than a hundred zuz," and *B* sells it for fifty, he must make up the other fifty from his own pocket; but if he sells it for two hundred, the whole belongs to *A* (see also Shulhan 'Arukh, *Hoshen Mishpat*, 185, 1 *et seq.*). According to R. Moses Isserles (gloss to *ib.*), a mere present sent to a buying or a selling agent turns him into a broker.

When a dispute arises about the instructions, there being no witnesses, and the broker insisting that he was permitted to sell at the price which he realized, he may clear himself by his oath. On the question when the "oath of the Torah" or when the rabbinic oath is required see **DECISORY OATH**.

The broker can not sell to himself, thus gaining the ownership of the article entrusted to him; but when he is limited to a price at which he may sell, and he pays that price to the principal, who accepts it, the latter can not afterward object to the broker's keeping the article. If the owner offers to the broker the surplus over a named price as the reward for his trouble, the mere silence of the broker is deemed an acceptance of these terms; and he may upon a sale retain such surplus accordingly (*ib.* 125, 5).

When an article entrusted to a broker is lost or stolen from him, even on the way, being a hired keeper (see **BAILMENTS**), he is bound to make it good. Should he lose a precious stone out of a ring or other jewel, he should swear that he has it not in his possession, and what it is worth, and make good its value (*ib.* 8). Where a broker is entrusted with goods for the purpose of pawning them, and he claims not to know to whom he has pawned them, this is an act of faithlessness, and he is answerable at once. If he has pawned the goods as directed and discloses the pawnee, and the latter denies having received them, the broker, in the opinion of Joseph Caro (*i.e.*, the text of the *Hoshen Mishpat*, *ib.* 9), goes free; but other authorities (dating back to Alfasi) hold him liable, as it was his duty to have proof by witnesses or otherwise to the act of pawning (see "Beer ha-Golah," *ad loc.*). If the broker gives an article to a purchaser on trial, and it is not returned, or if he sells it on credit and can not collect the price, he must answer to the owner, unless he has acted as he did with the latter's assent (*ib.* 10).

It may be noticed that R. Moses Isserles, in his note on *Hoshen Mishpat*, *i.e.*, mentions the "shadkan" or match-maker as a lawful species of broker, and refers to the customs of different countries, in

some of which the fee is due as soon as the terms as to dowry, etc., are made (see **BETROTHAL**), while in others it becomes due only upon the marriage. The absence of older authorities indicates that the trade of the Jewish match-maker is comparatively modern.

The rights of third parties growing out of the acts of a broker or paid agent are the same as if he were acting without compensation. These are defined under **AGENCY**.

The word "safsar" or "safsira" also occurs (B. M. 42b, 51a, 63b): once in the sense of a purchasing agent, and once in that of a commission merchant.

L. N. D.

**BROKERS, JEW:** A term used to indicate the Jewish merchants who had the right of trading at the Royal Exchange, London. The word "brokers" was first applied to traders, merchants, and middlemen in the time of Edward III.; but it was not until the resettlement of the Jews in England (1656) that the term was used in connection with the Jews resident in London and doing business there. Much opposition to the Jews was then manifested, especially concerning the privilege of trading as brokers; but the important position occupied by them through their manifold connections in the East and West Indies, made them too powerful to be ignored.

At that time wholesale trade was carried on mainly through the Royal Exchange, from which Jews were excluded. This proved so troublesome to the traders that in 1657 Solomon Dormido, a nephew of Manasseh ben Israel, applied for membership in the Exchange. His application was favorably considered by the court of aldermen, who purposely refrained from asking questions and from forcing him to take the oath, because of its doctrinal character. There

were in England at this time a number of influential Jews, trading as brokers under assumed names. Don Antonio Fernandez CARVAJAL, or Antonio Fernandez, was for some years a contractor for corn for the English government. In 1650 he and Don Rodrigues sued a Captain Peters in the Admiralty Court for a shipment of goods that had not been delivered; and in the same year, under the name "Don Antonio Fernandez Carvagall," he petitioned the Admiralty committee to consider his claim for the seizure of certain shipments to Francisco Botelio Chacon and Botelio Silveria in Portugal, which, because of the unrest in the country, had been ordered shipped to Holland instead. All the names mentioned in these suits were those of founders of the Bevis Marks congregation.

The first documentary mention of Jew brokers, so far as is known, is in the Rawlinsonian manuscripts of the Bodleian Library, and occurs in

**First Jew Brokers.** a rough slip similar to that used at the present day by the brokers and under-

writers at Lloyd's. Particulars are given of the risk accepted on the cargo of "Augustin Coronell, the Littell Jue, in the Yonge Tobias, the 6th June, 1655, from London to Lixbo," the premium being 2½ per cent, and the policy being underwritten in "Thridnedel Stret" (Threadneedle Street). Another risk was effected upon the cargoes

of the "Dominego Vass and de breto. the 9th May, 1655, from London to Barbadoes in the Jno. Cli. at 3 $\frac{1}{2}$ ." Coronel and De Brito (whose names are incorrectly spelled in the premium slip) were also Jews. Probably the first judicial mention of a Jew acting as a bill-broker at the period of the Commonwealth is in the year 1656, when Lady Hall gave evidence before the commissioners of the protectorate respecting a sum of £4,000 lent to Charles Stewart on a bill of exchange. According to the Thurlow state papers, Lady Hall declared "that there is a Jew named Da Costa, a great merchant in London, who hath, and is presently to receive, the sum of £4,000 for the use of Charles Stewart," which sum was to be returned to Da Costa by Mr. Leger of New-castle.

The admission of Solomon Dormido to membership in the Royal Exchange, as mentioned above, led to a suspension of the law excluding Jews; and soon they entered in such numbers that

"Jews' a special space, known as the Jews' Walk" in WALK, was allotted to them. As the the Royal law had been abrogated for the Jews, Exchange. a similar suspension as regards the taking of the oath had to be generally

adopted; and in consequence the Exchange was soon overrun with doubtful characters. Abuses grew so rapidly that public clamor resulted in a reorganization of the Exchange and its laws in 1697. The "Post Boy" of April 27 of that year records that "the Lord Mayor and the Aldermen have been busy this week in receiving petitions from a great number of persons, who put in to be Exchange brokers: they are to be 100 in number, 80 of whom are to be Englishmen and the rest foreigners and Jews, each of whom is to carry a medal in his pocket with his name on it, the King's effigy on one side and the city arms on the other, and they are to show it on the making of any bargains."

According to the archives contained in the Guildhall Library, London, the number of Jew brokers or alien brokers was limited to twelve, the election being the prerogative of the lord mayor and the court of aldermen. An entrance-fee of forty shillings was charged, with an annual payment of a similar amount. In addition, the broker had to give

surety in two bonds of £500 each, as a guaranty of the faithful performance of his duties. When these conditions had been complied with, the applicant received his medal, which,

in the case of a Jew broker, was transferable. The purchase of brokers' medals caused much competition, the usual purchase price ranging from £1,000 to £1,500. In the event of a Jew broker dying before a transfer could be made, the privileges accruing from the sale became perquisites of the lord mayor.

The last recorded sale of a broker's medal took place in 1826, when Joseph Barrow Montefiore paid 1,500 guineas to Sir William Magnay, the then lord mayor, for a medal which had lapsed through the death of its owner. In 1828 the corporation removed the limit on the number of Jews admitted to the Exchange, and abolished the purchase of the medal and the heavy entrance fee. Under an old charter of Edward III. English brokers were forced to be free-

men, but it was not until 1832 that the freedom of the city was extended to the Jews.

**BROMBERG.** See POSEN.

**BROOCH** or **BUCKLE:** A term which occurs in I. Macc. x. 89, xi. 58, xiv. 44, as the translation of the Greek *πόρπη*; Latin, *fibula*. This was a ring made of metal (often gold) and set with precious stones, through which passed a pin. It was used, in the manner of the modern safety-pin, to fasten the overgarment to the shoulder. By the Romans brooches were often given as presents; and in the army they were bestowed as marks of distinction or rewards for meritorious service, like modern orders and decorations. When of gold, they resembled the epaulets now worn by the higher military officers. From the passages quoted above it is evident that in the East kings or high dignitaries (priests) were exclusively the recipients; something of the ancient TABOO apparently surviving in this restricted use. In Ex. xxxv. 22, R. V., "brooch" is the rendering of the Hebrew *נֶזֶן*, which, however, was a nose-ring (see BRIDLE; compare II Kings xix. 28).

E. G. H.

**BROOKLYN.** See NEW YORK.

**BROTHER:** Son of the same father and mother (or of either), but principally son of the same father and mother (see Gen. xlii. 3, 4, 5, 13; xlii. 11, 23, 29; II Sam. xiii. 4 *et seq.*; Judges ix. 3). The brother was expected to give his consent to his sister's marriage (Gen. xxiv. 50-55, xxxiv. 11 *et seq.*). The Mosaic law declares the marriage of brother and sister, whether the latter be the daughter of the same father or of the same mother, to be incestuous (Lev. xviii. 9, xx. 17); whereas in the patriarchal time, and even later, it was not considered unlawful to marry the daughter of the same father (Gen. xx. 12; II Sam. xiii. 13). To marry the brother's wife was incest (Lev. xviii. 16, xx. 21); but if a brother died childless, then the surviving brother was enjoined to marry the widow, and the first-born son of this marriage bore the dead brother's name and was his legal heir. In case of the refusal of the brother-in-law to marry her, the widow was required to summon him before the city elders and loose his shoe from off his foot, saying: "So shall be done unto that man that will not build up his brother's house" (Deut. xxv. 5-9; see HALIZAH and LEVIRATE).

The nearest relative occasionally took the place of the brother (Ruth iv. 13; v. 3, 4). The brother was the first, as GOEL, to redeem the property sold by an impoverished man, and to avenge the murder of a brother (Lev. xxv. 48; Ps. xlix.). It is probably due to this primitive idea of kinship that the name "brother" came to have the following significations:

(a) A kinsman. Thus, Lot, the nephew of Abraham, and Jacob, the nephew of Laban, are each called "brother" (Gen. xiii. 8, xiv. 14, xxxix. 15). Furthermore, inasmuch as the whole tribe formed in this sense one family, the name "brother" became also the designation for

(b) A tribesman (Lev. xxi. 10; Deut. xviii. 7; II Sam. xix. 13 [12]) or one belonging to the same nation (Ex. ii. 11, iv. 18; Num. xxxii. 6; Deut. x. 9, xvii. 20, xxiii. 19, xxiv. 7; Jer. xxxiv. 14).

(c) Kindred tribesmen, who are also called "brothers" (Num. xx. 14; Deut. ii. 4, 8; xxiii. 7; Amos i. 11).

(d) Friends by concluding a covenant become actual brothers (II Sam. i. 26; Amos i. 9—"berit ahim" [covenant of brothers]; compare "alahavah" [brotherhood], Zech. xi. 14); although, according to Prov. xviii. 24, "there is a friend that sticketh closer than a brother."

(e) The name "brother" has a higher meaning, and implies brotherly sentiment, in such verses as: "Open thine hand wide unto thy brother, to thy poor" (Deut. xv. 11); "Lest by exceeding the number of stripes thy brother should be vilified unto thee" (Deut. xxv. 3, Hebr.); "Fear thy God that thy brother may live with thee" (Lev. xxv. 36). Indeed, proverbial wisdom states as an experience of life among the Jewish people that "a brother is born for adversity" (Prov. xvii. 17); that is to say, mere sight of distress rouses brotherly compassion.

(f) Finally, the word "brother" means a fellow-man as son of the same God and Father: "At the hand of every man's brother will I require life" (Gen. ix. 5). "Have we not all one father? hath not one God created us? Why do we deal treacherously every man against his brother" (Mal. ii. 10). "Thou shalt not hate thy brother in thine heart" (Lev. xix. 17). The feeling of brotherly union which gave rise to Ps. cxxxiii., "How good and how pleasant it is for brethren to dwell together in unity," prompted also the prayer recited in the Temple every morning: "May He who dwelleth in this house plant brotherliness and love, peace and friendship, amongst you" (Yer. Ber. i. 3c; compare iv. 7d, a similar prayer by R. Johanan). "Years of plenty and prosperity make of the creatures brothers to each other" (Gen. R. lxxxix.; Midrashic explanation of וַיִּשְׂרַח Gen. xli. 2). In a far higher sense Abraham by his piety and philanthropy "made brothers" of the whole world (Gen. R. xxxix.; see BROTHERLY LOVE).

(g) "Brother" is also used in the sense of "friend" as a form of politeness (Gen. xix. 7), and (h) figuratively in the sense of "companion": "He that is slothful in his work is brother to him that is a great waster" (Prov. xviii. 9); "I am a brother to dragons, a companion to owls" (Job xxx. 29).

E. C.

K.

**BROTHERHOODS.** See FRATERNITIES.

**BROTHER-IN-LAW.** See LEVIRATE.

**BROTHERLY LOVE:** The love for one's fellow-man as a brother. The expression is taken from the Greek word *φιλαδελφία* ("love of brothers"), which trait distinguished the early Christian communities. Rom. xii. 10; I Thess. iv. 9; John xiii. 35; I John ii. 9, iii. 12, iv. 7, v. 1; and I Peter iii. 8, v. 9 express the idea of Christian fellowship and fraternity. It originated among the Essene brotherhoods, who practised brotherly love as a special virtue (Josephus, "B. J." ii. 8, § 2; Philo, "Quod Omnis Liber Probus," § 12). Brotherly love is commanded as a universal principle in Lev. xix. 18: "Thou shalt love thy neighbor as thyself," the preceding verse containing the words: "Thou shalt not hate thy brother in thine heart." This commandment of

love, with the preceding sentence, "Thou shalt not avenge nor bear any grudge against the children of thy people," may originally have referred, and has by some scholars (Stade, "Gesch. des Volkes Israel," i. 510a) been exclusively referred, to

**A Biblical Command.** The Israelitish neighbor; but in verse 34 of the same chapter it is extended to "the stranger that dwelleth with you . . . and thou shalt love him as thyself." In Job xxxi. 13-15 it is declared unjust to wrong the servant in his cause: "Did not he that made me in the womb make him? and did not one fashion us in the womb?"

The principle of brotherly love, including all men, is plainly stated in the Book of Wisdom i. 6, vii. 23, xii. 19: "Wisdom is man-loving" (*φιλανθρωπικον*); "the righteous must be man-loving." The Testaments of the Patriarchs (Issachar v., vii.) teach the love of God and love of all men "as [His?] children." Commenting upon the command to love the neighbor (Lev. *l.c.*) is a discussion recorded (Sifra, Kedoshim, iv.; compare Gen. R. xxiv. 5) between Akiba, who declared this verse in Leviticus to contain the great principle of the Law ("Khal gadol ba-Torah"), and Ben Azzai, who pointed to Gen. v. 1 ("This is the book of the generations of Adam; in the day that God created man, in the likeness of God made he him"), as the verse expressing the leading principle of the Law, obviously because the first verse gives to the term "neighbor" its unmistakable meaning as including all men as being sons of Adam, made in the image of God. Tanhuma, in Gen. R. *l.c.*, explains it thus: "If thou despisest any man, thou despisest God who made man in His image."

Hillel also took the Biblical command in this universal spirit when he responded to the heathen who requested him to tell the Law while standing before him on one foot: "What is hateful to thee, thou shalt not do unto thy neighbor. This is the whole of the Law, the rest is only commentary" (Shab. 31a). The negative form was the accepted Targum interpretation of Lev. xix. 18, known alike to the author of Tobit iv. 15 and to Philo, in the fragment preserved by Eusebius, "Preparatio Evangelica," viii. 7 (Bernays' "Gesammelte Abhandlungen," 1885, i. 274 *et seq.*); to the Didache, i. 1; Didascalia or Apostolic Constitutions, i. 1, iii. 15; Clementine Homilies, ii. 6; and other ancient patristic writings (Riesch, "Agrapha," pp. 95, 135, 272). That this so-called golden rule, given also in James ii. 8, was recognized by the Jews in the time of Jesus, may be learned from Mark xii. 28-34; Luke x. 25-28; Matt. vii. 12, xix. 19, xxii. 34-40; Rom. xiii. 9; and Gal. v. 14, where the Pharisaic scribe asks Jesus in the same words that were used by Akiba, "What is the great commandment of the Law?" and the answer given by Jesus declares the first and great commandment to be the love of God, and the second the love of "thy neighbor as thyself." To include all men, Hillel used the term "beriot" (creatures [compare *κτίνας*]; Mark xvi. 15; Rom. viii. 19) when inculcating the teaching of love: "Love the fellow-creatures" (Abot i. 12). Hatred of fellow-creatures ("sinat ha beriyot") is similarly declared by R. Joshua b. Hananiah to be one of the three

**The Golden Rule.** Eusebius, "Preparatio Evangelica," viii. 7 (Bernays' "Gesammelte Abhandlungen," 1885, i. 274 *et seq.*); to the Didache, i. 1; Didascalia or Apostolic Constitutions, i. 1, iii. 15; Clementine Homilies, ii. 6; and other ancient patristic writings (Riesch, "Agrapha," pp. 95, 135, 272). That this so-called golden rule, given also in James ii. 8, was recognized by the Jews in the time of Jesus, may be learned from Mark xii. 28-34; Luke x. 25-28; Matt. vii. 12, xix. 19, xxii. 34-40; Rom. xiii. 9; and Gal. v. 14, where the Pharisaic scribe asks Jesus in the same words that were used by Akiba, "What is the great commandment of the Law?" and the answer given by Jesus declares the first and great commandment to be the love of God, and the second the love of "thy neighbor as thyself." To include all men, Hillel used the term "beriot" (creatures [compare *κτίνας*]; Mark xvi. 15; Rom. viii. 19) when inculcating the teaching of love: "Love the fellow-creatures" (Abot i. 12). Hatred of fellow-creatures ("sinat ha beriyot") is similarly declared by R. Joshua b. Hananiah to be one of the three

things that drive man out of the world (Abot ii. 11; compare 1 John iii. 15).

That brotherly love as a universal principle of humanity has been taught by the Jewish rabbis of old, is disputed by Christian theologians, who refer to the saying attributed to Jesus in Matt. v. 43: "Ye have heard that it was said, Thou shalt love thy neighbor and hate thine enemy, but I say unto you, Love your enemies," etc. This statement, however, lacks all foundation in Jewish literature (see Grätz, "Gesch. der Juden," iii. 312, note). Gûdemann thinks that Jesus' words had a special

**Hate Thy Enemy, Un-Jewish.** political meaning, and that they refer to a view expressed by the zealots who wanted to exclude dissenters from the command of love by such teaching as is found in Abot R. N. xvi., ed. Schechter, p. 64: "Thou shalt not say, I love the sages but hate the disciples, or I love the students of the Law but hate the 'am ha-arez [ignoramus]; thou shalt love all, but hate the heretics [ "minim "], the apostates, and the informers. So does the command, 'Thou shalt love thy neighbor as thyself,' refer only to those that act as one of thy people; but if they act not accordingly, thou needst not love them." Against this exclusive principle, Jesus asserted the principle of brotherly love as applied by the liberal school of Hillel to all men. Indeed, the Talmud insists, with reference to Lev. xix. 18, that even the criminal at the time of execution should be treated with tender love (Sanh. 45a). As Schechter in "J. Q. R." x. 11, shows, the expression "Ye have heard . . ." is an inexact translation of the rabbinical formula **הֲיִשְׁמַע אֵינִי**, which is only a formal logical interrogation introducing the opposite view as the only correct one: "Ye might deduce from this verse that thou shalt love thy neighbor *and* hate thine enemy, but I say to you the only correct interpretation is, Love all men, even thine enemies."

The story of the good Samaritan, in the Pauline Gospel of Luke x. 25-37, related to illustrate the meaning of the word "neighbor," possesses a feature which puzzles the student of rabbinical lore. The kind Samaritan who comes to the rescue of the men that had fallen among the robbers, is contrasted with the unkind priest and Levite; whereas the third class of Jews—*i. e.*, the ordinary Israelites who, as a rule, follow the Cohen and the Levite—

**The Good Samaritan.** is omitted; and therefore suspicion is aroused regarding the original form of the story. If "Samaritan" has been substituted by the anti-Judean gospel-writer for the original "Israelite," no reflection was intended by Jesus upon Jewish teaching concerning the meaning of neighbor; and the lesson implied is that he who is in need must be the object of our love.

The term "neighbor" has at all times been thus understood by Jewish teachers. In Tanna debe Eliyahu R. xv. it is said: "Blessed be the Lord who is impartial toward all. He says: 'Thou shalt not defraud thy neighbor. Thy neighbor is like thy brother, and thy brother is like thy neighbor.'" Likewise in xxviii.: "Thou shalt love the Lord thy God"; that is, thou shalt make the name of God beloved to the creatures by a righteous conduct toward Gentiles as well as Jews (compare Sifre,

Deut. 32). Aaron b. Abraham ibn Hayyim of the sixteenth century, in his commentary to Sifre, *l. c.*; Hayyim Vital, the cabalist, in his "Sha'are Kedushah," i. 5; and Moses Hagis of the eighteenth century, in his work on the 613 commandments, while commenting on Deut. xxiii. 7, teach alike that the law of love of the neighbor includes the non-Israelite as well as the Israelite. There is nowhere a dissenting opinion expressed by Jewish writers. For modern times, see among others the conservative opinion of Plessner's religious catechism, "Dat Moshel we-Yehudit," p. 258.

Accordingly the synod at Leipsic in 1869, and the German-Israelitish Union of Congregations in 1885, stood on old historical ground when declaring (Lazarus, "Ethics of Judaism," i. 234, 302) that "'Love thy neighbor as thyself' is a command of all-embracing love, and is a fundamental principle of the Jewish religion"; and Stade, when charging with imposture the rabbis who made this declaration, is entirely in error (see his "Gesch. des Volkes Israel," *l. c.*).

K.

**BROTHERS, RICHARD:** English visionary and founder of Anglo Israelism; born Dec. 25, 1757, at Placentia, Newfoundland; died at London Jan. 25, 1824. He entered the British navy in 1771, but was discharged as a half-pay lieutenant in 1783. In 1790 he refused to draw his pension on account of the oath which he was required to take; and two years later he began his prophetic career by declaring he had a divine mission to announce the fulfilment of Dan. vii. Brothers described himself as the "nephew of the Almighty," because he considered that he was descended from one of the brothers of Jesus, and claimed that on Nov. 17, 1795, he would be revealed as the prince of the Hebrews and ruler of the world. Before that date, however, he had been removed to a lunatic asylum, where he wrote his "Revealed Knowledge of the Prophecies" (1794), "A Description of the New Jerusalem" (1801), and "The New Covenant Between God and His People" (a posthumous work, 1830).

Brothers seems to have been the first person to claim that the English are descendants of the Lost Ten Tribes; and his views are still referred to with respect by the adherents of Anglo-Israelism. His "Description of the New Jerusalem" contains a series of plates of the various officials of the new kingdom which was to be restored in Palestine under his leadership. These officials are all dressed in the court costume of George III.

J.

**BROUGHTON, HUGH:** English Christian divine and rabbinical scholar; born 1549 at Oldbury, Shropshire; died at Tottenham, near London, Aug. 4, 1612. Broughton was entered at Magdalen College, Cambridge, where he began his Hebrew studies under the French scholar Chevalier. He graduated as B. A. in 1570, and subsequently went to London, where he distinguished himself in the pulpit as a representative of Puritan sentiment. In his first work, "A Concord of Scripture," which appeared in 1588, he made an effort to determine the Biblical

chronology, as well as to correct the profane writers by it.

Broughton seems to have been anxious to convert the Jews to Christianity. In the course of his travels in Germany (he probably started at the end of 1589 or at the beginning of 1590) he engaged in religious discussions with several Jews. In Frankfurt, early in 1590, he disputed in the synagogue with "Rabbi Elias." This dispute resulted in a letter from a certain Rabbi Abraham Reuben, written in 1596 at Constantinople and transmitted to Broughton in Germany by his (Broughton's) disciple "Top." Broughton anticipated good results from his discussions with Jews; and often referred to his disputations with Rabbi David Farrar. He was desirous of translating the New Testament into Hebrew; but, receiving no encouragement, he translated the Apocrypha only.

Broughton was one of the chief instruments in bringing about the Authorized Version of King James; but, keenly disappointed at being overlooked by the king when the latter appointed the fifty-four learned men to undertake the revision (July 22, 1604), Broughton attacked vigorously the new translation. His own versions of the Prophets, while marked by all his peculiarities, have a majesty of expression which entitles them to be better known.

**BROVARY:** Small town in the government of Chernigov, Russia. In 1898 it had 1,344 Jewish inhabitants in a population of 5,166. Most of them were engaged in mercantile pursuits; while 258 followed various handicrafts. The prevailing trade is tailoring, in which 102 Jews are engaged. Besides, there are 22 Jewish day-laborers and 75 persons who earn their livelihood in the local cigarette, tar, and chair factories.

The Jewish charitable institutions consist of a hospital for the poor, a home for the aged, and a few similar establishments. The educational needs of the Jewish community are supplied by 12 "hederim" (136 pupils) and a Talmud-Torah (28 pupils).

S. J.

**BROWN, SAUL.** See under New York.

**BROWN, WILLIAM:** Scottish clergyman; born 1766; died 1835; for forty-three years minister of Eskdalemuir, Scotland. He is the author of "Antiquities of the Jews Carefully Compiled from Authentic Sources, and Their Customs Illustrated from Modern Travels," in two volumes, with a map showing the ground-plan of the Temple (London, 1820; 2d edition, Edinburgh, 1826). The work is compiled mostly from Latin, French, and English sources, such as Arius Montanus' "Aaron," Calmet's dictionary, Goodwin's "Moses and Aaron," Owen's "Exercitation on the Hebrews," Buxtorf's "De Synagoga Judaica," and Basnage's history. He borrowed much from Dr. Lightfoot's "Prospect of the Temple" and "Temple Services," but states in the preface of his work that he takes "a wider range than Dr. Lightfoot, who professes to despise rabbinical learning."

For the improvements in the second edition Brown used Surenhusius' Latin translation of the Mishnah and several additional treatises by Maimonides and Abravanel, also from Latin translations; for his familiarity with Hebrew seems to have been very limited. The work is of more interest to the bibliographer than to the student.

**BIBLIOGRAPHY:** *Dictionary of National Biography*, vii. 36.  
T. P. Wl.

**BROWNING, ROBERT:** English poet; born in Clerkenwell, London, 1812; died at Venice Dec. 12, 1889. From his somewhat Jewish appearance, knowledge of Hebrew, and sympathy with Jews, it was for a long time thought that Browning was of Jewish descent, but this has been disproved by the tracing of his genealogy by Dr. Furnivall. His interest in Jews may to some extent be due to the fact that his father obtained a position in the Bank of England through the influence of the Rothschilds, with whom the poet was personally acquainted throughout his life. Several of Browning's poems deal with Jewish subjects. "Holy Cross Day" gives the soliloquy of a Jew of the Roman ghetto who was unwilling to attend the sermons of a Dominican friar. The concluding lines state the case forcibly of the Jew against Christian persecution:

"By the torture, prolonged from age to age,  
By the infamy, Israel's heritage,  
By the Ghetto's plague, by the garb's disgrace,  
By the badge of shame, by the felon's place,  
By the branding tool, the bloody whip,  
And the summons to Christian fellowship—  
We boast our proof that at least the Jew  
Would wrest Christ's name from the Devil's crew."

His principal Jewish poems were "Rabbi Ben Ezra" and "Jochanan Hakkadosh," the former giving the life-philosophy of a Jewish sage, who may perhaps be identified with Abraham ibn Ezra; it is full of true Jewish optimism. "Jochanan Hakkadosh" is an account of a great rabbi who obtains the privilege of additional months of life given up to him by his pupils, through whose experience he passes. He declares that all is vanity, after three months' experience of the life of a married lover, of a warrior, of a poet, and of a statesman. But by accident he has also obtained the gift of three months from the life of a little child, and this experience harmonizes all the discrepancies, and enables the sage to feel that life is not altogether in vain.

Other poems of Jewish interest are: "Filippo Baldunecchi on the Privilege of Burial" and "Ben Karshook's Wisdom"—the latter an extension of the saying in Pirke Abot, "Repent the day before your death."

Besides his poems, Browning showed his sympathy with Jews by signing, in 1881, the memorial to the lord mayor to summon a meeting to protest against the persecution of the Jews of Russia; and by joining the Council of the Anglo-Jewish Exhibition in 1887.

J.

**BROYDÉ, ISAAC:** Russian Orientalist; born at Porozowo, government of Grodno, Russia, Feb. 23, 1867. After attending the gymnasium at Grodno

he went in 1883 to Paris. There he studied at the Sorbonne, receiving his diploma from the Ecole des Langues Orientales in 1892, and from the Ecole des Hautes Etudes, Section des Sciences Historiques et Philologiques, in 1894. From 1890 to 1895 he was secretary to Joseph Derenbourg, and on the death of the latter, in 1895, was appointed by the publication committee of the Alliance Israélite Universelle one of the collaborators to continue the publication of Saadia's works, which Derenbourg had commenced. In 1895 Broydé was appointed librarian to the Alliance Israélite Universelle, which position he resigned in 1900. He then went to London, and during his short stay there catalogued the library of Elkan Adler. The same year he went to New York and joined the editorial staff of the JEWISH ENCYCLOPEDIA.

Broydé is the author of the following works: "Résumé des Réflexions sur l'Âme de Bahya ben Joseph ibn Pakuda," Paris, 1894; "Torat ha-Nefesh": "Réflexions sur l'Âme de Bahya ben Joseph ibn Pakuda," translated from the Arabic into Hebrew, with notes and an introduction, Paris, 1894; "La Prise de Jérusalem par les Perses, sous Héraclius," Orléans, 1896, translated from an old Arabic manuscript in Count Courret's collection of documents relating to the Crusades. He has also contributed several articles on Jewish subjects to "The Jewish Quarterly Review" and the "Revue des Etudes Juives."

S. F. T. H.

**BRUCHSAL:** City in the grand duchy of Baden. Jews resided here as early as the beginning of the twelfth century. In 1337 the Jews of Bruchsal joined with those of a number of other places in paying an annual tribute of 700 marks (in lieu of the taxes levied) to the bishop of Speyer. They also lent various sums to the bishop, which money was credited against the tribute due. At the time of the Black Death (1348-49) many Jews of Bruchsal were martyred. During the Middle Ages and the Reformation the Jews of Bruchsal suffered in common with their coreligionists throughout Germany. Until the French Revolution the Jewish community numbered only one or two hundred persons; and there were never so many as at the present time (1902), when about 100 families are to be found in the place.

The most famous of the rabbis was David Friedberg of Mosbach, who officiated in Bruchsal from 1857 to 1871.

**BRUCK, ABRAHAM JACOB:** Russian educator; author of works in Hebrew and in Russian; born in the district of Rossienny 1820; died in Yekaterinoslav 1893. He received his education at the yeshibah of Volozhin, but studied Hebrew grammar and the Russian, German, French, and English languages without the aid of a teacher. For many years he was instructor in Hebrew at the government school for Jewish boys in Kherson, and later established a private school for Jewish girls, which the government subsidized. For his zeal as an educator he was awarded a medal by the government. He contributed extensively to Jewish

periodicals, Russian and Hebrew. A Hebrew translation of a French novel by L. Z—ski—which had been published in the "Archives Israélites"—was made by him under the title of "Hatan Damim," Lemberg, 1878. The novel portrays the life of the Jews in Russia.

**BRUCK, JACOB:** Hungarian physician and author; born at Pápa Oct. 20, 1845; died at Budapest 1901; brother of Lajos Bruck. He studied at the gymnasium and at the University of Budapest; and graduated as doctor of medicine in 1870. He began to practise at Budapest in 1874, and in 1875 became consulting physician at the Erzsébet salt-water baths of the city, which position he held till his death in 1901. He was one of the judges at the National Exposition of 1885, and notary of the sanitary department; subsequently he was appointed a member of the National Sanitary Council. He was also a member of the committee of arrangements for the Millennial Exposition of 1896. His literary works, principally on the treatment of female diseases and hydrophobia, appeared in the medical journals "Gyógyászat," "Fürdői Lapok," and "Pester Medicinische Presse," of which last-mentioned publication Bruck was for a time editor.

M. W.

**BRUCK, JULIUS:** German dentist and writer on dentistry; born at Breslau Oct. 6, 1840; died there, April 20, 1902. He studied dentistry and medicine at the universities of Breslau, Berlin, Bonn, and Paris; receiving his diploma as dentist from Berlin in 1858, and as doctor of medicine from Breslau University in 1866. In 1859 he became assistant to his father, Dr. Jonas Bruck, a dentist in Breslau, and succeeded him in his practise. In 1871 he was admitted to the medical faculty of the Breslau University as privat-docent, receiving the honorary title of professor in 1891.

Bruck is the author of: "Die Krankheiten des Zahnfleisches"; "Beiträge zur Pathologie und Histologie der Zahnpulpa"; "Ueber Angeborene und Erworbene Defekte des Gesichts und des Kiefers"; "Das Urethroskop und Stomatoscop Durch Galvanisches Glühlicht."

**BRUCK, LAJOS:** Hungarian painter; born at Pápa, county of Veszprim, Nov., 1846. Though his father intended him for commercial life, he early showed a liking for drawing and painting, and resolved to become an artist. He frequented the Academy of Art in Vienna, and made portraits in private; this latter occupation absorbing his time to such an extent that often he had to miss the lectures and go to Budapest and Erlau in order to complete the portraits which had been ordered. In 1871, after having received a stipend from the government, he went to Italy to study the masterpieces of art. He remained two years in Venice, and then

proceeded to Rome and Naples, everywhere producing a large number of sketches and studies. An outcome of this journey was the picture with which in 1873 he first came before the public. "The Rialto at Venice." On his return from Italy he completed his sketches, but succeeded in finding only a single patron, General Türri, who purchased three of his pictures. As a consequence he undertook another pilgrimage, visiting the cities of Salzburg, Munich, Angsburg, Heidelberg, Cologne, Rotterdam, Amsterdam, Antwerp, Brussels, Ostend, and London.

In 1874 he went to Paris, where he was subjected to many struggles, his German style not appealing to the French taste. Hitherto his style had inclined to idealism and sentimentalism, while Paris demanded the forceful representation of actual life. His first notable painting, "On the Edge of the Wood," was exhibited in the Salon in 1876. This was followed by "The Departure for the City"—exhibited at the Salon, 1877—which made him widely known. Since that time he has been a regular annual exhibitor of pictures treating of Hungarian folk-life, such as "The Letter from the Absent One," "Deserted," "The Emigrant," and "In the Forge." These pictures have become widely known through engravings and photographs, which have found many purchasers in America. Bruck recently removed from Paris to London, where he ranks among the most popular painters.

**BRUCK, MAX (Miksa)**: Hungarian painter; born at Budapest 1863; a brother of Lajos Bruck. He graduated from the schools of his native city, and when still a pupil at the Realschule showed a predilection for drawing. He continued his studies at the National Academy of Design, where he occupied himself with wood-carving. In 1880 he accompanied his brother to Paris, where he remained for several years. He also spent three years in Munich. On his return to Budapest he entered Benczúr's School of Arts, and is to-day professor at the Academy of Painting. His best-known pictures are "Zwei Liebespaare," "Nach Hause," "Im Walde" (which are at the imperial castle at Vienna); "Bis Wir Alt Werden" (in the imperial castle at Budapest); "Am Rande der Theiss," "Das Gänsemädchen."

**BRUCK, MOSES**: Hungarian theological writer; born about 1812 in Prerau, Moravia; died in 1849. He studied at Prague, and, as he could find no position as tutor in Moravia, went to Hungary. On the outbreak of the Revolution of 1848 he enlisted in Gross-Beeskerek on the side of Hungarian independence, became a Honvéd officer, died at Hód-Mező-Vásárhely, and was buried with full military honors in the Jewish cemetery there.

Bruck was one of the most enthusiastic supporters of the Reform movement, and was among the pioneers of modern Jewish theological literature. He wrote "Die Reform des Judenthums"; but especially his "Rabbinische Ceremonialgebräuche" and "Phari-

säische Volkssitten und Ritualien" are of great value to the student of Jewish customs and practices, and were favorably criticized by Geiger ("Wissenschaftliche Zeitschrift," iii. 426) and Fürst ("Allg. Zeit. des Judenthums," i. 324), and were widely read.

s.

L. V.

**BRÜCK, SOLOMON B. HAYYIM**: Austrian Hebraist; born in the latter part of the eighteenth century; died about 1846. He is the author of "Hakirat ha-Emet" (Altona, 1839; 2d ed., Vienna, 1842), a volume of collectanea, including in the first edition a sermon which he delivered in England in the English language, and which was excluded by the Austrian censor from the second edition. His other work, "Hezyone Layil," was published posthumously by his son, Isaac Levi Brück (born 1817), a veteran of the Italian wars under Radetzky. In a German preface which he appended to his father's work, Isaac Levi tells his own interesting biography and his experiences with Samuel David Luzzatto while he was stationed at Padua. The work consists of a series of imaginary dream-visits to the other world, in which the manners and conduct of certain classes are severely criticized.

**BRUCKMAN, HENRIETTA (née Kahn)**: Founder of the first Jewish women's lodge in America; born in Bohemia April, 1810; died in New York city April, 1888. She married Dr. Philip Bruckman, and, about the year 1842, came with him to the United States, settling in New York city. Dr. Bruckman and his wife did much to assist their fellow-countrymen who emigrated to New York, the former winning the sobriquet of "Der Böh-mische Vater."

Mrs. Bruckman conceived the idea of organizing a women's lodge and broached the subject to several ladies of the Congregation Emanu-El. An informal meeting was held at her house in 1846, resulting in the foundation, on April 21 of that year, of the "Unabhängiger Orden Treuer Schwestern" (Independent Order of True Sisters), a secret benevolent society.

**ERUHL, LUCIEN LEVY**. See LEVY-BRUHL.

**BRUHL, L. S.** See LEVY-BRUHL.

**BRÜLL, ADOLF**: German writer and theologian; born in Kojetein, Moravia, April 27, 1846; son of Rabbi Jakob Brüll. He was educated at Kremsier and at the universities of Vienna, Prague, and Breslau, and received his theological training at the Jewish Theological Seminary at the last-named city. In 1871 he received a call as teacher at the Philanthropin in Frankfort-on-the-Main. Here he founded (1879) the Mendelssohn Society and edits the "Populär-Wissenschaftliche Monatsblätter."

He is the author of "Fremdsprachliche Redensarten und Ausdrücklich als Fremdsprachlich Bezeich-

nete Wörter in den Talmuden und Midraschim," Leipsic, 1869; "Trachten der Juden im Nachbiblischen Alterthume," part i., Frankfort-on-the-Main, 1873; "Das Samaritanische Targum zum Pentateuch, zum Ersten Male in Hebräischer Quadratschrift Nebst einem Anhange Textkritischen Inhaltes Herausgegeben," *ib.* 1875; "Zur Geschichte und Literatur der Samaritaner," *ib.* 1876; "Beiträge zur Kenntniss der Jüdisch-Deutschen Literatur," in Brüll's "Jahrbücher," 1877, iii. S.

**BRÜLL, IGNAZ:** Austrian composer; born at Prossnitz, Moravia, Nov. 7, 1846. In 1848 his parents removed to Vienna, where he became a pupil of Epstein (piano-

*Ignaz Brüll*

forte), Rnfinatscha (composition), and Dessoff (instrumentation). In 1861 Epstein played with great success a pianoforte-concerto composed by his youthful pupil. After giving pianoforte-recitals at Vienna, at which he played principally his own compositions, Brüll made extensive tours through Germany and England. An orchestral serenade of his, performed at Stuttgart in 1864, served to spread his fame, and in 1872 he was appointed professor at the Horak Institute, Vienna.

Brüll's first opera, "Der Bettler von Samarkand" (1864), was never played; but the second, "Das Goldene Kreuz" (Berlin, 1875), rapidly became very popular in Germany and abroad. At its first performance at the Imperial Opera House in Berlin, the emperor, William I., personally complimented the composer on his success. The opera was also given in English by the Carl Rosa Company, and was very favorably received in London. It was followed by "Der Landfriede" (Vienna, 1877); "Bianca" (Dresden, 1879); "Königin Mariette" (Munich, 1883); "Das Steinerne Herz" (Prague, 1888); "Gringoire" (one act, Munich, 1892); "Schach dem König" (Munich, 1893); and a two-act comic opera, "Der Hussar" (Vienna, March 2, 1898), a work which has met with great success. The other compositions of Brüll include: "Im Walde"; "Jagd-Ouverture für Orchester"; 3 orchestral serenades; overture to "Macbeth"; a dance-suite for orchestra; 2 pianoforte-concertos; a violin-concerto; a suite and 3 sonatas for piano and violin; a trio; a sonata for violoncello and pianoforte; a sonata for two pianos; songs, part-songs, and pianoforte pieces.

Brüll is one of the ablest and most diligent composers of the present day; he has exercised a most wholesome and fruitful influence upon every de-

partment of composition in which he has been active. In his chamber-music he reveals the influence of Schumann and Mendelssohn, but finds in the field of opera a wider scope for his inventive powers. "Das Goldene Kreuz" to-day occupies a position unapproached by any other modern production in the field of popular German opera, not excepting Nessler's "Trompeter von Säckingen." Brüll is an excellent pianist, and has especially distinguished himself as an interpreter of the compositions of Brahms, with whom he was on terms of intimate friendship.

J. So.

**BRÜLL, JAKOB:** Austrian Talmudist and author; born at Neu-Raussnitz, Moravia, Nov. 16, 1812; died at Kojetein Nov. 29, 1869. He attended the yeshibot of Bonyhad, Presburg, and Budapest. After serving as assistant rabbi in his native city, he was elected rabbi at Kojetein (1843), where he remained till his death. Among his pupils were his two sons, Nehemiah and Adolf Brüll, as well as David Kaufmann.

Brüll wrote "Forschungen über Targumim und Midraschim" (1852); "Die Mnemonik des Talmud" (1864); "Mebo ha-Mishnah" (2 vols., 1876, 1885); and a week before his death he published "Ben Zequnim" (A Child of Old Age). He contributed to Löw's "Ben Chananja" and Weiss's "Bet-Talmud." His writings are characterized by extensive learning and critical insight. S.

Jakob Brüll.

**BRÜLL, NEHEMIAH:** Rabbi and scholar of varied attainments; born March 16, 1843, at Neu-Raussnitz, Moravia; died Feb. 5, 1891, at Frankfort-on-the-Main. Brüll received his rabbinic-Talmudic education from his father, Jakob, who combined wide Talmudic knowledge with acute historical perception. He then studied classical and Oriental languages and history at the University of Vienna, having at the same time a good opportunity to continue his Talmudic studies at the Vienna bet ha-Midrash, then under the direction of men like I. H. Weiss, M. Friedmann, and Adolf Jellinek. Here, too, Brüll, the son of a conservative rabbi, and the grandson of the arch-Orthodox chief rabbi of Moravia, Nahum Trebitsch, developed into a decided Reformer and a disciple of Geiger.

Brüll was called as rabbi to Bisenz, one of the Reform communities of Moravia, an office that he resigned in 1870 in order to take charge of the rabbinate

of Frankfort-on-the-Main. He owed this appointment to Abraham Geiger, who drew the attention of his native community to the young Moravian rabbi. Brüll remained with this ancient community until his death, although his position was fraught with disappointment. As a result of the movement inaugurated by S. R. Hirsch at Frankfort, even the circles that were not Orthodox tended gradually toward the conservative party. Brüll cared as little for compromise as did his opponent Hirsch. An

Nehemiah Brüll.

enthusiastic representative of the Reform movement, for religious as well as scientific reasons, he was decidedly opposed to any attempts at reconciliation between Reform and Orthodoxy. Yet he was not the man to influence the masses: his sermons, less effective from the pulpit, had to be read in order to be appreciated. Not until he saw that all his efforts were in vain, and he had been personally attacked (compare FRANKFORT-ON-THE-MAIN), did he retire to devote himself to his studies, greatly to the honor and advantage of Jewish learning.

Brüll's researches ranged over almost all the branches of Jewish science, including Bible exegesis and grammar, Jewish history and literature, the Apocrypha, Biblical Halakah, casuistics, responsa,

general history, philology, poetry, Jewish-German literature; and he contributed to all these by original investigation. No less a man than Adolf Jellinek says of Brüll: "His range of reading in Jewish literature was hardly

paralleled, and he evinced a peculiar acumen found in no other scholar of modern times" (in Adolf Brüll's "Monatsblätter," xi. 50). Brüll collected the results of his scholarship in the ten volumes of his "Jahrbücher" (Frankfort-on-the-Main, 1874-90). He contributed almost the entire material to these "Jahrbücher"—the longer and shorter essays as well as the numerous criticisms on new books. Many of these essays have also been printed separately. Following is a list of the more important of them, arranged according to subjects—Bible: "Beiträge zur Erklärung des Buches Hosea" ("Jahrb." v.-vi. 1-62); "Historische Basis des Buches Ruth" (v.-vi. 63-70); "Das Apokryphische Susannahbuch" (iii. 1-69); "Die Epistolischen Apokryphen und die Apokryphischen Zusätze zum Buche Daniel." Talmud: "Die Talmudischen Tractate über Trauer und Verstorbene" (i. 1-57); "Fremdsprachliche Wörter in den Talmuden und Midraschim" (i. 123-210); "Die Entstehungsgeschichte des Babylonischen Talmuds als Schriftwerkes" (ii. 1-123); "Verschollene Baraitas und Midraschim" (ii. 124-133); "Entstehung und Ursprünglicher Inhalt des Tractates Abot" (vii. 1-17); "Eingeschaltete Partien im Babylonischen

Talmud" (viii. 59-60). History: "Adiabene" (i. 58-86); "Das Geschlecht der Treves" (i. 87-122); "Die Polemik für und gegen Maimuni im Dreizehnten Jahrhundert" (iv. 1-33); "Zur Gesch. der Jüdisch-Ethischen Literatur des Mittelalters" (v.-vi. 71-93); "Sprüchwörter in der Nachaltmudischen Literatur des Judenthums" (vii. 18-30).

Brüll's extraordinary range of reading and critical insight constituted him an almost unexcelled reviewer of new books in the field of Jewish science. His "Jahrbücher" contain 183 reviews, all of which illuminate more or less the subjects with which they deal. In 1890 Brüll undertook a continuation of the "Hebräische Bibliographie," edited by Steinschneider, under the title "Central-Anzeiger

**Bibliographical Works.** für Jüdische Literatur"; but only one volume appeared (Frankfort-on-the-Main, 1891), as the undertaking was cut short by Brüll's death. At the

instance of Steinschneider, the Zanz-Stiftung had commissioned Brüll to add a supplement to Zanz's "Gottesdienstliche Vorträge," the basic work of modern Jewish science. Steinschneider remarked in his preface to the second edition of the work in question (xvi.): "Dr. Brüll appeared to me to possess the rare combination of ability and leisure, zeal and perseverance, requisite for editing such a supplement." Brüll had intended to devote his whole scholarship to this undertaking. The scattered notes that were found in his papers after his death were in part incorporated in the second edition of the "Gottesdienstliche Vorträge" (ib. 1892). Brüll was among the few German scholars who also wrote in Hebrew, as may be seen by his many contributions to the Hebrew periodicals "Bet-Talmud," "Bet ha-Midrash," "Ha-Karmel," and "Ozar ha-Sifrut." Of these, "Toledot Shabbethai Zebi" (Wilna, 1879) and "Ner ha-Ma'or," a biography of Aaron Worms, in "Ozar ha-Sifrut," ii. 20-31, deserve special mention. Brüll also printed his sermons (1869) and addresses (1878). "Grabreden" (Frankfort-on-the-Main, 1895) and "Tranungsreden" (ib. 1891) were published posthumously.

**BRUNA, ISRAEL.** See ISRAEL BEN HAYYIM OF BRÜNN.

**BRUNETTI, ANGELO** (better known as **Cicirucchio**): Popular Roman leader, and advocate of the emancipation of the Jews; born in Rome 1800; died there Aug. 10, 1849. Inspired by the patriot Mazzini, Brunetti labored not only for the deliverance of his native city, but also for the unhappy inhabitants of the Roman ghetto. He utilized the great influence he had gained during the prerevolutionary epoch, in effecting a reconciliation between the Jews and their Christian fellow-citizens. On July 8, 1847, he won over the inhabitants of Regola, a suburb of Rome, and a week later an immense mass-meeting in favor of the Jews was held in the capital itself. On the evening of that meeting (July 15) 6,000 Roman citizens went to the ghetto and fraternized enthusiastically with its inhabitants. When on April 17, 1848 (the first day of Pesah), the

order of Pius IX. to tear down the walls of the ghetto was made public, Ciciruaocchio hastened thither with a large number of his friends, and they were the first to begin the work of demolition. In the following year Ciciruaocchio, together with two of his sons, was killed in a riot in the streets of Rome. The Jewish congregation of Rome erected in its council-room a tablet to his memory, with an inscription recording his great services in the emancipation of the Jews of Rome.

**BRÜNN:** Capital of Moravia. At the instigation of Capistrano, the Jews were expelled from Brünn July 27, 1451, by King Ladislaus, the posthumous son of the fanatical Albrecht II. Among the exiles was Israel Bruna, author of a well-known set of responsa, and recognized as the greatest Talmudic authority of his time. Not until the beginning of the nineteenth century did the Jews attempt to found a new community. In obedience to a royal decree of Sept. 5, 1811, they paid 50 florins a year, and 12 florins into the poor fund, for permission to have a small Torah (law-scroll) in their possession. David Ashkenazi, whose son, Joel Deutsch, was director of the institute for deaf-mutes, officiated as rabbi, although he was only allowed to assume the title of meat-inspector. In 1852 the Jews were permitted to lay out a cemetery, and in 1853 to build a synagogue. The statutes of a religious society formed in 1853 were provisionally confirmed Sept. 1 of that year; but not until Feb. 7, 1859, did the ministry give permission to organize a provisional religious community. On March 15, 1860, all the Jews living at Brünn were released from paying the communal dues of their several communities, and on Nov. 7 of the same year the protest of the district community against this decree, that injured it in its finances, was refused. Dr. B. Placzek, who was chosen rabbi in the same year, was appointed district rabbi by the ministry May 5, 1885.

The Jewish-Moravian orphan asylum and the pro-seminary are at Brünn; the city is the center for the Moravian general fund ("Landesmassenfonds") derived from the excise. This fund, which had been used for Jewish educational purposes since the time of Joseph II., was handed over to the management of the Jews of Moravia by Emperor Francis Joseph I. Sept. 28, 1869.

A. F.-G.

**BRUNNER, ARNOLD WILLIAM:** American architect; the son of William Brunner and Isabelle Solomon; was born in New York city Sept. 25, 1857. He was educated in Manchester, England, and in New York, and is a graduate of the special architectural course in the Massachusetts Institute of Technology. Brunner was one of the founders of the Architectural League of New York (1881), is a member and vice-president (1898) of the New York Chapter of the American Institute of Architects, a fellow of the Institute, and (1902) a member of the Board of Education of New York city. He

has designed and erected many buildings, notably the new United States post-office, custom-house, and court-house at Cleveland, Ohio, won in competition. He was also the architect of the Temple Beth-El, the synagogues of the congregations Shearith Israel and Shaaray Tefila, the Educational Alliance Building, the Mt. Sinai Hospital, the Clara de Hirsch Home for Working Girls, the Jewish Theological Seminary of America, all in New York, and of the Temple Mishkan Israel at New Haven, Conn., and the Frank Memorial Synagogue at Philadelphia.

Brunner has written a work on "Cottages," another on "Interior Decoration," and is a contributor to the "Encyclopedia of Architecture," edited by Russell Sturgis. A.

**BRUNNER, SEBASTIAN:** Austrian Catholic theologian, editor, and anti-Jewish writer; born Dec. 10, 1814, in Vienna; died in Währing, near Vienna, Nov. 26, 1893. He was ordained as priest in 1838, and after officiating in various parts of the diocese of Vienna, was employed by Metternich (1843-48) in arranging all reports on religious and political movements that came into the minister's office. In 1846 he was sent by the chancellor to France and Germany to report the situation in those countries.

Brunner founded in 1848 the "Wiener Katholische Kirchenzeitung," which he edited until 1865, making himself notorious by his rabid attacks in its columns on Jews and Judaism. Citing the actions of David and Elijah, he insisted that the Old Testament was permeated by a spirit of vindictiveness, and for this reason he maintained that the Jewish morals endangered those of the Christian neighbors of Jews ("Kirchenzeitung," 1860, p. 12). For a long time the Jews ignored his denunciations; but finally, in 1860, Ignaz Kuranda, editor and publisher of the "Ostdeutsche Post," took up the cause of his coreligionists, calling attention to the fact (Jan. 28, 1860) that Brunner's attacks were for the most part mere repetitions of the charges made by Eisenmenger and Pfefferkorn, and that, moreover, they were undertaken by Brunner not in a spirit of zeal for the Church, but in the hope of increasing the circulation of his paper.

Brunner sued Kuranda for libel April 27, 1860; but on trial the latter was acquitted as having sustained every item of his charges against Brunner, who in addition was severely rebuked by the presiding judge for conduct unbecoming a priest. The importance which the Jews attached to the result of the trial may be seen from the fact that a stenographic account of its proceedings was printed in pamphlet form in both Hebrew and German for the purpose of commemorating Kuranda's victory over Brunner.

Brunner held several high offices in the Catholic Church.

**BRUNSWICH, LÉON LÉVY** (known as **Lhérie**): French dramatist; born at Paris April 20, 1805; died at Havre April 29, 1859. Favorite

collaborator of Ad. de Leuven, he wrote together with him, as well as with Dumersan, Dupeuty de Beauplan, etc., many vaudevilles and comic operas, among which were: "Gothon du Passage Delorme," 1831, a parody on Victor Hugo's "Marion Delorme"; "Faublas," 1833; "Le Postillon de Longjumeau," 1837; "Le Brasseur de Preston," 1838, the last two set to music by Adolphe Adam; "Le Mariage du Tambour," 1843; "Gibby la Cornemuse," 1847, to the music of Clapisson; "La Foire aux Idées," 1849; "Le Roi des Halles," 1853; "Dans les Vignes," 1856.

**BRUNSWICK** (German, **Braunschweig**): Duchy of Germany, the capital of which has the same name. The first settlement of Jews in the duchy was at Blankenburg; for a record states that in 1241 the abbess of Quedlinburg owed Jacob, a Jew, probably the first one in Brunswick, 213 pounds of silver; some of the lands of the nunnery were sold to extinguish this debt. At another time a payment of eighty pounds of silver between the same parties is mentioned. In 1247, Jews were settled at Helmstedt. The abbot of Verden was their lord. At the time of the Black Death in 1349, the Jews of Brunswick were persecuted; and in 1540, by reason of Martin Luther's polemics, anti-Jewish outbreaks occurred. In the eighteenth century Israel Jacobson, a noted Jewish financier, lived in Brunswick. Mendelssohn often visited the ducal family, with which he was on intimate terms.

The Jews at the beginning of the nineteenth century were barely tolerated in Brunswick. However, their condition was gradually ameliorated; for, by the laws of Oct. 29, 1821, Jews were permitted to become apprentices in all trades. On dissolving the Chambers July 11, 1823, the duke of Brunswick announced that steps to relieve Jews of their disabilities were contemplated. Again, in 1831, the Jews petitioned Duke William of Brunswick to change the laws affecting them. As the Jews had always fulfilled their duties as citizens, they demanded to be admitted to full privileges as such. This petition was unsuccessful.

On Oct. 12, 1832, measures for the relief of the Jews were passed. It was enacted that those who had the legal right to reside in Brunswick were to be regarded as inhabitants and native residents. It was ordained that right of residence did not depend on religious convictions, but rather on the possession of some means, or of freedom from criminal acts. The Jews were allowed to vote for and act as deputies and as minor officials. As late as 1820 these rights were exclusively enjoyed by the Christians. It is to be noted that in 1833 the director of the Samson Free School in Wolfenbüttel was a candidate for the office of deputy and was defeated by one vote. The Jews had, however, no extensive property rights; for they could buy land only with the permission of the government. They were permitted to act as attorneys, but not as procurators or notaries.

In 1843 and 1844, through the "Allg. Zeit. des Judenthums," Ludwig Philippson summoned a rab-

binical conference for the discussion of questions affecting Judaism, to meet at Brunswick early in 1844. The sessions lasted from June 12 to June 19, and were attended by twenty-two, and later by twenty-five rabbis, who worked to improve the Jewish ritual and to preserve the religious instinct in the Jews themselves. One of the results of the conference, which drew attention to the position of the Jews, was the repeal of the Jews' oath, "More Judaico," May 16, 1845. In 1850 permission was granted to Jews to become officers in the army and to marry Christians without first being baptized.

At the beginning of the nineteenth century S. L. Eger was rabbi in Brunswick. In 1840 Dr. Herzfeld was the rabbi, the government having full power to appoint.

In the duchy two famous institutions now flourish: (1) the Samson Free School at Wolfenbüttel, mentioned above, founded in 1733 by Gumpel Moses (also known as Marcus Gumpel Moses Fulda), the first Jewish resident of Wolfenbüttel; and (2) the Jacobson Free School and Asylum at Sesen, of which Immanuel Wohlwill was superintendent in 1838.

In 1840 the Jews of Brunswick numbered 1,300. The latest figures give 2,000 Jewish residents in the duchy.

**BRUSA**: City of Anatolia, 54 miles from Constantinople and 21 miles from the port of Moudania. According to some chroniclers, the Jews of Brusa were the first to enter into relations with the Ottoman Turks and to come under their dominion. According to others, Sultan Urkhan, on capturing Brusa (1326), drove out all the inhabitants, and, in order to repeople it, imported Jews from Damascus, Aleppo, and other places in the Byzantine empire. Hence Brusa was the first Jewish community of Turkey. Sultan Urkhan, in consideration of a poll-tax called "kharaj," granted to the Jews a firman authorizing them to live in a special quarter (Yahudi-Mahalesi), to build a synagogue there (that of 'Ez Hayyim), and to have a chief rabbi. The Jewish magistrates ("memunnim"), popularly called "kharajros," receivers of the kharaj or tax, collected this tax and delivered it to the governor, under oath upon the roll of the Law.

According to the historian Ubcini, persecutions obliged Spanish Jews to leave their country in 1415.

"When they arrived at Brusa, the historical beauty of this Oriental city, the freshness of its waters, the multitude of its palaces and gardens that reminded them of Granada and Andalusia, induced them to settle here." Upon the great expulsion of 1492 other Spanish Jews settled in Brusa, and founded two new synagogues named, respectively, "Qahal Qadosh Mayor" and "Qahal Qadosh Gerushah."

Toward the end of the sixteenth century and at the beginning of the seventeenth there existed in

Brusa an important yeshibah, from which proceeded the well-known family of rabbis ALGAZI or Al-Gâzi. At this time Solomon Algazi I., "the Elder," author of thirteen rabbinical works; his brother Moses Algazi, also an author; and Joseph Gansou (1628), teacher of the Algazis, flourished here. As one of the remarkable events of the period 1600-1800 a conflagration is reported toward the end of the eighteenth century that destroyed half the city as well as the Jewish quarter. The rabbis of Brusa during the nineteenth century have been, in chronological order: Abraham Shilton; his son Elijah Shilton; David Carasso from Salonica; Abraham Habib from Bosnia; Rab Shabbethai Halévy, brother of the grand rabbi Moses Halévy of Constantinople; a rabbi from Ismid; and R. Uzziel from Constantinople.

The older Jews of Brusa tell the following legend: At the end of the eighteenth century a learned rabbi came incognito to that city from Salonica.

**Legend.** He fell ill, and died almost immediately upon his arrival, and was buried like any ordinary man. But a strange light was seen to hover over his grave for several nights in succession, which greatly excited the community. Upon inquiry it was learned that the stranger was a very pious and learned rabbi, Rab Segalia by name; and the people then decided to render him the last honors due to his position, by erecting a fine tombstone over his grave. The stone, accordingly, was placed on the mound. The next morning, however, it was found thrown down some distance away. It was restored, but again mysteriously removed overnight, and now the people no longer dared to replace it. At this tomb of Rab Segalia the people were wont to pray for rain in times of drought. Every trace of the tomb has now disappeared, owing to the construction of a road to the railway station.

In 1901 the Jewish population of Brusa numbered 3,500 in a total of 100,000 inhabitants. The community possesses three very handsome synagogues, belonging to the congregations 'Ez Hayyim, Mayor, and Gerushah. Of Jewish antiquities, there is in the synagogue 'Ez Hayyim a scroll of the Law more than 160 years old; and

**Population and Institutions.** in that of the Gerushah congregation a unique old "rimmon" (a silver pomegranate forming part of the ornaments of the Torah scroll; the mate of this rimmon was stolen), dating back to the first half of the eighteenth century; and the Shilton family possesses some old manuscripts written by rabbis of that name. The notable families of Brusa are: Baraza, Caraco, Shilton, Franco, Saban, and Sévilla.

The Brusa community has the following philanthropic societies: Haknasat Oraḥim, 'Ozer Dallim, Bikḥur Holim, 'Ose Hessed. The Jews of Brusa are very benevolent, and visit the poor in their own homes. There is not a single beggar in the city.

In 1901 there were four hundred Jewish pupils—namely, one hundred and twenty-eight boys and seventy-two girls—in the two schools supported by the Alliance Israélite Universelle, and two hundred in the Talmud Torah.

The chief rabbi of Brusa in 1901 was David Pappo of Constantinople. This official presides at the communal council elected by the notables of the city. The revenues of this council consist of taxes upon meat and wine and the rent of some real estate (a bath, an oven, and some shops). As formerly, the Jews still pay to the government a tax for exemption from military duty, called "bédèle." When the notables are short of funds and unable to pay this tax, the communal council draws upon the treasury of the three synagogues. These are governed by syndics ("gabba'im").

As a matter of fact the majority of the Jews are generally poor. Among them are two or three merchants, about fifteen money-changers, and a large number of small shopkeepers, peddlers, and dealers in tinware. Although the silk industry is a specialty there, no Jews are engaged in it, beyond some two hundred Jewish women working as operatives in the mills. The Alliance Israélite maintains at Brusa a system for apprenticing boys as carpenters, blacksmiths, tinsmiths, compositors, and for teaching girls to weave. Some young Jews occupy subordinate positions in European business houses and banks established at Brusa. No Jews are employed by the government, nor are any engaged in the professions.

In the neighborhood of Brusa there are some places containing a small number of Jews originally from Brusa, as Climasti-Cassaba, Yeni-Yol, Yeni-Shehir, Eski-Shehir, and Yeumlek.

**BRUSILOV:** Town in the government of Kiev, Russia, with a Jewish population (1898) of 2,800, in a total of 6,500. Of the 541 Jewish artisans, 112 are tailors and 206 tanners. About eighty families receive alms at Passover. There is a Talmud Torah, attended by more than one hundred children. Brusilov has also twenty-two private schools, a hospital, a poorhouse, and a "Gemilut Hessed" (society for lending money without interest).

S. J.

**BRUSSELS** (French, **Bruxelles**): Capital of Belgium. There are no records as to the date when Jews first settled in Brussels; but as many of them were scattered over the province of Brabant at the time of the Romans, it may be assumed that they established themselves at Brussels as soon as it was founded by St. Gery, bishop of Cambray, in the seventh century. The Jews of Brussels underwent all the vicissitudes of their Belgian coreligionists. The Crusaders left many sanguinary traces of their passage at Brussels. During the thirteenth century and at the beginning of the fourteenth the Jews of Brussels, protected by the subsequent rulers, attained, in common with those of other communities of Brabant, a high degree of prosperity. The calamities which culminated in the massacre and banishment of the Jews of Brussels in 1370 began with the spreading of the Black Death throughout Europe. A chronicler of that time, Li Muisis, gives an account of this tragedy, for which see BELGIUM.

Sale of the Host.

Jews Dragged to Prison.

HOST-TRAGEDY AT BRUSSELS, 1370.

(From "Histoire des Hosties Miraculeuses," 1770, after the Gobelin Tapestries in the Cathedral of St. Gudule, Brussels.)

Martyrdom of the Jews.

This catastrophe, which took place in 1349, was followed twenty-two years later by a similar one. A banker of Enghien, distinguished by his wealth as well as by his philanthropy, was assassinated in his own garden. His wife and son took refuge in Brussels. The assassins spread the report that the Jews had stolen from a church consecrated wafers in order to pierce them with poniards. This brought about the burning of hundreds of Jews at Brussels (May 22, 1370) and a general banishment from Belgium. The event is known locally as the miracle of St. Gudule, and was commemorated by an annual festival. Eighteen tableaux, which represented the piercing of the host and the miracle of the spurting of the blood, were painted; and these paintings are still preserved in the Church of St. Gudule. On the Jewish side, the martyrs of Brussels were commemorated in the

"Memorbuch" of Mayence and in a Hebrew elegy.

From 1370 till the end of the Spanish domination over Belgium, there is no trace of Jews at Brussels. Their reappearance there dated probably from the Peace of Utrecht (April 11, 1713), when Belgium became part of Austria. A decree banishing Jews from Brussels was issued July 18, 1716;

**After the  
Peace of  
Utrecht.**

but it was not enforced; a gift to the crown overcame all difficulties. A similar decree issued forty years later had the same result. Several Jews received the right of citizenship in Brussels. Among them was one named Philip Nathan, who, in 1783, requested the government to assign a place for a new

cemetery for the Jews; the old one, situated near the Porte de Namur, having disappeared in consequence of the dismantling of the fortress.

Many families of position from Germany and Holland, such as the Landaus, the Lipmanns, the Fürths, the Hirschs, and the Simons, settled in Brussels. The Jews were still subjected to special imposts. It was only after 1794, when the French became masters of Belgium, that Jews could settle freely in Brussels and enjoy the rights of citizenship. An imperial edict dated March 17, 1808, divided the Jews living in French countries into consistories. Brussels was included in the consistory of Crefeld. On the overthrow of Napoleon, Belgium was united with Holland; and the Jewish community of Brussels became the head of the fourteenth religious district of Holland. After the revolution of 1830 Brussels became the head of the Belgian

Jews Represented as Transfixing Hosts.

(After the Gobelin Tapestries in the Cathedral of St. Gudule, Brussels.)

consistories, and a chief rabbi was nominated. The chief rabbis have been: E. Carmoly, Henri Loeb, Aristide Astruc, Abraham Dreyfus, and the present (1902) rabbi, Armand Bloch. The government contributes largely to the support of Jewish worship. In 1890, according to the official statistics, Brussels had 150 registered Jewish households.

Brussels has the following Jewish communal institutions: Société de Bienfaisance Israélite, Société des Secours Efficaces (Dames), Société des Mères Israélites et Ecole Gardienne, Orphelinat, Comité d'Apprentissage de la Jeunesse Israélite, Maison de Retraite pour les Vieillards, Hakeneset Kallah, Cercle des Amis Israélites, l'Egalité (mutual aid), and Ménahelem Abélim.

I. BR.

**BRUTISH** (בער): A term applied by the Biblical writers to men whose disposition or spirit was like that of beasts. It is used in close conjunction with "foolish" (Jer. x. 8; Ps. xlix. 10, xciv. 8), and, as indicated in the Hebrew, may mean "stupid." In a few instances it seems to indicate that the persons under consideration are both ignorant and reckless (Jer. x. 14, li. 17; Ps. lxxiii. 22, xcii. 6). Again, brutishness, or beastlikeness, implies not a passive but an actively dangerous quality of character (Ezek. xxi. 31). The man who is persistently ignorant is also called "brutish" (Prov. xii. 1). The prophets who did not call upon the Lord, to inquire of Him, were included in the same category (compare Jer. x. 21). To sum up, "brutishness" in the Old Testament is descriptive of a foolish, stupid, recklessly and persistently ignorant, and dangerous man.

J. JR.

I. M. P.

**BRUTZKUS, JUDAH LOEB BEN DAVID:** Russian writer; born 1870 at Polangen, in the government of Courland; studied at the gymnasium and University of Moscow, from which city his family was expelled in 1892. He received his diploma as physician in 1894. Brutzkus took part in the Russo-Jewish bibliographical work, "*Sistimaticheski Ukazatel Literaturny o Yevreyakh*." Since 1895 he has contributed to the Russo-Jewish periodical "*Voskhod*"; and in 1899 he was appointed assistant editor on that periodical.

H. R.

V. R.

**BRÜX:** Town of Bohemia, 14 miles north of Saaz. Documents prove that, as early as the fourteenth century, Jews were living at Brüt. In 1393 Borso the Younger, of Riesenbourg and Petschau, gave his note for fifty schock of Prague groschen to the Jews Isaac and Asher of Brüt; and similar notes were given in 1394, 1413, and 1419 to the Jews Eberleyn and his wife Esther, Michael and Heyneman, Michael the Larger, and Michael the Smaller. In a document dated Feb. 17, 1456, a Jewish cemetery of Brüt is mentioned, which Frederick, duke of Saxony and margrave of Meissen, gave to a certain Hans Wickart. According to a Latin document, dated June 20, 1464, the king of Bohemia, George Podiebrad, forbade the Jews to reside at Brüt or within a mile of it, for which the city had to pay an annual tribute of six shocks of Prague groschen to indemnify the king for his loss of the Jews' annual toleration tax (*Schutzgeld*). For four hundred years there was no Jewish community at Brüt; in fact, since the sixteenth century Jews were not permitted to live in the mining towns of Bohemia.

Jewish congregations existed in Harreth and Lischnicz (about one hour's distance from Brüt), and these became parents of the congregation of Brüt, which

was founded in 1868. A synagogue was built in 1873, and the cemetery was dedicated in 1878. The prosperity, harmony, and high standing of the congregation are due primarily to its able and public-spirited leader, Joseph Spitz, who took charge in 1885. The following associations may be mentioned: The Hebrah Qaddishah, the Hebrew Women's Benevolent Society, and the Kronprinz Rudolf Stiftung for poor wayfarers. There are, besides, the Kaiser Franz Joseph Jubiläums-Stiftung, for poor Hebrew artisans, and a Ludwig Bloch Stiftung. A pension fund for the Jewish clergy is to be founded. Adam Sattler, for many years religious instructor in the public schools and at the gymnasium, on being pensioned was decorated with the Golden Cross of Merit. Among the rabbis and religious teachers at the public schools and the gymnasium may be mentioned: Alexander Kisch, 1874-1877; I. S. Bloch, 1877-80, editor of the "*Oesterreichische Wochenschrift*," and at one time a member of the Reichstag; Jacob Tauber, 1880-86; Gotthard Deutsch, 1887-91, later professor in Cincinnati; and, since 1891, Adolf Biach.

The Jewish population of about 1,000—one-twentieth of the entire population—speak German. There are among them 10 lawyers, 5 physicians, and 2 clerks of the court; but the larger number are merchants.

D.

A. Br.

**BRYANSK:** Town in the government of Grodno, Russia, with a Jewish population (1898) of 2,365, in a total population of 6,342. Of the Jews 525 are artisans and 85 gardeners and farmers.

H. R.

S. J.

**BUBER, SOLOMON:** Galician scholar and editor of Hebrew works; born at Lemberg Feb. 2, 1827. His father, Isaiah Abraham Buber, was versed in Talmudic literature and Jewish philosophy, and was Solomon's teacher in the latter subject; but for his son's Biblical and Talmudic studies he carefully selected competent professional teachers. The desire was soon aroused in Solomon to make independent research and to put the result of his work into literary form—a disposition which proved of the utmost value to Jewish literature.

At twenty years of age Buber married and entered commercial pursuits. He rose by rapid degrees until he became "*Handelskammerrath*," and auditor of the Austro-Hungarian bank, the national bank, and the Galician savings-bank. This last position he still (1902) retains. Buber is also president of the "*Geschäftshalle*," vice-president of the free kitchen, and honorary member of a working men's union. For more than a quarter of a century he has been one of the directors of the Lemberg congregation; he is on the committee of the Bernstein foundation, and takes a leading part in various philanthropic associations.

While active in public life, Buber has also devoted himself to learned research. The Midrash literature had special attractions for him; and his activity in this field has been remarkable in extent. Its first result was an edition of the so-called "*Pesikta de-Rab Kahana*," with an elaborate commentary and

**Bio-  
graphical  
Data.**

an introduction which exhaustively discuss all questions pertaining to the history of this old Haggadah collection. The book appeared as a publication of the society known **Midrash Editions.** under the name of "Mekize Nirdamim," Lyck, 1868. Buber's method of dealing with the difficult undertaking was new to scientific literature; and both introduction and commentary received the unstinted praise of the scholarly world. The introduction was translated into German by Aug. Wünsche, and published by him with his translation of the Midrash, Leipsic, 1884.

Other Midrashic works edited on a similar method and scale by Buber are: collectanea from Midrash Abkir, Vienna, 1883; Tobiah b. Eliezer's Midrash Lekah Tob, Wilna, 1884; the original Midrash Tanhuma, Wilna, 1885; collectanea from Midrash Eleh ha-Debarim Zutta, Vienna, 1885; Sifre d'Agadta, short Midrashim on the Book of Esther, Wilna, 1886;

*Solomon Buber*

Midrash Tehillim, Wilna, 1891; Midrash Mishle, Wilna, 1893; Midrash Shemuel, Cracow, 1893; Midrash Agada, an anonymous haggadic commentary on the Pentateuch, Vienna, 1894; Midrash Zutta, on the Song of Solomon, Ruth, Lamentations, and Ecclesiastes, Berlin, 1894; Aggadat Esther, haggadic treatises on the Book of Esther, anonymous, Cracow, 1897; Midrash Ekah Rabbati, Wilna, 1899; Yalk Makiri, on the Psalms, Berdychev, 1899; Menahem b.

Solomon's Midrash Sekel Tob, on the Books of Genesis and Exodus, ii. vol. 2, Berlin, 1900-02. This last work is also published by the society Mekize Nirdamim.

As this array of publications shows, Buber is a prolific writer; yet the scientific quality of his work does not suffer on this account. At the outset he adopted a certain system to which he has consistently adhered. For a determination

**Method as Editor.** himself of all accessible manuscripts and printed works—and everything is accessible to him, as he spares no expense in obtaining copies of manuscripts and the rarest printed editions; he conscientiously records the various readings in foot-notes, and he bestows special care, chiefly in the older Midrashim, on the correction and explanation of words in the text borrowed from the Greek and the Latin. In the introductions, which almost assume the proportions of independent works (the introduction to the Tanhuma embraces 212 pages octavo), everything that bears upon the history of the work under consideration is discussed, and a

compilation is given of the authors or works cited by the Midrash or serving as sources for it, and those which in turn have drawn upon the Midrash. His work is distinguished by thoroughness, and reveals his synthetic ability as well as the vast extent of his reading. The only serious opposition to the views encountered by Buber has been in regard to his theory concerning the Tanhuma.

Buber has distinguished himself in other departments of literature. His first work was a biography of the grammarian Elias Levita, published at Leipsic in 1856. After this he edited the following: "De Lates' Gelehrten-geschichte Sha'are Zion," Jaroslaw, 1885; Zedekiah b. Abraham's liturgic work, "Shibbole ha-Leket," Wilna, 1886; "Peshet Dabar," Saadia's treatise on the Hapax Legomena of the Bible, Przemysl, 1888; Samuel b. Jacob Jama'a's "Agur," introduction and additions to the 'Aruk, Breslau, 1888 (in "Grätz Jubelschrift"); Samuel b. Nissim's commentary on Job, "Ma'yan Gannim," Berlin, 1889; Biurim; Jedaiah Penini's explanations of Midrash Tehillim, Cracow, 1891, and a commentary on Lamentations by Joseph Caro, Breslau, 1901 (in the Kaufmann Gedenkbuch); "Anshe Shem," biographies and epitaphs of the rabbis and heads of academies who lived and worked at Lemberg, covering a period of nearly four hundred years (1500-1890), Cracow, 1895. In these works Buber appears as a philologist and as a careful writer of biographies of scholars, especially of the Jewish scholars of Poland.

Buber's extensive knowledge of Jewish history and literature is also displayed in additions to the works of others and in numerous contributions to Hebrew magazines, such as: "Meged Yerahin," Kobak's "Jeschurun," "Ha-Lebanon," "Ha-Maggid," "Maggid Mishneh," "Ha-'Ibri," "Ha-Meliz," "Ha-Habazelet," "Ha-Karmel," Joseph Kohn's "Ozar Hokimah," "Bet Talmud," "Ha-Shahar," "Ha-Asif," "Keneset Yisrael," "Zion," "Ozar ha-Sifrut," "Ha-Eshkol."

Among the works of his more recent years the following may be mentioned: "Yeri'ot Shelomoh," a supplement to Abraham b. Elijah Wilna's "Rab Po'alin," Warsaw, 1894; a criticism of Yalkut Makhiri, on Isaiah, ed. Sebapira, Cracow, 1895; a criticism of the Pesikta, with an introduction by David Luria (ed. Warsaw, 1893), Cracow, 1895; "Kiryah Nisgabah," on the rabbis in Zolkiev up to the letter 7, published in "Ha-Eshkol," i.-iii., 1898-1900; and his contribution to the "Steinschneider Festschrift," wherein he propounds a new theory concerning the "Petihot" (Introductions) in Midrash Ekah Rabbati.

Buber corresponds on learned subjects with many well-known Jewish scholars. He has proved himself a veritable Maecenas of learning. The cost involved in the publication of his works has usually been borne by him, and he has presented gratuitous copies to libraries and indigent scholars.

H. B.

**BUCHHEIM, CHARLES ADOLPHUS:** Professor of the German language and German literature at King's College, London; born in Moravia

1828; died at London June 4, 1900. He was educated at the University of Vienna, whence he received the degree of Ph.D.; settled in Paris; but after 1852 removed to London, where he lived till his death. In 1863 Buchheim became professor in King's College. He was also examiner in German to the universities of London (1875-90), Oxford, and Cambridge, and at one time was German tutor to the children of the Prince of Wales (afterward King Edward VII.).

Buchheim was the author of several critical works on German writers. He translated several of Dickens's novels into German, and published, through the Clarendon Press, annotated editions of a large number of German classics. In the "Golden Treasury Series" he published the popular "Deutsche Lyrik," 1875; "Balladen und Romanzen," 1891; and Heine's "Lieder und Gedichte," 1897. Of a more scholarly nature is his work "First Principles of the Reformation," which he published, conjointly with the Rev. Dr. Wace, in 1883.

In recognition of his learning and services the University of Oxford in 1898 bestowed on Buchheim the honorary degree of M.A.

**BUCHAREST:** Ancient capital of Wallachia, and the present capital of Rumania. The oldest Jewish tombstone is dated 1682; but Jews settled in the city much earlier. In 1573 a Jew, Isaiah b. Joseph, was secretary to Prince Alexander Mircea. When Michael the Brave rose against Turkey in 1594, all the Jews of Bucharest were massacred. Not much is known of Jews resident here during the seventeenth century, except that they were engaged in commerce and in the manufacture and sale of liquor, while a few practised medicine. Under Constantin Brancovan (1689-1714) a Jew surnamed "Salitriariu" (maker of saltpeter) furnished that prince with the gunpowder needed in the army. The Jews formed a corporation of their own with a "staroste" (provost) at their head, and were restricted to one suburb, as were also the Armenians. In addition to their personal taxes, special assessments were levied upon them as a corporate body, out of all proportion to those imposed on other organizations of the city. In 1695 they were assessed 150 thalers to support the Turkish army in the war against Austria, and 100 thalers for boats.

In 1715 Stephen Cantacuzene ordered the synagogue to be demolished. This led to a riot, during which the Jewish provost was killed. Upon payment of a heavy sum the Jews were permitted to rebuild their synagogue and resume worship. Better times came with the enlightened Prince Nicholas Mavrocordato. This ruler maintained

The most friendly relations with the physician Tobias Cohen of Constantinople, and with Daniel de Fonseca who was physician to the sultan as well as to the French ambassadors at Constantinople, with whom he was on terms of intimate friendship. Nicholas in 1719 established De Fonseca at his court in Bucharest, and lent him his influence. Nicholas also favored Mentech Bally, banker of the

grand vizier, upon whom he conferred valuable privileges.

Under the successors of Mavrocordato the Jews were again more or less persecuted. Michael Racovitza (1730-31 and 1741-44), taught by the loss of his Moldavian throne in consequence of his difficulties with the Jews, did not oppress them more than he did his other subjects. His son Constantine even renewed the privileges of the "haham bashi" of Moldavia, recognizing the latter's authority over the Jews of Wallachia, and granting them the right to have a deputy at Bucharest (1764).

The number of Jews increased after the Austro-Turkish wars, so that it became necessary to open a second synagogue in a central part of the city. Alexander Ghika (1764-66) demolished it upon the advice of the patriarch Ephraim of Jerusalem, who was passing through Bucharest. The Jews opened a new synagogue during the Russian occupation (1769-74), but this also was destroyed by Alexander Ypsilanti (1774-82). Not until 1787 did they receive permission from Peter Mavroyeni (1786-89) to have a new synagogue, on condition that it was located in a distant suburb. During the Russo-Turkish war (1769-74) the Jews suffered from the violence and spoliation of the janizaries. In 1770 they were unexpectedly attacked by the populace; many perished, but the greater number were saved by the boyars. Urged by the need of money, Mavroyeni, though not unfavorably disposed toward the Jews, pressed them hard. On pretense of taxing them, he made the Jewish tailors, furriers, and jewelers of Bucharest work for the Turks, who were then at war with Austria. The plague, which broke out in 1792, under Michel Sutzcu, brought disaster to the merchants already ruined by the Austrian occupation (1789-91). The distilleries, which were mostly owned by the Jews, were also closed.

Alexander Moruzi (1793-96) closed the synagogue which had been opened in 1790 in the center of the city, and punished the Jews who had defended themselves against their oppressors. Encouraged by the attitude of their prince, the populace heaped indignities upon the Jews; so that Moruzi found himself obliged—for a consideration in money—to direct the authorities to defend them; he even had to condemn to the bastinado and to exile a Christian tailor who had forcibly baptized a Jewish child. Under pretext of sumptuary laws, Moruzi forbade the Jews to sell cosmetics. At the same time the reappearance of the plague crippled the business of the second-hand dealers, peddlers, retailers, and even of the artisans. Constantine Hangerli (1797-99) treated the Jews somewhat better; giving them a tract of land on which to erect distilleries, granting privileges to artisans, and exempting them from taxation. But the plague, that had become endemic, paralyzed all business.

In spite of the obstacles put in the way of the Jews at Bucharest, the artisan class especially developed during the eighteenth century; its members often occupied exceptional positions, owing to their skill and the services which they rendered to the princes, the boyars, and even the people. The provost of the Jews occupied under several princes the position of "kuyunju pasha" (grand provost of silver-

smiths). In 1787 he gave way to a Christian; but six years later the position was again held by a Jew, Eleazar, who bore the title of "jeva-hirji-pasha" (grand provost of jewelers). There were also among the Jews manufacturers of pipes, potash, and rackets; also excellent engravers, lace-makers, and bookbinders. Certain Jews attached to the court obtained privileges and were exempt from taxes; and they acquired influence with the princes, the high dignitaries, and the boyars.

The populace was still hostile to them, and the nineteenth century opened with a bloody massacre. The Jews were accused of espionage and of ritual murder; and on April 8, 1801, the rabble, aided by some soldiers, pretending to possess orders from the authorities, fell upon them, maltreated them, pillaged their houses, and massacred 128.

**Massacre of 1801.** Alexander Moruzi, who in 1799 had again come into power, being frightened by the massacre and his responsibility to the Porte, condemned the ringleaders to the salt-mines for life.

The Jews had hardly recovered from this terrible blow, when they were obliged to leave Bucharest hastily, together with the rest of the population, on account of the invasion of Pasvan Oglu, the rebel pasha of Rusteluk (1802). When they returned to their homes the specter of ritual murder again confronted them, so that Constantine Ypsilanti was obliged to request the metropolitan to instruct the priests to proclaim from their pulpits the falsehood of the accusation, which had been spread by persons whose only purposes were riot and pillage (1804). Nevertheless, the populace had their way two years later (Dec., 1806). When the Russo-Turkish war recommenced Ypsilanti abdicated just as the Russians were approaching Bucharest. The populace drove out the Turks, and, taking advantage of the disorder, fell upon the Jews, pillaged them, massacred a considerable number, and penned up the remainder in a certain locality, giving them a few days in which to choose between baptism and massacre. The entrance of the Russians rescued the Jews from this terrible plight.

Their fate during the Russian occupation (1806-1812) was not an enviable one. The well-to-do families removed to Transylvania; and the less fortunate ones who remained behind were subjected to heavy taxes, in which, however, they were not treated differently from the Christian merchants. Jews were forbidden to open their shops on the Christian festivals, and even to work at home during these days. Certain manufacturers of potash were driven from their factories, and peddling was interdicted. The Jews lived in continual fear of being accused of ritual murder, and finally, in order to extort money from them, their provost was imprisoned, and his office given to a German Catholic. Later the provost was liberated and restored to office. The Russian Jews residing at Bucharest only received a certain amount of liberty and a few privileges.

The impecunious prince Jean Caradja (1812-18), in order to extract money from the Jews, revived the

order forbidding them to employ Christian minors as servants, or to rent or buy shops in the vicinity of churches. A fresh and violent outbreak of the plague furnished a pre-

**Position at** break of the plague furnished a pre-  
**Beginning** text to Caradja, who accused the Jews  
**of** of living in filth and of thus spread-  
**Nineteenth** ing the pestilence. Various measures  
**Century.** taken by the authorities completely

paralyzed the business of the merchants, pedlers, brokers, and others. In order to increase his revenues and to tax foreign Jews who should have been exempt, Caradja granted to the native Jews the exclusive privilege of establishing Jewish butcher-shops. Alexander Sutz (1818-1821) confirmed this privilege.

During the first quarter of the nineteenth century the situation of the Jews of Bucharest was not enviable, in spite of the considerable influence which some of them enjoyed. They were treated worse than the gipsies, and were continually exposed to the insults of the populace. They could not venture into certain streets without risking their lives. Their domestic life was exemplary; but the communal life was filled with quarrels, originating with Polish or Russian rabbis of mediocre attainments, who did not know much more than their flocks, and who were driven from office as soon as the opposing party gained the upper hand.

The death of Alexander Sutz precipitated the Heteria (Greek insurrection) and the rising of Theodore Vladimirescu. Panic reigned at Bucharest. The well-to-do Jews fled to Cronstadt, while others sought refuge in the neighboring monasteries, where they camped in the courtyards in tents or on mats. Business was suspended, and the workmen were entirely out of work. The Jews suffered untold misery, for the entry of the Heterists into Bucharest was marked by the pillage of the Jewish quarter. The Turkish occupation that followed was a period of unlimited oppression. For a Jew to venture into the streets meant almost certain death. The merchants closed their shops and left the country. On March 7, 1822, the Turkish soldiers, after a quarrel, charged upon the people, killed and wounded fifteen Christians and sixty Jews and Armenians, and looted the shops.

In the second year of the reign of Gregory Ghika (1822-28) a fire destroyed the Jewish synagogue and one hundred and fifty houses inhabited mainly by Jews, many of whom lost all their possessions. In the same year the populace fell upon the Austrian Jews, who, on repelling the attack, were arrested by the police. The plague again offered an opportunity for extortion; the Jews, being

**Further** declared infected, were driven from  
**Diffi-** the city, and allowed to return only  
**culties.** on payment of a sum of money. The anti-Semitic feeling also showed itself

in the decree forbidding Moldavian Jews to settle at Bucharest (1827). The decree became a dead letter when the Russians again occupied those principalities (1828-34), bringing with them a number of Russian and Moldavian Jewish traders. During this occupation the Jews of Bucharest experienced better times.

The communal quarrels in the mean time continued

among the followers of the German and the Portuguese ritual, and among the native Russian, Austrian, and Prussian Jews, not abating even after the reorganization of the community, which was granted by the authorities in 1832. Rabbis were installed and deposed by the different parties, thus causing embarrassment to the government, the all-powerful consuls, and the boyars, each of whom had a favorite Jew. Further, the populace here and there brought up the accusation of ritual murder (1834). Nevertheless, the importance and the influence of the Jews increased; their provost was named grand provost of the guild of timmen; and their artisans and merchants were sought and honored by the boyars. Some among them were appointed to remunerative and honorable positions. The cashier of the Bucharest prefecture of police from 1839 to 1848 was a Jew. The banker Hillel Manoah, on being knighted, was made a member of the commission appointed by the prince in 1847 to aid the suffering Jews, and in the following year he was elected to the municipal council. The physician Barasch was appointed a professor at the college in 1852. The Jews owned houses, vineyards, and estates. They were readily permitted to build synagogues, and in order to reduce the number of these they decided in 1845 to build a large one.

The Jews of German origin especially took an active part in the revolution of 1848, sacrificing themselves for it. The painter Daniel Rosenthal was naturalized and devoted himself heart and soul to his country. This epoch marks the beginning of the real regeneration of the Jews of Bucharest. The native Jews as well as the Austrian and Prussian subjects founded modern schools (1852), and took the initiative in reforming divine worship; erecting a temple with modernized service in 1857. Physicians increased in number; and young men turned to the higher studies. This progress did not cease even when the anti-Semitic spirit began to show itself, about 1866.

The Sephardim, who are called "Spaniards" in Rumania, were at first united with the rest of the Jews; but as early as 1818 they built their own synagogue and were subsequently recruited in numbers by Turkish immigrants. During the reign of Alexander Ghika (1834-43) they completely separated themselves from the other congregations, even having their special cemetery. This separation, however, while profitable to them materially, injured them morally, retarding their spiritual progress. After 1866 the two communities were no longer officially recognized. Yet the Sephardim, although less numerous, were able to maintain their organization; while that of the Ashkenazim was dissolved. All the educational and philanthropic institutions and agencies have been supported solely by societies or committees appointed for raising funds, since the salt-tax, which was a profitable source of income, was abolished.

The Jewish population of Bucharest, numbering between 4,000 and 5,000 at the beginning of the nineteenth century, had risen to 43,274 in 1899, according to the census of that year. The Sephardim have two synagogues; the Ashkenazim, a large number in addition to the Temple. The only con-

gregation organized by the Ashkenazim is that of the Temple using the western ritual, with M. Beck at its head as rabbi and preacher.

**Present Condition.** Since the law of 1893 practically excluding their children from the public schools, the Jews of Bucharest have maintained six primary schools for boys and two for girls, a professional school for boys and one for girls, a business school, and a gymnasium. They also have a hospital, two homes for the aged, two burial societies (*hebrah kaddishah*), and a large number of philanthropic societies and institutions. See also RUMANIA.

**BUCHBINDER, BERNHARD** (pen-name, **Gustav Klinger**): Austrian journalist; born July 6, 1854, in Budapest, where he received his education, being destined for a mercantile career. A one-act comedy, which he wrote after he left school, and which was played successfully in Budapest, decided his future. Both of his parents having died when he was very young, and his father having been but a poor pedler, Buchbinder had to care for his younger brothers and sisters. Under great hardships and privations he adopted the profession of journalist and became very successful as a novelist and dramatic writer.

Among his numerous works may be mentioned the novels, "Vergessen im Armenhause," 1882;

"Väter und Söhne," 1885; "Bettelstudent," 1886; "Freimann," 1891; "Eine Wiener Theaterprinzessin," 1894, and the dramas "Herrgotts Mörder," "Vater Deák," "Wer Ist der Herr im Hause," "Gräfin von der Strasse," "Die Flüchtlinge," "Heirat auf Probe," "Heiratsschwinder," "Der Schmetterling," "Göttin der Vernunft," "Verlogenes Volk," "Leute von Heute," "Die Diva," "Rother Schnabel," "Die Dritte Eskadron," "Grubers Nachfolger," and "Er und Seine Schwester."

F. T. H.

**BUCHHOLZ, CARL AUGUST**: German Christian lawyer and author; born in the latter half of the eighteenth century; died at Lübeck Nov. 15, 1843. He was a doctor of laws and of philosophy, and, at the time of his death, occupied the position of second "Stadt-Syndicus" of Lübeck. Although that city was notorious for its hostility to the Jews, both before and after the Napoleonic wars, Buchholz, who was one of its leading citizens, voluntarily undertook to champion their cause in a work entitled "Ueber die Aufnahme der Jüdischen Glaubensgenossen zum Bürgerrecht" (Lübeck, 1814; 2d ed., Leipsic, 1816). This led to his being selected by the Jewish communities of the three Hanse towns (Lübeck, Hamburg, and Bremen) as their representative at the Congress of Vienna (1815), where he rendered valuable service. He was also sent as representative of the foregoing Jewish communities to the German Diet at Frankfurt. At that time appeared his "Actenstücke, die Verbesserung des Bürgerlichen Zustandes der Israeliten Betreffend" (Stuttgart and Tübingen, 1815), a collection of laws and decrees concerning the Jews, issued by various princes and commonwealths of Germany. It is preceded by an

introduction of about 75 pages, which forms one of the best and most comprehensive pleas for Jewish emancipation advanced by a Christian in that period of reaction. This work, which may be considered as a brief, showing his capacity as defender of the rights of the Jews of Germany, is alike creditable to his erudition, to his logical mind, and to his love of justice.

**BUCHHOLZ, P.:** German rabbi; born Oct. 2, 1837; died in Emden, Hanover, Sept. 20, 1892. He became rabbi of Märkisch-Friedland in 1863, where he remained till 1867, in which year he was called to the rabbinate of Stargard, Pomerania. In 1875 he became chief rabbi of Friesland, which position he filled with ability and distinction until his death. He was a good Talmudical scholar and well versed in modern philosophy.

Buchholz was the author of a small work on the legal and moral relations of the family according to Jewish law, "Die Familie in Rechtlicher und Moralischer Beziehung nach Mosaisch-Talmudischer Lehre" (Breslau, 1867); and some of his more important speeches and lectures were published by him or by his friends. He has also written a number of articles on historical and other scientific subjects in the Jewish periodicals of Germany, of which his "Historischer Ueberblick über die Mannigfachen Codificationen des Halachastoffes" ("Monatsschrift," 1864, pp. 201-241) and "R. Azaria Figo und Seine Predigtsammlung Binah la-Ittim" (Beilage zur "Isr. Wochenschrift," 1872, Nos. 4-9) are probably the most important.

**BIBLIOGRAPHY:** Lippe, *Bibliographisches Lexicon*, pp. 58, 59; *Der Israelit* (Mayence), 1892, Nos. 79, 80; Winter and Wünsche, *Jüdische Literatur*, iii. 769.

P. Wl.

**BÜCHLER, ADOLF:** Austrian historian and theologian; born Oct. 18, 1867, at Priekopa, Hungary. In 1887 he began his theological studies at the Budapest Seminary, and at the same time studied in the department of philosophy of the university under Goldziher and Kármán. Büchler continued his studies at the Breslau Seminary, and in 1890 was graduated as Ph.D. at Leipsic University, his dissertation being "Zur Entstehung der Hebräischen Accente," which was afterward published in the "Sitzungsberichte der Wiener Akademie der Wissenschaften" of 1891.

Büchler returned to Budapest to finish his theological studies, and was graduated as rabbi in 1892. He then went to Oxford for one year, where he worked under the direction of his uncle, Dr. Adolf Neubauer, and published an essay, "The Reading of the Law and Prophets in a Triennial Cycle" (in "Jew. Quart. Rev." April, 1893). The same year he accepted a call as instructor at the Vienna Jewish Theological Seminary, where he still (1902) teaches Jewish history, Bible, and Talmud.

Büchler has published the following works: "Die Priester und der Cultus im Letzten Jahrzehnt des Tempelbestandes," Vienna, 1895; "Die Tobiadn und die Oniaden," *ib.* 1899; "Das Grosse Synedrion in Jerusalem und das Beth-Din in der Quaderkam-

mer des Jerusalemischen Tempels," *ib.* 1902. He has also contributed some essays to the "Jewish Quarterly Review," the "Monatsschrift," the "Revue des Études Juives," and other periodicals, mainly on the last days of the Second Temple, which essays have attracted much attention on account of their originality. S.

**BÜCHLER, ALEXANDER:** Born in Füle, Hungary, in 1869; son of the Talmudist rabbi Phineas Büchler of Moór. He was educated at the gymnasium in Székesfehérvár and at the university and the seminary of Budapest; he received the degree of Ph.D. in 1893, and was ordained as rabbi in 1895. In 1897 he was called to Keszthely.

Büchler's works include essays on the history of the Jews in Hungary, published in the "Magyar Zsidó Szemle" and the "Oesterreichische Wochenschrift," and the following books: "Niederlassungen der Juden in Europa im XVI. und XVII. Jahrhundert, mit Besonderer Rücksicht auf Ungarn," Budapest, 1893 (in Hungarian); "Schay Lamoreh," "Kolel Miktebe Hakkem Yisrael," Budapest, 1895 (in Hebrew); and "History of the Jews in Budapest," 1901 (in Hungarian).

S.

L. V.

**BUCHNER, WOLF B. DAVID HAKOHN:** Hebrew stylist; born at Brody in the latter half of the eighteenth century and lived into the nineteenth. In his boyhood Buchner enjoyed the hospitality which every Talmud student found in those days in the bet ha-midrash, and during his manhood he traveled with Hebrew books through Germany, Galicia, Poland, and Lithuania (Letter 83).

At times he earned his livelihood by writing letters for illiterate people. His own publications were another source of income to him (*ib.*). He corresponded with Baruch Jeiteles (Letter 72); Jacob Landau, son of Ezekiel Landau (Letter 81); and Beer Ginzburg, the Galician poet and friend of Nahman Krochmal (Letters 3, 82, 83). He suffered very much in his travels through foreign countries, and in Berlin he sustained an injury which cost him the sight of his right eye (Letters 19, 20). As he never speaks in his letters of wife or child, it is impossible to tell whether he was married.

His works are: (1) "Zebed ha-Melizah," an imitation of Al-Harizi's "Taḥkemoni," written in 1770, but published (Prague, n.d.) not earlier than 1794, the date of the censor's approbation; (2) "Zebed Tob" (*ib.*), a collection of poems; (3) "Keter Malkut" (Lemberg, 1794), a hymn in imitation of Gabriel's; (4) "Shire Tehillah" (Berlin, 1797), hymns and parodies; (5) "Zaḥut ha-Melizah" (Prague, 1805), a collection of his private letters. The "Shir Nifla" (Frankfort-on-the-Oder, 1802) and "Shir Yedidut" (*ib.* 1810) are to all appearance partial reprints from the "Shire Tehillah." His parodies of the marriage and betrothal contracts were later abridged and published separately ("Seder Tenaim Rishonim me-Ḥag ha-Pesah," Lemberg, 1878) and wrongly ascribed to Israel Nagara.

Buchner is one of the modern representatives of the medieval school of artificial poetry. His prose is flowery and full of conceits; while his poetry

devotes more attention to the number of letters in the words than to the sense which the words are supposed to convey. He endeavored to imitate Gabirol, Al-Ḥarizi, and Bedersi; but he had not the depth of the first, the invention of the second, or the force of expression of the third. He showed a predilection for similitudes (משל); but his arguments are generally encumbered rather than strengthened by these. Though his works had considerable vogue in his day, and went through several editions, they have fallen into oblivion.

**BIBLIOGRAPHY:** His letters (צורת המשל); Zeitlin, *Bibl. Post-Mendels.* s.v.; Delitzsch, *Zur Gesch.* p. 86; Fuenn, *Keneset Yisrael*, p. 301.

**BUCHSBAUM:** Family of Jewish physicians of Frankfort-on-the-Main, whose activity extended over a century. Its prominent members were:

1. **Amschel Gutman Buchsbaum:** Son of Gutman Wolf (No. 3). He graduated from the University of Giessen in 1729; died 1743.

2. **Benjamin Levi or Wolfgang Buchsbaum:** Born at Frankfort 1645; died June 26, 1715. He devoted many years to the study of medicine and philosophy at the universities of Heidelberg, Vienna, Pisa, and Padua, and graduated from the last-named in 1669. The same year he returned to his native town, where he was given permission to practise medicine, and enjoyed a high reputation among both Jews and Christians.

3. **Gutman Wolf Buchsbaum:** Born 1678; died 1770; a son of Wolfgang (No. 2). He graduated from the University of Leyden in 1697, and returned to Frankfort to practise. He held a respected position in the community.

4. **Lipman Buchsbaum:** Brother of Gutman Wolf (No. 3); born 1677; date of death unknown. With his brother he graduated from the University of Leyden in 1697, and returned to Frankfort to practise medicine. He also held a high position in the community. Confined for a time in the tower of Bornheim on account of false accusations brought against him, he utilized his imprisonment by writing a long treatise on medicine.

**BIBLIOGRAPHY:** D. Kaufmann, *Ein Jahrhundert Einer Frankfurter Aerztfamilie*, in *Monatsschrift*, xli, 128-133; Horowitz, *Jüd. Aerzte in Frankfurt-am-Main*, pp. 33, 34; Landau, *Geschichte der Jüdischen Aerzte*, p. 124.

**BUCKLER.** See SHIELD.

**BUCURESTEANU (BUCURESHTEANU), ABRAHAM COHEN:** Rumanian publicist; born at Bucharest 1840; died there Jan. 24, 1877. From his earliest youth he was passionately fond of the theater, and obtained some success on the stage; but by the advice of his family he devoted himself to commerce. At the same time, being gifted with spirited wit and having an inordinate fondness for puns and repartee, he composed a number of satirical poems and epigrams, love-songs, theatrical skits, and anecdotes, which were most favorably received by the public (1860-74). His songs were favorites alike in the parlors of the wealthy and the hovels of the poor, and, although mediocre, are still (1902) to be heard in Bucharest. The best known among them are: "S'o vezi Mama n'o mai uită"; "Gândul meu la tine zboară"; "Cu Chimir."

Bucuresteanu's life was a wild one; insatiable love and furious jealousy soon deprived him of his wife, and brought him to the grave, a victim of physical suffering and remorse. His songs are to be found in numerous popular collections; but he himself published only "Urdubelea si Norocul," Bucharest, 1873, and "Buchetul, Culegere de Anecdote," Bucharest, 1874.

As Jew and philanthropist, he has to his credit the foundation of the Zion Society, which assumed large dimensions, and became an integral part of the American B'nai B'rith in Rumania, under the name "Zion Grand Lodge."

**BUZACZ, ABRAHAM DAVID B. ASHER ANSHEL:** Galician Talmudist; born 1770 at Nadworna; died 1840 at Buczacz. Even as a boy he attracted, by his acuteness in Talmudic knowledge, the attention of the leading Talmudists to such a degree that Zebi Hirsch, the author of "Neta' Sha-shu'im," chose him in his tenth year as a son-in-law. At the age of twenty he was ready to accept the office of rabbi at Goslowitz.

The chief event of his life was the struggle awakened in him by the opposition between the Talmud and the Cabala. Unacquainted with the tendencies and modes of life of the Ḥasidim, Buczacz did not believe in the miracles of their rabbis; and his wife and friends had great difficulty in persuading him to take his sick son to a Ḥasidic rabbi, Levi Isaac of Berdichev. The latter, however, influenced him to take up the study of the Cabala; but in trying to reconcile these new views—so utterly antagonistic to those of the extreme Talmudists, which he himself had hitherto held—he nearly became insane. The Ḥasidic rabbi Levi Isaac of Berdichev helped him through this struggle and won him over, to the great joy of the Ḥasidim, who feared his wide Talmudic learning. Buczacz adopted the Ḥasidic mode of living; but in his decision of halakic questions was guided, not by cabalistic, but by purely Talmudic, principles. In 1813 he succeeded his late father-in-law as rabbi of Buczacz, and remained in office until his death.

Buczacz is the author of the following works: (1) "Da'at Qadoshim," to the Shulḥan 'Aruk, Yoreh De'ah, Lemberg, 1870; 2d ed., *ib.* 1879; (2) "Dibre Abot," commentary on Abot, *ib.* 1879; (3) "Eshel Abraham," annotations to the Shulḥan 'Aruk, Oraḥ Ḥayyim, *ib.* 1885; (4) "Birkat David," cabalistic-haggadic commentary on Genesis, Zolkiev (date 1766, given on title-page, wrong); (5) "Maḥazeh Abraham," commentary on the Pentateuch, and "Hozeh David," on the other Biblical books, Lemberg, 1871; (6) "Amarot Tehorot," on the purification of Niddah and vessels, in Judæo-German, *ib.* 1878; (7) "Tefillah le-David," on benediction and prayer, *ib.* 1886; Kolomea, 1887; (8) "Tehillah le-David," on the Psalms, *ib.* 1872.

**BUDA.** See BUDAPEST.

**BUDA, PURIM OF:** In 1684 the Christian armies laid siege to Buda (Ofen) to drive out the Turks, who had held possession of the city from 1541; their design was, however, frustrated by the stout resistance of the Turks and Jews. The participation of the latter in this opposition to Christian forces was followed by great embitterment against the Jews, particularly in Italy, where in Rome they could not venture into the street without a guard from the pope's troops; any not thus protected being sure of immediate assault and possibly murder. The towns of Moncellis, Montaniana, Castel-Franco, and Citadella followed the example of Rome; and in Padua, where Jews and Christians had lived side by side for many centuries, a sharp outbreak of anti-Jewish feeling was felt in 1670. The outbreak in that city was the outcome of commercial jealousy, brought to a head by a calumnious publication which was widely circulated among the people. Although the publication was interdicted by the authorities, it nevertheless implanted deep animosity against the Jews; and when the news came of the part which they had taken in the defense of Buda, the latent hatred broke into flame. The Capuchin Marco d'Aviano, who had passed two months with the besieging armies outside Buda, when asked concerning the part which the Jews had taken in bringing disgrace upon the Christian armies, replied truthfully that the Jews of Buda were not blameworthy. The populace, however, refused to accept this generous estimate, and pictures of Buda in which the ghetto was over-prominent were widely circulated, greatly increasing the popular resentment.

On the Ninth of Ab the Jews of Padua gathered as usual to celebrate their annual fast-day commemorating the destruction of the Jerusalem Temple; but no explanation would convince

**Jews of Padua** the people that the object of the fast was other than to implore divine assistance in behalf of the Turks and

**Besieged.** Jews then besieged in Buda, and to offer prayers for the defeat of the imperial troops. Although the Jews notified the authorities of this cruel misconception on the part of their Christian fellow-citizens, no weight was attributed to their statement. On Sunday, Aug. 20, 1684, the news was passed from mouth to mouth that Buda had at last been captured. It appears that a special messenger had arrived at Venice from Buda the day before, and the people had erroneously taken him to be the bearer of tidings of victory. The Padua populace, joined presently by armed men, gathered in the vicinity of the ghetto, and, in exultation over the supposed victory, bombarded the Jewish dwellings with stones and attempted to break down the barred gates of the ghetto. The authorities who tried to pacify the mob were silenced with volleys of stones; all who endeavored to make peace were assailed with reproaches of having been bought by the Jews. The Jews themselves attempted to pacify the raging people with gifts of money and food; but to no purpose. The magistrates threatened the severest punishment to any who should assault or despoil Jews, but their warnings availed only for the moment. The Jews decided to send an appeal for help

to the doge of Venice, but when the ghetto-gate was opened to give egress to the messenger, the mob poured in by thousands, broke open warehouses, and destroyed the windows of the synagogue. The besieged barricaded the doors of their dwellings and awaited their fate. Finally a detachment of Italian and German cuirassiers cleared the ghetto of the rioters, wounding several of them. This still further incensed the populace, and two cuirassiers were slain by the mob. When a wicked woman, with a terrible outcry, announced that the Jews had stolen her only child to use its blood, popular fury knew no bounds. The riotous mob rushed with the woman to the city hall, demanding the heaviest punishment for the offenders. In vain did the educated and respectable element of the city government endeavor to pacify them. It was only by the lavish use of gold that any impression was made upon the mob, which presently dispersed. When, some time later, the Jews offered to repay the sum thus disbursed by the burgomaster, he refused to accept it.

At the request of the people the military was withdrawn from the ghetto. No sooner had this taken place, however, than the fury of the people broke out afresh; the ghetto was again assailed and its massive doors attacked with fire and sledge-hammers. The Jews passed the night in consummate terror; distrusting the guards who had been assigned for their protection, some crawled on ladders into the houses of their Christian friends outside the ghetto. Deliberate attack was prevented by the proclamation of the authorities that death awaited any man who harmed the Jews, and the next day stringent orders came from Venice commanding immediate cessation of the riot. Popular indignation therefore was forced to content itself with burning Jews in elligy at the stake.

These anxious days are still commemorated by the Jews of Padua, who on Elul the 10th annually celebrate a festival called the Buda (Ofen) Purim, in memory of the valiant deeds of their ancestors in that city, the sufferings brought by it upon the Jews of Padua, and their deliverance therefrom.

A. BÜ.

**BUDAPEST:** The capital of Hungary. Of the several congregations within this tripartite city, Buda (Ofen), Ó-Buda (Alt-Ofen), and Pesth, that at Buda is the oldest (see ALT-OFEN); Jewish population in 1900 was 166,198. The first mention of the Jews of Pesth dates back to 1406, in which year Saul of Pesth and Saul of Ofen obtained from Béla IV. certain privileges which were countersigned by the chapter of Stuhlweissenburg, when they settled in the last-named city. In 1504, Jews owned houses and lands at Pesth. At the time of the Turkish rule their cemetery was situated in the present Leopoldstadt. After 1686, in which year the Turks were driven from Pesth, no Jews were allowed to live there for nearly a century; and the magistrate of Pesth collected a tax of thirty kreutzers from every Jew traveling through the city, and one thaler from

every Jew remaining in it overnight—a right that Pesth claimed by virtue of the letter of privileges granted by King Leopold I. Oct. 23, 1703, according to which it was left in the hands of the municipal council to admit Jews or to refuse them admission. When the governor enrolled the Jews of Hungary in 1735, the city of Pesth decreed that neither a heretic nor a Jew could live or settle there in future; but they were allowed to visit the markets of the city from the sixth decade of the eighteenth century.

In endeavoring to gain a permanent residence in the city, the Jews were always frustrated by the magistracy. The latter in 1762 even begged the prince primate, Count Franz Barkóczy, who had become the protector of the city, to exclude the Jews. This resistance of

**Under Joseph II.** the city authorities was finally overcome by the emperor, Joseph II., after whose decree of March 31, 1783, Jews slowly began to settle at Pesth. The first arrivals came from Alt-Ofen and settled generally in the Theresienstadt, which at the present time (1902) is most thickly populated by Jews. The city of Pesth would not allow them to live elsewhere, and would have transformed the Theresienstadt into a ghetto, but failed to do so when Israel Abraham Offenheim, with the permission of the authorities, rented a house and a store in the inner city itself in 1786. Jews were allowed to live in the city only with the permission of the king, and those who bought this right for large sums were called "tolerated Jews"; those who were only temporarily received by the city were called "Commoranten" (sojourners). In 1787 fourteen tolerated Jews were living at Pesth; the settlement numbering 114, including servants. At first they were not allowed to have their own butcher-shop, the kosher meat being cut up twice a week by the municipal butcher. Jews staying temporarily in the city or those traveling through it had to obtain their food and drink at the public cook-shop, the high rent paid for the same being a large source of income for the city. At first travelers were allowed no lodging except in this cook-shop.

When Joseph II., on his death-bed (Jan. 28, 1790), revoked all his decrees, the citizens of Pesth determined to expel the Jews, who competed with them in business; and the magistracy had already fixed upon the first of May as the

**After Joseph II.** day of expulsion, when the Diet interfered. Being compelled to endure the presence of the Jews, the city endeavored to make their residence unpleasant. The Commoranten were often expelled; and only those were allowed to stay in the city who had a toleration-permit. The city forbade them to organize a community or to use a seal. In 1804 it attempted several times to drive them from various parts of the city and to concentrate them in the Theresienstadt. The Jews, stung by this animosity and conscious of the commercial services they were rendering to the community, pointed out that the creation of a ghetto would be the surest means of injuring the commerce of Hungary, which was then in its infancy. They claimed that nowhere else had Jews been so instrumental in developing trade as in Pesth; and that they did not deserve insult as a reward. They declared that

Jews lived amicably with Christians in every port and emporium of Europe, and that in those cities in which they were influential in commerce, such as Trieste, Hamburg, Dresden, and Berlin, they even owned their houses; while in places where a special Jewry was assigned, the more prominent merchants were allowed to live in open places outside of the ghetto. The Jews warned the city not to carry out its intentions, pointing out the damage that the Leopoldstadt would suffer if they were expelled from it, and directing attention also to the formidable increase which would ensue in rents if the

The Tabakgasse Synagogue at Budapest.  
(From a photograph.)

owners of the houses in the Theresienstadt had the monopoly of renting to Jews.

A most severe decree against the Jews of Pesth was issued in 1808; it forbade any foreign Jew to

**Foreign Jews Forbidden Entrance, 1808.** settle at Pesth, even though he married the daughter of a tolerated Jew. The parent's right to trade and to be tolerated passed by inheritance only to one male descendant; while all the other children were regarded

merely as Commoranten and as assistants in their father's business. In 1828 the Jews addressed a petition to the king requesting the abrogation of this decree. "Out of love to our children," thus wrote the community, "we wish to die with the assurance that we may leave to our descendants at least an assured home, the honest means of gaining a livelihood, and independence, if not wealth."

If the father died all the children who had been working with him as "assistants" had to emigrate, with the sole exception of the tolerated son. It happened often that the only available husbands for their daughters were shiftless and undesirable Jews, whose sole merit was that they possessed the right of toleration. Honest and industrious strangers were out of the question because they were forbidden to remain at Pesth or to engage in commerce.

That all these endeavors to place difficulties in the way of Jews intending to settle at Pesth were futile may be seen by the fact that of 1,346 Jewish

**Progress of Com-** families living there in 1833, only 530 had the right of toleration or were **munity.** Commoranten. The community of Pesth, increasing in numbers, wealth, and education, thus became from 1839

the foremost of the Hungarian-Jewish communities; working as such for the emancipation of Hungarian Judaism, and often convoking gatherings of representative Hungarian Jews for that purpose.

It was due to the energetic interposition of the community of Pesth that King Ferdinand V. (1835-1848) abrogated the toleration-tax by which the Jews had been branded for a century. The Jews of Pesth sympathized with the nation at the time of the Hungarian struggles for liberty. Although the populace attacked and plundered the Jews on the second day of Passover, April, 1848, and the intolerance of the people excluded them from the national guard, the Jews were not long discouraged. The rabbi Schwab stirred up their patriotism, for which he was arrested after the uprising had been quelled. The Jews were so enthusiastic in the cause of Hungary that they even offered to sacrifice the silver paraphernalia of the temple and of the Hebrah Kadishah; and all Jews entering the revolutionary army received their full equipment from the community. Haynau punished them for this patriotism with a heavy war-tax, part of which, however, King Francis Joseph I. remitted.

Emperor Joseph sought to forbid the Jews to engage in retail business and in peddling, for which

**Oc-** reason in 1788 he decreed that tolerated **cupations.** Jews should be received in Pesth only when they established a wholesale house or some manufacture. Within

the community they were allowed to deal only in such goods as the Christian population lacked or in which they could not compete with Christian dealers. Only wholesale merchants were allowed to keep an open shop. Many Jews, therefore, who did not wish to engage in peddling, petitioned for the rights of a wholesale dealer, although they had neither the money nor the capacity for such business. Their profits were curtailed by visiting dealers, who came from near and far to the markets; there were heavy taxes and living expenses; and the shops had to be closed not only on the Jewish, but also on the Christian, holidays.

Yet with all these drawbacks the Jewish business men of Pesth materially aided the development of the city. Noteworthy among the many eminent merchants is the Ullmann family, a member of which, the apostate Moritz, who was ennobled, was the first to propose the organization of the Commercial Bank

of Pesth; he also originated the plans for the railroad from the Austrian frontier to Pesth and thence to Debreczen. Not only Jewish merchants, but artisans also settled at Pesth, among them the lace-maker Joel Berkovits, a descendant of Rabbi Heilmann of Metz, who had learned his trade with a relative, Ephraim Kossmann, at Berlin. Berkovits was also skillful in making Turkish fancy boxes.

Although the guilds largely interfered with the development of Jewish industry, the Jewish community of Pesth encouraged many young men to learn trades. It instituted a fund to aid Jewish youths who followed laborious handicrafts, and with the assistance of Jacob Kern it was instrumental in founding in 1842 the Hungarian Israelitish Trades and Economic Association, which had benefited many Jews. Thus in due time the Jews contributed to the industrial development of the city, as well as to its culture, through the many teachers and university professors, judges, physicians, lawyers, and engineers they furnished to the community.

Immediately after their settlement the Jews organized a place of worship in the Hausler homestead in the Königsgasse, paying a rent of 200 gulden for their synagogue. The necessary Torah-rolls were lent to them by the community at Alt-Ofen. On Aug. 17, 1787, the government gave them a permit to continue worshipping quietly in private houses of prayer without a rabbi.

#### Worship.

In 1796 they rented a room for a new synagogue in the house owned by Baron Orczy, an immense building that is still called the "Judenhof." In the year 1800 there were, in addition to the Orczy temple (called the "large temple"), a Polish temple, and a separate house of prayer belonging to the Sephardim. The first place to adopt an improved (moderate Reform) manner of worship was the temple of the Hesed Ne'urim association, in the house of the "White Goose" ("Fehér Lud"). It was considered merely as a private synagogue; but when all private and association temples were dissolved in 1830, the community included this temple among its institutions, and transferred it also to the Orczy house, adjoining the "large temple." The communal temple was transferred in 1859 to the present magnificent building in the Tabakgasse. In the seventies a synagogue was organized for the Conservatives in the Rombachgasse, while their temple in the Orczy house was rented by the Orthodox congregation, which still worships there (1902). The temple of the Reform Society was from 1848 to 1852 in the Valero house in the Königsgasse.

The Jews of Pesth at first buried their dead in ALT-OFEN. The city in 1788 assigned to them a free cemetery, which was situated on the plot now occupied by the Westbahnhof. A

**Cemeteries.** new cemetery was given to them in 1808 behind the city dike, in the Weitzerstrasse, and they transferred thither in 1839 their dead and their tombstones. Gravestones with sculptured images of men and women were erected in this cemetery as early as 1832, a practise against which Moses Sofer, rabbi of Presburg, vigorously protested. As this cemetery proved to be too small, a new one was assigned to them near the Kerepeserstrasse. Lately the community bought for

burial purposes a large plot of ground behind Köbanya.

The Hebrah Qaddishah was founded in 1790. It is one of the largest benevolent societies, its budget for 1902 being 511,671 crowns. In 1800 Israel Wahrmann founded the Shi'ynr society. The hospital was organized in 1805. There are also the following associations: Hesed Ne'urim, Bikkur Holim,

Menahem Abelin, and Tomke Yetomim; the Women's Society, founded in 1866, which owes its success largely to the noble Johanna Bisehitz de Heves; the People's Kitchen, the hospital, the Adela Brody Children's Hospital, named after its founder; an orphan asylum for girls, and one for boys, which was founded by a philanthropist named Fechs; the new building of the last-named, inaugurated in 1901, is a monument to the labors of Jacob Deutsch. Many Jews have perpetuated their names by large foundations, among them Wolf Holitscher, Solomon Taub, Alexander Wahrmann, Philip Kunewalder, and Moses Ehrlich. The Jews of Pesth have always been public-spirited and philanthropic. During the cholera epidemic of 1831 they not only relieved Jews, but also furnished daily rations to eighty-two Christian families, earning the gratitude of the count palatine Joseph. They are, in addition, liberal contributors to the general philanthropic institutions of the country.

The religious life of the community was at first under the supervision of the rabbinical council of Alt-Ofen, and, beginning with 1789, under Moses Münz, rabbi of that city. When Rabbi Wolf Bos-

kovitz settled at Pesth in 1793, the community elected him rabbi. The government, however, deprived him of his office Dec. 27, 1796, in consequence of the intrigues of Moses Münz, and ordered the community to elect anyone it chose to conduct its religious affairs, with the exception of Münz. In the spring of 1799 it elected Israel ben Solomon Wahrmann, rabbi at Bodrogh-Keresztur, against whom Münz again began to plot. In the following year the government ended these intrigues, and the enlightened Wahrmann was able peacefully to conduct the affairs of the community. He died June 24, 1826 at the age of seventy. His dayyanim were Simon, Oppenheimer, Azriel Brill, and Moses Kunitzer. After Wahrmann's death certain educated and wealthy members of the community, delighted with the organization of the new Vienna temple and the sermons of its preacher, Noah Mannheimer, proceeded to introduce Reformed worship at Pesth and to elect a preacher. They chose Joseph Bach of Alt-Ofen as preacher, and Edward Karl Demhof, also of Alt-Ofen and a pupil of Sulzer of Vienna, as preacher. This temple, or "choir synagogue," as it was also called, was for a time a bone of contention in the community. Attempts were made to prohibit worship in it; and only the endeavors of the president of the community, Gabriel Ullmann, preserved it from the fanatics.

These changes in the life of the community made it imperative that a man should officiate as rabbi who could meet the demands of the Conservatives as well as of the Reform party. In 1829 the com-

munity elected David Joseph Wahrmann, son of the deceased rabbi; but as he delayed his coming, Löw Schwab, rabbi at Prossnitz, was called instead. Entering upon office in Jan., 1836, Schwab's incumbency was a blessing not only to the community of Pesth, but also to the entire Hungarian Jewry. He fostered the development of all culture and religious institutions, acting always with tact and avoiding dissensions. His rabbinical council included the scholarly Samuel Löw Brill (b. 1814; d. 1897), later professor of the Talmud at the rabbinical seminary at Budapest, and Judah Wahrmann, author of the "Ma'areket ha-Ha'takot" (Ofen, 1831), on Hebrew punctuation ("trop"), and of an ethical book, "Dat Yehudah." Schwab's literary activity included sermons, and works in which he defended Judaism against the slanders of Gasparich Kilit, translated into Hungarian by Moritz Bloch, a convert; a religious book, "Erinnerung an den Erhalteuen Religionsunterricht" (Pesth, 1846), in German and Hungarian; and a responsum directed against the Jewish Reform Association at Pesth. This association had been called into life by the Hungarian struggles for liberty in 1848. Its first rabbi was Ignatz Einhorn, who subsequently became secretary of state in the Hungarian ministry under the name of Eduard Horn. When Horn fled from Hungary, after the Revolution had been put down, his place was taken in 1852 by Dr. David Einhorn, district rabbi of Mecklenburg-Schwerin. However, he officiated for only a short time, as the government dissolved the Reform Association in 1852 in consequence of the remonstrances of Rabbi Schwab, the members going back to the original congregation.

After Schwab's death, April 3, 1857, the community extended an invitation to Dr. Michael Sachs of Berlin; but as he refused the call, Dr. **Successors** W. Alois Meisel was chosen May 11, of Schwab. 1859. This preacher was much hampered in his activities not only by the president of the community, Dr. Ignatz Hirschler, but also by the rivalry between the Hungarian and the German element. It was in consequence of the strengthening of the Hungarian element that the office of a preacher in the Hungarian language was created, Dr. Samuel Kohn being called to fill it. His researches contributed largely to the systematization of the history of the Hungarian Jews. After Meisel's death (Nov. 30, 1867), the position of chief rabbi remained vacant, and the office of a German preacher was created, Dr. M. Kayserling being chosen to fill it. Rabbi L. Pollak was called to the temple in the Rombachgasse. Dr. Julius Weissburg has been assistant rabbi since 1895. After Brill's death the position of chief of the "bet din" was filled in 1901 by Moses Feldmann, rabbi at Galantha. The first rabbi of the Orthodox congregation founded in the seventies was Joachim Schreiber, after whose death Koppel Reich was elected (still officiating in 1902).

The education of Jewish children was at first in the hands of private teachers. In Aug., 1787, the government decreed that all the Jewish children of Pesth should attend the Christian schools, and that there should be no private instruction except that

of one religious teacher. Some of these private teachers contributed to Hebrew literature, among others I. L. Löwinger, Joseph Rotten-

**Education.** Bauer, Adolf Pevani, L. Moses Foels, Philipp Weil, Leopold Breuer, and Karl Kohlmann, who, after renouncing Judaism, was appointed censor of the Hebrew books printed at Ofen. A public school was opened through the endeavors of Rabbi Israel Wahrmann, through whose influence the pupils of the gymnasium received religious instruction. Rabbi Schwab procured royal protection for the school, and also induced the community to organize an infant-school. After the Revolution, during the Germanizing régime of Bach, the school became the nursery of the Hungarian national spirit. Ignatz Reich, the enthusiastic Hungarian teacher, was active at this time. He is the author of "Bet El," a work containing the biographies of eminent Hungarian Jews. The community of Pestb did much for its schools. In addition to the elementary schools for boys and for girls, it has a secondary school for them, with capable instructors. The religious instruction in the municipal schools, as well as in all the intermediate schools (Mittelschulen), is provided by the congregation, and consists of a staff of religious teachers, some of whom are graduate rabbis. The supervision of all the schools at present is in the hands of B. Munkácsi, appointed by the congregation.

Ever since the Jews settled at Pesth their governing board has consisted of the seven members of the so-called "Deputation," which originally regulated the rents derived from Jewish taverns. The arbitrary proceedings of this board were restricted by the statutes of 1800, according to which

**Internal Government.** twelve members in addition to the seven directors supervised the affairs of the community. New by-laws were imposed upon the community by the

city in 1816 and 1828. It had no constitution confirmed by the government until 1833. Since this date the Jews of Pesth have formed an officially recognized community. It drew up new by-laws in 1861, when Dr. Ignatz Hirschler was chosen as president, by whom the institutions of the community were reorganized. He was succeeded as president by Moritz Wahrmann, who was the first Jewish deputy in the Hungarian House of Representatives. The present president of the congregation is Sigmund Kolner; its secretary (since 1874), the well-known Orientalist Ignaz Goldziher. See ALT-OFEN.

D.

A. BÜ.

**BUDEK:** Polish Catholic priest; canon of Wislica at the beginning of the fifteenth century, and one of the most vigorous Jew-baiters of his time. It was he who instigated the attack on the Jews of Cracow on the third day of Easter (March 27), 1407; charging them with the murder of a Christian boy and with having attacked a priest who was carrying the sacrament (see Cracow).

H. R.

**BÜDINGER, MAX:** Austrian historian; born April 1, 1828, at Cassel, Germany; died at Vienna Feb. 23, 1902; son of Moses Mordecai BÜDINGER.

Büdinger devoted himself from 1847 to 1851 to the study of history at the universities of Marburg, Bonn, and Berlin. In 1857 he became privat-docent of history at the University of Marburg; but seeing no prospect of attaining a professorship, on account of his Jewish faith, he soon left this position and went to Vienna. In 1861 he received a call to the University of Zurich as professor of history. From 1872 until his death in 1902 he occupied the chair of history at the University of Vienna. In 1887 he was elected a member of the Vienna Academy of Sciences.

Büdinger was the editor of two series of historic essays written by his pupils under his direction: (1) "Untersuchungen zur Römischen Kaisergeschichte," in 3 vols., Leipsic, 1868-70; and (2) "Untersuchungen zur Mittleren Geschichte," in 2 vols., *ib.* 1871. He is the author of the following works: (1) "Zur Kritik Altbayrischer Geschichte," Vienna, 1857; (2) "Zur Kritik Altböhmischer Geschichte," *ib.* 1857; (3) "Oesterreichische Geschichte bis zum Ausgang des 13. Jahrhunderts," Leipsic, 1858; (4) "König Richard III. von England," Vienna, 1858; (5) "Die Königinhofer Handschrift und Ihr Neuester Verteidiger," *ib.* 1859, where he proved the spuriousness of this pretended Old-Bohemian literary monument; (6) "Nachrichten aus Altrussischen Jahrbüchern," *ib.* 1859; (7) "Ein Buch Ungarischer Geschichte, 1058-1100," Leipsic, 1866; (8) "Wellington," *ib.* 1869; (9) "Lafayette," *ib.* 1870; (10) "Aegyptische Einwirkungen auf Hebräische Kulte," Vienna, 1872-74; (11) "Zur Aegyptischen Forschung Herodots," *ib.* 1873; (12) "Lafayette in Oesterreich," *ib.* 1878; (13) "Vorlesungen über Englische Verfassungsgeschichte," *ib.* 1880; (14) "Cicero und das Patriziat," *ib.* 1881; (15) "Poesie und Urkunde bei Thukydides," in 2 vols., *ib.* 1890-91; (16) "Don Carlos' Haft und Tod," *ib.* 1891. He embraced Protestantism.

I. BR.

**BÜDINGER, MOSES ISRAEL BEN ISAAC:** Teacher at Metz at the end of the eighteenth century and the beginning of the nineteenth. He devoted himself to Hebrew grammar and literature and trained a large number of grammarians and writers of elegant Hebrew. Büdinger was the author of the following works, all published at Metz: "Em le-Mikra" (Mother of Reading), a manual of the Hebrew language, compiled from various elementary books, 1816; "Hanok le-Na'ar" (Train up the Child), an extract of the preceding work, 1816; "Iggeret Purim" (Essay on Purim), the ritual laws concerning the Feast of Purim, together with the roll of Esther, 1816; "Mahzor," a commentary on the festival prayers, together with the text and a German translation by Prosper d'Alsace, in 9 vols., 1817; "Derush le-Bar Mizwah" (Lecture for a Confirnee), with a German translation by Prosper d'Alsace, 1819; "Selihot," a commentary on the penitential prayers, together with the text, 1822.

In addition, Büdinger reedited the ethical work of Isaac Aboab, "Menorah ha-Maor," with the Hebrew commentary, "Nefesh Yehudah," and a

Judæo-German translation by Moses Frankfurter, Metz, 1769.

**BIBLIOGRAPHY:** *Allg. Zeit. des Jud.* Supplement, 1839, No. 2; Fürst, *Bibl. Jud.* i. 1835; Zeitlin, *Bibl. Post-Mendels.* p. 48. s. I. Br.

**BÜDINGER, MOSES MORDECAI:** German educator; born at Maidorf, a village in Hessen, Jan., 1783; died at Cassel Jan. 31, 1841. At the age of twenty he became a servant in the house of a petty Jewish merchant, and later, by dint of indefatigable zeal, became sholet, hazan, and religious teacher in a small congregation. After making the necessary preparatory studies during his four years' residence in Naumburg, where he was private teacher, he went to the University of Marburg. In 1820 he became tutor in the family of the court banker Kanlla, in Stuttgart. From 1824 he occupied with great distinction the position of principal teacher of the Jewish pedagogical seminary at Cassel. Büdinger was also a prominent preacher, and very often delivered lectures in the little synagogue attached to the seminary, on moral and religious subjects. In 1830 the philosophical faculty of the University of Marburg gave him the degree Ph. D. for his "Leitfaden beim Unterrichte der Religion." The government rewarded him by appointing him member of the "Landrabbinat." His only son was the historian Max Büdinger.

Büdinger's first work was "Derek Emunah, oder die Kleine Bibel" (1823), which was introduced as a text-book in many schools. Of his numerous sermons and addresses may be mentioned "Zehn Geistliche Reden" (Stuttgart, 1821).

M. St.

**BUDNY, SIMON:** Calvinist priest of Lithuania in the sixteenth century; founder of the Polish sect of the Budnians, who were surnamed "Half-Jews" ("Semi-Judaizantes"). He studied at the Academy of Cracow, where he became acquainted with some of the disciples of Socinus, Blandrata, and other Unitarians, who, being outlawed by Catholics and Reformers alike, had found shelter in Poland, where they could live and speak freely. Budny was invited by Prince Nicholas Radziwill in 1562 to take the place of pastor in the newly built Calvinist church at

Kleck. Here he began his Polish translation of the Bible, which was published in Nieswicz in 1572. He then turned to the Socinians, and was one of their most ardent missionaries in Lithuania.

Budny associated much with Jewish scholars, and was a great friend of the Jews. He was somewhat familiar with the Hebrew language and literature. Hiezekiah David Abulafia mentions him in his work "Ben Zekunim" in the following words: "There is another wise man, by the name of Simon Budny, who praises the Talmud very much and considers it to be the best work of all literatures."

The exact date of Budny's

death is unknown; but he died before Faustus Socinus—according to Grätz in 1584. His works are very rare, the Catholics having collected and burned all that they could obtain.

**BUDUSHCHNOST** ("The Future"): Russo-Jewish weekly, established (1900) and edited by S. O. Gruzenberg. Like the "Voskhod," it gives val-

Synagogue at Budweis (Pointed Style).  
(After a photograph.)

nable information concerning the history of the Jews and their social life and institutions; but while the former periodical is in favor of assimilation, the latter is of a Zionist tendency. Most of the leading Zionist writers of Russia are among its contributors. The "Budushchnost" publishes a "sbornik," or literary annual, as a supplement.

M. R.

**BUDWEIS:** City of Bohemia. Jews were settled there in the first half of the fourteenth century, possibly earlier. In 1337 the community was destroyed by the Flagellants. In 1341 King John I. of Bohemia again admitted two Jews, who were granted remission of taxes for a period of ten years. They were compelled, however, to pay an impost to the city, which was set apart to cancel its debts to foreign Jews. They also erected a synagogue, which fact shows that many other Jews joined them. In 1390 a Jews' quarter ("vicus Judæorum") is mentioned; it was situated close to the parsonage, because the Jews, on account of their financial and commercial importance, had to be near the authorities.

A responsum concerning the Jews of Budweis is recorded in the fifteenth century. In 1506, Jews were expelled from Budweis, and were not permitted even to visit the annual fairs. Hence the "persecutions in Budweis" in 1505, during which thirteen Jewish women drowned themselves, and those of 1564, which are mentioned in the Nachod "Memorbuch," can not refer to the Bohemian city of Budweis.

Since 1848, Jews have again lived at Budweis, and they have had an incorporated congregation since 1859. The cemetery was laid out in 1866; the synagogue (see p. 421), a building in the pointed style of architecture, was built by Max Fleischer of Vienna. There is also an organization of Jewish artisans in the city. The district rabbi is (1902) Adam Wunder. The nineteen communities of the district of Budweis include 252 families, numbering 1,263 persons.

**BUENA ESPERANZA, LA** ("The Good Hope"): Title of a Jewish weekly, published in Judæo-Spanish and in rabbinic characters at Smyrna since 1874. It first appeared under the name "La Esperanza." Aaron de Joseph Hazan has been its editor from the beginning.

G.

M. Fr.

**BUENO (BONUS):** Family of Spanish origin, members of which, including many physicians and scholars, have settled in southern France, Italy, Holland, England, and America, as well as in the Orient.

**Abraham Bueno:** Physician in Amsterdam, where he died in 1633.

**Benjamin Bueno de Mesquita:** Died in New York, Nov., 1683. The monument erected to his memory is one of the oldest in that city ("Publications Am. Jew. Hist. Soc." i, 91 *et seq.*).

**David Bueno:** Lived at Leghorn in the seventeenth century. He was wealthy and fostered Jewish science. He directed that Solomon Adret's collection of responsa ("Toledot Adam") be printed at his own expense at Leghorn in 1657, but died at an advanced age before the work was completed.

**David Bueno de Mesquita:** Lived in Amsterdam in the seventeenth century. He was the husband of a granddaughter of Francisco Fernandez de Mora. He was the "resident" of Duke Christian Ernst of Brandenburg-Bayreuth, and in 1684 served as agent-general of the dukes of Brunswick-Lüneburg (De Barrios, "Aumento de Israel," p. 172).

**David ben Raphael Hayyim Bueno:** Editor in Venice from 1704 to 1732.

**Ephraim Hezekiah Bueno:** Died at Amsterdam Nov. 8, 1665; son of Joseph Bueno. According to the inscription placed beneath a portrait of him painted by Rembrandt about 1647 and engraved by Lyrius, he was "Alter Avenzoar, magnus in medi-

Ephraim Hezekiah Bueno.

(From Rembrandt's painting of the "Jewish Doctor.")

eis, magni discipulus patris" (a second Avenzoar, a distinguished physician and pupil of his celebrated father). In 1650, in conjunction with Jonah ABRAVANEL, he published several liturgical works, among which were a Spanish translation of the Psalms, entitled "Psalterio de David, en Hebrayco Dicho Theylim, Tradladado con Toda Fidelidad Verbo de Verbo del Hebrayco," Amsterdam, 1656, and "Pene Rabbah" (1628), the first work of Manasseh ben

Israel, with whom he, as well as his father, was on terms of intimate friendship.

In 1656 Bueno, together with the pious and charitable Abraham Pereira, founded the scientific society "Torah Or" in Amsterdam.

**Isaac Bueno:** Hakam in Jerusalem about 1685. He was the author of dialectal notes on the codes Orah Hayyim and Yoreh De'ah, entitled "Shulhan Melakim" (The Kings' Table; Azulai, "Shem ha-Gedolim," s. v.).

**Jacob Bueno:** Physician; died at Amsterdam in 1661; probably a son of Abraham Bueno.

**Joseph Bueno:** Physician; died at Amsterdam Aug. 8, 1641; father of Ephraim Bueno. After having received his degree of doctor of medicine in Bordeaux, he went to Amsterdam some time before 1625. In that year this "new Jewish physician," as the French ambassador D'Espesses states, was summoned to the sick-bed of Prince Maurice of Orange. "The Jewish physician," he continues, "Joseph Bueno, has made the prince of Orange take some powders, and will not allow any one to despair of his life." But Bueno had been deceived in his hopes, for the prince died April 23, 1625.

According to Daniel Levi de Barrios, Bueno was also a poet, and celebrated the "Conciliador" of his friend Manassch ben Israel in a Spanish sonnet. Sarah, Bueno's wife, died May 15 (not 25), 1654.

**Joseph Bueno:** Poet; lived in Amsterdam in the seventeenth century. In the martyrology entitled "Elogios que Zelosos Dedicaron," etc., he celebrated the martyr Bernal, who was burned at Cordova May 3, 1655. From the fact that this composition was of the kind known as a "silva," Wolf ("Bibl. Hebr." iii. 385) and Steinschneider ("Hebr. Bibl." iv. 91) have erroneously called him "Bueno Silva."

**Joseph Bueno:** Went, probably from London, to New York about 1680. In the latter city he became a highly respected merchant, and in 1681 purchased land for a Jewish cemetery ("Publications of the Am. Jew. Hist. Soc." i. 91, ii. 81 *et seq.*, 85 *et seq.*).

**Joseph Bueno de Mesquita:** Rabbi in the Orient; mentioned by Samuel Zarfat in his "Nimuke Shemuel" (Nepi-Ghirondi, "Toledot Gedole Yisrael," p. 168).

**Joseph Morenu Bueno:** Physician in Amsterdam. He possessed extraordinary talent, and died at the early age of twenty, Sept. 16, 1669.

**Samuel Bueno:** A contemporary of Solomon Alkabez, and, like him, devoted to the study of mysticism; lived in Safed, Palestine, about 1550.

**Solomon Bueno:** Physician in Amsterdam, where he died 1681.

**Solomon ben Jacob Bueno:** Editor in Cremona, Italy, in 1576.

**BIBLIOGRAPHY:** D. H. De Castro, *Keur v. Grafsteenen*, pp. 77 *et seq.*, 87 *et seq.*; Koenen, *Gesch. der Joden in Nederland*, pp. 208, 433; Kayserling, *Bibl. Esp.-Port.-Jud.*, pp. 31 *et seq.*, D. M. K.

**BUENOS AYRES.** See SOUTH AMERICA.

**BUFFALO:** A name common to different species of *Bovide*. The best known is the *Bubalus buffelus*, or *Bos bubalus*, generally called in Eastern countries *jamoos* or *chamoosh*, a word of Persian origin, meaning "ram-cow." From India, its native home, the buffalo has been gradually introduced into western

Asia, Greece, southern Italy, and northern Africa. Some writers have tried to identify the buffalo with the "re'em" (רְעֵם) of the Bible, and Gesenius ("Thesaurus," p. 1249) was one of them. This theory of identity, however, is now generally abandoned. The re'em appears to have been a much wilder animal, an animal utterly impossible to domesticate (Job xxxix. 9-12). Besides it seems established that the buffalo was not introduced into western Asia until shortly before the common era. Hence the re'em, identical with the Assyrian "rimu," is now generally regarded as the wild ox of the mountain.

H. H.

**BUFFALO:** The second city in New York state. Its first connection with the history of the Jews occurred in 1825, when Mordecai M. Noah laid the corner-stone of his projected city of ARARAT in one of its churches.

Though a flourishing city of over 15,000 inhabitants, Buffalo in 1835 contained but one Jew, named Flersheim, from Frankfort-on-the-Main; he gave private instruction in German.

The earliest Jewish arrivals were German, and one Englishman. The first attempt at a religious organization was the holding of the Passover services, in the spring of 1847, in Concert Hall, on the southwest corner of Main and Swan streets. On Oct. 3, in the same year, the Jacobsohn Society was organized; it disbanded five years later. The society purchased a piece of land for burial purposes on Fillmore avenue, which has been unused since 1861.

In 1847 the first congregation, Beth-El, was established, under the presidency of Mark Moritz, and had as its reader the Rev. Isaac M. Slatky. Services were held for more than two years on the third floor of the Hoyt Building, at the corner of Main and Eagle streets. In 1850 this congregation bought a schoolhouse on Pearl street, near Eagle, which it converted into a synagogue, and dedicated July 22 of the same year. In 1874 this congregation, which uses the Polish liturgy, built its own synagogue, which it still occupies.

The German element in Buffalo organized in Nov., 1850, the Beth Zion congregation, which found great difficulty in maintaining itself, but continued to exist until 1864, when it merged into the newly established Reform congregation. In 1863 a number of Jews requested the Rev. Isaac M. Wise of Cincinnati to send them a minister to conduct the services of the New-Year and the Day of Atonement according to the Reformed liturgy. These services were held in Kremlin Hall. The following year, at a meeting held (Oct. 9) in Kremlin Hall, at which Leopold Kaiser presided, the congregation Temple Beth Zion was organized. A year after its organization the congregation purchased for its place of worship a Methodist church in Niagara

street. This building was dedicated **New Temple.** May 25, 1865, and the Rev. I. N. Cohn was elected minister. He was succeeded in 1866 by the Rev. Samson Falk, who continued his ministration until his death, Dec. 24, 1886

The congregation called as his successor Rabbi Israel Aaron, D.D., then at Fort Wayne, Ind., who was installed May 1, 1887. During his incumbency a new and more commodious temple was erected on Delaware avenue.

The influence of this congregation in promoting fellowship among the religious bodies of Buffalo has been very great. Upon the walls of the temple are tablets recording the sentiments of Episcopalians and Baptists. Its minister has been invited to preach in most of the principal churches of the city.

The educational and social-settlement work of the congregation is managed by the Sisterhood of Zion, founded in April, 1891, by Dr. I. Aaron. This body of women owns, free of debt, Zion House, a busy center in the heart of that section of the city inhabited by Russian Jews.

There is a large colony of Russian Jews in Buffalo, who own five synagogues. Among their rabbis have been several Hebrew scholars and writers of note; *e.g.*, Rev. **Russian Jews at Buffalo.** Harry Singer, author of "Sefer Zikkaron basefer," published in Wilna.

There are a number of benevolent societies in Buffalo, but the chief work is under the efficient supervision of the Hebrew Board of Charities, which represents several organizations, and receives into its treasury nearly all funds for the relief of the poor.

Buffalo is associated with Rochester and Syracuse in the support of the Jewish Orphan Asylum of western New York, situated at Rochester.

The Union of American Hebrew Congregations held its second council in Buffalo in 1875, at which it was finally determined to open a Hebrew Union College. In 1900 the Central Conference of American Rabbis met in Buffalo.

The present (1902) Jewish population is estimated at 7,000. Among the Jews of Buffalo who have held public positions are R. Wolfsohn, United States consul at Mannheim; Hon. Louis W. Marcus, judge of the surrogate court; and Simon Fleischmann, president of the common council.

I. AA.

**BUK:** Town in Prussia, province of Posen, which, after the second partition of Poland, in 1793, passed under Prussian rule. Jews then began to settle in the place, which, as an old episcopal town, had hitherto excluded them. By 1820 many Jews were living there. The Hebrah Kadishah Gomle Hasidim, an association for nursing and burial which is still flourishing, was founded in that year. The synagogue was built in 1846-47.

The year 1848 was disastrous to the Jews of Buk. Their synagogue was almost completely demolished during an uprising of the Poles, and several Jews were killed. After order was restored, the synagogue was renovated, and in 1894 it was entirely rebuilt.

At present (1902) there are about 250 Jews in Buk.

D.

M. L. B.

**BUKKI:** 1. Son of Jogli, prince of the tribe of Dan, who represented his tribe in the division of the land (Num. xxxiv. 22). 2. Son of Abishua' and father of Uzzi, a priest, the fourth in line from

Aaron (I Chron. v. 31), and ancestor of Ezra (Ezra vii. 4). In the Apocrypha his name is given as **Boccas** (I Esd. viii. 2) and **Borith** (II Esd. i. 2).  
J. JR. G. B. L.

**BUKOWINA.** See GALICIA, CZERNOWITZ, RADAUTZ, SERETII, SUCCAWA.

**BUL:** The name of the month in which the building of Solomon's Temple was completed, as mentioned in I Kings vi. 38. It would seem that at the time of the writing of that passage the name was obsolete; for the writer found it necessary to define "Bul" as the eighth month. The name is Canaanitish, occurring in the Phœnician inscriptions, on the Eshmunazar tablet ("C. I. S." i. 3, line 1), on an inscription from Cyprus (*ib.* i. 10, line 1), and on one from Idalium (*ib.* i. 90, line 2). It was adopted by the Israelites on their entrance into Canaan, and was retained by them during preexilic days. In post-exilic times בּוּל, along with the names of three other months, "Ziv" (I Kings vi. 37), "Abib" (Ex. xiii. 4, xxiii. 15; Deut. xvi. 1), and "Etanim" (I Kings viii. 2), was supplanted by the names current in Babylonia, and "Bul" became "Heshwan." This could only have been an approximation, however; for the old calendar of the Canaanites was solar and was adapted to an agricultural people, whereas the Assyrian calendar was lunar, with compensations to harmonize with the solar year.

The etymology of the word is still in doubt. The Septuagint simply transliterates Βαῦλ. The Targum attempts an etymology in its translation מִיִּסְפָּה אֲכַבֵּי ("destroying the crops"), pointing clearly to the root נָבַל ("to destroy"). This derivation is also given by the Rabbis (Yer. R. H. i. 56d): "The month in which the leaf is destroyed and the earth becomes full of clods," referring to the great rains in that month. A somewhat fanciful explanation fastens on כָּלַל ("to provide"; Judges xix. 21). "It is the month in which they provide food for the cattle from the house" (Tan., Noah, 11), the fields being waste.

**BULAN**: King of the Chazars, who in 620 embraced Judaism. Joseph, "Chaghan" (king) of the Chazars, in answer to a letter from Hlisdai ibn Shaprut (960), informs him that 340 years earlier one of his ancestors, Bulan, became ruler of the Chazars. To him the Lord appeared in a dream, promising him might and glory. Bulan went by the Dardan road (Caucasus) to Aradavil (Ardebil), the capital of Adherbaijan in Armenia, and gained great victories. He then determined to adopt the Jewish religion. The Byzantine emperor and the calif of Ismael each sent him deputations with valuable presents and wise men versed in religious matters to convert him to their respective religions. Bulan summoned wise men of Israel also, and examined them all. As both the representatives of the religion of the Nazarene and those of Islam referred to Judaism as the foundation of their faiths, Bulan declared that they, the opponents of Judaism, had themselves made an impartial avowal of the excellence of the Jewish religion; and he therefore accepted it. See CHAZARS.

**BULAT** (בולט), **ABRAHAM IBN**: Talmudic scholar; lived in Spain in the fifteenth century. He was the disciple of Isaac de Leon, and in a vigorous dispute of the latter with Isaac Gayyal concerning a halakic decision, Bulat took the part of his master and wrote a booklet demonstrating that Gayyal's decision was against the law. This booklet was published, together with the arguments of Isaac de Leon and Isaac Gayyal, in the miscellany "Shib'a 'Enayim" by Jacob London and Abraham Meldola (Leghorn, 1745).

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, ii. 138; Steinschneider, *Cat. Bodl.* cols. 643 and 671.

L. G. I. BR.

**BULAT** (בולט), **JUDAH BEN JOSEPH IBN**: Spanish Talmudist and rabbi; born at the end of the fifteenth century at Estella, Navarre; died probably at Constantinople about 1550. He was the author of "Kelal Kazer mi-Kol ha-Rashum Beketab" (Short Abstract of All That Has Been Published), containing a short compendium of rabbinic theology, Halakah, morals, ethics, jurisprudence, and political science. The book appeared in manuscript at Constantinople in 1530, and could be obtained from the author only for a limited time, on the payment of one florin as a fee for perusal. At present, also, the work is rare. Besides, Bulat published the Talmud methodology "Halikot 'Olam" of Joshua ben Joseph (Constantinople, 1510). Tam ibn Yahyah, in his work "Tummat Yesharim," and Elijah Mizrahi, in his responsa, both colleagues of Bulat at Constantinople, cite some of his responsa.

Bulat, possessing a thorough knowledge of the Talmud, depth of thought, and excellent judgment, opened up new methods in Talmudic study. He became aware of the fact that the method of Talmud interpretation practised by some of his contemporaries was contradictory to the real meaning of the Talmud. It was their custom to regard every opinion, even every sentence, in the Talmud as a binding rule; and they went so far as to look upon every "posek" (post-Talmudic Halakah) in the same way. Consequently, a vast number of new "humrot" (intensifications of the Law) continued to be introduced; and it was considered a duty of the pious to refrain from acts tabooed by their predecessors, though only by a few of them.

Similarly, the theoretical opinions of earlier Talmud commentators were studied in a receptive, uncritical spirit. Bulat, however, returned to the Talmud itself. He distinguished between the decisions arrived at in the Talmud, that should be regarded as standard, and the opinions of individuals, which might be disregarded. He sought for the true meaning, the motives and aims of the Talmudic controversies and Halakot; and he considered needless intensifications of the Law, especially in marital and juridical questions, as criminal. He maintained that whoever was unable to find in the Talmud a true solution of new circumstances, by means of logic and analogy, was not worthy to work in the province of Halakah; and that investigations into the meaning of "poskim" as a rule lead to nothing. "Many times," said Bulat, "the reader is perplexed because of the disagreement between the various writers; and often the different parts of a posek contradict one another, thus perplexing and completely bewildering the reader. For this reason the true rendering of the text must be sought in the original source" במקור התחלתו ("Tummat Yesharim," No. 34).

It was natural that in his endeavor to carry his views into practise he should meet with the opposition of his colleagues at Constantinople (*ib.* No. 39). Nevertheless, even his opponents respected him; and one of them, Tam ibn Yahyah, used to address him with the most flattering epithets (*ib.* Nos. 35, 38).

BIBLIOGRAPHY: Conforte, *Kore ha-Dorot*, pp. 33a, 34a; Azulai, *Shem ha-Gedolim*, p. 64; Steinschneider, *Cat. Bodl.* cols. 1290, 1303; Dukes, *Nahal Kedumim*, i. 61; Tam ibn Yahyah, *Tummat Yesharim*, part I., Venice, 1622; *Oholei Tam*, Nos. 7, 34-39, 46-49 (in No. 34 is given one of Tam Bulat's responsa, which dates from 1525, containing an exposition of Bulat's principles).

L. G. I. BER.

**BULGARIA**: Principality of southeastern Europe, under the suzerainty of Turkey. According to Josephus ("Ant." xxii.) and Belloguet ("Les Cimérix," p. 24) the Jews knew of Mesia (old name for the Balkan peninsula) at a very early age. But the first Jewish community of Bulgaria was founded at Nicopolis under Trajan, after the victories gained over the Dacians. The Bulgarian czar Krum brought some Jews among the 30,000 prisoners carried away from Thessaly in 811. A large number of Byzantine Jews established themselves in Bulgaria in 967, at Nicopolis, Widdin, Silistria, and Sofia (compare Solomon Abraham Cohen,

Responsa, Leghorn, 1592). The rabbinical authors called them Romanim Jews. They preserved their Greek customs, one of these being to choose a chief rabbi from without their own city, and another to close their shops on the day of a burial; this latter custom having been observed until the year 1720 ("Mayim Rabbim," Amsterdam, 1637).

In 1189 the two brothers Assen and Peter founded the Bulgarian kingdom, this being the second foundation. They entered into relations with Venice, Ragusa, and Geneva. As the majority of the merchants in these cities were Jews, offices were established by them (according to Ubcini, "Provinces Danubiennes") in the ports of Bulgaria on the Danube, especially at Widdin. Under the czar Assen II. (1218-41), the successor of Assen I., the number of Jews increased. The pope in a letter to Bela IV., king of Hungary (1238), complains that the above-mentioned czar received heretics into his dominions (Gh. Sincat, "Cronica Romanilou," p. 262, Jassy, 1853). The Tatars invaded Bulgaria about 1290, under their chief, Khan Tchoca, who was killed by a Jew at the siege of Tirnova. Muralt (ii. 402) places this event in 1293, other historians, as Hammer-Purgstall ("Goldene Horde"), in 1299. An anonymous work, printed by R. Jonah of Constantinople in 1743, mentions the communities at Philippopolis (1344), at Zagora (1344), and at Nicopolis and Silistria (1377), as existing at the time when Bulgaria fell into the hands of the Turks. When Czar Ivan Alexander came to the throne, in 1330, he was a widower, and father of two children, Michel-Assen and Dobritch. The following year he married his second wife, the daughter of a woyewode,

by whom he had one son, Ivan Strachenir. After a time he repudiated this wife, and married in 1335 a beautiful Jewess of Tirnova, Sara by name, who was converted to Christianity (Jirecek, "Gesch. der Bulgaren," p. 312, Prague, 1876).

The new czarina received the name of Theodora or "Newly Enlightened Czarina and Sole Support of all the Bulgarians and Greeks." Gifted with a remarkable intelligence, according to the historians, she aided the czar in all affairs of state. But when Ivan Alexander grew old, Theodora, wishing to secure the future of her children, Ivan Chichman and Tamar (or Mara or Marie), divided the kingdom in 1355, Ivan Chichman receiving one part, with Tirnova as the capital, Dobritch receiving the Dobroudja, and Strachenir the province of Bdin or Widdin. Thus Theodora, moved by maternal sentiment, made the mistake of enfeebling the land by dividing it. Ivan Chichman, the son of the Jewess, succeeded his father in 1346, and in 1367 he hospitably received the Jews who had been driven from Hungary and had settled at Nicopolis, Plevna, and Widdin. Mention is made of R. Shalom of Neustadt, who settled at Widdin. The community of Sofia, formerly called Stredetz, and founded by Byzantine Jews at the end of the tenth century, erected a synagogue, which is still known under the name "Kahal de los Gregos." Ashkenazic Jews established themselves at Sofia in 1360. The Bulga-

rian Jews were then divided into the following four rituals: (1) Bulgarian Jews properly so called; (2) Italian Jews from Venice; (3) Roman or Byzantine Jews; and (4) Ashkenazim, of German origin.

It appears that after the death of Ivan Chichman a reaction was felt against the Jews of Tirnova, which led to their emigration to Nicopolis. The Spanish Jews who arrived in that city in 1492 found there a Jewish community, having at its head Hayyim b. Albalgui or Albalgri (the Bulgarian). Among the immigrants were Ephraim Caro and his son Joseph, from Toledo; the latter married the daughter of this rabbi, and later became famous by his work, the Shulhan 'Aruk. Widdin is also an ancient settlement, judging from a manuscript of the beginning of the fifteenth century, entitled "Perush we-Tosafot," by R. Dossa b. Moses of Widdin. Bazarjik, or Tatar Bazarjik, received its first Jewish settlement about 1500, with the arrival of some Spanish refugees, Aobi being its first rabbi.

Under Turkish rule the Jews of Bulgaria were little known; all Jewish life seems to have centered in the communities of Constantinople, Salonica, Smyrna, and Adrianople. All that is known is that from time to time they were severely oppressed by rapacious Turkish officials as well as by the Greeks. During the next three centuries and a half (1500-1876) the only distinguished Jewish name is that of Joseph Caro. It was not until the Russo-Turkish war of 1877-78 that the Jews of Bulgaria came into notice. Goaded by the insolence of the peasantry

who were in rebellion against the sultan, they did not know whether to favor the movement for the emancipation of Bulgaria or to remain faithful to the Turks. Their hesitation cost them much suffering. As soon as the Russian forces appeared before a town, the Bulgarians would denounce the Jews as hostile, and would set about to punish them. They were expelled in a body from Kezanlik, Zagora, Widdin, Shipka, and elsewhere, plundered of all their property, and forced to take to the road under miserable conditions. Their sufferings aroused a cry of horror throughout Europe, reaching even to America (see "Bulletins" of the Alliance Israélite Universelle); thousands took refuge in Constantinople, where their needs were looked after through the munificence of Baron Maurice de Hirsch.

Upon the close of the war the Jews of Bulgaria enjoyed comparative repose for the space of fourteen years (1878-92). In 1877, when the Turks set fire to the city of Sofia, it was the Jews and Jewesses, according to Bianconi ("Carte Commerciale de la Bulgarie," p. 12, published by Chaix, Paris), who fought the flames, and, armed with whatever weapon came to hand, beat off the soldiers employed in setting fire to the buildings. Thus the Bulgarian capital owed its preservation to its Jewish inhabitants, and, in recognition of their bravery, Prince Alexander decreed in 1879 that the fire-brigade should be chosen exclusively from Jewish citizens; and on all occasions of reviews, processions, etc., the Jewish firemen have the place of honor next to the picked troops of the Bulgarian army. When, in 1885, Bulgaria was waging war against Servia,

the Bulgarian Jews distinguished themselves so highly in the battles of Pirot and Slivnitsa that Prince Alexander publicly thanked them, calling them "true descendants of the ancient Maccabees."

The Bulgarian constitution accords all civil rights to Jews, in obedience to the Treaty of Berlin (1878).

They are electors, are eligible to office, and are to be represented in every municipality by one or two members.

They may become members of the *Sobranje* (Chamber of Deputies). They are subject to military service and have the right of military promotion. Each Jewish community is governed by its "synagogal committee," which levies a tax upon each individual. From this revenue, together with the voluntary offerings of the faithful, the committee, whose members serve three years and are officially recognized by the prince, provide for all the communal expenses as well as for the maintenance of Jewish schools. The liberality of the new constitution was at once received with enthusiasm by the Jews. Three graduates of the military school of Sofia attained the rank of major. They are Mochohoff Garte of Philippopolis, Moréno Graziani of Shumla, and Behdjeto, or Behdjeto, of Rustchuk; the last has recently resigned his commission.

Since 1890, however, anti-Semitism has made its appearance in Bulgaria, so that both elementary and high schools have become almost closed to Jews by reason of the hostility of the Christian students. M. Gabbé, a certain large landed proprietor, was elected to the Chamber of Deputies, whereupon his Christian colleagues made their utmost endeavors to invalidate the election because of his Jewish race. An accusation of murder for ritual purposes was made against the Jews of Wratzza in 1891, but the jurist Stoiloff (later minister), proved their innocence ("Bulletin" of the Alliance Israélite Universelle). Anti-Semitism has developed to such an extent in Bulgaria that the Jews are now emigrating in large numbers to Turkey in Asia.

The Jews of Bulgaria have not contributed to the national literature; they have written nothing in the Bulgarian language up to the present time (1902). They have four journals: one, which might be called peripatetic, "El Amigo del Pueblo," is published alternately at Sofia and at Rustchuk; the others are: "El Eko Judaico," "La Verdad," and "Ha-Shofar." A Judæo-Spanish journal, "El Día," was published at Philippopolis in 1897, and a Judæo-Spanish review, "La Alhorada," at Rustchuk in the same year. A Jewish journal in the Bulgarian language appeared for the first time at Philippopolis for some months in 1899, under the name "Teheweschky-Prava" (The Rights of Man). The Alliance Israélite Universelle has fifteen schools in Bulgaria, nine for boys, with 2,235 pupils, and six for girls, with 1,760. From the year 1886 the Jews of Sofia evinced the desire to be worthily represented in the person of their chief rabbi, and, no longer content with a simple Talmudist, more or less learned in rabbinical matters, they called Dr. Dankowitz that year to be their spiritual head, a widely read scholar, linguist, and possessor of

administrative capacity. He warmly defended the interests of his constituents with word and pen, particularly in the Wratzza affair; but, owing to the machinations of some of his flock, he resigned in 1889. In 1891 Dr. Moritz Grünwald was called from Jung-Bunzlau in Bohemia, and remained until 1895, when he died while on a visit to London. Grünwald instituted pastoral tours, visiting the Jewish communities in turn over the entire country. Since 1890 the Jews of Bulgaria, on account of communal dissensions, political troubles, and possibly the Zionist agitation, have been without any chief rabbi or official defender, until quite recently, when Dr. Ehrenpreis was appointed to the position.

Until 1880 the Jews of Bulgaria, like those of other portions of Turkey, occupied themselves exclusively with trading; but since the foundation of trade-schools by the Alliance Israélite,

**Industries.** there have been among them carpenters, blacksmiths, coppersmiths, type-setters, leather-workers, and furriers. The most prominent Jewish families of Bulgaria are those of Présenté at Bourgas, Davitchon Levi at Sofia, and Canété at Rustchuk.

In a total population of three and a half million inhabitants there are 30,000 Jews, and these are divided into thirty-five communities, nearly all of which observe the Sephardic ritual. Some cities, among them Sofia, Rustchuk, Philippopolis, Varna, Widdin, and Bourgas, have, in addition to the Sephardic community, also a small

#### Pop- ulation.

group of Ashkenazic Jews. Following is an exact list of the places in Bulgaria inhabited by Jews, and the Jewish population of each: Aithos, 45 Jews; Bercootza, 250; Bourgas, 550; Bazarjik (Tatar), 1,700; Carlova, 200; Carnabat, 400; Dobritz, 200; Dubnitsa, 1,100; Ferdinand, 160; Haskovo, 465; Kustendil, 1,000; Kezanlik, 200; Lom-Palanka, 325; Nova-Zagora, 180; Novi-Bazar, 20; Nicopolis, 150; Philippopolis, 3,075; Pleven or Plevna, 405; Pravady, 250; Rasgrad, 200; Rustchuk, 3,000; Shumla, 1,000; Sisto (Svitchev), 135; Silistria, 280; Slivno, 225; Samakoff, 1,350; Stauimaka, 140; Sofia, 8,000; Stara-Zagora, 520; Tchirpan, 200; Toztrakan, 50; Varna, 1,050; Widdin, 1,950; Wratzza, 75; Yambol, 1,010. Total, 29,860.

**BULL.** See Ox.

**BULL WORSHIP AMONG ANCIENT HEBREWS.** See CALF, GOLDEN.

**BULLOCK.** See CATTLE.

**BULLS, PAPAL, CONCERNING JEWS.** See POPES.

**BULRUSH:** A rush or reed. The term "bulrush" in the Bible occurs once as a translation for "agmon" (Isa. lviii. 5) and twice for "gome" (Ex. ii. 3; Isa. xviii. 15). Both of these words occur elsewhere in the Bible, where they are translated "rush." Both in Hebrew and in English the words "bulrush"

and "rush" seem to be used interchangeably. According to Isa. lviii. 5, bulrushes grew quite high and had a large flower that, because of its weight, drooped over. The plant was peculiar to swampy places (Isa. xxxv. 7; Job viii. 11). By this description any one of the water-rushes might be meant, but the *Typha elephantina* comes nearest to it. The ancients put bulrushes to various uses. They made boxes (Ex. ii. 3) and even boats of them (Isa. xviii. 2). The bulrush was naturally used as fuel (Job xli. 12); and it would appear that it was used as a piercing-tool (Job xl. 26). See REEDS.

J. JR.

G. B. L.

**BULWARK.** See WAR.

**BUN**: As a personal prenominal this name is a dialectic abridgment of "Abun" ("Abin," "Rabin"; see Jastrow, "Dictionary," 147a; compare Pešik. xxx. 192b; Yer. Hag. i. 76c; Yer. Suk. v. 55d), and appears exclusively in Palestinian literary sources (Yer. Ter. viii. 45c; Yer. Pes. iii. 29d; Yer. Shek. iv. 48b; Yer. Yeb. iii. 4c). Several amoraim so cited are mentioned under the full name as it appears in the Babylonian Talmud (see, for example, אבין ב. חייא, אבין ב. קאחא); and a Palestinian scholar of the fourth century is cited once under the name of "Bun b. Bisna" (Yer. Yeb. iv. 7b), and once (*ib.* i. 2d) under that of "Abun b. Bizna."

J. SR.

S. M.

**BUNNEY, EDMUND**: English preacher and Hebrew scholar; born at Vache, near Chalfont, St. Giles, Buckinghamshire, in 1540; died at Carwood, Yorkshire, Feb. 26, 1618 or 1619. He was made prebendary of Oxgate, St. Paul's, London, in 1564; and in 1565 master of arts of Oxford, and in the same year a fellow of Merton College. At Bolton Percy Rectory he was made subdean; but after 1579 he turned itinerant preacher. His principal works are: "The Whole Summe of Christian Religion," 1576; "The Scepter of Judah; or, What Manner of Government It Was That unto the Commonwealth or Church of Israel Was by the Will of God Appointed," 1584; "The Coronation of David: Wherein Out of That Part of the Historie of David That Showeth How He Came to the Kingdome Wee Have Set Forth unto Us What Is Like to Be the End of These Troubles That Daylie Arise for the Gospel's Sake," etc., 1588. Bunney's work on the Hebrew polity was an indication of the Puritan tendencies toward a commonwealth, which were afterward to be put into practise.

**BUNZLAU.** See JUNG-BUNZLAU.

**BUNZLAU (BUMSLO), MEÏR BEN EPHRAIM FISHEL** (called also **Meir Fishels** and **Meir Fishelles**): Bohemian rabbi and Talmudist; born at Bunzlau (Jewish-German, "Bumslo"); died Nov. 23, 1770 at Prague, where he had been for forty years "rosh bet din" and director of a Talmudic academy. His works were never published, since all the manuscripts were destroyed by fire in 1754.

The epitaph of Bunzlau testifies to the unbounded love and admiration which he enjoyed among his contemporaries. In addition to his study of the Talmud he devoted himself to the Cabala, and, it is said, was also well versed in secular sciences. He was reputed to be an eminent preacher, his popularity not being confined to his own community, since his fame as a Talmudist had spread abroad. A very important decision of Bunzlau concerning the treatment of a first-born animal has been preserved in Ezekiel Landau's "Noda' be-Yehudah" (Yoreh De'ah, §§ 82 and 83). Two of his responsa in the "Noda' be-Yehudah" *l.c.* (§§ 72 and 89) testify to his humane disposition and true scholarship.

**BUOL - SCHAUENSTEIN, JOHN RUDOLPH, COUNT VON**: Austrian diplomat; born Nov. 21, 1763; died Feb. 12, 1834, in Vienna. He entered the diplomatic service, and was sent as ambassador to The Hague in 1790, to Basel in 1792, and finally to Dresden. In 1816 he was elected president of the Bundesrath which convened in Frankfort on Nov. 5 of that year, and evinced his liberalism by embracing the cause of the Patriots. At the outbreak of the riots against the Jews of Frankfort, Aug. 9 and 10, 1819, Buol summoned a conference of the members of the council, and called out the federal troops to protect the Jews, as the city militia could not be relied upon. As a result of his liberal views the count came in conflict with Metternich, and was recalled March 20, 1823.

**BURDEN OF PROOF**: In law, the obligation resting upon one or other of the parties to a suit to bring proof of a fact when the opposite party alleges the contrary. The Talmudic phrase is "alaw ha-rayah" (on him is the proof). Of course, the plaintiff who seeks to make out a case for relief states his side first; and whatever the defendant admits need not be proved. But in the jurisprudence of the Talmud there is a broad exception: for everything in the nature of a penalty ("kenas")—*e.g.*, the twofold, fourfold, and fivefold compensation in case of theft—can only be adjudged upon the testimony of witnesses. An acknowledgment by the defendant may be of no use, or may even result in averting the penalty. In an ordinary suit for debt, the plaintiff would first prove by witnesses, or by the production of a bond, that the defendant owes him a given sum for a loan or on a credit-sale; and the defendant would then have to produce his acquittance in writing ("shober"), or the witnesses in whose presence either the debt was repaid or the creditor acknowledged its discharge.

So far there is no difficulty. But some cases are more complex; and to these two maxims are applied: (1) "hammozi me-habero 'alaw ha-rayah" (he who takes away from his neighbor [that is, who asks a judgment for money or property], on him is

the proof), and (2) "nekasim be-hezqatan" (property [abides] in its status); that is, no change in rights is presumed unless proved.

The first maxim is illustrated in a case where two of the defendant's oxen, one "forewarned" and the other "innocent," have pursued the plaintiff's ox, and one of them has killed the latter, but the witnesses can not say which of the two caused the death. It will be presumed that the "innocent" ox did it; and the plaintiff will recover only half-damages. As half-damages are paid only out of the price of the injuring animal, if both the defendant's oxen were "innocent," it will be presumed that the injury was committed by the less valuable of the two (B. K. iii. 11, where other instances of the same rule are also found).

The other maxim is illustrated where a man and his father are killed by one and the same accident, and it can not be shown who died first. The father's heirs say the son died first; the son's creditors say the father died first. According to the opinion of the school of Hillel, which prevails, the property goes to the heirs upon the ground that "property abides in its status"; though here the other maxim would lead to the like result. If a man and his wife die together, the maxim of the abiding status gives the property brought into the marriage by the wife, not assumed by the husband at a fixed value and which is still on hand, to the wife's heirs, but frees the husband's heirs from paying her jointure (B. B. ix. 8, 9).

In cases of doubt which can not be solved by these rules—for instance, where husband and wife die together, as to the disposal of the "iron flock property" (that is, such part of the dowry as the husband has converted to his own use and is personally bound for)—the only rule is, divide into halves. In such a case the husband's heirs would take one-half, and the wife's heirs one-half (see Gemara on last-cited section, 158b *et seq.*).

It will be seen that no allowance is made for circumstances that would raise a greater likelihood on behalf of one of the alternatives—*e.g.*, that the "forewarned" ox rather than the "innocent" one had done the mischief, the larger ox rather than the smaller one. And where two persons die through one and the same accident, no presumption is indulged, as in the Roman law, that the one who by age or sex had the greater power of resistance lived the longer.

Another maxim may be mentioned here. When A has no proof but B's admission for one fact, he must give B credit for such other fact as the latter chooses to couple with it. For instance (Ket. ii. 2). B says to A, "This field in my possession belonged to your father, but I bought it from him." If A has no other proof of his father's title, he must admit the purchase; for "the mouth which bound is the mouth that loosed." But if A has witnesses of his father's title, then B must bring proof of his purchase.

L. N. D.

**BURG, MENO:** German military officer; was born in Berlin Oct. 9, 1789; died there Aug. 26, 1853. His father was in very poor circumstances,

but his cousin, S. Sachs, had secured an official position as government building inspector, and received the boy as apprentice. In 1807 Burg was advanced to the position of field-surveyor.

At the outbreak of the Napoleonic wars, Burg wished to join the army; but his application at Breslau to serve in the Guards was refused on account of his being a Jew. His acquaintance with Prince August, however, secured for him admission to the artillery; but his desire to go to the front was not fulfilled, and he had to be content with service in the fortresses. At the end of the war he was appointed instructor at the provisional military school at Danzig; and when the school at Berlin was established, in 1817, he was transferred thither. Burg's principal subject of instruction was geometry, on which science he wrote a text-book that attained great popularity, being frequently republished and translated into many modern languages. He was promoted to a first lieutenantcy, and in due course became eligible for a captaincy; but the appointment was withheld by the king, who expressed the wish that Burg should first adopt Christianity. Burg, who was supported by Prince August, demurred, and defended his course with such courage and vigor that the king finally conceded the point and sanctioned the promotion.

Burg was honored with the Medal for Merit, the Gold Medal for Art and Science, and the Order of the Red Eagle. In 1847 he became a major. During the years 1847-49 Burg was engaged in writing his autobiography, which was published in 1854 in Berlin under the title "Geschichte Meines Dienstlebens."

For a year Burg was one of the elders of the Jewish congregation in Berlin, and was active on various committees.

**BIBLIOGRAPHY:** L. Geiger, *Gesch. der Juden in Berlin*, p. 197, s. M. Co.

**BURGDORF:** Town in the canton of Bern, Switzerland. It contained a few Jewish inhabitants in the fourteenth century. In 1347 Simon, a Jew living there, loaned to the cathedral provost Ulrich forty pounds of pennies. On Feb. 16, 1349, the poverty-stricken Eberhard von Kiburg drove all the Jews out of Burgdorf in the night. After effecting this, "because of their wrong-doing," as he professed, he seized their possessions. In 1900 a few Jews still lived at Burgdorf, though not forming a congregation.

M. K.

**BURGEL (BURGIL), ELIJAH HAI VITA:** Rabbi of Tunis; son of Nathan Burgel. He is the author of "Migdanot Natan," a work in two parts. The first part, printed with a literary production by his father (Leghorn, 1778), contains a commentary on the tractate Baba Mezi'a and notes on several tracts of the Babylonian and Jerusalem Talmuds and on the Yad ha-Hazakah. The second part (Leghorn, 1785) contains novelle on various treatises and a funeral oration.

L. G.

M. K.

**BURGEL, JOSEPH:** Rabbi of Tunis; son of Elijah Hai Burgel; born in 1791; died at Tunis in 1857. He was the author of "Zar'a de-Yosef," on the Tosafot (Leghorn, 1849), and of "Wa-Yikhen Yosef," various responsa (Leghorn, 1852).

L. G.

M. K.

**BURGEL, NATHAN BEN ABRAHAM:** Rabbi at Tunis about 1750; pupil of Isaac Lumbroso. Considered a rabbinical authority, people from far and near brought him cases difficult to decide. When he was an old man he went to Jerusalem, where he died soon after his arrival, in Dec., 1791. He is the author of *נתיבות*, containing novella, explanations on the Mishnaic order Kodashim, of the treatise Horayot, etc. (Leghorn, 1776-78). This was reprinted in the edition of the Talmud, Wilna, 1895-97.

M. K.

**BÜRGER, HUGO** (pen-name of Hugo Lubliner): German dramatist; born in Breslau April 22, 1846; now (1902) living at Berlin. He came to Berlin at the age of twelve, and at seventeen began to produce short dramatic works, one of which, a one-act comedy entitled "Nur Nicht Romantisch" (1865), was well received. He became the proprietor of a textile establishment, and traveled in Belgium, France, and Italy, in the interest of his business. But the great success of his three-act comedy "Der Frauenadvokat" (1873) induced him to devote himself entirely to the theater. That comedy, presented on all the German stages, and the following four-act comedy, "Die Modelle des Sheridan," were published together under the title "Theater" (Berlin, 1876).

Between the years 1876 and 1891 Lubliner wrote about fifteen comedies and dramas, and was also joint author with G. v. Moser of the comedy "Glück bei Frauen" (1884), and with P. Lindau of the drama "Susanne" (1885). A collection of his dramatic works appeared in four volumes in Berlin, 1881-82. He also published two novels, under the collective title "Berlin im Kaiserreich," of which the first, "Die Gläubiger des Glücks," went through numerous editions (6th ed., Breslau, 1886), and the second, "Die Frau von Neunzehn Jahren," also appeared in Breslau (1887). Some of his best-known dramatic works are: "Die Florentiner" (1876), "Die Adoptierten" (1877), "Gabriele" (1878), "Der Jourfix" (1882), and "Die Mitbürger" (1884). Of his later productions, "Gräfin Lambach," "Gold und Eisen," "Im Spiegel," and "Der Kommande Tag" have attracted considerable attention. Lubliner's mastery of stage effects makes his plays almost uniformly successful, while his knowledge of the world, and the ability with which he exposes the weaknesses of modern social life, have added several works of lasting value to the German repertoire.

**BÜRGER, SOLOMON BEN DAVID.** See *BORGER, SOLOMON BEN DAVID.*

**BÜRGER, THEODOR** (pen-name of Daniel Pillitz): Rabbi and preacher in Szegedin, Hungary, 1843-47. Two years after entering upon his office he published a book, "Der Talmud und die Perfectibilität des Mosaismus vom Standpunkte der Reform," in which he completely denied the authority of the Talmud. The theme of this work caused some sensation. In spite of the pen-name the authorship was at once traced to him, and he was forced to resign his office of rabbi. He left his congregation and retired to private life, after first holding memorial services for Archduke Joseph Feb. 7, 1847. In 1849 he published a prayer-book, "Andachtsstunden für Israeliten Beiderlei Geschlechtes."

L. V.

**BURGLARY.**—**Biblical Data:** In English and American law burglary is the offense of breaking into a dwelling-house at night, with the intent to commit a felony, generally with the intent to steal. The Biblical passage on the subject (Ex. xxii. 1-2 [A. V. 2-3]) reads thus: "If the thief be found breaking in ["be-Mahteret," literally, "in the breach"] and be smitten that he die, there shall be no blood-guiltiness for him. If the sun be risen upon him, there shall be blood-guiltiness for him; he should make restitution; if he have nothing, he shall be sold for his theft."

The offense of breaking into a house at night is deemed graver than simple theft only in so far as the offender exposes himself to death at the hands of the inmates; but no greater punishment can be inflicted by the judges. Of the old Jewish versions the Septuagint renders the first half of the second verse thus: "If the sun rise upon him, he is guilty and should die in return." But Onkelos, in the spirit of the tradition, says: "If the eye of the witnesses has fallen upon him, there is blood-guiltiness." Among the commentators, Rashi, as is his usage, gives to the verse a construction found in the Mekilta and in the Talmud; but Ibn Ezra holds to the literal meaning of the text, and maintains that the word ("mahteret") used for "breaking in," like the English word "burglary," implies breaking in at night.

The word "mahteret" also occurs in Jer. ii. 34, where the prophet complains that he found at Jerusalem the blood of innocent poor men, killed, but not in the act of housebreaking—an indication that violent death to the housebreaker had become a common occurrence.

—**In Rabbinical Law:** The Mekilta on the passage in Exodus (Mishpatim xiii.) treats the shining of the sun as a mere figure of speech, signifying that it was clear as the sun that the housebreaker meant to do no harm to the inmates. The Mishnah treats of burglary among capital offenses (Sanh. viii. 6): "He who comes through the breach is judged on account of his latter end [i.e., on account of what he is expected to do in the end]."  
**A Capital Offense.** If one has come through the breach and broken a jar, if there is blood-guiltiness for him, he is bound to pay damages; if not, he is free from paying them." This is ruled on

the principle that where an act is punishable with death (though only with death at the hands of the injured party), the actor does not pay damages.

In the discussion of this Mishnah some of the Babylonian sages (Sanh. 72a) go so far as to claim that even when the burglar has carried the goods away, he can not be held to double restitution, except in the cases where the figurative light of the sun—that is, the certainty of his not intending harm to the person in the house—would raise blood-guiltiness for his death. The apparent result of the discussion is that single restitution is to be made even by the burglar, who has taken his life in his hands; that he has not “with his life” acquired the stolen goods; but at any rate he seems not to be liable to double restitution like the ordinary thief.

As to estimating the intent of the burglar, the Gemara, by way of illustration, puts the case of the father breaking into the house of the

**Proof of son**, where it may be taken for certain that the housebreaker would not

kill the owner, even if the latter should

stand up for the retention of his goods (Sanh. 72d *et seq.*). One argument for this figurative meaning of the text is drawn from the words: “If the sun rise upon him,” as though the sun shone on him alone and not on all alike; hence the light cast upon him by the circumstances must be meant (Mek. *l.c.*; Sanh. 72d; Yer. Ket. iv. 28c).

The question is also raised (Sanh. 72b) whether any one other than the master of the house is justified in killing the burglar; and it is solved in the affirmative, as the text says, “and be smitten,” in the passive, not defining who smote him. Also, whether there must be a breaking into the house proper, or whether coming into another man's courtyard or stable, or upon his roof, would constitute burglary; and the decision is that it would (Sanh. *l.c.*; Yer. Sanh. viii. 26c; Maimonides, “Yad,” Genelah, ix. 7-12). Except Maimonides, the codifiers have taken but little trouble to clear up these points or to decide what the true Halakah is, as questions of criminal law had long ceased to be of practical value (Tur. Hoshen Mishpat, 351, 2; Shulhan 'Aruk, Hoshen Mishpat, 425, 1, gloss).

**BURGOS** (בורגייט): City of Old Castile, having a long-established, large, wealthy, and cultured Jewish community up to the time of the expulsion of the Jews from Spain in 1492. It is reported that the Jews of Burgos, who as early as 1070 had made a loan to the Cid, organized a large squadron in 1123, and fought bravely against Sancho Aznar, as faithful subjects of the king of Castile (Sandoval, “Historia de los Reyes de Castilla,” p. 132a, Pamplona, 1634).

The Jews of the city, “in sustentatione pauperum,” were compelled to make an annual donation of two solidos and one denar to the hospice presented by the king of Castile to the church there (Florez, “España Sagrada,” xxvi. 472). Special privileges, and immunities against the arbitrary acts of officials, were granted to the Jewish residents by Ferdinand III. and Alfonso X. (the Wise), and were again confirmed by D. Sancho el Bravo on

April 23, 1295. The era of greatest prosperity extended from the close of the thirteenth century to the middle of the fourteenth; the taxes in 1290 amounting to 87,760, and the various other imposts to 22,161, maravedis. The Cortes assembled in this ancient diocese in 1301, 1315, and 1345 gave considerable attention to the charges of usury brought against the Jews, who were occupied as merchants, tradesmen, and mechanics.

In the civil war between King Pedro the Cruel and Henry de Trastamare, the Jews of Burgos remained faithful to the king. The story goes that when the archbishop proposed to surrender Pedro on the ground of the latter's devotion to Judaism, the Jews of the city agreed, declaring that the inclination of a Christian for Judaism is as much a defection as is the conversion of a Jew to Christianity. This story, however, is a pure invention. In reality they offered obstinate resistance to Henry de Trastamare; fortifying themselves in their quarters (Juderia), and replying to Henry, when summoned to surrender, that they could recognize no ruler other than their legitimate sovereign, for whom they were willing to sacrifice their lives (Aboab, “Nomologia,” p. 290). This fidelity to the vanquished ruler met with the frank admiration of the victor Henry, who nevertheless, according to the reports of both Jewish and Christian chroniclers (Ayala, “Cronica,” year 18, ch. xxxv.; Samuel Zarza in “Shebet Yehudah,” ed. Wiener, p. 131), imposed a fine of 50,000 doubloons, or 1,000,000 maravedis, which reduced the Jews to such extremity that they were compelled to sell the crowns and ornaments of the scrolls of the Law. Those unable to pay their contribution were sold into slavery, and all debts payable to Jews were ordered to be canceled.

On the day of the coronation of Juan I. (1379), Yusaph Pichon, the chief tax-collector of Henry II., was executed by the Jews as a “malshin” (slanderer). The king, whose authorization had been surreptitiously obtained, was incensed at this act, and ordered the death of the Jewish executioners, Zulema and Zag, as well as of the “Merino Rabbi Mayor [chief rabbi] de la Juderia Burgalesa.” This unauthorized act on the part of the Jews produced a very bad impression over all Castile, and was used to good effect by Ferrand Martinez, archbishop of Ecija. In the same year the king ordered that, on payment of a stipulated sum, the Jews of Burgos were to be relieved from the obligation of gratuitously furnishing raiment and bedding to the court.

During the great persecution of 1391 the Jews of Burgos were subjected to much suffering; among those who accepted baptism on that occasion was the rich and scholarly Solomo ha-Levi, who, as Paul de Burgos, or de S. Maria, became primate of Spain and an arch-enemy of the Jews. Burgos was the birthplace of Abner de Valladolid, or de Burgos. The community, once so rich and great, sank into ever greater poverty, so that in 1474 it was capable of paying only 700 maravedis in taxes; the wealthiest resident at that time being R. Ephraim, who left the country in 1492. There was a famous scroll of the Law at Burgos, to which pilgrimages were made (“Jew. Quart. Rev.” xiii. 257).

**BURGUNDY.** See FRANCE.

**BURIAL:** Placing the corpse in the earth or in caves of the rock, the chief modes adhered to by the Jewish people of disposing of the dead (Gen. xxiii. 19, xxv. 9, xxxv. 8, xlix. 29 et seq.; Deut. xxxiv. 6; Josh. xxiv. 30; Judges viii. 32; I Sam. xxv. 1, and elsewhere). The burning of the bodies of Saul and his sons was exceptional, and is explained in different ways (see I Sam. xxxi. 12, and the commentaries; also Schwally, "Das Leben nach dem Tode," p. 48); the same is the case with the allusion to burning in Amos vi. 10 (see commentaries, and Schwally, *l.c.*). The burning of the body so that even the bones were consumed was considered a disgrace (Amos ii. 1); and was inflicted as a punishment (Josh. vii. 25. Compare Tacitus, "Hist." v. 5: "They [the Jews] bury rather than burn their dead." See, also, CREMATION.

To be denied burial was the most humiliating indignity that could be offered to the deceased, for it

Placing the Body in the Coffin.  
(From Bodeuschatz, "Kirchliche Verfassung.")

meant "to become food for beasts of prey" (Deut. xxviii. 26; I Kings xiii. 22, xiv. 11, xxi. 24; II Kings ix. 34-37; Jer. vii. 33; viii. 1, 2; ix. 21 [22]; xiv. 16; Ezek. xxix. 5; Ps. lxxix. 2, 3).

The law, therefore, requires even the criminal to be buried who has been put to death (Deut. xxi. 23).

So, too, the slain enemy was buried (I Kings xi. 15; Ezek. xxxix. 15), not merely because the dead body defiled the land, but from a feeling of compassion, as is seen in the case of Rizpah (II Sam. xxi. 10; compare Josephus, "B. J." iv. 5, § 2).

While it was incumbent upon the relatives to bury their dead (Gen. xxiii. 3, xxv. 9, 1, 7; I Macc. ii. 70; Tobit vi. 15, xiv. 11), it was regarded as one of the laws of humanity "not to let any one lie unburied" (Josephus, "Contra Ap." ii. 29 [30]; Philo,

"Hypothetica," ed. Mangey, ii. 629; Bernays, "Gesammelte Schriften," i. 277 et seq., who shows this to have been also an old Athenian law of Buzyges). The Rabbis call it *כת מנוחה* ("an obligation to the dead claiming the service of the finder") (Massek. Sem. iv. 29; Sifra, Emor, Introduction; Sifre, Num. 26; Meg. 3b; Naz. 43b, 47b, and elsewhere). Tobit devoted himself entirely to the task of burying the unclaimed bodies of the slain (Tobit i. 17, ii. 7). According to Josephus, "B. J." iii. 8, § 5, a suicide was not buried before sunset; but Abithophel, who committed suicide, was placed in his grave in the usual manner (II Sam. xvii. 23; see Shulhan 'Aruk, Yoreh De'ah, 345, and "Sifte Kohen," thereon; see SUICIDE).

In Sanh. 46b the law of burial is derived from Deut. xxi. 23, "Thou shalt bury him on that day,"

which is construed as a law affecting all men. Still in the Talmudic passage the question is discussed whether burial is to prevent disgrace

of the body, or is a means of atonement for the soul for sins committed during lifetime—that is to say, a means of reconciliation of the shade, which finds no rest before being united with the body under the earth (see Schwally, *l.c.* pp. 52, 53). The process of decay in the grave was believed to be painful to the body, and therefore to be the means of atonement (compare Ber. 18b; Tosef., Sanh. 46b; Sanh. 47b). Atoning power of the ground per se (Ket. 111a) was attributed to Palestine exclusively (compare Tosef., Sanh. 46b; Sanh. 47b). This view concerning the atoning effect of the decaying process induced some to bring the body into close contact with the earth by either having the coffin perforated or by dispensing with the coffin altogether (Yer. Kil. vii. 32b, top; R. Nissim to Sanh. 46b; Tur, Yoreh De'ah, 362). Earth of the Holy Land, as based upon Deut. xxxii. 43, *וכפר ארמתו* = "the earth shall atone for his people," is therefore often put under the body in the coffin to accelerate the dissolution and the ceasing of the pain (see Isserles to Shulhan 'Aruk, Yoreh De'ah, 363, 1), if not on account of the Resurrection (see Yer. Kil. ix. 32c).

According to Pirke R. El. xxi., Adam and Eve learned the art of burial from a raven whom they saw bury one of its kin in the sand (Tan., Bereshit, 10, has "two clean birds" instead; Gen. R. xxii., "clean birds and beasts buried Abel," is probably incorrect; see ABEL).

Although the law in Deut. xxi. 23 refers only to the culprit exposed on the gallows, the rabbinical interpretation derives from it that "no corpse is to remain unburied overnight" (Sanh.

**Time of Burial.** vi. 4, 46a, b; Maimonides, "Abel," iv. 8; Shulhan 'Aruk, Yoreh De'ah, 357, 1). With reference to Num. xx. 1,

it is even urged that burial should follow death closely (M. K. 28a; compare Acts v. 6-10; and see Tobler, "Denkblätter aus Jerusalem," 1853, p. 325, as to the present usage: "The burial takes place within as few hours after death as possible"). "To keep the dead overnight was not permitted in the city of Jerusalem" (Tosef., Neg. vi. 2; B. K. 82b; Ab. R. N. xxxv.). Whether this was due to the

SEPHARDIC JEWS IN PROCESSION ROUND A COFFIN.  
(From Fleury, 1733.)

climate, which causes decomposition to ensue rapidly—compare Abraham's words: "Let me bury my dead out of my sight" (Gen. xxiii. 4)—or to the defiling nature of the corpse (Num. xix. 11-14), the generally accepted view was that the acceleration of the burial was a praiseworthy act unless preparations for the honor of the dead made delay desirable (M. K. 22a; Maimonides and Yoreh De'ah, *l.c.*).

The tomb, however, was not immediately closed over the dead. During the first three days it was customary for the relatives to visit the

#### Early Burials.

grave to see whether the dead had come to life again (Massek. Sem. viii.; see Perles, "Leichenfeierlichkeiten," p. 10, and Brüll, "Jahrb." i. 51). In the course of time the Mishnaic law was insisted upon, notwithstanding the altered conditions, and quick burials involved the danger of entombing persons alive,

been adopted by all modern rabbinical authorities, though the Eastern Jews still adhere to the old custom with its abuses (see Altschul, "Kritisches Sendschreiben über das Bisherige Verfahren mit den Sterbenden," 1846, and David Einhorn, "Ueber die Nothwendigkeit der Einrichtung von Leichenhäusern," in "Sinai," 1862, pp. 213 *et seq.*, 243).

Embalming, practised in Egypt (Gen. i. 2, 26) and in the case of Aristobulus in Rome (Josephus, "Ant." xiv. 7, § 4), was unknown, or at least

#### Spices and Plants at the Burial.

exceedingly rare, in Judea. But—undoubtedly with the view of removing the odor—spices were put on the coffin or otherwise used at funerals (Ber. viii. 6; John xii. 7, xix. 39), and myrtles and aloe (in liquid state) were carried in the procession (Bezah 6a; John xix. 39). In honor of dead kings "sweet odors and diverse kinds of spices"

CARRYING A BODY TO A GRAVE.  
(From Bolenschatz, "Kirchliche Verfassung," 1745.)

When, therefore, in 1772, the Meeklenburg government, in prohibiting such burials and insisting that three days should intervene between death and interment, provoked great opposition on the part of the rabbis, who considered it an infringement upon Jewish law and custom, Moses Mendelssohn, who was asked to intercede, justified the governmental measure, declaring the Jewish custom to be in conflict with the ancient view and practise (see Kayserling, "Moses Mendelssohn," 1862, pp. 276 *et seq.*, and the "Measscf" of the year 1772). This view has

were burned (Jer. xxxiv. 5; II Chron. xvi. 14, xxi. 19), together with the bier and the armor (see 'Ab. Zarah 11a), or carried along in the procession (Josephus, "Ant." xv. 3, § 4; xvii. 83; *idem*, "B. J." i. 33, § 9). Onkelos (Aquila), the proselyte, burned 80 manehs of balsam in honor of R. Gamaliel the Elder (Sem. viii.; 'Ab. Zarah 11a). Later practise added an infusion of the spices to the water with which the dead was washed (see TAHARAH).

As soon as the last breath was drawn, the eyes of the dead were closed by the oldest or the most dis-

THROWING EARTH UPON A COFFIN.  
(From Flaxart, 1723.)

tinguished son or next relative (Gen. xvi. 4), the mouth was shut, and kept in position by a band on

### Preparation for Burial.

the cheek-bones, and the body placed upon sand or salt on the floor to retard decomposition, metal or glass being put upon the navel to prevent swelling. Then the body was washed and anointed with aromatic unguents, and wrapped in linen clothes (Shab. xxiii. 5; Sem. i. 2, 3; Acts ix. 37; John xi. 44, xii. 7, xix. 39 *et seq.*, xx. 6 *et seq.*; Matt. xxvii. 59; Mark xv. 46 *et seq.*; Luke xxiii. 53 *et seq.*; Testament of Abraham, xx.).

In Biblical times persons, especially of high rank, were arrayed at burial in the garments, ornaments, and weapons which they had worn in life (I Sam. xxviii. 14; Isa. xiv. 11; Ezek. xxxii. 27; compare Josephus, "Ant." xv. 3, § 4; xvii. 8, § 3; "B. J." i. 33, § 9; and "Ant." xiii. 8, § 4; xvi. 7, § 1). To be buried without garments was considered a disgrace (Shab. 14a; compare Spiegel, "Avesta," ii., Introduction, p. xli.). As a token of honor, it was customary to cast the most costly garments and ornaments upon the bier of a dear relative or friend, and as such objects could no longer be used for other purposes, the Rabbis deprecated such practise (**אסור בהנאה**, the Rabbis deprecated such practise (Sem. ix.; Sanh. 48a *et seq.*). In fact, since funeral expenses became common extravagances and an object of alarm to the relatives, R. Gamaliel II. set the example by the order he gave for his own funeral, and thus introduced the custom of burying the dead in simple linen garments (Ket. 8b; M. K. 27b). In the Testaments of the Twelve Patriarchs, Judah enjoins his sons "not to bury him in costly garments nor to cut open his body" (for embalming), as is done to kings (Judah xxvi.; compare Josephus, "Contra Ap." ii. 27).

In R. Papa's time cheap clothes became the rule (Ket. 8b). White garments, which were the robes of state (Yer. R. II. i. 57b; Eccl. ix. 8), were at all times preferred. R. Jannai, however—some versions have "R. Johanan"—wished to be buried in

colored garments, saying: "Not in black, lest I appear as a mourner among the righteous who are clad in white in paradise, nor in white, lest I be

clad in festal garments when I should bewail my sad lot" (Yer. Kil. ix. 32b; Shab. 114a; Gen. R. xcvi., and elsewhere). R. Jeremiah said (Yer. Kil. *l.c.*; Gen. R. e.): "Dress me in white garments with sleeves, put on my slippers, and place a cane in my hand and my sandals by my feet, and set me by the high road so that I may be ready when the Resurrection call comes." The use of the shroud, or **SARGENES**, is a later custom. Objects used or favored by the dead, such as a writing-tablet, a pen or inkstand, a key or bracelet, were often put into the coffin or grave (Sem. viii.). Formerly the face was covered only in case of disfigurement; in course of time, when long privation caused the poor to look disfigured and the rich only seemed to enjoy the privilege of having their faces uncovered, it became the rule to cover the faces of all; the bridegroom alone, whose death appealed to universal sympathy, being excepted (Sem. *l.c.*; M. K. 27a). Brides had their hair loosened (Sem. *l.c.*). As a rule, the hair was cut (M. K. 8b). The body was

placed in the coffin face upward, the hands folded across the breast, and the feet stretched out; a curved or bent-over position was deprecated (Yer. Naz. ix. 57d; Bab. Naz. 65a; B. B. 74a, 101a, b; Tur, Yoreh De'ah, 362).

Coffins, though used in Egypt (Gen. i. 26), were not in general use in Biblical times; in most cases the dead

### Coffins or Biers.

were carried out to the burial-place upon a bed or bier ("mitṭah," I Sam. iii. 31; Ber. iii. 1; Josephus, "Ant." xvii. 8, § 3, *κλίνη*; compare II Kings xiii. 21, and the story of the sham funeral of Johanan ben Zakkai, Giṭ. 56a). Occasionally coffins were used, either of wood or of stone (M. K. 8b; Yer. M. K. i. 80d), those of wood suggestive of the tree which brought death to man (Gen. R. xix.); cedar-wood, "which does not decay," being preferred (Test. Patr., Simeon, 8; compare Levi, 19; Zebulun, 10). In France it became customary to use for the coffin-boards the table upon which food for the poor had been served (Baḥya b. Asher, commentary to Ex. xxv.).

At first the bier used for the rich was more elaborate than that used for the poor; later, simplicity and equality became the rule (M. K. 27b).

The bearers, who carried the bier on their shoulders (hence their name, "kattafim" [shoulderers]),

walked barefooted, one set of bearers changing with another from time to time to give as many as possible an opportunity to honor the dead (Ber. iii.

1; Yer. Naz. vii. 56a). In the case of a child under twelve months, the coffin was carried by the handles (Sem. iii. 2; M. K. 24b). The women went, as a rule, in front of the bier, the reason given (Yer. Sanh. ii. 20b; Gen. R. xvii.) being that "woman brought death upon the world"; in reality because the mourning women singing the dirge and beating the drum led the funeral procession, as they still do in the East (Jer. ix. 16; M. K. iii. 8-9; Kelim xv. 6; Schwarz, "Das Heilige Land," p. 342), though at times they follow the bier (Lane, "Customs of the Egyptians," ch. xxviii.).

Besides the relatives and friends (Gen. i. 7), any stranger was also expected to follow when he saw the dead carried to the grave, lest it be said of him "the one who mocketh the poor reproacheth his Maker" (Ber. 18a, after Prov. xvii. 5). A teacher of the Law was honored by having a scroll of the Law placed upon the bier, or carried alongside of it, and placed in the tomb (B. K. 17a).

The burial-place received its chief sanctity from the fact that it was the resting-place of the mem-

bers of the family. To the ancient Hebrew, to die was "to be gathered unto his people" and "to lie with his fathers" (Gen. xlix. 29; Num. xxvii.

13; Judges ii. 10, and elsewhere); to be buried in the grave of his father and mother was his fondest wish (I Sam. xix. 38, xxi. 14; Tobit iv. 3-4, xiv. 10-12). Thus the cave of Makpelah became the family sepulcher of the Patriarchs (Gen. xxiii., xlix. 29-31). The kings were buried in a family sepulcher (II Kings xxi. 18, 26; xxiii. 30). These sepulchers were either dug in the ground in the neighborhood of the family dwelling (I Kings

ii. 3-4; 1 Sam. xxv. 1, xxviii. 3) or hewn out of the rock, often during one's lifetime (Isa. xxii. 16; II Chron. xvi. 14; see also for the thirteenth century Isaac b. Sheshet, Responsa, No. 114, quoted by Perles, *l. c.* p. 29). In the one case, stone buildings in the shape of houses or cupolas, after Phœnician custom called נפש ("the soul" or "bird-house") (*Er. v. 1*; *Shék. ii. 5*), were erected over the graves; in the other case, either caves (מערות) (*B. M. 85b*; *M. K. 17a*; *Judith xvi. 23*) were selected, or the rocks were so excavated as to furnish compartments or galleries with as many vaults ("kokim," כוכים) at the three sides as the family required. Into these vaults the corpse could be horizontally moved, the stone rolled upon the entrance forming the cover or door, while the porch on the fourth side was large enough to afford room for the bier and the visitors (*B. B. vi. 8*; *Yer. B. B. iii. 13d*; *Ket. 84a*; *M. K. 8b*). While the kings claimed the privilege of being buried in the Holy

K.

**BURIAL SOCIETY:** Organization for providing proper burial rites. There is hardly a congregation of Jews in the world without an association specially organized for the following purposes: to conduct the burial service without charge; to be present at the death of a member; to watch over the corpse, to cleanse and shroud it, and to accompany it with funeral procession; and to bury the body with religious ceremonies. The members are called מתעסקים ("mit'askim" = attendants, undertakers; *M. K. 24b*). The society is known as חברה קדישא ("holy association"), also as חברת נמילות חסדים ("society for mutual benevolence"), or ח"נ חסד של אמת ("of true mutual benevolence"), derived from the last words of Jacob to Joseph: "I pray thee . . . deal kindly and truly [חסד ואמת] . . . and bury me," etc. (*Gen. xlvii. 29, 30*). The members are also called נומלי חסדים ("interchangers of kindness," *Ket. 8b*). A burial society bearing this name is quoted in the Responsa of Simon b. Zemah Duran, iii., No. 13 (תשב"ץ, 1361-1444). The existence of a burial society is mentioned in the Talmud. R. Judah commanded that all citizens suspend work in order to honor and bury the dead. When R. Hamnuna went to Daromta and observed that some of the people attended to their usual vocations in the event of a death, he wanted to excommunicate them, but accepted the excuse that there was a society in the town to render such services (*M. K. 271*). It seems that the people were divided into two sections; the one attending the burial duties on certain days, while the other was relieved (*Tur and Shulhan 'Aruk, Yoreh De'ah, Abelim*, 343).

Burial has always been considered by the Jews as the greatest act of benevolence. R. Hama b. Hanina said: "Walk after the Lord your Sanctity God" [*Deut. xiii. 5*] means 'Follow of Burial, the path of God . . . and . . . bury the dead, even as He did bury Moses in the valley of Moab' (*ib. xxxiv. 6*; *Sotah 14a*).

The object of the burial societies in the Middle Ages is thus described in the responsa of R. Asher b. Jehiel (הראש"י): to be with the mourner on the night of the death; to accompany the funeral; to assist in the burial; to furnish consolation meals (סעורת הבראה) to the mourners; to pray in the house of mourning (*Responsa, Rule 13, No. 12*). The membership was apparently limited, and a deceased member could be replaced by a son over thirteen years of age (*ib. Rule 13, No. 13*).

The first burial society of later times was organized by R. Eliezer Ashkenazi in 1564 at Prague,

Mourners Throwing Grass Behind Them as They Leave the Cemetery.

(From Bodenschatz, "Kirchliche Verfassung.")

City and so near the Temple as to provoke the protest of the prophet (*Ezek. xl. 7-9*), the rule was that the burial-place should be at least fifty cubits distant from the city (*B. B. ii. 9*; *Luke vii. 12*); but it was often placed in a garden (*John xix. 41*), with flowers planted around (*Toh. iii. 7*). In those old family sepulchers of Palestine the interment did not take place immediately, but the body was left in the sepulchral chamber for some time until it was reduced to a mere skeleton, and then the bones were collected anew, wrapped in linen clothes, tied closely together like mummies, and then solemnly interred (*Yer. M. K. i. 80d*; *Sem. xii., xiii.*).

To disturb the rest of the dead by removing the body or the bone-remnants from one place to another was considered a great wrong; but it was allowed for the benefit of the dead in the case of a transfer of the body to the family plot, or when the place of burial had become unsafe from desecration or elementary ruin (*Sem. xiii.*; *Yer. M. K. ii. 81b*; *Shullhan*

with rules, regulations, and amendments by R. Moses Mōlin (מהרי"ל) in 1573. It received the sanction of the Austrian government on June 1, 1742 (Preface to *זכרון ליום אהרן*, Prague, 1828). Some of the societies, however, exercised arbitrary power in the communities. They virtually owned the cemeteries and usurped the right to dispose of the plots as they pleased. When the ground became expensive and government taxes burdensome, it was customary for the rich to pay for their burial-plots, the income so derived being employed to defray the burial expenses of the poor.

Often the societies exacted exorbitant sums from the rich, and even from the middle classes. To remedy this abuse a conference of the Council of Four Lands (*ארבע ארצות*) assembled at Granitz in 1683, and passed resolutions to nullify the practise of the societies in dealing unjustly both with the dead and the living by delaying burial till the payment of a compulsory compensation was settled. The conference passed a decree excommunicating and imposing a fine of fifty ducats upon the leaders of any congregation which permitted the members of a burial society to extort more than 150 gulden for the burial of a rich man; and the approbation of the leaders and the chief rabbi was to be obtained before payment was made of the minimum sum of 30 gulden, or upward. This decree was renewed and promulgated on market-day in every congregation at Bierslav in 1698, and was registered in the congregational record (*פנקס*). The society, in order to prevent abuses, appointed one day in the year as a fast-day, to be devoted to prayer and to visiting the cemetery, to attend to necessary repairs of the graves and headstones, and to be followed at night by a sacred feast, to which every member was invited (see in G. Wolf, "Die Jüdischen Friedhöfe und die Chewra-Kadisha in Wien," an invitation from the seven Jewish town councilors to the members of the holy association to partake of the sacred banquet on Tuesday in the week of the sidra Shemini, in the year 5080 = 1320).

On May 5, 1764, the Vienna burial society was reorganized by R. David Wertheim; and among the rules adopted was one fixing the annual fast-day for Adar 7. A proviso was inserted that the feast after the fast must not be too costly.

One of the largest Hebrah Qaddishahs is the one in Budapest, which includes several societies. It has a yearly budget of half a million crowns.

A burial society was organized in 1793 at Kiev, Russia. The burial charge for members and dependent persons was ten gulden. The members were granted certain privileges in the synagogue, such as leading in prayer and reading the Torah on Hoshanah Rabbah and Shemini 'Azeret in the Tabernacle festival. On the former day the election of the officers took place. The annual fast and feast were held on Kislew 15, which is the day observed by most of the societies. On reorganizing the Hebrah Qaddishah of Odessa in 1878, the maximum price for a rich burial was 60 rubles, the minimum for middle classes 12 rubles, and free burials for the poor ("Ha-Zefirah," 1878, v., No. 48).

In New York the oldest burial society, Hebrah

Hesed ve-Emet ("loving kindness and truth"), was established by the Portuguese-Jewish congregations in 1802. The society recently celebrated its one hundredth anniversary at the Shearith Israel synagogue. The German-Jewish communities all through

America organized free burial societies, following the example of their brethren in Europe; and these were, or are being, in the course of time merged into the united Hebrew relief societies of each town. The Hebrah Qaddishah of the Russian-American congregation Beth Hamedrash Hagadol was organized in 1859. The Agudat Ahim Hesed Shel Emet ("Society of Friends for True Benevolence"), managed by Russian Jews on the East Side of New York and incorporated in 1889, has 2,200 members, and up to Jan. 1, 1901, had given free burials on 8,263 occasions.

**BURMANIA, BARTHOLD DOWE**, Dutch statesman and ambassador to the court of Vienna; lived in the eighteenth century. He was a man of broad humanitarian sympathies and an especially staunch friend of the Jews. When, on Dec. 18, 1744, Maria Theresa ordered the expulsion of the Jews from Prague (to take place before the end of Jan., 1745) and from all Bohemia (before the end of June, 1745) Burmania, at the request of the Jewish communities of Amsterdam, Rotterdam, and The Hague, exerted all his influence at the court to have the edict revoked. He was assisted by the English minister, Sir Thomas Robinson. The result of his efforts was the postponement of the date of exile to the last day of Feb., 1745. Again the Jewish communities of Holland appealed to Burmania, and again he pleaded, urged, and remonstrated with the Austrian Reichskanzler, that "sovereigns, more than other persons, are responsible to God and man for their deeds." Another month of grace was granted, but on March 31, 1745, the Jews of Prague were exiled. Thereupon, Burmania, upheld by the ambassadors of England, Poland, and Turkey, directed his energies toward averting a still greater impending catastrophe—the expulsion of the Jews from the whole of Bohemia, which was to take place in June.

A royal edict was issued April 8, 1745, ordering all Jews of Moravia also to emigrate within a short time. Again Burmania pleaded for the unfortunate people, and the edicts were modified (May 15, 1745), the Jews being allowed to remain in Bohemia and Moravia "until further orders." Burmania endeavored to have the edict repealed which was issued June 25, 1746, prohibiting all Jews from coming within two hours' distance of Prague; but he was not successful. For two years the condition of the Bohemian Jews was miserable. Finally, however

(July 14, 1748), Maria Theresa revoked the edict of Dec. 18, 1744, "on account of the pressure from the foreign ambassadors," and the Jews were allowed to return to Prague.

**BURNING BUSH.**—**Biblical Data:** The name commonly given to the tree from which the angel of Jehovah manifested himself to Moses in a flame of fire; the distinctive feature of the revelation being that the tree was not consumed (Ex. iii. 2-4).

—**In Rabbinical Literature:** The discrepancy between Ex. iii. 2, where it is said that an angel appeared to Moses in the burning bush, and verse 4, where it is stated that God spoke to Moses out of the bush, is answered in various ways by the Midrash. According to one opinion, an angel appeared first and after him the Shekinah; while according to others the appearance of the angel merely indicated to Moses that the Shekinah was near, and this angel

"Moses at the Burning Bush."  
(From the Sarajevo Haggadah, 14th century.)

was Michael (or, as some say, Gabriel), the constant attendant of the Shekinah. When Moses beheld this heavenly apparition other persons were with him, who did not, however, perceive anything. According to Joshua b. Karhah (Rabban Gamaliel, Num. R. xii. 4) God revealed Himself to Moses for the first time in a thorn-bush to prove to him that "nothing"—not even such an insignificant plant as the thorn-bush—"is void of the Shekinah." The thorn-bush itself receives various symbolic interpretations. Thus, as this shrub is among the least of the plants, so Israel occupied a lowly and despised position in Egypt. As the thorn-bush is used for a hedge, so Israel is a fence and protection for the other nations. The burning but not consuming fire of the bush indicated to Moses that Israel would successfully endure all the sorrows and pains inflicted upon it by the Egyptians. It was "heavenly fire" (compare Darmesteter, in "Rev. Etudes Juives," i. 186 et seq.), that burns and consumes not (Ex. R. ii. 5).

J. S. R.

L. G.

—**Critical View:** The word rendered "bush" (סִיחַ) is found only in this passage and in Deut. xxxiii. 16, where, however, it is possible that the right reading is "Sinai." It is generally held that a thorn-bush of some sort is meant; but the exact species has not been determined. The ground about the bush was holy (verse 5), showing that the place was a residence of the Deity.

The main purpose of the theophany is made plain by the context. YHWH, whose seat was in Mt. Sinai, was about to take the Israelites as a people under His direct protection and to deliver them from bondage; and after their deliverance they were to enter into a covenant with Him at this sacred spot (iii. 7-12). The motive of the special mode and form of the apparition may be arrived at as follows: God's self-manifestation in fire is a familiar episode in ancient Israel. Indeed, this appearance to Moses has its counterpart in the greater display of lightnings and thunderings in the same region in the presence of the whole of Israel, when the covenant was actually made. On the latter occasion, and in the other theophanies (Ps. xviii. 8, 12 et seq.; 1. 3; Micah i. 4; Hab. iii. 3 et seq.; compare Deut. iv. 24; Heb. xii. 29), the fire is destructive; whereas here it is shown to be harmless by the preservation of the tree that was enveloped in its flames.

The explanation is found in the particular design of the revelation. Fire is an emblem of the purity or holiness of God; while, ordinarily, this attribute is represented as being visibly displayed when God intervenes in the way of judgment and retribution, the object here is to show that YHWH brings Israel into a sure relation to Himself, which means preservation or salvation.

The sacred tree has not an equal significance. The burning bush is not to be compared with the sacred terebinth and other trees which play so large a rôle in the earlier history of Israel, and which have a permanent sanctity of their own. It was, however, a living thing, the only object on Sinai that had life in it; and it belonged, moreover, to a class of objects often made the abode of divinity. The explanation often given, that the bush symbolized the people of Israel unconquered by the oppression of Egypt, can not have been the primary meaning of the phenomenon.

**BURNING OF THE DEAD.** See CREMATION.

**BURNT OFFERING.**—**Biblical Data:** The ordinary translation in modern versions of the Hebrew "olah" (עֹלָה). This term does not mean literally "burnt offering," but "what is brought up" or presented to the Deity. The name is a translation of the Septuagint rendering, which is itself based upon the descriptive phrase often attached to "olah" in the ritual prescriptions: "an offering made by fire unto the Lord" (Lev. i. 9 et seq.). A synonym is

כָּלִיל, which defines the offering as complete; *i.e.*, when it is placed upon the altar, to distinguish it from the other forms of animal sacrifice (see I Sam. vii. 9; compare Ps. li. 21). The burnt offering was the highest order of sacrifice in the Old Testament ritual. The bloodless offerings were made only in connection with it.

The following is a concise statement of the Levitical law concerning burnt offerings:

**The Offerings:** These were wholly animal, and the victims were wholly consumed. They might be from the herd or the flock, or in cases of poverty birds might be substituted. The offerings acceptable were: (*a*) young bullocks; (*b*) rams or goats of the first year; (*c*) turtle-doves or young pigeons. These animals were to be free from all disease or blemish. They were to be brought to the door of the tabernacle, and the offerer was to kill them on the north side of the altar (if a burnt offering), except in the public sacrifices, when the priest put the victims to death, being assisted on occasion by the Levites (II Chron. xxix.

**Mode of Sacrifice.** 34). The blood was then sprinkled around the altar. The victim, if a large animal, was flayed and divided; the pieces being placed above the wood on the altar, the skin only being left to the priest. If the offering was a bird a similar operation was performed, except that the victim was not entirely divided. The fire which consumed the offerings was never allowed to go out, since they were slowly consumed; and the several kinds of sacrifice furnished constant material for the flames. Every morning the ashes were conveyed by the priest to a clean place outside the camp (Ex. xxix. 38-42; Lev. i. vi. 8-13, ix. 12-14; Num. xv.).

**Kinds and Occasions of Burnt Offering:** (*a*) **STATED OFFERINGS** were: (1) **The Daily Burnt Offering**, presented at the time of the morning and the evening prayer (the third and ninth hours). The victim was a lamb or kid a year old. This was always accompanied by a vegetable offering ("minhah") and a libation of wine (Ex. xxix. 38-42; Num. xxviii. 3-8).

(2) **The Sabbath Burnt Offering**, which **Stated and Occasional Offerings.** included double the amount of all the elements of the ordinary daily sacrifice (Num. xxviii. 9, 10). (3) **The Festal Burnt Offerings**, celebrated at the new moon, the Passover, Pentecost, the Feast of Trumpets, the Day of Atonement, and the Feast of Tabernacles. On these occasions, especially on the last-named, the number of victims was increased (Num. xxviii. 11-xxix. 39).

(*b*) **OCCASIONAL OFFERINGS:** (1) When a priest was consecrated (Ex. xxix. 15; Lev. viii. 18, ix. 12); (2) at the purification of women (Lev. xii. 6-8); (3) at the cleansing of lepers (Lev. xiv. 19, 20); (4) at the purgation of ceremonial defilement (Lev. xv. 15, 30); (5) in connection with the vow of a Nazarite (Num. vi. 11, 16).

These sacrifices were prescriptive and obligatory; but voluntary burnt offerings might also be made. Some of them are recorded which involved the immolation of a large number of victims (Num. vii. 1 Kings viii. 61).

These were the regulations of the Levitical ritual.

All of the sacrifices were to be made under priestly auspices; and even when a private offerer killed the victim the main parts of the ceremony were performed by the priests. Yet both before and after the time of Moses the 'olah was offered by laymen without distinction of persons and without restriction as to mode or measure—*e.g.*, Gen. viii. 20, xxii. 2 *et seq.* (compare xv. 17); I Sam. vi. 14; Amos v. 22; Isa. i. 11; Hosea vi. 6; Job i. 5, xlii. 8—not to speak of the more or less heathenish offering of human victims (Judges xi. 31; II Kings iii. 27; Jer. xix. 5).

J. F. McC.

—**In Rabbinical Literature:** The name **עֹלָה** for burnt offering is explained in various ways. Some scholars take it to be an offering of atonement for the evil thoughts that steal over one, **עֹקֵר עַל רוּחוֹ**, ("ascend in his mind." Tan., Lek Leka, ed. Buber, i. 71; Lev. R. vii. 3); others derive the name from **עֲלֵךְ** ("to the Highest"), because it is entirely intended for God, the Most High, men taking no part therein (Tan., ed. Buber, iii. 13).

The 'olah is the only offering which may be accepted in the Temple from non-Jews, the drink-offering appertaining to it being in such cases furnished at the cost of the community (Men. 73b; Tem. 2b; compare Maimonides, "Yad," Ma'ase ha-Korbanot, iii. 2, 5). The 'olah was laid entire upon the altar, even the horns of the animal and the beard of the goat not being removed (Zeb. ix. 3, 85a; "Yad," *l.c.* vi. 2). Before being offered upon the altar the carcass was cut into pieces, not at haphazard, but according to the detailed directions given in the Talmud (Tamid 31). The several pieces were then laid upon the altar, the number of priests officiating being eight, eleven, or twenty-four, according as the animal was a sheep, ram, or ox (Yoma 26b). This, however, applies only to the 'olah offered by the whole congregation, not to the individual 'olot, which could be cut up into any number of pieces, and be offered by any number of priests (*l.c.*). The skins of these animals belonged to the priests, who divided them among themselves every Friday, provided the offering had not proved unfit (**פסול**) before skinning (Zeb. xii. 3; Tosef., Men. xiii. 18). As the more prominent priests forcibly took possession of the skins, it was decreed that the latter should be sold and the proceeds be given to the Temple (Tosef., *l.c.* 19).

**BIBLIOGRAPHY:** Maimonides, *Yad, Ma'ase ha-Korbanot*, vi. 1-23.

—**Critical View:** What most obviously requires explanation is the fact that while the Levitical law insists on the observance of minute prescriptions relating to the burnt offerings and other bloody sacrifices, defines the several occasions, and provides a special ritual for each, these were not conformed to during the greater portion of the history of Israel. This is a matter of too general a character to be treated here. Suffice it to say that the difficulty is satisfactorily met by the hypothesis, now accepted by most modern scholars that the prescriptions themselves were of late origin, and formed part of a rigorous and comprehensive system of worship designed for the community of Israel under the Second Temple.

Only by cutting loose this final ceremonial law from the tribal and monarchical history of the Hebrews can one gain any rational conception of their sacrificial usages. With this general principle in view one is in a position to answer the two questions of most immediate concern: (1) What was the origin of burnt offerings in Israel? and (2) What were the historical occasions and modes of these sacrifices?

There seem to be three stages or phases in the development of sacrifice as representing the relations between the worshippers and the Deity.

**Aspects of Sacrifice.** In the first, communion is prominent; in the second, homage or devotion; in the third, expiation. The most primitive notion was that of communion with the object of worship, held to be akin to his votaries, who partook of his life. The Deity, however, was also a benefactor. It was from Him that the various kinds of offerings, animal and vegetable, as the produce of the land, came to the offerers. Hence, on the one hand, a sacrifice was a part of a social feast—a family meal in a wider and deeper sense. On the other hand, it was the giving back to the beneficent Deity of a part of what He had bestowed; it was in fact the most tangible and obvious mode of rendering homage to one's God.

Only a part of the whole was at first offered; otherwise there would have been no sacrificial feast, no communion with the Divinity. But what should be chosen as the offering? and how should it be rendered? The Deity, being invisible, would be most suitably entertained by a more ethereal form of nourishment than solid food. Hence arose the custom of burning certain portions of the animal offerings or materials of the feast. The most appropriate of all, which in general among ancient peoples, as among the Hebrews, were consumed by fire, while the remainder of the flesh was eaten by the human participants. This was the "zebah," the fundamental animal offering.

**Origin of Burnt Sacrifices.** were the fatty parts of the animal, which in general among ancient peoples, as among the Hebrews, were consumed by fire, while the remainder of the flesh was eaten by the human participants. This was the "zebah," the fundamental animal offering.

From this universal type of sacrifice the 'olah was differentiated. The "wholeness" of the oblation was what distinguished it from other fire-offerings, at least in outward form. But this wholeness was not an exclusive mark of burnt offerings among sacrifices in general; for it merely implied that no part of the oblation was to be consumed by any one except the Deity, to whom it was wholly surrendered. Among various peoples it may be observed that offerings of any sort of vegetables were given unconsumed by the offerers; and among the Hebrews even some forms of the fire-offerings were wholly consumed on the altar. Thus the "minhah," or cereal-offering, when offered by a priest, was to be entirely burned (Lev. vi. 20 *et seq.*). Also the bullock of the sin-offering, when the offense had been committed either by a priest or by the whole people, was burned entire outside the camp (Lev. iv. 3-21), even the skin being consumed, which was not the case with the burnt offering.

**Characteristics of the Oblation.** among sacrifices in general; for it merely implied that no part of the oblation was to be consumed by any one except the Deity, to whom it was wholly surrendered. Among various peoples it may be observed that offerings of any sort of vegetables were given unconsumed by the offerers; and among the Hebrews even some forms of the fire-offerings were wholly consumed on the altar. Thus the "minhah," or cereal-offering, when offered by a priest, was to be entirely burned (Lev. vi. 20 *et seq.*). Also the bullock of the sin-offering, when the offense had been committed either by a priest or by the whole people, was burned entire outside the camp (Lev. iv. 3-21), even the skin being consumed, which was not the case with the burnt offering.

What, then, is the distinctive meaning of the whole burnt offering? It is plain that it was not of a sacramental character, implying a communion with the object of devotion; for it is expressly distinguished from those in which the elements were portioned out between the Deity and the worshippers. Nor was it, in any sense or degree, a festal ceremony. Was, it then, piacular or expiatory? Not distinctively so, according to the Levitical ritual, though it must be borne in mind that the idea of expiation was probably never wholly absent from the stated order of animal sacrifice in the final legislation. From the special occasions of its celebration as given above, it may be inferred that it was honorific and devotional, implying homage to YHWH and a complete surrender to His service. Was this always the case in Israel? Some light may be thrown upon this question from the Biblical statements as to the occasions of such sacrifices in the earlier history, and from the details which are added to some of the accounts.

Piacular sacrifice seems historically to have begun with human immolations. This is the view taken by the writer of Gen. xxii. (E), where the burnt offering of Isaac by Abraham is commuted by the sacrifice of a ram. The sacrifice by Mesha, king of Moab, of his eldest son (II Kings iii. 27) was expiatory; for, in the view of the narrator, the "wrath" of the offended deity was diverted upon Israel. Such were also the horrible sacrifices made to Moloch in the later days of the kingdom. These practices are amply illustrated from other ancient nations. But not all Old Testament human sacrifices were burnt offerings. Agag was not burned (I Sam. xv. 33); nor were the seven sons and grandsons of King Saul (II Sam. xxi. 8, 9). Both of these executions were made "before YHWH," and were therefore real sacrifices, the latter being expressly stated to be expiatory.

When animals took the place of human offerings a motive for the immolation of the whole victim was not present, or at least not urgent. When the sacrifice was representative the shedding of the blood of the victim was in general a sufficient expression of a sense of guilt, and as animal oblations were already made from other motives, burnt offerings also, of which the sprinkling of blood formed in any case an essential part, naturally came to have a varied use and significance. Accordingly, while, on the whole, animal burnt offerings were mainly honorific and devotional in the latter legislation, they were often piacular in the earlier history (*e.g.*, I Sam. vi. 14; vii. 9 *et seq.*).

There are some interesting passages which seem to show the development of the principle and practice of whole burnt offerings. They were written in the eighth and seventh centuries B.C. In Judges vi. 19 *et seq.* Gideon's sacrifice of a kid and unleavened cakes is wholly consumed by fire from heaven (compare vs. 26 *et seq.*). Still more significant is Judges xiii. 15 *et seq.*, where Manoah, who had intended to present a kid for food to the angel of Jehovah, is com-

manded to make of it a burnt offering. Thus we may observe the development of the zebah into the 'olah. Jeremiah, when he says: "Add your burnt offerings to your [ordinary] sacrifices" (vii. 21), seems to have in mind the ritual tendency just indicated.

It may be observed, finally, that by the very nature of the case private offerings, which were an essential part of the every-day life of the normal Israelite, were very seldom holocausts, and that the more fixed and statutory the public ritual became, the larger was the place given to the burnt offering. As early as the time of Abaz, in 732 B.C. (11 Kings xvi. 15), a morning burnt offering was part of the stated ritual. See SACRIFICE.

**BURY ST. EDMUNDS:** Town of Suffolk, England, and seat of a monastery the ruins of which still exist. Under the rule of Abbot Hugh (1173-80) the monastery fell deeply into debt to the Jews, especially to Isaac Fil Joee, Benedict of Norwich, and Jurnet of Norwich, to an amount exceeding £3,025. The Jews were accordingly favored by the sacristan William, who used to take charge of their deeds and money in times of war (Jocelin de Brake-lond, "Cronicon," pp. 1, 2, 4, 8). The town was the site of a case of blood accusation in 1181, when a boy named Robert was said to have been martyred (*ib.* pp. 12, 114). No details are extant as to this alleged martyrdom. Abbot Samson, who was the rival candidate for the position of abbot with William, the sacristan, on succeeding Abbot Hugh in 1182, found great difficulty in freeing the abbey from indebtedness to the Jews, but succeeded in doing so within twelve years of his accession. On March 18, 1190, fifty-seven Jews were slaughtered at Bury, and almost immediately afterward Abbot Samson obtained their expulsion from the town on the ground that a man of the town had to be a "man"—*i. e.*, vassal—of St. Edmund (*ib.* p. 33).

There still exists at Bury a building which is known as Moyses Hall and is supposed to have been a former synagogue of the Jews. It is of late Norman or Transition character, and therefore its date is probable; but no continuous evidence of a tradition associating it with Jews can be obtained, and a careful inquiry made by the Jewish Historical Society of England negatives its identification.

**BUSH.** See BURNING BUSH.

**BUSH (BUSCH), ISIDOR:** Litterateur, publicist, and viticulturalist; born in Prague, Bohemia, Jan. 15, 1822; died in St. Louis, Mo., Aug. 5, 1898. His maternal great-grandfather was Israel Hönig, Edler von Hönigsberg, the first Jew raised to nobility in Austria (see Kompert, "Oesterreichische Adels-halle für Israeliten"). When seven years old Bush was seriously burned at a conflagration, suffering all his life from the effects, but rising superior to the consequent physical infirmities through an iron will and a naturally strong constitution. Bush received his education from private teachers, and owed his literary bent to the cultured circles and rare minds (such as Leopold Zunz and Michael Sachs) with which he came in contact from boyhood.

When fifteen years of age, he entered Schmid's Oriental printing establishment in Vienna, which his father had acquired. The Talmud published with the imprint of Von Schmid and Bush is still prized for its exactness. For six years (1842-47) Bush edited and published the "Kalender und Jahrbuch für Israeliten" (Vienna). Its plan was the presentation in the same book of the productions of leading Jewish scholars of divergent

**His "Jahrbücher."** Among these were Leopold Zunz, S. L. Rapoport, S. D. Luzzatto, Gotthold Salomon, Ludwig Philippson, Michael Sachs, Noah Mannheimer, Joseph Wertheimer, Leopold Stern, Theodor Creizenach, Ludwig August Frankl, Leopold Kompert, Leopold Löw, and Simon Szanto. Some of these made their first appearance as writers in the pages of the "Jahrbücher." In 1844 he edited "Mesillat ha-Limmud" (Way of Instruction), which was published by his father after Bush had left for America.

Liberal in politics, he edited the "Organ für Glaubensfreiheit," and other revolutionary papers issued from his press. When the Revolution of 1848 failed he had to flee to New York, where he arrived Jan. 8, 1849. There Bush opened a store for the sale of newspapers and stationery, and on March 30, 1849, published the initial number of "Israel's Herald," the first Jewish weekly in the United States, which, however, lived only three months. He was assisted in producing it by leading members of the Order B'nai B'rith. In the summer of 1849 Bush went to St. Louis, where he conducted a general store for six years. In 1857 Bush was made president of the People's Savings Bank. When the Missouri Convention was called to determine whether the state should join in the secession movement, Bush was chosen a member on the Unconditional Union ticket, and was made a member of the Committee of Nine, to which most important matters were referred.

When Fremont took command in 1861, with headquarters in St. Louis, Bush was made his aide-de-camp, with the rank of captain. He

**Military Career.** submitted to Secretary of the Treasury Chase a plan for a government loan

of one hundred million dollars, similar to the famous Rothschild premium loans of Austria. Mr. Chase feared its rejection by Congress, but was impressed with Bush's financial genius, and offered him a Treasury clerkship. Bush returned shortly afterward to St. Louis, and became for six years general freight and passenger agent of the St. Louis

and Iron Mountain Railroad Company. He assisted in forming Congregation B'ne El in St. Louis and in establishing the Independent Order B'nai B'rith in the West, and was henceforth prominently identified with the Order, rendering invaluable service, especially in connection with its endowment or insurance feature, and in forming the Cleveland Jewish Orphan Asylum. His interest in the society led him to become an insurance actuary.

Bush was chosen member of the state convention called to abolish slavery and to form a new constitution. He was elected a member of the Missouri state board of immigration to repair losses in population resulting from the war, which post he retained for twelve years. Later in life Bush became interested in viticulture. He purchased a tract of land (named by him "Bushberg") outside the city, which became noted for its products; and he even sent large quantities of cuttings from his vineyards to France to replace ravages by phylloxera. Bush, after years of preparation, published a catalogue of grapes, "The Bushberg Catalogue," which has gone through several editions and has been translated into several languages.

P. Co.

**BUSH, LEWIS:** American soldier; born in Philadelphia; died 1777; member of the well-known Bush family, Jewish merchants of Philadelphia. He received the commission of first lieutenant of the Sixth Pennsylvania Battalion Jan. 9, 1776, and was made captain of the same June 24, 1776. He was transferred on Jan. 13, 1777, to Col. Thomas Hartley's additional continental regiment. Of this troop Bush was commissioned major March 12, 1777. He was a brave soldier, serving with distinction during many engagements. At the battle of Brandywine, Sept. 11, 1777, he received a fatal wound and died shortly after.

A. M. F.

**BUSH, SOLOMON:** American soldier; born in Philadelphia; son of Matthias Bush, one of the signers of the non-importation agreement (Oct. 25, 1765).

Solomon Bush was an officer in the Pennsylvania militia, 1777-87. On July 5, 1777, he was appointed deputy adjutant-general of the state militia by the supreme council of Pennsylvania. In Sept., 1777, he was dangerously wounded in the thigh during a skirmish, and had to be taken to Philadelphia. When the British captured the city in Dec., 1777, he was taken prisoner, but released on parole. As he could not earn his living, being kept, on account of his wound, at his father's home (Chestnut Hill, Philadelphia), the council passed a series of resolutions, Oct. 20, 1779, respecting him, and on Oct. 27 of that year he was promoted to lieutenant-colonel, with pay in accordance with the rank. Bush was in destitute circumstances in later years, and on Nov. 5, 1785, the council of Pennsylvania, under the presidency of Benjamin Franklin, ordered that a pen-

sion be paid him for his meritorious services. His brother, Jonas Bush, was on the roll of Revolutionary soldiers.

#### **BUSNACH, WILLIAM BERTRAND:**

French dramatist; born in Paris March 7, 1832; nephew of the composer Fromental Halévy. His father was associated with BAKRI, to whom France was indebted to the amount of some twenty-odd million francs for provisions furnished to Bonaparte in Egypt. The lawsuit lasted for more than fifty years, and Busnach and his partner were not paid in full at the end. The elder Busnach, an Algerian Jew, became a naturalized Italian in the time of the deys, and was the first interpreter of the French army. He established himself at Paris in 1835. William—an Italian Jew born in France of an Algerian father, with a German surname and an English given name—was at first employed in the customs department. He subsequently devoted himself to dramatic work, writing many plays, a number of which have been successful. The following may be mentioned here: "Les Virtuoses du Pavé," 1864; "Première Fraîcheur, Paris-Revue," 1869; "Héloïse et Abélard," with music by Litolfé, 1872; "Forte en Gueule," "La Liqueur d'Or," in collaboration with A. Liorat, music by Laurent de Rillé, 1873; "Kosiki," with Liorat, music by Lecocq, 1876.

In 1867, Busnach assumed the direction of the Athénée, where several of his operettas ("Fleur de Thé," etc.) were performed. His greatest successes he achieved, however, with his adaptation of celebrated novels for the stage; for example, "L'Assommoir," 1881; "Nana," 1882; "Pot-Bouille," 1883, all by Emile Zola; "Le Petit Jacques," by Jules Claretie, 1885; "La Marchande des Quatre Saisons," etc.

Busnach is also the author of the following novels: "La Fille de M. Lecoq," 1886; "Le Petit Gosse," 1889; "Cyprienne Guérad," 1895, etc.

J. W.

**BUSNASH, NAPHTALI:** Chief of the Algerian Jews and statesman; born at Algiers in the middle of the eighteenth century; assassinated June 28, 1805. He was engaged—first alone, and later with Bakri Brothers—in the grain trade, of which the dey Ijasan, with whom Busnash was on friendly terms, granted him a monopoly. The firm of Bakri & Busnash soon attained a wide reputation, and Busnash became the most influential man in Algeria.

In 1800 he was appointed by the dey Mustapha—whom he had helped to attain to power—chief of the Algerian Jews, a post to which was attached the office of broker to the dey, and the consul-generalship of Ragusa. In this position Busnash displayed so much ability that he won the entire confidence of the dey, who practically left the government in his hands. It was he who received the consuls and settled differences between Algeria and foreign countries.

His power did not, however, last. The janizaries and the fanatical Moslems reluctantly submitted to the domination of a Jew; and Busnash, after having escaped several attempts on his life, was at last shot dead by a janizary at the gate of the dey's palace.

**BUSTANI.** See BOSTANAL.

**BUTCHERS.** See ШЕИТАИ.

**BUTRYMOWICZ, MATHEUS:** Polish statesman and landlord of the eighteenth century; a descendant of one of the oldest families of Lithuania and Samogitia, and one of the most enlightened members of the Diet assembled in Warsaw from 1788 to 1792.

He took a special interest in the development of the industry and commerce of Poland and Lithuania, and to this end considered it of the utmost importance to utilize the energy and the abilities of the Jewish inhabitants. Together with Castellan Yezierski and other Liberal members of the "last" Polish Diet, he endeavored to prove to the Polish representatives how harmful to the welfare of the country was the abnormal position of the Jews, and urged the taking of measures leading toward their emancipation. In 1789 he elaborated a plan for transforming the Jews into useful citizens, which he set forth in a pamphlet entitled "Sposób Uformowania Żydów Polskich w Pożytecznych Krajowi Obywatelów" (Warsaw), and which he submitted to Stanislaus Poniatowsky at the session of the Diet of Dec. 4, asking the king to favor it with his support. In this pamphlet he points out that the Polish law does not include the Jews in the three estates of the realm (the nobility, country gentry, and burghesses); that the Polish legislation had always regarded the Jews as a foreign element, and, though burdening them with exceptional taxes, had not granted them the rights of citizens, while Polish society had treated them with contempt, defamed their religion, and would not tolerate the notion that a Jew could be a son of his fatherland. He adds:

"And after all this, you demand from the Jew that he shall be useful to the country which does not profess to be his fatherland, that he shall be faithful and devoted to those who constantly oppress him! The Jew did not take to agriculture, because he did not care to exchange one kind of misery for another; the law would not permit him to own land, and he had no desire to become a serf and to work for others. He showed strong inclinations to trade and industry; but the towns either would not admit him at all to these pursuits, or at best allowed him to be only a haberdasher. It was a constant struggle between the Jews and the Christian merchants; and therein lies the cause of the decay of trade and the impoverishment of the towns."

When the Diet appointed, in June, 1790, a committee "to reform the condition of the Jews," Butrymowicz was one of its most active members. He pleaded in behalf of the inviolability of the Jewish faith, and of the union of "the peoples" (the Christians and the Jews) by the reception of the latter into the national organism through mutual concessions, through the abolition or the reorganization of the *Kahal*, and even through the influence of the courts

in the propagation of education and culture among the Jewish youths. See CZACKI and POLAND.

**BUTTE, MONTANA.** See MONTANA.

**BUTTENWIESER, LAEMMLEIN:** German Talmudist and linguist; born in Wassertrüdingen, Bavaria, Jan. 16, 1825; died in New York city Sept. 23, 1901. He was descended from a well-known family of German rabbis, his father being rabbi of Wassertrüdingen, and his grandfather and great-grandfather having been rabbis at Buttenwiesen, Germany. Buttenwieser received his education at the gymnasium at Aschaffenburg, where he studied Talmud under Rabbi Adler, and at the universities of Würzburg and Prague. While attending the universities he also studied for the rabbinate; and he received his diploma as rabbi from Judah Löb Seligman Bär Bamberger of Würzburg, from Rapoport and Samuel Freund of Prague.

In 1854 Buttenwieser emigrated to America, and, not liking the conditions of the ministry, became a teacher of languages. He taught in the Talmud Yelodim School in Cincinnati, and in 1867 became instructor in the Hebrew Education Society of Philadelphia and in the Maimonides College at that place. He went to New York (1873) as a private tutor in Hebrew and Talmudic studies. The same year Buttenwieser was appointed teacher of languages in the New York public schools, which position he held until 1886, when he resigned.

F. T. H.

**BUXTORF (BUXTORFF), JOHANNES** (usually called "Father," or "the Elder"): The principal founder of rabbinical study among Christian scholars; born Dec. 25, 1564, at Kamen, Westphalia; died Sept. 13, 1629, at Basel. He studied at Marburg and afterward at Herborn, where Johann Piscator persuaded him to study Hebrew. He continued his studies at Basel in 1584, where he became the close friend and tutor of the children of Leo Curio, whose daughter Margaret he afterward married. In Aug., 1590, he graduated as doctor of philosophy, and in the following year was appointed professor of Hebrew at the University of Basel, which position he continued to fill until his death.

Buxtorf displayed remarkable enthusiasm and diligence in the investigation of Jewish science. In order to obtain a thorough knowledge of the Bible—which book he chose as his basis of inquiry—he was led to the study of the Masorah, the Talmud, and the Targum; and as many books were requisite to this end, he gradually acquired a valuable Hebrew library, and, unconsciously, obtained a knowledge of bibliography which eventually carried him to the threshold of post-Biblical Hebrew literature. By the publication of a catalogue of his Hebrew books, he

made one of the first attempts in the wide field of Jewish bibliography. For the correction of his edition of the Bible, as well as for his personal instruction, he employed from 1617 onward the services of two Jews, one of whom was the learned Abraham ben Eliezer BRAUNSCHEWIG. These men naturally were compelled to live in the neighborhood of Buxtorf's house. As, however, since the year 1557 "the Jews had been absolutely forbidden to enter Basel during the merchants' fair and at other times," Buxtorf was compelled to secure a special permit for them from the municipal authorities. When, in 1619, a son was born to Abraham Braunschweig, curiosity and zeal for investigation induced Buxtorf, accompanied by his son-in-law, the printer

**Fined for Attending a Circumcision.**

König, and the sergeant of the common council, to attend the circumcision. For this offense Buxtorf and König were fined each 100 gulden. Though Buxtorf was not a friend of the Jews, as is evident from his "Synagoga Judaica," he nevertheless maintained a correspondence with a number of Jews in Germany, Amsterdam, and even in Constantinople. His eulogists declare that his writings were welcomed and extolled in synagogues in every part of the world, and that Jews everywhere were accustomed to regard him as their leading oracle even on the most subtle questions of their belief. But this statement is undoubtedly an exaggeration. The mainspring of his activity in the domain of Jewish literature was his polemical zeal against Judaism, the ultimate object of which was the conversion of the Hebrews. Hence it comes that his first work was the above-mentioned "Synagoga Judaica," which, under the title of

"Judens-Schül" (Basel, 1603), appeared in several editions (with additions, 1664), and was translated into Flemish and Latin. Even Buxtorf's contemporaries condemned the superficial and malicious character of the book and its numerous intentional distortions of fact. Moréri criticizes the work as "très peu judicieux, et il s'y est trop attaché à des bagatelles, et à ce qui peut rendre les Juifs trop ridicules." Buxtorf's attention was constantly directed toward the conversion of the Jews; and from 1615 on he entertained the design of editing again the notorious "Pugio Fidei Contra Mauros et Judæos" ("Judendoleh"), or "Dagger [Defense] of the Faith," of the Dominican Raymond MARTIN, a manuscript copy of which had been sent to Buxtorf by Philipp Mornay-Plessis of Saumur. This design was defeated by his death.

**His Zeal Against Judaism.**

The most noteworthy of Buxtorf's publications is his rabbinical Bible, containing the Hebrew text, the Masorah, and various commentaries, published in two folio volumes (Basel, 1618-19), together with a supplement entitled "Tiberias, Commentarius Masorethicus" (1620), which for a long time was the best work of its kind. The best grammatical work of Buxtorf was the "Præceptiones Grammaticæ de Lingua Hebræa" (Basel, 1605), later published under the title "Epitome Grammaticæ Hebrææ," and afterward successively edited about sixteen times by Buxtorf's son and others, and translated into English by John Davis (London, 1656).

Buxtorf's work as a lexicographer began with the "Epitome Radicum Hebraicarum et Chaldaicarum" (Basel, 1607, not 1600), afterward published in numerous editions at Basel (1615-1735), Amsterdam (1645), London (1646), and Franeker (1653-54), under the title "Lexicon Hebraicum et Chaldaicum." An extract from it also appeared at Basel (1612; 6th ed., 1658), under the title, "Manuale Hebraicum et Chaldaicum." As especially important may be mentioned his "Concordance," based upon the older work of Isaac Nathan ben Kalonymus, and published after Buxtorf's death by his son; and his "Lexicon Chaldaicum Talmudicum," begun

**Lexicographical Works.**

Johannes Buxtorf I.

by Buxtorf in 1609, and completed by his son in 1639, after nine years of indefatigable labor. This lexicon, despite its numerous imperfections and errors, became an indispensable guide to specialists; a new but very imperfect edition was published as late as 1866. As the "Bibliotheca Rabbinica"—containing about 324 rabbinical writings arranged according to the Hebrew alphabet—was the first serious endeavor toward a compilation of a Jewish bibliography, so the "De Abbreviaturis Hebraicis," which was first published about the same time (Basel, 1613, 1640; Franeker, 1696; Herborn, 1708), and is still useful, furnished the basis for a knowledge of the Hebrew abbreviations. Finally, it is necessary to mention Buxtorf's "Institutio Epistolaris Hebraica, sive de Conscribendis Epistolis Hebraicis Liber, eum Epistolarum Hebraicarum Centuria" (Basel, 1610; "Cum Append. Variarum Epistolarum R. Maiemonis et Aliorum . . . Excell. Rabbinorum," Basel, 1629), a work containing over one hundred family and other letters, partly supplied with vowels, and partly translated into Latin and furnished with explanations of words; the letters being taken from the epistolary guide,

"Megillat Sefer" (Venice, 1552), the "Iggarat Shelomim" (Augs-burg, 1603), and the "Ma'ayan Gannim" of Archevolti (Venice, 1553).

Sprache*, pp. 28 et seq., Leipzig, 1859; Fürst, *Bibliotheca Judaica* (containing many inaccuracies), s. v.

T.

M. K.

**BUXTORF, JOHANNES:** Johannes Buxtorf, the son of the elder; known as **Johannes Buxtorf II.**; Christian Hebraist; born at Basel Aug. 13, 1599; died there Aug. 16, 1664. Before the age of thirteen he matriculated at the University of Basel, and in Dec., 1615, graduated as master of arts from that institution. He then went to Heidelberg, where he continued his studies under David Pyräus, Abraham Scultetus, Altng, and others. In 1618 he attended the synod at Dordrecht [Dort], where he formed a friendship with Simon Episcopus, Ludwig Crocius, and others. He succeeded his father, after the death of the latter, in the chair of Hebrew at the university; and so closely did he follow

Becomes in his father's footsteps that it became Professor of proverbial to say, "Non ovum ovo Hebrew. similis quam Buxtorf pater et filius."

He gained an almost equal reputation in the same domain as his father. Although he received offers from Groningen, Leyden, and various other places, he preferred to retain his position at Basel. He was four times married, and in his latter years experienced many sorrows.

Like his father, Buxtorf maintained relations with several learned Jews. He employed Abraham Braunschweig (see **Johannes Buxtorf**) to purchase Hebrew books for him; and for many years he corresponded with the scholarly Jacob Roman of Constantinople regarding the acquisition of certain Hebrew manuscripts and rare printed works. For Buxtorf was also engaged in the sale of Hebrew books; among his purchasers being the commercial representative of Cardinal Richelieu, Stella de Tery et Morimont, who occasionally sojourned at Basel, and Joh. Heinrich Hottinger, a professor of Zurich, with whom Buxtorf was on terms of close friendship. He also frequently furnished Hebrew books to the Zurich library. Buxtorf corresponded not only with Jacob Roman and Leon Siau of Constantinople (the latter of whom afterward embraced Christianity and became physician-in-ordinary to a Transylvanian prince), but with the teacher Simon Gal, and with the friend of the latter, Florio Porto of Mantua, both of whom were commissioned by Buxtorf to purchase Hebrew books in Italy; with the learned rabbi Menahem Zion Porto Cohen of Padua, whom Buxtorf did not treat in a very friendly manner; with MENASSE B. ISRAEL; David Cohen de LARA of Hamburg; Jacob ABENDANA of Amsterdam, for whose "Miklol Yofi" he wrote an approbation; Isaac ABENDANA,

brother of the foregoing; JOSEPH DEL MEDIGO, with whom he was personally acquainted; and many others.

Buxtorf prepared new editions of several of his

father's works [especially the "Tiberias"]; and, as in the case of the "Concordance" and the "Talmudic-Rabbinical Lexicon," completed and prepared for publication those that had been left unfinished. Nineteen years after the death of his father he became involved in a controversy with Louis CAPPELUS regarding the antiquity of the Hebrew vowel-signs; and although the question was one purely historical, it nevertheless contained a substratum of dogma, and in a number of polemical writings was conducted with great intensity and bitterness on both sides. The following original works of Buxtorf were published. "De Linguae Hebraicae Origine et Antiquitate" (Basel, 1644; not as Herzog, 1643); "Florilegium Hebraicum Contineus Elegantes Sententias, Proverbia, Apophthegmata: ex Optimis Quibusque Maxime vero Priscis Hebraeorum Scriporibus Collectum et . . . Alphabeticè Dispositum" (Basel, 1648). Especially noteworthy also are Buxtorf's Latin translations of the "Moreh"

#### His Original Works.

of Maimonides, "Doctor Perplexorum" (Basel, 1629), and the "Cuzari" of Judah ha-Levi, "Liber Cosri" (Basel, 1660). Buxtorf also wrote a long series of dissertations on the writings of Abravanel, among which may be mentioned "De כרת Sive de Excitii Poema," "De Longa Vita Primorum Parentum," "De Statu et Jure Regio," "De Mosis Nominè." All these first appeared singly, and then either as "Dissertationes Philologicae-Theologicae" (Basel, 1662), or in Ugolino's "Thesaurus" (xxv.); while several others, such as "De Lepra Vestimentorum et Aedium," "De Poesi Veteri Hebraica in Libris Sacris Usitata," "De Principio Anni," etc., were appended to the translation of the "Cuzari."

**BIBLIOGRAPHY:** *Revue Etudes Juives*, viii. 74-95, xiii. 260-276. Rich biographical material on Buxtorf the Younger may be found in his unpublished correspondence, and also in that addressed by him to Hottinger (which is preserved in the public libraries at Basel and Zurich).

M. K.

**BUXTORF, JOHANNES B.:** Nephew of Johannes Jakob Buxtorf; born Jan. 8, 1663; died June 19, 1732. He was professor of Hebrew at Basel, and published "Specimen Phraseologiae V. T. Hebr." (Frankfort-on-the-Main, 1717).

T.

M. K.

**BUXTORF, JOHANNES JAKOB:** Professor of Hebrew at Basel; son of Johannes Buxtorf II. by his fourth wife; born Sept. 4, 1645; died April 4, 1705. According to a letter written by his father to Coccejus ("Op. Anecd." ii. 738) in 1663, he was able at eighteen to read the Hebrew text of the Bible and of the Targum; and he is said also to have had some acquaintance with the Rabbinic and the Syriac. After his death the library collected by the three Buxtorfs (I., II., and III.), and valued at 300 louis d'or, was secured for 1,000 thalers by the public library at Basel, where it still forms a separate department.

T.

M. K.

**BUXTORF, JOHANNES RUDOLPHUS:** Great-grandson of Johannes Buxtorf I.; born at Basel Oct. 24, 1747; died 1815. After completing his studies in his native city, he became private tutor

in the family of the count of Schaumburg-Lippe. On his return to Basel he became professor of rhetoric and theology at the university (1793). He also lectured and wrote on Biblical archeology.

T. M. K.

**BUZ**: Second son of Nahor (Gen. xxii. 21). From the language of the genealogical lists, however, it is to be inferred that the name applies to a tribe; and from Jer. xxv. 23 it is clear that it was an Arabic one. It is probable that Elihu, the friend of Job (Job xxxii. 2, 6), was of this tribe.

J. JR. G. B. L.

**BUZAGLIO, BUZAGLI, or BUSAGLO, SHALOM BEN MOSES**: Cabalist; born in Morocco (where his father was "rosh yeshibah") at the beginning of the eighteenth century; died in 1780. He was a disciple of the cabalist Abraham Azulai, rabbi of Morocco, and filled the position of dayan. Owing to voyages in the Orient made in his capacity of collector of alms for the relief of the poor in Palestine, he became acquainted with the chief cabalists of the period. He also visited Europe, and sojourned some time in London.

Buzaglio published the following works: (1) "Mikdash Melek" (The Sanctuary of the King), a commentary on the Zohar, published by Meldola (4 vols., Amsterdam, 1750); (2) "Hadrat Melek" (The Beauty of the King), a commentary on the Zohar, compiled from Isaac Luria and Hayyim Vital (2 vols., Amsterdam, 1766; London, 1772); (3) "Kisse Melek" (The Throne of the King), annotations on the Tikḥune Zohar (Amsterdam, 1769); (4) "Hod Melek" (The Majesty of the King), commentary on the book Zeni'uta of the Zohar (London, no date); (5) "Sefer ha-Zohar," notes on the Zohar, published together with the text (London, 1772); (6) "Kebod Melek" (The Honor of the King), a collection of cabalistic derashot (London, no date); (7) "Ma'aseh sbe-Hayah Kak-Hayah" (What Happened Was in This Fashion), report of the proceedings of a lawsuit (London, 1774); (8) "Kuntras Ma'aseh Adonai Ki Nora Hu" (Fascicle on the Work of God, Which Is Majestic), an appeal to the public concerning the authority of Buzaglio's judgment in a lawsuit, in Hebrew and Judæo-German (London, 1774); (9) "Tokahat le-Shobabim we-Takkanah le-Shabim" (Admonition for Transgressors and Rehabilitation for the Repentant), consisting of two letters to Israel Meshullam Solomon, also concerning Buzaglio's lawsuit (London, 1774).

Although these cabalistic works bear his name on the title-page, they are merely compilations of teachings attributed by Azulai, his teacher, to Luria and Hayyim Vital. Buzaglio took part in the discussion that arose among many cabalists, whether Jews should be allowed to undergo vaccination, discovered shortly before that day. Buzaglio pronounced himself in favor of vaccination, but disputed the priority of Jenner in regard to its discovery.

**BUZAGLO, WILLIAM**: English inventor and empiric; died at London in 1788. His first claim to distinction was his introduction of stoves made on a new plan, and intended for the heating of large public buildings. He afterward practised medicine and professed to be able to cure the gout without drugs, by muscular exercise alone. Whatever may have been the real efficacy of his method—which seems analogous to the modern massage—he was generally regarded as an empiric because of the nature of his advertisement, abounding, as it did, in self-laudation. His manifesto was humorously parodied by Captain Grose in a handbill, given with a caricature, entitled "Patent Exercise, or Les Caprices de la Goutte."

**BYELAYA TZERKOV** (called in Hebrew לְבָן (שָׂרָה לְבָן)): Town in the government of Kiev, Russia. Its Jewish settlement must have been formed after 1550, when the waywode of Kiev, having built there a castle, attracted many inhabitants to the town by granting them numerous privileges.

The Jewish community of Byelaya Tzerkov is mentioned in the list of those given by Nathan Nata of Hanover as having been destroyed by the hordes of Chmielnicki in 1650 ("Yaven Mezulah," ed. Dyhernfurth, p. 3b). As the town, however, was the stronghold of the Cossacks before 1648 (Kostomarov, "Bogdan Chmielnicki," i. 24 *et seq.*), it is hardly probable that the Jews could have remained until the arrival of Chmielnicki. In any case, the fact that Samuel Faibush of Vienna, in his account of the Chmielnicki persecutions ("Tit ha-Yaven"), does not mention Byelaya Tzerkov proves that the Jewish community in the town was not of great importance. From 1651 until its occupation by the Russians in 1793, Byelaya Tzerkov was dominated alternately by the Cossacks and by the Poles, and could scarcely have had a large Jewish population.

Its importance as a Jewish community dates from the end of the eighteenth century, when it numbered about 12,000 Jews in a population of 20,700. In 1817 a Hebrew printing-office was established there, from which many Hebrew books were issued. The first work published was a book of sermons for Hanukkah and Purim, entitled "Or he-Hadash." Byelaya Tzerkov now (1902) has a synagogue and seven houses of prayer, the greater part of its Jews belonging to the Hasidic sect. The Jewish population in 1898 was about 9,000 out of a total of 22,703.

**BYELAYA VEZH**. See **SARKEL**.

**BYELOSTOK** (Polish, Białystok): Town in the government of Grodno, Russia; by rail 52 miles southwest of Grodno; one of the youngest in Lithuania. Little is known of the history of its Jewish community. There is a tradition (see "Ha-Kol," i., Nos. 41 *et seq.*) that its last owner before its incorporation into Russia, the waywode Count Branitzky—at whose instance in 1749 King August-

tus III. of Poland raised the proprietary village to the dignity of a town—invited Jews to settle there in houses and stores which he built for them at his own expense. He also

**Early Tradition.** erected for them a synagogue—a wooden structure which is to-day one of the curiosities of the city. There is no record of the effect which the transition from Polish to Prussian dominion in 1793, and later from Prussian to Russian rule after the Treaty of Tilsit in 1807, had on the Jewish community, which must have been considerable in those times. But there is reason to believe that the short-lived German rule helped to stimulate commerce and industry and was the cause of German predominance in the business affairs of Byelostok at the beginning of the nineteenth century.

Rabbi Kalonymus Kalman Lichtenstein, brother of R. Abraham Yekutiel, author of "Zer'a Abraham" on Sifre (Dyhernfurth, 1811), who, in the work of his grandson, Rabbi Abraham of Prossnitz, entitled "Ha-Torah we-ha-Mizwah" (Wilna, 1820), is referred to as rabbi of Byelostok, is probably the first rabbi of the community of whom there is any record. In the "Shem ha-Gedolim he-Hadash" mention is also made of Rabbi Solomon of Byelostok (second half of the eighteenth century), and of his successor, R. Aryeh Loeb b. Baruch Bendet, author of the

work "Sha'gat Aryeh," on the tractate Makkot of the Babylonian Talmud (Byelostok, 1805). Then probably came Rabbi Nehemia, whose responsum upon the reading of the "ketubah," or marriage contract, at weddings, written by him in 1835, was published by Benzion Zechmilopovitch of Russia, in Vienna (printed by Adalbert della Torre, 1859). The existence of this Rabbi Nehemia is known only through that responsum, and is doubted by both Ben Jacob and Zedner, who seem to believe that Zechmilopovitch printed it under an assumed name. This would agree with Fuem's statement ("Keneset Yisrael," p. 301) that Rabbi Moses Ze'eb became rabbi of Byelostok in 1824. Moses Ze'eb was the author of "Mareot ha-Zobeot," a work on abandonment (Byelostok, 1810), and of "Aggudat Ezob," sermon: (*ib.* 1824), and formerly rabbi of Tiktin.

After Ze'eb's death there was an interregnum, during which R. Eliakim Getzel acted as rabbi without having the title, until about 1860, when R. Yom-Tob Lipman Heilprin of Meseritz was called to Byelostok. Heilprin, who in his former community had had many quarrels with the Hasidim about his crusade against smoking in the synagogue, encountered many difficulties in his new position. His refusal to officiate at a wedding ceremony in the "chorschul," or quasi-Reform synagogue, caused him to be imprisoned at Grodno; and he was freed only after a long and expensive struggle. After his death in 1878, his son, R. Hayyim Herz

**Eminent Rabbis.** (born 1850), who edited his father's voluminous work of responsa, "Oneg Yom-Tob," was acting rabbi for about five years, until R. Samuel Mohilewer of Radom was elected to the rabbinate in 1883 (see Samuel MOHILEWER). After the death of Mohilewer in

1898, R. Hayyim Herz Heilprin again became acting rabbi. Meir Marcus, a graduate of the rabbinical seminary of Wilna, has been the government rabbi of Byelostok for more than thirty years (d. Dec. 1900).

Byelostok was always an industrial city; and the material condition of its inhabitants is therefore superior to that of the population of other cities in poverty-stricken Lithuania. Its chief industry, the manufacture of cloth, was up to the middle of

The Old Synagogue of Byelostok.  
(From a photograph.)

the nineteenth century mostly in the hands of Germans, who, however, relied largely on Jewish capital. Nahum Mintz and Sender Bloch were the first Jews to engage in the manufacture of cloth (1850); Mintz being also the first to employ the steam-engine in that industry at Byelostok. Among the other pioneer Jewish manufacturers were J.

S. Barish, Breinin & Zabludovsky, and A. Halberstamm; the last-named being the father of the prominent banker Henry Halberstamm, who went to Germany to study the system of manufacturing in western countries. At present the Jews equal, in some points even excel, the Germans in cloth-making.

The growth of the population and the prosperity of Byelostok for the last forty years must be attributed almost entirely to the Jews. There does not

seem to have been any increase of the Gentile population during that period. Semenov, "Geographical and Statistical Dictionary of the Russian Empire" (i. 372), gives the Jewish population of Byelostok in 1860 as 11,288 in a total population of 16,544. In 1889, according to "Entziklopédicheski Slovar," 1896 (the latest official authority available), it was 48,552 in a total population of 56,629. S. R. Landau, in his excellent description of the Jewish community of Byelostok at the present

**Vital Statistics.** time says, in his "Unter Jüdischen Proletariern" (Vienna, 1898), pp. 45-58, that there are hardly 5,000 Christians among its 65,000 inhabitants. Semenov mentions only 3 cloth-factories in Byelostok in 1860; the present number, according to Leonty Solowitschik ("Un Proletariat Méconnu," p. 100, Brussels, 1898), is 60, besides about 20 establishments of allied industries. The number of Jewish weavers, according to Landau, is in round numbers 2,000. Almost all other industries and trades, as well as commercial enterprises, are in Jewish hands. The tobacco industry, which in Byelostok is second in importance only to the cloth industry, is entirely in the hands of Jews. In the earlier part of the nineteenth century Byelostok had a Hebrew printing-office, from which the first book known to have been printed was issued in 1805 and the last in 1824.

The Jewish community of Byelostok is the most prosperous in Lithuania, and its communal institutions are models of their kind. The *Korobka* (meat-tax) and the yearly quota of conscripts to the army, which are the cause of much trouble in most Russo-Jewish communities, are dealt with here in a spirit of justice which satisfies all parties concerned. Byelostok has one large synagogue, or "schul," one "chorschul," four or five large "batte midrashim," and about twice as many small ones, or "minyanim." It has also one of the finest Jewish hospitals in the empire, a home for the aged, two "gemilut hasadim," or free loan institutions, a Talmud-Torah with about 500 pupils, and many other benevolent societies.

The number of distinguished Jews born or who have made their home in Byelostok is considerable. Isaac Zabludovsky, the ancestor of the most influential family in Byelostok, is said to have been the first Jewish millionaire in Russia. Michael Zabludovsky (1803-69), author of a work, "Mish'an Mayim," on the rational interpretation of the Haggadah, and

**Notable Jews.** Professor Zabludovsky, specialist in massage at the University of Berlin, belong to the same family. Eliezer Halberstamm, the wealthy scholar and author, was connected with them by marriage. Jacob Bucharach, who corresponded with Rapoport, Zunz, Luzzatto, and other great scholars of the century, and wrote on the Hebrew alphabet and other subjects, lived in Byelostok. The Nestor of modern Hebrew literature in Russia, A. B. GOTTLOBER, spent his last years in Byelostok, and is buried there. The poet M. M. DOLITZKY; Arthur Freeman, son of the Hebrew writer; A. D. LIEBERMAN; and Leo WEINER of Harvard University, Massachusetts, U. S. A., were born there. J. CHAZANOVITZ, the noted Zionist, who devotes his energy and almost his entire

income to the national library which he founded in Jerusalem, is one of the interesting characters of Byelostok. Lazar Atlas, the critic, and formerly editor of the "Ha-Kerem," has been a bank official in the city since 1895.

P. W1.

**BYELSK:** Town in the government of Grodno, Russia. It is impossible to name the exact date when Jews first settled here. In the sixteenth century, during the reign of Sigismund Augustus, the Byelsk Jews were accused of ritual murder, but were acquitted. This trial, together with a similar one at Narva, resulted in the promulgation of a royal edict, termed "Privilegia," forbidding the torture of Jews accused of using Christian blood for their ritual. The king himself was to try these cases; and the accusation had to be proved in the manner mentioned in the "Privilegia."

Byelsk has a total population of 7,461, including (in 1898) 5,500 Jews. The economic conditions of the latter are generally poor. There is fierce competition among the petty shopkeepers, constituting about 75 per cent of the Jewish population. About 440 Jews are engaged in tailoring, baking, shoemaking, etc., while 60 are laborers. The increase of poverty is manifested by the number of applicants for charity at the Passover. These increased from 95 in 1894 to 195 in 1898. The committee of charities, numbering 300 members, collects annually about 2,000 rubles for the poor. There is a Talmud-Torah with 113 pupils, and an elementary public school having two classes.

S. J.

**BYESHENKOVICHI:** Town in the district of Lepelsk, government of Vitebsk, Russia. In 1898, in a total population of 5,000, about 4,000 were Jews, of whom 576 were artisans. They had a synagogue, many houses of prayer, three benevolent societies, and numerous religious schools.

S. J.

**BYK, EMIL:** Austrian lawyer and deputy; born Jan. 14, 1845, at Janow, near Trembowla, in Galicia.

In 1885 Byk was chosen chairman of the charity committee of the Kultusrath of Lemberg, and is now (1902) president of the Jewish community there; in 1890 he was a "Stadtverordneter" and president of the Shomer Israel Society; in 1891 he was elected to represent Brody and Zloczow in the Reichsrath; and he was reelected at every subsequent election. Byk has served on several important committees of the Reichsrath, such as the Volkswirtschaftsausschuss and Justizausschuss. Some of his more important speeches in that body are: an address in 1893 against Prince Lichtenstein on the establishment of a Jewish theological seminary; an address, May 4, 1898, against the proposition that the sittings of the committee to consider the charges against ex-Prime Minister Badeni should be public; and a stirring address, Nov. 24, 1898, on the "Ausnahmestand" in Galicia, which was very well received. Byk is promi-

ment in the legal profession, and takes a leading part in Jewish affairs not only in Lemberg but in Galicia generally.

P. Wl.

**BYKHOV:** District town in the government of Mohilev, Russia. At the census of 1898 the total population was 6,536, including 3,172 Jews, of whom 587 were artisans. Most of the Jews are extremely poor, and at times they lack the simple necessities of life. One hundred and twenty-seven families had to apply for relief at the Passover. There are a "biḳḳur ḥolim" society (for the visitation of the sick), a "linat ha-zedek" (poorhouse), and a "kibbud yom-tob" society (an organization for providing help during holidays). In the vicinity of Bykhov are situated **Sapezhinka** (a village where 44 Jewish families own 357 deciatines of land) and an agricultural colony, **Vynn** (with 20 Jewish families who own a tract of 200 deciatines).

H. R.

S. J.

—**Historical Data:** During the uprising of the Cossacks under Bogdan Chmielnicki, 1648–49, the greater part of the Jews of Bykhov, who did not embrace Christianity, were killed. From a report of the Polish agent Voisba to King Jan Cazimir (dated Mohilev on the Dnieper, Aug. 25, 1662) it is evident that the Jews of Bykhov who were forcibly baptized did not become true adherents of the Greek Orthodox Church, and that they gave their support to the Polish commander Grochowski, who had been captured by the Russians on the Bykhov road and imprisoned. At the same time Major Jacob Shtreg, an engineer from Moscow, who was dissatisfied on account of the humiliation he received from the Russians during the siege of Smolensk and Bykhov, reported that he would soon come to Mohilev in the service of the Polish king, together with the Jews of Bykhov, with whom he had made arrangements for the occasion.

The Russian archimandrite, Vasilevich of Slutsk (Lithuania), in a letter addressed to Prince Radziwilk, lord of the manor, complained of the great losses he had sustained by the Jews—not the old settlers of Slutsk, but those who emigrated from Bykhov and from the Ukraina, among whom there were many who had been converted to the Greek Orthodox religion and had now turned back to Judaism. Thus, for instance, a Jewess from Russia who had been converted to Christianity more than ten years before, and who had married a Muscovite Christian, persuaded him to remove to Slutsk, where she and the sister and children of her husband, as well as her own children, changed their faith to Judaism.

Owing to an application of Abraham Wolfovich, a Jew from Bykhov, a copy of a document of the city records of Orsha, given to Isaash and Abraham Wolfovich of Bykhov, was entered Aug. 13, 1671, in the city records of Brest-Litovsk. It contained a privilege granted by King Michael to the city of Old Bykhov, Oct. 20, 1669, releasing the community from the payment of taxes for twenty years on

account of the deplorable condition of its inhabitants, who had been utterly ruined by the attacks of the Cossacks and the Muscovites.

H. R.

**BYRON, GEORGE GORDON, LORD:** English poet; born in Halles street, London, Jan. 22, 1788; died at Missolonghi, Greece, April 19, 1824. The only one of his works which has any relation to Jewish topics is his "Hebrew Melodies," some of which have proved as popular as any of his lyrics. These melodies were written to oblige Byron's friend Douglas Kinnaird. Their meter lacks spontaneity; the subject-matter has often nothing whatsoever to do with anything Hebraic; and their imagery is often conventional and unpicturesque. "She Walks in Beauty," for example, might be Irish as well as Hebrew. It was written on Byron's return from a ball, where he had seen and admired Mrs. (later Lady) Wilmot Horton, wife of the poet's relative, the governor of Ceylon. She appeared at the ball, dressed in black and covered with spangles.

Much the same may be said of "It Is the Hour When from the Boughs." On the other hand, "Oh Weep for Those" is essentially Jewish in its subject-matter, and is written in a strain worthy of its author. The last verse is well known:

"Tribes of the wandering foot and weary breast,  
How shall ye flee away and be at rest?  
The wild dove bath her nest, the fox his cave,  
Mankind their country—Israel, the grave."

Another poem, symbolic of Judaic history, "The Assyrian Came Down Like a Wolf on the Fold," is not written, however, in Byron's usual smooth and euphonious style.

The "Hebrew Melodies" never satisfied their author. Twitted on the subject by Moore, he exclaimed:

"Sunburn Nathan! [the composer who had set them to music] Why do you always twit me with his Ebrew nasalities? Have I not already told you it was all Kinnaird's doing and my own exquisite facility of temper?"

The poems constituting the "Melodies" were written in 1814 for music composed by Isaac NATHAN, who had been introduced to Byron two years previously. The music was mainly "a selection from the favorite airs sung in the religious ceremonies of the Jews" ("Nathan's Fugitive Pieces," p. ix., ed. 1829, p. 144); and Kinnaird, who was a dilettante, induced Byron to supply the words. Subsequently John BRAHAM arranged and sang the songs, but did not assist in composing them.

E. Ms.

**BYZANTINE EMPIRE:** Name given to the eastern division of the Roman empire. On May 11, 330, Constantinople became the capital of the Roman empire, and the Greek Orient thereafter developed independently. In these countries of the Eastern empire, including Palestine, the Jews lived in great

masses, so that the fate of the Jewish people was decided in Constantinople.

The association of "navicularii" (ship- and cargo-owners) of Constantinople had attempted to force the Jews and the Samaritans to join them and to share in the burdens of the society; but a decree dated Feb. 20, 390, bearing the names of the emperors Valentinian II., Theodosius, and Arcadius, decided that the communities of the Jews and the Samaritans could not legally be forced to join the navicularii, and that at most their wealthy members only could be taxed ("Codex Theodosianus," xiii. 5, 18). This decree was most important to the Jews, for many of them were ship-owners, and more than one-half of the shipping in Alexandria was controlled by Jews (Synesius, "Epist.," iv.). While

in the Western empire the Jews were compelled to fill civic offices, the Eastern empire accorded certain privileges at least to the elders ("viri spectabiles") and to the patriarchs of the community ("Cod. Theod.," xvi. 8, 14). The rule of Arcadius was on the whole favorable to the Jews, and these privileges of the patriarchs were renewed Feb. 3, 404. In 412, disturbances of the Jewish service and the confiscation of Jewish synagogues were forbidden (*ib.* xvi. 8, 21). In 438 Theodosius II. had all laws codified and published relating to the Jews ("Novelle Theod.," title iii.).

In the mean time several events had occurred to disturb the relations between Jews and Christians. In 343 a riot is said to have broken out among the Jews of Palestine, during which they killed many Greeks and Samaritans (Theophanes, "Chronographia," ed. Migne, cviii. 139); and similar events are reported in the "Chronicon" of Jerome (compare Theodoret, iv. 6) as occurring in the fifteenth year of Constantine's reign (352). In fact, even Talmudic sources speak of the hardships inflicted upon the Jews under Cæsar Gallus at the hands of his general, Ursicinus. The Roman army captured Diocæsarea (Sepphoris), the stronghold of the uprising, and, among other cities, Lydda and Tiberias, which were completely destroyed. The leader of the rebellion is called by the Romans "Patricius," and in Jewish sources "Natrona"; the latter, however, seems to be an assumed Messianic name, like that of Nehemiah ben Hushiel, who, according to an obscure passage of the Midrash (on Ps. lx. 3), died before the gates of Jerusalem in the war against Constantinople. Among other severe penalties, Constantine renewed the law which forbade the Jews to enter Jerusalem (Sozomen, ii. 9, iii. 17). The severe measures against them were somewhat relaxed during the short reign of Julian the Apostate, but as early as the reign of Theodosius I. outrages were committed upon

**III-Feeling** them, the bishop of Callinicus burning  
**Between** the synagogue in Osrhoene (Am-  
**Jews and** brosius, "Epist.," xxix.; see Am-  
**Christians.** brose). Though in 402 Atticus, bishop of Constantinople, cured a paralytic Jew by baptizing him (Theophanes, *l.c.* p. 223), Arcadius did not encourage such baptisms, and issued a decree "de his qui ad ecclesias confugiunt" ("Cod. Theod.," l. 2).

But under the bigoted Theodosius II. the clergy had a free hand in Jew-baiting. In Alexandria, through the fanatic bishop Cyrill, open hostility broke out between the Jews and the Christians, and Cyrill succeeded in cruelly expelling the Jews from the city in 415 (Socrates, "Hist. Eccl.," vii. 15; Theophanes, *l.c.* p. 223). The prefect of the city complained, but at Constantinople the bishop was supported; nor did the authorities there interfere when the Jews were driven from Crete. On the other hand, Theodosius II., with perfect justice, threatened punishment to the Jews for insulting the Christian religion by some Purim joke ("Cod. Theod.," xvi. 8, 18, 21).

According to a report falsely ascribed to Athanasius, the Jews of Beirut are said to have insulted the image of Jesus (Leo Diaconus, "Hist.," x. 5, ed. Migne, cxvii. 896). In Inneslar or Imnum, a little town between Antioch and Chalcis, a similar occurrence is said to have caused the death of a Christian boy; and the perpetrators of the joke were of course severely punished (Socrates, *l.c.* vii. 16; Theophanes, *l.c.* p. 227). In consequence of this event the Christians of Antioch took away from the Jews their synagogues (423). The emperor himself did not respect the property of the Jews, for in 429, after the extinction of the patriarchate, he seized its tax, which formerly went to the patriarch, for the imperial treasury ("Cod. Theod.," xvi. 8, 29).

It was Theodosius, also, who expelled the Jews from Constantinople proper, assigning them to a district on the other side of the Golden Horn above Galata, called Stenum (Στενόν), Stanor, or Stanayre (but now changed to Juderia or Judeca), in which was also their cemetery. Hitherto they had occupied in the city itself a special quarter, the copper market (χαλκοπράτεια), containing their synagogue, which was turned later into a Christian church. They were now under the jurisdiction of a special strategus; but Manuel Comnenus again put them under the municipal authorities (Du Fresne, "Histoire Byzantine," ii. 167, Paris, 1680). Benjamin of Tudela, also, did not find the Jews in the city itself, but across the inlet. A staircase, which probably led to the Jewish cemetery, was called 'Εβραϊκὴ σκάλα (Ducange, "Notæ in Alexiadem," ad 161 D.). Jews and Samaritans here held such large manufacturing interests that merchants in general were called "Samaritans" (Schwarz, "Samarit. Pentat.," p. 42).

The feeling of Emperor Zeno (474-491) against the Jews is illustrated by a remark at the races of Antioch. The "Party of the Green" murdered many Jews, threw their corpses into the fire, and burned their synagogue. "They should have burned the living ones also," said the emperor (Makulas, "Chronographia," ed. Bonn, p. 389). The charioteer Kallipos, who had come to Antioch from Constantinople, also caused a massacre of the Jews, July 9, 507 (Makulas, *ib.* p. 396). Small wonder that there was a baptized Jew, Bassus, even in the Palestinian city Pausas (*idem*, p. 239). Palestine suffered much in those days; Aere and Ptolemais were destroyed by earthquakes; and in Beirut the synagogue fell (Joshua Stylites, ch. xlvii.). In 523 Justin renewed

the decree of Theodosius the Younger, forbidding the Jews and the Samaritans to hold positions of honor ("Codex Justinianus," i. 5, 12). Although nominally no difference was made between Jews and Samaritans, the latter were even more oppressed, since they could not act as witnesses, nor will away their property. During the reign of Zeno, in 490, at Pentecost, the Samaritans of Nablus fell upon the Christians, maltreated their bishop, and desecrated their church; as a punishment the emperor took away their holy mountain, Gerizim, presented it to the Christians, and built a church there.

Under Justinian (527-567) the Samaritans rose again, chose Julian b. Sahar for their king (June, 530), fell upon the Christians, and burned their churches. The emperor's troops suppressed the riots, killed 20,000 Samaritans, and executed the leaders. Many Samaritans thereupon were converted; the others remained at Nablus and in the vicinity of Mt. Gerizim (Theophanes, *l.c.* p. 411; Procopius, "Historia Arcana," ch. ii.; "Chron. Paschale," ed. Bonn, p. 619). The Jews did not take part in this riot (Malalas, *l.c.* p. 445), the immediate cause of which was a quarrel at an athletic game. It is known that Jews and Samaritans were employed as charioteers (*ib.* p. 446). During a race at Caesarea in Palestine both the Jews and the Samaritans engaged in a riot (Theophanes, *l.c.* ad annum 555) against the Christians, pulled down their churches, and killed Stephen, the prefect of the city. The emperor had the rioters severely punished by Amantius, or Adamantius (Procopius, *l.c.* ed. Bonn, pp. 150-152). It was perhaps in mockery of the Jews that there was in the circus of Constantinople the inscription Παλαιστράτης ("Ruler of Palestine") as the name of a horse (Kumanudes, *Συναγωγή Ἀγίων Ἀποστολικῶν*, p. 248, Athens, 1883). On the other hand, the Jewish era ("era mundi") is found on an inscription from the year 858, at Nicæa in Bithynia ("Byzantinische Zeitschrift," i. 77). The Jews had always defended the Persians. When Tella in Mesopotamia was besieged by Kobad in 505, the Jews, through treachery, fell into the hands of the Greeks, and were all massacred by the Greek general Leontius (Joshua Stylites, ed. Wright, ch. lviii.).

Justinian was the first emperor who not only curtailed the civic rights of the Jews, but interfered also in their religious customs and traditions. He forbade the celebration of the Passover if it fell before the Christian Easter (Procopius, *l.c.* ch. xxviii.), because a Christian sect, the Quartodecimani, still celebrated this festival together with the Jews. An anonymous writer violently attacks both the Jews and the Quartodecimani for this (Photius, "Myriobiblon," ed. Migne, ciii. 390). The ancient community of Barion in northern Africa was even forced into baptism by Justinian (Procopius, "De Edificiis," vi. 2), perhaps because it had resisted Belisarius in his expedition against the Vandals. After Belisarius had conquered the empire of the Vandals he carried to Constantinople the venerated treasures of the Temple, which they had taken from Rome; but, on the advice of a Jew, Justinian sent them to

Jerusalem (Procopius, "Bellum Vand." ii. 9). The Jews, having good reason to stand by the Goths, heroically defended Naples in southern Italy against Belisarius in 536 (Procopius, "Bellum Goth." i. 8). It was an evil day for the Jews of Italy when they too came under Byzantine rule. Under Mauritius, in 584, a church in Jerusalem fell; the emperor sent Jews from Constantinople to restore it.

Under Phocas occurred the bloody uprising of the Jews of Antioch. Phocas himself was murdered, but his successor, Heraclius (610-642), also waded in the blood of the Jews. During his reign important events took place in Palestine, which are differently reported in the various chronicles. In the fourth year of Heraclius' reign, according to a Syrian source ("Rheinisches Museum für Classische Philologie," xlviii. 164), Sahrparz, general of Chosroes II. of Persia, conquered Damascus, in the following year Galilee, and in the year after Jerusalem, killing 90,000 persons there. "The Jews bought the captive Christians for a small sum, and in their wickedness put them to death"; but the source of this remarkable statement, Bar Hebraeus Abulfaraj, is careful to qualify it by adding that

"most of the Christians were killed by the Persians and only a small number between by the Jews." Eutychius (Ibn Bat-Rome and rik), however, asserts that the Jews helped the Persians in this massacre

of countless Christians, and George the Monk speaks of myriads of Christians murdered by the Jews at the bidding of the Persians, which statement is corroborated by Theophanes ("Byzantinische Zeitschrift," iii. 343). At all events the Jews dealt cruelly with the Christians, thereby hoping to induce the Persians to cede Jerusalem to them. According to the Syriac source the hope was not realized; on the contrary, all Jews from that city and the vicinity were exiled to Persia. When, after fourteen years, Heraclius came as victor into Palestine, the Jews of Tiberias and of Nazareth, under the leadership of Benjamin of Tiberias, joined him as allies; the emperor would have kept peace with them had not fanatic monks instigated him to a massacre. Only a few Jews escaped into Egypt or sought refuge in caves and in forests (Eutychius, ii. 241).

In atonement for the violation of an oath to the Jews, the monks pledged themselves to a fast, which the Copts still observe; while the Syrians and the Melchite Greeks ceased to keep it after the death of Heraclius; Elijah of Nisibis ("Beweis der Wahrheit des Glaubens," translation by Horst, p. 108, Colmar, 1886) mocks at the observance. Heraclius is said to have dreamed that destruction threatened the Byzantine empire through a circumcised people. He therefore proposed to destroy all Jews who would not become Christians; and he is reported to have counseled Dagobert, king of the Franks, to do the

same (Pertz, "Monumenta Germanicæ Historica," i. 286, vi. 25; compare Joseph ha-Kohen, "Emek ha-Baka," tr. Wiener, p. 5). The saying of the Tiburtine sibyl (Sackur, "Sibyllinische Texte," p. 146, Halle, 1898), that the Jews of the Byzantine empire would be converted in one hundred and twenty years, seems

to refer to these occurrences, since about one hundred and twenty years elapsed from the time of the Persian war under Anastasius, in 505, to the victory of Heraclius in 628. It has been thought that a Jewish apocalypse also refers to this expedition of Heraclius against the Persians (Buttenwieser, "Elias-Apokalypse," Leipzig, 1897; see APOCALYPTIC LITERATURE, NEO-HEBRAIC; see, however, "Jew. Quart. Rev." xiv. 359). No further persecutions of the Jews under Heraclius are reported. But the Jews again showed their warlike spirit when, as Nicephorus narrates, they stormed the Church of St. Sophia at Constantinople, which at that time was protected by the empress Martina and her son Heraclonas. Heraclius' dream was fulfilled in an unexpected way. Judea, Syria, and Egypt fell into the hands of the circumcised Arabs and ceased to exist for the Byzantine empire; and the Jews were no longer excluded from Jerusalem.

The Byzantine empire was now considerably smaller, but all the more bitter were the persecutions originating there. It is said that Leo the Isaurian (718-741) as an itinerant peddler met some Jewish fortune-tellers, who predicted that he would win the Roman empire if he abolished idolatry (Glycas, "Annal." i. 280; Gibbon, "Decline and Fall," v. 185). The iconoclasts, of whom Leo was the first, were nicknamed "Jews," as the pure Jewish religion forbade image-worship. The sentence of a wise man was frequently quoted: "You have often heard that the Hebrews and Samaritans condemn images, hence all those who condemn them are Jews" (Mansi, "Sacrorum Conciliorum," etc., xiii. 167). The reading of Isa. xl. 18, at Christmas, 814, so af-

**The Iconoclasts.** fected Emperor Leo V., the Armenian, that he turned iconoclast. The same may be supposed of the Isaurian, who was acquainted with Jews and Arabs. Nevertheless he forced the Jews of his empire to be baptized (723), many submitting, but at the first opportunity returning to their ancient faith. Others fled to freer countries, a number of Greek Jews going to the Crimea, to the Caucasian districts, or to the kingdom of the Chazars, where they effectively planted the seeds of Judaism.

The former comrade in arms of Leo the Armenian, Emperor Michael II., stood in peculiar relations to Judaism. Many Jews were living in Amorion, a city in upper Phrygia. The Greek inhabitants belonged to a sect which, while believing in baptism, lived according to the Mosaic law in all things except circumcision. In spiritual as well as in temporal affairs it had as its leader a man or a woman who must have been born a Hebrew. Michael the Phrygian in his youth had belonged to this sect. Thus he had been ruled by Jews before he in turn ruled them (Additions to Theophanes, ed. Migne, cix. 56). The so-called "Attinganes" also may be regarded as Jews (Basnage, "Histoire des Juifs," v. 1482). Basil I., the Macedonian (867-886), third ruler after Michael, affected the lot of the Jews as no other Greek emperor had done. Knowing well that the religious disputations which he convoked between Jews and Christians led to no results, he promised relief from the burdensome taxation, and honors and offices to all Jews who should elect to

be baptized. Perhaps by threats rather than by promises, he induced many Jews to be converted, although, as the source expressly adds, they returned to Judaism immediately after the em-

**Basil I.** peror's death (*ib.* p. 341; Simeon Magister, *ib.* p. 690; Georgius Monachos, *ib.* p. 842; Cedrenus, in the "Compendium," p. 241). The Chronicle of Ahimaaz (Neubauer, "Medieval Jewish Chronicles," vol. ii.) shows the far-reaching consequences of the emperor's edict. From Otranto the terrible news spread even to the Byzantine provinces of southern Italy, and it was only through a miracle, when Shephatiah b. Amittai cured the insane daughter of the emperor, that five Jewish communities there were saved; while more than one thousand communities were forced to submit to baptism. Shephatiah expressed his sorrow in touching penitential songs; and this characteristically Byzantine act became the subject of Malzor commentaries. The Chronicle of Ahimaaz says that Basil's son, Leo VI., the Philosopher, restored religious freedom to the Jews; this agrees with the statements found in the continuation of Theophanes. However, the "Basilica," that "corpus juris" which was begun by Basil and continued and completed by Leo VI. and Constantine VII. Porphyrogenitus, contains some stringent measures in regard to the Jews. But more rigidly than these imperial edicts were the edicts of the Church enforced.

The heretical patriarch of Constantinople, Photius, who had for his teacher a Jewish necromancer, and who was himself the tutor of the imperial philosopher, collected the ecclesiastical laws into the *nomocanon*. The sixth ecumenical council (680-681), which was the third convened at Constantinople, prescribed in Tit. iv., canon 78, that the Samaritans, with whom there had been trouble, should not be admitted too hastily to baptism. The seventh ecumenical council, the second held at Nicea, in 787, dealt in the eighth canon with the same subject; this time, however, in regard to the Jews, who, it said, ought to remain Jews rather than mock at Christianity under the mask of Christians. Emperor Constantine VIII., in 1026, added to these laws a regulation for a special Jew's oath.

Soon afterward the Byzantine Jews were stirred by events of world-historic importance. At the time of the first crusade (1096), Messianic hopes filled both the Germanic and the Greek Jews, who expected no less than that Palestine would be restored to the Jews. A letter found in the genizah of Cairo ("Jew. Quart. Rev." ix. 27-29), which was sent from Tripolis to Constantinople, seems to indicate that Emperor Alexius Comnenus

**Messianic Hopes.** and the Patriarch (this is the interpretation of the "great Hegemon") exempted the Jews, perhaps only those of Salonica, from taxation, either because they were unable to pay taxes on account of the stress of the time, or because the emperor, fearing lest they should sympathize with the Latin crusaders, tried to secure their loyalty. Signs were reported from Salonica which were taken to announce the advent of the Messiah. These hopes, however, were deceptive; the Jews suffered untold misery at the hands of the crusaders, and Palestine, wrested from the

Mohammedans, was not even allowed to be the sanctuary of Jewish piety (*ib.* x. 139-151).

About the year 1000 Elijah of Nisibis ("Beweis der Wahrheit," p. 42) gave the following description of the Byzantine Jews: "The Romans tolerate many Jewish inhabitants within their borders, protect them, permit them to worship in public, and to build synagogues. The Jew in his country openly declares: 'I am a Jew.' He cherishes his religion, prays in public, is not called to account for it, nor is he prevented from observing it, and no difficulties are put in his way." The Nestorian metropolitan here shows how much better was the condition of the Jews than that of the Christian heretics. Moreover, it appears that the Greek Jews were more favorably circumstanced than their brethren in most of the other countries of Europe: the Greeks found the conduct of the Latins toward the Jews unjust and abhorrent (Basnage, "Histoire des Juifs," v. 1749). Therefore it is an error on the part of the traveler Pethahiah to speak of the bondage of the Jews in Greece. He himself testifies at the end of his work that there were a great many Jewish communities in Greece; consequently they could not have been so badly treated. The traveler Benjamin of Tudela (about 1170) also testifies to the peace and prosperity enjoyed by the Greek Jews. In Otranto,

**In Eleventh and Twelfth Centuries.**

the last town in southern Italy that remained under Byzantine rule, there were 500 Jews, but in Corfu only one Sicilian Jew; in Arta (or Larta), 100 families, whose leader was significantly called "Rabbi Heracles"; in Achæas were 2 Jews; in Patras, 50;

in Lepanto, 100; in Krissio near Mt. Parnassus, 200 Jews, engaged in agriculture; in Corinth, 300; in Thebes, 2,000. A Jew from Thebes is mentioned in the Messianic letter from Tripolis, and Judah al-Harizi also mentions this city. Its Jewish scholars stood second only to those of Constantinople, and the best silks and purple stuffs of the whole Byzantine empire were manufactured by its Jews. Silk-culture had been quickly learned by the Byzantine Jews, who became masters of the art, some of them being transported to Sicily by Roger, king of Naples. In Eubœa there were 200 Jews; in Taburtrissa, 100; in Rovinaca, 100; in Armiros, a great commercial city, 400; in Vissena, 100; in Salonica, 500; in Mitrizzi, 20; in Drama, 140; in Christopolis, 20; in Rodosto, 400; in Gallipoli, 200; in Kilia, 50. In Zeitum, on the borders of Wallachia, Benjamin found 50 Jews. The Wallachians pillaged the Greeks, but did not molest the Jews; they even gave to their children Jewish names, and called themselves brothers to the Jews. In Constantinople—that is, across the inlet—lived 2,000 Rabbinite and 500 Karaite Jews, separated by a wall. In addition to celebrated teachers, there were silk-workers, merchants, and bankers; they were often disturbed by the tanners near whom they lived. On the Greek islands also were many Jews: on Mitylene were 10 communities, on Chios 400 families, on Samos 300, on Rhodes 400, and on Cyprus several communities, among whom were some heretics.

Benjamin of Tudela, and Justinian in his one hundred and forty-sixth novella, describe quite

accurately the communal affairs of the Jews of the Eastern empire. Since the extinction of the patriarchate they had no central authority. In the several communities the heads of the academies ("reshe pitke," ἀρχιφερρεκται) managed the affairs, assisted by the elders (πρεσβύτεροι) or masters ("magistri"). In

**Internal Constitution.**

Palestine the rabbis were designated by the Greek expression "wise men" (σοφοί), a title that survived in the Sicilian communities during the whole Middle Ages ("Jew. Quart. Rev." vi.

235). The delegates to the communities were called ἀπόστολοι. The "Cod. Theod." xvi. 8, 10 also mentions the primates of the Jews. When Benjamin of Tudela visited the Jews at Salonica, they had their own mayor (έφορος). This was during the reign of Manuel Comnenus (1143-80), who, as has been said, put the Jews of Constantinople under the jurisdiction of the common courts. He permitted his physician, Solomon the Egyptian, to ride a horse. At Corfu, where the Jews were increasing, the Jewish syndics dressed like the Christian syndics, but were not permitted to carry a sword. Here the Jews retained their old constitution even under Venetian rule (Romanos, in "Hestia," Athens, 1891; "Rev. Et. Juives," xxiii. 69-74; concerning the Jewish community of Corfu see Romanos, *l.c.*).

The once powerful Byzantine empire grew ever weaker, Arabs, Bulgarians, Venetians, and Turks despoiling it of its most beautiful provinces. There came a time when Jewish funds helped to sustain the weakened realm. In 1237 the pope, Gregory IX., permitted the king of France to send money obtained from the Jews to the Byzantine empire (Stern, "Stellung der Päpste zu den Juden," Nos. 198-200, Kiel, 1895). Under the Bulgarian czar, Johannes Alexander (1331-65), who married a Jewess called after baptism "Theodora," the Jews are said to have made themselves obnoxious and to have created disturbances (Jireček, "Gesch. der Bulgaren," p. 312, Prague, 1876). In Bulgaria the Jews were employed as executioners (*ib.* p. 380). This was a Byzantine custom, as may be learned from a letter of R. Jacob de Venice to Fra Pablo Christiani (Kobak, in "Ginze Nistaroth," 1868, pp. 1-31; compare "Monatsschrift," 1870, p. 117). The spirit of intolerance still permeated the polemical work of Emperor Joannes Cantaczenus (1347-55), which was, however, directed against the Mohammedans rather than the Jews (ed. Migne, cliii., cliv.); a century later this spirit entirely disappeared. One often meets polemical writings against the Jews (Jahn, "Anecdota Græca Theologica," p. xvi., Leipsic, 1893), and the Greek opponent declares that he uses the Jewish language (*ib.* p. 1).

The beautiful city of Constantinople fell into the hands of the Turks in 1453, and, curiously enough, the Greeks mourned with songs patterned after the Hebrew Threni.

**Jewish Relics at Constantinople.**

Countless monuments of art, many pertaining to Judaism, were destroyed. Nearly all the personages of the Old

Testament had statues here, which were revered by the Jews, even though they served Christian purposes. The staff of Moses, and the cross, both brought by Constantine the Great

from Jerusalem, were considered the most precious treasures of the empire. Until 1204 the statue of a rider with winged feet stood in the cattle market ("forum tauri"), representing Bellerophon, though the people regarded it as Joshua when he bade the sun stand still. Abraham Zacuto held the characteristic if erroneous opinion that Joh was buried in Constantinople ("Yuhasin," ed. London, p. 6). The Midrash books, most of which received their final form in the Byzantine empire, often speak of the new Rome, or Babel, as it is also called, especially in regard to the size of this city (Midr. Teh. xlviii. 4; B. B. 75b; see also Berliner's "Magazin," xix. 239). In a late Midrash the throne and circus of Constantinople are discussed, and Benjamin of Tudela describes the throne. Under the name "Kostantine" the city is often mentioned in the later Midrash and Targum, and even more frequently in the Jewish literature of the later Middle Ages. Aside from its figurative names, such as "Uz," "Buz," "Magdiel," etc., the Byzantine empire is usually called "Romania," for the Byzantines always considered themselves Romans. The name is especially applied to the ritual, and mention is frequently made of a Roman or Grecian ritual (Zunz, "Ritus," p. 79) and of a Roman Maḥzor (ed. princeps,

**Liturgy.** Constantinople, 1510). Affinity to the Greek ritual is shown not only by those of Corfu and of Kaffa (a city of the Crimea, which like many others was influenced by Constantinople), but also by those of Germany, France, and Italy, into each of which, the Byzantine empire being the medium, the Palestinian ritual was introduced; while Spain and the farther Orient were guided by the Babylonian ritual. Technical terms for the liturgical poetry in Hebrew (as "keroba") and especially in Greek (as "piyyuṭ," from ποιητής, ποιήσις, לוטרן from λειτουργία, סנרק from σύνδικος or σύντεκνος, פומן from ψαλμός) spread from here to the European countries. The influence of the Byzantine Jews on Judaism in general is in fact much greater than has heretofore been acknowledged.

As long as the academies of Babylonia flourished they were much frequented by Greek Jews, especially by Jews from Constantinople, whose knowledge of the Greek language was often of advantage to the Geonim (Harkavy, "Teshubot ha-Geonim," pp. 24, 105). HAI GAON learned Greek from them for his lexicographic work. Even Nahmanides in Spain studied under a Greek scholar (ou B. B. 8a). Matthew of Edessa (1136) mentions in his chronicle a great Hebrew scholar of Cyprus, named Moses, who even in matters of religion judged between Greeks and Armenians (Wiener, in "Hebr. Bibl." vi. 116). Ibn Ezra mentions "the wise men of Israel in the land of Javan" (on Jonah i. 2). In his introduction to the commentary on the Pentateuch he speaks of the Greeks as forming a special school of Bible exegesis. Their method is the so-called "Derush," though they held it superfluous to compile older Midrash works. Two eminent representatives of this method, both from Castoria in Bulgaria, are Tobiah b. Eliezer, author of "Lekah Tob" (edited by S. Baber), and his pupil Meir, author of "Or 'Enayim." Tobiah also took part in the Messianic movement of 1096, mentioned above, and both

are cited by their countryman Judah (Leon) Mosconi of Ochrida in Bulgaria (about 1360; Berliner's "Magazin," iii. 95), who in recent times became known as the owner of a valuable library ("Rev. Et. Juives," xl. 63). The work "Kebod Elohim" of

R. Abraham Cohen of Patras is preserved in manuscript. Joseph "the Greek" is known as a translator. In the sphere of this Greek learning were also the Jews of southern Italy and of Sicily, prominent among whom was Shabbethai Donnolo (about 970) of Oria, physician to the Byzantine viceroy Eupraxius. The well-known Isaiah di Trani also lived in Greece, and from his responsa may be gleaned the fact that some rabbinical observances were neglected by the Greek Jews ("Jew. Quart. Rev." iv. 99). Whether Hillel b. Eliakim, the Midrash commentator, lived in Greece or in southern Italy is not known. The Mishnah commentator Isaac Siponto also deserves mention, and a certain R. Baruch from the land of Javan is named as a Talmudic authority. Shemiah b. Elijah Cretensis, in Spain called simply "the Greek," a philosopher and grammarian, was prominent in the fourteenth century. The "Greek" Zerabiah (fourteenth century) is the author of "Sefer ha-Yashar." Besides these there were in Greece several liturgic poets; but they were unfavorably criticized by the competent judge Judah al-Harizi, who singles out for commendation only the poet Michael b. Kaleb of Thebes. Since Abraham ibn Ezra and Maimonides ("Ni'ṭe Na'amanim," 17b) also pass adverse judgment on the scholars of Greece, the intellectual endowments of the latter must have been mediocre.

But the Byzantine empire was and remained the classic land of the Samaritans and the Karaites. The frequent uprisings of the former have already been mentioned. The literary activity of the Karaites is most noteworthy. They seem to have had a systematic organization, for Aaron b. Judah Kusdini (about 1120) is named as the leader of the Karaite communities of the Byzantine empire (Fürst, "Gesch. des Karäerthums," i. 211). Distinction was attained by the "Jew" Assaf, probably a Karaite (time uncertain), and by the polyhistor Caleb Afendopolo (fifteenth century), a distinguished botanist, this being a rare attainment among the Jews of the Middle Ages. In Constantinople lived also Judah Hadassi (twelfth century), the greatest Karaite scholar. Most of the Karaite books were destroyed in the frequent conflagrations at Constantinople (Wulfer, in "Theriaea Judaica," p. 289).

In the writings of the Rabbinate as well as in those of the Karaite Jews, Greek, the mother tongue, often has the ascendancy, to the extent of entire Greek glosses (Perles, in "Byzantinische Zeitschrift," ii. 570-584). But such words as רומנט for "Roman," and קריטנטני for "Byzantine coin," are also found in Western authors; the Jews also used Greek money in Turkish times (year-book "Jerusalem," v. 167). Jerahmeel, who, probably in the eleventh century, made an epitome of the YOSIPPON, also gives evidence of the thoroughly Greek culture of the Byzantine Jews. "It is certain that in Magna Graecia, as in Constantinople, Greek was the vernacular

language, and would therefore be used by the Jews" (Neubauer, in "Jew. Quart. Rev." xi. 367). Two facts, both relating to the religious service, especially illustrate how deeply the Jews were steeped in Greek culture. Emperor Justinian was requested by a party of the Jews to have the weekly portions from the Torah translated into Greek. He willingly consented, hoping that thereby the Jews might be converted; he issued, in 553, a decree ordering the Jews to use either the Septuagint translation or that of Aquila. But the Jews reconsidered the matter betimes and retained their old custom. Even more remarkable is the fact that in Candia the Haftarah for the afternoon of the Day of Atonement—the Prophet Jonah—was recited in Greek (Elijah Kap-

sali, ed. Lattes, p. 22). This text, dating from the twelfth or the thirteenth century, is considered by many to be the oldest extant specimen of the Greek vernacular. A complete translation of the Bible into Greek, for the use of Jews, exists in several manuscripts. Such a translation, together with an Aramaic and Spanish translation, was first printed at Constantinople in 1547.

As Greek culture had well-nigh disappeared before the invention of printing, the intellectual products of the Byzantine Jews are to a great extent unknown; here, as well as in the political history of the time, new investigations may lead to fresh discoveries.

S. KR.

## C

**CABALA.**—Name and Origin (Hebrew form **Qabbalah** [קבלה, from קבל = "to receive"; literally, "the received or traditional lore"]): The specific term for the esoteric or mystic doctrine concerning God and the universe, asserted to have come down as a revelation to elect saints from a remote past, and preserved only by a privileged few. At first consisting only of empirical lore, it assumed, under the influence of Neoplatonic and Neopythagorean philosophy, a speculative character. In the geonic period it is connected with a Mishnah-like text-book, the "Sefer Yezirah," and forms the object of the systematic study of the elect, called "mekubbalim" or "ba'ale ha-qabbalah" (possessors of, or adepts in, the Cabala). These receive afterward the name of "maskilim" (the wise), after Dan. xii. 10; and because the Cabala is called **הסתר הנבמה** ("hokmah nistarah" = the hidden wisdom), the initials of which are הן, they receive also the name of **ידועי הן** ("adepts in grace") (Eccl. ix. 11, Hebr.). From the thirteenth century onward the Cabala branched out into an extensive literature, alongside of and in opposition to the Talmud. It was written in a peculiar Aramaic dialect, and was grouped as commentaries on the Torah, around the Zohar as its holy book, which suddenly made its appearance.

The Cabala is divided into a theosophical or theoretical system, **Qabbalah 'Iyyunit** (קבלה עיונית) and a theurgic or practical Cabala, **קבלה מעשית**. In view of the fact that the name "Cabala" does not occur in literature before the eleventh century (see Landauer, "Orient. Lit." vi. 206; compare Zunz, "G. V." p. 415), and because of the pseudepigraphic character of the Zohar and of almost all the cabalistic writings, most modern scholars, among whom are Zunz, Grätz, Luzzatto, Jost, Steinschneider, and Munk (see bibliography below), have treated the Cabala with a certain bias and from a rationalistic rather than from a psychologico-historical point of view; applying the name of "Cabala" only to the speculative systems which appeared since the thirteenth century, under pretentious titles and with fictitious claims, but not to the mystic lore of the

geonic and Talmudic times. Such distinction and partiality, however, prevent a deeper understanding of the nature and progress of the Cabala, which, on closer observation, shows a continuous line of development from the same roots and elements.

Cabala comprised originally the entire traditional lore, in contradistinction to the written law (Torah), and therefore included the prophetic and hagiographic books of the Bible, which were supposed to have been "received" by the power of the Holy Spirit rather than as writings from God's hand (see Ta'an. ii. 1; R. II. 7a. 19a, and elsewhere in the Talmud; compare Zunz, "G. V." 2d ed., pp. 46, 366, 415, and Taylor, "Early Sayings of the Jewish Fathers," 1899, pp. 106 *et seq.*, 175 *et seq.*). Each "received" doctrine was claimed as tradition from the Fathers—"masoret me-Abotenu" (Josephus,

**Meaning of the Word "Cabala."** "Ant." xiii. 10, § 6; 16, § 2; Meg. 10b; Shek. vi. 1)—to be traced back to the Prophets or to Moses on Sinai (compare "mekubbalani" in Peah ii. 6; 'Eduy. viii. 7). So the Masorah, "the fence to the Torah" (Ab. iii. 13) is, as Taylor (*l.c.* p. 55) correctly states, "a correlation to Cabala." The chief characteristic of the Cabala is that, unlike the Scriptures, it was entrusted only to the few elect ones; wherefore, according to IV Esdras xiv. 5, 6, Moses, on Mount Sinai, when receiving both the Law and the knowledge of wondrous things, was told by the Lord: "These words shalt thou declare, and these shalt thou hide." Accordingly the rule laid down for the transmission of the cabalistic lore in the ancient Mishnah (Hag. ii. 1) was "not to expound the Chapter of Creation ('Ma'aseh Bereshit,' Gen. i.) before more than one hearer; nor that of the Heavenly Chariot ('Merkabah,' Ezek. i.; compare I Chron. xxviii. 18 and Ecclus. [Sirach] xlix. 8) to any but a man of wisdom and profound understanding"; that is to say, cosmogony and theosophy were regarded as esoteric studies (Hag. 13a). Such was the "Masoret ha-Hokmah" (the tradition of wisdom, handed over by Moses to Joshua (Tan., Wa'ethanan, ed. Buber, 13); and likewise the twofold philosophy

of the Essenes, "the contemplation of God's being and the origin of the universe," specified by Philo ("Quod Omnis Probus Liber," xii.). Besides these there was the eschatology—that is, the secrets of the place and time of the retribution and the future redemption (Sifre, Wezot ha-Berakah, 357); "the secret chambers of the behemoth and leviathan" (Cant. R. i. 4); the secret of the calendar ("Sod ha-'Ibbur")—that is, the mode of calculating the years with a view to the Messianic kingdom (Ket. 111a-112a; Yer. R. II. ii. 58b); and, finally, the knowledge and use of the Ineffable Name, also "to be transmitted only to the saintly and discreet ones" (Zenu'im or Essenes; Kid. 71a; Yer. Yoma iii. 40d; Eccl. R. iii. 11), and of the angels (Josephus, "B. J." ii. 8, § 7). All these formed the sum and substance of the Mysteries of the Torah, "Sitre or Raze Torah" (Pes. 119a; Meg. 3a; Ab. vi. 1), "the things spoken only in a whisper" (Hag. 14a).

How old the Cabala is, may be inferred from the fact that as early a writer as Ben Sira warns against it in his saying: *אין לך עסק בנסתרות* = "Thou shalt have no business with secret things" (Eccles. [Sirach] iii. 22; compare Hag. 13a; Gen. R. viii.). In fact, the apocalyptic literature belonging to the second and first pre-Christian centuries contained the chief elements of the Cabala; and

**Antiquity of the Cabala.** as, according to Josephus (*l.c.*), such writings were in the possession of the Essenes, and were jealously guarded by them against disclosure, for which they claimed a hoary antiquity (see Philo, "De Vita Contemplativa," iii., and Hippolytus, "Refutation of all Heresies," ix. 27), the Essenes have with sufficient reason been assumed by Jellinek ("B. II." ii., iii., Introductions and elsewhere), by Plessner ("Dat Mosheh wi-Yehudit," pp. iv. 47 *et seq.*), by Hilgenfeld ("Die Jüdische Apokalyptik," 1857, p. 257), by Eichhorn ("Einleitung in die Apoc. Schriften des Alten Testaments," 1795, pp. 434 *et seq.*), by Gaster ("The Sword of Moses," 1896, Introduction), by Kohler ("Test. Job," in Kohut Memorial Volume, pp. 266, 288 *et seq.*), and by others to be the originators of the Cabala.

That many such books containing secret lore were kept hidden away by the "wise" is clearly stated in IV Esdras xiv. 45-46, where Pseudo-Ezra is told to publish the twenty-four books of the canon openly to the worthy and the unworthy may alike read, but to keep the seventy other books hidden in order to "deliver them only to such as be wise" (compare Dan. xii. 10); for in them are the spring of understanding, the fountain of wisdom, and the stream of knowledge (compare Soṭah xv. 3). A study of the few still existing apocryphal books discloses the fact, ignored by most modern writers on the Cabala and Essenism, that "the mystic lore" occasionally alluded to in the Talmudic or Midrashic literature (compare Zunz, "G. V." 2d ed., pp. 172 *et seq.*; Joël, "Religionsphilosophie des Sohar," pp. 45-54) is not only much more systematically presented in these older writings, but gives ample evidence of a continuous cabalistic tradition; inasmuch as the mystic literature of the geonic period is only a fragmentary reproduction of the ancient apocalyptic writings, and the saints and sages of the tannaic period

take in the former the place occupied by the Biblical protoplasts, patriarchs, and scribes in the latter.

So, also, does the older Enoch book, parts of which have been preserved in the geonic mystic literature (see Jellinek, *l.c.*, and "Z. D. M. G." 1853, p. 249), by its angelology, demonology, and cosmology, give a fuller insight into the "Merkabah" and "Bereshit" lore of the ancients than the "Hekalot," which present but fragments, while the central figure

of the Cabala, Metatron-Enoch, is seen in ch. lxx.-lxxi. in a process of transformation. The cosmogony of the Slavonic Enoch, a product of the first pre-Christian century (Charles, "The Book of the Secrets of Enoch," 1896, p. xxv.), showing an advanced stage compared with the older Enoch book, casts a flood of light upon the rabbinical cosmogony by its realistic description of the process of creation (compare ch. xxv.-xxx. and Hag. 12a *et seq.*; Yer. Hag. ii. 77a *et seq.*; Gen. R. i.-x.). Here are found the primal elements, "the stones of fire" out of which "the Throne of Glory" is made, and from which the angels emanate; "the glassy sea" (מִיָּא מִיָּא), beneath which the seven heavens, formed of fire and water (מֵאֵשׁ וּמַיִם = שְׁמַיִם), are stretched out, and the founding of the world upon the abyss (אֲבֵן שְׁתִּיהָ); the preexistence of human souls (Plato, "Timæus," 36; Yeb. 63b; Nid. 30b), and the formation of man by the Creative Wisdom out of seven substances (see Charles, note to ch. xxvi. 5 and xxx. 8, who refers to Philo and the Stoics for analogies); the ten classes of angels (ch. xx.); and, in ch. xxii., version A, ten heavens instead of seven, and an advanced chiliastic calendar system (ch. xv.-xvi., xxxii.; see MILLENNIUM). Its cabalistic character is shown by references to the writings of Adam, Seth, Cainan, Mahalalel, and Jared (ch. xxxiii. 10, and elsewhere).

More instructive still for the study of the development of cabalistic lore is the Book of Jubilees written under King John Hyrcanus (see Charles, "The Book of Jubilees," 1902, Introduction, pp. lviii. *et seq.*)—which also refers to the writings of Jared, Cainan, and Noah, and presents Abraham as the renewer, and Levi as the permanent guardian, of these ancient writings (ch. iv. 18, viii. 3, x. 13; compare Jellinek, "B. II." iii. 155, xii. 27, xxi. 10, xlv. 16)

—because it offers, as early as a thousand years prior to the supposed date of the "Sefer Yezirah," a cosmogony based upon the twenty-two letters of the Hebrew alphabet, and connected with Jewish chronology and Messianology, while at the same time insisting upon the heptad as the holy number rather than upon the decad system adopted by the later haggadists and the "Sefer Yezirah" (ch. ii. 23; compare Midr. Tadshe vi. and Charles's note, vi. 29 *et seq.*; Epstein, in "Rev. Et. Juives," xxii. 11; and regarding the number seven compare Ethiopic Enoch, lxxvii. 4 *et seq.* [see Charles's note]; Lev. R. xxix.; Philo, "De Opificio Mundi," 30-43, and Ab. v. 1-3; Hag. 12a). The Pythagorean idea of the creative powers of numbers and letters, upon which the "Sefer Yezirah" is founded, and which was known in tannaic times—compare Rab's saying:

"Bezalel knew how to combine [צִירְיָה] the letters by which heaven and earth were created" (Ber. 55a), and the saying of R. Judah b. 'Ilai (Men. 29b), quoted, with similar sayings of Rab, in Bacher, "Ag. Bab. Amor." pp. 18, 19—is here proved to be an old cabalistic conception. In fact, the belief in the magic power of the letters of the Tetragrammaton and other names of the Deity (compare Enoch, lxi. 3 *et seq.*; Prayer of Manasses; Kid. 71a; Ecel. R. iii. 11; Yer. Hag. ii. 77c) seems to have originated in Chaldea (see Lenormant, "Chaldean Magic," pp. 29, 43). Whatever, then, the theurgic Cabala was, which, under the name of "Sefer (or 'Hilkot" Yezirah," induced Babylonian rabbis of the fourth century to "create a calf by magic" (Sanh. 65b, 67b; Zunz, "G. V." 2d ed., p. 174, by a false rationalism ignores or fails to account for a simple though strange fact), an ancient tradition seems to have coupled the name of this theurgic "Sefer Yezirah" with the name of Abraham as one accredited with the possession of esoteric wisdom and theurgic powers (see ABRAHAM, APOCALYPSE OF, and ABRAHAM, TESTAMENT OF; Beer, "Das Leben Abrahams," pp. 207 *et seq.*; and especially Testament of Abraham, Recension B, vi., xviii.; compare Köhler, in "Jew. Quart. Rev." vii. 584, note). As stated by Jellinek ("Beiträge zur Kabbalah," i. 3), the very fact that Abraham, and not a Talmudical hero like Akiba, is introduced in the "Sefer Yezirah," at the close, as possessor of the Wisdom of the Alphabet, indicates an old tradition, if not the antiquity of the book itself.

The "wonders of the Creative Wisdom" can also be traced from the "Sefer Yezirah," back to Ben Sira, *l.c.*; Enoch, xlii. 1, xlvi. 1, lxxxii. 2, xcii. 1; Slavonic Enoch, xxx. 8, xxxiii. 3 (see Charles's note for further parallels); IV Esdras xiv. 46; Soṭah xv. 3; and the Merkabah-travels to Test. Abraham, x.; Test. Job, xi. (see Köhler, in Kohut Memorial Volume, pp. 282-288); and the Baruch Apocalypse throughout, and even II Macc. vii. 22, 28, betray cabalistic traditions and terminologies.

But especially does GNOSTICISM testify to the antiquity of the Cabala. Of Chaldean origin, as suggested by Kessler (see "Mandæans," in Herzog-Hauck, "Real-Encyc.") and definitively shown by Anz ("Die Frage nach dem Ursprung des Gnostizismus," 1879), Gnosticism was Jewish in character long before it became Christian (see Joël, "Blicke in die Religionsgeschichte," etc., 1880, i. 203; Hönig, "Die Ophiten," 1889; Friedländer, "Der Vorchristliche Jüdische Gnostizismus," 1898; *idem*, "Der Antichrist," 1901). Gnosticism—that is, the cabalistic "Hokmah" (wisdom), translated into "Madda" (Aramaic, "Manda" = knowledge of things divine)—seems to have been the first attempt on the part of the Jewish sages to give the empirical mystic lore, with the help of Platonic and Pythagorean or Stoic ideas, a speculative turn; hence the danger of heresy from which Akiba and Ben Zoma strove to extricate themselves, and of which the systems of PHILO, an adept in Cabala (see "De Cherubim," 14; "De Sacrificiis Abelis et Caini," 15; "De Eo Quod Deterius Potiori Insidiatur," 48; "Quis Rerum Divinarum Heres Sit," 23), and of PAUL (see Matter,

"History of Gnosticism," ii.), show many pitfalls (see GNOSTICISM, MINIM). It was the ancient Cabala which, while allegorizing the Song of Songs, spoke of ADAM QADMON, or the God-man, of the "BRIDE of God," and hence of "the mystery of the union of powers" in God (see Conybeare, "Philo's Contemplative Life," p. 304), before Philo, Paul, the Christian Gnostics, and the medieval Cabala did. Speculative Cabala of old (IV Esd. iii. 21; Wisdom ii. 24) spoke of "the germ of poison from the serpent transmitted from Adam to all generations" (וְהוֹמָה שֶׁל נְחִישׁ) before Paul and R. Johanan ('Ab. Zarah 22b) referred to it. And while the Gnostic classification of souls into pneumatic, psychic, and lylic ones can be traced back to Plato (see Joël, *l.c.* p. 132), Paul was not the first (or only one) to adopt it in his system (see Hag. 14b; Cant. R. i. 3, quoted by Joël; compare Gen. R. xiv., where the five names for the soul are dwelt upon).

The whole dualistic system of good and of evil powers, which goes back to Zoroastrianism and ultimately to old Chaldea, can be traced through Gnosticism; having influenced the cosmology of the ancient Cabala before it reached the medieval one. So is the conception underlying the cabalistic tree, of the right side being the source of light

**Cabalistic Dualism.** and purity, and the left the source of darkness and impurity ("siṭra yemina we siṭra aḥara), found among the Gnostics (see Irenæus, "Adversus Hæreses," i. 5, § 1; II, § 2; ii. 24, § 6; Epiphanius, "Hæreses," xxxii. 1, 2; "Clementine Homilies," vii. 3; compare Cant. R. i. 9; Matt. xxv. 33; Plutarch, "De Isike," 48; Anz, *l.c.* 111). The fact also that the "Kēlippot" (the scalings of impurity), which are so prominent in the medieval Cabala, are found in the old Babylonian incantations (see Sayce, "Hibbert Lectures," 1887, p. 472; Delitzsch, "Assyrisches Wörterbuch," s. v. קְלִיפּוֹת), is evidence in favor of the antiquity of most of the cabalistic material.

It stands to reason that the secrets of the theurgic Cabala are not lightly divulged; and yet the Testament of Solomon recently brought to light the whole system of conjuration of angels and demons, by which the evil spirits were exorcised; even the magic sign or seal of King Solomon, known to the medieval Jew as the SHIELD OF DAVID, has been resurrected (see Conybeare, in "Jew. Quart. Rev." xi. 1-45; also EXORCISM).

To the same class belongs the "Sefer Refu'ot" (The Book of Healing), containing the prescriptions against all the diseases inflicted by demons, which Noah wrote according to the instructions given by the angel Raphael and handed over to his son Shem (Book of Jubilees, x. 1-14; Jellinek, "B. II." iii. 155-160; Introduction, p. xxx.). It was identified with the "Sefer Refu'ot" in possession of King Solomon and hidden afterward by King Hezekiah (see Pes. iv. 9, 56a; "B. H." *l.c.* p. 160; Josephus, "Ant." viii. 2, § 5; compare *idem*, "B. J." ii. 8, § 6, and the extensive literature in Schürer, "Gesch. des Volkes Israel," 3d ed., iii. 2, 99 *et seq.*), whereas the secret of the black art, or of healing by demonic powers, was transmitted to heathen tribes, to "the sons of Keṭurah" (Sanh. 91a) or the AMORITES (compare Enoch, x. 7).

So striking is the resemblance between the שׁוּׁר קוֹמַח and the anthropomorphic description of the Deity by the Gnostics (see Irenæus, *l.c.* i. 14, § 3) and the letters of the alphabet laid across the body in At-bash (אַתְבַּשׁ), or ALPHA AND OMEGA order, forming the limbs of the Macrocosmos, that the one casts light upon the other, as Gaster (in "Monatsschrift," 1893, p. 221) has shown. But so have "the garments of light," "the male and the female nature," "the double face," the eye, hair, arm, head, and crown of "the King of Glory," taken from the Song of Solomon, 1 Chron. xxix. 11; Ps. lxxviii. 18, and other familiar texts, even "the endless" (*Eu-Seif* = Ἄπειρος), their parallels in ancient Gnostic writings (see Schmidt, "Gnostische Schriften in Koptischer Sprache," 1892, pp. 278, 293, 310, and elsewhere). On the other hand, both the mystic Cross ("Staurus" = X = the letter tav of old; see JEWISH ENCYCLOPEDIA, i. 612b; Irenæus, *l.c.* i. 2, § 3; Justin, "Apology," i. 40; and Joël, *l.c.* p. 147) and the enigmatic primal "קַבַּל־קַבַּל," or "קַבַּקַבַּל," taken from Isa. xxviii. 10, receive strange light from the ancient cabalistic cosmogony, which, based upon Job xxxviii. 4 *et seq.*, spoke of "the measuring-line"—קַבַּל, the קוֹ תַהוֹ (Isa. xxxiv. 11; compare קִנְיַת הַמְדָּה, Gen. R. i. after Ezek. xl. 3)—drawn "crosswise"—שְׁתֵי יַעֲרֵב—(see Midr. ha-Gadol, ed. Schechter, 11; compare כִּמְיָן שְׁתֵי פַקְעֵי־וֹת שֶׁל שְׁתֵי, Hag. xii. 1, and Joël, *l.c.*), and consequently applied also the term קַבַּל־קַבַּל (קַבַּל־לֵקַבַּל), taken from Isa. xxviii. 10, to the prime motive power of creation (see Irenæus, *l.c.* i. 24, §§ 5, 6; Schmidt, *l.c.* p. 215; compare Matter, "Gnosticism," ii. 58; Joël, *l.c.* p. 141). This was to express the divine power that measured matter while setting it in motion; whereas the idea of God setting to the created world its boundary was found expressed in the name שְׁרֵי ("the Almighty"), who says to the world כִּי ("This sufficeth").

With the scanty materials at the disposal of the student of Gnosticism, it seems premature and hazardous at present to assert with certainty the close relationship existing between it and the ancient Cabala, as Matter, in his "History of Gnosticism," 1828 (German translation, 1833 and 1844), and Gfroerer, in his voluminous and painstaking work, "Gesch. des Urchristenthums," 1838, i. and ii., have done. Nevertheless it may be stated without hesitation that the investigations of Grätz ("Gnosticism und Judenthum," 1846), of Joël ("Religionsphilosophie des Sohar," 1849), and of other writers on the subject must be resumed on a new basis. It is also certain that the similarities, pointed out by Siegfried ("Philo von Alexandria," pp. 289-299), between the doctrines of Philo and those of the Zohar and the Cabala in general, are due to intrinsic relation rather than to mere copying.

As a rule, all that is empiric rather than speculative, and that strikes one as grossly anthropomorphic and mythological in the Cabala or Haggadah, such as the descriptions of the Deity as contained in the "Sifra de Zeni'uta" and "Iddra Zuṭta" of the Zohar, and similar passages in "Sefer Azilut" and "Raziel," belongs to a prerationalistic period, when no Simon ben Yoḥai lived to curse the teacher who represented the sons of God as having sexual organs and committing fornication (see Gen. R. xxvi.; com-

pare Vita Adæ et Evæ, iii. 4, with Enoch, vii. 1 *et seq.*; also compare Test. Patr., Reuben, 5; Book of Jubilees, v. 1, and particularly xv. 27). Such matter may with a high degree of probability be claimed as ancient lore or Cabala (= "old tradition").

And as to speculative Cabala, it was not Persia with her tenth-century Sufism, but Alexandria of the first century or earlier, with her strange commingling of Egyptian, Chaldean, Judean, and Greek culture, that furnished the soil and the seeds for that mystic philosophy which knew how to blend the wisdom and the folly of the ages and to lend to every superstitious belief or practise a profound meaning. There sprang up that magic literature which showed the name of the Jewish God (אַחֲרַת) and of the Patriarchs placed alongside of pagan deities and demons, and the Hermes books (סְפָרֵי הַמִּירוֹם, as copyists wrote for הִירְמִיּוֹס—not "Homeros"—see Kohler, "Jew. Quart. Rev." v. 415, note), which, claiming an equal rank with the Biblical writings, enticed also Jewish thinkers. But above all it was Neoplatonism which produced that state of enthusiasm and entrancement that made people "fly in the air" by "the wagon of the soul" (מַרְכַּבָּה) and achieve all kinds of miracles by way of hallucinations and visions. It gave rise to those Gnostic songs (זִמְרֵי יוֹנִי; Hag. 15b; Grätz, *l.c.* p. 16) which flooded also Syria and Palestine (see Gruppe, "Die Griechischen Culte und Mysterien," i. 1886, pp. 329, 443, 494, 497, 659; Von Harless, "Das Buch von den Ägyptischen Mysterien," 1858, pp. 13-20, 53-66, 75, and Dieterich, "Abraxas," 1891). The whole principle of emanation, with its idea of evil inherent in matter as the dross (קַלִּיפוֹת) is found there (see Von Harless, *l.c.* p. 20), and the entire theurgic Cabala (קַבְלָה מַעֲשִׂית) is in all its detail developed there; even the spirit-rapping and table-turning done in the seventeenth century by German cabalists by means of "shemot" (magic incantations; for the literature see Von Harless, *l.c.* pp. 130-132) have there their prototypes (Von Harless, *l.c.* p. 107).

K.

—**History and System:** This remarkable product of Jewish intellectual activity can not be satisfactorily estimated as a whole unless the religious side of the Cabala is more strongly emphasized than has been the case heretofore. It constantly falls back upon Scripture for its origin and authenticity, and for its speculative-pantheistic and anthropomorphic-prophetic tendencies. While mysticism in general is the expression of the intensest religious feeling, where reason lies dormant, Jewish mysticism is essentially an attempt to harmonize universal reason with the Scriptures; and the allegorical interpretation of the Biblical writings by the Alexandrians as well as by the Palestinians (see ALLEGORICAL INTERPRETATION) may justly be regarded as its starting-point. These interpretations had their origin in the conviction that the truths of Greek philosophy were already contained in Scripture, although it was given only to the select few to lift the veil and to discern them beneath the letter of the Bible.

In Talmudic times the terms "Ma'aseh Bereshit" (History of Creation) and "Ma'aseh Merkabah"

(History of the Divine Throne = Chariot; Hag. ii. 1; Tosef., *ib.*) clearly indicate the Midrashic nature of these speculations; they are really based upon Gen. i. and Ezek. i. 4-28:

**Mystic Doctrines in Talmudic Times.** while the names "Sitre Torah" (Hag. 13a) and "Raze Torah" (Ab. vi. 1) indicate their character as secret lore. In contrast to the explicit statement of Scripture that God created not only

the world, but also the matter out of which it was made, the opinion is expressed in very early times that God created the world from matter He found ready at hand—an opinion probably due to the influence of the Platonic-Stoic cosmogony (compare Philo, "De Opificiis Mundi," ii., who states this as a doctrine of Moses; see Siegfried, "Philo von Alexandria," p. 230). Eminent Palestinian teachers hold the doctrine of the preexistence of matter (Gen. R. i. 5, iv. 6), in spite of the protest of Gamaliel II. (*ib.* i. 9).

A Palestinian Midrash of the fourth century (see Epstein, in "Rev. Etudes Juives," xxix, 77) asserts that three of the elements—namely, water, air, and fire—existed before the creation of the world; that water then produced the darkness, fire

**The Six Elements.** produced light, and air produced wisdom (רוח = "air" = "wisdom"), and the whole world thereupon was made

by the combination of these six elements (Ex. R. xv. 22). The gradual condensation of a primal substance into visible matter, a fundamental doctrine of the Cabala, is already to be found in Yer. Hag. ii. 77a, where it is said that the first water which existed was condensed into snow; and out of this the earth was made. This is the ancient Semitic conception of the "primal ocean," known to the Babylonians as "Apsu" (compare Jastrow, "Religion of Babylonia"), and called by the Gnostics βίβος = בְּהוּ (Anz., "Die Frage nach dem Ursprung des Gnostizismus," p. 98). Rab's enumeration of the ten objects created on the first day—namely, heaven, earth, tohu, bohu, light, darkness, wind, water, day, and night (Hag. 12a) [the Book of Jubilees (ii. 2) has seven.—κ.]—shows the conception of "primal substances" held by the rabbis of the third century. It was an attempt to Judaize the un-Jewish conception of primal substances by representing them also as having been created. Compare the teaching: "God created worlds after worlds, and destroyed them, until He finally made one of which He could say, 'This one pleases Me, but the others did not please Me'" (Gen. R. ix. 2). See also "Agadat Shir ha-Shirim," ed. Schechter, p. 6, line 58.

So, also, was the doctrine of the origin of light made a matter of mystical speculation, as instanced by a haggadist of the third century, who communicated to his friend "in a whisper" the doctrine that "God wrapped Himself in a garment of light, with which He illuminates the earth from one end to the other" (Gen. R. iii. 4; see ABRAHAM, APOCALYPSE OF; compare Ex. R. xv. 22: "After He had clothed Himself in light, He created the world"). Closely related to this view is the statement made by R. Meir, "that the infinite God limited or contracted Himself [צמצם] in order to reveal Himself" (Gen. R. iv. 4; EA. R. xxxiv. 1). This is the germ of

the Cabala doctrine of the "Zimzum," in idea as well as in terminology.

In dwelling upon the nature of God and the universe, the mystics of the Talmudic period asserted, in contrast to Biblical transcendental-

**God in the Theosophy of the Talmud.** ism, that "God is the dwelling-place of the universe; but the universe is not the dwelling-place of God" (Gen. R. lxxviii. 9; Midr. Teh. xc.; Ex. xxiv. 11, LXX.) Possibly the designation

מְקוֹם ("place") for God, so frequently found in Talmudic-Midrashic literature, is due to this conception, just as Philo, in commenting on Gen. xxviii. 11 (compare Gen. R. *l.c.*) says, "God is called 'ha maqom' [place] because He encloses the universe, but is Himself not enclosed by anything" ("De Somniis," i. 11). Spinoza may have had this passage in mind when he said that the ancient Jews did not separate God from the world. This conception of God is not only pantheistic, but also highly mystical, since it postulates the union of man with God (compare Crescas, "Or Adonai," i.); and both these ideas were further developed in the later Cabala. Even in very early times Palestinian as well as Alexandrian theology recognized the two attributes of God, "middat ha-din," the attribute of justice, and "middat ha-rahamim," the attribute of mercy (Sifre, Deut. 27; Philo, "De Opificiis Mundi," 60); and so is the contrast between justice and mercy a fundamental doctrine of the Cabala. Even the hypostasization of these attributes is ancient, as may be seen in the remark of a tanna of the beginning of the second century C.E. (Hag. 14a). Other hypostasizations are represented by the ten agencies through which God created the world; namely, wisdom, insight, cognition, strength, power, inexorableness, justice, right, love, and mercy (Hag. 12a; Ab. R. N. xxxvii. counts only seven, while Ab. R. N., version B, ed. Schechter, xliii., counts ten, not entirely identical with those of the Talmud). While the Sefirot are based on these ten creative potentialities, it is especially the personification of wisdom (חכמה) which, in Philo, represents the totality of these primal ideas; and the Targ. Yer. i., agreeing with him, translates the first verse of the Bible as follows: "By wisdom God created the heaven and the earth." So, also, the figure of ΜΕΤΑΥΡΟΝ passed into the Cabala from the Talmud, where it played the rôle of the demiurgos (see DEMIURGE), being expressly mentioned as God (Sanh. 38b; compare ANTINOMIANISM, note 1). Mention may also be made of the seven pre-existing things enumerated in an old Baraita; namely, the Torah (= "Hokmah"), repentance (= mercy), paradise and hell (= justice), the throne of God, the (heavenly) Temple, and the name of the Messiah (Pes. 54a). Although the origin of this doctrine must be sought probably in certain mythological ideas, the Platonic doctrine of preexistence has modified the older, simpler conception, and the preexistence of the seven must therefore be understood as an "ideal" preexistence (see Ginzberg, "Die Haggada bei den Kirchenvätern," etc., pp. 2-10), a conception that was later more fully developed in the Cabala.

The attempts of the mystics to bridge the gulf

between God and the world are especially evident in the doctrine of the preexistence of the soul [compare Slavonic Enoch, xxiii. 5, and Charles's note.—*K.*] and of its close relation to God before it enters the human body—a doctrine taught by the Hellenistic sages (Wisdom viii. 19) as well as by the Palestinian rabbis (*Hag.* 12b; 'Ab. Zarah 5a, etc.).

Closely connected herewith is the doctrine that the pious are enabled to ascend toward God even in this life, if they know how to free them-

**The Pious.** selves from the trammels that bind the soul to the body (see ASCENSION).

Thus were the first mystics enabled to disclose the mysteries of the world beyond. According to Anz, *l.c.*, and Bousset, "Die Himmelfahrt der Seele," in "Archiv für Religionswissenschaft," iv. 136 *et seq.*, the central doctrine of Gnosticism—a movement closely connected with Jewish mysticism—was nothing else than the attempt to liberate the soul and unite it with God. This conception explains the great prominence of angels and spirits in both the earlier and the later Jewish mysticism. Through the employment of mysteries, incantations, names of angels, etc., the mystic assures for himself the passage to God, and learns the holy words and formulas with which he overpowers the evil spirits that try to thwart and destroy him. Gaining thereby the mastery over them, he naturally wishes to exercise it even while still on earth, and tries to make the spirits serviceable to him. So, too, were the Essenes familiar with the idea of the journey to heaven (see Bousset, *l.c.* p. 143, explaining Josephus, "Ant." xviii. 1, § 5); and they were also masters of angelology. The practise of magic and incantation, the angelology and demonology, were borrowed from Babylonia, Persia, and Egypt; but these foreign elements were Judaized in the process, and took the form of the mystical adoration of the name of God and of speculations regarding the mysterious power of the Hebrew alphabet (see Ber. 55a; compare Pesik. R. 21 [ed. Friedmann, p. 109a], "the name of God creates and destroys worlds"), to become, finally, foundations of the philosophy of the "Sefer Yezirah."

Another pagan conception which, in refined form, passed into the Cabala through the Talmud, was

**The Syzygies.** the so-called סוד הווי ("the mystery of sex"). [Compare Eph. v. 33, and BRIDE, and JOEL, *l.c.*, pp. 158 *et seq.*—*K.*] Possibly this old conception underlies the Talmudical passages referring to the mystery of marriage, such as "the Shekinah dwells between man and woman" (*Sotah* 17a). An old Semitic view (see BA'AL) regards the upper waters (compare Slavonic Book of Enoch, iii.; Test. Patr., Levi, 2; ABRAHAM, TESTAMENT OF) as masculine, and the lower waters as feminine, their union fructifying the earth (*Gen. R.* xiii.; Wertheimer, "Batte Midras-shot," i. 6. Compare the passage, "Everything that exists has a mate [בן זוג]: Israel is the mate of the Sabbath; while the other days pair among themselves," *Gen. R.* xi. 8). Thus the Gnostic theory of syzygies (pairs) was adopted by the Talmud, and later was developed into a system by the Cabala.

The doctrine of emanation, also, common to both Gnosticism and the Cabala, is represented by a tanna

of the middle of the second century C.E. (*Gen. R.* iv. 4; R. Meir, "Parable of the Spring"). The idea that "the pious actions of the just increase the heavenly power" (*Pesik.*, ed. Buber, xxvi. 166b); that "the impious rely on their gods," but that "the just are the support of God" (*Gen. R.* lxix. 3), gave rise to the later cabalistic doctrine of man's influence on the course of nature, inasmuch as the good and the evil actions of man reinforce respectively the good or the evil powers of life.

The heterogeneous elements of this Talmudic mysticism are as yet unfused; the Platonic-Alexandrian, Oriental-theosophic, and Judæo-allegorical ingredients being still easily recognizable and not yet elaborated into the system of the Cabala. Jewish monotheism was still transcendentalism. But as mysticism attempted to solve the problems of creation and world-government by introducing sundry intermediary personages, creative potentialities such as Metatron, Shekinah, and so on, the more necessary it became to exalt God in order to prevent His reduction to a mere shadow; this exaltation being rendered possible by the introduction of the pantheistic doctrine of emanation, which taught that in reality *nothing* existed outside of God. Yet, if God is "the place of the world" and everything exists in Him, it must be the chief task of life to feel in union with God—a condition which the Merkabah-travelers, or, as the Talmud calls them, "the frequenters of paradise," strove to attain. Here is the point where speculation gives place to imagination. The visions which these mystics beheld in their ecstasies were considered as real, giving rise within the pale of Judaism to an anthropomorphic mysticism, which took its place beside that of the pantheists. Although Talmudic-Midrashic literature has left few traces of this movement (compare, *e.g.*, Ber. 7a, Sanh. 95b), the Rabbis opposing such extravagances, yet the writings of the church fathers bear evidence of many Judaizing Gnostics who were disciples of anthropomorphism (Origen, "De Principiis," i.; compare CLEMENTINA, ELCESAITES, MINIM).

The mystical literature of the geonic period forms the link between the mystic speculations of the Talmud and the system of the Cabala;

**Different Groups of Mystic Literature.** originating in the one and reaching completion in the other. It is extremely difficult to summarize the contents and object of this literature, which has been handed down in more

or less fragmentary form. It may perhaps be most conveniently divided into three groups: (1) theosophic; (2) cosmogenetic; (3) theurgic. In regard to its literary form, the Midrashic-haggadic style may be distinguished from the liturgic-poetic style, both occurring contemporaneously. The theosophical speculations deal chiefly with the person of METATRON-ENOCH, the son of Jared turned into a fiery angel, a minor YHWH—a conception with which, as mentioned before, many mystics of the Talmudic age were occupied. Probably a large number of these Enoch books, claiming to contain the visions of Enoch, existed, of which, however, only fragments remain (see "Monatschrift," viii. 68 *et seq.*, and ENOCH, BOOK OF).

Curiously enough, the anthropomorphic description of God (see SHI'UR KOMAH) was brought into connection with Metatron Enoch in the geonic mysticism. This vexatious piece of Jewish "Metatron-Enoch." Christians as well as to Karaites (compare AGOBARD; SOLOMON B. YERUHAM) a welcome opportunity for an attack upon rabbinical Judaism, existed as a separate work at the time of the Geonim. Judging from the fragments of "Shi'ur Komah" (in Jellinek, "B. H." iii. 91; ii. 41; in Wertheimer, "Hekalot," ch. xi.), it represented God as a being of gigantic dimensions, with limbs, arms, hands, feet, etc. The "Shi'ur Komah" must have been held in high regard by the Jews, since Saadia tried to explain it allegorically—though he doubted that the tanna Ishmael could have been the author of the work (as quoted by Judah b. Barzilai in his commentary on "Sefer Yezirah," pp. 20-21)—and Hai Gaon, in spite of his emphatic repudiation of all anthropomorphism, defended it ("Teshubot ha-Geonim," Lick, p. 12a). The book probably originated at a time when the anthropomorphic conception of God was current—that is, in the age of Gnosticism, receiving its literary form only in the time of the Geonim. The Clementine writings, also, expressly teach that God is a body, with members of gigantic proportions; and so did Marcion. ADAM QADMON, the "primal man" of the Elcesaites, was also, according to the conception of these Jewish Gnostics, of huge dimensions; viz., ninety-six miles in height and ninety-four miles in breadth; being originally androgynous, and then cleft in two, the masculine part becoming the Messiah, and the feminine part the Holy Ghost (Epiphanius, "Hæres." xxx. 4, 16, 17; liii. 1). According to Marcion, God Himself is beyond bodily measurements and limitations, and as a spirit

"Shi'ur Komah." can not even be conceived; but in order to hold intercourse with man,

He created a being with form and dimensions, who ranks above the highest angels. It was, presumably, this being whose shape and stature were represented in the "Shi'ur Komah," which even the strict followers of Rabbinism might accept, as may be learned from the "Kerub ha-Meyuhad" in the German Cabala, which will be discussed later in this article.

The descriptions of the heavenly halls ("Hekalot") in treatises held in high esteem at the time of the Geonim, and which have come down in rather incomplete and obscure fragments, originated, according to Hai Gaon, with those mystagogues of the Merkabah (עֲרֵבֵי מֵרֻכְבָּתָא), "who brought themselves into a state of entranced vision by fasting, asceticism, and prayer, and who imagined that they saw the seven halls and all that is therein with their own eyes, while passing from one hall into another (compare ASCENSION, and for a similar description of the Montanist ecstasy, Tertullian, "De Exhortatione Castitatis," x.). Although these Hekalot visions were to some extent productive of a kind of religious ecstasy, and were certainly of great service in the development of the liturgical poetry as shown in the Kedushah piyyuṭim, they contributed little to the development of speculative mysticism. This

element became effective only in combination with the figure of Metatron or Metatron-Enoch, the leader of the Merkabah-travelers on their celestial journeys, who were initiated by him into the secrets of heaven, of the stars, of the winds, of the water, and of the earth, [see METATRON, and compare Mithras as driver of the Heavenly

Chariot in "Dio Chrysostomus," ii. 60, ed. Dindorf; Windischmann, "Zoroastrische Studien," 1863, pp. 309-312; and Kobler, "Test. of Job," p. 292.—k.]. Hence, many cosmological doctrines originally contained in the books of Enoch were appropriated, and the transition from theosophy to pure cosmology was made possible. Thus, in the Midr. Kohen (Jellinek, "B. H." ii. 23, 27), which is closely related to the "Seder Rabba di-Bereshit" (in Wertheimer, "Botte Midrashot," i. 18), the Torah, identical with the "Wisdom" of the Alexandrians, is represented as primeval and as the creative principle of the world, which produced the three primal elements, water, fire, and light, and these, in their turn, when commingled, produced the universe.

In the description of the "six days of creation," in the Midrash in question, the important statement is made that the water disobeyed God's command—an old mythological doctrine of God's contest with matter (here represented by water).

**Cosmological Theories.** which in the later Cabala serves to account for the presence of evil in the world. In "Seder Rabba di-Bereshit," however, the contest is between the

masculine and feminine waters which strove to unite themselves, but which God separated in order to prevent the destruction of the world by water; placing the masculine waters in the heavens, and the feminine waters on the earth (*l.c.* p. 6). Independently of the creation, the "Baraita de-Middot ha-'Olam" and the "Ma'aseh Bereshit" describe the regions of the world with paradise in the east and the nether world in the west. All these descriptions—some of them found as early as the second pre-Christian century, in the Test. of Abraham and in Enoch; and, later on, in the Christian apocalyptic literature—are obviously remnants of ancient Esene cosmology.

The mysticism of this time had a practical as well as a theoretical side. Any one knowing the names and functions of the angels could control all nature and all its powers (compare, for example, Lam. R. ii. 8; and HANANEEL in Rabbinical Literature). Probably entrusted formerly only to oral tradition,

the ancient names were written down by the mystics of the geonic period; and so Hai Gaon (in Eliezer Ashkenazi's collection, "Ta'am Ze'kenim,"

p. 56b) mentions a large number of such works as existing in his time: the "Sefer ha-Yashar," "Harba de-Mosheh," "Raza Rabbah," "Sod Torah," "Hekalot Rabbati," "Hekalot Zutrati." Of all these works, aside from the HEKALOT, only the "Harba de-Mosheh" has recently been published by Gaster ("The Sword of Moses," in "Jour. Royal Asiatic Soc." 1896; also printed separately). This book consists almost entirely of mystical names by means of which man may guard himself against sickness,

enemies, and other ills, and may subjugate nature. These and other works later on formed the basis of the theurgic Cabala. The amplifications upon paradise and hell, with their divisions, occupy a totally independent and somewhat peculiar position in the geonic mysticism. They are ascribed for the greater part to the amora Joshua b. Levi; but, in addition to this hero of the Haggadah, Moses himself is alleged to have been the author of the work "Ma'ayan Hokmah" (compare *Soṭah* ix. 15, which gives an account of heaven and the angels).

Aside from the "Sefer Yezirah," which occupies a position of its own, the following is nearly a complete list of the mystic literature of the time of the Geonim, as far as it is preserved and known to-day: (1) "Alfa Beta de Rabbi Akiba," in two versions (Jellinek, "B. II." iii.); (2) "Gan 'Eden," in different versions (Jellinek, *l.c.* ii., iii., v.); (3) "[Maseket] Gehinnom" (Jellinek, *l.c.* i.); (4) "Harba de-Mosheh," ed. Gaster, 1896, reprinted from "Jour. Royal Asiatic Soc.," 1896; (5) "Hibbut ha-Keber" (Jellinek, *l.c.* i.); (6) "Hekalot," in several recensions (Jellinek, *l.c.* ii., iii.; Wertheimer, "Jerusalem," 1889, the text varying considerably from that of Jellinek: the Book of Enoch is likewise a version of "Hekalot"); (7) "Haggadot Shema' Yisrael" (Jellinek, *l.c.* v.; also belonging probably to the time of the Geonim); (8)

"[Midrash] Konen" (printed several Mystical times; also in Jellinek, *l.c.* i.); (9) Literature "Ma'aseh Merkabah" (in Wertheimer, in Geonic "Botte Midrashot," ii.; a very ancient Times. "Hekalot" version); (10) "Ma'aseh de Rabbi Joshua b. Levi," in different recensions (compare APOCALYPTIC LITERATURE, NEO-HEBRAIC, No. 5); (11) "Ma'ayan Hokmah" (Jellinek, *l.c.* i.); (12) "Seder Rabba di-Bereshit," in Wertheimer, *l.c.* i.); (13) "Shimmusha Rabba we-Shimmusha Zutta" (Jellinek, *l.c.* vi.).

Mystical fragments have been preserved in Pirke R. El., Num. R., and Midr. Tadshe; also in the "Book of Raziel," which, though composed by a German cabalist of the thirteenth century, contains important elements of the geonic mysticism.

Elcazar of Worms' statement that a Babylonian scholar, AARON B. SAMUEL by name, brought the mystic doctrine from Babylonia to Italy about the middle of the ninth century, has been found to be actually true. Indeed, the doctrines of the "Kerub ha-Meyuḥad," of the mysterious power of the letters of the Hebrew alphabet, and of the great importance of the angels, are all found in the geonic mystic lore. Even those elements that seem later developments

may have been transmitted orally, or may have formed parts of the lost of the works of the old mystics. If, now, Speculative the German Cabala of the thirteenth

Cabala. century is to be regarded as merely a continuation of geonic mysticism, it follows that the speculative Cabala arising simultaneously in France and Spain must have had a similar genesis. It is the SEFER YEZIRAH which thus forms the link between the Cabala and the geonic mystics. The date as well as the origin of this singular book are still moot points, many scholars even assigning it to the Talmudic period. It is certain, however, that at the beginning of

the ninth century the work enjoyed so great a reputation that no less a man than Saadia wrote a commentary on it. The question of the relation between God and the world is discussed in this book, the oldest philosophical work in the Hebrew language.

The basic doctrines of the "Sefer Yezirah" are as follows: The fundamentals of all existence are the

ten Sefirot. These are the ten principles that mediate between God and the universe. They include the three "Sefer Yezirah." primal emanations proceeding from the Spirit of God: (1) *רוח* (literally, "air" or "spirit," probably to be rendered "spiritual air"), which produced (2) "primal water," which, in turn, was condensed into (3) "fire." Six others are the three dimensions in both directions (left and right); these nine, together with the Spirit of God, form the ten Sefirot. They are eternal, since in them is revealed the dominion of God. The first three preexisted ideally as the prototypes of creation proper, which became possible when infinite space, represented by the six other Sefirot, was produced. The Spirit of God, however, is not only the beginning but is also the end of the universe; for the Sefirot are closely connected with one another, "and their end is in their origin, as the flame is in the coal."

While the three primal elements constitute the substance of things, the twenty-two letters of the Hebrew alphabet constitute the form. The letters hover, as it were, on the boundary-line between the spiritual and the physical world; for the real existence of things is cognizable only by means of language, *i.e.*, the human capacity for conceiving thought. As the letters resolve the contrast between the substance and the form of things, they represent the solvent activity of God; for everything that is exists by means of contrasts, which find their solution in God, as, for instance, among the three primal elements, the contrasts of fire and water are resolved into *רוח* ("air" or "spirit").

The importance of this book for the later Cabala, overestimated formerly, has been underestimated in modern times. The emanations here are not the same as those posited by the cabalists; for no graduated scale of distance from the primal emanations is assumed, nor are the Sefirot here identical with those enumerated in the later Cabala. But the agreement in essential points between the later Cabala and the "Sefer Yezirah" must not be overlooked. Both posit mediate beings in place of immediate creation out of nothing; and these mediate beings were not created, like those posited in the various cosmogonies, but are emanations. The three primal elements in the "Sefer Yezirah," which at first existed only ideally and then became manifest in form, are essentially identical with the worlds of AZILUT and BERIAH of the later Cabala. In connection with the "Sefer Yezirah" the mystical speculations of certain Jewish sects must be men-

Mysticism tioned, which, toward the year 800, of Jewish began to spread doctrines that for Heretics. turies had been known only to a few initiated ones. Thus the Maghariyites taught that God, who is too exalted to have any attributes ascribed to Him in Scripture, created an angel to be the real ruler of the world [compare the *שר העולם*]

and Metatron in the Talmud.—*k.*]; and to this angel everything must be referred that Scripture recounts of God (Kirkisani, extracts from his manuscript quoted by Harkavy in Rabbinowicz's Hebrew translation of Grätz's "Gesch. der Juden," iii. 496; separately under the title "Le-Korot ha-Kittot be-Yisrael"). This Jewish form of the Gnostic Demiurge, which was also known to the Samaritans (Baneth, "Marqah, on the twenty-two Letters of the Alphabet," pp. 52-54), was accepted with slight modifications by the Karaites (Judah Hadassi, "Eshkol ha-Kofer," 25c, 26b) as well as by the German cabalists, as will be shown further on. Benjamin Nahawendi seems to have known of other emanations in addition to this Demiurge (see Harkavy, *l.c.* v. 16). These, of course, were not new theories originating at this time, but an awakening of Jewish Gnosticism, that had been suppressed for centuries by the increasing preponderance of Rabbinism, and now reappeared not by chance, at a time when Sadduceeism, the old enemy of Rabbinism, also reappeared, under the name of Karaism. But while the latter, as appealing to the masses, was energetically and even bitterly attacked by the representatives of Rabbinism, they made allowance for a revival of Gnosticism. For, although the cabalistic treatises ascribed to certain geonim were probably fabricated in later times, it is certain that numbers of the geonim, even many who were closely connected with the academies, were ardent disciples of mystic lore. The father of the German Cabala was, as is now known, a Babylonian (see AARON B. SAMUEL HA-NASSI), who emigrated to Italy in the first half of the ninth century, whence the Kalonymides later carried their teachings to Germany, where in the thirteenth century an esoteric doctrine, essentially identical with that which prevailed in Babylon about 800, is accordingly found.

While the branch of the Cabala transplanted to Italy remained untouched by foreign influences, the reaction of Greco-Arabic philosophy on Jewish mysticism became apparent in the Arabic-speaking countries. The following doctrines of

**Influence of Greco-Arabic Philosophy.** Arab philosophy especially influenced and modified Jewish mysticism, on account of the close relationship between the two. The "Faithful Brothers of Basra," as well as the Neoplatonic Aristotelians of the ninth century, have left their marks on the Cabala. The brotherhood taught, similarly to early Gnosticism, that God, the highest Being, exalted above all differences and contrasts, also surpassed everything corporeal and spiritual; hence, the world could only be explained by means of emanations. The graduated scale of emanations was as follows: (1) the creating spirit (*noir*); (2) the directing spirit, or the world-soul; (3) primal matter; (4) active nature, a power proceeding from the world-soul; (5) the abstract body, also called secondary matter; (6) the world of the spheres; (7) the elements of the sublunary world; and (8) the world of minerals, plants, and animals composed of these elements. These eight form, together with God, the absolute One, who is in and with everything, the scale of the nine primal substances, corresponding to the nine primary numbers and the nine spheres. These nine numbers of the "Faithful Brothers" (com-

pare De Boer, "Gesch. der Philosophie im Islam," p. 84; Dieterici, "Die Sogenannte Theologie des Aristoteles," p. 38; *idem*, "Weltseele," p. 15) have been changed by a Jewish philosopher of the middle of the eleventh century into ten, by counting the four elements not as a unit, but as two ("Torat ha-Nefesh," ed. Isaac Broydé, pp. 70, 75; compare, also, Guttmann, in "Monatsschrift," xlii. 450).

Solomon ibn Gabirol's doctrines influenced the development of the Cabala more than **Gabirol's**, any other philosophical system; and **Influence** his views on the will of God and **upon the** on the intermediate beings between **Cabala.** God and the creation were especially weighty. Gabirol considers God as an absolute unity, in whom form and substance are identical; hence, no attributes can be ascribed to God, and man can comprehend God only by means of the beings emanating from Him. Since God is the beginning of all things, and composite substance the last of all created things, there must be intermediate links between God and the universe; for there is necessarily a distance between the beginning and the end, which otherwise would be identical.

The first intermediate link is the will of God, the hypostasis of all things created; Gabirol meaning by will the creative power of God manifested at a certain point of time, and then proceeding in conformity with the laws of the emanations. As this will unites two contrasts—namely, God, the actor, and substance, the thing acted upon—it must necessarily partake of the nature of both, being *factor* and *factum* at the same time. The will of God is immanent in everything; and from it have proceeded the two forms of being, "materia universalis" (*izra*) and "forma universalis." But only God is "creator ex nihilo": all intermediary beings create by means of the graduated emanation of what is contained in them potentially. Hence, Gabirol assumes five intermediary beings (**אמצעיות**) between God and matter; namely: (1) will; (2) matter in general and form; (3) the universal spirit (**שכל הכללי**); (4) the three souls, namely, vegetative, animal, and thinking soul; and (5) the nature, the motive power, of bodies. Gabirol (quoted by Ibn Ezra, commentary on Isa. xliii. 7) also mentions the three cabalistic worlds, Beriah, Yezirah, and 'Asiyah; while he considers Azilut to be identical with the will. The theory of the concentration of God, by which the Cabala tries to explain the creation of the finite out of the infinite, is found in mystical form in Gabirol also (see Munk, "Mélanges," pp. 284, 285).

Still, however great the influence which Gabirol exercised on the development of the Cabala, it would be incorrect to say that the latter is derived chiefly from him. The fact is that when Jewish mystic lore came in contact with Arabic-Jewish philosophy, it appropriated those elements that appealed to it; this being especially the case with Gabirol's philosophy on account of its mystical character. But other philosophical systems, from Saadia to Maimonides, were also laid under contribution. Thus the important German cabalist Eleazar of Worms was strongly influenced by Saadia; while Ibn Ezra's views found acceptance among the Ger-

man as well as the Spanish cabalists. Possibly even Maimonides, the greatest representative of rationalism among the Jews of the Middle Ages, contributed to the cabalistic doctrine of the "En-Sof" by his teaching that no attributes could be ascribed to God [unless it be of Pythagorean origin (see Bloch, in Winter and Wünsche, "Jüdische Literatur," iii. 241, note 3).—K.].

The esoteric doctrines of the Talmud, the mysticism of the period of the Geonim, and Arabic Neoplatonic philosophy are thus the three chief constituents of the Cabala proper as it is found in the thirteenth century. These heterogeneous elements also explain the strange fact that the Cabala appeared at the same time in two different centers of culture, under different social and political conditions, each form being entirely different in character from the other. The German Cabala is a direct continuation

of geonic mysticism. Its first representative is Judah the Pious (died 1217), whose pupil, Eleazar of Worms, is its most important literary exponent. Abraham Abulafia was its last representative, half a century later. The correctness of Eleazar's statement (in Del Medigo's "Mazref la-Hokmah," ed. 1890, pp. 64, 65), to the effect that the Kalonymides carried the esoteric doctrines with them from Italy to Germany about 917, has been satisfactorily established. Till the time of Eleazar these doctrines were in a certain sense the private property of the Kalonymides, and were kept secret until Judah the Pious, himself a member of this family, commissioned his pupil Eleazar to introduce the oral and written esoteric doctrine into a larger circle.

The essential doctrines of this school are as follows: God is too exalted for mortal mind to comprehend, since not even the angels can form an idea of Him. In order to be visible to angels as well as to men, God created out of divine fire His **כבוד** ("majesty"), also called **כרוך המיוהר**, which has size and shape and sits on a throne in the east, as the actual representative of God. His throne is separated by a curtain (**פרגוד**) on the east, south, and north from the world of angels; the side on the west being uncovered [compare, however, God's Shekinah dwelling in the east ("Apostolic Constitutions," ii. 57).—K.], so that the light of God, who is in the west, may illuminate it. All the anthropomorphic statements of Scripture refer to this "majesty" (**כבוד**), not to God Himself, but to His representative. Corresponding to the different worlds of the Spanish cabalists, the German cabalists also assume four (sometimes five) worlds; namely: (1) the world of the "glory" (**כבוד**) just mentioned; (2) the world of angels; (3) the world of the animal soul; and (4) the world of the intellectual soul. It is easy to discern that this curious theosophy is not a product of the age in which the German cabalists lived, but is made up of ancient doctrines, which, as stated above, originated in the Talmudic period. The Germans, lacking in philosophical training, exerted all the greater influence on the practical Cabala as well as on ecstatic mysticism. Just as in Spain about this time the deeply religious mind of the Jews rose in revolt against the cold Aristotelian rationalism that

had begun to dominate the Jewish world through the influence of Maimonides, so the German Jews, partly influenced by a similar movement within Christianity, began to rise against the traditional ritualism. Judah the Pious (Introduction to "Sefer Hasidim") reproaches the Talmudists with "poring too much over the Talmud without reaching any results." Hence, the German mystics attempted to satisfy their religious needs in their own way; namely, by contemplation and meditation. Like the Christian mystics (Preger, "Gesch. der Deutschen Mystik," p. 91), who symbolized the

**Christian and Jewish God** by the figure of marriage, and **Mysticism**. Jewish mystics described the highest degree of love of man for God in sensuous forms in terms taken from marital life.

While study of the Law was to the Talmudists the very acme of piety, the mystics accorded the first place to prayer, which was considered as a mystical progress toward God, demanding a state of ecstasy. It was the chief task of the practical Cabala to produce this ecstatic mysticism, already met with among the Merkabah-travelers of the time of the Talmud and the Geonim; hence, this mental state was especially favored and fostered by the Germans. Alphabetical and numeral mysticism constitutes the greater part of Eleazar's works, and is to be regarded simply as means to an end; namely, to reach a state of ecstasy by the proper employment of the names of God and of angels, "a state in which every wall is removed from the spiritual eye" (Moses of Tachau, in "Ozar Nehmad," iii. 84; compare Güdemann, "Gesch. des Erziehungswesens," i. 159 *et seq.*).

The point of view represented by the anonymous book "Keter Shem-Tob" (ed. Jellinek, 1853), ascribed to Abraham of Cologne and certainly a product of the school of Eleazar of Worms, represents the fusion of this German Cabala with the Provençal-Spanish mysticism. According to this work, the act of creation was brought about by a primal power emanating from the simple will of God. This eternal, unchangeable power transformed the potentially existing universe into the actual world by means of graduated emanations. These conceptions, originating in the school of Azriel, are herein combined with Eleazar's theories on the meaning of the Hebrew letters according to their forms and numerical values. The central doctrine of this work refers to the Tetragrammaton; the author assuming that the four letters *god, he, vau, and he* (יהוה) were chosen by God for His name because they were peculiarly distinguished from all other letters. Thus *god*, considered graphically, appears as the mathematical point from which objects were developed, and therefore symbolizes the spirituality of God to which nothing can be equal. As its numerical value equals ten, the highest number, so there are ten classes of angels, and correspondingly the seven spheres with the two elements—fire cohering with air, and water with earth, respectively—and the One who directs them all, making together ten powers; and finally the ten Sefirot. In this way the four letters of the Tetragrammaton are explained in detail.

A generation later a movement in opposition to the tendencies of this book arose in Spain; aiming to supplant speculative Cabala by a prophetic visionary one. Abraham ABULAFIA denied the doctrines of emanations and the Sefirot, and, going back to the German mystics, asserted that the true Cabala consisted in letter and number mysticism, which system, rightly understood, brings man into direct and close relations with the "ratio activa" (יִשְׁבֵּל הַתּוֹעֵל), the active intelligence of the universe, thus endowing him with the power of prophecy. In a certain sense Joseph b. Abraham Gikatilla, a cabalist eight years younger than Abulafia, may also be included in the German school, since he developed the practical Cabala into many circles. Yet Gikatilla, like his contemporary Tobias Abulafia, still hesitates between the abstract speculative Cabala of the Provençal-Spanish Jews and the concrete letter symbolism of the Germans. These two main movements are finally combined in the Zoharistic books, wherein, as Jellinek rightly says, "the syncretism of the philosophical and cabalistic ideas of the century appears complete and finished."

While the German mystics could refer to authentic traditions, the cabalists of Spain and southern

France were obliged to admit that they could trace their doctrines, which **The Cabala in Provence.** ("Kabbalah"; thus an Oriental scholar as early as 1223; compare Harkavy, Hebrew transl. of Grätz's "Gesch. der Juden," v. 47), to authorities no older than the twelfth century. The modern historian has greater difficulties in determining the origin of the Cabala in Provence than the cabalists themselves had; for they agreed that the esoteric doctrines had been revealed by the prophet Elijah, in the beginning of the twelfth century, to Jacob ha-Nazir, who initiated Abraham b. David of Posquières, whose son, Isaac the Blind, transmitted them further. But Isaac the Blind can not possibly be credited with being the originator of the speculative Cabala, for it is far too complicated to be the work of one man, as is evident by the writings of Azriel (born about 1160), the alleged pupil of Isaac. Azriel, moreover, speaks of the Sefirot, of the En-Sof, and of the cabalists of Spain (in Sachs's "Ha-Palit," p. 45); and it is absolutely impossible that Isaac the Blind, who was not much older than Azriel (his father Abraham b. David died in 1198), could have founded a school so quickly that Spanish scholars would be able to speak of the contrast between cabalists and philosophers as Azriel does. If there be any truth in this tradition of the cabalists, it can only mean that the relation of Isaac the Blind to the speculative Cabala was the same as that of his contemporary Eleazar of Worms to German mysticism; namely, that just as the latter made the esoteric doctrines—which were for centuries in the possession of one family, or at any rate of a very small circle—common property, so Isaac introduced the doctrines of the speculative Cabala for the first time into larger circles.

It may furthermore be assumed that the speculative philosophy of Provence, like German mysticism, originated in Babylon: Neoplatonism, reach-

ing there its highest development in the eighth and ninth centuries, could not but influence Jewish thought. Gabirol, as well as the author of "Torat ha-Nefesh," bears evidence of this influence on Jewish philosophy; while the Cabala took up the mystic elements of Neoplatonism. The Cabala, however, is not a genuine product of the Provençal Jews; for just those circles in which it is found were averse to the study of philosophy. The essential portions of the Cabala must, on the contrary, have been carried to Provence from Babylon; being known only to a small circle until Aristotelianism began to prevail, when the adherents of the speculative Cabala were forced to make their doctrine public.

The earliest literary product of the speculative Cabala is the work "Masseket Azilut," which contains the doctrine of the four graduated worlds as well as that of the concentration of the Divine Being. The form in which the rudiments of the Cabala are presented here, as well as the emphasis laid on keeping the doctrine secret and on the compulsory piety of the learners, is evidence of the early date of the

work. At the time when "Masseket Azilut" was written the Cabala had not yet become a subject of general study, but was still confined to a few of the elect. The treatment is on the whole the same as that found in the mystical writings of the time of the Geonim, with which the work has much in common; hence, there is no reason for not regarding it as a product of that time. The doctrines of Meṭatron, and of angelology especially, are identical with those of the Geonim, and the idea of the Sefirot is presented so simply and unphilosophically that one is hardly justified in assuming that it was influenced directly by any philosophical system.

Just as in the "Masseket Azilut" the doctrine of the ten Sefirot is based on the "Sefer Yeẓirah" (ed. Jellinek, p. 6, below), so the book **Bahir**, which, according to some scholars, was composed by Isaac the Blind, and which in any case originated in his school, starts from the doctrines of the "Bahir." "Sefer Yeẓirah," which it explains and enlarges. This book was of fundamental importance in more than one way for the development of the speculative Cabala. The Sefirot are here divided into the three chief ones—primal light, wisdom, and reason—and the seven secondary ones that have different names. This division of the Sefirot, which goes through the entire Cabala, is found as early as Pirḳe R. Eliezer III., from which the "Bahir" largely borrowed; but here for the first time the doctrine of the emanation of the Sefirot is clearly enunciated. They are conceived as the intelligible primal principles of the universe, the primary emanations of the Divine Being, that together constitute the **ס** (τὸ πᾶν = "the universe"). The emanation is regarded, not as having taken place once, but as continuous and permanent; and the author has such an imperfect conception of the import of this idea that he regards the emanation as taking place all at once, and not in graduated series. But this assumption annihilates the whole theory of emanation, which attempts to explain the gradual transi-

tion from the infinite to the finite, comprehensible only in the form of a graduated series.

On the whole, the contents of the book—which seems to be a compilation of loosely connected thoughts—justify the assumption that it is not the work of one man or the product of one school, but the first serious attempt to collect the

**Opposition to Aristotelianism.** esoteric doctrines that for centuries had circulated orally in certain circles of Provence, and to present them to a larger audience. The work is important because it gave to those scholars

who would have nothing to do with the philosophy then current—namely, Aristotelianism—the first incentive to a thorough study of metaphysics. The first attempt to place the cabalistic doctrine of the Sefirot on a dialectic basis could have been made only by a Spanish Jew, as the Provençal Jews were not sufficiently familiar with philosophy, and the few among them that devoted themselves to this science were pronounced Aristotelians who looked with contempt upon the speculations of the cabalists. It was Azriel (1160-1238), a Spaniard with philosophical training, who undertook to explain the doctrines of the Cabala to philosophers and to make it acceptable to them. It should be noted particularly that Azriel (in Sachs, "Ha-Palit," p. 45) expressly says that philosophical dialectics is for him only the means for explaining the doctrines of Jewish mysticism, in order that "those also who *do not believe*, but ask to have everything proved, may convince themselves of the truth of the Cabala." True disciples of the Cabala were satisfied with its doctrines as they were, and without philosophical additions. Hence the actual form of the Cabala as presented by Azriel must not be regarded as absolutely identical with its original one. Starting from the doctrine of the merely negative attributes of God, as taught by the Jewish philosophy of the time (see

**Azriel.** ATTRIBUTES). Azriel calls God the "En-Sof" (אֵן סוּף), the absolutely infinite, that can be comprehended only as the negation of all negation. From this definition of the En-Sof, Azriel deduces the potential eternity of the world—the world with all its manifold manifestations was potentially contained within the En-Sof; and this potentially existing universe became a reality in the act of creation. The transition from the potential to the actual is a free act of God; but it can not be called creation; since a "creatio ex nihilo" is logically unthinkable, and nothing out of which the world could be formed exists outside of God, the En-Sof. Hence, it is not correct to say that God creates, but that He irradiates; for as the sun irradiates warmth and light without diminishing its bulk, so the En-Sof irradiates the elements of the universe without diminishing His power. These elements of the universe are the Sefirot, which Azriel tries to define in their relation to the En-Sof as well as to one another. Although there are contradictions and gaps in Azriel's system, he was the first to gather the scattered elements of the cabalistic doctrines and combine them into an organic whole. Casting aside the haggadic-mystic form of the cabalistic works preceding him, Azriel adopted a style that was equal and at times

superior to that of the philosophic writers of the time.

ASHER BEN DAVID, a nephew and pupil of Isaac the Blind, a cabalistic contemporary of Azriel, and probably influenced by him, added little to the development of the Cabala, judging from the few fragments by him that have been preserved. On the other hand, ISAAC BEN SHESHET of Gerona, in his "Sha'ar ha-Shamayim," made noteworthy additions to the theoretical part of Azriel's system. The author of "Ha-Emunah we-ha-Bittahon," erroneously ascribed to Nahmanides, must also be included in the school of Azriel; but, desirous only to give a popular presentation of Azriel's doctrines, with a strong admixture of German mysticism, he contributed little to their development. More important is "Sefer ha-'Iyyun" (the Book of Intuition), ascribed to the gaon R. HAMAI, but really originating in the school of Azriel.

The cabalists themselves consider NAHMANIDES as the most important pupil of Azriel—a statement not supported by Nahmanides' works; for his commentary on the Pentateuch, although permeated by mysticism, has little that pertains to the speculative

**Nahmanides.** Cabala as developed by Azriel. Nahmanides, on the contrary, emphasizes the doctrine of the "creatio ex nihilo," and also insists that attributes can be

ascribed to God; while Azriel's En-Sof is the result of the assumption that God is without attributes. Yet Nahmanides' importance for the development of the Cabala must be recognized. The greatest Talmudic authority of his time, and possessing a large following of disciples, his leaning toward the Cabala was transmitted to his pupils, among whom David ha-Kohen, R. Sheshet, and Abner are especially mentioned. The brothers Isaac b. Jacob and Jacob b. Jacob ha-Kohen also seem to have belonged to the circle of Nahmanides. His most important pupil, however, and his successor, was Solomon ben Abraham ibn Adret, the great teacher of the Talmud, who also had a strong leaning toward the Cabala, but apparently gave little time to its study. Among his pupils were the cabalists SHEM-TOB B. ABRAHAM GAON, ISAAC OF ACCO, and BAIYA B. ASHER, the last named of whom, by his commentary on the Pentateuch, contributed much to the spread of the Cabala.

Isaac ibn Latif, who flourished about the middle of the thirteenth century, occupies a peculiar and independent position in the history of the Cabala, owing to his attempt to introduce Aristotelianism. Although he founded no school, and although the genuine cabalists did not even consider him as belonging to their group, many of his opinions found

**Ibn Latif.** entrance into the Cabala. With Maimonides he upheld the principle of the beginning of the world; his statement, God has no will because He *is* will, is borrowed from Gabirol; and in addition he teaches the principle of the emanation of the Sefirot. He conceives of the first immediate divine emanation as the "first created" (נְבִיאָה הַרְאִישִׁית), a godlike, absolutely simple Being, the all-containing substance and condition of everything that is. The other Sefirot proceeded from this in gradual serial emanation, grow-

ing more coarse and material as their distance increased from their purely spiritual, divine origin. The relation between the "first created" and all that has since come into existence is like that between the simple geometrical point and the complicated geometrical figure. The point grows to a line, the line to a plane or superficies, and this into a solid; and just as the point is still present as a fundamental element in all geometrical figures, so the "first created" continues to act as the primal, fundamental element in all emanations. This conception of the first Sefirah as a point, or numeral unit, within the universe reappears with special frequency in the presentations of the later cabalists.

The real continuation of Azriel's doctrines, however, is to be found in a number of pseudepigraphic works of the second half of the thirteenth century. Although this literature has been preserved only fragmentarily, and has not yet been critically edited to any extent, its trend nevertheless may be clearly discerned. Such works represent the attempt to put the doctrines of "Bahir" and of Azriel into dogmatic form, to shape and determine the old cabalistic teachings, and not to bring forward new ones. Among the important products of this dogmatic Cabala is, in the first place, the little work "Sefer ha-Temunah" (Book of Form), which endeavors to illustrate the principle of emanation by means of the forms of the Hebrew letters. Here for the first time the conception of the Sefirot is laid down in definite formulæ in place of the uncertain statement that they were to be considered as powers (כחות) or as tools (כלים) of God. The Sefirot, according to this book, are powers inhering in God, and are related to the En-Sof as, for instance, the limbs are to the human body. They are, so to speak, organically connected with God, forming one indivisible whole. The question that long occupied the cabalists—namely, how the expression or transmission of the will may be explained in the act of

"Sefer ha-Temunah"—is here solved in a simple way: for all the Sefirot, being organically connected with the En-Sof, have but one common will. Just as man does not communicate his will to his arm when he wants to move it, so an expression of the will of the En-Sof is not necessary in the act of emanation. Another important principle, which is much in evidence from the Zohar down to the latest cabalistic works, is likewise clearly expressed for the first time in the "Sefer ha-Temunah"; namely, the doctrine of the double emanation, the positive and negative one. This explains the origin of evil; for as the one, the positive emanation, produced all that is good and beautiful, so the other, the negative, produced all that is bad, ugly, and unclean.

The final form was given to Azriel's Cabala by the work MA'AREKET HA-ELONUT, in which Azriel's system is presented more clearly and definitely than in any other cabalistic work. The fundamental principle of the Cabala herein is the potential eternity of the world; hence the dynamic character of the emanations is especially emphasized. The treatment of the Sefirot is also more thorough and extended than in Azriel. They are identified with God; the first Sefirah, כתר ("crown"), containing

*in potentia* all of the subsequent nine emanations. The doctrine of double emanations, positive and negative, is taught in "Ma'areket," as well as in "Sefer ha-Temunah," but in such a way that the contrast, which corresponds exactly with the syzygy theory of the Gnostics, appears only in the third Sefirah, Binah (= "intelligence"). The author of the "Ma'areket" proceeds as the "Bahir" in the separation of the three superior from the seven inferior Sefirot, but in a much clearer way: he regards only the former as being of divine nature, since they emanate immediately from God; while the seven lower ones, which were all produced by the third Sefirah, are less divine, since they produce immediately the lower world-matter. A contrast which rules the world can therefore begin only with the third Sefirah; for such contrast can not obtain in the purely spiritual realm.

This point is an instructive illustration of the activity of the cabalists from the time of the "Bahir" (end of the twelfth century) to the beginning of the fourteenth century. Within this period the disjointed mystico-gnostic conceptions of the "Bahir" were gradually and untiringly woven into a connected, comprehensive system.

Side by side with this speculative and theoretical school, taking for its problem metaphysics in the strict sense of the word—namely, the nature of God and His relation to the world—another mystical movement was developed, more religio-ethical in nature, which, as Grätz rightly says, considered "the ritual, or the practical side, to call it so, as the more important, and as the one to which the theosophical side served merely as an introduction." Both these movements had their common starting-point in the geonic mysticism, which introduced important speculative elements into practical mysticism proper. But they also had this in common, that both endeavored to come into closer relationship with God than the transcendentalism of Jewish philosophy permitted, colored as it was by Aristotelianism. Practical mysticism endeavored to make this union possible for every-day life; while speculative thinkers occupied themselves in reaching out toward a monistic construction of the universe, in which the transcendence of the primal Being might be preserved without placing Him outside of the universe.

Both of these movements, with a common end in view, were ultimately bound to converge, and this actually occurred with the appearance of the book called ZOHAR (זוהר = "splendor"), after Dan. xii. 3, והמשכילים יזהירו כוהר הרקיע (= "The wise shall be resplendent as the splendor of the firmament"), showing that it had the "Bahir" (= Bright) for its model. It is in the main a commentary on the Pentateuch, and R. Simon ben Yoḥai is introduced as the inspired teacher who expounds the theosophic doctrines to the circle of his saintly hearers. It first appeared therefore under the title of MIDRASH R. SIMON BEN YOḤAI.

The correspondence to the order of the Scripture is very loose, even more so than is often the case in the writings of the Midrashic literature. The Zohar is in many instances a mere aggregate of heterogeneous parts. Apart from the Zohar proper, it con-

tains a dozen mystic pieces of various derivations and different dates that crop up suddenly, thus entirely undoing the otherwise loose texture of the Zohar.

Distinct mention is made in the Zohar of excerpts from the following writings: (1) "Idra Rabba"; (2) "Idra Zuṭṭa"; (3) "Matnitin"; (4) "Midrash ha-Ne'elam"; (5) "Ra'aya Mehemna"; (6) "Saba" (the Old); (7) "Raze de-Razin"; (8) "Sefer Hekalot"; (9) "Sifra de-Zeni'uta"; (10) "Sitre Torah"; (11) "Tosefta"; (12) and lastly, "Yanuka."

Besides the Zohar proper, there are also a "Zohar Hadash" (New Zohar), Zohar to Cant., and "Tikkunim," both new and old, which bear a close relation to the Zohar proper.

For centuries, and in general even to-day, the doctrines contained in the Zohar are taken to be the Cabala, although this book represents only the union of the two movements mentioned above. The Zohar is both the complete guide of the different cabalistic theories and the canonical book of the cabalists. After the Zohar, which must be dated

### The Zohar Literature.

about the beginning of the fourteenth century, and which received its present shape largely from the hand of MOSES DE LEON, a period of pause ensued in the development of the Cabala, which lasted for more than two centuries and a half. Among the contemporaries of Moses de Leon must be mentioned the Italian Menahem Recanati, whose cabalistic commentary on the Pentateuch is really a commentary on the Zohar. JOSEPH B. ABRAHAM IBN WAḲAR was an opponent of the Zohar; his Introduction to the Cabala, which exists in manuscript only, is considered by Steinschneider as the best. It was some time before the Zohar was recognized in Spain. Abraham b. Isaac of Granada speaks in his work "Berit Menuḥali" (The Covenant of Rest) of "the words of R. Simon b. Yoḥai," meaning the Zohar. In the fifteenth century the authority of the Cabala, comprising also that of the Zohar, was so well recognized in Spain that SUEM-TOB BEN JOSEPH IBN SUEM-TOB (died 1430) made a bitter attack on Maimonides from the standpoint of the Zohar. Moses BOTAREL tried to serve the Cabala by his alleged discoveries of fictitious authors and works; while the pseudonymous author of the ḲANAH attacked Talmudism under cover of the Cabala about 1415. Isaac ARAMA and Isaac ABRAVANEL were followers of the Cabala in the second half of the fifteenth century, but without contributing anything to its development. Nor does the cabalistic commentary on the Pentateuch of MENAHEM ZIONI B. MEIR contribute any new matter to the system, although it is the most important cabalistic work of the fifteenth century. Judah HAYYAT and ABRAHAM SABA are the only noteworthy cabalists of the end of that century.

The happy remark of Baur, that a great national crisis furnishes a favorable soil for mysticism among the people in question, is exemplified in the history of the Cabala. The great misfortune that befell the Jews of the Pyrenean peninsula at the end of the fifteenth century revived the Cabala. Among the fugitives that settled in Palestine MEIR B. EZEKIEL IBN GABBAI wrote cabalistic works evincing an acute

insight into the speculative Cabala. A Sicilian cabalist, Joseph Saragoza, is regarded as the teacher of DAVID IBN ZIMRA, who was especially active in developing the Cabala in Egypt. Solomon Molcho and Joseph della Reina (the history of his life is distorted by many legends) represent the reviving mysticism. Deliverance from national suffering was the object of their search, which they thought to effect by means of the Cabala. Solomon ALKABIZ and Joseph CARO, who gradually gathered a large circle of cabalistic dreamers about them, endeavored to attain a state of ecstasy by fasting, weeping, and all manner of stringent asceticism, by which means they thought to behold angels and obtain heavenly revelations. Of their number, too, was Moses Cordovero, rightly designated as the last representative of the early cabalists, and, next to Azriel, the most important speculative thinker among them.

The modern cabalistic school begins theoretically as well as practically with Isaac Luria (1533-72).

**Luria's Cabala.** In the first place, its doctrine of appearance, according to which all that exists is composed of substance and appearance, is most important, rendering Luria's Cabala extremely subjective by teaching that there is no such thing as objective cognition.

The theoretical doctrines of Luria's Cabala were later on taken up by the Ḥasidim and organized into a system. Luria's influence was first evident in certain mystical and fanciful religious exercises, by means of which, he held, one could become master of the terrestrial world. The writing of amulets, conjuration of devils, mystic jugglery with numbers and letters, increased as the influence of this school spread. Among Luria's pupils Hayyim Vital and Israel Saruḳ deserve especial mention, both of them being very active as teachers and propagandists of the new school. Saruḳ succeeded in winning over the rich Menahem Azariah of Fano. Thus, a large cabalistic school was founded in the sixteenth century in Italy, where even to-day scattered disciples of the Cabala may be met. HERRERA, another pupil of Saruḳ, tried to spread the Cabala among Christians by his "Introduction," written in Spanish. Moses Zacuto, Spinoza's fellow-pupil, wrote several cabalistic works strongly tinged with asceticism, which were not without influence on the Italian Jews. In Italy, however, there appeared also the first antagonists of the Cabala, at a time when it seemed to be carrying everything before it. Nothing is known of Mordecai Corcos' work against the Cabala, a work that was never printed, owing to the opposition of the Italian rabbis. Joseph del Medigo's wavering attitude toward the Cabala injured rather than helped it. Judah de Modena attacked it ruthlessly in his work "Sha'agat Aryeh" (The Lion's Roar); while an enthusiastic and clever advocate appeared, a century later, in the person of Moses Hayyim Luzzatto. A century later still, Samuel David LUZZATTO attacked the Cabala with the weapons of modern criticism. But in the East, Luria's Cabala remained undisturbed.

After Vital's death and that of the immigrant Shluniel of Moravia, who by his somewhat vocifer-

ous methods contributed much to the spreading of Luria's doctrines, it was especially Samuel Vital, Hayyim Vital's son, together with Jacob

**In the Orient.** ZEMAH, and Abraham AZULAI, who endeavored to spread the mode of life (הנהגות) and the mystical meditations

for prayer (פיוט) advocated by Luria. Frequent bathing (טבילה), vigils on certain nights, as well as at midnight (see HAZOT), penance for sins, and similar disciplines, were introduced by this aftergrowth of the school of Luria. It must be noted in their favor that they laid great emphasis on a pure life, philanthropy, brotherly love toward all, and friendship. The belief that such actions would hasten the Messianic time grew until it took concrete form in the appearance of Shabbethai Zebi, about 1665. Shabbethaism induced many scholars to study the speculative Cabala more thoroughly; and, indeed, the Shabbethaian Nehemia Hayyun showed in his heretical cabalistic works a more thorough acquaintance with the Cabala than his opponents, the great Talmudists, who were zealous followers of the Cabala without comprehending its speculative side. Shabbethaism, however, did not in the least compromise the Cabala in the eyes of the Oriental Jews, the majority of whom even to-day esteem it holy and believe in it.

While the Cabala in its different forms spread east and west within a few centuries, Germany, which seemed a promising field for mysticism in the beginning of the thirteenth century, was soon left behind. There is no cabalistic literature proper among the German Jews, aside from the school of Eleazar of Worms. Lippman MÜLLHAUSEN, about

1400, was acquainted with some features of the Cabala; but there were no

**In Germany and Poland.** real cabalists in Germany until the eighteenth century, when Polish scholars invaded the country. In Poland the Cabala was first studied about

the beginning of the sixteenth century, but not without opposition from the Talmudic authorities, as, for instance, Solomon b. Jehiel Luria, who, himself a devout disciple of the Cabala, wished to have its study confined to a small circle of the elect. His friend Isserles gives proof of wide reading in cabalistic literature and of insight into its speculative part; and the same may be said of Isserles' pupil Mordecai Jaffe. But it is perhaps not a mere chance that the first cabalistic work written in Poland was composed by Mattathias Delacur (1570), of south European descent, as his name indicates. ASHER or ANSHEL of Cracow at the beginning of the sixteenth century is named as a great cabalist, but the nature of his doctrine can not be ascertained. In the seventeenth century, however, the Cabala spread all over Poland, so that it was considered a matter of course that all rabbis must have a cabalistic training. Nathan Spiro, Isaiah Horwitz, and Naphtali b. Jacob Elhanan were the chief contributors to the spread of Luria's Cabala in Poland, and thence into Germany. Yet, with the exception of Horwitz's work "Shene Luhot ha-Berit" (The Two Tablets of the Covenant), there is hardly one among the many cabalistic works originating in Poland that rises in any way above mediocrity. In the following cen-

tury, however, certain important works appeared on the Cabala by Eybeschütz and Emden, but from different standpoints. The former contributed a monumental work to the speculative Cabala in his "Shem 'Olam" (Everlasting Name); the latter became the father of modern Cabala criticism by his penetrating literary scrutiny of the Zohar.

The real continuation of the Cabala is to be found in HASIDISM, which in its different forms includes both the mystical and speculative sides. While the doctrines of the HABAD have shown that the Lurian Cabala is something more than a senseless playing with letters, other forms of Hasidism, also derived from the Cabala, represent the

**Hasidism.** acme of systematized cant and irrational talk. Elijah of Wilna's attacks on Hasidism chiefly brought it about that those circles in Russia and Poland which oppose Hasidism also avoid the Cabala, as the real domain of the Hasidim. Although Elijah of Wilna himself was a follower of the Cabala, his notes to the Zohar and other cabalistic products show that he denied the authority of many of the works of the Lurianic writers: his school produced only Talmudists, not cabalists. Although "Nefesh ha-Hayyim" (The Soul of Life), the work of his pupil Hayyim of Volozhin, has a cabalistic coloring, it is chiefly ethical in spirit. Hayyim's pupil, Isaac Haber, however, evinces in his works much insight into the older Cabala. The latter also wrote a defense of the Cabala against the attacks of Modena. The non-Hasidic circles of Russia in modern times, though they hold the Cabala in reverence, do not study it.

The critical treatment of the Zohar, begun by Emden, was continued toward the middle of the nineteenth century by a large group of modern scholars, and much was contributed in the course of the following period toward a better understanding of the Cabala, although more still remains obscure. The names of

**Critical Treatment of the Cabala.** Adolf Franck, M. H. Landauer, II. Joël, Jellinek, Steinschneider, Ignatz Stern, and Solomon Munk, who paved the way for the scientific treatment of the Cabala, may be noted. Many obscurities will probably become clear as soon as more is known about Gnosticism in its different forms, and Oriental theosophy.

This historical survey of the development of the Cabala would not be complete if no mention were made of its relation to the Christian world. The first Christian scholar who gave proof of his acquaintance with the Cabala was Raymond Lull (born about 1225; died June 30, 1315), called "doctor illuminatus" on account of his great learning. The Cabala furnished him with material for his "Ars Magna," by which he thought to bring

**The Cabala in the Christian World.** about an entire revolution in the methods of scientific investigation, his means being none other than letter and number mysticism in its different varieties. The identity between God and nature found in Lull's works shows that he was also influenced by the speculative Cabala. But it was PICO DI MIRANDOLA (1463-94) who in-

roduced the Cabala into the Christian world. The Cabala is, for him, the sum of those revealed religious doctrines of the Jews which were not originally written down, but were transmitted by oral tradition. At the instance of Ezra they were written down during his time so that they might not be lost (compare II Esdras xiv. 45). Pico, of course, holds that the Cabala contains all the doctrines of Christianity, so that "the Jews can be refuted by their own books" ("De Hom. Dignit." pp. 329 *et seq.*). He therefore made free use of cabalistic ideas in his philosophy, or, rather, his philosophy consists of Neoplatonic-cabalistic doctrines in Christian garb. Through Reuchlin (1455-1522) the Cabala became an important factor in leavening the religious movements of the time of the Reformation.

The aversion to scholasticism that increased especially in the German countries, found a positive support in the Cabala; for those that were hostile to scholasticism could confront it with another system. Mysticism also hoped to confirm its position by means of the Cabala, and to leave the limits to

which it had been confined by ecclesiastical dogma. Reuchlin, the first important representative of this move-

ment in Germany, distinguished between cabalistic doctrines, cabalistic art, and cabalistic perception. Its central doctrine, for him, was the Messianology, around which all its other doctrines grouped themselves. And as the cabalistic doctrine originated in divine revelation, so was the art cabalistic derived immediately from divine illumination. By means of this illumination man is enabled to get insight into the contents of the cabalistic doctrine through the symbolic interpretation of the letters, words, and contents of Scripture; hence the Cabala is symbolical theology. Whoever would become an adept in the cabalistic art, and thereby penetrate the cabalistic secrets, must have divine illumination and inspiration. The cabalist must therefore first of all purify his soul from sin, and order his life in accord with the precepts of virtue and morality.

Reuchlin's whole philosophical system, the doctrine of God, cognition, etc., is entirely cabalistic, as he freely admits. Reuchlin's contemporary, Heinrich Cornelius Agrippa of Nottesheim (1487-1535), holds the same views, with this difference, that he pays especial attention to the practical side of the Cabala—namely, magic—which he endeavors to develop and explain thoroughly. In his chief work, "De Occulta Philosophia," Paris, 1528, he deals principally with the doctrines of God, the Sefirot (entirely after the fashion of the cabalists), and the three worlds. The last-named point, the division of the universe into three distinct worlds—(1) that of the elements; (2) the heavenly world; and (3) the intelligible world—is Agrippa's own conception but shaped upon cabalistic patterns, by which he also tries to explain the meaning of magic. These worlds are always intimately connected with one another; the higher ever influencing the lower, and the latter attracting the influence of the former.

Mention must also be made of Francesco Zorzi (1460-1540), whose theosophy is cabalistic, and who refers to the "Hebraei" ("De Harmonia Mundi,"

cantus iii. 1, ch. iii.). His doctrine of the threefold soul is especially characteristic, as he uses even the Hebrew terms "Nefesh," "Ruah," and "Neshamah." Natural philosophy in combination with the Christian Cabala is found in the works of

the German Theophrastus Paracelsus (1493-1541), of the Italian Hieronymus Cardanus (1501-76), of the Hollander Johann Baptist von Helmont (1577-1644), and of the Englishman

Robert Fludd (1574-1637). Natural science was just about to cast off its swaddling-clothes—a crisis that could not be passed through at one bound, but necessitated a number of intermediate steps. Not yet having attained to independence and being bound up more or less with purely speculative principles, it sought support in the Cabala, which enjoyed a great reputation. Among the above-mentioned representatives of this peculiar syncretism, the Englishman Fludd is especially noteworthy on account of his knowledge of the Cabala. Almost all of his metaphysical ideas are found in the Lurianic Cabala, which may be explained by the fact that he formed connections with Jewish cabalists during his many travels in Germany, France, and Italy.

Cabalistic ideas continued to exert their influence even after a large section of Christianity broke with the traditions of the Church. Many conceptions derived from the Cabala may be found in the dogmatics of Protestantism as taught by its first representatives, LUTHER and Melancthon. This is still more the case with the German mystics Valentin Weigel (1533-88) and Jacob Böhme (1575-1624). Although owing nothing directly to the literature of the cabalists, yet cabalistic ideas pervaded the whole period to such an extent that even men of limited literary attainments, like Böhme, for instance, could not remain uninfluenced. In addition to these Christian thinkers, who took up the doctrines of the Cabala and essayed to work them over in their own way, Joseph de Voisin (1610-85), Athanasius Kircher (1602-84), and Knorr Baron von ROSENROTH endeavored to spread the Cabala among the Christians by translating cabalistic works, which they regarded as most ancient wisdom. Most of them also held the absurd idea that the Cabala contained proofs of the truth of Christianity. In modern times Christian scholars have contributed little to the scientific investigation of cabalistic literature. Molitor, Kleuker, and Tholuk may be mentioned, although their critical treatment leaves much to be desired.

—**Teachings:** The name "Cabala" characterizes the theosophic teachings of its followers as an ancient sacred "tradition" instead of being a product of human wisdom. This claim, however, did not prevent them from differing with one another even on its most important doctrines, each one interpreting the "tradition" in his own way. A systematic review of the Cabala would therefore have to take into account these numerous different interpretations. Only one system can, however, be considered here; namely, that which has most consistently carried out the basic doctrines of the Cabala. Leaving HASIDISM aside, therefore, the Zoharistic system

as interpreted by Moses Cordovero and Isaac Luria, has most consistently developed these doctrines, and it will be treated here as the cabalistic system par excellence. The literary and historical value of its main works will be discussed in special articles.

The Cabala, by which speculative Cabala (קבלה עיונית) is essentially meant, was in its origin merely a system of metaphysics; but in the course of its development it included many tenets of dogmatics, divine worship, and ethics. God, the world, creation, man, revelation, the Messiah, law, sin, atonement, etc.—such are the varied subjects it discusses and describes.

The doctrine of the En-Sof is the starting-point of all cabalistic speculation. God is the infinite, unlimited being, to whom one neither can nor may ascribe any attributes whatever; who

**God.** can, therefore, be designated merely as En-Sof (אין סוף = "without end," "the Infinite"). Hence, the idea of God can be postulated merely negatively: it is known what God is not, but not what He is. All positive ascriptions are finite, or as Spinoza later phrased it, in harmony with the Cabala, "omnis determinatio est negatio." One can not predicate of God either will or intention or word or thought or deed (Azriel, in Meïr ibn Gab-bai's "Derek Emunah," ed. Berlin, p. 4a). Nor can one ascribe to Him any change or alteration; for He is nothing that is finite; He is the negation of all negation, the absolutely infinite, the En-Sof.

In connection with this idea of God there arises the difficult question of the creation, the principal problem of the Cabala and a much-discussed point in Jewish religious philosophy. If God be the En-Sof—that is, if nothing exists outside of God—then the question arises, How may the universe be explained? This can not have preexisted as a reality or as primal substance; for nothing exists outside of God: the creation of the world at a definite time presupposes a change of mind on the part of God, leading Him from non-creating to creating. But a change of any kind in the En-

**Creation.** Sof is, as stated, unthinkable; and all the more unthinkable is a change of mind on His part, which could have taken place only because of newly developed or recognized reasons influencing His will, a situation impossible in the case of God. This, however, is not the only question to be answered in order to comprehend the relation between God and the world. God, as an infinite, eternal, necessary being, must, of course, be purely spiritual, simple, elemental. How was it possible then that He created the corporeal, compounded world without being affected by coming in contact with it? In other words, how could the corporeal world come into existence, if a part of God was not therein incorporated?

In addition to these two questions on creation and a corporeal world, the idea of divine rulership of the world, Providence, is incomprehensible. The order and law observable in the world presuppose a conscious divine government. The idea of Providence presupposes a knower; and a knower presupposes a connection between the known and the knower. But what connection can there be between absolute

spirituality and simplicity on the one side, and the material, composite objects of the world on the other?

No less puzzling than Providence is the existence of evil in the world, which, like everything else, exists through God. How can God, **World.** who is absolutely perfect, be the cause of evil? The Cabala endeavors to answer all these questions by the following assumption:

Aristotle, who is followed by the Arabian and Jewish philosophers, taught (see Munk's note to his translation of the "Moreh Nebukim," i. 68) that in God, thinker, thinking, and the object thought of are absolutely united. The cabalists adopted this philosophic tenet in all its significance, and even went a step further by positing an essential difference between God's mode of thinking

and man's. With man the object thought of remains abstract, a mere form of the object, which has only a subjective existence in the mind of man, and not an objective existence outside of him. God's thought, on the other hand, assumes at once a concrete spiritual existence. The mere form even is at once a substance, purely spiritual, simple, and unconfined, of course, but still concrete; since the difference between subject and object does not apply to the First Cause, and no abstraction can be assumed. This substance is the first product of the First Cause, emanating immediately from Wisdom, which is identical with God, being His thought; hence, like Wisdom, it is eternal, inferior to it only in degree, but not in time; and through it, the primal will (רצון הקדום), everything was produced and everything is continuously arranged (Azriel, *l.c.* 3a; this point is discussed in detail in Eybeschütz, "Shem 'Olam," pp. 50 *et seq.*). The Zohar expresses this thought in its own way in the words: "Come and see! Thought is the beginning of everything that is; but as such it is contained within itself and unknown. . . . The real [divine] thought is connected with the אין [the "Not"; in the Zohar אין = "En-Sof"], and never separates from it. This is the meaning of the words (Zech. xiv. 9) 'God is one, and His name is one'" (Zohar, Wayehi, i. 246b).

The Zohar, as may be seen here, uses the expression "thought" where other cabalists use "primal will"; but the difference of terminology does not imply a difference of conception. The designation "will" is meant to express here merely

**Its Wisdom.** a negation; namely, that the universe was not produced unintentionally by the First Cause, as some philosophers hold, but through the intention—*i.e.*, the wisdom—of the First Cause. The first necessary and eternal, existing cause is, as its definition "En-Sof" indicates, the most complete, infinite, all-inclusive, and ever actually thinking Wisdom. But it can not be even approached in discussion. The object of its thought, which is also eternal and identified with it, is, as it were, the plan of the universe, in its entire existence and its duration in space and in time. That is to say, this plan contains not only the outline of the construction of the intellectual and material world, but also the determination of the time of its coming

into being; of the powers operating to that end in it; of the order and regulation according to fixed norms of the successive events, vicissitudes, deviations, originations, and extinctions to take place in it. The Cabala sought to answer the above-mentioned questions regarding the creation and Providence by thus positing a primal will. The creation of the world occasioned no change in the First Cause; for the transition from potentiality to reality was contained in the primal will already.

The primal will contains thus within itself the plan of the universe in its entire infinity of space and time, being for that reason *eo ipso* Providence, and is omniscient concerning all its innumerable details. Although the First Cause is the sole source of all knowledge, this knowledge is only

**Provi-** of the most general and simple nature.  
**dence.** The omniscience of the First Cause

does not limit the freedom of man because it does not occupy itself with details; the omniscience of the primal will, again, is only of a hypothetical and conditional character and leaves free rein to the human will.

The act of creation was thus brought about by means of the Primal Will, also called the Infinite Light (אור אין סוף). But the question still remains unanswered: How is it possible that out of that which is absolute, simple, and indeterminate—it being identical with the "First Cause"—namely, the "Primal Will"—there should emerge determinate, composite beings, such as exist in the universe? The cabalists endeavor to explain the transition from the infinite to the finite by the theory of the *Zimzum*; *i.e.*, contraction. The phenomenon, that which appears, is a limitation of what is originally infinite and, therefore, in itself invisible and imperceptible, because the undefined is insensible to touch and sight. "The En-Sof," says the Cabala, "contracted Himself in order to leave an empty space in the world." In other words, the infinite totality had to become manifold in order to appear and become visible in definite things. The power of God is unlimited: it is not limited to the infinite, but includes also the finite (Azriel, *l.c.* p. 2a). Or, as the later cabalists phrase it, the plan of the world lies within the First Cause; but the idea of the world includes the phenomenon, which must, therefore, be made possible. This power contained in the First Cause the cabalists called "the line" (קו) [compare the Gnostic "Kaw la-Kaw" mentioned above.—*k.*]; it runs through the whole universe and gives it form and being.

But another danger arises here. If God is immanent in the universe, the individual objects—or, as Spinoza terms them, the "modi"—may easily come to be considered as a part of the substance. In order to solve this difficulty, the cabalists point out, in the first place, that one perceives in the accidental things of the universe not only their existence, but also an organic life, which is the unity in the plurality, the general aim and end of the individual things that exist only for their individual aims and ends. This appropriate interconnection of things, harmonizing as it does with supreme wisdom, is not inherent in the things themselves, but can only originate in the perfect wisdom of God. From this follows

the close connection between the infinite and the finite, the spiritual and the corporeal, the latter being contained in the former. According to this assumption it would be justifiable to deduce

**Identity of** the spiritual and infinite from the cor-  
**Substance** poreal and finite, which are related  
**and Form.** to each other as the prototype to its copy. It is known that everything

that is finite consists of substance and form; hence, it is concluded that the Infinite Being also has a form in absolute unity with it, which is infinite, surely spiritual, and general. While one can not form any conception of the En-Sof, the pure substance, one can yet draw conclusions from the "Or En-Sof" (The Infinite Light), which in part may be cognized by rational thought; that is, from the appearance of the substance one may infer its nature. The appearance of God is, of course, differentiated from that of all other things; for, while all else may be cognized only as a phenomenon, God may be conceived as real without phenomenon, but the phenomenon may not be conceived without Him (Cordovero, "Pardes," xxv., "Sha'ar ha-Temurot"). Although it must be admitted that the First Cause is entirely uncognizable, the definition of it includes the admission that it contains within it all reality, since without that it would not be the general First Cause. The infinite transcends the finite, but does not exclude it, because the concept of infinite and unlimited can not be combined with the concept of exclusion. The finite, moreover, can not exist if excluded, because it has no existence of its own. The fact that the finite is rooted in the infinite constitutes the beginnings of the phenomenon which the cabalists designate as אור בבהינת בריאה ("the light in the test of creation"), indicating thereby that it does not constitute or complete the nature of God, but is merely a reflection of it. The First Cause, in order to correspond to its concept as containing all realities, even those that are finite has, as it were, retired into its own nature, has limited and concealed itself, in order that the phenomenon might become possible, or, according to cabalistic terminology, that the first concentration (צמצום הראשון) might take place. This concentration, however, does not represent the transition from potentiality to actuality, from the infinite to the finite; for it took place within the infinite itself in order to produce the infinite light. Hence this concentration is also designated as בקיעה ("cleavage"), which means that no change really took place within the infinite, just as we may look into an object through a fissure in its surface while no change has taken place within the object itself. It is only after the infinite light has been produced by this concentration, *i.e.*—after the First Cause has become a phenomenon—that a beginning is made for the transition to the finite and determinate, which is then brought about by a second concentration.

The finite in itself has no existence, and the infinite as such can not be perceived:  
**Con-** only through the light of the infinite  
**centration.** does the finite appear as existent; just as by virtue of the finite the infinite becomes perceptible. Hence, the Cabala teaches that the infinite light contracted and retired its infin-

expansion and contraction of the will; the sum of both, the moral order, appears as beauty. The last-named trinity of the Sefirot represents dynamic nature, namely, the masculine *Nezah* (נצה = "triumph"); and the feminine *Hod* (הוד = "glory"); the former standing for increase, and the latter for the force from which the forces produced in the universe. *Nezah* and *Hod* unite to produce *Yesod* (יסוד = "foundation"), the reproductive element, the root of all existence.

These three trinities of the Sefirot are also designated as follows: The first three Sefirot form the intelligible world (עולם מושכל), or *Elohim ha-shel*, as *Azriel* [*l.c.* p. 3b] calls it, corresponding to the *kósmos noúthós* of the Neoplatonists), representing, as we have seen, the absolute identity of being and thinking. The second triad of the Sefirot is moral in character; hence *Azriel* (*l.c.*) calls it the "soul-world," and later cabalists *עולם מורגיש* ("the sensible world"); while the third triad constitutes the natural world

*ΚΑΔΜΟΝ*, because the figure of man is employed in symbolic representation of the Sefirot, the Sefirot are conceived merely as conditions of the finite that is to be; for their activity only begins in the other so-called three worlds; namely, (1) the world of crea-

tive ideas (עולם הבריאה), (2) the world of creative formations (ע העצירה), and (3) the world of creative matter (ע העשייה). The earliest description of these four worlds is found in the "Masseket Azilut." The first Azilutic world contains the Sefirot (כבור in this passage = ספירות, as *Azriel*, *l.c.* 5a, says), and in the Beraitic (בריאה) world are the souls of the pious, the divine throne, and the divine halls. The *Yezeritic* world is the seat of the ten classes of angels with their chiefs, presided over by *Metatron*, who was changed into fire; and there are also the spirits of men. In the *Asiyyatic* world are the *ofanim*, the angels that receive the prayers and control the actions of men, and wage war against evil or *Samuel* ("Mas-

The Sefirot in Relation to One Another. (From "Asia Rimmolin," 1601.)

(עולם המושכע), or, as in *Azriel* [*l.c.*], *עולם הנוף*, and in the terminology of *Spinoza* "natura naturata"). The tenth Sefirot is *Malkut* (מלכות = "dominion"), that in which the will, the plan, and the active forces become manifest, the sum of the permanent and immanent activity of all Sefirot. The Sefirot on their first appearance are not yet the dynamic tools proper, as it were, constructing and regulating the world of phenomena, but merely the prototypes of them.

In their own realm, called *עולם האצילות* ("realm of emanation"; see *AZILUT*), or sometimes *ADAM*

*seket Azilut*," in *Jellinek*, "Ginze Hokmat ha-Kabbalah," pp. 3-4). Although there is no doubt

**The Four Worlds.**

that these four worlds were originally conceived as real, thus occasioning the many fantastic descriptions of them in the early Cabala, they were subsequently interpreted as being purely idealistic.

The later Cabala assumes three powers in nature, the mechanical, the organic, and the teleological, which are connected together as the result of a general, independent, purely spiritual, principal idea.

They are symbolized by the four worlds. The corporeal world (ע העשייה) is perceived as a world subjected to mechanism. As this can not be derived from a body or corporeality, the Cabala attempts to find the basis for it in the noncorporeal; for even the 'Asiyyatic world has its Sefirot; i.e., non-corporeal powers that are closely related to the monads of Leibnitz. This assumption, however, explains only inorganic nature; while organic, formative, developing bodies must proceed from a power that operates from within and not from without. These inner powers that form the organism from within, represent the Yeziratic world, the realm of creation. As

Correct Order of Sefirot Arranged in a Circle. (From "Asis Rimmonim," 1601.)

Sefirot in the Form of a Menorah. (From "Asis Rimmonim," 1601.)

there is found in nature not activity merely, but also wise activity, the cabalists call this intelligence manifested in nature the realm of creative ideas. Since, however, the intelligent ideas which are manifested in nature proceed from eternal truths that are independent of existing nature, there must necessarily exist the realm of these eternal truths, the Azilutic world. Hence the different worlds are essentially one, related to one another as prototype and copy. All that is contained in the lower world is found in higher archetypal form in the next higher world. Thus, the universe forms a large unified whole, a living, undivided being, that consists of three parts enveloping one another successively; and over them soars, as the highest archetypal seal, the world of Azilut.

The psychology of the Cabala is closely connected with its metaphysical doctrines. As in the Talmud, so in the Cabala man is represented as the sum and the highest product of creation. The very organs of his body are constructed according to the mysteries of the highest wisdom; but man proper is the soul;

for the body is only the garment, the covering in which the true inner man appears. The soul is threefold, being composed of Nefesh, Ruah, and Neshamah; Nefesh (נפש) corresponds to the 'Asiyyatic world, Ruah

(רוח) to the Yeziratic, and Neshamah (נישמה) to the Beriatric. Nefesh is the animal, sensitive principle in man, and as such is in immediate touch with the body. Ruah represents the moral nature; being the seat of good and evil, of good and evil desires, according as it turns toward Neshamah or Nefesh. Neshamah is pure intelligence, pure spirit, incapable of good or evil; it is pure divine light, the climax of soul-life. The genesis of these three powers of the soul is of course different. Neshamah proceeds directly from divine Wisdom, Ruah from the Sefirah Tiferet ("Beauty"), and Nefesh from the Sefirah Malkut ("Dominion"). Aside from this trinity of the soul there is also the individual principle; that is, the idea of the body with the traits belonging to each person individually, and the spirit of life that has its seat in the heart. But as these last two elements no longer form part of the spiritual nature of man, they are not included in the divisions of the soul. The cabalists explain the connection between soul and body as follows: All souls exist before the formation of the body in the suprasensible world (compare PREEXISTENCE), being united in the course of time with their respective bodies. The descent of the soul into the body is necessitated by the finite nature of the former: it is bound to unite with the body in order to take its part in the universe, to contemplate the spectacle of creation, to become conscious of itself and its origin, and, finally, to return, after having completed its tasks in life, to the inexhaustible fountain of light and life—God.

While Neshamah ascends to God, Ruah enters Eden to enjoy the pleasures of paradise, and Nefesh remains in peace on earth. This statement, however, applies only to the just. At the death of the godless, Neshamah, being stained with sins, encounters obstacles that make it difficult for it to return to its source; and until it has returned, Ruah may not enter Eden, and Nefesh finds no peace on earth.

Im-mortality. Closely connected with this view is the doctrine of the transmigration of the soul (see METEMPSYCHOSIS), on which the Cabala lays great stress. In order that the soul may return to its source, it must previously have reached full development of all its perfections in terrestrial life. If it has not fulfilled this condition in the course of one life, it must begin all over again in another body, continuing until it has completed its task. The Lurianic Cabala added to metempsychosis proper the theory of the impregnation of souls; that is, if two souls do not feel equal to their tasks God unites both in one body, so that they may support and complete each other, as, for instance, a lame man and a blind one may conjointly do (compare the parable in Sanh. 91a, b). If one of the two souls needs aid, the other becomes, as it were, its mother, bearing it in its lap and nourishing it with its own substance.

In regard to the proper relation of the soul to God, as the final object of its being, the cabalists distinguish, both in cognition and in will, a twofold gradation therein. As regards the will, we may fear God and also love Him. Fear is justified as it leads to love. "In love is found the secret of divine unity: it is love that unites the higher and lower stages,

The Aleph as a Symbol of the Four Cabalistic Worlds. (From "Asis Rimmonim," 1601.)

and that lifts every thing to that stage where all must be one" (Zohar, wa-Yakhel, ii. 216a). In the same way human knowledge may be either

**Love, the Highest Relation to God.** reflected or intuitive, the latter again being evidently the higher. The soul must rise to these higher planes of knowledge and will, to the contemplation and love of God; and in this

way it returns to its source. The life beyond is a life of complete contemplation and complete love. The relation between the soul and God is represented in the figurative language of the Zoharistic Cabala as follows: "The soul, Neshamah [which proceeds from the Sefirah Binah, as mentioned above], comes into the world through the union of the king with the matrona—'king' meaning the Sefirah Tiferet and 'matrona' the Sefirah Malkut—and the return of the soul to God is symbolized by the union of the matrona with the king." Similarly, the merciful blessing that God accords to the world is symbolized by the first figure; and by the second, the spiritualizing and ennobling of what is material and common through man's fulfillment of his duty.

It is seen hereby that ethics is the highest aim of the Cabala; it can be shown, indeed, that metaphysics is made subservient to it. The cabalists of course regard the ethical question as a part of the religious one, their theory of influence characterizing their attitude toward ethics as

**Ethics of the Cabala.** well as law. "The terrestrial world is connected with the heavenly world, as the heavenly world is connected with the terrestrial one," is a doctrine frequently recurring in the Zohar (Noah, i. 70b). The later cabalists formulate this thought thus: The Sefirot impart as much as they receive. Although the terrestrial world is the copy of the heavenly ideal world, the latter manifests its activity according to the impulse that the former has received. The connection between the real and the ideal world is brought about by man, whose soul belongs to heaven, while his body is earthy. Man connects the two worlds by means of his love for God, which, as explained above, unites him with God. The knowledge of the law in its ethical as well as religious aspects is also a means toward influencing the higher regions; for the study of the law means the union of man with divine wisdom. Of course,

the revealed doctrine must be taken in its true sense; *i.e.*, the hidden meaning of Scripture must be sought out (see **Influence.** *JEW. ENCYC.* i. 409, *s.v.* ALLEGORICAL INTERPRETATION). The ritual also has a deeper mystical meaning, as it serves to preserve the universe and to secure blessings for it. Formerly this was the object of the ritual sacrifices in the Temple; but now their place is taken by prayer. Devout worship, during which the soul is so exalted that it seems desirous of leaving the body in order to be united with its source, agitates the heavenly soul; that is, the Sefirah Binah. This stimulus occasions a secret movement among the Sefirot of all the worlds, so that all approach more or less to their source until the full bliss of the En-Sof reaches the last Sefirah, Malkut, when all the worlds become conscious of a beneficent influence. Similarly, just

as the good deeds of man exert a beneficent influence on all the worlds, so his evil actions injure them.

The question as to what constitutes evil and what good, the cabalists answer as follows:

In discussing the problem of evil, a distinction must be made between evil itself, and evil in human nature. Evil is the reverse of the divine **טורה אהרה** [the *left* side, while the good is the right side—a Gnostic idea (see above).—*K.*]. As the divine has true being, evil is that which has no being, the unreal or the seeming thing, the thing as it appears. And here again distinction must be made, between the thing which appears to be but is not—*i.e.*, the appearance of a thing which is unreal—

**The Problem of Evil.** and the appearance of a thing which is what it appears to be—*i.e.*, as a being of its own, having an original type of existence of its own. This "appearance of an appearance" or semblance of the phenomenon is manifested in the very beginnings of the finite and the multiform, because these beginnings include the boundaries of the divine nature; and the boundaries of the divine constitute the godless, the evil. In other words, evil is the finite. As the finite includes not only the world of matter, but, as has been shown above, also its idea, the cabalists speak of the Beriatric, Yeziratic, and 'Asiyyatic worlds of evil, as these worlds contain the beginnings of the finite. Only the world of the immediate emanations (**עולם האצילות**), where the finite is conceived as without existence and seeking existence, is free from evil. Evil in relation to man is manifested in that he takes semblance for substance, and tries to get away from the divine primal source instead of striving after union with it.

Most of the post-Zoharic cabalistic works combine with this theory of evil a doctrine on the fall of man resembling the Christian tenet. Connecting with the ancient view of Adam's corporeal and spiritual excellence before the Fall (see **ADAM IN RABBINICAL LITERATURE**), the later cabalists assert that originally all souls were combined into one, forming the soul of Adam. Man in his original state, therefore, was still a general being, not endowed with the empirical individuality with which he now appears in the world; and together with man the whole lower creation was in a spiritual, glorified state. But the venom of the serpent entered into man, poisoning him and all nature, which then became susceptible to the influence of evil. Then human nature was darkened and made coarse, and man received a corporeal body; at the same time the whole 'Asiyyatic world, of which man had been the lord and master, was condensed and coarsened. The Beriatric and Yeziratic worlds were also affected; influenced by man, they sank like the 'Asiyyatic world, and were also condensed in a proportionately superior degree. By this theory the cabalists explain the origin of physical and moral evil in the world. Yet the Cabala by no means considers man as lost after the Fall. The greatest sinner, they hold, may attract the higher heavenly power by penitence, thus counteracting the poison of the serpent working in him. The warfare between man and the satanic power will only cease

**The Fall of Man.** then became susceptible to the influence of evil. Then human nature was darkened and made coarse, and man received a corporeal body; at the same time the whole 'Asiyyatic world, of which man had been the lord and master, was condensed and coarsened. The Beriatric and Yeziratic worlds were also affected; influenced by man, they sank like the 'Asiyyatic world, and were also condensed in a proportionately superior degree. By this theory the cabalists explain the origin of physical and moral evil in the world. Yet the Cabala by no means considers man as lost after the Fall. The greatest sinner, they hold, may attract the higher heavenly power by penitence, thus counteracting the poison of the serpent working in him. The warfare between man and the satanic power will only cease

when man is again elevated into the center of divine light, and once more is in actual contact with it. This original glory and spirituality of man and of the world will be restored in the Messianic age, when heaven and earth will be renewed, and even Satan will renounce his wickedness. This last point has a somewhat Christian tinge, as indeed other Christian ideas are also found in the Cabala, as, *e.g.*, the trinity of the Sefirot, and especially of the first triad. [But on three powers in the one God compare Philo, "De Sacrificio Abelis et Caini," xv.; *idem*, "Quaestio in Genes." iv. 2; and F. Conybeare, "Philo's Contemplative Life," 1895, p. 304.—*k.*] But although the Cabala accepted various foreign elements, actual Christian elements can not be definitely pointed out. Much that appears Christian is in fact nothing but the logical development of certain ancient esoteric doctrines, which were incorporated into Christianity and contributed much to its development, and which are also found in Talmudic works and in Talmudic Judaism.

In forming an opinion upon the Cabala one must not be prejudiced by the general impression made on the modern mind by the cabalistic writings, especially the often repulsive Zoharistic Cabala. In former centuries the Cabala was looked upon as a

**Opinions  
on the  
Value of  
the Cabala.**

divine revelation; modern critics are inclined to condemn it entirely owing to the fantastic dress in which most cabalists clothe their doctrines, which gives the latter an entirely un-Jewish appearance. If the Cabala were really as un-Jewish as it is alleged to be, its hold upon thousands of Jewish minds would be a psychological enigma defying all process of reasoning. For while the attempt, inaugurated by Saadia, to harmonize Talmudic Judaism with Aristotelianism failed in spite of the brilliant achievements of Maimonides and his school, the Cabala succeeded in being merged so entirely in Talmudic Judaism that for half a century the two were almost identical. Although some cabalists, such as Abulafia and the pseudonymous author of "Kanah," were not favorably disposed toward Talmudism, yet this exception only proves the rule that the cabalists were not conscious of any opposition to Talmudic Judaism, as is sufficiently clear from the fact that men like Nahmanides, Solomon ibn Adret, Joseph Caro, Moses Isserles, and Elijah b. Solomon of Wilna were not only supporters of the Cabala, but even contributed largely to its development. As these men were the actual representatives of true Talmudic Judaism, there must have been something in the Cabala that attracted them. It can not have been its metaphysics; for Talmudic Judaism was not greatly interested in such speculations. It must be, then, that the psychology of the Cabala, in which a very high position is assigned to man, appealed to the Jewish mind. While Maimonides and his followers regarded philosophical speculation as the highest duty of man, and even made the immortality of the soul dependent on it; or, speaking more correctly, while immortality meant for them only the highest development of "active intellect" (שכל הפעיל) in man, to which only a few attained, the Cabalists taught not

only that every man may expect a great deal in the future world, according to his good and pious actions, but even that he is the most important factor in nature in this world. Not man's intelligence, but his moral nature, determines what he is. Nor is he merely a spoke in the wheel, a small, unimportant fragment of the universe, but the center around which everything moves. Here the Jewish Cabala, in contrast to alien philosophy, tried to present the true Jewish view of life, and one that appealed to Talmudic Judaism.

The Jew as well as the man was recognized in the Cabala. Notwithstanding the strongly pantheistic coloring of its metaphysics, the Cabala

**The  
Cabala and  
Phi-  
losophy.**

never attempted to belittle the importance of historic Judaism, but, on the contrary, emphasized it. Like the school of Maimonides, the cabalists also interpreted Scripture allegorically; yet there is an essential difference between the two. Abraham and most of the Patriarchs are, for both, the symbols of certain virtues, but with this difference; namely, that the Cabala regarded the lives of the Patriarchs, filled with good and pious actions, as incarnations of certain virtues—*e.g.*, the life of Abraham as the incarnation of love—while allegorical philosophy sought for exclusively abstract ideas in the narratives of Scripture. If the Talmudists looked with horror upon the allegories of the philosophical school, which, if carried out logically—and there have always been logical thinkers among the Jews—would deprive Judaism of every historical basis, they did not object to the cabalistic interpretation of Scripture, which here also identified ideality with reality.

The same holds good in regard to the Law. The cabalists have been reproved for carrying to the extreme the allegorization of the ritual part of the Law. But the great importance of the Cabala for rabbinical Judaism lies in the fact that it prevented the latter from becoming fossilized. It was the Cabala that raised prayer to the position it occupied for centuries among the Jews, as a means of transcending earthly affairs for a time and of feeling oneself in union with God. And the Cabala achieved this at a period when prayer was gradually becoming a merely external religious exercise, a service of the lips and not of the heart. And just as prayer was ennobled by the influence of the Cabala, so did most ritual actions cast aside their formalism, to become spiritualized and purified. The Cabala thus rendered two great services to the development of Judaism: it repressed both Aristotelianism and Talmudic formalism.

These beneficial influences of the Cabala are, however, counterbalanced by several most pernicious ones. From the metaphysical axiom,

**Noxious  
Influences.**

that there is nothing in the world without spiritual life, the cabalists developed a Jewish MAGIC. They taught that the elements are the abode of beings which are the dregs or remnants of the lowest spiritual life, and which are divided into four classes; namely, elemental beings of fire, air, water, and earth; the first two being invisible, while the last two may easily be perceived by the senses. While

the latter are generally malicious imps who vex and mock man, the former are well disposed and helpful. Demonology, therefore, occupies an important position in the works of many cabalists; for the imps are related to those beings that are generally designated as demons (שׂרפים), being endowed with various supernatural powers and with insight into the hidden realms of lower nature, and even occasionally into the future and the higher spiritual world. Magic (מַעֲשֵׂה שֵׁרִים) may be practised with the help of these beings, the cabalists meaning white magic in contrast to מַעֲשֵׂה כִּישָׁף ("the black art").

Natural magic depends largely on man himself; for, according to the Cabala, all men are endowed with insight and magical powers which they may develop. The means especially mentioned are: "Kawwanah" (כוּוּנָה) = intense meditation, in order to attract the higher spiritual influence; a strong will exclusively directed toward its object; and a vivid imagination, in order that the impressions from the spiritual world may enter profoundly into the soul and be retained there. From these principles many cabalists developed their theories on CASTING OF LOTS, NECROMANCY, EXORCISM, and many other superstitions. BIBLIOMANCY and the mysticism of numbers and letters were developed into complete systems.

The metaphysical conception of the identity of the real with the ideal gave rise to the mystical conception that everything beheld by our senses has a mystical meaning; that the phenom-

**Cabalistic** ena may instruct man as to what takes **Super-** place in the divine idea or in the **stition.** human intellect. Hence the cabalistic doctrine of the heavenly alphabet,

whose signs are the constellations and stars. Thus **ASTROLOGY** was legitimized, and bibliomancy found its justification in the assumption that the sacred Hebrew letters are not merely signs for things, but implements of divine powers by means of which nature may be subjugated. It is easy to see that all these views were most pernicious in their influence on the intellect and soul of the Jew. But it is equally true that these things did not originate in the Cabala, but gravitated toward it. In a word, its works represent that movement in Judaism which attempted to Judaize all the foreign elements in it, a process through which healthy and abnormal views were introduced together. Compare **ADAM QADMON**, **ALLEGORICAL INTERPRETATION**, **AMULETS**, **ASCENSION**, **AZILUT**, **CREATION**, **EMANATION**, **METEMPSYCHOSIS**, **SEFIROT**, **SZYZYGIES**, **ZOHAR**; and, on the relation of the Cabala to non-Jewish religions, **GNOSTICISM** and **PARSEEISM**.

**BIBLIOGRAPHY:** Only those cabalistic works are mentioned here that systematically discuss the Cabala or that are recognized as standard authorities in reference to it. The catalogue of Oppenheimer's library, *Kohlet David*, Hamburg, 1826, contains the names of most of the cabalistic works that had appeared up to the first third of the eighteenth century. Neubauer's catalogue of the Hebrew books in the Bodleian Library, Oxford, and Steinschneider's of the Munich Library, give information on the most important manuscripts of the Cabala. The following are the most important cabalistic works that have appeared: Azriel, *Perush 'Eser Sche'rot*, Berlin, 1850, in Meir ibn Gabbai, *Derek Eminent*; Eleazar of Worms, commentary on the *Sefer Yetzirah*, Przemysl, 1889; *Keter Shem-Tub* (anonymous), in Jellinek, *Auswahl Kabalisticcher Mystik*, Leipzig, 1853; Abraham Abulafia, *Shebat' Netivot ha-Torah*, in Jellinek, *Philosophie und Kabbala*,

*ib.* 1854; Isaac ibn Latif, *Giuzet ha-Melek*, in *Kokhe Yizhak*, xxviii.; *Zurat ha-Olam*, Vienna, 1852; *Rab Pe'alim*, Leinberg, 1885; *Ma'areket ha-Elahut* (alleged author, Pharez), Ferrara, 1557; Joseph b. Abraham Gikatilla, *Sha'are Orah*, Mantua, 1561; Moses b. Shem-Tob de Leon, *Sefer 'Aresh ha-Hakamah*, Basel, 1608; Zohar, alleged author, Simon b. Yohai, Mantua, 1558-60; Cremona, 1588; Shem-Tob ben Shem-Tob, *Sefer ha-Emunah*, Ferrara, 1556; Meir ben Ezekiel ibn Gabbai, *Derek Eminent*, Padua, 1562; Moses h. Jacob Corovvero, *Pardees Rimmonim*, Cracow ad Novydvor, 1591, the best and most profound treatise upon the Cabala by a cabalist. Isaac b. Solomon Luria's doctrines are discussed in the works of his pupils, especially in Hayyim Vital, *Ez Hayyim*, Korez, 1784; Abraham Herrera, *Sha'ar ha-Shamayim*, Amsterdam, 1665; also in Latio, *Porta Caelorum*, Sulzbach, 1678; Isaiah b. Abraham Horwitz, *Shene Lulot ha-Berit*, Amsterdam, 1649; Joseph Ergas, *Shomer Emunim*, Amsterdam, 1736, a readable discussion of important cabalistic doctrines.; Moses Hayyim Luzzatto, *Hofer u-Mekabbel*, Sbklov, 1755; German transl. by Freystadt, Königsberg, 1840; *Sefer 'Ezer*, *Pithe Hokmah*, Korez, 1785, the last and best introduction to the Cabala by a cabalist; Jonathan Eybeschütz, *Shem 'Olam*, Vienna, 1891, on the æonic mystical literature (see page 463 of the *JEW. ENCYCL.*, vol. II.).

**CABALLERIA, DE LA:** Marano family of Aragon, Spain, widely ramified, and influential through its wealth and scholarship, especially in Saragossa. The family descended from D. Solomon ibn Labi de la Caballeria, who had nine sons. The eldest, Bonafos de la CABALLERIA, was baptized, and all the others followed his example except Benveniste. Bonafos and Samuel took the name "Pedro" (Mieer Pedro). Samuel Pedro attained to high clerical offices, while his brother Ahab-Felipe became a leader in the Cortes, and Isaac Fernando was assistant curator in the University of Saragossa. The youngest brother, Luis, who was baptized as a little child, was appointed *tesorero mayor*, or chief treasurer, by Don Juan of Navarre. The sons of Isaac Fernando were engaged in farming the public taxes, and through their wealth secured high positions in the state. Pedro de la Cabal-

leria negotiated the marriage of Queen Isabella of Castile to Don Ferdinand of Aragon, and had the honor of presenting to the royal bride a costly necklace, valued at 40,000 ducats, defraying part of the cost himself. Benveniste's son, Vidal de la Caballeria, and his wife Beatrice also embraced Christianity, taking the name "Gonzalo." One of Benveniste's daughters became the wife of the rich landowner Don Apres de Paternoy, a Marano of Verdun, and their descendants were important in Spanish history.

Notwithstanding the high offices which this family filled, several of its members suffered from the persecutions of the Inquisition. Alfonso de la Caballeria of Saragossa, who still maintained his connection with the large synagogue there, took part in the conspiracy against the inquisitor Arbues. The remains of Juan de la Caballeria were burned in Saragossa, at which place, in 1488, Luis de la Caballeria, as well as his son Jaime and several other members of the family, was made to do public penance.

**CABALLERIA, BONAFOS (בנפוס) DE LA:** Anti-Jewish writer of the fifteenth century; son of Solomon ibn Labi de la Caballeria of Saragossa; assumed the name of "Micer Pedro" on becoming a convert to Christianity. From early youth he devoted himself to the study of the Hebrew, Arabic, and Latin languages, and gradually acquired a profound knowledge of civil and canonical law. He won the favor of Queen Maria, who appointed him commissioner of the Cortes which convened at Monzon and Aleaniz (1436-37); and all the liberties and privileges which the Caballeria family had enjoyed for a long time were confirmed to him and his descendants. Caballeria was twice married: first (before his conversion) to the former wife of Luis de Santangel, who obstinately resisted baptism, and then to Violante, a daughter of the wealthy Alfonso Ruiz of Daroca, who, like Caballeria, was a convert to Christianity.

In the year 1450 Micer Pedro began his "Zelus Christi Contra Judæos et Sarracenos," a book full of malevolence against his former coreligionists. This work, upon which he was engaged for fourteen years, was published at Bologna in 1592 by Martin Alfonso Vivaldo, who added numerous annotations showing his hostility to the Jewish race. Soon after the completion of this work, in which he falsely accused the Jews of every imaginable vice, branding them as a cursed seed and a hypocritical, pestilential, and abandoned race, Pedro was murdered (1464), the deed having been committed, it is believed, at the instigation of Maranos. All the sons of Pedro occupied high positions in Aragon; Alfonso being vice-chancellor, Luis confidential adviser of King Juan, and Jaime counselor and confidential adviser of Don Ferdinand, accompanying the latter on his first visit to Naples, and traveling by his side in princely splendor. Nevertheless, Jaime in 1504 became a victim of the Inquisition, and was sentenced at Saragossa. Another member of the family, Martin de la Caballeria, was invested with the command of the fleet at Majorca.

**CABRET or CABRIT, JACOB BEN JUDAH:** Spanish translator; lived in Spain toward the end of the fourteenth century. The surname "Cabret" or "Cabrit," borne by several persons, is derived, according to Gross ("Gallia Judaica," p. 474), from a Spanish locality, Cabreta or Cabrita. Cabret translated from the Latin into Hebrew and abridged the work of Arnaldus of Villanova, "De Judiciis Astronomia," or "Capitula Astrologia," on the application of astrology to medicine. The translation made at Barcelona in 1381 is still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2042).

**CABUL:** A city on the boundary-line of Asher (Josh. xix. 27), identical with the modern Kabul (Buhl, "Geographie," p. 221). Josephus ("Vita," § 43) refers to it as "the village of Chabolo situated in the confines of Ptolemais." The name was applied also to an entire district which included twenty cities given by Solomon to Hiram, king of Tyre (I Kings ix. 13). Josephus ("Ant." viii. 5, § 3) interprets "Cabul" as meaning, in Phœnician, "what does not please"; but doubt has been cast on this interpretation of the term.

G. B. L.

**CACERES (קאָסערין):** also spelled *Caceras, Carceres, Carcerets, Casares, Casseras, Cazares*: A family, members of which have lived in Portugal, Holland, England, Mexico, Surinam, the West Indies, and the United States. They came, probably, from the city of Caceres in Spain.

The first reference to any person bearing the name is in a list of heretics, posted according to custom in the cathedral in the city of Mexico, where the names of Antonio Dias (or Diaz) de Caceres and Catalina de Leon, his wife, occur as "Judaizers"; the latter doing penance at an auto da fé, celebrated on Feb. 24, 1590, in that city. Their daughter Doña Leonor de Caceres was denounced as a "Judaizer" by her aunt, Doña Mariana Nuñez de Carabajal (see CARABAJAL), before the tribunal of Mexico. Her testimony (see Cyrus Adler, in "Publications Am. Jew. Hist. Soc." iv. 45, 47, 63) gives these data: Antonio Dias de Caceres and Jorge de Almeida (Adler, *ib.* pp. 29-79) married on the same day, in the city of Parmco, Mexico, Catalina and Leonor de Carabajal, sisters of the deponent, and, after a visit to Spain, moved to the district of San Paolo in the city of Mexico.

Antonio appears to have lived in another district, in a house which served as a gathering-place for fasting and prayer; and although they all attended mass, and otherwise observed the rites and ceremonies of the Roman Church, they practised their Jewish rites in private. This was soon discovered; the deponent, her mother, and brothers were arrested by order of the Inquisition; and Antonio Dias de Caceres, fearing a similar fate, went to China.

There he lived three years, came back to Mexico, feigned at first estrangement from his wife, because she was a "Judaizing" penitent, and finally, seeming to yield to the entreaties of friends who sought to bring them together, became nominally reconciled to her and set about in earnest to obey the behests of the Mosaic law. Antonio observed caution, dreading the arm of the Holy Office, but persisted, together with his family, in keeping the Sabbath at home. Prayers were recited at home out of a Hebrew book, said to have been written in verse, and the Psalms, without the required *Gloria Patri*, were chanted by all. His daughter, the above-mentioned Leonor de Caceres, figured as a penitent at an auto da fé held in the city of Mexico, March 25, 1601. A facsimile of a document, dated Sept. 6, 1608, containing an account of her trial, is given in vol. iv. of "Publications Am. Jew. Hist. Soc."

**Isabel Caceres**: A victim of the Inquisition in Toledo in 1625; wife of Luis Baez.

**Jacob (Yahacob) Rodriguez Caceres**: Martyr, who died at the stake in 1665, at Cordova. Daniel Levi de Barrios celebrates him in verse in the prologue to his allegorical comedy "Contra la Verdad no ay Fuerça. Panegirico a los tres buena venturados mártires Abraham Athias, Yahacob Rodriguez Caceres, y Raquel Nuñez Fernandez, que fueron quemados vivos en Cordova por santificar la unidad divina, en 16. de Tammuz, año de 5425 (1665)," Amsterdam (no date).

**Moseh de Caceres**: One of the founders of the Portuguese community in Amsterdam, who flourished about 1600.

J.

G. A. K.

**Francisco de Caceres**: 1. Writer of the seventeenth century; son of Daniel de Caceres of Amsterdam. He translated from Italian into Spanish the "Vision Deleytable y Summarico de Todas las Ciencias," a work written by Alfonso de la Torre and translated into Italian by Domenico Dolphino. The translation of Caceres, published at Amsterdam in 1663, and dedicated to D. Emanuel, prince of Portugal, consists of two parts, the first dealing with the various sciences, the second with moral philosophy. Of the first part, ch. i. treats of the "evil of things, and the confusion in the world"; the following six chapters treat of logic, rhetoric, arithmetic, geometry, music, and astrology, and the remaining chapters treat of metaphysics, pneumatics, and physics. Part ii. discusses ethics and politics.

Wolf ("Bibl. Hebr." iii. Nos. 903, 1854h) makes this Francisco de Caceres the author also of "Dialogos Satiricos," published at Amsterdam in 1616. Kayslering ("Bibl. Esp.-Port.-Jud." p. 32), however, ascribes that work to (2) Francisco or Jacob de Caceres who was probably a son of Moseh de Caceres, one of the founders of the Jewish-Portuguese community of Amsterdam. The latter Francisco or Jacob also translated into Spanish "Los Siete Dias de la Semana Sobre la Creacion del Mundo," a work by Bastasi, dedicated to Jacob Tirado. As the "Dialogos Satiricos" was published as early as 1616, it is not probable that the author was the former Francisco de Caceres.

Francisco (or Jacob) had, so far as it can be determined, five sons:

(1) **Daniel de Caceres**: Writer of the seventeenth century; son of Jacob de Caceres. He held the degree of master of arts.

Caceres was a friend of Manasseh ben Israel, upon whose works, "The Conciliator" and "On Human Frailty" (written about 1642), he wrote approbations. He also wrote a eulogy on Saul Levi Morteira's *נבטת יסאול* (Amsterdam, 1645).

D.

A. R.

(2) **David de Caceres**, who, according to Kayslering, died Oct. 18, 1624, at Amsterdam (Kayslering, *l.c.* p. 32).

(3) **Henrique (or Henry) de Caceres**, who lived in England c. 1650, probably the same who, with Benjamin de Caceres, petitioned the king (April 8, 1661) to permit them to live and trade in Barbados and Surinam ("Publications Am. Jew. Hist. Soc." v. 47, 62; JEWISH ENCYCLOPEDIA, ii. 523b).

J.

G. A. K.

(4) **Samuel de Caceres**: Dutch poet and preacher; and brother-in-law of Benedict Spinoza; died Nov., 1660, at Amsterdam. He was a pupil of Rabbi Saul Levi Morteira of Amsterdam. The title "Poeta, Predicador, y Jaxam, de la Ley Sancta Eseritor" (Poet, Preacher, and Cauter, Writer of the Holy Law), given to Caceres by his contemporaries, shows the eminent position which he occupied in the Jewish community of Amsterdam. "De la Ley Sancta Eseritor" refers to the Spanish translation of the Bible, which he edited, revised, and corrected, and which was published in 1661, soon after his death.

D.

A. R.

(5) **Simon de Caceres**: Military strategist, merchant, and communal leader; flourished in the middle of the seventeenth century. He was prominent in mercantile affairs in Hamburg, London, South America, and the West Indies; and his transactions extended to many parts of the world.

Caceres is described as a chauvinist Jew, boastful of his Jewish descent (see Lucien Wolf, "Transactions Jew. Hist. Soc. Eng." i. 56, 73). He joined Antonio Fernandez CARVAJAL in the acquisition of the Bet Holim cemetery in London, and was one of the petitioners who signed the document presented to Cromwell by Manasseh ben Israel in March, 1656. Queen Christina of Sweden is known to have interceded with Cromwell on his behalf for certain commercial privileges in Barbados (Rawlinson MS., A. 26, fol. 388); and at a later date the king of Denmark gave Caceres' brother a letter of recommendation to Charles II., which was instrumental in procuring for the Jews in the West Indies an extension of commercial facilities ("Calendar of State Papers," Colonial series, 1661-68, p. 49). Simon was one of Cromwell's intelligencers; and there are at least two documents among the Thurloe papers which show that his experience was utilized by the lord protector. The one is called "A Note of What Things Are Wanting in Jamaica" ("Thurloe Papers," ed. Th. Birch, pp. 61, 62, London, 1742). It is a memorandum containing minute advice with regard to fortifications and implements. From a passage in "Crom-

well's Letter and Speeches," ed. Carlyle (iii. 131), it would seem that his recommendations were followed, for the needed supplies were forwarded.

Together with this memorandum Caceres submitted to the protector a remarkable scheme for the conquest of Chile (printed in Birch's ed. of the "Thurloe Papers," *l.c.* pp. 62, 63; see also bibliography below), wherein he proposed to enlist "men of his own nation" (meaning Jews), and offered to lead the expedition in person. In his letter of instructions Cromwell refers to the desirability of hindering the Spanish trade with Peru and Cartagena, and of striving with the Spaniard for the mastery of all those seas (see CHILE). At a later date Caceres presented another plan to Cromwell, which provided for the protection of the Barbados trade and for improving the administration of the navigation act (Rawlinson MS., A. 60, fol. 131). This document seems to have been unauthorized, and turns out to be a personal application for an office he desired to have created for himself.

**BIBLIOGRAPHY:** Lucien Wolf, in several papers published in the London *Jewish Chronicle*, especially his *Cromwell's Jewish Intelligencers* and *American Elements in the Resettlement* (each published separately); *idem*, in the *Transactions of the Jew. Hist. Soc. Eng.*, i. ii, iii.; G. A. Kohut, *Simon de Caceres and His Plan for the Conquest of Chili*, New York, 1899 (reprinted from the *American Hebrew*, June 16, 1899); besides the sources cited in the text.

Daniel (see above) had two (?) sons: (1) **Francisco de Caceres**. (2) **Samuel ben Daniel de Caceres**, whose name, if he is not Daniel's son, remains a "crux interpretum." It is more than probable that the two Samuels have been confounded by bibliographers. Samuel, the poet and preacher, had a son named **David de Caceres**, who was printer in Amsterdam in 1661. Another person bearing that name was rabbi at Salonia, and afterward (c. 1650) at Hebron, Palestine. The following is a tentative genealogical sketch of the Amsterdam branch of the Caceres family:

A **Bernard de Caceres** is mentioned in the "Calendar of State Papers" (see Jacobs, in the bibliography below,) 1661-68, as residing in the West Indies. One of the chief members of the Jewish congregation in Surinam, whose name is affixed to a special charter of privileges, dated Oct. 1, 1669, was **Henrique de Caceres** ("Publications Am. Jew. Hist. Soc." iv. 3), and a **Samuel de Caceres** is spoken of in Curaçao, W. I., in the year 1692 (Corcos, "Jews of Curaçao," p. 15). In 1891, a Mr. Benjamin de Caceres officiated at Curaçao in the absence of a rabbi (*ib.* p. 47).

Persons bearing the name are living to-day (1902) in New York and Philadelphia. Miss Ida Caseres of Philadelphia claims descent from the Caceres who settled in Jamaica in the seventeenth century.

**BIBLIOGRAPHY:** Wolf, *Bibl. Hebr.* quoted by Steinschneider, in *Cat. Bodl.* Nos. 525, 792, 9165; Fürst, *Bibl. Jud.* i. 150

(where, among other errors, the convert John Xeres [*Cat. Bodl.* p. 2737] is converted into "Jacob de Caceres"); *Catalogue Michael*, MS. No. 351, 2, p. 39; Jacobs and Wolf, *Bibl. Anglo-Jud.* pp. 39, 40, 45, London, 1888; Kayserling, *Bibl. Esp.-Port.-Jud.* p. 32, Strasburg, 1890.

G. A. K.

**CADENET:** Small village in the department of Vaucluse, France. Like all places situated along the river Durance, Cadenet had a Jewish community in the Middle Ages. A document of the year 1283 states that this community, together with those of Aix, St. Maximin, Lambesc, Pertuis, Istres, Tretz, and Lanson, was permitted to have a synagogue and a cemetery on paying an annual tax of two pounds of pepper to the archbishop of Aix (Charter of 1283; compare Depping, "Les Juifs dans le Moyen Age," p. 197).

In 1385 a remarkable lawsuit arose in Arles, relating to an alleged marriage (described in all its details by Gross, in "Monatsschrift," 1880, pp. 404 *et seq.*). The plaintiff was Maestro Duran of Cadenet. In order to be revenged on Meirona, daughter of En Salves Cassin of Arles, who had refused him, Duran declared that he had married her in the presence of two witnesses, Vidal Abraham of Bourrin and Bonfilh or Bonfils Crégud. These witnesses were later convicted of perjury.

The case was taken in turn before the rabbinical colleges of Arles, Nimes, Montpellier, and Perpignan, and in the last instance, upon the demand of Don Salemas Nasi of Valence, was submitted to R. Isaac ben Sheshet, who pronounced severe judgment against Duran and his fellow-conspirators, and bitterly reproached the community of Arles that it had not done its utmost to prevent such a scandal from becoming public. A Jew, Mosson of Cadenet by name, lived at Carpentras in 1404 ("Revue Etudes Juives," xii. 196); and two others, Salvat of Cadenet and Vidalon of Cadenet, were sheriffs of that community in 1460 (*ib.* p. 176).

S. K.

**CÆCILIUS OF CALACTE:** Rhetorician, critic, and historian; flourished in the first century B.C. at Calacte, a town on the northern coast of Sicily. He was the first Jew noted for literary activity at Rome. Little is known of his life. He was born a slave, and was named "Archagathus." His parents were either of Sicilian or Syrian origin. As a freedman he bore the name "Cæcilius," perhaps after one of the Metelli, the ancient patrons of Sicily. He went to Rome and devoted himself to the study of rhetoric, Apollodorus probably being his first master, and Dionysius of Halicarnassus, who lived at Rome from 30 to 7 B.C., his close friend. Suidas states that Cæcilius was a Jew, an assertion which is now generally accepted, though some writers think that he may have been only a convert to Judaism.

The fragments of Cæcilius' writings which are still extant attest above all his versatility. Together with his friend Dionysius, he was the

**The Attic** representative in his time of the Attic **School.** style of oratory in contradistinction to the verbose Asiatic style. While

the earlier devotees of the Attic school contented themselves with the study and the classification of

literary forms, Cæcilius and Dionysius extended their labors to the fields of philology and esthetic criticism; and the hatred felt by the former for the Asiatic school resulted in his two works directed against it: *Τὴν Διαφέρει ὁ Ἀττικὸς Ἠθὸς τοῦ Ἀσιανοῦ* ("On the Differences between the Attic and the Asiatic Styles"), and *Κατὰ Φρυγῶν* ("Against the Phrygians"; that is, the Asiatic Barbarians). In his earliest works on rhetoric (*Τὴν Ἐπιτομὴν* and *Περὶ Σχημάτων*), Cæcilius showed himself a disciple of the older Attic teachers, who confined their attention to matters of form; but soon afterward he seems to have come under the influence of Dionysius, to whom may be attributed his interest in philologic and esthetic criticism.

In the latter field, the most significant work of Cæcilius is *Περὶ Χαρακτήρος τῶν Δέκα Ῥητόρων* ("The Characteristics of the Ten Orators"). Though Dionysius also wrote on several of the chief orators of Greece, it is either in Cæcilius or his contemporary Didymus that the first account of the canon of the ten Attic orators is found. In the above-mentioned work Cæcilius endeavors, by means of information gathered from traditional documents and all other available sources, to present truthful portraits of the orators, in order to determine the time and to illumine the circumstances in which each oration was delivered. These researches possessed unusual critical value in that they not only offered classic examples of the adaptation of style to substance, but helped to unmask a large number of orations circulating under false names. They remained the permanent source of information on the diverse qualities of the classic orators, even the erroneous hypotheses of the author being accepted by later writers as authentic facts. To promote the study of the classics, Cæcilius compiled a lexicon that was much used by later scholars. The fine rhetorical feeling and critical acumen which enabled him to expose literary pretenders were again exhibited in a work devoted to an examination of the genuine and the spurious orations of Demosthenes. However, he used his discriminative gifts also in comparative studies, this being a unique literary phenomenon in that time. He produced three essays of this character: a comparison of Demosthenes and

Æschines, of Demosthenes and Cicero, and of Lysias and Plato. As an evidence of his intellectual curiosity, the study of Cicero is particularly noteworthy, in view of the fact that Cæcilius and Dionysius were the only students of Latin literature at a time when it was the literary fashion to dismiss it with contempt. In all his writings on esthetic subjects Cæcilius appears as an uncompromising antagonist of the artificial style, always insisting that thought and the proper choice of words, with the least possible use of rhetorical ornamentation, indicate excellent oratory. These ideas are reiterated in his work on "The Sublime" (*Περὶ Ὑψιῶς*), known from a polemical work against it composed in the first century under the same title and falsely ascribed to Longinus. Cæcilius did not attempt to formulate a theory of the sublime, but simply gave illustrations of what was and what was not sublime. It is interesting to note that among the examples of the sub-

lime there is a quotation, somewhat inaccurate, from the first chapter of Genesis.

As the literary method of Cæcilius was critical and historical, he was naturally interested in history; and several historical works are ascribed to him: one dealing with the historical incidents mentioned in the "Orators," and with the extent to which the orators had clung to strictly authenticated facts; another on the Servile wars; and a third on "History" (*Περὶ Ἱστορίας*). The briefest summary of his works may well lead one to concur with those scholars who regard Cæcilius as the most scholarly and versatile representative of the Attic school, and one who, by his labors in hitherto unexplored regions, rendered considerable service to the cause of science.

G.

H. G. E.

**CÆSAR, CAIUS JULIUS:** Roman dictator, consul, and conqueror; born July 12, 100 B.C. (according to Mommsen, 102 B.C.); assassinated March 15, 44 B.C. Caesar's attitude toward the Jews is manifest from the many enactments issued in their favor by him and by the senate.

The first decree, dated probably July, 47 B.C., registered in both Greek and Latin on a table of brass and preserved in the public records, concerns Hyrcanus, the son of Alexander, high priest and ethnarch of the Jews. Julius Caesar, with the approbation of the senate, recognizes the services rendered by Hyrcanus to the empire, both in peace and in war. He mentions the aid given by Hyrcanus with his 1,500 soldiers in the Alexandrian war, and speaks of the personal valor of Hyrcanus. In recognition of these services he grants Hyrcanus and the Jews certain privileges (Josephus, "Ant." xiv. 10, § 2).

In another decree of probably the same date, Caesar determines "That the Jews shall possess Jerusalem, and may encompass that city with walls; and that Hyrcanus, the son of Alexander, the high priest and ethnarch of the Jews, retain it in the manner he himself pleases; and that the Jews be allowed to deduct out of their tribute, every second year the land is let [in the Sabbatical period], a corus of that tribute; and that the tribute they pay be not let to farm, nor that they pay always the same tribute" (*ib.* xiv. 10, § 5).

The next decree, dated before Dec. 47 B.C., ordains that all the country of the Jews pay a tribute to the city of Jerusalem except during the Sabbatical year, with permanent exemption for Joppa, which, as formerly, is to belong to them. It also prohibits the raising of

**His Decrees.** auxiliaries and the exacting of money for winter quarters within the bounds of Judea. This decree provides for an annual tribute to Hyrcanus and his sons, the Sabbatical year

excepted. It ordains that the original ordinances in regard to the high priests of the Jews shall remain in force, and that Hyrcanus and the Jews retain those places and countries which belonged to the kings of Syria and Phenicia. The following two decrees confirm the privileges granted to Hyrcanus and his children. As the ally of Rome he is to send and receive ambassadors (*ib.* § 6).

The following two decrees are of the same date: "That Hyrcanus and his children bear over the nation of the Jews, and have the profits of the places to them bequeathed; and that he, as the high priest and ethnarch of the Jews, defend those that are injured; and that ambassadors be sent to Hyrcanus, the son of Alexander, the high priest of the Jews, that may discourse with him about a league of friendship and mutual assistance; and that a table of brass containing the promises be openly proposed in the capitol, and at Sidon, and Tyre, and Ascalon, and in the temple, engraven in Roman and Greek letters; that this decree may also be communicated to the questors and pretors of the several cities, and to the friends of the Jews; and that the ambassadors may have presents made them, and that these decrees be sent everywhere" (*ib.* § 3).

"Caius Cæsar, imperator, dictator, consul, hath granted, That out of regard to the honor, and virtue, and kindness of the man, and for the advantage of the senate, and of the people of Rome, Hyrcanus, the son of Alexander, both he and his children, be high priests and priests of Jerusalem, and of the Jewish nation, by the same right, and according to the same laws, by which their progenitors have held the priesthood" (*ib.* § 4).

The last decree of Cæsar, dated Feb., 44 B.C., again mentions the services rendered by Hyrcanus and the Jews, and calls for suitable recognition on the part of the Senate and the people of Rome (*ib.* § 7).

Following is a summary of the decrees of the consuls during the rule of Julius Cæsar, as recorded in Josephus:

Sept. 19, 49 B.C.: Report on the public proceedings at Ephesus concerning the exemption of the Jews of Asia Minor from military service on account of their religion, and the decree in this sense of the consul Lucius Lentulus ("Ant." xiv. 10, § 19).

Sept. 19, 49 B.C.: Short report on the preliminary proceedings on the same question on the part of the military authorities (*ib.* § 18).

Sept. 19, 49 B.C.: Short declaration of the consul Lucius Lentulus concerning the exemption of the Jews from military service (*ib.* § 16).

Sept. 20, 49 B.C.: Communication of Titus Appius Balbus to the magistrate of Ephesus, to the effect that on his intercession for them, the consul Lucius Lentulus agreed to the exemption, and that the high Roman officials Lucius Antonius and Phanias sanctioned the decree (*ib.* § 13).

Probably 49 B.C.: Message of Lucius Antonius to the magistrates of Sardes, to the effect that the Jews of that city having an assembly of their own, according to the laws of their forefathers, he gives order that their privileges be preserved (*ib.* § 17).

May, 48 B.C.: Proclamation of the magistrates of the island of Delos, that, according to the decree of the consul Lentulus, the Jews shall be exempted from entering the army (*ib.* § 14).

Probably at the beginning of 46 B.C.: Reprimand of a proconsul to the people of Parium on account of their hostile attitude toward their Jewish fellow-citizens concerning their public assemblies and their contributions to the Temple (*ib.* § 8).

46-45 B.C.: Admonitory letter of the proconsul Publius Servilius to the magistrate of Miletus that the Jews should not be disturbed in the execution of their religious customs (*ib.* § 21).

46-45 B.C.: Reply of the Laodiceans to the proconsul of Asia, that, in obedience to injunctions received from him, they will not disturb the religious customs and assemblies of the Jews (*ib.* § 20).

46-45 B.C.: Decree of the Sardians, upon the representation of the pretors, granting the Jews religious liberty, setting apart for them a place for public worship, and even directing those that have charge of the provisions of the city to "take care that such sorts of food as they esteem fit for their eating may be imported into the city" (*ib.* § 24).

46-45 B.C.: Decree of the people of Halicarnassus to the effect that, in accordance with privileges granted by the Romans, they shall not disturb the religious customs and assemblies of Jews (*ib.* § 23).

Feb., 44 B.C.: Testimony of the twelve questors, that the Senate had passed a decree in favor of the Jews, but that this decree had not hitherto been brought into the treasury, and that now the Senate and the consuls Dolabella and Marcus order that these decrees shall be "put into the public tables" and be "put upon the double tables" (*ib.* § 10).

(For a critical survey of these edicts see Grätz, "Gesch. der Juden," 3d ed., iii., note 9, pp. 660-668; Schürer, "Gesch." 3d ed., iii. 56 *et seq.*, 67, note 30).

These decrees show clearly that Julius Cæsar in his broad and statesmanlike manner fully recognized the rights and claims of the Jews as an important element of the Roman empire.

"This Judaism," says Mommsen ("Römische Gesch." iii. 549-555), "although not the most pleasing feature in the nowhere pleasing picture of the mixture of nations which then prevailed, was nevertheless a historical element developing itself in the natural course of things, which the statesman could neither ignore nor combat, and which Cæsar on the contrary, just like his predecessor, Alexander, with correct discernment of the circumstances, fostered as far as possible. While Alexander, by

**Usefulness in Roman Empire.** laying the foundation of Alexandrian Judaism, did not much less to found the Jewish nation than its own King David by planning the Temple of Jerusalem,

Cæsar also advanced the interests of the Jews in Alexandria and in Rome by special favors and privileges, and protected in particular their peculiar worship against the Roman as well as against the Greek local priests." "Cæsar's extraordinary keenness as a statesman," says F. Rosenthal (in "Monatsschrift," 1879, p. 321), "recognized in the Jews most useful collaborators in his extensive plans for the creation of a great Roman body politic. Distributed as they were over the greatest part of the Roman empire, yet acting in harmony with one another, they were as much on this account as by reason of their commercial instincts the intermediators between Orient and Occident."

"The Jews were destined to play no insignificant part in the new state of Cæsar," says Mommsen (*ib.*). Even later, when by a decree of Cæsar all religious or political associations (*collegia*) were forbidden, except those which had existed from very remote times, the same decree permitted the Jews, "our friends and confederates . . . to gather themselves together according to the customs and laws of their forefathers, to bring in their contributions, and to make their common suppers" (Josephus, "Ant." xiv. 10, § 8; Suetonius, "Cæsar," 42). By these and other edicts of Cæsar the Jewish religion was recognized in the Roman empire as "religio licita" (Tertullian, "Apologia," xxi.; Schürer, "Gesch." 3d ed., iii. 69).

"When Cæsar attained the power," says Huide-

koper ("Judaism in Rome," p. 6). "we find a procession annually of Roman dignitaries, on the first day of the Passover, for the purpose of throwing away idol-images; and at his funeral Jews were conspicuous." Mommsen quotes a contemporary orator

**Judaism Respected in Rome.** (Cicero) as saying that Roman officials in the provinces had to be extremely careful not to offend a Jew, otherwise they were liable to be hissed on their return to Rome by the plebeians.

During the Pompeian wars Cæsar, without associates (Mommsen, *l.c.* iii. 8, 374), surrounded only by military aids and political agents, made use of the brilliant abilities of Aristobulus II., and, out of hatred to Pompey, gave the former his freedom and sent him with two legions into Syria to create a diversion in Cæsar's favor (Josephus, "Ant." xiv. 7, § 4). Macrobius hints ("Saturnaliorum Conviviorum," i.) that during the Pompeian wars the Jewish contingent in Cæsar's army was by no means an unimportant one; that at his court and in his councils the Jews were influential in political and financial matters. The great historical significance of Cæsar's relations with the Jews is brought out strikingly by their military services under him during the Egyptian campaign.

For all his daring and energy, and notwithstanding the importance of his entering Egypt, Cæsar would not have landed had he not been certain of support from the Jews of the country. His resources were scanty—scarcely two legions of infantry and a small detachment of cavalry—in all about 5,000 men. With such a handful of soldiers even Cæsar could not expect a successful conflict with the powerful Egyptian army. There is historical evidence that organized local bands of Jews came to his assistance. The Jews of Egypt, numbering at that time, according to Manfrin, about a million, were evidently on his side before he came to Egypt; and, in order to render him efficient service, they suspended their party quarrels. With Mithridates there entered Egypt under the leadership of Antipater a detachment of troops numbering 1,500, or, according to Josephus (*l.c.* xiv. 8, § 1), 3,000, composed exclusively of Jews.

According to the testimony of Josephus, the taking of Pelusium, which, from the Syrian side, was the key to Egypt, was largely due to the

**Valor of Antipater.** personal bravery and skill of Antipater, who destroyed a portion of the city wall. With his Jewish followers

he was the first to enter the city, thus clearing the way for Mithridates' army. As a reward for his services Cæsar gave to Antipater the privilege of a citizen of Rome, and made him procurator of Judea (Josephus, *ib.* 8, § 3).

After the Alexandrian campaign Cæsar granted many favors and privileges to Judea and to the Jews in general. He gave the former the right of "status clientis"—the broadest autonomy that countries subject to Rome could enjoy. Besides this right Cæsar allowed Judea to utilize the city of Joppa and its harbor, since the latter was indispensable to Jerusalem for intercourse with its colonies.

Cicero's defense of Flaccus, who confiscated the gold collected for the Temple in Jerusalem, shows

that the Oligarchic party stood in fear of Cæsar's connection with the Jewish colonies. They suspected that the money collected for the Temple was, in part at least, used for the carrying out of Cæsar's political plans. In fact, the whole defense ("Pro Flacco") was an indirect accusation of Cæsar. By the prohibition of all but Jewish associations, he apparently expressed his belief in the favorable influence of the political principle of Judaism and in its superiority over the other Eastern religions that had been brought to Rome.

But while the mass of the Roman population favored Cæsar, that was not sufficient for his election. Large sums of money were re-

**Antipathy to Jews Roused.** quired for this purpose, and Cæsar had hardly any means of his own. When he was leaving for Spain his

debts amounted to \$3,400,000 (according to some historical documents, \$4,800,000); and it appears that a few of his creditors importuned him. Possibly the Jewish colonies supplied funds. These colonies extended all over Egypt, in Asia from the shores of the Pontus Euxinus to the Euphrates, and in Europe as far as Prague and into Gallia.

On the other hand, the Cæsarean period produced an ill-will toward the Jews that gradually grew to hatred and has survived to the present day.

Reference can be here made to the work of Manfrin concerning the important rôle Cæsar assigned to monotheistic Judaism in his new empire, but his views are open to question.

Renan ascribes to Cæsar very broad and liberal views. "He truly conceived," he says, "liberty of conscience in a sense of absolute neutrality in the state, as enlightened nations now do. He desired the freedom of all provincial worship, and, if he had lived, he doubtless would have prevented the reaction toward strictness which, from the days of Tiberius, led the central government to insist on too much preponderance for the Roman worship. The Jews in Alexandria had their privileges confirmed. The free exercise of Jewish worship was stipulated in the principal towns of Asia Minor. The Jews throughout the world regretted the death of the dictator. Among the numerous provincials who mourned the Ides of March, it was remarked that Jews for several months came to make final lamentation over his burial-place" ("Histoire du Peuple d'Israel," v. 196, 197).

K. II. R.

**CÆSAREA.**—1. Cæsarea by the Sea: Ancient city of Palestine; called in early times "Strato's Tower" (Στρατόνως πύργος, Josephus, "Ant." xiii. 11, § 2; xiv. 4, § 4; xv. 8, § 5; xix. 8, § 2; *idem*, "B. J." i. 3, § 4; i. 21, § 5; Strabo, xvi. 758; Pliny,

"Historia Naturalis," v. 14). In rabbinic sources (Meg. Ta'an. iii.; Meg. 6a; Sifre, Deut. 51; Yer. Sheb. 36c) the name is frequently corrupted (it is only once written correctly, Tosef., Sheb. iv. 11) as קֶסְרִי; in a later source (piyyuṭ for the second Sabbath of Hanukkah) the name has even been corrupted into מְנַרְלֵ נֶשֶׂיָה (B. Beer, in "Monatsschrift," 1860, ix. 113). Herod the Great transformed the insignificant place into an important city, naming it Cæsarea (Καίσαρεια) in honor of Emperor Augustus. Still the old name survived; Strabo and Pliny continue to call the city "Strato's Tower," while Ptolemy and Epiphanius use the singular expression "Cæsarea of Strato." To distinguish it from other cities of the same name, it was also called "Cæsarea by the Sea" (παράλιος Καίσαρεια, "Ant." xiii. 11, § 2; *idem*, "B. J." iii. 9, § 1; ἐπὶ θαλάσσεια = "ad mare," *ib.* vii. 1, § 2; vii. 2, § 1); on coins it is called ΚΑΙΣΑΡΙΑ

Cæsarea, a city that they hated, should be uprooted (עקרון), with no intent of identifying it with Ekron (Schwarz, "Tebu'ot ha-Arez," p. 66b). It is possible, however, that there is here also an allusion to the old name Sharshon (שֶׁרְשׁוֹן); while the assumption that there were two Ekrons, one of which was identical with Cæsarea (Friedmann, in Lunz, "Jerusalem," v. 109), is wholly unfounded. The Rabbis speak of it disguisedly as "Magdiel" (Gen. R. lxxxiii.).

Mannert determines the location of Cæsarea as 66° 15' E. long. and 32° 30' N. lat. Josephus speaks of it as lying in Phenicia, between Joppa and Dora ("Ant." xv. 9, § 6). It was 600 stadia

**Location.** (75 miles) distant from Jerusalem ("Ant." xiii. 11, § 2; "B. J." i. 3, § 5); 36 miles (a day's journey, Acts xxi. 8) from Ptolemais (Abulfeda); and 30 miles from Joppa

RUINS OF CÆSAREA.

(From a photograph by Bonfils.)

Ἡ ΠΡΟΣ ΣΕΒΑΣΤΩ ΑΙΜΕΝΙ. Later writers call the city "Cæsarea of Palestine" (Cæsarea Palestinæ = Καίσαρεια ἐπὶ Παλαιστίνῃ, Eusebins, "Hist. Eccl." v. 22, or Καίσαρεια τῆς Παλαιστίνης, *ib.* vii. 12). In the Talmud, the Midrash, and the Targum it is very frequently called "Kesri" (קֶסְרִי); the expression "Kesri, the daughter of Edom" (Meg. 6a), meaning that Cæsarea is the outpost of the Roman empire. In the same Talmudic passage is a sentence of R. Abbahu, who lived in the third century at Cæsarea, according to which "Ekron," that "shall be rooted up" (Zeph. ii. 4), means "Cæsarea"; but this probably expresses merely the wish of the Jews that

(Edrisi). The soil was sandy ("it is situated in the midst of sand," says the Talmud, Meg. 6a; compare "Ant." xv. 9, § 5), but so fertile that the region was called "the land of life" (Meg. 6a). The following are mentioned as products of the soil: "etrogim"—that is, pomegranates of Cæsarea (Tosef., Maksh. iii. 10); Cæsarean grain (Tos., Dem. iv. 23); a woolly moss growing on stones (Yer. Kil. 32a; Yer. Shab. 4c). As merchandise are mentioned the beds of Cæsarea (Yer. Ber. 6a; Yer. Ned. 40c; Yer. M. K. 83a). The city lay close by the sea, and had a good harbor, which was constructed by Herod, and is often mentioned ("Ant." xv. 9, § 6, *λαιῶν*; Yer. Giṭ.

43b). This harbor was as large as the Piræus, and had a deep channel and "a double station for the ships" ("Ant." *l.c.*). The rocky shore, which is frequently mentioned (Gen. R. x. 7; Lev. R. xxii. 4), was laid out as a promenade (Ecl. R. v. 8). Large subterranean passages and canals led from the city to the harbor ("Ant." *l.c.*); and perhaps these are the vaults mentioned in the Talmud (Yer. Naz. 56a). The city had imposing streets (*ib.*) and theaters ("Ant." *l.c.*), and, on its eastern side, a magnificent gateway (τετράπυλον, Tosef., Oh. xviii. 13), through which the road led to the vineyards (*ib.*). The Rabbis considered Cæsarea as the frontier of Palestine toward the west, and in questions dealing with Jewish law its harbor was held not to belong to the land of Israel. Tombs of heathens were supposed to lie east and west of the city, and hence these regions were declared unclean, although opinions on the question were divided (Yer. Giṭ. 43b; Yer. Dem.

fact that from the time of Vespasian there was, in addition to the Greeks, a large colony of Romans at Cæsarea. The restoration of a temple of Hadrian ('Αδριανείου) is mentioned even in Christian times. English explorers have recently discovered the ruins of a temple at Cæsarea.

The Jews of Cæsarea were completely Hellenized, and in the third century the Shema' prayer was said in Greek (Yer. Soṭah 21b). In Talmudic times there was here a large Jewish population with many synagogues. Besides the "brothers" (Yoma 53b; Ta'an. 24b; Pesik. 171b), the "rabbis" of Cæsarea are very often mentioned (Yer. Dem.

**Character of Jewish Cæsarea.** 'Ulla, Adda, Idi, Talhifa, Abba, Hezekiah, Jacob, Ḥanina, and Abbahu,

either came from Cæsarea or lived there (see Bacher, "Die Gelehrten von Cæsarea," in "Monatsschrift," xiv. 298 *et seq.*). ABBAHU appeared as the antagonist of Christianity, which at an early date had found adherents in Cæsarea. He directed a college and officiated as judge (Bacher, "Ag. Pal. Amor." ii. 92). R. Jose (Isi) of Cæsarea speaks of the Christianized Jews of that city (Ecl. R. vii. 26). The Christian library of Cæsarea is of great importance for Biblical science. But the Christians themselves at an early date speak of Cæsarea as being a Jewish city (Clement, "Recognitions," ii. 37, iii. 65, v. 4).

A number of Samaritans also lived at Cæsarea. The Samaritan prophet Simon Magnus worked mischief there. The Cuthæans of Cæsarea disputed with R. Abbahu (Yer. 'Ab. Zarah 44d). When, on the death of the latter, the columns of Cæsarea trickled water, as if they were mourning for him (Eusebius, "Hist. Eccl." viii. 9), the Cuthæans declared, to spite the Jews, that it was because the columns were out of repair (Yer. 'Ab. Zarah 42c; M. K. 25b). A Samaritan chronicle (Neubauer, "Chronique Samaritaine," p. 18, Paris, 1873) erroneously identifies Cæsarea with Dora. In 484 and 548 the Samaritans instigated bitter riots against the Christians.

Only the old name, "Strato's Tower," gives any clue to the earliest history of Cæsarea. Renan ("Mission de la Phénicie," p. 790) and, after him, Hildesheimer connect Strato with the Phœnician name Astarte. But D. Oppenheim and Neubauer have demonstrated the probability that "Strato"

was the name of a person, indeed, that of the founder of the city; and it is a fact that Strato is named as such in Justinian's "Novellæ" (103 pref.). Stark ("Gaza," p. 451) thinks that the Ptolemies founded Strato's Tower; but Schürer is of opinion that it was founded by the Sidonians in Persian times. In the fourth century b.c. there were two kings of Sidon by the name of Strato, one of whom probably founded the fort Strato's Tower. The first geographical writer who mentions the "Tower" is Artemidorus (about 100 b.c.; Stephen of Byzantium, *s.v.* Δώρος). About the same time, Aristobulus I. caused his brother Antigonus to be murdered there ("Ant." xiii. 11, § 2). The "tyrant" Zeilus, who had usurped the government of Strato's Tower and of Dora, and had

Copper Coin of Agrippa II., Struck at Cæsarea.

*Obverse:* ΝΕΡΩΝΙΑΔ . . . ΚΑΙΣΑΡΙΑ ΑΡΡΗΙΑ with turreted female head. *Reverse:* ΒΑ[Ι ΑΠ ΕΤ]ΟΥΣ ΑΙΤΟΥ ΚΑΙ Ξ, two cornucopie, in the middle a caduceus.

(After Madden, "History of Jewish Coinage.")

21a; compare Büchler, in "Jew. Quart. Rev." xiii. 654 *et seq.* and Krauss, *ib.* xiv. 745).

The original population of Cæsarea was probably pagan—at first Phœnician, and then Greek. From the time of the Maccabees, Jews are mentioned as residing there; and as their number steadily increased they tried to gain possession of the city, frequent quarrels resulting between pagans and Jews. Herod's

**Pop-ulation.**

temples and theaters testify to his endeavors to preserve the pagan character of the city. He built here a temple of Augustus, the statue by which it was surmounted representing Zeus Olympus, while another, Hera, represented Rome ("Ant." xv. 9, § 6; "B. J." i. 21, §§ 5, 8).

The first dramatic festivals in honor of Augustus were held 12 b.c. ("Ant." xvi. 5, § 1; "B. J." i. 21, § 8). The emperor's temple (καιάρειον), or "Sebastos temple" (Σεβαστείον), as it is called by Philo ("Legatio ad Cajum," xxxviii.), lay on a hill opposite the harbor, which was also dedicated to Augustus (ὁ λιμὴν Σεβαστός, "Ant." xvii. 5, § 1; "B. J." i. 31, § 3); the full name of the city was therefore "Cæsarea Sebaste" ("Ant." xvi. 5, § 1; Ammianus Marcellinus, xiv. 8). On the coins of Cæsarea, which are mentioned also in the Talmud ('Ab. Zarah 6b), dating mostly from the second and third centuries, are found the names of many gods: Zeus, Poseidon, Apollo, Hercules, Dionysus, Athena, Nike, and especially the Phœnician goddess ASTARTE. The worship of the Egyptian ΣΕΡΑΠΙΣ is due to the

made common cause with the Cyprian king Ptolemy Lathyrus, drove Alexander Jannæus from the country, which he apportioned among the Jews ("Ant." xiii. 12, §§ 2-4).

Strato's Tower now belonged to the Jewish king ("Ant." xiii. 15, § 4); and it is probably this conquest which is mentioned in rabbinic sources (Meg. Ta'an. iii.). Pompey liberated the city ("Ant." xiv. 4, § 4; "B. J." i. 7, § 7), and Augustus presented it to Herod ("Ant." xv. 7, § 3; "B. J." i. 20, § 3), who transformed it into a metropolis, changed its name to "Cæsarea," and called the harbor "Sebaste." Cæsarea remained a fortress ("Ant." xv. 8, § 5); but Herod cared more for beautifying the city, and built many magnificent edifices of white stone for the citizens. Within twelve years the city was rebuilt, the work having neither wearied the king nor exhausted his resources ("Ant." xv. 9, § 5; "B. J." i. 21, § 5; i. 31, § 3). Cæsarea now became a flourishing city, and Josephus calls it the largest in Judea ("B. J." iii. 9, § 1; Ammianus Marcellinus, *l.c.*). The Jews also recognized it as a rival to Jerusalem (Meg. 6a), and the Rabbis called it the "metropolis" of the kings (*ib.*), the term "kings" here signifying the Roman governors, who, after the death of Archelaus, administered Judea from this place. The governors Felix and Festus resided in Cæsarea (Acts xxiv. 27, xxv. 1). Agrippa I., who possessed the city for a short time, also had an administrator there (*σπαρτυγός*, "Ant." xix. 7, § 4), and died there. He also had coins struck in Cæsarea (Madden, "Jewish Coinage," pp. 107, 109). After his death the Cæsareans and Sebasteans vilified the memory of their benefactor, whom they hated for his Judaizing, and insulted his daughters, Mariamne and Drusilla. By the order of Emperor Claudius they were severely punished by the governor, Cuspius Fadus ("Ant." xix. 9, § 1). The city was also called "Judeæ Caput" (Tacitus, "Historia," ii. 78), as being the seat of the Roman governors. It had a Roman garrison ("Ant." *l.c.*), which is also mentioned in the Talmud (Yer. 'Ab. Zarah 39e, *תאזיח*). The large pagan population ("B. J." iii. 9, § 1) would not permit the Jews to share in the administration of the city. This resulted in sanguinary conflicts under the administration of Felix; and in the year 61 Nero declared the pagans to be the sole rulers ("Ant." xx. 8, § 9; "B. J." ii. 13, § 7; ii. 14, § 4), and at the same time he removed Felix from office. In 66 the Jews, because of an insult to their synagogue, began a battle with the Greeks in which much blood was shed, but they finally succumbed, and had to flee to the neighboring city of Nabotia ("B. J." ii. 14, §§ 4, 5). These disturbances were the preliminary episodes of the Jewish war, upon the outbreak of which the pagans of Cæsarea fell upon the Jews and massacred them all, to the number of 20,000, in one hour ("B. J." ii. 18, § 1; vii. 8, § 7). The synagogue, where the rioting began, is probably the same which is called in Talmudic sources the "riotous synagogue of Cæsarea" (Yer. Sanh. 18a; Yer. Naz. 56a; Num. R. xii. 3; Lam. R. i. 3). The city itself is also called the "riotous city" ('Ant. R. i. 5; Targ. Yer. Num. xxiv. 10). A Byzantine writer (Malalas, "Chronographia," ed. Bonn, x. 261) says that Vespasian turned this synagogue into an odeon; but the trans-

formation (if it did take place) must have been by a later emperor, since the rabbinic sources of the third century still speak of this synagogue.

After the war, Vespasian constituted Cæsarea a Roman province, but without the full "jus Italicum" (Pliny, "Historia Naturalis," v. 13, § 69; compare Justinian, "Digesta," l. 15, §§ 1, 8). It is also called "colonia" on coins. At the time of Alexander Severus the title "metropolis" came into use, as also in the rabbinic sources, and on coins. The subterranean prisons of Cæsarea ("Diaeta," Esther R., Introduction) were much dreaded by the Jews, being fraught with peril for them (*ib.*). The city was destroyed by an earthquake in 128 (Eusebius, "Chronicon").

In the reign of Justinian the Jews made common cause with the Samaritans of Cæsarea, and harassed their Christian fellow-citizens. They even killed the governor, Stephan, July, 556 (Malalas, "Chronographia," p. 488; Theophanes, "Chronicon," i. 356). Under Heraclius it was estimated that there were 20,000 Jews in Cæsarea; and it was said that a Jew gave the city into the hands of the victoriously advancing Arabs (Weil, "Gesch. der Chalifen," i. Appendix, p. 2), by whom, according to the "Chronique Samaritaine" (p. 23), the city was looted. Benjamin of Tudela found only twenty Jewish families in Cæsarea, as against 200 Samaritans. In 1265 Cæsarea was completely destroyed by the sultan, Baibars. The destruction of Cæsarea is pictured in "Pal. Explor. Fund. Quarterly Statement," 1884, p. 147. Nothing now remains of it but a pile of ruins, that still bears the name "Kaisariyya."

Quart. Rev.* xiv. 745-751.

—2. **Cæsarea Philippi:** Ancient city of Palestine. According to the investigations of Gesenius, Raumer, and Robinson, this was the original site of the place Baal-gad,—*i.e.* where Gad was worshiped as the god of fortune (Isa. lxx. 11)—or of Baalhermon (I Chron. vi. 23). In Israelitic times the place was called "Dan," and the image made by Micah was worshiped here. Here, too, Jeroboam I. set up the golden calf. Not far distant was the

place Tarnegola, which the Rabbis mention as being on the northern boundary (Tosef., Sheb. iv. 10; Yer. Situation. Sheb. 36c; Yer. Dem. 22d; Sifre, Deut. 51; Targ. Yer. ii. on Num. xxxiv. 15). Its name is probably connected with the idol Tarnegol ("fowl"), though other places of Palestine (Sepphoris and Plurugitha, for instance) were also called after birds. The place is also said to be identical with the Biblical Leshem (Josh. xix. 47) or Laish (Judges xviii. 29; Meg. 6a; Tan., Re'eh, 16). This, however, is very improbable. But Cæsarea Philippi is certainly identical with Paneas (*Πανίας, Πανιάς, Παναϊς*), frequently mentioned by Greek as well as rabbinical authors (Josephus, "Ant." xv. 10, § 3; Eusebius, "Hist. Ecl." vii. 17; Sozomen, v. 21; Pliny, "Historia Naturalis," v. 15; Cedrenus, p. 305); the rabbinical writers indeed

chiefly use the name "Paneas" (פניאס, also פמיאס; see the Talmudic dictionaries). But Παναίας is the name of the grotto sacred to Pan, on the neighboring mountain Panion (Philostorgius, vii 3; compare Targ. Yer. Num. xxxiv. 11); hence, the significance of the place as the seat of a cult is preserved in the name, from which it follows that Paneas was originally inhabited by Syrian or Greek pagans. Ptolemy (v. 15, § 21) includes it in Phenicia.

At the time of Herod the region of Παναίας belonged to a certain Zenodorus (Zenon), after whose death (20 B.C.) Augustus presented it to Herod ("Ant." xv. 10, § 1; "B. J." i. 20, § 4). The domain of Zenon, together with some other districts, was taxed 100 talents ("B. J." ii. 6, § 3). Herod erected a magnificent temple in honor of Augustus in the vicinity of the grotto of Pan ("Ant." xv. 10, § 3; "B. J." i. 21, § 3); and Herod's son, the tetrarch Philip, transformed the place into an important city, calling it Καισάρεια, also in honor of the emperor ("Ant." xviii. 2, § 1; "B. J." ii. 9, § 1). But coins of the city are extant, dating from an independent and earlier era (about 3 B.C.). The Galilean Cæsarea was called Καισάρεια ἡ Φιλιππου (Matt. xvi. 13; Mark viii. 27), to distinguish it from the Judean Cæsarea, while the rabbinic sources call it קיסרין = Kesrion, in contradistinction to קסרי = Kesri; but as these sources are uncritical, the distinction is not always observed. The rabbinic sources state also that the designation "Paneas" continued in use.

It is indeed a question whether Paneas and Cæsarea were not two separate cities built near together. An ancient source (Mek. to Ex. xvii. 14 [ed. Friedmann, p. 55b]) mentions Kesrion as being situated below Paneas, from which it follows that they were two distinct cities. The name "Paneas" continued to be used to such an extent that through its form "Panía" the variants "Pamiya," "Apamiya," and "Aspamiya" (אספמיא) became current among the Rabbis; but these must be strictly separated from similar names.

After the death of Philip the city was for a time under Roman jurisdiction; then in the hands of Agrippa I.; again under Roman governors; and, finally, it passed into the hands of Agrippa II. (53 C.E.), who called it Νερωναίς, in honor of Nero ("Ant." xx. 9, § 4). This name, which is found on some coins, soon fell into disuse. At the time of the Jewish war the population was mostly pagan (Josephus, "Vita," xiii.). Vespasian and Titus spent their holidays there, and arranged games and festivals ("B. J." iii. 9, § 7; vii. 2, § 1).

From the second century the city is called Καισάρεια Παναίας (Ptolemy, v. 15, § 21; viii. 20, § 12), both by writers and on coins. But among the native population "Paneas" was probably the name chiefly used, and this form prevails in rabbinic writings as well as in those of the church fathers, and has been preserved under the form "Banias" to the present day. According to a legend the patriarch, and the most eminent among the Jews of Paneas appeared before Diocletian, who hated the Jews (Gen. R. lxiii. 8).

The city is important to Christianity as being one of the places visited by Jesus. It was the site of

an old Christian monument (Eusebius, "Hist. Eccl." vii. 18), and was made a bishopric. It is also mentioned during the Crusades. At present the village of Banias contains about fifty miserable houses or huts, built within the ancient castle wall.

—3. **Cæsarea in Cappadocia**: Capital of Cappadocia; originally named "Mazaga." It is mentioned in rabbinic writings either as "Cæsarea of Cappadocia" or as "Mazaga-Cæsarea." R. Akiba here met a shipwrecked Jewish scholar (Yer. Yeb. 15d), probably R. Me'ir (Yeb. 121a). R. Nathan also sojourned at Cæsarea (Yer. Yeb. 7d), where, it is further stated (*ib.* 4b), a Palestinian robber was executed. It is said that the Persian king Sapor massacred 12,000 Jews there (M. K. 26a). As Kaisari, the place is to-day a populous and flourishing city.

**CAGE**: A rendering for כלוב in Jer. v. 27; but it is doubtful whether this translation is accurate. The Hebrew word occurs only once more—viz., in Amos viii. 1—where it seems to be a basket, probably of wickerwork, or some other net-like receptacle for fruit. In Jer. v. 27 the word is employed to characterize the houses of the rich, filled to overflowing with ill-gotten wealth, as shown by the abundance of costly articles of luxury. It has been supposed that כלוב was a crate filled with birds, which craned their necks through the openings—a very common sight in the markets. This furnishes the key to the simile of the prophet; the costly ornaments and furniture peeping, as it were, for purposes of display, through the very walls of the houses. The Targum, however, in rendering the word by בית פיטמה ("house [place] for fattening"), assumes that the prophet had in mind not so much the display (the craning of the necks) as the artificial—i.e., ill-gotten—character of the wealth. "Cage" or "crate" would thus be the meaning which the Targum gave the word, but the cage would be one of the kind employed for fattening geese, so restricted in size as to make motion impossible for the occupant.

The root of the Hebrew word being uncertain, the exact equivalent can not be definitely ascertained. In the El-Amarna tablets the word is found in the form "kulibi," meaning "bird-net," an instrument to trap birds. This seems to fit in with Jeremiah's simile, "The houses are filled with dishonesty and violently acquired goods" (A. V., "deceit"). In Ecclus. (Sirach) xi. 30 the heart of a vain man is likened to a decoy partridge in a "cage" (κάραλλος). This word is the Arabic 'kirtal' (hamper); but the context shows that "cage" here stands for not merely a crate, but for a cage contrived to capture birds, in which the decoy partridge is "vain" in so far as it displays a mere semblance to the absent reality. Ezek. xix. 9, R. V., in accordance with this idea of a contrivance to trap, renders the Hebrew במצרות by "cage." E. G. H.

**CAGLIARI** (Hebr., כַּאֲלִיאֵר): Capital of the island of Sardinia. It had a Jewish community in early times. When a Christianized Jew named Peter placed images of saints in the synagogue of that city on Easter Monday, the day following his baptism, to the annoyance of the Jews, Gregory I. ordered Bishop Januarius of Cagliari to have the objects at once removed (Grätz, "Gesch. der Juden," v. 52). Little is known of the history of the Jews of Cagliari. Under Aragonian rule their condition was favorable, for they were not molested and were received at court. When King Martin I. of Aragon was at Cagliari in Dec., 1408 (he died in that city in 1409), and the Jews were looking on at the **דַּאָנְט** or **Dans** games instituted in his honor, he invited one of them to take part in the game, and the Jew finally consented, although the community had issued a decree four years previously, interdicting this game to every Jew and Jewess on pain of excommunication. On this occasion Judah ben David, called also **Bonjusas Bondavin**, the rabbi of the community, addressed a question to Isaac b. Sheshet, whom he knew personally. A physician and fine Talmudist, he formerly lived at Marseilles, and then went to Sardinia in 1390, where he was appointed rabbi of Cagliari, the king confirming him as rabbi of the whole island of Sardinia. There was a large synagogue at Cagliari. The Jews of Cagliari were expelled in 1492, like their coreligionists in Spain.

**CAGLIARI, ABRAHAM DA:** Rabbi at Cagliari, Sardinia, in the eighth century. He is mentioned by Antonio di Tharos, the historian of that epoch, and by Delotone, in his "Ritmo di Gialeto." The latter relates that Abraham interpreted many Phœnician inscriptions collected by the Sardinian king Gialeto; and the former that, together with another Jewish scholar named Canaim, he deciphered Greek and Phœnician inscriptions found in the palace of Masu.

I. BR.

**CAHAN, ABRAHAM:** Russian-American novelist and labor leader; born in Podberezhye, government of Wilna, July 7, 1860. His grandfather was a rabbi and preacher in Vitz, government of Vitebsk; and his father was a teacher of Hebrew and Talmud. The family, which was devoutly Orthodox, removed in 1866 to Wilna; and there young Cahan received the usual Jewish preparatory education for the rabbinate. He, however, was attracted by secular knowledge and clandestinely studied the Russian language, ultimately prevailing on his parents to allow him to enter the Teachers' Institute of Wilna, from which he was graduated in 1881. He was appointed teacher in a Jewish government school in Velizh, government of Vitebsk, in the same year; but a domiciliary visit by the police, resulting from his connection with the revolutionary movement, caused him to flee the country.

After many vicissitudes he, in June, 1882, arrived in New York, where he still resides. Having become an ardent socialist while in Russia, he devoted all the time he could spare from work and study to spread his favorite ideas among the Jewish working men of New York. He thus became the pioneer socialistic labor leader among them, and was the first in the United States to deliver socialistic speeches in Yiddish. Cahan was either originator, collaborator, or editor of almost all the earlier socialistic periodicals published in that dialect; and he is still connected with the daily organ of that section of the socialists with which he is in sympathy. He has occupied various positions in labor organizations, from walking delegate to representative at the International Socialist Congress at Brussels.

Cahan quickly mastered the English language; and four years after his arrival in New York taught immigrants in one of the evening schools. Later he began to contribute articles to the "Sun" and other newspapers printed in English, and was for several years employed in a literary capacity by the "Commercial Advertiser," to which paper he is still a regular contributor. While his Yiddish writings are mostly confined to propagandism, his literary work in English is mainly descriptive; and he has few, if any, equals in the United States in depicting the life of the so-called "ghetto," where he has lived and worked for the last twenty years. "A Providential Match" was the first of Cahan's tales to be published (in "Short Stories," 1895). His first novel, "Yekl" (New York, 1896), being the graphic story of an Americanized Russo-Jewish immigrant, attracted much attention and was favorably commented on by the press both in America and in England. W. D. Howells compared Cahan's work to that of Stephen Crane, and prophesied for him a successful literary future ("The World," New York, July 26, 1896). Cahan's next work of fiction, "The Imported Bridegroom, and Other Stories" (*ib.*, 1898), was also well received and favorably noticed by the general press. Of his shorter publications the article on the Russian Jews in the United States, which appeared in the "Atlantie Monthly," July, 1898, deserves to be specially mentioned.

**BIBLIOGRAPHY:** A syndicate article describing Cahan's career (with illustrations), published simultaneously in many newspapers Sept. 27, 1896, among others the *Boston Post* and *Pittsburg Dispatch*; *The Bookman*, iv. 157-158, vii. 513, x. 101-102, 128-430; Wiener, *History of Yiddish Literature in the Nineteenth Century*, pp. 221-226, New York, 1899.

**CAHEN, ALBERT:** French composer; born at Paris Jan. 8, 1846; a pupil of César Franck (composition) and Mme. Szarvady (pianoforte). He made himself known to the musical world by the

following compositions: (1) "Jean le Précurseur," a Biblical poem (1874); (2) "Le Bois," a comic opera (1880); (3) "Endymion," a mythological poem (1883); (4) "La Belle au Bois Dormant," a fairy operetta (1886); (5) "Le Vénitien," four-act opera (1890); (6) "Fleur des Neiges," ballet (1891); (7) "La Femme de Claude," a three-act lyric drama (1896).

**BIBLIOGRAPHY:** *Nouveau Larousse Illustré*, il. 382; Baker, *Biographical Dict. of Musicians*, New York, 1900, s. I. Br.

**CAHEN, CORALIE:** French philanthropist; born at Nancy, 1832; died at Paris March 12, 1899; wife of Mayer Cahen, chief physician of the Northern Railroad Company. Losing her husband and her only daughter before 1870, she devoted herself thenceforward to the relief of the unfortunate, and was largely instrumental in establishing the *Maison Israélite de Refuge pour l'Enfance*, an institution opened at Romainville in 1866 for homeless Jewish girls. When the war of 1870 broke out, she left this work to go to the field. At Metz she was appointed vice-president of the Society for Aid to the Wounded (*Société de Secours aux Blessés*) and acted as a Red Cross head nurse in the hospitals. When the German army entered Metz, Mme. Cahen offered her services to the army of the Loire. At the request of Gambetta she went to Vendôme, and established herself at the hospital organized in the lycée of that city, and succeeded in having her authority recognized by the Marianist sisters of Sainte-Croix at Le Mans.

Filled with compassion for the French soldiers imprisoned in the forts of Silesia and Pomerania, she made three journeys into Germany, two of them during the severe winter of 1871-72. Aided by Empress Augusta, she even gained the ear of Emperor William. Visiting sixty-six forts, she succeeded in releasing 300 prisoners before the expiration of their term. She also accomplished the no less difficult task of procuring information for the families of the missing. She did what even the minister of foreign affairs had been powerless to accomplish; viz., she discovered at Berlin the office in which all the information regarding these widely scattered soldiers was kept, and she carried back to Paris 59,000 individual reports concerning their situation; indicating those that were dead, and those that were being treated in the German hospitals. This marvelous perseverance and devotion were for a long time unknown to the public, owing to the modesty of this heroic woman. When in 1889 M. de Freycinet found the official record of this brilliant service mentioned in an article in the "Temps," he conferred a military decoration upon Mme. Cahen.

After the war Mme. Cahen devoted herself to works of charity; giving also some time to sculpture, in which she showed considerable skill. Noteworthy among her works is a bust of Zadoc Kahn, chief rabbi of France. The "Refuge" founded by her became under her care a model of its kind. It was later transferred to its new quarters constructed by the architect Aldrophe at Neuilly, and was dedicated June 4, 1883. She was its president until her death. She was also a member of the Association

des Dames Françaises. The academician Maxime du Camp, in his book entitled "Paris Bienfaisant" (pp. 365 *et seq.*, Hachette, 1888), in which he gives high credit to the Jewish charities of Paris, devotes an entire chapter to the "Refuge" and to its director. He pays the latter a brilliant tribute, tracing the principal episodes of her life, and closing with these remarkable words: "It has been said, and I, too, have said it myself, that Israelites never have a strongly developed love for their country; but—O Jewess, forgive me!"

**BIBLIOGRAPHY:** Maxime du Camp, *Paris Bienfaisant*, in *Univers Israélite*, March 17, 1899, s. I. W.

**CAHEN, ISIDORE:** French scholar and journalist; born at Paris in 1826; died there March 6, 1902. After having brilliantly completed his education at the Collège Charlemagne, he entered the Ecole Normale in the section of philosophy, having for comrades Edmond About, Hippolyte Taine, Francisque Sarcey, and others, who afterward became distinguished in their respective walks of life. Cahen soon attracted the attention of his professors; and, while still a student, was entrusted with the teaching of philosophy in the College of Versailles.

In 1849 Cahen graduated third at the Ecole Normale; and in the same year succeeded in obtaining the degree of "agrégé de philosophie." A year later he was appointed professor of philosophy at the Lycée Napoléon-Vendée, after having been nominated secretary to the French embassy at Madrid. A cabal among the clerical papers, however, soon caused him to lose his professorship. The incident gave rise to many press polemics, and brought about the resignation of the members of the Jewish consistory.

The government then offered Cahen other positions, but he declined them all, and devoted himself to journalism. He collaborated on the "Journal des Débats," and for many years was attached to the editorial staff of "Le Temps." At the death of his father, Samuel Cahen, he assumed the directorship of the "Archives Israélites," which position he held until his death. Cahen lectured from 1859 till 1878 on history and literature in the Jewish Theological Seminary of Paris.

Besides contributing many valuable articles to the press on various subjects, Cahen was the author of the following writings: (1) "Deux Libertés en Une," in which he pleaded the cause of liberty of conscience and freedom in tuition (Paris, 1848); (2) "La Philosophie du Poème de Job," inserted as an appendix to the Bible translation of his father; (3) "L'Immortalité de l'Âme chez les Juifs," translated from the German of G. Brecher (Paris, 1857).

**BIBLIOGRAPHY:** *Archives Israélites*, 1902, Nos. 13, 14, 15, s. I. Br.

**CAHEN, SAMUEL:** French Hebraist and journalist; born at Metz Aug. 4, 1796, died at Paris Jan. 8, 1862. He was brought up at Mancey; pursuing a course of rabbinical studies and devoting, at the same time, much attention to modern languages and literatures. After completing his education Cahen was engaged as a private tutor in Germany. In 1822 he went to Paris, where he

assumed the directorship of the Jewish Consistorial School, a position which he held for a number of years. In 1840 Cahen founded the ARCHIVES ISRAËLITES.

Cahen's main work was the translation of the Bible into French, with the Hebrew on opposite pages, and critical notes and dissertations by himself and others. The entire edition, consisting of eighteen volumes, appeared at Paris in 1851. Despite adverse criticism, denying Cahen critical perception in the choice of his material, it must be admitted that the undertaking exerted a great influence upon a whole generation of French Jewry. In addition to this great work of his, Cahen was the author of the following writings: (1) "Cours de Lecture Hébraïque, Suivi de Plusieurs Prières, avec Traduction Interlinéaire, et d'un Petit Vocabulaire Hébreu-Français," Metz, 1824; (2) "Précis d'Instruction Religieuse," *ib.* 1829; (3) a new French translation of the Haggadah of Passover, Paris, 1831-32; (4) "Almanach Hébreu," *ib.* 1831.

Cahen was appointed a chevalier of the Legion of Honor in 1849.

**BIBLIOGRAPHY:** *Arch. Isr.*, Jan., 1862; *La Grande Encyclopédie*, s.v.; H. S. Morais, *Eminent Israelites of the Nineteenth Century*, p. 27.

I. BR.

**CAHN, ARNOLD:** German physician; born at Worms April 11, 1858. After completing his course at the gymnasium, he studied medicine at the University of Strasburg, graduating thence in 1881. He was assistant physician at the hospital of the university from 1882 to 1885, becoming privat-docent in the latter year, and assistant professor in 1895.

Cahn has written many articles in the medical journals, his specialty being the physiology of digestion. Among his works and essays are: "Ueber Antiperistaltische Magen-Bewegungen"; "Ueber Magen-Verdaunung bei Chlorhunger"; "Ueber Magensätüre bei Acuter Phosphorvergiftung"; "Ueber die Verdauung des Fleisches im Normalen Magen"; "Ueber die Peptone als Nahrungsmittel."

F. T. II.

**CAHUN, DAVID LÉON:** French Orientalist and writer; born June 23, 1841, at Haguenau, Alsace; died at Paris March 30, 1900. Cahun's family, which came originally from Lorraine, destined him for a military career; but owing to family affairs he was compelled to relinquish this, and he devoted himself to geographical and historical studies. In 1863 he began to publish in the "Revue Française" a series of geographical articles and accounts of his travels in Egypt and the neighboring countries. About the same time he published in the daily press letters of travel, and a geographical review which was the first of its kind. In 1864 Cahun set out to explore Egypt, Nubia, the western coast of the Red Sea, and Asia Minor.

Returning to France in 1866, he became a political writer on the staff of "La Liberté"; but when that paper supported the empire, Cahun left it, and joined the staff of "La Réforme" (1869) and "La Loi." During the Franco-Prussian war he was correspondent for several papers. On Sept. 4, 1870, he

entered the army as a volunteer, and was appointed sublieutenant of the 46th foot in the following November. When peace was established he resumed his Oriental studies, devoting himself chiefly to researches concerning the Turks and the Tatars.

In 1875 he was appointed to the Bibliothèque Mazarine, where he was specially engaged in the compilation of an analytical catalogue from the year 1874. Meanwhile Cahun had begun to publish a series of historical novels dealing with ancient history, in the style of the journeys of Anacharsis in Greece. They are said by one critic to be written in temperate and pure French, combining interest with genuine archeological knowledge. It was Cahun's intention to present facts of ancient history that were not generally known, and thus make contributions to general history and geography. These novels include: "Les Aventures du Capitaine Magon," on Phœnician explorations one thousand years before the common era (Paris, Hachette, 1875); "La Bannière Bleue," adventures of a Mussulman, a Christian, and a pagan at the time of the Crusades and the Mongolian conquest (*ib.* 1876); "Les Pilotes d'Ange," dealing with French history of the sixteenth century (*ib.* 1878); "Les Mercenaires," of the time of the Punic wars (*ib.* 1881); "Les Rois de Mer," on the Norman invasions (Chasavay, 1887); "Hassan le Janissaire," on Turkish military life of the sixteenth century (crowned by the French Academy); "La Tucuse," scenes from the Mongol invasion of Hungary in the thirteenth century (1893). Cahun contributed many literary articles to the "Revue Bleue," "Le Journal des Débats," etc., and several critical, geographical, and ethnographical papers to the "Bulletin de la Société d'Ethnographie," "Bulletin de la Société Académique Indo-Chinoise," "Bulletin de la Société Japonaise," "Bulletin de la Société Américaine," "Bulletin de l'Athénée Oriental," etc.

In 1878 Cahun set out on a fresh series of journeys accompanied by his wife. The two intrepid travelers visited central Syria, the mountains of Ansairi (1878), the Faroe islands and Iceland (1879), central Syria and Mesopotamia (1880). In 1879 the "Tour du Monde" published an account of his travels through Syria and the mountains of Ansairi. He also issued a volume treating the same subject, entitled "Excursions sur les Bords de l'Euphrate" (Paris, 1884). His scholarly study of local customs, "Scènes de la Vie Juive en Alsace," with preface by Zadoc Kahn, chief rabbi of Paris, appeared about the same time (*ib.* 1885). In 1884 he published "Le Congo, la Véridique Description du Royaume Africain, Traduite pour la Première Foisen Français sur l'Édition Latine Faite par les Frères de Bry en 1598, d'Après les Voyages Portugais et Notamment Celui d'Edouard Lopez en 1578" (Brussels, 1884).

In 1890 Cahun established a course of lectures at the Sorbonne, where he taught the history and the geography of Asia. A résumé of one section of this course has been incorporated in the "Histoire Générale" of Lavisse and Rambaud. Cahun's "Introduction Générale à l'Histoire de l'Asie" (1896), based on material gathered during his travels, is a complete and exact history of that continent. He also undertook the restoration of some ancient casts

that are of great geographical interest. Some years before his death Cahun ceased writing for the Parisian periodicals, but to the end he contributed to "Le Phare de la Loire." He left unfinished a history of the Arabs, and a historical novel dealing with the story of the Arabs. He was a member of several learned societies.

Z. K.

**CAIAPHAS** or **CAIPHAS** (*Καϊάφας*, a Greek word; in the Hebrew original, probably not **כַּיָּהֵן**, but **כַּיָּהֵן**; compare Mishnah Parah.iii. 5; Derenbourg, "Essai sur l'Histoire de la Pal." p. 215, note 2; Schürer, "Gesch." 3d ed., ii. 218); full name, **JOSEPH CAIAPHAS** (Josephus, "Ant." xviii. 2, § 2) Son-in law of the high priest Ananias or Annas (John xviii. 13); held that office himself through appointment of Valerius Gratus, about 18-36, hence for a longer period than several of his predecessors and successors. Luke iii. 2 speaks of two high priests, Annas and Caiaphas. The mention of the two at one and the same time has been a great stumbling-block to the commentators. John made a curious error (xi. 49, xviii. 13) in speaking of Caiaphas as the high priest "in that year," as if he interchanged every year with Annas. It appears that even while Caiaphas performed the duties of the office, the power of high priest lay in the hands of Annas.

Caiaphas' historic importance lies in the fact that he is expressly mentioned by Matt. xxvi. 3, 57, and John xi. 49, xviii. 13, 24, 28, in connection with the crucifixion of Jesus, though not by Mark and Luke. After his arrest, however, Jesus was taken not to Caiaphas but to Annas (John xviii. 13 *et seq.*), who questioned him only privately. The actual trial took place on the next day, the eve of the Passover, before the twenty-three members of the Sanhedrin over whom Caiaphas presided (Matt. xxvi. 57). Caiaphas is reported to have said on that occasion that it was expedient that one man should die for the people (John xviii. 14), a saying found also among the Rabbis (Gen. R. xciv. 9). The fact that Jesus was taken not to Caiaphas but to Annas is explained on the ground that the latter's palace was nearer the place of arrest than that of the former. Through the travels of Theodosius Archidiaconus, 530, it is known that there were 100 paces between the house of Caiaphas and the hall of judgment ("Nuovo Bull. di Arch. Crist." vi. 184, Rome, 1900). Peter and other disciples, however, being ignorant of the state of affairs, went to Caiaphas' house in the night.

After Pontius' recall Caiaphas was removed by the new governor, Vitellius (Josephus, "Ant." xviii. 4, § 3), and was succeeded by Jonathan, who was the son of Anan (36) and perhaps a brother-in-law of Caiaphas. It was probably at this time that the meeting with the apostles took place, at which Caiaphas is mentioned as belonging to the high-priestly family (Acts iv. 6). It was said later in the Syrian Church that he had been converted to Christianity, and was identical with the historian Josephus Flavius (Assemani, "Bibl. Orient." ii. 156, iii. 522; Solomon of Bassora, "The Book of the Bee," ed. Budge, tr. p. 94). His house outside Jerusalem is still (1902) shown.

**BIBLIOGRAPHY:** Commentaries on the Gospels, *l.c.*; Renan, *La Vie de Jésus*, ch. xxiv.; Edersheim, *The Jewish Messiah*, ii. 547; Strauss, *Das Leben Jesu*, iv. 30 *et seq.*, ed. Bonn, 1835 G. S. Kr.

**CAIN**.—1. **Biblical Data:** First-born of Adam and Eve, named "Cain" ("Qayin") because "gotten" (root, "kanah") "with the help of YHWH." He became a tiller of the ground, and made an offering of its fruits which YHWH did not accept, though He had accepted that of Abel. Cain was angered, whereupon YHWH assured him that divine acceptance depended upon conduct. Cain slew Abel, and was cursed by YHWH so that the soil should yield no return to his labor, and he should be driven out to wander over the earth. At Cain's appeal YHWH "made to him a sign, lest any one finding him should smite him." Cain went forth to the land of Nod (Wandering), east of Eden; his wife bore him a son Enoch, after whom he named a city which he had built. From him were descended Lamech, who is recorded as having married two wives; Jubal, who instituted nomad life; Jubal, who invented music; and Tubal-Cain, the inventor of metal weapons—*i.e.*, the authors of material and social progress.

k.

W. H. B.

—**In Rabbinical Literature:** Cain, the murderer of his brother Abel, presented to the views of the Rabbis two different types. One was that of a sinner who yielded to his passions, who was greedily, "offering to God only worthless portions; the remnants of his meal or flaxseed"; whom either God's favorable acceptance of Abel's sacrifice or Abel's handsomer wife and twin sister filled with jealousy; who, because he claimed the pasture-land or the wife of Abel as his birthright, quarreled with his brother. He was nevertheless sincere in his repentance when he said, "Too great is my sin [A. V., "punishment"] to bear" (Gen. iv. 13), and so the mark the Lord set upon him was a token of forgiveness. Like a man who had slain another without premeditation, he was sent into exile to atone for his sin (Sanh. 37b); and his crime was finally atoned for when he met death through the falling upon him of his house (Book of Jubilees, iv. 31), or at the hands of his great-grandson Lamech, who took him for a wild beast in the distance and shot him (Tan., Bereshit, ed. Vienna, p. 6b, and Yalk. i. 38).

Cain was also viewed as a type of utter perverseness, an offspring of Satan (Pirke R. El. xxi.), "a son of wrath" (Apoc. Mosis, 3), a lawless rebel who said, "There is neither a divine judgment nor a judge" (Midr. Lekah Tob and Targ. Yer. to Gen. iv. 8), whose words of repentance were insincere (Sanh. 101b; Tan.), whose fleeing from God was a denial of His omnipresence (Gen. R. xxii.), and whose punishment was of an extraordinary character: for every hundred years of the seven hundred years he was to live was to inflict another punishment upon him; and all his generations must be exterminated (Test. Patr., Benjamin, 7, according to Gen. iv. 24; Enoch, xxii. 7). For him and his race shall ever be "the desire of the spirit of sin" (Gen. R. xx., after Gen. iv. 7). He is the first of those who have no share in the world to come (Ab. R. N. xli., ed. Schechter, p. 133).

The seven generations of Cain, as the brood of Satan, are accordingly represented as types of rebels

(Gen. R. xxiii.). While the pious men all descended from Seth, there sprang from Cain all the wicked ones who rebelled against God and whose perverseness and corruption brought on the flood: they committed all abominations and incestuous crimes in

public without shame. The daughters of Cain were those "fair daughters of men" who by their lasciviousness caused the fall of the "sons of God" (Gen. vi. 1-4; Pirke R. El. xxii.;

compare Sibyllines, i. 75). The Ethiopian Book of Adam and Eve and the Syriac Cave of Treasures—both Christianized Melchisedecian works based upon a genuine Jewish original—relate the story of the fall of the descendants of Seth as "the sons of God" who had lived in purity as saints on the mountain near Eden, following the precept and example of Seth and Enoch, their leaders, but were attracted by the gay and sensuous mode of life in which the children of Cain indulged; the latter spending their days at the foot of the mountain, in wild orgies, accompanied by the music of instruments invented by Jubal, and by women, in gorgeous attire, seducing the men to commit the most abominable practices. In the days of Jared ("descent") the Sethites ("the sons of God") went down the hill to join the Cainites, heedless of the warnings of Jared; and none of those who walked in the path of sin could come back. This was repeated in the days of Enoch, Methuselah, and Noah: all the admouitions of these saintly leaders did not prevent the fall of the sons of Seth, for whom the daughters of Cain lusted (see The Book of Adam and Eve, transl. by S. C. Malan, 1882, pp. 115-147; Dillmann, "Das Christliche Adambuch," 1853, pp. 82-101; Bezold, "Die Schatzhöhle," i. 10-23). Josephus ("Ant." i. 2, § 2; i. 3, § 1) also speaks of the excessive wickedness of the posterity of Cain, which grew in vehemence with every generation; while the posterity of Seth remained virtuous during seven generations, after which the fall of the angels ensued and they were enticed by their gigantic offspring. To Philo, likewise, Cain is the type of avarice, of "folly and impiety" ("De Cherubim," xx.), and of self-love ("De Sacrificiis Abelis et Caini"); "Quod Deterius Potiori Insidiari Soleat," 10). "He built a city" (Gen. iv. 17) means that "he built a doctrinal system of lawlessness, insolence, and immoderate indulgence in pleasure" ("De Posteritate," 15); and the Epicurean philosophers are of the school of Cain, "claiming to have Cain as teacher and guide, who recommended the worship of the sensual powers in preference to the powers above, and who practised his doctrine by destroying Abel, the expounder of the opposite doctrine" (*ib.* 11).

A doctrine of the Cainites appears, then, to have been in existence as early as Philo's time; but nothing is known of the same. In the second century of the common era a Gnostic sect by the name of "Cainites" is frequently mentioned as forming a branch of the antinomistic heresies which, adopting some of the views of Paulinian Christianity, advocated and practised indulgence in carnal pleasure. While some of the Jewish Gnostics divided men into three classes—represented (1) by Cain, the physical or earthly man; (2) by Abel, the psychical man (the

middle class); and (3) by Seth, the spiritual or saintly man (see Irenaeus, "Adversus Haereses," i. 7, 5; compare Philo, "De Gigantibus," 13)—the antinomistic pagan Gnostics declared Cain and other rebels or sinners to be their prototypes of evil and licentiousness. Cain, Esau, Korah, the Sodomites, and even Judas Iscariot, were made by these Gnostics expounders of the "wisdom" of the serpent in rebellion against God (Gen. iii. 5), the primeval serpent, "Nahash ha-Ḳadmoni" (Gen. R. xxii. 12). How many of these pernicious doctrines were already formed in pre-Christian times and how many were developed during the first and second Christian centuries is difficult to ascertain (see Jude 11, "the way of Cain"; Irenaeus, *l.c.* i. 31, 1; 26, 31; 27, 3; Hippolytus, "Adversus Omnes Haereses," v. 11, 15, 21; Clemens of Alexandria, "The Cainists," Stromata vii. 17; Eusebius, "Hist. Eccl." iii. 29; Epiphanius, "Haeres." xxv., xxvi., xxxviii. 2). Blau with good reason refers to such Cainite doctrines the Haggadah of blasphemy, referred to in Sanh. 99b, as taught by Manasseh ben Hezekiah, the typical perverter of the Law in the direction of licentiousness.

K.

—**Critical View:** The narratives in Gen. iv. are assigned to two different strata of the Jahvistic document; *e.g.*, Ball, "S.B.O.T.," the story of the murder of Abel (1-16a, 25, 26<sup>2</sup> to J), the later stratum; and the story of Cain, the city-builder, and of his descendants (16b-24<sup>1</sup> to J), the earlier stratum. The independence of the two sections is shown, among other things, by the fact that the man who, in verse 12, is to be "a fugitive and a wanderer," in verse 17 builds a city. Verses 16b-24, to which probably 1a should be added, are from the same document as the story of the creation in Eden; and 1b-16, 25, 26, from that containing J's account of the flood. The apparent cross-reference, "wanderer," "nad" (12), with "wandering," "Nod" (16b), is due to a redactor; and verse 24 refers to a version of the story of Cain which is different from that given in 1b-16 (compare below).

The later section, 1b-16, is commonly explained thus (compare Holzinger's "Genesis"): Cain is the eponym of the Kenites (see 2), and the verses are a form of an independent tradition which explained the nomadic life of the Kenites as due to a curse laid upon them for some ancient murder. To the settled Israelites the nomadic life seemed mean and wretched. Verses 25, 26 connect this story with the complete J.

The earlier section, 17-24, is J's genealogy of the descent of the human race from Adam, and his account of the development of civilization. The Song of Lamech (23, 24) is an ancient fragment inserted by J, referring to a form of the story of Cain which placed his conduct in a favorable light.

Text of Gen. iv. 1. A. V., "[a man] from the Lord," so Targ. O., implies a reading כַּיִן אֵלֶּי: the actual text might possibly be rendered as R. V., "with the help of the Lord"; so Septuagint, Vulgate, or even

"from YHWH." Marti, apud Holzinger, proposes 'ot for 'et, "a man bearing the YHWH-sign" (compare verse 15, and below).

The etymology of iv. 1 is a linguistic impossibility. The name was originally that of the Kenite tribe (see 2). The word קַיִן ("kayin") is

**Origin of Name.** read in the Masoretic text of II Sam. xxi. 16, and translated "lance"; the corresponding words in Arabic and Syriac mean "smith." The tribe may have derived its name from the fame of its smiths. The "Cainan" of Gen. v. 14 ("Kenan") is another form of this name (compare "KENAN"; R. V., "Kenan"). No explanation of YHWH's disapproval is given in the Masoretic text. The LXX. of verse 7 implies some ceremonial irregularity. Suggestions that the sin consisted in the bloodlessness of the offering, or in its worthlessness, or that it was given in a wrong spirit, are alike conjectures. The story is probably imperfect at this point.

The "sign" of Cain is sometimes understood as a sign given to Cain to reassure him, but probably some mark on his person is intended, which should indicate that he was under divine protection. It perhaps refers to a tribal mark of the Kenites connected with their worship of YHWH (Stade, "Z. A. T. W."; Guthe, "Herzog," 1901, s. r.).

The Apocrypha (Wisdom x. 3, 4) refers to Cain as the cause of the Flood. In the New Testament Cain is mentioned as an evil example (Heb. xi. 4; I John iii. 12; Jude 11).

2. Tribe; mentioned in Num. xxiv. 22, and Judges iv. 11, for the tribe of the Kenites (see KENITES).

3. City ("Ha-Kayin"); mentioned in Josh. xv. 57, in southern Judah, often identified with Yagin, southeast of Hebron.

**CALABRESE, HAYYIM BEN JOSEPH.** See VITAL, HAYYIM.

**CALABRIA.** See ITALY.

**CALAH:** The name of a city mentioned in Gen. x. 11 et seq. and forming with Nineveh, Rehoboth 'Ir, and Resen the chief places in the Assyrian extension of Nimrod's domain. The verse in question embodies a correct tradition that the Assyrian empire was originally an offshoot of Babylonia. Assyrian culture similarly represents a natural extension toward the work of the civilization that arose in the South. The mound of Nimrod, lying in the fork of land between the rivers Tigris and the Upper Zab, marks the site of the city. Excavations were begun here by Layard in 1845, and subsequently continued by Rassam and George Smith. Their work has

resulted in the discovery of a great platform built of sun-dried bricks and faced with stone, extending 600 yards north and south by 400 yards east and west, on which have been found remains of new palaces and of restoration works carried on by Shalmaneser I., Assurnazirpal, Shalmaneser II., Tiglathpileser III., Sargon, and Esarhaddon. Very little is known of the history of the city, but Assurnazirpal ascribes its origin to Shalmaneser I. (about 1300 B.C.); it is, however, scarcely probable that the city came into existence at so late a period. It is safe to assume that he means that Shalmaneser rebuilt it and made it a city of importance. Though the city was at times the residence of the king, it never became so populous as either Asshur or Nineveh.

**CALAHOR(R)A:** A family of Spanish descent, resident in Cracow from the sixteenth century up to the present time, of which the following members attained prominence:

1. **Israel Samuel Calahorra** (in the place of קאלהורא read קאלהורה): Writer; lived at Cracow; son of Solomon Calahorra (No. 3). He was not a physician, as Fürst and others have it, nor did he come from "Califoor."

In 1624 he completed "Yismal Yisrael" (Israel Shall Rejoice), a lexicon to the four ritual codes in alphabetic order. It was published at Cracow in 1626 and again at Amsterdam in 1693, together with the commentary "Hukke Da'at" by Moses Jekuthiel Kaufman. Single parts of it appeared at Berlin in 1700 and at Dyhernfurth in 1701. The code Yoreh De'ah was published at Vienna in 1865, together with the commentary "Hukke Da'at" and a commentary, "'Olelot Zebi," by M. H. Friedländer.

According to Calahorra's own statement in the preface to his lexicon, he wrote, besides the commentary on the ritual codes: "Or Yisrael" (Light of Israel), a commentary on the Pentateuch; "Kerem Shelomoh" (Vineyard of Solomon), a commentary on Pirke Abot, and "Sullam ha-Shamayim" (Heavenly Ladder). Besides the last work there is at the end of the first code in "Yismal Yisrael" a "tehinah" (supplication), mystical in character, together with several prayers. None of these other works has been printed.

2. **Mattithiah Calahorra:** Apothecary in Cracow; grandson of Solomon Calahorra (No. 3). He held a religious dispute with a Dominican, and suffered martyrdom at the stake in 1664 at Pieterkov. An account of his trial and the story of his martyrdom are in manuscript in the archives of the Dominican monastery at Cracow. A copy of the same is in the possession of S. J. Halberstamm.

3. **Solomon Calahorra:** Physician; lived in Cracow between 1559 and 1586. His son designates him as "sepharad" (= Spaniard); and he probably came from Calahorra. Moses Isserles (ReMA) and Solomon Luria, whose contemporary he was, held him in high regard for his medical skill; and privileges were conferred on him in 1570 and 1578 by King Sigismund Augustus, to whom he was physician-in-ordinary, and by Stephen Bathori.

Calahorra, it appears, occupied himself also with business; and he has been confounded by Graetz and others with the physician Solomon Ashkenazi.

**CALAMANI, JOSHUA ABRAHAM BEN SIMḤAH:** Italian Talmudist; born at Venice in 1704. The surname "Calamani" is, according to Steinschneider, derived from the German "Kalman" or "Kalonymus," borne by an ancestor of Joshua. Calamani was a precocious child, the only work extant by him having been written when he was thirteen years of age. It is entitled "Mille de-Bediḥuta" (Words of Delectation), and contains parodies on the language and style of the Talmud, with Rashi and Tosafot. It was written for the festival of Hanukkah (Venice, 1717).

**CALAMUS:** One of the ingredients (Ex. xxx. 23) of the oil made specially for anointing the tabernacle (Ex. xxx. 26), its vessels (*ib.* 27-29), and the priests (*ib.* 30). The calamus reed was fragrant, and is therefore mentioned in the long list of spices and fragrant woods in Cant. iv. 14. It was one of the articles in which Tyre traded (Ezek. xxvii. 19). See REED.

G. B. L.

**CALATAYUD, CALATAL-YEHUD, or CASTILLO DOS JUDÍOS** (Arabic, *Ḳal'at Ayub*, Castillo de Ayub; Hebrew, *קלעת איוב* (קלעה): City of Aragon, which had a large Jewish community as early as the reign of 'Abd al-Rahman III. In 1882, while workmen were digging the foundation of a house, they discovered a marble tombstone bearing a Hebrew inscription in memory of a certain Samuel b. Solomon, who died Marḥeshwan 11, 4680=Oct. 9, 919 ("Boletín de la Real Academia de la Historia," xii. 17 *et seq.*; "Rev. Et. Juives," xvi. 273). By the kings of Aragon the Jews of Calatayud were granted certain privileges, among which was one with regard to the oath; and these privileges were from time to time renewed.

The Jewish quarter of Calatayud was situated in the vicinity of the river Las Pozas, and extended from S. María de la Peña to the Torre Mocha. On the opposite side of the river lay the Jewish cemetery. The community, which, during its prosperous times, annually paid 6,000 maravedis in taxes, possessed two large synagogues, one of which, situated at the end of the Jewish street, was very beautiful. This synagogue was built by Aaron b. Yahya, and renovated by his relative, Joseph b. Yahya. There were also several large schools, two of which were founded respectively by Joseph Parḥi and Jacob b. Calna.

In addition to these there was a school for the association of weavers, and another attached to the Hebrah Ḳaddishah. As the members of the congregation occasionally absented themselves from the

synagogues and held prayers in private houses, the "aljama" (community) ordained that services were to be held only in the regularly constituted synagogues and schools; and that an infringement of this mandate was to be punished by a fine, one-half of which was to be donated to the crown. There were, however, two persons exempt from this law: one, the physician Don Bahiel al-Constantini, who lived some distance from the synagogue; the other, Moses b. Shaprut, whose gout prevented his attendance at the service.

In 1326 the Jews of Calatayud had indiscreetly admitted two Christians to Judaism; in consequence the former were condemned to severe punishment by the inquisitor, but later pardoned by King Jaime. In the war between Castile and Aragon in 1367, the Jews of Calatayud and Daroca, of whom the former had bravely defended their city, were subjected to great suffering at the hands of the Castilian soldiery, having their shops plundered and their children ruthlessly massacred. As a result of this war the walls of the city of Calatayud, which had been heavily damaged and partly destroyed, had to be restored, and since the Jews were willing to repair only the walls of their immediate quarter, a joint conference was held on Jan. 11, 1390, between the city council and the representatives of the aljama (among whom were the physicians Samuel Sadoch, Jacob Azarias, and Don Samuel b. Shaprut), at which it was agreed that the Jews were to rebuild all the walls of the city, but that they were to receive reimbursement from the Christian inhabitants for all the additional money expended.

In consequence of the persecutions and the sermons of the proselytizing Vicente Ferrer, a large number of the wealthiest Jews of Calatayud in 1391, and more particularly in 1413, accepted baptism. Among the converts were the following distinguished families: the Clementes, whose progenitor was Moses Hamorro; the Santangels, descended from Azariah Genillo; the Villanuevas, from Moses Patagon; and the children of the wealthy Samuel Vibon. Several of these persons rose to high eminence in Church and state, but many fell victims to the Inquisition.

The community, once wealthy and powerful, gradually declined, until (about fifty years before the expulsion of the Jews from Spain) it was able to pay only a modicum in taxes. Calatayud was always celebrated as a great seat of Jewish learning, and among its eminent scholars were: the grammarian Solomon ibn Parḥon, who was born at Calatayud and was a friend of Judah ha-Levi; the rabbi Solomon Reuben, who was related to Hasdai Crescas, and had many enemies (he was finally compelled to give place to the preacher En Bima); R. David ibn Shoeb, who enjoyed the esteem of both Jewish and Christian circles, and who, like Moses Alḳabiz and Don Solomon b. David, carried on a correspondence with Isaac b. Sheshet. The Nasi D. Samuel ha-Levi and R. Moses b. Susa (the latter probably identical with the correspondent of Isaac b. Sheshet at Ucles) were the representatives of the Calatayud community at the disputation at Tortosa. The last preacher of the congregation of Calatayud was the celebrated Isaac ARAMA. Ac-

ording to Steinschneider ("Jew. Quart. Rev." xi. 605), the Jewish family name "K̄alai" is derived from this city.

**CALATRAVA:** Fortified city in the former province of La Mancha, in Castile. In 1146, when it was captured from the Moors by Alfonso VII., the latter made his favorite, Judah b. Joseph ibn Ezra ha-Nasi, governor of the city, just as Celorigo, when captured twenty-eight years later, was entrusted to the Jews (Joseph ha-Kohen, "Emek ha-Baka" [after Ibn Daud], p. 28; German transl. by M. Wiener, p. 161; "Boletin Acad. Hist." xiv. 267; J. Amador de los Rios, "Historia de los Judios de España," i. 331).

The Knights of the Order of Calatrava, called after this city—who received large estates and gifts from the kings of Castile and Aragon—and their grand masters had various relations with the Jewish communities and individual Jews. The city Maqueda was a fief of the order, and was the home of the scholarly Moses ARRAGEL, with whom the grand master Luis de Guzman corresponded. In 1316 the grand master Garcia Lopez interceded for the Jewish community, by asking the king, Alfonso XI., to reduce the royal taxes. In 1304 the Order of Jaime II. of Aragon was granted the privilege of admitting thirty Jewish families into the city of Alcañiz, which belonged to the order. In recognition of the services rendered by the grand master and his knights to King Henry II. in his war against Don Pedro, the king presented the grand master and the order 500 and 1,000 maravedis, respectively, from the annual taxes of the Jews residing between Guadalferra (Guadalfisca) and Puerto de Muladar and from those of the Jewish community of Villa Real. In 1310 the order sold a water-mill, called Batanejo, which became the property of Don Zulema (Salomon ibn Albagal) and his wife, Jamila, more correctly Joanila. The grand master Garcia Lopez also had negotiations with Abraham aben Xuxen (ben Susan) of Villa Real in regard to a water-mill.

**CALAZ, JUDAH.** See KALAZ, JUDAH.

**CALCOL:** A man famous for his wisdom, since the Biblical writer attests the wisdom of Solomon by saying that he surpassed Calcol. In the account of I Kings iv. 31, R. V., Calcol (Chalcol, I Kings iv. 31, A. V.) is given as the son of Mahol, while in I Chron. ii. 6 he is called the son of Zerah of the tribe of Judah, and a brother of Heman and Ethan. Rashi, following the Midrash (Pesik., ed. Buber, iv. 34b) says that Calcol [which probably means "the nourisher," or "nourishment"] is a name given to Joseph because of the verse "and Joseph nourished" (ויבלבל יוסף) (Gen. xlvii. 12).

**CALCUTTA:** Capital of Bengal, and seat of government of British India. The Jews of Calcutta now number about 2,150, of whom 150 are European and the remainder natives of Asiatic Turkey, Persia, and southern Arabia. Just when the first Jew settled in Calcutta is uncertain; but Jewish traders did business there many years ago. Shalome David Cohen is the first permanent settler of whom there is authentic record toward the end of the eighteenth century. He became a favorite of the raja of Lucknow, and even had the honor of riding with him on his elephant. Cohen built the first synagogue in Calcutta, known as the Old Synagogue.

The second synagogue, Naveh Shalome, situated in Canning street, was built nearly a century ago by Ezekiel Judah Jacob, another Jewish pioneer. It had until lately the income (229 rupees monthly) from a large compound, which was formerly distributed among the poor. This compound is now occupied by the Magen David synagogue, whose founder, Elias David Joseph Ezra, compensated the Naveh Shalome by a permanent income from a trust fund. Religious questions are sent for solution to Bagdad.

The third synagogue was the Beth-El, on Pollock street, erected in 1855-56 by Joseph Ezra and Ezekiel Judah. It was rebuilt and enlarged in 1885-86 by Elias Shalome Gubbay. The finest synagogue in Calcutta is the Magen David. It is lighted by gas and cooled by punkas (fans).

The Ezra Hospital, the only Jewish institution of its kind in Calcutta, was erected by Mrs. Mozelle E. D. J. Ezra in memory of her husband. It cost 125,000 rupees; and all expenses, save those of doctors, are defrayed by the founder.

The school Kehillath Yeshooroon, though meant for girls, also receives boys up to ten years of age.

It is in charge of three European and two Hebrew teachers, and the pupils are taught up to the seventh standard. The school is maintained partly by tuition fees and partly by a government subsidy. There is also a Talmud-Torah school, where the poor are taught and fed free every afternoon. It is supported by the wealthy Jews.

In trade the Jews are in the front rank. The great houses David Sassoon & Co. and E. A. D. Sassoon & Co. have branch offices in Calcutta. Other representative men in commercial life are M. A. Sassoon, Maurice Gubbay, H. S. Howard, and J. E. D. J. Ezra. The middle class Jews speculate in opium and stocks, and act as brokers. The poor keep shops and earn a livelihood as hawkers.

The rich Jews live in the best part of the town, the Chowringhee, their habits and costumes being European in every respect, though their vernacular is Arabic. There are several cricket,

social polo, and social organizations. Though many still adhere to their Arabian style of costume, the younger generation has adopted English dress.

**CALÉB.**—**Biblical Data:** According to the Biblical text, Caleb was of the tribe of Judah. He represented that tribe among the twelve spies whom Moses

sent from the wilderness to spy out Canaan. He and Joshua alone brought back an encouraging report, and in consequence were the only ones of all that came out of Egypt who were permitted to survive and enter Canaan (Num. xiii. 6, 30; xiv. *passim*; xxvi. 65; xxxii. 12; xxxiv. 19; Deut. i. 36). After the conquest he was given Hebron and the region around it. In the conquest of this territory he offered the hand of Achsah, his daughter, to the man who would capture Hebron for him; the feat was accomplished and the maiden won by Caleb's younger brother, Othniel. To him was assigned the south land, to which later, at Achsah's request, "the upper springs" were added (Josh. xiv., xv.; and Judges i. *passim*). His name is connected with several towns in southern Judah (1 Chron. ii. *passim*).

—**In Rabbinical Literature:** In the rabbinical sources, Caleb, the son of Hezron (1 Chron. ii. 18–20), is identified with Caleb, the son of Jephunneh (Num. xiii. 6), the epithet "Jephunneh" having been given to him because he "turned away" (פָּנָה = פָּנָה) from the sinful intention of the other spies who advised the people against going into the Holy Land. Caleb is also called (1 Chron. iv. 5) "Ashhur," because his face became black (שִׁחֹר) from much fasting, and "father of Tekoa" (אָבִי תְּקוּעַ), because he fastened (תָּקַע) his heart on God, and in this faith he married the prophetess Miriam, whom, although she was neither fair nor healthy, he treated with fatherly love (אָבִי), appreciating her own piety and her relationship to such brothers as Moses and Aaron.

Although the son of Jephunneh, Caleb is also called "the Kenizzite" (A. V., "Kenezite," Josh. xiv. 6, 14; compare Judges i. 13), because Kenaz, the father of Othniel, was his stepfather; Othniel thus being in fact his half-brother (Sothah 11a, 12a, where the names of Azubah's children [1 Chron. ii. 18] are applied to Caleb in haggadic fashion; see also Ex. R. i. 17).

When Caleb came to Palestine as one of the spies, he visited the graves of the Patriarchs in Hebron (compare Num. xiii. 22) and prayed for their help against the sinful intention of his colleagues (Sothah 34b). It was also he alone who insisted that the spies should take some of the fruits of the country with them in order to convince the people of the extraordinary fertility of Palestine. As they did not wish to do this Caleb drew his sword and said: "If you will not take any fruit with you, then either my life or yours!" (Tan., Shelah 15, ed. Buber; Num. R. xvi. 14). Thoroughly realizing the evil intentions of the spies, and knowing that it was useless to attempt to dissuade them, he did not betray his plans to them, but acted as if he agreed with them (Tan., *l.c.* 19; Num. R. *l.c.* 19). But when the spies began to incite the people against Moses, and hissed Joshua, who attempted to act as peacemaker, Caleb, whom they had thought to be on their side, rose and said, "This is not the only thing the son of Amram has done for us."—here all the ring-leaders were silent—"He has taken us out of Egypt; he has divided the sea for us; and he has fed us with manna. Now, therefore, if he were to command

us to make ladders and scale the heavens, we should obey him. Let us go up at once and take possession" (Sothah 35a; Num. R. *l.c.*; Tan., *l.c.*). When the country was divided, Caleb and Joshua received the portions that had been intended for the other spies (B. B. 117b, 118b).

Caleb was the father of HUR from his second wife Ephrath (1 Chron. ii. 19), and, therefore, the progenitor of the Davidic house, the "Ephrathite" (1 Sam. xvii. 12; Sothah 11b; Sanh. 69b).

L. G.

—**Critical View:** The eponymous ancestor of the clan of CALEBITES. Since "Caleb" signifies dog, it has been thought that the dog was the totem of the clan. Modern criticism finds several different strata to this material, representing different points of view. The oldest writer (J) calls him simply Caleb in Josh. xv. 14–19; and Judges i. connects him with the expulsion of the sons of Anak from Hebron, and with the gift of Achsah and of certain lands to Othniel. D and P call him Caleb, the son of Jephunneh, and make him one of the twelve spies. In the original form of the story he alone brought back the favorable report, and so of all that came out of Egypt he alone entered Canaan.

G. A. B.

**CALEBITES:** A branch of the Edomite clan of Kenaz (compare Judges i. 12 with Gen. xxxvi. 11, 15, 42) that, before the Israelitish conquest, had migrated to southern Judah and settled in the vicinity of Hebron. They appear to have entered the country from the south and to have been friendly to the Hebrews, from which fact, perhaps, arose the story of Caleb's favorable report as one of the twelve spies. They were afterward absorbed in the tribe of Judah. This union had not fully taken place at the time of David's career as an outlaw (1 Sam. xxv. 3, xxx. 14). The narratives in Josh. xv. 14 *et seq.* and Judges i. 12 *et seq.* were composed to establish the claim of certain Calebite clans to particular localities (see ACHSA and OTHNIEL). It appears from 1 Chron. ii. 18 *et seq.* that the pre-exilic territory of the Calebites included Ziph and Mareshah and other towns in the extreme south of Judah; while another list in the same chapter (verses 46 *et seq.*), by representing certain personified towns as sons of Caleb's concubines, among which is Bethlehem, indicates that after the Exile the clan was pushed farther north. This was doubtless due to the occupation of the south by Edomites.

G. A. B.

**CALENDAR, HISTORY OF:** The history of the Jewish calendar may be divided into three periods—the Biblical, the Talmudic, and the post-Talmudic. The first rested purely on the observation of the sun and the moon, the second on observation and reckoning, the third entirely on reckoning.

The study of astronomy was largely due to the need of fixing the dates of the festivals. The command (Deut. xvi. 1), "Keep the month of Abib," made it necessary to be acquainted with the position of the sun; and the command, "Also observe the

moon and sanctify it," made it necessary to study the phases of the moon.

The oldest term in Hebrew for the science of the calendar is **קביעותא דירחא** ("fixing of the month"); later **קרוש החדש** ("sanctification of the new moon"); **קרוש החדש על פי ראייה** ("sanctification of the new moon by means of observation"); **קרוש החדש על פי השבון** ("sanctification of the new moon by means of reckoning"); **יריעה בקביעותא דירחא** ("science of fixing the month"); **הלכות קרוש החדש** ("rules for the sanctification of the new moon"). Among other names besides these we find **סוד העבור** ("the secret of intercalation"). The medieval and modern name is **לוח**.

The Babylonian year, which influenced the French time reckoning, seems to have consisted of 12 months of 30 days each, intercalary months being added by the priests when necessary. **Babylonian Calendar.** Two Babylonian calendars are preserved in the inscriptions, and in both each month has 30 days as far as can be learnt. In later times, however, months of 29 days alternated with those of 30. The method of intercalation is uncertain, and the practise seems to have varied.

The Babylonian years were soli-lunar; that is to say, the year of 12 months containing 354 days was bound to the solar year of 365 days by intercalating, as occasion required, a thirteenth month. Out of every 11 years there were 7 with 12 months and 4 with 13 months.

Strassmeier and Epping, in "Astronomisches aus Babylon," have shown that the ancient Babylonians were sufficiently advanced in astronomy to enable them to draw up almanacs in which the eclipses of the sun and moon and the times of new and full moon were predicted ("Proc. Soc. Bib. Arch., 1891-1892," p. 112).

The Talmud (Yerushalmi, Rosh ha-Shanah i. 1) correctly states that the Jews got the names of the months at the time of the Babylonian exile.

There is no mention of an intercalary month in the Bible, and it is not known whether the correction was applied in ancient times by the addition of 1 month in 3 years or by the adding of 10 or 11 days at the end of each year.

Astronomers know this kind of year as a bound lunar year. The Greeks had a similar year. Even the Christian year, although a purely solar year, is forced to take account of the moon for the fixing of the date of Easter. The Mohammedans, on the other hand, have a free lunar year.

It thus seems plain that the Jewish year was not a simple lunar year; for while the Jewish festivals no doubt were fixed on given days of lunar months, they also had a dependence on the position of the sun. Thus the Passover Feast was to be celebrated in the month of the wheat harvest (**אביב**), and the Feast of Tabernacles, also called **הג האסיף**, took place in the full. Sometimes the feasts are mentioned as taking place in certain lunar months (Lev. xxiii.; Num. xxviii., xxix.), and at other times they are fixed in accordance with certain crops; that is, with the solar year.

In post-Talmudic times Nisan, Siwan, Ab, Tishri, Kislew, and Shebat had 30 days, and Iyyar, Tammuz, Elul, Heshwan, Tebet, and Adar, 29. In leap-year, Adar had 30 days and We-Adar 29. According to Pirke Rabbi Eliezer, there was a lunar solar cycle of 48 years. This cycle was followed by the Hellenists, Essenes, and early Christians.

In the times of the Second Temple it appears from the Mishnah (R. H. i. 7) that the priests had a court to which witnesses came and reported. This function was afterward taken over by the civil court (see B. Zuckermann, "Materialien zur Entwicklung der Alt-jüdischen Zeitrechnung im Talmud," Breslau, 1882).

The fixing of the lengths of the months and the intercalation of months was the prerogative of the Sanhedrin, at whose head there was a patriarch or **נשיא**. The entire Sanhedrin was not called upon to act in this matter, the decision being left to a special court of three. The Sanhedrin met on the 29th of each month to await the report of the witnesses.

From before the destruction of the Temple certain rules were in existence. The new moon can not occur before a lapse of 29½ days and ⅓ of an hour. If the moon could not be exactly determined, one month was to have 30 days and the next 29. The full months were not to be less than 4 nor more than 8, so that the year could not be less than 352 days nor more than 356. After the destruction of the Temple (70 C.E.) Johanan ben Zakkai removed the Sanhedrin to Jabneh. To this body he transferred decisions concerning the calendar, which had previously belonged to the patriarch. After this the witnesses of the new moon came direct to the Sanhedrin.

Every two or three years, as the case might be, an extra month was intercalated. The intercalation seems to have depended on actual calculation of the relative lengths of the solar and lunar years, which were handed down by tradition in the patriarchal family. Moreover, it was possible to judge by the grain harvest. If the month of Nisan arrived and the sun was at such a distance from the vernal equinox that it could not reach it by the 16th of the month, then this month was not called Nisan, but Adar Sheni (second).

On the evening before the announcement of the intercalation the patriarch assembled certain scholars who assisted in the decision. It was then announced to the various Jewish communities by letters. To this epistle was added the reason for the intercalation. A copy of such a letter of Rabbau Gamaliel is preserved in the Talmud (Sanh. xi. 2).

The country people and the inhabitants of Babylonia were informed of the beginning of the month by fire-signals, which were readily carried from station to station in the mountain country. These signals could not be carried to the exiles in Egypt, Asia Minor, and Greece, who, being accordingly left in doubt, celebrated two days as the new moon.

Owing to the weather it was frequently impossible to observe the new moon. In order to remove any uncertainty with regard to the length of the year on this account, it was ordained that the year should not have less than 4 nor more than 8 full

months. After the fixing of the calendar it was settled that the year should not have less than 5 nor more than 7 full months.

R. Gamaliel II. (80-116 C.E.) used to receive the reports of the witnesses in person, and showed them representations of the moon to test their accuracy. On one occasion he fixed the first of Tishri after the testimony of two suspected witnesses. The accuracy of the decision was disputed by Rabbi Joshua, who was thereupon commanded by the patriarch to appear before him prepared for travel on the day which was, according to his (Joshua's) calculation, the Day of Atonement, an order with which he most reluctantly complied.

During the persecutions under Hadrian and in the time of his successor, Antoninus Pius, the martyr Rabbi Akiba and his pupils attempted to lay down rules for the intercalation of a month.

Under the patriarchate of Simon III. (140-163) a great quarrel arose concerning the feast-days and the leap-year, which threatened to cause a permanent schism between the Babylonian and the Palestinian communities—a result which was only averted by the exercise of much diplomacy.

Under the patriarchate of Rabbi Judah I., surnamed "the Holy" (163-193), the Samaritans, in order to confuse the Jews, set up fire-signals at improper times, and thus caused the Jews to fall into error with regard to the day of the new moon. Rabbi

Judah accordingly abolished the fire-signals and employed messengers.

**Talmudic Period.** The inhabitants of countries who could not be reached by messengers before the feast were accordingly in doubt, and used to celebrate two days of the holidays. By this time the fixing of the new moon according to the testimony of witnesses seems to have lost its importance, and astronomical calculations were in the main relied upon.

One of the important figures in the history of the calendar was Samuel (born about 165, died about 250), surnamed "Yarhinai" because of his familiarity with the moon. He was an astronomer, and it was said that he knew the courses of the heavens as well as the streets of his city (Ber. 58b). He was director of a school in Nebardea (Babylonia), and while there arranged a calendar of the feasts in order that his fellow-countrymen might be independent of Judea. He also calculated the calendar for sixty years. His calculations greatly influenced the subsequent calendar of Hillel. According to Bartolucci his tables are preserved in the Vatican. A contemporary of his, R. Adda (born 183), also left a work on the calendar.

Mar Samuel reckoned the solar year at 365 days and 6 hours, and Rab Adda at 365 days, 5 hours, 55 minutes, and 25 $\frac{2}{3}$  seconds.

In 325 the Council of Nice was held, and by that time the equinox had retrograded to March 21. This council made no practical change in the existing civil calendar, but addressed itself to the reform of the Church calendar, which was sol-lunar on the Jewish system. Great disputes had arisen as to the time of celebrating Easter. Moreover, the Church was not fully established, many Christians being still simply Jewish sectarians. A new rule was therefore made, which, while still keeping

Easter dependent on the moon, prevented it from coinciding with Passover.

Under the patriarchate of Rabbi Judah III. (300-330) the testimony of the witnesses with regard to the appearance of the new moon was received as a mere formality, the settlement of the day depending entirely on calculation. This innovation seems to have been viewed with disfavor by some members of the Sanhedrin, particularly Rabbi Jose, who wrote to both the Babylonian and the Alexandrian communities, advising them to follow the customs of their fathers and continue to celebrate two days, an advice which was followed, and is still followed, by the majority of Jews living outside of Palestine.

Under the reign of Constantius (337-361) the persecutions of the Jews reached such a height that all religious exercises, including the computation of the calendar, were forbidden under pain of severe punishment. The Sanhedrin was apparently prevented from inserting the intercalary month in the spring; it accordingly placed it after the month of Ab (July-August).

The persecutions under Constantius finally decided the patriarch, Hillel II. (330-365), to publish rules for the computation of the calendar, which had hitherto been regarded as a secret science. The political difficulties attendant upon the meetings of the Sanhedrin became so numerous in this period,

and the consequent uncertainty of the feast-days was so great, that R. Huna

**Post-Talmudic Period.** Abin made known the following secret of the calendar to Raba in Babylonia: Whenever it becomes apparent

that the winter will last till the 16th of Nisan, make the year a leap-year without hesitation.

This unselfish promulgation of the calendar, though it destroyed the hold of the patriarchs on the scattered Judeans, fixed the celebration of the Jewish feasts upon the same day everywhere. Later Jewish writers agree that the calendar was fixed by Hillel II. in the year 670 of the Seleucid era; that is, 419 A.M. or 359 C.E. Some, however, as Isaac Israeli, have fixed the date as late as 500. SAADIAH afterward formulated calendar rules, after having disputed the correctness of the calendar established by the Karaites. That there is a slight error in the Jewish calendar—due to inaccuracies in the length of both the lunar and the solar years upon which it is based—has been asserted by a number of writers.

According to Isidore Loeb the Jewish cycle in 19 years exceeds the Gregorian by

**Error in** 2 hours, 8 minutes, and 15.3 seconds.

**the** This makes a difference in a hundred

**Calendar.** cycles (1000 years) of 8 days, 21 hours, 45 minutes, and 5 seconds ("Tables du

Calendrier Juif," p. 6, Paris, 1886).

The assumed duration of the solar year is 6 minutes, 39 $\frac{2}{3}$  seconds in excess of the true astronomical value, which will cause the dates of the commencement of future Jewish years, which are so calculated, to advance from the equinox a day in error in 216 years ("Encyc. Brit." s.v. "Calendar," 9th ed., iv, 678).

The following calculation of the differences between the Jewish and Gregorian lengths of the year and month was privately made for the writer by

Prof. William Harkness, formerly astronomical director of the United States Naval Observatory at Washington:

1 year = 365 d. 05 h. 97 $\frac{1}{2}$  ḥalaḳim  
or 365 d. 05 h. 55 m. 25.439 s.  
48 m. 46,069 s. true value  
(29 d. 12 h. 793 ḥalaḳim) 235 = 6939 d. 16 h. 595 ḥalaḳim = 19 years  
29 d. 12 h. 44 m. 3 $\frac{1}{2}$  s. True value = 29 d. 12 h. 44 m. 02.841 s.

According to these calculations the Jewish year exceeds the Gregorian by 6 m. 39.37 s. and the Jewish month by .492 s. Insignificant as these differences may appear, they will cause a considerable divergence in the relations between Nisan and Spring as time goes on, and may require a Pan-Judaic Synod to adjust.

**Writers on the Calendar:** Mashallah, 754-813; Sahl ben Rabban al-Ṭabari, 800; Sind ben Ali, 829-832; Shabbethai b. Abraham Donolo, 949; Ḥasan, judge of Cordova, 972; Abraham b. **BIBLIOGRAPHY:** L. M. Lewisohn, *Geschichte und System des Jüdischen Kalenderwesens*, Leipzig, 1853 (Schriften herausgegeben vom Institute zur Förderung der Israelitischen Literatur); also the works of Steinschneider, Scaliger, and Ideler. J. A.

**CALENDAR** (Hebrew, "Lual" = table): A systematic arrangement of the days of the year. The Jewish calendar reckons the days from evening to evening, in accordance with the order observed in the Biblical account of the Creation, "And there was evening and there was morning, one day" (Gen. i. 5). This principle is repeated in the Pentateuch several times (Ex. xii. 18; Lev. xxiii. 32). With nightfall the day, the period of twenty-four hours, ends, and a new one commences. The day, in this sense of the word, consists of two periods, that of light and that of darkness: the former is called "day"; the latter, "night." So that the term "day" is used in a double sense: (1) as the period of twenty-four hours, and (2) as daytime. Which of the two meanings the word carries in any particular passage of the Bible can easily be gathered from the context or from parallel passages (compare Bab. Suk. 43a).

The transition from day to night, from light to darkness, and vice versa, is gradual: in the one case it begins before sunset, and continues till after sunset; in the other, it begins before sunrise and continues till after sunrise. The two periods of transition are of undefined length, and are called, in Hebrew, "ereb" and "boqer" ("evening" and "morning"); compare Ruth iii. 14; Deut. xxiii. 11; Num. ix. 15). The period of transition is also called "neshef" ("dawn" and "twilight"; Prov. vii. 9; I Sam. xxx. 17; compare Berakot 3b) and "dimdude ḥammah"

(redness of the sun, Yer. Berakot iv. 1; Bab. *ib.* 9; and Rashi, *ad loc.*).

Nightfall, as the border-line between two consecutive days, is the moment when three stars of the second magnitude become visible ("zet ha-kokabim"); and the length of a day as opposed to night is, according to Neh. iv. 21, "from the rising of the morning" ("alot ha-shahar" or "alot 'ammud ha-shahar") "till the stars appear" ("zet ha-kokabim"; Berakot 2b). The short time before the actual appearance of the stars is regarded as a doubtful period, neither day nor night, and is called in rabbinic literature "ben ha-shemashot" (between the two suns), a euphemism for "bene ramshaya" (between the evenings; compare Mishnah Pesahim i. 1). The duration of the "ben ha-shemashot" is fixed by the Rabbis (Ṭur Oraḥ Ḥayyim, 261) to be thirteen minutes, thirty seconds before night.

An important element in the modern Jewish calendar is the announcement of zet ha-kokabim on Sabbaths, festivals, and fasts. The time that elapses between sunset and the appearance of stars varies from day to day and from place to place. It is determined by frequent observation, or by calculation. In the latter case, as well as in the former, the results found must be considered as the average time of zet ha-kokabim, which does not in each individual case agree with the result of direct observation.

It may be assumed that, under average conditions of the atmosphere, **Beginning of Night**, three stars of the second magnitude

become visible in the evening when the sun is seven degrees below the horizon. The calculation is based on the following three equations: (1)  $\cos \phi = \frac{\sin \alpha}{\cos L \cos D}$ . (2)  $\cos H = \tan D$

$\tan L$ . (3)  $\cos (H - x) = 2 \cos \frac{\phi + H}{2} \cos \frac{\phi - H}{2}$ .

[H = time in degrees from noon to sunset; D = declination of the sun;  $\phi$  = an auxiliary angle; x = time between sunset and the moment when the sun reaches 7 degrees below the horizon.] In higher latitudes, where during the summer the sun does not sink below the horizon, and during the winter does not rise above it, the days are counted in summer from midday, *i. e.*, from one upper crossing of the meridian by the sun to the next crossing; in the winter, from midnight to midnight, *i. e.*, from one lower crossing of the meridian by the sun to the next.

In places of the same latitude the time of zet ha-kokabim varies according to their longitude. Like any other point of time, it travels at the rate of one degree in four minutes from meridian to meridian, along any of the parallel circles, and arrives again at the starting-point in twenty-four hours. The question now arises, which is to be considered the first meridian. At which point of the circle do the twenty-four hours begin? The problem has been discussed by R. Judah ha-Levi in his "Cuzari" (ii. 11), and although he seems inclined to take the meridian of Sinai or of Jerusalem as the first, the meridian 90 degrees east of Jerusalem was accepted as the starting-point.

The day is divided into twenty-four equal hours, beginning at 6 p. m. (In Pirke R. El. the "large hour," equal to two ordinary hours, is mentioned.)

This division affects only the calculation of the "molad" and "teḳufah" (beginning of a month and of the four seasons of the year). In other respects daytime is divided into twelve hours, which vary according to the length of daytime. Whether the night in Talmudic times was likewise divided into twelve hours, is not certain. While in daytime the

parts could easily be determined by the sun-dial, it became difficult after nightfall. Both in Biblical and Talmudical literature mention is made of a division of the night into three or four (Berakot 3a) watches ("ashmorah" or "mishmarah"; compare "the morning watch" [Ex. xiv. 24], "the middle watch" [Judges vii. 19], "the beginning of the watches" [Lam. ii. 19]).

The hour is divided into 1,080 parts ("halakim"). In the Yer. (Berakot i. 1) the following division is given: A day has twenty-four hours; one hour has twenty-four "onot"; the "onah" has twenty-four "ittot"; one "et" has twenty-four "rega'im." In the calculation of the molad only halakim are employed. Both the hour and the parts (halakim) are treated as constant; a day on the equator, which is equally divided between day and night—the night lasting from 6 P.M. to 6 A.M., and the day from 6 A.M. to 6 P.M.—being taken as the basis of the calculation.

The week consists of seven days, distinguished from one another by their place in the week. They are called the first day, the second day, the third day, and so on to the seventh day, which is besides called "Shabbat" (Rest) or "Yom ha-Shabbat" (Day of Rest). As the Sabbath is the most important day of the week, the term "Shabbat" denotes also "week"—that is, the period from one

**The Week.** Sabbath to the next; and a year of rest is also called "Shabbat" (or "shabu'a"). Friday, as the forerunner of Shabbat, is called "'Ereb Shabbat" (The Eve of Sabbath). The term "'ereb" admits of two meanings: "evening" and "admixture" (Ex. xii. 38); and "'Ereb Shabbat" accordingly denotes the day on the evening of which Sabbath begins, or the day on which food is prepared for both the current and the following days, which latter is Sabbath.

The idea of preparation is expressed by the Greek name *παρασκευή*, given by Josephus ("Ant." xvi. 6, § 2) to that day (compare Mark xv. 42; Luke xxiii. 54; Matt. xxvii. 62; John xix. 42). In Yer. Pesahim iv. 1 the day is called "Yoma da-'Arubta" (Day of Preparation). Another term frequently employed in describing the day is the Aramaic "me'ale" (bringing in, that is, the Sabbath). Saturday evening—i.e., the evening after the termination of Sabbath—is correspondingly called "Moza'e Shabbat" in Hebrew and "Appuḳe Yoma" in Aramaic ("leading the day out"). The name, originally given to Saturday evening, is also applied to denote the whole of "Sunday." Similarly, the sixth year, or the year preceding the Sabbatical year, and the eighth year, or the year following the Sabbatical year, are respectively called "'Ereb Shebi'it" and "Moza'e Shebi'it."

The same terms are also applied to the days preceding and following any of the festivals; as "'Ereb

Pesah," "'Ereb Sukkot," etc. The weekly Sabbaths are distinguished from one another by the lesson from the Pentateuch or by that from the Prophets, read on Sabbath. "Shabbat Bereshit," for instance, is the name of the first Sabbath after the autumn holy days, or the first Sabbath after Simḥat Torah, because on that Sabbath the section, or parashah, that begins "Bereshit" (Gen. i. 1) is read; and, similarly, the second Sabbath is called "Shabbat Noah," because the parashah beginning "Eleh Toledot Noah" is read on that day. Again, "Shabbat Nahamu" is the Sabbath after the fast of Ab, when Isa. xl., beginning "Nahamu" (Comfort ye), is read; and "Shabbat Shubah" is the

**Name of Sabbaths.** the Day of Atonement, when Hos. xiv., beginning "Shubah" (Return), is read. The names are based on the custom followed at present in all Orthodox congregations, prescribing the reading of the whole of the Pentateuch in the synagogue once every year. In the synagogues where the cycle of three years is adopted, these names do not apply. See SIDRA.

A difficulty with regard to the Sabbath is experienced by those who are traveling round the world. Journeying westward, they find the day longer than 24 hours; traveling eastward, they find the day shorter than 24 hours. When the starting-point is again reached, the former find that the  $a$  days of their counting are  $a-1$  ordinary days of 24 hours; while those who travel in an eastward direction find their  $a$  days equal to  $a+1$  ordinary days of 24 hours. Suppose the traveler in a westerly direction completes his journey on Friday evening according to his reckoning, he finds that at his starting-place it is not Friday but Saturday evening; and the traveler in the opposite direction, if he completes his journey on Saturday evening, according to his account finds that the day was counted in that place as Friday and not as Saturday. In the first case, therefore, the traveler has kept one Sabbath less than his brethren at home; in the second case, one Sabbath more.

The moon passes through her different phases in 29 days, 12 hours, 793 parts (halakim) of an hour. These phases serve as a measure of time (compare Ps. civ. 19); and the period covered by them is known as one lunar month. For practical purposes, however, the months are reckoned by full days and set in with the beginning of night. They contain either 29 or 30 days; in the first case the month is "haser" (deficient) by half a day; in the second, "male," over-full by half a day. The first appearance of the new moon determines the beginning of the month. At first a small and faint

**The Month.** are, like a sickle, can be seen by those endowed with good sight, from spots favorable for such an observation. It may, therefore, happen that in different places the reappearance of the moon is noticed on different days. In order to prevent possible confusion to the central religious authority, the chief of the Sanhedrin, in conjunction with at least two colleagues, was entrusted with the determination of New-Moon Day for the whole nation. See CALENDAR, HISTORY OF.

Although the Jewish calendar was thus regulated

by direct observation, the members of the court seem to have been in possession of a recognized system, called "Sod ha-'Ibbur"—("Ibbur" is the intercalation of a day in a month, making it thirty days, and of a month in a year. The principal object of the calendar was to regulate these two points)—which enabled them to test the accuracy of the evidence of the eye-witnesses, and which was probably resorted to on exceptional occasions (R. H. 20). There were times of persecution when the president and the Sanhedrin could not exercise their authority; times of trouble and war when neither witnesses nor messengers could travel in safety. On such occasions calculation had to be relied upon. The substitution of calculation for observation became gradually permanent, helping to maintain the religious unity of the nation, and insuring the uniform celebration of "the seasons of the Lord," independently of the vicissitudes of the times, as well as of the distance of Jewish settlements from Palestine. A permanent calendar, still in force, was introduced by Hillel II., nasi of the Sanhedrin about 360. It is uncertain what the calendar of Hillel originally contained, and when it was generally adopted. In the Talmud there is no trace of it.

Originally, the Hebrews employed numerals to distinguish one month from the other. The month in which the spring season ("Abib") commenced was the first month (Ex. xii. 2; Deut. xvi. 1), the other months being accordingly called the second, third, etc. A few traces of names of months are met with in the earlier books of the Bible: Abib, the first month (Ex. l.c.); Ziw, the second month (I Kings vi. 1); Etanim, the seventh month (*ib.* viii. 2); and Bul, the eighth month (I Kings vi. 38). In post-exilic books Babylonian names are employed; viz., Nisan, Iyyar, Siwan, Tammuz, Ab, Elul, Tishri, Heshwan, Kislew, Tebet, Shebat, Adar, and We-Adar.

Although the Hebrews reckoned by lunar months, it was provided that the first month should be in the spring (Ex. xii. 2, xiii. 4; Deut. xvi. 1). As the lunar year consists of twelve months, or 354 days, 8 hours, 876 parts, it is shorter, by 10 days, 21 hours, 204 parts, than the solar year, and

**The Year.** every two or three years the difference is equalized by the addition of a month, following the twelfth month. The year is then called a leap-year, and consists of 383 days, 21 hours, 589 parts. Various methods were suggested for the equalization of the solar and lunar years (see 'Ar. 8b *et seq.*; Pirke R. El. vii.; and Baraita of Samuel), but the cycle of Meton, or the Mahzor of the calendar of Hillel, prevailed. At first it was in the hands of the Sanhedrin to decide annually whether the year was to be a common year or a leap-year; and the decision was based on direct observation as to the signs of spring. In course of time, calculation was in this case also substituted for observation; and the sequence of common years and leap-years was permanently fixed.

The fact that the civil year included only complete days, as well as some other consideration, set forth below in the principles of the Jewish calendar, caused variations in the number of days, both in the common year and in the leap-year.

The following are the principles regulating the Jewish calendar: (1) The length of the astronomical lunar month is 29 days, 12 hours, 793 parts. (2) A synodical month has 29 or 30 days, and is accordingly "haser" (defective), or "male" (full). (3) The first of Tishri is the day on which the "molad" (conjunction) of Tishri has taken place, except: (a) When the molad is at noon or later ("Molad Za'ken"). (b) When the molad is on a Sunday, Wednesday, or Friday ("Adu" = אָדוּ). (c) When the molad is a common year is on Tuesday, 204 parts after 3 A.M. ("Ga'rad" = גָּרָד). (d) When the molad is on Monday, 589 parts after 9 A.M., in a year succeeding a leap-year ("Be'utakpaṭ" = בְּעוּתַקפֶּט). The exceptions ("dehiyyot" = postponements) were introduced to provide that the Day of Atonement should not be on Sunday or Friday ('Ar. l.c. p. 20), and that the seventh day of Tabernacles should not be on Saturday. Maimonides ("Yad," *Ḳiddush ha-Hodesh*, v. 7) attempts to explain these exceptions astronomically. The exception of Molad Za'ken provided that the first of Tishri should at least include six hours of the new astronomical month, in accordance with R. H. 20: "if the molad takes place before noon, the moon can be seen the same day near sunset"; and that same day was declared to be the first of Tishri. There was at least the possibility of experts discovering the small sickle of the moon six hours after the conjunction; and this possibility justified the authors of the calendar in fixing the day of the molad as the first of the new month, if the molad took place before noon.

An unsuccessful attempt was made by a certain BEN ME'IR (923) to substitute 12 hours, 642 parts for "noon" (compare A. Harkavy, "Zikron La'aharonim," and M. Friedlander, in "Jew. Quart. Rev." v. 196 *et seq.*).

(4) The molad of Tishri of the first year was on Sunday, 204 parts after 11 P.M. (5) A common year, consisting of twelve months, has 353, 354, or 355 days; a leap-year, consisting of **Principles of the Calendar.** thirteen months, has 383, 384, or 385 days. The effect of these variations is the variation in the length of the months of Heshwan and Kislew, which have 29 and 30 days, 30 and 30 days, or 29 and 29 days; the years are accordingly called "kesidrah" (regular), "shelemah" (perfect), or "haserah" (defective), and marked by the Hebrew letters ב, ט, and ה. These variations for the common year and for the leap-year, together with the changes as regards the day of the week on which the first of Tishri falls, are: בִּשְׁבַע וַיְהִי הַיּוֹם הַשְּׁבִיעִי and ז' for the common year, and בִּשְׁבַע וַיְהִי הַיּוֹם הַשְּׁבִיעִי and ז' for the leap-year; the letters ב, ג, ה, ז, denoting Monday, Tuesday, Thursday, and Saturday.

(6) In the cycle ("mahzor") of nineteen years the third, sixth, eighth, eleventh, fourteenth, seventeenth, and nineteenth are leap-years; the rest are common years. Nineteen lunar years with seven extra months equal nineteen solar years minus one hour, four hundred and eighty-five parts. Some count the seven leap-years of the cycle differently, because they begin the first year of the first cycle differently. The solar year in the Jewish calendar, according to Samuel of Nehardea, is the same as the

Julian year. According to R. Ada, the son of Ahabah (date unknown), it is  $12\frac{2}{7}$  lunar months = 365 days, 5 hours,  $997\frac{1}{15}$  parts (see Maimonides, "Hil. Kiddush ha-Hodesh," ix., x.). The year is divided into four equal seasons; and the beginning of a season is called in Hebrew "teḳufah." One teḳufah is distant from the next 91 days,  $7\frac{1}{2}$  hours, according to Samuel, whose theory has been adopted for ritual purposes.

As the Christian calendar is based on the solar year, and the Jewish calendar has only years of twelve or thirteen lunar months, the problem arises how to find for a given Jewish date the corresponding Christian date. The solution is as follows:

Given: Sept. 24, 3 A.M., the first teḳufah of Tishri, being 12 days, 20 hours, 204 parts before the first molad of Tishri. What is the Christian date of the molad of Tishri 5661 (1901)?

Solution: 5660 = 237 cycles (of 19 years) and 17 years. The excess of 1 solar year over 1 lunar year = 10 days, 21 hours, 204 parts; of 19 solar years over 1 cycle = 1 hour, 485 parts.

In 237 cycles the excess = 17 days, 22 hours, 405 parts; in 17 years the excess = 17 days, 19 hours, 870 parts.

Deduct 12 days, 20 hours, 204 parts from the sum, and 12 days, 21 hours, 1071 parts remain as the excess of 5660 solar years over 5660 lunar years; i.e., the molad Tishri of 5661 is 12 days, 21 hours, 1071 parts before Sept. 24, 3 A.M. = Sept. 11,  $\frac{1}{2}$  min. after 5 A.M. (old style), or Sept. 24, 5 hours,  $\frac{1}{2}$  min. (new style).

The date of the first of Tishri is not necessarily that of the molad Tishri. According to rule 3, it depends on the day of the week on which the molad takes place, whether the first of Tishri is the day of the molad, or one or two days later. In order to find the day of the week for the molad Tishri, proceed in the above example as follows:

The first molad Tishri was 2 days, 5 hours, 204 parts. The excess over complete weeks is in a common year 4 days, 8 hours, 876 parts; in a leap-year, 5 days, 21 hours, 589 parts; in a cycle of 19 years, 2 days, 16 hours, 595 parts; in 237 cycles, 11 common years, and 6 leap-years, it amounts to 0 days, 5 hours, 885 parts; added to the initial 2 days, 5 hours, 204 parts, the total is 2 days, 11 hours, 9 parts; i.e., the molad Tishri 5661 is on Monday,  $\frac{1}{2}$  min. after 5 A.M., and the first of Tishri is on the same day, Monday, Sept. 24.

Gauss ("Monatliche Correspondenz von Freih. v. Zach," v. 435) gives the following formula for finding the Christian date for the fifteenth of Nisan of the year A A.M.:

$12A + 17 = 19D + a$ ;  $A = 4E + b$ ;  $M$  is an Integral and  $m$  is a fraction;  $M + m = 32.0449932 + 1.5542418 a + 0.25 b - 0.09317794 A$ . Explanation of the equation: Let  $M, m, a, b, c$ , have the same significance as above.  $T$  = initial date of Nisan 1 (the day of the molad) of the year 1 A.M. with the hours and halakim of the molad Tishri of the year 2 (i.e. March 33, 583);  $K = \frac{\text{lunar month}}{19}$ ;  $L = \frac{1 \text{ h. } 485 \text{ h.}}{19}$ . Then  $M + m = T - (A - 1)7K - (A - 1)L + (6 - 1)0.25 = T - (A - 1)(19 - 12)K - \text{etc.} = T + K(12A - 12) - \text{etc.} = T + K(12A - 2) - 10K - \text{etc.} = T - K(12A + 17) - 10K - \text{etc.} = T - 10K + K(12A + 17) - AL + L + 0.25 b - 0.25. T = 10K + L + 14 = 32.0449932$ ; and  $-0.25$  is disregarded in order to increase the value of  $M$  by 6 hours and thus to exclude Molad Zaḳen; and addition or subtraction of a multiple of 19 does not alter the result.

Further,  $M + 3A + 5b + 5 = 7F + c$ . If  $c = 2, 4$ , or 6, the fifteenth of Nisan is on the  $(M + 1)$ th day of March; if  $c = 1$ ,  $a > 6$ ,  $m > 0.63287057$ , — on the  $(M + 2)$ th of March, and if  $c = 0$ ,  $a > 11$ , and  $m > 0.89772376$  Nisan 15 is on the  $(M + 1)$ th of March; in all other cases, on the Mth of March.

This formula is intended to determine on which day of the week the Mth of March falls: the excess of days over complete weeks is 1 day in ordinary years, 2 days in leap-years, or 5 days in every

4 years. The first of March of the year 1 was on Saturday; the excess of days over complete weeks from the first of March of the year 1 to the Mth of March of the year A is  $6 + M + \frac{5}{7}(A - b) + (b - 1) = M + \frac{1}{2}(\Delta - b) + 5 + b$  (because addition or subtraction of a multiple of 7 does not alter the result)  $= M + 3A - 2b + 5 = M + 3A + 5b + 5$ .

In order to facilitate the comparison of the two systems of dates, tables are appended which show the date for each day in 1,000 years from the year 1001 to 2000. In Table I. the first column gives the years of the common era; the second column, those of the era of the creation (according to Jewish tradition, the asterisks indicating the leap-years); in the third columns the letters "r," "p," and "d" indicate whether the Hebrew year is regular, perfect, or defective; the next column has the figures 2, 3, 5, 7 to indicate whether the first of Tishri is

on Monday, Tuesday, Thursday, or Saturday. The last column gives the difference between the standard dates of Table II. and the actual dates of the year in question; e.g., 1110 C.E. or 4870\* A.M. p. 7—7 (i.e., the year 1110 C.E.) corresponds to 4870 A.M., which is a leap-year having 13 months, and perfect, having 385 days, the first of Tishri, Saturday, and 7 days before Sept. 4.

This difference has to be added to the Christian date if that is sought from the given Jewish date, and deducted from the Jewish date if the latter is sought from the given Christian date. As regards the Jewish date between Nisan and Elul of the year x, or the Christian date between March and December, use the difference given for  $x + 1$ ; otherwise that for the year x.

Table II. contains the Jewish and Christian dates of one year, beginning first of Nisan, and March 11; and having Tishri 1 on Sept. 4. As the Christian year is longer than the Jewish common year, the table has been extended to the end of Nisan of the succeeding year. From Kislew onward there are three lines for each month, marked "r," "p," and "d." and according as the year is regular, perfect, or defective, the one or the other line is to be used. In We-Adar "r," "p," and "d" have each two lines, marked respectively "c" and "l," the one for the common Christian year, the second for the Christian leap-year. The first column of dates contains the dates for the first days of Rosh-hodesh of those months which have two days Rosh-hodesh. The difference between the dates of any particular year and this standard table (Table I, 5th column) applies to the months from Tishri onward in that year, and also to the months from Nisan to Elul of the previous year (and from January to March of that year, and from March to December of the previous year). The dates which fall on the same day of the week as the first of Tishri are printed in heavier figures. The following two examples illustrate the use of the tables:

Maimonides was born Nisan 14, 4895; find the corresponding Christian date. In Table I. is found 4895 A.M. corresponds to 1135 C.E.; and that the number of difference for 4896 (which also applies to the last six months of 4895) is 6. In Table II. the fourteenth of Nisan corresponds to March 24; add 6, and the result is: March 30, 1135. The first of Tishri, according to Table I., was on Tuesday, and the fourteenth of Nisan, occupying the fifth place from the date in heavy figures, was on Saturday.

What Hebrew date corresponds to Aug. 15, 1520? Table I.: 1521 = 5281 27 9. Table II.: Aug. 15 = Elul 10; Deduct 9. Hence: Aug. 15, 1520 = Elul 1, 5280.

According to Table I., the first of Tishri is on Thursday, and in Table II. Elul 1 closely precedes the date printed in heavier figures. Elul 1, 5280, was on a Wednesday.

There are two cycles: the large cycle ("mahzor gadol") of twenty-eight solar years, and the small cycle of nineteen lunar years. In twenty-eight solar years the tokufot (according to Samuel) complete their course of variations as regards the hour of the day, and the day of the week; and New-Year's

Day (Jan. 1) follows exactly the same order every twenty-eight years as regards the day of the week. The cycle of nineteen lunar years (the cycle of Meton) determines the sequence of common years and leap-years in the Jewish calendar, because nineteen lunar years with seven extra months of seven leap-years approximately equal nineteen solar years.

Thirteen small cycles, = 247 years, form the cycle ("iggul") of Rabbi Nahshon. This cycle has almost an exact number of weeks, only 905 parts being wanted to complete the last week. The first of Tishri after 247 years falls on the same day of the week for a long period, but by no means forever, on account of the deficiency of 905 parts; nor does the same order of the years as regards their characteristics repeat itself after 247 years.

The cycles of "shemittah" (seven years), of year of release, and of "yobel" (fifty years = jubilee), do not affect the Jewish calendar.

The following is a list of the dates of Jewish festivals and fasts:

- Nisan 14. Eve of Passover.
- 15. Passover, first day.
- 16. " second day.
- 17-20. Hol ha-mo'ed, or middle days.
- 21. Passover, seventh day.
- 22. " eighth day.
- Iyyar 18. Lag ba-'omer, or thirty-third of the 'Omer.
- Siwan 6. Shabu'ot or Pentecost, first day.
- 7. " second day.
- Tammuz 17. Fast of Tammuz.
- Ab 9. " Ab.
- Tishri 1. New Year, first day.
- 2. " second day.
- 3. Fast of Gedaliah.
- 10. Day of Atonement.
- 15. Tabernacles, first day.
- 16. " second day.
- 17-21. Hol ha-mo'ed, or middle days.
- 21. Hosha'na rabba.
- 22. Eighth-day Festival.
- 23. Rejoicing of the Law.
- Kislev 25. Hanukkah, first day.
- Tebet 10. Fast of Tebet.
- Shebat 15. New Year for trees.
- Adar 13. Fast of Esther
- 14. Purim } in common years.
- 15. Shushan Purim }
- Adar 14-15. Purim Katan }
- We-Adar 13. Fast of Esther } in leap-years.
- 14. Purim }
- 15. Shushan Purim }

**CALF, GOLDEN.** — **Biblical Data:** A portable image overlaid with gold, made by Aaron at Mount Sinai (Ex. xxxii.). As the text stands, it narrates how Moses had gone up into the mountain to receive the Ten Words, and remained forty days. When the people found his return delayed they asked Aaron to make for them gods which should go before them. At Aaron's request they took off the gold rings worn by the women and children in the camp. These he took and "fashioned it with a graving tool and made it a molten calf." An altar was built before it and a feast to YHWH celebrated.

Meantime Moses in the mountain had been warned by YHWH of the defection of the people, and he now came down. Much surprised and angered when he found what was actually going on, he cast the tables of the Ten Words to the ground and broke them. He took the calf—which seems to have really been of wood overlaid with gold—and burned it till the wood was charred, and then pulverized the gold and strewed it on the water of the brook they drank from. Moses then demanded of Aaron an explanation of his conduct, and received one truly Oriental in character (see Ex. xxxii. 22 to 24). Then, seeing that the people were "broken loose," Moses called for all on the side of YHWH to come and stand by him, whereupon all the sons of Levi gathered themselves together, and at the command of Moses went throughout the camp and slew 3,000 men—apparently all those that had been leaders in the image-worship. At Moses' command these avengers then gathered to receive the blessing of YHWH.

On the morrow Moses assembled the people, and told them that they had grievously sinned, but that possibly he could atone for them. He then prayed that he might himself be punished and the sin of the people forgiven, and was told by YHWH to go on and lead the people forward; that those who had sinned should bear their own sin, and that one day He would punish them.

J. JR. G. A. B.  
— **In Rabbinical Literature:** Next to the fall of man, the worship of the golden calf is, in rabbinical theology, regarded as the sin fraught with the direst consequences to the people of Israel. "There is not a misfortune that Israel has suffered which is not partly a retribution for the sin

of the calf" (Sanh. 102a). The very seriousness of the offense leads the Rabbis to find circumstances extenuating the guilt of the people, and to apologize for Aaron's part in the disgraceful affair. The initiative was taken not by the Israelites, but by the Egyptians who had joined them at the time of the Exodus (Ex. xii. 38), and who were the source of a great deal of trouble to Moses and the Israelites (Num. xi. 4); for the Egyptians, when the time fixed for Moses' descent from the mountain had expired, came in a body—forty thousand of them, accompanied by two Egyptian magicians, Yanos and Yambros, the same who imitated Moses in producing the signs and the plagues in Egypt—to Aaron, and told him that it was the sixth hour of the fortieth day since Moses left, the hour he named for his return (a play upon the word בָּשֶׁטַח, Ex. xxxii. 1 = בָּשָׁה שֵׁשֶׁת, "the six [hours] have come"), and that Moses had not yet returned: he would never come. Satan took advantage of the opportunity, and brought gloom and confusion into the world to alarm the people. Then he told them Moses was dead, as the sixth hour had come and he had not arrived. Seeing he was not believed, he showed them a bed in the mountain with Moses in it. This convinced them that Moses was really dead; and they demanded that Aaron make them a god (Shab. 89a; Tan., Ki Tissa, 19). Thereupon Hur stepped in and rebuked them for their ingratitude to the God who had performed so many miracles for them. He was at once put to death, and Aaron was threatened with the same fate. The latter saw that he must accede to their request, but he sought a device whereby the execution of their demand would either be made impossible or at least be delayed until Moses came; for he was not ensnared by the wiles of Satan. So he ordered them to bring the golden ornaments of their wives; knowing that the women would be more grateful to God, and would refuse to part with their jewels for idolatrous purposes. His expectation was realized. Their jewels could not be obtained; and the men had to give their own. Aaron had no choice but to put the gold into the fire. A calf came out alive and skipping!

One explanation is that this was due to the magical manipulation of the Egyptian sorcerers. Another is more ingenious: On the night of the Exodus, Moses searched all Egypt for Joseph's remains, but could not find them. At last Serah, the daughter of Asher, pointed out to him the place in the Nile where the Egyptians had sunk an iron chest containing Joseph's bones (Tan., *l.c.*; Ex. R. xli. 7). Moses took a splinter, wrote on it the words עֲקֵה יִשְׂרָאֵל ("Come up, ox"; Joseph being compared to an ox; see Deut. xxxiii. 17), and threw it into the water, whereupon the chest rose to the surface (Tan., Beshallah, ii.; Tosef., Soṭah, iv. 7; Soṭah 13a). This splinter was secured by Micah, and when Aaron cast the gold into the fire, he sent the splinter after the gold, and as a result a calf came out (see MICAH, THE IMAGE OF).

Another reason given for this aberration of the people is that when God came down on Mount Sinai to give the Law, he appeared in the chariot with the four beasts of Ezekiel. These the people saw; and

it was one of them, the ox (Ezek. i. 10), that they made an image of and worshiped. This was one of the pleas Moses made to palliate the offense of the people (Ex. R. xliii. 8).

The tribe of Levi did not join in the worship of the calf (Yoma 66b). If all the people had abstained from worshipping it, the tables of stone would not have been broken, and as a result the Law would never have been forgotten in Israel, and no nation could have had any power over the Hebrews ('Er. 54a).

The mysterious way in which Aaron described the origin of the golden calf gave rise to superstitious beliefs; and it was ordained by the Rabbis that this part of the account of the golden calf (Ex. xxxii. 21-25, 35) should be read at public worship in the original, but should not be translated by the "meturgeman" (Meg. iv. 10; Tosef. Meg. iv. [iii.] 36; Yer. *ib.* iv. 75c; Bab. *ib.* 25b).

—**In Mohammedan Literature:** The story of the golden calf is mentioned in the Koran (suras xx. 88 *et seq.*, vii. 149 *et seq.*) as follows: "Thereupon [after he had received the Law on the mountain] Moses returned to his people, angry and afflicted, and said: ' . . . Did the time [of my absence] seem too long to you, or did you desire that wrath from your Lord should fall upon you because you have broken the promise given to me?' They answered: 'We have not broken our promise given to you of our own authority, but we were made to bring loads of the ornaments of the people, and we cast them [into the fire], and Al-Samiri did likewise.' And he brought forth unto them a living, beflowing calf.

And they said: 'This is your God and the God of Moses, but he hath forgotten him.' . . . Moses said: 'O Aaron, what hindered you, when you saw

them do wrong, from following me [to the mountain]; have you been disobedient to my order?' Aaron answered: 'Oh, son of my mother, do not lay hold of my beard or my head—behold the people made me weak and almost murdered me.' And Moses said: 'How about you, O Samiri?' He answered: 'I saw what they did not see, and I took a handful [of dust] from the footsteps of the messenger and cast it. Thus did my mind guide me.' Moses said: 'Go away, and this shall be your punishment in life that you say [to every one you meet]: "Touch me not"; and a threat is awaiting you which you shall not escape. And see, your idol which you have worshiped, we shall burn and throw the ashes into the sea' " (compare also suras ii. 48-51, 86, 87; iv. 152).

When Moses departed for Sinai he made Aaron his deputy. During the absence of Moses, Aaron reminded the people that the ornaments which they had were stolen booty, and told them that they must bury them in a common hole until Moses should decide what was to be done with them. This they did. Samiri threw a clod of the earth, which the horse of the messenger Gabriel had thrown up, on the spot where they had hidden their ornaments; and thereupon God brought forth the calf (Tabari).

This Arabic legend, in describing the fate of Samiri as that of a man compelled to wander, barred from all intercourse with his fellow-men, whom he

himself is bound to warn by his pitiful cry, "Touch me not," to come not near him, seems to be one of the earliest forms into which was cast the later story of the Wandering Jew current among Christians. Yet on the whole this assumption is inadmissible. Samiri according to Geiger, is identical with Samael. According to the Arabic commentators, however, and, lately, according to Fränkel ("Z. D. M. G." lvi. 73, with especial reference to Hosea viii. 5), Samiri is indebted for his name to the fact that he belonged to the Samaritan sect. Mohammed knew, perhaps, how much this sect was hated, and (according to the report of an old but evidently lost Midrash) made the seducer a Samaritan in spite of all chronology. So Baidawi (also Palmer's translation of this

sura) holds him to have been "the Samiri's Samaritan." This accounts at once Identity both for the rôle here ascribed to him, with and the fate meted out to him. Samael. Mohammed carried in his mind many rabbinical conceits, but in a much confused form. He had an indistinct impression of the rabbinical prejudices against the Samaritans, among which the fact that they worshiped an animal idol and poured out libations to an their holy mountain was not the least (Yer. 'Ab. Zarah v. 44d, at foot; IIul. 6a). But the fact that the idol imputed to the Samaritans was a dove and not a calf became confused in his recollection of hearsay rabbinical stories. It was enough for him to know that the Samaritans were looked upon by the Jews as idolaters or even worse (Yer. Ta'anit iv. 66b; Yer. M. K. iii. 83b, middle), to make the Samaritan the arch-seducer, and artificer, by "magic," of the idol. That the Jews would hold no intercourse with the Samaritans may also have been among the disjointed fragments of Mohammed's Biblical and rabbinical lore. Hence under the decree his "Samaritan" was condemned to wander and never to permit another to defile himself by close contact.

That not Aaron, but another, was the real culprit in the making of the calf is also reported in a rabbinical account (Sanh. 102, 2), according to which Micah (Judges xvii. *et seq.*) was its maker. The threatening of Aaron and the bleating of the calf are likewise founded on rabbinical sources (Sanh. 5; Pirke R. El. 45).

Before the expulsion of Samiri, Moses (in accordance with Ex. xxxii. 20 *et seq.*) ordered the calf to be reduced to dust and the powder mixed with their drinking-water (sura ii. 87). When they drank the water it caused them great pain, and they called upon Moses for help. Then Moses told them to slay one another (sura ii. 51). Thus 70,000 were killed. The Lord sent an intense darkness to prevent their seeing one another, so that recognition of the corpses should not induce them to forbear ("jalal al-din"). Finally, the crying of the women and children moved the heart of Moses, who prayed to God to stop the murdering; and his prayer was answered immediately.

—Critical View: As the Exodus narrative stands, it is clearly composite. For example, in vers. 7 Moses is warned that the people have sinned; and in verses 9 to 12 he seems to understand clearly what their sin is, and yet in verses 16 to 19 he is greatly surprised at what has occurred. Again, verses 7 to 12 represent Moses as praying for the sinners before he came down from the mount, while verses 30 to 31 represent him as praying practically the same prayer the day after the destruction of the image was over. Palpably the two are of different authorship. Again, verses 25 to 29 describe the vengeance that was executed on the sinners, while vers. 34 regards it as still future. Critics therefore regard the narrative as made up of strata from two documents (Jahvist and Elohist), though they do not altogether agree as to the points of division. The main stratum of the story is, however, thought to come from the Ephraimitish writer (Elohist), though there are a sufficient number of points in the story taken from the Jahvist to show that his work also contained the narrative.

The purpose of the original story seems to have been, as Budde thinks, to account for the selection of the tribe of Levi for the priesthood. A great crisis in the worship had arisen in which the Levites had stood for YHWH, and punished all that opposed themselves, so that they were consecrated to the service of the priesthood (see LEVI and the literature cited below). Many critics see in it a polemic against the calf-worship of Beth-el and Dan, and no doubt an Ephraimitish writer of the prophetic circles of the time of Hosea would shape the tale with a view to the religious reforms in which he was interested. It is probable that at this time there was introduced into the story the view that the offense punished by the Levites was the making of a calf; but it also seems likely that there underlies the present narrative a much earlier form of the tale, a form that pictured some other crisis in which the Levites distinguished themselves and thus were elected as the priestly tribe.

**CALF-WORSHIP—Critical View:** Among the Hebrews, as among the other agricultural Semites, the bull was associated with deity in a sacred character (see OX). The form in which this thought found expression in Israel was in their representation of YHWH by an image of an ox or bull made of gold (compare I Kings xii. 28). In consequence of the costliness of the metal, the images were small, and from their size, rather than from the age of the animal regarded sacred, were called "calves." In the earlier time the images were carved out of wood (compare Moore, "Judges," pp. 375 *et seq.*); but with the increase of wealth it became the custom to make them of gold. These golden images were cast in molds, and consequently were called "molten images." They seem to have been in use in the old nomadic times, since they are mentioned in the two

Covenant Documents (Ex. xxxiv. 17; xx. 23), whereas the older practise of making images of wood persisted more as a private custom. In the Decalogue (Deut. v. 8; Ex. xx. 4) the prohibition does not specify molten gods and those of silver and gold, but extends to all images representing YHWH.

It has been often held (for example, by Renan and Maspero) that this calf-worship was derived from Egypt; but that view is now generally abandoned. The Egyptians worshipped the living animal, and not an image; and the prevalence of bull-worship among agricultural Semites sufficiently accounts for the origin. Among the Hebrews, the bull was a symbol of strength (compare Num. xxiii. 22, xxiv. 7).

Ex. xxxii. attributes the making of a golden calf to Aaron at Mount Sinal (see CALF, GOLDEN). The critics assert that this is hardly possible; since the bull is the symbol of divinity only among settled agriculturists, and not among nomads such as the Israelites then were. The narrative in question is declared by them to be in reality a prophetic polemic against the calves of Jeroboam.

Jeroboam, in making the sanctuaries of Beth-el and Dan the recipients of his royal patronage, placed in them images of YHWH made of gold in this calf form, the fame of which went far and wide (compare I Kings xii. 23; II Kings x. 29; II Chron. xi. 14, 15). The Deuteronomic author of Kings attributes the origination of these representations of YHWH to Jeroboam, but this some critics question. Jeroboam, it has been assumed, simply revived an old custom; and it is probable that the silver image of YHWH in the Temple of Micah (Judges xvii., xviii.) was in this form. Similar images were perhaps in the Temple at Gilgal (Amos v. 4 *et seq.*; Hos. iv. 15, ix. 15, xii. 11 [12]; compare G. A. Smith, "Book of Twelve Prophets," i. 37), and at Samaria (Hos. viii. 5), though Wellhausen and Nowack are of the opinion that "Samaria" is in this latter passage used for the whole kingdom and not for the city.

The prophets of the northern kingdom inveighed continually against the rites connected with these calf-shrines; and with the overthrow of that kingdom they disappear. There are no traces of this form of calf-worship in the southern kingdom; though the twelve oxen on which rested the great laver in the Temple of Solomon (I Kings vii. 25; II Kings xvi. 17; Jer. lii. 20) are considered as evidence that there was some sacred character attached to the bull.

G. A. B.

**CALIFORNIA:** One of the United States of America on the Pacific coast. There exists no authenticated record of the activities of Jews in California prior to 1849. During that year, attracted by the discoveries of gold, large numbers of them ventured into the new El Dorado, scattering over the entire area of the gold-fields. (A partial list of the Jewish pioneers of California is given in Markens,

"The Hebrews in America," pp. 336, 337; but the list needs revision.) The constituent elements of the nascent Jewish communities came from every part of the world, including Australia, and some of them from the east and south of the United States. Divine services were held for the first time in San Francisco on Kippur Day, 1849, in a tent owned by Louis Franklin, and were attended by about ten persons (Leeser's "Occident," vii. 480; "Chronicles of Emanu-El," p. 16). The organization of the Jewish community was completed between July and October of the following year (see SAN FRANCISCO). While the San Francisco community is the oldest as regards the date or dates of its organization, it received, after the collapse of many of the mining ventures, large accessions from the Jewish settlers in the gold regions. Many Jews had found their way to the mines, notably along the Early Com- American river; and in Placer, Ama- munities. dor, and Yuba counties—then the centers of the gold excitement—and at every prominent point of settlement a Jewish "mining" congregation or benevolent society began to flourish. As most of these institutions have now passed out of existence, it may be well to preserve a partial record of them in this permanent form. For a complete list see "Emanu-El," Dec. 21, 1900, xi., No. 6.

**Sonora:** Hebrew Benevolent Society organized in 1852. A burial-ground is still cared for by the few families resident in the village.

**Stockton:** Congregation Re'im Ahubim organized 1853 from a previously existing society (1851) for the care of the Jewish insane. In 1852 there were three Jewish inmates in the State Asylum for the Care of the Insane at this place.

**Los Angeles:** In 1854 an Israelite named Carvalho, of Sephardic extraction, a member of General Fremont's expedition, settled in Los Angeles and suggested the founding of a benevolent society. Religious services were held as early as 1852 (see LOS ANGELES).

**Nevada City:** The Nevada Hebrew Society was organized in 1855. Objects: "To hold religious services, maintain a burying-ground for members and others, and assist the needy with pecuniary aid." In 1857 the society numbered twenty members.

**Jackson:** Congregation organized for the autumn holidays of 1856. At a meeting held April 18, 1857, it was decided to build a synagogue, the first erected in the mining districts. This synagogue still exists, but, owing to the migration of the members of the congregation, is subverted to secular purposes.

**Fiddletown:** Organization in 1857 of a Jewish society "for the furtherance of religious and humanitarian interests."

**Jesu Maria:** A mining camp in Amador county, where services were held by Jewish miners in 1853. In 1857 a society for "the maintenance of religious services and the care of the sick and poor" was organized; but the records were not kept, and details are not obtainable.

**Marysville:** Congregation B'nai B'rith (defunct) organized Nov. 8, 1857, a Hebrew benevolent society having existed since 1852. In Aug., 1860, the Jewish population numbered 23 families, exclusive

of 105 bachelors. At the present date the town contains four Jewish families.

**Sacramento:** Congregation organized 1857 out of previously existing societies, which had flourished since 1851 (see SACRAMENTO).

**Grass Valley:** A Jewish society organized Sept. 8, 1856, and a congregation for the autumn holidays of 1857.

**Shasta:** The Hebrew Indigent Sick and Burial Society organized March 1, 1857.

**Folsom:** Organization of the Hebrew Benevolent Society in 1859.

There existed Jewish burial-places which were owned by these extinct societies in Sonora, Oroville, Nevada City, Folsom, and Grass Valley; and these are piously cared for by the descendants of the settlers or families subsequently arrived. After 1870 most of the organizations mentioned became defunct, the population having either shifted to the new metropolitan centers or returned to the East. Out of a few of them small B'nai B'rith lodges were organized and incorporated with District No. 4 of that order. Congregations remain at the following points, besides the smaller ones given below: San Francisco (6), Los Angeles (2), Sacramento (1), Stockton (2), Oakland (2), San José (1), San Diego (1); total, 15.

The Jews were prominent in the organization of the new state of California. So far as the record

has been completed mention can be made of Solomon HEYDENFELDT, chief justice of the supreme court of California (1852-57); Henry A. Lyons, one of the first three justices of the same court; Washington Bartlett, alcalde of San Francisco in 1849, and governor of California in 1887; Elkan Heydenfeldt, brother of Solomon, and Isaac Cardoza, both members of the California legislature of 1852; Samuel Marx, United States appraiser of the port of San Francisco; Joseph Shannon, county treasurer of San Francisco in 1851; A. C. Labatt, an alderman of San Francisco in the same year; besides a large number of business men. Of the latter there may be mentioned the brothers Seligman, William, Henry, Jesse, and James, of San Francisco, afterward eminent in finance; Louis Sloss and Lewis Gerstle, of Sacramento, afterward founders of the Alaska Commercial Company; and of Los Angeles the Hellman and Newmark families, the former now leading financiers, and the latter still one of the representative Jewish pioneer families of southern California.

During the mining period the commercial skill of the Hebrew traders developed relations with the East and with Europe (Soulé, "Annals of San Francisco"). The financial transactions of the early gold period are represented in part by the names of Hebrews like Benjamin Davidson, agent of the Rothschilds, Albert Priest of Rhode Island, Albert Dyer of Baltimore, and the three brothers Lazard, now composing the international banking house of Lazard Frères (Paris, London, and San Francisco); besides the Seligmans (see above), the Glaziers, and the Wormsers, all now in New York, but industrial and financial pioneers of California.

Out of the slenderest beginnings—for most of these

youths were not overburdened with means—came forth a number of the proudest business enterprises of the coast and of the United States. Moritz FRIEDLANDER, about 1870, was one of the grain kings of the country; Michael REESE, one of the extensive realty brokers; and Adolph SUTRO, an engineer, whose famous exploitation of the Comstock lodes by means of the Sutro tunnel has become an interesting chapter in the mining history of the United States. While many of the early commercial firms have passed away, others remain as monuments of pioneer industry and foresight, strong financial concerns worthily maintained by the second and third generations. The London, Paris, and American Bank (Sigmund Greenebaum, Richard Altschul) is still the agency of its founders, Lazard Frères; the Anglo-Californian Bank (Philip N. Lilienthal, Ignatz Steinhart) is the successor of the Seligman interests; and the Nevada Bank, the Union Trust Company, and the Farmers and Merchants' Bank of Los Angeles (Isaiah W. Hellman, Herman W. Hellman, I. W. Hellman, Jr.) are three institutions representing a number of financial interests of national magnitude and importance. The great coal-fields of the Northwest and of Canada

owe much to the exploitation of John **Pioneer Work in Alaska.** Rosenfeld; and the seal-fisheries of Alaska. other resources of that territory, were developed by Jewish successors of the Hudson Bay Company, the Alaska Commercial Company, and its more modern competitors, the North American Commercial Company (Herman Liebes, Isaac Liebes) and Blum & Roth (Leon Blum and Daniel Roth).

The Jews of California are similarly prominent in the professions. In medicine and surgery the leading names are: Hirschfelder (internal medicine), one of the physicians to the late President McKinley; Rosenstirn (surgery and gynecology); Rogensburger (skin diseases); Newmark (nervous diseases); Abrams (lung diseases); Barkan and Arnold (eye and ear). Among the younger physicians of California of Jewish extraction Joseph Erlanger, now a professor of physiological chemistry at Johns Hopkins University, Baltimore, may be prominently mentioned.

In law the names of Charles L. Ackerman, Jacob B. Reinstein, Jesse W. Lilienthal, and Marcus Rosenthal represent a class of attorneys remarkable for legal acumen and capacity. In the arts Ernest Peixotto, scion of an illustrious family, has become an eminent representative of his people, and in economics his sister, Dr. Jessica Blanche Peixotto, holds an established position.

The universities and colleges have their quota of Jewish scholars. Among them are the following:

In the University of California, College of Agriculture, Jaffa; Department of Mathematics, Wilczynski; German faculty, Putzker, Senger; Semitic Department, Voorsanger, Margolis; medical faculty, D'Ancona, Levison; board of regents, Hellman, Reinstein. In the faculty of Cooper Medical College are Hirschfelder, Barkan, and Harris. In music, Jacob H. Roswald, Cantor Edward J. Stark, Henry Heyman, Landsberger, Sigmund Beel, and Louis Lisser (professor of music at Mills's Seminary) represent

abilities recognized throughout the West. Louis Sloss until his recent demise was treasurer of the University of California, being succeeded by Lewis Gerstle; Julius Jacobs is the subtreasurer of the United States at San Francisco, and Herman Silver was director of the United States Mint at Denver, Col.

The bench of California now has Max C. Sloss, one of the youngest, but acknowledged to be one of the most learned, of the judges of the superior court of San Francisco. Julius Kahn is now member of Congress from the Fourth California District (San Francisco).

In journalism, M. H. De Young, proprietor of the San Francisco "Chronicle," is well known; and in literature the native authoress, Emma Wolf, needs but to be mentioned. In San Francisco alone more than one hundred Jewish women are enrolled as public-school teachers ("Directory of the Department of Public Schools of the City and County of San Francisco," June 1, 1902), and there are several in the high school faculties. The name of Leon Sloss may be added as one of the regents of Stanford University.

This rapid review of the present commercial and professional status of the Jews of California is also fairly indicative of their social standing and of the excellent character of their communal institutions. In 1901 the Jewish population of California did not exceed 28,000, of which San Francisco alone numbered 17,500. This comparatively small body of people is competently organized; every aspect of communal work, including the religious, having strong representation. The following table, though by no means complete, furnishes an indication of the organized strength of the Jews of California:

JEWISH ORGANIZATIONS OF CALIFORNIA,

The outbreak of the Spanish-American war (April 22, 1898) revealed the patriotic spirit of the Jews of California to a marked degree. The first volunteer regiment ordered to the Philippines was the First California (James F. Smith, colonel).

**Californian Jews in War.** This regiment, of nearly 1,200 officers and men, contained at the time of its departure fully *eight per cent* of Jewish volunteers, or nearly one hundred men, mostly natives of San Francisco. At the battle of Cavite, fought shortly after the arrival of the regiment, the first to fall was Sergeant Morris Justh

(First California). The incomplete state of preparation of the First California, and the general desire to equip the regiment in a manner befitting the dignity of the state, resulted in the organization of the California Red Cross Society, of which Jacob Voorsanger was one of the founders and the first vice-president, and Sarah Sloss and Betty Lowenberg members of the board. Subsequently, for the comfort and accommodation of the army in the Philippines, the Manila Library Association was organized, of which Jacob Voorsanger was the first president and Betty Lowenberg the distributing manager. The latter still retains her position. The First California returned from the war with distinction, bringing back one of its Jewish members (Percy L. Badt) as a commissioned officer. In the California Artillery and the Sixth California, Jewish commissioned officers likewise rendered valuable service in the mobilization of their respective commands, among them Emanuel M. Heller, Eugene Baer, and Morris Greenwald. In the state militia of California, Brig.-Gen. Hyman P. Bush is a field-officer with more than twenty years of continuous service.

**CALIFS: 1.** The attitude of the first Mohammedan rulers toward their Jewish subjects was as much regulated by circumstances as had been that of Mohammed himself. The latter, having subdued the Jewish tribes of Arabia and located them in the northern borders of the peninsula, permitted them to remain on condition that they gave half their harvest to the Moslem authorities. This was a policy of utility pure and simple, as the Jewish farmers were needed to help feed the Moslem armies. The same policy was upheld during the reign of Abu Bekr, and his successor Omar was guided by two principles, viz., to preserve the mobility of his army by not allowing them to turn agriculturists, and to banish all non-conformists from Arabia proper. This course of action resulted in the tolerance of non-Moslem settlers in the adjoining provinces, while imposts and land-taxes laid upon them secured the revenues of these conquered territories for the benefit of the commonwealth.

Omar wrought another and more important change in the fortunes of his Jewish subjects. He transplanted them to Kufa, a town he had founded in the year 15 of the Hegira, in 'Iraq, the ancient Babylon. Apart from the imposts laid upon them, they were obliged to wear a special garb to distinguish them from the Faithful, and were further bound to grant three days' hospitality to every traveling Moslem, to permit the latter to enter their places of worship, and to abstain from riding on horseback and from using expressions derogatory to Islam. A Moslem legend relates (Tabari, p. 2403) that at the conquest of Jerusalem Omar was greeted by a Jew as the friend of Elijah. This legend conveys the

idea that the Jews of Palestine considered the Moslem victory a relief from the persecutions to which they had been exposed under the Byzantine régime. The Jews of Homs also looked forward to the conquest of their city by the Moslems (Beladhori, ed. De Goeje, p. 137). During the siege of Caesarea a Jew named Josef is said to have led the Arab warriors through a subterranean passage into the town which contained 100,000 of his coreligionists. According to another legend, the convert Ka'ab al-Ahbar predicted Omar's death three days before the latter was assassinated (Ibn al-Athir, iii. 38; concerning Abdallah ibn Saba see i. 43).

**2. Omniads:** The government of the califs of the house of Omayya was guided by principles unlike those of their predecessors. Religious interests gave way to dynastic considerations. Civil war and party strife increased. The unity of the Moslem religion was broken by deep schisms. The Jews profited by these conditions in that the heads of the various

political and religious factions had no leisure in which to disturb them. They and not only became reconciled to the new **Fatimites.** order of things, but took part in the spiritual life of the Moslems and in the rise of literary activity among them. The physician Maserjawihi of Bassora translated (683) a medical work from Syriac into Arabic (Steinschneider, "Z. D. M. G." lii. 428 *et seq.*). In Irak the Jew Somair struck coins for the calif 'Abd al-Malik, but was put into prison and threatened with death by the tyrannical governor Hajjaj.

**3. Abbassids:** See JEWISH ENCYCLOPEDIA, i. 39.

**4. Fatimite Califs in Egypt:** With the conquest of Egypt many Jewish communities came under the Mohammedan rule. Amr b. al-Asi, the conqueror of the country, is said to have reported to Omar that he found in Alexandria alone 40,000 Jewish taxpayers (Calcashandi, tr. by Wüstenfeld, p. 44). Otherwise the Jews of Egypt, and of Africa in general, were not much in evidence for about two centuries. They seem to have enjoyed comparative peace under the various dynasties which strove to detach the North-African provinces from the commander of the Faithful. Ziadat Allah, the last Aghlabide prince, appointed the well-known Isaac Israeli (the Elder) his physician-in-ordinary. When the Aghlabide rule was overthrown, Isaac passed over into the service of the conqueror, Obaid Allah, founder of the Fatimite dynasty. This was about the time that Saadia was born in Fayum. Obaid Allah himself was said to have been the son of a Jewish widow in Salamiyya. His name was Said, and when his mother married the Shiitic chief Al-Husain, his stepfather converted him to Islam. He was then declared to be the long-expected Imam, and, on coming to power, he assumed the name "Obaid Allah." This story is, however, supposed to have been concocted in order to discredit the descent of Obaid Allah from Fatima, the daughter of Mohammed.

Obaid Allah and his successors extended the Fatimite power at the expense of the califs of Bagdad. Al-'Aziz, who had made himself master of Syria, appointed the Jew Manasse and the Christian Isa his

lieutenants (996). Through the treachery of several Moslem citizens they were, however, subsequently deposed and thrown into prison. This change of policy toward the Jews assumed a much graver character under the next calif, the famous Al-Hakim. This monarch, suddenly seized by a fanatic zeal for his cause, developed what is called the "religion of the Druses" (see De Sacy, "La Religion des Druses," p. 303). One of the consequences of his doctrine was excessive severity in the treatment of non-Moslems. In 1004 he ordered Jews and Christians to wear black turbans, and black marks on their yellow costumes, and when bathing they were obliged to wear around the neck a bell, or a block of wood weighing five pounds and resembling a calf's head.

Jewish bathers were distinguished by wooden blocks. Jews were forbidden to ride on horseback, or to hire mules **Per-** **AL-HAKIM.** and asses from Moslem owners. They could use only wooden saddles, and were compelled to wear the bags on the right side. Moslems were forbidden to serve them or to allow them the use of their ships. Spies were employed to discover all transgressors of these restrictions. Many Jews adopted Islam, or pretended to do so, and many emigrated to foreign countries. Shortly before his death Al-Hakim relented, and permitted the Jews to return to their old faith.

About this time the brothers Abu Sa'd Ibrahim and Abu Naṣr Harun, sons of Abu Sahl of Tustar, were prominent merchants in Cairo. The calif Al-Zahir (1021-36) bought from Abu Sa'd a female slave, who became the mother of the next calif, Al-Mustanshir. In consequence of this, Abu Sa'd's influence became very great. At his recommendation Al-Mustanshir appointed Abu ul-Fath Ṣadaḳah, a converted Jew, as vizier. Some time afterward the latter caused Abu Sa'd to be assassinated. Under the rule of Al-Amir (1101-30) a Jew named Abu al-Manja was appointed governor of the district of Damietta. At the request of the citizens he built a canal, which was long known under the name of "the canal of Abu al-Manja" (Makrizi, i. 487; Calcashandi, p. 27). The next calif, Al-Hafiz, appointed the Jew Abu Manṣur his physician-in-ordinary; the latter, when commanded to poison the calif's son, refused to do so. In 1171 the Fatimite califate was declared extinct by Saladin. At about the same time Benjamin of Tudela visited Cairo and gave much interesting information about the religious and communal life of the Jews of the place, information which is corroborated and supplemented by later authors (see English translation by Asher).

G. H. HIR.

**CALIGULA (CAIUS CÆSAR AUGUSTUS GERMANICUS):** Third emperor of Rome; born Aug. 31, 12 C.E.; assassinated at Rome Jan. 24, 41. He soon displayed the characteristics which made his reign a blot on Roman history. He formed a strong friendship for the Jewish king Agrippa, who, as the Romans thought, influenced Caligula for the worse.

Later on, Caligula professed belief in his own divinity, and ordered altars to be erected to himself and worship to be paid to him. In Alexandria the Roman governor, A. Avillius Flaccus, tried to force this worship on the Jews, and made their disobedi-

ence a pretext for persecuting them. He even suppressed an address of homage which they purposed sending to Caligula. The governor was suddenly removed in the autumn of 38, and the condition of the Jews under his successor, C. Vitrasius Pollio, until the death of Caligula, is unknown.

The discord between the Jews and the heathens of Alexandria continued. In the year 40 both sent delegations to Caligula, in order to present the matter to him and to win his good-will.

**Jewish Delegates** Philo headed the Jewish embassy, and Apion that of the heathen. A report of the mission by Philo has been preserved, though not in the original; and an alleged report of the heathen delegation is found in the collection of papyri at Berlin, which Wilcken intends to edit ("Hermes," xxvii. 474). The mission ended unfavorably for the Jews. Helicon, a base favorite of Caligula, assisted the Alexandrians to thwart the Jews. Caligula ultimately consented to receive the embassy, but treated them with the utmost contumely and insult. They were obliged to follow at his heels while he interspersed orders to his gardeners with ribald remarks on the Jewish religion. Naturally no redress ensued from such an interview.

Meanwhile, Caligula's madness almost caused calamity to the Jews of Palestine also. The heathens of Jamnia, a seaport largely peopled with Jews, provoked the latter and exhibited their own loyalty by erecting an altar in honor of Caligula. Forthwith the Jews demolished it. Herennius Capito, the procurator, reported this to Caligula, who, infuriated, sent an order that his image be placed in the Temple at Jerusalem. Petronius, the governor of Syria, was ordered to mobilize half of his army in Palestine in order to enforce this command (39-40).

**Trouble in Palestine.** Petronius, anticipating a serious conflict, endeavored either to gain the assent of the Jews to the imperial command or to secure the revocation of the latter. When the news of Caligula's intention spread through Palestine, it occasioned general mourning. A large delegation appeared before Petronius at Ptolemais, his headquarters, and their mournful petition produced a deep impression on him. Later, a similar deputation came before Petronius at Tiberias and was joined by Aristobulus, Agrippa's eloquent brother. In the mean time, however, Agrippa had arrived at Rome, and at a banquet given by him to the emperor, he succeeded in inveigling the latter into a virtual revocation of his order. Afterward the letter of Petronius, asking the emperor for an annulment of his order, arrived; Caligula was incensed at the audacity of the governor, and regretting his former action, laid plans for introducing his statue into the Temple surreptitiously, and sent an order of immediate suicide to Petronius. This message did not reach its destination until after the receipt of the news of Caligula's assassination at the hand of Cassius Chæreas. It is possible that the day of his death (22 Shebat) was instituted as a memorial day at Jerusalem.

**CALIMANI, BARUCH:** Italian publisher; lived in the second half of the sixteenth and at the beginning of the seventeenth century at Venice. He issued the work of his teacher, Eliezer Ashkenazi, "Ma'ase Adomai" (Venice, 1583), and Moses Alshech's "Torat Moshel" (*ib.* 1601), adding rhetorical prefaces to both works.

L. G.

I. BER.

**CALIMANI, SIMḤAH (SIMON) BEN ABRAHAM:** Venetian rabbi and author; died at Venice Aug. 2, 1784. He was a versatile writer, and equally prominent as linguist, poet, orator, and Talmudist. During his rabbinate Calimani was engaged as corrector at the Hebrew printing-office in Venice. Among the great number of books revised by him was the responsum of David ben Zimra (RaDBaZ), to which he added an index, and the "Yad Haruzim" (on Hebrew versification) of Gerson Lefez, enriched with interesting notes of his own.

Calimani was the author of the following works: (1) "Il Rabbino Morale-Toscane," an Italian translation of the Mishnah treatise Abot (in collaboration with Jacob Saraval, Venice, 1729, often reprinted); (2) "Kelale Diḳduke Leshon 'Eber," a Hebrew grammar inserted at the end of the Bible, edited at Venice, 1739; (3) "Grammatica Ebraea," an Italian translation of the preceding work, Venice, 1751; Pisa, 1815; (4) "Kol Simḥah" (Voice of Joy), an allegorical drama, with Jealousy, Folly, and Wisdom as the heroes, Venice, 1758; (5) a Hebrew Italian dictionary, left unfinished.

Calimani was liberal in his religious views, and took part in the campaign directed by Wessely against the delivery of casuistic lectures (pilpul) in the synagogues (see Zunz, "G. V." p. 459, note c).

**CALITAS:** A Levite who had married a foreign wife, but, at the solicitation of Ezra, repudiated her (1 Esd. ix. 23). Ezra x. 23 gives "Kelaiah," a glossator, however, giving the collateral form "Kelita." He is perhaps identical with the "Calitas" who helped Ezra to explain the Law (1 Esd. ix. 48; in Neh. viii. 7 given as "Kelita").

G. B. L.

**CALIXTUS II. (GUIDO OF BURGUNDY):** One hundred and sixty-seventh pope (1119-24); born at Quigney, near Besançon, France; died at Rome Dec. 12, 1124. His attitude toward the Jews was a very favorable one. On entering Rome, after having defeated the antipope Gregory VIII., Calixtus issued a bull which prohibited the forced conversions of Jews. Calixtus said, "From constrained adoption of Christianity, a faithful adherence to that religion can not be expected." He also forbade, under pain of excommunication, the infliction of bodily

or pecuniary injuries on Jews who had not been legally condemned by a tribunal; they were not to be hindered in the exercise of their religion, nor were their cemeteries to be defiled. This bull served as a model to the subsequent popes who were favorably inclined toward the Jews. It was mentioned in the bull "Sicut Judæis" of Innocent IV., and in that of Eugen IV.

**BIBLIOGRAPHY:** Stern, *Urkundliche Beiträge zur Stellung der Päpste zu den Juden*, i. 43; Watterich, *Pontificum Romanorum*, etc., ii. 138; Vogelstein and Rieger, *Gesch. der Juden in Rom*, i. 219.

I. Br.

**Calenberg, Johann Heinrich:**

Professor of theology and philology, and promoter of conversionist enterprise among the Jews; born of peasant parents at Molschleben Jan. 12, 1694; died July 11, 1760. In 1735 he was appointed professor of philology in the University of Halle, and in 1739 professor of theology. From his youth he cherished the idea of working for the conversion of the Mohammedans; but later he devoted himself to missionary work among the Jews, and established, in 1728, the Institutum Judaicum, to which he attached a printing-office. In this office he printed the Gospel and other Christian books in the Judæo-German dialect, and distributed them among the Jews. He also sent missionaries to other European countries, and was a patron of converted Jews. His plans for the conversion of Mohammedans were resumed some what later, but in these he utterly failed. The Institutum Judaicum existed until 1791.

**"Calling Up."** See ALIYAH.

**Callirrhoe:** Hot springs on the western side of the Dead Sea, near the Zerka Maim (Buhl, "Geographie des Alten Palästina," p. 123; Smith, "Historical Geography of Palestine," p. 571). Josephus describes the springs ("Ant." xvii. 6, § 2) as running into the lake of Asphaltites and as being fit to drink. They were, however, strongly sulfurous, and for this reason were used for medicinal purposes to cure skin diseases. It was to Callirrhoe that Herod went for relief from his ailment, without, however, securing it. Modern travelers have noticed at Callirrhoe four large and many small springs. Sulfurous vapors are given off by the waters, the temperature of which is the same as that of the waters of Tiberias, 49° C. The ground around the sources is covered with reeds, thorns, and wild palm-trees (Robinson, "Physical Geography," pp. 163-164). Neubauer supposes that by the appellation בִּירָם ("Biram"), mentioned in the Talmud (Sanhedrin 108a) among the thermal places, is meant Callirrhoe, which is situated in the vicinity of Baris; and that בִּירָם is a corrupt reading of בִּירָם. In fact, Josephus speaks of a locality called Baaras situated in a valley in the vicinity of Machaerus, where flames rising from the earth can be noticed in the night. This locality is called by Eusebius and Jerome Baris or Baru. "Callirrhoe" is the post-Biblical name of Lasha.

**BIBLIOGRAPHY:** Neubauer, *La Géographie du Talmud*, pp. 37, 254.

J. Jil. G. B. L.

**CALLISTHENES:** A Syrian who was believed to have been concerned in the burning of the gates of the Temple during the persecution to which the Jews were subjected in the reign of Antiochus Epiphanes (I Macc. iv. 38). When the Jews were celebrating their subsequent victory over Nicanor (135 B.C.), they captured Callisthenes, who had taken refuge in a little house, and burned him to death. "And so he received a reward meet for his wickedness" (II Macc. viii. 33). E. G. H.

**CALM, MARIE** (pseudonym, M. Ruhland): German authoress and advocate of women's suffrage; born at Arolsen, Germany, April 3, 1832; died at Cassel, Germany, Feb. 22, 1887. She managed a seminary for indigent girls at Cassel, and was one of the original members of the Allgemeine Deutsche Frauenverein. Aside from her books on household economics and etiquette, she was the author of: "Bilder und Klänge," poems, Cassel, 1871; "Weibliches Wirken in Küche, Wohnzimmer, und Salon," Berlin, 1874; third edition, 1882; "Leo," novel, 1876; "Ein Blick ins Leben," Stuttgart, 1877; "Wilde Blumen," novel, Bremen, 1880; "Echter Adel," Stuttgart, 1883; and "Bella's Blaubuch," Leipsic, 1883.

**CALMANSON, JACOB (JACQUES).** See POLAND.

**CALMER, LIEFMANN:** Baron of Picquigny, an important personage in French Jewry of the eighteenth century; born in Aurich, Hanover, in 1711; died in Paris Dec. 17, 1784. His full synagogal name was Moses Eliezer Lipmann ben Kalonymus—in German, "Kallmann," whence the family name "Calmer" is said to have been derived. From "Lipmann" undoubtedly came "Liefmann." Calmer first settled in The Hague, and later left Holland for France, in which country he obtained letters of naturalization.

On April 27, 1774, Pierre Briet, lord of Benapré, as straw-man for Calmer, bought from the creditors of the duke of Chaulnes the barony of Picquigny and viscounty of Amiens for 1,500,000 francs. A little later it was declared that the purchase was made in the name of Liefmann Calmer, full citizen of The Hague and naturalized Frenchman. He thus became baron of Picquigny and viscount of Amiens. Calmer had three sons, two of whom were guillotined during the Reign of Terror; the third dying without issue in 1824.

J. H. Gut.

**CALMET, AUGUSTIN:** French Catholic theologian, historian, and Biblical scholar; born 1672 at Mesnil-la-Horgne in Lorraine; died 1757 in Paris. In 1688 he entered the Order of St. Benedict, and began his studies. Coming across the smaller Hebrew grammar by Buxtorf and some other Hebrew books in the abbey of Münster, he undertook the study of the language, assisted by the Protestant

pastor Faber. From 1696 to 1704 he was instructor in the abbey of Moyaen-Moutier, and there wrote his commentary on the Bible. After various ecclesiastical appointments, he became abbot of Senones (in Lorraine), in which position he remained until his death.

Of Calmet's numerous works (a full list of which is given by Fangé, and in the "Nouvelle Biographie Générale") only four need be mentioned here: (1) His first exegetical work, on which rests his reputation as a Biblical scholar, is the commentary "La Ste. Bible en Latin et en Français avec un Commentaire Littéral et Critique" (1707; 4th ed., 1729). He was the first prominent Catholic theologian who abandoned the allegorical and mystical method of interpretation, and undertook to give the literal sense of the Bible words. The value of this book lies, however, not so much in its exegesis as in the dissertations attached to it, which treat such topics as Hebrew poetry, music, weights and measures, medicine, marriage customs, burial customs, military organization, circumcision, the Saqhedrin, and Hebrew schools and sects, and are, for his time, remarkably full and judicious, though now superseded. They were published separately under the title "Dissertations qui Peuvent Servir de Prolégomènes à l'Écriture Sainte" (1720). An extract of his Bible editions is known under the title "Bible de l'Abbé Vence." The "Trésor d'Antiquités Sacrées et Profanes" (Paris, 1722, three volumes) is substantially the same work. An English translation of a selection from the dissertations appeared in 1727, and they were also translated into other European languages.

(2) Closely connected with the commentary is his "Dictionnaire Historique et Critique Chronologique, Géographique et Littéral de la Bible" (1722; Supplement, 1728), which is chiefly a collection of the explanatory remarks in the commentary. Many editions and many translations of it have appeared, among them a good translation into English by D'Oyly (1732), and one by Taylor (1795, 1800) with a worthless appendix (American reprint of Taylor, 1812). The best-known American edition is that of Edward Robinson (1832), in which Calmet's material is condensed and revised. This dictionary was the first work of the kind, and was the point of departure for all others. (3) "Histoire Sainte de l'Ancien et Nouveau Testament et des Juifs," etc. (1718; English translation, 1740), extending to the destruction of Jerusalem. (4) "Histoire Sacrée et Profane Depuis le Commencement du Monde Jusqu'à Nos Jours" (1735), coming down to 1720. In these works, which are mere compilations, Jewish history is treated sympathetically; but Calmet's ignorance of Talmudic and rabbinical literature makes his account of the times after the destruction of Jerusalem meager and misleading, and he has no sympathy whatever with the post-Biblical thought of the Jews.

T.

**CALNEH:** 1. City, mentioned together with Babylon, Erech, and Accad as forming part of the

Babylonian kingdom of Nimrod (Gen. x. 10). The exact site of Calneh is unknown. It has been identified with Nippur (modern Niffer) by Rawlinson on the ground of the Talmudic statement, "Calneh means Nippur" (Yoma 10a); but the basis is insufficient. Nor is the concurrent testimony of Targum, Eusebius, and Jerome sufficient for the equation Calneh = Ctesiphon. In recent times it has been proposed to identify Calneh with Kulunu (Zarilab, Zirlaba); but this, too, is doubtful. 2. A city mentioned in Amos vi. 2, which may with some probability be identified with Kullani, conquered by Tiglath-pileser III., and represented by the modern Kullanh, about six miles from Arpad.

R. W. R.

**CALÑI, SAMUEL BEN MOSES:** Turkish rabbi of the fifteenth century; born at Arta in the Morea. Calñi is the author of responsa entitled "Mishpete Shemuel," and printed by his nephew at Venice, 1599-1600. He was the son-in-law of Benjamin b. Mattathias, author of "Benjamin Ze'eb," as the latter says in a responsum.

**BIBLIOGRAPHY:** *Kore ha-Dorot*, 34b, 39a; Michael, *Or ha-Hayyim*, p. 283.

L. G.

V. C.

**CALNO:** A city mentioned with Hamath and Samaria, and compared to Carehemish (Isa. x. 9). Its identity is doubtful. It is named "Calneh" in Amos. vi. 2; but must not be confused with the Calneh of Gen. x. 10. The latter was a Babylonian city, held by some to be the modern Niffer, by others to be Ctesiphon. The Septuagint seems to have disregarded this distinction; for, according to it, the tower was built in our Calno. The towns mentioned in Isaiah being Syrian, and not Babylonian, precludes the identification of Calno (Calneh) with Kullani, captured by Tiglath-pileser III. in 738. Neither can it be regarded as the Kullani mentioned among the cities and territories north of Assyria, given in the geographical list in "Western Asiatic Inscriptions," ii. 53, No. 1, line 6b. More acceptable is the equation Calno = Kulnia, which occurs in Assyrian tribute-lists (*ib.* ii. 53, No. 3). Delitzsch suggests that the Biblical city stands for Kullanh, situated about six miles from Arpad. Pinches accepts this identification as "the best," and this opinion is indorsed by Cheyne, Winckler, Field, Hommel, and others.

E. G. H.

**CALUMNY:** Evil-speaking; a sin regarded with intense aversion both in the Bible and in rabbinical literature. The technical term for it in the latter is לִשְׁן הָרַע (leshon hara', "the evil tongue"). In the Bible the equivalent words are: רְבָה, meaning "talk" in a sinister sense; רָכַל, the "merchandise" of gossip with which the talebearer goes about; and רָנַל, a verb, denoting the "peddling" of slander. As these words indicate, that which is condemned as "leshon hara'" denotes all the deliberate, malicious, untruthful accusations which have the purpose of injuring one's neighbor, that is, calumny

proper, and also the idle but mischievous chatter which is equally forbidden, though it is not slander.

In the Pentateuch evil-speaking of both kinds is expressly forbidden (Lev. xix. 16): "Thou shalt not go about as a talebearer among thy people," and (Ex. xxiii. 1), "Thou shalt not raise a false report; put not thine hand with the wicked to be an unrighteous witness." Upon this the Rabbis comment (Mek. Ex. 20), "It is a warning not to receive or listen to evil reports." Of course, the most comprehensive commandment in connection with this is the ninth of the Decalogue: "Thou shalt not bear false witness against thy neighbor." In descriptions of corrupt society, calumny is always emphasized as a prominent feature. Jer. ix. 2, 3 speaks of those "that bend their tongues like bows for lies, every neighbor walketh with slanders"; and Ezek. xxii. 9, "In thee are men that carry tales to shed blood."

The Psalms and books of the Wisdom literature abound in descriptions of the terrible workings of this sin. Ps. **Prohibition.** l. 20: "Thou sittest and speakest against thy brother, thou slanderest thine own mother's son." Prov. x. 18: "He that hideth hatred with lying lips, and he that uttereth a slander, is a fool"; and Ps. ci. 5: "Him that slandereth his neighbor in secret I will cut off." Prov. xxx. 10: "Calumniate not a servant unto his master lest he curse thee and thou be found guilty." Eccl. x. 11: "Surely the serpent will bite without enchantment, and the man of the [evil] tongue is no better." And Eccles. xxviii. 12-26 contains an eloquent denunciation of the evil tongue, the gist of which (v. 18) is: "Many have fallen by the edge of the sword, but not so many as have fallen by the tongue." Specially characteristic is the repeated complaint of the pious because of slanderous persecutors. Ps. xxxi. 13: "For I have heard the slander of many, fear was on every side; while they took counsel together against me, they devised to take away my life" (compare Ps. xxxv. 11; Jer. xx. 10).

The man that abstains from evil speech is given the highest praise. Among the qualities which befit a man who dwells in Jehovah's tent is "that he uttereth no calumny with his tongue" (Ps. xv. 3). It is recommended as an indispensable condition for life rich in years and happiness. "Keep thy tongue from evil and thy lips from speaking guile" (Ps. xxxiv. 12, 13).

The Talmud and Midrash teem with references to the evils of calumny. In Gen. R. xxvi. 2 slander is compared to the venom of the serpent. "As this affects every part of the body, so does the slanderer wound the soul of mankind. As the serpent's venom injures from a distance, so calumny may be hissed forth by one living in Rome to slay one living in Syria. The slanderous tongue is called 'telitai' [threefold], as being a threefold murderer. It ruins the slanderer, the listener, and the maligned."

Its disastrous effects on a whole generation are suggested in the following (Gen. R. xxvi. 2): "The contemporaries of David despite their virtues go to battle and are defeated, because among them are Doeg and Ahitophel, who were eager for calumnies."

The men of Ahab's time, though idolatrous, go to battle and are victorious because there is no slanderer among them." And again

**Effects.** (Shab. 56b), "If David had not listened to the evil tongue (in reference to Meplibosheth, II Sam. xvi. 3, 4), the kingdom would not have been divided; Israel would not have served idols, and we should not have been driven from our land." The decree of condemnation of the generations of the desert that had tried God ten times (Num. xiv. 22) was finally sealed, and they were not to enter the Promised Land because the spies had brought slanderous reports (Num. xiv. 37) concerning the country ('Ar. 15a).

The heinousness of this sin is strikingly taught in sententious sayings. Midr. Yalk., Ps. ci. 5: "Of the slanderer, the Holy One says, he and I can not dwell together in the world." 'Ar. 15 b: "The slanderer denies God." Soṭah 42a: "Four classes will be excluded from the Divine Presence: scoffers, liars, hypocrites, and slanderers." And strongest of all ('Ar. 15b and Gen. R. lxx. 4), slander is equal in a moral sense to idolatry, adultery, and murder; and rather than commit any of them, an Israelite in time of persecution must forfeit his life.

So sensitive were the Rabbis to the possibilities of this sin in all men that they spoke of the "abak leshon hara" (the fine dust of calumny); that is, of

words which, while innocent, may lead **The "Fine** to calumny, and against which one **Dust of** must be on his guard (B. B. 165a; **Calumny.**" 'Ar. 16a). They therefore warned against extravagant praise of our fellow-man lest "by too much praise you provoke abuse." As a safeguard against the gossip habit they said ('Ar. 15b): "If a scholar, let him occupy himself with the study of the Torah; if a man of the people, let him cultivate self-depreciation."

Calumny appeared to the Rabbis to deserve special and severe punishment. They saw in leprosy its merited retribution ('Ar. 15b, and Ab. R. N. ix. 2). This conception was based on the account of the punishment of Miriam for speaking evil of Moses (Num. xii. 1, 19). Ingenious is their comment ('Ar. 16b) that, as the slanderer does the work of moral leprosy, separating husbands from wives, he is naturally punished by a disease that casts him out from society. They also (Shab. 36a and 36b) attribute quinsy to the sin of evil speech. According

to one rabbi (Yalk., Ps. ci. 5), the slanderer deserves stoning; another (Pes. 118a) vents his anger thus: "He who speaks evil of his neighbor, and he who listens, and he who bears false witness against his neighbor, deserve to be cast to the dogs."

It is characteristic of Judaism that it knows of no hero without a blemish; and as sins of speech are all-prevalent, because of human fallibility (B. B. 165a), there is a tendency in the Midrash to discover the best man's failure in the form of a sin of the tongue. So Joseph is punished for slandering his brethren (Gen. xxxvii. 2; Gen. R. lxxxiv. 7, and Yer. Peah, i. 1). In Yalk. on Isa. vi. 5 we are told that those who are leaders of the people are in danger of sinning through too severe censure. Thus Moses for saying "Hear ye, rebels" (Num. xx. 10-13);

Elijah for asserting (I Kings xix. 10), "The children of Israel have forsaken thy covenant"; and Isaiah for exclaiming, "And in the midst of a people of unclean lips I dwell," were all in some manner punished by God.

The frequent and passionate reiteration of the ethical and religious sanctions in Bible and Talmud against calumny are explained because its work in robbing men of their reputation is usually too subtle to be reached by the arm of the law. There are, however, two cases which could be reached by the civil authorities: The man who, because of some dislike, "brings up an evil name" (Deut. xxii. 13-19)

upon the woman whom he has married. If his accusation is found true, he must pay a fine of one "hundred (shekels) of silver," and "he may not put her away all his days." Comparing this fine with the amount that he who forces an unbetrothed virgin into sexual sin had to pay (Deut. xxii. 28), the sages in 'Ar. iii. 5 say, "From this we gather that sometimes evil speech is more severely punished than evil deed."

People whose malice leads them to plot the injury or death of another by deliberately bearing false witness against him (Deut. xix. 16-21), when their testimony was proved to be false by the process according to the traditional interpretation of showing that they were not present at the time and in the place with respect to which they bear witness, were condemned to receive the punishment which their testimony, if acted upon by the court, would have brought upon the falsely accused (see ALJIB).

The religious horror, the moral indignation, and penal severity with which "leshon hara'" (the calumniating tongue) was attacked during every stage in the development of Jewish thought, may be said to be the expression of the ethical principle (Ab. ii. 10), "Let the honor of thy fellow-man be as dear to thee as thine own."

**CALVO, EMANUEL:** Italian physician and Neo-Hebraic poet; born at Salonica toward the end of the seventeenth century; died before 1772. In early youth he went to Leghorn with his learned father, Raphael Calvo, and on Oct. 23, 1724, was graduated as doctor in Padua. Calvo practised medicine with considerable success at Leghorn, but inclined to the Cabala toward the end of his life. Several of Calvo's poems are included in A. B. Piperno's collection "Kol 'Ugab," Leghorn, 1846. He was an intimate friend of the poet Abraham Isaac Castello and of Moses Hayyim Luzzatto, who

wrote a eulogy of him in a Hebrew poem after his graduation, and subsequently corresponded with him. When Calvo died Joseph ben David wrote an elegy, which is published in his "Yeḳara de-Shakbe," Salonica, 1774.

**CALW, MEÏR.** See MEÏR CALW.

**CAMBRIDGE:** University town of England, and one of the earliest English towns inhabited by Jews. Fuller ("History of Cambridge," p. 8) fixes the date of the first Jewish settlement as 1073. The old synagogue was near the prison, but was given to the Franciscans (Brewer, "Monumenta Franciscana," pp. 17, 18). There is a tradition that the Round Church near St. John's College was a synagogue; and the parishes of All Saints and St. Sepulcher are still known as "in the Jewry." One of the earliest episodes mentioned with regard to the Cambridge Jewry is a fine inflicted upon Comitissa, a Jewess of Cambridge, for allowing her son to marry a Lincoln Jewess without the king's permission. It is probable that this Comitissa was the mother of MOSES BEN ISAAC HANASSIAH, the author of the "Sefer ha-Shoham." There is a grammarian known as Benjamin of Canterbury; but he is more likely to have been of Cambridge, since the Latin records make mention of a "Magister Benjamin" at Cambridge. No other prominent Jewish personage is known to have lived at Cambridge in early days; but it remained one of the more important of the Jewries up to the Expulsion, being the seat of an ARCHA.

In 1224 Henry III. granted the house of Benjamin the Jew to the town as a jail. This was on the site of the present Guildhall. The Jews of Cambridge do not seem to have suffered during the riots of 1189-90; but they were victims during the revolt of the barons in 1266.

Since the return of the Jews to England, the chief connection of Jews with Cambridge has been a few teachers at the university, like Israel Lyons (1739-75), S. Schiller-Szinessy, and Solomon SCHECHTER. The last-named raised the University Library collection of Hebrew manuscripts to the first rank by presenting to it the collection of fragments from the GENIZAH of Cairo, which he had collected during a scientific mission to that city. Professor J. J. Sylvester took high honors in mathematics in 1839, but was debarred from taking his degree by the university statutes. In 1869 Numa HARTOG

gained the position of senior wrangler, the highest mathematical triumph a student can obtain, and by this means helped to pass the University Tests Act which allowed Jews to take their degrees. Many Jewish students have obtained considerable distinction in the colleges and universities. Israel Abrahams is now (1902) reader in Rabbinic in the university. There is a small congregation in the town, which has a meeting-hall.

BIBLIOGRAPHY: Jacobs, *Jews of Angerin England*, pp. 4, 22, 374-375; Cooper, *Annals of Cambridge*, under the years 1215, 1224, 1266; Baker, *History of St. John's College*, pp. 26-27.

J.

**CAMEL:** The well-known ruminant, native in Asia and Africa. The word "camel" (Hebrew, נמל, *gamal*) is the same in the Assyrian, Samaritan, Aramaic, Syriac, Arabic, Egyptian, and Ethiopic languages. Together with the knowledge of the animal, its name was introduced into Greek (*κάμηλος*) and Latin (*camelus*), whence many modern languages

war; in Isa. xxi. 7, camel-riders were part of the force of the Elamites. The Israelites were forbidden to eat the camel (Lev. xi. 4; Deut. xiv. 7; see Bochart, "Hierozoicon," i. 11); it was the opinion of the Arabs that Jacob forbade it as food because it produced sciatica. As in Arabic, so also in Hebrew, the expressions "becker" (בכר, Isa. ix. 6) and "bikrah" (בכרה, Jer. ii. 23) denote the young, vigorous animals. In the first passage Targ. Yer. has "hognin" (הוגנין), a word that also in the Talmud and in Arabic means a young camel; in the second passage ינקא must, according to Bochart, be changed to נאקה, which in the Talmud and in Arabic means the female camel (see "Aruk," ed. Kohut, v. 378). The swift camel, or the dromedary, is called in the Talmud (Macc. 5a; Yeb. 116a) the "flying" camel.

The camel is also subject to rabies (see the Talmud Ber. 56a). Hul. 59a speaks of the distinctive teeth of the full-grown and of the young camel.

CAMELS LED AS TRIBUTE TO SHALMANESER.

(From the Black Obelisk in the British Museum.)

derived it (Hommel, "Die Namen der Säugetiere bei den Südsemitischen Völkern," pp. 144-146, Leipzig, 1879). Many passages of the Bible show that the camel was found especially among the peoples of the deserts bordering on the land of the Israelites (Judges vi. 5, vii. 12; I Sam. xv. 3, xxvii. 9, xxx. 17; Jer. xlix. 29, 32; Isa. lx. 6). The camels of the Midianites were decorated with little golden crescents (Judges viii. 21, 26). Camels constituted also part of the wealth of the Patriarchs (Gen. xii. 16, xxiv. 10; specially Job i. 3, xlii. 12), who used them as beasts of burden; in riding, a sort of cushion was used (Gen. xxxi. 34). For swift riding dromedaries were employed (Isa. lxvi. 20, כרכרות); in traveling across wide stretches of desert the treasures were packed upon the humps of camels (Isa. xxx. 6). King David had a special officer over his camels, named Obil (I Chron. xxvii. 30; compare Arabic *abil*).

Otherwise the camel is mentioned as a possession only in post-exilic times among the Israelites (Ezra ii. 67). In olden times the camel was also used in

The fat hump of a camel that has never carried burdens tastes like the meat itself (Mishnah and Gem. Hul. 122a). Camel's hair was made into clothing (Shab. 27a); but it must not be mixed with sheep's wool (Mishnah Kil. ix. 1). John the Baptist was clothed in a coarse garment of camel's hair (Matt. iii. 4; Mark i. 6).

On the Sabbath it was forbidden to tie camels together, because of the workaday appearance (Mishnah and Gem. Shab. 54a). Camel-drivers, who often formed entire caravans (Mishnah Sanh. x. 5; B. B. 8a), are frequently mentioned together with mule-drivers; Abba Judan gave much of his time to his camels (Yer. Hor. iii. 48a). The Talmud shows great familiarity with the characteristics of the camel: it has a short tail because it eats thorns (Shab. 77b); it mates in a modest manner (Midr. on Gen. xxxii. 16); in rutting-time it becomes dangerous (Sanh. 37b; compare Jer. ii. 24, where the same is said of the wild ass). The name "gamal" is also supposed to signify etymologically that the animal becomes easily enraged and is then vindictive.

A number of Aramaic proverbs about the camel are found in the Talmud. For instance, "In Media the camel can dance on a bushel-basket" (Yeb. 45a), meaning that in Media everything is possible; "as the camel, so the burden" (Soṭah 13b); "the camel

Camel on an Assyrian Cylinder.  
(From Hommel, "Aufsätze und Abhandlungen.")

asked to have horns, so his ears were cut short" (Sanh. 106a); "there are many old camels who must bear the burdens of the young ones" (*ib.* 52a). It has been suggested that the word "camel" (*καμήλος*) in Matt. xix. 24; Mark x. 25; Luke xviii. 25 does not mean a camel, but a *rope*; but in view of the Talmudic expression "elephant through a needle's eye" (Ber. 55b; B. M. 38b), this is not admissible.

J. JR.

S. KR.

**CAMONDO:** Well-known family of Jewish financiers and philanthropists of Spanish-Portuguese origin. Several centuries ago it established itself at Venice, where some of its members became famous by their scholarship and by the services which they rendered to their adopted country. After having lived for a long time at Venice, the Camondo family in the nineteenth century established itself in Constantinople.

**Count Abraham Camondo:** Italian and Turkish financier and philanthropist; born at Constantinople 1785; died at Paris, his place of residence, March 30, 1873. In 1832 he inherited from his brother Isaac (who died without children) a fortune, and managed it so wisely that at his death he was estimated to be worth 125,000,000 francs. While Venice was under Austrian rule, he received as an Austrian subject the title of Chevalier of the Order of Francis Joseph. When Venice again became an Italian possession, Camondo, as a Venetian citizen, presented

large gifts to several Italian philanthropic institutions, in recognition of which King Victor Emmanuel conferred upon him the title of count, with the privilege of transmitting it in perpetuity to the eldest son of the family.

Count Camondo's career in Turkey was an extraordinary one. He exercised so great an influence over the sultans 'Abd al-Majid and 'Abd al-'Aziz, and over the Ottoman grand viziers and ministers, that his name became proverbial. He was banker to the Ottoman government before the founding of the Ottoman Bank. It was he who obtained from the Porte a firman by virtue of which the privilege of possessing real estate in Turkey, which until then had been restricted to subjects of the Ottoman empire, was extended to those of foreign nations.

Profiting by this decree, Camondo erected such a large number of houses at Pera (Constantinople) that even to-day (1902) the family is one of the richest landholders in the Ottoman capital.

Camondo was especially active in behalf of his Eastern coreligionists. He established at Constantinople a central consistory for the Jews of Turkey, of which he was almost continuously the president; he introduced reforms into the communal administration; and he founded in 1858 an educational institution, the Institution Camondo, at Peri Pasha, the poorest and most densely populated suburb of

Figure of a Camel on a Monument (South Arabia).  
(From Hommel, "Aufsätze und Abhandlungen.")

the capital. Shops for tailoring and shoemaking were soon added. On account of this school its benevolent founder was excommunicated by certain fanatical rabbis, and he endured otherwise much vexation; yet it has flourished for thirty-two years, and trained the majority of the Jewish officials now in the service of the Ottoman government.

Dying at Paris at the age of eighty-eight, Camondo, according to his last wishes, was buried in his family vault in the Jewish cemetery at Haskeni (Constantinople). The Ottoman government held memorial services in his honor.

**Raphael Solomon de Camondo:** Born 1810; died 1866 at Constantinople. He left two sons, **Count Béhor Abraham de Camondo** and **Nissim de Camondo**, who died at Paris within a year of each other, in 1886 and 1887, respectively. Each of these two brothers left an only son: the first, **Count Isaac de Camondo**; the second, **Count Moses de Camondo**, both of whom are (1902) living in Paris.

**Solomon Camondo:** Turkish rabbi and man of letters; lived at Salonica in the second half of the eighteenth century; related to the Camondo family of Constantinople. He is the author of responsa, published under the title "Neharot Dammeshék," Salonica, 1772.

**CAMP** (מַחֲנֶה): A collection of tents (Judges vii. 13), or booths and huts (Neh. viii. 14), pitched or erected to give shelter to shepherds, travelers, or soldiers, sometimes overnight merely, or for many days or even months. Safety and a sufficient supply of water were the prime considerations determining the choice of location ("Pitched at the waters of Merom," Josh. xi. 5; compare also Judges vii. 1; I Macc. ix. 33). Security against sudden attacks by roving robbers (Bedouins) or other enemies was effected by establishing the camp on the side of a ravine or valley. Watches, moreover, were placed in three shifts for the night (Judges vii. 19; I Macc. xii. 27); and a garrison was left on guard when the main body of the campers went out to the combat (I Sam. xxx. 24). That the camp was usually laid out in a circle, a form of construction much affected by the modern Bedouin, may be inferred from the word "ma'gal" (I Sam. xvii. 20, xxvi. 5); though by many commentators and ancient versions this rare designation is explained as etymologically connected with the Hebrew word for "wagon," and on this basis the theory has been advanced that wagons surrounded the camp to increase the security and to insure ease of defense. It is impossible definitely to decide which of these interpretations deserves greater credence.

From Num. ii.—a chapter which the critical school would not accept as containing historical data—it would appear that in the construction of the camp a certain plan was followed in the grouping of the different tribes, which was indicated by flags with a fixed relation to the tabernacle at the halting-places. The descriptions by Doughty and others of the hadj to Mecca agree in reporting the observance of a similar arrangement marked by flags and lamps, or torches, for the pilgrims when on the march. Artificial defenses to add to the natural advantages of the chosen location, or to supply their absence, are also mentioned (I Sam. xvi. 1 *et seq.*).

In their anxiety to protect their flocks the early nomads were driven to erect permanent enclosures (stockades) in which to keep their herds overnight (Num. xxxii. 36), generally in the neighborhood of caves, near which a massive platform of loose large stones was built, whereon the huts of the shepherds were placed ("Migdal," "Migdal Eder"). The erection of these permanent shepherd camps must be considered as the first step toward the abandon-

ment by the Hebrews of the migratory life with its movable camps. Hence the proverb "from the watch-tower to the fortified city" (11 Kings xvii. 9, xviii. 8).

**CAMPANATOR.** See SCHULKLOPPER.

**CAMPANTON, ISAAC B. JACOB:** Spanish rabbi; born 1360; died at Penafiel in 1463. He lived in the period darkened by the outrages of Ferrn Martinez and Vicente Ferrer, when intellectual life and Talmudic erudition were on the decline among the Jews of Spain. The historiographers Immanuel Aboab ("Nomologia," ii. 2), Zaento ("Yuhasin," ed. Filipowski, p. 226b; compare "Seder ha-Dorot," pp. 27b, 28a), and Joseph b. Zaddik (Neubauer, "Anecdota Oxoniensia," i. 99) unite in designating Campanton as a gaon, Aboab stating that he was styled "the gaon of Castile." Among his pupils may be mentioned Samuel (ibn Sadillo) al-Valensi and Isaac Aboab. He left but one work, "Darke ha-Gemara," or "Darke ha-Talmud" (A Methodology of the Talmud), which is an important contribution to the subject, as it attempts to be a practical guide for those who are called upon to teach the Talmud. It was published at Constantinople, sixteenth century; Venice, 1565; Mantua, 1593; and Amsterdam, 1706, 1711, 1754; and newly edited by Isaac H. Weiss, Vienna, 1891.

**BIBLIOGRAPHY:** Grätz, *Gesch. der Juden*, 3d ed., viii. 217 *et seq.*; Jellinek, *מקראות גדולות*, p. 6, Vienna, 1878.  
G. H. G. E.

**CAMPEN, JOHN VAN:** Christian professor of Hebrew at Louvain and Cracow; died at Freiburg in Breisgau Sept. 6, 1538. He compiled a Hebrew grammar from Elias Levita's work, which ran through three editions (Cracow, 1534; Paris, 1539, 1543). He also commented on Psalms in a manner to earn the praises of Hupfeld ("Psalmen," iv. 474), and attached the commentary to a paraphrase which appeared at Paris, 1533; Leyden, 1534; Basle, 1548, etc. Campen was summoned to Cracow by the prince bishop, Peter Tomiki, on very favorable conditions.

**BIBLIOGRAPHY:** C. Siegfried, in *Allg. Deutsche Biographie*, ii. 739; Steinschneider, *Cat. Bodl.* col. 813; idem, in *Zeit. f. Hebr. Bibl.* ii. 95; idem, *Bibliographisches Handbuch*, No. 350 (also *Zusätze*, p. 350); F. L. Hoffmann, in Steinschneider, *Hebr. Bibl.* vii. 42.  
T. J.

**CAMPHIRE** (Hebrew, "kopher"); Arabic "hinna," whence English "henna"): A shrub growing to a height of between eight and ten feet, and bearing cream-colored and very fragrant flowers. The botanical name of the plant is *Laursonia alba*. In ancient times it grew very plentifully near Engedi (Song of Solomon i. 14). Tristram ("Natural History of the Bible," p. 339) reports having found it growing there. Various uses were made of camphire. Along with other fragrant woods (Song of Solomon iv. 13, 14) it was valued for its perfume. But it was utilized chiefly as a dye for the hair and the skin. In dyeing the skin, cloths were placed on the parts adjacent to and encircling those to be dyed. To these parts the powdered leaves, made into a paste by the addition of a little water, were

applied, and allowed to remain overnight. The stain lasted for three or four weeks. Mohammed (Hughes, "Dict. of Islam," p. 175) dyed his beard and recommended the practise to his followers: it has therefore become an established religious custom with Mohammedans.

G. B. L.

**CANAAN—Biblical Data:** Name of the son of Ham, and a brother of Cush (Ethiopia), Mizriam (Egypt), and Put (Phut), occurring in the geographical-ethnographical table, Gen. ix. and x. Originally the name "Canaan" was not an ethnic term. It belongs primarily to the vocabulary of geography; the curse pronounced upon its bearer for the misconduct of Ham demonstrating only the knowledge of the author that the dominant Semitic population of the land so designated was the deposit of a wave of immigration and conquest coming from the south. Originally an appellative (compare Moore, on the use of the article in Egyptian inscriptions, in "Proceedings of Am. Oriental Soc." 1890, lxvii. *et seq.*), it described some peculiar aspect of the country, and was only later transferred from the territory to the inhabitants.

Like most geographical terms in the Bible, "Canaan" is employed in a very loose and confusing manner; and it is almost impossible to establish definitely the limits of its application. In earlier times its range was probably very narrow; designating the strip of coast-line along the Mediterranean, more particularly the northern—*i. e.*, the Phœnician—part thereof. With this restriction "Kan'na" appears in the Egyptian inscriptions (Müller, "Asien und Europa," pp. 206 *et seq.*). But it was also applied to the whole coast district down to the Egyptian frontier (Philistea). Like the Greek "Palestine," which originally designated only the southern coast-line, "Canaan" was then extended to the adjacent highlands. In Josh. xi. 3 it covers the land from the foot of Mt. Hermon to the southern end of the Dead Sea, and also the territory west of the Jordan to the Mediterranean. It is doubtful whether the name was ever given to districts east of the Jordan. These, as "the land of Gilead," are generally put in antithesis to "the land of Canaan" (Num. xxxii. 29 *et seq.*; Josh. xxii. 9, 32). "Canaan" is the favorite appellation of the Jahvist, sometimes with the prefix "land" and sometimes without (Ex. xv. 15; Gen. xii. 5, xvi. 3; and elsewhere).

The etymology of the name is in doubt. After Augustine ("Ennarationes in Psalmos," civ. 7), it has been explained as designating lowland either in contrast to Aram, or to the mountainous highland looming beyond the coast-line and removed from the sea only by a narrow strip of "lower land" (Num. xiii. 29; Josh. xi. 3). The former implication is now generally abandoned; but the latter, though open to objections (see Moore, *l. c.*), may be provisionally retained. Canaan is geographically identical with the land of the Amorites. As such it is mentioned in the El-Amarna tablets, though it also occurs in them as "Kinahlu" or "Kinahna." See CANAANITES.

E. G. H.

—**In Rabbinical Literature:** The first of the seven sinners who made idols for the heathens, the other six being Phut, Shelah, Nimrod, Elah, Dinl, and Shuah. Canaan, with his six companions, brought precious stones from Havilah (Gen. ii. 11-12), and made of them idols, which at night shone as brightly as the sun, and which were endowed with a power so magical that, when the blind Ammorites kissed them, they regained their eyesight ("Chronicles of Jerahmeel," p. 167; compare KENAZ).

Canaan, in a certain sense, was predestined to this and similar offenses; for he was begotten by his father while in Noah's Ark, whereas God had commanded that the sexes should live separately therein (Gen. R. xxxvi.). Canaan was of so low and base a character that Ham, in the record of his wickedness, is designated "the father of Canaan," whereby father and son were ironically characterized as a "par nobile" (noble pair) (Gen. R. *l. c.*; Origen on Gen. ix. 18).

Concerning the curse of Noah upon Canaan, the Midrashim endeavored in different ways to give a solution to the question why Canaan

**Curse of Noah.** had to suffer for the sins of his father. The old explanation was that Canaan, not Ham, though he had in no sense

transgressed against his grandfather, had to be cursed by him because God had blessed Noah and his sons; and wherever the blessing of God rests there can be no curse (R. Judah, Gen. R. *l. c.*; Justin Martyr, "Dial. cum Tryph." cxxxix.). This explanation, however, was found to be defective; for it was contrary to Jewish sentiment to curse an innocent man; hence the new assertion that Canaan, like his father, transgressed against Noah.

There are different views as to the nature of Canaan's transgression. According to one, Canaan circulated the report that he saw Noah naked; another view is that he emasculated him that he should have no more sons (Gen. R. *l. c.*; Origen and Ephraem Syrus on Gen. x. 24, 25; more elaborated, in Pirke R. El. xxiii.).

Through the curse which Canaan brought upon himself, the low condition of slaves (Canaan's descendants) is to be explained; for par-

**Canaan the Father of Slaves.** ents exercise a strong influence, for good or for evil, upon the fate of their offspring. "Wo unto the sinners," comments a Midrash, "who bring evil upon themselves, their children, their children's children; in fact, upon all the generations that follow." Many of the sons of Canaan were worthy of being ordained as rabbis; but the guilt of their father barred them from such a career (Yoma 87a). God, however, is different from man. Man seeks to deprive his enemies of the means of subsistence; but God, though He cursed Canaan, made him a slave, that he might eat and drink of that which his master possessed (*ib.* 75a).

Canaan upon his death-bed left to his children the following rules of life: (1) "Let there be mutual love between yourselves," (2) "Love robbery and unchastity," (3) "Hate your masters, and do not speak the truth" (Pes. 113b). Not only by words, but also by deeds, Canaan exemplified to his sons

the life worthy of slaves. When Noah divided the earth among his three sons, Palestine fell to the lot of Shem. Canaan, however, took possession of it, notwithstanding the fact that his father and his children called his attention to the wrong he had committed. They therefore said to him: "Thou art cursed, and cursed wilt thou remain before all the sons of Noah, in accordance with the oath which we took before the Holy Judge [God] and our father Noah" (Book of Jubilees, x., end). Later, when the Jews, the descendants of Shem, drove out the Canaanites from Palestine, the land fell into the hands of its lawful owners.

Among the various tribes of the Canaanites were the Gîrgashites, who, on Joshua's demand, subsequently left Palestine and emigrated to Africa (Yer. Sheb. vi. 36c; Lev. R. xvii.). Many of the Canaanites concealed their treasure in the walls of their houses, that they might not fall into the hands of the Jews. But God commanded that, under certain circumstances, the houses should fall into ruins; thus the hidden treasure came to light (Lev. R. xvii.). The Canaanites furthermore, on hearing that the Jews had left Egypt, destroyed all crops, cut down the trees, demolished the houses, and filled up the wells, in order that the Israelites should come into possession of a wasted country. But God promised the children of Israel a rich and fertile land (see Deut. vi. 10-12). He therefore led the Jews for forty years in the wilderness; and the Canaanites, in the mean time, rebuilt what they had destroyed (Mek., Beshallah, i. [ed. Weiss, p. 28b]).

In the time of Alexander the Great the descendants of those Canaanites who had left Palestine at the request of Joshua, and had settled in Africa, sought to regain the Promised Land. Gebiha ben Pesisa, however, who appeared before the king in the interest of the Jews, showed that according to Scripture, by which the Africans traced their ancestry to Canaan, that ancestor had been declared the slave of Shem and Japheth. The Jews, therefore, not only had the right to hold the land of their slaves, but the Africans had to indemnify the Jews for the long time during which they had performed no service for them. In consternation, the Africans then fled to their homes (San. 91a).

In the literature of the German-French Jews of the Middle Ages the Canaanites and the Slavs were considered identical, owing to the sim-

**Medieval Views.** ilarity of the latter name with the German word for "slave" (A. Harkavy, "Die Juden und die Slavischen Sprachen," pp. 19-29; Kohut, "Aruch Completum," s. v. כנען). In Sifre, Deut. 306 (ed. Friedmann, p. 131b) the word כנען is used peculiarly; לִשָּׁן כְּנַעֲנִי (literally, "Canaanitish language") means probably "a mercantile expression."

**BIBLIOGRAPHY:** Bacher, in *Jew. Quart. Rev.* iii. 354, 356; Ginzberg, *Die Haggada bei den Kirchenvätern*, pp. 84-87. L. G.

**CANAANITES, THE:** The expressions "Canaan" and "Canaanite" (כְּנַעֲנִי, כְּנַעַן) are applied in the Old Testament sometimes to the collective non-Israelitish population west of the Jordan, or to the

land itself (Gen. xii. 5; Josh. xxii. 9; Ps. cvi. 38), and sometimes to a part of the population. Thus, the Canaanites are mentioned among other Palestinian tribes (Gen. xiii. 7, xv. 21; Ex. iii. 8); and the term is applied specifically to the inhabitants of the Mediterranean coast (Josh. v. 1) or to the tribes dwelling between that coast and the Jordan (Josh. xi. 3; Num. xiii. 29). As a designation for the coast inhabitants it is identical with "Phœnicians," and is thus used in a political sense in Isa. xxiii. 2. In Zeph. ii. 5 the name is applied to the Philistine population of the southern coast; but the accuracy of the text is not quite certain. Since the term "Canaanites" was also applied to the Phœnicians, it gradually obtained the meaning of "traders," as used in Isa. xxiii. 8; Ezek. xvi. 29, xvii. 4; Zeph. i. 11; Job xl. 30 (A. V. xli. 6); Prov. xxxi. 24; (possibly also in Zech. xiv.

21). The consistent use of the word is one of the distinguishing features of the Jahvist sources, while the Elohist uses "Amorite" in the same sense (compare AMORITE and HITTITE). In Isa. xix. 18, where the language of the Canaanites is referred to, the word "Canaan" is applied to the Jewish population of Palestine, but in Hosea xii. 8 it is an opprobrious epithet for idolatrous Israel, if indeed the text here be reliable.

The same double use of the word is found elsewhere. Thus, on Phœnician coins the word כנען is used to designate the Phœnician people. Similarly, Greek writers employ the word *χνα* (a short form = כנע) in reference to Phœnicia or to the ancestors of the Phœnicians (compare Schröder, "Die Phœnizische Sprache," p. 6). In the El-Amarna tablets "Kinahhu" (כנע) and "Kinahna" refer to the northern portion of the Mediterranean coast. In the old Egyptian inscriptions the word "Kan'na" is applied especially to the Phœnician coast; sometimes, also, to the whole shore of the Mediterranean. The word designating Canaanites in these inscriptions is, however, applied in a wider sense to the people of western Syria in general. This is similar to the Old Testament usage, but is more comprehensive.

In all probability the limited application of the word to the Mediterranean coast is the original, narrower use of the word found in so many inscriptions pointing in that direction. The designation was afterward applied to the inhabitants of the interior, either because the coast population was originally best known, or because they actually occupied a great portion of the mountainous district also.

**BIBLIOGRAPHY:** Moore, in *Proceedings of Am. Oriental Soc.* 1890, lxvii. *et seq.*; Zimmern, in *Zeit. Deutsch. Paläst.-Ver.* xiii. 138; W. Max Müller, *Asien und Europa*, pp. 205 *et seq.* E. G. H. F. Bc.

**CANADA:** A federation of provinces in British North America. The earliest authentic records of the Jews in Canada go back to the period when England and France were engaged in their final contest for the mastery of the northern part of the New World. While the batteries of Wolfe were thundering at the gates of Quebec, Amherst was closing in on Montreal with an army from the south. Among the members of his staff was Commissary Aaron Hart, an English Jew, born in London in 1724; and

among other Jewish officers of the invading hosts were Emanuel de Cordova, Hananiel Garcia, and Isaac Miranda. Hart was afterward attached to General Haldimand's command at Three Rivers, and at the close of the war settled in that city, and became seignior of Bécancour. About this time a number of Jewish settlers took up their residence in Montreal, including Lazarus David, Uriel Moresco, Samuel Jacobs, Simon Levy, Fernandez da Fonseca, Abraham Franks, Andrew Hays, Jacob de Maurera, Joseph Bindona, Levy Solomons, and Uriah Judah. Lazarus David was a large landowner, and was noted as a public-spirited citizen. Several of the others held offices in the army. There were also opulent and extensive traders among them; and altogether these early colonists were men of substance and strenuous character.

Soon joined by other bands of settlers, the Jewish community of Montreal found itself strong enough to organize a congregation in 1768, called "Shearith Israel." As a large majority of the early members were descended from exiles from Spain, they adhered to the rites of the Spanish and Portuguese Jews; and the congregation has continued to flourish under its original name, tenaciously adhering to its historic ritual.

**Synagogue** Founded at Montreal. Around this synagogue the main incidents of the history of the Jews of Canada centered for the major part of a century; for during many decades Shearith Israel remained the sole Jewish congregation in Canada. The first two scrolls of the Law were presented to it in 1768 by the Spanish and Portuguese Jews of London, and were at that date already accounted very old. These scrolls are still in use in the synagogue. At first the congregation met for worship in a hall in St. James street; but in 1777 the members built their first synagogue on a lot belonging to David David, at the junction of Notre Dame and St. James streets, close to the present court-house. See the DAVID family.

In 1775 the congregation acquired land for a cemetery on St. Janvier street; and the first person interred was Lazarus David (referred to above), born in 1734, and died a year after the purchase of the ground. His remains were subsequently removed to the present cemetery on Mount Royal, when the old one was closed, together with the original tombstone, dated 1776, which still stands and marks the oldest Jewish grave in Canada.

The Rev. Jacob Raphael Comex was the first regular minister of the Montreal Spanish and Portuguese Jews of whom there remains any record. He was their spiritual guide from 1778 to 1782.

The president (parnas) of the Montreal synagogue in 1775 was Jacob Salesby (or Salisbury) Franks, a relative of the Abraham Franks mentioned among the earliest settlers, who belonged to a family that played a most important part in those days in

Philadelphia, as well as in Montreal (see the FRANKS family). Other members of the Franks family remained in Canada, and supported the British in repelling Montgomery's invasion, notably Abraham Franks, Jacob Franks, Sr., and Jacob Franks, Jr., who were

members of the junta of the Spanish and Portuguese congregation of Montreal, and who were prominent in public affairs. Abraham Franks, who was born in 1721 and died in 1797, had a daughter Rebekah, who in 1775 married Levy Solomons. The latter, whose name figures among the earliest Jewish settlers in Canada, was parnas of the Montreal synagogue in 1788; and it was during his presidency that a regular set of by-laws was drawn up. The executive was styled the "junta," and consisted of a "parnas" (president), "gabay" (treasurer), and three others. Executive privileges were also accorded to past officers who were "Gentlemen of the Mahamad."

When Montgomery invaded Canada in 1775 he commanded Levy Solomons to act as purveyor to the hospitals for the American troops. At that time Solomons was engaged in very extensive trade operations between Michilimackinac, Montreal, Albany, New York, and London. He carried out his contract with General Montgomery faithfully; but when the defeat and death of the latter at Quebec led to the retreat of the American forces from Montreal, General Arnold, as he retired, took possession of quantities of supplies stored at Lachine, belonging to Solomons, for the maintenance of his troops. The services which Solomons rendered the Revolutionary forces were never indemnified by them. At the same time he was exposed to the resentment of the British, as one suspected of sympathy for the revolted colonists. After having been expelled with his family from his home in Montreal by General Burgoyne, and after enduring much hardship, he eventually gained the indulgence of the Canadian governor, and was permitted to return in peace to Montreal.

Solomons had numerous offspring. His eldest daughter, Mary (Polly), who was born in 1776 and died in 1826, married Jacob Franks, Jr., a renowned Hudson's Bay trader, who was one of the first to penetrate to the remotest parts of the Canadian Northwest. Another daughter, Rachel, married Henry Joseph of Berthier, the progenitor of a family distinguished in Canadian Jewish annals. Joseph's partner in Montreal was his brother-in-law, Benjamin Solomons, closely related to the Seixas and Nathan families of New York. His four sons, Jacob Henry, Abraham, Jesse, and Gershom, were prominent men of affairs and communal leaders. See the JOSEPH family.

In 1807 Ezekiel Hart, one of the sons of Commissary Aaron Hart, was elected to represent Three Rivers in the legislature. This at once raised the question of the civil status of the Jews in Canada, which till then had not been clearly defined. When the legislative chamber reassembled Jan. 29, 1808, Ezekiel Hart declined to be sworn in according to the usual form "on the true faith of a Christian,"

**The Struggle for Civil Rights.** but took the oath according to Jewish custom on the Pentateuch, and with the head covered. At once a storm of opposition arose, due, it is said, not to religious prejudice or intolerance, but to the fact that his political opponents saw in this an opportunity of making a party gain by depriving an antagonist of his seat. After

a heated debate it was decided to receive Hart's petition, in which he urged his right to take his seat, and claimed that his oath was in accord with the statute of 31st of George III. The chamber discussed the question in committee on Feb. 16 and 17, 1808; and on the nineteenth of the same month Hart was heard at the bar of the House. The next day the majority decided that he was not entitled to take his seat, and declared for his expulsion. The English minority vehemently protested against this; notably Richardson, who cited the statute of 13th George II., chap. vii., to show that Hart's expulsion was illegal. The British attorney-general was also quoted in support of this view of the question. Notwithstanding the adverse vote of the majority, Hart vigorously protested, and attempted to vote during several of the divisions; but he was again expelled. Having been again sustained by his constituents, the House proposed passing a bill to put his disqualification as a Jew beyond doubt. This roused the indignation of the governor, Sir James Craig, who was already in conflict with the Assembly; and, to put an end to their distasteful course, he dissolved the chamber before the bill could pass.

Years of agitation followed, and on Dec. 4, 1823, several Jews petitioned Parliament to authorize them to keep a register of births, marriages, and deaths. A bill in conformity with this petition was passed in 1829, and sanctioned by royal proclamation Jan. 13, 1831. Encouraged by this success, the Jews of Canada determined once more to try to secure recognition of their civil rights; and on Jan. 31 and Feb. 7, 1831, they sent an address, signed by Samuel Becancour Hart, to the legislature, petitioning to this effect. On March 16, 1831, a bill was introduced in the Legislative Assembly extending the same political rights to Jews as to Christians. Party passions no longer entered into the question; and the acrimony that had distinguished the debates of 1808 and 1809 had died out. The bill rapidly passed both the Assembly and the Council, and received the royal assent June 5, 1832. Since then Jews have sat in the Canadian Parliament, fulfilling their duties with credit and ability, the first to attain that distinction having been Mr. Nathan of British Columbia.

The land on which the first synagogue had been erected in Montreal having reverted to the heirs of David David on his death in 1824, it became necessary to demolish the old building; and the congregation then met for worship in a hall adjoining the residence of Benjamin Hart, at the corner of Recollet and St. Helen streets, Montreal. For a while the affairs of the congregation remained in this unsettled condition; but in 1826 an appeal was issued urging the members to build a new synagogue to

**The** replace the former one, and also pointing to the necessity for reorganization.  
**Chenne-** This appeal was signed by the presi-  
**Street** dent of the congregation, Benjamin  
**Syn-** Hart, one of the sons of Commissary  
**agogue.** Aaron Hart. His appeal had the desired effect: in 1835 a piece of land on Chenneville street was purchased; and there the Spanish and Portuguese Jews built their second synagogue, which they dedicated in 1838. The build-

ing was planned by Moses J. Hays, a nephew of David David, one of the trustees of the congregation, and in his day one of the most prominent citizens of the Canadian metropolis.

After the retirement of the Rev. Jacob Raphael Cohen, the position of minister of the Shearith Israel congregation was occupied tempora-

**Early** rily by Myer Levy, and afterward by  
**Rabbis.** Isaac Valentine. Dr. de La Motte also occasionally officiated. In 1840 the Rev. David Piza was appointed minister; and he held the office for six years.

In 1837-38 Canada was convulsed by the rebellion led by Papineau, Nelson, Brown, and Mackenzie; and among those who fought on the Loyalist side were several of the members of the Spanish and Portuguese synagogue. Two members of the David family held important cavalry commands under Wetherell at the action at St. Charles, and took a distinguished part in the battle of St. Eustache. Aaron Phillip Hart, grandson of Commissary Hart, temporarily abandoned his large law practise to raise a company of militia, which rendered valuable service. Jacob Henry Joseph and his brother Jesse were with the troops on the Richelieu and at Chambly; the former being entrusted by Sir John Colborne, the Royalist commander, with the bearing of despatches to Colonel Wetherell. When the struggle had terminated and peace had been restored, it was recognized that the members of Shearith Israel had done well toward upholding the unity and the prestige of the empire of which they were citizens.

In 1846 the Rev. Abraham de SOLA, LL.D., was elected rabbi of the Montreal Spanish and Portuguese synagogue. He held high rank among the Jewish leaders of his day.

**Dr.**  
**Abraham** In addition to his ministerial duties he  
**de Sola.** occupied the chair of Semitic languages and literature at McGill University, and was the author of many valuable works on theology, philology, and Jewish history.

During Dr. De Sola's pastorate a number of Montreal Israelites won distinction in public life, notably Dr. A. H. David, grandson of

**Some** Lazarus David, who was dean of the  
**Communal** faculty of medicine of Bishop's Col-  
**Workers.** lege; Samuel Benjamin, the first Jew elected to the Montreal city council;

and Jesse Joseph, son of Henry Joseph of Berthier, one of Canada's merchant princes, who gained prominence as the organizer and director of many of the most important Canadian public companies and institutions. His brother Jacob was connected with the promotion of early Canadian railways and telegraph lines, and another brother, Gershom, was the first Hebrew lawyer appointed a queen's counsel in Canada. All these men were officers of the Spanish and Portuguese synagogue, which also numbered among its active workers Goodman and William Benjamin, G. I. Ascher, and Jacob L. Samuel.

Up to the middle of the nineteenth century the Spanish and Portuguese Jews of Montreal maintained the only synagogue in Canada; but about the year 1845 a sufficient number of Jews had settled in Toronto to lead to the organization of a synagogue in

that city. Little, however, was accomplished until 1852, when a "bet hayyim" (cemetery) was purchased; and the Holy Blossom congregation was established. Mark Samuel, Lewis Samuel, and Alexander Miller did much to sustain the first Toronto congregation in its early struggles. Under the energetic presidency of Alfred D. Benjamin, during the closing years of the nineteenth century, it grew so greatly in strength and numbers that it became necessary to remove from its first building in Richmond street to its present (1902) commodious edifice in Bond street. The arrival of many Hebrew settlers has lately increased the number of Toronto's Jewish communal organizations; and, in addition to founding new congregations, the community has established excellent benevolent and literary societies.

In 1846 several Polish-Jewish families arrived in Montreal, and in the same year organized a synagogue, following the German and Polish, or Ashkenazic, customs. This led the Spanish and Portuguese Jews to seek and obtain (1846) a new act of

#### Polish-Jewish Settlers.

incorporation from the legislature, the German and Polish congregation being incorporated by the same bill. The new congregation, however, was short-lived; for although the Sephardim aided their brethren with subscriptions and the loan of a scroll of the Law, the Montreal community was as yet too small to support two synagogues, and the first Ashkenazic congregation was in consequence dissolved soon after its formation. In 1858 a second effort was made to organize a German and Polish synagogue in Montreal, this time with success. Abraham Hoffnung, M. A. Ollendorf, and Solomon Silverman were among the most active of its charter members; and the Rev. Samuel Hoffnung was its earliest minister. He was soon succeeded by the Rev. Mr. Fass, who in turn was followed by other prominent ministers. The first building of this congregation was in St. Constant street, and was dedicated in 1860. Its corner-stone was laid by David Moss, who belonged to a family that was active in advancing the welfare of this congregation during three decades. The act of 1846 was first availed of; but in 1902 the congregation secured a separate act of incorporation. In 1886 they removed to their new edifice in McGill College avenue.

Meanwhile the Spanish and Portuguese congregation had been deprived by death of the services of Dr. Abraham de Sola (1882). He was succeeded by his eldest son, Rev. Meldola de Sola. As the Spanish and Portuguese congregation continued to grow during the latter's incumbency, a new synagogue was erected in Stanley street, where the congregation moved thence from Chenneville street in 1890. The new edifice was of Judæo-Egyptian architecture, and owed its design to Clarence I. de Sola, one of the sons of Dr. Abraham de Sola, who was honorary secretary of the building committee. In 1890 Shearith Israel secured a new act of incorporation from the legislature.

Jewish congregations were meanwhile springing up in other parts of Canada. The discovery of gold in British Columbia in 1857 led to the settlement there of a Hebrew colony, which built a synagogue in Victoria in 1862. In 1882 a synagogue was

erected in Hamilton; and a couple of years later the Jews of Winnipeg organized two congregations. Halifax, St. John (New Brunswick), Ottawa, and London (Ontario) followed in the next decade. In Quebec, Israelites had settled soon after the British conquest, and a bet hayyim and a temporary synagogue were opened there as far back as 1853. But the Hebrew population of the ancient fortress city remained small for a long while, although attempts were made from time to time to organize. Abraham Joseph (born 1815; died 1886), a son of Henry Joseph of Berthier, was the most prominent of Quebec's Jewish citizens. He was identified with many of its most important commercial enterprises, and was at one time selected as candidate for the mayoralty.

The serious outrages against the Jews in Russia which began in 1881, and the persecutions and anti-Semitic outbreaks which followed in eastern Europe, caused the influx of a large number of Russian, Rumanian, Galician, and other Jewish immigrants into

#### The Russian Outbreaks of 1881.

Canada during the two closing decades of the nineteenth century and the opening years of the twentieth. These, besides greatly swelling the population of the already established Jewish communities, formed new settlements in numerous towns and villages throughout the Dominion. Many of those who came in 1882 were assisted by the Mansion House committee of London and by a committee of Montreal Jews that had been formed through the initiative of the Montreal branch of the Anglo-Jewish Association. A citizens' committee, organized by Christian sympathizers in Montreal, of which the Anglican bishop was chairman, raised a substantial fund in aid of these victims of persecution. Some of the settlers founded agricultural colonies in the Canadian Northwest. The earliest of these was established near Moosomin in 1884 by the Mansion House committee. The experiment of making agriculturists of men who had received little and in many cases no previous training in husbandry was beset with difficulties; and the results were at first discouraging. But obstacles were gradually overcome, and the present (1902) agricultural colonies in Assiniboia, at Hirsch, Oxbow, and Wapella, seem assured of success. The establishment of these colonies was mainly due to the munificence of Baron de Hirsch, who in 1892 and succeeding years largely subsidized them; and after his death the Jewish Colonization Association continued to grant them financial aid. Baron de Hirsch's benefactions were also extended to Jewish immigrants in Canada in many other ways. He gave large sums to the Young Men's Hebrew Benevolent Society of Montreal, for the purpose of aiding and educating Jewish immigrants; and for a while that society was delegated by him and his executors to supervise the Northwest agricultural colonies. This duty is, however, now performed by a resident agent acting under the direction of the Paris committee of the Jewish Colonization Association.

The Young Men's Hebrew Benevolent Society of Montreal, which thus became so closely connected with Baron de Hirsch's work in Canada, was founded

in 1863 through the efforts of Lawrence L. Levey (its first president), Isidore G. Ascher, Tucker David, Charles Levey, M. Gutman, Lawrence Cohen, Samuel Moss, Moise Schwob, and others; and among its presidents have been Jacob L. Samuel, Jacob G. Ascher, Lyon Silverman, Lewis A. Hart, Harris Vineberg, and D. A. Ansell. The large sums received by the society from Baron and Baroness de Hirsch induced its members to secure an amended act of incorporation in 1900; and its name was at the same time changed to "The Baron de Hirsch Institute and Hebrew Benevolent Society of Montreal." In addition to succoring the poor and aiding immigrants, it maintains a day-school.

The Jews of Montreal have greatly increased in population in recent years; and in 1902 they possessed nine synagogues (eight Orthodox and one Reform) and numerous communal societies and institutions, as well as a journal, "The Jewish Times." New congregations in other towns of Canada are also being founded from time to time.

The rise of Zionism in 1897 created much enthusiasm among the Jews of Canada; and in a remarkably short time societies in support of

**Zionism.** the movement were established in many centers. The first of these associations was organized at Montreal in Jan., 1898;

and in rapid succession similar societies were established at Toronto, Winnipeg, Hamilton, London, Ottawa, Kingston, St. John, Glace Bay, Brandon, and Vancouver. Clarence I. de Sola, Joseph S. Leo, Leon Goldman, Rev. A. Ashinsky, Dr. D. A. Hart, J. Cohen, I. Rubenstein, H. Bernstein, Rev. M. de Sola, L. Cohen, and M. Shapira were among the earliest Canadian promoters of the movement. In 1899 all the Zionist societies in British North America were united under the control of the Federation of Zionist Societies of Canada. Clarence I. de Sola was elected first president of the Federation; and he represented Canada at the International Zionist Congress held in London in 1900, where he was elected member of the Actions committee, the central governing body. The Jewish Colonial Trust and the National Fund count numerous shareholders in Canada; and Zionist organizations now exist in nearly every important town in the Dominion.

During the South African war, 1899-1902, several Canadian Jews enlisted in the British army and took part in many of the battles against the Boers.

The census of 1901 gave the total Jewish population of Canada as 16,060, divided among the provinces as follows: British Columbia, 543; **Popu- Manitoba, 1,514; New Brunswick, lation.** 376; Nova Scotia, 437; Ontario, 5,329; Prince Edward Island, 17; Quebec, 7,575; Northwest Territories, 215; Yukon, 54. The three largest cities, according to the same census, show the following Jewish population: Montreal, 6,790; Toronto, 3,090; Winnipeg, 1,156; adding the large number of immigrants who arrived from Rumania, Galicia, and Russia in 1901 and 1902, after the taking of the census, and adding also the many who were unenumerated in the religious census, it would seem that the Jewish population of Canada may now (1902) be estimated at from 20,000 to

25,000, of whom at least 10,000 reside in Montreal and its environs.

**CANCELATION OF DOCUMENTS:** An instrument in writing may be canceled by cross-lines or by other marks obliterating it, or by burning or tearing the material on which the writing occurs.

In the Jewish law there are certain peculiar methods of cancellation by the court as well as by the parties, when the purpose for which the instruments have been drawn has been accomplished. When an obligation has ceased, the instrument creating it is canceled by the court by being torn or cut crosswise through the date, through the names of the witnesses, or through other important parts of the document. Hence any document which bears such cuts or scissions is invalid, the presumption being that its validity has ceased by a judicial act

(Shulhan 'Aruk, Hoshen Mishpat, 52, **A Torn Document Invalid.** 1; B. B. 168b). If the instrument produced before the judge has rents un- like those made by the court, and appears to have been still further torn after the judicial cancellation, in order to destroy the peculiar rents made by the court, it is invalid (*ib.* gloss).

An instrument may be canceled by the parties without the intervention of the court, by being cut with a knife, or torn in half (*ib.*). If the instrument produced does not bear these obvious marks of a deliberate intent to cancel it, but is partly obliterated or torn or spotted, it remains in full force as long as the writing can be recognized (*ib.* 52, 2); and the law provides a method for substituting a new instrument for the one thus nearly destroyed (see **AUTHENTICATION OF DOCUMENTS**).

A special instance of cancellation of an instrument by the court is the case of the "ketubah" (marriage settlement). When a woman was divorced she was entitled to payment of the sum provided by her ketubah. This was usually paid to her in court upon her production of her גֵּט and her כְּתוּבָה. After the payment had been made to her, the court

took her get from her, tore it crosswise, and wrote on it these words: "We have torn this get not for the purpose of canceling it, but in order that the wife may not again use it to claim the amount of her ketubah" (Ket. 89b). This act was a cancellation of the ketubah, although it was the get which was torn and indorsed by the court. Unless the get was produced the woman could not claim her ketubah. After the Hadrianic revolt the law was changed. Among the edicts of the

**Cancela-** Roman authorities intended to sup-  
**tion of the** press the last remnants of Jewish na-  
**Ketubah.** tional life remaining after the unsuccess-  
ful rebellion was one making it a crime for Jews to write a get. This resulted in the practise of destroying the latter immediately after it had been delivered to the wife, so that its production might not incriminate the parties. Thereupon R. Simon ben Gamaliel decreed that the non-production of the get could not deprive the woman of her right to claim the ketubah, if the divorce were otherwise proved to have taken place (Git. 64a; Mishnah Ket. ix. 9).

A peculiar case of cancellation of a contract by the act of one of the parties without the knowledge or consent of the other was the preparation of a "sheṭar moda'a" (declaration of protest). This could be done in cases where one had been forced against his will to enter into an obligation. In such cases the person under duress, before actually entering into the obligation into which he was being forced, made a declaration before witnesses to the effect that he was about to be forced into an agreement against his will, and that he intended to contest its validity thereafter on that ground. This declaration was reduced to writing and signed by the witnesses, and could be used afterward for the purpose of canceling the contract made under duress.

The following form of such a sheṭar is given in "Nahalat Shib'ah," form 43:

"Before us, the subscribing witnesses, came A, son of B, and said to us, 'Be ye witnesses that I protest before you that C, son of D, owes me the sum of \_\_\_\_\_, and now he seeks every means to evade payment, and if I sue him in court, he threatens to claim poverty or to run away, and I am therefore obliged to compromise with him on his own terms, for fear lest he may seek means to injure me. I therefore declare before you that I am compelled under pressure of necessity to compromise with him; but hereafter I wish, by producing this instrument, containing my protest, before you, to cancel the compromise made, and to demand payment of the entire debt. For the compromise I am about to make with him is the result of duress and against my will. Even though I may declare in the instrument containing the said compromise that this protest and all its proofs are invalid, I shall be doing it not of my free will, but under duress, as is known to you, and thereafter I intend to cancel it all through this instrument.' This protest A, son of B, declared before us, and we the subscribers having observed his condition, and knowing it to be true and recognizing the great duress under which he is going to do this act, have received this protest from him and have written it and signed it before the compromise is made. This day and year," etc. (Signed by two witnesses.)

According to ancient law, when a husband had sent the get to his wife by a messenger, he had the right to cancel it in this manner even before she received it, although neither the messenger nor the wife was present at the cancellation. The consequences of this were disastrous. The woman receiving the get believed herself divorced, and might

remarry, only to discover afterward that her husband had canceled the get, this making her an adulteress and bastardizing her children by her second husband. Rabban Gamaliel abolished the right of the husband in such a case unless the wife or messenger were present (Mishnah Git. iv. 2), and his decision was supported by the later authorities (*ib.* 33a). In cases of bills of manumission of slaves, the master had a similar right under the ancient law; but the sages decided that after he had directed his slave to become free, he could never revoke the order, since an advantage may be conferred on a person in his absence, but nothing could be done to cause him loss, except in his presence (*ib.* i. 6).

There may be an implied cancellation of an instrument, as when two instruments concerning the same matter are prepared, one subsequent to the other. The second impliedly cancels or revokes the first (Ket. 44a). For cancellation of contracts see CONTRACTS; for cancellation of sales, see SALES.

**BIBLIOGRAPHY:** For other forms of the sheṭar moda'a see J. G. C. Adler, ספר הקטני שטרות, §§ 27, 28, Hamburg and Bützow, 1773; Judah ben Barzillai, ספר השטרות, No. 39, Berlin, 1898. J. SR. D. W. A.

**CANCER:** A malignant growth of new tissue; usually in the form of a tumor. Whether removed or not, it tends to give rise to secondary growths in near or distant parts of the body, and to prove fatal. The term "cancer" is usually applied to malignant tumors formed of epithelial tissue, as carcinoma and epithelioma; but in this article sarcoma is also included.

Cancer is considered a disease of civilization, or of civilized races, and the relative mortality of large cities from this cause is greater than that of small ones.

Lombroso, investigating the demography of the Jews in Italy, found that the mortality from cancer among the general population was 2 per cent; while the Jews in Italy and England showed a mortality from this disease of 3.30 per cent. He also shows that, as is the case with the general population, the disease of cancer more frequently attacks women than men.

In England Dr. James Braithwaite noticed that cancer of the uterus was seldom or never met with among the numerous Jewesses attending the gynecological out-patient department of the Leeds General Infirmary—only one case in ten years. The experience of the London Hospital, where there is a special Hebrew department, is the same—only one case in five years, against 178 among Gentile women. Dr. Braithwaite considers that the only explanations possible are difference of race or difference in diet, especially the absence of pork from the Jewish diet. On the other hand, a writer in the "British Medical Journal" (March 15, 1902, p. 681) states that, in his experience, cancer of the breast has often been met with among the Jewesses in London; and while examples of nearly every form of cancer have been seen, there has seemed to be a special tendency to development of intestinal malignant growths. Of the patients dying between 40 and 65 years of age, a large percentage have been sufferers from cancer. The writer then brings figures from the records of

the United Synagogue Burial Society for three years—1898, 1899, 1900—showing that 525 deaths due to cancer occur annually among 1,000,000 Jews; while the cancer rate for England and Wales for 1896 was 764 per 1,000,000 of population. From the registrar-general's returns for London the rate for 1900 showed more than 800.

CANCER AMONG THE JEWS IN LONDON.

	Registrar-General's Returns.			United Synagogue Burial Society Returns.		
	1900	1899	1898	1900	1899	1898
Deaths from all causes.	86,007	89,689	83,936	1,612	1,725	1,649

Percentage of deaths from cancer .....	4.9	4.7	4.8	2.3	2.4	2.06
Deaths of persons over 20 years of age from all causes.....	50,565	51,922	45,490	609	642	677
Percentage of deaths from cancer to deaths from all causes of persons over 20 years of age.....	8.4	8.8	8.9	6.1	6.5	5.02

Dr. John S. Billings has shown that in the United States cancer occurs among Jews just as often as in the general population, as can be seen from the appended table:

CANCER DEATH-RATES PER 1,000 OF TOTAL DEATHS FROM ALL CAUSES.

	Males.	Females.
Jews.....	13.58	21.65
General population of the United States (1880).....	13.09	23.50

Statistics collected by Dr. Maurice Fishberg for the Russian and Polish Jews living in the seventh, tenth, and thirteenth wards of New

**In New York city** show, on the other hand, **York City.** that they are less liable to succumb to cancer than the other inhabitants of the same districts, as can readily be seen from the appended table:

CANCER AMONG THE RUSSIAN AND POLISH JEWS IN NEW YORK CITY DURING THE SIX YEARS ENDING MAY 30, 1890.

	Population.			Deaths Due to Cancer.			Cancer per 100,000 Population.			Total Three Wards.		
	7th Ward.	10th Ward.	13th Ward.	7th Ward.	10th Ward.	13th Ward.	7th Ward.	10th Ward.	13th Ward.	Population.	Deaths Due to Cancer.	Cancer Death-Rate per 100,000 Population.
Mothers Born in :												
Russia and Poland (Jews)...	16,295	30,476	13,190	15	33	24	92.05	108.28	181.95	59,961	72	120.07
Other countries (including United States).....	41,071	27,120	32,694	126	108	94	306.78	398.23	287.51	100,885	328	325.12
Total.....	57,366	57,596	45,884	141	141	118	245.80	244.80	257.17	160,846	400	248.68

The cancer death-rate among those whose mothers were not born in Russia or Poland was 325.12 per 100,000; while that of the Russian and Polish Jews was only 120.07—less than one-half.

Inquiries among surgeons and gynecologists who have a large experience among Jews in New York city have elicited the result that Jews are comparatively less liable to be attacked by cancer than are other races. Dr. Abram Brothers states that of nearly 35,000 women examined by him (mostly Jewish) he has met with less than a half-dozen cases of cancer of the uterus in Jewish women; while he has had several dozen cases in the same time in non-Jewesses. Dr. H. J. Boldt, basing upon an experience gained by the examination of more than 1,000 Jewish women annually, states that although he has operated upon a large number of Jewish women for cancer of the uterus, the proportion of the disease in this race, compared with others, is very small. A rough estimate is about one-tenth or even less. The same holds good with cancer of the breast, so far as his experience goes.

As to the comparative morbidity of the Jews in the United States from cancer, the following statistics have been collected from the "Annual Reports" for 1898, 1899, 1900, of one Jewish hospital in New York city (Mount Sinai), and compared with the cancer cases from a hospital which admits few Jews (St. Luke's). These are given in the following table:

Parts Affected by Cancer.	Mount Sinai (Jewish), 9,497 Patients.		St. Luke's, 7,933 Patients.	
	Number of Cancer Cases.	Per cent of Cancer.	Number of Cancer Cases.	Per cent of Cancer.
Uterus.....	18	6.98	59	15.98
Breast.....	32	12.40	91	24.59
Gastro-intestinal tract..	81	31.40	48	12.98
Liver.....	19	7.37	14	3.78
Rectum.....	12	4.66	25	6.76
Other organs.....	38	14.72	86	23.24
Sarcoma.....	58	22.47	47	12.70
Total.....	258	100.00	370	100.00

It appears from these figures that: (1) Malignant disease is by no means rare among Jews, although

it is less frequently met with than in other races. (2) Carcinoma and epithelioma, or true cancer, are more frequent among the general popu-

**Results of Inquiry.** number of patients sick from all causes were affected by these forms of cancer; while among Jews the percentage was only 2.10 or about one-half. (3) Sarcoma is somewhat more frequent in Jews than in others; 0.061 per cent of sick Jews were affected with this form of malignant disease as against 0.059 per cent of the general population; 22.47 per cent of all cases of malignant disease among Jews suffered from sarcoma; while of the patients from the general population suffering with malignant disease, only 12.70 per cent were afflicted with sarcoma. (4) Cancer of the uterus and breast is less frequent in Jewish women than in other races. (5) Jews are more liable than non-Jews to be affected with cancer of the gastrointestinal organs. Nearly 45 per cent of all cases of malignant disease in Jews occurred in the stomach, intestines, liver, pancreas, rectum, etc.; while in non-Jewish patients only 23 per cent of patients suffering from malignant disease were affected with cancer of these organs. (6) The only part of the gastro-intestinal tract which is less often attacked by cancer in Jews than in non-Jews is the rectum, and this notwithstanding the fact that Jews are markedly sufferers from other rectal diseases, such as HEMORRHOIDS, fistula, etc.

According to all available statistics, cancer is more than twice as frequent in women as in men, owing to the occurrence of the disease in the breast and womb. Among Jewesses, on the other hand, cancer of the breast and womb is less common than among the general population. As has been shown, these organs appear to be affected less than one-half as often as in the patients in the non-Jewish hospital. This explains why the total percentage of cancer is lower among Jews than in other races.

**CANDLE TAX.** See TAXES, JEWISH, IN RUSSIA.

**CANDLESTICK** (Hebrew, "menorah"; Aramaic, "nebrashta," Dan. v. 5); Mentioned as a secular object only in II Kings iv. 10. The candlestick in the Temple, however, is often referred to, although there is no reliable information from earlier times concerning its use and shape.

(1) In the temple of Shiloh a "ner" (lamp) is mentioned, but not a "menorah" (candlestick); according to I. Sam. iii. 3, the lamp seems to have burned only at night. In I Kings vii. 49 ten golden candlesticks are referred to, five of which stood to the right and five to the left of the "debir" (oracle); and in Jer. lii. 19 menorot are also found, though not in the parallel passage, II Kings xxv. 14. By modern critics, however, both I Kings vii. 48-50 and Jer. lii. 19 have been held to be interpolations. It may be merely accidental that we have no stronger references to the use of candlesticks in Solomon's Temple, for the number ten is undoubtedly based on ancient tradition; and if Solomon had no golden candlesticks, he probably had them of bronze, cast for him by Hiram (compare Stade's "Zeitschrift," iii. 173 *et seq.*).

(2) The seven-branched candlestick in the tabernacle, described in Ex. xxv. 31 *et seq.* and xxxvii. 17 *et seq.*, is attributed by the critics to post-exilic times, for the description is that of the candlestick of the Second Temple. It was chased of pure gold, and called, therefore, "menorah tehorah" (Ex. xxxi. 8, xxxix. 37; Lev. xxiv. 4). From a pedestal ("yarek"), which is not described, rose the trunk, and from this spread the branches ("kanah"), curving upward from the stem at three points in a vertical line; on the trunk there are said to have been four, and on each of the branches three, calices shaped like almond blossoms; that is, bulbs with opening buds. On the branches were seven lamps ("nerot"), which were removed every day for trimming and refilling, and hence were called "nerot hama'arakah" (Ex. xxxix. 37). As the lamps evidently had spouts from which the wicks protruded, thus throwing the light principally to one side, the lamps had to be turned in such a way as to make the spouts point northward, for the candlestick was set over against the southern wall, in order to be to the left of any one entering the sanctuary.

This candlestick corresponds on the whole to the one described in Zech. iv. 1 *et seq.*, except that the latter has seven branches, while the Symbolism one referred to in Ex. xxv. 31 *et seq.* of the Candlestick has only six branches, the seventh light being fastened in the center. Both, however, represent a tree with six or seven branches respectively, as is evident from the fact that the candlestick in Ex. xxv. 31 *et seq.* is ornamented with almond blossoms. The assumption that this seven-branched candlestick has a symbolic meaning is confirmed by Zech. iv. 1 *et seq.* The seven lights may be said to represent the seven

Symbolism one referred to in Ex. xxv. 31 *et seq.* of the Candlestick has only six branches, the seventh light being fastened in the center. Lamp Found Among the Ruins of Carthage by P. Delattre.

From a Rock-Cut Tomb Near Jaffa.

From a Gilt Glass Vase Found in the Jewish Catacombs at Rome.

From the Entrance to a Tomb at Wadi al-Nahal.

The Golden Candlestick on the Arch of Titus, as It Appeared in 1710. (After Reland, "De Spoliis Templi Hierosolymitani in Arco Titiano.")

From a Graffito Found in the Jewish Catacombs at Venosa.

From the Bottom of a Glass Vase Now in the Museo Borgiano at Rome.

From the Great Mosque at Gaza. Discovered by Clermont-Ganneau.

Hexagonal Arrangement of the Golden Candlestick (Hypothetical).

EARLIEST KNOWN REPRESENTATIONS OF THE GOLDEN CANDLESTICK.

planets, which, regarded as the eyes of God, behold everything. The light in the center, which is especially distinguished, would signify the sun, as the chief of the planets. It is possible that with this was also combined the mystic conception of a celestial tree, with leaves reaching to the sky, and fruit typifying the planets. How the connection with an almond-tree arose is not known, but it may have been through the idea of stars as representing almonds. This symbolism was probably due to foreign influence, for in the Babylonian religion the seven planets are the seven chief gods (compare Gunkel, "Schöpfung und Chaos," pp. 124 *et seq.*). Zerubbabel's temple contained only one candlestick, as *Eccles.* (Sirach) xxvi. 22 expressly states; Antiochus Epiphanes had it removed and broken (1 Macc. i. 22), while Judas Maccabæus restored it (iv. 49 *et seq.*). Pompey saw the candlestick in the sanctuary (Josephus, "Ant." xiv. 4, § 4), and it was also in the sanctuary of Herod's temple ("B. J." v. 5, § 5). Illustrations of the seven-branched candlestick are found on the triumphal arch of Titus and on Jewish coins (see Madden, "Jewish Coinage," p. 231). For later history see **TITUS, ARCH OF**.

It was forbidden to make copies of the golden candlestick for ritual purposes; and for other uses, only five-, six-, or eight-branched, instead of seven-branched, candlesticks could be made. It is doubtful whether this restriction had anything to do with the fact that Onias hung up a golden chandelier in the temple of Leontopolis (compare Josephus, "B. J." vii. 10, § 3).

[The symbolism of the almond-tree is probably explained by Jer. i. 11. The traditions of the Rabbis may be found in Men. 28b and Maimonides, "Yad," Bet ha-Behirah, iii. 1-5. According to this authority the pedestal rested on three feet; other metal could be used than gold, and only when gold was used was the required weight ("kikkar") insisted on. Otherwise the candlestick could even be hollow, but under no circumstance was it permissible to use for its manufacture broken scraps of metal. Josephus says that three of the lamps were kept burning during the day, while at night the entire seven were lighted; but his statement conflicts with the explanation of the later rabbinical commentators, who hold that the lamp was lighted only during the night (Ibn Ezra and Rashi to Ex. *l.c.*). The prohibition of imitations applies to all Temple or tabernacle utensils (Men. 28b). Of interest as bearing on the distinction between "ner" and "menorah" may be the Midrashic story of the woman married to a man of lower social standing, likened to a "golden candlestick with an earthen lamp on top" (Gen. R. xx.). Compare **MENORAH, HANUKKAH**.—E. G. H.]

**CANKERWORM.** See **LOCUST**.

**CANNEH:** A city mentioned in the long list of the contributors to Tyrian greatness and commercial power (*Ezek.* xxvii. 23). The name occurs in no other passage. Cornill takes it to be the "Calneh" of Amos vi. 2; and one manuscript has that reading, which would, however, rather give the "Calneh" of Gen. x. 10. According to Kiepert, it was *Kawai*, a city on the Tigris. Mez ("Gesch. der Stadt Haran," 1892, p. 33), indorsed by Cheyne ("Encyc. Bibl." i. 648), proposes to emend the name to "B'nai Eden"; but, as Bertholet ("Kurzer Hand-Commentar," on *Ezekiel*) remarks, it would be extraordinary indeed for such a familiar word as "B'nai" to be corrupted into a form like "Canneh."

**CANON:** A rule for the inclusion of certain books within a certain degree of sanctity; hence also the word "canonical." See **BIBLE CANON**. J.

**CANOPY, BRIDAL.** See **HUPPAH**.

**CANSINO:** Spanish-Jewish family, famous in history for its wealth and influence, its scholars and poets.

Jacob Cansino I. served as an interpreter at Oran, a Spanish colony in northwestern Africa, under Charles V., until 1556, when he was sent as an ambassador to the king of Morocco. The office was then held in regular succession by his son Isaac Cansino from 1568 to 1599, by his grandson Hayyim (Hayen) from 1601 to 1621, and by his great-grandson Aaron from 1621 to 1633. After an interval of three years Aaron's brother, Jacob **CANSINO II.**, received the appointment (1636), and served until his death in 1666. He is known by his translation into Castilian of "Extremas y Grandezas de Constantinopla," from the Hebrew of Moses Almosnino.

Other prominent members of the family were Solomon Cansino, poet; Moses Cansino, scholar; Samuel Cansino, cantor in the synagogue, and wealthy philanthropist, who ultimately lost the whole of his fortune to gamblers; and Rabbi Abraham Cansino II., secretary of the Jewish community of Oran.

**BIBLIOGRAPHY:** Grätz, *Gesch. der Juden*, x. 413, note 2; Luzzatto, in *Keren Hemed*, iv. 34-35; Wolf, *Bibl. Hebr.* iii. 524-526, No. 1101; Jost, *Gesch. der Israeliten*, viii. 42.

D.

A. R.

**CANSINO, ABRAHAM BEN JACOB: 1.** Poet; lived in the seventeenth century. He is the author of "Aguddat Ezob" (A Bunch of Hyssop), a collection of poems and rhetorical compositions, in three parts, praised very highly by Isaac Cansino and David Abu al-Khair (אבנו אלכיר). Abraham Cansino was once arrested by the Spanish authorities for having in his possession copies of the Babylonian and Palestinian Talmuds. His son was also taken, and both were sent to Murcia, Spain, where they were treated like prisoners for a time, and fined \$400; the copies of the Talmud were confiscated. His friends and relatives wrote poems of consolation to him; to these he replied from Murcia.

**2.** An authority mentioned in the *Malzor* Oran as writing, in the name of the Jewish community of

Oran, to the communities of Algiers in 1661, of Jerusalem in 1663, and of Hebron in 1668. In 1679 he lived in Leghorn, Italy, where he received a letter from Tunis. This Abraham Cansino may be identified with Abraham Cansino, rabbi and preacher, brother of Isaac Cansino of whom Wolf speaks ("Bibl. Hebr." iii., Nos. 143b, 1101, and 1265c). Kayserling mentions an Abraham Cansino who was rabbi at Leghorn in 1685, and evidently refers to the same person. Luzzatto thinks that this Abraham Cansino is not to be identified with the poet of the same name.

3. An authority mentioned in the Mahzor Oran as living at Leghorn in 1709. As he is not addressed by the titles usually given to rabbis, Luzzatto thinks that he was not a rabbi, and therefore not to be identified with either of the above. The epitaph of an Abraham Cansino written by Jacob Sasportas is given in the Mahzor Oran, but furnishes no indication of the place or date of its writing.

Mention is also made of an Abraham Cansino, author of the epitaph on David Francis, who died about 1696.

**BIBLIOGRAPHY:** Kayserling, *Bibl. Esp.-Port.-Jud.* p. 33; S. D. Luzzatto, *Keren Hemed*, iv. 34-35. See ISAAC CANSINO and CANSINO family.

A. R.

**CANSINO, ISAAC (BEN ḤAYYIM):** Poet and prominent member of the Jewish community of Oran; died in 1672; probably a brother of Jacob CANSINO II. He was a liturgical poet of high attainments, and cantor in the synagogue on the Day of Atonement, an office regarded as a post of honor. Cansino's greatest work is the first part of the so-called Mahzor Oran, which contains many poems written by him. Among his occasional poems are one in praise of the collection of poems, "Aguddat Ezob," by Abraham CANSINO (1); a dirge on the death of Aaron Cansino in 1633; and one of sympathy to Samuel Cansino on the occasion of the loss of his fortune by the cheating of gamblers.

Wolf ("Bibl. Hebr." iii., Nos. 1265c and 1101) speaks of Isaac Cansino, a brother of Abraham Cansino, who embraced Christianity after the expulsion of the Jews from Oran in 1668. This Isaac Cansino, however, can hardly be identical with the one above mentioned. Kayserling also mentions an Isaac Cansino, publisher at Amsterdam in 1685, whose relationship with the Cansinos of Oran is unknown.

**BIBLIOGRAPHY:** Kayserling, *Bibl. Esp.-Port.-Jud.* p. 33; Luzzatto, *Keren Hemed*, iv. 34-35; Jost, *Gesch. der Israeliten*, viii. 42. See ABRAHAM CANSINO and CANSINO family.

A. R.

**CANSINO, JACOB:** "Vassal of his Catholic majesty and interpreter of languages in the places of Oran" (so styled by himself); died Sept. 19, 1666. He was the fifth in succession of the Cansino family to hold the office of royal interpreter. Upon the death of his brother Aaron in 1633, the office was given by King Philip IV. of Spain to Yahob Caportas (whom Graetz identifies with Jacob Sasportas), a member of an influential Jewish family which rivaled the Cansinos. Thereupon Jacob Cansino came to Madrid, petitioned the king for the office in consideration of the services rendered by his family

to the government, and obtained the appointment in 1636, with a salary of 25 scudi (dollars) per month.

As a man of letters Jacob Cansino is known for his translation into Castilian of a Hebrew book by Moses Almosnino, under the title "Extremas y Grandenzas de Constantinopla," published at Madrid by Francisco Martinez, 1638. The preface includes an extract from the book of the royal secretary, Augustus Maldonatus, enumerating the various offices held by members of the Cansino family, and a letter from King Philip IV. in appreciation of their services. Jacob Cansino excited the enmity of Marquis de Los Veles, governor of Oran, who wished to give the office held by the former to the husband of one of his favorites. Jacob was too firmly established in his position, however, and remained in office until his death. In 1668 the Jews were expelled from Oran at the instigation of the governor.

**BIBLIOGRAPHY:** Grätz, *Gesch. der Juden*, x. 235, 413, note 2; Kayserling, *Bibl. Esp.-Port.-Jud.* p. 33; Luzzatto, *Keren Hemed*, iv. 34-35; Wolf, *Bibl. Hebr.* iii. 524-526, No. 1101; Jost, *Gesch. der Israeliten*, viii. 42.

**CANSTATT, KARL FRIEDRICH:** German physician and medical author; born at Regensburg July 11, 1807; died at Erlangen March 10, 1850. He was one of the pioneers of the modern school of medicine in Germany, and numbered Professor Virchow among his pupils. Canstatt studied at the University of Vienna and, later, under Schönlein at Würzburg, where in 1831 he obtained his doctor's degree. A year later he went to Paris to study Asiatic cholera, then epidemic in the French capital. His monograph on this disease, published the same year, attracted the attention of the Belgian government, which commissioned him to plan a cholera hospital.

He remained in Brussels until 1838, when he returned to Regensburg to practise ophthalmology, in which he had won signal success in Belgium. The same year he was appointed official physician to the provincial law court at Ansbach, where he remained until 1843. On the death of Heneke (1843) he was called to the University of Erlangen to fill the chair of pathology. Three years later he was attacked by tuberculosis, and thinking that a change of air would benefit him, he went to Pisa, Italy; but he remained there for a short time only, and on his return to Erlangen he died.

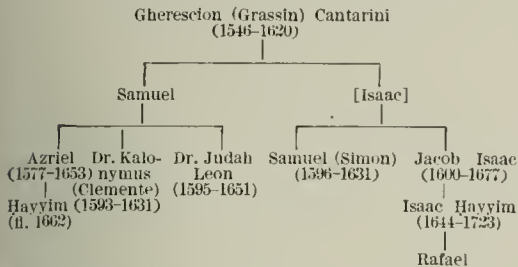

Canstatt's greatest service to medicine was the conception and publication of the "Jahresbericht über die Fortschritte der Gesammten Medicin Aller Länder," begun in 1841 and continued after Canstatt's death by Professor Virchow. The work next in importance was his "Handbuch der Medicinischen Klinik" (1841). Other publications were: a monograph on diseases of the eyes (1841); "Die Cholera in Paris" (1832); "Ueber die Krankheiten der Chorea" (1837); "Die Krankheiten des Höheren Alters und Ihre Heilung" (1839); "Die Specielle Pathologie und Therapie," etc. (1841-42); a monograph on Bright's disease (1844); and "Klinische Rückblicke und Abhandlungen" (1848).

**CANTARINI, HAYYIM MOSES (ANGELO) BEN ISAAH AZRIEL:** Italian physician, rabbi, poet, and writer; lived in the second half of the seventeenth and the first half of the eighteenth century at Padua, where he was also instructor in the yeshibah. He published in Italian: "Chirurgia Pratica," Padua, 1677. At his death he left the following manuscript works in Hebrew (Ghirondi MSS.): "Haggahot," glosses on some halakic works of post-Talmudic authors; "Mar'eh ha-Seneh" (Vision of the Thorn-Bush), a description of a persecution of the Jews at Padua, probably of the same one of which the work of his uncle Isaac Hayyim CANTARINI, "Paḥad Yizḥak," treats. Responsa of his are also extant in manuscript.

Wolf ("Bibl. Hebr." iii. 565) mentions Cantarini's correspondence with the Christian scholar Unger of Silesia on the history of the Jews in Italy.

**CANTARINI, ISAAC HAYYIM (VITA),** (also called **Raphael ben Jacob Isaac ha-Kohn**): Italian poet, writer, physician, and rabbi; born Feb. 2, 1644, at Padua; died there June 8, 1723. He studied Hebrew and the Talmud with Solomon Marini, author of the "Tiḳḳun 'Olam," and with the poet Moses Catalano. His instructor in the secular branches was Bernardo de Laurentius.

Cantarini received his diploma as physician at Padua Feb. 11, 1664; and in addition to following the profession of medicine, he very often preached in the Ashkenazic synagogue. His sermons were frequently attended by Christians, the number of these on one occasion being so great that the Jews

had to find seats in the women's gallery. He also taught in the yeshibah, and officiated as cantor, especially on the Day of Atonement. As he had a thorough knowledge of the Talmud, his decisions were often sought in halakic cases.

Cantarini had an extensive practise, especially among the patricians outside of Padua, but at the end of his life, having lost his property through others, he was in straitened circumstances. Many elegies were written at the time of his death, among others by his pupil Moses Hayyim Luzzatto, Venice, 1728.

In his poetical writings Cantarini based his language almost exclusively on that of the Bible; his sentences containing, in addition to innumerable conceits, allusions to Biblical expressions. The contents of his works must be judged apart from their unpleasing form, being remarkable for pithy sense and elegant definition.

The most important of his Hebrew works is "Paḥad Yizḥak" (The Fear of Isaac), a description of the attack on the ghetto at Padua by the Christian populace Aug. 20, 1684, published at Amsterdam, 1685. The work contains a detailed account of all the incidents, in most of which he had taken part ("Ozar Nehmad," iii. 131); and many documents of the governments of Padua and Venice are therein translated and quoted in Hebrew. An account of the internal condition of the community, together with statistics, serves as an introduction (p. 10). The author develops entirely modern theories on the causes of these occurrences in the political as well as the physical world (5a *et seq.*). Noteworthy also is his decided tolerance toward Christians (see, for instance, pp. 9a, 23g).

The following poems were published by Cantarini; they are nearly all occasional: "Pi Sefarim" (Mouth of Books), festal songs written when

**His Poems.** the teachers of the yeshibah decided to include the study of the treatise of Hulin (Venice, 1669). A poem in the form of a psalm, on the delivery of the community from the hands of the populace Aug. 20, 1684, is printed in the "Paḥad Yizḥak" (p. 51b), which was formerly read every year on the anniversary of the attack (10 Elul) in the synagogue. Other poems are printed in his works "Eḳeb Rab" and "Et Kez" (see below), and in the prefaces to the "Kebumat Abraham" of Abraham Cohen, and the "Ma'aseh Tōbiah" of Tobias Cohen. Cantarini also wrote a paraphrase of the majority of the Psalms, which has not yet been printed. Many of his poems in manuscript were in Ghirondi's possession. Some of his poems have also been inscribed on the walls of the large Ashkenazic synagogue of Padua, which was built during his life. His "Et Kez" (Time of the End) deals with the time of the advent of the Messiah (Amsterdam, 1710), while the "Eḳeb Rab" (Great Consequence), is a collection of responsa in Hebrew and Italian, concerning the oath which the tax-collectors of the community of Padua took before the wardens (Venice, 1711). The manuscript of his "Leb Hakam" (Heart of the Wise) was in Ghirondi's possession. His "Hayye Besarim" (Physical Life), "Leb Marpeh" (Healing Heart), and "Shibat Tishbi"

(Reply to the Tishbite), a polemic against Elijah Levita's "Tishbi," have not yet been printed. Cantarini's Hebrew letters, addressed to the Christian scholar Unger of Silesia, are interesting as containing notices on the Jewish writers of Italy (Hamburg MS. No. 335, reprinted in "Ozar Nehmad," iii. 128 *et seq.*). Halakic responsa of his are printed in Isaac Lampronti's "Pahad Yizhak" and in Simson Morpurgo's "Shemesh Zedakah" (Orah Hayyim, No. 4, and Hoshen Mishpat, No. 33).

In Latin Cantarini wrote the "Vindex Sanguinis," a reply to the work on blood accusation of Jacob

Geuze (Amsterdam, 1681). Three Latin letters by him have also been published; **Latin Works.** one of them dealing with natural history, is addressed to his teacher Bernardo de Laurentius (Padua, 1856, ed. Osimo).

An Italian responsum of his is mentioned (translated into Hebrew in Isaac Lampronti's "Pahad Yizhak," under עקר). Many of his Italian sermons in manuscript were in Ghirondi's possession. There have also been preserved several "consulti" (partly in Latin) on medical subjects ("Ozar Nehmad," iii. 148).

I. BER.

**CANTARINI, JUDAH (LEON) BEN SAMUEL (SIMON) HA-KOHEN:** Italian physician and rabbi; born about 1650 at Padua; died there April 28, 1694. He had a large practise among the Christian as well as the Jewish population of that city, visiting the poorer of his patients four times a day without charge. Cantarini founded a yeshibah in the synagogue of the Ashkenazim, where he taught the Talmud, in which he was very learned. He also officiated as preacher. A letter of his is

extant, addressed to Jacob Lebet-Levi, and dealing with a legal quarrel in which Cantarini was involved. This letter, which testifies to his thorough knowledge of the Talmud, is written in a very pure and classical Hebrew. At Cantarini's death his nephew, Isaac Hayyim Cantarini, wrote his obituary.

**BIBLIOGRAPHY:** I. H. Cantarini, *Pahad Yizhak*, pp. 10a, 42a; idem, in *Ozar Nehmad*, iii. 145; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 198; Steinschneider, in *Monatsschrift*, 1890, p. 472.

L. G.

I. BER.

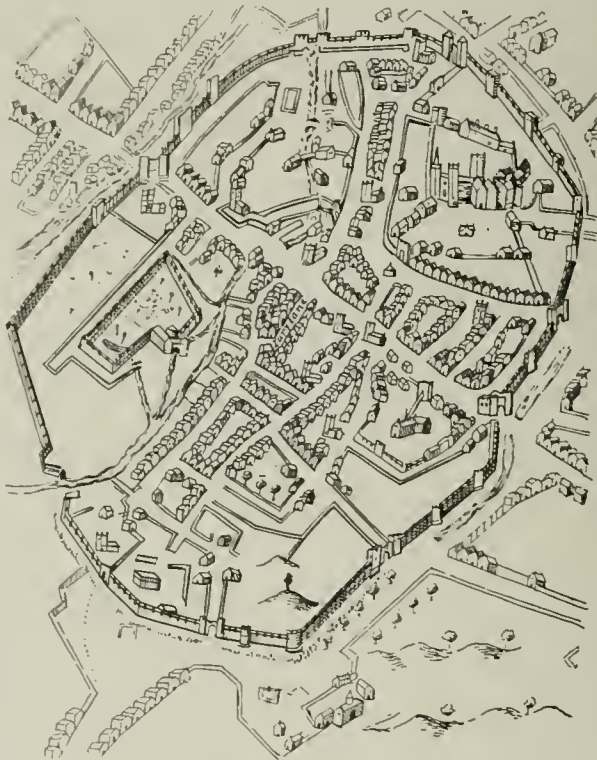

**CANTARINI, KALONYMUS AARON (CLEMENT) BEN SAMUEL (SIMON) HA-KOHEN:** Italian physician; born in 1593 at Padua; died there July 30, 1631, of the plague. He was famous as a Talmudist, as well as for his extensive knowledge of the profane sciences.

**BIBLIOGRAPHY:** Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 302; Mortara, *Indice*, p. 10. L. G. I. BER.

**CANTARINI, SAMUEL (SIMON) BEN GERSON HA-KOHEN:** Official procurator of the Jewish community of Padua; born about 1561; died 1631 during the plague, to which also two of his sons and other members of his family succumbed. His sons were Azriel, Kalonymus, and Judah Cantarini. Isaac Hayyim Cantarini was his grandson.

**BIBLIOGRAPHY:** Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 342; Mortara, *Indice*, p. 10. L. G. I. BER.

**CANTERBURY:** Large town in Kent, England, containing the metropolitan cathedral. Jews were settled here in the twelfth century. They seem to have been on very good terms with the monks, taking their side in a controversy with the archbishop. Gervase of Canterbury ("Chronicles," i. 405) was struck by the contrast between the archbishop excommunicating the monks and the Jews praying for them. Reference is made to the inn of a Jew at Canterbury (Robertson, "Materials for Life of Becket," ii. 7). In Speed's map of Canterbury there is a "Jewry Lane" opposite All Saints'; while, according to Somner ("Antiquities of Canterbury,"

Map of Canterbury, Showing Position of Jewry.  
(From Speed, "The Theatre of the Empire of Great Britaine," 1676.)

metropolitan cathedral. Jews were settled here in the twelfth century. They seem to have been on very good terms with the monks, taking their side in a controversy with the archbishop. Gervase of Canterbury ("Chronicles," i. 405) was struck by the contrast between the archbishop excommunicating the monks and the Jews praying for them. Reference is made to the inn of a Jew at Canterbury (Robertson, "Materials for Life of Becket," ii. 7). In Speed's map of Canterbury there is a "Jewry Lane" opposite All Saints'; while, according to Somner ("Antiquities of Canterbury,"

pp. 124, 125), the site of the ancient synagogue was that of the Saracen's Inn.

Only two rabbis of any importance are said to have been connected with the town of Canterbury. These are AARON of CANTERBURY and BENJAMIN of CANTERBURY, the latter of whom Joseph Jacobs has attempted to identify with a Benjamin of Cambridge (see CAMBRIDGE). The community preserved its importance up to the Expulsion, as it was the seat of an archa or chest for the preservation of deeds. Soon after the return of the Jews to England a synagogue was founded in King street, Canterbury (about 1730), and a small congregation has remained in the town up to the present day. A synagogue was built in St. Dunstan's, but was replaced (1847) by a new building, which was erected on the site of the old Templars' Church. There are now only thirteen resident Jewish families in the city, though a large number of casual poor pass through it annually.

**BIBLIOGRAPHY:** Jacobs, *Jews of Angewin England*, pp. 93, 375; Hasted, *Canterbury*, i. 61, 126; ii. 364; Margolouth, *Jews in Great Britain*, iii. 135, 136.

J.

**CANTHERAS:** Surname of Simon, the son of Boethus, the high priest, according to Josephus "Ant." xix. 6, §§ 2, 4; compare *ib.* 8, § 1, where Elioneus, son of Cantheras, is mentioned as having also been appointed high priest by King Agrippa (41-44). Abba Saul ben Baṭnit and Abba Jose ben Johanan of Jerusalem, contemporary leaders of the Hasidic party, however, regarded the house of Cantheras as a different one from the house of Boethus, when they both exclaimed: "Wo unto me from the house of Boethus; wo unto me from their club! Wo unto me from the house of Kadros [Cathros = Cantheras]; wo unto me from their pen!" (see Tosef., Men. xiii. 21; Pes. 57a), while Elioneus is mentioned in Parah iii. 5 as son of Joseph Caiaphas. Grätz ("Gesch. der Juden," 4th ed., iii. 739-746, and "Monatsschrift," 1881, pp. 97-112) blames Josephus for having confused the names; Schürer ("Gesch." 3d ed., ii. 218, notes 11, 14) accepts Josephus' information as correct (compare Derenbourg, "Histoire de la Palestine," pp. 215, 233).

K.

**CANTICLES, BOOK OF.** See SONG OF SONGS.

**CANTILLATION:** Mode of intonation used in public recital of prayers and Holy Scripture. The infinite gradations of tone in ordinary speech serve to bring home to the listener the interrelation and coordination of the words used by the speaker. Even when the listeners do not exceed the small circle that can be reached by the ordinary speaking voice, the delicate shade of meaning to be conveyed by the structure adopted for the sentence will not be appreciated by them unless certain conventionalities of pitch are introduced in utterance. These conventionalities of pitch result in an elementary form of song, and thus became early known as "singing to speech" (*προσῳδία*, *accentus*). But when a larger audience is addressed the assistance of a sing-song utterance in marking this accent or prosody, and rendering the precise interdependence of the successive words unmistakable, has been recognized by all who have ever had to speak in the open air or in a large

building, and has been from the earliest ages adopted for the public recitation of sacred texts. Among Jews the desire to read the Scriptures in the manner described in Neh. viii. 8 has from time immemorial resulted in the use of some sort of musical declamation. This mode of recitation, depending not upon the rhythm and sequence of the sounds chanted, but upon the rhythm and sequence of the syllables to which they are chanted, is known as *cantillation*.

In describing synagogal chanting, it is necessary to distinguish the intonation traditionally employed for the text of the prayers—the component sounds of which are dependent upon the momentary impulse of the reader, checked only by the fixed melody of the coda with which the benediction concludes—from the intonation traditionally employed for the text of the Scriptural lessons (the elements of which are rigidly fixed). The first is discussed in the general article on MUSIC, SYNAGOGAL, under the heading "Prayer-Motives." The cantillation which is here described forms the musical interpretation of the ACCENTS which accompany the text of the Hebrew Scriptures.

These signs, נְיָוֹת ("strings," "musical notes"), or, in the older expression, טְעָמִים ("adornments," "tropes"), have been discussed, from the grammatical point of view, in ACCENTS. The musical system to which they now serve as a notation, apart from their syntactical force, must have existed long before the need was felt for such a notation,

even as VOCALIZATION was in use long before the vowel-signs were invented. The notation which fixed the traditional *pronunciation* of each word may well, as Wickes points out, have been introduced at the same period

and for the same reasons as the notation which fixed the traditional *modulation*. And, similarly, the causes which have led to a geographical variation of the original sounds in the one case have brought it about in the other.

The earliest reference to the definite modulation of the Scripture occurs in the Babylonian Talmud (Meg. 32a), where R. Johanan deprecates the indifference of such as "read [the text] without tunefulness and repeat [the Mishnah] without song." The use of the term נְיָוֹת ("tunefulness") shows that a melody definite enough to cause a pleasant impression was already attached to the Scriptural reading, and that it had long passed the stage of a syllabic plain-song which could only bring out the rhythm of the cursus as one group of syllables succeeded another. The cantillation must already have become "melismatic," with groups of notes, that is, attached to the more important syllables, so that the meaning of the text as well as its rhythm received emphasis and illustration from the chant.

If the cantillation was already tuneful to contemporary ears, the way had been cleared for its hermeneutic application to the text. The vocal phrases which constituted its melodious element would, by their distinctness from the monotone recitation which joined them into tuneful succession, serve to bring out the logical and syntactical importance of the syllables sung to them from among the other

syllables comparatively slurred over on one note. "In this way the music was made to mark not only the broad lines, but the finest shades of distinction in the sense; and when its signs were introduced into the text, they were also the signs of *interpunction*; no others were needed" (Wickes). For a long time no such signs, however, were necessary; the cantillation was transmitted orally, and teachers were recognized whose profession it was to give instruction in "the pausal system of the accentuation" (Ned. 37a). But precisely as in the case of the plain-song of the churches, *memoria technica* were gradually introduced in the private scrolls of individual masters, probably at a very early date—later crystallizing into the Babylonian and Palestinian systems of ACCENTS. Before this necessity for a notation was generally felt, a system of manual signs had been developed (Ber. 62a), just as in the Greek Church, where it was called the *χειρωναυία* ("Mannum variis motibus altitudinem, depressionem, flexus vocis significabant"); and the system survived into the Middle Ages, being referred to by Ben Asher (תקנוני הטעמים, ed. Baer and Strack, 18), and later by Rashi (on Ber. 62a), while Petbahiah of Regensburg found them still practised in the Bagdad synagogues in the twelfth century. In modern times it has been noticed by Joseph Saphir in Yemen (Eben "Safir," i. 56b) and by Burkhardt in Tiberias. This chironomy, like that of the churches, must have been based upon the rise and fall of the finger as the notes employed seemed to rise and to fall in succession. However much the point and straight line, as in the fifth-century Syriac system, may have been utilized for the bases of notation, yet the manual movements and the written signs must often have mutually counteracted (compare "Manuel du Lecteur," ed. J. Derenbourg, p. 16).

**Early References.** In its present state, however, calligraphy rarely depicts the rise and fall of the voice, for the accents are intended only to remind readers of certain intonations they have already learned by ear. So the signs do not designate any tonal value or any sort of succession of notes, but only that a conventional series of sounds are to be grouped on a syllable in a certain manner. Attempts have been made to reconstitute the oldest form of the cantillation by J. C. Speidel ("Spuren von der Alten Davidischen Sing-Kunst," Waiblingen, 1740), C. G. Anton (in Paulus' "Neues Repertorium für Biblische Litteratur," Jena, 1790), L. Haupt ("Sechs Alttestamentliche Psalmen," Görtitz, 1854), and L. Arends ("Ueber den Sprachgesang der Vorzeit," Berlin, 1867). But as these investigators did not combine that acquaintance at once with Hebrew grammar and history and with synagogal music on which Delitzsch rightly insists for the study of the subject ("Physiologie und Musik in Ihrer Bedeutung für die Grammatik, Besonders die Hebräische," Leipzig, 1868), the fanciful in their conclusions outweighs the probable.

The Hebrew Bible is now pointed with two systems of accents. Of the system employed in the three poetical books, אֲמַת, Job, Proverbs, Psalms, the vocal interpretation has been forgotten, al-

though traces of it appear to have been still retained in the fourteenth century (compare Simon ben Zemah Duran, מִנְיַן אֲבוֹת, 52b). This loss is probably due to the early discovery that for congregational use—the chief employment of the Psalms, at least—the utilization would be at once more simple and more effective of a chant identical in each successive verse, and with enough melodic definiteness and individuality to be easily remembered, in comparison with a pointed cantillation varied from verse to verse, and demanding continuous attention from the readers. The similar measurement and dichotomy of verses in these poetical books would sometimes, indeed, suggest such a fixed melody by the similar accentuation of successive verses. But the prose Scriptures are recited by an individual, and for them the commoner species of pointing is employed. For this accentuation of the "twenty-one books" the cantillation vigorously survives in a certain number of antique forms, divergent in detail of tune and especially in tonality (or scale structure), but *parallel* in character and in outline.

This parallelism of divergent forms results in several divergent musical interpretations being given to the accents in each מִצְוָה or rite traditional among Jews since the Middle Ages (remarked before 1444 in S. Duran's מִנְיַן אֲבוֹת, 52b). This feature is probably of great antiquity, and may have already existed in the Talmudical age. A similar parallelism is noticeable among the various prayer-motives (or outlines of melody for intoning the devotional portions of the various services; see MUSIC, SYNAGOGAL) in each rite, and exhibits the same uniformity of employment of different tonalities. The principle seems to be general in Jewish worship-music, and may be formulated as the specific allotment in tradition of a particular mode or scale-form to each sacred occasion, on account of some esthetic appropriateness felt to lie in the association. While the only two modes utilized in modern European music, the major and the minor, are to be met with, they are of insignificance in face of the rich variety of modes of an antique or Oriental character more frequently favored in all the musical rituals which have not recently broken with tradition. The cantillation adheres only to modes similar to those of the Catholic plain-song, probably from a contemporary development at the close of the Dark Ages. The resemblance of some tropes to intonations employed in reading the Koran is at once striking; and the tonalities preserved among the Jews closely resemble those of the Byzantine and Armenian traditions, of the folk-song of eastern Europe, and of Perso-Arab melody. This modal feeling of Jewish worship-music is still reminiscent of the musical theory and practise of eastern Asia, which radiated from Babylon to the Mediterranean and to the Indian ocean. All this suggests that a similar principle may have underlain the cantillation of the Psalms in the Temple at Jerusalem, and attracts attention to the suggestions thrown out on literary grounds by Haremburg ("Lips. Misc. Nova," 1753, ix. 2, p. 218 *et seq.*) and by Grätz ("Psalmen," 1882, p. 71) that other head-

**One Species Lost.**

**Principle of Parallel Tonalties Ancient.**

ings of the Psalms besides Gittith (viii., lxxxi.) refer to music known by the name of a particular district, according to the old Greek custom and that of Eastern races. It may be surmised that the Masoretes were no longer acquainted with that practise of the older musical school which superscribed a Psalm with the geographical name of the scale in which it was to be sung, because the liturgical Psalms nearer the close of the Canon, or the chant of which may have been still known, or may have been more definite in melody form, bore no such superscription. But if the practise of later

Jews (found equally among the various traditions which then had not yet diverged) of using a different tonality for each class of religious occasion had already prevailed in Temple times, it could be understood why Psalms would be headed with geographical expressions such as Gathite (viii., lxxxi.); Eolian of the East (xxii.); Susian (xiv., lx., lxix., lxxx.); Elamite (ix., xlvi.); Ionian (*Jucanit*) (lvi.); perhaps the headings of Ps. vi. and lvii., with others similarly superscribed, might be referred to the same class of technical musical rubric. In any case, scale-forms similar to these ancient ones were, and are, used by all Jews, according to the sacred day, for the cantillation now designated by the ACCENTS.

The modes employed in the prayer-motives will be discussed with them, but the modes for the cantillation may be summarized as follows, if the Gregorian nomenclature is used.

	Scriptural Reading.	Mode.
Ashkenazi	Pentateuchal (ordinary)	Hypoeolian
	(penitential)	Mixolydian
	Prophetical	Dorian
	Lamentations	Hypodorian
Sephardi	Esther	Hypolydian
	Pentateuchal	Hypoeolian
Bagdadi	Prophetical	Dorian
	Pentateuchal	Ionian
Levantine	Prophetical	Hypodorian
	Lamentations, etc.	Phrygian
	Pentateuchal	Hypodorian

In all these varied systems of musical interpretation of the same signs each particular accent is associated with a parallel vocal figure or trope, which consists of a group of notes forming a melismatic phrase. The accents, and consequently the tropes, are either conjunctive or disjunctive. Some of the disjunctive tropes form not so much a note-group, to be sung at one effort of the voice, as a series of such groups, or what is known in plain-song as a jubilation. Sometimes a minor conjunctive will in chanting be absorbed into the more important disjunctive which may follow it; but, as a rule, one

accent designates one trope, and each word (save only the few enclitics) has a trope sung upon its tone-syllable, the more immediately connected conjunctives and disjunctives running on smoothly together into a "distinction" or phrase. If the word has a penultimate accent, the last note is, where necessary, repeated; and any syllables preceding the accented syllable are recited on a note of the trope introduced for the purpose in front of the note bearing the stress, and serving to "carry on" from trope to trope, blending the several ננינות or jubilations together into a homogeneous distinction for each successive rhetorical phrase. The whole strikes the hearer with its singular effectiveness in bringing out the meaning of the text, and affords a fair idea of that bardic declamation interpreting the text chanted, which for the ancients constituted melody, as tune does for us.

Now, if the following text be taken for cantillation according to its accents—

וַיְהִי אַחַר הַדְּבָרִים הָאֵלֶּה וַהֲאֱלֹהִים נִסָּה אֶת־אַבְרָהָם  
וַיֹּאמֶר אֱלֹוֹ אַבְרָהָם וַיֹּאמֶר הֲנִנִּי:

when read (according to the Northern use) as part of an ordinary Pentateuchal lesson, it will be chanted thus:

*Rather briskly: without strict tempo.*

Wa - ye - hi..... a - har ha - de - ba - rim... ha -  
el - - leh, we - ha - e - lo - him.. nis - sah... et Ab - ra -  
ham, ... way - yo - mer e - law..... Ab - ra - ham..... way -

Pash-ta..... Mah - pak Pash-ta Za - kef Ka - ton... Ye-tib.... Za - kef Ka - ton,

The musical score consists of 16 staves of music, each corresponding to a line of Hebrew text. The notation includes various rhythmic values and melodic lines. The text is: Pash-ta..... Mah - pak Pash-ta Za - kef Ka - ton... Ye-tib.... Za - kef Ka - ton,.

The score is divided into two main sections by a vertical line. The first section covers the text from 'Pash-ta' to 'Ka - ton...'. The second section covers 'Ye-tib....' to 'Ka - ton,'.

Key features of the notation include:
 

- Staff 1: Introduction of the 'Pash-ta' note with a dotted line.
- Staff 2: Introduction of the 'Mah - pak' note.
- Staff 3: Introduction of the 'Za - kef' note.
- Staff 4: Introduction of the 'Ka - ton' note.
- Staff 5: Introduction of the 'Ye-tib' note.
- Staff 6: Introduction of the 'Za - kef' note.
- Staff 7: Introduction of the 'Ka - ton' note.
- Staff 8: Introduction of the 'Pash-ta' note.
- Staff 9: Introduction of the 'Mah - pak' note.
- Staff 10: Introduction of the 'Za - kef' note.
- Staff 11: Introduction of the 'Ka - ton' note.
- Staff 12: Introduction of the 'Ye-tib' note.
- Staff 13: Introduction of the 'Za - kef' note.
- Staff 14: Introduction of the 'Ka - ton' note.
- Staff 15: Introduction of the 'Pash-ta' note.
- Staff 16: Introduction of the 'Mah - pak' note.

מונה Resting (horn)	אתנתתא Rester	מונה (Before conjunctives) Resting (horn)	מונה (Before disjunctives) Resting (horn)	פזר Dispersed	תלישא גדולה Major Drawing Out
nah	Et-nah-ta;	Mu-nah,....	Mu-nah	'Pa-zer,.....	T'li-sha,.....
<p>The musical score consists of 15 staves of music. The first four staves are in 6/8 time, and the last two are in 4/4 time. The notation includes various rhythmic values, rests, and ornaments. Above the staves, there are labels for different cantillation marks: 'מונה' (Resting horn), 'אתנתתא' (Rester), 'מונה (Before conjunctives)' (Resting horn), 'מונה (Before disjunctives)' (Resting horn), 'פזר' (Dispersed), and 'תלישא גדולה' (Major Drawing Out). The lyrics 'nah Et-nah-ta; Mu-nah,.... Mu-nah 'Pa-zer,..... T'li-sha,.....' are written above the first staff. The music features a variety of rhythmic patterns, including eighth and sixteenth notes, and rests. There are also some specific markings like '3' and '4' indicating triplets or other rhythmic groupings.</p>

Da - re - ga..... Te - bir,.... Me-re - ka Tip - ha, Me-re - ka Sil - luh.

The musical score consists of 15 staves of music. The first staff contains the lyrics: "Da - re - ga..... Te - bir,.... Me-re - ka Tip - ha, Me-re - ka Sil - luh." The music is written in a system of five-line staves. The first staff is in 4/4 time and features a series of eighth notes with a '3' above a group of three notes, indicating a triplet. The second staff continues the melody with similar rhythmic patterns. The third staff shows a change in the melodic line, with a '3' above a group of notes. The fourth staff continues the pattern. The fifth staff shows a change in the melodic line, with a '3' above a group of notes. The sixth staff continues the pattern. The seventh staff shows a change in the melodic line, with a '3' above a group of notes. The eighth staff continues the pattern. The ninth staff shows a change in the melodic line, with a '3' above a group of notes. The tenth staff continues the pattern. The eleventh staff shows a change in the melodic line, with a '3' above a group of notes. The twelfth staff continues the pattern. The thirteenth staff shows a change in the melodic line, with a '3' above a group of notes. The fourteenth staff continues the pattern. The fifteenth staff shows a change in the melodic line, with a '3' above a group of notes. The music is written in a system of five-line staves. The first staff is in 4/4 time and features a series of eighth notes with a '3' above a group of three notes, indicating a triplet. The second staff continues the melody with similar rhythmic patterns. The third staff shows a change in the melodic line, with a '3' above a group of notes. The fourth staff continues the pattern. The fifth staff shows a change in the melodic line, with a '3' above a group of notes. The sixth staff continues the pattern. The seventh staff shows a change in the melodic line, with a '3' above a group of notes. The eighth staff continues the pattern. The ninth staff shows a change in the melodic line, with a '3' above a group of notes. The tenth staff continues the pattern. The eleventh staff shows a change in the melodic line, with a '3' above a group of notes. The twelfth staff continues the pattern. The thirteenth staff shows a change in the melodic line, with a '3' above a group of notes. The fourteenth staff continues the pattern. The fifteenth staff shows a change in the melodic line, with a '3' above a group of notes.

On the Penitential Days, however, it would be chanted with jubilation of similar outline to each accent, but the intervals of the scale drawn from quite another mode, as follows:

raey; and only inadequate impressions of the contemporary jubilation in use can be derived from the few statements preserved in the writings of Ben Asher, Shem-Tob, and Moses Provençale. Delitzsch

*Rather slower: without strict tempo.*

Wa - ye - hi..... a - har ha - de - ba - rim ha - el - leh, we - ha - e - lo - him... nis - sah et Ab - ra - ham,.. way - yo - mer e - - law.... Ab - ra - ham, way - yo - mer, hin - ne - ni.

*CODA.*

But, again, had this passage from Gen. xxix. formed a portion of a lesson from the Prophets (HAFTARAH), its accents would have been musically interpreted in similar style, but in yet another tonality; thus:

(Psalms i., p. 44, English ed.) sums these up as follows: "Pazer and Shalshet have a like intonation, which rises quaveringly; though Shalshet is drawn out longer—about a third longer than that of

*Rather briskly: without strict tempo.*

Wa - ye - hi..... a - har ha - de - ba - rim.... ha - el - leh, we - ha - e - lo - him nis - sah et Ab - ra - ham, way - yo - mer e - law, Ab - ra - ham..... way - yo - mer, hin - ne - ni.

*CODA.*

The coda added to each of the above transcriptions shows the form of the "jubilation" which ends each section of the reading, a sort of musical "Here endeth the lesson," varying in figuration as well as in tonality according to the importance of the service.

It is not always certain whether the names of the accents were given to them from their shape, position, and function, or from the outline and tone of the musical sounds for which they are the notation. Words in any case rarely succeed in describing the effect of musical sounds with any approach to accu-

the prose books. Legarmeh (in form Mahpak or Azla, followed by Pesik) has a clear high tone; before Zinnor, however, Old Descriptions. it is deeper and more broken; Rebia magnum has a soft tone, tending to repose [query: sinking to a rest-note]. In Shlluk the tone is raised at first, and then sinks to repose. The tone of Merka is, according to its name, *andante* [query, protracted] and sinking into the depths; the tone of Tarha corresponds with *adagio*." All that can be gathered from this is that the accents of the three poetical books were meant to be interpreted

by much the same figuration of notes as those of the twenty-one prose books. Of these last similar descriptions are to be found in old writers (compare Kalonymus ben David in A. de Balmes' מְקַנָּה אֲבָרָם Venice, 1523). During the recent centuries the continued elaboration of the cantillation by the professional readers, especially among the Polish and German congregations, has overlaid the earlier elements of the chant with ornament and developed many variants, so as to render these descriptions difficult to elucidate. But they are scarcely needed, since so many musical transcriptions have been made: such transcriptions being known, from the jubilation with which they commence, as "Zarka Tables." The most valuable of them all, for the Ashkenazic traditions, is to be found in Cantor Abraham Baer's "Ba'al Tefillah," 1877, pp. 30-42. The value of the earlier tables (*e.g.*, those of Bartolucci, A. Kircher, P. Guarin, etc.) is detracted from by unnecessary elaboration, and especially by experiments in transcribing the notes backward, so as to go with the Hebrew from right to left, which have misled later students. Such, too, is the case with the transcription made by the monk Böschenstein for Renschlin, and printed in his "De Accentibus" (Hagenau, 1518), at end of Book III., where the cantillation, reversed and given in the tenor as a canto fermo, is ludicrously accompanied by three other harmony parts. But Renschlin's tenor cantillation, when retranscribed, is particularly valuable as showing that the tradition has not appreciably varied in four centuries, save possibly in the rarer jubilations, such as "Karne Farah," where license is always taken. Similarly valuable as illustrating the persistent accuracy of tradition is the transcription of the Sephardic cantillation made by David de Pinna, a Jewish surgeon in Amsterdam, for Jablouski's "Biblia Hebraica" (Berlin, 1699). The Oriental traditions have only received treatment since Villoteau followed in the train of Napoleon to Egypt, while the Bagdad

forms are now first presented (from notes by Mr. Morris Cohen). The cantillation being still handed on in oral tradition, many minor variants will be found to exist, which it was not deemed necessary to include in the preceding "Zarka Table," where ad libitum grace notes have also been omitted from the transcription.

The "repetition with song" (see above), or study of religious literature in a vocal intonation, similarly survives from the Talmudical age to the present day. But it was never so developed for the small audience in the house of study as was the Scriptural cantillation for the larger congregation in the house of prayer. Private notes in the copy of the individual here likewise originated a system of accentuation. Examples are referred to by the Tosafists and

#### The Students' Cantillation.

by Profiat Duran; and an accentuated copy of the Mishnah was possessed by Joseph Solomon Medigo in the seventeenth century. Indeed, one treatise of the Mishnah was printed with accents as late as 1553. The oldest extant manuscript of the Talmud, a fragment of Keritot, is marked with accents for the students' cantillation, and can be examined in the facsimile published in Singer and Schechter's "Rabbinical Fragments." Nothing, however, is known of any musical interpretation of these accents. The students' cantillation in present use varies according to the country of origin, but is more or less a mere drone, although the monotone is always abandoned at the end of the clause, according as it expresses a question or a reply, a doubt or a conclusion. Generally the question ends on the dominant, the reply on the tonic.

The earliest transcription of a students' cantillation is to be found in the Helek of the apostate Gerson of Halberstadt (Helmstadt, 1610), where he says that "almost the whole of the Talmud is set out in question and answer as follows." Put into modern notation, his transcription is as given on page 549.

*Ad lib.*

Fraw, wie gebt ir die He-ring? Umb drey Pfen-nig!  
 Das ist zu thew-er! Umb ei-nen Pfen-nig?  
 Das ist zu wol-feil! Dar-umb umb zwe-ne Pfen-nig!...

The students' cantillation has been carried into domestic worship in the HAGGADAH, the child's question on the Passover Eve being often set out in it. The transcription on the following page is due to Baer ("Ba'al Tefillah," p. 170).

**BIBLIOGRAPHY:** The grammatical force of the accents is treated under ACCENTS. Almost every compilation of synagogue music covering the whole year includes some transcription of the cantillation, if only of the Pentateuch. Fuller and more careful summaries are due to Naumbourg, *Recueil de Chants Religieux*, Paris, 1874, and Baer, *Der Praktische Vorbeter*, Gothenburg, 1877, and Frankfort, 1882. For the general consideration of the melody of the accents see Wickes, *Poetical Accentuation*, Oxford, 1881, and *Prose Accentuation*, ib. 1887. Useful references are collected in Ackermann, *Der Synagogale Gesang* (I. Das Talmudische Zeitalter), in Winter and Wünsche, *Jüdische Literatur*, vol. iii., Treves, 1894. For the musical accentuation of later texts see Steinschneider, *Jewish Lit.* p. 154; Dukes, in *Literaturblatt des Orients*, 1843-1844; and Abrahams, in *Jew. Quart. Rev.* xi. 291, London, 1899. The various traditions are coordinated in F. L. Cohen, *Ancient Musical Traditions of the Synagogue*, in *Proceedings of the Musical Assoc.* xix., London, 1893; and *Le Plain Chant de la Synagogue*, in *Revue du Chant Grégorien*, Nos. 33-36, Marseilles, 1899.

F. L. C.

**CANTON, ISAAC BERECHIAH:** Italian Talmudist; flourished about the middle of the eighteenth century in Turin, in which city he established a yeshibah. He is the author of a responsum in Simson Morpurgo's "Shemesh Zedakah" (Yoreh De'ah, 12). Ghironi possessed in manuscript some other halakic decisions by Canton, and saw also a manuscript work of his entitled "Yetad ha-Ohel" (The Pin of the Tent), an index to Solomon Urbino's dictionary of Hebrew synonyms entitled "Ohel Mo'ed."

**BIBLIOGRAPHY:** Nepi-Ghironi, *Toledot Gedole Yisrael*, p. 159; Mortara, *Indice*, p. 10.

I. BER.

**CANTONI, LELIO** (הלל ברוך שלום): Italian rabbi; born in 1802 at Gazzuolo (dukedom of Mantua); died in 1857 at Turin. In 1829 he went to the Istituto Rabbinico at Padua, then recently established, graduating as rabbi in 1832. From 1833 until his death he was chief rabbi of Turin. Endowed with executive ability and magnetic personality, and being a man of deep piety, he ably bridged the gulf that separated the old and the modern views of Judaism.

Recognizing his administrative ability, the government repeatedly entrusted Cantoni with the drafting of statutes affecting the Jewish communities. After the emancipation of the Sardinian Jews in 1848, Cantoni was mainly occupied with the organization of the internal administration of Jewish

religious matters. To effect this he published his "Nuovo Ordinamento del Culto Israelitico nes Regi Stati," in which he advocated the establishment by the government of consistories, pointing out the means by which these could be supported. Cantoni was the chief promoter of the establishment of asylums for children, which are still maintained with success in every Italian Jewish community of importance.

He was also instrumental in founding the best schools and societies of the community of Turin. Most noteworthy among his achievements was his work on behalf of the emancipation of the Jews in the kingdom of Sardinia through the Constitution of 1848, which was subsequently transferred to united Italy. Cantoni's untimely death prevented the realization of his hopes of founding an organization to include all the communities and rabbis of Italy. In addition to writing books for the edification of the young, he was a contributor to the "Educatore Israelita" and the "Archives Israélites."

**BIBLIOGRAPHY:** *Educatore Israelita*, v. 37; *Arch. Isr.* xviii. 81.

I. E.

**CANTONISTS:** Sons of Russian private soldiers who from 1805 to 1827 were educated in special "canton schools" for future military service; after 1827 the term was applied also to Jewish boys, who, according to a statute issued Sept. 7, 1827, were drafted to military service at the age of twelve and placed for their military education in cantonist schools of distant provinces.

The sons of Jewish soldiers were at this period regarded as government property and were educated for military service by the authorities, who, during the reign of Nicholas I. of Russia, had a special regard for the Jewish cantonists, as it was easier to convert them to the Greek Orthodox Church than it was to convert their elders, whose religious principles had been firmly established. The best method to obtain this result was to take them far away from their birthplace so that they could forget their religion and be unprotected against the missionary propaganda of the officers of the army (I. Orshanski, "Russkoe Zakonodatelstvo o Yevreyakh," p. 25, St. Petersburg, 1877). According to Nikitin, "Otechestvennyya Zapiski," 1871, viii. 352, those mobilized at Kiev were sent to Perm; those at Brest to Nijni-Novgorod. Eye-witnesses have many times described the inhuman tortures

H. R.

**CANTOR.** See HAZAN.

**CANTOR, GEORG:** German mathematician; born at St. Petersburg, Russia, March 3, 1845. He is distantly related to Moritz CANTOR. He was only eleven years old when he went to Germany, where he received his high-school and university education. In 1862 he entered the University of Zurich, Switzerland, but at the close of the academic year moved to Berlin, where he remained until 1867, deeply interested in his studies and enthusiastically following mathematical and philosophical lectures at the university. In 1869, two years after receiving the degree of Ph.D. at the University of Berlin, he was

admitted as privat-docent at the University of Halle, where he became assistant professor in 1872, and professor seven years later.

Without being a prolific writer, Cantor has rendered invaluable services to the progress of mathematical analysis, more especially to that of the modern theory of functions, by his epoch-making contributions to the theory of multiplicities ("Mannigfaltigkeitslehre" in German, "théorie des ensembles" in French)—a doctrine which he wholly and independently created and developed. The startling but fruitful ideas embodied in his "Grundlagen einer Allgemeinen Mannigfaltigkeitslehre," Leipzig, 1883, have become the property of the best modern textbooks on mathematical analysis, despite the difficult and abstruse character of the new conceptions involved.

No mathematician could to-day dispense with the perusal of the little volume that, at a single stroke, brought universal fame to the author, and opened a new and rich field for mathematical investigation. Georg Cantor's definition of the mathematical continuum, as a particular form of a more general class of multiplicities, has been of immense benefit to the progress of mathematics, and in itself constitutes an undying monument to the name of this profound philosopher and mathematician. Much of the clearness and precision of modern mathematical methods is due to his example and instigation. He endeavored to unravel the mysteries of the infinite, and succeeded in establishing, if an indirect, nevertheless a perfectly determinate conception of the mathematical infinity—theory of transfinite numbers. His rigorous mathematical theory of irrational numbers, together with the independent investigations of Weierstrass and Dedekind, filled an important lacuna in the development of modern mathematical thought. On this subject see more especially his paper "Ueber die Ausdehnung eines Satzes aus der Theorie der Trigonometrischen Reihen," in vol. v. of the "Mathematische Annalen," 1872; and the memoir "Die Elemente der Functionenlehre," by E. Heine in Crelle's "Journal für die Reine und Angewandte Mathematik," 1871, vol. lxxii.

The articles by Georg Cantor which appeared under different titles in Crelle's "Journal," in the "Acta Mathematica," and in the "Zeitschrift für Philosophie und Phil. Kritik," are, for the greater part, either reproductions or translations of papers published in the "Mathematische Annalen," and later collected, under the title "Grundlagen einer Allgemeinen Mannigfaltigkeitslehre." His "Gesammelte Abhandlungen" were published in 1890.

A. S. C.

**CANTOR, JACOB A.:** American lawyer and politician; born in New York city Dec. 6, 1854; grandson of Agil Hanau, cantor of Dukes Place Synagogue, London. Cantor is an LL.B. of the University of New York. He served as a member of the assembly of the state of New York in 1887 and as state senator from 1888 to 1898, during which time he was chairman of the finance committee of the senate and leader of the Democratic party in that body. For two years (1893-94) Cantor was president of the senate. In 1901 he was elected, on a

non-partizan ticket, president of the borough of Manhattan, an office second in importance only to that of mayor of New York. Cantor has been actively interested in good government for municipalities. In the legislature he championed legislation in behalf of the public schools and colleges of New York, having charge at the same time of general measures affecting the canals.

Cantor has been prominently identified with Jewish communal work, belonging to many societies, and serving as director of the Society for the Aid of Jewish Prisoners and of the Jewish Protectorate. During his fourteen years' service in the legislature he introduced and aided the passage of many measures affecting the Jewish institutions of New York. He advocated the Freedom of Worship Bill, according equal religious rights to all inmates of prisons and reformatories, and was instrumental in securing an appropriation for the compensation of Jewish rabbis ministering in those establishments.

A.

**CANTOR, MORITZ:** German historian of mathematics; born at Mannheim, Germany, on Aug. 23, 1829. He comes of a family that emigrated to Holland from Portugal, another branch of the same house having established itself in Russia, the land of Georg Cantor's birth. In his early youth Cantor was not strong enough to go to school, and his parents decided to educate him at home. Later, however, he was admitted to an advanced class of the gymnasium in Mannheim. Thence he went to the University of Heidelberg in 1848, and soon after to the University of Göttingen, where he studied under Gauss and Weber, and where Stern awakened in him a strong interest in historical research.

Moritz Cantor.

After taking his degree of Ph.D. at the University of Heidelberg in 1851, he went to Berlin, where he eagerly followed the lectures of Lejenne-Dirichlet; and upon his return to Heidelberg in 1853, he was appointed privat-docent at the university. In 1863 he was promoted to the position of assistant professor, and in 1877 he became honorary professor.

Cantor was one of the founders of the "Kritische Zeitschrift für Chemie, Physik, und Mathematik." In 1859 he became associated with Schömilch as editor of the "Zeitschrift für Mathematik und Physik," taking charge of the historical and literary section of this excellent publication. Since 1877, through his efforts, a supplement to the "Zeitschrift" has been published under the separate title of "Abhandlungen zur Geschichte der Mathematik."

Cantor's inaugural dissertation—"Ueber ein Weniger Gebräuchliches Coordinaten-System," Frankfurt-on-the-Main, 1851—gave no indication that the history of exact sciences would soon be enriched by a masterwork from the same author. Even his first work, entitled "Grundzüge einer Elementararithmetik als Leitfaden zu Akademischen Vorträgen," Heidelberg, 1855, only faintly disclosed the direction of his real taste and talents. These became apparent for the first time in his paper "Ueber die Einführung Unserer Gegenwärtigen Ziffern in Europa," which he wrote for the "Zeitschrift für Mathematik und Physik," 1856, vol. i. The masterwork of Cantor was only recently concluded. His "Vorlesungen über Geschichte der Mathematik," in three volumes, of which the first appeared in 1880 and the last in 1898, at Leipzig, covers the development of this science from the remotest times until the year 1758—that is, until the era of Lagrange—and is the most exhaustive and authoritative work on the subject to-day.

As a pioneer in the revived study of the history of exact sciences, Cantor stands at the head of his contemporaries. To him belongs the chief credit for founding a new discipline in a field that had hitherto lacked the sound, conscientious, and critical methods of this master. His work, both as a successful lecturer at the University of Heidelberg and as the author of numerous papers and reviews, has been an incentive to his pupils and followers and a stimulus for further investigation.

Among his other works may be mentioned: "Mathematische Beiträge zum Culturleben der Völker," Halle, 1863; "Die Römischen Agrimensoren und Ihre Stellung in der Geschichte der Feldmesskunst," Leipzig, 1867; "Das Gesetz im Zufall," Berlin, 1877.

**BIBLIOGRAPHY:** Supplement to vol. xlv. of the *Zeitschrift für Mathematik und Physik* entitled *Abhandlungen zur Geschichte der Mathematik*; edited by M. Curtze and S. Günther, and dedicated to Moritz Cantor on the seventieth anniversary of his birthday, Aug. 23, 1889. The carefully compiled catalogue contains, besides references to original works by Cantor, a complete list of his historical and critical reviews to date.

**CANTORI, JOSHUA DEI:** Assailant of the Talmud at Cremona in 1559. According to Steinschneider, he belonged to the family Cantarini (קנטריני). In consequence of a dispute with Joseph Ottolenghi, who was head of the Talmudical school of Cremona, Cantori, in order to avenge himself on his adversary, appeared with the converted Jew Baptista Vittorio Eliano, and denounced the Talmud as containing blasphemies against the Christian faith. The result of this accusation was the public burning of Hebrew books in 1559 at Cremona. Joseph ha-Kohen records this incident, and adds that later Cantori was found assassinated in a street of Cremona, and was buried "behind the board" in the Jewish cemetery of that city as a mark of contumely. According to another source quoted by J. Wolf ("Bibl. Hebr." i. 131), Cantori was a convert to Christianity.

**CAPADOCE, ABRAHAM:** Convert to Christianity; born at Amsterdam 1795; died there Dec. 16, 1874. His parents, who were Portuguese Jews, gave him an entirely secular education, wishing him to study medicine. After having completed his medical studies at the University of Leyden, he was adopted by his uncle, the well-known physician Immanuel Capadoce. In his uncle's house Abraham came in contact with Christians, and being animated with strong religious feelings without having been practically instructed in any religion, he yielded to the influence of his surroundings, especially to that of Isaac da Costa, who persuaded him to become a Christian.

Among Capadoce's writings the most noteworthy are: (1) "Aan Mijne Geloofsgenooten in de Ned. Hebr. Gem." The Hague, 1843; (2) "Overdenkingen over Israel's Roeping en Toekomst," Amsterdam, 1843; (3) "Rome en Jerusalem," Utrecht, 1851.

As a physician Capadoce made himself known by his opposition to vaccination. A work of his on this subject, published at Amsterdam in 1823, provoked many polemics in the medical world.

**ÇAPATEIRO, JOSEPH** (designated also, even by the more modern Portuguese historians, such as Mendes dos Remedios, as **José Çapateiro de Lamego**, or "Joseph, Shoemaker of Lamego"): Portuguese traveler of the fifteenth century. After a sojourn in Bagdad, he returned to Lisbon to present a report to King João II. on Ormuz, the emporium of the East-Indian spice trade. He thereupon, by the king's orders, set out in company with the experienced linguist, ABRAHAM OF BEJA, in search of the roving explorer, Pedro de Covilhão, in order to interview the latter in the king's behalf as to the results of his travels. After obtaining valuable information regarding the discovery of the sea route to India from Covilhão, who had previously gathered it from Arabian and Indian pilots, Joseph was sent home by caravan to Aleppo. Both Joseph and Abraham, his fellow-traveler, thus rendered eminent pioneer service in the cause of Portuguese discovery.

**CAPE TOWN.** See SOUTH AFRICA.

**CAPEFIGUE, JEAN-BAPTISTE HONORÉ-RAYMOND:** French Christian publicist and historian; born at Marseilles 1802; died at Paris Dec. 23, 1872. Among many historical works, Capefigue wrote a history of the Jews, entitled "Histoire Philosophique des Juifs Depuis la Décadence des Macchabées Jusqu'à Nos Jours," Paris, 1833. The author divided Jewish history into three periods, of which only the first, extending from the decadence of the Maccabees to the sixth century, is dealt with in the volume that has been published.

**CAPER-BERRY** (translation of אֲבִייוֹנָה, *abiyonah*, Eccl. xii. 5; incorrectly, A. V. "desire," from אֲבִייוֹנָה): The feminine "abiyonah" does not express "desire," but "the desiring thing," *sc.* "soul" [so Kimhi]. The Septuagint, Vulgate, Peshiṭta, and Aquila translate by *καππαρίς*, "caper-berry," which traditional translation is confirmed in the Mishnah Ma'as. iv. 6 and in other places in the Talmud, where it is carefully distinguished from the shoots, "temarot," and the floral envelopes, "ḳapperisin," and declared to be the fruit of the "zalef" or caper-plant): This is a woody, trailing shrub known in botany as *caparris spinosa*. It is quite common in the Mediterranean countries, where it grows on old walls and in the fissures of the rocks. Its large white flowers, with many long lilac anthers, are highly decorative. The caper of commerce, which is now eaten pickled, is the flower-bud, not mentioned in the Talmud. The "abiyonoth," or berries proper, however, were eaten, as appears from their liability to tithes and to the restrictions of the 'Orlah. They were supposed to have aphrodisiac properties (see Delitzsch's "Ḳohelet," *ad loc.*).

For the allegorical meaning of the word "abiyonah" in Ecclesiastes, see commentators.

**BIBLIOGRAPHY:** Moore, *The Caper-Plant and Its Edible Products*, in *Journal of Biblical Literature*; Tristram, *Natural History of the Bible*.

K.

II. II.

**CAPERNAUM** (Καφαρναούμ, or, in Jewish writings, כַּפְּרִנְחָם): Small town by the Lake of Gennesaret, mentioned in the Gospels as the home of Jesus, where he resided after his rejection by his Nazareth townsmen (Matt. iv. 13, viii. 5-17, ix. 1, xi. 23, xvii. 24; Mark i. 21; Luke vii. 1 *et seq.*; John vi. 17; Eccl. R. to i. 6 and to vii. 26, as the dwelling-place of the Minim or Christian exorcists of the second century. See also Derenbourg, "Essai sur l'Histoire et la Géographie de la Palestine," p. 362). According to these passages it lay close by the lake, and contained a synagogue built by a centurion living there. The "receipt of custom" nearby (Matt. ix. 9) probably had made it necessary to station Roman soldiers in the town. The exact site of the town can not be definitely fixed. Josephus speaks of a spring "Kafarnaum," which watered the fertile plain of Gennesaret (now plain of Ghuwair) on the northwestern side of the lake. Hence the spring must be looked for in 'Ain al-Tabighah, on the northern slopes of the plain, since water was in olden times carried down to the plain through a conduit now in ruins. Accordingly the ruins of El-Minyah, in the extreme northern part of the Gennesaret plain, have been taken by some as the site of Capernaum. This assumption is further supported by the statement of the pilgrim Arculfus (middle of the seventh century; Tobler and Molinier, "Itinerarium Hierosolymitanum," p. 183) that Capernaum lay at the base of the southern slope of a mountain. This is not decisive, however, since Arculfus did not visit the town itself, but saw it from a distance, and his further remarks can not be applied to the site of the ruins of Minyah.

But Capernaum might also be identified with the ruins close by the Tabighah spring, discovered by

Schumacher. However, Theodosius of the sixth century says that Capernaum was two Roman miles from the Heptapegon (or Tabighah) spring. Jerome also says that Capernaum was two miles distant from Chorazin (probably the Kerazah of to-day). These figures apply to the well-known ruins of Tell Hum, found near the lake and rapidly disappearing. Among the blocks of black basalt are found the remains of a marble synagogue, which show that a city once stood on this spot; and as the second part ("hum") of this name is also found in "Kefar Naḥum," many scholars identify these ruins with Capernaum. If the name "Tell Hum" was originally "Tenhum," this identification is made more probable on linguistic grounds, especially since "Kefar Tanḥum" and "Kefar Tehumin" are frequently given as variants for "Kefar Naḥum." [See Kohut, "Aruch Completum," *s.v.* כַּפְּרִי; Neubauer "G. T." p. 221; Grätz, "Gesch. der Juden," iii. 307 *et seq.*—K.] This location would harmonize with the statement of Josephus ("Vita," § 72) that, after his accident on the Jordan, he was carried to a village, Cepharnome (Kephar Nome). But the reading here is not certain (compare Niese), and, moreover, Capernaum was a town, not a village.

F. Br.

**CAPESTANG:** Village in the department of Hérault, near Béziers, France. Several official documents testify to the presence of many Jews there in the thirteenth century. Simon ben Meïr, in his work, "Milḥemet Mizwah," relates that about 1245 he took part in a religious controversy before the archbishop of Narbonne, in the presence of the leaders of the Jewish community of Capestang. Numerous scholars of the thirteenth and fourteenth centuries have borne the surname of "Capestang," which, in passing into Hebrew, underwent many alterations, as קַבְּסַטְאָן, קַבְּסַטְאָן, קַבְּסַטְאָן.

The Jewish community of Capestang took part in the campaign led by Abba Mari of Lunel against Maimonides. A letter of adhesion condemning the study of philosophy was sent to Abba Mari by Isaac ben Moses ha-Kohen in the name of fifteen scholars of Capestang.

**CAPHAR-SALAMA.** See KEFAR-SALAMA.

**CAPHTOR:** Original country of the Philistines before their emigration into Palestine, whence their name, "Caphtorim" (Deut. ii. 23; Amos ix. 7; Jer. xlvii. 4, where they are called "the remnant of the country [Hebrew, "island"] of Caphtor"). The ancient versions render "Caphtor" by "Cappadocia" (Persian, "Katpadhuka"), changing the final consonant to *k*, which is evidently only a very bold conjecture. According to Gen. x. 14 and I Chron. i. 12 (where the gloss-like remark, "out of whom came the Philistines," has, as is now generally believed, been misplaced by copyists, being properly after "Caphtorim," not after "Casulhim"), Caphtor was

supposed to have been a region of Egypt. The city Koptos (Egyptian, "Kebtō[yu]") has, however, nothing to do with it, and the hypothesis of Ebers, "*Keft-ur*, Great(er) Phœnicia," is entirely un-Egyptian. The country "Kft" of the hieroglyphics (earlier "Kityw," to be vocalized probably as "Keftō"), which is not Phœnicia but probably the southern coast of Asia Minor, may have had some indirect connection with Caphtor. An Egyptian inscription of the most recent period has been found, however, which, copying an earlier geographical list, enumerates "Ka)ptar" among Asiatic nations, insuring thus the correctness of the Hebrew tradition as against the versions. The popular identification with Crete (Dillmann, etc., following Calmet) rests on Jer. xlvi. 4 (see LXX.; the word "Caphtor" is a later addition, so that the passage is at least doubtful) and on the identification of the CHERETHITES with the Cretans (LXX., etc.), which would, if correct, probably determine the original home of only a part of the Philistines, without necessarily identifying Caphtor itself.

**BIBLIOGRAPHY:** Ebers, *Ägypten und die Bücher Mosis*, p. 130; W. Max Müller, in *Mittheilungen der Vorderasiatischen Gesellschaft*, 1900, v. 1, *et seq.* (locating Caphtor on the Carian or Lycian coast); Smith, *Hist. Geography*, p. 171.

**CAPISTRANO, JOHN OF:** Franciscan monk; born at Capistrano, Italy, 1386; died 1456. Owing to his remarkable power as a popular preacher, he was sent by Pope Nicholas V. (1447-55) as a legate to Germany, Bohemia, Moravia, and Silesia, with the special mission to preach against the Hussites and other heretical teachings and to subdue "the disbelieving Jews," in accordance with the resolutions adopted at the council of Basel (1431-43).

His stirring sermons, in which he urged the people to repent of their sins and to fight against the Freethinkers, made a thrilling impression. Knowing how easy it is to excite the masses by appealing to their prejudices, Capistrano, in his discourses, accused the Jews of killing Christian children and of desecrating the host. The Jews trembled at his approach, for his sermons seemed like invitations to riot. His admirers called him "the scourge of the Judeans." The Bavarian dukes, Louis and Albert, influenced by Capistrano's agitations, drove out the Jews from their duchies; in some places in Bavaria Jews were forced to wear the degrading BADGE on their coats (1452). Bishop Godfrey of Würzburg, reigning duke of Franconia, who had granted the fullest privileges to the Jews of his duchy, under the influence of Capistrano issued an ordinance (1453) decreeing their banishment. The towns and landowners were enjoined to expel the Jews, and Jewish creditors were deprived of a portion of the debts owing to them.

In Silesia the Franciscan was most zealous in his work. When Capistrano arrived at Breslau, a report was circulated that one Meyer, a wealthy Jew, had bought a host from a peasant and desecrated it. Thereupon the local authorities arrested the representatives of the Breslau Jewish community and confiscated their houses and property for the benefit of the city. The investigation of the so-called blasphemy was conducted by Capistrano himself. By means of tortures he managed to wring from a few

of the victims false confessions of the crimes ascribed to them. As a result, more than forty Jews were burned at the stake in Breslau June 2, 1453. Others, fearing torture, committed suicide, a rabbi, Pinbeas, hanged himself. The remainder of the Jews were driven out of the city, while their children of tender age were taken from them and baptized by force.

In Poland Capistrano found an ally in the archbishop Zbigniew Olesnieszki, who urged Casimir IV. Jagellon to abolish the privileges which had been granted to the Jews in 1447. Capistrano, in supporting Olesnieszki's demand, threatened the king, in case of resistance, with horrible sufferings in hell, and predicted great misfortune to the country. The king at first refused to comply; but when the Polish army was defeated Sept., 1454, in the war with the Teutonic Order (which was secretly assisted by the pope and the Polish Church), and the clergy announced that God had punished the country on account of the king's negligence of the Church and for his protection of the Jews, Casimir yielded (1454) and revoked the privileges which the latter had enjoyed. This led to persecutions of the Jews in many Polish towns. Capistrano was canonized in 1690.

**CAPITAL PUNISHMENT.**—In the Pentateuch: Warrants for the infliction of capital punishment, as opposed to private retribution or vengeance, are found in the Pentateuchal codes for the commission of any one of the following crimes: adultery (Lev. xx. 10; Deut. xxii. 22); bestiality (Ex. xxii. 18 [A. V. 19]; Lev. xx. 15); blasphemy (Lev. xxiv. 16); false evidence in capital cases (Deut. xix. 16-19); false prophecy (Deut. xiii. 6, xviii. 20); idolatry, actual or virtual (Lev. xx. 2; Deut. xiii. 7-19, xvii. 2-7); incestuous or unnatural connections (Lev. xviii. 22, xx. 11-14); insubordination to supreme authority (Deut. xvii. 12); kidnaping (Ex. xxi. 16; Deut. xxiv. 7); licentiousness of a priest's daughter (Lev. xxi. 9); murder (Ex. xxi. 12; Lev. xxiv. 17; Num. xxxv. 16 *et seq.*); rape committed on a betrothed woman (Deut. xxii. 25); striking or cursing a parent, or otherwise rebelling against parental authority (Ex. xxi. 15, 17; Lev. xx. 9; Deut. xxi. 18-21); Sabbath-breaking (Ex. xxxi. 14, xxxv. 2; Num. xv. 32-36); witchcraft and augury (Ex. xxii. 17; Lev. xx. 27).

Only in comparatively few instances is the particular mode of death incurred by the commission of a crime prescribed. Blasphemy, idolatry, Sabbath-breaking, witchcraft, prostitution by

**Modes of Punishment.** a betrothed virgin, or deceiving her husband at marriage as to her chastity (Deut. xxii. 21), and the rebellious son are, according to the Pentateuchal laws, to be punished with death by stoning; bigamous marriage with a wife's mother and the prostitution of a priest's daughter are punished by

burning; communal apostasy is punished by the sword. With reference to all other capital offenses, the law ordains that the perpetrator shall die a violent death, occasionally adding the expression, "His (their) blood shall be upon him (them)." This expression, as we shall see presently, post-Biblical legislation applies to death by stoning. The Bible speaks also of hanging (Deut. xxi. 22), but, according to the rabbinical interpretation, not as a mode of execution, but rather of exposure after death (Sanh. vi. 4, 75b).

—In Rabbinic Law: An old-established rule of rabbinic jurisprudence forbids the infliction of punishment where there is no Biblical authority for such punishment (Sanh. 82b; compare Sifre, Deut. 154). That authority, however, may be established

by GEZERAH SHAWAH (גזרה שוה); *i. e.*, by comparing similar or analogous expressions in two or more passages, in one of which the meaning and import of the expression are unmistakable

(Ker. 5a). Similarly in cases where the Pentateuch imposes the death penalty, without specifying the mode of death, Talmudic jurisprudence discovers the particular mode intended by means of the principle of Gezerah shawah. Thus: In reference to the man or the woman who makes use of "a familiar spirit"—*i. e.*, "a wizard"—the law says (Lev. xx. 27), "They shall stone them with stones; their blood shall be upon them" (רמיהם בם). Here the expression "Deme-hem bam" is plainly used in connection with death by stoning; hence it is argued that, wherever the same expression occurs in the Pentateuch in connection with the death penalty, it means death by stoning, and consequently the punishment of the crimes mentioned in Lev. xx. 9, 11, 12, 13, 16, is the same: death by stoning (Mek., Mishpatim, 17; Sifra, Kedoshim, ix. : Sanh. 53b, 66a). Again, with reference to the perpetrator of bestiality the law reads (Lev. xx. 15), "He shall surely be put to death; and ye shall slay the beast." Here the particular mode of death is not stated, but rabbinic law again infers it by means of a Gezerah shawah. Since, with reference to the enticer to idolatry, the Bible (Deut. xiii. 10 [A. V. 9]) employs the term Harag = "to slay" ("Thou shalt surely slay him"), and this is immediately explained by the addition (*ib.* 11 [A. V. 10]), "Thou shalt stone him with stones, that he die," it follows that the term "harag" used in reference to the beast likewise means to slay by stoning. And as for the criminal himself, his sentence is the same as that of the beast in connection with which he is mentioned (Sifra, *l. c.* x. : Sanh. 54b). In the case of the instigator to communal apostasy ("maddiah") the law reads (Deut. xiii. 6 [A. V. 5]), "He hath spoken . . . to thrust thee out of the way of the Lord," and in that of the enticer of individuals ("mesit") the identical expression is used: "He hath sought to thrust thee away from the Lord" (*ib.* 11 [A. V. 10]); hence as in the latter case stoning is the penalty, so it is in the former (Sifre, Deut. 86; Sanh. 89b). Finally, concerning the witch, it is said (Ex. xii. 17 [A. V. 18]), "Thou shalt not suffer her to live," and elsewhere (*ib.* xix. 13) the expression, "Shall not live," is used in connection with "He shall surely be stoned"; therefore in the first case the particular

penalty is to be the same as in the second (Mek., *l. c.*; Sanh. 67a).

According to these conclusions, rabbinic law based on Pentateuchal authority, expressed or inferred, affixes death by stoning to each of the following eighteen crimes: 1. Bestiality committed by man (Lev. xx. 15; Sanh. vii. 4, 54b; Sifra, Kedoshim, x. 1; Mek., Mishpatim, 17). 2. Bestiality committed by woman (Lev. xx. 16; Sanh. vii. 4, 54b; Sifra, Kedoshim, x. 3; Mek., Mishpatim, 17). 3. Blasphemy (Lev. xxiv. 16; Sanh. vii. 4, 43a; Sifra, Emor, xix.). 4. Criminal conversation with a betrothed virgin (Deut. xxii. 23, 24; Sanh. vii. 4, 66b; Sifre, Deut. 242). 5. Criminal conversation with one's own daughter-in-law (Lev. xx. 12; Sanh. vii. 4, 53a; Sifra, Kedoshim, ix. 13). 6. Criminal conversation with one's own mother (Lev. xviii. 7, xx. 11; Sanh. vii. 4, 53a; Sifra, Kedoshim, ix. 12). 7. Criminal conversation with one's own stepmother (Lev. xviii. 8, xx. 11; Sanh. vii. 4, 53a; Sifra, Kedoshim, ix. 12). 8. Cursting a parent (Lev. xx. 9; Sanh. vii. 4, 66a; Mek., Mishpatim, 17; Sifra, Kedoshim, ix. 7). 9. Enticing individuals to idolatry: "Mesit" (Deut. xiii. 7-12 [A. V. 6-11]; Sanh. vii. 4, 67a; Sifre, Deut. 90). 10. Idolatry (Deut. xvii. 2-7; Sanh. vii. 4, 60b; Sifre, Deut. 149). 11. Instigating communities to idolatry: "Maddiah" (Deut. xiii. 2-6 [A. V. 1-5]; Sanh. vii. 4, 67a; Sifre, Deut. 86). 12. Necromancy (Lev. xx. 27; Sanh. vii. 4, 65a; Sifra, Kedoshim, xi., end.). 13. Offering one's own children to Molech (Lev. xx. 2; Sanh. vii. 4, 64a; Sifra, Kedoshim, viii., parashah 10, beginning). 14. Pederasty (Lev. xx. 13; Sanh. vii. 4, 54a; Sifra, Kedoshim, ix. 14). 15. Pythomism (Lev. xx. 27; Sanh. vii. 4, 65a; Sifra, Kedoshim, xi., end.). 16. Rebelliousness against parents (Deut. xxi. 18-21; Sanh. vii. 4, 68b; Sifre, Deut. 220). 17. Sabbath-breaking (Num. xv. 32-36; Sanh. vii. 4; Sifre, Num. 114). 18. Witchcraft (Ex. xxii. 17 [A. V. 18]; Sanh. vii. 4, 67a; Mek., Mishpatim, 17).

As in the several classes included in the above category (1, 2, 5, 7, 8, 14) rabbinic jurisprudence establishes the particular punishment of the criminal on the basis of Gezerah shawah, so in most cases of the following category the particular punishment is deduced from Gezerah shawah. Thus, with reference to bigamy with mother and daughter the law reads (Lev. xx. 14): "It is wickedness" ("Zimmah hi"), and because elsewhere (*ib.* xviii. 17) the identical expression is used with reference to criminal conversation of man with female relatives of other degrees, rabbinic law affixes the penalty which the Pentateuch attaches to the former also to the latter (Sanh. ix. 1, 75a; Sifra, Kedoshim, ix. 17). On the same principle the Rabbis establish the penalty for such conversation with relatives within certain ascending degrees, comparing them with the descending degrees of like removes, explicitly mentioned in the Bible (Yeb. 21a *et seq.*; Yer. Sanh. ix. 26d; Yer. Yeb. ii. 3d).

The crimes punished in rabbinic law with death by burning are accordingly the following ten: 1. Criminal conversation by a priest's daughter (Lev. xxi. 9; Sanh. ix. 1, 76a; Sifra, Emor, i. 14 *et seq.*). 2. Criminal conversation with one's own daughter (Yeb. 3a; Sanh. ix. 1, 75a). 3. Criminal conversation with one's own daughter's daughter (Lev. xviii. 10; Sanh. ix. 1, 75a). 4. Criminal conversation with one's own son's daughter (Lev. xviii. 10; Sanh. ix. 1, 75a). 5. Criminal conversation with one's own stepdaughter (Lev. xviii. 17; Sanh. ix. 1, 75a; Sifra, Kedoshim, ix. 16). 6. Criminal conversation with one's own stepdaughter's daughter (Lev. xviii. 17; Sanh. ix. 1, 75a; Sifra, Kedoshim, ix. 16). 7. Criminal conversation with one's own stepson's daughter (Lev. xviii. 17; Sanh. ix. 1, 75a; Sifra, Kedoshim, ix. 16). 8. Criminal conversation with one's own mother-in-law (Lev. xx. 14; Sanh. ix. 1, 75a; Sifra, Kedoshim, ix. 15). 9. Criminal conversation with one's own mother-in-law's mother (Sanh. ix. 1, 75a; Sifra, Kedoshim, ix. 17; Yeb. 21a *et seq.*). 10. Criminal conversation with one's own father-in-law's mother (Sanh. ix. 1, 75a; Sifra, Kedoshim, ix. 17; Yeb. 21a).

The nine cases of incest here enumerated (2-10) subject the perpetrator to the penalty of burning

only when the crime is committed during the life of his legal wife (Yeb. 95a; Sanh. 76b; see Maimonides, "Yad," Issure Bi'ah, i. 5).

Two crimes only are punished by **slaying**: 1. Communal apostasy (Deut. xiii. 13-16 [A. V. 12-15]; Sanh. ix. 1, 52b; Sifre, Deut. 94.). 2. Murder (Ex. xxi. 12; Lev. xxiv. 17; Sanh. ix. 1, 52b; Mek., Mishpatim, 4; Sifre, Num. 160; see HOMICIDE).

The penalty for the first is explicitly declared (Deut. xiii. 16 [A. V. 15]): "Thou shalt surely smite the inhabitants of that city with the edge of the sword"; but that of the latter is again based on the principle of the Gezerah shawah. As with reference to a murderer the law is (Ex. xxi. 20), "He shall surely be punished" ("naḳom yinnaḳem"; literally, "It shall surely be avenged"), and elsewhere (Lev. xxvi. 25) an "avenging sword" ("ḥereb noḳemet") is spoken of, the Rabbis argue that the term "naḳom" applied to homicide has the significance given to it by its connection with sword (Sanh. vii. 3, 52b; Mek., Mishpatim, 4).

To the three modes of capital punishment explicitly mentioned in the Pentateuchal laws, rabbinic law adds a fourth; viz., **strangulation**. In post-Biblical jurisprudence this is the penalty incurred by the perpetrator of any one of the crimes to which the Pentateuch affixes death, without specifying the mode of death and where no conclusions from Gezerah shawah can be deduced. The Rabbis argue thus: No death-sentence pronounced in the Bible indefinitely may be construed with severity; on the contrary, it must be interpreted leniently. And since the Rabbis viewed strangulation as the easiest of deaths, they decided that the undefined death-sentence of the Pentateuchal code means strangulation. Moreover, the Bible frequently speaks of death sent "by Heaven" for certain sins (for example: Gen. xxxviii. 7, 10; Lev. x. 7, 9); and as the death visited by Heaven leaves no outward mark, so must the death inflicted by a human tribunal leave no outward marks, and that is possible only in an execution by strangulation (Mek., Mishpatim, 5; Sifra, Qeḏoshim, ix. 11; Sanh. 52b).

By **strangulation** the following six crimes are punished: 1. Adultery (Lev. xx. 10; Deut. xxii. 22; Sanh. xi. 1, 52b; Sifra, Qeḏoshim, ix. 11; Sifre, Deut. 241; see ADULTERY). 2. Bruising a parent (Ex. xxi. 15; Sanh. xi. 1, 84b; Mek., Mishpatim, 5). 3. False prophecy (Deut. xviii. 20; Sanh. xl. 1, 5, 89a; Sifre, Deut. 178). 4. Insubordination to supreme authority: "Zaḳen mamre," (Deut. xvii. 12; Sanh. xi. 1, 87a; Sifre, Deut. 155). 5. Kidnaping (Ex. xxi. 16; Deut. xxiv. 7; Sanh. xi. 1, 85b; Mek., Mishpatim, 5; Sifre, Deut. 273; see ABDUCTION). 6. Propheying in the name of heathen deities (Deut. xviii. 20; Sanh. xl. 1, 5, 89a; Sifre, Deut. 178).

Of the four modes of capital punishment—stoning, burning, slaying, and strangulation—the first is considered by the majority of Rabbis the severest; the last, the mildest (Sanh. vii. 1, 49b *et seq.*). Hence when convicts condemned to different modes of capital punishment become intermixed beyond the possibility of identification and classification, all of them suffer the sentence carrying with it the death named lowest in the order cited above (Sanh. ix. 3, 80b). On the other hand, when one is found guilty of several crimes of different grades of punishment, he will suffer the severest death to which he is liable (Sanh. ix. 4, 81a; compare Tos. Yom-Tob to Mishnah).

Capital punishment in rabbinic law, or indeed any other punishment, must not be inflicted, except by the verdict of a regularly constituted court (Lesser Sanh.) of three-and-twenty qualified members (Sanh. i. 1; Sifre, Num. 160), and except on the most trustworthy and convincing testimony of at least two qualified eye-witnesses to the crime (Deut. xvii. 6, xix. 15; Soṭah vi. 3;

**Mode of Judgment.** Sifre, Num. 161; *ib.* Deut. 150, 188; Sanh. 30a) who must also depose that the culprit had been forewarned as to the criminality and the consequences of his project (Sanh. v. 1, 40b *et seq.*; see HATRAAM). The culprit must be a person of legal age and of sound mind, and the crime must be proved to have been committed of the culprit's free will and without the aid of others (see ABETMENT); and if any one wilfully kills him before conviction, a charge of murder will lie against such perpetrator (Tosef., B. K. ix. 15; Sifre, Num. 161; compare 'Ar. i. 3, 6b). Nor may an execution be deferred, except in the case of the "Zaḳen mamre" (Sanh. xi. 4), or of a woman about to be delivered of a child ('Ar. i. 4), nor may it be carried out on a day sacred to religion (Mek., Mishpatim, 4; *ib.* Wayyakhel; Yeb. 6b; Sanh. 35b). On the day that the verdict is pronounced, the convict is led forth to execution (Sanh. 34a). Looking upon the sinner as upon the victim of folly (Soṭah 3a), and considering death an expiation for misdeeds (Ber. 60a; Sanh. vi. 2; see ATONEMENT), the Rabbis would not permit the protraction of the interval between sentence and execution, which they considered as the most terrible period in the convict's existence. These considerations prompted them to afford the convict every possible alleviation of the pains and sufferings concomitant with the execution, and to direct the execution itself so as to prevent the mutilation of the body, or to reduce such mutilation, where it is unavoidable—as in stoning or slaying—to a minimum. The Pentateuchal law (Lev. xix. 18) prescribes, "Thou shalt love thy neighbor as thyself"; and the Rabbis maintain that this love must be extended beyond the limits of social intercourse in life, and applied even to the convicted criminal who, "though a sinner, is still thy brother" (Mak. iii. 15; Sanh. 44a): "The spirit of love must be manifested by according him a decent death" (Sanh. 45a, 52a).

As the convict is led forth to the place of execution, which is located outside of the city limits and at some distance from the court-house (Sanh. vi. 1, 42b), a flag-bearer is stationed at the entrance to the court, and farther on a rider is placed, while a herald marches in front of the procession, proclaiming the name of the convict, his crime, when and where committed, and the names of the witnesses on whose evidence he was convicted, at the same time inviting any and every one in possession of evidence favorable to the convict to come forward and declare it—the judges remaining in session throughout the process of the execution and fasting all that day (M. K. 14b; Sanh. 63a). If favorable evidence comes to light, the flag-bearer gives the signal, and the rider turns the procession back to the court where the new evidence is duly

considered. Indeed, the convict's own declaration that he can prove his innocence, or mitigating circumstances, cause a stay until he is heard. And even where he fails to effect a reversal of sentence by his first attempt, there is still hope left for him. He may repeat the attempt several times, two scholars accompanying him for the purpose of hearing him and judging whether further delay should be permitted. On arriving in the neighborhood of the scaffold, he is exhorted to make confession of his sins, though not specifically of the crime for which he is to suffer death (see CONFESSION OF SINS). Thereupon he is given to drink a mixture of wine and oilibanum, that he may become stupefied and not realize the painful close of his earthly career (Sem. ii. 9; Sanh. 43a; compare Mark xv. 23; contrast Matt. xxvii. 34). When he is brought still nearer to the fatal place, he is divested of his clothes and covered in front, and, if a woman, in front and behind (according to the adopted opinion, a woman was not divested at all). In this state the convict was led on to the spot (Sanh. vi. 1-3, 42b-45b; Tosef., Sanh. ix. 6; Sifra, Emor, xix. 3; Sifre, Deut. 221). Then the prosecuting witnesses, who are the only legal executioners known to Biblical and rabbinic laws (Deut. xvii. 7; Sifra, Emor, xix. 3; Sifre, Deut. 89, 151; Sanh. 45b), proceed to carry out the sentence which their evidence has brought about. That is done in the following manner:

**Stoning** (סִקּוּיָה): With reference to two offenders subject to this penalty, the Pentateuch says, "Thine hand shall be first upon him to put him to death, and afterward the hand of all the people" (Deut. xiii. 10 [A. V. 9]), and again (*ib.* xvii.

The "Four 7), "The hands of the witnesses shall Deaths." be first upon him to put him to death, and afterward the hands of all the people." Rabbinic law follows this injunction literally, but confines its consummation within narrow limits. The convict having been placed on a platform twice his height, one of the witnesses throws him to the ground. If the concussion does not produce instant death, the second witness hurls a heavy stone at his chest; and only when this also proves insufficient to end his misery, the bystanders throw stones at the prostrate body until death ensues (Sanh. vi. 4; 45a *et seq.*; Sifra, Emor, xix.; Sifre, Num. 114; *ib.* Deut. 89, 90, 149, 151).

**Burning** (שִׂרְיָה): The Pentateuch simply ordains that the criminal "shall be burnt with fire" (Lev. xx. 14, xxi. 9), and a case is reported from the last days of the Second Temple, where a guilty daughter of a priest was actually burned on a pyre. However, the reporter of the case stated that he had witnessed it during his minority; and as the testimony of a minor is not valid, no rule of procedure could be based thereon. Indeed, the Rabbis declared that a court ordering such an execution was ignorant of traditional law, and a later teacher was of opinion that the court referred to consisted of dissenting Sadducees. According to rabbinic law, an execution by burning means this: The witnesses secure the convict, then force his mouth open by means of a stout cord (wrapped in soft cloth, to prevent the discoloration of the convict's neck) being tightly drawn around his neck, when molten lead or, ac-

ording to another opinion, a mixture of lead and tin, is poured down his throat and burns his vitals. (Sanh. vii. 2, 52b; Tosef., Sanh. ix. 11; Yer. Sanh. vii. 24b).

**Slaying** (הֲרָגָה): The convict having been fastened to a post, his head is severed from the body by a blow with a sword. Splitting the body or piercing it is not permitted; neither is it allowed to perform decapitation on a block (Sanh. vii. 3, 52b; Mek., Mishpatim, 4; Sifre, Deut. 94). See BEHEADING.

**Strangulation** (חֲנָקָה) is effected by slinging around the convict's neck a stout cord, wrapped in soft cloth, which the executioners draw in opposite directions, until all breath leaves his body and he dies (Sanh. vii. 3, 52b; Mek., Mishpatim, 5; Sifra, Kedoshim, ix. 14).

No execution is attended with posthumous indignities, except that the usual mourning ceremonies are not observed (Sifra, Shemini, Introduction, 28; Sem. ii. 7; Sanh. vi. 6), and in the case of the idolater and of the blasphemer **hanging** is superadded, provided the criminal is not a woman. The exposure of the body, however, must not be protracted. The dead convict's hands are joined above his head, and by them he is suspended; but while one of the executioners is still engaged in fastening the cords, the other must begin to untie them. As to the gibbet, it must not be a natural or permanent one, like a tree, but an artificial arrangement, easily removable; and when once used, must be buried out of sight (Sanh. vi. 4, 46b; Sifre, Deut. 221).

For the burial of convicts two special cemeteries are provided: one in which those are buried who have been executed either by stoning or by burning, and another for those slain or strangled. The dry bones are eventually disinterred, and placed in the general burial-grounds (Sanh. vi. 5, 6, 47b; Tosef., Sanh. ix. 8, 9; Yer. Sanh. vi. 23d).

No sentence carries with it any change in the civil status of the convict's family. The Pentateuchal law provides (Deut. xxiv. 16), "The parents shall not be put to death for the children, neither shall the children be put to death for the parents; every man shall be put to death for his own sins," and rabbinic jurisprudence follows this principle both to the letter and in spirit. Nor is a sentence attended by confiscation of the convict's goods. All his possessions descend to his legal heirs (Tosef., Sanh. iv. 6; Sanh. 27b, 48b; see CONFISCATION).

Rabbinic jurisprudence is developed on the basis of the letter and the spirit of the Bible, particularly of the Pentateuchal codes (Josh. i. 8, viii. 31; Josephus, "Contra Ap." i. 8; Hag. 10b,

**Critical** 14a; Ned. 22b; Mak. 23b; compare **Note.** Darmesteter, "The Talmud," trans-

lation by H. Szold, pp. 62 *et seq.*); but that development naturally partook of the spirit of the ages during which it took place—from Ezra's times to the final redaction of the Gemara (559 B.C. to 550 C.E.). This was especially the case with the development of the civil and ritualistic laws, which governed Jewish life long after the Roman conquest of Palestine. But also in criminal law, involving capital punishment, the right to administer which had been taken from the Sanhedrin decades before the fall of Jerusalem (Sanh. 41a; Yer. Sanh. i. 18a,

vii. 24b), the Rabbis delved deeply, elaborating the details thereof with a view to their application in the hoped-for Messianic days (הילכתא למשיחא, Sanh. 51b; Yeb. 45a) or for the satisfaction accruing from study (ררוש וקבל שנה, *ib.*). In this department there are therefore some laws which are mere legal opinions or theoretic ratiocinations which were never applied in practise. Such, for example, are the laws relating to the "rebellious son" and to "communal apostasy" (Tosef., Sanh. xi. 6, xiv. 1; Sanh. 71a). However, the bulk of rabbinic rules, even those concerning capital punishment, bear the stamp of great antiquity, inasmuch as they are based on actual precedent or on old traditional interpretation. Josephus, whose main authority for the first half of his "Antiquities" doubtless was the Bible itself, supplements his outlines of "the polity settled by Moses" ("Ant." iv. 8, §§ 1-45) with traditions current in his day. Some of these traditions agree with the corresponding Halakot embodied in the Talmudim and halakic Midrashim at a much later date. A few examples must suffice. In the true spirit of traditional law, Josephus ("Ant." xii. 9, § 1) says, "The purposing of a thing, but not actually doing it, is not deserving of punishment" (compare Tosef., Mak. v. [iv.] 10; Sanh. 63b; Mak. 16a); nevertheless he construes the Pentateuchal law regarding the confuted witness (Deut. xix. 16-19) as decreeing punishment where the sentence brought about by the confuted testimony has not been executed. He says ("Ant." iv. 8, § 15), "If any one be believed to have borne false witness, let him, when he is convicted, suffer all the very same punishments which he against whom he bore witness *was to have suffered*." This coincides with the rabbinic Halakah (Mak. i. 6; Sifre, Deut. 190; see ALIBI), as opposed to the Sadducean ruling that the confuted witness is punishable only after the execution of the sentence which his falsehood has brought about (*ib.*; compare S. Mendelsohn, "Criminal Jurisprudence of the Ancient Hebrews," p. 136). Also the Pentateuchal law (Ex. xxi. 21, 22) regarding an assault on a woman with child, Josephus (*l.c.* § 23) interprets in the spirit of the Halakah (Mek., Mishpatim, 8; B. K. 42a; Sanh. 74a; compare Geiger, "Urschrift," pp. 436 *et seq.*; Pineles, "Darkak shel Torah," § 160). Likewise his esteeming guiltless the slayer of the thief, "although he were only breaking in at the wall" (*l.c.* § 27), is in consonance with the traditional interpretation of the Halakah (Mek., Mishpatim, 13; Sanh. 72a; Yer. Sanh. viii. 26c); and so is his reduction of the number of stripes (Deut. xxv. 1-3) from forty to "forty save one" (*l.c.* §§ 21, 23) in accord with the Halakah (Mak. iii. 10, 22b; Sifre, Deut. 186; compare II Cor. xi. 24).

As to the spirit of later rabbinic legislation, it clearly appears that there was a tendency to reduce capital punishment to a minimum, if not to abolish it altogether. That capital punishment was a rare occurrence in the latter days of the Jewish commonwealth is patent from the statement in the Mishnah that a court was stigmatized as "murderous" if it condemned to death more than one human being in the course of seven years. Indeed, ELEAZAR B. AZARJAN applied the same epithet to a court that executed more than one man in every seventy years;

and his famous colleagues, TRYPHON and AKIBA, openly avowed their opposition to capital punishment, saying, "Had we belonged to the Sanhedrin [during Judea's independence], no man would ever have been executed," as they would always have found some legal informalities by which to make a sentence of death impossible (Mak. i. 7a).

**CAPPADOCIA** (Greek, Καππαδοκία, derived from the Persian, "Hoaspadaklym" = "country of the good horses"; in the Assyrian cuneiform inscriptions, "Katpadhuka"); Ancient province of Asia Minor. It was known to the Jews in its Greek form also, and is often mentioned in the Talmud and the Midrash. The Roman province Cappadocia extended from the Taurus to the Euxine, and from the Helys to the Euphrates. According to Josephus ("Ant." i. 6, § 1) the Cappadocians were formerly called "Mosocheni," the Biblical tribe Meshech, mentioned together with Tubal; and Philo (in treating of Gen. xxvi. 28) is said to have called them "Canaanites." Herodotus speaks of them as "Syrians" (i. 72, v. 49, vii. 72), and even at the time of Strabo (xii. 544) they were known among the Greeks as "white Syrians" (λευκόσυροι). They must not, however, be classed with the Semites, since the little that remains of their language shows no relationship with Semitic (Gesenius, "Monumenta Phœnicia," p. 11).

The Septuagint, the Syriac Hexapla, the Targum Onkelos, and the Jerusalem Targum identify (Deut.

ii. 23) the Biblical CAPHTOR with Cappadocia. The targums on Gen. x. 14, **the Bible**. Amos ix. 7 (here also the LXX, and Symmachus), and Jer. xlvii. 4 (also Aquila and Theodotion), identify it also with Caphator, and the targum on Ezek. xxvii. 11, with Gammadim, where the reading גַּמְדִּים ("Medes") serves as basis. According to this interpretation, the Bible would testify to an emigration of the Cappadocians from Assyrian and Median regions to Syria and Palestine. For later times, compare Yuhasin, ed. London, p. 232b.

Josephus is the first to give genuine historical data; he often mentions Cappadocia, since the royal house of Herod was related to that

**Josephus**. of Cappadocia by the marriage of Herod's son Alexander (subsequently executed) to Glaphyra, daughter of King Archelaus of Cappadocia ("Ant." xvi. 1, § 2). Glaphyra later greatly shocked the Jews by marrying her brother-

in-law Archelaus (*ib.* xvii. 13, § 4). Through these connections with Cappadocia, and perhaps even before that time, Jews came to that country, and Christianity spread among them (Acts ii. 9, xviii. 23; I Peter i. 1; on the Hypsistarian sect in Cappadocia, see M. Friedländer, in "Jew. Quart. Rev." xiv. 300). The Jews of Cappadocia also went to the festivals at Jerusalem ("Ant." xvi. 6, § 7); some settled in Sepphoris (Yer. Sheb. 39a); and R. Judah, R. Yannai, and R. Samuel are mentioned as Cappadocian teachers of the Law. The Halakah mentions the Jews of Cappadocia, saying that they had no vegetable oil, using only mineral oil (naphtha) for lighting on the Sabbath (Tosef., Shab. ii. 3; Yer. 4d; Bab. 26a). The Talmud also speaks of robbers in Cappadocia (Tosef., Yeb. iv. 5; Bab. 25b), the Cappadocians being in evil repute because of their astuteness. Mazaea, or Casarea, the capital of Cappadocia, is also frequently mentioned; R. Akiba visited it on his travels (Tosef., Yeb. xiv. 5; Yer. 15d; Bab. 25b); and R. Meïr, a teacher of the Law, is also mentioned here (Bab. Yeb. 121a). The importance of Mazaea, and hence that of Cappadocia, is shown most clearly, however, by the fact that when the Persian king, Sapor I., during his war with the Romans, besieged the city, he had 12,000 Jews massacred (M. K. 26a); it is said that the walls of Laodicea were rent by the noise of the arrows at Mazaea (*ib.*). Further mention is made of Cappadocian coins (Ket. xiii. 11) which, according to the correct interpretation (Parhi, in "Kaftor wa-Ferah," ed. Edelmann, p. 29b), were superior to those of Palestine. An ingenious use of the name is seen in the interpretation of a dream (*κάππα* = 20; *δοκοί* = beams), by means of which a hidden treasure was found (Lam. R. i. 1; Gen. R. 68, 12; Ber. 56b; Ma'as. Sh. 55b); this passage likewise indicates that journeys were often undertaken to Cappadocia. The word "Cappadocia," furthermore, was used as a veiled expression for Rome (Tan., Wayera, 13; *ib.* Bo. 4), and in this sense may be connected with the dream above mentioned. Cappadocia had no independent existence in later times, and hence no further importance for Judaism.

**CAPPEL, LOUIS (LUDOVICUS CAPPELLUS):** Christian theologian and Hebrew scholar; descended from an old aristocratic French Huguenot family; born Oct. 15, 1585; died June 18, 1658. In consequence of the so-called Tractate of Nemours of July 7, 1585, Cappel's parents were obliged to leave the country, and during their flight Louis was born at Saint Elier, near Sedan. The soldiers of the League, who were pursuing the parents, very nearly spitted the new-born infant on their swords. After studying theology and Oriental languages at Sedan, and traveling for four years through England, Holland, and Germany, he was appointed, in 1613, preacher and professor of Hebrew, and in 1633 professor of theology, at the Reformed Academy of Saumur. He died there, highly honored.

Cappel gained imperishable fame by his two books, "Arcanum Punctationis Revelatum," pub-

lished anonymously by Thomas Erpenius, at Leyden, in 1624, and "Critica Sacra," printed at Paris, in 1650. In the "Arcanum" he proved conclusively that the Hebrew text was first pointed after the Christian era, until which time it had been composed merely of consonants; in the "Critica" he proved that not even the consonantal text had been transmitted without errors, but needed emendation with the help of the versions and of conjecture.

It is to the lasting credit of Cappel that he was the first who dared to undertake, with exemplary clearness, penetration, and method, a purely philologic and scientific treatment of the text of the Bible.

**CAPSALI:** Family of scholars in European Turkey during the fifteenth and sixteenth centuries, which came originally from Greece, where a certain Elijah Capsali lived at the beginning of the fifteenth century. The name was taken from Cape Capsali, in the south of the Morea. Elijah had two sons, Moses and David, and the latter one son, Elkanah. The last Capsali mentioned in Jewish history is Elijah, son of Elkanah. The following members of the family are especially noteworthy:

**Eliezer Capsali:** Talmudist at Constantinople in the second half of the fifteenth century. In answer to the appeal of the Karaites, whose literary degeneracy was then notorious, he consented to instruct them in the rabbinic disciplines; imposing only the conditions that his pupils should refrain from vilifying the Talmudic authorities, and from desecrating the holy days of the rabbinical calendar. This attempt to reconcile the Karaites with Talmudic Judaism, or at least to soften their hostile attitude toward it, did not meet with the approval of the rigorists among the rabbis. Even Moses Capsali, who certainly was independent enough otherwise, stoutly opposed his relative, Eliezer (perhaps chiefly because it was not customary to treat the Karaites in a friendly manner; see Elijah Mizrahi, Responsa, No. 57).

**BIBLIOGRAPHY:** Grätz, *Gesch. der Juden*, viii. 208; Lattes, *Liklutim Shonin*, p. 17.

**Elijah b. Elkanah Capsali:** Turkish Talmudist and historian; born at Candia about 1490; died (there?) about 1555. In 1509 Capsali left his native city to study at Padua under Judah Minz; but Judah dying eight days after Capsali's arrival, the latter went to Meïr Katzenellenbogen, Minz's son-in-law and successor. In 1522 Capsali was again at Candia, having been appointed leader of the community there, with three assistants. During the terrible plague which appeared in Candia soon after, entailing upon the Jews great suffering, which was aggravated by the policy of isolating the Jewish quarter, Capsali worked unselfishly to relieve the stricken. When Menahem del Medigo, rabbi of Candia, became too old to officiate, Capsali and Judah del Medigo were appointed rabbis of the community; and Capsali continued there until his death. Among his pupils, Samuel ALGAZI deserves special mention (compare Nepi-Ghirondi, "Toledot Ge'oleh Yisrael," p. 6, below). Capsali carried on a learned

correspondence with the greatest Talmudists of his time; he showed a remarkable independence of spirit, not only in his relations with high authorities, but also in regard to ancient, time-honored customs. For instance, he abolished the custom, widely spread in Candia, of selling by auction the honor of bridegroom of the Torah; ordering instead that this should be conferred gratuitously upon a scholar or other prominent person of the community (Hayyim Benveniste, "Keneset ha-Gedolah, Oraḥ Hayyim," 10 669; i. 88c). The independence and self-confidence manifested by Capsali in his decisions aroused the opposition of many of his colleagues. The responsa literature of that time contains numerous references by prominent rabbis to the controversies between Capsali and his associate rabbi of Candia, Judah del Medigo; the former always inclining to a less rigorous interpretation than the latter (compare Moses Alashkar, Responsa, No. 114, p. 177; Nos. 99, pp. 111-114; Meir Katzenellenbogen, Responsa, No. 29). Abraham ibn Nahmias was another opponent of Capsali (Benveniste, *l.c.* pp. 261, 263, 342).

Capsali is the author of the following works: (1) "Sefer Dibre ha-Yanim le-Malkut Winiziah"; (2) "Seder Eliyahu Zutta," or "Debe Eliyahu"; (3) "No'am Hobbim," decisions and responsa; and (4) a collection of responsa. The first work is a history of Venice, the manuscript of which is in the British Museum. It contains, in addition, matter relating to other Italian cities, and a section on the persecutions of the Jews in Germany.

#### Elijah Capsali's Works.

The second work, a history of the Turkish empire from the earliest times down to the year 1522, is an important contribution to general history, as well as to the history of the Jews. This book (in manuscript in the Bodleian Library and in the British Museum), the publication of which would certainly throw much light on the history of the Jews in Turkey, contains a section on Spain and Portugal down to the expulsion of the Jews from those countries. Judging from the extracts made by Lattes, Capsali was not only an excellent stylist—possessing neither the baldness of the chroniclers nor the exuberance and affectation of the ecleists—but was also a reliable historian. Capsali added to the work, which is divided into 4 books and 166 sections, a treatise on theodicy. His interest in history is also seen in his collection of responsa, "No'am Hobbim," in which he narrates numerous interesting occurrences relating to the Rabbis (compare, for example, the extract in Grätz, "Gesch. der Juden," viii. 443-445, which refers to the controversy between Joseph Colon and Moses Capsali). Capsali's responsa seem to have entirely disappeared: Hayyim Benveniste is the only one known to have possessed and used a copy of them.

**BIBLIOGRAPHY:** Grätz, *Gesch. der Juden*, viii. 443 *et seq.*; Lattes, *Liklutim Shonim*, pp. 18-32 (extracts from Capsali's *Seder Eliyahu* are given on pp. 33-110); Neubauer, *Cat. Bodl. Hebr.* MSS No. 2411; Neppi-Ghirondi, *Toledot Gedole Yisrael*, pp. 6-8; Rabbinowicz, *Mozot Golah*, index.

**Elkanah b. David Capsali:** Turkish Talmudist and philanthropist of the second half of the fifteenth century. He was a pupil of his uncle, Moses Capsali, at Constantinople but left that city

and settled at Candia, where he became one of the most prominent members of the Jewish community. In 1493 he was "condestable" (high constable), one of its highest officers, and in that capacity was specially active in relieving the sufferings of the Spanish exiles who arrived that year in Candia. In one day (July 22, 1493) he collected for their assistance 250 Venetian gulden, a very large sum for that time. Many notes on the history of the Ottoman empire in Elijah Capsali's work were communicated to him by Elkanah, his father.

**BIBLIOGRAPHY:** Lattes, *Liklutim Shonim*, pp. 17-18; Luzzatto, in Wiener, *Emek ha-Baka* (Hebr. part), p. 20.

**Moses b. Elijah Capsali:** Chief rabbi of the Ottoman empire; born in Greece 1420; died about 1495 at Constantinople. When a young man he left his native country in order to study at the German yeshivot. He is next mentioned as rabbi of Constantinople about 1450; but he became prominent only during the reign of Sultan Mohammed II., who appointed him chief rabbi of Turkey. The sultan thought so much of the rabbi that he assigned to him a seat in the divan beside the mufti, the religious head of the Mohammedans, and above the patriarch of the Christians.

Capsali held various offices, which included the supervision of the taxes of the Jews, and the appointment of rabbis, and he even acted as a civil judge. It is said that the sultan's respect for the rabbi was due to the fact that, disguised as a civilian, Mohammed was present one day while Capsali was rendering his decisions; and he assured himself that the rabbi was incorruptible and impartial in his judgments. When the sultan undertook to improve the moral conditions of some parts of Constantinople, it was said that this endeavor was prompted by the rabbi. It is certain that Capsali dealt very severely with Jewish youths who, intimate with the janizaries, imitated them in leading un-Jewish and immoral lives. Some of these youths, enraged by the corporal punishment he had inflicted on them, attempted to kill him during a street riot in 1481, and he escaped only by flight. Capsali's associations with Bayazid, the son and successor of Mohammed II., were equally pleasant; and Bayazid's friendliness toward the Jews, that became especially evident in the ready reception of the Spanish exiles, must be ascribed in no small measure to Capsali's influence.

Capsali directed communal affairs with considerable skill, and commanded general respect. Ascetic in his mode of life—fasting frequently, and always sleeping on a bare floor—he was an advocate of rigorous rabbinism, severely criticizing the attempt of some rabbis to instruct the Karaites in the Talmud (compare ELIEZER CAPSALI above). Nevertheless he seems to have taken certain liberties in various ritual questions, that made him many enemies. A party was formed at Constantinople for the purpose

of injuring Capsali's reputation, and of branding him as an ignorant and unscrupulous rabbi. At the head of this clique was Moses "Twenty-four," said to have been so called because he knew only the twenty-four books of the Bible and nothing of the later literature, and who had been sent to Con-

stantinople by the community of Jerusalem in order to obtain permission from the chief rabbi to collect money for the poor of that city. But Capsali, for political reasons, could not comply with the request; for Bayazid II. was then at war with the calif of Egypt, and it was forbidden to carry money from Turkey into the Egyptian provinces, hence into Palestine also. Moses "Twenty-four" was so exasperated against the chief rabbi because of his disappointment, that he offered his services to the men who were attempting to bring Capsali into disgrace. At the head of these were Elijah Parnes, Aaron b. Abbaya, Isaac Alterno, and Asher of Cologne, who addressed to Joseph COLON, one of the greatest rabbinical authorities of the time, a letter containing the gravest accusations against Capsali, especially that of being careless in deciding cases dealing with marital troubles. Moses "Twenty-four" carried this mendacious letter to Colon in Italy, who at once began to denounce Capsali violently, declaring him to be unfit to fill the office of rabbi. In the ensuing controversy between Capsali and Colon men like Judah Minz and the three learned Del Medigo brothers (Elkanah, Moses, and Elijah), as well as many other rabbis, took Capsali's part against Colon. It is a proof of Capsali's noble character that he received Colon's son Perez in a most friendly way when the latter came to Constantinople to ask Capsali's pardon, as his father, on his death-bed, had requested him. Capsali, moreover, spoke of Colon in the highest terms, convinced that his opponent had acted against him because he was ignorant of the true state of affairs and zealous in upholding the Law.

**BIBLIOGRAPHY:** Grätz, *Gesch. der Juden*, viii., Index; Lattes, *Liklutim Shonim*, pp. 6-17; Nepi-Ghirondi, *Toledot Gedale Yisra'el*, pp. 265-267; Rabinowicz, *Moza'e Golan* (see index).

#### L. G.

**CAPTAIN:** One at the head of, and in command over, others; a chief or officer; the head man of a clan; the commander of an army. The title occurs both in A. V. and R. V. as the equivalent for a large variety of Hebrew and Greek words frequently translated differently in other passages. Even where the rendering "captain" is adopted, the exact military or official implication of the title is often not indicated. This indefiniteness is due to the fact that Jewish military forces, especially during the earlier periods of their history, were not rigidly or systematically organized. Standing or regular armies were unknown before the days of the kingdom.

The levies raised for purposes of offensive or defensive warfare fell naturally into units corresponding to the tribes or clans to which they belonged, the captain of each contingent being usually the chief of the tribe or clan; though occasionally the captain did not belong to the tribe, or was not its chief. Bands of men unconnected tribally, the "vain men" or fellows of Judges xi. 3, under the command of a captain distinguished by his prowess, are sometimes mentioned; and it is very likely that Saul, in "choosing" three thousand men (I Sam. xiii. 2), called into service such a company, and that the necessity for resorting to the same expedient a little later in his

career (I Sam. xxiv. 2) induced him to keep together as a permanent establishment a body of armed men under his personal command. It is during his reign that mention is first found of a commander- or captain-in-chief; namely, ABNER (I Sam. xiv. 50).

Under DAVID much progress was made in the development and organization of a standing military force. While a fugitive and an exile, David had been himself the leader of a band of freebooters (see I Sam. xxii. 2 *et seq.*). His followers formed the nucleus of a standing army. Under him are found, in addition to the commander-in-chief, "captains of the host" (שרי היל, II Sam. xxiv. 4). The captain of the royal body-guard is also mentioned as one of the high dignitaries of the court (II Sam. viii. 18, xx. 23). Captains of "runners,"—*i. e.*, foot-soldiers, a body of men probably entrusted with the custodianship of the palace gates (II Kings x. 25)—are named in I Kings xiv. 27. These "runners" seem to have consisted of companies of hundreds (II Kings xi. 4, שרי המאות).

The meaning of ראש השלישי (A. V., "chief among the captains"; R. V., "chief of the captains") is not certain. "Shalish" has been explained as the third occupant of the CHARIOT (LXX., *τριστατης*); still, it is doubtful whether military chariots had come into use among the Israelites so early as David's reign. In Ex. xiv. 7 and xv. 4 the reference is to Egyptian chariots, and these are known to have been manned by two men only. "Shalish" in these two verses seems to designate "picked troops," the élite of soldiers. (See Baentsch on Ex. xiv. 7, in "Handkommentar zum Alten Testament.") In other passages the "shalish" probably was a military officer in charge of a third of a larger division (compare battalion =  $\frac{1}{3}$  regiment), or the third officer in rank. Compare Assyrian "shalshā," Rawlinson "Asiatic Inscriptions," v. 3, 48; Assurbanipal "Inscriptions," 130, 1. SOLOMON, however, had "captains" of horse and chariots (I Kings ix. 22).

It is not unlikely that during the period of the kings the army was divided into tactical units of 1,000, subdivided again into bodies of 100, 50, and 10, each under its proper **Military Divisions.** officer or "head" (ראש), or "captain" (שר). The fixed titles of the various ranks in the military hierarchy are not exactly known, but it is probable that each officer was designated as the "head" or "captain" ("sar") of the number under him (I Sam. viii. 12, xvii. 18, xviii. 13; II Sam. xviii. 1; Ex. xviii. 21; I Macc. iii. 55), though the title "shalish" would indicate also another nomenclature. The sources furnish too scanty a supply of facts to substantiate a more definite assertion.

The priests and Levites of the Second Temple were organized into groups, with proper officers or captains. Under the high priest the **Captains of the Temple.** כנן ("segar"), more generally designated הממונה ("the memunnah"), often officiated as his lieutenant. Jost ("Gesch. des Judenthums und Seiner Sekten," i. 150) suggests that this is the officer described in Acts iv. 1, v. 24, 26 as *στρατηγὸς τοῦ ἱεροῦ* ("captain of the temple"), and in II Macc. iii. 4 as *προβστατης* ("governor"). This identification, how-

ever, is not very convincing. It is more reasonable to hold *σπαρτηγός* to be the rendering of *רִאשׁוֹ מִשְׁמַר*, the Mishnaic title of the "captain [of one] of the priestly groups" (ma'amad or "mishmar"). The officer named in the passages quoted above corresponds to the one given the same title (*σπαρτηγός*) by Josephus ("Ant." xx. 6, § 2; "B. J." ii. 5, § 3). He is the captain of the Levitical temple-guard (compare Maimonides, "Kele. Ham." iii.), a body of police, referred to also in Luke xxii. 4, 52. The officers that assisted in the arrest of Jesus (John xviii. 3) may have belonged to this company. The "captain" of Acts xxii. 28, and possibly John xviii. 12, rendering the Greek word *χιλιάρχος*, represents a Roman officer, the "prefectus" or "tribunus militum"; it is not clear which grade of the Roman military hierarchy is meant by the "captain of the guards," in Acts xxviii. 16, where it is a translation of the Greek *στρατοπεδάρχης*. The R. V. omits the sentence altogether.

Three Hebrew words are mistranslated "captain" by the A. V.: (1) *כַּרִּי*, in II Kings xi. 4, 19 (probably a misreading for *כַּרְתִּי*; see *CHERETHITES*); (2) *כַּרְמִים*, in Ezek. xxi. 22 ("battering rams," R. V.); (3) *אֵלֶקָה*, in Jer. xiii. 21, where "friend" is the proper meaning.

Following are other Hebrew equivalents: "Tif-

as in R. V. generally). "Pehah," an Assyrian title; "pahati," from "bel pahati," lord of a district = governor; military "captain" in II Kings xviii. 24; Isa. xxxvi. 9; Ezek. xxiii. 6, 12, 23. "Kazin," originally "elder," "judge." "Rosh," "head," "chief" (R. V.). "Ba'al," "lord" (Jer. xxxvii. 13), "captain" of prison. "Rab" (II Kings xxxv. 8), "captain" of executioners; interchanges with "sar" (Gen. xxxix. 1). "Sar" is equivalent to "prince," and hence "commander," "captain." "Shallit" is rendered "ruler" in Dan. ii. 15. For renderings of "shalish" see above, and Dillmann on Ex. xiv. 7, in "Kurzgefasster Kommentar zu den Heiligen Schriften"; also Paul Haupt, in "Beiträge für Assyriologie und Semitischen Sprachwissenschaft," iv. 4, pp. 582-587, Leipzig, 1902.

E. G. H.

**CAPTIVES.**—**Biblical Data:** The Bible makes no provision for the treatment of captives taken in war. Captives were considered as slaves, and as such were subject to all the laws that govern the relations between the master and his non-Jewish slave (*עֶבֶד כְּנַעֲנִי*); (see *SLAVES*). In the early wars of Joshua with the seven tribes that inhabited Palestine, there could be no captives of war, as the Israelites were commanded to destroy all the people,

JEWISH CAPTIVES IN ATTITUDE OF SUPPLICATION.  
(From Layard's "Monuments of Nineveh.")

sar," (the Assyrian "dupsharu" = writer of tablets), in Jer. li. 27 and Nahum iii. 17, a military officer, probably the Hebrew "Sofer" (Jer. lli. 25; reading emended II Kings xxv. 19, see Nowack, "Lehrbuch der Hebräischen Archäologie," i. 360). "Nagid," a title of royal personages; secondarily, "chief," and hence "captain" (I Chron. xii. 27, xiii. 1); the "steward" of the palace (II Chron. xxviii. 7). "Nasi," truer rendering, "prince" (Num. ii. 3,

even the women and the children (Deut. xx. 16-18). In later days the descendants of such Canaanites as escaped destruction Solomon considered not only tributary to himself, but also bond-servants who had to serve the Israelites at any time in whatever capacity they might be needed (I Kings ix. 20, 21; Maimonides, "Yad," Melakim, vi. 1).

According to the Deuteronomic law (Deut. xx. 10-18), the Israelites were commanded to destroy

all male adults of a conquered people. In some instances, however, Israelitish kings showed unusual mildness to their captives. Ahab released Ben Hadad of Syria on very generous terms, after the latter had suffered a humiliating defeat on the battlefield (I Kings xx. 34). At the instance of the prophet Elisha, the king of Israel dismissed a Syrian army which had been taken by stratagem (II Kings vi. 20-23).

Female captives were also subject to the same laws as the female non-Jewish slaves. A peculiar exception to that general law is the case of the "yefat to'ar" (יפת תואר, Deut. xxi. 10-14). An Israelitish warrior who had intercourse with a captive might take her for a wife, after having permitted her to mourn for her parents a full month. If he then refused to marry her, he could not sell her into slavery, but must let her go free.

—**In Rabbinical Literature:** The Rabbis saw in the law regarding female captives a reluctant concession to the passions of man, and therefore looked upon such an act unfavorably. They treated it as an exception and limited it in the following manner:

One who takes possession of a female captive during war may not cast her off; but, if she be willing to accept the Jewish religion, her captor must keep her in his house for three months, this being the accepted interpretation of "yeraḥ yamim" (Deut. xxi. 13), and then marry her. If at the end of the three months he did not wish to marry her, he must not sell her into slavery, but must send her away free. Should she be unwilling to accept the Jewish faith, he may continue to keep her for twelve months and use peaceful persuasion; but if at the end of that period she is still steadfast in her determination, he must send her away free. At no time may the captor employ compulsory measures to force her into the Jewish faith. If he belongs to the family of Aaron, he can not marry her, as the Jewish law prohibits a Kohen from marrying a proselyte (Yeb. 48b; Kid. 21b *et seq.*; Maimonides, "Yad," Melakim, viii. 2-7).

### CAPTIVITY, or EXILE, BABYLONIAN:

By "exile" is meant any form of forced emigration in which the selection of his new habitation is left to the choice of the person banished. In a particular sense the word is used to designate the enforced emigration of larger communities, such as tribes and nations; in which case, however, any choice of domicile seems to be withheld. The specific term for this species of exile is "deportation." In antiquity, deportation was employed on an extensive scale for political purposes, either to annihilate the power of a conquered people, or to cultivate new and unsettled districts by populating them, or to fuse together various nationalities—more widely separated in ancient times than they are to-day—and occasionally to subserve several of these various ends at once.

The earliest deportation of Israelites mentioned in the Old Testament was that of Tiglath-pileser III. This king, either in 734 B.C., upon the march against Philistia, mentioned in a fragment of the eponym

list, or (in the event that the march against Hanno of Gaza [734] did not concern the affairs of Israel and Judah) in 733, took the field against Pekah of Israel and Rezin of Damascus, who were warring against his vassal, King Ahaz of Judah, and punished them by annexing the northern and eastern borderlands (II Kings xvi. 7-9).

### The Deportation of Israel.

While he annexed these borderlands of the tribes of Zebulun, Asher, and Naphtali, together with such of the eastern territory of the Jordan as belonged to Israel, he led the inhabitants of these provinces into Assyria, and established them there (II Kings xv. 29). The second deportation took place after the conquest of Samaria in 722 B.C., which conquest was followed by the demolition of the northern kingdom. The last king of that country, Hoshea, had renounced allegiance to Shalmaneser IV. (II Kings xvii. 4), whereupon the latter besieged the city of Samaria for three years (724-722). It was reserved for his successor, Sargon, however, to capture the hostile capital, as is evident from the cuneiform inscriptions (in contradiction to II Kings xvii. 3 *et seq.*, according to which the conquest was made by Shalmaneser himself). On that occasion 27,280 people were taken captive and deported, partly to the Assyrian province of Gozan in Mesopotamia and partly to Media, where they were established as royal charges; while, at the same time, colonists of other nationalities were settled in Samaria and the surrounding territory to take the place of those deported. In this way not only was a conquered and hostile people thoroughly disrupted, but it was at once replaced by subjects loyal to the crown, among whom the vacated territory was distributed, and who obtained special prerogatives, in order to strengthen their allegiance. The first people to be sent thither (721 B.C.) from Babylon as settlers were Arameans. Upon the close of the Babylonian insurrection, however (647 B.C.), Assurbanipal sent further contingents from Babylon, Cuthah, Sippara (Sepharvaim), Susa, and Elam (II Kings xvii. 24, xviii. 11; Ezra iv. 4-10).

The inhabitants of the southern kingdom, Judea, were in their turn subjected to two deportations.

The first of these took place in the year **Deportation 597** in connection with the first conquest of Judah. quest of Jerusalem by Nebuchadnezzar. On that occasion Nebuchadnezzar appeared before the walls of Jerusalem with his army for the purpose of punishing Josiah's son Jehoiakim, because the latter, relying upon the assistance of Egypt, had renounced his allegiance to Babylonia. As soon as Jehoiachin or Jaconiah, who had meanwhile succeeded his father, Jehoiakim, as king, had, after a short defense, surrendered to the leaders of the Babylonian army, Nebuchadnezzar ordered him, together with the most distinguished men of the land, and the most valuable treasures of the Temple and the palace, to be sent to Babylonia (II Kings xxiv. 1-16). Thus began the Babylonian Exile (597), from which year the prophet Ezekiel, who was among the captives, dates his calculations. Another deportation took place upon the downfall of the kingdom of Judah (586 B.C.). The new king, Zedekiah, a son of Josiah, whose original name was

Mattaniah, had taken the oath of fealty to the Babylonian sovereign (Ezek. xvii. 13). But as early as 593 he had planned an insurrection against Nebuchadnezzar, to which end he had summoned the ambassadors of the disaffected Syrian states tributary to Babylon; namely, Edom, Moab, Ammon, Tyre, and Sidon. Psammetichus II. (594-588), the new king of Egypt, was probably the soul of the undertaking. Although peace still reigned in Syria, and Zedekiah himself appeared before Nebuchadnezzar to vindicate his good faith (Jer. li. 59 *et seq.*), it soon thereafter became possible for the Egyptian king Hophra to tempt Zedekiah into a breach of faith. Nebuchadnezzar was now compelled to step in, and repaired to Riblah on the Orontes, in order to conduct a campaign against Jerusalem directly from his headquarters. The siege began Jan. 10, 587, and lasted for a year and a half. As the city, partly because of its inaccessible position, and partly because of its strong fortifications, was almost impregnable to assault, Nebuchadnezzar endeavored to starve out the inhabitants by encircling Jerusalem with a wall. The approaching army of Hophra now compelled the Babylonians temporarily to abandon the siege and stand battle. The Egyptians, however, were beaten; and the siege began anew, and was continued until July 9, 586, when the beleaguers penetrated into the city through a breach made in the protective wall built in the days of Hezekiah (II Chron. xxxii. 5; II Kings xxii. 14). An attempt at flight by Zedekiah and his retinue was frustrated; he and his armed followers being intercepted before they could cross the Jordan. The retinue were dispersed, while Zedekiah was captured and brought before Nebuchadnezzar at Riblah. Here he witnessed the death of his sons, who were murdered in his presence. His eyes were then put out, and he was taken in chains to Babylon. On Aug. 7 of the same year Nebuzaradan, captain of Nebuchadnezzar's body-guard, ordered that the Temple, the royal palace, and all dwellings in the city of Jerusalem be set on fire, and that the surviving inhabitants be taken captive to Babylon. This was also the fate of all those who, after the capitulation of the city, had sought refuge in the camp of the Babylonians. Seventy or eighty distinguished Jews, however, among them the high priest Seraiah, were sent to Riblah, where, by the order of Nebuchadnezzar, they were put to death (II Kings xxv. 1 *et seq.*; Jer. xxxix. 1 *et seq.*, lii. 1 *et seq.*). Yet a third deportation of the Jews was ordered by Nebuchadnezzar. During the futile siege of Tyre, which lasted thirteen years (585-573 B.C.) and compelled Nebuchadnezzar to keep a standing army in Syria, probably a rebellion broke out among the population, which, since the murder of Judah's Jewish governor, Gedaliah, had been heavily oppressed (Jer. lli. 30). In consequence of this, there was ordered, either in 582 or 581 B.C., another partial deportation to Babylon.

As regards the number of Jews deported by Nebuchadnezzar, there are two divergent reports. According to the statements in Jer. lli. 28-30, which must be accepted as the more reliable, as they certainly are the more complete, 3,023 Jews were deported in 597 B.C., 832 inhabitants of Jerusalem in 586,

and 745 Jews in 582, making 4,600 persons in all. But in Biblical times, as to-day in Oriental countries, only the men were counted. Hence it follows that from 14,000 to 18,000 souls must have been deported to Babylon. The other statements, given in II Kings xxiv. 14, 16, refer only to the deportation of the year 597 B.C.

Verse 14 states that 10,000 men were sent into exile; while according to verse 16 the number was 8,000. As the former verse is part of an addition to the original text, it will be necessary to adhere to the second, the figures in which, however, are more than twice as high as those given in Jeremiah. Now, if the figures as given in Jeremiah for the years 597, 586, and 582 be accepted as correct, the total number of exiles, taking into consideration II Kings xxiv. 16, will be 12,000 men, or in all 36,000 to 48,000 souls. Furthermore, if it be assumed that the total population of the kingdom of Judah was about 120,000 (the figures should probably be somewhat higher, as the country was at that time more densely populated than it is to-day), about one-fourth of the population (according to II Kings xxiv. 16) or, perhaps more correctly, one-eighth (according to Jer. lli. 28-30) was led captive into Babylonia.

The Israelites who were deported in 597 at first hoped for a speedy return to their homes. As they belonged without exception to the leading families, they had given credence to the sayings of the false prophets who had flattered them (Jer. xxvii.-xxix.; Ezek. xii. 21, xiii. 23); and in contradistinction to those who had remained at home, they came to regard themselves as the true Israel, although they themselves by no means conformed to the standard which the true prophets had pictured of an ideal Israel (Jer. xxiv.; Ezek. xi. 1-21), nor did they betray any evidence of a "new heart." When, therefore, contrary to their expectations, Jerusalem was destroyed in 586, they were, after all, compelled to follow the advice of Jeremiah (xxix. 4-9) and accommodate themselves to the conditions of a protracted exile.

As exiles, under royal protection, and consequently enjoying special prerogatives in their new home, their personal lot was undoubtedly a happier one than that of their brethren who had remained behind. Their habitation was in the province of Babylon. It is not known, however, whether they lived together in considerable numbers or were scattered throughout the country. The places where they dwelt were known by various names; thus, "Tel Abih," according to the Hebrew etymology, signified "hill of corn-ears," whereas its Babylonian signification was "the deluge," or "hill of the stream"—the valley of the rivers Chebar (one of the numerous canals of the Euphrates), Casiphia, and Abava (Ezek. i. 3; Ezra viii. 15, 17). A number of western Semitic proper names, discovered upon inscriptions found in Nippur, have led Hilprecht to believe that many of the exiles were settled in that place (see, for example, "Palestine Exploration Fund, Quarterly Statement," Jan., 1898, p. 54; April, 1898, p. 137). They not only preserved their old tribal distinction, but kept special genealogical

**Number of Babylonian Exiles.**

**Condition of the Exiles.**

records (Ezra viii. 17; Ezek. xiii. 9); and the heads of the tribes or elders were the leaders of the separate communities (Ezra viii. 1 *et seq.*, 16 *et seq.*; Ezek. viii. 1, xiv. 1, xx. 1).

Their outward condition was also by no means unsatisfactory. Jeremiah, in his exhortations (xxix. 5-7; compare Ezek. xiii. 2 *et seq.*, xiv. 9-11), states that the Israelites were permitted to till the soil, to cultivate the family life, and, by thrift and diligence, to accumulate wealth. Perhaps, being permitted to administer their internal affairs through their elders, they were allowed the undisturbed exercise of their religion; and nowhere are bloody persecutions heard of, designed to alienate forcibly the people from their ancestral religion, and to coerce them into accepting that of the conquerors. All the misery, want, imprisonment, and ill-treatment, frequently described as suffered in Babylonia, must be explained by the fact that the Prophets, whenever they gazed back upon the national catastrophe, felt anew all the pangs of homelessness and servitude. Consequently, the description of the people as a helpless worm (Isa. xli. 14), and of the violence and spoliation which had reduced Israel to the condition of those who suffer in chains and bondage (*ib.* xlii. 20-24), is not ascribable to actual sufferings inflicted in the land of exile. The chains and bonds are not such as have been forged for them in the land of their exile: they are figurative of the condition of homelessness and servitude into which the exiled Israelites have fallen; and they have lost their home, they have been despoiled, and the fetters of the foreign rule weigh heavily upon them. The Prophets also deplore the deep humiliation to which God has subjected His people by consigning them to ruin, and they bewail the circumstance that even the religious leaders, the priests and the Prophets themselves, have been delivered up to the profanation of a pagan people, instead of being permitted to serve the Lord in His holy Temple according to the divine mission appointed to them (Isa. xliii. 28, xlvii. 6). The source of the most poignant grief on the part of the pious devotees of YHWH was the ridicule cast by the idolaters upon their religion, their God, and His power; for, as the pagans could not trace the downfall of the people to its true cause—the sins of the people themselves—they beheld in the fall of Jerusalem and its Temple a proof of the weakness of Israel's God (Isa. lii. 5).

In consequence of the favorable external circumstances of the exiles, and particularly of such of them as were engaged in the diversi-

**Religious Conditions.** fied commerce in the Babylonian metropolis, the longing for home gradually disappeared, and they learned to content themselves with material prosperity. Most of these indifferent persons were lost to their people; for, in their anxiety to retain the wealth they had acquired, they learned to conform to the manners and customs of the country, thus sacrificing not only their national but also their religious independence and individuality. Hence the denunciation by the Prophets of the various forms of idolatry practised among the people. Even if the description of the idolatry mentioned in Isa. lvi. 9-lvii. 13a belongs to pre-exilic times, many other passages so

graphically describe the idolatrous practises of the exiles that the relation between these and the Babylonian cult can not be mistaken (Isa. lxx. 3 *et seq.*; compare *ib.* lxxvi. 17). Despite all this indifference and impiety on the part of the masses, there was nevertheless an element that remained true to the service of YHWH. These "servants of YHWH," who humbly submitted (עֲנִי, "the meek") to His will, gathered about the few Prophets who remained faithful to the Lord, but whose voice and influence were lost amid the general depravity, and who, in addition to the pain caused by base ingratitude and faithlessness toward the God of their fathers, were also compelled to endure all the shafts of scorn and ridicule. While some, though without obeying the prophet's exhortations (Ezek. xxxiii. 31), listened to his words—either because they appreciated his eloquence, or because they were entertained and pleased by the holy enthusiasm of the man of God—others ridiculed this faith in the Lord and the fond hope of the devotees of YHWH of a future salvation and a redemption from pagan captivity (Isa. lxiv. 5). Indeed, in their delusion they proceeded even to open hostility and oppression; and a reference to a species of excommunication or, at least, an open declaration of ostracism, is contained in the above-mentioned passage. These sad experiences of all true Israelites tended to separate them more and more from their recreant brethren. The more the pious exiles felt themselves repelled by their pagan environment and their disloyal fellow-Israelites (Ps. cxxxvii. 3 *et seq.*) the closer became the union among themselves, and the stronger their allegiance to their Prophets and the Law. What they had re-established almost immediately of the religion of their fathers was the sacred observances. True, a festive celebration of the high festivals was out of the question, in view

of the unfavorable conditions and of the mood of the people. Such a celebration was, therefore, supplanted by solemn days of penance and prayer to commemorate the catastrophe which had befallen the people (Zech. vii. 3, viii. 19). The fasts of the fathers were also observed, although in so superficial and thoughtless a manner that the prophet was compelled to condemn the mode of observance, and to censure fasting when accompanied by the ordinary business pursuits of every-day (Isa. lviii. 3). As the faithful could not honor YHWH by sacrifices in a foreign land, nothing remained to them of all their ceremonial but the observance of the Sabbath (Hosea ix. 3-5) and such other customs as were connected with a certain independence of action. Such, for example, were the act of circumcision, which, together with the observance of the Sabbath, constituted a distinguishing mark of Israel; regular prayer, performed with the face turned toward Jerusalem (I Kings viii. 48); and fasting, already mentioned. When the Prophets of the Exile spoke of the conditions under which the divine

prophecies would be fulfilled, they always emphasized the observance of the Sabbath. Sabbath as the foremost obligation, as the force which should unite and preserve the Jewish community (Isa. lvi. 2, 6 *et seq.*; lviii. 13; Jer. xvii. 19 *et seq.*; Ezek. xx. 12 *et*

seq.; xxii. 8, 26). On the other hand, it is evident from the demands and exhortations of the Prophets that they were now willing to dispense with the ceremonial, as the more external form of religious observance, in order to emphasize the exemplification of the essential religious spirit in works of morality and charity.

At the same time the idea found acceptance that the submission of the personal will to that of the Lord would prove the most acceptable sacrifice in His sight (Ezek. xi. 19, xviii. 31, xxxvi. 26; Isa. lxi. 1-3). Ezekiel also establishes the new principle that the essence of religion must be sought in individual morality: "The righteousness of the righteous shall be upon him, and the wickedness of the wicked shall be upon him" (Ezek. xviii. 20-32; compare Deut. xxiv. 16; Num. xxvi. 11); wherefore he, also, in contrast with the present disposition of the exiles, predicts a new heart and a new spirit (Ezek. xxxvi. 26). The new religious conviction was confirmed by the contemplation of the pagan idols with the attendant immoral cult, which reacted to strengthen and to purify the conception of the monotheistic idea, so that in the Deutero-Isaiah the certain conviction is already expressed of the ultimate recognition of יהוה by all pagan peoples.

Particular attention was now paid to the ancestral literature; and thus there arose during the Babylonian Exile the profession of the "scribes," those learned in the Law who set the standard of piety and devotion, and who transmitted their precepts both to their successors and to the people at large, while at the same time extending the body of the laws by means of revision and amplification (see ПЕНТАТЕУСН). Historical writings also were now revised in accordance with the standard of the Law, establishing as a basis the historical

**Cultivation of Literature.** conception of Deuteronomy. All the calamities which had befallen Israel were accepted by these exiles as a punishment for transgressions, and particularly for idol-worship. The sin of Jeroboam had ruined Israel, and the transgressions of Manasseh, despite his subsequent thorough reformation, were only atoned for by the downfall of Judah. Therefore the history of the past was to serve both as a warning and as a guide for the future. This explains the purpose of the compilation of the various older historical works into a historical entity: the new Israel, risen from the grave of exile, must avoid the sins and errors which caused the ruin of its fathers. And indeed the Psalms which were composed after the Exile reveal a keener introspection, a deeper sense of contrition, and a more frank avowal of sin than the earlier ones.

The first indication of a change for the better was the liberation of King Jehoiachin from his captivity, with regal honors which distinguished him above

**Termination of the Exile.** all other kings at the court of Babylon. According to II Kings xxv. 27-30, he was liberated by Evil-Merodach (562-560 B.C.); and though this passage mentions the liberation as occurring in the thirty-seventh year of the captivity of Jehoiachin, the event must be ascribed to Neriglissar (568-556). The first permanent change was brought

about by the Persian king Cyrus. As the Deutero-Isaiah already desired and predicted after the first inroad of Cyrus into the Babylonian kingdom (545), a conquest of the city of Babylon took place (539 B.C.) after the decisive defeat of the army at Sippara. This conquest, however, was not accompanied by spoliation or destruction, and was followed by an order to rebuild the Temple of יהוה in Jerusalem. This duty was assigned to Sheshbazzar, himself a Jew (according to I Chron. iii. 18, Shenazar, perhaps a Davidite), who had been sent by Cyrus as governor to Jerusalem, the king himself having previously laid the corner-stone of the Temple. The work of building, however, was soon arrested (Ezra v. 13-16). Sheshbazzar probably did not go to Jerusalem alone, being in all likelihood accompanied by distinguished Jews, such as the Davidite Zerubbabel, the priest Joshua, less prominent ones, and a troop of soldiers. But a general permission for the Jews to return was probably not given by Cyrus, as no mention of it occurs in any of the older records.

The actual return of the exiles was consummated by Ezra, who assembled at the river Ahava all those desirous of returning. These consisted of about 1,800 men, or 5,500 to 6,000 souls (Ezra viii.), besides 38 Levites and 220 slaves of the Temple from Casiphia. With this body, which was invested with royal powers, Ezra and Nehemiah succeeded, after great difficulties, in establishing the post-exilic Jewish community. From the list given in Neh. vii. 6-73 (= Ezra ii.), which the chronicler erroneously supposed to be an enumeration of those who had returned under Cyrus, it appears that the whole Jewish community at this time comprised 42,360 men, or 125,000 to 130,000 souls.

V. Rv.

—**Traditional Data:** Various causes are assigned in the Haggadah for the Babylonian Exile. Some authorities mention general unworthiness (Lam. R. proem 19); others give specific sins, as idolatry, licentiousness, and bloodshed (Tosef., Men. xiii. 22), incontinency in the drinking of wine (Gen. R. xxxvi. 4), too great indulgence to one another and failure to reprove those who sinned (Shab. 119b), and non-observance of the year of release and of the Sabbath, and neglecting the study of the Torah (Yer. Ta'an. iv. 69b).

Israel was exiled to Babylonia because the language of the Babylonians is akin to that of the Torah. According to another opinion, God had therefore exiled Israel to Babylonia because the latter is a low-lying country, like the nether world; as it is said (Hosea xiii. 14): "From the power of the nether world I will ransom them." Another

authority says that God exiled Israel to Babylonia, because it was the land from which they had come, as a husband that is angry with his wife sends her home to her mother (Pes. 87b). Babylonia was Israel's home. Israel and Judah were exiled to different places in order that each might find consolation in the other's misery (Pesik. R. xxxiii.).

Forty years before Israel went into exile date-palms were planted in Babylonia, because Israel was eager for the sweetness of the date, by which the tongue gets accustomed to the sweetness of the Torah (Yer. Ta'an. *l.c.*).

**Incidents Connected with the Exile.** According to one opinion the Ark was carried to Babylonia. With the destruction of the First Temple ceased the Davidic dynasty, the Urim and Tummim, and the Levitical cities (Tosef., *Sotah*, xiii. 1, 2). For fifty-two years after the destruction of the Temple no bird was seen to fly in Palestine. This is inferred from Jer. ix. 9, כַּהֲמָה having the numerical value of 52. Seven hundred kinds of clean fishes, 800 kinds of clean locusts, and innumerable fowl followed the exiles to Babylonia (Yer. Ta'an. *l.c.*; Lam. R. proem 34). As Nebuzaradan entered the Temple court he found the blood of the prophet Zechariah boiling. To his question, "Whose blood is that?" the people answered that it was the blood of sacrificial animals. He slaughtered a multitude of animals, but the prophet's blood did not cease boiling. Threatened with execution, the people admitted that it was the blood of the murdered prophet. Nebuzaradan thereupon slaughtered 80,000 priestly youths, but the blood still would not cease boiling. Turning in anger to it, he said, "Dost thou want me to kill thy whole people?" Then God felt mercy with His children and caused the blood to cease boiling (Yer. Ta'an. *l.c.*; *Git.* 57b). Eighty thousand priestly youths hid themselves in the cells of the Temple, where they were all burned, with the exception of Joshua b. Jehozadak, the high priest, the "brand plucked out of the fire" (Yer. Ta'an. *l.c.*). Eighty thousand priestly youths fled to the Ishmaelites. When they asked the latter for a drink, they gave them various salted foods, and leather bottles filled with air, and invited them to eat and drink. When one attempted to drink, the air from the bottle entered his lungs and choked him to death (*ib.*).

Nebuzaradan is identical with Arioch (Dan. ii. 14). This name suggests that Nebuzaradan, when leading the Jewish exiles, raged against them like a lion (אַרְיֵה) until they had reached the Euphrates. On arriving there he said to his troops: "Let them rest here, for from this time forward their God will not care for them." Therefore it is said, "By the rivers of Babylon we sat" (Ps. cxxxvii. 1), only then, not before (Lam. R. v. 5). By the rivers of Babylon they sat and wept over the dead who had fallen by the sword of Nebuchadnezzar and by the waters of the Euphrates, which had proved fatal to those used to the rain-water and the spring-water of Palestine. But the tyrant sat in a ship, surrounded by all his nobles in the midst of all kinds of music (Isa. xliii. 14), while on the bank passed the princes of Judah naked and in iron chains. "Why do these people go without burdens on their shoulders?" he asked

as he caught sight of them. Then heavy burdens were put upon them.

The longing after the soil of the Holy Land turned the heart of Israel to repentance. As long as they were in their own land Jeremiah exhorted them in vain to repentance; but when led into exile they regarded even the sacred vessels as holy, and hung up their harps on the willows (Pesik. R. xxviii.).

God regretted having exiled Israel (Suk. 52b). He hastened the Exile two years, otherwise the people would have been utterly destroyed (Sanh. 38a). God's anger subsided after they had gone into exile (Lam. R. ii. 16). The divine glory did not leave the Sanctuary even after its destruction, according to the assurance given in I Kings ix. 3; and so we read (Ps. iii. 5) "from His holy mount," holy even when a bare mount. Cyrus speaks (Ezra i. 3)—while the Temple was destroyed—of "the God who is in Jerusalem" (Tan., ed. Buber, *Shemot*, 10). God's attitude is illustrated by the following two parables: A king had two sons. He grew angry with the first, punished him, and sent him into exile, exclaiming, "Wo unto him; from what happy state must he be banished!" But having also grown angry with the second, and sent him likewise into exile, he exclaimed, "It is I whose method of education was wrong." Likewise, when God sent the Ten Tribes into exile, He exclaimed, "Wo unto them! for they have wandered from me" (Hosea vii. 13); but when Benjamin and Judah also went into exile, He said, "Wo unto me for my hurt" (Jer. x. 19). Again, a king had two sons. Angered by the first, he smote him so that he died; then he mourned for him. When also the second one died of his punishment, the king said, "I have no more strength to mourn; call the mourning women that they bewail him." Similarly, God, when the Ten Tribes went into exile, bewailed them (Amos v. 1); but when also Judah and Benjamin were exiled, He said (Jer. ix. 16), "Call the mourning women" (Pesik. xv. 120a, b).

In three passages of Scripture God complains of Nebuchadnezzar the Wicked: in Jeremiah, Kings, and Chronicles. Just as one complains to his neighbor, saying, "Behold what that cursed N. N. has done me!" so speaks God, "Behold what that Babylonian dwarf has done: he has exiled My children, destroyed My house, and burned My Temple" (*ib.* xiii. 112a, b).

The expression "because, even because" (Lev. xxvi. 43) has the same sense as the saying "measure for measure," and points to the fact that the duration of the Exile was commensurate with the duration of Israel's sinfulness (Lam. R. proem 21). Hananiah b. Azzur was a true prophet, but a plagiarist. Whatever he heard Jeremiah proclaim in the upper market-place he proclaimed in the lower market-place. Also his announcement that within two years the sacred vessels would be brought back (Jer. xxviii. 3) rests upon Jeremiah's prophecy of the seventy years (*ib.* xxxv. 12), which, however, Hananiah had miscalculated, assuming a wrong period for its beginning, and therefore an incorrect period for its end (Yer. Sanh. xi. 30b).

**God's Attitude to Exiles.** God's anger subsided after they had gone into exile (Lam. R. ii. 16). The divine glory did not leave the Sanctuary even after its destruction, according to the assurance given in I Kings ix. 3; and so we read (Ps. iii. 5) "from His holy mount," holy even when a bare mount. Cyrus speaks (Ezra i. 3)—while the Temple was destroyed—of "the God who is in Jerusalem" (Tan., ed. Buber, *Shemot*, 10). God's attitude is illustrated by the following two parables: A king had two sons. He grew angry with the first, punished him, and sent him into exile, exclaiming, "Wo unto him; from what happy state must he be banished!" But having also grown angry with the second, and sent him likewise into exile, he exclaimed, "It is I whose method of education was wrong." Likewise, when God sent the Ten Tribes into exile, He exclaimed, "Wo unto them! for they have wandered from me" (Hosea vii. 13); but when Benjamin and Judah also went into exile, He said, "Wo unto me for my hurt" (Jer. x. 19). Again, a king had two sons. Angered by the first, he smote him so that he died; then he mourned for him. When also the second one died of his punishment, the king said, "I have no more strength to mourn; call the mourning women that they bewail him." Similarly, God, when the Ten Tribes went into exile, bewailed them (Amos v. 1); but when also Judah and Benjamin were exiled, He said (Jer. ix. 16), "Call the mourning women" (Pesik. xv. 120a, b).

In three passages of Scripture God complains of Nebuchadnezzar the Wicked: in Jeremiah, Kings, and Chronicles. Just as one complains to his neighbor, saying, "Behold what that cursed N. N. has done me!" so speaks God, "Behold what that Babylonian dwarf has done: he has exiled My children, destroyed My house, and burned My Temple" (*ib.* xiii. 112a, b).

"The lion went up" (Jer. iv. 7)—this is Nebuchadnezzar in the constellation of the lion ("the fifth month," Jer. i. 3)—and destroyed the lion of God ("Jerusalem," Isa. xxix. 1). Accordingly will also come the lion ("God," Amos iii. 8) in the

**Return from Exile.** the constellation of the lion, in the destroyed (compare Jer. xxxi. 12: "I shall change her mourning into joy"), and He will rebuild the lion of God (Ps. cxlvii. 2; Pesik. xiii. 116a). That Israel had found no rest (Lam. i. 3) as he went into exile assured his return home; for Noah's dove returned also because she had found no rest for her feet (Gen. viii. 9); and with the same words is also predicted Israel's restlessness in exile (Deut. xxviii. 65; Lam. R. i. 3). When in consequence of the sins of Israel the enemy had entered Jerusalem, captured his heroes and tied their hands behind them, God said: "With him am I in distress" (Ps. xci. 15); "My children are in distress, shall I be in freedom?" Then He drew His right hand back from before the enemy (Lam. ii. 3). This was revealed to Daniel by the expression לָקֵץ הַיְמִינִי (Dan. xii. 13, the real meaning "at the end of days"), "till the end of the right hand," that right hand which was in subjection. "With the redemption of My sons have I also redeemed My right hand" (Pesik. xvii. 131b).

**CAPTIVITY, THE PRINCES OF.** See ENLARGERS, THE.

**CAPUA, JOHN OF.** See JOHN OF CAPUA.

**CARABAJAL** (variously spelled *Carabal*, *Caraballo*, *Caravajal*, *Carabajal*, and *Cavajal*, the name *Carvalho* being possibly identical): The name of a family of Maranos in Mexico at the end of the sixteenth century and the beginning of the seventeenth, all connected with Don Luis de Carabajal, governor of New Leon. Several members of the family suffered martyrdom at the stake for Judaizing.

**Francisca Nunez de Carabajal:** Sister of Don Luis de Carabajal; born in Portugal about 1540; died as a martyr in the city of Mexico Dec. 8, 1596. She was among the members of the family seized in 1590 by the Inquisition. She also was tortured till she implicated her husband and her children, one of whom was named Luis de Carabajal. The whole family were forced to confess and abjure at a public auto da fé, celebrated on Saturday, Feb. 24, 1590. Luis de Carabajal, with his mother and four sisters, was condemned to perpetual imprisonment, and his brother, Baltasar, who had fled upon the first warning of danger, was, along with his father, Francisco Rodriguez de Matos, deceased, burnt in effigy. In January, 1595, Doña Francisca and her children were accused of a relapse into Judaism, and convicted. During their imprisonment they were tempted to communicate with one another on Spanish pear seeds, on which they wrote touching messages of encouragement to remain true to their faith. At the resulting auto da fé, Doña Francisca and her children, Isabel, Catalina, Leonor, and Luis, died at the stake, together with Manuel Diaz, Bea-

triz Enriquez, Diego Enriquez, and Manuel de Lucena. Of her other children, Doña Mariana, who lost her reason for a time, was tried and put to death at an auto da fé held in the city of Mexico March 25, 1601; Anica, the youngest child, being "reconciled" at the same time.

Execution of Mariana de Carabajal at Mexico, 1601.  
(From Palacio, "El Libro Rojo.")

**Don Luis de Carabajal y Cueva:** Born at Magodorio, Portugal, in 1539; appointed governor of a district in Mexico in 1579; said to have died about 1595. In consideration of the appointment of governor, he undertook to colonize a certain territory at his own expense, being allowed the privilege of repaying himself out of the revenues. His original jurisdiction, under the name of "Nuevo Reino de Leon" (New Kingdom of Leon), was to comprise a somewhat ill-defined territory, beginning at the port of Tampico, extending along the River Panuco, and thence turning northward; but it was not to exceed 200 leagues either way. It would seem to have included Tamaulipas, as well as the states of Nuevo Leon and Coahuila, and parts of San Luis Potosi, Zacatecas, Durango, Chihuahua, and Texas. Carabajal received his royal patent as governor of Nuevo Reino de Leon on May 31, 1579. He arrived in Mexico in 1580, and began to prepare for his occupancy of the territory. He planted his colony on a site formerly called "Santa Lucia," and named the place "City of Leon."

To pacify and colonize the new territory, Carabajal was allowed 100 soldiers, and 60 married laborers, accompanied by their wives and children. It is safe to assume that a number of these early colonists were Spanish Jews, who, under the guise of Maranos, had hoped to escape persecution and find

prosperity in the New World. In this expectation they were doomed to disappointment, for within a decade after their settlement a score of them were openly denounced and more or less severely punished for Judaizing. In 1590 there seems to have been an extensive colony of them in Mexico.

Don Luis de Carabajal brought with him to Mexico his brother-in-law, Don Francisco Rodriguez de Matos, and his sister, Doña Francisca Nuñez de Carabajal, with their children, Doña Isabel, the oldest, 25 years of age, widow of Gabriel de Herrera; Doña Catalina, Doña Mariana, Doña Leonor, Don Baltasar, Don Luis, Jr., Miguel, and Anica (the last two being very young). Another son, Caspar, a pious young man (monk?) in the convent of Santo Domingo, Mexico, had arrived a short time before. Doña Catalina and Doña Leonor married respectively Antonio Diaz de Caceres (see CACERES) and Jorge de Almeida—two Spanish merchants residing in the city of Mexico and interested in the Tasco mines. The entire family then removed to the capital, where, in the year 1590, while in the midst of prosperity, and seemingly leading Christian lives, they were seized by the Inquisition. Doña Isabel was tortured till she implicated the whole of the Carabajal

Torture of Francisca de Carabajal at Mexico, 1590.  
(From Palacio, "El Libro Rojo.")

family, who, with the exception of Don Baltasar, were imprisoned. The latter succeeded in escaping to Tasco, and was condemned to death in his absence.

**Luis de Carabajal, Jr.:** Son of Doña Francisca Nuñez de Carabajal, the first Jewish author in America, and nephew of Luis de Carabajal, governor of New Leon; was Castilian by birth, and a resident of the city of Mexico; died in the city of Mex-

ico at an auto da fé Sept. 8, 1596. He had been "reconciled" at that city Feb. 24, 1590, being sentenced to perpetual imprisonment in the lunatic hospital of San Hipolito. On Feb. 9, 1595, he was again arraigned as a "relapso," subsequently testifying against his mother and sisters (if the records are to be believed). At one of the hearings (Feb. 25) he was shown a manuscript book beginning with the words: "In the name of the Lord of Hosts" (a translation of the Hebrew invocation, "be shem Adonay Zebaot"), which he acknowledged as his own book, and which contained his autobiography. On Feb. 8, 1596, he was put on the rack from 9:30 A.M. till 2 P.M., and then denounced no less than 121 persons, though he afterward repudiated his confession. He threw himself out of a window to escape further torture. He and his brother Baltasar composed hymns and dirges for the Jewish fasts: one of them, a kind of "widdui" (confession of sin) in sonnet form, is given in "El Libro Rojo."

G. A. K.

**CARACALLA:** Roman emperor (211-217); son of Septimius Severus. It is said that as a boy of seven he had a Jewish playfellow, and having heard that the latter had been cruelly whipped on account of his religion, he could not for a long time endure the sight either of his own father or of the boy's father, both of whom were responsible for the punishment (Spartianus, "Antoninus Caracalla," i.). The anecdote may be credited, since his mother, Julia Donna, was a Syrian. While still a prince, though already invested with the title "Augustus," his father permitted him to have a triumphal procession on the occasion when the Senate decreed Septimius Severus a Jewish triumph in honor of his successful wars in Syria (Spartianus, "Severus," xvi.); for the words "Cui senatus Judaicum triumphum decreverat" do not refer to Caracalla, as has been erroneously assumed (Grätz, "Gesch. der Juden," 4th ed., iv. 208), but to Septimius Severus, who as a mere amusement allowed even his youthful son to take part in the triumph.

As Augustus, Caracalla, whose real name was Bassianus, assumed the name Antoninus (beginning 198), an official designation under which he is mentioned several times together with his father. A synagogal inscription found in the otherwise little-known place Kaïsum contains a prayer of the Jews for the welfare of the whole imperial family, naming Septimius Severus, the empress Julia Donna, and their two sons, Antoninus and Geta ("Journal Asiatique," Dec., 1864; "Monatsschrift," 1865, p. 154). Hence Jerome's words in his commentary on Dan. xi. 34: "Hebræorum quidam hæc de Severo et Antonino principibus intelligunt qui Judæos plurimum dilexerunt" (Many of the Jews take this to refer to the emperors Severus and Antoninus, who greatly loved the Jews), are to be

Caracas  
Carcassonne

interpreted literally, and do not, as Grätz assumes (*ib.* iv. 452), refer only to one name, Alexander Severus. This contemporaneous rule of father and son becomes evident also in the laws of the Digesta ("De Decurialibus," Leges 50, II. iii. § 3). Those who followed the Jewish superstition were permitted by the emperors Severus (in some editions erroneously "Verus") and Antoninus to obtain offices ("honores"). This decree must be dated between 198 and 208, since Geta, who became Augustus in 208, is not mentioned therein. In any case there are several witnesses to Caracalla's friendliness toward the Jews, while nothing is known of any inimical measures during his short reign. Hence those scholars may be right who identify with Caracalla the Antoninus who is often mentioned in both the Talmuds as a friend and patron of the patriarch Judah I.

It is known that Caracalla undertook an expedition against the Parthians, during which he passed through Antioch and Syria (217); he may at that time have met R. Judah. On this expedition he was murdered by the subsequent emperor, Maerinus, who is also mentioned in Jewish writings. After his death the nickname "Caracalla" was given to him from a long Gallic garment which he had preferred. Some scholars think that this garment is mentioned also by the Rabbis (Krauss, "Lehnwörter," ii. 592).

S. KR.

**CARACAS.** See VENEZUELA.

**CARASSO, DAVID SAMUEL:** Jewish traveler; born at Salonica, Turkey. On the occasion of a business trip to Yemen, Arabia, in 1874, he studied the situation of the Jews of that region, and published an account of his travels in a volume written in Judæo-Spanish, entitled "Zikron Teman ó el Viage en el Yémen" (Constantinople, 1875). He traversed the whole of the interior of Arabia—including Sada, Ascer, Sanaa, etc., and was especially interested in the last-named community. In order to ameliorate the condition of the Jews of Yemen, he wrote to the Anglo-Jewish Association and to the chief rabbi of Constantinople, Moses Halévy, whereupon the latter sent Isaac Saul, a rabbi of Constantinople, to Sanaa as chief rabbi.

M. FR.

**CARAVAN:** A convoy of travelers or merchandise. As the commerce of the Israelites was chiefly inland trade, products from regions that were not contiguous were exchanged by means of caravans ("orhah"). The most important highways connecting Asia with Africa, and the far East with Europe, traversed or touched Palestine; and along these highways the great caravans passed through the country. They were not, however, roads in the modern sense of the word, but beaten paths, as they still are to-day, little better than trails and impassable for vehicles. Hence the camel was the chief medium for transportation, as it still is the invaluable beast of burden of those regions, marching day after day from twelve to fourteen hours with a burden of three or four hundred pounds, and thus far surpassing the best horse in its capacity for work. The

Israelites took little part in this trading by caravan, for the commerce of the country itself lay chiefly in the hands of the Phenicians and Canaanites; while the extensive trade between the East and the Mediterranean and Egypt was carried on by the tribes of the desert, who made this their business, as they in part still do. Thus it was a Midianite caravan—according to another source, an Ishmaelite—that, coming from the land east of the Jordan, carried Joseph to Egypt (Gen. xxxvii. 25, 28). The Dedanim—the inhabitants of the land of Teman and of Sheba—are also mentioned as leaders of caravans (Isa. xxi. 13, lx. 6; Job vi. 19). It seems that the kings of Israel levied, at least at times, a toll upon these caravans passing through their country (I Kings x. 15). See COMMERCE.

J. JR.

**CARBEN, VICTOR OF:** Jewish convert; lived at Cologne (1442–1515). Like most converts, Victor endeavored to show his zeal for his new religion by writing against his former coreligionists. When the Jews were banished from the diocese of Cologne early in the sixteenth century, he wrote to the archbishop, congratulating him on having "plucked away the weeds from his bishopric and ridden it of Jews."

Victor was the author of the following works: (1) "Opus Aureum ac Novum in quo Omnes Judæorum Errores Manifestantur," divided into four parts, the first of which treats of the life and customs of the Jews (Cologne, 1509). Raimann holds that the real author of the latter work was Ortuin Gratius. It was translated into German. (2) "Propugnaculum Fidei Christianæ, Instar Dialogi inter Christianum et Judæum, in quo quod Jesus Verus Messias, Verus Deus et Homo, Totiusque Humani Generis Salvator Sit Demonstratur" (Cologne, 1504–8).

In his writings Victor repeatedly asserts that it is not wise for Christians to enter into religious controversy with Jews, the latter being taught from childhood how to uphold their faith. He was chiefly concerned in exonerating himself from the accusation of having apostatized for the sake of worldly advantages; and in view of this, he paid the Jews a gratuitous compliment when he asserted that they, of all the people of the earth, are the most difficult to convert, their attachment to their Law being so strong that neither riches nor fear of persecution can cause them to abandon their faith.

In his old age Victor became an ecclesiastic; and after his death the following epitaph was engraved on the door of the church of Sainte-Ursule at Cologne: "Victor, formerly a Jew, wrote in the year 1509 four works against the errors of the Jews."

**CARCAS:** One of the seven chamberlains serving Ahasuerus and ordered by him to bring Queen Vashti into the royal presence (Esth. i. 10). The Septuagint gives a different name—Θαραζά. The Targum allegorizes five of the names, but leaves "Zetbar" and "Carcas" unexplained.

E. G. H.

G. B. L.

**CARCASS.**—**Biblical Data:** The carcass of a clean animal that had not been properly slaughtered, or that of an unclean animal of the land, the water, or the air, polluted until the evening the person who touched it (Lev. xi. 24). One who carried or ate it must wash his clothes (*ib.* 25, 39, 40). A special prohibition was enacted against eating clean animals that had died (Lev. xxii. 8; Ezek. iv. 14, xlv. 31), and although this was intended primarily for priests,

only the stranger in Israel could eat them (Deut. xiv. 21). Certain "creeping things" ("sherazim"), when dead, **Carcass.** polluted not only persons, but also wooden utensils, clothes, leather, and sackcloth. These were to be dipped into water, after which they became clean in the evening (Lev. xi. 32). But food and beverages could not thus be made clean (Lev. xi. 34), nor could a stove, nor any earthenware upon which the carrion had dropped (Lev. xi. 35; compare vi. 21). Seeds were unclean only when damp (Lev. xi. 38). See also **BURIAL**, **CORPSE**, **IMPURITY**.

Corpses, as well as inanimate things in the stage of dissolution and decay, must be removed from before the living God and from the people who dedicate themselves to Him (compare Lev. iii. 13, which commands the salting of meat offerings). The fear of dead bodies is due not merely to a physical revulsion against decay, but also to a sense of the mysterious curse attaching to mortality, especially of human bodies (Gen. ii. 17; iii. 19); it is, therefore, of ethical import (Dillmann's commentary on Lev. xi.). The fact that not only human carcasses, but also those of animals, were supposed to defile, militates against the supposition that these laws were intended to antagonize the pagan ancestor-worship.

E. G. H.

S. KR.

—**In the Talmud:** Dead animals often lay about in the cities (Tosef., Toh. vi. 1), for the carrion of animals did not pollute the habitations in which it lay. So long as the animals were not altogether dead they did not pollute: but if the head had been cut off, as, for instance, that of a lizard, though its trunk might still be moving, it was considered as a carcass (*ib.* i. 4; Oh. i. 6). Not only did the entire body of the animal pollute, but even a single member, which in quadrupeds might be smaller than an olive, or, in reptiles, smaller than a lentil (*ib.* i. 7). If the carcass were that of a clean bird, concerning which thirteen rules had to be observed (Toh. i. 1), it was more defiling in certain respects than that of an unclean bird (*ib.* i. 3). According to Lev. xi. 29, the carcasses of only eight amphibious animals polluted, which were specifically called "creeping things" (sherazim); opposed to these as the type of a clean animal was the frog (*ib.* v. 1, 4).

In post-Talmudic times the ordinances regarding the carcasses of "creeping things" were no longer observed, since none of the ordinances of purification were in force. The Karaites, however, censured the Rabbinites for this neglect of Biblical laws (Appiryon, in Neubauer, "Aus der Petersburger Bibliothek," p. 21, Leipzig, 1866; "Lebush Malkut," *ib.* p. 44). An Israelite who was not a Cohen was, according to rabbinical teaching, not bound to guard against pollution by carrion (Sifra, Shemini, iv.).

In other directions, however, the ordinances regarding animal carcasses received an extremely wide application; according to rabbinical law (Hul. ii. 4), for instance, an animal that had not been slaughtered in the prescribed way became carrion ("nebelah"; see **DIETARY LAWS**).

S. KR.

**CARCASSONNE:** Town in the department of Aude, France; the Carcaso or Carcassio of the Romans. It is variously transcribed in Hebrew as קרקאסונה, קרקאסונה, etc.

Although the settlement of Jews at Carcassonne goes as far back as the early centuries of the common era, official documents relating to them are not met with till the twelfth century. A cartulary of the Templars of Douzens in 1162 mentions a territory called "Honor Judaiens" in the environs of Carcassonne; and two charters of the same century describe Jews as lords of the manor. In 1142 a Jew named Bonisach, son of Ganiol (Hebrew name, Isaac ben Eliezer), gives his approval, as lord of the manor, to a donation of a vineyard made by its proprietors to the Templars. A similar case occurs forty-one years later when four Jews, joint lords of the manor, sign a deed of conveyance of vineyards bought by the Templars. One of the signers was Moses Caranita, who held the office of bailiff. The bestowal of this distinction upon a Jew was not unusual in the dominions of the counts and viscounts of Carcassonne, who protected their Jewish subjects and granted them many privileges. Raymond de Trencavel interceded with the bishops of his dominions to abolish the abuses to which the Jews were subjected during Holy Week. Roger II.

gave the Jews special evidences of his favor, and took the most prominent **Under Roger II.** among them under his personal protection. Thus, he secured the freedom of the eminent Talmudist Abraham ben David of Posquières (RABA'D), who had been thrown into prison by the lord of Posquières, and gave him shelter at Carcassonne. The example of Roger was followed by his successor, who assigned to his Jewish bailiffs the rank of barons in his court.

The crusade against the Albigenses brought a reaction in the state of the prosperous community of Carcassonne. Ascribing the Albigensian heresy to the influence of the rabbis, the counts and viscounts were compelled at the council of Saint-Gilles to swear that no public office should be entrusted to Jews. Moreover, Carcassonne in 1209 passed into the hands of the counts of Montfort, who were not so favorably inclined toward the Jews as were the Trencavels. Old edicts, destined to isolate the Jews from their Christian surroundings, were exhumed. The Lateran council of 1215 prescribed a special badge to be worn by Jews; and this order, although little observed in other places, was rigorously enforced in Carcassonne, which was the seat of the Inquisition.

In 1226, when Amaury de Montfort transferred Carcassonne to Louis VIII., the condition of the Jews grew worse. Under the administration of royal officers they became the prey of the avarice of the

government. St. Louis (Louis IX.), who did not favor the Jews in general, was especially embittered against those of Carcassonne for their participation in the uprising of 1240 in favor of Trencavel, when the latter was besieging the city. Thus, in 1246 St.

Louis ordered the seneschal of Carcassonne to keep all the Jews in prison until they had paid a certain sum; at the same time freeing Christian debtors from their debts to Jews. In 1253 he banished all Jews from Carcassonne, but soon recalled them, probably at the request of the remaining inhabitants. St. Louis, however, issued an edict (1254) prohibiting them from performing Talmudical rites, from lending money on interest, from practising sorcery, and from engaging in monetary transactions.

The reign of Philip the Bold brought no change in their status. The policy inaugurated by his father and the clergy to isolate the Jews from their Christian surroundings continued. The synodal constitutions of Bernard of Capendu, bishop of Carcassonne in 1272, forbade the Jews to leave their houses during Holy Week, obliged them to rest on Sundays and Christian festivals, prohibited them from eating with Christians, and forbade Christians to employ Jewish physicians.

The beginning of the reign of Philip the Fair promised relief to the Jews of Carcassonne. In 1288 he issued an ordinance forbidding the clergy to arrest Jews on any accusation without inquiry first being made by the seneschals. He also permitted

the Jews to lend money at a moderate interest, and obliged their Christian debtors to pay their debts. It was soon evident that in this Philip was acting in his own interest: he wanted to enrich the Jews in order that he might derive more profit in plundering them. A system of impositions was inaugurated by him which drove away many Jews from Carcassonne: these sought a refuge in the dominions of various counts, in order to avoid being sent as captives to Paris on account of not having paid their taxes (1290-92). During this time Philip himself apportioned the contributions to be paid by the principal Jews of Carcassonne, instead of leaving the matter to the syndics or procurators of the community, who were responsible for the payment of the taxes. This régime brought misery to the once prosperous community through the total banishment of the Jews from France and the confiscation of their property (1306).

During the reign of Louis X. (1315) an important community was reestablished at Carcassonne. Joseph ha-Kohen ("Emek ha-Baka," ed. Let-  
**Louis X.** teris, p. 73) includes it among the communities which had suffered from the persecutions of the Pastoureaux about 1320. Under

Charles IV. the community or district of Carcassonne had to contribute the sum of 25,000 livres to the total tax of 180,000 livres imposed upon the Jews of France. In 1394 the Jews were again banished from France, and since then no Jewish community has existed at Carcassonne.

Among the prominent men connected with Carcassonne the following may be mentioned: in the eleventh century, Joseph ben Solomon; in the twelfth

century, Abraham ben David of Posquières (RABAD) and Meïr ben Isaac of Trinquetaile; in the thirteenth, Elijah ben Isaac of Carcassonne, Samuel ben Solomon Nassi of Carcassonne, Abraham ben Isaac Hayyim of Carcassonne, Solomon ben Jacob, Mordecai ben Isaac Ezobi, and David ben Nathanel. Among the noted physicians of Carcassonne were Isaac, Jacob of Lumel, Dollan Bellan, and Leon Joseph, all of the fourteenth century.

**CARCASSONNE, DAVID:**

French physician; born Dec. 20, 1789, at Remoulins, a small town in the Gard department, France; died Nov. 15, 1861, at Nîmes. He was the son of a purveyor to the army of Napoleon I., and having joined the Grande Armée as military surgeon when twenty-three years of age, he followed the emperor to Russia in 1812, and was made a prisoner there. On his return to Nîmes, where his parents had settled, Carcassonne gave up his practise and became a carpet-manufacturer. He was a member of the Municipal Council of Nîmes, under King Louis Philippe (1837-48). Carcassonne was the author of a work entitled "Essai Historique sur la Médecine des Hébreux Anciens et Modernes," Montpellier-Nîmes, 1815.

S. K.

**CARCHEMISH:** City of northern Syria, on the Euphrates. Its importance seems to have been based on its situation at the end of the most direct route from the mouth of the Orontes to the Euphrates and to Harran. This position explains why it was the scene of the battle about 605 B. C. ("by the river Euphrates in Carchemish") between the Egyptian army of Necho II. and the Babylonians under Nebuchadnezzar (Jer. xlv. 2), in which, according to II Chron. xxxv. 20 (= I Esd. i. 25), the Egyptians were the attacking party. In Isa. x. 9 Carchemish is included among various powerful kingdoms overthrown by Assyria.

The city is mentioned as early as (about) 1480 B. C., when it was stormed by Pharaoh Thutmose III., and later, in the time of Rameses II.,

as an independent kingdom allied to the Hittites. The Egyptians write "Karakamisha," or frequently "Karakamisha." The Assyrians speak of "Gargamish" (earlier "Kargamish") as the principal city of northern Syria, "the Hatteland." It is mentioned as situated "on the right bank of the Euphrates, north of the modern river Sajur." Its territory was ravaged by Tiglath-pileser I. about 1100 B. C. King Sangara paid tribute to Asurnazirpal (877) and to Shalmaneser (854). The last king Pisiri(s) paid tribute to Tiglath-pileser II. (740), but revolted against Sargon in 717, which led to the loss of the independence of Carchemish (Isa. x. 9). The inhabitants were deported and the city was populated with Assyrian colonists, becoming the seat of an Assyrian governor.

The commercial importance of Carchemish is shown in the weight "maneh of Carchemish" in use at Nineveh. In Greek times it seems to have had the name "Europus"; the modern form of this name probably being "Jerabis" or "Jirbas" ("Jerablus," "Jerabolus," given by some English travelers, may be due to a confusion with the neighboring Hierapolis, south of Carchemish). The considerable ruins were first identified with Carchemish by G. Smith on his last journey (1876); formerly Circesium was often mistaken for that city. In I Esd. i. 23 the name is rendered "Carchamis"; in II Chron. xxxv. 20, A. V., "Charchemish."

**CARD-PLAYING.** SEE GAMES.

**CARDINAL, or CARDINEAL, JUDAH BEN ISAAC:** Translator; lived at the end of the twelfth century and the beginning of the thirteenth, probably in southern France. At the request of Joseph ben Baruch, who, according to Zunz, traveled from France to Jerusalem by way of Egypt in 1211, Cardinal translated from Arabic into Hebrew Judah ha-Levi's "Cuzari." This translation, which, with the exception of several small frag-

ments, is no longer in existence, was used by Nathanael ben Nehemiah Kaspi in his commentary on the "Cuzari" entitled "Edut le-Yisrael," and also by Judah ben Joseph Moscato in his commentary "Khol Yehudah."

**CARDINAL VIRTUES:** Virtues regarded as fundamental, and under which, as heads, all others may be arranged. The term "cardinal virtues" is first used by Ambrose to denote that group of four virtues which became familiar through the writings of Greek philosophers, and which were first formulated by Plato. In accordance with his threefold division of the soul into its rational, combative, and appetitive elements, Plato recognized four fundamental virtues: "φρόνησις" or "σοφία," wisdom; "ἀνδρεία," courage or fortitude, and this, as Zeller remarks, considered as a valor against the foes within the soul; "σωφροσύνη," temperance; and "δικαιοσύνη," justice or uprightness, conceived as resulting from the harmony of all the soul's powers when wisely governed. These four virtues became the classical expression of Greek ethical thought, irrespective of any particular system. They are specially prominent in the Stoics; and it is through the influence of the latter that they are found in Jewish writers of the Hellenistic period (see HELLENISM).

Strictly speaking, there never was, as a native and independent growth in Judaism, any attempt made to deduce systematically the commandments of the Torah from one or more general principles. It is only when the Jewish mind meets the Greek that Jewish thought attempts to present in Greek form, and also partly to recast into Greek ideas, the religious and moral conceptions of Israel. Thus a writer in the second century before the present era, the author of the Wisdom of Solomon, recognizes sophia, or wisdom, as the root of all virtues, and identifies it in his mind with the Spirit of God. In describing its workings he goes so far in his personifications as almost to hypostatize it, and speaks of the fruits of wisdom later as four (Wisdom viii. 7): "temperance and prudence, justice and fortitude."

The unknown author of IV Maccabees shows the influence of Stoicism in his enumeration of the four virtues in the following order: in the beginning of his work (i. 18) φρόνησις, as the most important, through which the mind rules over the affections; then justice, fortitude, and temperance. He illustrates the triumph of reason over the passions, from the martyrdoms described in II Macc. vi. Quite different again is the order of the four virtues in IV Macc. v. 22: temperance, fortitude, justice, and piety (see Freudenthal, "Die Flavius Josephus Beigelegte Schrift über die Herrschaft der Vernunft," 1869, pp. 51-55). Schürer says this "influence of Stoicism upon the author is in no other point so penetrating. . . . The reason to which he ascribes dominion over desire," and which is to produce the virtues, is "not human reason as such, but

reason guiding itself according to the rule of the Divine law."

Lastly, Philo, using his allegorical method, finds in the four streams of Eden an indication of the four cardinal virtues ("De Allegoriis Legum," i. § 19; compare "Quod Omnis Probus Liber," § 10); while in the order of them he follows the Stoics, he departs from them in recognizing the insufficiency of man to liberate himself from his sensual nature. For this is needed the help of God, who plants and promotes the virtues in the soul of man. True morality is, as Plato teaches, "the imitation of Deity," or, better, as the Rabbis say (Sifre, Deut. 49): "As He is called gracious, be thou gracious; as He is merciful, be thou merciful; as He is holy, be thou holy."

While there seems to be no other work of a Jewish writer in which the four virtues are directly mentioned, it may not be improper in this connection to note the tendency growing up in Jewish literature to enumerate certain virtues as striking manifestations of character. Thus the statement is given in Ned. 38a and other portions of the Talmud: "R. Johanan said, 'The Holy One, blessed be He! lets his Presence dwell only with the strong, the rich, the wise, and the humble.'" In this connection may be mentioned the accepted definitions of Ben Zoma (Ab. iv. 1):

**Jewish Fundamental Virtues.** "Wise is he who learns from every man; strong is he who masters his own spirit or 'yezer,' (his evil inclination); rich is he who is contented with or rejoices in his lot." It may be said that here is a group which is again and again found in the writings of Jewish philosophers of the Middle Ages. As the reverence for God was regarded as the beginning of wisdom (Ps. cxi. 10; Prov. i. 7), and as yezer, the evil inclination, was chiefly identified with the tendency to unchastity, a special cluster of Jewish virtues is here presented: study, combined with fear of God; chastity; cheerfulness or contentment; and humility or meekness. As these would express the inward disposition of the "disciple of the wise," there are also enumerations, especially in "Ethics of the Fathers," which seem to emphasize the fundamental virtues as they appear objectively in the deed or social institution. Such statements as that of Simon the Just (Ab. i. 2): "Upon three things the world rests—the study of the Law, divine service, and deeds of love," or that of another sage (Ab. i. 18): "Upon three things is the world established; viz., truth, justice, and peace," can well be taken to mirror the virtues which appeared to the Jewish mind as fundamental. [Compare Paul's triad of Christian virtues: faith, hope, and charity (I Cor. xiii. 13).—κ.]

Reference may also be made to the classical passage of the Talmud (Mak. 23b, 24a): "R. Simlai said, 'Six hundred and thirteen commandments were given to Moses. King David came and reduced them to eleven (Ps. xv.). The prophet Isaiah further reduced them to six (Isa. xxxiii.). Micah (vi. 8) reduced them to three: "He hath shewed thee, O man, what is good . . . to do justly, and to love mercy, and to walk humbly with thy God." Isaiah again reduced them to two (Isa. lvi.). The prophet

Amos placed them all upon one principle (Amos v. 4): "Seek me and live"; or, as the prophet Habakkuk said, "The just shall live by his faith." "

**CARDOSO, ELIJAH ABOAB**: Philanthropist and founder of the Hamburg synagogue; lived in that city in the first half of the seventeenth century. He was descended from the Spanish family of that name, and was one of the first Jewish settlers in Hamburg. In 1630 Cardoso founded the first Portuguese synagogue in the city. In so doing he risked the displeasure of the senate, which did not care to grant the Jews permission to build a synagogue, lest the attention of the fanatical population of Hamburg should be attracted to them.

**CARDOSO, ISAAC (FERNANDO)**: Physician, philosopher, and polemic writer; born of Marano parents at Celorico in the province Beira, Portugal, before 1615; died at Verona after 1680. He was a brother of Abraham Michael (Miguel) Cardoso. After studying medicine, philosophy, and natural sciences at Salamanca, he settled as physician at Valladolid in 1632, but was soon called as chief physician ("physico mor") to Madrid. While there he published (1632) a lecture on Vesuvius and on the causes of the earthquake, and (1635) a treatise on the color green, which he dedicated to Isabel Henriques, who was celebrated in the academies of Madrid for her intellect, and who lived later in Amsterdam. In the latter year he also composed a funeral discourse for Lope de Vega, which was dedicated to the Duke de Sessa, and a treatise on the uses of cold water, printed in 1637, and dedicated to King Philippe IV. Fernando (his Marano name) left Spain, probably to escape from the Inquisition, and went with his brother Miguel, who had also studied medicine, to Venice, where both openly embraced Judaism, Fernando changing his name to "Isaac." After a short stay in Venice he settled in Verona, where he remained until his death, highly honored by Jews and Christians.

Aside from the works already mentioned, Cardoso published a comprehensive treatise on cosmogony, physics, medicine, philosophy, theology, and natural sciences, printed at Venice in 1673 under the title "Philosophia Libera in Septem Libros Distributa," and dedicated to the doge and senate of that city. In this work, which critically discusses the various philosophical systems, he appears as a decided opponent of the Cabala and of the pseudo-Messiah Shabbethai Zebi, although his brother Miguel was an adherent. Isaac also ridiculed the cabalistic, Pythagorean doctrine of the transmigration of souls.

This "learned, God-fearing physician," as he is designated by the pious Moses Hagis ("Mishnat Hakamim," p. 120a) defended his coreligionists in his great work, "Las Exceleacias y Calunias de los Hebreos," printed in 1679 at Amsterdam, and dedi-

cated March 17, 1678, to Jacob de Pinto. In ten chapters he emphasizes the "excelencias" (distinguishing features) of the Jews, their selection by God, their separation from all other peoples by special laws, their compassion for the sufferings of others, their philanthropy, chastity, faith, etc.; and in ten other chapters he refutes the "calumnias" (calumnies) brought against them: viz., that they worship false gods, smell badly, are hard and unfeeling toward other peoples, have corrupted Scripture, blaspheme holy images and the host, kill Christian children and use the blood for ritual purposes. This work, which was celebrated by the rabbi J. Bricli of Mantua in a Hebrew sonnet ("Ozar Nehmad," iii, 167), was sent by Cardoso soon after its appearance, July 23, 1679, to the rabbi Samuel Aboab in Venice, asking for an opinion. Aboab answered July 31, thanking him for the splendid gift. In another letter to Aboab, Dec. 24, 1679, he gave his views on the derivation of some Spanish words from persons mentioned in the Bible. According to De Barrios, Cardoso also published "Varias Poesias" (1680).

M. K.

**CARDOSO, MIGUEL** (later **ABRAHAM**): Shabbethaian prophet and physician; born in Spain about 1630; died at Cairo 1706. He was a descendant of the Maranos in the Portuguese city of Celorico. He studied medicine together with his brother Fernando Isaac, and while the latter was given to his studies, Michael spent his time in singing serenades under ladies' balconies. After having completed his education, he left Spain for Venice. There, probably at the instigation of his brother, he embraced Judaism and received the name "Abraham." Later he established himself as a physician at Leghorn, but did not meet with much success until his recommendation by the duke of Tuscany to Othman, the bey of Tripoli.

Becoming thereafter fairly prosperous, Cardoso married two wives, and began to devote himself to cabalistic speculations, in which he appears to have been previously initiated at Leghorn by Moses Pinheiro. With the appearance of the Shabbethaian movement, he assumed the character of a prophet, pretending to have had dreams and visions; and sent circulars in all directions to support the Messianic claim of Shabbethai. Cardoso's pretended or actual belief in the Messiah was not renounced even when Zebi embraced Islam; he justified the latter on the plea that it was necessary for him to be counted among the sinners, in order that he might atone for Israel's sins, according to Isa. liii. (in every point applicable to Shabbethai Zebi).

Later Cardoso, no longer satisfied with being only a prophet, gave himself out as "Messiah ben Ephraim," asserting that the Messiah is he who teaches the true conception of God. This conception Cardoso expounded in nearly all his writings: that the true God is not the "En-Sof," but the "Keter Elyon"; the first being a passive power which has no connection with the world.

Being endowed with great eloquence, Cardoso had many followers, but many enemies as well. An influential personage, Isaac Lumbroso, by spending much money, obtained his banishment from Tripoli. Cardoso then wandered from place to place, trying to lead people astray by his prophecies and visions, but meeting no success, as the rabbis had issued warnings against his vagaries. In 1703 he settled at Cairo and became the physician of the pasha of Egypt. Three years later he was assassinated by his nephew during a discussion on money matters.

Cardoso was the author of many cabalistic and polemical works, of which only two are still extant: "Boker Abraham" (Dawn of Abraham), a cabalistic work in two volumes (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1441), an extract of which was published by Isaac Lopez in "Kur Mazref ha-Emunot," and

"Ha-Ketab" (The Writing), published in Weiss's "Bet ha-Midrash," 1865. **His Works.** Cardoso's other works were: (1) "Zeh Eli"; (2) "Hokmato Shel Abraham Abinu"; (3) "Sefer ha-Ma'or"; (4) "Or Zah we-Mezukhak"; (5) "Wikkuah Kellali"; (6) "Sullam Ya'akob"; (7) "Hereb Pipiyot"; (8) "Elohe Abi"; (9) "Shema' Kaddishah"; (10) "Tob Adonai ha-Kol"; (11) "Derush Amen"; (12) "Erez Yisrael"; (13) "Sod Hai 'Alamin"; (14) "Derush ha-Ketab"; (15) "Solet Nekiyah"; and (16) "Raza de-Razin."

**CARDOZA, DON AARON**: Consul for Tunis and Algiers at Gibraltar about 1805. He was a descendant of a Portuguese-Jewish family. Cardoza promoted the interests of the British government; and as delegate of General Fox, the governor of Gibraltar, concluded a treaty on Nov. 5, 1805, with Sidi Mahomet, bey of Oran, for provisioning the garrison of Gibraltar and the British squadron in the Mediterranean. He proceeded to Oran on board the frigate "Termagant," which was placed at his disposal by Lord Nelson. Cardoza was successful in saving the lives of three English sailors who were imprisoned at Oran and under sentence of death. A treaty was negotiated by him between the Portuguese government and the bey of Tunis. He was one of the principal landowners of Gibraltar. In 1824 Cardoza was created a knight of the Legion of Honor by Louis XVIII. of France, and was rewarded with other orders of merit for his distinguished services. For many years he was president both of the Hebrew community and of the chamber of commerce.

**CARDOZO**: American Sephardic family, doubtless connected with the Cardozos of Amsterdam and London, though the connection has not been made out. They trace back to Aaron Cardozo, a London merchant who went to New York about 1752.

Among his descendants have been several eminent citizens of Charleston, S. C., and a judge of New York state of some eminence. The sketch pedigree below (omitting branches that have died or married out of the faith) gives the chief branches of the family:

J. E. N. S.

PEDIGREE OF THE CARDOZO FAMILY.

**CARDOZO, DAVID DE JAHACOB LOPEZ:** Dutch Talmudist and prominent communal worker; born in Amsterdam, Holland, May 21, 1808; died there April 11, 1890. He was sent at an early age to the celebrated bet ha-midrash 'Ez Hayyim, studied under Rabbi Berenstein at The Hague, and received his diploma of "Morenu" in 1839. The same year he was appointed ab bet din of the Portuguese synagogue of Amsterdam, and in 1852 ab bet din and preacher of that synagogue, Chumacero being made hakam, and Vaz Diaz and Montezinos dayyanim at the same time. He became dean of the intermediate classes of 'Ez Hayyim, which office he held for nearly half a century. Cardozo was founder of the Hebrah 'Abodat ha-Kodesh, instituted for the study of Jewish law and its commentaries. After having been decorated by the king of Holland with the Royal Order of the Lion for services rendered to his country, he retired from his various offices in 1888.

M. K.

**CARINTHIA** (German, *Kärnten* or *Kärnten*): A crownland of Austria. It has but a small number of Jews, whose ancestors, with the Jews of the neighboring crownlands, Carniola (Krain) and Styria (Steiermark), shared the vicissitudes of their brethren in the Austrian empire. The first settlement of Jews in these countries took place at the

end of the eleventh and during the twelfth and thirteenth centuries, as is proved by documents in which occur such names as "Judenburg," "Judendorf," and "Judenger." At first compelled to dwell in hamlets and villages, they were allowed, in the course of the fourteenth century, for financial and commercial reasons, to inhabit cities.

The development of the legal status of the Jews of Carinthia and Styria up to the year 1496 resembled that of the Jews of Austria generally. The privileges granted by Duke Friedrich July 1, 1244, and by King Ottocar I. March 29, 1254, forming and regulating the laws governing the Jews of Austria proper, were extended to Carinthia, when, in 1335, it came into the possession of the house of Hapsburg. In civil affairs the Jews had their own jurisdiction. Their judge ("Judenmeister") decided all cases among Jews, and was the intermediary between them and the government, especially in regard to taxes and other state matters.

An edict ("Handfeste") concerning the "right, liberty, grace, and good habits" of the Jews of Carinthia and Styria, issued by the dukes Albrecht III. and Leopold III. at Vienna, June 24, 1377, was renewed and confirmed Oct. 23, 1396, by Duke Wilhelm "after good consideration and advice of our counselors." Neither the originals nor copies of these documents being extant, their detailed contents are not known. Presumably, the Jews, having been in 1370 the victims of persecutions and spoliations, solicited the renewal of these edicts, which restored to them their former rights and freedom.

In those parts of Carinthia not belonging to the house of Hapsburg the legal status of the Jews was

based upon special privileges. Thus, Duke Heinrich of Carinthia granted his protection to the Jew Höschelein and his heirs, and secured to **Privileges.** them all the rights enjoyed by the other Jews in Austria and Styria (Jan. 20, 1328). He also promised them his aid in collecting their outstanding debts and claims in Carinthia and elsewhere. In return they were required to pay him annually 30 marks in silver.

The laws regulating the condition of the Austrian Jews were also in force in those districts that were included in the territory of Carinthia and that belonged to the archbishop of Salzburg, the bishop of Bamberg, the counts of Görz and Ortenburg, and others. The Church in Inner Austria was never hostile to the Jews. Although the statutes of the Salzburg provincial councils of 1267 and 1418 directed against the Jews applied also to Carinthia and Styria, they were never enforced there; and the clergy had frequent commercial dealings with the Jews.

As creditors of the burghers and the peasants, of the nobility and the clergy, the Jews through their wealth gained great influence in times when money was scarce. Money-lending being the only business in which they were allowed to engage, and having no guaranty of repayment of their loans, they were compelled to exact a high rate of interest, and thus they incurred the hatred of the people. In those days of ignorance and superstition the Jews were also accused of maliciously desecrating the host and of ritual murder. Violent persecutions in 1310, 1338, and 1397 were the consequence.

Jewish taxes in Inner Austria are recorded in the "Rationalia" (Rent-Books) of the Austrian dukes in the years 1326-38. Under Friedrich **Taxes.** III. the Jews of these countries annually paid 6,000 florins. In 1470 a personal tax of 4,000 florins and in 1478 one of 3,000 florins were imposed upon them. A special tax paid in 1446 was a contribution toward the dowry of Princess Katharina, sister of Friedrich III.

The agitations in the cities against the privileges of the Jews resulted in several edicts limiting their commercial and judicial rights. An ordinance of Duke Wilhelm (March 17, 1396) prescribed that all bills of credit given by Christians to Jews must be sealed by both the city or market judge and the Jewish judge.

About the middle of the fifteenth century a hostile movement also began to manifest itself among the provincial legislatures ("Landstände"); and the Jewish question, heretofore considered but a local affair, now became the concern of the country at large. Complaints against the Jews were the constant subject of proceedings in the

**Opposition of the Estates.** provincial diets, and they ended in the expulsion of the Jews. From St. Veit, Carinthia, Emperor Friedrich III. issued a decree (Jan. 5, 1444), article 17

of which is to the effect that any Jew possessing a bill of credit given by one Christian to another and transferred to him (the Jew), must sue for recovery in the court to which the Christian creditor resorts, and not in a court of his own choice. Article 16 ordains that without the consent of his feudal

master a peasant may neither sell his estate nor give a bill of credit to a Jew.

On July 8, 1491, Friedrich III. ordained that, "for better control and security," all debt-claims of the Jews should be entered in a special book known as the "Judenbuch," and that bills of credit not so entered should have no validity. To restrain usury, the same ordinance greatly reduced the rate of interest, and prohibited the charging of compound interest.

In consequence of these lengthy transactions with Friedrich III. the provincial diets came to the conclusion that only expulsion could definitely solve the Jewish question, but that this emperor would never sanction such a measure. His son and successor, Maximilian I., however, yielded to their demand. After preliminary transactions at the diets held at Marburg in April and Nov., 1494, and at Gratz in Aug., 1495, the emperor accepted the offer of 38,000 florins from Styria and one of 4,000 florins from Carinthia, to indemnify him for the loss of Jewish contributions to his treasury, and ordered the expulsion of the Jews "on account of their misdeeds." In March, 1496, he issued from Schwäbisch-Werda a decree according to which the Jews, "for having repeatedly insulted and desecrated the holy sacrament, tortured and killed Christian children and used their blood for hidden, damnable purposes, and with falsified letters, seals, and otherwise having cheated people, and impoverished and ruined many noble and other families," were required within six months to leave Carinthia and to withdraw from Styria by the following Epiphany (Jan. 6). What the Christians "honestly owe" to the Jews, they are to pay, up to Aug. 24, 1496; failing to do so, their property is to be given into the hands of the messenger of the court, Virgil Haffner, who shall sell the same, pay the debt to the Jews, and return the remainder to the debtor. The real estate of the Jews became the property of the king.

A considerable number of Jews lived at Villach, the center of commerce in Carinthia, situated within the territory of the bishop of Bamberg. They had there a synagogue and a cemetery near the village Judendorf. Persecutions took place

**Various Com-** in 1338 at Wolfsberg; and in the fatal  
**munities.** year 1349 they extended to the Carinthian possessions of the archbishop of Salzburg, as is indicated in the treaty

of peace made at Friesach Nov. 14, 1349, in which Archbishop Ortolf declares that "he will not meddle with the affairs of the Jews." Probably also Salzburg Jews were injured or slain in these tumults in the Bamberg territory.

But during the period following, the bishops of Bamberg vigorously protected their Jewish subjects. On Feb. 12, 1368, Bishop Ludwig made an agreement with the dukes Albrecht III. and Leopold III., according to which the ducal governor of Carinthia was to aid the subjects of the bishop, be they Christians or Jews, in obtaining satisfaction from their debtors. The same stipulation was made in the agreement of Feb. 3, 1436, between Duke Friedrich and Bishop Anton of Bamberg.

These favorable conditions continued during the fifteenth century, until the Jews, accused of having

killed SIMON OF TRENT, were also expelled from the districts of Bamberg under Bishop Philipp von Henneberg in 1478. It seems that this decree of banishment was not strictly carried out; since it was frequently republished, in 1535, 1565, 1566, 1585, 1593, 1687, 1699, 1700, 1711, 1712, 1713, and 1748.

Jews settled in the district of Salzburg in the thirteenth century. From a brevet of Archbishop Ortolf von Weisseneck dated June 25, 1346, it is known that upon payment of a considerable annual tax they enjoyed the privilege of owning houses, and the right of free movement and commerce. In Friesach they had a synagogue. In 1498 these Jews were expelled, being forced to sign a declaration that they would never return. After having paid their debts, they were allowed to take their goods with them; but they had to surrender the pledges in their hands.

Jews passing through the countries from which they had been driven were strictly watched; only a temporary sojourn in certain market-towns being allowed, and then the payment of a personal tax was required.

For almost three centuries the decree of banishment remained in force. When Emperor Joseph II. proclaimed the Act of Toleration May 16, 1781, the Styrian deputies remonstrated against it, whereupon the emperor gave this decision:

**Re-admission.** "Since, according to the provincial privileges, Jews neither exist nor are tolerated in this country at the present time, there is no question of the admission or toleration of the Jewry in this country." Nevertheless a patent of Sept. 9, 1783, set forth that "natives and foreigners, Christians as well as those of another religion, may visit the annual markets at Gratz, Klagenfurth, Laibach, and Linz." On the other hand, by circulars of Oct. 20, 1784, and of June 4, 1787, Jews were prohibited from "entering the country, trading from house to house, buying old silver and other things." These prohibitions were republished with the gubernatorial ordinances of 1823 and 1828.

The imperial patent of March 4, 1849, about the political rights granted by the constitution, gave to the Carinthian Jews social and legal equality; but they were not allowed to own real estate until the constitution of Dec., 1867, removed this last vestige of intolerance.

According to the census of 1890 the total number of Jews in Carinthian towns was 179, divided as follows:

Klagenfurth and environs.	122	Pfarrdorf.....	5
Spital.....	6	Bleiberg.....	5
Villach.....	20	Wolfsberg.....	2
Tarvis.....	4	Völkernmarkt.....	5
Prevali.....	5	St. Veit.....	5

They, together with the Jews of Styria and Carinola, belong officially to the Israelitish congregation of Gratz.

**CARITES:** People mentioned in II Kings xi. 4, 19. The Kari (R. V., "Carites"; margin, "executioners"; A. V., "captains") are mentioned be-

tween the captains over hundreds and the "runners" (*i. e.*, satellites) as body-guards of the king. In II Sam. xx. 23, where the well-known troop of the Cherethites (A. V., "Keri") and Pelethites is mentioned, the text reads "Kari" (R. V. margin, "Carites") for "Cherethites." The most plausible explanation is that, in all three passages, there is only an abridged orthography for the usual "Kerethi(m)"—Cherethite(s) (compare Vulgate, the Hexapla, etc.; Targ. [except II Kings xi. 4, "heroes"]). Others (*e. g.*, Driver, on II Sam. xx.) consider that the reading "Carite(s)" (II Sam. xi. 4) is intended, and they assume that, instead of the Philistine mercenaries here, a similar troop of Carians, the famous pirates and mercenaries of earlier Greek antiquity, is mentioned, as by Herodotus ii. 152, 171; Thucydides, iv. 8; Hecyclus, under "Karitai" and "Archilochus." This might also point to affinity with the Philistines who came from the same quarter of the Aegean Sea. The Septuagint understands "Chori" not as collective singular, but as the name of an officer.

**CARLSRUHE, GERMANY.** See KARLSRUHE.

**CARLSTADT, CROATIA.** See KARLSTADT, under CROATIA.

**CARMANIANS (R. V., CARMONIANS):** A people mentioned in II Esd. xv. 30. The Carmanians are represented as joining battle with the "nations of the dragons of Arabia." The dragons gain the upper hand, but are themselves defeated later (xv. 33). This has been taken to refer to the time of the Sassanids. Sapor I. (240-273) invaded Syria and took Antioch, but was repulsed by Odenathus and Zenobia. Zenobia was afterward defeated by Aurelian and taken captive.

The name is still preserved in "Kirman," a district in the southeastern part of Persia, on the shores of the Persian Gulf.

**CARMEL.** See PERIODICALS.

**CARMEL, MOUNT:** A well-known mountain ridge in Palestine; **הכרמל** ("the garden" or "garden land," with the definite article) is usually given in the Bible. It is known in later Hebrew as **כרמל**, and in modern Arabic as "Knrnul," but more usually "Jabal Mar Elyas." Extending from the plain of Esdraelon to the Mediterranean, it terminates in a steep promontory in that sea, about nine miles southwest of Acre. The formation is of limestone with

an a mixture of flint. The highest point is 1,742 feet above the sea, and the slope is covered with a luxuriant vegetation. Oaks, pines, olives and laurels abound.

Carmel is renowned in Jewish history and occurs frequently in the imagery of the Prophets (Isa. xxxiii. 9, xxxv. 2; Jer. xlvii. 18, l. 19; Amos i. 2, ix. 3; Micah vii. 14; Nahum i. 4; Song of Solomon vii. 12). It fell to the lot of the tribe of Asher (Josh. xix. 27) — "the king of Jekneam of Carmel" being one of the Canaanitish chiefs who was defeated by Joshua (Josh. xii. 22). It is also famous as the place where the prophet Elijah brought Israel back to its allegiance to YHWH, and where he slew the priests of Baal (I Kings xviii. 40). Here within the manner-caves he lived concealed during the reign of Ahab; and here, too, at his word were consumed the two "captains" with their "fifties" (II Kings i. 9-12). Here also Elisha received the visit of the Samanite woman, whose son he restored to life (II Kings iv. 25).

It is reasonable to suppose that from very early times Carmel was considered a sacred spot. This is

**CARMI**: 1. A son of Reuben who came to Egypt with Jacob (Gen. xlv. 9; Ex. vi. 14; I Chron. v. 3). Also the name of a family of which Carmi was the head (Num. xxi. 6). 2. A Judahite (I Chron. ii. 6) son of Zaphi, mentioned in Josh. vii. 1 and father of Achan, who is called "Achan" in I Chron. ii. 7. The latter name being perhaps related etymologically to *ayy* (Acher) "the troublemaker." 3. In I Chron. iv. 1 Carmi is a tribal chief for Cherethai (see Benzinger, "Die Bücher der Chronik Eshkari," Tübingen, 1901).

MOUNT CARMEL FROM THE SEA.

From a photograph.

evidenced by the facts that an altar to YHWH existed there before the introduction of the worship of Baal into the kingdom (I Kings xviii. 30); that Elijah chose it for the place of the assembly of the people; and that Elisha visited it from Jericho before coming to Samaria (II Kings ii. 25) and even made it his abiding-place (II Kings iv. 23). In later times Pythagoras, according to his biographer Iamblichus, was attracted to it by its sacred reputation; and Vespasian went thither to consult the oracle of God "without image or temple" (Tacitus, "Hist." ii. 7).

The exact site of the contest between YHWH and Baal, where fire, descending from heaven, proved the God of Israel to be the true God (I Kings xviii. 17-40), has not been identified. Traditions, preserved in the monastery founded on Mt. Carmel in 1156 by Berthold, count of Limoges, and among the Druses of the neighboring villages, indicate, as the scene, the eastern end of the ridge at a spot called El-Mabarrahah ("the burning").

**CARMI.** See **KARMI**.**CARMI (CRÉMIEUX), MORDECAI B. ABRAHAM.** See **CRÉMIEUX MORDECAI ABRAHAM**.

**CARMOLY, ELIAKIM**: French scholar, born at Saizy, then in the French department of the Upper Rhine (August 5, 1802; died at Frankfurt-on-the-Main Feb. 15, 1875). His real name was Gabriel David Behr (or Baer), the name "Carmoly" borne by his family in the fourteenth and fifteenth centuries, was adopted by him when quite young. He studied Hebrew and Talmud at Colmar; and, owing to the fact that both French and German were spoken in his native town, he became proficient in those languages. Carmoly went to Paris and there assiduously studied the old Hebrew manuscripts in the Bibliothèque Nationale, where he was employed. Several articles published by him on various subjects in scientific papers made him known, and on the establishment of a Jewish consistory in Belgium,

he was appointed rabbi at Brussels (May 18, 1832). In this position Carmoly rendered many services to the newly founded congregation, chiefly in providing schools for the poor. Seven years later, having provoked great opposition by his new scheme of reforms, Carmoly resigned the rabbinate and retired to Frankfort, where he devoted himself wholly to Jewish literature and to the collection of Hebrew books and manuscripts, in which he was passionately interested.

**Leaves Ministry for Literature.** Carmoly's works have been severely attacked by the critics; and it must be admitted that his statements can not always be relied upon. Still, he rendered many services to Jewish literature and history; and the mistrust of his works is often unfounded. Carmoly was the author of the following works: (1) "Toledot Gedole Yisrael," a biographical dictionary of eminent Jews, ancient and modern, Metz, 1828 (only one volume, extending to "Aaron ben Hayyim," was published); (2) "Wessely et Ses Écrits," Nancy, 1829; (3) "Sibbul Rab Petahyah," the travels of Pethabiah of Regensburg, translated into French and accompanied by the Hebrew text, Paris, 1831; (4) "Eldad ha-Dani: "Relation d'Eldad le Danite, Voyageur du IX<sup>e</sup> Siècle, Traduit en Français, Suivie du Texte et de Notes," Brussels, 1834; (5) "Mémoire sur un Médaille en l'Honneur de Louis-le-Débonnaire," *ib.* 1839; (6) "Maimonides und Seine Zeitgenossen," translated from the Hebrew into German, Frankfort-on-the-Main, 1840; (7) "Les Mille et Un Contes, Réécits Chaldéens," Brussels, 1842; (8) "Akhan de-Mar Ya'akov," a kind of Midrash in six chapters on the Chazars, published for the first time from two manuscripts, *ib.* 1842; (9) "Eldad et Medad, ou le Joueur Converti," translated from Leo di Modena's work, with a biographical notice on the author, *ib.* 1844; (10) "Le Jardin Enchanté," Contes, *ib.* 1845; (11) "Sefer ha-Kuzarim: Des Khozars au X<sup>e</sup> Siècle, Suivi d'une Lettre du Ministre d'Abd el-Rahman III. au Roi de Khozarie et la Réponse du Prince," *ib.* 1845; (12) "Histoire des Médecins Juifs, Anciens et Modernes," *ib.* 1844; (13) "Halikot Erez Yisrael: Itinéraires de la Terre Sainte des XIII<sup>e</sup>-XVII<sup>e</sup> Siècles," translated from the Hebrew, *ib.* 1847; (14) "Dibre ha-Yamim le-Bene Yahya," genealogy and biography of the Yahya family, Frankfort-on-the-Main, 1850; (15) "Ha-'Orebim u-Bene Yonah" (The Crows and the Doves), genealogy of the Rapoport family, Rödelheim, 1861; (16) "Imre Shefer" (Words of Beauty), on Hebrew versification, by Abshalom Mizrahi (fourteenth century), with an introduction and an appendix containing literary essays and poems by the editor, Frankfort-on-the-Main, 1868; (17) "La France Israélite: Mémoire pour Servir à l'Histoire de Notre Littérature," Paris, 1858; (18) "Mebasseret Zion" (O Zion, That Bringest Good Tidings), a collection of letters from Jerusalem on the Lost Ten Tribes, Brussels, 1841.

Besides these works, Carmoly contributed to many periodicals, and edited the "Revue Orientale" (Brussels, 1841-46, 3 vols.), in which most of the articles were furnished by himself. The most important of these contributions, which constitute works by

themselves, were (1) "Vocabulaire de la Géographie Rabbinique de France"; (2) "Essai sur l'Histoire des Juifs en Belgique"; (3) "Mille Ans des Annales Israélites d'Italie"; (4) "De l'Etat des Israélites en Pologne"; (5) "Des Juifs du Maroc, d'Alger, de Tunis, et de Tripoli, Depuis Leur Etablissement dans Ces Contrées Jusqu'à Nos Jours."

**BIBLIOGRAPHY:** *The Itinerary of Benjamin of Tudela*, ed. Asher, ii. 239; Fuenn, *Keneset Yisrael*, p. 134; a monograph in *Jahrbuch der Vorgeschichtclubs*, Oct. 1, 1902.

**CARMOLY, ISSACHAR BÄR BEN JU-DAH:** Alsatian rabbi; born at Ribeauville, Alsace, Sept. 15, 1735; died at Sulz May, 1781. At the age of ten he was advanced in his training for the rabbinate sufficiently to follow the elaborate lectures of Jonathan Eybeschütz. Later, Carmoly studied successively at Frankfort, under the direction of Jacob Joshua, author of "Pene Yehoshu'a," and at Metz, under Samuel Helman, who conferred upon him the title of rabbi. On returning home, in compliance with the wish of his father, Carmoly began the study of medicine under the direction of Jacob Assur, a physician of Nancy, but had to give it up, being engrossed with his Talmudical studies. The only benefit he derived from his tutor was a fair knowledge of mathematics, of which he made use later.

Carmoly married the daughter of a rich banker named Joseph Raineau. The latter persuaded the bishop of Sulz to create a rabbinate in his see; and Carmoly was appointed rabbi of Sulz.

Carmoly was the author of a commentary on the Tosefta to the treatise Bezah, published, together with the text, under the title "Yam Yissakar" (Sea of Issachar; Metz, 1769). The grandson of the author, Eliakim Carmoly, claimed to have had in his possession the following manuscripts of his grandfather: (1) "Yam Yissakar," a commentary on the Tosefta on the treatise Makkot; (2) "Keter Torah" (The Crown of the Law), a poem containing the names of all the books of the Holy Scripture, the Mishnah, and the Talmud ("This poem," says Eliakim Carmoly, "is still recited in the district of Sulz on the eve of the Feast of the Law" [Simhat Torah]); (3) "Ha-Talmudi ha-Melummad" (The Learned Talmudist), a collection of Halakah, Haggadah, and commentaries; (4) "Matteh Yissakar" (The Staff of Issachar), halakic decisions; (5) "Sefer Yad ha-Itim" (Book of the Hand of the Times), a treatise on the Jewish calendar; (6) "Bene Yisrael" (The Children of Israel), novellæ on many Talmudical treatises; (7) "Ohel Yissakar" (The Tent of Issachar), a treatise on mathematics; (8) "Karmi Sheli" (Mine Own Vineyard), novellæ on the Pentateuch, literary essays, poems, etc.

**CARMONA:** City in the archbishopric of Seville, Spain, where Jews resided in very early times. In an old "Fuero de Carmona" it was ordained that no Jew should command a Christian in Carmona or in any of the territory under its jurisdiction.

The Jews of Carmona, who were very wealthy and lived in a separate quarter, were in June, 1391, either murdered or forced to accept baptism, and their synagogue was destroyed in the following December. With the same celerity which had characterized the persecution of Jews in 1391, the persecution of the Maranos spread to Carmona from Cordova in 1474, the local Maranos being plundered and killed in a most horrible manner. "Would that you, illustrious king, had seen the sack and devastation of the city of Carmona!" cries the poet Anton de Montoro in a poem dedicated to the king; "not one thought to cry halt to these excesses."

**BIBLIOGRAPHY:** Amador de los Rios, *Historia*, i. 376, ff. 1391; Jacobs, *Sources*, No. 1318 (read 1390 for 1395); Fidel Fita, *La España Hebrca*, pp. 211 et seq.; *Cancionero de Anton de Montoro*, p. 90, Madrid, 1900.

M. K.

**CARMONA:** A family of Jewish financiers prominent in Turkey at the beginning of the nineteenth century. It is of Spanish origin, and probably came from the city of the same name in Andalusia. The earliest known member was Behor Carmona, or, more exactly, "Tchelebi" (Lord) Behor Carmona, who had the Turkish title "Shap-tehli Bashi" (chief purveyor of alum). Carmona was at the same time banker to the court and general tax-gatherer, sharing these offices with two other Jews, Ezekiel Gabbai and Isaiah Ajiman. In time of war Carmona and Gabbai followed the armies, establishing themselves near headquarters. After the destruction of the corps of the janizaries, in 1826, by order of the sultan Mahmud two negroes of the palace strangled Carmona one night in his own house. His property was confiscated.

Thirty years later (1856), during the reign of Sultan 'Abd al-Majid, a member of the Carmona family who had become an English subject went to London and attracted the attention of the Board of Deputies of the British Jews. The board obtained from the Ottoman government a firman granting an annual pension of 25,600 francs from that year to the descendants of the Tchelebi Behor.

At the beginning of the reign of Sultan 'Abd al-Hamid (1876), Behor Carmona's son, David (Turkish, Davidtchon) Effendi, was a member of the Ottoman Parliament convened under the new constitution. Although this parliament held only a few sessions, David's title of senator secured for his family after his death a pension from the government.

Another member of the family was Joseph Carmona, born at Constantinople in 1860. He was an amateur writer and translator. Under the title "El Assedio de Rhodes" he translated in 1873 from the French into Judaeo-Spanish a novel entitled "Le Sièg de Rhodes," treating of the customs of the Jews of Rhodes under the dominion of the knights, by Pierre Baudin, a bookseller of Constantinople.

There are several families of the name of Carmona at Salonica and Constantinople.

**BIBLIOGRAPHY:** Franco, *Hist. des Israélites de l'Empire Ottoman*.

M. Fr.

**CARNABAT, CARNOBAT, or KARNA-BAT:** Town of eastern Rumelia or southern Bulgaria. According to tradition, Jews first established

themselves at Carnabat about 1580; but the oldest tombstones decipherable bear date of 1686. Eliezer of Calo was chief rabbi of Carnabat about 1800; Jacob Finzi, about 1820; and Joseph Hayyim ben Hasson of Salonica, from 1840 to 1876. The last-named was an exceptionally learned rabbi, whose memory is still cherished. He left several Hebrew works in manuscript, which are in the possession of his son Isaac ben Hassan at Boorghas. During the Turco-Russian war, 1876-78, the Circassians ravaged the city, inflicting all manner of outrages upon the Jews.

The community has now no chief rabbi, as was customary under the Ottoman rule, but is governed by an elective synagogal council subject to the approval of the government. It has a synagogue, built in 1882, a communal school of 70 boys (in 1901); Le Progrès, a reading club; "Bikkur-Holim," a society for sick relief; and "Kabarim," a burial society.

The Jews number 400 in a total population of 6,500. Most of them are engaged in the calico and grocery trades. The only large merchant is Hezekiah Presente, dealer in cereals, wool, and hides.

M. Fr.

**CARNIOLA.** See LAIBACH.

**CARNIVAL:** Among the Romans, a period of gaiety during the weeks before Lent, in which the Jews were made to play a contemptuous part. While the carnival had existed from the earliest medieval period, its scope was considerably extended by Pope Paul II. at Rome, who established foot-races in addition to the usual games. The papal officials desired to amuse the populace by holding races for various classes on different days. On Tuesdays Jews raced for a prize of valuable robes ("pallia"). The races were not supposed to degrade the participants, but were merely a part of the program. The Jews ran in red cloaks, which all, save physicians, had to wear. No contestant was to be older than twenty years, and the entire community had to contribute toward the expenses.

The Jews' first race took place in the Via Lata Feb. 9, 1466. The next year the course exceeded a mile and was on another street. By statute the Jews were taxed 1,100 florins in support of the races.

At first the Jews enjoyed these contests. Later, however, they were subjected to all sorts of cruelties by the populace; and in 1547 a Jew died during the progress of a race. This was the last year in which Jews raced in the carnival. The carnival was an institution of most of the cities of Italy; and Jews, wherever settled, participated in the races. In Rome, contests were held later in the Via Navona and on the Monte Testaccio.

The races were not the only amusements in the carnival in which Jews participated. Besides paying tribute from the earliest times, the Fattori, rabbis, etc., of the congregation were compelled to march on foot before the car of the senators along the entire Corso. Finally, on Jan. 28, 1668, Pope Clement IX. ordered that the Jews be no longer made the sport of the populace, but that a yearly tax of 300 scudi be collected instead. The elders

had to pay this tax on the first day of the carnival in each year to the papal authorities, with due declarations of loyalty and submission. The statement that these expressions were followed by kicking the rabbi must be accepted as fiction; the latest sources do not disclose this practise as customary. In 1712 the Jewish deputies were ordered to appear in citizens' clothes, and not in their robes of office.

This annual procession soon drew upon itself the scorn of the populace, and on several occasions the Jewish deputies were badly treated. It was continued, however, up to the accession of Pius IX. (1846).

**CARO, DAVID:** Prussian pedagogue; born about 1782 at Fordon, grand duchy of Posen; died Dec. 25, 1839, at Posen. He belonged to the school of the MEASSEFIM, and devoted his great literary talents to the enlightenment of his brethren, to the reform of Judaism, and to the cultivation of the Hebrew language. Under the pseudonym "Amittai ben Abida Ahizedek" he defended the Hamburg Reform Temple in "Berit Emit" (Covenant of Truth, Dessau ["Constantinople" on title-page], 1820), the first part of which, "Berit Elohim" (Covenant of God), was published by the author himself, and the second part, "Berit ha-Kehunnah" (Covenant of the Priesthood), or "Tekunnat ha-Rabbanim" (Character of the Rabbis), by Judah Löb Mieses of Lemberg. A new edition of the second part, with additions by Mieses, was published at Lemberg in 1879.

Many of Caro's articles, essays, and poems appeared in "Ha-Messef" and in the "Bikkure ha-'Itim." He was a prolific writer, and left a number of manuscripts on literary, lexicographical,

bibliographical, and pedagogical subjects. Among his inedited works are a Hebrew translation of Zunz's "Gottesdienstliche Vorträge der Juden," with notes and additions; a Hebrew translation of the same author's biography of Rashi, with notes; and biographies of celebrated rabbis.

**BIBLIOGRAPHY:** *Ha-Messef*, viii, 33; ix, (4), 14, 63; x, (1), 25, 44; (2) 26, 56, 88; *Bikkure ha-'Itim*, xi, 58, 61, 66, 168, 180, 182, 183, 184; *Allg. S. MAN.

**CARO, EZEKIEL:** German rabbi and historian; born Nov. 26, 1844, at Pinne, near Posen; son of the exegete and homiletic writer Joseph Hayyim Caro, rabbi at Wloclawek. He attended the gymnasium at Bromberg, the Jewish theological seminary and the university at Breslau; subsequently he was graduated as doctor of philosophy at the University of Heidelberg. He was at first preacher of the German-Jewish community of Lodz (Poland), going thence to Mewe (western Prussia); then was successively rabbi at Dirschau, 1870-79; Erfurt, 1879-82; Pilsen (Bohemia), 1881-91; and since 1891 chief rabbi of the community of Lemberg. Caro's works include: "Ausgewählte Gelegenheitsreden" (Danzig, 1874); "Ein Viertel Jahrhundert Städtischer Verwaltung" (Dirschau, 1880); "Geschichte der Juden in Lemberg bis zur Theilung Polens" (Cracow, 1894); also many sermons and scientific essays in Rahmer's "Literaturblatt."

S.

**CARO, GEORG MARTIN:** Lecturer on history at the University of Zurich, Switzerland; born Nov. 28, 1867, at Glogau, Prussia. Caro received his education at the gymnasium of his native place and at different German universities, being finally graduated as Ph.D. from the University of Strasburg, Germany, in 1891. After a prolonged stay in Italy, where he sojourned chiefly in Genoa, he became privat-docent at the University of Zurich in 1896. As a result of his Italian experiences his writings deal principally with the history of northern Italy during the Middle Ages, with special reference to the republic of Genoa. Caro is a contributor to the "Byzantinische Zeitschrift," to the "Mitteilungen des Instituts für Oesterreichische Geschichtsforschung," "Historische Vierteljahrsschrift," etc. His chief works are: "Die Verfassung Genua's zur Zeit des Podestat's" (his Strasburg dissertation), 1891; "Genua und die Mächte am Mittelmeer," Halle, 1895-99; and "Studien zu den Älteren St. Gallen Urkunden," 2 parts, 1901-02.

F. T. II.

**CARO, ISAAC B. JOSEPH:** Spanish Talmudist and Bible commentator; flourished in the second half of the fifteenth century and the first half of the sixteenth. The son of a scholar, and scion of a noble family, he devoted himself to study in his native city of Toledo, being one of the foremost rabbinical authorities of the country when he had to leave it on the expulsion of the Jews from Spain in 1492. Then he went to Portugal, where he remained for six years, and when the Jews were driven from that country too, fled to Constantinople. During

the persecution in Portugal he lost all but one of his sons, "who were beautiful like princes." Finally he found refuge in Turkey, where he probably died at an advanced age after 1518. In this year he published his commentary to the Pentateuch, "Toledot Yizhak" (Constantinople; printed six times in Italy and Poland). In this work Caro endeavors to do justice to the "peshaṭ," the literal interpretation, as well as to the allegorical interpretation, evincing little originality but good taste. He left a collection of responsa that has never been published. His nephew, Joseph b. Ephraim Caro, quotes from it several times (compare Conforte, *s. v.*, and "Abkat Rokel," No. 144), and the latter's son, Judah, intended to publish it, but never carried out his intention. The Bodleian Library contains Caro's novellæ to Ketubot (No. 535, 2, 3, in Neubauer, "Cat. Bodl. Hebr. MSS."), as well as a work entitled "Hasde Dawid," containing philosophic and haggadic homilies (Neubauer, *l. c.* No. 987).

**BIBLIOGRAPHY:** Conforte, *Kore ha-Dorot*, ed. Cassel, p. 31; Grätz, *Gesch. der Juden*, 3d ed., viii. 386; Steinschneider, *Cat. Bodl.* col. 1129.

L. G.

**CARO, JACOB:** German historian; born at Gnesen, province of Posen, Prussia, Feb. 2, 1836; son of Joseph Hayyim Caro. After several years of diligent study at the universities of Berlin and Leipzig, he attracted considerable attention by his work, "Das Interregnum Polens im Jahr 1586, oder die Häuser Zborowski und Zamojski." Gotha, 1861; and was immediately entrusted with the continuation of Röppel's history of Poland in the series of "Geschichten der Europäischen Staaten," edited by Heeren and Ukert, and published at Gotha. Jacob Caro contributed vols. ii.-v. (1863-88) of this monumental work.

Before publishing the results of his research he undertook several extensive journeys through Galicia and the south of Russia, and upon his return to Germany in 1863 was appointed privat-docent at the University of Jena. Shortly afterward, at the invitation of the grand duchess Helena of Russia, he accompanied her on her travels, and was for some time attached to her suite at St. Petersburg. Later he was promoted to the position of assistant professor at the University of Jena; and in 1869 was called by the University of Breslau to fill a special chair of history. Since 1882 he has occupied the position of professor at that institution.

His reputation is based chiefly on his researches in the history of Poland. Among his works, besides those already mentioned, are: "Liber Cancellariæ Stanislai Ciolek: Ein Formelbuch der Polnischen Königskanzlei aus der Zeit der Hussitischen Bewegung," 2 vols., Vienna, 1871-74; "Aus der Kanzlei Kaiser Siegmunds," Vienna, 1879; "Beata und Hulszka: Eine Polnisch-Russische Geschichte aus dem 16. Jahrh.," Breslau, 1880; "Lessing und Swift: Studien über Nathan den Weisen," Jena, 1869; "Das Bündnis zu Canterbury: Eine Episode aus der Geschichte des Konstanzer Konzils," Gotha, 1880; "Ueber eine Reformationschrift des 15. Jahrh.," Danzig, 1882; "Johannes Longinus: Ein Beitrag zur Literaturgeschichte," Jena, 1863; "Catherina H. von Russland," Breslau, 1876.

A. S. C.

**CARO, JOSEPH B. EPHRAIM:** The last great codifier of rabbinical Judaism; born in Spain or Portugal in 1488; died at Safed, Palestine, March 24, 1575. After the expulsion of the Jews from Spain, in 1492, Caro went with his parents to Nicopolis in European Turkey, where he received his first instruction from his father, who was himself an eminent Talmudist. He married, first, Isaac Saba's daughter, and, after her death, the daughter of Hayyim Albalag, both of these men being well-known Talmudists. After the death of his second wife he married the daughter of Zechariah Sechsel (Sachsel?), a learned and wealthy Talmudist. Between 1520 and 1522 Caro settled at Adrianople, where he probably met the enthusiast Solomon Molcho, who stimulated his mystical tendencies. When the latter died at the stake in 1532, Caro also was filled with a longing to be "consumed on the altar as a holy burnt offering," to sanctify the name of God by a martyr's death. Like Molcho, Caro had fantastic dreams and visions, which he believed to be revelations from a higher being. His genius, מנין, he thought, was nothing less than the Mishnah personified, which instructed him because he had devoted himself to its service. These mystical tendencies probably induced Caro to emigrate to Palestine, where he arrived about 1555, having en route spent several years at Salonica (1533) and Constantinople.

At Safed he met Jacob BERAB, who exerted a great influence upon him, Caro becoming an enthusiastic supporter of Berab's plans for the restitution of ordination. After Berab's death Caro tried to carry out these plans, ordaining his pupil Moses Alshech; but he finally gave up his endeavors, convinced that he could not overcome the opposition to ordination (compare his "Kesef Mishneh," on Sanh. iv., where his silence regarding this point is significant). However, his aspiration to be regarded as the highest authority in Judaism was practically realized; for his reputation during the last

**Authority** thirty years of his life was greater than **Recognized**, that of almost any other rabbi since Maimonides. The Italian Azariah dei Rossi, though his views differed widely from Caro's, collected money among the rich Italian Jews for the purpose of having a work of Caro's printed ("Me'or 'Enayim," xxiii., ed. Benjacob, i. 241); and the Pole Moses Isserles compelled the recognition of one of Caro's decisions at Cracow, although he thought Caro was wrong (Isserles, Responsa, No. 48). When some members of the community of Carpentras, in France, believed themselves to have been unjustly treated by the majority in a matter relating to taxes, they appealed to Caro, whose letter was sufficient to restore to them their rights ("Rev. Etudes Juives," xviii. 133-136). In the East, Caro's authority was, if possible, even greater. His name heads the decree of excommunication directed against Daud, Joseph Nasi's agent (Responsa of Elijah b. Hayyim, "Mayim 'Amukkim," No. 56);

and it was Caro who condemned Dei Rossi's "Me'or 'Enayim" to be burned (Azulai, "Mahazik Berakah," p. 133). Caro's death, therefore, caused general mourning; and several funeral orations delivered on that occasion have been preserved (Moses Albelda, "Darash Moshch"; Samuel Katzenellenbogen, "Derashot"), as well as some elegies (anonymous, see "Rev. Etudes Juives," ix. 304, 305; x. 317; Mosecato, in "Ozar Nehmad," iii. 167; and biography of Mosecato by Apfelbaum, p. 56).

Caro published during his lifetime: "Bet Yosef" (House of Joseph), in four parts—(i., ii.) Venice, 1550–1551; (iii., iv.) Sabbionetta, 1553–59; Shulhan 'Aruk, in four parts, Venice, 1565 (according to Steinschneider's Catalogue, col. 1480, the composition of the Shulhan 'Aruk was completed at Biri, Palestine, 1555); "Kesef Mishneh" (Double Money), Venice, 1574–75. After his death there appeared: "Bedeq ha-Bayit" (Repairing of the House), supplements and corrections to "Bet Yosef," Salonica, 1605; "Kelale ha-Talmud" (Methodology of the Talmud), *ib.*, 1598; "Abkat Rokel" (Powder of the Merchant), Responsa, *ib.* 1791; Responsa, *ib.* 1597; "Maggid Mesharim" (Who Preaches Rightly), Lublin, 1646; supplements to the same, Venice, 1654; "Derashot," Salonica, 1799, in the collection "Oz Zaddikim" (The Power of the Righteous). Caro also left a commentary upon the Mishnah, as well as supercommentaries to Rashi's and Nahmanides' commentaries on the Pentateuch, which have, apparently, not been preserved. The Bodleian Library contains some smaller literary fragments by Caro not yet published.

Caro's literary works and the importance of his share in the development of rabbinism are beyond dispute; his works are among the masterpieces of rabbinical literature; and his influence is potent even to this day. But Caro's character has been variously criticized, the difference of opinion being connected with the literary question whether the

book "Maggid Mesharim" is really a

**"Maggid Me-sharim."** work by Caro, or is merely ascribed to him. This book is a kind of diary in which Caro during a period of fifty years noted his discussions with his

heavenly mentor, the personified Mishnah. He had these visions even at Nicopolis (p. 21b; p. 42b, ed. Polno, is dated 1570; in opposition to Grätz, "Gesch. der Juden," ix. 545, who asserts the text to be corrupt but הוהיך meaning there, of course, "father-in-law" and not "son-in-law"). The discussions treat of various subjects. The maggid enjoins Caro to be modest in the extreme, to say his prayers with the utmost devotion, to be gentle and patient always. Especial stress is laid on asceticism; and Caro is often severely rebuked for taking more than one glass of wine, or for eating meat. Whenever Caro did not follow the severe instructions of his maggid, he suddenly heard its warning voice. His mentor also advised him in family affairs (p. 21b), told him what reputation he enjoyed in heaven, and praised or criticized his decisions in religious questions. Caro received new ideas from his maggid in regard to the Cabala only, for the study of which he had hardly any time; such information was in the nature of sundry cabalistic interpretations of the Pentateuch,

that in content, though not in form, remind one of the theories of Caro's pupil, Moses Cordovero. The present form of the "Maggid Mesharim" shows plainly that it was never intended for publication, being merely a collection of stray notes; nor does Caro's son Judah mention the book among his father's works (Introduction to the Responsa). It is known, on the other hand, that during Caro's lifetime the cabalists believed his maggid to be actually existent (compare Vital-Calabrese, "Sefer ha-Gilgulim," pp. 119, 142, Wilna, 1885). The "Maggid Mesharim," furthermore, shows a knowledge of Caro's public and private life that no one could have possessed after his death; and the fact that the maggid promises things to its favorite that were never fulfilled—*e.g.*, a martyr's death—proves that it is not the work of a forger, composed for Caro's glorification. Rapoport's assumption (in Kobak's "Jeschurun," vi. 90; "Iggerot Shir," pp. 207, 208) that the "Maggid Mesharim" was written by Solomon Alkabez and ascribed to Caro is unfounded, as well as Cassel's positive assertion that the book was fabricated after Caro's death ("Josef Karo und das Maggid Mescharim," appended to the sixth annual report of the Lehranstalt für die Wissenschaft des Judenthums in Berlin, 1888). The authenticity of the "Maggid Mesharim" does not, however, justify the assertion that Caro was a cabalist, in the sense of regarding the Cabala as equally authoritative with Talmudism, or so important a factor in religious life.

Although Maimonides and Caro, the two greatest codifiers of rabbinical Judaism, differed so widely from each other, they had this in common, that in their codes they assumed exclusively the standpoint of Talmudism—an attitude eminently characteristic of the spirit of rabbinism. Just as Maimonides' "Yad"—aside from its book "Ha-Madda"—gives no indication that its author ranked Aristotle immediately after the Prophets, so Caro, in his works,

does not betray his leaning toward

**Caro's Character-istics.** mysticism. Of course, he considered the Zohar to be a work of the tanna

Simon b. Yoḥai (compare Solomon Alkabez's answer to Caro about a difficult passage of the Zohar in his "Berit ha-Lewi," ed. Lemberg, 1863, p. 39, to which Brüll draws attention in "Jahrb." ix. 152), and a holy book, that, however, has little or no importance for religious practice, which must be ruled exclusively by the Talmud. Caro's mysticism was not speculative in nature; and he devoted very little time to the Cabala, although his maggid often exhorted him not to neglect the study of it ("Maggid Mesharim," p. 57b). The catastrophe that came upon the Pyrenean Jews made such an impression upon the minds of the best among them that many saw therein the signs of Messianic travail, חבלי משיח (compare Jacob BERAB; and Caro, according to a contemporary (Azkari, "Sefer Haredim," Introduction), took this dark view throughout his life. While men like MOLCHO and David REUBENI were led to commit extravagant and foolish deeds under the influence of this idea, Berab's and Caro's nobility of nature came to the fore. If Caro indulged in mystical visions, and, half dreaming, thought he heard heavenly

voices in his soul, they served always as reminders to him that his life, his actions, and his accomplishments must surpass those of other people (*ib.* "Toledot," p. 9; "Azharot," p. 3b, and *passim*). Caro's mysticism stimulated rather than hindered his activity, urging him on to great works. While Caro's teacher, Berab, had attempted to create a spiritual center for the Jews scattered throughout the world, by reestablishing ordination, Caro tried to carry out the same idea in a different way.

Although Caro is known to later times chiefly as the author of the *Shulhan 'Aruk*, yet his earlier "Bet Yosef" marked him as one of the greatest Talmudists of all times. He began the book in 1522 at Adrianople, finished it in 1542 at Safed, and published it in 1550-59. In form it is a commentary upon Jacob b. Asher's "Arba'ah Turim"; but it is

really much more comprehensive, going back to the Talmud and halakic Midrashim, discussing the pros and cons of the authorities cited by the "Tur," and examining the opinions of the authorities not mentioned by the latter. Thirty-two authorities, beginning with the Talmud and ending with the works of ISSERLEIN, are briefly summed up and critically discussed in "Bet Yosef." No other rabbinical work can compare in wealth of material with it. Though Maimonides, in his "Yad," almost completely covered Talmudic literature (including its archeological portions), which was not done by Jacob b. Asher and his successor, Caro, the latter included in "Bet Yosef" the immense material of post-Talmudic literature; while Maimonides hardly drew even upon the works of the Geonim, confining himself chiefly to the Talmud. Caro evidences not only an astonishing range of reading, covering almost the whole Talmudic-rabbinical literature on its halakic side, but also very remarkable powers of critical investigation. He shows no disposition to accept blindly the opinions of the ancient authorities, notwithstanding his great respect for them. In the introduction to his monumental compilation, Caro clearly states the necessity of and his reasons for undertaking such a work. The expulsion of the Jews from the Pyrenean peninsula and the invention of printing endangered the stability of religious observances on their legal and ritual sides. In Spain and Portugal questions were generally decided by the "customs of the country"; the different districts had their standard authorities to which they appealed in doubtful cases. The most prominent of these were Maimonides, Nahmanides, and Asher b. Jehiel. When the Spanish-Portuguese exiles came to the various communities in the East and West, where usages entirely different from those to which they had been accustomed prevailed, the question naturally arose whether the newcomers, the majority of whom were men of greater learning than the members of the invaded communities, should be ruled by the latter, or vice versa. The increase of printed books, moreover, spread broadcast the products of halakic literature; so that many half-educated persons, finding themselves in possession of legal treatises, felt justified in following any ancient authority at will. Caro undertook his "Bet Yosef" to remedy this evil, quoting and critically

examining in his book the opinions of all the authorities then known.

Caro at first intended to follow his own judgment in cases of differences of opinion between the various authorities, especially where he could support his own view by the Talmud. But he gave up this idea because, as he says, "Who has the courage to rear his head aloft among mountains, the heights of God?" and also because he correctly thought,

#### The Standard Authorities.

Caro took Alfasi, Maimonides, and Asher b. Jehiel as his standards; accepting as authoritative the opinion of two of the three, except in cases where most of the ancient authorities were against them. The standard that Caro set up in the introduction to his work was, as a younger contemporary remarks (Hayyim b. Bezalel, Introduction to "Wikkuah Mayim Hayyim"), in a certain sense, merely a blind; for Caro proceeded with more independence and more self-confidence. He very often decides disputed cases without regard to the age and importance of the authority in question, expressing simply his own views. He follows Maimonides' example, as seen in "Yad," rather than that of Jacob b. Asher, who seldom decides between ancient authorities.

But, as regards the form of his work, Caro unfortunately follows Jacob b. Asher entirely, the "Bet Yosef" in consequence sharing all the methodological faults of its predecessor, the "Tur." Several reasons induced Caro to connect his work with the "Tur," instead of with Maimonides' code. In the first place, the "Tur," although not considered so great an authority as Maimonides' code, was much more widely known; the latter being recognized only among the Spanish Jews, while the former enjoyed a high reputation among the Ashkenazim and Sephardim, as well as the Italians. Secondly, it was not Caro's intention to write a code similar in form to Maimonides' work; he intended to give not merely the results of his investigations, but also the investigations themselves. He wished not only to aid the officiating rabbi in the performance of his duties, but also to trace for the student the development of particular laws from the Talmud through later rabbinical literature. The study of Talmudic literature was not for Caro, as for Maimonides, merely a means toward an end—namely, for religious observances—but an end in itself; he, therefore, did not favor codes that contained only decisions, without giving any reasons for them.

Caro wrote the *Shulhan 'Aruk* in his old age, for the benefit of those who did not possess the education necessary to understand the "Bet Yosef." The arrangement of this work is the same as that adopted by Jacob b. Asher in his "Arba'ah Turim," but more concise; nor are any authorities

#### The Shulhan 'Aruk.

given. This book, which for centuries was, and in part still is, "the code" of rabbinical Judaism for all ritual and legal questions that obtained after the destruction of the Temple, has a remarkable history, hardly paralleled by that of any other prod-

uct of rabbinical literature. The author himself had no very high opinion of the work, remarking that he had written it chiefly for **תלמידי קטנים** ("young students," Shulhan 'Aruk, Introduction). He never refers to it in his responsa, but always to the "Bet Yosef." The Shulhan 'Aruk achieved its reputation and popularity not only against the wishes of the author, but, curiously enough, through the very scholars who attacked it. The history of the Shulhan 'Aruk is, in a way, identical with the history of rabbinical literature in Poland for a period of two centuries. Recognition or denial of Caro's authority lay entirely with the Polish Talmudists. Germany had been forced to give way to Poland as early as the beginning of the sixteenth century; and in the last third of that century the East had become so entirely absorbed in the new cabalistic school of Luria that the study of the Talmud was greatly neglected. Caro was opposed in the East only by his contemporaries, Yom-Tob Zahalon, who designated the Shulhan 'Aruk as a book for **קטנים ועמי הארץ** ("children and ignoramuses"; see his Responsa, No. 67, beginning), and Jacob Castro, whose work "Erek ha-Shulhan" consists of critical glosses to the Shulhan 'Aruk. Isserles and Solomon Luria were Caro's first important adversaries. Although the opposition of these two men was different in kind and due to different motives, it may be regarded in a measure as the protest of the Ashkenazim against the supremacy of the Sephardim. The Ashkenazim—first the German, and then the Polish—were much more scrupulous in matters of ritual than their Spanish-Portuguese brethren; hence they considered that Caro's "Bet Yosef" contained dangerous innovations, as the authorities he followed were chiefly Sephardim, whose opinions did not prevail among the Ashkenazim.

Immediately upon the appearance of Caro's "Bet Yosef," Isserles wrote his "Darke Mosheh," a moderately expressed but very severe criticism of Caro's great work. In place of Caro's three standard authorities, Isserles brings forward the **אהרונים** ("the later authorities"), together with the Franco-German Tosafists as criteria of opinion ("Darke Mosheh" to Yoreh De'ah, 35). The importance of the **מנהג** ("prevailing local custom") is also a point of dispute between Caro and Isserles; while the former

held fast to original authorities and material reasons, the latter considered **Opposition to Caro.** the minhag as an object of great importance, and not to be omitted in a codex. This point, especially, induced Isserles to write his glosses to the Shulhan 'Aruk, that the customs (minhagim) of the Ashkenazim might be recognized, and not be set aside through Caro's reputation. If Abraham b. David's criticism of Maimonides' code be compared with Isserles' criticism of Caro's Shulhan 'Aruk, the question suggests itself why the Shulhan 'Aruk became an authoritative code, in spite of opposition and against the will of its author, while Maimonides' "Yad" found no acceptance among the Franco-German Jews, owing to Abraham b. David's criticism and influence. The answer lies in the fact that the keen and, in part, just criticism by RABAD destroyed confidence in Maimonides' "Yad," while

Isserles was not content only to criticize, but supplemented Caro's work extensively, with the result that the Ashkenazim then accepted the Shulhan 'Aruk, assuming that in its corrected form it was an unquestionable authority.

Solomon Luria's opposition to Caro's code was due to entirely different motives. Luria shared Isserles' great respect for the French scholars, whom he placed above the Sephardic; but he held that "since the completion of the Talmud no opinion that can not be deduced from the Talmudim or the halakic Midrashim can claim to be authoritative"—a view so novel and daring that Luria found few supporters even among his own countrymen, and his "Yam Shel Shelomoh" was not enough to deprive Caro's works of their authority. The Shulhan 'Aruk with Isserles' supplements was so popular, and enjoyed such great authority even so early as the last third of the sixteenth century, that **חַיְיִם ב. בֶּזַלֶּל**'S attacks on it were also without effect. **חַיְיִם**, a Pole by birth and education, attempted in his "Wikkuah Mayim Hayyim," to defend Germany's honor against both Caro and Isserles—against the former's aversion to the German authorities, and the latter's endeavor to set up the Polish minhag as the "minhag Ashkenaz" par excellence. But toward the end of the sixteenth century the Shulhan 'Aruk found a dangerous competitor in Mordecai Jafe's "Lebushim." Jafe, who

**Mordecai Jafe.**

was a pupil of Luria and Isserles, adopted in his code a method midway between the prolix discursiveness of the "Bet Yosef" and the terse oracular form of the Shulhan 'Aruk, both of which the "Lebushim" far surpasses in style, arrangement, and method. This book seemed, on its appearance, likely to displace the Shulhan 'Aruk; but the severe criticism to which it was subjected by Jafe's younger contemporary, Alexander Falk ha-Kohen, in his "Sefer Me'irat 'Enayim," a commentary on the fourth part of the Shulhan 'Aruk, shattered the reputation of the "Lebushim," and again confirmed that of the Shulhan 'Aruk.

Falk heads the list of the commentators of the Shulhan 'Aruk who helped to increase its authority, and made it impossible for rabbinical literature to stagnate. These commentators examined the differences of opinion between Caro, Isserles, and Luria, as well as the validity of the reasons given by these and other auth-

**Commenta-** orities for their opinions. It is, in part, due to the endeavors of Me'ir b. **Shulhan** Gedaliah MaHaRaM of Lublin, Samuel Edels, and Yom-Tob Lipmann

**'Aruk.** Heller that the Shulhan 'Aruk did not displace the study of the Talmud and the ancient sources; they had a very poor opinion of the Shulhan 'Aruk, considering the Talmud as by far the chief study (compare, for example, Responsa of MaHaRaM, Nos. 11, 102).

The last important attack on the Shulhan 'Aruk was made by Joel Särkes in his "Bayit Hladash" (New House), in which he endeavored to restore Jacob b. Asher's code to the reputation it had enjoyed, especially among the Ashkenazim; attempting, in numerous passages of his book, to abolish

the customs introduced in many places under the combined influence of Caro and Isserles (BaI to Yoreh De'ah, 279; Responsa, No. 80 [new series 42]). But Joel succeeded as little as his master, Luria, in his opposition to Caro and Isserles.

The battle raging around the Shulhan 'Aruk lasted for nearly a hundred years, its authority not being firmly established until the middle of the seventeenth century, which date also marks the beginning of the commentaries to it, the period of the so-called AHARONIM. MOSES LIMA B. ISAAC, DAVID B. SAMUEL HA-LEVI, SHABBETHAI B. ME'IR HA-KOHEN, ABRAHAM ABELE GOMBINER, and SAMUEL B. URI PHOEBUS of Władysław, all of the seventeenth century, are the classical commentators of the Shulhan 'Aruk. They differ in their relation to Caro and Isserles, though all the Aharonim fully and unreservedly recognized the authority of both. Moses Lima held that no one was entitled to decide any cases according to the Shulhan 'Aruk "who was not at the same time competent to expunge entire paragraphs from it" (Emden, "She'elat Ya'abez," ii., No. 20, end), while David b. Samuel, although a pupil and son-in-law of Joel Särkes, held that no decision of the Shulhan 'Aruk was under any circumstances a criterion to be literally followed (Yoreh De'ah, 48, 5). Shabbethai b. Me'ir's relation to the Shulhan 'Aruk is a peculiar one. One of the keenest minds among the Rabbis, he was the warmest defender of Caro and Isserles against the attacks of the Aharonim; while he himself unsparingly attacked not only the Shulhan 'Aruk, but also all the post-Talmudic authorities. Although all these men thus preserved a certain independence toward the work, they yet confirmed its authority by making it the basis of their own works and by undertaking to explain it. The above-mentioned Polish Talmudists especially, David b. Samuel and Shabbethai b. Me'ir, placed the authority of the Shulhan 'Aruk beyond dispute, answering in their commentaries attacks upon it, and supplementing the missing portions from the works of others. Menahem Krochmal (second half of the seventeenth century) says: "Since Caro's 'Bet Yosef' and Shulhan 'Aruk, and Isserles' notes on the latter, have appeared and been distributed throughout Israel, we must follow them alone" (Responsa, "Zemah Zedek," No. 9, end). Gershon Ashkenazi, Krochmal's son-in-law, expressed himself similarly ("Abodat ha-Gershoni," No. 48, beginning), and also his contemporary Ephraim b. Aaron ha-Kohen ("Sha'ar Efrayim," No. 113, p. 81a, bottom), who relates that the congregational archives of Buda, where he was rabbi, contained a resolution not to accept any rabbi that did not agree to render his decisions according to the Shulhan 'Aruk (*ib.*; see also Isaiah Horwitz, "Shene Luhot ha-Berit," ed. Amsterdam, p. 74b).

In the eighteenth century the authority of the Shulhan 'Aruk was so firmly established that even men like Hayyim Jair Bacharach (Supplements to his "Ijawot Ya'ar," p. 262) and Jonathan Eybeschütz ("Kizzur Tekofo Kohen"), who possessed great independence and self-confidence, considered it indisputable. Elijah b. Solomon of Wilna, however, did not share this opinion, having no regard for preceding authorities, but decided cases on their

merits. Among the Sephardim, Hezekiah de Silva, born 1650, is perhaps the only one among the Oriental Jews who dared to attack the Shulhan 'Aruk. The Egyptian rabbis, in return, forbade the reading of his "Peri Hadash."

Instrumental as was the Shulhan 'Aruk in shaping rabbinical Judaism, it was necessarily singled out for attack by those who sought to assail the latter. Passages from the book, detached from their context, and often intentionally mutilated and misinterpreted,

**Anti-Semitic Attacks on the Shulhan 'Aruk.**

were used by the adversaries of the Jews as a means of representing the ethics and religion of the Jews as dangerous and despicable. As regards the work itself—the attacks are directed really against the entire post-Biblical literature of the Jews—two works may be mentioned here which clearly and distinctly refute the unfounded criticisms brought against the book; namely, "Der Schulchan Aruch," by D. Hoffmann (Berlin, 1885), and "Die Gesetzsammlung des Judenspiegels . . . von Aron Briman . . . Beleuchtet und Berichtigt," by K. Lippe (Jassy, 1885). Compare, also, GENTILES, ETHICS, RABBINICAL JUDAISM.

The attacks made by modern Jewish historians upon the Shulhan 'Aruk, especially the accusation that it forces rabbinical Judaism into a strait-jacket, can hardly be supported. The code is not the creator of that rigorous, scrupulous attitude inimical to all liberty, but a product of it. The Shulhan 'Aruk, furthermore, has caused anything but stagnation of intellectual activity among the Jews, as is most clearly shown by the rabbinical literature of the period (1550–1700), the products of which, all more or less influenced by Caro, are among the most eminent works of their kind. Compare CODIFICATION, REFORM MOVEMENT.

L. G.

**CARO, JOSEPH HAYYIM B. ISAAC SELIG;** German-Russian rabbi; born 1800; died in Włocławek, government of Warsaw, April 21, 1895. He was educated as an Orthodox Talmudist, and married the daughter of R. Zebi Hirsch Amsterdam of Konin, government of Kalisz in Russian Poland, whose pupil he became. He afterward established himself as a merchant in Gnesen, near Posen, whence, at about the age of forty, he was called to the rabbinate of Pinne, in the province of Posen. Later he became rabbi of Fordon, in the same province, and twenty years after his first call he became rabbi of the progressive and Germanized community

of Wloclawek, where he remained until his death. He was one of the first truly Orthodox rabbis in Russia to acquire a correct knowledge of German and to deliver sermons in that language.

Caro was famous not only for his extensive rabbinical knowledge, but also as a preacher; and even at the present day his works are popular among old-style "maggidim" and "darshanim." His first work, "Minhat Shabbat," is a German translation (in Hebrew characters) of Pirke Abot, with a short commentary in German and a longer one in Hebrew (Krotoschin, 1847). In the third edition of that work (Wilna, 1894) the German commentary is omitted and that of Maimonides substituted for it. His "Teba we-Haken," containing rules of "shehitah" and "bedikah" in the form of a dialogue, was published by his sons Isaac and Jacob (Leipsic, 1859; 2d ed., Wilna, 1894). His chief work, "Kol Omer Kera," is a collection of sermons in four volumes (Warsaw, 1860-80; 2d ed., Wilna, 1895), arranged after the order of the Pentateuch in the weekly sections, which furnished the texts. The last of his published works, "Yoreh u-Malkosh" (Wilna, 1894), is also a collection of sermons, mostly funeral orations, some of which were originally delivered in German. Here and there in his works are to be found poetical compositions and other traces of the influence of modern ideas not common among the rabbis of Russian Poland. His inclination toward the "Haskalah" and its Neo-Hebrew literature is shown by the article which he contributed, at a very advanced age, to the year-book "Ha-Asif" (iv. 132-137, Warsaw, 1887), entitled "Birkat ha-Zedukim." Caro was also a pioneer Zionist and defended the colonization of Palestine against the opponents of that plan. Two of his letters on the subject are printed in "Shibat Zion." He attended to his rabbinical duties until past the age of ninety, and retired from active work only a few years before his death.

One of Caro's sons is a professor at the University of Breslau, and two others are the rabbis, respectively, of Lemberg and Thorn.

**CARPENTRAS:** Chief town of the arrondissement of that name in the department of Vaucluse, France. Jews settled at Carpentras at a very early period. The collection of rabbinical decisions called "Kol Bo" quotes a document (No. 117) attributed to Jacob Tam, grandson of Rashi (twelfth century), in which the rabbis of Carpentras are mentioned together with "the elders and scholars of Troyes and its environs, the great men of Auxerre, the scholars of the regions of the Rhine, the doctors of Paris and their neighbors, the scholars of Lyons, of Lombardy, of the seacoast, of Anjou, of Poitou, and the great men of Lorraine." Expelled in the beginning of the thirteenth century, the Jews returned to Carpentras in 1263. On Feb. 28, 1276, Bishop Pierre III. Rostaing made an agreement with them, signed by sixty-four heads of families, representing two-thirds of the community, by which they acknowledged themselves to be, as their forefathers at Carpentras had been, vassals of the bishop, and they consented to

pay to him and to his successors the following taxes: (1) an annual quit-rent of 18 Tours pounds; (2) a tallage of 25 pounds for six specified cases; (3) sheets for the bishop's guest-beds; (4) all the tongues of the cattle they might kill, or should have killed; (5) an annual tax on their rural and urban possessions, and the thirteenth part of the total seat-rent of the synagogue; (6) ten Tours sous for every foreign or strange Jew coming to live at Carpentras, and desiring to be received as a citizen on the same terms as other Jews; (7) fifteen Tours sous for every Jew wishing to live outside of the chain fixed at the entrance of the "visataria" (post of inspection). In addition, (8) Jews are thenceforward forbidden to assist or support any person, corporation, or association against the bishop, or to have any relations or connection with them; (9) Jews are obliged to render the above-mentioned homage to every new bishop, to swear fidelity to him, and to observe the same agreement with him; (10) the bishop binds himself and his successors to impose no other taxes upon the Jews, to guard their property, and to protect them against injustice and violence; (11) the Jews are permitted to leave the city and to establish themselves elsewhere, but in that case they will cease to be citizens of Carpentras ("Revue Etudes Juives," xii. 43, 44).

The convention of April 12, 1320, between Pope John XXII. and the bishop, consecrated by the bull of "dismemberment," changed the situation created for the Jews by the act of 1276. They ceased to be the bishop's property, his "subscribed" serfs, but they remained to a certain extent his tributary vassals (Bardinet, "Revue Historique," xii. 40). Protected against the Pastoureaux by Pope John XXII. in 1320, they were nevertheless expelled by him from Carpentras in 1322. Their synagogue was demolished, a church dedicated to the Virgin Mary being erected on its site ("Revue Etudes Juives," xii. 48; compare Bardinet, *l.c.* xii. 17).

Pope Clement VI., well disposed toward the Jews, on his accession in 1342, revoked the edict of expulsion of John XXII. Bishop Hugues permitted twelve heads of Jewish families, who in 1343 had returned to Carpentras, to build a new synagogue, and also to have a cemetery near the city, on payment of a yearly contribution of six pounds of spices, three of ginger, and three of pepper ("Revue Etudes Juives," xii. 51; compare Bardinet, *l.c.* xii. 41). This agreement of 1343 was renewed by Bishop John Flandrini in 1367; but Bishop Peter IV. de Rabath revoked it in 1385 and reestablished the annual tax of eighteen pounds that dated back to 1276. Pope Benedict XIII. claimed in 1403 all the taxes which the Jews had formerly paid to the episcopal household, especially the furnishing of the sheets for the bishop's guest-beds. By an agreement of May 2, 1405, the Jews could free themselves of this prestation by paying to the bishop annually the sum of twenty florins in gold ("Revue Etudes Juives," xii. 55; compare Bardinet, *l.c.* xii. 43). Other agreements were made, now and later on, between the Jews and the bishopric in regard to the tax on seat-rents of the synagogue, the selling of kosher wine, the presence of the rector's sergeant at

circumcisions, marriages, and interments, and the policing of the ghetto, etc. ("Revue Etudes Juives," xii. 56 *et seq.*).

Clement VII., who had confirmed the privileges of the Jews in 1524, revoked them in 1539. In a bull of June 13, 1525, he ordered the men

**Sixteenth Century.** to wear the yellow hat, and the women some other distinctive mark. Paul IV. in 1555, Pius V. in 1566, and Clement

VIII. in 1592 renewed the decrees of their predecessors ("Revue

Etudes Juives," vi. 90). Notwithstanding these bulls, the Jews obtained permission to wear no other signs than those they were accustomed to (*ib.* xxxii. 70). On the accession of Paul III. the Jews of Carpentras sent two procurators to Rome, Joseph de Lattès and Viles Avigdor of Cavailon, in order to obtain from the pope a new examination into their rights. This request was entirely successful (*ib.* 74). By his bull of Feb. 26, 1569, Pius VII. expelled the Jews from the Italian and French territory. An order of the legate, dated Avignon (Aug. 3, 1570), commanded them to leave the country by Oct.

15 following. The rector, however, permitted a small number of them to remain at Carpentras; and these, a few years later, had again grown into an important community (*ib.* xii. 165). The bull of Clement VIII. (Feb. 28, 1593), by which the Jews were driven from the pontifical states, except Rome, Ancona, and Avignon, was not enforced at Carpentras. Those provinces which in the course of the seventeenth century had repeatedly demanded the expulsion of the Jews succeeded no better.

The Jews willingly paid the episcopal taxes, etc., imposed upon them by the agreement of 1276. Twice, however, they resisted, in 1513 and in 1781;

but each time they were compelled to render homage to the bishop, and to pay all that they owed him (*ib.* xii. 63). The Revolution and the annexation of the county of Venaissin by France freed them from this yoke of the Middle Ages.

The synagogue, built in 1741 upon the same spot as the one of 1367, was repaired in 1784, and again in 1899. It has several distinctive features not found outside of the county, unless in Italy (see detailed description by I. Loeb, "Revue Etudes Juives,"

xii. 227, 235). The cemetery, probably the same as the one granted to the Jews in 1343 by Bishop Hugues, is situated in the northeastern part of the city, in the quarter called "La Fontrouse." Neubauer has described in the "Archives des Missions Scientifiques" (3d series, vol. i.) some tombstones from the old cemetery, now in the museum of Carpentras. For the construction and support of their synagogue and cemetery, the expenses of their ritual, and the heavy taxes arbitrarily imposed upon them from time to time, the community contracted a debt which, at the beginning of this century, amounted to 286,831.22

NORTH GATE OF THE JEWRY AT CARPENTRAS.  
(From the "Revue des Etudes Juives.")

francs. This was fully paid between June 26, 1822, and Sept. 6, 1825.

Carpentras constituted formerly, together with Avignon, Lisle, and Cavailon, the four communities, "Arba' Kehillot," that were the only ones tolerated in the French pontifical territory. They had a special liturgy: (1) the seder of "Yamim Nora'im"

(Ritual for the New Year and Day of Liturgy. Atonement; Amsterdam, 1739); (2) the seder of the three "Regalim"

(Festivals; Amsterdam, 1759); (3) the seder of the four fasts (Amsterdam, 1762); (4) the "Seder ha-Tamid" (Daily Ritual; Avignon, 1767); (5) the

"Seder ha-Konteris" (Ritual Opusculum; Avignon, 1767). The Hebrew Provence poems inserted in the "Seder ha-Tamid" and in the "Seder ha-Konteris" have been translated and published by E. Sabatier (Nîmes, 1876) under the title of "Chansons Hébraïco-Provençales des Juifs Comtadins," and also by Dom Pedro d'Alcantara, emperor of Brazil (Avignon, 1891), under that of "Poésies Hébraïco-Provençales du Rituel Israélite Comtadin."

The community of Carpentras, which, in 1789, had 1,000 Jews, counts to-day only thirty to thirty-five families in a total population of 10,628. It belongs to the "Circonscription Consistoriale" of Marseilles; and possesses, in addition to the synagogue, a maz-zot factory.

The following noted scholars dwelt in Carpentras: Hanan ben Nathan Ezohi (thirteenth century) and his two sons, the poets Eleazar and Joseph, the first of whom settled later on at Béziers, the second in Perpignan; ABRAHAM MALAKI; Mordecai ben Yossif, Abraham the Elder, Abraham ben Isaac, and Hayyim de Carcassonne (thirteenth century); Mordecai ben Isaac, a correspondent of Abba Mari of Lunel (in 1303-06); Moses ben Judah Rouget, Ishmael ben Todros of Noves, and Asher ben Moses of Valabrègue (members of the rabbinical college in 1582); Hayyim Crescas, Moses ben Joseph Kolon, Zemañ ben Moses Caslari, Isaac Leon, Jacob Vidal (1580-89); Rabbi Jesse, R. Saul, and R. Solomon Lion (1629); Solomon Ezobi (1620-23), a learned Talmudist and distinguished astronomer, who was in correspondence with the celebrated Peirese of Aix, and the Hebraist John Plantavit de la Pause, bishop of Lodève ("Revue Etudes Juives," xi. 101, 292; compare Gross, "Gallia Judaica,"

**Scholars and Physicians.** p. 611); David ben Joseph Carmi (1621-22); Elijah Carmi, editor of "Seder ha-Tamid," and a liturgical poet bearing the same name (1682);

Mordecai Astruc, author of a thanksgiving prayer, inserted in the "Seder ha-Tamid" and recited at Carpentras on the Ninth of Nisan; Saul ben Joseph de Monteux, son of the liturgical poet Joseph ben Abraham Monteux, who composed a "piyyut" upon the deliverance of the Jews at the time of the riot at Carpentras in 1682; Mordecai ben Jacob, author of an elegy upon the martyrdom of the Has-monean priest Eleazar (Zunz, "Z. G." p. 473); Judah Aryeh Loeb ben Zebi Hirsch of Krotoschin (eighteenth century), author of a concordance, a dictionary of Hebrew proper names, and two works on the Pentateuch; Moses Sinai (1742), Joseph de Lattés (1746-58), Jacob Hayyim Vidas, Isaac Samuel Crémieux, Judah David Crémieux, Joseph Milhaud, Israel Crémieux, Jacob Lunel, Menahem Lion, and Abraham Roguemartine (1731-62).

Also the following physicians: Bondavit Boninas of Marseilles (1343), Maître Mayé or Magister Magius Macipi, Boniac, and Thoros (1357), Isaac Tauroei or Thoros (1367), Cresques Bondavid, Hayyim, and Solomon (1400-01), Samuel Bonajudo (1532), Isaac Thoros, Vides Avigdor of Cavailon, and Isaac de Lattés (1540-64), Sauves or Saulves (1570), Joseph ben Isaac ha-Levi (1571), Moses ben Judah (1583), and Moses of Cavailon.

**CARPENTRASI, JUDAH B. ZEBI.** See JUDAH B. ZEBI HIRSCH OF CARPENTRAS.

**CARPI, LEONE:** Italian political economist; born 1820 at Bologna, Italy. He was the first deputy elected to the Italian Parliament by the city of Ferrara. Carpi, on the expiration of his term, divided his time between Bologna and Rome, where he was a contributor to "Popolo Romano." He has thrown much light on the social and moral conditions of new united Italy by the authentic information that he has collected in all departments of the government. Among his works may be mentioned: "Dell' Emigrazione Italiana all' Estero, nei Suoi Rapporti coll' Agricoltura, coll' Industria, e col Commercio," Florence, 1871; "Delle Colonie e dell' Emigrazione degl' Italiani all' Estero nei Loro Rapporti coll' Agricoltura, Industria, e Commercio," 4 Milan, 1874; "Statistica Illustrata dell' Emigrazione," Rome, 1878; "L' Italia Vivente, Studi Sociali," Milan, 1878; "Il Risorgimento Italiano: Biografie Storico-Politiche d' Illustri Italiani Contemporanei," Milan, 1884; "L' Italia all' Estero," Rome, 1887. The only work written by him relating directly to Jewish interests was his "Alcune Parole Sugli Israeliti in Occasione di un Decreto Pontificio d' Interdizione," Florence, 1847.

**BIBLIOGRAPHY:** De Gubernatis, *Dizionario Biografico degli Scrittori Contemporanei*, Florence, 1879. S. I. E.

**CARPI, SOLOMON JOSEPH B. NATHAN:** Italian writer; born Dec. 27, 1715; lived at Leghorn. He engaged in the controversy with regard to Hay-yon's book on Shabbethai Zebi, writing an attack on it, extracts from which were published by N. Brüll under the title "Toledot Shabbethai Zebi," Wilna, 1879. He also wrote a Hebrew elegy on the death of Emmanuel Ricchi, and corresponded with Joseph Ergas.

**BIBLIOGRAPHY:** Moriara, *Indice*; Brüll's Preface to *Toledot Shabbethai Zebi*. E. C. J.

**CARPI, ZACHARIAH:** Italian revolutionist; born at Revere in the second half of the eighteenth century. After the French Revolution he appears to have engaged in plots against the Austrian government of Lombardy; and on March 25, 1799, he and his son, Mordecai Moses Carpi, were imprisoned at Mantua. When Napoleon reached that city in 1800, Carpi was sent to Venice, thence to Sabonico in Dalmatia, and through Carinthia and Croatia to Peterwardein in Hungary, where he was at last released by Napoleon's orders (April 3, 1801). He wrote a narrative of his imprisonment under the title "Toledot Yizhak," which was edited by G. Jaré, and published at Cracow in 1892. Besides this, he wrote an account of his early life, under the title "Megillat Yizhak," and a book for children entitled "Dibre Yizhak." The last two works are no longer extant.

**BIBLIOGRAPHY:** G. Jaré, in Preface to *Toledot Yizhak*. E. C. J.

**CARPZOV, JOHANN BENEDICT II.:** German Christian theologian and Hebraist; born 1639; died 1699. He was a member of a family which, like the Buxtorfs, produced a long line of distinguished scholars. He studied Hebrew under Johannes Buxtorf II. in Basel, was appointed professor of Oriental languages at Leipzig in 1668, and was pastor of St. Thomas' 1679-99, and professor of theology 1684-99. He edited in 1674 Schikhard's "Jus Regium Hebræorum," and, later, Tamov's "Kleine Propheten," Lightfoot's "Hore Heb. et Talmudicæ," Lanekisch's "Concordantiæ Bibl. German.-Hebr.-Græcæ," and in 1687 the "Pugio Fidei" of Raymondus Martini. To the last-named work he prefixed his own "Introductio in Theologiam Judaicam." Some dissertations by Carpzov were published (1699) by his brother Samuel Benedict; and in 1703 appeared his "Collegium Rabbinico-Biblicum in Libellum Ruth." Carpzov's writings, useful when first published, have now no great value.

**BIBLIOGRAPHY:** Ersch and Gruber, *Encyc. s.v.*; Herzog-Hauck, *Real-Encyc. s.v.*

T.

**CARPZOV, JOHANN GOTTLÖB:** German Christian Old Testament scholar; born Sept. 26, 1679, in Dresden; died April 27, 1767, at Lübeck; nephew of Johann Benedict II., and son of Samuel Benedict; most famous and most important Biblical scholar of the Carpzov family. He was titular professor of Oriental languages at Leipzig 1719-30, and preacher and theologian till his death; like his uncle, he was an opponent of the pietists. His critical works are: "Introductio in Libros Vet. Test." 1721, 4th ed. 1757; "Critica Sacra" (I. Original text, II. Versions, III. Reply to Whiston), 1728; "Apparatus Historico-Criticus Antiquitatum et Codicis Sacri et Gentis Hebrææ," 1748. The "Apparatus" is in the form of annotations to Goodwin's "Moses and Aaron," and appended to it are dissertations on "The Synagogue Treated with Honor" (a statement of what the Christian Church has retained of ancient Jewish customs), on "The Charity System of the Ancient Jews" (discussion of the question whether צדקה in O. T. ever means "alms"), and others.

Carpzov represents both an advance and a retrogression in Biblical science—an advance in fulness of material and clearness of arrangement (his "Introductio" is the first work that deserves the name), and a retrogression in critical analysis, for he held fast to the literal inspiration of the Hebrew text of the Old Testament and bitterly opposed the freer positions of Simon, Spinoza, and Clericus. His antiquarian writings are still interesting and useful.

**BIBLIOGRAPHY:** Ersch and Gruber, *Encyklopädie*.

T.

**CARRASCO or CARASCON, JUAN:** Apologist; born at Madrid about 1670, of Marano parentage. At first an Augustin friar at Burgos and an excellent preacher, he later, on a journey to Rome, became a convert to Judaism at Leghorn. He was familiar with the writings of Moses b. Nahman, Isaac Abravanel, and others, and while in Holland (probably at Amsterdam, where he was circumcised) he wrote in Spanish his "Apology of Judaism." This work was published at Nodriz (The

Hague) in 1633, and was later incorporated in the "Coleccion de Reformadores Españoles," published by Wiffen, who believed Carrasco to have been a Protestant.

M. K.

**CARREGAL, HAYYIM MOSES BEN ABRAHAM:** Rabbi and editor; flourished in Palestine at the beginning of the eighteenth century, but lived in Holland for a time, engaged in gathering funds for Jerusalem. His autobiography is to be found in the introduction to his edition of Moses ben Joseph Ventura's *ימין נשמה*, Amsterdam, 1718. He was probably a son of Abraham Carregal of Cairo (c. 1650), and was perhaps the father of Raphael Hayyim Isaac Carregal of Hebron, Palestine (1733-77), who visited Newport, R. I., in 1773.

**BIBLIOGRAPHY:** Fürst, *Bibl. Jud.* ii. 171; Zedner, *Cat. Hebr. Books Brit. Mus.* pp. 167, 338; Roest, *Cat. Rosenthal. Bibl.* pp. 255, 577; G. A. Kohut, in *Publications of Am. Jew. Hist. Soc.* No. 3, p. 123; *idem*, in *Ezra Stiles and the Jews*, p. 91, New York, 1902.

G. A. K.

**CARREGAL (Caregal, Carigal, Carrigal, Karigal, Karigel, Karigol, Kargol, Kragol), RAPHAEL HAYYIM ISAAC:** Itinerant rabbi and preacher; born in Hebron, Palestine, Oct. 15, 1733; died at Barbados, West Indies, May 5, 1777. He was

Raphael Hayyim Isaac Carregal.  
(From a portrait in the possession of Rev. J. L. Jenkins.)

ordained rabbi at the age of seventeen, and in 1754 set out on a series of voyages, usually remaining a brief time in the places he visited; e.g., two years in Constantinople (1754-56); two years in Curaçoa, West Indies (1761-63); four years in Hebron (1764-1768); two and one-half years in London (1768-71);

one year in Jamaica, West Indies (1771-72); and one year in the British colonies of North America (1772-1773). In 1773 (July 21) he sailed for Surinam, and in 1775 he was at Barbados. In London, according to his own statement, he was teacher at the Bet ha-Midrash, earning a salary of £100 sterling (\$500) per annum. At Curaçao he appears to have held the office of rabbi, though no record of his incumbency is to be found in local annals. He spent some time in New York and Philadelphia, and sojourned in Newport, R. I. (March-July, 1773), as the guest of the community. Though nowise connected with the congregation, he often officiated at divine service.

While in Newport Carregal became an intimate friend of EZRA STILES, afterward president of Yale College, New Haven, Conn. They studied together, discussing the exegesis and interpretation of Messianic passages in the Bible, and corresponded, mostly in Hebrew. The letters still exist among the unpublished Stiles papers in the library of Yale University. Stiles, in his diary, recently published, speaks lovingly and admiringly of his Jewish friend; gives a long account of his dress, manner, and personality; and, in a series of entries occupying many pages of his day-book, draws up a complete memoir of his career in Newport.

Carregal appears to have written only two brochures (both sermons), published in Newport in 1773.

Soc.*, No. 3, pp. 122-125; No. 6, p. 79; No. 8, pp. 119-126; *The Literary Diary of Ezra Stiles*, edited by F. B. Dexter, I. 354, 357-358, 362-363, 376-377, 384-386 *et passim*, New York, 1901; G. A. Kohut, *Ezra Stiles and the Jews*, Index, s.v., pp. 143-146 (where all the passages are quoted), New York, 1902.

G. A. K.

**CARRETUS, LUDOVICUS:** Convert to Christianity; lived at Florence in the middle of the sixteenth century. He was a native of France and was originally called "Todros Cohen." As the physician of a Spanish duke, he was with the imperial troops who besieged Florence in 1530. Later, at the age of fifty, he embraced Christianity at Genoa. Carretus is the author of "Mar'ot Elohim; Liber Visorum Divinorum," in which he relates the history of his conversion and quotes passages from the Bible and cabalistic writings in favor of Christianity. The work, published at Paris in 1553, was translated into Latin by Angelo Canini (Florence, 1554) under the title "Epistola Ludovici Carreti ad Judæos, Quæ Inscrībatur Liber Visorum Divinorum," etc. Another Latin translation of it was made by Hermann Gernberg, and is inserted in Johannes Buxtorf's "Synagoga Judaica."

**CARRIAGE.** See CHARIOT.

**CARRIERA.** See GHETTO.

**CARRION DE LOS CONDES:** Ancient city of Castile uninhabited by Jews at an early date. Although superior to the Christians both in numbers and in property, they submitted in 1126 to the victorious king Alphonso VI., who showed himself

favorably disposed toward them. In 1160 many of them settled in the neighboring city of Palencia. The Jewish community of Carrion was so large in 1290 that it paid 92,000 maravedis in taxes, not much less than the amount paid by the community of Burgos. In Carrion, as elsewhere, the Jews were persecuted. Delegates from the city appeared before King Alphonso of Castile (probably Alphonso the Wise), informing him that the Christians of the city, because of a groundless suspicion, had risen against the Jews and killed two of them; that thereupon the Jews had sought refuge in the palace of the prince, who was absent at the time, and, when the Christians followed in pursuit, had escaped through a secret door leading into the court, and locked their pursuers in. The king ordered a strict investigation of the matter, hanged ten of the ring-leaders, and imprisoned all others who had taken part in the disturbance. At the time of the great persecution in 1391, most of the Jews of Carrion were baptized.

Carrion is the birthplace of the first Spanish-Jewish poet, Don Santob, commonly called Don SANTOB DE CARRION.

**CARRION, SANTOB DE.** See SANTOB DE CARRION.

**CARSONO, CORSONO, or CARSI, JACOB** (or Jacob ben Abraham Isaac): Spanish astronomer of the fourteenth century. He was commissioned by King Pedro IV. of Aragon to translate from Catalanian into Hebrew the astronomical tables known as "The Tables of Don Pedro," which, at Don Pedro's command, had been begun by Maestre Piero Gilebert, and finished by Gilebert's pupil, Dalmacio de Planis. About 1376 Carsono wrote at Seville a treatise in Arabic on the astrolabe. This he himself translated into Hebrew at Barcelona in 1378. Hayyim ibn Musa ascribes cabalistic miracles to Carsono.

**BIBLIOGRAPHY:** Steinschneider, *Hebr. Uebers.*, pp. 596, 639; idem, *Notice sur les Tables Astronomiques Attribues à Pierre III. d'Aragon*, Rome, 1881.

G. M. K.

**CART:** A translation of עגלה ('agalah). The cart was generally drawn by two oxen, or sometimes by cows, harnessed with cords (Isa. v. 18). It was used to convey the sacred utensils of the tabernacle (Num. vii. 3-8). The Philistines returned the Ark of the Covenant to the Israelites on a cart drawn by two kine (I Sam. vi. 7-11). Carts were also, but not usually, used to convey persons from place to place (Gen. xlvi. 5). Owing to the bad state in which many of the roads were kept, together with the fact that no springs were used in the construction of carts, they traveled very unsteadily and at times threatened to upset; hence Amos ii. 13. Compare CHARIOT.

E. G. H.

G. B. L.

**CARTAGENA** (קרטיני): Ancient city on the eastern coast of the Spanish province of Murcia, referred to in the Talmud. The Cartagena mentioned in Yer. Sheb. vi., beginning, identified in this passage with Spain, is certainly identical with the

Spanish Cartagena. Jews settled here at an early date. At the fourth Council of Cartagena (436) it was decreed: "Ut episcopus nullum prohibeat ingredi ecclesiam et audire verbum Dei, sive gentilem sive . . . Judaum usque ad missam catechumenorum." Many of the Jews expelled from Spain took ship at Cartagena, as well as at Cadiz; and many Maranos also settled in the former city, where they fell into the hands of the Inquisition.

J.

M. K.

**CARTHAGE:** Ancient city and republic in northern Africa; of special interest to Jews on account of the Phenico-Semitic origin of its inhabitants, its government under the suffetes, recalling the "shofetim" (judges) among the Hebrews, and on account of the religion of the inhabitants. The city, called קרת הרתת ("New City") in native inscriptions (Lidzbarski, "Nordsemiteische Epigraphik," i. 365), is mentioned in Jewish writings since Talmudic times only as קרתניני ("Karthagini"), a name equivalent to the Byzantine form Καρθαγεννη and in agreement with the Syriac (Payne Smith, "Thes. Syr." cols. 3744, 3765), the Greek form Καρχηδών being found with the latter. Notwithstanding the peculiar form, perhaps chosen with reference to the founder Dido (קרתת + קרתת, "Woman-City"), the Hebrew word certainly designates Carthage in Africa, not Cartagena in Spain. Later Jewish chronicles, which make the founding of Carthage contemporaneous with David, use the variants "Kartagena" (Yuliasin, ed. London, 236b), "Kartigini" (with ט instead of ת, as sometimes even in the Talmud; David Gans to the year 3882), "Kartini," and "Kartigni" ("Seder ha-Dorot," s. v. "David"), sometimes adding the curious remark that the Talmud refers to two cities of Carthage, which is, however, an erroneous conclusion.

Josephus Flavius writes Καρχηδών like the Greeks. He says it is recorded in the public documents of Tyre that King Solomon built the Temple at Jerusalem 143 years and eight months before the Tyrians founded Carthage

**Josephus.** ("Contra Ap." i. § 17). Josephus intends to prove by this statement the antiquity of the Jewish people, drawing the same conclusions from Menander's account of the reign of Hiram, according to which Hiram came to the throne 155 years and eight months before the founding of Carthage, and the Temple was built in the twelfth year of his reign (*ib.* i. § 18). Through this computation Josephus refutes the grammarian Apion, who placed the exodus from Egypt at the time that the Phenicians founded Carthage (*ib.* ii. § 2). The Maccabean Judah formed a treaty with the Romans for the reason, among others, that he had heard that the Romans had vanquished the Carthaginians ("Ant." xii. 10, § 6; compare "B. J." ii. 16, § 4; vi. 6, § 2). Josephus does not say that any Jews lived at Carthage.

Although Carthage is not mentioned in the Bible, modern scholars are inclined to identify the Biblical Tarsus with Carthage, since it is thus translated in the Septuagint, the Targum, and the Vulgate. Ezek. xxvii. 12. A unique statement in the Talmud, based probably on the legend of the emigration of the Gergashites, identifies Kenizzi (Gen. xv.

19) with Carthage (Yer. Sheb. 36b; Yer. Kid. 61d; Gen. R. xlv. 23). But a wide-spread rabbinical legend identifies the land of the Amazons with Carthage (Lev. R. xxvii. 1), or with Africa (Tamid 32b), in both instances agreeing with classical tradition. Carthage was considered one of the four largest cities of the Roman empire (Sifre, Num. 131; p. 47b, ed. Friedmann). An amora of the third century has the following curious sentence: "From Tyrus to Carthage Israel and his 'Father in heaven' are known; from Tyrus to the west and from Carthage to the east Israel and his God are not known" (Men. 110a); which is probably meant to indicate the extent of the Semitic race.

The fact that the Talmud mentions the Carthaginian teachers of the Law, R. Abba, R. Isaac, and R. Hana, proves that Jews were living in that city, although Frankel, without reason, takes it to mean an Armenian city ("Mebo," pp. 6b, 66a), and Kohut a Spanish city ("Aruch Completum," vii. 220). It is evident from the introduction to the work "Adversum Judeos," ascribed to Tertullian, that Jews were living in Carthage; and they are found still further west (Schürer, "Gesch." 3d ed., iii. 26, note 64). Münter ("Primordia Eccl. Afric." p. 165, Copenhagen, 1829) mentions a certain R. Jisschak (the one in the Talmud?). The Jews of Africa (see AFRICA) are often referred to in the correspondence between Jerome and Augustine; and in recent times there has been found in Gamart, near the city of Carthage, a great Jewish necropolis with many inscriptions in Latin (see CATACOMBS). From the conquest of Carthage by the Vandals (439) to the subjection of the latter by the Byzantines (533), the holy vessels from the Temple of Jerusalem, that had been taken from Rome, were kept in Carthage (Evagrius, "Scholasticus," Fragment iv. p. 17; Procopius, "Bellum Vand." ii. § 9). The Jews then passed under the rule of Justinian, who instructed Solomon, the governor of Africa, to transform the synagogues as well as the churches of the Arians and the Donatists into orthodox churches (Novellæ, No. 37). Solomon, however, was soon compelled to flee from the rebellious Africans.

In 692 the city was wrested from the Christians by H Hasan, a general of the calif 'Abd al-Malik, and in 698 the Greeks were permanently driven from Carthage and Africa by the Arabs. Musa (Weil, "Gesch. der Chalifen," i. 478). Previous to this the Arabs had founded the city Kairwan, which became as important to the Jews as Carthage had been. Following Arabic writers, Parhi defined the situation of Carthage as 36° latitude by 35° longitude ("Kaftor wa-Ferah," ed. Edelmann, 26b).

**Under the Arabs.** Musa (Weil, "Gesch. der Chalifen," i. 478). Previous to this the Arabs had founded the city Kairwan, which became as important to the Jews as Carthage had been. Following Arabic writers, Parhi defined the situation of Carthage as 36° latitude by 35° longitude ("Kaftor wa-Ferah," ed. Edelmann, 26b).

**CARTHAGENA.** See SOUTH AMERICA.

**CARTHAGENA, DON ALFONSO DE:** Convert to Christianity; son of Paul of Burgos; died

at Burgos in 1456. He was baptized when quite young by his father, and became archdeacon of Compostella. Being equally distinguished as statesman and as priest, he succeeded his father in the bishopric of Burgos. In 1431 he was the representative of Castile at the Council of Basel. Pope Pius II., in his memoirs, called him "an ornament to the prelacy." Pope Eugenius IV., learning that the bishop of Burgos was about to visit Rome, declared in full conclave that "in the presence of such a man he felt ashamed to be seated in St. Peter's chair."

Grätz ascribes to the influence exercised by Carthage over Eugenius IV. the latter's sudden change of attitude toward the Jews. Carthage alone, says Grätz, could have been the author of the complaints against the pride and arrogance of the Castilian Jews, which induced the pope to issue the bull of 1442, withdrawing the privileges granted to them by former popes. Among Carthage's writings on history, morals, and other subjects, there is a commentary on the twenty-sixth Psalm.

**CARTOGRAPHY.** See **CHARTOGRAPHY.**

**CARVAJAL, ANTONIO FERNANDEZ:**

Portuguese merchant, and first denaturalized English Jew; born about 1590, probably at Fundão, Portugal; died in London Nov. 10, 1659. He appears to have left Fundão on account of the persecution of the Inquisition, and, proceeding to the Canary Islands, acquired much property there, and made many commercial connections which led him (about 1635) to London, where he settled in Leadenhall street. In 1649 the council of state appointed him one among the five persons who received the army contract for corn. In 1653 Carvajal was reported as owning a number of ships trading to the East and West Indies, to Brazil, and to the Levant. He dealt in all kinds of merchandise, including gunpowder, wine, hides, pictures, cochineal, and especially corn and silver, and is reported to have brought to England, on the average, £100,000 worth of silver per annum.

In the early days of his residence in England, Carvajal used to attend mass at the Spanish ambassador's chapel, and in 1645 was informed against for not attending church; but the House of Lords, on the petition of several leading London merchants, quashed the proceedings. In 1650, when war broke out with Portugal, Carvajal's ships were especially exempted from seizure, though he was nominally a Portuguese subject. In 1655 he and his two sons were granted denizenship as English subjects (the patent being dated Aug. 17 of that year); and when the war with Spain broke out in the following year, his property in the Canaries was liable to seizure, as he was a British subject. Cromwell made arrangements by which Carvajal's goods were transported from the Canaries in an English ship which passed under Dutch colors.

When Manasseh ben Israel came to England in 1655 to petition Parliament for the return of the Jews to England, Carvajal, though his own position

was secured, associated himself with the petition; and he was one of the three persons in whose names the first Jewish burial-ground was acquired after the ROBLES case had forced the Jews in England to acknowledge their creed. Carvajal, besides advancing money to Parliament on cochineal, had been of service to Cromwell in obtaining information as to the Royalists' doings in Holland (1656). One of his servants, Somers, alias Butler, and also a relative, Alonzo di Fonseca Meza, acted as intelligencers for Cromwell in Holland, and reported about Royalist levies, finances, and spies, and the relations between Charles II. and Spain. It was to Carvajal that Cromwell gave the assurance of the right of Jews to remain in England. Under date of Feb. 4, 1657, Burton, in his diary, states: "The Jews, those able and general intelligencers whose intercourse with the Continent Cromwell had before turned to profitable account, he now conciliated by a seasonable benefaction to their principal agent [Carvajal] resident in England." In 1648 a cargo of logwood belonging to Carvajal was seized by the customs officers. He assembled his servants and friends, broke open the government warehouses, and carried off his merchandise. The litigation to which this gave rise was only interrupted by Carvajal's death.

**CARVALHO (CARVALLO), MORDECAI**

**BARUCH:** A wealthy Tunisian merchant; died Jan., 1785, at an advanced age. He devoted part of his time to rabbinical studies, and in 1752 succeeded his teacher, Isaac Lumbroso, whose best pupil he was, as rabbi of the Leghorn congregation of Tunis. Throughout the country he enjoyed a high reputation as a rabbinical authority. His publications are: "To'afot Re'em" (The Strength of a Unicorn), commentary on the work of Elijah Mizrahi (Leghorn, 1761); and "Mira Dakya" (Pure Myrrh), commentary and miscellanies on various tracts of the Babylonian Talmud, and on Maimonides' *Yad ha-Hazakah* (Leghorn, 1792). He also published the uncompleted work of his son, **Isaac Carvalho**, who died January, 1759, at the age of twenty-eight. This work, entitled "Sefer ha-Zikronot ve-Hayye Yizhak" (Book of Records, and the Life of Isaac), and published together with the elder Carvalho's "To'afot Re'em," contains a commentary on the works of Mizrahi, miscellanies on various tracts of the Talmud, and four funeral orations.

**BIBLIOGRAPHY:** D. Cazès, *Notes Bibliographiques sur la Littérature Juive-Tunisienne*, etc., pp. 77 et seq., 83 et seq.

D.

M. K.

**CARVALLO, JULES:** French engineer; born at Talence, Gironde, France, in 1820. After having graduated with the highest honors at the Ecole Polytechnique and Ecole des Ponts et Chaussées, he was attached as engineer to the Southern Railroad; and under his direction the lines from Tech to Rivesaltes and from Tet to Perpignan were built, including the remarkable viaduct of Bouzanne.

Afterward Carvallo became director of the work of canalizing the Ebro (Spain); and he established in the delta of that river a system of irrigation which permitted the cultivation of enormous tracts of land hitherto unproductive. From Spain Carvallo went to Italy, where he directed the works of the Roman railroads. On his return to Spain he was entrusted with the building of the line from Pampeluna to Saragossa, and later became the chief engineer of a Spanish water company.

Carvallo was the author of many dissertations printed in the "Comptes-Rendus de l'Académie des Sciences" and in many other scientific publications. Among his numerous contributions the most noteworthy were those on the piling up and solidification of embankments; on the formula of the maximum of stability and minimum of expense in public works; on the laws of oscillation of chain bridges, etc.

Amid his numerous works, Carvallo found time to devote himself to Jewish interests. He was one of the founders of the Alliance Israélite Universelle, and for many years served on the executive committee of that institution.

**BIBLIOGRAPHY:** Larousse, *Grand Dictionnaire Universel*, xvi., Supplement, p. 470.  
s. I. BR.

**CASABLANCA** (Spanish), or **BET AL ABYAD** (Arabic): Port of Morocco, Africa, on the Atlantic ocean. The Jewish community, numbering 6,000, in a total population of 20,000 inhabitants, is of recent date. The majority of its members are engaged in commerce in grain, spices, etc.; there are also a few tinsmiths. The community is governed by a council of administration, which aids the poor and subsidizes the schools with the revenues from the meat-tax, and with the voluntary contributions of its members. Besides the two schools supported by the Alliance Israélite Universelle, with 295 boys and 161 girls respectively, Casablanca has eight Talmud-Torahs with 500 pupils.

Casablanca possesses eleven synagogues, one of which, a synagogue for the poor, was erected about 1750, and another, the Synagogue Eliaon, about 1800. The chief rabbis of Casablanca since 1837 have been: Hayyim Elmalch (d. 1857); Joseph Mehalem (d. 1867); David Quakaine (d. 1873); Messaoud Nahmias (d. 1876); Judah Ohama (d. 1882); and, finally, Isaac Marasch (still living, 1902).

There are three Jewish charitable and philanthropic societies, the Hebrat Lomede ha-Zohar, the Hebrat Eliyahu ha-Nabi, and the Hebrat Tehillim. In the neighborhood of Casablanca are three groups of Jews; viz., Ouled-Ihriss (numbering 50); Stal (1,000); and Mzab (1,000).

**CASAL MAGGIORE:** Town in Italy, about twenty-two miles east-southeast of Cremona. In Sept., 1485, Joshua Solomon and Moses, sons of Israel Nathan of Soncino, began to print a large Mahzor according to the Roman ritual. In the following year they erected a printing-establishment in the

neighboring town of Casal Maggiore, where they completed the second part of the book, which contains 320 folio leaves. The Mahzor, of which a number of copies were printed on parchment, was the only work printed at Casal Maggiore.

J. A. F.

**CASE, CASA, or קָזָא, JOSEPH B. ABRAHAM:** One of the foremost Polish rabbis and Talmudists of the end of the sixteenth century and the beginning of the seventeenth; died at Posen about 1610. His name, "Case" (קָזָא) or "Qaza" (קָזָא) is most probably only a variant of the well-known surname "Cases." This would argue for Italian descent; but it does not agree with the fact that Case called himself "Shapiro," as Bloch has conclusively proved.

After serving as chief rabbi of Lemberg, Case became city rabbi of Posen, while Mordecai b. Abraham Jafe was the district rabbi of Greater Poland. Although Case apparently left no writings, he was one of the first Talmudic authorities of his time, as may be seen from Benjamin Aaron Solnik's responsum No. 22, and Meïr b. Gedaliah of Lublin's responsum No. 88. Case's son Solomon (d. Jan. 2, 1612, at Lemberg) was also an eminent Talmudist.

L. G.

**CASES or CAZES:** Jewish Italian family that included among its members rabbis, physicians, and scholars. The more numerous branch of the family lived in Mantua; some lived in Ferrara; some emigrated to Turkey and Palestine (see Zunz, in Ben-jacob's edition of Dei Rossi's "Meor 'Enayim," iv. 30). **Benjamin Cazes**, a contemporary of Azulai, was rabbi of Safed and author of a commentary on Moses of Coucy's "Codex SeMaG," with the title "Megillat Sefer" (Constantinople, 1750). Of the Mantuan branch the following are the most distinguished:

**Aaron b. Joseph Baruch Cazes:** Scholar and physician; took his degree on Aug. 3, 1751; died 1767.  
A. R.

**Israel Gedaliah (Claudio) Cazes:** Rabbi at Mantua; born there June 19, 1794; died there Jan. 1, 1841. Like his father and grandfather, he attained proficiency both in rabbinical literature and in medicine. In 1834 he succeeded his father in the rabbinate, which was transmitted from father to son in the Cazes family. In addition to the duties of the rabbinate, Cazes practised medicine with great success.

**BIBLIOGRAPHY:** Jost, *Israelitische Annalen*, 1841, p. 144; Mortara, *Indice Alfabético*, p. 11.  
I. BR.

**Israel Gedaliah ben Joseph Baruch Cazes:** Italian physician and chief rabbi at Mantua; died Jan. 21, 1793. He enjoyed a threefold reputation as physician, as an acute Talmudist of wide reading, and

as preacher. He wrote "Tefillot Libene Yisrael K. K. Mantova" (Prayers of the Israelites of the Holy Congregation of Mantua), being prayers for the victory of King Joseph II.'s army, written in Hebrew and translated into Italian (Mantua, 1788). He is said to have been a disciple of the abbé Canini, whose methods of medical treatment he successfully applied after having taken his degree in 1754.

**BIBLIOGRAPHY:** Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 160; Mortara, *Indice Alfabetico*, p. 10; Steinschneider, in *Monatsschrift*, 1900, p. 84.

## I. BER.

**Jacob b. Israel Cases Gedaliah I.:** Physician, eighteenth to nineteenth century (Mortara, "Indice Alfabetico," p. 10).

## A. R.

**Joseph Baruch ben Moses Cazes:** Italian Talmudist, rabbi, and physician; died between 1716 and 1726 at Mantua, his native place. He was famous both as physician and as Talmudist. His responsa, which Nepi declares brilliant, are quoted in the works of his contemporaries, among others in Isaac Lampronti's "Pahad Yizhak" (letter **ס**, fol. 79g, 102a; **ג**, fol. 60b; **ג**, fol. 63g *et seq.*; **פ**, fol. 127a). His Talmudic method of teaching is entirely logical. He was averse to useless discussions (letter **ג**, fol. 60b). Although he believed in the strict observance of all the Talmudic precepts, he advocated departures from the Law in certain cases, in order that religion might not become a burden to the people (letter **ס**, fol. 79g; letter **ג**, fol. 63g and 66b); or when the welfare of individuals was endangered (letter **ס**, fol. 103g).

**BIBLIOGRAPHY:** Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 129-254. The date of his death may be gathered from *Pahad Yizhak*, letter **ס**, fol. 79g, and 2, fol. 42a.

## I. BER.

**Joseph Samuel b. Israel Gedaliah I. Cases:** Scholar and physician; died 1775 (Mortara, "Indice Alfabetico," p. 10).

**Luliane (Lelio) Shalom b. Samuel Cases:** Seventeenth century; physician and scholar; took his degree Jan. 12, 1622. He is the author of "Derek Yesharah" (The Straight Path); a treatise on communal conduct in order to avoid dissensions. Zunz called this work "the swan-song of the Mantuan press." It was published in 1626 by Judah Samuel Perugia & Son.

**BIBLIOGRAPHY:** Mortara, *Indice Alfabetico*, p. 11; Zunz, *Z. G.*, p. 250.

## A. R.

**Moses ben Samuel Cazes:** Italian Talmudist and physician; took his degree on Jan. 11, 1586; lived in the second half of the sixteenth century and the first quarter of the seventeenth at Mantua, where he was rabbi and director of a yeshibah. He was a pupil of the celebrated cabalist Menahem Azariah di Fano. Cazes enjoyed a more than ordinary reputation among his contemporaries; a gifted writer uttering the following opinion of him: "In the synagogues and schoolhouses of our time there is no one to equal him in wisdom and understanding, in counsel and courage, in knowledge and piety" (Abraham de Portaleone, "Shilte ha-Gibborim," p. 24d). Cazes was the author of the following works: (1) "Notes on Alfasi"; (2) Commentary on the Fifth and Sixth Orders of the Mishnah; (3) "Contributions to the Hermeneutics of the Talmud." They were never published.

**BIBLIOGRAPHY:** Azulai, *Shem ha-Gedolim*, i. 143; Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 254, 255; Mortara, *Indice Alfabetico*, p. 11; Ben-jacob, *Ozar ha-Sefarim*, pp. 60, 180 (Nos. 387 and 406); Fürst, *Bibl. Jud.*, i. 147 (mentions other works of Cazes, but without giving the place where they are to be found in MS.); Zunz, in Ben-jacob's edition of Dei Rossi's *Meor 'Enayim*, iii. 30.

## I. BER.

**Samuel b. Moses Cases:** Scholar of the sixteenth century. He edited Samuel Zarza's "Meqor Hayyim" (מקור חיים), Mantua, 1559; and is mentioned by Azariah dei Rossi ("Meor 'Enayim," i. 80; ii. 221) as a possessor of a manuscript of the Targum of Jonathan ben Uzziel (Zunz, in Ben-jacob's edition of De Rossi's "Meor 'Enayim," iii. 29-30).

The following two belonged to the Ferrara branch of the Cases family:

**Hananiah b. Menahem Cases:** Physician and rabbi of Florence; lived at the end of the seventeenth and beginning of the eighteenth centuries. Author of (1) "Kin'at Soferim" (Zeal of Writers), written in defense of the "Sefer ha-Mizwot" of Maimonides against the attacks of Nahmanides (Leghona, 1740, reprinted in the Warsaw edition of the "Sefer ha-Mizwot"); (2) an epistle (Iggeret) to R. Nehemiah b. Barneh concerning musical harmony in the chanting of the priestly benediction ("Birkat Kohanim") which is included in R. Nehemiah's "Meziz u-Meliz" (מעזיז ומליץ), Venice, 1715; and (3) "Hok le Yisrael" (Statute unto Israel), glosses and notes on Hezekiah di Silva's "Peri Hadash" on the "Yoreh De'ah" (Leghorn, 1740). Responsa of Cases may be found in the works of his contemporaries, among others in I. Lampronti's "Pahad Yizhak," letter **ס**, fol. 102b, and **ת**, fol. 109b).

## A. R.

**Menahem ben Elhanan Cazes:** Italian Talmudist; born about the beginning of the seventeenth century; died after 1664. He was rabbi at Modena (1642) and Ferrara (1655). Azulai saw two of his manuscript works: (1) "Shelom ha-Bayit" (The Peace of the House), a commentary on Solomon ibn Aderet's "Torat ha-Bayit" and Aaron ha-Levi's "Bedeq ha-Bayit"; (2) and "Hiddushim" (novelle) on the treatise "Shabbat." Ghirondi had in his possession a manuscript of Cazes containing halakic decisions. A responsum by Cazes, which shows his wide range of Talmudic learning, has been published in Samuel Aboab's "Debar Shemuel" (Venice, 1702, No. 79).

**BIBLIOGRAPHY:** Azulai, *Shem ha-Gedolim*, ii. 140; Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 233; Mortara, *Indice Alfabetico*, p. 11; Ben-jacob, *Ozar ha-Sefarim*, p. 180; Samuel Aboab, *Debar Shemuel*, No. 79.

## L. G.

## I. BER.

**CASHMORE, MICHAEL:** Australian communal worker; born in 1814; died at South Melbourne Oct. 17, 1886. He was one of the oldest colonists in Victoria, having arrived in Melbourne in 1838, after a stay of two years at Sydney. Cashmore was president of the Melbourne Hebrew Congregation and one of the trustees of the Bourke street synagogue. He was the first Jewish member of the city council, and the first Jewish magistrate appointed in the colony. For seventeen years he held the position of inspector of meat markets.

**CASIMIR II., THE JUST:** King of Poland; born 1138; ascended the throne on the deposition of his brother MIECZYSLAW III., 1177; died 1194. He was one of the most amiable monarchs that ever ruled in Poland, a lover of peace, and a friend of the people. He protected the Jews from the oppression and extortions of the nobles, and by favorable legislation in the Diet of Leczyce, 1180, paved the way for the famous privileges granted to the Jews of Poland in 1264 by Duke Boleslaw of Kalisz.

**BIBLIOGRAPHY:** Kraushar, *Historja Zydów w Polsce*, i. 66, Warsaw, 1865; Sternberg, *Gesch. der Juden in Polen*, p. 20, Leipzig, 1878.

H. R.

**CASIMIR III., THE GREAT** (Polish, *Kazimierz*): King of Poland; born 1309; succeeded 1333; died in Cracow Nov. 5, 1370. He was a peaceful ruler, and, by his salutary reforms, strengthened his reign and developed trade and industry. On Oct. 9, 1334, he confirmed the privileges granted to the Jews in 1264 by Boleslaw the Pious. He was favorably disposed toward the Jews, who during his reign made themselves conspicuous in commerce, handicrafts, and agriculture. Under penalty of death he prohibited the kidnaping of Jewish children for the purpose of baptizing them, and inflicted heavy punishment for the desecration of Jewish cemeteries.

At the Diet of Wislica, March 11, 1347, he introduced salutary legal reforms in the jurisprudence of his country; he sanctioned a code of laws for Great and Little Poland, which gained for him the title of "the Polish Justinian"; and he also limited the rate of interest charged by Jewish money-lenders to Christians to 8½ per cent per annum. This measure must not be ascribed to his animosity against the Jews, but should rather be considered as a wise act tending to the welfare of the country as well as of the Jews.

The Inquisition, introduced in Poland under Vladislav Lokietek, remained impotent, in spite of all the intrigues of the lower clergy. On

**Legislative** one occasion the Jews were accused of  
**En-** having murdered a Christian child,  
**actments.** found on the road to the Lobsow

wood, a few miles distant from Cracow (1347); but a public investigation, conducted under an order of the king by the state chancellor Jacob of Melchta in conjunction with the humane priest Prandola (who shared the tolerant views of Casimir), proved their innocence. The consequence was that Casimir ordered the publication, in the form of an edict, of paragraph 31 of BOLESLAW'S statute, refuting the blood accusation and defining the punishment for such a charge when not sustained by proofs. In commemoration of this event Casimir founded a chapel at Cracow.

Casimir appears to have protected the Jews against outbreaks of the mob in 1348, for the groundless accusation of the poisoning of wells by the Jews had traveled from Germany into Poland and had roused the populace against the latter. Massacres occurred in Kalisz, Cracow, Glogau, and other cities, especially those on the German frontier. According to Matteo Villani ("Istorie," p. 622, Milan, 1729), 10,000 Jews were killed in 1348 in Poland.

In 1356 Casimir became infatuated with a beautiful

Jewess, named Esther (Esterka), a tailor's daughter of Opoczno. She bore him two sons (Niemez and Pelka) and one daughter (not two, as stated by Grätz). The sons were brought up in the Christian religion; the daughter, in the Jewish. Many Polish noble

families, as the Lubinski, Niemi,  
**Esterka** Niemiroyez, Niemirowski, claim to be  
**the** their descendants. Polish historians  
**Jewess.** ascribe the special favors and privi-  
leges bestowed on the Jews by Casim-

mir to his love for Esther; but they are not correct in this ascription, since the privileges in question were confirmed by Casimir in 1334, twenty-two years before his relations with Esther. Czacki sees the origin of these favors in the king's sense of righteousness and justice. Czacki writes: "It is not known that the king granted to the Jews other privileges and rights owing, as Jan Dlugosz thinks, to his affection for Esterka. Envy and hatred sur-named this benefactor of the people 'Ahasuerus,' Poland, being a fertile but sparsely populated country, was in want of trade and industries. The Jews, who during the pestilence of 1360 fled from Germany, migrated to Poland with their wealth. It may also with certainty be admitted that foreign Jews provided Casimir with large sums of money, thus enabling him to found new cities and to develop many old ones."

Cracow was in Casimir's time one of the Hanse towns in alliance with forty other cities in Europe. So full of gratitude to Casimir were the Jews, that at the marriage of Casimir's granddaughter Elizabeth, Wierzynek, a Jewish merchant of Cracow, requested from the king the honor of being allowed to give the young bride a wedding present of 100,000 florins in gold, an immense sum at that time and one equal to her dowry from her grandfather.

H. R.

**CASIMIR IV., JAGELLON:** Grand duke of Lithuania and king of Poland; born 1427; died at Grodno 1492. He succeeded to the grand duchy in 1440, and followed his brother Ladislaus III. on the throne of Poland in 1447. For the greater part of his reign, when the influence of the clergy was lessened by the greater aggressiveness of the executive power, the Jews of Poland and Lithuania enjoyed happy days, as in the times of Casimir the Great. Casimir continued the liberal policy of his predecessor Withold toward the Jews of Lithuania; but he did not confirm the privileges Withold had granted to them. Bershadski thinks that this was not because of antipathy to the Jews, but because he had probably left it to the elders to rule them, or that he followed the example of his father, in allowing the Jews of Lithuania to enjoy the more extensive privileges of the Jews of Poland. Certain it is that soon after his accession to the throne of Lithuania, Casimir granted the Jews of Troki the Magdeburg law, which long before had been granted to the Christian inhabitants of that city as well as to the Jews of

Wilna and Kovno. According to this law, the Jews of Troki were subject to the jurisdiction of a Jewish bailiff, elected by his coreligionists and confirmed for life by the king, to whom alone he was responsible.

Soon after Casimir's accession to the throne of Poland, while he was visiting Posen, a fire broke out there, in which the original document, enumerating the privileges granted to the Jews by Casimir the Great (1334), was burned. Casimir IV. not only renewed and confirmed the old privileges, but granted new ones, such as the Jews of Poland had never before enjoyed.

Owing to the intrigues of Cardinal OLESNICKY ZBIEGNEW, archbishop of Cracow, and of the monk John CAPISTRANO, these privileges were abolished in 1454 on the pretense that they "conflicted with the laws of God and of the country." This repeal aggravated the condition of the Jews of Poland and led to the riots of Cracow (April 12, 1464), in which about thirty Jews were killed. In 1467 the Diet again confirmed the rights and privileges of the Jews granted to them by Casimir in 1447.

The favor shown by Casimir to the Jews is supposed by some to have been due to the monetary help they afforded him. When he died he left unpaid many debts to the Jews.

H. R.

**CASIPHIA:** The residence of the NETHINIM, who were under the leadership of Iddo (Ezra viii. 17). Ezra sent them a message from Ahava, which resulted in their joining his forces at that place. The exact site of Casiphia is uncertain.

J. JR.

G. B. L.

**CASLARI:** Name of a family originally from Caylar (Latin, "Castalarium"), a village in the department of Hérault, France. A rather important Jewish community existed at Caylar in the Middle Ages. After the royal edict of Sept. 17, 1394, these Jews went to Provence and to the Comtat-Venaissin; in 1459 and 1487 some of them were at Tarascon, and in 1480 at Avignon (S. Kahn, "Les Juifs de Tarascon," pp. 30, 32; "Rev. Et. Juives," x. 172). The Caslari family enjoyed a considerable reputation as late as the second half of the sixteenth century. It produced the following scholars:

**David Caslari** (called also **Bongodas**, and entitled "**Maestro**") (Zunz, "Z. G." p. 465): Physician at Narbonne, and one of the Jews to whom the archbishop, in 1284, granted a number of privileges (Saige, "Les Juifs du Languedoc," p. 48). The poet Abraham Bedersi, who was an intimate friend of Caslari, addressed to him a liturgic poem at the feast of Purim, and proposed him, together with Abraham Saquil, Asher ha-Kohen, and Moses ben Judah Mansuri, as a judge of the literary contest to which he had invited the Jewish poets (Renan-Neubauer, "Les Rabbins Français," p. 715; compare Saige, *l.c.* p. 119). David translated from Latin into

Hebrew Galen's treatise, "De Inæquali Intemperie" (Renan-Neubauer, *l.c.*, p. 646).

**David ben Vadi Caslari:** Lived at Perpignan about 1337. He was probably not related to Maestro David Caslari. His signature appears to the bill of divorce which the scholar David Bongoron was obliged to give (1337) to his wife, the daughter of the rich En Astruc Caravida of Girone (Gross, "Gallia Judaica," p. 469).

**En Bongodah** or **Bonjuda Yehacel Caslari:** Poet. He and his son **Yehacel** (Ezekiel), about 1400, exchanged poems with Solomon ben Reuben Bonfed, which are still extant in the manuscripts of Bonfed's diwan (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1984; Renan-Neubauer, "Ecrivains Juifs Français," p. 647; Steinschneider, "Hebr. Bibl." xiv. 98).

**Mossé du Caylar** or **Caslari:** Warden of the community at Avignon in 1480, together with Vital Dieu, Lo Sal of Carcassonne, Mossé of Softal, Isaac of Sant Paul (St. Paul), Isaac Botorel, and Mossé Ferrusol ("Rev. Et. Juives," x. 172).

**Zemaḥ ben Jedidiah** (called **Crescas** of **Caslari**): He copied in 1525 the Paris manuscript (No. 179) containing the commentary of Abraham ibn Ezra on the Pentateuch (Gross, *l.c.*, p. 621).

**Zemaḥ ben Moises Caslari:** Rabbi at Carpentras about 1583. His signature appears on a document confirmed at Carpentras Adar 7, 5343, in addition to the names of Moses, son of Judah Rouget, and Moses, son of Joseph Kolon (*ib.* x. 82).

G.

S. K.

**CASLARI, ABRAHAM BEN DAVID:** Physician; lived at Besalu, Catalonia, in the first half of the fourteenth century. Caslari was considered one of the most skilful physicians of his time. He was the teacher of Moses Narboni of Perpignan, and one of the ten notables to whom, in 1333, Kalonymus ben Kalonymus of Arles addressed his treatise on morals, entitled, "Eben Boḥan" (Touchstone).

Abraham was the author of the following medical works, still extant in manuscript: (1) "'Aleḥ Ra'anān" (Verdant Leaf), or, as it is quoted by Judah ben Natan, "'Aleḥ ha-Refu'ah" (The Leaf of Healing), a treatise on fevers, divided into five books, completed Nov., 1326 (Parma MS. No. 946). The author says that he wrote the book at the request of his friends, who wished to possess a vade mecum on these matters. (2) "Ma'mar be-Ḳaddaḥot ha-Debriyot u-Mine ha-Ḳaddaḥat," a treatise on pestilential and other fevers, composed in 1349, when the Black Death decimated the populations of Provence, Catalonia, and Aragon (Bibl. Nat., Paris, MS. No. 1191, 7). (3) "Dine ha-Haḳkazah" (Rules for Bleeding), Turin MS. No. 121. (4) "Mekalkel Mahalah" (Who Sustains in Sickness), only an extract from which has been preserved (Neubauer, "Cat. Bodl. Hebr. MS." No. 2142, 39). He is also said to have translated into Latin the "Antidotarium" of Razi. The "Book of Foods," written by Isaac Israeli the Elder, is falsely ascribed to Caslari. Profiat Duran Efodi of Perpignan, called in Hebrew "Isaac b. Moses ha-Levi," borrowed from Caslari the astronomic note which he cites in his commentary on the "Moreh

Nebukim" of Maimonides (i. 72). He is also mentioned by Nissim Gerondi (Responsa, No. 33).

**BIBLIOGRAPHY:** Steinschneider, in Virchow's *Archiv*, xl. 122; idem, *Hebr. Uebers.*, p. 779; Renan-Neubauer, *Les Ecrivains Juifs Français*, pp. 644 et seq.; Gross, *Gallia Judaica*, p. 619; Carmoly, *Histoire des Médecins Juifs*, p. 102.

**CASLARI, CRESCAS.** See CRESCAS VIDAL DE CASLARI.

**CASLARI, ISRAEL BEN JOSEPH HA-LEVI** (known as Crescas Caslari): Physician and poet; lived at Avignon in 1327. He was the author of a liturgical poem for Purim, beginning with the words כמי כמור. In a manuscript of this poem ("Rev. Et. Juives," ix. 116) the signature contains the words לבני יצהר, from which Neubauer concludes that Crescas Caslari belonged to the family of the Yizhari. This opinion, shared by Zunz, is criticized by Gross, who holds that the appellation is merely honorary, as it is in the Bible (Zech. iv. 14).

According to Zunz ("Z. G." p. 466), Caslari was the author of a poem on the story of Esther and Mordecai, which he translated into the vernacular. A fragment of a Provençal poem by Maestro Crescas has been published in "Romania" (April, 1892). Caslari also translated Arnaud de Villeneuve's medical work entitled "Liber de Regimine Sanitatis," dedicating it to Jaime II. of Aragon.

**BIBLIOGRAPHY:** Renan-Neubauer, *Les Ecrivains Juifs Français*, pp. 647-650; Zunz, *Literaturgesch.*, p. 504; Gross, *Gallia Judaica*, pp. 7, 257.

S. K.

**CASLARI, JOSHUA:** Liturgical poet; lived at Avignon about 1540. He wrote four elegies which are inserted in the manuscript Mahzor of Avignon; his signature is found at the end of the last. Joshua Caslari is in all probability identical with the Jozué du Cayslar, named with Ferussol Pampelona, in a document dated June 15, 1558, as member-elect of the council of the Jewish community of Avignon.

**BIBLIOGRAPHY:** Zunz, *Literaturgesch.*, p. 577; De Maulde, in *Rev. Et. Juives*, x. 163; Gross, *Gallia Judaica*, p. 621.

S. K.

**CASLUHIM:** According to Gen. x. 14 (= I Chron. i. 12), the Casluhim are sons of Mizraim; i. e., a part or dependency of the Egyptians. Bochart ("Geographia Sacra," iv. 31) knew no better identification than the Colebians in the eastern corner of the Black Sea, because, according to a strange and utterly improbable statement of Herodotus (ii. 104), repeated by Diodorus Siculus (i. 28, 55), Strabo, and others, these were Egyptians who had emigrated. Knobel ("Völkertafel"), after Forster, suggested their identity with the Casiotis between Pelusium and Rinoecolm, a tract of desert coast before the Sirbonis lake, which is almost uninhabitable. Ebers, "Ägypten und die Bücher Moses" (p. 120), tried to support this view by an alleged Coptic etymology, "kas-lokh" (arid mountain), which is impossible in every respect (the correct Egyptian form would be "tas-rokh"). It is not possible to say anything on the name "Casluhim," the more so because the LXX. reads differently. Whether the latter's *Χασουλιμ* (?) has anything to do with the "Nitriotes nomos," or Natron valley, west of Egypt ("hesmen"; Egyptian, "Natron"; compare Ebers, *l.c.*), is very questionable.

G.

W. M. M.

**CASPARI, CHARLES PAUL:** German Semite and Biblical scholar; born at Dessau 1814; died 1892. His parents were Jews, and he was reared in the Jewish faith, but in 1838 became a Christian. In 1847 he was called to the University of Christiania, where he remained until his death. The most enduring work of Caspari is his Arabic grammar, "Grammatica Arabica" (1844-48), very soon translated into German, since revised and enlarged by Wright in England (English translation, 3d ed., 1896) and A. Müller in Germany (1887), and now the standard Arabic grammar. Of his numerous exegetical works the following may be mentioned: commentary on Obadiah (1842); "Beiträge zur Einleitung in das Buch Jesaja und zur Gesch. der Jesaianischen Zeit" (1848); "Ueber den Syrisch-Ephraimitischen Krieg unter Jotham und Abas" (1849); commentary on Micah (1851-52); and commentary on Isaiah (1867). He also translated the Psalter into Norwegian (1851), and had charge of the new Norwegian translation of the Bible (1891).

**CASPI, JOSEPH BEN ABBA MARI BEN JOSEPH BEN JACOB:** Provençal exegete, grammarian, and philosopher; born in 1297 at Largentière, whence his surname "Caspi" (= made of silver); died at Tarascon in 1340. His Provençal name was Don Bonafous de Largentera. He traveled much, visiting Arles, Tarascon, Aragon, Catalonia, Majorca (where he must have foregathered with Leon Mosconi ["Rev. Et. Juives," xxxix. 249]), and Egypt, where, as he says in his "Zawwa'ah," he hoped to be instructed by the members of Maimonides' family. This hope was not realized, as the descendants of Maimonides were more pious than learned. At one time Caspi intended to go to Fez, where many renowned schools existed; but he seems to have abandoned this project and to have settled at Tarascon. He underwent much suffering at the time of the Pastoureaux persecution, and was threatened with punishment if he did not renounce his faith.

Caspi was one of the most prolific writers of his time, being the author of twenty-nine works, the greater part of which are still extant in manuscript and the titles of the remainder being known from the list which he had the precaution to make. He began his literary career at the age of seventeen. At thirty he devoted himself to the study of logic and philosophy, which he eagerly cultivated until his death. The following is a list of his writings in their chronological order, some of them being no longer in existence: (1) "Perush," commentary on Ibn Ganah's grammatical work; (2) supercommentaries on Ibn Ezra's commentary on the Pentateuch

**His Works.** (one of these commentaries is purely grammatical, bearing the title "Parashat Kesef" [Sum of Money], and is still extant in manuscript [Bibliothèque Nationale, Paris, MS. No. 184, and elsewhere]); (3) "Terumat Kesef" (Oblation of Silver), summary of Averroes' commentaries on Aristotle's "Ethics" and Plato's "Republic," according to the Hebrew translation of Samuel of Marsailles (Parma MS. No. 442; Neubauer, "Cat. Bodl. Hebr. MSS." No. 1427); (4) "Zawwa'at Kaspi" (Testament

of Caspi), or "Yoreh De'ah," moral sentences dedicated to the author's son, and published by Eliezer Ashkenazi, Leipsic, 1844; (5) "Ma'ot Kesef" (Staves of Silver), commentaries on the Bible, with the exception of the Pentateuch; (6) "Ma'azref le-Kesef" (Crucible for Silver), commentary on the Bible; (7) "Kefore Kesef" (Cups of Silver), giving the author's reasons for the rejection of various explanations of Ibn Ezra and Maimonides; (8) "Kesef Siggim" (Silver Dross), questions and answers on the seeming contradictions in the Bible; (9) "Zeror ha-Kesef" (Bundle of Silver), or "Kizzur Higgayon," a compendium of logic (Bibliothèque Nationale, Paris, MS. No. 986); (10) "Retu'ot Kesef" (Chains of Silver), or "Pirke Yosef" (Chapters of Joseph), treatise on grammar ("Cat. Angel." No. 21); (11) "Shulhan Kesef" (Table of Silver), divided into four chapters called "regel" (foot), treating of prophets and miracles ("Cat. Peyron," p. 209); (12) "Tirat Kesef" (Palace of Silver), or "Sefer ha-Sod" (Book of Mystery), mystic commentary on the Pentateuch (Vatican MSS. Nos. 36, 46); (13) "Adne Kesef" (Thresholds of Silver), forming the second part of the preceding work and containing mystical explanations of the Biblical books other than the Pentateuch; (14) "Mizre'ke Kesef" (Basins of Silver), explanations of Biblical passages respecting the Creation; (15) "Mazmerot Kesef" (Sickles of Silver), commentary on Job (Munich MS. No. 265); (16) "Menorat Kesef" (Candelabra of Silver), commentary on the Mercabah (Heavenly Chariot); (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1631); (17) "I'agorat Kesef" (Girdle of Silver), commentary on Ezra and Chronicles (*ib.* No. 362); (18) "Kappot Kesef" (Spoons of Silver), commentary on Ruth and Lamentations (Munich MS. No. 265; Cambridge MS. No. 64); (19) "Gelile Kesef" (Scrolls of Silver), commentary on Esther (Bibliothèque Nationale, Paris, MS. No. 1092; Munich MS. No. 2653); (20) "I'azozerot Kesef" (Trumpets of Silver), commentaries on Proverbs, Ecclesiastes, and Song of Songs (Neubauer, "Cat. Bodl. Hebr. MSS." Nos. 362, 1349; Parma MS. No. 461); (21) "Ka'arot Kesef" (Bowls of Silver), in which Caspi endeavored to prove that the Law contains the idea of spiritual happiness and immortality, to explain the Biblical doctrine that God visits the iniquities of the fathers upon the children, and to explain the relation of wickedness to prosperity; (22 and 23) "Ammude Kesef" (Pillars of Silver) and "Maskiyot Kesef" (Images of Silver), commentaries on Maimonides' "Guide of the Perplexed," published by Werbluner, with notes and corrections by R. Kirchheim, Frankfurt-on-the-Main, 1848; (24) "Gebi'a Kesef" (Mug of Silver), or "Yoreh De'ah" (Teacher of Science), supplement to the mystic commentaries on the Bible ("Cat. Peyron," p. 208; Munich MS. No. 267); (25) "Shasherot Kesef" (Chains of Silver), or "Sefer ha-Shorashim" (Book of Roots), on Biblical lexicography (Bibliothèque Nationale, Paris, MS. No. 1244); (26) "Kappot Kesef" (Spoons of Silver), in which Caspi explains some Biblical problems concerning the history of the Jews; (27) "Mezamrot Kesef" (Songs of Silver; in other lists, Shulhan Kesef), a commentary on the Psalms; (28) "Tum ha-Kesef" (The Silver Is Finished), on the destruction of both temples,

Jeremiah's prophecies, and the arrival of the Messiah; (29) "Qebuzat Kesef" (Collection of Silver), containing a list of Caspi's works, published by Benjacob in the "Debarim 'Attikim," Leipsic, 1844. Joseph Caspi's name is also to be found attached to many liturgic poems of merit. These, however, may belong to his namesake, Joseph Caspi ben Shalom of the sixteenth century, a liturgic poet of some importance.

Caspi's works were diversely estimated. Ibn Zarzah, Moses of Narbonne, and Efodi speak in praise of them. The cabalist Johanan Aleman recommends Caspi's commentaries on account of their mystic character. On the other hand, Isaac Abrazanel and Simon Duran emphatically declare him to be antireligious because, among other things, in his commentary on the Moreh he admitted the eternity of the universe (i. 9, 70; ii. 26).

**CASPI, NATHANAEL BEN NEHEMIAH** (surnamed **BONSENIOR MACIF OF LARGENTIÈRE**): Provençal scholar; lived at the end of the fourteenth century and at the beginning of the fifteenth. He was a disciple of FRAT MAIMON, under whose direction he composed in 1424 his first work, a commentary on the "Cuzari." This commentary, still extant in manuscript (Bibliothèque Nationale, Paris, MS. No. 677, and elsewhere), is based upon the Hebrew translation of the "Cuzari" made by Judah Cardinal. Caspi was also the author of the following works: (1) a commentary on the "Ru'ah Hen," which treats of the terminology of Maimonides (*ib.* No. 678, 3; Parma, No. 395); (2) a commentary on Maimonides' "Shemoneh Pera'kim" (Paris, No. 678; Parma, No. 395); (3) "Li'khotot," a collection of glosses on the Pentateuch (Munich MS. No. 252). These glosses are based upon those of Joseph Official. Many rabbis of eastern France are cited in these glosses, and many French words and sentences may be found in them.

**CASSEL:** City in the Prussian province of Hesse-Nassau. There was a persecution of the Jews at Wolfslagen, near Cassel, during the Black Death in 1348; and Hesse-Cassel is mentioned in the same year as a scene of persecution. In 1610 Landgrave Moritz accorded protection to the Jews of Cassel, on the payment of 1,000 reichsgulden. In 1635 only one Jew, Benedict Goldschmidt, was living at Cassel; in 1647 the brothers Abraham and Simon Goldschmidt. In 1649 the Cassel Jews were forced to listen to weekly sermons for their conversion, each Jew—even women and children—being obliged to

appear at the town hall. Once, when sixteen Jews and their rabbi were celebrating the Day of Atonement and neglected to attend the sermon, the landgrave caused them to be imprisoned and severely punished, and expelled the rabbi. In 1651 the weekly sermons to the Jews were reduced to six a year, at the instance of the Jewish community. Every Jew without a "privilege" had to pay one ducat for every night that he stayed in Cassel—an ordinance that was renewed in 1673. In 1749 exceptions were made only in favor of the traveler who had papers from the government certifying that he was there on official business, in which case

The new synagogue was dedicated in 1839. The seat of the district rabbinate was transferred from Witzenhausen to Cassel in 1772. Among the rabbis were: Hirsch Kirchlain (died 1779); Joseph Hess (1780); Joseph Michael Kugelmann (about 1790); Loeb Meier Berlin (died 1814); Dr. Ph. Romann (1836-42); L. Adler (1852-83); and I. Prager. Cassel possesses a Jewish teachers' seminary and school. At present (1902) there are 2,200 Jews in Cassel.

EXTERIOR OF SYNAGOGUE AT CASSEL, GERMANY.  
(From a drawing by Loewer.)

he was allowed to remain four days without payment. In 1751 the poll-tax on native Jews was fixed at four groschen, and that on foreign Jews at eight groschen. In 1766 the Jews were nevertheless ordered to dwell in the city during the fairs, even the district rabbi and the presidents being included. They were not allowed to buy houses except in the Unterneustadt, nor were they permitted to rent them. The next year twelve streets were named in which they might reside. In 1773 a Jews' street was laid out; and as late as 1820 it was ordered that no Jews should live in any of the principal streets of the Altstadt, and that they be entirely excluded from the Oberneustadt. In 1775 Jews were allowed to have open shops in the city.

**CASSEL, DAVID:** German historian and theologian; born March 7, 1818, at Gross-Glogau, Silesia, Prussia, where he graduated from the gymnasium; died Jan. 22, 1893, in Berlin. Cassel's name is intimately connected with the founders of Jewish science in Germany—Zunz, Geiger, Steinschneider, Frankel, and others. In appreciating his great scholarship in Jewish literature it must not be forgotten that he was born in a city in which Jewish learning had been maintained at a very high standard, and which has given to the world many noted scholars: Solomon Munk, Joseph Zedner, Michael Sachs, H. Arnheim, and others.

Cassel became a student at the Berlin University, where he attended the lectures of the Orientalist

F. H. Petermann, the philosopher Fr. A. Trendelenburg, the philologist Philip Boeckh, and others. He, besides, maintained very friendly relations with Moritz Steinschneider, H. Jolowicz, L. Landshut, and Paul de Lagarde. During the whole time of his university studies he supported himself by giving lessons; and having thus experienced all the bitterness of poverty, he became later one of the founders of the Hilfs-Verein für Jüdische Studierende, a society for assisting poor Jewish students in

David Cassel.

Berlin, which is still in existence.

Cassel began his career as an author with his doctor's thesis on "Die Psalmenüberschriften" (published in the "Literaturblatt des Orients," Leipsic, 1840). He received his rabbinical diploma in 1843 from J. J. Oettinger and Z. Frankel, but never accepted a rabbinical position, although he possessed a decided talent for the pulpit, as may be seen from his "Sabbath-Stunden zur Belehrung und Erläuterung" (Berlin, 1868), a collection of 52 homilies on the Pentateuch, originally delivered as Sabbath lectures in a school for boys. In 1846 Cassel became principal of an educational institute called the "Dina-Nauen-Stift," in which position he remained until 1879. He was, besides, in 1850 and 1851 teacher of religion in Berlin at the congregational school for Jewish girls, and from 1852 to 1867 at the Jewish school for boys. From 1862 to 1873 he was also a teacher at the Jewish Normal School. In 1872, when the Lehranstalt für die Wissenschaft des Judenthums ("Hochschule") was established in Berlin, Cassel was elected one of the docents.

Cassel wrote a great number of valuable books, besides many essays for the Jewish magazines. Some of his works were written mainly for educational purposes; e.g., the above-mentioned "Sabbath-Stunden" and the following: "Leitfaden für den Unterricht in der Jüdischen Gesch. und Litteratur," Berlin, 1868 (translated into various languages); "Gesch. der Jüdischen Litteratur," 2 vols., Berlin, 1872-73, dealing only with Biblical literature; "Hebräisch-Deutsches Wörterbuch," etc., Berlin, 1871, last ed., 1891; "Lehrbuch der Jüdischen Gesch. und Litteratur," Leipsic, 1879; 2d ed., Berlin, 1896. In addition to these he edited, or contributed introductions and notes to, several scientific works of great value, of which the following may be mentioned: "Cat. Hebräischer Schriften," Latin part by himself, and Hebrew by Rebenstein (Bernstein), Berlin, 1845; D. Conforte's "Kore ha-Dorot," a biographical and bibliographical lexicon of Jewish scholars with introduction and notes, Berlin, 1846; "Zikron Yehudah," responsa of Judah b. Asher, published by Rosenberg, with introduction and notes by Cassel, Berlin, 1846; "Teshubot Geonim Kadmonim," responsa of

the earlier Geonim, edited from a Berlin manuscript, with an introduction by J. L. Rapoport, in "He-Haluz," Berlin, 1848, viii, 138; the "Yesod 'Olam" of Isaac Israeli, an astronomical work edited by B. Goldberg and L. Rosenkranz, with an introduction and a German translation by Cassel, Berlin, 1848; קובץ משפטי ירי נאונים קדמונים, published by Rosenberg with notes and references by Cassel, Berlin, 1856; Index to De Rossi's "Dizionario Storico," Leipsic, 1846; the "Cuzari" of Judah ha-Levi, with a German introduction and translation and very numerous explanatory and critical notes, which fully testify to Cassel's erudition in Jewish-Arabic philosophy, Leipsic, 1840-53, Berlin, 1869 (in this work Cassel was assisted to some extent by H. Jolowicz); "Meor 'Enayim" of Azariah dei Rossi—a classical edition, Wilna, 1866; the Apocrypha, translated into German from the Greek, Berlin, 1864-71; "Die Pesach-Haggadah," with German introduction, translation, and critical notes (latest edition, Berlin, 1895); "Grammatik der Hebräischen Sprache" of H. Arnheim (died 1870), with introduction, notes, and additions by Cassel, Berlin, 1872.

Cassel further wrote pamphlets on questions of the day, such as "Woher und Wohin? Zur Verständigung über Jüdische Reformbestrebungen," Berlin, 1845; "Die Cultusfrage in der Jüdischen Gemeinde von Berlin," Berlin, 1856, a defense of his friend Michael Sachs against the attacks by the Orthodox; "Oftener Brief eines Juden an Prof. Dr. Virchow," Berlin, 1869; and "Joseph Caro und das Buch Maggid Mesharim," published in the "Jahresbericht" of the Berlin Hochschule, Berlin, 1888, in which he proves, against Grätz, that this book was not written by Caro. Cassel is also the author of all the articles dealing with Judaism and Jewish literature in Brockhaus' "Konversations-Lexikon." He also wrote articles for the publications of the Society of Hebrew Literature of London.

Finally, it must be mentioned that Cassel, while still a young man, conceived the plan of publishing a Jewish encyclopedia containing everything of interest to Judaism. With the assistance of M. Steinschneider he composed the "Plan der Real-Encyclopädie des Judenthums," Krotoschin, 1844; but, inasmuch as Jewish studies were still in their infancy, the plan, though pursued for some time, could not be carried out.

**BIBLIOGRAPHY:** For the great number of articles written by Cassel for Jewish and Christian magazines and encyclopedias (e.g., the *Allgemeine Encyclopädie der Wissenschaften und Künste* of Ersch and Gruber) see Moïse Schwab, *Répertoire*, Paris, 1900, s.v. Cassel; S. Hochfeld, *David Cassel, Gedenk-Rede auf Seinen Heimgang*, Berlin, 1894; and especially H. Brody's pamphlet, *Toledot David Cassel*, Cracow, 1893.

H. M.

**CASSEL, HARTWIG:** Journalist and chess editor; born Nov. 2, 1850, at Konitz, West Prussia, where his father, Dr. Aaron Cassel, was rabbi. He was educated at the Real-Gymnasium in Landsberg on the Warta, and in 1879 went to England, where he began his journalistic career as the chess editor of the "Observer-Budget," Bradford, Yorkshire. He wrote chess articles for the metropolitan and provincial English papers, organized the Yorkshire County Chess Club, arranged the Blackburne-Gönsberg match at Bradford (1887) and the International

Chess Masters' Tournament in 1888 at the same city. Cassel left England in 1889, and went to Havana for an English and New York newspaper syndicate to report the Tchigorin-Günsberg match. In 1890 he became chess editor of the New York papers, "The Sun" and the "Staats-Zeitung" (which appointments he still holds), and since then has contributed chess articles to most of the metropolitan journals. He was instrumental in establishing the "Staats-Zeitung" and Rice trophies, and arranged, among other important contests, the first cable chess match between the Manhattan and British chess clubs. He is the inventor of a chess cable code.

A. P.

**CASSEL, JACOB:** German physician; born at Schwerin-on-the-Warta, province of Posen, Prussia, May 25, 1859. He was educated at the universities of Berlin and Leipsic, from which latter place he was graduated as doctor of medicine in 1883. The same year he settled as a physician in Berlin, being assistant to Baginsky until 1890, when he opened a hospital for children. Cassel has contributed many essays to the "Archiv für Kinderkrankheiten," "Berliner Klinische Wochenschrift," "Deutsche Medizinische Wochenschrift," "Therapeutische Monatshefte," "Allgemeine Medizinische Centralzeitung," etc. Especially noteworthy is his "Ueber die Untersuchung Geistig Minderwerthiger Schulkinder," Berlin, 1901.

F. T. H.

**CASSEL, PAULUS STEPHANUS (SELIG):** Convert to Christianity and missionary to the Jews; born Feb. 27, 1821, in Gross-Glogau, Silesia; died Dec. 23, 1892, in Friedenau, near Berlin. His father was a sculptor, and his brother David was docent at the Berlin "Hochschule für die Wissenschaft des Judenthums." Cassel studied at the gymnasium at Schweidnitz and at the University of Berlin, where he followed with special attention the lectures of Leopold Ranke. In 1849 he edited in Erfurt "Die Constitutionelle Zeitung," and in 1850-56 "Die Erfurter Zeitung," in a royalist spirit. He was baptized May 28, 1855, in Buessleben, near Erfurt, and became librarian of the Royal Library and secretary of the Academy in Erfurt in the following year. He remained in Erfurt till 1859. Frederick William IV. bestowed the title of professor on Cassel in recognition of his loyal labors. In 1860 he removed to Berlin, where he was a teacher at a gymnasium for a short time, and occupied himself with literary work. In 1866-67 he was a Conservative member of the Prussian Chamber of Deputies.

In 1867 Cassel was appointed missionary by the London Society for Promoting Christianity Among the Jews, a position which he retained till March, 1891. At the same time (1867) Cassel was assigned to the pastorate of the Christuskirche in Berlin, remaining in service for twenty-four years. In a pamphlet published a short time before his death, he complains of the inconsiderate treatment he had received at the hands of his Christian friends (see "Sendeschreiben an Freunde in Deutschland und

England über die Christuskirche in Berlin und ihr Martyrium Durch die London Society," Berlin, 1891). H. L. Strack confesses that it is not clear what induced Cassel to join the Christian Church, though he contends that Cassel's reasons were obviously not mercenary (see Herzog-Hauck, "Real-Encyc." iii. 744). Cassel combated anti-Semitism with considerable warmth (in "Wider Heinrich von Treitschke für die Juden," Berlin, 1880; "Die Antisemiten und die Evangelische Kirche," 2d ed., Berlin, 1881; "Ahasverus, die Sage vom Ewigen Juden mit einem Kritischen Protest Wider Ed. von Hartmann und Adolf Stöcker," Berlin, 1885; also "Der Judengott und Richard Wagner, eine Antwort an die Bayreuther Blätter").

In his "Emanicipation und Mission" Cassel endeavored to show that the Jews would obtain permanent relief from persecution not by civil enfranchisement, but through evangelization. In later years, however, he frankly receded from this view. De le Roi, the historian of Christian propaganda among the Jews, says that Cassel was animated by "a very decided Jewish spirit." In 1860 Cassel published a "History of the Jewish People Since the Destruction of Jerusalem," issued in Berlin by the "Gesellschaft zur Beförderung des Christenthums Unter den Juden." He exerted himself in the interest of proselytism among Jews. He stated his views on missionary work among them in a pamphlet: "Wie ich über Judenmission Denke," Berlin, 1886; (see also "Nathanael," edited by H. L. Strack, 1897). From 1875 to 1889 he edited "Sunem, ein Berliner Wochenblatt für Christliches Leben und Wissen" (16 vols.). "Hallelujah, Einhundert und Acht und Achtzig Geistliche Lieder," is a collection of hymns reprinted from this journal. In 1847 Cassel wrote an earnest though somewhat fantastic study of Hungarian archeology, "Magyarische Alterthümer," which is still of value. Of especial interest is his translation (with notes) of the reply to Chisdai b. Isaac of Joseph, king of the Chazars (pp. 183 *et seq.*).

His only methodic work is his history of the Jews from the destruction of Jerusalem to 1847 ("Juden [Geschichte]" in Ersch and Gruber, "Encyc." ii., part 27, pp. 1-238). This scientific treatment of Jewish history he wrote before his conversion; and it is signed "Selig Cassel." Jost, however, says of it: "It is one-sided and

**His History** merely gives episodes out of the life of the Jews in various countries. It is collated in a fragmentary manner, though rich in erudite notes" (see I.

M. Jost, "Gesch. des Judenthums und Seiner Sekten," Section 3, p. 365, Leipsic, 1859). "Sabbathliche Erinnerungen" was also published before Cassel's conversion—the first part anonymously; the second (signed "S. C." in the preface) being put forth for the benefit of indigent veterans of 1813-15. Other publications of Cassel's are: "Wissenschaftliche Berichte, Unter Mitwirkung von Mitgliedern der Erfurter Akademie"; "Denkschrift der Königlichen Akademie Gemeinnütziger Wissenschaften in Erfurt, Herausgegeben am Sekularfeste Ihrer Gründung, den 19. Juli, 1854"; "Irene, eine Sprachlich-Exegetische Skizze," Erfurt, 1855; "Der Mittler, ein Exegetischer Versuch, zu Galater iii. 19, 20"; "Aus

der Hagia Sophia, ein Akademisches Neujahrs-Programm"; "Ueber Thüringische Ortsnamen, Abdruck von Wissenschaftlichen Berichten der Erfurter Akademie"; "Dialoge über Wissenschaft und Christenthum." Essays with respect to Judaism, dating from this time, are the following: "Das Glaubensbekenntniss der Zenobia, Fürstin von Palmyra," in "Orient, Lit." 1841, Nos. 31 *et seq.*; "Der Apostat," *ib.* 1843, Nos. 18 *et seq.*; "Historische Versuche: Anmerkungen zu Benjamin von Tudela, Französische Städtenamen, Apologie," Berlin, 1847; "Die Rabbinerversammlung des Jahres 1650, eine Historische Abhandlung," Berlin, 1845. Other writings by Cassel with reference to Judaism and the Jews are the following: "Die Symbolik des Blutes und der Arme Heinrich von Hartmann von der Aue," Berlin, 1882; "Shylock, der Kaufmann von Venedig," in "Aus Literatur und Symbolik," pp. 368-386; "Caricaturnamen" in "Literatur und Geschichte," pp. 323-347; "Der Ewige Jude," in "G. S." i. 367-410; "Das Zicklein aus der Jüdischen Passahliturgie," in "Aus dem Lande des Sonnenanfangs," pp. 1-16, Berlin, 1886; "Zur Naturgeschichte der Chuzpe," a reply to Fritz Mauthner's review of "Ahasverus," *ib.* pp. 89-100; an important treatise on medieval folk lore, and the contributions made thereto by Jews, is "Mischle Sindbad, Secundus Syntipas, Edirt, Emendirt und Erklärt; Einleitung und Deutung des Buches der Sieben Weisen Meister," 3d ed., Berlin, 1891.

Cassel's Biblical studies are conservative; and it is surprising that he neglected to use the fund of rabbinical lore he undoubtedly possessed. In 1865 he wrote "Das Buch der Richter und Ruth" for J. P. Lange's "Theologisch-Homiletisches Bibelwerk." A second edition appeared in 1887, which was translated into English in 1872. In 1878 appeared "Das Buch Esther, ein Beitrag zur Gesch. des Morgenlandes, aus dem Hebräischen Uebersetzt, Historisch und Theologisch Erläutert," section 1, with an appendix, a translation of the Second Targum.

The original text of the Second Targum Cassel published in "Aus Litteratur und Gesch." Berlin and Leipsic, 1885; "Zweites Targum zum Buche Esther, im Vocalisirten Urtext mit Sachlichen und Sprachlichen Erläuterungen Herausgegeben." An English translation by Aaron Bernstein was published in Edinburgh in 1888. This English edition also gives translations of several of Cassel's essays; viz., "Mithra" (pp. 345-361), "The Winged Bulls of Persepolis" (pp. 362-377), and "Zoroaster" (pp. 378-400). Most of Cassel's other literary work partakes of the character of controversy. His larger work on "Weihnachten, Ursprünge, Bräuche und Aberglauben, ein Beitrag zur Gesch. der Christlichen Kirche und des Deutschen Volkes," Berlin, 1861, is a medley of ingenious but unsystematized erudition, and is pervaded by a tone of pious emotionalism.

Altogether, Cassel's versatility has secured him merely the admiration of his contemporaries. He was incapable of acquiring a position of influence in the church of his adoption. His more general works are: "Vom Wege nach Damascus, Apologetische Abhandlungen," Gotha, 1872; "Aus Guter Stunde,

Betrachtungen und Erinnerungen." Gotha, 1874; "Für Ernste Stunden, Betrachtungen und Erinnerungen," 2d ed., Berlin, 1881; "Aus Literatur und Symbolik," Leipsic, 1884; "Aus Literatur und Geschichte," Berlin and Leipsic, 1885; "Vom Nil zum Ganges, Wanderungen in die Orientalische Welt," Berlin, 1880; and "Das Leben des Menschen in Gesch. und Symbol," in "G. S." (only one volume published), Berlin, 1893. Besides, Cassel wrote a large number of pamphlets on theological, ethnological, and philological subjects.

s.

L. GR.

**CASSIA:** The term given as the translation for "kiddah" (Ex. xxx. 24; Ezek. xxvii. 19) and "kezi'ot" (Ps. xlv. 9). Ancient commentators agree in identifying the two. Onkelos to Ex. xxx. 24 renders "kiddah" by "kezi'ah"; Rashi does the same. Cassia belongs to the cinnamon group and resembles the ordinary species, though its fragrance is fainter. It is indigenous to Eastern countries, and in Biblical times was used along with myrrh and aloe both as a perfume (Ps. xlv. 9) and as an ingredient of the anointing-oil (Ex. xxx. 24). It formed one of the many commodities in which Tyre traded (Ezek. xxvii. 19).

G. B. L.

**CASSIUS LONGINUS:** Questor of Crassus in Syria in 53 B.C. After the unfortunate battle of Carrhae, Syria, he became independent governor of the province, clearing it of the Parthians, and traversing all parts of the country in order to reestablish the fallen prestige of the Romans. Thus he came to Judea, where Pitholaus, a partizan of Aristobulus, had taken up arms against the Romans.

Cassius conquered the stronghold Tarichæa, killed the valiant Pitholaus at the instigation of Antipater, and carried away captive 30,000 Jews (Josephus, "Ant." xiv. 7, § 3; *idem*, "B. J." i. 8, § 9). He then went to Rome and was one of the conspirators against Julius Caesar, who had appointed him pretor of Syria in 44. After Caesar's murder he was sent as proconsul by the Senate in 43. Thus he came again to Judea, where, upheld by four Egyptian legions, he used his power to exact money from the Jews. The frightened Antipater quickly apportioned among the provinces the 700 talents of silver demanded by Cassius; and his son Herod was the first to pay his share. Malichus, however, the friend of Hyrcanus, seems to have hesitated, whereupon Cassius led away captive the inhabitants of the four cities Gophna, Emmaus, Lydda, and Thamna, and would have also killed Malichus, had not Hyrcanus appeased him with 100 talents ("Ant." xiv. 11, § 2; according to "B. J." i. 11, § 2, it was Antipater).

The Jews captured by Caius Cassius, as he is called, were liberated by a decree of Mark Antony ("Ant." xiv. 12, § 3), and it was ordered that Cassius' other depredations be repaired (*ib.* 12, § 5). During the war of Cassius and Brutus against Octavius Caesar and Antony, Cassius, who was at that time in Syria, sought to gain the support of Herod by promising him the kingdom of Judea; Malichus was urged to poison Antipater ("Ant." xiv. 11, § 4; "B. J." i. 11, § 4). While Herod took the part of Cassius and the republicans, Malichus was looking

forward to the victory of the Cæsarean party; so that it was in the interest of Cassius that Herod had the murderer of his father assassinated at Tyre, the old and weak Hyrcanus being induced to believe that the deed was instigated by Cassius ("Ant." xiv. 11, § 6; "B. J." i. 11, § 8). The anti-Herodian party joined issue with a certain Marion whom Cassius had left behind as master of Tyre; Herod, however, vanquished his enemies ("Ant." xiv. 11, § 7; 12, § 1; "B. J." i. 12, § 2) and thus put an end to Cassius' rule in Judea. Cassius soon after slew himself in the battle of Philippi, 42 B. C. ("B. J." i. 14, § 3).

**CASSUTO, JUDAH:** Hazan of the Portuguese-Jewish community of Hamburg; born in Amsterdam 1808; died at Hamburg March 10, 1893. In 1827 he was elected hazan of the Portuguese-Jewish community, a post which he held until his death. Cassuto was not only cantor, but also spiritual chief of the congregation, and was entitled to act as rabbi at the solemnization of marriages among its members. He was a very learned man, and possessed a thorough knowledge of many modern languages. His lay occupation was that of teacher and translator. In 1843 Cassuto was appointed sworn interpreter and translator to the city of Hamburg. As a teacher he was active up to the hour of his death, which occurred suddenly. Until 1894, when a successor to Cassuto was chosen, the Portuguese congregation had no spiritual chief, marriages being solemnized by the rabbi of the German congregation.

**CASTANHO, ABRAHAM:** Spanish poet; lived at Amsterdam in the middle of the seventeenth century. He was the author of an elegy on the martyr Abraham Nuñez of Bernal, who was burned at Cordova May 3, 1655. It was inserted in "Elogios que Zelosos Dedicaron á la Felice Memoria," etc., published probably at Amsterdam in 1656.

I. BR.

**CASTEL D'AJANO, SAMUEL DI:** Italian physician and philosopher; lived at Mantua in the sixteenth century. A philosophical work of his on the articles of belief, entitled "Meor ha-Golah" (The Light of the Exile), is still extant in manuscript (Michael, "Or ha-Hayyim," No. 383). Castel d'Ajano is supposed to be the author of the liturgical poem לְנוֹעַם שִׁבְעָה עֵינָה ("For the Comfort of a Poor Captive"), which bears the signature שִׁמְעוֹן הַרְוֵא (Roman Mahzor, ii. 162b). He shows considerable knowledge of the Talmud in a casuistical note on a passage in R. Nissim's commentary on Megillah, which is still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 911, 8b).

It is likely that Samuel di Castel d'Ajano is identical with Samuel Castiglione, who, at the same epoch, practised as a physician at Mantua, and was also a liturgist (compare Zunz, "Literaturgesch." p. 417).

**CASTEL-BRANCO, JOEL RODRIGO.** See JUAN RODRIGO.

**CASTEL-SARASSIN** (Hebrew, קַסְטֵיל סַרַסִין or קַסְטֵיל סַרַסִין): Chief town of the department of Tarn-et-Garonne, France. A somewhat important Jewish community existed here in the Middle Ages. When attacked by the Pastoureaux in 1320, all the Jews except two killed one another, in order not to fall into the hands of their enemies, and these two subsequently threw themselves from the tower. The author of "Shebet Yehudah" estimates the number of the martyrs to have been 200; but Grätz, following the Latin works that place the tragedy at Verdun, a city on the Garonne, considers 500 to be a more exact estimate.

**CASTELLAZZO:** Italian-Jewish family which settled at the beginning of the sixteenth century in Cairo, where several members occupied the rabbinate with distinction. The most important were the following:

1. **Jehiel Castellazzo** (called **Ashkenazi** to signify that he was not by birth an Oriental): Rabbi in Cairo in the sixteenth century. He was a contemporary of Joseph Caro, whom he severely criticized on account of a Halakah.

2. **Moses Castellazzo:** Lived during the seventeenth century. He is eulogistically mentioned in the responsa of Meir Boton.

3. **Moses dal Castellazzo** (whose name has been misread by copyists as "Moses Kastilin"): Portrait-painter; lived at Venice in the fifteenth and sixteenth centuries. He is highly praised by David Reubeni in his memoirs for having befriended the latter on his arrival in Venice from Arabia in 1524. Moses' reputation as an artist extended far beyond the limits of the ghetto of Venice; indeed, he was known throughout Italy. In 1521, in recognition of his great talent, the Council of Venice granted him the privilege of selling his artistic illustrations of the Pentateuch.

4. **Moses ha-Kohen Abigdor Castellazzo:** Son of Simeon (No. 5); was rabbi at Salonica, Rhodes, Damascus, and Cairo in the seventeenth century. In Cairo he was the colleague of Aaron b. Hayyim. He was almost ninety years old at his death.

5. **Simeon ben Jehiel Castellazzo:** Rabbi at Cairo; died May, 1588. He was well versed in the Cabala, and was renowned for his great piety. Conforte reports that he had seen a decision emanating from Joshua Soncin, rabbi of Constantinople at the time of Joseph Nasi, in which Soncin invokes the authority of Simeon ben Jehiel. Both Conforte and Joseph Sambari assert that Simeon wrote two

works: (1) a collection of responsa, and (2) "Megillot Setarim," a commentary, probably cabalistic, on the Book of Esther. Azulai mentions as many as eighty responsa by Simeon.

**CASTELLI, DAVID:** Italian scholar; born at Leghorn, Tuscany, Dec. 30, 1836; died 1901. He was educated at the rabbinical college of Leghorn, and from 1857 to 1863 was teacher of Hebrew and Italian in the Jewish schools of that city; then he became secretary of the Jewish congregation in Pisa, where at the same time he was a private teacher. From Jan., 1876, until his death he occupied the chair of Hebrew at the Istituto di Studi Superiori Pratici e di Perfezionamento in Florence.

Of Castelli's numerous works and essays the following may be mentioned: "L'Ecclesiaste, Traduzione e Studio Critico," Pisa, 1866; "Leggende Talmudiche, Traduzione con Prefazione Critica," *ib.* 1869; "Il Messia Secondo gli Ebrei," Florence, 1874; "Il Diritto di Testare nella Legislazione Ebraica," *ib.* 1878; "Della Poesia Biblica," *ib.* 1878; "Il Commento di Sabbatai Donnolo al Libro della Creazione, Testo Ebraico con Note Critiche e Introduzione in Ebraico e in Italiano," *ib.* 1880, in "Pubblicazioni del Regio Istituto di Studi Superiori"; "La Profezia nella Bibbia," *ib.* 1882; "La Legge del Popolo Ebreo nel suo Storico Svolgimento," *ib.* 1884; "Storia degli Israeliti Secondo le Fonti Bibliche Criticamente Esposte," 2 vols., Milan, 1887-88; "Il Cantico dei Cantici, Studio Esetico, Traduzione e Note," Florence, 1892; "Anmaestrauzioni del Vecchio e del Nuovo Testamento, Raccolti e Tradotti," *ib.* 1896; "Il Poema Semitico del Pessimismo (Il Libro di Job), Tradotto e Commentato," *ib.* 1897; "Gli Ebrei, Sunto di Storia Politica e Letteraria," *ib.* 1899.

S.

**CASTELLO (CASTILHO), ABRAHAM ISAAC:** Rabbi, preacher, and poet; born at Ancona 1726; died at Leghorn Aug. 1, 1789. At the age of thirteen he arrived, poor and destitute, in Leghorn, where, although he had previously intended to become a mechanic, his agreeable voice induced him to prepare himself to become a cantor. After the death of Adam Bondi, cantor of the Jewish congregation in Leghorn, whose daughter he had married, he became his successor. He then, with indefatigable diligence, devoted himself to the study of the Hebrew and Spanish languages, and to rabbinical science, and was soon advanced to the position of rabbi and preacher, in which capacity he so greatly distinguished himself that even Christian scholars delighted to discuss with him religious and philosophical topics. Castello is probably the Jewish scholar with whom Lessing conversed during his scientific tour in the company of Duke Leopold of Brunswick, and, on hearing whom, the duke is said to have exclaimed in astonishment, "Here we have one even greater than Mendelssohn—of far purer metaphysics."

Castello was the author of the following writings, all published at Leghorn: "Kol Millin," an allegorical drama in celebration of the wedding of Aaron Ergas and Deborah da Costa (1765); "Oracion Doctrinal" (1753); "A Memorial Sermon on the Death of Francis I. of Germany" (1765), written in Spanish, and translated by Castello's son Joseph into Italian. Besides these there were several occasional poems in Hebrew published by Sal. MICHELI, in "Composizioni Poetiche" (1788), and by A. B. Piperno in the collection "Kol 'Ugab" (1846).

**BIBLIOGRAPHY:** Berliner, in *Israelitische Monatsschrift, Beilage zur Jüdischen Presse*, 1898, pp. 21, 22; Piperno, *Kol 'Ugab*, at end; Nepi-Ghirondi, *Toledot Gedole Yisrael*, No. 51; S. D. Luzzatto, *Epistolario Italiano-Francese*, 1890, p. 734; Roest, *Cat. Rosenthal. Bibl.* p. 256.

M. K.

**CASTELLO (CASTILHO), JOSEPH:** Physician; born at Leghorn about 1746; son of Abraham Isaac. After studying medicine at Pisa, he returned to his native city, where he soon acquired a reputation as a physician. A medical work written by Castello and dedicated to the archduke (afterward Emperor Leopold II.), did not appear until after his death, which occurred while he was still in the prime of manhood. Castello's brother Samuel was an eminent physician at Leghorn, and his son Abraham Isaac a lawyer and poet in the same city.

M. K.

**CASTELLON DE LA PLANA, or DE BURIANA:** City of Valencia. In 1320 the Jews of Castellon obtained permission to lay out a cemetery; and in 1432 to build a new synagogue. In 1391, in contradistinction to most of the other cities of Spain, at Castellon the magistrates protected the Jews from violence. In 1459 thirty-one Jewish families were living here. When in 1492 the Jews were compelled to leave Castellon, the city council demanded an indemnity for the taxes which the city would lose by their departure.

**CASTELNUOVO, SAMUEL DI:** Secretary of the Jewish community of Rome; lived at the end of the sixteenth century and at the beginning of the seventeenth. He edited and probably translated into Italian: (1) Judah ha-Levi's piyyut, "Mi kamoka," Venice, 1609, recited on the Sabbath preceding the Feast of Purim; (2) Moses Rieti's liturgic work, "Ma'on ha-Shoalim," Venice, 1609. The

name of Castelmovo occurs also in a halakic decision of Reggio on the ritual bath, inserted in "Mashbit Milhamot," fol. 92.

G. I. Br. **CASTLES.** See DEFENSE.

**CASTRO, ADOLF DE:** Spanish historian; member of the Academia de la Historia of Madrid; lived in Cadiz; died there Oct., 1898. He wrote the first short history of the Jews in Spain, based on careful studies; and this was so impartial and dispassionate that he found it necessary to assure his readers (p. 8): "Escribo esta historia sin pasion, ni artificio, como de cosas que nada me tocán. Ni soi judio, ni vengo de judaizantes" (I write this history dispassionately and without craft, as concerning things that do not touch me. I am not a Jew, nor am I of Jewish descent. De Castro's book was published under the title, "Historia de los Judios en España, desde los Tiempos de su Establecimiento hasta Principios del Presente Siglo," Cadiz, 1847; and was translated into English by Rev. Edward D. G. M. Kirwan, Cambridge, John Deighton, 1851.

Unlike J. Amador de los Rios, who, after him, treated the history of the Jews in Spain, De Castro condemned the Inquisition: "Pues los monarcas bien podran regir con las leyes de la fuerza los cuerpos de sns vasallos: pero no podrán sujetar los animos" (For monarchs can indeed command by forcible laws the bodies of their subjects, but can not subdue their souls).

M. K.

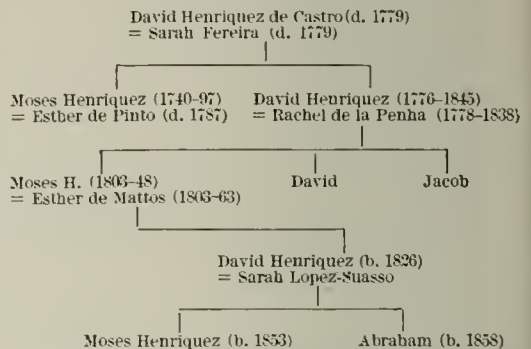

**CASTRO, DE, FAMILY:** The various branches of this family are all of Spanish and Portuguese origin. Soon after the establishment of the Inquisition, members of the family emigrated to Bordeaux, Bayonne, Hamburg, and other cities in the Netherlands, and later, in the United States; to-day their descendants are found scattered throughout Turkey, Egypt, Holland, Germany, England, and Italy. Some branches of the family have continued to bear the simple name of "De Castro"; others are known by the following names: De Castro-Osorio; De Castro Sarmiento; De Castro-Castello-Osorio; Pereira de Castro; De Castro Vieira de Pinto; Rodriguez de Castro; Orobio de Castro; De Castro de Paz; Henriquez de Castro, etc.

Arms of De Castro Family.

Among the members of this family, of some of whom a more detailed account will be found below, are the following: Aaron de Castro, or Crasto, parnas, Amsterdam, 1834; Abraham de Castro, who was among the Jews who returned to Amsterdam from Brazil when that country was lost to the Hollanders in 1651 ("Publ. Am. Jew. Hist. Soc." iii. 17); Abra-

ham Nahamias de Castro, London, 1769; Dr. Baruch de Castro, Amsterdam, 1597-1684; Daniel de Castro, brother of Baruch; Daniel Gomez de Castro, parnas, Amsterdam, 1772; Dr. Ezekiel de Castro, Verona, 1639; Imanuel de Imanuel Nahamias de Crasto, parnas, Amsterdam, 1773; Dr. Isaac de Castro, surgeon, Amsterdam, 1683; Joseph Mendes de Castro, London, 1694; Mordecai de Castro, Amsterdam, 1650; Moses Gomez de Castro, parnas, *ib.*, 1784; Nissim de Castro, Constantinople, nineteenth century; Pedro Fernandes de Castro, alias Julio Fernandez de Castro of Valladolid, son-in-law of Simon Vaez "Publ. Am. Jew. Hist. Soc." iii. p. 57), Los Valles, Mexico; as a Judaizing heretic, Pedro Fernandez became reconciled in 1647 (*ib.*, vii. 4); Dr. Rodrigo de Castro, 1550-1629; Dr. Jacob de Castro-Sarmiento, F.R.S., 1691-1761; David de Abraham de Castro-Tartas (often spelled "de Crasto," noted printer in Amsterdam, seventeenth century. The only branch of the family of which it is possible to make a definite pedigree is the Dutch, as follows:

**Abraham de Castro:** Master of the mint and farmer of the coinage for Sultan Sulaiman, in Cairo, Egypt, in the sixteenth century. Through his wealth and benevolence—he gave away 3,000 gold florins a year in alms—he acquired great influence among the Turkish officials, and was highly esteemed by his coreligionists, in whose affairs he took an active interest. When in 1524 Ahmad, who had been appointed pasha of Egypt as a reward for his exploits at the capture of Rhodes in 1523, plotted to establish himself as an independent sovereign, and asked De Castro to mint the coins with his name in lieu of the sultan's, De Castro secretly left Egypt and hastened to Constantinople to inform the sultan of Ahmad's plot. The sultan received him with high honors and gave him costly presents.

Ahmad avenged De Castro's flight on the Jews; he imprisoned several of them, probably relations of De Castro, and imposed exorbitant taxes upon the community, with heavy penalties in case of non-payment. De Castro returned to Egypt after Ahmad's execution; but the anxiety of the Jews was allayed only by the granting of a firman at the instance of De Castro. In commemoration of this deliverance in 1524, the Egyptian Jews for a long time celebrated the 27th or 28th of Adar, as a memo-

rial day, with special festivities (Egyptian or Cairo Purim); see **AMMAD-PASHA**.

M. K.

**Balthazar (Isaac) Orobio de Castro:** Philosopher, physician, and apologist; born at Braganza, Portugal, about 1620; died at Amsterdam Nov. 7, 1687. While still a child, he was taken to Seville by his parents, who were Maranos. He studied philosophy at Alcalá de Henares and became teacher of metaphysics at the University of Salamanca. Later he devoted himself to the study of medicine, and became a popular practitioner in Seville, and physician in ordinary to the duke of Medina-Celi and to a family nearly related to the king.

When married and father of a family, De Castro was, at the instigation of a servant whom he had punished for theft, denounced to the Inquisition as an adherent of Judaism, and thrown into a dark and narrow dungeon, where he remained for three years, subjected to the most frightful tortures. As he persistently denied the charge, he was finally released, but compelled to leave Spain and to wear the *subenito*, or penitential garment, for two years. He thereupon went to Toulouse, where he became professor of medicine at the university, at the same time receiving from Louis XIV. the title of councillor; but, weary at last of hypocrisy and dissimulation, he went to Amsterdam about 1666, and there made a public confession of Judaism, adopting the name "Isaac." In that city De Castro continued the practise of medicine, and soon became a celebrity, being elected to membership in the directory of the Spanish-Portuguese congregation and of several academies of poetry. Esther, his wife, died July 5, 1712.

Orobio de Castro was a very prolific writer. His work entitled "Certamen Philosophicum Propugnatae Veritatis Divinae ac Naturalis Adversus J. Bredenburgi Principia" was published at Amsterdam, 1684, 1703, 1731. This work, in which De Castro attacks the ethics of Spinoza, with whom he maintained a friendly correspondence, was translated into Spanish under the title "Certamen Philosophico, Defiende la Verdad Divina y Natural Contra los Principios de Juan Bredenburg," by G. de la Torre, The Hague, 1741. All the other writings of De Castro, like the foregoing translation, are still extant in manuscript. They are: "Prevençiones Divinas Contra la Vana Ydolatria de las Gentes" (Libro ii., "Contra los Falsos Misterios de las Gentes Advertidas a Ysrael en los Escritos Propheticos"); "Explicação Paraphrastica sobre o Capitulo 53 do Propheta Isaias. Feito por hum Curiozo da Nação Hebræa em Amsterdam, em o mez de Tisy anno 5433" (compare Neubauer, "The Fifty-third Chapter of Isaiah," pp. 21-118, London, 1876); "Tratado em que se Explica la Prophesia de las 70 Semanas de Daniel. Em Amsterdam á 6 Febrero anno 1675," a paraphrastic explanation of the 70 weeks of Daniel; "Epistola Invectiva Contra un Judio Philosopho Médico, que Negava la Ley de Mosse, y Siendo Atheista Affectava la Ley de Naturaleza." This is identical with "Epistola Invectiva Contra Prado, un

Philosopho Medico, que Dubitava, o no Creya la Verdad de la Divina Eseritura, y Pretendió Encubrir su Malicia con la Affecta Confacion de Dios, y Ley de Natureza," a work directed against Juan de Prado, a physician and author of Picardy who resided in Amsterdam. Long after De Castro's death a Jew by the name of Henriquez published an alleged work of his in French under the title "Israel Vengé," claiming it to have been originally written in Spanish (London, 1770). It has been translated into English by Grace Aguilar (London, 1839). De Castro's discussions on Christianity with the Dutch preacher Philipp von Limborch were published by the latter in the work entitled "De Veritate Religionis Christianæ Amicæ Collatio cum Erudito Judæo," Amsterdam, 1687.

**Benedict, (Baruch) Nehamias de Castro:** Physician in ordinary to Queen Christina of Sweden, and writer on medicine; born at Hamburg in 1597; died there Jan. 31, 1684. He attended the gymnasium of that city in 1615, received preparatory instruction in medicine from his father, Rodrigo de Castro, and later prosecuted this study at several universities. After his graduation at Padua (or at Franeker), he began to practise in Hamburg (1622), acquiring such fame that in 1645 he was appointed physician in ordinary to the queen of Sweden. De Castro was for some time president of the Portuguese-Jewish congregation at Hamburg, and was a zealous adherent of Shabbethai Zebi. He was twice married. In his old age he was reduced to such poverty that he was compelled to sell his library and furniture, to obtain the means of subsistence. This "vir humanissimus," as Hugo Grotius calls him, was interred in the cemetery of the Portuguese congregation at Altona. The tombstone erected by his relatives bears the following inscription:

"Do Benaventurado muy insigne Varão  
o Doutor Baruch Nabanyas de Castro  
faleceo em 15. Sebat año 5444.  
Sua alma gloria."

De Castro, under the pseudonym "Philtheo Castello," was the author of the following works: (1) "Flagellum Calumniantium, seu Apologia in qua Anonymi Cujusdem Calumnie Refutantur, Ejusdem Mentiendi Libido Detegitur," Amsterdam, 1631, a polemical work, in which the author defends physicians of Portuguese origin against the malicious attacks of a certain Joachim Curtius. It is said to have been published at Antwerp in 1629, under the title "Tratado da Calumnia em o qual Brevemente se Mostram a Natureza, Causas e Effeitos deste Pernizioso Vicio." (2) "Monomachia sive Certamen Medicum, quo Verus in Febre Synocho Putrida cum Cruris Inflammatione Medendi Usus per Venæ Sectionem in Brachio . . ." Hamburg, 1647, a work dedicated to Queen Christina.

M. K.

**Daniel (Andreas) de Castro:** Physician; born in Hamburg 1599; younger brother of Baruch Nahamies, with whom he attended the gymnasium and studied medicine. He was physician in ordinary to King Christian IV. of Denmark, and lived at Glückstadt.

**BIBLIOGRAPHY:** Kayserling, in *Monatsschrift*, ix. 97; idem, *Bibl. Esp.-Port.-Jud.* p. 36.  
G. M. K.

**David Henriques de Castro:** Numismatist and author; born at Amsterdam, 1832; died there Oct. 10, 1898; son of Moses Henriques de Castro. He was a man of much learning, member of the board of directors of the Portuguese synagogue at Amsterdam, and president of the committee of the Portuguese Jews of the Netherlands. He possessed a rare collection of old coins and art treasures, and a library rich in Spanish and Portuguese manuscripts and printed works dealing with the history of the Jews, an elaborate catalogue of which appeared shortly after his death, under the title "Catalogue . . . de la Succession de Feu M. D. Henriques de Castro," Amsterdam, 1899 (with illustrations). The whole collection was sold at auction in April, 1899. De Castro was appointed knight of the Order of the Immaculate Conception by the king of Portugal. He was a member of the Royal Archeological Society at Amsterdam, the Netherlands Literary Society at Leyden, and the Zealand Society of Arts and Science at Middelburg.

De Castro took a keen interest in the history of the Spanish-Portuguese congregation of Amsterdam, in the renowned men identified with it, notably Spinoza, and in the inscriptions on the tombstones of the old cemetery at Oudekerk. He laid bare an entire section of this old burial-ground and unearthed costly tombstones. He was also interested in the Jewish cemetery at Middelburg near Flushing, where he resided for some time. The results of his investigations are embodied in the following works: "De Synagoge der Portugeesch-Israelitische Gemeente te Amsterdam," 1675-1875, published on the occasion of its bicentenary; "Keur van Grafsteenen op de Nederl.-Portug.-Israel. Begraafplaats te Oudekerk aan den Amstel," Leyden, 1883 (text in both Dutch and German). De Castro was a contributor to several periodicals, such as the "Israelitische Weekblad."

G. M. K.

**Ezekiel de Castro:** Physician; born in Portugal in the early part of the seventeenth century. After completing his studies at Coimbra, he began the practise of medicine at Verona in 1639. Barbosa ("Bibl. Lusit. i. 767") calls him "insigne medico e subtil filosofo." De Castro possessed some knowledge of Jewish literature. He was the author of the following works on medicine: "De Colostro," about 1639; "Ignis Lambens, Historia Medica, Prolusio Physica, Rarum Pulehrescentis Nature Specimen," Verona, 1642, in which he refers at times to Biblical and Talmudic matters (a work entitled "De Igni Lambente in Deserto" was published by Pedro de Castro in the same year at Verona); "Amphitheatrum Medicum in quo Morbi Omnes Quibus Imposita

Sunt Nomina ab Animalibus Raro Spectaculo Dibelantur," Verona, 1646.

**BIBLIOGRAPHY:** Kayserling, in *Monatsschrift*, x. 38 et seq.; idem, *Bibl. Esp.-Port.-Jud.* p. 36.  
G. M. K.

**Felix de Castro:** Spanish physician; lived at Agramunt in the first quarter of the eighteenth century. On Nov. 30, 1725, he was condemned by the Inquisition to imprisonment for life for Judaizing. A similar sentence had previously been imposed upon the following members (all physicians) of the De Castro family: Alvarez de Castro of Pontevedra, aged twenty-five, sentenced Sept. 21, 1722, at Santiago; Joseph de Castro of Madrid, aged forty-nine, and Simon de Castro of Badajoz, aged twenty-five, sentenced Nov. 30, 1722, at Llerena. To these may be added the following, who were condemned by the Toledo Inquisition: Manuel de Castro of Madrid (1561), Teresa de Castro (1485), Francisco de Castro (1625), Jorge de Castro (1664), Ana de Castro, wife of Rodriguez Mercado (1676); Ines de Castro, wife of Luis Cardoso (Toledo, 1679); Catalina de Castro, wife of Baltazar de Castro of Guadalajara (1691).

**Hananeel de Castro:** English communal worker; son of Mossel and Judith de Castro; born at London Oct. 16, 1794; died March 23, 1849. During 1817-18 he served with the English volunteers in Barbados, and soon after returned to London, where, in Dec., 1825, he married his cousin, Deborah de Jacob Mendes da Costa.

In London De Castro at once took an important part in the communal life of the Bevis Marks synagogue. At the time of the blood accusation at Damascus (1840) he was president of the board of deputies of the British Jews, and was among the first to urge Sir Moses Montefiore's journey to the East. About the same period (Jan. 20, 1845) he laid the foundation of Sussex Hall, consisting of a library and lecture hall, which was the first Jewish literary institution in London.

During the bitter controversies following the promulgation of the herem against the Reform synagogue in 1841, Hananeel de Castro strove unceasingly to bring about a reconciliation. Finally, March 9, 1849, a few weeks before his death, he secured the repeal of the herem in so far as it applied to Ascamia No. 1.

**Isaac de Castro:** Turkish printer; progenitor of the De Castro family of Constantinople; born at Venice in 1764; died at Constantinople in 1845. He founded an important printing-establishment in the latter city. In 1815 he was commissioned by the government of the sultan Mahmud II. to organize the national Ottoman printing-office. Of keen mind and exemplary probity, and being a great benefactor of his coreligionists, he was universally esteemed, and was decorated by the sultan Mahmud with the Order Nishan-Iftikhar. He was an English subject. At his death he left one daughter, Dolceta, and six sons, Abram, Jacques, Moses, Nissim, Joseph, and Léon.

**Jacob de Castro** (מֵהַר יִקִּיט): Rabbinical authority; lived in Egypt; died there in 1610. He was a nephew—not a son—of the master of the mint, Abraham de Castro. On a pilgrimage to Safed he was the guest of Joseph Caro, by whom he was highly esteemed. De Castro corresponded among other of his contemporaries with Samuel de Medina, and was the author of the following works, which were published after his death: "Erek Lehem" (An Order of Bread), novelle and notes to the four legal codes, Constantinople, 1718; "Ohole Ya'aqob" (Tents of Jacob), ritual decisions, Leghorn, 1783; "Kol Ya'aqob" (Voice of Jacob), derashot on the Pentateuch (cited by Azulai as manuscripts), Constantinople; "Nazir," and a number of similar writings on Talmudic subjects, published by Jacob Hagus in his "Halakot Keṭanot," Venice, 1704.

**Jacob de Castro:** Comedian; born in London Jan. 14, 1758; died after 1815; son of a Hebrew teacher. He was intended in his youth for the Jewish ministry, and, with this in view, attended the various scholastic institutions of the Portuguese synagogue. But he showed an early predilection for the stage, at the age of fifteen arranging plays and farces in commemoration of Purim. He first appeared at the Theater Royal, Covent Garden, in 1779, in a farce; then at the Royal Circus, at the Haymarket, in 1785. In 1786 he engaged with Philip Astley in the latter's "Amphitheater and Ambigu-Comique," remaining with him for a number of years, and performing in a long list of burlesques, musical farces, and pantomimes. He was the chief of a small body of performers who were colloquially spoken of as "Astley's Jews." In 1803 De Castro became manager of the Royalty Theater, but later returned to Astley, with whom he remained until his death, appearing frequently in his amphitheater in Dublin.

**Leon Hayim de Castro:** Editor of the Spanish (Ladino) periodical, published at Constantinople in 1853, under the title "Or Yisrael," "La Luz de Israel."

G. M. K.

**Moses de Castro:** Rabbinical authority (presumably a pupil of Berab); lived in the sixteenth century. He was distinguished by great learning and ascetic piety. At first the head of a Talmudic school in Cairo, he settled later (about 1530) in Jerusalem. When Jacob Berab, rabbi of Safed, sought to invest the ordination of rabbinical judges with a higher authority, and to reestablish in Palestine a kind of Sanhedrin with himself as president, it was Moses de Castro and Levi b. Habib who successfully opposed the movement.

**Rodrigo de Castro:** Physician; born 1550 at Lisbon; died at Hamburg, date disputed, but probably 1627. Several members of his family were physicians of some reputation, his uncle Emmanuel Vaëz having attended four kings of Portugal.

Castro studied medicine at Evora and Salamanca, and, after receiving there the degrees of doctor of philosophy and of medicine, he practised at Lisbon. Philip II. requested him on the completion of his studies to make a journey to East India, for the purpose of collecting medicinal herbs and studying them scientifically; but the request was refused. In order to escape the persecutions of the Inquisition, Castro settled in Antwerp with his wife, Katharina Rodriguez, and their two children. Here, by effecting some fortunate cures, he soon won high esteem; but when the Spanish reestablished themselves in the Netherlands, considering himself insecure, he left Antwerp, probably living in northern Holland for several years, until his countryman and colleague, possibly also relative, Henrico Rodriguez, induced him to make Hamburg his permanent home (1594). When the plague broke out in that city in 1596, Castro distinguished himself by self-sacrificing

devotion. He wrote a treatise on the plague and dedicated it to the Senate. Though he did not hold the office of "Medico del Senado" or city physician, as Daniel Levi de Barrios states in his "Relacion de los Poetas y Escritores Españoles," p. 55, he was a very popular and active physician, and was frequently summoned by the magnates of neighboring countries, among whom were the king of Denmark, the landgrave of Hesse, the count of Holstein, and the archbishop of Bremen.

During Castro's first years in Hamburg he did not avow himself a Jew; but the first list of Portuguese Jews published in the city council makes mention of Dr. Rodrigo de Castro "together with his wife, two full-grown sons, and other small children." After the death of his wife (1603), who, since there was no Jewish cemetery in Hamburg-Altona, was buried either in the Christian cemetery or in the place obtained by Castro "within the pale of the Church," he married again. For almost fifty years, thirty-five of which were spent at Hamburg, he acted as the friend and helper of suffering humanity, being styled "master of his art," "famous physician," and "prince of medicine of his time." He was buried in the cemetery of the Jewish-Portuguese congregation at Altona.

The following works of Rodrigo de Castro appeared in print: "Tractatus Brevis de Natura et Causis Pestis Que Hoc Anno 1596 Hamburgensem Civitatem Afflixit," Hamburg, 1596; "De Universa Mulierum Morborum Medicina," *ib.* 1603 (1604), 1628, 1664; Venice, 1644; Hanover, 1654; Cologne, 1689; Frankfurt, 1668; "Medicus Politicus, sive de Officiis Medico-Politicis Tractatus," a kind of medical encyclopedia and methodology, Hamburg, 1614, 1662. The above were written in Latin, and the following in Portuguese: "Tratado de Herem, Em o Qual a Serca Desta Materia," etc., cited also under the title "Tratado da Halissa, Em o Qual Sen a Desta Materia Dialogi xxv." 1614.

**Castro, Jose Rodrigues de:** Christian rabbinic scholar; librarian; born in Spain in 1739; died about 1795. Appointed royal librarian to Charles III. and Charles IV., he devoted himself to a revision of the bibliographical labors of Nicolas Antonio; producing at Madrid, in 1781, the "Biblioteca Española." This contains in the first volume accounts of Spanish Jewish authors, taken mainly from Bartolucci, though there is evidence that the writer knew some Rabbinic Hebrew, as his work includes Spanish translations of two Hebrew poems on chess. He addressed to Charles III. on his accession a number of Hebrew, Latin and Greek verses entitled "Congratulatio Regi," Madrid, 1759.

**CASTRO SARMENTO, JACOB (HENRIQUEZ) DE:** Physician, naturalist, and poet; born about 1691 in Bragança, Portugal; died at

London in 1761. At the age of seventeen he entered the University of Evora, to study philosophy, and later studied medicine at Coimbra, receiving his baccalaureate in 1717. In order to escape the persecutions of the Inquisition, Henriquez—so-called as a Marano—went to London in 1720; there he continued his studies in medicine, physics, and chemistry, and passed his examinations in the theory and practise of medicine. He was elected a fellow of the Royal Society of London about 1725, in recognition of his having introduced a new medicine for curing fevers. Castro Sarmento corresponded with many scholars, among others with Prof. Mendes Sanchetto Barbosa of Lisbon, who reported to him the terrible earthquake that destroyed the capital of Portugal in 1755, and with the Jesuit B. Suarez, who communicated to him his astronomical observations made in Brazil.

The literary activity of Castro Sarmento began with a treatise on vaccination, "Dissertatio in Novam, Tutam, ac Utilem Methodum Inoculationis seu Transplantationis Variolorum" (London, 1721; German translation, Hamburg, 1722; Supplement, London, 1731; anonymously, Leyden). Other works are: "Historia Medica Physico-Hist.-Mechanica," part i., London, 1731; part ii., *ib.* 1735; "Syderohydrologia ó Discurso das Aguas Mineraes Espadañas ou Chali-beadas," *ib.* 1736, identical with "Da Uso e Abuso das Minhas (Minerales) Aguas da Inglaterra," London, 1756; "Tratado da Verdadeira Theoria dos Mares," London, 1737; and a Portuguese translation of the treatise of the surgeon Samuel Sharp: "Surgical Operations, with Plates and Descriptions of the Instruments Used" (London, 1744).

In recognition of his services to medicine the University of Aberdeen awarded to him, in July, 1739, a medical degree. Castro Sarmento was also a poet and a preacher. In Spanish, he published "Exemplar de Penitencia, Dividido en Tres Discursos Para ó dia Santo de Kipur" (London, 1724); "Extraordinaria Providencia Que el Gran Dios de Ysrael Uso con su Escogido Pueblo en Tiempo de su Mayor Afliccion por Medio de Mordehay y Ester Contra los Protervos Intentos del Tyrano Aman, Deducida de la Sagrada Escritura en el Sequinte Romance" (London, 1728); "Sernão Funebre as . . . Memorias do . . . Ilham Morenu a R. e Doutor David Neto" (London, 1728).

**CASTRO TARTAS, ISAAC DE:** Marano and martyr; born at Tartas, Gascony, about 1623; died at Lisbon Dec. 15 (22), 1647. He was a brother of

David Castro Tartas, and a relative of the physician Elijah MONTALTO, and was himself trained in philosophy and in the classical languages. Early in life Isaac went to Parahiba, Brazil, where he lived for several years. Against the wishes of his relatives there, he went later to Bahia dos Santos, where he was recognized as a Jew, arrested by the Inquisition, and sent to Lisbon. Summoned before the tribunal of the Inquisition, he at once avowed his belief in Judaism and his determination to remain true to the faith. All the endeavors of the inquisitors to convert him to Christianity were in vain. On Dec. 15 (22), 1647 (not Sept. 23, as was erroneously supposed), this young man was led, together with five fellow-sufferers, to the stake. In the midst of the flames he called out in startling tones, "Sheha' Yisrael! [Hear, O Israel!] The Lord our God is One!" With the word "Ehad" (One), he breathed his last. For several years the public of Lisbon repeated his last words, so that the Inquisition was finally compelled to interdict this confession of the Jewish faith, under the threat of severe punishment. It is said that the martyrdom of De Castro Tartas so affected the hardened inquisitors that they determined to cease burning heretics at the stake. In Amsterdam the tragic end of this promising young man occasioned deep mourning. A memorial sermon was delivered by Saul Levi Morteira, and elegies in Hebrew and in Spanish were written in his honor by Solomon de Oliveyra and Jonas Abravanel.

**CASTROJERIZ:** Town in southern Castile, 18 miles west of Burgos. Jews lived there as early as the period of the Moorish rule. In the charter ("fuero") granted to the town in 974 by Garcí Fernandez, count of Castile, it is ordered that the murder of a Jew be punished in the same way as that of a Christian. When, after the death of King Sancho, forty Jews were killed at Mercatello, Ferdinand I., his son and successor, settled the remaining Jews of that place at Castrojeriz (1035). After the death of Alfonso VI. of Castile, in 1106, the inhabitants of the neighboring Castro fell upon the Jews of Castrojeriz, killing many, making prisoners of others, and plundering their houses. The new king, Alfonso VII., and his wife, Urraca, forbade any further injury to the Jews of Castrojeriz on pain of heavy penalties. In 1234 Fernando III. confirmed the privileges which had been granted to the Jews. In 1474 the Jewish community paid 1,100 maravedis in taxes.

**CASUISTRY.** See LEGALISM.

**CAT:** There is no reference to the cat in the Old Testament, the domestication of that animal being later than the Bible, except in Egypt, where it was revered as a divine being, and probably thus became tame. Victor Hehn ("Culturpflanzen

und Haustiere," etc., Berlin, 1894) even declares that the tame cat was not introduced into Europe until after the invasion of the Huns. There is, however, evidence on Greek vases and Pompeian wall-paintings that the cat was domesticated in Greece and Rome before the common era (R. Engelmann, "Die Katzen im Alterthum," in "Jahrbuch des Kaiserlichen Deutschen Archäologischen Instituts," xiv. 136-143, Berlin, 1900). In the Talmud, on the other hand, there are many references to the cat, which is called *התול*, a general name for the "pouncer," though at times it is called *שונרה* (*שונרה*), which is a specific term derived from the Persian (Sachau, in "Z. D. M. G."), and suggests the possibility that the domesticated cats of Syria and Europe were derived from that country.

The destructive qualities of the cat are generally recognized. With its five claws (Hul. 52b) it destroys not alone mice (B. K. 80a), weasels (Sanh. 105a), hens, young birds, lambs, and kids (Hul. 53a), but even large birds (Ket. 41b), as well as snakes (Pes. 112b), snake-poison being innocuous to it (Shab. 128b). It is dangerous to babies (B. K. 80b), who on that account wear a leather bandage (Kelim xxvi. 5; the reading is doubtful). White cats bite worse than black ones (B. K. 80b). The cat is regarded as a model of modesty, because of its cleanly habits (Er. 100b); though the reason is also given that these are due to the desire to avoid being detected by mice.

That the cat was tamed in Talmudic times is shown by the statement that it never leaves a home it has once chosen, and therefore need not be watched (Shab. 51b). It bears young in 52 days (Bek. 8a), which nearly agrees with the right period of 55 days. The reason why the cat forgets its master, whereas the dog will always remember him, is stated to be because cats eat mice, which are eminently the cause of forgetfulness (Hor. 13a). This idea has lasted into modern times; for in Russia Jewish boys are not even now allowed to stroke a cat lest they lose their powers of memory. The prohibition does not, however, extend to girls.

In order to see demons, one should burn the fetus of a black cat, which must be the eldest female offspring of a black cat that is also the eldest female offspring of a black cat, and sprinkle the ashes on one's eyes (Ber. 6a). A woman's blood, offered to a cat, with magic formulas, will deprive a man of his virility (Shab. 75b). If rats kill a cat, the owner has no remedy, on the principle that "the man who is killed by women is no man" (B. M. 97a). Any one may kill a wild (perhaps mad) cat and take its skin (Shulhan 'Aruk, Hoshen Mishpat, 266, 4); the pelt, being soft, is used for furs (B. K. 80b). Of enemies who become reconciled it is said proverbially "the cat and the weasel have made a match" (Sanh. 105a). In Russo-Jewish folk-lore, blood from the tail of a cat is regarded as a cure for erysipelas; while a cat put into a new cradle drives away evil spirits from the baby. When there is a thunder-storm, the cat is put outside in the rain. A black cat in the house is propitious; a white one, unlucky. When a house is built a black cat, among other domestic animals, is introduced into it for luck. In the cabalistic system of transmigration a person who

uses the name of God is turned into a cat (Vital Calabrese, "Sefer ha-Gilgulim," ed. Warsaw, p. 125).

**CATACOMBS:** Underground galleries with excavations in their sides for tombs or in which human bones are stacked. The term is derived from "catacomba," a compound of the Greek *katá* and the Latin "comba" ("cumba"), meaning "near the sepulchers." Originally it designated a definite place on the Via Appia near Rome, but since the ninth century it has been applied to all subterranean

gives a detailed description of this kind of tomb, the chief characteristic of which is that the bodies were placed in niches (Talmud, *בִּרְבִּין*; Latin, "loculi") in the subterranean vaults. The Christian catacombs doubtless originated in imitation of this Jewish custom, although it would appear from the catacombs so far discovered at Rome that the Christian ones are older than the Jewish. Among Christians, moreover, Jesus' tomb in the rock must have been the model from the beginning.

Jewish catacombs have been discovered at Rome as follows: (1) Before the Porta Portuensis; found in 1602 by Bosio under the Colle Rosato. This catacomb has since become inaccessible through the

FRAGMENT OF A SARCOPHAGUS FROM THE VIGNA RANDANINI AT ROME, SHOWING JEWISH SYMBOLS. (From Garrucci, "Cimitero Degli Antichi Ebrei.")

burial-places in Italy as well as in other countries. In the Middle Ages only Christian catacombs were known; in modern times, however, Jewish burial-places have been discovered resembling the Christian ones, and hence are also called catacombs.

In point of fact, the mode of burial followed in catacombs is undoubtedly of Jewish origin. Subterranean tombs were used in Palestine even in early times. While in the East corpses were usually put into the earth, in the West they were cremated. The earliest example of a subterranean tomb is the double cave of Machpelah, still preserved under the mosque built over it. Around Jerusalem there are so-called tombs of the Prophets—tombs of priests according to Sepp—that, in their labyrinthine arrangement, resemble the catacombs. Tombs of the judges—i.e., tombs of the sanhedrists—are also to be found throughout Palestine. The architect Schick found at Jerusalem a catacomb begun by Jews and continued by Christians. These tombs, which are hewn out of the rock, differ from the Roman catacombs only in that they are difficult of access, while the latter are arranged with a view to the frequent visits of the living (Swoboda, "Die Altpalästinischen Felsengräber und die Catacomben," in "Römische Quartalschrift für Christl. Altertumskunde," p. 321, Rome, 1890; compare also the word *λειτουργον* = "quarry," used in the sense of "cemetery," which recalls these rock-tombs).

Wherever the Jews went in the course of their wanderings, they endeavored to preserve this custom of their fathers as far as the nature of the ground permitted; and they did so at Rome, in lower Italy, Carthage, Cyrene, etc. The Talmud

filling in of the neighborhood. Its arrangement was extremely simple and primitive, as it contained only two cubicula or burial-niches. It is evident, from

its situation on the road leading to Porto, that it served as a cemetery for the Jews living in Trastevere. (2) In Porto itself, from which several Greek inscriptions of the first and second centuries have been preserved. These inscriptions throw much light on the history of the Jews at Rome. (3) In the Vigna Randanini on the Via Appia, discovered by Garrucci in 1862. He also found there two figured sarcophagi

and gilded glasses of Jewish origin, which furnish proof of the interesting fact that the Jews also followed the higher arts. (4) In the Vigna Cimarra near the Via Appia, discovered by De Rossi in 1867. Among its inscriptions, which are also important, one mentions the synagogue of Elea. (5) In the Vigna Apolloni on the Via Labicana, discovered in 1882 by Marucchi; it is less important, and contains only a very few inscriptions, but is marked by easily recognizable Jewish symbols. (6) On the Via Appia Pignatelli, discovered in 1885 by Nicolaus Müller (see "Mitteilungen des Archäologischen Instituts," Roman section, 1886, i. 49-56).

According to F. X. Kraus's description, the Roman catacombs consist of an immense labyrinth of galleries excavated in the bowels of the earth and under the hills surrounding the city. The galleries are arranged in different stories ("piani"), often three or four of them one above the other, and

**Arrange-ment.**

crossing a number of times in the same story. The galleries are from one-half to one meter wide, hence generally very narrow; in height they vary with the nature of the rock out of which they are hewn. The walls on both sides are perforated by horizontal caves or niches like oblong ovens, each of which affords space for one or more bodies. The rows are broken at intervals by passageways leading into smaller chambers, the walls of which are also perforated by niches. There is little difference between the Christian and the Jewish catacombs; certain variations in construction being no greater than the differences among the several Christian catacombs themselves. There is the same arrangement of

The chief value of the Jewish catacombs at Rome lies in the numerous and multiform inscriptions that they furnish, which throw a strong light on the life of the Jews at Rome. A great number of names has been preserved thereby; and sometimes the titles of the offices and the status of those buried are given. Since about 110 of the inscriptions are in Greek and only about 40 in Latin, the former was probably the language of the Jews at Rome. The Greek inscriptions date from between the first and third centuries, from which time to the fourth century there are Latin inscriptions. A genuine Hebrew inscription has not yet been found, though the formulas שלום ("Peace") and שאלום על ישראל [sic!] ("Peace to Israel") have been noted in some instances. Where the inscription does not begin with the name of the deceased, the usual introductory formula is ΕΝΘΑΔΕ ΚΕΙΤΕ (for *κεῖθα*): the Latin "Ilic Jacet" (Here Lies) is seldom found. Eulogies recalling Biblical verses and idioms are used as final formulas; e.g., Isa. lvii. 2 or Ps. iv. 9. The frequent δὴ βίον, taken to mean εὐλοῖ ("for life eternal"), must also be considered a pious wish. The Jewish inscriptions of the catacombs of Rome have been collected in the works of Berliner and of Vogelstein and Rieger.

**Inscriptions.**

The commonest symbol found in the Jewish catacombs is the seven-branched candlestick, doubtless in reference to the verse, "The spirit of man is the candle of the Lord" (Prov. xx. 27). It is an infallible sign that the tomb in question is Jewish, as it is not found on Christian tombs. Another symbol is a fruit from which an ear of grain sprouts, and which is interpreted as "lulab" (palm-branch) and

galleries and cubicula, the same method in the disposition of the graves, and the same decoration in colors and tints. It has been remarked, however, that the flags closing the niches on the outside are fitted better in the Jewish than in the Christian tombs; so that no one would suspect that tombs were behind these stones. The only real difference consists in the presence of Jewish formulas and symbols and in the absence of Christian ones.

"etrog" (citron). This interpretation is, however, not certain. An oil vessel is also found on some stones, a symbol probably identical

**Symbols.** with the candlestick. Garrucci interpreted it as referring to Hanukkah, but this is inadmissible. It may be considered an artistic expression of the thought, "A good name is better than precious ointment; and the day of death than the day of one's birth" (Eccl. vii. 1). There

is no reason to doubt that a curved horn signifies the shofar. It is intended to symbolize the resurrection of the dead, which shall precede the Messianic times to be announced by the shofar. A heart-shaped leaf is often found, as also on Christian stones: this signifies sorrow for the dead.

The symbols of the Christian tombs also, in so far as they are taken from the Old Testament, are interesting from a Jewish point of view. The chief types are: Noah in the Ark, the sacrifice of Isaac, the miraculous water produced by Moses in the desert, Israel's passage through the Red Sea, the ascension of Elijah, Jonah's deliverance, the three youths in the fiery furnace, and Daniel in the den of lions. All these pictures express the thought that there are comfort and deliverance from sorrow and trouble. Kaufmann explains the fact that these and not other scenes from the Old Testament were used, by the circumstance that this cycle was based on an old passage of the Jewish liturgy.

In some Jewish tombs gilded glasses were found, having drawings in gold-leaf executed on the flat bottoms of the vessels in such a way that the letters and figures were visible from the inside. An illustration given by Berliner shows, in addition to the candlestick, the palm-branch, the heart-shaped leaf, and a lion beside the open book of the Law. On one of the glasses there is even a representation of the Temple at Jerusalem. The gilded glasses are supposed to be the "kiddush" cups used on the Sabbath and at festivals. Berliner supposes them to refer to the "cup of consolation" that was offered to the mourners.

In addition to the six Jewish catacombs mentioned above, Rome has a few others that may be either Jewish or Christian. In the first decades of Christianity, baptized Jews probably used the existing Jewish catacombs as burial-places; thus, for example, the Hebrew inscription of one

**Doubtful Catacombs at Rome.** Shofael was found in the Catacomba Callisti. In the case of the large and well-known Catacomb of Domitilla (so called because the noble Domitilla, of the imperial Flavian house, is supposed to be buried there), its Jewish origin depends on the question whether Domitilla was a Jewish or a Christian proselyte. The architectural character of this catacomb points to Jewish origin, because one of its chambers contains only a single-trough tomb ("arcosolium"), with a bench in front. Since both of these, the single tomb as well as the flat bench, are especially characteristic of the Jewish rock-tombs in Palestine, it is possible that the Catacomba Domitilla was originally laid out by Jews, although it was certainly finished by Christians. The architectural characteristics of this catacomb are so striking that even Müller admits Jewish influence, although he thinks that the Christian catacombs were constructed on pagan and not on Jewish patterns (Herzog Hauck, "Real-Encyc." 3d ed., x, 863).

It is also impossible to determine whether certain catacombs in places other than Rome are Jewish or Christian, particularly as investigations have not yet been carried to the same extent as in Rome. This is especially the case at Naples and its vicinity, and, in general, throughout southern Italy. Aside

from those near the little town of Matera, the catacombs of Venosa are a modern discovery, and none has been definitely recognized as Christian, while most of them are certainly Jewish. Discovered in 1853, these catacombs have been investigated and described by G. I. Ascoli, François Lenormant, and Nicolaus Müller.

Notwithstanding the tufa, which tends to crumble easily, there are galleries here more than two meters wide; hence wider than those at Rome. In the subterranean main street the trough-tombs—i.e., those hollowed out in the form of a trough ("arcosolia")—are much more numerous than the niche-tombs ("loculi"); moreover, not only the walls, but also the floors, contain many tombs. The chief interest of the catacombs of Venosa lies in their inscriptions. These are written partly in Latin and partly in Greek, the language in both cases being incorrect and barbaric. It is most important to note that Hebrew occurs more frequently; for there are epitaphs written entirely in that language; and the characters used are remarkable for paleographic reasons. One of these epitaphs reads:

מיטכבו של ביטה בן פוסטינו [ס] נוח נפשו נשמתו לחי [י] עולם.

("Resting-place of Beta, son of Faustinus. Peace to his soul! May his spirit share in the life eternal!") An epitaph of which the second portion is Greek written in Hebrew characters is also noteworthy, and for that reason is given here, from a reproduction in Ascoli's "Iscrizioni Greche, Latine, Ebraiche di Antichi sepolcri Giudaici del Napolitano," No. 17.

("Peace to his resting-place.") (sic!) שלום על מיטכבו טפוס סהקונדינו פרסביטרו קי מטאדינא אטון אודואנטא.

(Τάφος Σεκούνδιου Πρεσβυτέρου και Ματρίνα[ς] ἐτῶν ὀσσητά.)

("Tomb of Secundinus [son of] Presbyterus and Materina, eighty years old.") Müller found a number of other catacombs at Venosa, in addition to those discovered in 1853. It has not yet been determined, however, whether they are of Jewish or Christian origin. The same symbols are found here, and in the places still to be mentioned, as are found at Rome.

The island of Sicily abounds in catacombs. These have not yet been thoroughly investigated, nor has

their Jewish or Christian character been determined; but there certainly are Jewish catacombs at Syracuse (see Paolo Orsi, in "Römische Quartalschrift," 1897, pp. 475-495; *ib.* 1900, p. 190). The geological formation of the island was most favorable to the construction of rock-tombs, which were built by pagans, Jews, and Christians. There are more single than common tombs; and the bodies are placed

Archéologique," 3d series, xiii. 178, Paris, 1889). The necropolis lies to the north of the city, on moderately high hills near the hill Gamart. It contains about 200 tombs, that resemble the Palestinian hypogea, although the loculi give it the character of catacombs. It has been found that the Talmudic regulations regarding the rock tombs have been implicitly observed in this necropolis; and the fact

GROUND-PLAN OF THE JEWISH CATACOMBS AT VENOSA.

A, B, entrance grottoes; C, entrance to catacombs; D, principal corridor; E-K, side corridors; L-P, corridors in ruins.

(After Ascoli.)

not in niches, but in arcosolia. The Sicilian tombs must therefore be designated as hypogea—*i.e.*, subterranean vaults—rather than as catacombs, and resemble more closely their Palestinian models. Jewish hypogea have also been found in recent times at Heliopolis in Phrygia (Humann, "Altertümer von Heliopolis," p. 46, Berlin, 1898).

In Africa the first Jewish graveyards to be noted are those of Carthage, in which Jewish catacombs are recognized (see Delattre, in "Revue

that it is Jewish is fully determined by the fragments of Hebrew inscriptions that have been found and the frequent representation of the seven-branched candlestick, although most of the inscriptions are in Latin. The tombs contained no vessels except the lamps; but the walls were richly decorated in relief and fresco, indicating a certain degree of wealth among the Jews of Carthage ("Rev. Etudes Juives," xliv. 14).

On closer investigation Jewish catacombs will be

found among the many Christian ones in Cyrenaica and in its capital, CYRENE. In Lower Egypt, also, especially near Alexandria, there are pagan, Jewish, and Christian catacombs ("Am. Jour. of Archaeology," pp. 145 *et seq.*, Baltimore, 1887).

In the Egyptian catacombs there are many cell-tombs; *i. e.*, tombs in which the bodies are pushed forward into the niches. According to Schultze, this indicates that the tomb in question is Jewish. This assumption, however, is rightly criticized by other scholars, and a decision of the question must await further investigation. See BURIAL and CEMETERIES.

**CATALAN, GERSON B. SOLOMON:** Author: lived at Arles in the middle of the thirteenth century; died (possibly) at Perpignan toward the end of the thirteenth century. According to Abraham Zacuto and others, he was the father of Levi b. Gerson (Gersonides). He compiled, about 1280, an encyclopedia entitled "Sha'ar ha-Shamayim" (Door of Heaven), which contains many quotations and even whole treatises from previous translations of works written in Arabic. Following Ibn Palquera, he divided his work into three parts, dealing respectively with: (1) physics, including a chapter on dreams; (2) astronomy, taken chiefly from Al-Fergani; and (3) theology or metaphysics, which part, as Catalan expressly says, contains nothing new, but is a copy of Maimonides' "Book of the Soul." The Greek authors cited are: Alexander of Aphrodisias, Aristotle, Empedocles, Galen, Hippocrates, Homer, Plato, Ptolemy, Pythagoras, Themistius, and Theophrastus; the Arabic: Ali ibn al-Abbas, Ali ibn Ridhwan, Averroes, Avicenna, Costa ibn Lucca, Al-Farabi, Al-Fergani, Honain, Isaac Israeli, Ibn Tufail, and Ibn Zuhr. The work was published in Venice, 1547, Rödelheim, 1801.

**CATALOGUES OF HEBREW BOOKS:** These were of frequent use among the Jews in the Middle Ages. Judah ibn Tibbon (about 1200) speaks in loving terms of his collection of books and of its catalogue, both of which he recommends to

his son Samuel. Specimens of old catalogues from various genizot have been brought to light within recent years, the oldest and most important, in respect to the number and interest of its volumes, being that published by E. N. Adler and I. Broydė in "Jew. Quart. Rev." xiii. 52 *et seq.* This fragment of a catalogue, compiled in the twelfth century, gives an Arabic description of 100 works offered for sale. The books are indeed summarily described without much method; still, the cataloguer states that they are divided into the following classes: Bible, Mishnah, Talmud, Theology, Halakah, and Liturgy—a fact which shows the existence of a system in the classification of books even at that early period.

Unfortunately, such catalogues, so important to bibliography, are very scarce; and this scarcity has caused a distinct gap in the history of Hebrew literature in the Middle Ages. It is only within the last two and a half centuries that public as well as private libraries have adopted the practise of publishing catalogues. In the following list of printed ones of both public and private collections of Hebrew books, the former are arranged in the alphabetical order of the towns in which the libraries exist, and the latter in that of the names of the owners of the collections:

#### PUBLIC COLLECTIONS.

**Amsterdam:** "Catalog der Hebraica und Judaica aus der L. Rosenthal'schen Bibliothek," by M. Roest, 2 vols., Amsterdam, 1875. A special division is devoted to a description of 32 MSS. in that library.

**Berlin:** "Die Handschriftlichen Verzeichnisse der Königl. Bibliothek," . . . by M. Steinschneider; 2 vols. in two divisions, describing 259 MSS., Berlin, 1878, 1897.

**Bern:** "Catalogus Codicum Bernensium," Bern, 1875. At the beginning is a description of 20 Hebrew MSS.

**Bologna:** "Catalogo dei Codici Ebraici della Università di Bologna," by Leonello Modona, in "Cataloghi dei Codici Orientali di Alcune Biblioteche d'Italia," Florence, 1878-97 (28 MSS.).

**Breslau:** (1) "Catalog der Bibliothek der Synagogen-Gemeinde," Breslau, 1861; (2) "Catalogus Bibl. Seminarii Jud.-Theol. Vratislaviensis," . . . by B. Zuckermann, Breslau, 1876 (90 MSS.).

**Cambridge, England:** "Catalogue of the Hebrew Manuscripts Preserved in the University Library," by S. M. Söbiller-Szinessy, Cambridge, 1876, vol. i. (72 MSS., Bible and commentaries).

**Copenhagen:** "Codices Orientales Bibliothecae Regiae Hafniensis . . . Pars Altera Codices Hebraicos Continens," Copenhagen, 1851 (46 MSS.).

**Florence:** "Bibliothecae Mediceo-Laurentinae Catalogus . . . Tomus Primus, Codices Orientales Complectens," by Maria Bisconi, Florence, 1752-57 (221 MSS.).

**Hamburg:** "Catalog der Hebräischen Handschriften in der Stadtbibliothek zu Hamburg," by M. Steinschneider, Hamburg, 1878 (375 MSS.).

**Leipzig:** "Catalogus Librorum Manuscriptorum qui in Bibliotheca Civitatis Lipsiensis Asservantur," by Naumann. "Codices Orientalium Linguarum," by Fleischer and Delitzsch, Leipzig, 1838 (43 MSS.). With additamenta by Zunz.

**Leyden:** "Catalogus Codicum Hebraeorum," . . . by M. Steinschneider, Leyden, 1858 (114 MSS.).

**London (British Museum):** "Catalogue of the Hebrew Books in the Library of the British Museum," by J. Zedner, London, 1867. "Catalogue of Hebrew Books in the British Museum Acquired During the Years 1868-92," by S. van Straelen, London, 1894. "Descriptive List of the Hebrew and Samaritan MSS. in the British Museum," by G. Margoliouth, London, 1895. "Catalogue of the Hebrew and Samaritan MSS. in the British Museum," by G. Margoliouth, vol. i. (331 Bible MSS.), London, 1899. (Bet ha-Midrash.) "Catalogue of the Hebrew MSS. in the Jews' College," by Ad. Neubauer, Oxford, 1886 (148 MSS.). "Catalogue of Hebraica and Judaica in the Library of the Corporation of the City of London," by A. Löwy, London, 1891.

**Mantua:** "Catalogo dei Manoscritti Ebraici della Comunità Israelita di Mantova," by M. Mortara, Leghorn, 1878 (78 MSS.).

**Milan (Ambrosiana):** "Die Hebr. Handschriften," by A. Berliner, in "Magazin," vii. 111.

**Modena:** "Katalog der Hebräischen Handschriften der Königl. Bibliothek in Modena," by Grünwald, 1858 (27 MSS.).

**Monte Cassino:** "I Codici e le Carti a Monte Cassino," vol. i. Monte Cassino, 1869 (2 MSS.).

**Munich:** "Die Hebräischen Handschriften der K. Hof- und Staatsbibliothek," . . . by M. Steinschneider, Munich, 1858 (418 MSS.).

**Nîmes:** "MSS. Hébreux de la Bibliothèque de la Ville de Nîmes," by Joseph Simon, in "Rev. des Etudes Juives," iii. 225 (*et seq.*) (20 MSS.).

**Oxford:** "Catalogus Librorum Hebraeorum in Bibliotheca Bodleiana," . . . by M. Steinschneider, Berlin, 1852-60. "Catalogue of the Hebrew Manuscripts in the Bodleian Library and in the College Libraries of Oxford," by Ad. Neubauer, Oxford, 1886 (2,541 MSS.).

**Paris:** "Catalogue des Manuscrits Hébreux et Samaritains de la Bibliothèque Impériale," by S. Munk and H. Zotenberg, Paris, 1866 (13 MSS.).

**Parma:** "Codices Hebraici Bibliot. I. B. De Rossi," 3 vols. Parma, 1803 (1,377 MSS.). "Catalogo dei Codici Ebraici della Bibl. di Parma non Descritti dal De Rossi," Florence, 1880 (111 MSS.).

**Rome (Vatican):** "Bibliotheca-Apostolica-Vaticanae Codicum Manuscriptorum Catalogus . . . Tomus Primus Complectens Ebraicos et Samaritanos," by Stefani Evodeo and Guiseppo Simone Assermani, Rome, 1756 (512 MSS.). ((*assunata*): "Catalogo dei Codici Ebraici della Bibliotheca Casanatense," by Gustavo Sacerdote, in "Cataloghi dei Codici," etc. (230 MSS.). (Angelica): "Catalogo dei Codici Ebraici della Bibliotheca Angelica," by Angelo di Capua, in "Cataloghi dei Codici Ebraici," etc. (53 MSS.).

**St. Petersburg:** "Catalog der Heb. und Samaritanischen Handschriften der Kaiserlichen Oeffentlichen Bibliothek," by A. Harkavy and H. L. Strack, 2 vols., St. Petersburg, 1875 (259 Biblical MSS.). "קטלוג ספרים קדומים, Catalogus Librorum Impressorum Hebraeorum in Museo Asiatico Imperialis," . . . by Samuel Wiener (in course of publication).

**Strasbourg:** "Catalog," etc., by Landauer.

**Turin:** "Codices Hebraici Manu Exarati Regiae Bibliothecae in Taurinensi Athenaeo Asservantur," by Ber. Peyron, Turin, 1880 (249 MSS.).

**Upsala:** "Verzeichniss der Hebräischen und Aramäischen Handschriften der Königl. Universitäts-Bibl.," by R. V. Zettersteen, Lund, 1900 (38 MSS.).

**Venice:** "Catalogo dei Codici Ebraici della Bibliotheca Marciana," by Mose Lattes, in "Cataloghi dei Codici Orientali," etc. (49 MSS.).

**Vienna:** "Die Handschriftlichen Hebräischen Werke der Hof-Bibl.," by Albr. Krafft and Simeon Deutsch, Vienna, 1847. Supplement by J. Goldenthal, Vienna, 1851 (257 MSS.).

#### PRIVATE COLLECTIONS.

Abbas, Samuel, Amsterdam, 1693. Aboab, Isaac, Amsterdam, 1693. Abraham, Judah Löb of Meseritz, The Hague, 1807. Adler, E. N. (only Karaite), in "Jew. Quart. Rev." xiii. Aguilar, Moses Raphael de Amst., 1680. Almanzi, יצחק יצחק, by S. D. Luzzatto, Padua, 1864. Azulai, Hayyim Joseph, by Schönblum, Lemberg, 1872. Beer, יעקב יעקב, Berlin, 1863. Berlin, Berlin, 1866. Berliner, "Aus Meiner Bibliothek," Frankfurt-on-the-Main, 1898. Bondi, Simon, Dessau, 1818. Carmoly, Frankfurt-on-the-Main, 1874. Chwolson, Daniel, Wilna, 1897. Cohen, Joshua, by Cyrus Adler, Baltimore, 1887. Costa, Da, Amsterdam, 1816. Dubno, Solomon, Amsterdam, 1814. Eger, Samuel, Hanover, 1843. Emden, Hartog, Amsterdam, 1856. Emden, Jacob, יעקב יעקב, by M. Roest, *ib.* 1867. Essau, Man van, *ib.* 1889. Felbel, Solomon, Erlangen (?), 1804. Ghirondi, by M. Steinschneider, Berlin, 1872. Halberstamm, קרל יעקב, Vienna, 1890. Heidenheim, Rödelheim, 1833. Heineemann, Jerusalem, Leipzig [1854?]. Holdheim, Berlin, 1866. Jacob ben Saul, Amsterdam, 1816. Jacobsohn, Meir, יעקב, *ib.* 1814. Jeshurun, Solomon, *ib.* 1811. Jonghe, Wolf de, *ib.* 1839. Lehmann, Moses, *ib.* 1832. Lehen, *ib.* 1899. Leeser, by Cyrus Adler, Philadelphia, 1883. Lewwarden, Jacob, *ib.* 1797. Levi, Rofe, Amsterdam, 1789. **CATALONIA**: Duchy of Aragon in the north-west of Spain. Jews settled in Catalonia (which included originally the county of Barcelona; the following cities of Tarragona, viz., Ciudad de los Judios, Viel, Manresa, Gerona, Besalu, Peraleda, Conflent; and many other places) as early as the eighth century. Kaula ha-Jehudi ("the Jew") and his army fought the emir Al-Horr on Catalonian territory; and after the former had fallen in combat the Jews under his command, who were harassed by Al-Horr, were hospitably received in those Catalonian cities inhabited by their coreligionists. Contemporary Christian chroniclers deny the allegation that the numerous Jews resident in Barcelona, the capital of Catalonia, surrendered (890) the strongly fortified city to the commander 'Abd al-Karim.

Often the Jews had to suffer cruelties inflicted by Crusaders in Catalonia, who came to assist the Christians against the Moors. The pope, in a letter to the bishops, forbids these excesses. He says that a difference exists between Jews and Moors: "Against those who persecute the Christians and drive them from their cities and possessions, war is waged rightly; but the former [the Jews] are everywhere ready to serve."

In early times the Jews of Catalonia secured property rights. Under Count Ramon Berenguer I. it was decreed in 1068, and again at the third Council of Gerona in 1078, that those Jews who bought lands were to pay a title to that parish in which the lands were situated, "quemadmodum si a Christianis coleretur" (Flores, "España Sagrada," *ib.*, 477). Moreover, here the Christian spirit soon got the upper hand. According to the old "Codigo de los Usatges," in a litigation between Jew and Gentile the Jew had to take an oath to the Christian, but never the latter to the former. Neither Jews nor Saracens were admitted as witnesses against a Christian. In 1024 the lands of a Jew accused of adultery with a Christian woman were confiscated and sold. The conversion of Jews to Christianity was favored here as early as the eleventh century. He who insulted a converted Jew, by calling him

**Legal****Position.**

trimmer, deserter, or renegade, was punished by a fine of twenty ounces of gold.

trimmer, deserter, or renegade, was punished by a fine of twenty ounces of gold.

In Catalonia, connected as it was for a long time, with southern France, the French spirit was altogether dominant; and this continued in all phases of development up to the union with Aragon. The condition of the Jews was on the whole, quiet and peaceful; they engaged in trade and industries, and studied the sciences, particularly medicine; they attained to honors and respect; medical knowledge opened the doors of princes and counts to them. The Jews of Barcelona, Gerona, Tarrega, Tarrasa, and Manresa were noted for their thrift not less than for their prosperity; and they contributed materially to the dissemination of Catalonian commerce. Many of the Jews whom the Almohades persecuted found safety and protection in the cities of Catalonia.

The Jews living in Catalonia were, like the Saracens, the property of the ruler; they bore a direct relation to the king, and, with all of their goods, stood under his special protection.

**Relation to King.** At the same time they could not be called slaves ("servi"); for they had free right of residence by law. The king gave them a special interest, or usury, law, and regulated their congregational relations.

Gradually, however, the clergy gained supremacy. Even before the reign of King Jaime I. the Jews on Catalonian territory were deprived of their right to act as judges or to exercise corporal punishment. Under Jaime I. Catalonia was united to Aragon and Valencia in one great kingdom. Henceforth the history of the Jews in Catalonia is that of their brethren in Aragon (see ARAGON, BARCELONA, GERONA, MANRESA, SPAIN).

The connection between Catalonia and southern France is also shown from a religious standpoint, as later the question was discussed whether Gershom's arrangement forbidding polygamy for Germany and France was binding also on Catalonia. Catalonia had its own rite; and this generally coincided with that of Provence (Mahzor Catalonia) in its principal points. "Kol Nidre" was not recited in Catalonian congregations.

M. K.

**CATARIVAS, SHEMARIAH:** Talmudic writer of the eighteenth century. He was originally from Tiberias, and went to Tunis in 1750 as alms collector, settling there after a sojourn in Algiers. He gained a reputation for scholarship and piety. Catarivas was an intimate friend of Abraham Cohen Baberebi, one of the oldest rabbis of Tunis, whose grandson published Catarivas' "Zeker Zaddik" (Memory of the Just), a commentary on the first two orders of the Mishnah, together with the "Abraham Yagel" of Abraham Cohen (Leghorn, 1843). Several of the responsa of Catarivas are contained in the "Yerek Ya'akov" of Jacob b. Abraham Faitosi, Leghorn, 1842.

M. K.

**CATECHISMS:** Manuals for religious instruction. The name as well as the form of Jewish catechisms has been adopted from the Christian Church in modern times in connection with a more systematized religious instruction. Catechesis as a term for instructing persons, particularly proselytes, in the principal parts of the faith before admitting them into the fold, was probably in use among the Greek-speaking Jews in pre-Christian times (see, for instance, Acts xviii. 25); the manual used for this purpose being simply called "Didache"—Torah = teaching (see ΔΙΔΑΧΗ). In the Christian Church, however, the catechization—that is, the instruction and other preparation of the applicant for admission into membership—was made a well-defined branch of practical theology, and the existence of catechisms as an aid became a necessity. In accordance with the old—also Jewish—system of instruction of proselytes, the catechism originally consisted of a list of the capital sins to be shunned and of the duties or leading virtues to be practised, besides parts of the creed. With the introduction of more rational methods of education, due especially to the Reformation movement, and above all since Luther, who with fine pedagogical insight made the Decalogue the basis of instruction (1529), the catechism became a useful and almost indispensable means of religious instruction of the young, as it presented in clear concise language, in the form of questions and answers adapted to common use, the chief teachings, religious and moral, of the Church.

The need of such a catechism was not felt in Judaism of old, since with the cessation of a religious propaganda cases of the admission of proselytes became rare and isolated, while the regular curriculum of Jewish instruction comprised throughout the Middle Ages the entire Torah; that is, Bible and Talmud. Only for the observance and knowledge of the laws compendia were now and then composed to facilitate the study; but for the systematic comprehension of the creed no provision was made in the education of the young, the intercourse between Jew and non Jew having been so rare as to render a specific religious instruction or a discussion of the distinctive characters of the Jewish belief unnecessary for the average student.

The first symptom of an awakened Jewish self-consciousness was Abraham Jagel's "Leqah Tob," a catechism published in Venice in 1587, and composed entirely after the model of the smaller catechism by the Catholic Peter Canisius (see Maybaum, "Abraham Jagel's Katechismus Leqah Tob," Berlin, 1892). After Luther's catechism had given a new impetus to systematic religious instruction even in Catholic Italy so as to give rise to Canisius' larger and smaller catechisms exactly after the Protestant model, the idea naturally suggested itself to the Jews of Italy, who stood in closer relation to their Christian neighbors than their coreligionists did elsewhere, of having also the tenets of the Jewish faith presented to the young in similar catechetical form. This was the declared purpose of Jagel's work. The need of a catechism, however, was not as yet felt by the Jews. The "Leqah Tob," written in

Hebrew and in defense of the Jewish religion, with constant and clever use of rabbinical literature in support of views and conceptions largely adopted from the Catholic original, was—against the expectation of the author—never used as a school manual; but its popularity is shown by the fact that it was frequently republished in Hebrew and translated into Latin and into Judæo-German. The books used for elementary religious instruction contained mainly the 613 commandments and Maimonides' thirteen articles of faith with excerpts from the prayer-book and the Shulhan 'Aruk. Such books were the "Emet we-Emunah" by Isaac Aruvas, Venice, 1654; the "Eleh ha-Mizwot" by Gedaliah Taikus, Amsterdam, 1765, who also wrote in 1764 "Emumat Yisrael," a religious catechism not noticed by Güdemann.

The first systematic religious manual after Jagel's attempt seems to have been Judah ben Perez's "Fundamento Solido de la Divina Ley," a compendium of Jewish theology written in dialogue form in Spanish (Amsterdam, 1729). A similar one under the title of "Torat Emumat Yisrael" appeared 1764 in Leghorn, in Hebrew and Spanish, for the use of Turkish Jews, by Isaac de Moses Paz, and in 1782, in Verona, "Esamo Osia Catechismo ad un Giovane Israelito" by Simone Calinani (Strassburger's "Gesch. der Erziehung," p. 277).

The Mendelssohnian era, which, owing to the closer contact of the Jews with the Christian world, made a more systematic religious instruction a necessity, brought a perfect tidal wave of catechetical literature. From 1782 to 1884 no less than 161 religious manuals appeared, according to David Kaufmann and Isidore Loeb (see Maybaum, "Methodik des Jüdischen Religionsunterrichts," p. 5), and the place of honor belongs not, as Maybaum has it, to W. Dessau, whose "Grundsätze der Jüdischen Religion" appeared 1782, but to Hartwig Wessely, who, at the suggestion of Moses Mendelssohn, published in 1782 the first sketch of a catechism in his "Miktabim," republished in the "Meassef." He had already recommended in his "Yen Lebanon" (1775) the composition of a religious manual, and in his "Gan Na'ul" presented the system in Hebrew. As to the method after which the matter should be arranged, the question was whether for the doctrinal part the thirteen articles of Maimonides or Albo's three fundamental articles should be made the basis, and whether for the duties the whole Pentateuchal system of laws—that is to say, all the ceremonial laws—or only the chief ceremonies, besides the festivals and the moral laws, should be treated.

A number of authors followed Luther's example; but, in accordance with Num. R. xiii. and Saadia's Azharot, they used the Decalogue as the basis for the treatment of the duties. J. A. Franck, 1826; B. H. Auerbach, in "Torat Emet," 1839; S. Holdheim, in "Ha-Emunah we ha-De'ah," 1857; Leopold Stein, in "Ha-Torah we ha-Mizwah," 1858; and G. Laseh, in "Piqqude Adonai," Leipsic, 1857, all derived the 613 commandments from the Decalogue.

Among the leading catechisms of the conservative school may be mentioned those of Alexander Behr,

### Jewish Catechism Not Re- quired.

1826; Solomon Plessner, 1838; Anerbach, 1839; 2d ed. 1853; G. Lasch, 1857; Feilchenfeld, 1867; 2d ed. 1878; and M. Friedlander, London, 1891.

In the year 1832 Zunz wrote in his "Gottesdienstliche Vorträge" (p. 457) that for the last thirty-three years more than fifty Jewish

**Catechism** catechisms appeared in German, **Du-Literature**, nish, French, Italian, and Hebrew.

In addition to these the following Hebrew catechisms may be mentioned: Abr. Jagel, "Leqah Tob," 1595; Isaac Aruvaz, "Emet we-Emumah," 1654; and Gedaliah Taikus, "Emunat Yisrael," referred to above; Ben Ze'eb, "Yesode ha-Dat," Vienna, 1806, in Hebrew and German; David Zakkut de Modena, "Limmude Adonai," Hebrew and Italian, Reggio, 1815; A. Buchner, "Doresh Tob," Warsaw, 1825 and 1826; Jacob Tugendhold, "Ben Yakkir," in Hebrew, German, and Polish, Warsaw, 1839.

Herz Homberg published three catechisms: "Imre Shefer" (Vienna, 1808), in Hebrew, and German; "Bene Ziyyon" (Vienna, 1810), which

**Early** had to be studied in Austria by brides **Catechisms**, before they could receive the marriage license; the third, "Ben Yakkir"

(Vienna, 1820), declares that Jewish soldiers might be exempt from the observance of Biblical laws. "Edut Adonai" (Berlin, 1814; third edition, Leipsic, 1839, and under a new title, 1850) was published by E. Kley; "Gersha de Jankutha" (Breslau, 1814), by B. Meseritz; "Dat Yisrael," in two volumes (Prague, 1810-11), by Peter Beer. He also published a "Handbook of the Mosaic Religion" (Prague, 1818 and 1821) and "Emet we'Emumah" (Prague, 1832, 2d edition). This catechism omits the ceremonial laws, and states that in the "interest of humanity every religious commandment may be set aside," and that "wars of conquest" are prohibited by the sixth commandment. Among the duties of the Jews are mentioned "bathing in fresh water and frequent change of linen," and that "employers must take care of their employees when they are sick or old."

"Doctrine and Faith," in Hebrew and German, by Heinemann, was published, 1812, in Cassel; also "Torat Dat Yisrael" and "Mizwot Dat Yisrael" (Berlin, 1829 and 1830). A. Arnheim published "Leitfaden beim Unterrichte in der Mosaischen Religion" (Glogau, 1829); H. Miro, "Leitfaden beim Unterrichte der Israelitischen Religion" (Breslau, 1834); Joseph Maier, "Selection of Fruits from the Bible" (Frankfort-on-the-Main, 1820); and R. Benedict, "Elementary Instruction in the Mosaic Religion, with Appendix" (Prague, 1832). "Judaism in Its Relation to the State" was translated by Rabbi A. L. Landau (Breslau, 1832). The Hebrew title is "Ahabat Melek." "Teru'at Melek" was published by B. Fränkel (Breslau, 1833). H. M. Copenhagen published "Zefirat Tif'arah" (Breslau, 1833). The catechism of J. Wolf, Gotthold Salomon, and M. Frankel was published under the title, "Yesode ha-Limmud" (Dessau, 1810); J. Johlson's, as "Alume Yosef" (Frankfort, 1814 and 1819; Vienna, 1824) and A. H. Bock's, as "Emunat Yisrael" (Berlin, 1814). Beer Fraenk was the author of "Ma'ene Lewi" (Prague, 1816). Julius Schoenborn published a catechism (Cracow, 1819). "Emunat Yisrael" is the name

of a catechism by Naphtali Benedict (Vienna, 1824), and "Gedankensammlung" of one published by J. M. Lilienfeld (Berlin, 1825). P. Hurwitz wrote "Torat Adonai Temimah" (Berlin, 1832), and Salomon Pappenheim "Maamar Ge'ullat Mizrayim u-Mizwat Tefillin" (Breslau, 1815; published, after his death, by the Breslau Jewish Orphan Asylum). A. Büdinger was the author of "Moreh Limmudim" (Cassel, 1830), and Judah ben Ze'eb Loeb of "Explanation of the Ten Commandments" and "Religionsbuch für die Jüdische Jugend" (Darmstadt, 1834). H. Stern published the "Tree of Life" (Würzburg, 1834), and Abraham Grunthal the "Mosaische Religionslehre" (Breslau, 1836). "Complete Ceremonies of Confirmation" was published by S. Lippmannsohn (Neukirchen, 1836). Naphtali Benedict published a "Torah Min ha-Shamayim" (Vienna, 1814). J. Johlson's "Shoreshe ha-Dat: Doctrines of the Mosaic Religion" (Frankfort, 1819) is a catechism which was accepted in the curriculum for rabbis and teachers in Bavaria. It has been translated into English, with certain omissions, by Isaac Leiser (Philadelphia, 1830), and has passed through several editions.

Aron Chorin published a catechism in dialogues under the title "Hillel" (Ofen, 1837), in Hebrew and German. Its leading thought is that

**German** the law of humanity is divine. **Jo-Catechisms**, seph Saaschütz's "Basis to Catechizations" (Vienna, 1833) contains fifty pages on "God's Attributes" and four on "Duties to Fellow-Men." The post-Mendelssohnian school imitated Christian catechisms, and dwelt on arguments for the existence of God at the expense of ethics and Jewish teaching.

Salomon Herxheimer displayed pedagogical skill in laying greater stress on ethics, and his "Israelitische Glaubens- und Pflichtenlehre" (Bernburg, 1831; 27th edition, 1889) won great popularity by its terseness. It was recommended by the Prussian minister of education "for its Kantian and Lessingian spirit" in 1886.

Samuel Hirsch's "Systematischer Katechismus der Israelitischen Religion" (Luxemburg, 1856; second edition, Philadelphia) bases ethics upon Biblical history, and declares the ceremonies, dietary laws, etc., to be needless to those who have the "religion of the heart," Judaism being not "law" (*Gesetz*), but "doctrine" (*Lehre*). Hirsch favors Sunday as a day of rest for Jews in the Occident, inasmuch as the Jew who would also rest on Saturday would break the commandment "six—[and not five]—days shalt thou labor." Joseph Aub's "Grundlagen zu einem Wissenschaftlichen Unterricht in der Mosaischen Religion" (Mayence, 1865; 2d edition, Leipsic, 1875) lays stress upon the fact that faith, in the language of the Bible, is "trust based on knowledge." Superstition and atheism spring from ignorance and materialism, which are twin sisters. Falsehood can not be made truth by miracles, and truth needs no miracles. David Einhorn's "Ner Tamid, the Doctrine of Judaism" (Philadelphia, 1866) declares that man through his conscience hears God's voice, which is revelation. The mission of Israel implies God's love for all nations. Sin is unnatural; original sin therefore is impossible. Israel's dispersion

is a blessing and not a curse; hence the Ninth of Ab should be celebrated as a "day of joy," being the beginning of the realization of our mission, which is spiritual and not national. Yom Kippur emphasizes the idea that Judaism rejects the belief in a Mediator.

Leopold Stein's "Torah u-Mizwah; Israelitisches Religionsbuch" (Frankfort-on-the-Main, 1858, 2d edition) is based upon the Decalogue; it takes the dietary laws to be "sanitary" laws. Salomon Formstecher's "Torat Moshe" (Giessen, 1860) is a condensed extract of his treatise, the "Religion of the Spirit" (Frankfort, 1841). Religion is the law in history and the spirit of mankind. The Temple in Jerusalem was destroyed in order to teach that God can be worshiped everywhere by prayer and by moral conduct. "Ha-Emunah ve ha-De'ah" (Berlin, 1857), by Samuel Holdheim, discriminates between moral and national laws, such as are Levitical, purity, and dietary laws. The Sabbath should be celebrated in the Occident on a day which can be conveniently observed. Ceremonies have only an educational character, and sacrifices have no atoning power without moral conduct.

"Israelitische Religionslehre" (Dessau, 1873, 2d edition), by Julius Popper, defines "revelation" as the work of the religious genius of Israel. Among ceremonies which he holds to have outlived their usefulness are: circumcision, dietary laws, and mazzot on Pesah. Sunday is the real day of rest.

M. Levin's "Israelitische Religionslehre" (Berlin, 1892) defines religion as the "belief in God based on knowledge." Prayer should not be supplication, but adoration. Death atones for every guilt. Man must remove everything that might cause his defeat in the struggle for existence. The author apparently means that the Jew should not rest two days of the week, as by doing so he could not succeed against his competitors, who labor six days of the week.

Salomon Plessner's "Dat Moshch we-Yisrael" (Berlin, 1838) represents extreme orthodoxy. Mysticism plays an important part in this catechism. The Sabbath is a blessing, because the six days of labor are a curse. That the dietary laws, in Plessner's opinion, are conducive to health is no sufficient reason for their observance, but the fact that they were ordained by God.

The first English catechism was a translation of Salomon Cohen's Hebrew "Shoreshe Emunah" (Roots of Faith; London, 1814). Leeser's

**English Catechisms.** translation of Johnson's "Shoreshe ha-Dat" has already been mentioned. A. P. Mendes published "The Law of Moses" (revised, London, 1870). He speaks of five "revelations": (1) to Adam and Noah; (2) to the Patriarchs; (3) to Moses; (4) to Israel on Sinai; (5) to the Prophets.

The first duty of a Jew is circumcision. Blood, certain fat, etc., are forbidden, in order to "keep our health from injury." The thirteen articles of creed are given precedence over the Ten Commandments.

Isaac M. Wise published "The Essence of Judaism" (Cincinnati, 1861) and "Judaism, Its Doctrines and Duties" (1880). He recognizes the authority

of the Bible, but not that of the Talmud. "True religion is that the doctrines of which are taught in God's works and words." Among his four "cardinal doctrines the mission of Judaism is not included." "Mizwah" means a Biblical commandment which is either expressed or implied in the Decalogue. "The Decalogue was written by divine authority for the sake of certainty, that it be known for sure that this is the moral law, as ordained by the Creator of man." "The fourth commandment opens the duties of man to man" (p. 42) and "teaches duties to ourselves" (p. 45). "Huqqim are ordinances concerning the mode of worship, and are obligatory on every one in Israel," a definition which would make innovations in the mode of worship absolutely impossible.

George Jacobs' catechism (Philadelphia, 1882) teaches that "those who do not keep the Sabbath must surely die, and that the souls of those who eat leaven on Pesah shall be cut off from Israel." Short catechisms in English were published by David Asher (London, 1845), Benjamin Szold, H. A. Henry, J. Mendes de Solla, N. S. Joseph, Julius Katzenberg, H. Loeb, I. Mayer, E. Pike, Gustave Gottheil, J. S. Goldammer, Joseph Strauss (London, 1895), M. Friedlander (London, 1896, 4th edition), Aron Messing, and Barnett Elzas; Koplowitz translated Feilchenfeld's "Manual." In Kaufmann Kohler's "Guide for Instruction in Judaism" (New York, 1898) rabbinical as well as Biblical ethics are duly considered, and the growth of Jewish religious ideas and ceremonies is traced through the Biblical and rabbinical stages of development. It also takes the Decalogue as a basis.

Following are the catechisms written in French: "Catechisme du Culte Judaïque" (Metz, 1818), written in Hebrew, German, and French; "Catechisme Judaïque, en Hébreu, en Alle-

**In French.** mand, en Français," by L. M. Lambert (Paris, 1837); "Précis Élémentaire d'Instruction Religieuse et Morale," in Hebrew and French, by Elie Halévy (Paris, 1837); "La Foi d'Israel, Ses Dogmes, Son Culte, Ses Cérémonies," by S. Bloch (Paris, 1859); "Histoire Abrégé des Juifs et de leurs Croyances," by Elie Astruc (Paris, 1869); "Quelques Paroles sur l'Instruction Religieuse," by L. Kahn (Brussels 1862); "Précis Élémentaire d'Instruction Religieuse et Morale," by the central consistory of the Israelites of France (Strasburg, 1838); "Morale en Action à l'Usage des Ecoles Israélites" (Mulhouse, 1858; 2d edition, Vienna, 1869); "Les Doctrines Religieuses des Juifs," by M. Nicolas (Paris, 1860). Among catechisms written in Italian are: "Catechisma de l'Instruzione Religiosa ad Uso della Gioventù Israel-

**In Italian.** itica," by Salomon Jona (Ivrea, 1858); "Or Zaroa', Corso d'Instruzione Religiosa," by Marco Mortara (Mantua, 1857-62); "Compendio della Religione Israelitica," by the same author (Mantua, 1855); and "La Prima Parte della Fede d'Israel," by R. M. Bachi. "A Catechism of the Jewish Religion," by S. J. Cohn

**In Danish.** (Hamburg, 1811), was in 1812 translated into Danish. Abraham Alexander Wolf's "Lehre der Israelitischen Religion" (Mayence, 1825) was translated into Danish (1862), Dutch

(1844), Swedish (1844 and 1852), and republished in German (1863). Of Hungarian catechisms, the following deserve mention: the one written by Israel Bak (Budapest, 1878, 2d edition), by Solomon Kohn (Budapest, 1883 and 1885), and by Leopold Loew (Budapest, 1895). "A Plan of Instruction in Religion for the Jewish Congregation of Budapest" has been translated into German by Bernhardt Mandl (Vienna, 1894). David Kaufmann published a Hungarian essay: "On the Jewish Catechism" (Budapest, 1884; republished in German). Catechisms in Polish were published by S. Dankowitz (Cracow,

**Other Languages.** 1873) and by Joachim Blumenthal (Drohobicz, 1882), and in Russian by J.

L. Klatzko (Warsaw, 1884). Four Hebrew catechisms were published in the second half of the nineteenth century: "Ma'ase Abot" (Vienna, 1896); "Mizwoth Yisrael" (Cracow, 1891); The 613 "Mizwoth" (Presburg, 1859), by J. Landau; and "Ammodet ha-'Olam" for Orthodox schools (Presburg, 1875), by Wilhelm Neuman. The last two were translated into German. Of modern authors of German catechisms may be further mentioned: Lazarus Adler (Cassel, 1872), Ignatz Baek (Leipsic, 1857), S. Baek (Lissa, 1886), M. L. Belinsohn (Odessa, 1878), Hirsch B. Fassel (Vienna, 1864), Wolf Feilchenfeld (Posen, 1874), Joseph Horowitz (Grodno, 1878), Jacob H. Jacobsohn (Leipsic, 1876), L. Kahn (Vienna, 1860), Solomon Kohn (Budapest, 1860, 1873, 1878), E. Bondi (Brünn, 1880, 1885), Jacob Auerbach (Frankfort, 1869), L. Lewysohn (Worms, 1856), M. Levinger (Bremen, 1876), L. Levi (Hechingen, 1877), D. Leimdörfer (Nordhausen, 1876; Frankfort, 1881; Vienna, 1898), Gerson Lasch (Leipsic, 1857 and 1861), Julius Landsberger (Berlin, 1861; 2d edition, 1876), Georg Wolf (Vienna, 1878), Marcus Winter (Vienna, 1860), Abraham Singer (Ujhely, 1875), J. Schwarz (Great Kanisza, 1877), D. Rothschild (Breslau, 1879), Ludwig Philippson (Leipsic, 1844, 1858; Vienna, 1878), Emanuel Mandus (Breslau, 1860 and 1870, Orthodox), A. Kapka (Prague, 1882; 8th edition, Berlin, 1884), D. Kohn (Odessa, 1880), Michael Silberstein (Wiesbaden, 1888), Israel Singer (Ujhely, 1881), H. Sondheimer (Lahn, 1881), Jacob Mautner (Vienna, 1884, 1894, 1896), Ludwig Stern (Frankfort, 1895, Orthodox), Osear Waldeck (pseudonym; Vienna, 1886), M. Spanier (Berlin, 1898), Adolf Weiss (Prague, 1894), M. Zuckerman (Frankfort, 1889), T. M. Caro (Posen, 1883), J. Goldschmidt (Frankfort, 1896), Eisik Bentaivism (Jaffa, 1899), F. Feilchenfeld (Breslau, 1881; 3d edition, Frankfort, 1900), H. J. Schuetz (Cleve, 1854), Eliezer Nathan (pseudonym; Rödelheim, 1804), M. Gottlieb (Frankfort, 1896; Hanover, 1898, part ii.), U. Grünwald (Tilsit, 1893), J. Guttman (Teschen, 1896), Leopold Katz (Ratibor, 1890), H. Lesser (Colberg, 1853), W. Wesely (Prague, 1846), Israel Steinhardt (Arad), S. Stern (Prague, 1893).

**CATECHUMENS, HOUSE OF** (called also **Casa dei Neofiti**): A Roman institution for converting Jews to Catholicism, which the Jews, by means of taxes, were compelled to support. The

Vatican founded this house for converts March 21, 1548 (Rieger, ii. 64), by setting apart various sums from its revenues. By a papal decree of Jan. 1, 1565, certain revenues were to be used for the support of the catechumens, and the fines levied on Jews for possessing scrip certificates of indebtedness, lending money on interest, or engaging in certain occupations were to go to their support also. Under Pius V. forcible conversions occurred in large numbers. His successor, Pope Gregory XIII., continued the institution. Hitherto many Jews became converts through the fear of powers that might be exerted against them; now many took this step in the hope of profiting thereby. For Gregory XIII.

ordained that all church dignitaries should assist the converts by material encouragements and recommendations. Whereas the Vatican had protected these converts up to this time, it was decided that the Jews themselves had now to bear this burden. Sireto, protector of the catechumens or neophytes, was active in his opposition to the Jews. Before the establishment of the House of Catechumens all conversions that took place were voluntary. The House marked the second stage, since it was designed as a retreat and prison for recalcitrant neophytes during the process of transition. Later, when the revenues for the catechumens had fallen to a very low point, conversion by means of the compulsory attendance of Jews three times a year at Christmas sermons against Judaism was begun.

Sixtus V., by a bull of Oct. 22, 1586, permitted the Jews to rebuild synagogues on the earlier sites, provided the contributions for the support of catechumens be not reduced in amount. And Clement VIII. reduced the tax of the Jews of Rome for the support of the House of Catechumens from 2,500 scudi to 800 scudi, whereof 300 scudi fell to the Cloister of Converts.

After the Jews had been expelled from the Romagna, with the exception of Rome and Ancona, those remaining were, in later times, taxed oppressively. In Nov., 1604, the chief rabbi of Rome, Joshua Assouth, with his four children, was forced to enter the Casa dei Neofiti, and the latter were baptized (Rieger, *l.c.* 193). Besides, where the neophyte refused to become a convert voluntarily, force often was applied, and finally the victims were killed by hanging. If they accepted baptism, a grant of money from the government was usually made in addition to the sum derived from Jewish taxes. The catechumens, as a Roman institution, survived until late into the eighteenth century. As late as 1784 sixty Jewish children were thrown into prison because two other children were being hidden from the officers of the Casa dei Neofiti; they had to be given up to release the remainder (Rieger, *l.c.* 253; "Monatsschrift," pp. 399 *et seq.*). The Jewish contributions to the Casa were abolished in 1810 (Rieger, *l.c.* 359).

**CATEGORY** (Greek, *κατηγορία* = מאמר): A term introduced by Aristotle into the philosophical vocabulary, signifying "attribute," "predicate." According to him every word contained in a proposition belongs to one of the following ten categories: substance, quantity, quality, relation, place, time, situation, possession, action, passion. Words being images of objects, it is obvious that every object can be predicated by one or more of these categories. For this reason, after having briefly expounded the categories in the book *Κατηγοριαι*, placed at the head of the "Organon," Aristotle treated this doctrine at length in his "Metaphysics." In the latter book, however, the categories change their characters somewhat, and instead of substance and attributes they represent being and its accidents. Of all the categories, only the first, that of substance which represents the being, has a real existence; the others are only appended to it, describing its qualities. For Aristotle there is no being but the individual being, as perceived by the senses; it follows that the ten categories must be found in every kind of being.

There was no fundamental change in the doctrine of the categories from the time of Aristotle to that of Kant. Plotinus, after a lengthy critique on Aristotle's categories, in the first books of the sixth "Ennead," distinguishes two classes of categories: five of the intelligible sphere, and five of the sensible world. The former are substance, rest, motion, identity, and difference; the latter, substance, relation, quantity, quality, and movement. Though allusions to this classification are to be found in the writings of the Jewish Neoplatonists, the classification of Aristotle was adopted even by the latter.

The first Jew to give an account of the categories was Saadia. In demonstrating the unity of God he analyzes the ten categories and shows that none of them can be applied to God ("Emanot we-De'ot," ii., viii. *et seq.*). Gabirol, in dealing with the nature of matter and form, frequently refers to the categories ("Me'kor Hayyim," § 2, pp. 11 *et seq.*, in Munk's "Mélanges"). Bahya, like Saadia, mentions them in his demonstration of the unity of God ("Ijobot ha-Lebabot," i., vii.) and in the definition of substance and accidents ("Torot ha-Nefesh," p. 6). Joseph ibn Zaddik also points out that none of the categories can be applied to God ("Ha-'Olam ha-Katan," ed. Jelinek, p. 53). Abraham ibn Daud devotes the first chapter of his "Emanah Rammah" to an explanation of the categories. Maimonides frequently refers to them in his "Guide of the Perplexed"; and, like Al-Farabi, he designates them under the appellation of "genus." Jacob Anatoli translated the *Κατηγοριαι* into Hebrew, and gave a full explanation of them in his work on the philosophical terms, entitled "Ruah Hen."

The general term adopted in Hebrew for "category" is מאמר, which is the translation of the Arabic term "maḳalali," used by the Arabian philosophers. Hebrew designations of the several categories, also translated from the Arabic, are: מאמר העצם (substance), מאמר הכמות (quantity), מאמר האיכות (quality), מאמר המצב (situation), מאמר ההצטרפות (relation), מאמר מתי (time), מאמר אנה

(place), מאמר הקנין (possession), מאמר שיפעל (action), מאמר שיתפעל (passion).

**CATHERINE II.**: Empress of Russia; born in Stettin May 2, 1729; died in St. Petersburg Nov. 17, 1796. She was the wife and successor of Peter II., and usurped the throne July 9, 1762.

Within a week of her accession, Catherine was called upon to ratify a decree of the Senate giving the Jews free admission to the interior of Russia. She was liberally inclined; but, having been raised to the throne through the extreme Orthodox party, found herself unable to carry out the suggestion of the Senate, and, in her perplexity, was relieved by having her attention drawn, by Prince Odojevski, to a side-note of Elizabeth Petrovna concerning a similar request: "I will not derive any profit from the enemies of Christ," whereupon Catherine postponed her decision ("Russki Archiv," 1865, p. 492). During the whole reign of Elizabeth Petrovna (1741-1762) the persecution of the Jews had been carried on. Catherine, in her zeal to maintain the traditions of Old Russia, and to flatter its prejudices, could not, with all her liberalism, openly favor the Jews; therefore they were not included in the edict issued Dec.

15, 1762, permitting foreigners to enter and to settle in Russia ("Complete Russian Code," xvi., No. 11,720). Her liberal attitude toward the Jews, however, manifested in her letter,

dated May 11, 1764, to Governor-General Browne of Riga, concerning certain foreign merchants of the New Russian provinces, who came under the tutelage of a bureau, instituted in 1763, for the protection of foreigners. These foreign merchants were to be permitted to live in Riga and to carry on business on the same legal conditions as merchants of other Russian provinces. Furthermore, if any clerks, agents, and workmen should be ordered by these merchants to settle in New Russia, they were to be provided with passports and with an adequate escort, irrespective of their religion. Finally, if three or four persons should arrive from Mitau, on their way to St. Petersburg, with claims upon the government, they were to be provided with passports, simply stating their names, without mentioning their nationality or religion. To prove their identity such persons were to present a letter from the merchant Lewin Wulff of St. Petersburg. To this letter the following postscript is added in German, in the hand of the empress: "Wenn Sie mir nicht verstehen, so wird es meine Schuld nicht seyn; dieser Brief hat der President von der Protection-Canzley selber geschrieben. Halten Sie dieses alles geheim." The "foreign merchants" mentioned in the letter were: the rabbi Israel Hayyim, and his assistant, Nathan Abraham of Birzhi, and the merchants David Levi (Bamberg), Moses Aaron, Behr Benjamin, and Israel Lazer, the "mohel" Lasar Israel, and the laborer Jacob Marcus of Mitau. They were escorted to St. Petersburg. Some of them soon returned to Riga and settled there with

their families and servants (Buchholtz, "Gesch. der Juden in Riga," p. 57).

In this diplomatic manner avoiding the name "Jew," the empress deemed it advisable to usher in the settlement of the Jews into Russia. In another letter to Governor-General Browne she speaks of her great intentions concerning the

**Liberal Attitude Toward the Jews.** Jews, and of his knowledge of these intentions (*ib.* p. 61). In answer to a complaint of Benjamin Bachr, "factor of the Polish, Lithuanian, and Courland Jews," against the municipal

authorities of Riga, Catherine wrote to Browne, Oct. 15, 1765, directing him to inquire whether the council (Rath) in spite of its privileges had the right to oppress such people, who had begun to develop trade in Riga to the benefit of the country, and enjoining that the complainants be protected and their petitions granted (*ib.* p. 65). The "foreign merchants" did not go to South Russia; most of them settled in Riga, and some of them in St. Petersburg. In 1769 Catherine permitted Jews to settle in the New Russian provinces on an equal footing with all foreigners, these being invited to people the deserted South Russian steppes.

With the first division of Poland in 1772, a great number of the Jews of White Russia became Russian subjects. In a manifesto issued by Count Chernishov, the new governor-general of White Russia, in the name of the empress, promised equal rights, without distinction of religion or nationality, to the inhabitants of the newly acquired territories. The phrase, "without distinction of religion or nationality" is used in most of the ukases of the empress. The Russian historian Gradovski emphasizes the fact that Catherine II., having declared, on ascending the throne, her *profession de foi* to rule in the Russian Orthodox spirit, never saw any danger to the Orthodox Church from the Jews and Judaism, as had her predecessors. While she often warned the governors against the Roman Catholic orders, and especially against the "plotting" Jesuits, she did not hesitate (in 1772) to grant religious rights to the Jews ("Otnosheniya k Yevreyam," etc., p. 478, note).

But notwithstanding the magnanimous intentions of Catherine, the Jews were restricted to a PALE OF SETTLEMENT, almost immediately after the rights of equality had been officially granted them. This was certainly not the wish of the empress, but was due to the local authorities and the Senate, which at that time possessed great power in the administration of the empire. While the law recognized the Jews as Russian subjects, granting them equal rights with the other inhabitants throughout the empire ("Complete Russian Code," xix., No. 13,850), administrative decrees were issued, keeping them out of the great Russian provinces. By a ukase of 1776 the rule of the "khalal" was reestablished, and the old poll-tax reintroduced. In 1786 the Senate, in answer to an application of the Jews of White Russia to the empress, issued a decree curtailing the judicial, commercial, and industrial rights of the Jews. That the empress was opposed to the narrow-minded policy of the Senate may be seen from this remarkable decree: "Since the above-mentioned [White Russian] inhabitants, holding the Jewish

faith, have, in virtue of the ukases issued, already entered into a position equal to that of other inhabitants, it is necessary in all cases to observe the rule that every one according to his rank and standing shall be enabled to enjoy his rights and benefits without distinction of faith or nationality" ("Voskhod," Jan., Feb., 1889, p. 45; Gradovski, "Otnosheniya," etc., i. 12). For the inhuman cruelties practised upon the Jews of Uman and other places in South Russia in 1782, Catherine was not responsible.

At the end of Catherine's reign two ukases were issued which bear the signature of the empress, but are utterly opposed to her previous tendencies. The first, dated Jan. 3, 1792, under the

**Restric-tions upon the Jews.** pretext of giving the Jews of Yekaterinoslav and Taurida the same privileges as those given to the Jews of White Russia, prescribes that Jews

can not be admitted into the guild of merchants of Smolensk and Moscow ("Complete Russian Code," xxiii., No. 1706). The second, issued July 4, 1794 (No. 17,224), determines the localities where Jews are permitted to carry on business and trade, thus in an indirect way depriving them of the right to carry on business in the great Russian provinces; it also compels the Jewish merchants to pay a tax for their business and trade licenses in the provinces open to them the double of that paid by Christian merchants. Only the Karaite Jews were, in 1795, exempt from the double tax, and from that time the Karaites enjoyed special privileges.

Thus the reforms introduced by the "Semiramis of the North" affecting the Jews did not, like many other of her well-meant reforms, accomplish the expected results; but through the fault of the narrow-minded officials they rather resulted in establishing the Pale of Settlement in which the Russian Jews are still shut up at the beginning of the twentieth century.

H. R.

**CATHUA:** Name of a family of Nethinim returning from Babylon with Zerubbabel (I Esd. v. 30). In the order of enumeration they correspond to Giddel in Ezra ii. 47 and Neh. vii. 49.

E. G. H.

G. B. L.

**CATTANEO, CARLO:** Italian Christian jurist-consult; born in Milan June 15, 1801; died at Castagnole, near Lugano, Feb. 5, 1869. Although Cattaneo was not favorably inclined toward the Jews, he vehemently protested against the oppressive laws to which the Jews in Italy were then subjected. In a work entitled "Ricerche Economiche sulle Interdizioni Imposte dalla Legge Civile agli Israeliti" (Milan, 1899), Cattaneo demonstrates that the outlawry of the Jews is detrimental to society.

I. Br.

**CATTLE** (Hebrew, מִקְנֵה = "possession"); Term used to denote all domestic animals, the principal possession of nomadic and pastoral peoples.

Cattle were very important in the early life of the Hebrews. The story of Abel, who was a "keeper of sheep," and offered unto the Lord "of the firstlings of his flock" (Gen. iv. 2, 4), is without doubt an indication of the conditions of early times. Abraham, Isaac, and Jacob his sons were "shepherds" in all the significance of the word (Gen. xvi. 34; xlvii. 1, 3, 4, 6); and their respective stories show the importance of cattle in their lives. Their cattle furnished them their dwelling, the tent, their clothing, and their food, the last consisting of milk, cheese, and butter, and, on great occasions, meat. They also supplied them almost exclusively with the material of the sacrifices.

After having settled in the Land of Promise, the Israelites did not entirely abandon their early mode of life. Some tribes, particularly those of Reuben, Gad, and Simeon, continued in the pastoral life, in which they were encouraged by the nature of their respective territories. Others seem to have continued the rearing of cattle, along with their new agricultural occupations. Therefore the herds and flocks were a part of all blessings (Deut. viii. 13, xxviii. 4) and prophecies (Jer. xxxi. 27, xxxiii. 12, 13; Zech. ii. 4). In the ordinary usage of the language, kings were called "shepherds" (II Sam. v. 2, vii. 7; Isa. xli. 28), and the same figurative language is used to describe Providence (Ps. xxiii. 2).

The live stock of the Israelites consisted chiefly of small cattle, horned cattle, and asses. The camel and the horse were not common in Biblical times. Small cattle—*i. e.*, sheep and goats—were the most numerous, since Palestine, like the other Mediterranean countries, was in ancient times, as in modern, well suited to the habits of these animals. They were known by the collective name צֹאן (*zon*; compare the Homeric *μῆλα*; see GOAT, SHEEP). Horned cattle were raised successfully only in well-watered places, as the valley of the Jordan, the plain of Sharon, and, particularly, the western part of Bashan. They were called בָּקָר (*baqar*, "plowers"; compare "armentum," from "arare"; see Ox). Asses were as common as they were good, and she-asses were especially appreciated (Gen. xii. 16, xxx. 43; Josh. vii. 24; I Sam. viii. 16), even after the introduction of the horse (Ezra ii. 66 *et seq.*; Neh. vii. 68 *et seq.*).

Many passages in the Scriptures enjoin on man kindness and humanity toward domestic animals.

God, as Creator and Providence of all animals, gave man sway over them, delegating to him His providence, as well as His dominion. Punishing man, He strikes also the animals; making His peace with mankind, He extends the reconciliation to animals. The firstlings of the domestic animals are His, as are the first-born of Israel. Domestic animals were entitled to their rest on the Sabbath (Ex. xx. 10, xxiii. 12; Deut. v. 14), and during the Sabbatical year were allowed to wander through the fields feeding on the spontaneous products (Lev. xxv. 7; Ex. xxiii. 11). Castration was forbidden, according to Josephus ("Ant." iv. 8, § 40; probably based on Lev. xxii. 24), and, likewise, hybridization (Lev. xix. 19). To plow with an ass and an ox was not allowed, probably because of the superior strength

of the ox, which was the plower par excellence (Deut. xxii. 10). The overladen ass must be relieved of part of his burden, and if he should fall under it, his master must help him up (Deut. xxii. 4). The ox treading out the corn was not to be muzzled (Deut. xxv. 4). A cow or a ewe and her young could not be killed in one day (Lev. xxii. 28). The origin of the command not to seethe a kid in its mother's milk (Ex. xxiii. 19, xxxiv. 26; Deut. xiv. 21) is uncertain. Its purpose seems to have been to deter the Israelites from a heathen custom (see Bochart, "Hierozoicon," pp. 634 *et seq.*; Dillmann, on Ex. xxiii. 19; Nowack, "Lehrbuch der Hebräischen Archäologie," p. 117. Maimonides, "Moreh Nebukim").

During the summer cattle were left in the open air. At night they were driven into pens or folds, for which the Bible has a great variety of names: בַּצְרָה, Bozrah (Micah ii. 12); מִכְלָא, Mikla (Hab. iii. 17 *et seq.*); גֶּדֶרָה, Gederah (Num. xxxii. 16, 24, 36); מִשְׁפָּתַיִם, Mishpetayim (Gen. xlix. 14).

**Shelter at Night.** These pens were sometimes fenced about with stakes; more often, however, they consisted of an enclosure

with a dry-stone wall, to protect the cattle from wild beasts; and occasionally they were provided with watch-towers (II Chron. xxvi. 10). The cattle were counted in the morning and the evening when going out and coming in; and the shepherd was obliged to replace every missing head, unless he could prove that it had not perished through his own fault (Gen. xxxi. 39; Ex. xxii. 12-13; compare Amos iii. 12). In the neighborhood of the pens were watering-places, consisting generally of a well or cistern, with a trough. To dip out the water and fill the troughs must have been one of the hardest duties of the shepherds (Gen. xxiv. 20, xxix. 8-10). During the winter the cattle were sheltered in regular stables (מַרְבֵּק, *marbek*), which were furnished with cribs (אֲבוֹס, *abus*). It is incidentally mentioned that the ox and the cow were generally fed on chopped straw (תֶּבֶן, *teben*, Isa. xi. 1xv. 25), or sometimes on a sour mixture (בֶּלִיל הַמִּיץ, *belil hamiz*), a provender consisting of various grains, mixed with alkaline herbs (Isa. xxx. 24), sometimes like the "farrago" of the Latin (see Bochart, *l. c.* pp. 113, 303; Blau, in "Z. D. M. G." xxvii. 522 *et seq.*). Horses also were fed on chopped straw and on barley. Oats and hay were then, as now, unknown in Oriental countries. Fatlings were probably kept always in the stables, hence the expression, "'egel" or "'egle marbek" (עֵגֶל, *egal*, I Sam. xxviii. 24; Jer. xlvi. 21; see Gesenius, "Thesaurus," p. 1260; Bochart, *l. c.* pp. 302 *et seq.*). Elsewhere fat heaves are called בְּרִיאִים (*Beri'im* = "fattened"), in contradistinction to רְעִי, *re'i* ("heaves of pasture," I Kings v. 3), or מְרִיאִים, *mer'im* (II Sam. vi. 13; I Kings i. 9). There is no evidence that the Hebrews understood the art of breeding with a view to the bettering of the race. Under this heading one would hardly consider the trick of Jacob, used to increase his flocks at the expense of his father-in-law.

**CAUCASUS** or **CAUCASIA** (Russian, "Kavkazski Krai" = the country of the Caucasus): A division of Russia, bounded on the north by European Russia; on the east by the Caspian sea; on the south by Persia and Asiatic Turkey; and on the west by the Black sea. It consists of six governments, four provinces, and two districts. The Jewish inhabitants, according to the census of 1897, numbered 58,471, or 6.3 per cent of the total population ("Voskhod," 1902, No. 3). These figures are probably too low.

The exact number of the Caucasian Jews is not easy to determine. Some of them (in the southern provinces) have adopted the Mohammedan religion; while others (in Georgia) have embraced Christianity. They are also often confounded with Jewish immigrants from European Russia. Von der Hoven estimates the number of the native Jews of the Caucasus to be about 100,000 ("Budushchnost," 1900, No. 52).

The following table illustrates the distribution of the Jews of the Caucasus among the various governments, provinces, and districts according to the censuses of 1886 and 1891-92:

DISTRIBUTION OF JEWS OF THE CAUCASUS.

	Jews.	Per cent of Total Population.
NORTHERN CAUCASUS (1891-92):		
Government of Stavropol.....	1,215	0.4
Province of Tersk.....	4,985	0.6
Province of Kuban.....	5,100	0.3
District Chernomorski (Black sea).....	52	—
TRANSCAUCASIA (1886):		
Government of Kutais.....	7,082	0.76
Government of Tiflis.....	7,632	0.94
Government of Erivan.....	44	0.01
Government of Baku.....	8,603	1.20
Government of Yelisavetpol.....	1,755	0.24
Province of Daghestan.....	9,210	1.46
Province of Karsk.....	—	—
District of Zakatalsk.....	8	—

Some of the Caucasian Jews claim to be descendants of the Lost Ten Tribes of Israel, which were taken captive by Nebuchadnezzar;

**Supposed Descent from Lost Ten Tribes.** while others (particularly the Georgians) are equally certain of their descent from the Israelites who were taken from Palestine by Shalmaneser.

It is hard to determine whether this belief is based upon valid tradition or whether it is of later origin, and an attempt, by means of bad philology, to connect the "Iabor," near which river the exiles were settled, with "Iberia," the name by which the Caucasus is known to classical writers. In the Georgian language the Jews are called "Iuria," a term which is related to "Iberia" (Koeh, "Reise Durch Russland," Preface, p. ix.).

The Russian archeologist and linguist Vsevolod Miller believes that a large Jewish population formerly existed in that part of Media which was later called "Attnrpatkau," and which is at present known under the name of "Azerbeijan," and that this country was probably the cradle of the Caucasian Jews. He thinks that they have preserved the old

Semitic type to a more marked degree than the European Jews. The presence of a distinctive Jewish type among many of the Caucasian peoples has long been noticed by travelers and ethnographers. It is especially interesting, as some of these people, the Armenians, Georgians, and Ossetes, for instance, are not of one and the same race. Baron Peter Uslar suggests that during the past two thousand years Jewish tribes often emigrated to the Caucasus ("Russische Revue," xx. 42, xxi. 300). Miller is of the opinion that in very remote times they emigrated thither from Media. All the Armenian and Georgian historians speak of the existence of a large Jewish population in Transcaucasia until the beginning of the present era.

When St. Nina came to the city of Urbnis in Georgia from Jerusalem in 314, she is said to have spoken to the Jews in the Hebrew language ("His-

Caucasus Jewess and Her Children.  
(After a photograph.)

toire de la Georgie," translated by Brosset, I. i. 31, 37, 54, 64, 93, 100, 104-120). When the Persians took possession of Transcaucasia in 366, the Jews adopted the old Persian language, which they called "Parsee" or "Tat," from which they formed a jargon with an admixture of words taken from the Bible and from languages of local tribes. They write this jargon in Hebrew square characters.

From the Arabic writers Mas'udi, Ibn Haukal, and from the "Derbend Nameh" (a Persian history of Derbend) it is evident that the Arabs, when they

conquered Daghestan in the eighth century, found a large number of Jews there. According to Pantyukhov (probably following Quatrefages, "Observations Anthropologiques au Caucase," Tiflis, 1893, cited in "Archiv für Anthropologie," xxvii. 448.) the Caucasian Jews may be considered descendants of the Chaldeans (early Babylonians), who originally dwelt on the upper Euphrates and in the vicinity of Lake Van, but who in later, though even still remote, times intermixed with the native Caucasians. In the course of time many of these Jews renounced Judaism and embraced Mohammedanism. It is probable that the Chewsures and a portion of the Swanetes and of the Lesghians are of Jewish descent. In the fifth century the rulers of Georgia claimed that their ancestors came from Jerusalem. The Chaldean has little in common with the Arabo-Semitic type. Erckert, as the result of a comparison of the head measurements of the Caucasian Jews with those of the other inhabitants of the districts in which they dwell, gives the following data:

Mountain Jews of the Caucasus.  
(From a photograph.)

CEPHALIC INDEX :

Azerbaijan Tatars.....	79.4	mesocephalic
Georgians.....	83.5	brachycephalic
Armenians.....	85.6	hyperbrachycephalic
Mountain Jews.....	86.7	hyperbrachycephalic

HEIGHT OF HEAD :

Kalmucks.....	62.0
Georgians.....	67.9
Mountain Jews.....	67.9
Armenians.....	71.1

FACIAL INDEX :

Georgians.....	86.5
Kalmucks.....	87.0
Armenians.....	87.7
Mountain Jews.....	89.0

NASAL INDEX :

Mountain Jews.....	62.4
Armenians.....	62.5
Georgians.....	62.9
Kalmucks.....	75.3

If the shape of the head be taken as a standard of a fine type, the mountain Jew may be considered to rank first among the Caucasian races, which are classified by Erckert in the following order: mountain Jews, Armenians, Kumyks, Georgians, Azerbaijan Tatars, Ossetes, Circassians, Tshechentzy, Lesghians, Nogaians, Kalmucks ("Der Kaukasus und Seine Völker," pp. 370-377).

The stature of the Jews in the district of Kuba (government of Baku) is 1,618-1,621 mm.; that of the Jews in the government of Kutais, 1,630; of those of Daghestan, 1,644. These three groups exhibit slightly varying types; they have completely

adopted the language of the people among whom they live (Pantyukhov, *l.c.*).

Mountain Jews ("Bergjuden") are those of the Caucasian Jews who live in villages ("auls") and some towns of the provinces of Daghestan, Tersk, Kuban, and in the governments of Baku and Yelisevopol, and who speak an Iranian language, a dialect of the Tat. The Tats themselves are of Iranian origin, but have intermarried with Jews. They speak the same dialect (Tat mingled with Hebrew) as the mountain Jews. They probably arrived in the Caucasus with the Jews in the times of the Achæmenidae, having been sent to guard the northern boundary of Persia on the Caspian sea. According to Anisimov, the Tats of today were Jews when they arrived in the Caucasus, and they embraced Mohammedanism only when the Arabs conquered the country. They themselves cherish this belief, and carefully preserve their Hebrew books (Hahn, "Aus dem Kaukasus," p. 181).

Hasdai ben Isaac, in his letters to the king of the Chazars (about 960), says that, according to a tradition, the Chazars formerly lived in the mountains of Seir (Serir in the eastern Caucasus). Miller is of the opinion that the Jews of the Caucasus introduced Judaism into the kingdom of the Chazars, and that the Jews of Daghestan originated in Azerbaijan. He refers to Esther iii. 8 and to II Kings xvii. 6. He thinks that old Jewish colonies in the Caucasus existed in Tabasseran and in Kaitak, in which region there is a place still called "Shuit-Katta" (Jewish pass). About three hundred years ago many Jews emigrated thence to Majlis, the capital of the Tatars, and a little later to Jangi-kent (= "New Settlement").

Large Jewish communities existed in the ninth century in Tiflis, Bardaa, Derbend, and other places in the Caucasus. According to Benjamin of Tudela (1160-73), the power of the exilarch extended over all the communities of Armenia, Kota, and Georgia. Guillaume de Rubruquis in 1254 found a large Jewish population in the eastern Caucasus.

The traveler Judah Chorny also concludes that the Jews arrived in the Caucasus before the destruction of the First Temple, and that up to the fourth century of the common era they lived under Persian protection. At the end of the Sassanian dynasty, when Tatar hordes overran Persia, and the Cau-

casian Jews were driven from their homes, the latter came in contact with their coreligionists in Babylonia, and adopted the rabbinical teachings as religious law. Soon they began to study the Talmud, of which they had an intimate knowledge when Eldad ha-Dani (ninth century) visited them. This is also corroborated by Benjamin of Tudela and Pethahiah of Regensburg. In the centuries when the great Talmudic schools flourished in Babylon, many eminent Talmudists lived in Derbent and the ancient Shemacha, in the government of Baku. In many regions in the government of Baku, where at present there are no mountain Jews, ruins of their auls and graves, and traces of irrigation trenches, etc., are to be found. The local Mohammedans still call these ruins by their old Jewish names; *e.g.*, "Chifut Tebe" (Jewish Hill), "Chifut Kabur" (Jewish Grave), etc. In some parts of Daghestan the Mohammedan religion has supplanted Judaism; but in many Mohammedan families are to be found Jewish books inherited from Jewish ancestors.

The Caucasian Jews can not be classed among the Karaites, as they still adhere closely to the Talmud. There is no question, however, that at the present time their Talmudic knowledge is not extensive and that they have added demonology to

**Superstitions and beliefs.** Judaism. Owing to this comparative ignorance they are nicknamed by the European Russian Jews "Byky" (oxen). The Jews of Daghestan and

Baku believe in good and in evil spirits; *e.g.*, Seer-Ovy (the spirit of the water), Ider, Hudur-bai, Kes-sen-bai, and others. The most venerated is the mighty Num-Negyr (the spirit of travelers and of the family), which name signifies "unutterable" (literally, "do not take a name"). A belief in perpetual warfare between the good and the evil spirits is deep-rooted among the Jews as well as among the Mohammedans of the Caucasus. According to Erkert, the Caucasian Jews in the times of the Seleucids were in communication with Palestine. They helped to spread Christianity in Armenia, Georgia, and the highlands of Albania. The mountain Jews are probably later emigrants, who in the eighth century and at the beginning of the ninth settled in the region north of Derbent. It was not until the end of the sixteenth century that they removed to the neighboring Majlis. Another stream of emigrants may have followed about 1180 from Jerusalem and Bagdad via Persia. Erkert and many others are of the opinion that the Caucasian Jews amalgamated at an early date with the native tribes. It is certain that among the peoples of the Caucasus the Jewish type is everywhere represented, and that even among Christian and Mohammedan tribes many Jewish customs and habits have been preserved to the present day. Among the Ossetes the old Mosaic law of levirate marriage still exists, which, according to Chorny, the mountain Jews also strictly observe. Even the outward appearance and the manner of speech of the Ossetes resemble those of the Jews. Many of their villages bear Hebrew names, and the marriage and funeral ceremonies correspond in many respects with those of the ancient Hebrews. The same may be said about the Tshechenty.

The Caucasian Jews differ greatly from the European Jews. Their language, dress, education, employments, and their whole character render them almost a separate people; and they even differ greatly among themselves.

The Georgian, Lesghian, and Ossete Jews differ as much from one another as do the countries in which they live. The Jews of Daghestan have nothing in common with the foregoing, either in

language, dress, mode of life, or moral views. They differ little from the other warlike mountain tribes among whom they dwell. They only differ from their Mohammedan and

Christian neighbors in their adoption of the Tat language. They all dress in the Circassian style, and go about armed with daggers, pistols, and swords; even being armed when they go to bed or when praying in the synagogue. They are skilled horsemen. Their occupations are mostly dyeing, cattle-breeding, gardening, and viticulture. They own small farms, and rent land from their Mohammedan neighbors, by whom they are much oppressed. They raise tobacco, and manufacture excellent weapons. Even their hakams know how to handle the spade, the hoe, and the hammer.

Owing to their persecutions under Mohammedan rule, the mountain Jews in the Russo-Caucasian wars always sided with the Russians; and the Russian government, after the conquest of the Caucasus, in acknowledgment of their valuable services, granted them equal rights with the other Caucasian tribes. Lately, however, these rights have been curtailed.

In contradistinction to the mountain Jews, the Georgian Jews have always exhibited great patriotism, and have fought against the Russians. Their love for the fatherland is as proverbial as their bravery in war. Notwithstanding his warlike character, however, the Georgian

**Mountain and Georgian Jews.** Jew becomes penitent and humble in the synagogue. Here he may be seen to weep for the unfortunate destiny

of his coreligionists scattered over the world. Georgian Jews are found in Tiflis, Kutais, Suran, Karasubazar, and the surrounding villages. Besides the Georgian and mountain Jews, mention should here be made of the Caucasian **SHABBOTNIKI** (Sabbatarians), who are probably descendants of the Chazars. Their type is more Slavonic than Semitic, but their mode of life is Jewish: they not only keep the Sabbath strictly, but also observe all the Mosaic laws and many rabbinical precepts. In Tiflis in 1894 their community numbered thirty families, besides many who lived outside the village and occupied themselves with cattle-breeding, agriculture, and the cultivation of the vine. They have the same prayers as the Russian Jews, but use the Russian language instead of the Hebrew. Some of them send their sons to Wilna for a higher rabbinical education. They consider it a great honor to intermarry with rabbinical Jews; but such marriages are rare. The Georgian and especially the mountain Jews deem it beneath their dignity to intermarry with the **Shabbotniki**.

In recent years, with the improvements in com-

munication, outside interest in the Caucasian Jews has become more extensive. Their coreligionists have endeavored to spread culture among them, while the Zionist organizations have established some schools for the rational study of Hebrew. For further details reference may be made to the articles on the respective cities, provinces, and peoples. See also ARMENIA and CHAZARS.

G.

H. R.

**CAUL.**—**Biblical Data:** Nowadays applied to the membrane surrounding the human fetus; used also in other senses. In the Bible: 1. A rendering of the Hebrew שְׂבִימִים, the second on the list of toilet articles worn by the women of Jerusalem (Isa. iii. 18). Schröder emends this to "shemisim," which he compares to the Arabic "shumaisah" (little sun). It would then mean an article of jewelry, perhaps a pendant. It is quite possible to take it to designate nets used as adornments for the hair. The Septuagint gives it this sense; and the Targum reproduces the word, which by Mishnaic usage is confirmed as a net for the hair (see Levy, "Neuhebr. Wörterb." iv. s. v.).

2. Used in an anatomical sense of the enclosure of the heart, perhaps of the pericardium (Hosea xiii. 8).

3. Most frequently, however, it is used to translate "yoteret," a word occurring frequently in the priestly regulations and in connection with the liver. It is best taken to mean the fatty mass surrounding the liver. This was always included (Ex. xxix. 13, 22; Lev. iii. 4, 10, 15; iv. 9; vii. 4; viii. 16, 25; ix. 10, 19) in the burnt offering.

E. G. H.

G. B. L.

—**In Rabbinical Literature:** According to the A. V., it was the caul, with some other parts of the sacrifice, that was burned on the altar. For we read: "And thou shalt take all the fat that covereth the inwards, and the caul that is above the liver, and the two kidneys, and the fat that is upon them, and burn them upon the altar" (Ex. xxix. 13; compare references below). The Hebrew term here

rendered "caul" is "yoteret" (יתרת), always occurring in connection with "kabel" (כבד = "liver"); this "yoteret" is variously translated by earlier and later scholars. Thus, the Septuagint renders it "the lobe of the liver"; and so do Josephus ("Ant." iii. 9, § 2), Gesenius ("Dict." s. v.), Kohut ("Aruch Completum," iii. 476, s. v. הַצֵּר כֶּבֶד), Jastrow ("Dict." p. 572), and the Karaites (see Aaron b. Elijah, "Gan 'Eden," Shehitah, xxi.). This rendition does not seem to correspond with the phraseology of the original. Of the eleven Biblical passages containing the term "yoteret," seven are mandatory (Ex. xxix. 13, 22; Lev. iii. 4, 10, 15; iv. 9; vii. 4), and the remaining four (Lev. viii. 16, 25; ix. 10 [where the preposition כִּן, "from," is used], 19) are narrative. In six of the former (the only exception being Ex. xxix. 22), yoteret is described as being situated על הכבד ("over the liver"), which can not be said of a lobe or of any part of the liver itself. Were the preposition על ("above," "over," "upon") absent in the mandatory clauses as it is in the narratives, it might be assumed that "yoteret" is in the construct state, and the phrase יתרת הכבד would really mean "the pendant (יתר = 'redundant,' 'hanging over'; i. e., 'lobe') of the liver." But the presence of the preposition in the six mandatory clauses precludes this construction, and consequently also this rendition.

That the narrative clauses do not embody the preposition does not prove the contrary. The narrator simply relied on the exact designation conveyed in the mandatory passages. The yoteret must, therefore, be looked for among the viscera adjacent to and over the liver. Leeser finds it in the midriff; and this partly agrees with Rashi's definition, as explained by Kohut (*l. c.* iv. 94, s. v. טרפיט; compare Jastrow, *l. c.* 557b, s. v. טרפיטא), "Rothfleisch," the fleshy filers connecting the midriff with the costal cartilages. But, as even the midriff is not directly over the liver, a double layer of tissue intervening between them, the A. V. renders the phrase by "the caul over the liver." This definition is supported by the Vulgate, and agrees with that of Rashi (to Ex. xxix. 13, according to Musaphia, in "'Aruk," s. v. טרפיט), and with the translations of Zunz (Arnheim), Luzzatto, Fürst (in *Lev. l. c.*; in *Ex. l. c.* he translates "happen"); and by it is meant that part of the caul which forms the duplicature extending from the transverse fissure of the liver to the lesser curvature of the stomach, technically called the "gastrohepatic" or "small omentum" (compare Strack to Ex. xxix. 13; Kautzsch, *Ex. and Lev. l. c.*; contrast Kohut, *l. c.*, s. v. הַצֵּר כֶּבֶד). Some object to this definition, because the small omentum is devoid of fat; but as the Bible never includes the yoteret under the fats, this objection is not tenable (compare Sifra, Wayikra, Hovah, ix. [ed. Weiss, p. 21b]; Pesik. Zutza to Lev. iii. 10; Hastings, "Dict. Bible," s. v. "Caul"; Cheyne, "Encyc. Bibl." s. v. "Caul"; see SACRIFICE).

The Karaites include the yoteret among the animal parts forbidden to the Jews as food (see Aaron b. Elijah, *l. c.*; Elijah Bashyazi, "Aderet Eliyahu," Shehitah, xviii.); rabbinic law, however, knows of no such prohibition (see Hul. 117a; Rashi, *ad loc.*, s. v. יתרת; Pesik. Zutza, *l. c.*; Maimonides, "Yad," Ma'akalat Asurot, vii. 5; Nahmanides to Lev. iii. 6 *et*

sey.). That the caul mentioned by Josephus ("Ant." iii. 11, § 2) in connection with such a law does not mean the yotercet is evident from his naming the caul and the lobe of the liver as distinct parts devoted to the altar (*ib.* iii. 9, § 2). What he means is doubtlessly the epiploon, or the fatty membrane constituting the gastrocolic or great omentum. The same is meant by Herodotus (ii. 47), who mentions the caul in connection with an ancient Egyptian sacrifice to the moon.

S. M.

**CAUTION (דַּוְיָן):** Warning given to witnesses before testimony. Neither Biblical nor rabbinical law requires a witness to confirm his testimony by an oath. Jewish casuists are of opinion that the witness who would not tell the truth without an oath would not scruple to depose a falsehood with an oath (Tosef., *Kid.* 43b, *s. v.* "Hasha": compare Josephus, "B. J." ii. 8, § 6).

Instead of an oath, rabbinical law prescribes in criminal cases a preliminary caution or admonition, in the course of which the witnesses are exhorted to testify to such matters only as have come under their personal observation, and are warned not to state anything based on imagination or hearsay. They are told that the court will subject them to a careful examination and a searching cross-examination. Finally, the formal caution laid down in the Mishnah (*Sanh.* iv. 5; Maimonides, "Yad," *Sanh.* xii. 3) proceeds as follows:

"Know ye that the responsibilities devolving upon the witness in criminal cases are vastly more serious than those of the witness in civil suits. In civil suits a man makes good the losses sustained through his falsehood, and is for-

**Responsibilities of Witness.** given: but in criminal cases the blood of the victim of falsehood and the blood of his possible offspring to the end of time, which is cut off by his undeserved death, fall on the head of the false witness. That such is the case is evident from God's rebuke administered to Cain, who slew his brother (Gen. iv. 10), where it is said, 'The voice of thy brother's bloods cry unto me.' Now, since the Bible says 'Thy brother's bloods (דַּוְיָן אֲבִיבֵי), and not 'Thy brother's blood,' it teaches that Cain was considered guilty of shedding the blood of Abel's possible progeny, as well as that of Abel himself. Also the fact that, at the beginning, God created one man only, should teach thee that whosoever destroys a single innocent life is as guilty as if he had destroyed a whole generation; and that, on the contrary, whosoever saves a single innocent life is as meritorious as if he had saved a whole generation. . . . Say not, however, 'Why should we mix ourselves up in these troubles?' Scripture declares (Lev. v. 1), 'The witness who hath seen or known, and doth not tell it, shall bear his iniquity.' Nor must ye scruple about becoming the instruments of this man's death. Remember the Scriptural maxim (Prov. xi. 10), 'When the wicked perish there is shouting.'"

The object of the closing admonition is to remind the honest man of his duty to bear witness even against a person tried for his life, to impress upon him the verity that the escape of the guilty is an injury to the innocent, while the punishment of the wicked is a benefit to the public. Therefore, although the criminal's deed can not be undone, no mawkish compassion should prevent

**Object of Warning.** the giving of testimony leading to conviction (Deut. xix. 13; Sifre, *l. c.* 187); therefore, too, the honest witness must not scruple to testify against the accused, in the event of whose conviction he, the witness, must act as executioner (Deut. xvii. 7; Sifra, *Kedo-*

shim, viii.; Sifre, Deut. 89). See CAPITAL PUNISHMENT, WARNING.

**BIBLIOGRAPHY:** Maimonides, *Yad ha-Hazaqah, Sanh.* xii. 3. E. C. S. M.

**CAVAILLON:** Small town in the department of Vaucluse, France. In his book, "Réponses de Rabbins Français et Lorrains" (Vienna, 1881), Joël Müller mentions (No. 17) a rabbi of Cavailion, Eliezer ben Judah, pupil of Isaac ben Menahem, who lived at Orleans in the second half of the eleventh century. It also appears from the same book (Nos. 21, 22) that the celebrated Rashi of Troyes was in correspondence with the scholars of Cavailion. Gross ("Gallia Judaica," p. 591), however, maintains that the passage refers not to Cavailion, but to Châlons-sur-Saône. However that may be,

The Old Synagogue at Cavailion.  
(After a photograph.)

it is certain that Jews were living at an early period at Cavailion. A Jew named Jaquiellus was a tenant of crown lands in 1303 (Bardinet, "Revue Historique," 1880, xiv. 36). A document of the year 1372 mentions five Jews who, in the name of the community, rendered homage to the bishop, to whom the Jews of Cavailion paid an annual quitrent for the houses and lands owned by them in his territory (*ib.* xii. 44. 46).

In 1453 the Jews were relegated to a special quarter ("Inventaire des Archives de la Communauté de Cavailion," No. 127). The year 1485 was an unfor-

tunate one for the Jews of Cavaillon. Imitating the inhabitants of Arles and Taraseon, the Christians of Cavaillon fell upon the Jews and pillaged their property ("Rev. Et. Juives," vi. 35).

Toros of Cavaillon, one of the three wardens of the Jewish community of Avignon in 1400, is identified by Steinschneider with the physician Todros of Cavaillon, the author of a pharmacopeia written partly in Hebrew and partly in Latin (Renan-Neubauer, "Les Ecrivains Juifs," p. 725). Something is known of another scholar of Cavaillon, Jacob Léon, for whom Moses Farissol Botarel in 1465 wrote a treatise on the calendar. Gross (*l.c.* p. 539) identifies this Jacob Léon with Jacob of Cavaillon, at whose suggestion Mordecai Durant Farissol copied, in the same year, a part of Levi ben Gerson's book, "Milhamot ha-Shem."

Cavaillon was one of the four communities ("arba' kehillot") having a special ritual of prayers (see CARPENTRAS), this being edited in 1767 at Avignon, by Elijah Carmi, a teacher at Carpentras. A new edition of this liturgy was published in 1855 at Aix, by Michel Milhaud.

The lists of the Jews of Carpentras ("Rev. Et. Juives," xii. 193-212) contain the names of a number of Jews called after the town of Cavaillon. In 1413-1414 there were also at Perpignan Jews who came originally from Cavaillon (*ib.* xiv. 75). At Arles R. Joseph of Cavaillon was in 1385 a member of the rabbinical college of judges in the scandalous trial mentioned in the article on CADENET, Provence. R. Isaac ben Nathan of Cavaillon was in 1582 a member of the rabbinical court of Fossano, Italy. A document of the same year, relating to the excommunication of the woman Bonastorga of Carpentras, bears the signatures of Bongoias de la Rocca and David Cohen of Cavaillon ("Rev. Et. Juives," x. 82). At Cavaillon, in 1713, lived the poet Gad ben Judah of Bédarride, author of a thanksgiving prayer preserved in the ritual of Avignon (Zunz, "Z. G." p. 466).

The old community has almost disappeared, only three Jewish families residing in Cavaillon in 1901. The synagogue, which was repaired in 1774, has been preserved. It rests partly upon an archway under which a street passes; and this arch was probably once the gate to the ghetto. The synagogue closely resembles that of Carpentras.

**CAVALLERO, CAVAGLIERO** (קבלירה (קאבלירר): Name of a family, with branches in Provence, Africa, Turkey, and Italy.

**1. Abraham ben Judah Cavallero:** Lived at Fez between 1688 and 1700.

BIBLIOGRAPHY: Steinschneider, *Hebräische Bibl.* xvi. 62.

**2. Isaac Cavallero:** Talmudic scholar. He began the study of the Talmud at Salonica about 1630, and was a fellow-student of David Conforte ("Kore ha-Dorot," ed. Cassel, 52b). He is probably not identical with the Isaac Cavallero who was a preacher at Venice in the second half of the seventeenth century, and whose sermons were published by his relative Judah ben Joseph Perez under the title "Nahal Eitan" in the "Perah Lebanon" (Berlin 1712).

BIBLIOGRAPHY: Azulai, *Shem ha-Gedolim*, ii. 121.

M. K.

**3. Isaac de Don Shem-Tob Cavallero:** Italian scholar; son of Shem-Tob Cavallero; flourished at Venice at the end of the sixteenth and beginning of the seventeenth century. He was the author of "Orden de Oraciones" (Venice, prior to 1583), an edition of the prayer-book according to the ritual of the Spanish and Portuguese Jews, and containing the Hebrew text with a translation into the Spanish vernacular; a second edition, to which the "Declaracion de los Puntos" was appended, was published at Venice in 1622. The "Orden de Oraciones" was placed upon the "Index Librorum Prohibitorum," edited by Caspar á Quiroga (p. 69b, Madrid, 1583).

**CAVES IN PALESTINE:** By "me'arah" (מערה) the Hebrew designates natural caves. The mountains of Palestine, which for the greater part are formations of soft limestone, abound in natural caves and grottoes. Most of these have developed from an initial fissure or crack in the rock, which, widening, in time became the channel of a subterranean stream. But as the latter changed its bed in the course of years, a large, dry, hollow passageway was finally left. In many places the skill of man has completed the work of nature. This has been the case more particularly east of the Jordan, and especially in the Hauran. In the latter district, artificial caves are very numerous (see Wetzstein, "Reisebericht über Hauran und Trachonitis," pp. 22, 44 *et seq.*, Berlin, 1860).

These caves are historically of the highest interest. Undoubtedly they served for the original habitations

of prehistoric man. In the cave where the Nahr-al-Kabir takes its rise, in the grottoes at the bridge across the river near its mouth, and

**Caves in Prehistoric Times.** again in the Ferraja grotto in the district of Kesrawan, etc., flint knives, arrow-heads, and fragments of pottery

have been found, of essentially the same kind as those unearthed in Europe; while the remains of animals are largely of species that are now extinct or have disappeared from the region. This circumstance points to a time when the climatic conditions were evidently different from those now prevailing; it presupposes a temperate, if not a semi-arctic, climate. Formerly it was the common opinion that the entire people of the Horites, who, anterior to and contemporaneously with the Edomites, inhabited the mountain of Seir (Deut. ii. 12, 22; Gen. xxxvi. 20), were troglodytes, their name being connected with הֹרִי "hur" (hole, cave). It is not probable, however, that this may be applied to a whole people, and it is certainly more correct to identify הֹרִי, "Hori," with the Egyptian "Haru," the designation of southern Syria.

Caves were used: (a) as dwellings, and (b) as burial-places. (a) Even in historic periods, long after houses had become the common

**Caves in Historic Times.** abodes, caves served, especially in time of war, as places of refuge or as natural fortresses (compare Josh. x. 16 *et seq.*; Judges vi. 2; I Sam. xiii. 6; Ezek.

xxxiii. 27; I Macc. i. 56). Robbers made them their hiding-places; shepherds used them for folds, and as dwellings when the flock was at large; and travelers rested in them at night.

(b) The custom of using the caves for burial-places dates from the earliest times. The entrance was closed with large stones in order to protect the bodies against men and animals. Perhaps the best known of these burial-places is the Machpelah cave at Hebron, which Abraham bought from the inhabitants for a burial-plot for himself and his family (Gen. xxiii.). The descendants of David had their plot in the caves on Zion. Even to-day a large number of vaults in the rocks around Jerusalem show how wide-spread was this custom among the ancient inhabitants of Jerusalem (see BURIAL).

Tradition locates the so-called Machpelah cave in the eastern part of the present Hebron, on the edge of the valley, and the mosque

**Important Caves in the Bible.** which now stands there is supposed to enclose it. It is certain that this refers to a holy spot of great antiquity, whose associations antedate Josephus

(compare Buhl, "Geographie Palästinas," pp. 161 *et seq.*). There is some difficulty in reconciling the Machpelah tradition with that of the Mamre oaks at Hebron, and it is not improbable that these two traditions date from different epochs (*ib.* pp. 160 *et seq.*).

The cave of Makkedah (Josh. x. 16 *et seq.*), where five kings are said to have hidden in the days of Joshua, is probably identical with one of the caves near the village Al-mughar, southwest of Ekron. That of En-gedi, where the encounter between Saul and David occurred (I Sam. xxiv.), can not be definitely located. On the old road northwest of En-

gedi (I Sam. xxiv. 2) several caves may be seen today; e.g., Magharat al-Nasraniyyah and Magharat al-Sakf. It is probable that the cave of Adullam (מְעַרַת עֲדֻלָּם) owes its name to a scribal error, the true reading of the passage, I Sam. xxii. 1, 4 being מְעַרַת מְצוּדָה (compare I Sam. xxii. 1, 4 and II Sam. xxiii. 13, 14).

W. N.

**CAYENNE or FRENCH GUIANA:** An island of South America, and a town of the same name situated on this island that lies at the mouth of the Cayenne or Oyaque river, in the Atlantic.

A band of Jews settled in Dutch Guiana as early as 1644. They were chiefly immigrants from Holland, who had arrived two years before from Amsterdam, under the lead of Isaac ABOAB and Moses Raphael de AGUILAR. After the capitulation of Recife Jan. 23, 1654, when all Dutch possessions in South America, excepting Dutch Guiana, were ceded to Portugal, the Jews having supported Holland in the struggle for supremacy (1623-54), were compelled to leave BRAZIL. Many of them returned to their native country, whither their conquerors accorded them a safe-conduct; others migrated to New York or the West Indies, and the majority of them, under the captainship of David Nassy, a native Brazilian and a cultured and influential man, settled at Cayenne, in French Guiana. The directors of the West India Company, alive to the possibilities of such a colony, and eager to encourage Jewish settlements everywhere, granted them, under date of Sept. 12, 1659, a most liberal Charter of Privileges ("Vrijheden onder Exemption"), wherein freedom of thought, liberty of conscience, and political autonomy were vouchsafed to the new colonists headed by David Nassy, who was the accredited representative of the company. This document, one of the most remarkable in American Jewish history, numbers 18 paragraphs and has been published at various times (see bibliography). Attracted by these generous inducements, the colonists thrived, and encouraged their coreligionists in Holland and elsewhere to join them. In 1660 one hundred and fifty-two Jews of both sexes arrived from Leghorn, Italy (on the 9th of Ab = August), and among them was the famous poet, historian, and litterateur Don Miguel Levi de Barrios, who afterward visited the West Indies, where his wife Deborah died. The colony prospered for nearly five years, but owing to the constant wars between Holland and Portugal and to the frequent depredations of the French, the settlement was, on May 15, 1664, transferred to SURINAM, Dutch Guiana, where it flourished for two centuries, with occasional interruptions. Among the "Articles and Conditions" of surrender, agreed upon and signed by the French and the Dutch, March 15, 1664, when the island was ceded to France, we read that the Jews stipulated, among other things, "that the expenses incurred by the patron (patroon) and individuals of the Hebrew colony shall be repaid them," and that they be given "the free and public exercise of their religion."

It was on the Ile du Diable, off the coast of Cayenne, that Capt. Alfred Dreyfus was imprisoned.

CEDARS OF LEBANON.  
(From a photograph by Bonfils.)

raélite Universelle, and at the age of eighteen was commissioned to establish and direct several primary schools in the East; namely, at Volo in Thessaly (1869), at Smyrna (1873), and at Tunis (1878-93). In each of these places he took part also in the organization of the communities. At Tunis especially the official organization of Judaism by the government of the French protectorate was his work. Since 1893 he has been in Buenos Ayres, Argentine Republic, serving as a member of the administrative committee of the colonization fund founded by the Baron Maurice de Hirsch under the name of the Jewish Colonization Association.

**CEDAR** (אַרְז): A tree of the pine family frequently mentioned in the Old Testament, where the "cedar of Lebanon" is generally meant. The cedar-tree grows best in a high, dry, and sandy region, and it found these requirements in the northern part of Palestine in the Lebanon district. In this district there are to be seen trees that reach a girth measurement of no less than forty-two feet. The tree spreads its roots among the rocks, and thus secures a strong hold. From this hold the tree sometimes grows to a height of ninety feet, but this scarcely gives an idea of its size, for the cedar usually grows horizontally, the limbs out from the

stem as well as the branches out from the limbs. The leaves are dark green, about an inch in length, and are evergreen; the shade they make is broad and dense. The wood of the cedar-tree is valuable for building purposes, since the oil in it prevents destruction by dry-rot and worms. Cedar-oil was used by the Romans for the protection of their manuscripts.

Various were the uses to which cedar was put in Biblical times. It was used by Solomon in building the Temple (1 Kings vi. 18), the inside of which was all of cedar, no stone being visible. On the outside, also, cedar was used (1 Kings vii. 12). The altar was made of the same wood (1 Kings vi. 20). Later on it was employed in building the Second Temple (Ezra iii. 7). From Ezek. xxvii. 5 it is clear that cedar was used in the making of masts. In religious service it was used in cleansing the leper (Lev. xiv. 4, 49, 51, 52) and in the ceremony of the Red Heifer (Num. xix. 6).

It is natural to find so striking a tree introduced as a favorite figure of the Biblical writers. A maiden describes her lover as a choice cedar (Cant. v. 15). Oftentimes a strong nation is compared to the cedar; for example, the Amorite (Amos ii. 9) and Assyrian (Ezek. xxxi. 3). In Zech. xi. 2 it is a synonym of "powerful." The strength of the cedar as well as of the leviathan is brought out in Job xl. 17. Another favorite figure is based on the luxuriance of the growth of the cedar. A flourishing land is evidenced by the presence of the cedar (Isa. xli. 19); and the prosperity of the righteous is compared to it (Ps. xcii. 13 [A. V. 12]).

In Num. xxiv. 6 cedar is mentioned as growing beside water. This seems to be impossible; but it is to be noticed that the term "cedar" was applied very often to trees that were really not cedars. In Rosh ha-Shanah 23a the statement is made that the inhabitants of Palestine called ten different trees cedar.

G. B. L.

**CEDRON:** 1. Name of the brook Kidron as given in John xviii. 1. Near the stream was the garden in which Jesus was taken by the officials after he had been betrayed by Judas (see KIDRON).

2. A place mentioned in connection with Jammia (the "Jabneh" of II Chron. xxvi. 6) and fortified by Cendebeus at the command of Antiochus (I Macc. xv. 39). From Cedron as a base, Cendebeus began to ravage Judea. According to the account of Josephus ("Ant." xiii. 7, § 3), Simon Maccabeus, although at this time quite old, himself led the attack and drove back Cendebeus; but, according to I Macc. xv. 39-41, xvi. 9, Simon delegated the command to his sons Judas and John. Judas was wounded, but John continued the pursuit to Cedron and thence to Azotus (Ashdod). Cedron is perhaps the same as Gederoth (Josh. xv. 41; II Chron. xxviii. 18), and to be identified with the modern *Ḳāṭra*, three and one-half miles southwest of Ekron, the modern *ʿAḳīr*.

G. B. L.

**CELIBACY:** Deliberate renunciation of marriage. In the Old Testament there is no direct reference to the subject. The prophet Jeremiah was a celibate (Jer. xvi. 2). He seems to have regarded it as futile to beget offspring doomed to death in the impending national catastrophe (*ib.* iii. 4). The pessimistic author of Ecclesiastes, although no admirer of woman (Ecc. vii. 26, 28), counsels "enjoying life with a woman whom thou lovest" (*ib.* ix. 9).

In post-Biblical literature Jewish opinion stands out clear and simple: marriage is a duty, and celibacy a sin. "The world was created to produce life; He created it not a waste, He formed it to be inhabited" (Isa. xlv. 18; *Git.* iv. 5 = *Eduy.* i. 13). "Be fruitful, and multiply" (Gen. i. 28) is taken as a command; marriage with a view to that end is a duty incumbent upon every male adult (according to some the duty devolves also upon woman; *Yeb.* vi. 8; Maimonides, "Yad," *Ishut*, xv.; Shulhan 'Aruk, *Eben ha-'Ezer*, i. 13).

Abstention from marital intercourse on the part of the husband exceeding a legitimate limit, which varies with the different occupations, may be taken by the wife as ground for a divorce (*Ket.* v. 6, 7). A single man who is past twenty may be compelled by the court to marry (Shulhan 'Aruk, *l.c.* i. 3). Isserles adds that this custom is obsolete. Exception is made in favor of a student, who may postpone marriage until a time when his education is complete and beyond the possibility of being endangered by the cares incident to procuring a livelihood (*ib.*; the source is *Kid.* 29b). "He who is without a wife is without joy, without blessing, without happiness, without learning, without protection, without peace; indeed, he is no man; for it is written (Gen. v. 2), 'Male and female created He them, and called their name Man [A. V., "Adam"]'" (*Yeb.* 62b, 63a; Shulhan 'Aruk, *l.c.* i. 1, note). "He who is not married is, as it were, guilty of bloodshed and deserves death: he causes the image of God to be diminished and the divine presence to withdraw from Israel" (*Yeb.* 63b, 64a).

The only known celibate among the rabbis of Talmudic times is Ben 'Azzai, who preached marriage to others, but did not practise it himself. "My soul is fond of the Law," he is reported as having said; "the world will be perpetuated by others" (*Yeb.* 63b). Regarding the passages which appear to indicate that Ben 'Azzai was married (*Ket.* 63a; *Sotah* 4b), see *Tosef.*, *Ket. s. r.* ברתיה, and *Yeb.* 63b, *s. r.* שיתקיים. The excuse is recognized by the Shulhan 'Aruk (*l.c.* i. 4); it is by no means recommended to follow an example which, at best, is considered exceptional. According to Josephus ("B. J." ii. 8, § 2) marriage was repudiated by some of the Essenes. Inasmuch as intercourse with woman was regarded as polluting, the aspiration to the highest degree of Levitical purity and sanctity may have led them to the rejection of marriage. There is nothing in Jewish literature to parallel *Matt.* xix. 12 in phraseology or motive (Dalman, "Worte Jesu," p. 100). Paul's views on celibacy may be found in I Cor. vii. See ASCETICISM, ESSENES.

M. L. M.

**CELSUS** (Κέλσος): Greek polemical writer against Christianity; flourished in the second century. He was the first pagan who denounced Christianity, and in his work, "The True Word" (Λόγος Ἀληθής), he attempted not only to refute but to ridicule the doctrines of Christianity. Although the work has been lost, large fragments of it are preserved in the apology of Christianity ("Contra Celsum," in eight books) written by Origen in answer to Celsus. An attempt was recently made by Keim and Muth to reconstruct the original from these fragments. Origen was not clear as to the person of Celsus; he mentions two Epicureans by that name, one of whom was said to have lived under Nero and the other under Hadrian; and it was against the latter that he directed his polemic. In designating his opponent by the opprobrious epithet of "Epicurean," Origen was misled by his prejudice; for Celsus, according to his own teachings, was an eclectic, following Plato and perhaps also Philo. Moreover, he must have lived after Hadrian's time, probably flourishing about 180 under Marcus Aurelius (161-180), since he mentions the Marcionites and the Marcellians. Lucian, who also denounced Christianity, dedicated to him his "Alexander, the Lying Prophet" ("Alex." xxi.).

In the first book of Celsus from which Origen took his extracts, a Jew, introduced by Celsus, addresses Jesus; in the second book, the Jew **Celsus and the Jews.** addresses his Jewish coreligionists who have embraced Christianity; and in the remaining six books Celsus speaks in his own person. All this shows, as Mosheim says, that Celsus mingled with the Jews, getting from them the story of the life and passion of Jesus. Yet the Jew introduced knew so little about his own religion as to describe it often incorrectly; hence his introduction in the work is merely a rhetorical device, and Celsus himself is the speaker, promulgating opinions which he had heard or learned from Jews. Whether he reproduced mere verbal assertions of the Jews (compare Origen, "Contra Celsum," vi. § 27, and Justin, "Dial. cum Tryph." pp. 10, 17, 108), or information from written Jewish sources, can hardly be determined. Keim believes that Tertullian ("De Spect." xxx.) had a written Jewish polemical work before him; but it is certainly wrong to assume that Celsus used the "Toledot Yeshu."

Celsus was by no means friendly to the Jews, regarding them as slaves escaped from Egypt. He denounced their history, especially that contained in Genesis, as foolish fables (iv. 5, § 2), affirming that sensible Jews and Christians look upon these things as allegories. He knew the divine names "Adonai" and "Sabaoth," the rite of circumcision, and the command against eating pork; and he ridiculed these and similar laws. Although understanding why the Jews should cling to their own laws, he thought Christians foolish for renouncing Hellenism in order to become converts to a false doctrine. He compared the disputes of the Jews and Christians about the Messiah with the dispute about the shadow of the ass (iii. 1, § 2), and asked whether Moses or Jesus was right, since the latter countermanded what the former had ordained.

It has been assumed that Celsus' work contained material not to be found elsewhere; but he knows no more than is found in the Gospels, as has been proved. All beyond this is merely an addition to what has been called the Jesus myths.

Yet there are connections between Celsus and Judaism that must be emphasized; e.g., he asserts that Jesus was the illegitimate son of a certain Panthera, and, again, that he had been a servant in Egypt, not when a child, as according to the New Testament, but when he was grown, and that he learned there the secret arts (i. 9, § 7). These statements are frequently identical with those of the Talmud. Celsus might have heard this from the Jews; he makes his Jew say that he could tell more about Jesus if he chose. Origen, however, rightly explains this phrase as a rhetorical device (ii. 3, § 1). Celsus agreed with the Jews in the chief points of their controversy with Christians, denying the divinity of Jesus, declaring all the marvelous stories about him to be fables similar to those of Greek mythology, and saying that the Jews were right in refusing to accept Jesus, especially as he was betrayed even by his own disciples, and left helpless into the hands of his enemies.

Origen had no single historic fact to oppose to Celsus' assertions; he too knew only what the Gospels recount, but he interpreted them

**Origen.** as a faithful Christian, and explained allegorically even the difficult passages in the Old Testament. Celsus gave all the ideas on miracles, angelology, and demonology current at his time even among the Jews; so that his treatise is important also for the study of Judaism.

S. KR.

**CEMETERY:** A place for the burial of the dead. The word "cemetery" is derived from the Greek κοιμητήριον, "the place where the dead sleep" (from κοιμάω ("to sleep"), used of the dead in I Kings xi. 43, LXX.; II Macc. xii. 45; Ecclus. (Sirach) xlvi. 19, xlvi. 13; Matt. xxvii. 52; I Cor. xv. 20, and is applied almost exclusively to Jewish and Christian graveyards (see Eusebius, "Hist. Eccl." vii. 11, 13; "Apost. Const." vi. 30; and Herzog-Hauck, "Real-Encyc." s. v. "Koimetarien"). In Hebrew it is variously termed: בית הקברות ("the place of sepulchers," Neh. ii. 3; Sanh. vi. 5), בית עולם ("house of eternity"; "long home," Eccl. xii. 5, A. V.), or בית עלמין (Eccl. R. x. 9; Targ. Isa. xlii. 14; Yer. M. Ḳ. i. 80b), and בית חיים ("house of the living," after Job xxx. 23 and Isa. xxvi. 19). The modern euphemistic name is "the good place," and among Polish-Russian Jews "the pure place," Non-Jewish names are: "hortus Judeorum" (garden of the Jews), probably from the trees surrounding the graves (Abrahams, "Jewish Life in the

Middle Ages," p. 77); "mons Judaicus" (Jewish hill; Berliner, "Gesch. der Juden in Rom," ii. 14); and "Juden-Sand" or "Sandhof" (sand-yard.)

The ancient law (see BURIAL) required the burial-place to be at least fifty ells distant from the nearest house (B. B. ii. 9); the place for the cemetery

At times, however, the cemetery was at a great distance from the town (Berliner, *l.c.*; Abrahams, *l.c.*). In fact, it was frequently the case that many townships (יישובים = "settlements") had one cemetery in common. The London cemetery was the only one in England up to 1177; the Hamburg Jews had

THE OLD CEMETERY OF THE COMMUNITY OF FRANKFORT-ON-THE-MAIN.  
(From a photograph.)

was therefore selected as remote as convenient from the city (Luke vii. 12). In Talmudical times the tombs were either in caves—hence

**Site.** כְּעֵרְהָא, frequently the name for a cemetery (M. K. 17a; B. M. 85a; B. B. 58a)—or hewn out of rocks; and the site was marked by a whitewashed stone (צִיץ, Shek. i. 1) to warn passers-by against Levitical impurity. MAUSOLEUMS, MONUMENTS, and inscribed TOMBSTONES, though not unknown, were exceptional. In the Middle Ages the Jewish cemetery was as a rule situated at the extreme end of the ghetto, the hospital and other communal buildings being frequently erected in the neighborhood. The limited area often made it necessary to inter bodies above those previously buried; and thus the rule became general to leave a space of six handbreadths between them (Tur Yoreh De'ah, 363, after Hai Gaon, and Sifte Cohen to Yoreh De'ah, 362, 4).

The Jewish cemetery in London in 1285 was within the city walls and was surrounded by a protective wall (Abrahams, *l.c.* p. 78), as was one in Rome (Berliner, *l.c.* i. 14; compare *ibid.*, ii. 62).

bury their dead in Altona; the Amsterdam Jews, in Ouderkerk (Schmidt, "Merkwürdigkeiten," vi. 38, § 2; Jacobs, "Jews of Angevin England," p. 62); the Jews of both upper and lower Bavaria, in Regensburg (Berliner, "Aus dem Leben

der Deutschen Juden im Mittelalter," **Medieval Cemeteries.** p. 118); and the municipality often imposed a tax for the right of burial (Stobbe, "Rechtsverhältnisse der Juden," p. 21).

In ancient times the cemetery was a necropolis consisting of family sepulchers, and common burial-grounds, in which criminals had special sections assigned to them (Sanh. vi. 5; compare "the potter's field," Matt. xxvii. 7). In the Middle Ages the area was often limited, but the dead were as a rule buried in a row (Yair Bacharach, Responsa, No. 239). Rabbis and men of distinction were placed in a special row (see Feuchtwang, in Kaufmann Gedenkbuch, p. 370; and HOLDHEIM). On the other hand, baptized Jews and persons of evil repute, as well as suicides, were buried in a corner outside of the line (Shulhan 'Arukh, Yoreh De'ah, 345 and 362). In regard to the direction in which the head was

placed custom differed: some preferred it toward the east; others toward the west or south; others, again, toward the exit of the cemetery (see Horowitz, "In-schriften des Alten Friedhofs," Introduction, iii.). Each cemetery had, as a rule, a place for the ablution of the dead, called the **TAHARAH HOUSE**, in which the prayers were also recited and the **HAḲKAFOT** made. Adjacent to this hall or house lived the keeper, whose duty it was to watch the cemetery to prevent profanation.

In Talmudic times the cemetery was visited on fast-days for the sake of offering prayer at the graves of the departed, "in order that they may intercede in behalf of the living" (Ta'an. 16; Yer. Ta'an. ii. 65a; compare Soṭah 34b); and this remained the cus-

ing of graves with flowers (see the report of a bitter controversy in Löw's "Ben Chananjah," 1858, pp. 433-442). A singular custom in the Middle Ages permitted first-born animals, which were held too sacred for private use (Yoreh De'ah, 309, 1), to pasture in the cemetery (Schudt, *l.c.* vi. 8, 39). On the other hand, the cemetery was an object of fear and superstition, inasmuch as it was regarded as the dwelling-place of spirits and demons (Isa. lxx. 4; Matt. viii. 28), and dangerous to remain in overnight (Hag. 3b; Nid. 17a); wherefore cabalists deprecated the idea of women—who since Eden's days have had a special predilection for the archfiend—visiting the cemetery.

On entering a cemetery the following benediction

tom throughout the Middle Ages (see Isserles, *Shulhan 'Aruk*, Orah H'ayyim, 459, 10, and 481, 4; Schudt, *l.c.* vi. 38, 78; Berliner, *l.c.* pp.

**Sacredness of the Cemetery.** 118 *et seq.*). Any occupation showing disregard of the dead, such as eating,

drinking, profane work, even the wearing of tallit and tefillin, or the use

of a scroll of the Law, is forbidden in the cemetery; nor may the vegetation growing there, or the ground itself, be used for private purposes (Meg. 29a; *Shulhan 'Aruk*, Yoreh De'ah, 367, 3-4, and 368). The non-use of the grass, however, often led to total neglect of the cemetery, which gave it a very dreary aspect not at all in keeping with its original design.

In Talmudic times great care was bestowed upon the cemetery; so that the saying became current, "The Jewish tombs are fairer than royal palaces" (Sanh. 96b; compare Matt. xxiii. 29, and Selüner, "Gesch." 3d ed., iii. 14). Orthodox rabbis in modern times, however, have strongly objected to the deck-

ing is to be recited: "Blessed be the Lord our God, King of the Universe, who created you in justice, who maintained and supported you in justice, who caused you to die in justice, and who recorded the number of you all in justice, and who is sure to resuscitate you in justice. Blessed art Thou, O Lord, who revivest the dead" (Ber. 58b). Compare an older and milder version in Yer. Ber. ix. 13, and Tosef., Ber. vi. 5: "Blessed be He who recordeth the number of you all. He shall judge you all, and He shall raise you all. Blessed be He who is faithful in His word, the Reviver of the Dead." Compare also Pesik. R., ed. Buber, 46b, and Baer's "Abodat Yisrael," p. 586. For other prayers composed later, see "Ma'abar Yabbok," compiled by Aaron Berechiah of Modena; L. Landshuth, *סדר בקור חולים מעבר יבן וספר חיים*, Berlin, 1867; and B. H. Ascher, "The Book of Life," 4th ed., London, 1874. A manual of prayers and devotional readings upon visiting the cemetery was prepared by the

New York Board of Jewish Ministers, and published (1898) under the title of "The Door of Hope."

The fate of their cemeteries forms one of the most tragic chapters in the tragic history of the Jewish people. Every massacre of the living was, as a rule, followed by furious attacks on the dead in their graves and by a wanton spoliation of the tombstones. Graveyards, though regarded as asylums by the pagan Roman and Teuton alike, were not sacred

tered tombstones and of graveyards long concealed from sight, have brought considerable material to light, with which the historian is enabled to reconstruct in part the history of "those that sleep in the dust" and to revive their memory. See CATACOMBS and TOMBSTONE INSCRIPTIONS.

**Tragic Fate** many eye-witnesses, quoted in Zunz, *of Jewish "Z. G."* pp. 396-401, tell the same **Cemeteries.** sad story of the Jewish cemeteries.

Most of the tombstones were scattered about the cities and used for building and other purposes; and only occasionally were the lines of an inscription recorded by the historian. There is consequently little hope that the history of the old Jewish communities will ever, like that of buried cities of old, be unearthed. Nearly every trace of the ancient cemeteries and settlements has been wantonly effaced. Still, a few scanty records saved here and there, and occasional discoveries of scat-

**CENSER:** An implement shaped like a bowl or a pan, intended for the burning of incense. In the English Bible the term is employed indiscriminately to render two Hebrew words which seem to have denoted different objects. One of these words, "mikteret," occurs only three times (once in the variant "mekatterot," II Chron. xxx. 14). This, according to its etymology, indicated a censor which was among the appointments of the Temple required for the performance of holy offices. The other word, "mahtah," is mentioned in the Bible twenty-one times. In the English version it is rendered thirteen times as "censer," four times as "fire-pan," three times as "snuff-dishes," and once as "snuffer." Derived from the root "hatah" (to gather together coal or ashes), it was probably the name of various contrivances intended to remove the ashes or to carry live coals. Dillmann and Knobel contend that it was the saucer in which the snuffers were deposited. In Ex. xxv. 38 it stands for ladles used to remove the burnt portion of the wick (see Rashi on the passage). These may have been of small size. The larger ones in connection with the altar for burnt offerings (Ex. xxvii. 3; Num. xvii. 3 et seq.) may more properly be rendered by "fire-pans." From Mishnah Kelim ii. 3, 7 it is evident that various forms of these were known; some being open without rims, while others, designated as "complete," were provided with raised rims

The mahtah was, as a rule, not used to burn incense. From the documents, as now incorporated in the Pentateuch, it appears that only on the golden altar, or, as it is also called, "the inner altar," could incense be offered (Ex. xxx. 1-7; xl. 26, 27). The critical school has indeed contended that the inner or golden altar was not recognized in earlier times. But this does not weaken the evidence of the documents to the effect that in post-exilic periods censers were not proper utensils for the burning of incense. The story of Korah's adherents (Num. xvi. 17, 18), as well as Ezek. viii. 11, proves that in the opinion of the later days the use of the mahtah for this purpose was regarded in the light of an illegal profanation.

But the mahtah was used in conveying incense to the altar. An exception to this was in the ritual for the Day of Atonement. The high priest filled the censor with coals from the altar and, placing upon them a handful of incense, caused the smoke to cover the mercy-seat of the Ark in the Holy of Holies (Lev. xvi. 12, 13). These "pans" were of bronze, silver, and gold. Mishnah Tamid v. 5 indicates that those in the Temple were complicated in construction and of costly material (see also Yoma 43b).

**CENSORSHIP OF HEBREW BOOKS:** Censorship is the regulation, first decreed by the Church and then carried out either by that institution or by the state, whereby books (both manuscript and printed) were examined for the purpose of ascertaining whether they contained heretical or other objectionable passages. Upon this examination depended the conditions under which a book might be used or printed, or its condemnation. If a book was unconditionally rejected, it was laid under the ban, and all copies that could be found were destroyed. If a book was authorized conditionally, all the words and passages that the authorities found objectionable had to be expunged, being either omitted entirely in works that were about to be printed, or rendered illegible in those that had already been set up. Censorship, however, as regards the books of the Jews, is generally taken to mean only the revision, expurgation, or purification (זיקוק) of the text undertaken in Italy by persons appointed by the Inquisition.

The word "censura," in the sense of objection to questionable passages, is found from the middle of the fifteenth century. "Censor" was the title of the official appointed by the Church to decide, after examination, whether a book was beyond all revision, and hence would have to be prohibited, or whether it could be revised and allowed to circulate after expurgation. But for the examination of Hebrew books before printing there were no censors, in the exact meaning of the word, in the sixteenth and seventeenth centuries. Such censors, employed by the state, are not found before the second half of the eight-

eenth century, and then not in Italy, the chief seat of censorship, but in the territory of Austria. Since the beginning of the nineteenth century they are met with in Russia also. The description "censor" is not once found added to the signature in the numerous certificates of censorship of Hebrew books that have come down from Italy; but "reviser" ("revedetor," 1557; "reveditor," 1597; "riveditore" and "revisore" in the seventeenth century) is the usual title, and, as an exception, "expurgator" (1627). It would be more correct, therefore, to speak of the "revisers" than of the "censors" of Hebrew books in Italy. The three converts appointed by the bishop of Mantua to revise the Hebrew books are only occasionally (and then incorrectly) designated as "censores," in a document dated Aug. 27, 1595 (printed by Stern, "Urkundliche Beiträge," No. 158). Evidently none of them ever bore the title "censor" or added it to his signature.

There was no censorship for Hebrew books appointed and authorized by the Church as such. For even after a most careful expurgation the books of the Jews were not to be given such ecclesiastical authority as was conferred upon non-Jewish works when revised and certified by censors.

**No Censorship Proper.**

Therefore the persons employed to examine the Hebrew books were not considered by the Church as censors in the full meaning of the word.

The censors (using the term in its common acceptance) proceeded as follows: The Hebrew books were demanded from their Jewish possessors in the name of the Inquisition, and were handed over to the local office. Concealment of books was rigorously punished, not only by seizure of the books and by large fines, but, under certain circumstances, also by imprisonment and by confiscation of property. The books collected were examined by the appointed revisers, who destroyed the interdicted ones, and punished their possessors. The objectionable books were then expurgated and restored to their owners with a certificate of censorship. The Jews had to provide the costs of the censorship; that is, the payment of the revisers. It was forbidden, on pain of heavy punishment, to restore the expurgated words, or to supply the missing passages between the lines or in the margins.

All passages which, in the opinion of the revisers, contradicted the doctrines, regulations, or customs of the Christian Church, or contained blasphemies, heresies, or errors, were condemned. Thus they rendered illegible in Hebrew books any account of Christians and baptized Jews, clericals or heretics, the uncircumcised, Judaphobes, or observers of strange rites (עוכרי עבודה זרה), unless the context showed unmistakably that only the idolatry of antiquity, and not Christianity, could be intended. They also expurgated all references to Judaism as the one true religion in contrast to all the others; all mention of the Messiah to come; any passages of Scripture interpreted apologetically in favor of Judaism, or polemically in an anti-Christian sense; all complimentary epithets (as, for instance, קרוט צדיק =

"pious," "holy") when applied to the Jewish race, to a Jewish community, or to individual Jews, especially to Jewish martyrs (in the Latin edition of Benjamin of Tudela's "Itinerary," expressions like "bonæ, felicitis," or "probandæ memoriæ," etc., following the names of rabbis; "honesti viri," following "Judæi"; "saera" before "synagoga," etc., are also condemned by the papal index of 1612). The revisers also deleted any reflection on non-Jews and non-Jewish matters, or even a commendation of Jews or Judaism, that could be construed into a reflection on the opposite parties; all expressions like מלכות הרשעה, רומי, ארומ, מין ("wicked kingdom" "sectarian," "Roman," "Edom," "stranger"), that really or apparently referred to Christians and Christianity; all mention of the word הלמוד ("Talmud") or of the euphemistic phrase ירום הורו ("may his dignity be exalted"; usually applied to rulers), and similar expressions, when appended to the names of non-Christian rulers.

The words to be expurgated were scored through more or less heavily with pen and ink, and sometimes were rendered quite illegible by means of cross-lines. In consequence of this heavy crossing with acid ink, the paper in the course of time frequently crumbled, as was especially the case with prayer-books, Bible commentaries, and liturgic works, wherein many so-called anti-Christian passages were treated with unusual severity. At the same time, in many other cases, the ink of the expurgator has in the course of centuries gradually faded and revealed the original text. The application of printing-ink, to render the passage completely and permanently illegible, seems to have been an invention of nineteenth-century censorship. Occasionally the objectionable passage was emended, not by being stricken out, but by the addition of one or more words, such as של after

**Proceedings in Detail.**

עבורים = עובדי כוכבים ומולות) צלמים עבדו, "worshippers of the stars and constellations"), in order to exclude any possibility of applying the word צלמים to the holy images of the Christians. Sometimes a totally unobjectionable word was substituted for that erased by the reviser: thus, instead of נבי, that might be referred to the Christians, was inserted the word בותי ("Cuthæan") or בבבלי ("Babylonian"); and for עבודה זרה, abbreviated into עז ("strange rite"), which might also mean Christianity, was substituted עבודת אלילים, abbreviated ע"א ("idolatry"). Still, such emendations can hardly have been made by the Christian revisers, on account of the trouble connected therewith; they were probably undertaken by the Jewish owners themselves, either under compulsion or as a precaution. From the end of the sixteenth century, whenever a large part of the text of a folio, of a page, or even of a column was considered objectionable, the reviser, not taking the trouble to strike out the several expressions and passages, preferred to deal summarily by cutting or tearing out the whole folio or a part of it. This explains for example the absence of several folios from the middle (ch. iii., § 25) of Joseph Albo's "Ikkarim" in most of the Italian copies of the first three editions.

In several cases it has been definitely stated that the revisers lightened their work either by correcting

EXPURGATED PAGE FROM "SEFER SHA'AR HA-SHAMAYIM," OF GERSHON BEN SOLOMON, PRINTED AT VENICE, 1547."

*frase criticativa & pazzica vidit oca volumine etc*  
 or approbavit. אבן עזר

HOLOGRAPH APPROBATION OF THE CENSOR VINCENTIUS MATELICA ON FRONT COVER OF "SEFER SHA'AR HA-SHAMAYIM."

only one copy of each book, and using that as a pattern for all the other copies of the same edition, or by employing the so-called "Index Expurgatorius" (ספר היוקיק), a list of passages to be expunged, prepared either by themselves or other experts.

When the work of expurgation was finished, a short certificate by the censor, in Latin or in Italian,

occasionally in Hebrew, and in Italian and Hebrew, was affixed to the last page of the book, or sometimes to the title-page. The oldest censor's note extant is as follows: "1555 Die 10. dec[em]bris Reuisus per D[ominum] Jac[obu]m Geraldini comis[sarium] ap[ostoli]c[um]. C[æ]sar Belliossus Curie Ep[iscopali]s Bonon[ensis] et dieti D[omini] Comiss[arii] not[ari]i vicar[ius], which may be translated: "Dec. 10, 1555, Jac. Geraldini, apostolic commissioner, revised this book and C[æ]sar Belliossus, notary (and vicar?) testified to this by his signature to the bishop of Bologna and to the above mentioned commissioner." There is a similar endorsement of the episcopal notary at Reggio made in 1556 by order of the above-mentioned apostolic and ducal commissioner Geraldini.

The earliest censor's certificates (and even those as late as 1604) were formulated, at the request or with the consent of the ecclesiastical authority, by the notaries or the vicars of the Inquisition, who sometimes added the information that the inquisitor N. N. authorized the book, and that he (the notary or vicar) signed by order or in the place of the former. Toward the end of the sixteenth century, and less often during the seventeenth, the local inquisitor signed alone, sometimes adding a statement to the effect that he had commissioned the reviser N. N. to look through the book. In 1594 a reviser (Hippolitus Ferrarensis of Cremona) testified to the effect that the book revised by him had been passed by the Inquisition with the permission of the vicar N. N. A double signature to the same revision is also often found; as, for example, that of the reviser commissioned by the Inquisition, and below it that of the inquisitor by whom the order was given (end of the sixteenth century, at Turin); or that of the reviser, and below it that of the notary (1600).

Beginning with 1557, censors' certificates of the reviser—who sometimes adds that he has revised the book by order of the inquisitor (1590, 1622; Ancona, 1629) or of the Inquisition (1687)—are found side by side with these censors' certificates signed on the authority of the Inquisition by its officials, which, however, were declared inadmissible by the Roman Curia from the end of the sixteenth century. Sometimes, instead of the signature of the reviser himself, that of another person occurs (1622), with the remark that the revision has been undertaken by order of the appointed corrector, N. N., or that the book has been revised by another in the presence of the signer, by order of the inquisitor. A curious entry of the year 1566 is found, to the effect that Rabbi Judah ha-Dani revised the book with the permission of the Inquisitor of Alexandria, Vincentio Perera. The books revised at Mantua in 1597 often have the signatures of two revisers, Domenico Irosolomitano and Alessandro Scipione. In most cases, however, the expurgation

is testified to by one signature only, often containing merely the name of the expurgator, but occasionally other matter, as date, place, the nature of work done (correction, expurgation, revision, seldom approbation), and details of the commission (middle of sixteenth century): Vittorio Eliano, baptized grandson of the famous grammarian Elijah Levita of Venice wrote: "De ordine dei Essecutori contra la Biastema" (by order of the Executive Commission against Blasphemy); others wrote: "1622, by order and in the name of the bishop"; "1623, by the order of Rome"; "1683, by order of the archbishop of Urbino"; "1754, by order of the magister Sacri Palatii." The following protest, written in 1640-41 by the corrector Girolamo da Durallano, in the name of the possessor of the book is an exception: מלוח בללות לנאי על עבו"ם לא על הנוצרים נרפסו, probably meaning that expressions of disdain (בללות, probably misspelled for קללות) have been applied not to Christians, but to idol worshipers. Once, in 1754, in addition to the certificate of the reviser, Peruzzotti, there occurs a warning to the owner of the book (who has affixed his signature thereto), that the restoration of the erased words is forbidden on pain of a fine of 100 scudi.

As the censorship of Hebrew works was never given an authoritative character, the Church refusing any responsibility for conscientious expurgation, books that had

**Renewed Revision.** once been revised and attested could be again demanded for censorship,

either by the Inquisition of another place, or even by the same local Inquisition. Frequently books are found containing five different censors' certificates within half a century; hence it is evident that the certificate of expurgation was by no means equivalent to an ecclesiastical sanction of the expurgated book. The repeated domiciliary visits and revisions of books in the sixteenth century may have been due to the suspicion that some Jews owned prohibited books, such as Talmud treatises. But even after experience had shown how groundless these suspicions were, the authorities did not cease to demand Hebrew books. Even works published with the permission of the authorities ("con licenza dei superiori"), and, hence, examined and sanctioned before printing, had to be produced again and again for purposes of censorship. Furthermore, the conscientiousness of the earlier revisers was sometimes doubted; and they were openly accused of superficiality and negligence in correcting, of unreliability, and even of bribery. It became evident at each new revision that, in spite of the censor's certificate, many books had, either accidentally or intentionally, been left wholly or almost intact: for, on the one hand, much offensive matter had not been expunged; and, on the other, many erased passages had been restored by means of chemicals or had been written in the margin, the severe interdiction notwithstanding. One local inquisition distrusted the other; one inquisitor, his predecessor; all mistrusted the baptized revisers and the Jewish owners. This distrust, increased by repeated denunciations and by the prevailing inclination to harass the Jews, led in Italy to repeated domiciliary visits and to the confiscation or renewed expurgation of Hebrew books

in the old territory of the Pontifical States in 1753 and 1754. This last extensive book-inquisition marked the end of expurgatorial censorship in Italy.

The rules followed in the expurgation became more and more stringent as time went on. The revisers up to the end of the sixteenth century were much more lenient than those who came after; and the latter, again, were not so rigorous as the revisers of the seventeenth and eighteenth centuries. A list of the general rules to be observed in expurgating Hebrew books is found in the preface to the ספר הויקוק, of which (as now known) only five copies are extant in manuscript. This book, written in Hebrew, is an "Index Expurgatorius"

**Principles of Censorship.** for several hundred Hebrew books, and was begun in 1594 by an anonymous Capuchin. It was finished in 1596 by Domenico Irosolomitano, who

made additions, bringing it down to 1612. Finally it was further enlarged in 1626 by the reviser Renato da Modena. It was not used, however, until the seventeenth century. Although theoretically there was a definite agreement as to the methods to be followed in expurgating a book, practically the revisers acted most arbitrarily; so that frequently different copies of the same book were severely scored by one censor and hardly touched by another. No similarity of treatment was observed even by the same censor. At one time he would be severe, at another lenient; at one time thorough, and at another lax. Chance and bribery also came into play. As the revisers were paid by the Jews, and were mostly poor converts to whom money was a consideration, the Jews bought their good-will in order to save the books from being mutilated; hence the revisers were often bribed to certify to the expurgation, though the books had hardly been touched.

Numerous blunders were made by the generally ignorant censors of the sixteenth and seventeenth centuries. The following striking ex-

**Ignorant Censorship.** amples, unlike the fictitious illustrations which, given first in the "Literaturblatt des Orients" (v. 548, vii. 231), have been widely copied, are

genuine and attested. Laurentius Franguellus (1575) strikes out the word תלמוד ("knowledge," not "Talmud") in the prayer "Let us heed all the knowledge of Thy law," את כל דברי תלמוד תורתך; the verse of the Psalm מארצו גוים; and similar Biblical passages, in which ארם. גוים occurs, as though these passages referred to Christianity. Luigi di Bologna (1602) deletes the words שרי לגלחו in the book תרומת הדין (ed. Venice, 1545, § 86), where the cutting of the hair is referred to. Hence he read לגלחו and took it to mean a cleric (גלח). In the book פסקים וכתבים (ed. Venice, 1546) the same censor strikes out the first words in ברוך ושרץ ברזו. ("He who bathes while he holds an insect in his hand,") which he here connected with Christian baptism. Giovanni Domenico Vistorini (1609) deletes the Biblical passage ולא תלכו בחקות הגוים in the book ספר מצות גורל (Venice, 1547, fol. 10). In Abraham ibn Ezra's preface to his Pentateuch commentary the words משיח וישועה וכל מין are stricken out by several expurgators, who evidently took them to

refer to the Messiah, to Jesus, and to all Christians, while, in reality, two Karaite commentators, Mashiah and Jeshua, and similar sectaries, are meant.

The extent of the work of a busy censor may be estimated from a manuscript notice of Domenico Irosolimitano, probably of the year 1612 (in Porges copy of "Sefer ha-Zikkun"), which states that he had expurgated 21,167 (read "22,167") printed books, 4,311 manuscripts, and 2,533 books, partly printed and partly in manuscript; a total of 29,011 works.

The first notice of Jews having been forced to expurgate alleged blasphemies against Christianity dates from the middle of the thirteenth century. On Aug. 19, 1263, King Jacob of Aragon ordered all the Jews within his domain to delete within three months all the so-called objectionable passages found

**History of Expurgation.** in their books either by themselves or by Paul of Burgos. Failure to obey the command would entail the destruction of the books and a heavy fine. Books of the fifteenth century also show many

omissions in the text, gaps not filled in, and textual emendations, which are due either to previously expurgated manuscript copies or to Jewish expurgation made before printing. In 1426 the Jews of Savoy expunged from their Talmud copies and prayer-books passages pointed out as objectionable by the Inquisition. In the second half of the fifteenth century the Jews in the duchy of Milan expurgated their prayer-books in order to anticipate the denunciations of the apostate Vicenzo. When compared with earlier editions, printed books of the first half of the sixteenth century also show many omissions, indicating a Jewish anticipatory expurgation; but whether this was undertaken from fear or by order of the authorities is not certain.

Eight months after the Talmud was publicly burned at Rome (Sept. 9, 1553), a papal bull (May 29, 1554) commanded the Jews, on pain of heavy punishment, to give up within four months all books containing alleged blasphemies or vituperations against Jesus; but they were allowed to retain other Hebrew books that contained no objectionable passages. Hereby expurgation of all Hebrew books was naturally assumed without being expressly demanded. An ecclesiastical decision from Rome, given through the "Escentori contra la Biastema" in Venice toward the end of 1553, declared, in answer to the question which Talmudic books apart from the Talmud proper should be burned, that the non-Talmudic books should be revised by Christians who knew Hebrew.

The first one officially appointed for this work was the baptized Jew Jacob Geraldino (Geraldini), proposed by the Jews themselves and made apostolic commissioner by the pope in 1555. In 1556 he was appointed dual commissioner by the duke of Modena. Another convert, Andrea de Monte, appointed not by the pope, but at the request of the Jews, was soon associated with him. Their work was merely superficial; and it gave subsequent censorial authorities much cause for complaint. Probably, in order to lighten the work of the expurgators, the rabbi Abraham Provenzale of Mantua began (1555) a list of passages to be expurgated, but did not

get beyond thirty books, mostly Bible commentaries.

In order to anticipate the censorship by correcting the texts before printing, the printing establishment founded at Cremona in 1556 engaged as reviser Vittorio Eliano, a baptized grandson of the grammarian Elijah Levita. The Jews were so glad to save their non-Talmudic books from expurgation, that they willingly made great pecuniary sacrifices in order to soften the severity of the expurgators. There was a tendency in the Roman Inquisition, however, to restrict as much as possible the number of books permitted to be expurgated. When, in 1559, the first papal index of prohibited books appeared—which included the Talmud with all its compendiums, glosses, notes, interpretations, and expositions—the vicars of the Inquisition at Cremona (Sixtus of Siena and Hieronymus of Vercelli) endeavored to give to it the widest possible interpretation. On complaint of the Jews of the duchy of Milan, however—to which Cremona at that time belonged—most of the non-Talmudic books were restored, although grudgingly. The two above-mentioned vicars demanded a high price for the revision of the returned books, made either by themselves or by others, and in addressing the duke the Jews could unhesitatingly say that the two revisers had cared more for the money than for the expurgation.

The index of Pius IV. of Trent, which appeared March 24, 1564, permitted the Jews to use Hebrew and even Talmudic books, provided they were printed without the word "Talmud," and were purged from vituperations against the Christian religion. The expurgation of Hebrew books, thus expressly declared admissible, was henceforth regularly undertaken before printing, either by the Jews themselves or by Christian correctors; and this accounts for the more or less mutilated state of reprints since the middle of the sixteenth century.

Although the expurgation of Hebrew books and manuscripts was undertaken about 1560-74 in accordance with instructions of the Inquisition, it was certified to neither by the signatures of the Inquisition nor by those of the expurgators. There is a single certificate (1566) that the rabbi "Jehodah" of the tribe of "Dan" expurgated a book by permission of the Inquisition. As late as 1589-90 it must have been customary in Mantua not to sign censors' certificates; for not a single signature by Alessandro Scipione is extant from this period, although in 1589-90 he corrected and revised all the Hebrew books in that city. The statement in Neubauer's "Catalogue of Hebrew Manuscripts in the Bodleian Library" (Index, "Censors"), that Laurentius "Franquella" signed censors' certificates as early as 1571, seems to be due to an error in reading the date; the signature of Laurentius Franguellus, who was one of the busiest revisers of whom there is record, is not found before Nov. 1574.

In 1571 the first papal Index Expurgatorius for non-Jewish books appeared. For Hebrew books busy expurgators doubtless used a similar index, as it would have been a waste of time to correct every book afresh page by page. None of these Hebrew indices, however, not even the "Sefer ha-Zikkuk,"

already mentioned, received the authorization or ecclesiastical sanction granted to the Index Expurgatorius for non-Hebrew books. For, although the Church declared the expurgation of Hebrew books indispensable, neither the Roman Congregation of the Index, existing since 1571, nor the Congregatio Sancti Officii of Rome, founded 1588, nor any pope would vouch for the correctness of the expurgation undertaken by the Christian revisers, who were generally of Jewish origin; nor would they confer upon the purified texts the approbation of the Church. Furthermore, the opinions of the Church in regard to the admissibility and value of the expurgation of Hebrew books were continually changing, not only with successive incumbents of the papal chair, but at times even with one and the same pope.

By permission of Pope Gregory XIII. the censored (mutilated) edition of the Babylonian Talmud appeared at Basel in 1578-81 with many of its passages changed beyond recognition, a scandalous instance of Roman censorship. But even this "purified" Talmud did not receive ecclesiastical approbation, but was merely tolerated. In the third quarter of the sixteenth and in the first half of the seventeenth century extraordinarily large numbers

**Vacillation** of Hebrew books were expurgated. **in Cen-** Notwithstanding the many annoyances and the heavy expenses connected therewith, the Jews were glad to be able to save their books from destruction, and to be protected against the punishment attendant upon the use of non-expurgated books.

The customary inconsistency of the papal court was now again shown in the continual wavering between leniency and rigor. At the instance of the Jews, who shrank from no trouble and no sacrifices, Pope Sixtus V., in 1540, ordered a renewed expurgation of the Talmud by the Index commission, and the rules to be followed were formulated; but the year after Sixtus' death the Roman Inquisition wrote that the expurgation of the Talmud was a ridiculous and useless work. In 1592 the Inquisition repeatedly declared, in accordance with the wishes of Pope Clement VIII., that the Jews had no right to keep any Hebrew books except the Bible and grammars. A year later, however, a bull of the same pope limited the prohibition to a few Talmudic and cabalistic books, together with some other Hebrew books and manuscripts—already condemned by his predecessor—which could not be permitted, even under the pretext that they had been expurgated. A papal writ of April 17, 1593, allowed the Jews six weeks in which to expurgate other books that had not been expressly forbidden. The bishops and local inquisitors, confused by these contradictions, waverings, and changes of the chief authority, treated the books of the Jews according to their own

**Papal** personal likes or dislikes, rather than **Inconsist-** in accordance with the severe or lenient injunctions from Rome. As **ency.** early as 1591, and more frequently since then, inquisitors were censured and threatened because they had participated in the expurgation of Hebrew books, and had affixed their signatures to them.

In 1641 the work of expurgation was relaxed in Italy. The old Hebrew books and manuscripts had been repeatedly expurgated; the newly printed books were by a rigorous censorship purified of all objectionable matter before publication, and after that were generally again examined by expurgators. Yet the monk Antonio Francisco Enriquez, appointed by the archbishop of Urbino, was still busily employed as expurgator (1683-88).

In the eighteenth century, after an interval of more than sixty years, the work of revision was resumed with renewed zeal throughout the papal dominions, by Giovanni Antonio Costanzi, actively assisted by Philoip Peruzzotti (1753-54). Costanzi was scribe in the library of the Vatican, and the author of the large catalogue of its Hebrew manuscripts that appeared in 1756 under Assemani's name. During the interval of rest, the Jews had undone the work of the censors by restoring the expunged or omitted passages. Though this was a dangerous thing to do, punishable not only by confiscation and large fines, but also by long imprisonment, as in the case of Rabbi Solomon Abi'ud Basila in Mantua, 1733, yet the Jews could not resist the temptation. They were suddenly dumbfounded when, at the instigation of Costanzi, searching domiciliary visits in quest of Hebrew books were made in all the ghettos of the pontifical states. The Hebrew books, without exception, were collected and divided into three classes: (1) those permitted without reserve, which were immediately returned; (2) those permitted conditionally, returned after having been revised and paid for; and (3) those absolutely unreviseable, which were confiscated. Whenever several copies of the same book had to be revised, the reviser corrected merely one copy, which he signed; the Jews were then obliged to correct all other copies by this one, and to bring them to the reviser for his signature.

After the arduous work of revision had been completed an edict was issued, in 1755, for the Pontifical States, either prohibiting Hebrew books entirely or permitting them under certain restrictions. Costanzi planned to formulate exact rules for the censorship of such works; endeavoring also to work out an Index Expurgatorius for Jewish books, similar to that first made by the Spanish Inquisition for non-Jewish books. His trouble was in vain; and his book, which, according to the opinion of the celebrated Assemani, was arranged with signal clearness and knowledge of the subject, is now buried in the library of the Vatican. Outside of Italy the expurgation of Hebrew books and manuscripts was undertaken only in the French territory belonging to the Pontifical States. For the censorship of Hebrew books in Russia and for a list of censors see below.

N. P.

—**In Russia:** Jews at once took advantage of the ukase of Catherine II., dated Jan. 27, 1783, per-

mitting the establishment of printing-presses; and in the same year Hebrew books were published at Shklov and Polonnoe. These, as well as books imported from Poland (on account of there being no Hebrew censors among the censors of foreign books at the custom-houses, or among the censors of domestic printed matter in the chief towns), escaped the notice of the government. The attention of the authorities was first drawn by Governor-General Passek to the condition of affairs with regard to Hebrew books. This official reported in 1790 that he had ordered some Jewish books, imported from Poland, to be detained at the custom-house of Tolochin;

**Beginning** with regard to Hebrew books to be  
**of Cen-** a prohibition against their admission  
**sorship.** into Russia—contrary to the dictum  
of the "kahal" (communal council)

of Mohilev, which claimed that such silence implied only the non-taxation of Hebrew books. Catherine thereupon prohibited the importation of Hebrew books, stating that the Jews could obtain their supplies of religious literature from the Russian printing-offices.

For six years (1790-96) this prohibition was the subject of frequent complaints on the part of the Jews, who were compelled to have recourse to smuggling, the small and inadequate Russian printing-offices being unable to produce the large numbers of books needed. In 1796 the government legalized the importation of Hebrew books, having been compelled to do so in consequence of the ukase of Sept. 28 of that year, by which the liberty to establish printing-offices in Russia was withdrawn. Special censors, well versed in the Hebrew language, now became a necessity. On Oct. 17, 1796, Paul I. issued a ukase ordering the installation of two learned Jews in the censor's office at Riga, for the purpose of examining Hebrew books, both those published in

Russia and those imported. The "two learned Jews" were found by Governor Riecher of Livonia in the persons of Moses Hezekiel (or Hekiel) and Ezekiel David Lewy, both of Riga, who, after having been sworn (Jan. 1, 1798), entered upon their duties as subordinates of the Gentile censor at Riga, at a salary of 300 rubles a year. The first Jewish censor with full powers was Leon Elkan, a Prussian Jew, who, being well recommended to the authorities, was appointed Jewish censor at Riga at a salary of 600 rubles a year.

The Jewish communities soon felt the scarcity of sacred books, due first to the interference of the government with private enterprise in the printing industry, and secondly to the forced import of Hebrew books through one channel; namely, through Riga. Jewish merchants complained to the local officials, and petitioned the higher authorities at St. Petersburg. The censors at Radzivil also petitioned the attorney-general to increase the number of Jewish censors, on the ground that in the governments of Volhynia, Podolsk, and Minsk there were many Jews who needed Hebrew books "both for prayer and for the education of their children in the Law and Faith." The request was refused, the government considering one Jewish censor sufficient for the

needs of all the Russian Jews. It was not until 1798 that a censor's office was established at Wilna, Karl Tile of Leipsic being appointed **At Wilna.** censor for Hebrew books in that year.

The new office did not, however, commence operations until March 14, 1800; and in the mean while the censorship of Hebrew books, of either foreign or native production, continued to be exercised in Riga, whither the Jewish printing-houses of Grodno, Sbklov, Slavuta, Koretz, and Novodvor had to send their works for approbation.

It is interesting to note that the first book to puzzle the official censor as to its being in accord with the designs of the government was an ordinary prayer-book, entitled "Rosh Hodesh Siddurim." The most doubtful passages were found in the "Eighteen Benedictions," in "Taḥ-nun," and in the Sabbatic poem "Iklū Mashmanim"; the passages in the first two containing hints about tyrants and the land of exile; while the last was considered immoral on account of its exhortations to feasting and drinking. Censor Elkan did not recommend the burning of the prayer-book; but he advised that the page containing "Iklū Mashmanim" be torn out, and in the other cases that the obnoxious words be obliterated. Of other books that were condemned by the censor the first to fall under the ban was the "Hizzuk Emanaḥ," written at the end of the sixteenth century by Isaac ben Abraham Troki. In March, 1799, the entire edition of "Nizzaḥon," by Lipman Mülhausen, was confiscated, on the ground that it was written as a refutation of the Christian religion.

**Confiscations.** In 1800 the historical work of Joseph ha-Kohen, "Dibre ha-Yamim le-Malke Zarfai," was prohibited because it contained passages disrespectful to Chris-

tians and the Christian religion. The same fate befell the "Tehinnot Immahot," because the prayers for the New Moon contained allusions to cruel potentes calculated to breed hatred. The history of the Cossack persecutions under Chmielnicki, entitled "Yawen Mezulani," was prohibited, because of the name **דין** applied to Russians, and on the further ground that the reading of the book might prejudice the Jews against the natural-born subjects of the czar. The "Or ha-Hayyim," by Ya'abez, was prohibited because of one passage stating that God

in heaven, unlike the czars on earth, is not influenced by the high social standing of the sinner. Other books, notably "Babe Ma'aseh" and "Imre Yosef," were prohibited on account of alleged course or profane expressions in the text.

By the ukase of April 30, 1800, the importation of books in any language was prohibited till further notice, and the Hebrew censors at Riga were dismissed. During the 28 months of their activity in office 126 books were confiscated out of a total of 6,225 which were imported.

With the accession of Alexander I, the importation of books was once more legalized, the censorship being entrusted to the civil governors. This arrangement did not last; and in 1804 a committee of censors was

Alexander I. Pavlovich  
Alexander III., Alexandrovich

THE JEWISH ENCYCLOPEDIA

and other youths took an active part in the revolutionary movement of the seventies. Alexander knew and always appreciated the loyalty of the great majority of his Jewish subjects, and on many occasions rewarded them for their services to the country. When the assassination of Alexander by nihilist conspirators became known, the Jews of Russia deeply mourned the loss of the benevolent czar and liberator.

H R

**ALEXANDER III., ALEXANDROVICH,** Emperor of Russia; born at St. Petersburg, March 10 1845, died at Livadia, Nov. 1, 1894. He ascended the throne March 14, 1881, the day after the assassination of his father, Alexander II. The terrible fate of the latter produced an awful impression upon Alexander; but instead of continuing the reforms of the

his father, Alexander III had ascended the throne, anti-Jewish riots (Pogromy) broke out in Elizabetgrad (April 27, 28), Kiev (May 8-11), Shpolia (May 9), Ananiev (May 9), Vasilkov (May 10), Komotop (May 10), and, during the following six months, in one hundred and sixty other places of southern Russia. In these riots thousands of Jewish homes were destroyed, many families reduced to extreme poverty, women outraged, and large numbers of men, women, and children killed or injured. It was clear that the riots were premeditated ("Voshkod," May 24, 1881, p. 75).

To give but one example—a week before the pogrom of Kiev broke out, Von Hubbenet, chief of police of Kiev, warned some of his Jewish friends of the coming riots. Appeals to the authorities for protection were of no avail. All the police did was to prevent the Jews from defending their homes, families, and property. "The local authorities," says Mysh in "Voshkod," 1883, I, 210, "surrounded the pillagers with an honorary escort, while some of the rabble shouted approval." To a delegation of the Jews of Kiev, Governor-General Ortenlein said that he could do nothing for them, "for the sake of a few Jews he would not endanger the lives of his soldiers" ("Zeitung des Judentums," May 31, 1881). On May 18, Baron Horace de Günzburg was received in audience by Grand Duke Vladimir, who declared that the motive of the anti-Jewish agitation

was not so much resentment against the Jews as a general tendency to create disturbances ("London Times," May 19, 1881). On May 23, a deputation of the Jews of St. Petersburg waited upon the czar at Gatchina. It consisted of Baron Günzburg, Bock, Pasover, Bank, and Berlin. The emperor assured its members that the Jewish question would receive his attention, that the disturbances were the work of anarchists, and he advised them to address a memorandum on the subject to the minister of the interior. Both the emperor and the grand duke Vladimir expressed their belief that race-hatred was not the real cause, but only the pretext, of the recent disorders. In accordance with the promise of the czar, an edict was issued Sept. 3, 1881, ordering the appointment of local commissions from all the governments to be under the direction of the governors, for the solution of the Jewish question. But on the same day, General Ignatiev by order of the czar issued a circular to the governors, in which he pointed out that the Jews had been exploiting the Slav inhabitants of the empire, and that this was the real cause of the riots. This contradiction may explain the conduct of Attorney-General Stryelakow, who during the trial of the rioters before the court martial at Kiev, instead of incriminating the guilty parties, turned upon the Jews and endeavored to cast the whole blame upon them. These persecutions, added to the distressing economic conditions then prevailing, gave rise to the emigration movement, which soon assumed extensive proportions. The intelligent classes of Russia condemned the medieval barbarities against the Jews, but the anti-Semitic propaganda of the "Novoe Vremya," "Kievlyanin," and other organs hostile to the Jews, did not cease even after the riots. The constant Jew-baiting of Aksakov, Suvorin, and Pichlo had its effect on that class of the Russian people which was entirely unfamiliar with Jewish life, and therefore believed all the charges brought against the Jews by the agitators. That the South Russians especially had no cause for complaints against the Jews may be seen from the following statement made by the Russian economist Chelnerin: "Those who have lived in Little Russia, which is densely inhabited by Jews, and have compared the conditions of the peasant there with those existing in the provinces of Great Russia, know how exaggerated are the accusations against the Jews. If there is a difference in the condition of these peasants, it is in favor of the Little Russians."

The second series of persecutions began with the riots of Warsaw on Christmas, 1881, and lasted for three days. Two Jews were killed, many women outraged, and two million rubles' worth of property destroyed. In the neighboring Lithuanian provinces the disturbances were slight, owing to the precautions taken by Count Tolschev, governor-general of Wilna, who was not one of Ignatiev's disciples. Order was also maintained by General Further Gurko, governor-general of Odessa, and thus the riots in Odessa and vicinity were prevented from assuming great proportions. In Nyzhnie the soldiers, who were called out to quell the riots, killed and pillaged a wealthy Jewish family. Other riots occurred in Kurzminzky, Pitovleki, Klimov, Okrimotzy, and, on March 23, in Lubny, where three soldiers killed a Jewish family of six. Balta was the scene of another series of riots (Easter, 1882) resulting in the death of eight and the wounding of more than two hundred persons. Over a thousand houses were demolished and property to the value of over one million dollars was destroyed. These disgraceful acts aroused the public indignation of

REDUCED FACSIMILE OF A CENSORED PAGE OF THE JEWISH ENCYCLOPEDIA.

reestablished in every Russian university. During the reign of Nicholas I, the censorship of Hebrew books was entrusted to the official rabbis, who, partly through ignorance and Nicholas I, partly from fear of the government, showed themselves particularly severe. Under Alexander II, Jewish publications shared with Russian literature a liberal interpretation of the law with regard to censorship. Since the reign of Alexander III, Russian, and especially Hebrew, literature has suffered much from

the severity of the censors. Thus, by order of the censor-in-chief at St. Petersburg, the press was forbidden to publish any news concerning the anti-Jewish riots. Other orders (May 2, 1882; Nov. 19, 1890; June 19 and July 12, 1891) forbade the Jewish periodicals (either in Russian or in Hebrew) to comment editorially upon, or to print any matter concerning, the "new, widely circulating rumors that some persons have the senseless and insolent intention to protest against a so-styled oppression of the Jews." Several Jewish papers were temporarily stopped; and those published abroad were not admitted into Russia. By a circular issued from the chief office of the censor Aug. 13, 1891, the publication of appeals for aid for Jewish emigrants, as well as the collection of subscriptions in their behalf, was forbidden.

The activity of the censor still continues in Russia, being exercised as late as 1901 on the first volume of the JEWISH ENCYCLOPEDIA, in which a passage relating to Alexander III. was blotted out in copies admitted into the czar's dominions.

**CENSUS:** A numbering of the people. Several cases are given in the Bible. The first mentioned is that in Num. i. (from which the book receives its name), when the males—i.e., men capable of bearing arms—numbered 603,550 at the Exodus. Modern critics, foremost among them Bishop Colenso ("The Pentateuch and Joshua," pt. I, ch. v.), have pointed out the difficulties attached to such a number arising in four generations from the twelve sons of Israel, not to mention the commissariat required for at least four times that number. The numbering was again gone through six months later, according to the account of Num. xxvi.-xxvii., with exactly the same result. On these occasions, the numbering was done indirectly, half a shekel being given to the sanctuary by each person of the proper age, and then the half-shekels, and not the persons, were counted. This expedient, according to the critics, was resorted to by the writer of Numbers owing to the superstition which had arisen against a census through the experience in David's reign. After David had organized his kingdom he found it necessary, for military purposes, to know exactly how many men, of an age suitable for bearing arms, he could depend upon; and he determined to take a census (II Sam. xxiv.). Notwithstanding the remonstrances of Joab, David persisted in carrying out the numbering of the people. It appears to have been a laborious operation, as it took no less than nine months and twenty days to complete it. Unfortunately, the numbers given in the Biblical text are

discrepant; the Book of Samuel giving 800,000 for Israel and 500,000 for Judah, whereas I Chron. xxi. raises the former to 1,100,000 and reduces the latter to 470,000. As these numbers included only the fighting men, they would imply a population of probably 5,000,000 for Israel and 2,000,000 for Judah. The Assyrian practise of counting captives shows that such a census was not uncommon at the time. The figures recorded are, however, regarded by Biblical critics as doubtful for various reasons, apart from the uncertainty of the text, which Budde would emend to 100,000 for Israel and 70,000 for Judah ("S. B. O. T." *ad loc.*). A pestilence appears to have occurred shortly after the census, and confirmed the people in the superstition, common among primitive nations, against being numbered. In the Biblical text David's action in ordering a census is regarded as sinful.

It is possible that this objection to being numbered had something to do with the uprising, led by Judas the Galilean, against the census undertaken by Quirinius (Cyrenius) in the years 6-7 (Luke ii. 2; Acts v. 37). This census, or rather the taxation

which was the outcome of it, is mentioned by Josephus ("Ant." xviii. 1, § 1); and Luke connects with it the date of the birth of Jesus. But it has been conclusively proved by Schürer ("Gesch." i. 508-543) that such a census could not have been undertaken by a Roman official while Herod was still reigning. No details are known with regard to this census of Quirinius.

In modern civilized states, since the periodical taking of a census has been regarded as a necessary part of public policy, the number of Jews has been determined either by estimate or by actual count—in Hungary, for instance, since 1720; in Prussia, since 1816; and in Poland, since 1825. Custom varies in different countries with regard to the inclusion of the numbers of adherents to the several creeds in the census returns. At one time France included them, but no longer does so. Almost all the British colonies do so, as does Ireland; but England, Scotland, and the United States do not. In consequence, an exact enumeration of the Jewish population of the world is impossible.

**BIBLIOGRAPHY:** Commentaries on II Sam. xxiv.; Schürer, as above.

**CENTO** (צֵינְטוֹ): City of 8,000 inhabitants in the province of Ferrara, central Italy. If the statement is correct that the Ha-Me'ati (הַמְאֵתִי), a family of translators, derived their name from their native place, Cento (מֵאָה, "a hundred" = *cento*), there must have been a Jewish settlement in that city as early as the middle of the thirteenth century; and the beginnings of the community would then have been contemporary with those of the neighboring capital Ferrara. Authentic accounts record the existence of a Jewish population from the end of the fifteenth century. The Padoa family, still living at Cento, traces its genealogy back to Spanish exiles who came thither in 1492. In 1505 Duke Ercole d'Este decreed that the Jewish inhabitants of Cento should share, as far as they were able, the contributions of their coreligionists in the duchy of Ferrara.

Under the Estes, the Jews enjoyed great liberty and many privileges; but when that family became extinct and the Jews passed under the papal dominion (1598), they were subjected to all the restrictions that, since the time of Paul IV., had been imposed upon their coreligionists in the Pontifical States. They were not allowed to acquire real estate; they had to sell the lands they then possessed; they were forbidden to engage in any business except money-lending and rag-picking; they had to live in a ghetto and to wear the Jews' badge. These severe laws remained in force for fully two centuries; but, nevertheless, certain Jews obtained special privileges and became active in public affairs. Thus the members of the Carpi family still possess a diploma showing that in 1774 their ancestor Moses Carpi was appointed "familiaris" to Cardinal Albani, being granted all privileges; and it is known that the Jews of Cento from their advent into the community always owned real estate, for they were aided by the authorities themselves in evading the unjust law.

**Restric- tions.** The great changes brought about by the French Revolution caused the abolition of the ghetto at Cento in 1797. During the French occupation the Jews had full civic rights, and many of them were called upon to fill posts of honor; but when the papal supremacy was restored, in 1815, they were again subjected to exceptional laws that were enforced rigorously and cruelly, especially by Leo XII. Nevertheless, the severity of their operation was mitigated by the humanity of the authorities, who informed the Jews in advance of impending domiciliary visits in search of forbidden books and of children to be baptized, and who, in spite of the law, connived at the performance of work for the Jews on the Sabbath.

A happier era dawned only with the overthrow of the papal rule, in 1859, when Romagna became a part of the new kingdom of Italy, and when the Jews received all the rights of citizenship.

**Progress of Com- munity.** Though it is doubtful whether a community was organized when Jews first settled at Cento, there must have been a religious association before 1500; for, unlike others, this community has always preserved its Italian liturgy and did not introduce the Spanish liturgy or admit it on the same footing. This fact is probably attributable in part to the small number of the immigrants from Spain. The community seems to have been organized about 1600, when some families from the neighboring Pieve settled at Cento; it buried its dead for a long time in the cemetery at Pieve, and even to-day (1902) it holds services at that city on the Ninth of Ab and on the eve of the Day of Atonement. The new community at once founded a Talmud-Torah society for the advancement of Hebrew studies, and appointed a salaried teacher, who instructed the children and also officiated as *hazan*, or leader in prayer. In 1690 the twelve members of this society formed a second philanthropic society—*Gemilut Hasadim*—the statutes of which, in twenty-one articles, are still extant; the society proposed to nurse the sick and to render general philanthropic services, and determined to

lay out at once a new cemetery at Cento, for which they obtained the permission of the papal legate.

In 1727 the community received a new constitution, and both the societies were merged into the single *Confraternita di Studi Sacri e di Misericordia*. The community was reorganized during the period of liberty under the French consistorial constitution. In 1814 a new section was added to the *Confraternita* for reciting special prayers. These societies and philanthropic foundations for preserving the ritual, providing dowries for poor girls, and for the relief of the poor still exist. Under the kingdom of Italy this community, like many others, has been constituted a free association, the expenses of public worship and other congregational institutions being defrayed chiefly by the generosity of the Modena, Carpi, and Padoa families. The community that numbered 150 persons in 1865 has been reduced to 34 (in 1902); it possesses a new synagogue and a cemetery.

Of the scholars and rabbis of Cento the following are known: Ishmael Hazaq (1613, Oxford MS. No. 1379); Eliah Daniel del Bene, מַהֲרַ"ם (1667-75); Gamaliel; Monselice; Nathaniel b. Meshullam Levi; Isaiah Bassani; Israel Berechiah Fontanella (1724); Reuben b. Zerachiah Yahya (1727); Solomon David b. Moses del Vecchio; Giuseppe Alexandro Modena and his son Isaac Mordecai (1761); Hananeel Neppi (1820-36); Abraham Carpanetti (-1853); David Jacob Maroni (-1860); Moses Sorani (-1880); Donato Camerini; Moses Levi (1902).

**CEREMONIES AND THE CEREMONIAL LAW:** Symbolic rites and observances, expressive of certain thoughts or sentiments. As social life demands forms of etiquette (see GREETINGS), so every religious system has its peculiar ceremonies indicative of its own particular truths. The Biblical name for ceremonies appears to be 'edut ("testimonies," Deut. iv. 45; vi. 17, 20; see Nahmanides on the last passage), in distinction to "mishpatim" ("judgments," "ordinances," Ex. xxi. 1, and elsewhere); while the term "hukkim" ("statutes") is applied to both moral and ceremonial laws (Ex. xii. 14, 43; Lev. xviii. 4, and elsewhere). The Rabbis distinguish between mishpatim, moral laws—which are

dictated by reason and common sense, such as laws concerning justice, incestuous marriages, and the like—and hukkim, those divine statutes to which the "Yezer ha-Ra'" (the evil inclination) and the heathen object, such as the prohibition of pork or of wearing garments woven of wool and linen (Sifra, Aḥare Mot, xiii. on Lev. xviii. 5; Yoma 67b).

The Prophets laid the greatest stress upon the moral laws, while condemning mere ceremonialism (see Hosea vi. 6; Amos v. 21-24; Micah vi. 6-8; Isa. i. 13-17). The Psalmist (see Ps. xv.), and especially the Book of Wisdom, do not even refer to the ceremonial law. Whenever Judaism entered into relations with other nations and religions, the moral laws were accentuated, and the ceremonial laws were put into the background. Hellenistic Judaism, therefore (for Pseudo-Phocylides see Bernays, "Gesammelte Schriften," i. 227), Philo, and the entire propaganda literature to which the ΔΙΔΑΧΗ belongs, take the same attitude toward the ceremonial laws. And, again, when the Jew came into contact with Arabic culture, this view of the ceremonial laws prevailed as being dictated by reason and common sense.

The discrimination between "laws based upon reason" and "laws demanding obedience to God's will" was adopted by Saadia ("Emunot we-De'ot," iii. 12; compare Ibn Ezra to Ex. xxi.

**First** and "Yesod Moreh," v.), and, with **Mention of** direct reference to the rabbinical **Ceremonial** sages quoted, by Maimonides ("Moreh **Laws.** Nebukim," iii. 2b; "Shemonah Pera- kim," vi.). Joseph Albo ("Ikkarim,"

iii. 25), if not Simon ben Zemah Duran (see Zunz, "G. S." ii. 194), is the first who divides the Biblical laws into ceremonial, juridical, and moral laws. He admits, however, that he adopted this classification from a Christian controversialist; and, as a matter of fact, he forced himself in consequence to declare, with Maimonides (*l.c.* iii. 46), the sacrifices of the Mosaic law to be a concession to the pagan propensities of the people, and (in accordance with Sifre to Deut. xi. 13) prayer to be the true "service of the Lord"—a standpoint hardly to be reconciled with the belief in supernatural revelation and the permanence of the Mosaic law.

The Mosaic law expressly states that certain ceremonies are to serve as "signs" and "memorials": (*a*)

**Biblical** Circumcision is enjoined as "ot berit" ("a token of the covenant betwixt me and you," Gen. xvii. 11). (*b*) The Sabbath is to be "ot" ("a sign between me and you throughout your generations," Ex. xxxi. 13, 17; Ezek. xx. 17, 20). (*c*) The Passover feast "shall be

for a sign [ot] unto thee upon thine hand and for a memorial between thine eyes" (Ex. xiii. 9). (*d*) Connected therewith is the redemption of the first-born to be a "token upon thine hands and for frontlets between thine eyes" (Ex. xiii. 16). According to rabbinical traditions, there are: (*e*) The putting on of the phylacteries or *TEFILLIN* prescribed in Deut. vi. 8, xi. 18, "Thou shalt bind them for a sign [ot] upon thine hand, and they shall be as frontlets between thine eyes." (*f*) The placing of *MEZUZOT* upon the doors (Deut. vi. 9, xi. 20): "Thou shalt write them upon the doorposts of thine house." (*g*) The *ZIZIT*,

the fringe upon the borders of the garment, is also enjoined for the purpose "that ye may look upon it and remember all the commandments of the Lord" (Num. xv. 39).

In fact, all the festivals are to be "remembrances" of God's deliverance and protection of the people of Israel (Deut. xvi. 3, 12; vi. 24; Lev. xxiii. 43); the paschal lamb, the mazzah, and the bitter herb on Passover, and the sukkah and the four plants of the Feast of Tabernacles (Ex. xii. 8; Lev. xxiii. 40 *et seq.*), being the significant symbols. Similarly, the erection of the sanctuary and the sacrificial worship therein must be counted among the ceremonial laws, and no less so the dietary laws (Ex. xxii. 30; Lev. xi.; Deut. xvi. 3-21), as symbolically emphasizing the idea of Israel being God's "holy" or priest people.

To these, Pharisaic Judaism added a number of new ceremonies, among which may be mentioned the kindling of the lights, the blessing over the wine (see **KIDDUSH** and **HABDALAI**) for Sabbaths and festival days, and the blessing of the Moon.

Ceremonies are the impressive part, the poetry of religion. They invest life at its various stages and periods with "the beauty of holiness." The need of such has been all the more felt by Judaism since images or signs representing the Deity have been scrupulously shunned; and the home and every-day life of the Jew was to be sanctified no less than the Temple, the ancient domain of the priest. But exactly as the pomp of ritual called forth the protest of the prophet against "the work of men learned by rote" (Isa. xxix. 13, Hebr.), so there was a danger lest the multitude of forms might crush the spirit, wherefore many haggadists and writers, like Aristobulus and Philo, attribute symbolical meanings to Biblical ceremonies. Medieval mysticism also, from Bahya and Nahmanides down to Isaac Luria, endeavored to imbue the old ceremonies with new spirituality; while the liberal spirit awakened in Italy in the seventeenth century found its echo in Leon de Modena's attack on ceremonialism in his "Kol Sakal."

The question of the relative value of the ceremonies in Judaism was brought to a focus through Moses Mendelssohn, who, in his "Jerusalem," presented a new view of the Jewish ceremonial laws. He proudly repelled the attempts of Christian writers to win him over to Christianity, and declared Judaism to be not a system of belief based upon creeds, but a revealed system of law based upon ceremonies. While granting liberty of conscience to all, because truth is the property of all and dictated solely by reason, the Jewish law demands strict obedience

from its adherents, for whom the ceremonial law is a system of sign language suggestive of thought and sentiment for mind and heart alike. It is a living force impelling people to act well and at the same time to think rightly—the only proper bond of union of a people to be educated for truth and for freedom of thought and to be kept together until God's design shall be fulfilled. Though some of these ceremonies have in the course of time lost their meaning, they nevertheless retain their

value and importance as bonds of union, and, even when no longer understood as signs, remain binding upon the Jews until God in His own way and through some universally recognized authority abrogates or changes them. "Doctrines and beliefs," Mendelssohn writes to Herz Homberg, who objected to these postulates of blind obedience, "become shackles of the intellect. As long as polytheism, anthropomorphism, and religious despotism rule on earth, so long must a people of theists, such as the Jews are, remain banded together solely by symbolic actions; that is, by ceremonies" ("Schriften," iii. 311-319, 348-356; v. 669, Leipsic, 1843).

This was a powerful plea for the ceremonial laws; but it rendered Judaism a national concern void of a world-wide mission—a system of forms without the spirit of faith. Mendelssohn's own disciples were the first to surrender both the form and the faith. As soon as the modern Jew recognized the fact (which Mendelssohn, as follower of Wolfian deism, had failed to see) that in the historic development of humanity Judaism had a mission of its own, centered upon the monotheistic truth and the universal hope of man, the issue was raised between insistence on ceremony advocated by Orthodoxy and accentuating the prophetic ideas as the universal ideal, as was done by the leaders of Reform Judaism. The need of adequate and impressive ceremonies in place of the old and obsolete ones was urged by the Reform pioneers, and the

**Mutability of the Ceremonial Law.** introduction of forms, though adopted from Christian surroundings, roused a new religious life and zeal in many, but likewise awakened opposition from the conservatives. "Ceremonies," says Geiger, in an article on formalism ("Der Formenglaube in Seinem Unwerthe und Seinen Folgen") in his "Wiss. Zeit. für Jüd. Theol." 1839, pp. 1-12, "in order to imbue the people with a religious spirit and hallow their life, must have an elevating character and be in perfect harmony with their own mode of life, or else they lead to superstition bordering on idolatry. Blind obedience against one's conviction, 'the obedience of a dog,' is incompatible with the dignity of man and with faith in a holy God dwelling within him."

This view, advocating a gradual change of the ceremonial law, was pushed to its extreme, much to the detriment of the Reform movement, by the hazardous attempt of the Frankfurter Reform-Verein to abrogate circumcision and by the transfer of the Sabbath to Sunday made by the Berlin Reform congregation. Holdheim, the radical Reform leader, went so far as to deny the validity of the entire ceremonial law in his work, "Das Ceremonialgesetz im Messiasreich" (1845), taking the stand that it is closely interwoven with the national idea and with the temple as center of the Jewish commonwealth, whereas the Messianic era of which modern Israel is to be the herald and harbinger is to be the realization of the universal prophetic ideal. Less outspoken, but in sympathy with the principle enunciated by Holdheim, were Einhorn, Geiger, Samuel Hirsch (who, however, claimed permanency for the Abrahamic rite), Herzfeld, Hess, and others; the Sabbath, as far as the choice of day was concerned,

being included among the ceremonial laws, all of which were subject to change. A Talmudical passage, stating that "in the world to come [the Messianic time] the ceremonial commandments will cease to have validity" (Nid. 61b; compare Midr. Teh. to Ps. cxlvi. and Yalk. to Isa. xxvi. 2), is referred to by some as corroborating this statement (see Herzfeld, "Zwei Predigten über den Messias," 1844). Einhorn, in his "Sinai," 1856, p. 574, with deeper insight, refers to the frequent alterations and modifications of the Law in Biblical and Talmudical times, mentioned already by Albo ("Ikkarim," iii., xiii.-xvi.).

Against these radical Reform views Leopold Zunz advanced the doctrine that the **SABBATH** and **CIRCUMCISION** have ever been regarded institutions of a fundamental if not sacramental character, and can not be abrogated or radically altered without undermining Judaism itself (Zunz, "Gutachten über die Beschneidung," in "G. S." ii. 191-203). Joseph Aub also, in an article on "The Symbols of Faith of the Mosaic Religion," in Frankel's "Zeitschrift," 1845, pp. 409, 449, claims an exceptional position among the ceremonial laws for what he calls "the two fundamental symbols of Judaism" (see also Jost, "Neuere Gesch." iii. 218 *et seq.*, 261; compare Geiger, "Nachgelassene Schriften," v. 181, and "Sinai," 1857, pp. 696, 698 *et seq.*).

The issue between Reform and Orthodoxy hinges chiefly upon the view taken of the ceremonial law; the Talmudical conception of the Law knows of no such distinction as is claimed to exist between ceremonial and moral laws. The less important and the more important laws ("miẓwoṭ kallot" and "hamurot") are rated alike (Yer. Kid. i. 61b; Tan., 'Ekeb. 1). "Ceremonial laws must be obeyed as divine ordinances with unhesitating and unreflective obedience" (Yoma 67b), and "the wilful transgressor of any of the ceremonial laws is considered as a breaker of the law" (Hul. 5a). "Be as careful in the observance of the smallest commandment as of the greatest" is the ancient Mishnaic rule (Abot ii. 1). On the other hand, the fact is being more and more recognized that while certain ceremonies fall into disuse and others take their place, as has been the case with the sacrificial and Levitical laws, there are some ceremonies which form distinctive features of Judaism and must be upheld in order to keep it from disintegration.

Often imperceptibly old ceremonies are dropped and replaced by new ones. While practical life necessitates a compromise, the law of evolution (which rules religion as well as other domains of life) exerts its power also in regard to ceremonies. Deeper historical research discloses the fact that all forms of religion adapt themselves to the conditions of the time. The regulations concerning the zizit, the mazzah, the sukkah, and the lulab are not observed even by conservative Israelites in exactly the same manner as prescribed in the Law. All religious rites have undergone great and radical transformations, and receive in their modified and sanctioned form only a new meaning or interpretation at the hand of the religion which enjoins it as sacred or

sacramental; and the Jewish religion forms no exception to the rule (see Tylor, "Primitive Culture," ii. 362). Consequently, the question of ceremonial observance becomes for the theologian part of the larger problem, how far the principle of evolution is admissible and reconcilable with the belief in revelation and the divine character of the Law, and how far every age has power and authority to change and modify the Law and the forms of religion.

**BIBLIOGRAPHY:** Aub, Einhorn, Holdheim, and Zunz, as above. K.

**CERF, KARL FRIEDRICH:** German theatrical manager; born at Unterreissheim-on-the-Main in 1782; died at Berlin Nov. 6, 1845. He embraced Christianity when very young, and had to support his father's family when only seventeen years old. After having been engaged for many years in the horse trade at Dessau, he rose to the post of chief military agent, and in this capacity took part in the campaign of 1813-15, under Count Wittgenstein, general of the Russian army. The courage and fidelity displayed by Cerf won for him the favor of Emperor Alexander, who conferred on him a gold medal.

Cerf then settled at Berlin, and obtained from Friedrich Wilhelm III. a perpetual grant for the erection of the Königsstädtisches Theater, which was devoted to French comedy and Italian opera, and which he managed until his death.

I. BR.

**CERFBEER, HERZ, OF MEDELSHEIM:** French philanthropist; born at Bischheim, Alsace, in 1730; died at Strasburg in 1793. He was a contractor to the army, and employed his wealth and his influence with the French government in promoting the material and spiritual welfare of his coreligionists. The government permitted him to settle at Strasburg, in opposition to the wishes of the authorities of that city, who zealously enforced the law excluding Jews.

Cerfbeer protected all Jews who were willing to earn a livelihood by manual labor. As soon as he had received (in 1775) from Louis XVI. the patent granting him the rights of citizenship, "for services rendered by him to the government and to the land during the famine of 1770 and 1771," Cerfbeer established factories, where he employed Jews, in order to withdraw them from petty trading, and also to deprive their accusers of all excuse for prejudice.

The narrow-minded Strasburg Germans, who made every effort to prevent the Jews from settling in that city, compelled Cerfbeer to endeavor to obtain from the government the repeal of exceptional laws. A petition to the king was drawn up by Cerfbeer and sent to Moses Mendelssohn for revision. The latter consulted DOHM, who offered to write an apology for the Jews. This apology, "Ueber die Bürgerliche Verbesserung der Juden," which Cerfbeer energetically spread in France, combined with his personal efforts, brought about the convocation by Malesherbes of a commission to make suggestions for the amelioration of the condition of the Jews in France. Cerfbeer was the leading

member of this commission; and the first result of its efforts was the abrogation of the degrading poll-tax.

At the outbreak of the Reign of Terror in France, Cerfberr was thrown into prison on suspicion of favoring the royal cause; but was set free after a year of confinement.

Being acquainted with the Talmud, Cerfberr took a great interest in Jewish literature. He supported a yeshibah at Bishelheim and published at his own expense rare Hebrew books, among which was the "Lehem Setarim" of Solomon Algazi. Wessely wrote a poem in honor of Cerfberr ("in Ha-Meassef," 1786, p. 49), and Abraham Auerbach dedicated to him his poem "Dibre ha-Mekes we-Bittulo."

**CERFBEER, MAX-THÉODORE:** French officer and deputy; born at Nancy, Meurthe, Dec. 9, 1792; died Jan. 15, 1876. He entered the army at an early age, and was made an officer by Napoleon I. without having passed through the military school. In 1827 he was made captain on the general staff, and in 1834 commander of a squadron, and was attached to the War Department as staff secretary. When General Schneider became minister of war in 1839, he placed Cerfberr at the head of his bureau. Cerfberr, promoted to the rank of lieutenant-colonel, took his seat in the Chamber of Deputies July 9, 1842, as representative from Wissenbourg, having received 86 out of a total of 161 votes against 71 cast for Renouard de Bussières, the retiring deputy. He supported the government, devoting himself chiefly to military questions; thus he succeeded in having the fund for the relief of old soldiers increased by 150,000 francs. Cerfberr, now a colonel, was reelected to the Chamber of Deputies Aug. 1, 1846, having received 119 out of a total of 218 votes against 95 cast for Renouard de Bussières. He cast his vote for the ministry of Guizot. He retired from office after the revolution of February, 1848. In addition to his political duties, Cerfberr had also acted as manager of the Théâtre du Gymnase at Paris. He was a commander of the Legion of Honor.

S.

**CERFBERR, ANATOLE:** French journalist and author; born at Paris 1835; died at Neuilly 1896. Under various pseudonyms, among which were "Arthur Clary," "Antoine Cerlier," and "Fulgence Ridal," he contributed to numerous papers. He was an admirer of Balzac and Victor Hugo, an ardent socialist, and well versed in matters concerning the stage. Cerfberr published many poems, biographies, studies, etc., besides a work entitled "Répertoire de la Comédie Humaine de H. de Balzac," which was crowned by the Académie Française (Paris, 1887).

**CERFBERR, AUGUSTE ÉDOUARD:** French author; born at Epinal in 1811; died in 1858. Having completed his studies in law, Cerfberr entered the service of the government, in which he held many

high positions. His last office was that of prefect and general inspector of the prisons at Grenoble. Cerfberr was the author of two works: (1) "Du Gouvernement d'Alger" (Paris, 1834); (2) "Des Sociétés de Bienfaisance Mutuelle, ou des Moyens d'Améliorer le Sort des Classes Ouvrières" (Grenoble, 1836).

**CERFBERR, FRÉDÉRIC:** French consul; born at Strasburg Oct. 27, 1786; died at sea Sept. 18, 1842, on a voyage from New York to France. Being fond of travel and foreign languages, he obtained (in 1809) the appointment as secretary of the imperial commissariat in the Ionian Isles. Later he successively represented France at New York (1822), New Orleans, Haiti (1827-32), and again in the last-named place as consul-general, distinguishing himself in all three offices. In 1826, when the French government could find no representative for Santo Domingo, on account of an outbreak there of yellow fever, Cerfberr freely offered his services. On learning the miserable state to which the inhabitants of Cayes were reduced in consequence of an earthquake, Cerfberr despatched at his own expense a ship loaded with food and other needful articles.

Cerfberr fell a victim to his devotion to duty. The destructive earthquake at Haiti, May 7, 1842, killed his only daughter, and wounded him so severely that he expired on his voyage home.

**CERFBERR, MAXIMILIEN CHARLES ALPHONSE, OF MEDELSHEIM:** French journalist; born at Epinal July 20, 1817; died at Paris Dec. 16, 1883. After traveling extensively in Algeria and the East, Cerfberr was attached in 1839 to the penitentiary administration in the Ministry of the Interior. In 1848 he held for a short time the position of commissary of the republic in the department of Saône-et-Loire.

Among Cerfberr's numerous writings the most noteworthy are: "Projet d'un Etablissement Pénitencier à Paris," 1841; "La Vérité sur les Prisons," 1844; "Le Silence en Prison, Réflexions d'un Condamné," 1847; "Ce Que Sont les Juifs en France," 1843; "Les Juifs, Leurs Histoire, Leurs Mœurs," 1846; "La Guyane, Civilisation et Barbarie, Coutumes et Usages," 1854; "Paraboles," 1854; "La Police d'Assurance," 1867; "L'Épargne par la Dépense," 1867; "Biographie Alsacienne," 1878; "Histoire d'un Village," 1881; "L'Architecture en France," 1883.

Cerfberr wrote on several other subjects of less importance; and he translated several works from German into French.

I. Br.

**CERFBERR, SAMSON, OF MEDELSHEIM:** French soldier and author; born at Strasburg about 1780; committed suicide at Paris, 1826. He led an erratic and adventurous life, wandering

over the world, changing his name and even his religion several times. At one time he is dignified as a Mussulman with the name of "Ibrahim Mansur Effendi," serving in the Turkish army; at another he is found holding office in Westphalia under the name of "Medelshelm." In 1813 Cerfberr fought against the Servians in Bosnia. At the end of the war he wandered throughout the East, sojourned for a time in Austria and at Naples, and in 1814-17 served in the army of Ali Pasha of Janina.

On his return home Cerfberr published a work entitled "Mémoires sur la Grèce et l'Albanie Pendant le Gouvernement d'Ali-Pacha" (Paris, 1826), containing much valuable information.

I. BR.

**CERVERA** (סרבריה): Hill-town in Catalonia, Spain, which in the fourteenth and fifteenth centuries had a Jewish community. In 1328 a quarter near the San Miguel place was assigned by King Alfonso IV. to the Jews, who enjoyed full commercial freedom; but four years later, because of their increased trade, they received permission to live in the "Calle de Vent" (the Traders' street). At the time of the Black Death, in 1349, the Jews were attacked and plundered during a riot, and eighteen of them were killed. The rest fled, but returned to Cervera after order had been restored.

The liberality and benevolence of Don Juan II. won for him the hearts of his Hebrew subjects; and upon his death, in Jan., 1479, the Jewish communities of Agramont, Belpuig, Tarrega, and certain other places assembled at Cervera for memorial services. All were dressed in black. The most distinguished Jews of Cervera carried a coffin decorated with the royal escutcheon and covered with a silken pall. Four men bearing huge torches preceded it. Singing psalms and extracts from the Jewish liturgy, the procession marched from the "Calle de Mayor," the main street, to the market place. There the coffin was set upon a platform erected for the purpose, with torches at the two ends; and men and women joined in antiphonal dirges. Crescas ha-Kohen, physician to the king, delivered the memorial address, dwelling on the virtues of the deceased monarch; and the impressive services were closed with more dirges.

M. K.

**CESENA** (סעזינה): City of the Pontifical States. In early times a Jewish community existed here, of which the tosafist Eliezer is mentioned in the thirteenth century. The "payyetaṅ" Moses de Rossi and the exegete Obadiah Sforno were born in the city toward the end of the fifteenth century; and the rabbi Isaac Joshua b. Immanuel de Lattes officiated there in the sixteenth century. Under the papal dominion the community was subjected to all the exceptional laws, and even to the Inquisition with all its horrors. The Jews amassed so much wealth by their commercial enterprises that in 1514 the people feared that the money so accumulated would enable the Jews to become masters of the

whole city. The community was dissolved when the Jews were expelled from the papal dominions.

In 1459 Angiolo de Rossi da Cesena was granted by Pope Pius II. permission to practise medicine, and in 1474 Manuele de Solomone received similar permission from Sixtus IV., and in 1460 was appointed physician and confidant to the duke of Milan.

**CHABRIS**: Son of Gothniel, and one of the three governors of Bethulia, a city besieged by Holofernes. Toward the end of the siege, which had entailed much suffering upon the Israelites, Chabris and his colleagues had agreed to hold out for five days longer in the hope of deliverance; promising the people that if no prospect of relief appeared by the end of that time, they would yield. For this they were reproached by Judith, who pledged her help, and redeemed her pledge by killing Holofernes (Judith vi. 15; vii. 1, 30; viii. 10; xiii. 8).

**CHÆREMON** (Χαρίμων): Stoic philosopher and anti-Jewish writer (Origen, "Contra Celsum," i. 59; Eusebius, "Hist. Eccl." vi. 19), Egyptian priest (Porphyry, "De Abstinentia," iv. 6-8; Jerome, "Adversus Jovinianum Libri II.," ii. 13), teacher of Nero (Suidas, s. v. Ἀλεξανδρος Αἰγύαιος), and of Dionysius of Alexandria, and predecessor of the latter as librarian of Alexandria (Suidas, s. v. Διονύσιος Ἀλεξανδρείας). Hence he flourished about the year 50. He was a younger contemporary of Josephus, who refutes in detail his anti-Jewish writings. Josephus quotes an extensive fragment from Chæremón's Egyptian history (Αἰγυπτιακὴ ἱστορία), in which he scornfully recounts and ridicules, in a manner similar to that of Manetho, the departure of the Jews from Egypt. Josephus points out his errors and untruths ("Contra Ap." i. 32, 33), and boasts of having refuted him as well as Manetho and others (*ib.* ii. 1). Chæremón's history is mentioned by Porphyry (Eusebius, "Preparatio Evangelica," iii. 4, v. 10; Porphyry, "De Abstinentia," iv. 6-8), who regards the author as a truthful and reliable writer. In this case hatred of the Jews must have induced an otherwise honest man to make false statements. Chæremón's description of Egypt recalls the ideas which Philo, Clement, Origen, and others introduced into the Old and the New Testament. The asceticism especially, which

he ascribes to the ancient Egyptian priests, is analogous to the description in Philo's work, "De Vita Contemplativa"; still there is no literary connection between the two authors.

Fragments of the "History of Egypt" may still exist in a treatise of Psellus published in 1877 (Sathas, in "Bulletin de Correspondance Hellénique," vol. i.). According to Suidas (*s. v.* Χαρμήμων), another work of Charemon was entitled "Hieroglyphica," and probably contained interpretations of the hieroglyphics (collected from the works of the Byzantine Tzetzes, in Müller's "Fragmenta Historicorum Græcorum," iii. 499); while a third work may be the book "On the Comets" mentioned by Origen ("Contra Celsum," i. 59). Origen also made use of other writings of Charemon that are now lost (*Suidas, s. v.* Ὠκεῖνη).

G. S. Kr.

**CHAFF** (כִּיץ or כִּיץ): Separated husks of grain. The Bible frequently compares things evanescent to chaff blown away by the wind (Zeph. ii. 2; Ps. i. 4, xxxv. 5; Job xxi. 18; Hosea xxxiii. 3; Isa. xvii. 13, xxix. 5, xli. 15). In the process of winnowing, by tossing the cut straw, grain, and chaff into the air, or letting it fall from an inverted fork, the grain falls almost vertically back upon the heap; the straw is blown a short distance away, while the chaff, consisting of the husks and finer particles of the straw, is carried by the wind ten or fifteen feet away. Other uses of the word "chaff" in the Old Testament are not accurate, referring rather to cut straw (Isa. v. 24; Jer. xxiii. 28) than to chaff.

**CHAGIS.** See HAGGIS.

**CHAIBAR, ARABIA.** See KHAIBAR.

**CHAIKIN, MOSES AVIGDOR:** Rabbi and author; born at Sklow, government of Mobilev, in 1852, and removed at an early age with his father to St. Petersburg, where the latter became chief shohet. Chaikin was educated for the rabbinate, and obtained several rabbinical diplomas, among others one from Rabbi Spektor of Kovno. After the riots of 1881-82 he emigrated to Paris, where he served as rabbi of the Polish Jews from 1883 to 1887; but then returned to Russia and was rabbi at Rostov-on-the-Don from 1888 to 1889. Being expelled from Russia in 1890, he went to England, and in 1892 was appointed rabbi of Sheffield, England, and in 1901 of the Federation of Synagogues, London.

Chaikin is the author of "Apologie des Juifs," Paris, 1887, and "Celebrities of the Jews," Sheffield, 1889.

**BIBLIOGRAPHY:** *Young Israel*, June, 1899.

J. G. L.

**CHAINS:** A word employed in English versions of the Bible as an equivalent for the various Hebrew terms applied to devices consisting of a series of

links and used (1) as means of restraint, or (2) for ornamental purposes on persons or on buildings. These Hebrew terms are as follows:

1. **אֶצְעָרָה:** Occurring in Num. xxxi. 50; R. V., "ankle chains." In II Sam. i. 10 it is translated "bracelet"; and this is evidently its more exact meaning (see Driver and Klostermann on II Sam. i. 10, and compare **צַעְרָה** below No. 11).

2. **הַמְנוּכָה:** occurring in Dan. v. 7, 16, 29 (read **הַמְנוּכָה**), and indicating a necklace worn as a mark of distinction. One was conferred upon Daniel for interpreting Belshazzar's dream. In the Targum it is employed for **רִבִּיר** (Gen. xli. 42). Compare No. 12 below.

3. **וְקִים:** Occurs in Nahum iii. 10, and Ps. cxlix. 8, where it indicates fetters, probably of iron, for binding captives.

4. **חַה:** Translated "chain" in Ezek. xix. 4, 9, A. V., but more correctly rendered "hook" in R. V. Inserted in the nose, it served as a means of leading captives (compare II Kings xix. 28). It is also indicated as an ornament (Ex. xxxv. 22, A. V., "bracelets"; R.

Assyrian Captive in Chains. (After Botta, "Monuments de Ninive.")

V., "brooches"). From its insertion in the nose of the captive, it seems probable that as an ornament the **חַה** was a nose-ring (compare **נֶזֶם**).

5. **חַרְוִים:** Occurs in Song of Solomon i. 10 (R. V., "strings"). Ornamental chains for the neck, probably strings of coral, metal, or pearls, are meant.

6. **כִּוְשָׁרָה:** This word occurs only in Ps. lxxviii. 7 (6), and is translated as "chains" in A. V., but more correctly in R. V. as "prosperity" (compare dictionaries of Gesenius [-Buhl], Siegfried-Stade, and Baethgen. on Ps. lxxviii. 7).

7. **נְחִשְׁתִּים** and **נְחִשֵׁת**: Occurring in Lam. iii. 7, and often translated "fetters," as in Judges xvi. 21; II Kings xxv. 7. Chains for prisoners, made, as the name implies, of bronze. They consisted of two rings—one for each foot or arm—connected by a link.

8. **נְטָפוֹת:** Rendered "chains" in Isa. iii. 19, A. V., but better taken, in R. V., as "pendants"—obviously with reference to the drop-like form of the ornament. In Judges viii. 26, A. V., it is rendered "collars" [margin, "sweet jewels"]; in R. V., "pendants."

9. **עֵבֶת:** Employed in Ex. xxviii. 14, xxxix. 15 to designate the gold chains on the ephod and breastplate of the high priest.

10. עֵנָק: An ornament for the neck mentioned in Song of Solomon iv. 9, etc. (compare עֵנָקְתוֹ, Ps. lxxiii. 6). The word is used in Judges viii. 26 to designate the chains worn by camels.

11. צַעֲרָה: Rendered by R. V. in Isa. iii. 20 as "ankle chains"; A. V. has "ornaments of the legs." Compare אֶצְעָרָה (No. 1) above.

12. רִבִּיד: Occurs in Gen. xli. 42 and Ezek. xvi. 11, where it indicates a necklace evidently employed as a sign of distinction. Pharaoh adorned Joseph with a chain of this kind when investing him with office.

13. רְהוּק: Applied (1) to chains of captivity (Ezek. vii. 23); (2) to the gold chains hung before the "oracle" (רִבִּיר) in the Temple (I Kings vi. 21); and (3) to silver chains hung upon a graven image (Isa. xl. 19).

14. שִׁרְוֹת: Translated "bracelets" in Isa. iii. 19, both A. V. and R. V., but "chains" is the marginal rendering in the latter. The word seems to indicate arm-ornaments; compare the Arabic "siwar" (bracelet).

15. שִׁרְשֵׁרֹת: Chainwork used in ornamentation. It was employed in the Temple (II Chron. iii. 5, 16) and for the ephod and breastplate of the high priest (Ex. xxviii. 14, xxxix. 15). Compare שִׁרְשֵׁת (Ex. xxviii. 22), which is an abbreviated form of this word. See FETTERS.

### CHAJES or CHAJAS, ZEBI HIRSCH B.

**MEIR**: Talmudist, literary historian, and rabbi; born at Brody Nov. 20, 1805; died at Lemberg Oct. 12, 1855. His father, a scion of the famous HAYOR family of scholars, was a highly educated banker who lived for fifteen years at Florence before settling at Brody. He provided a good Jewish as well as secular education for his son, who even at the age of five years showed extraordinary talents. At Brody, where it was considered a sin for a Jew to speak German, the boy was taught French, German, and Italian by his father, who was himself familiar with six European languages. He

Zebi Hirsch Chajes.

also received instruction in Latin, natural science, history, etc. But rabbinical lore was his chief study, his teachers being Zanvil Margaliof of Przemysl, Ephraim Margaliof, and Elazar Landau of Brody. The last-named two Talmudists, although void of all modern scientific methods, were yet men of critical insight, and doubtless had a great influence on Chajes. At the age of twenty-two he received his diploma as rabbi, and a year later took charge of the

important community of Zolkiev, which numbered among its members Nachman KROCHMAL. Although dissimilar in character and gifts, the two formed an intimate friendship, which exerted a specially wholesome critical influence on Chajes' knowledge and extraordinarily wide reading. When, in 1846, the law was promulgated in Austria compelling rabbinical candidates to pass a university examination in the liberal arts and philosophy, Chajes, though in office, passed his examination at Lemberg, and received the degree of doctor of philosophy. After officiating for twenty-four years as rabbi of Zolkiev, he accepted a call as chief rabbi of Kalisch, Russian Poland, where he remained until shortly before his death, when he returned to Zolkiev. He stayed there for a short time only, and then went for medical treatment to Lemberg, where he died. Chajes left several learned sons, among whom may be mentioned **Solomon, Moses, and Isaac**, chief rabbi of Brody, (born 1843 and died Feb. 1901).

Chajes was the author of the following works: "Misped Tamrurim," a funeral oration on the death of Emperor Francis I. (Zolkiev, 1835);

**His Works.** "Torat Nebi'im," or "Eleh ha-Mizwot," being thirteen treatises on the authority of Talmudic tradition, and on the organic structure and methodology of the Talmud (*ib.* 1836); "Iggeret Bikḳoret," an examination into the Targumim and Midrashim (*ib.* 1840; with notes and revisions by Jacob Brüll, Presburg, 1853; German translation by Julius Fürst, in "Orient, Lit." i. Nos. 44 et seq.); "Aḥeret Zebi," six treatises on different subjects, which have appeared under separate titles, namely: (1) "Derush," an address on the accusation that the Jews are averse to agriculture and trades as means of livelihood; (2) "Mishpaṭ ha-Hora'ah," on the constitution and authority of the Great Sanhedrin; (3) "Tiferet le-Mosheh"; and (4) "Darke Mosheh," a defense of Maimonides against the attacks of S. D. Luzzatto and Reggio, also on the dogmatics of Maimonides in his halakic works (a discourse on the blood accusation is added as an appendix); (5) "Iggeret Bikḳoret," with newly added notes; and "Maṭbea' ha-Berakot," on the principle according to which the Rabbis pronounce the blessings in performing religious offices, to which are appended responsa under the title "Aḥeret Zebi" (*ib.* 1840-41). Chajes wrote also "Darke ha-Hora'ah," an examination of the rules that obtained in Talmudic times in deciding practical religious questions (Zolkiev, 1842); "Mebo ha-Talmud," Introduction to the Talmud (*ib.* 1845; translated in part by Jost in "Orient, Lit." vi. 16 et seq.); "She'elot u-Teshubot," responsa and scientific treatises (*ib.* 1850); "Inre Binah," six treatises, on the relation of Yerushalmi to Babli, on lost Haggadah collections, on the Targumim, on Rashi's commentary to Ta'anit, and on Bat Kol (*ib.* 1849); and "Minhat Ken'ot" against Reform (*ib.* 1849). Chajes also contributed to different periodicals, among which were "Literaturblatt des Orients" and "Zion" (edited by Creizenach and Jost); and he included these contributions in his collected works. His notes to the Talmud, published first in the Vienna edition and then in that of Wilna, are most valuable, and throw much light on the text. The Wilna editions of Ḥabib's "En Ya'akob" (1876, 1894)

contain the portion of Chajes' "Mebo' ha-Talmud" dealing with the Haggadah, as well as his notes to the haggadic passages of the Talmud.

Krochmal, Rapoport, and Chajes form the triumvirate of the critical school of Galicia in the second third of the nineteenth century. Although Chajes lacked the penetrating insight of the first-named and the critical sense of Rapoport, he excelled both in acumen and range of knowledge.

**His Importance.** His contributions to the history of the Targumim, the Halakah, and the Haggadah have to some extent been superseded by later investigations, yet he rendered great service in that field, because he paved the way for those investigations. Geiger's hypothesis regarding the Jerusalem Targumim is, as he himself admits ("Z. D. M. G." xiv, 314), but the carrying out of the idea which Chajes had developed in his "Imre Binah." There are few modern works dealing in detail with the Halakah or the Haggadah which have not profited by the labors of Chajes, although his name is often passed over in silence. His Introduction to the Talmud is especially noteworthy. For the conservative Chajes the Talmud is everywhere the source of law, even where it does not embody the oldest tradition; hence a Talmud introduction means for him chiefly a systematization of the forms that the traditional law and all connected with it assumed in the schools. In this respect Chajes' Introduction is the only attempt made on the part of Orthodoxy to formulate the nature, extent, and authority of tradition. Although the proofs of the truth and necessity of tradition are not valid from a strictly scientific point of view, yet it may be assumed that Chajes' conception of tradition was the one that must have prevailed in Talmudic times. Whatever one's practical attitude toward this question may be, Chajes' representation of tradition is highly important for the comprehension of Talmudic literature.

The views expressed in his works are not an entirely trustworthy criterion of Chajes' attitude on religious questions. A rabbi in a Galician town, most of the members of his community took him probably for an ΑΡΙΣΤΟΣ, who only doubted the genuineness of the Zohar; therefore Chajes had to be guarded in the expression of his liberal views, and frequently his views on important doctrines are to be read only between the lines. On reading Chajes' treatise on the Haggadah in his

"Introduction," one must admire the courage with which he uttered such heretical opinions without regard to his surroundings. Jost's criticism of Chajes that he changed "from a

liberal thinker favoring Reform to a bitter persecutor and attacker of all that is calculated to arrest superstition" (Jost's "Annalen," 1841, p. 72) is unfounded. Chajes' tolerance toward scientific questions is best proved by his veneration for Jost, whose works he almost knew by heart. It was the radical Reform theories of Holdheim and Geiger that he opposed, at the same time avoiding all personal attacks on the reformers.

**BIBLIOGRAPHY:** Buber, *Anshe Shem*, p. 199 (contains also Chajes' epitaph); I. Bodek, in *Ha-Maggid*, i. Nos. 8-11; Ko-

hen-Zedek, in *Meged Yerahim*, i. 106-116; Z. Sagoradski, in *Ha-Asif*, iv. 155-160; Zeitlin, *Bibl. Post-Mendels*, pp. 53-55; Rapoport, in *Keven Hemed*, vi. 204-259 (a very severe criticism of Chajes' *Iggeret Bikoret*).

**CHAJUN.** See HAYYUN.

**CHALAF TA.** See HALAF TA.

**CHALCIS:** Capital of the island of Eubœa in the Ægean sea; under Greek dominion since 1832. Benjamin of Tudela found 200 Jews on the island. There is also testimony to the early residence of Jews in Chalcis in a Hebrew inscription on a grave-stone set in the city walls at the entrance-gate. This stone, dated 5086 (1326 C.E.), shows that Jews came to Bœotia and Negropont before the expulsion from Spain, and therefore were not necessarily of Castilian origin.

According to information gathered at Chalcis, there were several Jewish communities in this region before the War of Independence (1821-27). The most important was at Thebes, where it is said there are still some Hebrew inscriptions. These communities suffered the ravages of the war, and some were completely broken up. The little synagogue of the congregation at Chalcis does not testify to any great prosperity in the past. The documents of the community were lost in a fire more than a century ago, and the synagogue itself, built about 1400, was also destroyed by fire in 1844, but was rebuilt five years later.

In a total population of 7,000 inhabitants there are in Chalcis about fifty Jewish families, all of the Sephardic ritual. All live in the same quarter, and are extremely poor, so that no rabbi is maintained and very little religious instruction is given. Few know the Torah or understand their prayers. Nevertheless they are attached to Judaism, and generally go to end their days in the Holy Land.

Their family names are for the most part Greek—such as Marzoukos, Kosty, Moschonas, Sakkys, Politi, Daskalaki—and their features are of the purest Greek type. Their language is Greek. The old men dress "à la Palikare," wearing the "shalvar," or fustanelle, with a high fez on the head, and a heavy tassel hanging down the neck. The old women cover their hair with an unbecoming head-dress consisting of a dark silk kerchief twisted tightly around the head. The young people, however, like their Christian fellow-citizens, have recently adopted European dress.

The Jewish cemetery of Chalcis, which has no enclosure, covers a large extent of ground. The dead are buried in a most primitive way, without any sign to mark the grave.

**BIBLIOGRAPHY:** *Chronique Israélite*, Corfu, 1863.

D.—M. C.

**CHALDEA:** The Hebrew "Kasdim" (generally without the article) usually designates the Chaldeans as a people, sometimes also their country (Jer. i. 10; li. 24, 35; Ezek. xi. 24, xvi. 29, xxiii. 15 *et seq.*) or the people together with the country (Gen. xi. 28, 31; xv. 7; Neh. ix. 7). The word is Assyrian, or rather Babylonian, yet the Hebrew is the earlier form; while the cuneiform inscriptions give the later or classical Babylonian sound of the word, namely,

"Kalde." Probably the Hebrew pronunciation was learned indirectly from the Chaldean tribes themselves before the latter had changed the earlier pronunciation.

The "land of the Chaldeans" (Jer. xxiv. 5 *et al.*) is also a frequently occurring phrase. The Chaldean country, in the strict sense, lay in southern Babylonia, on the lower Euphrates and Tigris. But the name was extended by the Biblical writers to include the whole of Babylonia, after the Chaldean Nebuchadnezzar had established the new Babylonian empire and brought his people to world-wide fame. Indeed, it is doubtful whether the Biblical "Chaldea" and "Chaldeans" ever connoted the ancient country and people; these terms, until the eighth century B.C., were restricted to the region along the head of the Persian gulf (see BABYLONIA). The only doubtful passages are those in which "Ur of the Chaldees" is spoken of (Gen. xi. 28 *et seq.*). On the whole, therefore, the Bible agrees with the inscriptions in making the Chaldeans of history a comparatively modern race, and in excluding them from all association with the ancient dynasties of Babylonia.

The term "Chaldaic," for the language spoken by the Chaldeans, does not occur in the Bible. What has been popularly signified under that name is properly called "Aramean" in Dan. ii. 4. The Chaldeans of course spoke Babylonian in the days of the prophet Daniel; but when the Book of Daniel was composed (second century B.C.), Aramean had come to be used by all classes throughout Babylonia.

E. G. H.

J. F. McC.

**The Land:** Chaldea as the name of a country is used in two different senses. In the early period it was the name of a small territory in southern Babylonia extending along the northern and probably also the western shores of the Persian gulf. It is called in Assyrian "mat Kaldi"—that is, "land of Chaldea"—but there is also used, apparently synonymously, the expression "mat Bit Yakin." It would appear that Bit Yakin was the chief or capital city of the land; and the king of Chaldea is also called the king of Bit Yakin, just as the kings of Babylonia are regularly styled simply king of Babylon, the capital city. In the same way, the Persian gulf was sometimes called "the Sea of Bit Yakin, instead of "the Sea of the Land of Chaldea."

It is impossible to define narrowly the boundaries of this early land of Chaldea, and one may only locate it generally in the low, marshy, alluvial land about the estuaries of the Tigris and Euphrates, which then discharged their waters through separate mouths into the sea. In a later time, when the Chaldean people had burst their narrow bonds and obtained the ascendancy over all Babylonia, they gave their name to the whole land of Babylonia, which then was called Chaldea.

**The People:** The Chaldeans were a Semitic people and apparently of very pure blood. Their original seat may have been Arabia, whence they migrated at an unknown period into the country of the sea-lands about the head of the Persian gulf. They seem to have appeared there at about the same time that the Arameans and the Sutu appeared in Baby-

lonia. Though belonging to the same Semitic race, they are to be differentiated from the Aramean stock; and Sennacherib, for example, is careful in his inscriptions to distinguish them. When they came to possess the whole land their name became synonymous with Babylonian, and, though conquerors, they were speedily assimilated to Babylonian culture.

The language used by the Chaldeans was Semitic Babylonian, the same, save for slight peculiarities in sound and in characters, as Assyrian. In late periods the Babylonian language ceased to be spoken, and Aramaic took its place. One form of this widespread language is used in Daniel and Ezra, but the use of the name Chaldee for it, first introduced by Jerome, is a misnomer.

**History:** The Chaldeans, settled in the relatively poor country about the head of the Persian gulf, early coveted the rich cities and richly cultivated lands of the more favored Babylonians to the north of them. They began a running fire of efforts to possess themselves of the country. These efforts varied much. On the one hand, Chaldean communities were formed in several parts of Babylonia by the simple and peaceful process of immigration. On the other hand, Chaldean agitators were ever ready to participate in rebellions against Assyrian authority, hoping that the issue might make them the rulers of the independent kingdom. Such a man was MERODACH-BALADAN, who was king of Babylonia several times, being deposed by the Assyrians, but always succeeding in seizing the reins of power again. Methods similar to those which he pursued triumphed in the end, and the new empire, which began with the reign of Nabopolassar in 625 B.C. (see BABYLONIA), was Chaldean, though there is no positive proof that its founder was himself of pure Chaldean blood.

When the Chaldean empire was absorbed into the Persian, the name Chaldean lost its meaning as the name of a race of men, and came to be applied to a class. The Persians found the Chaldeans masters of reading and writing, and especially versed in all forms of incantation, in sorcery, witchcraft, and the magical arts. They quite naturally spoke of astrologists and astronomers as Chaldeans. It therefore resulted that Chaldean came to mean astrologist. In this sense it is used in the Book of Daniel (Dan. i. 4, ii. 2 *et seq.*), and with the same meaning it is used by the classical writers (for example, by Strabo).

**CHALFAN, PHOEBUS.** See HALFAN.

**CHALID B. YESEKI.** See HALID.

**CHALIZAH.** See HALIZAH.

**CHÂLONS-SUR-MARNE** (Latin, *Catalaunum*; Old French, *Chaalons*): Capital of the department of Marne, France. Little is known of the Jews of this city. In 1292 Davy and his son Salemon, Jews of Chaalons, were living at Paris. The "Document sur les Juifs du Barrois" (1321-23) mentions for Châlons only Lyonnet, his mother Doucine, Morel, and two other Jews, whose names are not given. In 1306 the king, Philip the Fair,

demanded the confiscated property of the Jews of Châlons in behalf of the royal treasury; but the bishop of the city maintained that as the Jews were subject to him their property also belonged to him. The Parliament was asked to settle the difficulty, but in the course of the proceedings the king yielded and presented the bishop with the cemetery of the Jews (1314). This cemetery seems to have been the burial-place of all the Jews of Barrois. The Jewish community of Châlons to-day consists of forty or fifty families; it has a synagogue and a rabbi.

**BIBLIOGRAPHY:** *Rev. Et. Juives*, i. 68, 70; ii. 72; xix. 247, 254. G. S. K.

**CHÂLONS-SUR-SAÔNE** (Hebrew, קאלון or קאלוני): Capital of the department of Saône-et-Loire, France. Jews were established in the city at an early period; the council that convened there in 630 forbade them to sell slaves abroad. A mint-master named Priscus, who held office at Châlons in 555, seems to be identical with the Jew of that name who, in the presence of Gregory of Tours, had a theological controversy with the king Chilperic. Among the other Jewish mint-masters of this period mention is made of Jacote of Châlons, Juse of Macon, Jacotus of Orleans, etc. In the second half of the eleventh century R. Eliezer ben Judah, the pupil of R. Isaac ben Menahem of Orleans, lived at Châlons. The celebrated Rashi of Troyes corresponded with the scholars of קבילון (Châlons; Latin, "Cabillonum"), who took part in the synod convened at Troyes about 1160 under the direction of R. Jacob Tam of Rameru.

In the thirteenth and fourteenth centuries the Jewish community of Châlons was one of the most important of Burgundy, although its members were still periodically subjected to harsh treatment. The most eminent Jews of the period (1306) were Hélon and Bénion, who numbered important personages among their debtors, and (1384-95) Alisa of Treves, Namiet Lévi, Solomon of Montréal, Saulcin Beaugcy, Aaron Lévy, Croissant of Bourges, Isaac of Troyes, Maître Pérez, and R. Joseph, author of a commentary on the Pentateuch, in which he frequently cites the Bible commentator R. Eliakim מקולין or מקלן as his master and compatriot. Châlons-sur-Saône has to-day (1903) a small Jewish community, placed under the administrative and religious authority of the consistory of Lyons.

G. S. K.

**CHALPHI:** Father of Judas. The latter was one of the two captains who remained when all the others under Jonathan had fled at the battle of the plain of Nazor (I Macc. xi. 70). Josephus refers to Chalphi, but calls him "Chapsios." J. JR. G. B. L.

**CHALUKKA.** See HALUKKA.

**CHALYZIANS:** A people who, according to the Byzantine historian, John Cinnamus (twelfth century), accepted the Mosaic law. They fought,

together with the Dalmatians, against the Greeks in the reign of Manuel Comnenus in 1154. "Chalyzians," as A. Harkavy suggests, is probably the name given by Cinnamus to the Chazars, whom Duke Taksony of Hungary invited, among other tribes, to settle in his domains, in order to make good the losses in the population of the country, due to the many raids which the Hungarians undertook into surrounding countries, but which, after causing alarm to the whole of Europe, resulted in the final defeat of Duke Taksony in the year 970.

The Polish historian August Bielkowski, however, suggests that the Chalyzians of Cinnamus were the Chvalissy of Nestor. When the Hungarians removed to Dacia and Pannonia, the reigning family among them was the Kabary, one of the Chazar tribes.

**BIBLIOGRAPHY:** Cinnamus, *Epitome*, etc., ed. Niebuhr, iii. 107, 247, Bonn, 1836; A. Harkavy, *Ha-Jehudim u-Sefat ha-Slavim*, p. 132, Wilna, 1867; Nestor's *Älteste Jahrbücher der Russischen Geschichte*, translated by Scherer, p. 42, Leipsic, 1774. G. H. R.

**CHAMA (RAB).** See HAMA.

**CHAMAI (GAON).** See HAMAI.

**CHAMATI, NATHAN.** See NATHAN B. GAD OF HAMATH.

**CHAMBERLAIN:** The English rendering of סריס. This Hebrew word is also translated "officer" (Gen. xxxvii. 36; II Kings viii. 6). If "chamberlain" is to be used at all, it must be taken in a very broad sense. The chamberlain is sometimes a mere servant (Acts xii. 20), or messenger (II Kings viii. 6); at other times he holds a position of trust, and even has charge of the finances (Rom. xvi. 23). See EUNUCH and OFFICER.

In Jer. li. 59 the word stands for שר מנוחה, which is incorrectly given by the A. V. as "a quiet prince." The chamberlain here referred to was a brother of Baruch, the secretary of Jeremiah.

E. G. II.

G. B. L.

**CHAMBERLAIN, HOUSTON STEWART:** Anglo-German musical critic and anti-Semitic writer; born Sept. 9, 1855, at Portsmouth, England; son of Admiral W. C. Chamberlain. He went to school at Versailles, studied science at Geneva University, and finally became privat-docent in philosophy at the University of Vienna.

Besides several works on Richard Wagner, from whom he probably imbibed much of his anti-Semitism, he has attracted attention by his chief work, "Die Grundlagen des 19. Jahrhunderts," Munich, 1899; 4th ed., 1902. In this he regards all history as a conflict between the Aryans and the Semites; the latter being regarded as a special genus, "homo Syriacus," of which the Jew, "homo Judaicus," is a typical species. Race rules history; and the influence of the Semites in the early forms of Christianity broke down the ancient world, which had to be revived by the new blood of Germanism against which the Roman Catholic Church is perpetually struggling in order to introduce once more the abstract universalism of the Semite. Chamberlain dreads a world-supremacy on the part of the Jews, and attacks in every way their intellectual, moral, and religious qualities. While evincing great admiration

for the character and views of Jesus, so great is his anti-Semitic bias that he denies Jesus' Jewish origin.

Chamberlain's journalistic style and wide generalizations have attracted considerable attention, especially in German-Jewish journalism, as can be seen from the accompanying bibliography.

J.

**CHAMBÉRY:** Capital of the department of Savoy, France. When the Jews were driven from France by Philippe Auguste in 1182, many of them sought refuge in Chambéry and the surrounding country, especially at Yenne, Seissel, Aiguebelle, and Saint-Genis (Gerson, "Notes sur les Juifs des États de la Savoie," in "Rev. Et. Juives," viii. 235; compare Loeb, "Un Episode de l'Histoire des Juifs de Savoie," in "Rev. Et. Juives," x. 32). They were subject to a tax, which in 1300 amounted to 75,374 francs; in 1328, to 2,400 florins (gold); and, in 1331, to 1,200 florins (Costa de Beauregard, "Notes et Documents sur la Condition des Juifs en Savoie," in "Mémoires de l'Académie Royale de Savoie," 2d series, 11; compare Victor de St.-Genis, "Histoire de Savoie," i. 456). Amadeus V. granted them privileges which were confirmed Nov. 17, 1323, these being chiefly in favor of the Jews Vivant de Vesos, Master Agin, his son-in-law, and Harasson de Biauna ("Rev. Et. Juives," x. 32).

In 1348, at the time of the Black Death, the Jews of Chambéry were accused of having poisoned the wells at the incitation of Rabbi Peyret and Aboget, a rich Jew. Many were massacred at Chambéry, Montmélian, Chillon, Chatel, Yenne, etc. (Costa de Beauregard, *l.c.*; compare Grätz, "Gesch. der Juden," vii. 362). Another persecution occurred in 1394, at the instigation of Vincent Ferrer (Joseph ba-Kohen, "Emek ha-Baka," translation by I. Séé, p. 85). In 1417 two converted Jewish physicians, Guillaume Saffon and Master Pierre of Macon, were commissioned to examine the books of the Jews at Chambéry in order to find therein the alleged blasphemies against the Christian religion with which they had been charged ("Mémoires de la Société Savoie, d'Histoire et d'Archéologie," xv. 21, cited by Gerson in "Rev. Et. Juives," viii. 239).

At the request of the archbishop of Lyons, Marie de Berry, duchess of Bourbon, who governed the city of Trévoux in the absence of her husband, Jean de Bourbon, had the Jewish books examined in 1430. The physician Ayme (Amadeus), a converted Jew of Chambéry, was commissioned to examine works written in Hebrew, and to translate the passages that were to be condemned ("Rev. Et. Juives," x. 34). He also conducted an inquiry against the Jews of Savoy, whose books he ordered to be burned (*ib.* viii. 239).

Solomon ibn Verga ("Shebet Yehudah," No. 11) tells of a general persecution of the Jews in Savoy and Piedmont in 1490. Gerson (*l.c.* p. 236) thinks, not without reason, that this was the persecution instigated in 1466 by Louis of Nice or Provence, a converted Jewish physician, commissioned by his godfather, Duke Louis, to make an inventory of the

books of the Jews of Chambéry, who had been accused of witchcraft and sacrilege. This accusation was later acknowledged to be false (Costa de Beauregard, *l.c.* p. 106; compare "Rev. Et. Juives," viii. 239). In 1430 the Jews were confined to a special quarter assigned to them by Amadeus VII. The count of Savoy compelled them to wear, like the Jews of France, a wheel, half red and half white, upon the left shoulder ("Rev. Et. Juives," x. 33). They were finally forced to leave Chambéry in consequence of the general banishment of the Jews from Spain in 1492. According to Victor of St.-Genis, however (i. 455), this city had a Jewish community in 1714.

Among the scholars mentioned as having lived at Chambéry are: R. Aaron, commentator on the Pentateuch; R. Jacob Lévi; R. Solomon, the father of Joseph Kolon, who states that when he lived at Chambéry, about 1440, there were distinguished rabbis in that city; and the celebrated publisher, Gerson Soncino, who, in his preface to the Hebrew grammar of David Kimḥi (1532-34), says that he collected the Tosafot of Fouques in Chambéry. There were also several eminent Jewish physicians, among whom may be mentioned: Master Samson, physician to Amadeus V.; Master Palmieri, attached to the person of Amadeus VI., and physician of the city of Chambéry; Helias of Evian, called in 1418 to attend the daughters of the count of Savoy; Masters Isaac of Ancey and Jacob of Chambéry, physicians to Bonne de Berri, mother of Amadeus VIII.; Master Solomon, physician to Amadeus VIII.; Master Jacob of Cramonaz, physician to the regent Yolande ("Rev. Et. Juives," viii. 241, 242).

S. K.

**CHAMELEON:** An animal of the genus *Chamaeleon*, the only genus of the tribe *Dendrosauri* (also *Chamaeleonida*, *Rhoptoglossa*, *Vermilinguia*), of the *Chamaeleontidae* or *Chamaeleonida* family, of which it is the type. Some sixty species of the genus are known to exist, the most common of which, *Chamaeleon vulgaris*, is frequently found in Egypt and the Holy Land. The word "chameleon" is taken from the Greek *χαμαιλέον* (literally "ground-lion"), presumably a Greek adaptation of a foreign word. Bochart ("Hierozoicon," iv. ch. vi.) derives it from a supposed Punic word, נמלין ("little camel"). This conjecture he bases on the name "jamal al-Yahud" ("camel of the Jews"), which the Arabs give to the chameleon on account of the hump on its back.

In the A. V. "chameleon" is the rendering of the Hebrew כה (koah), which occurs only once (in Lev. xi. 30), in a list of five unclean animals, where it occupies the second place. This rendering, apparently, has the support of the Septuagint and the Vulgate, which may, however, be due to the fact that the animals are not arranged in the same order in the LXX. as in the Hebrew. The same can be said of the rendering "ḥulda" of the Peshiṭta. The koah is presumably a species of monitor, as the ḥulda is of the MOLE. It is now commonly thought that the chameleon is to be identified with the fifth animal on the list, תנשמת (tinshemet), in the R. V. This identification is based principally on the etymology of the word תנשמת ("the breather," "inhaler"),

from the root צָפַח ("to blow," "to breathe"). The chameleon is remarkable for its habit of inflating itself, which, combined with its power of fasting, led the ancients to believe that it lived on air (see Bochart, *l.c.*, quoting Kimbi). In reality it lives on insects, which it captures by darting at them its long and viscid tongue. The little animal, six or seven inches long, or, with the tail, eleven to twelve inches, lives almost exclusively upon trees, where it finds itself quite at home, thanks to its prehensile tail and feet.

Another peculiarity of the chameleon is its ability to change its color, supposedly in accordance with that of the objects with which it comes in contact. Whatever be the occasion of the phenomenon, its possibility is due to the presence in the skin of contractile cells, both clear and pigment-bearing, placed at various depths, and so arranged that, under the control of the nervous system, the one or the other only, or both kinds in various proportions, will come to the surface.

The tinsmetet of Lev. xi. 30 must not be confounded with a bird of the same name mentioned in Lev. xi. 18.

E. G. H.

H. H.

**CHAMOIS:** The rendering of the Hebrew זֶמֶר (zemer), both in the A. V. and in the R. V., probably on the authority of Bochart ("Hierozoicon," iii. ch. xxi.). It must, however, be discarded, for the reason that the chamois is exclusively a European animal. The zemer can not be identified with precision. The word occurs only once (Deut. xiv. 5); and it has no parallel in the cognate languages. The versions of the Bible are at variance as to its translation. The Septuagint and the Vulgate, followed by the Coptic, have "camelopard" or "giraffe"—apparently a mere guess, and not a happy one considering the remoteness of the home of that animal from Palestine. The Peshitta translates "zemer" by *arna*, a word which does not occur elsewhere in Syriac literature; Bar-Bahlul renders it "mountain-sheep," on the authority of Gregory of Nyssa and Bar-Serushway; while BarAli (ed. Hoffmann, gloss 1518) has *althaital*, "wild goat," or *al-wa'il*, "mountain-sheep." Both the thaital and the wa'il belong to the wild goats (steinböcke, bouquetins; see Hommel, "Die Namen der Säugethiere," pp. 280, 286). The rendering "elk" (Luther) is to be rejected for the same reason as "camelopard" or "chamois."

Modern naturalists generally agree that the zemer must have been a kind of wild sheep, of the same type as the ammontragus, the *aroui* of the Arabs which is represented on the Egyptian monuments and is still common in Egypt, Arabia Petrea, and the Atlas range.

**CHAMPAGNE** (קַמְפּוֹנִיָּה, קוֹמְפּוֹנִיָּה): אֶמְפּוֹנִיָּה, קַמְפּוֹנִיָּה: A former province of France, now known as the departments of Marne,

Haute-Marne, Aube, and Ardennes, with part of Seine-et-Marne, Yonne, Aisne, and Meuse. Jews settled in Champagne as early as the Gallo-Roman epoch. They depended on the protection of the counts governing the country, this protection, however, being dearly bought. Often the Jews of Champagne moved into adjacent countries, being unable to pay the heavy taxes imposed upon them. To avoid this loss to the treasury and to get "their Jews" back, the counts of Champagne concluded treaties of extradition with the neighboring countries. Such a treaty was concluded in 1198 between Count Thibaud IV. and Philippe Auguste, and was renewed in 1201 by Countess Blanche, the widow of Thibaud. The latter claimed the extradition of a wealthy Jew named Cresselin, who sought refuge at Paris from the extortions of the countess.

In 1284 Champagne was incorporated into the kingdom of France, and the fate of the Jews of this province became that of all the French Jews. In taking possession of Champagne Philip the Fair imposed upon the Jews of the province the payment of 25,000 livres as a gift for the "happy event."

Champagne was renowned in the twelfth century for its Talmudical schools at Troyes, Ramerupt, Dampierre, and other places. It was the native country of Rashi, Jacob Tam, and many other Talmudical celebrities. Its religious customs are often cited in the ritual laws.

At the present day (1902) the greater part of the ancient Champagne belongs to the consistorial district of Lille.

**CHAO YNG-CHENG:** Chinese mandarin; flourished about 1653. After the sack of K'AI FUNG-Foo, which followed the fall of the Ming dynasty in 1642, the synagogue there was destroyed, and the Jews took refuge on the north side of the river Hoang-Ho, having saved the scrolls, which had been thrown into the water. Ten years later Chao, who was a Jewish mandarin from the province of Chen-Si, was detailed to restore the city, and with the aid of his brother, Yng-teou, induced the Jews to cross the river and take up their old quarters, and rebuild the temple in 1653. One complete scroll of the Law was made up out of the fragments which had been saved from the waters, and other copies were made from this. Chao wrote an account of the saving of the scrolls and the rebuilding of the temple,

which was expanded by his brother into a book of ten chapters. A stone stele dated 1663 was afterwards erected, giving the details of his action.

**CHARAATHALAN** or **CHARAATHALAR:** Name occurring in I Esd. v. 36. It is a corruption of "Cherub," "Addan," and "Immer" (Ezra ii. 59 = Neh. vii. 61). Compare **CHERUB**.

E. G. H. C. L.

**CHARACA:** A city about 750 stadia distant from Caspis. It was the seat of the Jews called "Tubieni." Judas Maccabeus went to this place after his conquest of Caspis (II Macc. xii. 17).

E. G. H. G. B. L.

**CHARAN.** See HARAN.

**CHARASHIM.** See GE-HARASHIM.

**CHARCHEMISH.** See CARCHEMISH.

**CHARES** (Χάρης): Leader of the Zealots in the Judæo-Roman war, and one of the most eminent men of Gamala (Josephus, "B. J." iv. 1, § 9). When the men of Bathyra, "called the Babylonians," who sided with Agrippa and the peace party, were at Gamala without their leader, Philip, they were attacked by the Gamalians, and Chares, Philip's relative, and his brother Jesus were killed (*idem*, "Vita," xxxv., xxxvii.). Chares' name is found in inscriptions.

**BIBLIOGRAPHY:** Waddington, *Inscriptions de la Syrie*, No. 2112.

G. S. KR.

**CHARGER:** A rendering of two Hebrew words and a Greek one: (1) קערה (ke'arah), occurring in the list of the donations of the chiefs of the tribes on the day of the dedication of the Tabernacle (Num. vii. 13 *et seq.*). Elsewhere the word is rendered **DISH**. (2) אגרטל (agartel), the etymology of which is uncertain. It is, perhaps, the Greek *κάρταλος* taken into the Aramaic. The word is found in the list of vessels restored by King Cyrus to the returning Jewish exiles (Ezra i. 9). (3) Πίναξ, the dish upon which the head of John the Baptist was presented to Herodias (Matt. xiv. 8, 11; Mark vi. 25, 28).

E. G. H. G. B. L.

**CHARIOT:** Vehicles are designated in Hebrew chiefly by two expressions, "agalah" and "rakab," with "merkab" and "merkabah" derived from the latter. The former denotes the wagon used for heavy loads and general work, the name being connected with the root "to roll"; while the latter is the chariot of war or of state. Wagons for carrying burdens or persons are found among the different

Egyptian Chariot.  
(From Champollion, "Monuments de l'Egypte.")

peoples of antiquity, having displaced at an early time the sledge and the drag on rollers, drawn by men or oxen (compare the pictures in Wilkinson, "Manners and Customs of the Ancient Egyptians," iii. 324). Early Egyptian monuments show also a frame like a litter, which was fastened between asses and used to carry persons.

Originally the wheels of the wagons were solid disks (*ib.* i. 369), but a more artistic type, consisting of hub, spokes, and fellics, was gradually evolved. The spokes, "hishshukim" (I Kings vii. 33), sprang from the hollow cylinder in the center of the wheel ("ofan" or "galgal"), that is, from the hub, "hishshurim" (I Kings vii. 33), around the stationary axle-

Hitite Chariot.  
(From Champollion, "Monuments de l'Egypte.")

tree, "yad," and connected it with the rim or the fellics, "gebim" (I Kings vii. 33; Ezek. i. 18, x. 12). In extant Assyrian illustrations the wheels generally have eight spokes, while in the Egyptian wagons four, or more frequently six, spokes are found. The body of the wagon and the pole were connected directly with the axletree. The pole had a yoke arranged for two animals only, so that each additional animal had to be harnessed separately, and not in

front, but on the side of the first two animals. As horses did not come into general use among the Israelites until the time of Solomon, oxen were originally the chief draft animals (I Sam. vi. 7), while asses were generally used for the saddle. That the Israelites in very early times had wagons for carrying burdens, is evident from I Sam. vi. 7 and II Sam. vi. 3. Mention is also made of threshing-wagons (Isa. xxviii. 27). There is no definite information regarding harvesting-wagons (see Amos ii. 13). It is to be noticed that the latter are not used to-day in Palestine ("Zeit. Deutsch. Paläst. Ver." ix. 40, and the commentaries on Amos, *l.c.*). Persons traveled chiefly on asses, because the poor condition of the roads in Palestine made it difficult to use wagons to any extent, especially for long journeys. Nevertheless, the fact that the Egyptians evidently received the word עגלה (Egyptian, "agolt"), as well as מרכבה (Egyptian, "merkobt"), from the Canaanites, shows that wagon-building was known at an early date in Canaan.

War-chariots proper were also known in Canaan at an early time, for as a result of having them the Canaanites were so superior to the Israelites that the latter could not meet them in open battle on the plain (Josh. xi. 4; Judges i. 19, iv. 3; I Sam. xiii. 5).

These vehicles were indeed strange to the Israelites. Although David captured chariots and horses in his war with the Syrians, he did not use them, and even hamstringed the horses (II Sam. viii. 4). It remained for Solomon to introduce war-chariots, which were stationed partly in Jerusalem and partly in other cities (I Kings ix. 19). Beginning with his time, chariots and horsemen are often mentioned in the army of the southern as well as of the northern kingdom (I Kings xvi. 9; II Kings viii. 21, xiii. 7; Isa. ii. 7; Micah v. 9). Horses were indispensable to these chariots, and the great difficulty in procuring them (II Kings vii. 13, xviii. 23) probably often induced political leanings toward Egypt (Isa. xxx. 16, xxxi. 1, xxxvi. 9).

The war-chariots doubtless resembled the Assyrian and Egyptian two-wheeled chariots, open in the back; they were not furnished with scythes, as is often stated, for the latter were introduced by the Persians. They were made of fig-tree wood, and trimmed with bronze or iron. Like those of the Assyrians, the Hittites, and others, the chariots of the Israelites probably carried three men, שלישיים, the driver, the warrior proper, and the shield-bearer; while on those of the Egyptians there were generally

but two men. According to I Kings x. 29 the price of a chariot imported from Egypt in the time of Solomon was 600 shekels, and that of a horse 150 shekels.

During the last decades of the southern kingdom mention is made of sun-horses and sun-chariots stationed in the outer court of the Temple, these being removed later by Josiah. They had been introduced at the time that syncretism was flourishing, and the cult of the sun-god had become dominant under Assyrian influence. As in the case

of the Canaanite Baal (in reality the sun-god), the Assyro-Babylonian sun-god had been identified with יהוה, and his symbols placed in the court of the Temple. Such syncretism was not altogether foreign to Hebrew ideas, for יהוה is not only the God of heaven, but also He who rides in a chariot (II ab. iii. 8; Ps. lxxviii. 18[17]) and on the CHERUBIM, and who descends in a chariot of fire to take His saints into heaven (II Kings ii.

Assyrian Chariot.

W. N.

**CHARITY AND CHARITABLE INSTITUTIONS.—Ancient and Medieval Times.** Charity is kindness shown to the needy; Hebrew, "zedakah"="righteousness" (Deut. xxiv. 13; Isa. xxxii. 17; Prov. xiv. 34; Ps. cvi. 3; Dan. iv. 24); "gemilut hesed" or "gemilut hasadim"="the bestowing of kindness," is the rabbinical term for personal charity. Charity may be regarded merely as a free tribute of love, as in the New Testament, where ἀγάπη is often translated in A. V. by "charity"; or it may be equivalent to "liberality," a term borrowed from the Roman world, where, as in Greece, only on a larger scale, the free-born ("libri") or wealthy showed generosity by great donations to the lower classes. But in Judaism charity is an act of duty incumbent upon men of means to provide for those in want. Charity is righteousness in so far as God, the Giver of all blessings, claims from His gifts a share for the poor, and, as the actual owner of the land, claims certain portions of the produce for the fatherless and the widow, the Levite and the stranger: "Thou shalt surely give him [the poor], and thine

**The Lord's Share.** heart shall not be grieved when thou givest unto him: because that for this thing the Lord thy God shall bless thee in all thy works and in all that thou puttest thine hand unto. For the poor shall never cease out

of the land; therefore, I command thee, saying, Thou shalt open thine hand wide unto thy brother, to thy poor and thy needy in thy land" (Deut. xv. 10, 11). In the Mosaic legislation the right of proprietorship does not extend to the corners of the field, the gleanings of the harvest, the forgotten sheaf, and the growth of the seventh year; they "shall be for the stranger, the fatherless, and the widow" (Lev. xix. 9, 10; xxiii. 22; Deut. xxiv. 19-21; Ex. xxiii. 11; compare Lev. xxv. 23). The tithes of the yearly produce also were claimed every third year for the Levite, the stranger, the fatherless, and the widow (Deut. xiv. 22-29, xxvi. 12 *et seq.*; compare Mal. iii. 10). So should every enjoyment of God's gifts be shared by the needy (Deut. xvi. 11, 14). Charity from this point of view may be called an assessment of the rich in favor of the poor. This also is the view of the Rab-

**A Claim of Righteousness and Love.** When asked by Timinus Rufus: "Why does your God, being the lover of the needy, not Himself provide for their support?" R. Akiba replied:

"By charity wealth is to be made a means of salvation; God, the Father of both the rich and the poor, wants the one to help the other, and thus to make the world a household of love" (B. B. 10a).

In another aspect charity is righteousness. The helpless has a right to claim the help of his more fortunate brother. The cry of the distressed is an appeal to human compassion which must be responded to, lest the "gracious" God, who "doth execute the judgment of the fatherless and widow" (Deut. x. 18)-hear it and punish those who remain deaf to the call of duty (Ex. xxii. 20-25).

**Charity Is Righteousness.** The poor are "my people," says God: "If thy brother be waxen poor . . . thou shalt relieve him that he may live with thee" (Lev. xxv. 35).

He is "of thine own flesh," and when thou seest him naked thou shouldst cover him, and give him bread when he is hungry, and shelter when he is cast out (Isa. lviii. 7). The idea that the poor and forsaken stand under the special protection of God, who "loves the stranger" and is "father of the fatherless and judge of the widows" (Deut. x. 18; Ps. lxxviii. 6, 15), is the underlying motive of such charity as is expressed in Proverbs: "He that hath pity upon the poor lendeth unto the Lord" (xix. 17); "He that honoreth him hath mercy on the poor" (xiv. 31). Compare Ps. xli. 1: "Blessed is he that considereth the poor; the Lord will deliver him in time of trouble," and the whole of Ps. cxii. Accordingly, the ideal type of the righteous man is he who is "eyes to the blind," "feet to the lame," and "father to the poor" (Job xxix. 15); and that of the virtuous woman, she who "stretcheth out her hand to the poor" and "reacheth forth her hands to the needy" (Prov. xxxi. 20).

Charity is a human obligation. Man owes it to his fellow-man as a brother. It is expected of all men and toward all men (Deut. xxiii. 5; I Kings xx. 31; Amos i. 11-ii. 1; Philo, "De Caritate," §§ 17, 18). Abraham is a type of charity and benevolence (Gen. xviii. 3). In the Testaments of the Twelve Patriarchs it is simple-hearted Issachar (Issach. 3, 5, 7)

who, by example and precept, teaches charity in "helping the poor and the feeble and sharing every gift of God with the needy." Philo

**Charity a Human Obligation.** (ed. Mangey, ii. 629), in the fragment preserved by Eusebius ("Preparatio Evangelica," viii. 7) gives, as especial ordinances of Moses the lawgiver, the Buzygian laws; that is, the old Athenian laws of humanity (see Bernays, "Gesammelte Schriften," i. 278 *et seq.*): "not to refuse fire to any one asking for it, nor to cut off a stream of water; to offer food to beggars and cripples, and to give decent burial to the unclaimed dead; not to add additional suffering to one who is in trouble, nor to treat animals with cruelty." Josephus ("Contra Ap." ii. 29) also gives as ordinances of Moses regarding all men: "to afford fire, water, and food to such as need them, to show them the road [see Bernays, *l.c.* p. 78], and not to let any one lie unburied."

With unmistakable reference to a similar rabbinical tradition are the words spoken by Jethro, the God-fearing Gentile, to Moses (Ex. xviii. 20): "Thou shalt teach them ordinances and laws and shalt show them the way which they should walk therein and the work that they should do," as interpreted by Eleazar of Modin in Mek., Yitro (compare B. Ḳ. 99b; B. M. 30b; and Targ. Yer. Ex. xviii. 20), to mean: "Show them the house of life," *i.e.*, the synagogue where the poor are to be sheltered; "the way," that is, to visit the sick; "where they should walk," that is, to bury the dead; "therein," that is, "to bestow kindness" to other persons in need; and "the work they should do," that is, to do "more than is strictly required." "To him who shows mercy to all his fellow-creatures, Heaven will also show mercy; to him who fails to show mercy to his fellow-creatures, Heaven will not show mercy" (Shab. 151b, based upon Deut. xiii. 18 [A. V. 17]). The Israelites are distinguished for charity, modesty, and benevolence (Yeb. 79a). When Moses asked the Lord to show him "His way," He showed him the treasures of heaven in store for those who do works of charity, especially for those who rear orphan children (Tanh. to Ex. xxxiii. 13).

Charity, however, should not be so altruistic as to overlook one's duties toward self and those nearer home. "He commits a crime who im-

**Principles of Charity.** perils his life by refusing to take charity when he is in dire need" (Yer. Peah viii. 21b). Against the tendency prevailing in Essene and Christian circles to sell all one had and "give to the poor" in order to have "treasure in heaven" (Matt. xix. 21), the rabbis at the synod in Usha ordained that "no one should give away more than the fifth of his fortune lest from independence he may lapse into a state of dependence" (Ket. 50a). "He that doeth righteousness at all times" (Ps. cvi. 3) is he who supports his wife and small children (Ket. *l.c.*). The poor among one's own relatives, and then those in the same town, have the leading claims upon charity (B. M. 71a).

On the other hand, charity is to provide each poor person with "what is sufficient for his need in accordance with what he lacks"; that is to say, his personal claims and wants with a view to his former social position should be considered; "and if he needs

who, by example and precept, teaches charity in "helping the poor and the feeble and sharing every gift of God with the needy." Philo

immediate use by three officers. The collections for the *kuppah* were made weekly. A residence in the city for thirty days obliged persons to contribute to the *kuppah*, one of three months to the family, one of six months to the clothing, and one of nine months to the burial fund (B. B. 8-9; Tosef. Peah iv. 8-15; Mishnah Peah viii. 7; Yer. Peah 21a, b). The task of the charity administrators—also called “*parnasim*” (פרנסים), from *πρόνοος* = “provider”; compare “Apostolic Constitutions,” iii. 3, *προνοίαν ποιούμενος* (Tosef., Meg. iii. 4; Yer. Peah viii. 21a, b; Shek. v. 4, 48a)—was regarded as extremely delicate, and often entailed great sacrifice; while the reputation of the officers was so high that they were never called to account for their administration (Shab. 118b; B. B. 9a-11a; ‘Ab. Zarah 17b).

The leading maxim was that the poor should never be put to shame by receiving charity (Hag. 5a). Maimonides (“Yad,” *Mattenot Aniyim*, x. 7-13) enumerates eight different ranks of givers of charity: (1) he who aids the poor in supporting himself by advancing money or by helping him to some lucrative occupation; (2) he who gives charity without knowing who is the recipient and without having the recipient know who is the giver, *i. e.* in the manner charity was practised in the chamber of the

**Modes of Alms-giving.** Hasshaim (Essenes) in the Temple at Jerusalem (Shek. v. 7); (3) he who gives in secret, casting the money into the houses of the poor, who remain ignorant as to the name of their benefactor: this was done by great masters in Israel (Ket. 67b), and should be done whenever the public charity is not administered in a proper way; (4) he who gives without knowing the recipient, by casting it among the poor, while the recipient knows who is the giver (Ket. *l. c.*); (5) he who gives before he is asked; (6) he who gives after he is asked; (7) he who gives inadequately, but with a good grace; (8) he who gives with a bad grace.

Impostors who pretended to have bodily defects, whereby to appeal to the sympathy of the charity officers, are mentioned (Peah viii. 9; Tosef. Peah iv. 14; Ket. 68a). Non-Jewish poor were also supported from the charity fund (Giṭ. 61a), but such Jews as wilfully transgressed the Law had no claim to support as “brothers” (Shulhan ‘Aruk, Yoreh De’ah, 251). A woman’s claim had precedence of a man’s; a student of the Law, over an ignorant man, even though of the highest rank (Hor. iii. 7-8; Ket. 6, 7a; Maimonides, *l. c.* viii. 15; Shulhan ‘Aruk, *l. c.*).

Charity was also regarded as a form of sacrifice offered to God on behalf of the poor (see ALTAR), and was invested with the sacred character of vows and free-will offerings (Deut. xxiii. 24; R. II. 6a). Hence it came that, while only worthy persons should receive charity (B. B. 9b; Ecclus. [Sirach] xii. 1-6 Didache, i. 5-6; “Apost. Const.” iv. 3), it was also of great importance that the givers should be of unblemished character (Tosef., B. K. xi. 9 *et seq.*; “Apost. Const.” iv. 6-10—a very important Jewish chapter on charity, stating that charity has the character of a sacrifice, for which nothing that is abominable to God [Deut. xxiii. 19] may be used, and to which none who is an abomination [Deut. xviii. 10 *et seq.*] may be a contributor; see DIDASCALIA). Es-

pecially idolaters, unless in cases of royal donors, were excluded from contributing to the charity fund (Sanh. 26b; B. B. 10b; Maimonides, *l. c.* viii. 9). A frequent form of charity practised in the pre-Christian and early Christian centuries was the hospice or public inn (“*pandok*,” *πανδοκειον*), built on the high road to offer shelter and

**Public Inn for Travelers.** food to the poor traveler and the homeless. Ascribed alike to Abraham and to Job (Ab. R. N. vii., ed. Schechter, p. 34; Soṭah 10a; Gen. R. xlix., liv.; Test. Job iii.; see Köhler, in Kohut Memorial Volume, pp. 270, 318; compare Targ. Yer. to Dent. xxiii. 17); this practise was known in Philo’s time (Philo, “De Caritate,” § 12, and elsewhere), and later on in Babylonia, where Hana bar Hanilai kept an inn which had its four doors open on four sides, exactly like those of Job and Abraham, to all passers-by; sixty bakers being kept busy baking bread in the daytime, and sixty at night for the bashful poor who would not be seen asking bread by day (Ber. 58b; compare Test. Job iii. 11).

This *πανδοκειον* of the Essenes appears as a Christian institution in the fourth century under the name of “*xenodochium*” (inn for strangers), and connected with, or serving as, a “*ptocheum*” or “*ptocheutrium*” (sick-house) and was, as Hieronymus expressly states, transplanted from the East to the West “as a twig from Abraham’s terebinth,” a direct allusion to the rabbinical identification of Gen. xxi. 33 with such a hospice (see Uhlhorn, *l. c.* pp. 319-321, where Hieronymus’ words are quoted, but seemingly without a comprehension of their significance). As a matter of fact, the emperor Julian, in instituting inns for strangers in every city, refers to both Jews and Christians, “the enemies of the gods,” as models of philanthropy, inasmuch as with the former no beggar was to be found, and the latter also supported the heathen poor as well as their own (Julianus, “Epist.” xxx. 49; Sozomen, “Hist. of the Church,” v. 16). Abrahams (in his “Jewish Life in the Middle Ages,” p. 314, note) is therefore not far from the truth when he suggests a possible connection of the ancient “*pandok*” with the communal inn of the Middle Ages for the lodging and feeding of poor or sick travelers, which became a special necessity after the Crusades. The halakic rule, fixed for all time, was that no city is worth living in for a devotee of the Law (“*Talmid hakam*”) which has not a charity-box, “*kuppah shel zedakah*”; that is, a systematic relief of the poor (Sanh. 17b). Also the name “*hek-desh*” for the Jewish hospital, found as early as the eleventh century in Cologne (see Brisch, “Gesch. der Juden in Coeln,” 1879, p. 19; Berliner, “Aus dem Innern Leben der Deutschen Juden im Mittelalter,” p. 120), and in the casuistic literature as “*bet-hekdesh* [le ‘*aniyyim*]” (“the house of the things consecrated [to the poor],” see Lampronti, *s. v.* הקדש), points to a long-established custom of the pious to consecrate property to God for the benefit of the poor (see Ta’an. 24a; B. B. 133b). This *hek-desh* served all through the Middle Ages, like the ancient Christian *xenodochium* (Haeser, “Gesch. der Christl. Krankenpflege,” 1857, 13), both as a poorhouse and as a hospital for the sick and the aged as well as for the stranger.

As has been shown by Abrahams (*l.c.* pp. 311-312), the tamhoi or food distribution of old was gradually superseded either by private hospitality or by communal hostelries and by the benevolent activity of charitable societies formed for this purpose; while the institution of regular relief through the charity fund (*kuppah*) became universal (see Maimonides, *l.c.* ix. 3). Charity being the universal duty, all were forced to contribute (*Ket.* 49b), even women and children, and, as far as they could afford it, the poor themselves (*B. K.* 119a; *Git.* 7b). In the synagogue the charity fund was remembered by vows made publicly (*Tosef.*, *Ter.* i. 10; *Tosef.*, *Shab.* xvii. 22), especially on occasions of joy or in commemoration of the dead ("Or Zarua'," i. 26; *Ro'keah*, § 217); and occasionally collections were made at festal banquets (Abrahams, *l.c.* pp. 31 *et seq.*). The average Jew was always expected to give one-tenth of his income to charity (*Ket.* 50a; *Yer.* *Peah* i. 15b; Maimonides, *l.c.* vii. 5); and the rabbis of the Middle Ages endeavored to make this a legal tax rather than a mere voluntary contribution (Abrahams, *l.c.* pp. 319 *et seq.*) See also Judah Hadassi, in "Eshkol ha-Kofer."

In the thirteenth century (Abrahams, *l.c.* pp. 324 *et seq.*; Gudemann, "Gesch. des Erziehungswesens und der Cultur der Juden in Deutschland," i. 50, note; Berliner, "Gesch. der Juden in Rom," ii. 56; Vogelstein and Rieger, "Gesch. der Juden in Rom," ii. 315; "Ben Chananjah," 1861, p. 23) charitable societies were organized all over Europe for supporting and clothing the poor, for the education of the children of the poor, for endowing poor maidens, for nursing and educating orphans, for visiting the sick, for aid to sick and lying-in women among the poor, for sheltering the aged, for free burials, and for the ransom of prisoners, which, of all charitable objects, is declared in the Talmud to be the highest of merit (*B. B.* 8b; Maimonides, *l.c.* viii. 9-15; see CAPTIVES). The activity displayed

**Charitable Societies.** by these societies in Rome in the seventeenth century is typical of all; though, according to Berliner (*l.c.* ii. 183), the Spanish and Italian Jews displayed a special talent for organization. There existed, and still exist, four central organizations in Rome: one by the name of "Ozer Dallim" for the help of the poor; a second by the name of "Gemilut Hasadim" for the benefit of the dead; a third by the name of "Moshab Zekenim," a home for the aged; and a fourth by the name of "Shomer Emunim" for the maintenance of the faith and worship. These comprise wellnigh thirty different societies, seven of which provide for the needs of the poor, children, widows, and prisoners; two for visiting the sick and for offering aid in cases of sudden death; two for dowries for poor brides; and one for the ransoming of captives. The nursing of sick women as well as the award of dowries to brides was in charge of a woman appointed as directress by the Jewish community. Non-Jewish poor were also supported by these Jewish societies, whose officers brought the required aid to the houses of the more respected poor. The women had their own society (see Berliner, *l.c.*; Vogelstein and Rieger, *l.c.*).

In a remarkable document by Samuel Portaleone

("Jew. Quart. Rev." v. 505-515) seven charity-boxes are mentioned as existing in Mantua or San Martino in 1630: a box for the land of Israel; another for Talmud-Torah; a third for burying the dead ("kuppah gemilut hasadim"); a fourth for charity ("kuppah rahamin," the sick and aged); a fifth for maidens' dowries; a sixth for the relief of the poor; and a seventh for the redemption of captives. (For Amsterdam compare Zedner, "Cat. Hebr. Books Brit. Mus.," p. 49.) The records of every Jewish community, ancient and modern, evidence the fact beautifully expressed in Cant. R. iv. 1, v. 2: "'Behold thou art fair, my love'—in all works of charity; 'I sleep, but my heart waketh'—'I sleep' in regard to all other commandments, but 'my heart waketh' whenever works of charity are to be performed." See ALMS and PHILANTHROPY.

—**Modern Times:** In more recent times the charities of some of the chief cities, as London, Paris, and New York, were organized and modeled on modern lines.

In London a number of charitable institutions connected with the Spanish and Portuguese synagogue had existed since the middle of the eighteenth century. Food charities were founded at the beginning of the nineteenth century, and the Jews' Hospital in 1808. In 1876 this was amalgamated with the Jews' Orphan Asylum founded 1831. Many minor Jewish charities had their rise between 1840 and 1860; the Spanish and Portuguese Board of Guardians was founded in 1837 (reconstituted in 1878), and the German Board of Guardians in 1859. The earliest Portuguese charity arose in 1703, and the earliest German in 1745. Then, too, a certain part of the synagogue funds was used in relieving the poor. Almshouses had been erected, early in the century, by the Portuguese synagogue from the bequest of Joseph Barrows. In 1823 Sir Moses Montefiore supplied money for the same purpose. The Ashkenazim established some benevolent societies between 1815 and 1835. In 1862 the Solomons and Moses almshouses were opened; in 1865 the Jews' Deaf and Dumb Home. Since that time, some new shelters, soup-kitchens, and wards in general hospitals have been established.

In 1829 Jacob S. Solis of New York planned a Jewish orphan asylum, but not until 1859 was the first German Hebrew Benevolent Society established in New York: its asylum was opened in 1860. The Mount Sinai Hospital was established in 1852, and the Montefiore Home for Chronic Invalids in the early eighties. The Hebrew Sheltering Guardian Society was founded in 1879 by Philip J. Joachimson of New York, and the Independent Order of B'nai B'rith Home for the Aged and Infirm in 1848. In 1855 the New Orleans Jewish Orphans' Home was

founded, and the Philadelphia Hebrew Education Society in 1849. A number of hospitals, orphan asylums, and homes were founded by the Independent Order of B'nai B'rith throughout the United States, as at Cleveland in 1863 and at San Francisco in 1871.

In Paris, the several societies were amalgamated as the Comité de Bienfaisance de la Ville de Paris on May 12, 1809. The heads of the Parisian charities were the commissioners who had charge of all matters affecting relief. Several times

**Paris.** the Comité was reorganized both in the number of commissioners and in the relief afforded. April 15, 1839, new regulations went into effect, and 15 commissioners were appointed. The number finally reached 36 in 1877. Subcommittees have charge of the receipts and expenditures, of poor-relief, coal supplies, soup-kitchens, etc.

In 1843 a lottery for the benefit of the charities of the Comité was instituted, and between 1843 and 1853 a lying-in hospital and one for consumptives were organized and assistance offered to Jewish peddlers. The Comité, moreover, endeavored to reduce the number of Jewish mendicants. In 1809, when the Comité was first organized, a complete hospital service was established. But a hospital building was not acquired until January, 1841; this contained 15 beds. It was formally opened Jan. 16, 1842, and did much to relieve the poor, besides providing medical treatment for sick Israelites. The Rothschilds endowed the institution liberally, and founded an orphanage in 1855. After the Revolution of 1848 the affairs of the Comité were entirely reorganized, and since 1849 it has had charge of all Parisian Jewish charities. Notable was the founding of the Alliance Israélite Universelle in 1863.

A. A. M. F.

In 1882 the persecution of the Jews in Russia, resulting in a sudden emigration, thrust upon the Jews of various countries the problem of finding adequate relief for thousands of homeless and starving refugees. Soon it became necessary for the societies and institutions that existed in the communities to combine their efforts and enter into cooperation. In this manner Russian emigration gave impetus to the affiliation and consolidation of charitable effort, and especially affected such movements as had been started some time before. Within the

**Effect of Russian Persecution.** past twenty-five years these organizations, originally formed to meet an imminent need, have developed into compact, systematic bodies. In the larger communities in particular, where thousands of Jews lived, many

of whom were unknown to one another, the charity given indiscriminately by the individual gradually gave way to charity given by the organization after careful investigation of the applicant's needs, with the view of preventing pauperism and its attending

evils. Along with this innovation came the introduction of the paid agent instead of the volunteer, it being the business of the former to study the complex conditions that encompassed the poor and

**Co-operation Due to Russian Exodus.**

to administer relief, not only from the standpoint of the poor, but from the standpoint of their relation to the community. The modern Jewish relief institution is based on the assumption that the administration of charity is a task for the sociologist who has studied

the causes subjective and objective that produce poverty, and for the trained expert who has a knowledge of the particular agency that may be required to alleviate any form of distress.

The organizations, societies, and agencies for the giving of charity in its various phases may be grouped under the following general headings:

**1. The Care of Needy Families in Their Homes:** It is almost axiomatic that the care of needy Jewish families in their homes to-day is not a matter for public relief by the state, even in communities where public outdoor relief is given. Such relief as may be needed is given by Jewish organizations which, as a rule are based on the same plan and carry on similar lines of work. The Boards of Guardians in England, the Unterstützungs-Vereine in Germany, the Sociétés de Bienfaisance in France, the United Hebrew Charities and other benevolent societies in the United States give material relief to the deserving poor in the shape of money, clothing, coal, medicine, food, etc., and practically combine under one administration the duties of smaller individual charities which they have replaced. Many of these larger societies conduct employment bureaus, loan bureaus, workrooms for unskilled women, day, nurseries, and dispensaries as adjuncts to their regular work. An important feature is the granting of transportation to other communities where the applicant may be better able to prosecute his particular vocation.

The larger societies have a registration bureau, in which the record of the applicant is carefully preserved, and which is intended for the use of the contributors and the public. The purpose of such a bureau is to overcome the possibility of overlapping and duplication in the giving of

**Principles of Relief.** relief, and to weed out the beggar and the vagrant. The fundamental principle of these societies is that relief

shall be given in cases of emergency and only after a thorough investigation of the applicant's condition; that the relief which is given shall come from one source; that it shall be adequate for the applicant's needs, and shall consider his future welfare as well as his present distress. To carry out the last idea, many organizations have instituted cooperating societies known as sisterhoods of personal service, whose duty it is to enter the homes of the poor and to supplement the material relief of the society with the helping hand and kind word of the individual. Such personal service is a phase of the old Jewish idea of "gemilut hesed," and the modern development of the thought that the best aid that can be given to the poor is to help them to help themselves. The motto of one of the charity

organization societies in the United States, "Not alms, but a friend," is the fundamental motive of personal service and of the friendly visitor.

Many of these sisterhoods are adjuncts to the synagogue, and are a part of the contribution of the latter to the charitable work of the community. It is becoming more apparent daily that the friendly visitor, the man or woman who gives personal service to the poor, if intelligent and tactful, can be of inestimable benefit to the work of a relief society.

The London Board of Guardians for the relief of the Jewish poor stands as a type of the relief society that is to be found in England and its provinces. Its expenditures in 1899 were nearly £58,000 (\$290,000). It represents practically the entire Jewish community of London, although there are a number of independent small societies which give similar relief. Its work is conducted by thirteen committees, who grant loans, conduct workrooms, assist emigrants, apprentice boys, supply tools, conduct almshouses, and give every form of material relief. Similar organizations are found in most of the cities and towns in the provinces and colonies and throughout the British possessions.

In Paris the Comité de Bienfaisance Israélite, assisted by the commissioners of charity, grants necessary assistance to worthy poor families, gives them tools and machines or the means to purchase the same, also grants money to purchase

**Local** goods, makes loans, and provides medical relief. The Comité conducts an **Centralized** employment bureau and maintains **In-**stitutions. two large Jewish soup-kitchens where, for ten and fifteen centimes, portions of soup, meat, and vegetables are given to all presenting orders from the Comité. Outside of Paris there exist in France but few important institutions as there are but comparatively few Jewish poor.

In the United States the United Hebrew Charities of New York is the largest organization of its kind, disbursing annually upward of \$130,000, and is representative of similar institutions throughout the country. It endeavors to give every form of material relief that may be required by its beneficiaries, and to supplement this relief by educational and preventive agencies so that the grinding poverty common to congested communities, which rapidly tends to degeneracy, may not only be palliated, but suppressed. Not only in the larger cities of the United States, but in the smallest community where there is a Jewish population, similar organizations exist. In the "American Jewish Year-Book" for 1900-01, 593 philanthropic organizations are mentioned, of which the large majority assist in the care of needy families in their homes. There are, however, numbers of small relief and benefit societies which have been organized by the Russian, Rumanian, and Galician immigrants of the past twenty-five years and their descendants, which are little known outside of their immediate environment and which are not included in this list.

In Germany the Armen-Commission der Jüdischen Gemeinde in Berlin is typical of the general societies which look after the needy poor. This organization is composed of a committee from the United Congregations, in whose charge the philanthropic work

of the community is placed. In this respect Germany differs from the other countries mentioned above, where the large communal organizations are as a rule separate from congregational effort. The Armen-Commission in Berlin has several subcommittees, one of which gives monetary relief, another work and mazzot, and a third food. There are among them also a number of smaller institutions, such as a society for the support of needy travelers, a society for the granting of pensions to students, and another for giving clothing. Characteristic of Germany are organizations known as Vereine Gegen Wander- und Hausbetelei, of which there are seventy-seven in the various German cities and towns. In the smaller communities, as in the larger, the care of the needy families is a portion of the work of the Jewish congregations.

**2. Destitute, Neglected, and Delinquent Children:** The orphaned child has always been the particular care of the Jewish community. Furnishing marriage portions to orphans was the work of special societies. Wherever it was possible, the orphan child was taken in charge by relatives or friends, or foster-parents were found for it. When this became impossible, orphanages and asylums were organized to look after the child bereft of either or both of its parents. The object of these societies was not only to give shelter, but to educate the inmates to become good Jewish men and women. Such orphan asylums sprang into existence as early as the latter part of the eighteenth century, and today are the accepted method of caring for the dependent and destitute child. Societies for the boarding out of children in homes under the supervision of proper guardians are less common. Of more recent growth is the development of what is known as the placing-out system under which the child is

**Boarding** legally adopted. This system is based **Out.** on the belief that the housing of large numbers of children in institutions is detrimental to their proper development and destroys individual characteristics which would be brought out in the more natural environment of a home. Attempts that have been made in the United States to place children in homes have given but meager results.

In London there are two institutions for dependent children, the Jews' Hospital and Orphan Asylum and the Spanish and Portuguese Orphan Society, the latter for children of Sephardim only. In the provinces there are no orphan asylums, but in a number of communities there are organizations which are in the nature of aid societies to the Jews' Hospital and Orphan Asylum. In Australia there is a Jewish Orphan and Neglected Children's Aid Society in Melbourne.

In Paris the Jewish Orphan Asylum founded and maintained by the Rothschild family receives and educates about 100 children of both sexes; the Refuge de Plessis-Piquet receives abandoned boys from six to fourteen years old, gives them an elementary education, and teaches them a trade. It has accommodations for 70 pupils. The Refuge de Neuilly conducts a similar institution for girls.

In the United States there are at present 16 Jewish asylums for dependent children, situated in the

cities of Atlanta, Baltimore, Boston, Brooklyn, Chicago, Cincinnati, Cleveland, Newark, N. J., New Orleans, New York, Philadelphia, Pittsburg, Rochester, and San Francisco. Of these the largest are the Hebrew Sheltering Guardian Society of New York, which at present cares for over 900 children, and the Hebrew Benevolent and Orphan Asylum Society, which has nearly that number of children in its charge. The Hebrew Sheltering Guardian Society of New York and the Hebrew Infant Asylum of the same city are distinctive in that they receive not only orphan and half-orphan children, but any child for whom there is no proper guardianship. The latter institution confines its work to children under five years of age. The asylums in Atlanta, Ga., and Cleveland, Ohio, are under the auspices of the I. O. B. B. and receive their inmates from the respective districts which they represent. The other societies are local in character, and are conducted by private agencies.

The modern tendency in the care of dependent children is, as has been stated, against the institution, and in favor of the home as the natural place for child-training. On this supposition many of the Jewish relief societies grant pensions to deserving widows to enable them to keep their families intact. The United Hebrew Charities of New York disburses over \$30,000 annually to this end. In the case of full orphans and half orphans, societies like the Orphans' Guardian Society of Philadelphia and the Frank Fund of Chicago board out such children under proper guardianship in families. The Federation of Charities of Boston, in connection with the state authorities, has succeeded in boarding out some of its dependent children in Massachusetts homes.

In Germany, the institutional care of dependent children has developed further than in any other country, there being no less than 41 asylums of various kinds that look after the interests of children. Most of these institutions are local in character and have but few inmates; others, like the one founded by Baruch Auerbach in Berlin in 1833, are organizations of considerable importance.

**European Institutions.** Besides this institution there are ten others in Berlin; in Frankfort there are three; in Hamburg, two; in Hannover, two; and the others are scattered throughout the smaller towns and cities.

There are no special institutions for delinquent Jewish children. In Paris such children are sent to the Refuge de Plessis-Piquet; in Frankfort there is a society known as the *Stift für Gebrechliche oder Verwahrloste Israelitische Kinder*. In neither of these institutions is there any attempt at classification. Whenever delinquent children have been found, they have been turned over to public officials and placed in state or private agencies, not Jewish, of a correctional or reformatory character. In large cities, such as New York, the growth in the number of juvenile Jewish delinquents will in all likelihood necessitate the introduction of Jewish reformatories in the future. In Chicago, the Ninth Ward Bureau of Charities, which is affiliated with the Federation of Jewish Charities, has cooperated with the secular authorities toward the establishment of a

juvenile court and the paroling of delinquent Jewish children to probationary officers, in whose charge these children are placed and who are responsible to the court. In this manner many children who formerly were committed to correctional institutions for petty offenses are returned to their families under the supervision of the probation officer. The result has been salutary to a large degree.

**3. Hospitals, Dispensaries, Nursing:** The inns of the Middle Ages, for the accommodation of travelers and which also served as infirmaries, have given place to-day to magnificently equipped hospitals in all parts of the world, many of which differ radically from their originals, as they are founded on the highest principles of non-sectarian charity. Many of the institutions known as Jewish hospitals, while founded and endowed exclusively by Jews, are intended for the treatment of all, irrespective of creed, color, or race. The majority of these hospitals have a dispensary service attached to them, where outdoor medical relief is given. A number have district service, sending their physicians to the homes of the poor who are bedridden. Similar work is done by the relief-giving societies, the one in Chicago, for example, having its own dispensary. In connection with their other work, the hospitals frequently have training-schools for nurses, and of more recent growth are organizations similar to the nurses' settlement in New York, which combine training with district and neighborhood work. Institutions for the treatment of special diseases and for special classes of diseases are becoming more common, in line with the differentiation in charitable work.

In London, the Board of Guardians conducts a nursing-home and sends nurses to invalid children. Another organization, known as the Sick-Room Helps Association, provides attendants for the homes of the poor during illness and confinement. Convalescents are cared for by the Baroness de Hirsch Convalescent Home and the Jewish Convalescent Home. There are also a home and a hospital for Jewish incurables, and the Bet Holim Hospital for the aged.

The hospital founded by the Rothschild family in Paris is the only Jewish hospital in France. This is insufficient for the Jewish population, but the Jews do not hesitate to go to the general hospitals, where they obtain admission without difficulty. Connected with the Rothschild institution is a home for incurables, which accepts, besides those incurably ill, idiots and paralytics. At Berck-sur-Mer one member of the Rothschild family founded an institution for the special purpose of receiving and curing children up to fifteen years of age, who are of feeble constitution or scrofulous. Jewish hospitals are also to be found in Tunis, Smyrna, Constantinople, Salonica, Jaffa, and Jerusalem.

In the United States, medical relief is given by a large number of relief societies. There is a Jewish hospital in each of the following cities: Baltimore, Chicago, Cincinnati, Denver, New Orleans, and San Francisco. In New York there are four, in Philadelphia two. The hospital in Denver is a national Jewish institution for consumptives. A similar institution, local in character, is the Bedford Sanitarium

of the Montefiore Home, recently established at Bedford Station, N. Y. In St. Louis and Omaha, hospital societies have recently been organized. In New York the sanitarium for Hebrew children gives medical relief and a summer's outing to Jewish children and to their mothers under certain restrictions. In Germany, there are over 30 hospitals, three being in Berlin and three in Frankfurt. There is one in Nauheim, but it is for the treatment of children exclusively. Many of these, like the relief bureaus, are conducted under the auspices of the local congregations, and are partly supported by contributions from the latter.

**4. The Treatment of Criminals:** Until recently there was no special institution in any part of the world for the treatment of Jewish criminals. In London a special reformatory has been established, and a visitation committee of the United Synagogues visits the prisons. The percentage of Jewish criminals in state institutions has always been a very small one. Imprisonment for major crimes has until recently been very rare. Petty offenses, such as larceny, are the most common. In large cities, such as New York, Jewish criminality is steadily on the increase, and is no longer confined to the minor crimes. In the year 1900, 433 Jewish men and women were sent to the various prisons, jails, and reformatories throughout the state of New York, 419 Jews were sent to the New York city workhouse, and 383 Jewish boys and girls were sent to correctional institutions. While the proportion is below that existing among Catholics and Protestants in the same community, it is higher than the figures of a few years ago. The Society for the Aid of Jewish Prisoners of New York has been organized to look after the condition of affairs and to ameliorate it if possible. It cares for the families of prisoners, and gives the prisoners a helping hand after being discharged.

**5. Defectives:** Special Jewish institutions for the care of this class of dependents are exceedingly uncommon, and separate Jewish institutions for the care of the insane are unknown. The same is true of institutions for the care of the epileptic and the feeble-minded. In London there are a Jews' Deaf and Dumb Home (1863) and an institution for the indigent blind founded as early as 1819 under Jewish auspices. In Berlin, in Tauberbischofsheim (Germany), and in Budapest, there are Jewish institutions for the deaf and dumb, and there is a Jewish Blind Institute in Vienna. In Berlin there is also a society known as the Verein zur Förderung der Interessen der Israelitischen Taubstummen in Deutschland. There are no corresponding institutions or societies either in France or the United States.

**6. Care of Destitute Adults:** Consistent with the general policy of Jewish charity, it has never been customary to allow the destitute adult to become a charge upon the state or to be supported by public funds. In the almshouses of America or the poorhouses of England or in the public institutions of other countries for the care of indigent adults a Jew is seldom found. Private benevolence has constructed homes for the aged in which the

dietary laws are observed, or has arranged a system of life-pensions which permits those who have become incapacitated, through age or illness, to spend the remainder of their lives removed from the fear of becoming public charges.

In England there are but seven homes for the aged, of which six are in London and one in Manchester. One of these is under the auspices of the Jewish Board of Guardians; one conducted in connection with the United Synagogue, and one in connection with the Spanish and Portuguese Congregation. The others are conducted by private agencies. Most of these institutions are known as almshouses.

In Birmingham the Hebrew Philanthropic Society grants pensions to aged persons. In Liverpool the Hebrew Provident Society provides old people with a weekly pension; a similar organization exists in Manchester. In the other cities throughout England the care of the aged poor is left to the various Boards of Guardians and relief societies. In the British colonies there are homes for aged men and women in Gibraltar and in Sydney, Australia. In France a home for the aged is connected with the Jewish Hospital in Paris. Similar institutions are to be found at Nancy, Bordeaux, and Luneville, maintained by the local Jewish charities. In the United States, homes for the aged are located in Baltimore, Boston, Chicago, Cincinnati, Cleveland, New Orleans, New York, Philadelphia, Richmond, St. Louis, San Francisco, and Yonkers, N. Y., the last-mentioned being conducted under the auspices of the I. O. B. B. The home at Cleveland is supported by the order *Kesher Shel Barzel*, the other institutions by private effort in the various communities. As with orphan asylums and hospitals, Germany has a larger number of institutions for the aged than any other country. There are at present 23 "Pfründnerhäuser" or homes for the aged, Breslau having three, Berlin two.

**7. Preventive Work:** The chief tendency of modern charity being in the direction of the prevention of poverty and pauperism rather than their palliation, it has been found necessary to create many new agencies that tend to this underlying idea. In the belief that the prosperity of the people is in direct proportion to their health, free baths have been established to inculcate cleanliness and order. Of such a kind are the free baths connected with the Hebrew Education Societies in Philadelphia, Cleveland, and San Francisco. To insure proper nourishment for children, the Milk and Ice Society of Philadelphia and Baltimore and the Nathan Straus milk depots in New York furnish sterilized milk at a nominal cost.

In London the soup-kitchen provides soup and bread for the Jewish poor during the winter months.

Similar kitchens are conducted by the *Société de Bienfaisance* in Paris, where soup, meat, and vegetables are sold at a nominal price, and in Budapest. In Germany, people's kitchens exist in Berlin and Breslau. Special societies likewise look after the proper housing of the Jewish poor with the hope of either removing them from the congested centers in which they live in the large cities, or of providing them

with homes built according to the best principles of light, ventilation, and sanitation, which can be rented at a nominal price.

In London, The Four Per Cent Industrial Dwellings Company, Limited (1885), is conducted under Jewish auspices with the intention of furnishing healthy dwellings at a rental sufficient to yield a dividend of 4 per cent per annum on the investment. The City and Suburban Homes Company of New York, while non-sectarian in character, has a number of Jewish incorporators, and has a similar object to that of the London society. In the hope of bringing the worker into closer contact with the poorer classes, neighborhood houses and settlements have been organized in a number of communities. Of such a kind is the Maxwell Street Settlement in Chicago, Ill., and the Neighborhood House in St. Paul, Minn. In the latter there is a resident worker. Similar Jewish settlements are to be found in Cincinnati, Milwaukee, and Cleveland. Of a special nature is the Nurses' Settlement in New York. In all of these settlements the purpose is to raise the intellectual and moral level of the immediate neighborhood in which the settlement exists, by the organization of classes, by giving instruction to both

#### Edu- cational Set- tlements.

the younger and the older element, and by developing the social characteristics of the vicinity along educational lines. Societies like the Educational Alliance in New York make this their aim. They give instruction in various trades, conduct boys' and girls' clubs, and by carefully arranged entertainments develop the social side of the neighborhood. Similar in character to the latter are the Hebrew Educational Society in Brooklyn and the Hebrew Education Society of Philadelphia. In London the Brady Street Club for working boys, the East London Jewish Communal League, the Jewish Lads' Brigade, Jewish Working Men's Club, and the Lads' Institute accomplish similar results. In France the Union Scolaire in Paris corresponds to the societies mentioned above. This organization is a club where young men meet for conferences, readings, etc. It assists young Jews to find employment, and grants loans to workmen and small tradespeople. In Germany there are societies, clubs, etc., in fifty cities for the cultivation of trades and handicrafts among Jews. Somewhat more technical in the instruction which they give are the Jewish Training School of Chicago, the Hebrew Free and Industrial School Society of St. Louis, the Hebrew Industrial School of Boston, the Clara de Hirsch Home for Working Girls, the Hebrew Technical Schools for Girls, the Hebrew Technical Institute, and the Baron de Hirsch Trade School of New York. In connection with their relief-work, the sisterhoods mentioned above conduct religious schools, industrial schools, day-nurseries, employment bureaus, cooking-classes, sewing-circles, classes for women, home circles, kindergartens, boys' and girls' clubs, mothers' meetings, and workrooms for unskilled women. Similar organizations are conducted by individual societies in most of the large cities.

**8. Supervisory and Educational Movements:** Among the most marked features of the

development of charitable work within the past twenty-five years is the tendency of various institutions to effect an organization that will add to their value, and that will give the members of any one society the opportunity of coming in contact with the workings of similar societies in other communities. In England, while there is no special supervisory or educational movement appertaining directly to charitable work among the Jews, organizations like the Anglo-Jewish Association and the Committee of Deputies of the British Jews interest themselves in all communal work, and indirectly in the charitable work of the various communities. These two societies have affiliated organizations throughout the cities and towns of England, as well as the provinces. In France there is likewise no special organization which devotes itself purely to federation of the philanthropic organizations. In Germany the Deutsche Israelitische Gemeindebund has been in existence for thirty years, and is practically the source and inspiration of the charitable work carried on there. This organization publishes every two weeks statistics of its work, and from time to time special communications to its members. Up to the present time fifty-five reports have been issued. They are mainly educational in character and, in connection with the statistics which are published, give a useful résumé of the philanthropic work that is carried on by the Jews in the German empire. In this Gemeindebund **Combined Activity in** practically every town, and even the **Germany.** smallest village, in Germany is represented, so that there are complete federation and community of interest.

In the United States an attempt to bring the several relief societies into a union was attempted as early as 1885, when a conference was held in the city of St. Louis, but came to naught. In 1899 a similar movement was organized, and the first conference of this society, known as the National Conference of Jewish Charities, was held in Chicago in June, 1900. It now comprises all the important relief societies in the United States. It issues a volume of proceedings and rules for the guidance of its members on questions of transportation, desertion, etc. International organizations which interest themselves in philanthropic work and which can only be mentioned here incidentally, are the Jewish Colonization Society, the Alliance Israélite Universelle, and the numerous foundations and trusts that were established by the Baron de Hirsch.

**9. Immigration:** In connection with the work of relief societies in the United States, the United Hebrew Charities of New York has a special representative at the immigration bureau, who looks after the welfare of Jewish immigrants. In Philadelphia the Jewish Immigrant Aid Association supports a similar office. In England the London Board of Guardians has a special committee to which is entrusted the entire question of immigration and emigration. In Germany, and in France, the immigration question is almost altogether in the hands of the Jewish Colonization Association or the Alliance Israélite Universelle, which has agencies at various points.

L. K. F.

**CHARKOW, RUSSIA.** See KHARKOV.

**CHARLEMAGNE:** King of the Franks and emperor of the West; born April, 742; died Jan. 28, 814. His attitude toward the Jews was rather that of a clever politician than of a liberal-minded man. He realized the advantages to be derived by the country from the business abilities of the Jews, and gave them complete freedom with regard to their commercial transactions. Some Jews seem to have occupied prominent places at his court. Thus, Charlemagne had for his physician one named Ferragut. A Hebrew named Isaac was a member of an embassy sent by Charlemagne to Harun al-Rashid, probably in the capacity of dragoman. The account which connects Charlemagne with the coming of Makir to Narbonne is apocryphal.

But if the Jews were free in their commercial dealings, their political status generally remained almost the same under Charlemagne as under his predecessors. This is seen in his capitularies, some of which deal directly with the Jews. In bringing a charge against a Christian, the Jew was to have four, nine, or seven witnesses, while the Christian was held only to three. No Jew was to engage a Christian workman on a Sunday, nor was he to take in pledge, at the risk of the loss of his property and his right hand, anything that was the property of the Church. No Jew was allowed to force a Christian to go to prison as pledge for a Jew. When a Jew took an oath he was to hold a copy of the Pentateuch in his hand, and to swear: "So help me God! the same God that gave the Law on Mt. Sinai; may the leprosy of the Syrian Naaman not come upon me, as it did on him, nor the earth swallow me up as it did Dathan and Abiram; in this matter I have done thee nothing that is evil." Some of the capitularies were dictated by a spirit of proselytism. In regulating the laws of marriage, Charlemagne forbade the Jews to marry relatives within the seventh degree of consanguinity. "We desire," says he in this capitulary, "that any Christian man or woman, any Jew or Jewess, who would contract a marriage, should not be permitted to do so until after having provided a dowry and obtained in the Church of God the benediction of a priest." But the genuineness of some of the capitularies is not beyond doubt.

**CHARLEMONT, ELIZABETH JANE CAULFIELD, Countess of:** Convert to Judaism; born June 21, 1834; died at Roxborough Castle, Moy, County Tyrone, Ireland, May 31, 1882. She was the only daughter of William Meredyth, first Lord Athlumney, and married Dec., 1856, James Molyneux, third earl of Charlemont. Although a Christian by training, she became a regular attendant at synagogue worship, often seeking advice in spiritual matters from Jewish rabbis. Lady Charlemont resided in the country near Belfast, the synagogue of which town she frequently attended; while in London she worshiped at the services of the Bayswater and Central synagogues. She was a woman of

varied accomplishments, an excellent linguist, and a good musician; and possessed a remarkable gift for recitation, which she utilized on behalf of charitable institutions.

**CHARLESTON, S. C.:** Capital of the county of the same name, and chief city of the state of South Carolina in the United States; founded in 1670. The colony of South Carolina was originally governed under an elaborate charter drawn up in 1669 by the English philosopher John Locke. This charter granted liberty of conscience to all settlers, expressly mentioning "Jews, heathens, and dissenters."

The earliest record of a Jew in Charleston appears in 1695, when one is mentioned as acting as interpreter for Governor Archdale. It is likely, however, that individual Jews had settled there at an earlier date. In 1702 Jews appeared in numbers; and they seem to have influenced a general election. The Jewish community at Charleston received a substantial addition during the years 1740-41, when the illiberal policy of the trustees of Georgia induced both Jews and Christians to leave that colony and to flock to South Carolina.

The first synagogue established at Charleston was that of the congregation Beth Elohim, founded in 1750. Several of its founders had come from Georgia. Its first minister was Isaac da Costa; and among its earliest members were Joseph and Michael Tobias, Moses Cohen, Abraham da Costa, Moses Pimenta, David de Olivera, Mordecai Sheftail, Michael Lazarus, and Abraham Nuñez Cardozo. The

Beth Elohim congregation is still in existence. Its first synagogue was a small building on Union street; its present edifice is situated on Hasell street. The Jews of Charleston at an early date also established a Hebrew Benevolent Society, which still survives.

While the earliest congregation was composed mainly of Portuguese Jews, the German element soon became prominent. Even before 1786 the city possessed not only a Portuguese congregation, but a distinct German-Jewish one as well. The Jewish community soon became very prosperous; and before the Revolution several Jews had acquired wealth and gained distinction. Among these may be mentioned Moses Lindo, inspector-general for South Carolina.

During the struggle for independence the Jews of Charleston distinguished themselves by their patriotism. Not a single case of Toryism was to be found among them; while many instances of devotion to the cause of independence are recorded. The majority did good service in the field, mainly as officers. The most prominent Jew at the outbreak of the war was Francis SALVADOR, who resided near Charleston, and whose remains are interred in the old Charleston cemetery. Salvador was a member of the Colonial Assembly as early as 1774, and of the Provincial Congress as well. He was one of the leading patriots of the South.

In 1779 a special corps of volunteer infantry was organized for the defense of the city; and this regiment was composed almost exclusively of Israelites. Among its members were Daniel N. Cardozo, Jacob I. Cohen, and Isaiah Isaacs. The regiment subsequently fought under General Moultrie at the battle of Beaufort. Among others who served in the field may be mentioned Jacob de la Motta, Jacob de Leon, Marks Lazarus, the Cardozos, and Mordecai Sheftail, who was commissary-general

**In War of Independence.** for South Carolina and Georgia, but who must be considered as a resident of Savannah rather than of Charleston.

Major Benjamin Nones, a French Jew in Pulaski's regiment, distinguished himself during the siege of Charleston and won the praise of his commander for gallantry and daring. Mordecai Myers was also prominent at this period.

In 1790 the Jews of Charleston sent an address of congratulation to Washington upon his accession to the presidency, to which he replied in the most cordial terms.

In 1791 the congregation, then numbering fifty-three families, was incorporated by the legislature; and in 1794 its synagogue was consecrated in the presence of General Moultrie and many of the chief dignitaries of the state.

Shortly after this period many Jews went to Charleston from New York and elsewhere, owing to the great field offered by the South for commercial enterprise. In 1816 the city numbered over 600 Jews, then the largest Jewish population of any city in the United States.

During the early portion of the nineteenth century several Charleston Jews held high offices in the state. Among these may be mentioned: Myer Moses, member of the legislature in 1810; Abraham M. Seixas, a magistrate; Lyon Levy, state treasurer; and Franklin J. Moses, chief justice of South Carolina.

Charleston Jews also rendered valuable service during the War of 1812 and in the Mexican war.

The first Jewish Reform movement in the United States originated in Charleston. In 1825 a large

number of the members of Congregation Beth Elohim petitioned its trustees to shorten the service and to introduce the English language. The petition was rejected; and, as a result, the petitioners resigned, and organized the Reform Society of Israelites. David Nunez Carvalho was the first reader of the society; but the most influential man in the movement was Isaac HARBY, a distinguished journalist and playwright, editor of the "Quiver," "City Gazette," "The Charleston Mercury," and other publications. In 1843 there was another split in Congregation Beth Elohim, owing to the introduction of an organ into the synagogue. This resulted in the formation of a new congregation known as "Shearith Israel," which, however, reunited with the old congregation in 1866.

Other prominent Charleston Jews during the early part of the nineteenth century were: Penina Moise, born in 1797, who became widely known as a writer of verse; Mordecai Cohen, to whose memory the city of Charleston erected a tablet in the Orphan House in recognition of his benevolence; and Myer Moses, one of the first commissioners of education.

At the outbreak of the Civil war the Jews of Charleston joined their Gentile brethren in the Confederate cause. One of the prominent soldiers of the Confederacy was Dr. Marx E. Cohen. Since the war the Jews of

Charleston have been less prominent, owing partly to losses resulting from the struggle, and partly to the fact that the city is no longer the commercial center it formerly was. Charleston to-day (1902) contains fewer than 2,000 Jews, a proportion smaller than in 1816.

It is interesting to note that in 1885 the centennial of the birth of Sir Moses Montefiore was celebrated in Charleston by both Jew and Gentile.

Besides the Beth Elohim congregation the only other is that of Berith Shalom, with its synagogue at St. Philip street, south of Calhoun street.

Interior of the Old Synagogue at Charleston, S. C., Destroyed by Fire April 27, 1888.

**CHARMS.** See AMULETS; MAGIC.**CHAROSETH (HAROSETH).** See SEDER.

**CHARTOGRAPHY:** The art of making maps. In the development of this art, during the Middle Ages, an epoch is made by the Catalan "portulani"—seamen's charts showing the directions and distances of sailing between different ports, chiefly of the Mediterranean. These differ from the medieval *mappe mundi* by having tolerably accurate outlines of the Mediterranean littoral, and are thus, in some measure, the predecessors of modern maps. Baron Nordenskjöld has proved that these are derived from what he calls the normal portulano, compiled in Barcelona about 1280. The best known of the portulani are those drawn up in the island of Majorca, where a school of Jewish cartographers seems to have drawn up sea-charts for the use of seamen. In 1339 Angelico Dulcert drew up a portulano which still exists; and in 1375 this was greatly improved by Cresquez lo Juheu, who added to Dulcert's outline the discoveries of Marco Polo in the east of Asia. He thus made the voyage to the Indies westward appear less than it really was, and so helped toward the voyage of Columbus. This map, known as the "Catalan Portulano," was sent by the king of Aragon to the king of France, and is still retained in the Louvre. It formed a model for many globes and later maps, including those which most influenced Columbus, and is perhaps the best known of the portulani. See CRESQUEZ; GEOGRAPHERS, JEWS AS.

**CHARTRES:** Chief town of the department of Eure-et-Loire, France. From time immemorial Jews were established at Chartres, occupying a special quarter called "Rue aux Juifs." In 1394 their synagogue, which was in the Rue Saint-Père, was transformed into a hospital, becoming the property of the parish of St. Hilaire. In the "Réponses de Rabins Français et Lorrains," p. 15, mention is made of "קרטיני" דיניר, interpreted by the editor as "current coin"; but by Neubauer, in "Rev. Etudes Juives," iii. 155, with more reason as "coins of Chartres." There was, in fact, a mint at Chartres, which was called "Chartrain," and in Old French "Chartain."

Among the prominent rabbis of Chartres have been Mattithiah of קרטראש or קרטראש, a well-known scholar who flourished at the time of Rasli; R. Joseph, Bible commentator; and Samuel ben Reuben, a liturgical poet.

**CHASEISCH, MOSES:** German Talmudist; died at Halberstadt in 1793. Chaseisch enjoyed an established reputation among his contemporaries as a Talmudist, and was loved and honored by them on account of his modesty. Although his Talmudic attainments entitled him to the position of rabbinical assessor (or "klausner"), he preferred to devote his life to instructing the young in Talmudic science. Notwithstanding his straitened circumstances, he often refused to accept the fees for his lessons. Chaseisch taught not for the sake of profit, but for love of the Torah. As the fruit of his labors, the majority of the Jewish scholars who lived at Halberstadt between 1780 and 1840 owe to him their Talmudic knowledge and religious instruction.

**CHASHKES, MOSES (LÖB) B. JACOB**

(alias **Danzig**): Neo-Hebrew poet and Russian translator; born in Wilna Sept. 27, 1848; removed later to Odessa. His first collection of Hebrew songs, entitled "Nite'e Na'amanim," appeared in Warsaw in 1869. In the same year appeared "Ha-Perahim" (Odessa), followed by "Nebel we-Kinnor" (Odessa, 1871), "Zippor Deror" (Odessa, 1872), "Kol ha-Tor," "Maḥaṭ ba-Basar ha-Hai" (St. Petersburg, 1877), all poetico-satirical productions. His "Sefer ha-Yomi," or diary, in which he attempts to describe in verse the life of a Jewish litterateur (St. Petersburg, 1881), is partly autobiographical. His latest Hebrew poetical work is "Kol Shire Moshe Löb Chashkes" (Warsaw, 1896), of which only the first part has appeared. Chashkes also contributed Yiddish songs to the "Volksblatt" of St. Petersburg, and published a collection of poems in that dialect entitled "Lieder fun Herzen" (Cracow, 1888). Among other works he translated the following: "Kartina Muchenichestva Yevreyev" (St. Petersburg, 1879); Schleiden's "Die Romantik des Märtyrertums bei den Juden im Mittelalter"; "Stradanya, Byedstvo i Zashchniki Yevreyev" (St. Petersburg, 1882); and the 3d edition of Ellenberg's "Leiden der Juden." He was also the publisher and part translator of volume 5 of Graetz's "History of the Jews," which appeared in Russian (Moscow, 1880), and later published a volume of Russian poetry, "Stikhi i Mysli" (St. Petersburg, 1888).

**CHASHNIKI:** Town in the government of Vitebsk, Russia, having (in 1897) a population of 4,590, of whom about 4,000 are Jews. Besides those engaged in dairying, which is entirely in the hands of the Jewish population, there are 310 Jewish artisans and 99 Jewish journeymen. In consequence of the general poverty, the number of emigrants and of those depending on charity is constantly growing. About 115 persons apply yearly for aid

before the Passover holidays. With the exception of a *Bikkur Holim* association, Chashniki has no charitable societies. A government school for Jews with a female department (95 pupils), and a private school (48 Jewish pupils), are the only educational institutions.

S. J.

**CHASID.** See *HASID*.

**CHASTISEMENT.** See *PUNISHMENT*.

**CHASTITY:** Purity in regard to the relations of sex, implied in the commandment, "Ye shall be holy: for I the Lord your God am holy" (Lev. xix. 2). The ancient Semitic religions gave a prominent place to the adoration of those powers in nature which either fertilize or produce; the worship of the sexual was prominent in their cults; and ritual prostitution was a recognized and wide-spread institution (Kalisch, commentary to Lev. i. 312, 358-361; ii. 430). The gods were male and female; sexual intercourse was part of the rites at the shrines of Baal and Astarte in Phœnicia and at similar sanctuaries elsewhere. This unchastity in the religious institutions naturally affected the relations of social life; and sexual purity was regarded as of little moment. Possibly in no way were the religious and domestic institutions of Israel more markedly differentiated from those of the surrounding peoples than by the stress laid upon the virtue of chastity. The conception of the God of Israel as the Holy One meant, first of all, purity—purity in worship, and hence also in life.

Before mentioning the special laws of the Pentateuch on this subject, attention must be called to the general statement addressed to the people in Lev. xviii. 3-5, which may be considered the basis of the legislation: "After the doings of the land of Egypt, wherein ye dwelt, shall ye not do; and after the doings of the land of Canaan, whither I bring you, shall ye not do; neither shall ye walk in their statutes. My judgments shall ye do, and my statutes shall ye keep, to walk therein: I am the Lord your God. Ye shall therefore keep my statutes and my judgments: which if a man do he shall live in them: I am the Lord." Hereupon follow the laws of chastity which were to be observed if the people were to avoid the doings of the lands of Egypt and Canaan. These laws of chastity, enumerated in this chapter and in other sections of the Pentateuch, concern (1) the religious and (2) the social-domestic life.

**The Religious Life:** The "kadesh" and the "kedeshah," the male and female prostitutes "consecrated" to the worship of the god-

**Kadesh** dess of fertility, were recognized and adjuncts of the Canaanitish cults

**Kedeshah.** (I Kings xiv. 24, xv. 12, xxii. 47; Amos ii. 7; Hosea iv. 14; Ezek. xxiii. 36; see also the Baal-peor incident referred to in Num. xxv. 1-4 and Hosea ix. 10). This might not be in Israel; for it was "an abomination of the Lord thy God" (Deut. xxiii. 18, 19; see also Lev. xix. 29).

**The Social-Domestic Life:** (a) The purity of the maid was safeguarded (Lev. xix. 29); and, in case of wrong-doing on the part of the man, rectification and indemnification were commanded (Ex.

xxii. 15, 16; Deut. xxii. 28, 29). (b) **ADULTERY** was most stringently forbidden and punished (Ex. xx. 14; Lev. xviii. 20, xx. 10). "They shall both of them die . . . the man . . . and the woman; so shalt thou put away evil" (Deut. xxii. 22). A betrothed woman was regarded in the same light as a married woman, and was punished for adultery, as was also the man found with her (Deut. xxii. 23, 24; see, however, verses 25-28 for the modification of the punishment). Here must be mentioned the peculiar institution of the investigation of the *SOṬAH*, the woman suspected by her husband of adultery, as detailed in Num. v. (c) **THE FORBIDDEN DEGREES** of consanguinity are set forth in circumstantial detail (Lev. xviii. 8-18; xx. 11, 12, 14, 17, 21; Deut. xxvii. 20, 22, 23). (d) No woman was to be approached during the period of her uncleanness (Lev. xviii. 19). See *NIDDAH*. (e) The unnatural crimes against chastity, sodomy and pederasty, prevalent in heathendom, were strictly prohibited (Lev. xviii. 22, 23; xx. 13, 15, 16; Deut. xxvii. 21).

The sins against chastity were the particular abominations, the commission of which by the former inhabitants had caused the land to become unclean (Lev. xviii. 27). No wrong-doing, excepting idolatry, is more constantly and vehemently forbidden. Four out of the twelve curses which are pronounced in the chapter of curses in the Book of Deuteronomy (xxvii. 20-23) are directed against this vice in one or other of its forms. The Biblical attitude in this matter is perhaps best expressed in the story of Joseph, who, when tempted by Potiphar's wife, refused with the noble words: "How can I do this great wickedness and sin against God?" (Gen. xxxix. 9.) Unchastity was primarily a sin against God, the pure and holy.

In the historical books of the Bible occasional passages indicate how clearly it was understood that chastity was an indispensable virtue. When Shechem, the son of Hamor, defiled Dinah, the sons of Jacob declared it a villainy (A. V., "folly") in Israel which ought not to be committed; and Simeon

and Levi slew all the males of Shechem, saying to Jacob, when he rebuked them for their revengeful act: "Should he deal with our sister as with an harlot?" (Gen. xxxiv. 7, 31.) The one misdemeanor of Eli's two wicked sons that is mentioned by name is unchastity (I Sam. ii. 22). In Amnon's act of violence against Tamar she begs him to desist, "for no such thing ought to be done in Israel" (II Sam. xiii. 12). Among the sins of Judah in the reign of Rehoboam was that of ritual unchastity (I Kings xiv. 24), on account of which calamity came upon the kingdom (see also II Kings xiii. 6, xvii. 16, xviii. 4, xx. 1, 3, xxii. 4; II Chron. xxviii. 3, xxxiii. 3, xxxvi. 14). The Prophets laid the greatest stress upon chastity. Their condemnation of unchastity ranks among the most pronounced of their denunciations of the evils prevalent in their days (Amos ii. 7; Hosea iv. 2, 13, 14; Isa. lvii. 3; Jer. ix. 1; xxiii. 10, 14; xxix. 23; Ezek. xvi. 38; xviii. 6; xxii. 10, 11; xxiii. 48; xxxiii. 26). There is a further indication of the high esteem in which chastity was held in the fact that these prophets, in speaking of the punishment that would befall the people for their sins, mention

the deflowering of the women by their captors, which evil would not have been considered as so dreadful had not chastity been regarded in the highest light (Isa. xiii. 16; Zech. xiv. 2; Lam. v. 11; see also Amos vii. 17).

The many admonitions in the Book of Proverbs against unchastity need but be adverted to for proof of the lofty place that the pure life held in the estimation of the wise men of Israel (Prov. v. 3-23, vi. 24-33, vii. 5-27, ix. 13-18, xxxi. 3). "I made a covenant with mine eyes; why then should I look upon a maid?" says Job (xxxii. 1). Similar are the injunctions of the later sage Ben Sira (Eccles. ix. 3-9; xix. 2; xxiii. 22-26; xlii. 11), who counseled, "Go not after 'thy lusts'; and restrain thyself from thine appetites" (*ib.* xviii. 30). The spirit of the Rabbis appears in the advice of Jose ben Johanan, "Prolong not converse with woman" (Abot i. 5). "Follow not after your own eyes, after which ye use to go," etc. (Num. xv. 39); this means, "Ye shall not cast a lustful glance upon woman." One of the reasons given for the destruction of Jerusalem is the prevalence of "shamelessness,"

**In the** which undoubtedly means unchastity **Talmud.** (Shab. 119b). In the days of the terrible persecutions under Hadrian the rabbis advised the people to suffer death rather than be guilty of "idolatry, incest, or bloodshed"; while they considered the transgression of any other commandment permissible if necessary to preserve life (Sanh. 74a; see also Maimonides, "Yad," Yesode ha-Torah, v. 9). As a further example of the attitude of the rabbis of Talmudic times, may be quoted the passage which was given as advice what to do when unchaste thoughts and desires assail: "My son, if that monster [the YEZER HARA'] meets you, drag it to the house of study; it will melt if it is of iron; it will break in pieces if it is of stone, as is said in Scripture (Jer. xxiii. 29): 'Is not my word like as a fire? saith the Lord; and like a hammer that breaketh the rock in pieces?'" (Kid. 30b.) The Talmudic term for chastity is צניעות. There can be no doubt of the fact that early marriage among the Jews was a strong factor in making them so chaste a people. Even such an unsympathetic and hostile exponent of rabbinic theology as Weber indicates this ("Jüd. Theol." p. 234). The age of eighteen was posited as the proper time for a youth to contract matrimony (Abot v. 21; Kid. 29b; Yeb. 62b, 63b; Sanh. 76b; Shulhan 'Aruk, Eben ha-'Ezer, 1, 2). Early marriages continued in vogue among the Jews through medieval times (Abrahams, "Jewish Life in the Middle Ages," pp. 90, 167). Many enactments were made to safeguard the purity of the people and to insure chastity (Maimonides, "Yad," Issure Biah, xxi.; Shulhan 'Aruk, Eben ha-'Ezer, 21-25).

In one of the sections of the "reasons for the commandments" ("ta'ame miẓvot") in his "Moreh Nebukim," Maimonides gives as the reason for such legislation the following: "The object of these precepts is to diminish sexual intercourse, to restrain as much as possible indulgence in lust, and [to teach] that this enjoyment does not, as foolish people think, include in itself its final cause" ("Moreh Nebukim," iii. 35; see also *ibid.* 33). In ch. xlix. he treats at length the law concerning forbidden

sexual intercourse and that for the promotion of chastity, whose object is "to inculcate the lesson that we ought to limit sexual intercourse hold it in contempt, and only desire it rarely."

In speaking of the reason for the prohibition of intermarriage with a near relative, he expresses it as his opinion that one object of this is "to inculcate chastity in our hearts."

Of ethical philosophers who have expressed Jewish thought on this subject, Saadia and Bahya may be mentioned. The former, in the tenth century of chapter of his "Emunot we-De'ot," the Philosophers. which is the ethical portion of the book, devotes two paragraphs to chastity; the third is "on sexual intercourse," and the fourth "on desire." His teaching concerning intercourse is "that it is not good for man, except for the purpose of producing offspring"; concerning desire, "man shall have no desire except for his wife, that he may love her and she may love him" ("Emunot we-De'ot," ed. Slucki, pp. 150, 151). In his ethical treatise, "The Duties of the Heart," Bahya has frequent admonitions on the necessity of chastity and the overcoming of evil desires; as, for example, in the fifth division of the work, notably pp. 254, 258 *et seq.* (ed. Stern, Vienna, 1856). At the close of ch. ix. he quotes with approval and at length the last will and testament of a certain pious man in Israel, addressed to his son, and containing advice for the guidance of life. From this document one sentence may be set down here: "Be not one of those who, sunk in the folly of drunkenness and lust, submit like slaves to the dominance of evil passions; so that they think only of the satisfaction of sensual desires and the indulgence of bestial pleasures" (*ib.* p. 433). A similar word of advice may be quoted from a letter written by Nahmanides to his son: "Be especially careful to keep aloof from women. Know that our God hates immorality; and Balaam could in no other way injure Israel than by inciting them to unchastity" (Schechter, "Studies in Judaism," p. 141).

A few further like injunctions from the moral treatises of medieval rabbis may here be given: "Let not the strange god, thy sensual desire, rule over thee; act so that thou hast not cause to blush before thyself; pay no heed to the biddings of desire; sin not and say, I will repent later" (from "Sefer Roḳeah" by R. Eleazer b. Judah of Worms, in Zunz, "Z. G." pp. 132, 134); "Keep thy soul always pure: thou knowest not when thou wilt have to give it up" ("Sefer ha-Middot," fifteenth century, in *ib.* p. 153).

K. D. P.

**CHASTITY, PROOF OF.** See **CRIMES** and **DIVORCE.**

**CHÂTEAU-THIERRY:** Chief town of the arrondissement of the same name in the department of Aisne, France. At Château-Thierry, as in general throughout Champagne, the seigniors of the country were favorably disposed toward the Jews. The counts of Champagne, however, acted thus in their own interest; for they considered the Jews as their own property—a property which was very productive. Thibaut, count of Champagne, and Philip Augustus, king of France, signed in 1198 an agree-

ment by the terms of which they bound themselves to surrender to each other all Jews who might migrate from the domain of the one to that of the other. This agreement was renewed in 1201, after the death of Thibaut, between the king of France and the Countess Blanche (Brussel, "Usage Général des Fiefs en France," i. xi. 39). Cresselin, the richest Jew of Champagne, who, in order to escape from the arbitrary rule of the countess, had gone to Paris, was compelled to return to Champagne and to remain there on penalty of having all his outstanding debts canceled by Blanche (Brussel, *l.c.* ch. xxxix.; compare Depping, "Les Juifs dans le Moyen Age," p. 116). When in 1284 Philip the Fair took possession of Champagne, he demanded from the Jews of that province 25,000 livres as a congratulatory gift on his accession (*ib.*). In a document of the year 1298 mention is made of a fine of 50 livres imposed upon the Jew Soninus of Château-Thierry. Another document shows payments for right of residence between 1321 and 1323 by Jews of Château-Thierry; thus, 20 livres by Chièrefame Denix of "Chatel Thierr"; 60 and 68 livres by Deulesault of "Chasteltierr"; 100 livres by Vivant of "Chastel Thierr" (*l.c.* xix. 250, 252, 255).

As early as the thirteenth century Château-Thierry had become an important center of Talmudical learning. Mention may be made of the following scholars, who either came thence or lived there:

David the Pious, one of the celebrated French rabbis to whom R. Meïr ben Todros Abulafia of Toledo addressed, about 1204, his letter against the theory of the resurrection as propounded by Maimonides.

Samuel of Evreux, director of the school of Château-Thierry in 1225, was a remarkable Talmudist. His name is mentioned in the Tosafot *Ḳid.* 27b, 39a; *Ned.* 90b; 'Ab. Zarah 68a; *Bezah* 14b; *Tem.* 19b; the Tosafot upon *Soṭah* are also ascribed to him (*Zunz*, "Z. G." p. 38). *Zunz* (*l.c.*) says that Samuel was the son of R. Yom-Tob of Evreux and the disciple of R. Isaac b. Abraham of Danpierre. Gross ("Gallia Judaica," p. 39), on the contrary, identifies him with R. Samuel ben Shneur, the correspondent of R. Jehiel of Paris, and Nathaniel, the elder, of Chinon.

R. Isaac and his son Bonne Vie are two scholars of this place only known through the reference to them in the Tosafot upon *Bezah*. See CHAMPAGNE.

S. K.

**CHATTANOOGA.** See TENNESSEE.

**CHATELS:** In English and American law property is divided into two kinds: real or landed, and personal or chattels; in Continental law, into immovable and movable. Jewish law speaks of "karka'ot" (ground) and "mitṭalṭelin" (movables). Slaves are included in the former; demands on other persons, in the latter, though in many respects the law governing the ownership and incidents of bonds ("sheṭarot") or other demands differs from the law of tangible, bodily chattels, as has been shown in the article ALIENATION. Lands and slaves are sometimes joined together under the name of "property

which has responsibility" ("sharayot"), chattels, bond, and, other demands as property having none; because, under the Talmudic law (see DEEDS), a properly written and attested bond became as soon as delivered a lien on all of the debtor's lands, but not on his chattels and effects, and because, moreover, after the death of the debtor, only lands and slaves, not chattels or demands, were liable to his creditors. During the Middle Ages, however, as a matter of necessity, goods, moneys, and effects were made liable for the decedent's debts (see DEBTS; compare Hoshen Mishpat, 107, 1).

Since the non-observance of the Jubilee there has been no difference in the laws of descent (see AGNATES) between landed estate and chattels. They form together one mass, as they do in countries having a system of civil law. The modes of ALIENATION AND ACQUISITION are different, as has been shown in the article under that caption. Moreover, a sale of chattels can be set aside or corrected for OVERREACHING on the sole ground of inadequacy or excessive price, while the law of overreaching ("ona'ah") does not apply to either lands or bonds. These broad distinctions are readily found in the Mishnah *Ḳid.* i. 1-6, and B. M. iv. 1-9; for details see the articles under the captions indicated above.

**CHAUSSY:** District town in the government of Mohilev, Russia. The Jewish community of Chaussy dates from the seventeenth century, as appears from a charter granted to the Jews Jan. 11, 1667, by Michael Casimir Pacz, castellan of Wilna, and confirmed by King August III. March 9, 1739. In 1780, at the time of a visit of Catherine II., there was a Jewish population of 355, in a total of 1,057; and the town possessed one synagogue. In 1803 the Jewish population was 453, in a total of 1,185; in 1870 it was 2,433, in a total of 4,167; and in 1897, 2,775, in a total of about 6,000. Some of the Jewish artisans are employed in the tanneries and in silk and woolen factories. The Jewish population in the district of Chaussy (including the town) in 1897 was 7,444, or 8.42 per cent of the total population.

**CHAUTAUQUA SOCIETY, THE JEWISH:** A society formed in the United States for "the dissemination of knowledge of the Jewish religion by fostering the study of its history and liter-

ature, giving popular courses of instruction, issuing publications, establishing reading-circles, holding general assemblies, and by such other means as may from time to time be found necessary and proper." Its organization was the result of a suggestion offered by Rev. Dr. Henry Berkowitz in an address before his congregation, the Rodeph Shalom, Philadelphia, March 10, 1893. The Jewish literary societies of that city appointed a "committee on organization," which formulated plans. An agreement was entered into with the Chautauqua Literary and Scientific Circle convened at Lake Chautauqua, N. Y., for the use of the general methods of popular education known as the "Chautauqua System." A Jewish society, national in its scope, was then organized, with Dr. Berkowitz as chancellor.

In the winter of 1893 the society began the publication of a series of "course books" or syllabi for general readers and members of reading-circles or

Seal of the Jewish Chautauqua Society.

study classes. These guide-books give syllabi of courses in Biblical and post-Biblical history and literature, in the Hebrew language (correspondence method), and on Jewish characters in fiction.

The society has succeeded in interesting several thousand persons in the United States and some in Great Britain, Canada, and British India, in pursuing the readings outlined. By correspond-

**Extent of Work.** ence and through the agency of a traveling field-secretary, numerous

Chautauqua circles have been organized in many communities. Literary circles connected with congregations, lodges, sections of the Council of Jewish Women, Young Men's Hebrew associations, and Zionist societies use the Chautauqua plans of study.

The Chautauqua circles of West Virginia have formed a state organization and hold annual conventions.

The main source of inspiration for the home reading courses is derived from the summer assembly. Atlantic City, N. J., has been the seat of these summer gatherings of the Jewish Chautauquans during the past six years. In July, 1897, the first experiment was made in this direction. The program for a series of daily sessions continuing two weeks was arranged by the chancellor and carried out by the persons enlisted, under the management

of Dr. Lee K. Frankel as director of the assembly. A course of popular lectures on Jewish and other themes was delivered. Chautauqua circles in Bible study and in post-Biblical history and literature were conducted. A teachers' institute supplied instruction and practical help to the teachers of the Jewish schools of the country. Conferences were arranged for the consideration of some of the practical problems of Jewish life. Social and literary gatherings were held from time to time. At the second summer assembly, in July, 1898, books, charts, maps, models, and various appliances for use in the classes of the religious schools were exhibited. In 1899 the society was incorporated under the laws of the state of Pennsylvania.

The third assembly, which met in July of that year, was productive of such enthusiasm that on the recommendation of Dr. K. Kohler it was resolved to formulate plans for the addition of a regular summer school. In July, 1900, the fourth assembly was held, and the summer school was opened, with classes in the study of the principles of pedagogy applied to instruction in religion.

"The Assembly Record," a pamphlet giving a detailed report of these gatherings and edited by the secretary and director of the assembly, Isaac Hassler, has been issued each year by the society. The "Menorah" magazine is the official organ of the society.

"Papers presented at the fifth annual session of the summer assembly of the society held at Atlantic City, N. J., July 7 to 28, 1901," is the title of special series No. 7 of the books issued by The Jewish Publication Society of America, Philadelphia, June, 1902. A course in applied philanthropy was added to the features described above during the sixth assembly, held in July, 1902.

**CHAVES:** City in Portugal, which in the fourteenth century had a fairly large Jewish community, and an "aula," or school, "in which the Law was expounded by the rabbis." This school was subject to a special tax. Before the expulsion of the Jews from Portugal the Jewish quarter here annually paid 31,000 reis in taxes.

M. K.

**CHAVES:** Jewish-Portuguese family that derived its name from its native place of Chaves in Portugal; members of it are found in Amsterdam and London.

**A. de Chaves:** Painter at Amsterdam in 1700.

**Aaron de Chaves:** Edited in Amsterdam, in 1767, Reuel Jesurun's "Dialogo dos Montes," prefixing a Portuguese poem of his own.

**David Chaves:** Lived in London in 1720; celebrated in Latin verse Daniel Israel Lopez Laguna's Spanish translation of the Psalms, "Espejo Fiel de Vidalas."

**Isaac de Chaves:** Hazan in London in 1702.

**Jacob de Chaves:** Son of the wealthy Moses de Chaves of Amsterdam; pupil of the Neo-Hebraic poet Moses Hayyim Luzzatto, who published his drama, "La-Yesharim Tehillah" (Praise to the Vir-

tuous), in honor of Jacob's marriage with Rachel de Vega Enriques in 1743.

**CHAZANOWICZ, JOSEPH:** Russian physician, and founder of the Jewish National Library at Jerusalem; born at Goniondz, government of Grodno, Russia, Oct. 22, 1844; son of Aaron Chazanowicz. After finishing his studies at the Jewish school and at the gymnasium of Grodno, Chazaowicz went to Germany to study medicine. While still a student he became volunteer assistant surgeon at one of the military hospitals of Berlin during the Franco-Prussian war, 1870-71. He received his degree of doctor of medicine from the University of Königsberg in 1872. Returning to Russia, he passed his state board examination at Dorpat, and began to practise at Byelostok, where he now (1902) resides, having been physician of the Jewish hospital for several years.

Chazanowicz founded at Byelostok the Ḥobebe Ziyon, a society for the education of Jewish youth in the spirit of Zionism, and was for many years its president. He founded also the Linat ha-Zedek, a hospital society; and takes an active part in the Zionist movement. In 1890 he visited Palestine and conceived the idea of founding a library at Jerusalem, together with the order B'nai B'rith; but his plan was necessarily postponed, as he unfortunately aroused the displeasure of the government soon after his return to Byelostok. An anti-Semitic Polish physician of Byelostok had been guilty of malpractice on a Jewish boy; and Chazanowicz so vehemently took up the defense of the victim that he was forced by the government to leave the town for a period of two years, during which time he established himself at Lodz. In 1893 he returned to Byelostok and began to execute his plan. In 1896 he sent to Jerusalem his large collection of books, amounting to nearly 10,000 volumes, to become the nucleus of the Abarbanel Library. The enlargement of this library and the collection of funds to erect a special building for it have become the life-work of Chazanowicz. See **ABARBANEL LIBRARY IN JERUSALEM.**
