Rabbi, Budapest, Hungary; Corresponding Member of the Royal Academy of History, Madrid, Spain.

**MORITZ LAZARUS, Ph.D.,**

Professor Emeritus of Psychology, University of Berlin; Meran, Austria.

**ANATOLE LEROY-BEAULIEU,**

Member of the French Institute; Professor at the Free School of Political Science, Paris, France; Author of "Israël chez les Nations."

**ISRAEL LÉVI,**

Professor in the Jewish Theological Seminary; Editor of "Revue des Etudes Juives," Paris, France.

**EUDE LOLLI, D.D.,**

Chief Rabbi of Padua; Professor of Hebrew at the University, Padua, Italy.

**IMMANUEL LÖW, Ph.D.,**

Chief Rabbi of Szegedin, Hungary; Author of "Die Aramäischen Pflanzennamen."

**S. H. MARGULIES, Ph.D.,**

Principal of the Jewish Theological Seminary; Chief Rabbi of Florence, Italy.

**H. OORT, D.D.,**

Professor of Hebrew Language and Archeology at the State University, Leyden, Holland.

**ABBÉ PIETRO PERREAU,**

Formerly Librarian of the Reale Biblioteca Palatina, Parma, Italy.

**MARTIN PHILIPPSON, Ph.D.,**

Formerly Professor of History at the Universities of Bonn and Brussels; President of the Deutsch-Jüdische Gemeindebund, Berlin, Germany.

**SAMUEL POZNANSKI, Ph.D.,**

Rabbi in Warsaw, Russia.

**E. SCHWARZFELD, LL.D.,**

Secretary-General of the Jewish Colonization Association, Paris, France.

**LUDWIG STEIN, Ph.D.,**

Professor of Philosophy, University of Bern, Switzerland; Editor of "Archiv für Geschichte der Philosophie," etc.

**HERMANN L. STRACK, Ph.D.,**

Professor of Old Testament Exegesis and Semitic Languages, University of Berlin, Germany.

**CHARLES TAYLOR, D.D., LL.D.,**

Master of St. John's College, Cambridge, England; Editor of "Sayings of the Jewish Fathers," etc.

# SYSTEMS OF TRANSLITERATION AND OF CITATION OF PROPER NAMES\*

## A.—Rules for the Transliteration of Hebrew and Aramaic.

1. All important names which occur in the Bible are cited as found in the authorized King James version; e.g., *Moses*, not *Mosheh*; *Isaac*, not *Yizḥaq*; *Saul*, not *Sha'ul* or *Shaül*; *Solomon*, not *Shelomoh*, etc.
2. Names that have gained currency in English books on Jewish subjects, or that have become familiar to English readers, are always retained and cross-references given, though the topic be treated under the form transliterated according to the system tabulated below.
3. Hebrew subject-headings are transcribed according to the scheme of transliteration; cross-references are made as in the case of personal names.
4. The following system of transliteration has been used for Hebrew and Aramaic:

⚭ Not noted at the beginning or the end of a word; otherwise' or by dieresis; e.g., *Ze'eb* or *Meïr*.

ב <i>b</i>	ז <i>z</i>	ל <i>l</i>	פ with dagesh, <i>p</i>	ש <i>sh</i>
ג <i>g</i>	ח <i>h</i>	מ <i>m</i>	פ without dagesh, <i>f</i>	ס <i>s</i>
ד <i>d</i>	ט <i>t</i>	נ <i>n</i>	צ <i>z</i>	ת <i>t</i>
ה <i>h</i>	י <i>y</i>	ס <i>s</i>	ק <i>k</i>	
ו <i>w</i>	כ <i>k</i>	ע <i>'</i>	ר <i>r</i>	

NOTE: The presence of dagesh lene is not noted except in the case of *pe*. Dagesh forte is indicated by doubling the letter.

5. The vowels have been transcribed as follows:

ֶ a	ֹ u	ָ a	ֵ e	ִ o
ֶ e	ֶ e	ֶ o	ֶ i	
ֶ i	ֶ e	ֶ a	ֶ u	

Qamez ḥaṭuf is represented by *o*.

The so-called "Continental" pronunciation of the English vowels is implied.

6. The Hebrew article is transcribed as *ha*, followed by a hyphen, without doubling the following letter. [Not *hak-Kohen* or *hak-Cohen*, nor *Rosh ha-shshannah*.]

## B.—Rules for the Transliteration of Arabic.

1. All Arabic names and words except such as have become familiar to English readers in another form, as *Mohammed*, *Koran*, *mosque*, are transliterated according to the following system:

أ <i>a</i>	ح <i>kh</i>	ش <i>sh</i>	غ <i>gh</i>	ن <i>n</i>
ب <i>b</i>	د <i>d</i>	ص <i>s</i>	ف <i>f</i>	ه <i>h</i>
ت <i>t</i>	ذ <i>dh</i>	ض <i>ḏ</i>	ق <i>k</i>	و <i>w</i>
ث <i>th</i>	ر <i>r</i>	ط <i>t</i>	ك <i>k</i>	ي <i>y</i>
ج <i>j</i>	ز <i>z</i>	ظ <i>z</i>	ل <i>l</i>	
ح <i>h</i>	س <i>s</i>	ع <i>'</i>	م <i>m</i>	

2. Only the three vowels—*a*, *i*, *u*—are represented:

= a or ā	= i or ī	= u or ū
----------	----------	----------

No account has been taken of the *imālah*; *i* has not been written *e*, nor *u* written *o*.

\* In all other matters of orthography the spelling preferred by the STANDARD DICTIONARY has usually been followed. Typographical exigencies have rendered occasional deviations from these systems necessary.

3. The Arabic article is invariably written *al*; no account being taken of the assimilation of the *l* to the following letter; e.g., *Abū al-Salt*, not *Abu-l-Sall*; *Nafīs al-Daulah*, not *Nafīs ad-Daulah*. The article is joined by a hyphen to the following word.
4. At the end of words the feminine termination is written *ah*; but, when followed by a genitive, *at*; e.g., *Risālah dhāt al-Kursiyy*, but *Hī'at al-Aflāk*.
5. No account is taken of the overhanging vowels which distinguish the cases; e.g., 'Amr, not 'Amru or 'Amrun; Ya'akūb, not Ya'akūbun; or in a title, *Kitāb al-amānāh wal-'itikādāt*.

### C.—Rules for the Transliteration of Russian.

All Russian names and words, except such as have become familiar to English readers in another form, as *Czar*, *Alexander*, *deciatine*, *Moscow*, are transliterated according to the following system:

А а	<i>a</i>	И и	<i>n</i>	Щ щ	<i>shch</i>
Б б	<i>b</i>	О о	<i>o</i>	Ъ ъ	<i>mute</i>
В в	<i>v</i>	П п	<i>p</i>	Ы ы	<i>y</i>
Г г	<i>h, v, or g</i>	Р р	<i>r</i>	Ь ь	<i>halfmute</i>
Д д	<i>d</i>	С с	<i>s</i>	Ѣ ѣ	<i>ye</i>
Е е	<i>e and ye</i> at the beginning.	Т т	<i>t</i>	Э э	<i>e</i>
Ж ж	<i>zh</i>	У у	<i>u</i>	Ю ю	<i>yu</i>
З з	<i>z</i>	Ф ф	<i>f</i>	Я я	<i>ya</i>
И и	<i>i</i>	Х х	<i>kh</i>	Ө ө	<i>F</i>
К к	<i>k</i>	Ц ц	<i>tz</i>	Ү ү	<i>œ</i>
Л л	<i>l</i>	Ч ч	<i>ch</i>	Ӏ Ӏ	<i>i</i>
М м	<i>m</i>	Ш ш	<i>sh</i>		

### Rules for the Citation of Proper Names, Personal and Otherwise.

1. Whenever possible, an author is cited under his most specific name; e.g., Moses Nigrin under *Nigrin*; Moses Zacuto under *Zacuto*; Moses Rieti under *Rieti*; all the Qimḥis (or Qamḥis) under *Qimḥi*; Israel ben Joseph Drohobiezzer under *Drohobiezzer*. Cross-references are freely made from any other form to the most specific one; e.g., to Moses Vidal from *Moses Narboni*; to Solomon Nathan Vidal from *Menahem Meiri*; to Samuel Kansi from *Samuel Astruc Daseola*; to Jedaiah Penini, from both *Bedersi* and *En Bonet*; to *John* of Avignon from *Moses de Roquemaure*.
2. When a person is not referred to as above, he is cited under his own personal name followed by his official or other title; or, where he has borne no such title, by "of" followed by the place of his birth or residence; e.g., *Johanan ha-Sandler*; *Samuel ha-Nagid*; *Judah ha-Hasid*; *Gershon of Metz*, *Isaac of Corbeil*.
3. Names containing the word *d'*, *de*, *da*, *di*, or *van*, *von*, *y*, are arranged under the letter of the name following this word; e.g., *de Pomis* under *Pomis*, *de Barrios* under *Barrios*, *Jacob d'Illeseas* under *Illeseas*.
4. In arranging the alphabetical order of personal names *ben*, *da*, *de*, *di*, *ha-*, *ibn\**, *of* have not been taken into account. These names thus follow the order of the next succeeding capital letter:

Abraham of Augsburg	Abraham de Balmes	Abraham ben Benjamin Aaron
Abraham of Avila	Abraham ben Baruch	Abraham ben Benjamin Ze'eb
Abraham ben Azriel	Abraham of Beja	Abraham Benveniste

5. In order to facilitate reference, complete groups of all persons bearing such common names as *Aaron*, *Abraham*, *Jacob*, are given in small type in a group immediately under the first key-word.

\* When *IBN* has come to be a specific part of a name, as *IBN EZRA*, such name is treated in its alphabetical place under "I."

# THE JEWISH ENCYCLOPEDIA

**BENCEMERO**, or **BEN ZAMAIRA**, **ABRAHAM**: Mediator, in 1526, between the Moors and the governor of Saffee and Azamor, employed by the Portuguese. He lived at Azamor on the west coast of Africa. Abraham Cazan (Hazan), the most prominent Jew of that city, was also employed in the same capacity.

**BIBLIOGRAPHY**: João de Sousa, *Documentos Arabicos para la Historia Portuguesa*, pp. 159 et seq., Lisbon, 1790; Kayserling, *Gesch. der Juden in Portugal*, p. 161.

G.

M. K.

**BENCEMERO, ISAAC**: Relative of Abraham Bencemero of Azamor; the deliverer of Nuno Fernandes d'Atayde, commander-in-chief of Saffee. When in 1511 this latter city was besieged and surrounded by an army of more than 100,000 men and Atayde was exposed to the greatest danger, Bencemero and a certain Ismael formed the bold plan of bringing assistance to the Portuguese. At their own expense they fitted out two vessels, manned them with co-religionists, and sailed to Saffee. Eluding the sentinels on watch, they entered the city in the darkness of night, and thus saved Atayde and his men.

M. K.

**BENDAVID, LAZARUS**: German philosopher and reformer; born in Berlin Oct. 18, 1762; died there March 28, 1832.

In his younger days he supported himself by polishing glasses, and in his leisure time studied mathematics, in which he attained great proficiency. His earliest published work was on a geometrical subject, "Ueber die Parallellinien" (Berlin, 1786), and attracted much attention. Bendauid studied at the universities of Göttingen and Halle and

Lazarus Bendauid.

became a staunch adherent of the Kantian philosophy.

After failing in his effort to enter the service of the Prussian government in the Department of Jus-

tice, Bendauid in 1793 went to Vienna and lectured on Kant's philosophical system in one of the halls of the university. He was, however, soon compelled to terminate his lectures there, but continued them in the mansion of Count Harrach, where he attracted large and distinguished audiences. When, in 1797, foreign residents were forced to leave Vienna, Bendauid returned to Berlin, and was for several years editor of the "Spener'sche Zeitung," which he directed with great ability and circumspection during the dangerous times of the French domination.

In 1806 Bendauid became the director of the Freischule (Jewish Free School), which had been founded in 1778 by David Friedländer and Daniel Itzig. Bendauid brought the school to such a high standard that nearly a third of its pupils were non-Jews in 1819, when the attendance of Christian children at Jewish schools was prohibited by the government. He served without compensation until the school was closed in 1825. His services as an expert accountant were much sought after by commercial and financial institutions; and he was also employed in that capacity for many years by the directors of the Royal Fund for Widows (Königliche Wittwenkasse). The extreme simplicity of his mode of living brought him the nickname of "The Modern Diogenes"; while

by his thrifty habits he succeeded in being as independent in worldly affairs as he strove to be in the domain of philosophy. He is called by Heine "a sage after the pattern of antiquity." He never married.

In philosophy Bendauid remained a Kantian throughout his life. His published lectures, such as the "Vorlesungen über die Kritik der Praktischen Vernunft" (Vienna, 1796), "Vorlesungen über die Kritik der Reinen Vernunft" (*ib.*, 1796), and several similar works, are simply expositions of the philosophy of his great master. When new metaphysical leaders like Fichte, Schelling, and Hegel commenced to dominate the world of German thought, Bendauid offered no resistance and engaged in no polemics like other Kantians, but withdrew from the field of active philosophical studies and exercised his mind on other subjects.

Bendauid's influence on the development and popularization of philosophy in his time is generally

recognized. His "Ueber den Ursprung Unserer Erkenntnisse" (Berlin, 1802) was crowned by the Academy of Berlin. This work and his other independent philosophical researches, like "Beiträge zur Kritik des Geschmacks" (Vienna, 1797), "Versuch einer Geschmackslehre" (Berlin, 1798), and "Versuch einer Rechtslehre" (Berlin, 1802), which are now almost forgotten, were of importance at the time of their appearance. The truths which they contain, now generally accepted, had to struggle hard for recognition in those days; and Bendavid's lucid style contributed much to their popularization. He will always be remembered as one of the trio of Jewish philosophers (the other two being Marcus Herz and Solomon Maimon) who, as much as any other German thinkers, helped to spread the Kantian philosophy at the end of the eighteenth century.

In the Jewish world Bendavid's influence was also considerable, and by no means imperceptible, as is claimed by Grätz. In his "Etwas zur Charakteristik der Juden" (Vienna-Leipzig, 1793; improved ed., Berlin, 1813) he pleaded boldly for abolition of ceremonial laws, and is thus among the first, if not actually the first, advocate of practical religious reform in Judaism as the only means to stem the tide of conversions to Christianity which began to rise in those days with startling rapidity. In this work (pp. 33, 34) Bendavid pays high tribute to Moses Mendelssohn, who befriended and encouraged him in his early struggles. It is interesting to note that Bendavid was summoned before Cardinal Migazzi in Vienna to defend himself against the charge that he traduced Christianity in that work (see Schreiber, "Reformed Judaism," pp. 28-31, Spokane, Wash., 1892).

Bendavid was one of the first radical Bible critics among the Jews of Germany. His "Ueber die Religion der Ebräer vor Moses" (Berlin, 1812) and the essay "Ueber Geschriebenes und Mündliches Gesetz," which appeared in Zunz's "Zeitschrift für die Wissenschaft des Judenthums," 1823, claim to be parts of a comprehensive critical study of the Pentateuch which was probably never finished. In the same periodical also appeared his

**A Radical Bible Critic.**

"Ueber den Glauben der Juden an einen Künftigen Messiah," where he uses his knowledge of the Talmud and rabbinical literature to insist on the principle, first brought forward by Joseph Albo, that the belief in the coming of a Messiah is not essential to Judaism. His "Zur Berechnung und Geschichte des Jüdischen Kalenders" (Berlin, 1817) was also a radical departure from the usual treatment of the subject by Jewish writers, and called forth a vehement rejoinder in the booklet, "Dabar Be'itto," by Meïr ben Moses Kornick (Breslau, 1817). The last work published by Bendavid, which appeared in Berlin in 1824, was a report on the condition of the Freischule.

**BIBLIOGRAPHY:** Bendavid wrote an autobiographical sketch which appeared in the *Bildnisse Berliner Gelehrten*, Berlin, 1806. His biography, written by Moritz Velt, appeared in the *Blätter für Lit. Unterh.* for 1832. *Allgemeine Deutsche Biographie*, ii, 318-320; Grätz, *Gesch. der Juden*, xii, 139; Jost, *Gesch. des Judenthums und Seiner Sekten*, iii, 318; L. Geiger, *Gesch. der Jüd. Gemeinde in Berlin*, pp. 168 *et seq.*; *Zeit. für Gesch. der Juden in Deutschland*, iv, 75-86 (his letters to Bellerman).

**BENDEMANN, EDUARD JULIUS**

**FRIEDRICH:** German painter; born Dec. 3, 1811, in Berlin; died Dec. 27, 1889, at Düsseldorf. His father was a prominent banker of Berlin and associ-

ated with the intellectual circles of the capital. His talented son was therefore at an early age brought into contact with such celebrities as Gottfried Schadow and his two sons, as well as with Felix Mendelssohn and Werder. It was, however, the intercourse with Julius Hübner,

who afterward became his brother-in-law and was then a pupil at the Berlin Academy, that induced Bendemann to devote himself to art. After a short course of elementary study with W. Schadow at Berlin, Bendemann accompanied him to Düsseldorf, where he became a member of that celebrated fraternity of art students afterward designated "the Düsseldorf School."

As early as 1828 Bendemann had attracted attention in Berlin by an excellent portrait of his grandmother, which had been exhibited in that city. His next picture, "Boaz and Ruth," his first independent creation, also met with recognition, without, however, giving evidence of the triumphs that the painter was soon to achieve. When, in 1830, Schadow went to Italy, Bendemann, Karl Sohn, Th. Hildebrandt, and Hübner accompanied him, and remained there for an entire year, devoting themselves exclusively to the study of Raffael and Michelangelo.

Upon his return in 1831, Bendemann began the work "Jews Mourning in the Babylonian Exile," now exhibited (1901) in the Städtisches

**His "Jews in Babylonian Exile."**

Museum, Cologne. This work was considered the masterpiece of the 1832 exhibition of the Berlin Academy, and at once elevated the young artist to an equality with the leading painters of the day. The grandeur and majesty of the conception, the nobility and depth of the emotions portrayed, the simple and earnest rhythm of the composition, and the avoidance of the extremes of characterization, all combined to make this picture remarkable in the world of art, and one that was welcomed with the most intense satisfaction.

From 1831 to 1835 Bendemann produced several of his best works. In the latter year the crown prince of Prussia, upon the recommendation of Schadow, renounced his intention to order a copy of "The Mourning Jews," and commissioned Bendemann to paint a picture on the subject "Jeremiah at the Fall of Jerusalem." (See Frontispiece.) This work, now (1901) in the royal palace at Hanover, was first exhibited at the Berlin Academy of Art, where it attracted the greatest attention. About 1835 the artist married a daughter of Gottfried Schadow, and went to live in the house of his father-in-law at Berlin. There he executed the famous painting, "The Arts at the Fountain of Poetry."

Unsuccessful in his attempt to obtain an order for a work of monumental proportions in Berlin, Bendemann in 1838 accepted a professorship at the Dresden Academy, and there, in the following year, he was commissioned to decorate three rooms of the royal palace. Notwithstanding an affection of the eye, that in 1841 compelled him to go to Italy, Bendemann, throughout a

**Becomes  
Professor  
at  
Dresden.**

period of sixteen years, actively prosecuted this work, which to-day constitutes the greatest monument to his genius. Upon the resignation of Schadow in 1859, Bendemann accepted the directorship of the Düsseldorf Academy. This position he retained until 1867, when an affection of the throat compelled him to resign. Among his most distinguished pupils may be mentioned his son Rudolf, Theodor Grosse, and Peter Janssen.

Bendemann was a knight of the Ordre Pour le Mérite, member or honorary member of the principal art academies of the world, and the recipient of numerous honors and decorations.

Bendemann's principal works on Biblical subjects are, besides those already mentioned: "The Three Wise Men of the East on Their Way to Bethlehem" (1833); "Jeremiah At the Fall of Jerusalem" (original title, "The Jews Led into Captivity in Babylon"). The last-mentioned work—perhaps Bendemann's greatest—was first exhibited in 1872, and in 1876 was in the National Gallery at Berlin. It is described in the official catalogue as follows:

"In the foreground, the prophet Jeremiah is seated upon the ruins in speechless sorrow, attended by his faithful pupil, Baruch, who kneels beside him in prayer. The prophet is compelled to hear the curses of his countrymen, who, driven into exile, accuse him of conniving with the enemy. To the right is a group of despairing women and children, from whose midst a Babylonian warrior has just seized a boy. In

"**Jeremiah** the center, Nebuchadnezzar, in royal attire, at the **Fall of Jerusalem**," rides in a chariot drawn by two horses. He is accompanied by a group of jubilant women, and is preceded by the army, heavily laden with spoils. Following Nebuchadnezzar's chariot is King Zedekiah, blind, and groping his way with a staff. The latter is accompanied by his wives, and followed by the priests bearing the Ark of the Covenant, and by the camels and the baggage-train. In the background, and somewhat to the left, are the smoking ruins of YHWH'S Temple."

In addition to paintings of Biblical subjects, Bendemann produced numerous other compositions, such as "The Two Girls at the Well" (1833); "Shepherd and Shepherdess"; "Penelope" (now in the Antwerp Academy), and "Kaiser Lothar" (Imperial Gallery of the Römer, Frankfurt-on-the-Main). He also drew the designs for the Cornelius Gallery in Berlin, and these were afterward executed in encaustic by his pupils (see **Rudolf BENDEMANN**).

Equally noteworthy was his genius as a portrait-painter, as evidenced by the numerous pictures of distinguished persons painted by him during a period of thirty years. Among these are life-size portraits of the following: Quandt

**As a  
Portrait-  
Painter.**

(1850); Droysen (1855); Karl Sohn (1858); L. Richter (1859); Rietschel (1862); Joachim (1865); Cornelius (1870); Achenbach (1878); Clara Schumann (1878); Du Bois-Reymond (1880); Langenbeck (1880); Niels W. Gade (1881); W. v. Schadow; the

artist's father; and Fürst Anton v. Hohenzollern. Bendemann's portrait of General Oberwitz and his wife is ranked by Pecht "among the best which has ever been produced in this genre"; and the same critic considers that the splendid picture of the artist's wife (first exhibited in 1847) would alone entitle Bendemann to enduring fame. Among the most popular illustrations by Bendemann are those to Lessing's "Nathan der Weise" (1875).

**BIBLIOGRAPHY:** Julius Meyer, *Allgemeines Künstler-Lexikon*; Kohut, *Berühmte Israelitische Männer und Frauen*, ix, 369; *Katalog der Königl. National-Galerie*, Berlin, s. J. So.

**BENDEMANN, RUDOLF CHRISTIAN**

**EUGEN:** German painter of historical and genre pictures; son of Eduard Bendemann; born at Dresden Nov. 11, 1851. He was educated at the Düsseldorf Academy under the supervision of his father. From 1877 to 1879 he lived at Munich, and later made several visits to Egypt. The mural paintings in the Cornelius hall of the National Gallery at Berlin were executed by him in accordance with his father's plans, and in collaboration with Röber and Wilhelm Beckmann (1876). Among his works the following are the most noteworthy: "Frithjof und Ingeborg als Kinder" (1874); "Nymphe" (1877); "Bierausschank" (1878); "Beerdigung des Frauenlob"; "Ein Fest im 16ten Jahrhundert"; "Lautenschläger" (1879); "Wirthshausessen in Oberbayern" (1880); "Ausgang aus einer Moschee in Kairo"; "Schöpflinnen in Oberägypten." Bendemann has also achieved considerable success as a portrait painter.

**BIBLIOGRAPHY:** J. MEYER, *Künstler-Lexikon*; Kohut, *Berühmte Israelitische Männer und Frauen*, s. J. So.

**BENDER, ALFRED PHILIPP:** Rabbi at

Cape Town, South Africa; born at Dublin, Ireland, 1863; educated by his father, Rev. Philipp Bender, for many years rabbi of the Dublin congregation. Bender finished his education at St. John's College, Cambridge, Eng., and in 1891 was appointed rabbi of the Hebrew congregation at Cape Town, South Africa, where he continues to reside (1901). He is professor of Hebrew at the South African College, and is a member of the council of the University of Good Hope. Bender is connected with many local philanthropic institutions besides those of his own congregation. He has contributed to the "Jewish Quarterly Review" (vols. vi., vii.) a series of papers on the burial customs of the Jews. -

**BIBLIOGRAPHY:** Jacobs, *Jewish Year Book*, 1899-1900.

J.

**BENDER, JOHANN HEINRICH:** German

jurist; born at Frankfurt May or Sept. 29, 1797; died there Sept. 6, 1859. He studied law at Giessen, where he was also lecturer from 1819 to 1823. In 1831 he went to Frankfurt to practise law, and five years later he was made a member of the executive committee of the tariff commission (Zolldirectionsrath), a position he filled until his death. He was the author of "Grundriss der Deutschen Staats- und Rechtsgeschichte," 1819; "Ueber das Mündliche und Oeffentliche Verfahren in Criminalsachen," 1821; "Grundsätze des Deutschen Handelsrechts," 2 vols.,

1824-29: "Der Frühere und Jetztige Zustand der Israeliten zu Frankfurt, Nebst Verbesserungs-Vorschlägen," 1833; and other works.

S. E. M.

**BENDERY**: District town in the government of Bessarabia. In 1898 it had a Jewish population of 12,000 out of a total of 33,000 inhabitants. Commerce is the main occupation of the Jews there, only 1,061 of them being engaged in handicrafts (397 masters, 515 journeymen, and 149 apprentices). Ten Jewish families, who own about sixty-eight acres of land within the city limits, are engaged in viticulture. The most important among the Jewish benevolent institutions are the Jewish Hospital, which has an annual expenditure of 6,400 rubles, and the Talmud Torah. In special Jewish schools religious instruction is imparted to 325 children, while at the public schools 240 children receive such instruction.

H. R.

S. J.

**BENDETSOHN, MENAHEM MANUS**: Russian pedagogue and Hebrew writer; born in Grodno 1817; died there March 20, 1888. After a careful Talmudic education in his native town he was sent, while still young, to Breslau, Germany, where his father-in-law, Reuben Liebling, the cantor of the Reformed synagogue, supported him during his studies. There he published in 1847 *המסור אז אהרית רשע* ("The Denunciator"), a Polish tale, adapted from the German version of W. Tugendhold. In 1853 he returned to Russia, and then taught for more than twenty years in the government school for Jewish children at Grodno, and for a short time in Volkovisk. In Grodno he also conducted a private school for many years. Among his pupils may be mentioned the Hebrew poet Konstantin Shapiro, the public-spirited lawyer L. Kupernik of Kiev, and the jurist and writer D. Slonimski of Wilna.

Besides Hebrew, he wrote fluently in Russian and German, and being possessed of an exceptionally retentive memory he knew by heart the Scriptures and many of the writings of Schiller and other German classics.

As an esthetic writer and stylist, he could not approve of the Germanized Hebrew of the young generation, and in his preface to "Alluf Ne'urim" he severely criticized it. This called forth a reply from R. A. Braudes in an article entitled "Ha-Safah Bike-wodah ube-'Ozmah," which appeared in "Gan Perahim," Wilna, 1881, pp. 12 *et seq.* Besides the work mentioned above, Bendetsohn published: "Eben Bohan," the principal rules of Hebrew grammar in the form of questions and answers (Wilna, 1856); "Higgayon la-'Iltim," a Hebrew adaptation of the "Stunden der Andacht für Israeliten," by Samson Wolf Rosenfeld, rabbi of Bamberg (vol. i., Wilna, 1856; vol. ii., 1862); "Moda' le-Yalde Israel" (Friend of Jewish Children), instructive tales, anecdotes, etc., from the lives of noble men, partly derived from Wilhelm Oertel's "Practischer Unterricht in der Deutschen Sprache," Hebrew and Russian (Warsaw, 1872); "Alluf Ne'urim," a collection of instructive tales for youth and a manual of elementary

instruction in the Hebrew tongue, translated from the Russian (Wilna, 1879).

As a master of classical Hebrew he ranks among the best Neo-Hebraic writers, his style being almost equal to that of Mapu, who is considered the foremost classical writer of the "Maskilim."

H. R. A. FL.

**BENDIG, MEÏR, OF ARLES** (= Maestro Bendig d'Arles): Talmudist at Arles, in the Provence, probably in the second half of the fifteenth century. He wrote the following works: (1) An index of all the Biblical passages cited in the Babylonian Talmud, including the "minor treatises," and the Abot de-Rabbi Nathan, with a list of the passages in which they are cited. A later copyist gave the work the name "Em le-Mikra" (Scriptural Sources). It is manuscript No. 1637, 3, of Neubauer, "Cat. Bodl. Hebr. MSS.," and occurs also in a Verona manuscript. (2) A collection of the haggadic passages of the Talmud, erroneously entitled by the copyist "Em le-Masoret" (Sources of Tradition). It is contained in the same manuscripts as the preceding work. In his works Bendig carried out a plan of Isaac Nathan, author of "Meir Netib," who also lived at Arles, but before Bendig.

**BENDIN**. See PETRIKOV.

**BENDIT**. See BENEDICT.

**BENDIX, FRITS EMIL**: Danish violoncellist and composer; born Jan. 12, 1847, at Copenhagen. He first studied with F. Rauch, and later with Friedrich Neruda and Friedrich Grützmacher in Dresden. From 1866 to 1871 he lived in Germany, where he successively played in the orchestras at Meiningen and Cassel. He also appeared as a soloist and in chamber-music performances. On his return to Denmark in 1871 he became a member of the royal orchestra at Copenhagen, and since 1887 he has been its leader.

Bendix has published a book of children's songs, of which he composed both text and music. In 1884 a one-act comedy of his was performed at the Royal Theater in Copenhagen. Another play, entitled "En Hustru," was published by him under the pseudonym "Carston Holst."

BIBLIOGRAPHY: Salmøsen, *Store Illustrerede Konversationsleksikon*; C. F. Brieka, *Dansk Biografisk Leksikon*.  
S. J. So.

**BENDIX, OTTO JULIUS EMANUEL**: Danish oboist and pianist; born July 26, 1845, at Copenhagen; a brother of Frits Bendix. He first devoted himself to the study of the oboe, and received instruction on that instrument from Christian Schliemann. He was also a pupil of Gade and Rée. In 1868 he received an appointment as oboist in the royal orchestra; and he remained a member of that organization until 1880. In the mean time he had diligently devoted himself to the study of the piano; and in order to perfect himself as a pianist, he took

a course with Theodore Kullak at Berlin and with Liszt at Weimar (1872-74).

The piano now gradually became his favorite instrument. For a number of years he performed at concerts and taught in Copenhagen; but in 1880 he left his native city for Boston, Mass., where he now occupies (1902) a distinguished position as a teacher and virtuoso. In the latter capacity he has made frequent tours, one of which extended as far as San Francisco.

**BIBLIOGRAPHY:** *Salmonsens, Store Illustrerede Konversationsleksikon*; C. F. Bricka, *Dansk Biografisk Leksikon*; Baker, *Biographical Dict. of Musicians*, New York, 1900, s. J. So.

**BENDIX, VICTOR EMANUEL:** Danish violin virtuoso, pianist, and composer; born May 17, 1851, at Copenhagen; brother of Frits Bendix. He early manifested a remarkable talent for music. From 1867 to 1869 he was a pupil at the newly founded conservatory of music at Copenhagen, where he studied the piano under August Winding and composition under Niels W. Gade, whose favorite pupil and protégé he became. In association with Axel Liebmann, he conducted from 1872 to 1876 the concerts of the choral society founded by the latter. A few years later he became instructor of the chorus at the Royal Opera, and Gade's assistant at the choral rehearsals of the Musical Society. He also at this time frequently appeared as soloist and in chamber-music recitals, and during the season of 1893 conducted the popular concerts given at the Concert Palace.

Bendix has occasionally visited Germany and other foreign countries, and his compositions reveal the influence of modern German romanticism. They are characterized by a consummate mastery of technique, and embrace orchestral and chamber music, as well as numerous songs and minor compositions for the piano. The following is a list of his principal works: "The Thirty-third Psalm," for orchestra and chorus, op. 7; symphony in C, entitled "Fyaeldstigning" (German title "Zur Höhe"), published in 1891; symphony in D, entitled "Sommerklang fra Rusland"; symphony in A (1895?); "Lystspil-overture," op. 19; pianoforte concerto, op. 17; pianoforte trio, op. 11; ten songs, op. 18; "Poésies de Victor Hugo," op. 21; "Album," ten pianoforte pieces.

**BIBLIOGRAPHY:** *Salmonsens, Store Illustrerede Konversationsleksikon*; C. F. Bricka, *Dansk Biografisk Leksikon*, s. J. So.

**BENE-BERAK:** A town assigned to Dan (Josh. xix. 45). It was situated on the seacoast plain southeast of Joppa, and is to be identified with the modern Ibn Ibrak (Buhl, "Geographie," p. 196). The Danites, however, did not continue to hold the place, since Sennacherib (Rawlinson, "Cuneiform Inscriptions of Western Asia," i., plate 37, col. ii. 66) mentions Banai'barka as belonging to Zidka. In later times Bene-Berak became the seat of Akiba's school (Sanh. 32b).

**BENE MIKRA.** See KARAITES.

**BENEDETTI, SALVATORE DE:** Italian scholar; born April 18, 1818, at Novara, a town in Piedmont; died Aug. 4, 1891, at Pisa. In his time the public schools of Italy were closed to Jews, and therefore Benedetti attended the only school of importance in Piedmont open to Hebrews—a college founded in Vercelli by a certain Foa and intended more especially for the preparation of rabbis. After finishing his studies there and feeling no inclination for the ministry, Benedetti earned a livelihood by teaching, and by editorial work for some Piedmont and Milan papers. At this time also he translated, in abridged form, Adolph Franck's book on the Cabala. In 1844 Benedetti was named superintendent of the Pie Scuole Israelitiche at Leghorn. In 1848 he became one of the most militant participants of the Mazzini faction, and took an active part in the publication of the "Corriere Livornese."

When the Austrians invaded Leghorn, Benedetti left the city in order to return to his native province, Piedmont. He remained some time in Turin actively engaged as a journalist, and when Cesare Correnti founded the "Progresso," Benedetti became a member of the editorial staff of that paper. After its cessation Benedetti went back to Novara, and after having delivered public lectures on history he founded and edited the paper "La Vedetta," which served as intermediary between free Piedmont and Lombardy, then still under the Austrian yoke.

In view of the changed political situation provoked by the policy of Victor Emmanuel and of his minister Cavour, Benedetti decided thenceforward to devote his life to science and literature. In 1862 he became professor of Hebrew at the University of Pisa, and retained the position till his death. He also contributed from time to time to local papers of his new dwelling-place. He devoted the greater part of his energy to scientific publications; distinguishing himself by his exact knowledge of the bibliography of each subject he treated, by the severe method of research that he applied to every topic he discussed, and, above all, by the choice language he employed.

One of the most interesting of Benedetti's works was his "Vita e Morte di Mose," 1879, wherein he gathered and translated the legends concerning the great Hebrew legislator. His "Canzoniere Sacro di Ginda Levita," 1871, a translation of the poems of Judah ha-Levi, helped largely to acquaint the Italian public with the Hebrew poetry of the Middle Ages. Besides the above-mentioned works Benedetti published: "Il Terzo Centenario di Galileo," a historical tale, Pisa, 1864; "Del Metodo di Galileo nella Filologia," Turin, 1864; "Della Educazione Rustica," Florence, 1865; "Elisa Finocchietti Toscana," Pisa, 1870; "I Teologi Naturali" (translated from the Hebrew), Pisa, 1871; "La Leggenda Ebraica dei Dieci Martiri e la Perdonnaanza sullo Stesso Argomento," in "Annuario della Società Italiana per gli Studj Orientali," ii.; "Giuseppe Levi," a biography of the famous Italian poet, Florence, 1876; "Marianna Foa Uzielli," biography, Leghorn, 1880; "Dei Presenti Studj sul Talmud e Specialmente sull'Aggada," in "Proceedings of the Fourth Congress of Orientalists," held in Florence, 1878, Florence,

1880. "L'Antico Testamento e la Letteratura Italiana." Pisa, 1885.

S

**BENEDICT VIII.**: Pope from 1012 to 1024. A great persecution of the Jews took place during his pontificate. A terrible earthquake and hurricane visited the city of Rome on Good Friday, 1021, and the following day, in which many persons perished. According to the views of that time, this visitation was considered as a punishment sent by God; and the pope was persuaded, by one who pretended to have discovered the cause of the divine anger, that the Jews had insulted the host while the Christians were paying their adoration to the cross. An inquiry, conducted with all the partiality which characterized that epoch, having demonstrated the veracity of the alleged facts, Benedict ordered the execution of the guilty Jews. According to Zunz, the selihah רבו ענינו נא, written by Simeon ben Isaac, refers to this persecution.

**BENEDICT XII. (JACQUES DE NOVELLÈS)**: A monk of the Cistercian order; elected pope Dec. 30, 1334; died April 25, 1342. Although he displayed the greatest zeal for the extermination of the Albigenses and other heretics, he cherished kindly feelings toward the Jews and protected them by every means in his power. When, in 1338, bloody persecutions of the Jews broke out in several places in Germany because they had been accused of profaning sacramental wafers, Benedict addressed to Duke Albert of Austria a letter recommending him to take measures for the protection of the Jews. About the same time he wrote also to the bishop of Passau, in whose diocese many Jews had been slain on this accusation, directing him to investigate scrupulously the charge, which he, Benedict, did not believe, and to punish severely those who had invented such false accusations.

**BENEDICT XIII. (PEDRO DE LUNA)**: Antipope; born at Aragon about 1334; elected Sept. 28, 1394; died at Peñíscola June 1 (according to some, Nov. 29), 1421. This "unfrocked and spurious pope," as he was termed by the Council of Constance which deposed him (1415), caused much suffering to the Jews. Zealous for their conversion, he shrank from no measures to bring about this result. While he was still a cardinal he forced Shem-Tob ben Isaac Shaprut to appear at Pamplona before an assembly of bishops and high ecclesiastics in order to debate the question of original sin and salvation.

This zeal for conversion and controversy was encouraged by the baptized Jew, the unfrocked rabbi Salomon Levi Burgos (called by his Christian name

Pablo de Santa Maria), and Benedict's physician, Joshua Lorqui, whose Christian name was Geronimo de Santa Fé. They persuaded their master that they were able to demonstrate from the Bible and the Talmud that the Messiah had already come in the person of Jesus.

Benedict, who had perjured himself in order to save his tiara, hoped to atone for his sin before Christendom by a splendid deed, such as the conversion of the Jews en masse.

The  
Tortosa  
Con-  
troversy.

He therefore summoned the Jewish notables to a controversy at Tortosa. Twenty-two of the chief Aragonese Jews answered the summons, and assembled at Tortosa Feb. 6, 1413. At first Benedict treated them with kindness; but seeing, in the course of the debates, that he could not hope to convert them by persuasion, he threw off his mask and vented his wrath on the Talmud. When all means of converting them were exhausted without bringing about the desired results, he dismissed them in anger.

The consequence of this unprecedented controversy, which extended over a year and nine months (Feb. 6, 1413, to Nov. 12, 1414), was the issuance of an anti-Jewish bull containing eleven clauses. By the terms of this bull the Jews were prohibited from

Bull of  
1414.

studying the Talmud and Talmudical literature. All copies of the Talmud were confiscated. The communities were forbidden to build more than one synagogue poorly equipped. The Jews were not allowed to eat, bathe, or trade with Christians. They were not to hold any public office; not to follow any handicrafts, nor even to practise medicine. They were compelled to wear a red or a yellow badge, and three times a year, during Advent, at Easter, and in the summer, they were to attend Christian sermons.

Benedict, being just then deposed by the Council of Constance, did not live to see his bull enforced, but it bore its fruits; and the sad end of the Jews of Spain was due to this schismatic pope and the schismatic rabbi Burgos.

I. Br.

**BENEDICT XIV. (PROSPERO LAMBERTINI)**: Two hundred and fifty-fourth pope; born at Bologna in 1675; elected pope Aug. 17, 1740; died May 3, 1758. This pope, who graciously accepted a dedication from Voltaire and was full of amenity toward all heretics, thought it his duty to pursue by all means the conversion of the Jews. In 1747 he issued a bull regulating Jewish conversions. According to this bull all children above seven years of age could be baptized without the consent of their parents. A Christian nurse was allowed to baptize her Jewish charge against the will of the parents. One of the latter could baptize the child contrary to the wish of the other; and the grandfather could baptize his fatherless grandchild against the will of its mother.

By a decree dated Sept. 16 of the same year, Benedict forbade converted married Jews to divorce their wives according to Jewish law. At the request of the Jewish community of Rome (presented in Feb., 1751) to allow its members to frequent the market and to live outside the ghetto, Benedict renewed the severe project elaborated by the Inquisition in 1732, according to which a Jew was not permitted to pass a single night away from the ghetto.

Notwithstanding this, Benedict was far from being hostile to the Jews. On all occasions, except in the matter of conversion, he showed sympathy with them. When persecutions broke out in Poland he energetically defended the Jews and enjoined the Polish archbishop and primate to protect them.

In Italy Benedict was especially hostile to Hebrew books. The censor Constanzi prepared in 1748 a new list of forbidden books. Benedict ordered all those enumerated therein to be seized and confiscated; and on Sept. 15, 1751, this decree was enforced. It having been rumored that the Jews smuggled prohibited books into the ghetto, Benedict ordered a strict search of the houses, with the result that a general confiscation ensued. Later he gave directions to Constanzi to revise the "Sefer ha-Zikuk" (Book of Expiation) and to add to it an *Index Expurgatorius*, comprising a new series of books to be forbidden.

In Holy Week of 1756 the body of a child was found at Jampol, Poland, and a blood-accusation followed by persecutions ensued. To free themselves and all other Jews from the oft-repeated accusation, the Polish Jews sent Jacob Selek to Benedict to procure an official exposure of the falsehood of the charge. Benedict charged the counselor of the holy office, Lorenzo Ganganelli—later Pope Clement XIV.—to report on this subject; and on March 21, 1758, the acquittal of the Jews was pronounced.

**BENEDIKT, SIR JULIUS:** Composer, conductor, and teacher of music; born at Stuttgart Nov. 27, 1804; died in London June 5, 1885. Showing considerable musical talent as a boy, he became, at the age of fifteen, the pupil of Hummel at Weimar, and was introduced by him to Beethoven. In 1821 he went to Dresden to study musical composition under Weber, who treated him like a son. Having filled conductors' posts at Vienna from 1823 to 1825, he went with Barbaja to Italy in the latter year, and obtained an appointment as conductor at Naples, where he produced two of his own operas, "Gracinda ed Ernesto" and "I Porthocesi in Goa." In 1835 he went from Paris to London, where he resided till his death. He was conductor at the Lyceum in 1836 and at Drury Lane in 1838, where some of his own chief works for the operatic stage were produced. After visiting America with Jenny Lind in 1850, he became successively conductor at Her Majesty's Theater and at Drury Lane. Sir Julius held a prominent position in the musical world for

upward of forty years, as conductor and as teacher. He contributed much to the initial success of the Monday Popular Concerts at St. James' Hall. He was knighted in 1871; and, among other distinctions, was decorated by the emperor of Austria in 1874, and made knight commander of the Order of Frederick by the king of Württemberg. He was twice married.

Among his compositions are: a one-act operetta, "Un Anno ed un Giorno," produced at the Lyceum in 1836; "The Gypsy's Warning," 1838; "The Bride of Venice," 1843; "The Crusaders," 1846, produced at Drury Lane; "Undine," a cantata produced in 1860

Sir Julius Benedict.

at the Norwich Festival, of which he was for many years conductor; "The Lily of Killarney," 1862, his most successful opera, the libretto to which was founded upon Boniecault's "Colleen Bawn"; an operetta, "The Bride of Song," performed in 1864; "Richard Cœur de Lion," 1863, and an oratorio, "St. Cecilia," 1866, the last two composed for the Norwich Festival; "St. Peter," 1870; and "Graziella," 1882, besides symphonies and pianoforte music. The recitatives for the Italian version of Weber's "Oberon," which was produced at Drury Lane in 1865, were also written by Sir Julius.

**BENEDIKT, MARCUS.** See BENET, MORDECAL.

**BENEDIKT, MOSES:** German banker and artist; born in 1772 at Stuttgart, Germany; died there July 8, 1852. He was destined for the profession of sculptor. With his brother Seligmann Löb he was sent in 1785 to the Karlsschule in Stuttgart. Later on the two conducted the banking business of Benedict Brothers. Moses showed considerable talent for art, and as a painter of miniatures was particularly clever. He was an intimate friend of the painter Christian Gottlieb Schick, with whom he corresponded for years.

M. K.

**BENEDIKT, NAPHTALI.** See BENET, NAPHTALI.

**BENEDIKT OF YORK:** Leading member of the Jewish community in York, England, at the end of the twelfth century; died in 1189. Together with Josce of York he attended the coronation of Richard I., and in the riot which took place on that occasion was forced to submit to baptism, when he took the name of "William." Afterward he appealed to the king, who permitted him to return to his religion, though this was against the canon laws.

His death occurred soon after this at Northampton (Roger de Hoveden, "Chronica," ed. Stubbs, iii. 14), where he was the owner of houses. William of Newbury describes Benedict's house at York as being like unto a royal palace in size and strength ("Historia," ed. Howlett, i. 312). His widow and children were burned alive in it during the York riot of Easter, 1190.

**BENEDICTIONS** (Hebrew, "Berakot"): Blessings, or prayers of thanksgiving and praise, recited either during divine service or on special occasions. They were, according to rabbinical tradition (Ber. 33a), instituted and formulated by the founders of the synagogue, the "Anshe Keneset ha-Gedolah" (Men of the Great Synagogue), "the hundred and twenty elders" at the head of the commonwealth in the time of Ezra (Meg. 17a; Yer. Ber. ii. 4d; compare *Yad ha-Hazakah*, *Tefillah u-Birkat Kohanim*, i. 4; Ber. i. 5). Thanksgivings in the form of "Baruk Yhwu" (Blessed be the Lord) were occasionally offered in the time of the Patriarchs, the Judges, and the Kings (see Gen. xxiv. 27; Ex. xviii. 10; Ruth iv. 14; I Sam. xxv. 32; II Sam. xviii. 28; I Kings i. 48; v. 21; viii. 15, 56; I Chron. xvi. 36; II Chron. ii. 11, vi. 4) and by the Psalmists (Ps. xxviii. 6, xxxi. 22 [A. V. 21], and elsewhere); and in the form of "Baruk Attah Yhwu" (Blessed be thou, O Lord; I Chron. xxix. 10; Ps. cxix. 12); also in the prayer of Azariah (Song of the Three Holy Children, verse 3; Tobit iii. 11; viii. 5, 15; xi. 14).

In the time of Ezra public worship was begun with the call, "Bareku et Adonay" (Bless ye the Lord! Neh. ix. 5), each thanksgiving being followed by the congregational response AMEN (Neh. viii. 6) or a longer doxology, "Baruk . . . Amen" (Ps. xli. 14; lxxii. 18, 19; cvi. 48). Thenceforth the designation "Berakah," or benediction, became the

standing name for each individual thanksgiving in the service. Accordingly, the ancient Mishnah, R. H. iv. 5, calls the service "Seder Berakot" (Order of Benedictions). Thus eight benedictions are mentioned in Yoma vii. 1, which are recited by the high priest in the Temple service on the Day of Atonement, namely: (1) on the Law, (2) the 'Abodah, (3) the thanksgiving, (4) the forgiveness of sin, (5) the sanctuary, (6) Israel, (7) the priestly blessing, and (8) the closing prayers.

The recitation of the *SHEMA* every morning in the Temple was preceded by one benediction, and followed by three benedictions, which consisted of *EMET WE-YAZIB*, the 'ABODAH, and the Priestly BLESSING (closing with "Shalom" = peace; Tamid iv. 1). In the synagogue the *Shema* is preceded by two benedictions, one for the light of day: "Yozer-Or" (see LITURGY), closing with "Blessed be He who created the lights!" and one for the Law: *AHABAH RABBAH*, ending with "Blessed be He who loveth His people Israel!" and followed by one benediction beginning with *EMET WE-YAZIB* and closing with "Ga'al Yisrael" (Blessed be He who hath redeemed Israel!), after which the eighteen (or seven) benedictions follow. The *Shema* in the evening is preceded by the benedictions "Ma'arib 'Arabim," concluding with "Blessed be He who bringeth on the twilight!" and *AHABAT 'OLAM*, closing with "Blessed be He who loveth His people Israel!" and followed by two benedictions, namely: "Ga'al Yisrael," as in the morning, and "Hashkibenu" ("Grant us peaceful rest in the night!"), ending with "Blessed be He who guardeth Israel!" or, on Sabbath and holy days, with "Blessed be He who spreadeth the tabernacle of His peace over Israel!" The prayer (*SHIMONEN 'ESREN*) in the daily ritual of the synagogue consists of eighteen benedictions (Ber. 28b); the corresponding festival prayer, of

Title-Page of "Meah Berakot," Amsterdam, 1787.

seven (Tos. R. H. iv. 11); the one on fast-days, of twenty-four, six special benedictions being added to the eighteen of the daily prayer, each being followed by the response "Amen" (Ta'an. ii. 2-5).

A special benediction was also offered by Ezra before the reading from the Book of the Law, the assembly responding with "Amen! Amen!" (Neh. viii. 6.) Hence it became the regular practise in both the temple and the synagogue to recite a benediction before reading the Law, with the introductory "Bareku" (Bless ye the Lord), and after the reading with the closing formula, "Blessed be He who gave the Law," followed by the response "Amen" (Yoma vii. 1, p. 69b; "Masseket Soferim," xiii. 8, ed. Müller, p. 178). The benedictions recited at the reading from the Prophets, the HAFTARAH, one before and three or four benedictions after the reading on Sabbath and holy days, have the same character. They are thanksgivings for the words of comfort and of Messianic hope offered by the prophetic writings as interpreted by the Haggadah. Originally these also were accompanied by congregational responses ("Masseket Soferim," xiii. 9-14, ed. Müller, pp. 181-185). Similarly the reading of the HALLEL Psalms on the New Moon and holy days is preceded and

followed by a benediction; the latter known in Mishnaic time as "Birkat ha-Shir" (Benediction of the Psalm, Pes. x. 7). To the same category belong the benediction BARUK SIE-AMAR, which precedes, and the YISHTABAḤ (with or without the NISHMAT), which follows, the reading of Psalms in the early morning service; the benediction in each case closing with "Blessed be Thou, O Lord, who art extolled by praises!" (Compare Ps. xxii. 4 [3] and Ex. xv. 11.) The corresponding evening benediction "Baruk le-'Olam" appears originally to have been also a benediction on the Psalms (see S. Baer, "'Abodat Yisrael," p. 109; and Kohler, "The Psalms and Their Place in the Liturgy," Graetz College Publications, 1897, i. 31).

The benedictions recited over the meals are of very ancient origin. As early as the Book of Samuel people would not eat before the blessing had been offered over the sacrifice (1 Sam. ix. 13). Accordingly, the words in Deut. viii. 10, "When thou hast eaten and art full, thou shalt bless the Lord thy God for the good land which He hath given thee," are referred by the Rabbis to the benediction over the meal, to both the grace before the meal and the three-fold benediction after it (Ber. 21a, 48b; Tos. Ber. vii. 1; compare Sibyllines, iv. 25; Josephus, "B. J." ii. 8, § 5; Letter of Aristeus, § 184; Matt. xiv. 19, xv. 36, xxvi. 26; Acts xxvii. 35). "Seeing thee eat without washing the hands and without saying the benediction, I took thee to be a heathen," said an innkeeper to his brother Jew (Num. R. xx.). "Whosoever eats or drinks or enjoys some pleasure of the senses without offering a benediction commits a sacrilegious theft against God" (Ber. 35a, b).

Especially solemn, because accompanied with responses in accordance with the number of the participants, is the GRACE AT MEALS, consisting of three benedictions, later increased to four. According to Ber. 48b, the first "Ha-zan et ha-kol" (Blessed be He who giveth food to all) was instituted by

Moses; the second, "Noleh leka" (closing with "Blessed be Thou for the land and for the food!"), by Joshua, who led Israel into the land; and the third, "Raḥem na" (closing with "Blessed be He who rebuildeth [buildeth] Jerusalem"), by King Solomon; while the fourth, "Ha-tob we-lac-

Meṭib" (Blessed be He who is good and doeth good!)—recited as a rule whenever new wine is served to cheer the guests—is ascribed to the rabbis of Jamnia in Bar Kokba's time. All meals having had a distinctly social rather than a mere domestic character in olden times, the benedictions recited at the table were accordingly, like those in the synagogue, introduced by an exhortatory call, "Zimmun," and accompanied by responses (Ber. vii. 1, 2; Geiger, "Urschrift," p. 123; Kohler, *l.c.* pp. 34, 35).

Gladdening wine as a social element served on such occasions gave rise to benedictions connected with the Sabbath and the festival meals, the KIDDUSH (the sanctification of the day, Mek., Yitro, vii.; Pes. 106a) and HABBALAH ("the leave-taking from the holy day"), which formed originally the conclusion of the Sabbath meal (Ber. viii. 1; Geiger, "Zeitschr." vi. 116); the Passover Seder (Pes. x. 6); also to a benediction now no longer in use at the new-moon meal ("Mas. Soferim," xix. 9); to the seven benedictions recited at marriage festivities (Ket. 7b; compare Tobit viii. 6-17), which lasted a full week or two; the benedictions at circumcision (Shab. 137b; Toset., Ber. vii. 12, 13); and the benedictions at the mourners' meal, which were still in use in Europe in the eleventh century ("Mas. Soferim," xix. 11, ed. Müller, p. 276; Ber. 46b; Semahot xii. xiv.; "Sid-dur Rab Amram," i. 55; Maḥzor Vitry, No. 248). Every new enjoyment offered at the festal table, such as various kinds of fruits, or perfumes, gave rise to another benediction (Ber. vi. viii.; Tos. Ber. vi.). "To God belongs the earth and all its produce, according to Ps. xxiv. 1; but when consecrated by a benediction it becomes man's privilege to enjoy it, according to Ps. cxv. 16," says R. Levi (Ber. 36a).

Besides these three forms of benediction, a fourth, bearing a more personal character, came into use in ancient times—a thanksgiving for the manifestation of divine goodness experienced in one's life. The one hundred and seventh Psalm has been correctly understood by rabbinical tradition to refer to four different kinds of thanksgiving for benefits received from God: (1) for escaping the dangers of a journey through the desert (verses 4-9); or (2) being rescued from prison (10-16); or (3) recovering from a grave illness (17-22); or (4) having gone safely through the perils of a sea voyage. All who have undergone any of these experiences are bidden to offer loud thanksgiving to the Lord in the midst of worshipping assemblies. Out of this developed the

"Birkat ha-Gomel" (Blessed be the Lord, who bestoweth benefits upon the underserving), the benediction recited by men who are called up to the Law the first time they appear in the synagogue after deliverance from danger; the congregation responding: "May He who hath bestowed all good upon thee, further bestow good unto thee! Amen." As a matter of course,

each miraculous escape or other joyous experience gave rise to another benediction. In fact, many Psalms are the outpouring of such thanksgiving (Ps. xxii. 26 [A. V. 25], xl. 11 [A. V. 10], ciii. 1-5). Yet not only experiences of joy, but also severe trials, prompted the saints to offer thanksgiving, as in the case of Job. "The Lord gave, and the Lord hath taken away: blessed be the name of the Lord" (Job i. 21).

Every manifestation of divine protection and help became an opportunity for the pious Israelite to offer up thanksgiving in the usual form of a benediction; thus, after the victory over Nicanor the people exclaimed: "Blessed be He who hath kept His holy place undetiled" (II Macc. xv. 34). A similar benediction is given: "Blessed be Thou, the truthful Judge who discloseth the things hidden" (*ib.* xii. 41). Not only did the experience of miraculous help from Providence give an opportunity for thanksgiving, as when Jethro exclaimed, "Blessed be the Lord, who hath delivered you out of the hand of the Egyptian" (Ex. xviii. 10; Ber. 54a), but the very season or place which recalled the wondrous event to the memory of the people or of the individual gave rise to a benediction: "Blessed be Thou who wroughtest a miracle unto me," or "unto our fathers of old." There is an instructive passage in the Book of Enoch: "Each time Enoch beheld some of the wonders of nature, he blessed the Lord of Glory, who had made great and glorious wonders to show the greatness of His work to the angels and the souls of men, that they might praise His work and all His creation . . . and bless Him for ever." Obviously, at the time Enoch was written, the Hasidim had already made it a custom to

**Develop-  
ment of  
Bene-  
dictions.**

say a benediction at the sight of every great phenomenon of nature, "Oseh ma'asch Bereshit" (Blessed be Worker of Creation) (Ber. 54a; compare Ben Sira [Eccles.] xliii. 11, "Look upon the rainbow and praise Him that made it").

In the course of time all these benedictions assumed a stereotyped form; and the rule is given by Rab that, to be regarded as a regular benediction (Ber. 40b), every benediction must contain the name of God, and by R. Johanan that it must contain the attribute of God's kingship. It was always the Name that called forth the response, since the verse Deut. xxxii. 3 (Hebr.), "When I call upon the name of the Lord, ascribe ye greatness unto our God," was interpreted in this sense by the Rabbis (see Sifre, Deut. 306). In view of this response in the synagogue, "Amen"; in the Temple, "Baruk Adonay" (Blessed be the Lord the God of Israel from everlasting to everlasting), particular stress was always laid upon the closing formula ("hotem berakot") (Mishnah Ber. ix. 5; Ta'amit ii. 3; Tosef., Ber. vii. 21, 22; Tosef., Ta'amit i. 10-13); whereas full freedom as to the form of the main benediction was granted to the individual who offered the prayer or praise. It has been suggested that Psalms, such as cxxxvi., cxlviii., or other Biblical verses, originally formed the basis of each benediction (see Isidore Loeb, "Literature des Pauvres," p. 158; Müller, "Masseket Soferim," p. 228; Kohler, *l.c.* pp. 32-34). A specimen in the Apocryphon to an old benediction with choral

response is given in the Song of the Three Children (verses 29-34, 39-67). Out of the recitative benedictions spoken in assemblies, as seen in the prevalent use of the plural, developed at a much later stage the solitary prayer without the element of responses (Ber. viii. 8), which had previously been essential.

Great importance was laid, however, on the exact traditional form of the various benedictions. Only a recognized scholar ("Talmid hakam") was presumed to know them to a reliable degree; whereas those who compiled them for common use were, in Mishnaic time, regarded with suspicion. "Those who write down the benedictions are equal in mischief-doing to such as burn the Law"—ostensibly because they infringed the rights of those authorized to offer the benediction (see Tosef., Ber. i. 8; Shab. xiii. [xix. ] 4; Ber. 38a, 50a; Shab. 115b). Nevertheless it was from such written collections of benedictions that compilations like those enumerated in Mishnah Berakot ix., Ta'amit ii., Tosef., Ber. vii., and elsewhere were made. At any rate, by the second century they were already fixed as to form and number, since R. Meïr declares it to be the duty of every one to say one hundred benedictions daily (Men. 43b); and R. Yose says: "He who alters the form of benedictions fixed by the wise has failed to fulfill his obligations" (Ber. 40b; Yer. Ber. vi. 2, 10b). According to Num. R. xviii. (compare Tan., Korah, ed. Vienna, 1853), it was King David who instituted the one hundred daily benedictions. These hundred benedictions required daily by R. Meïr are shown by Abudrahim in gate iii. ("Birkat ha-Mizwah") of his commentary to correspond with the benedictions given in the daily prayers.

dictions  
Daily.**

Maimonides (Yad ha-Hazakah, Berakot, i. 4) divides the benedictions into three classes: (1) for enjoyments; (2) for the privilege of the performance of a religious duty; and (3) forms of liturgical thanksgiving and praise. Abudrahim, in Hilkot Berakot, divides them into four classes: (1) such as are comprised in the daily prayer; (2) such as precede the performance of religious duties; (3) such as are offered for enjoyments; and (4) such as are offered on special occasions of thanksgiving and praise.

The following is a list of benedictions prescribed in the Talmud and adopted in the liturgy; each of them beginning with the formula "Blessed art Thou, O Lord, our God, King of the Universe!"

(1) Before retiring to rest at night: ". . . who makes the bands of sleep fall upon mine eyes and slumber upon mine eyelids. May it be Thy will, O Lord, to make me lie down in peace and rise up again in peace. Let not my thoughts nor evil dreams nor evil imaginations trouble me, but let my bed be spotless before Thee, and give light again to mine eyes lest I sleep the sleep of death" (Ps. xiii. 4 [A. V. 3]); "for it is Thou who givest light to the apple of the eye" (Ps. xvii. 8). "Blessed art Thou who givest light to the whole world with Thy glory" (Ber. 60b).

(2) In the morning, before reciting any benediction, one has to wash the hands and say: ". . . who hast sanctified us by Thy commandments and enjoined us to wash the hands" ("Netilat Yadayim," "lifting up the hands"); compare Targ. to Ps. cxxxiv. 2 (Ber. 53b).

(3) After the performance of the functions of the body: ". . . who has formed man in wisdom and created many orifices and vessels, upon the opening or closing of which life depends." ". . . (who hastest all flesh and) who hast made man wondrously" (after Ps. cxxxix. 14).

(4) After awakening from the night's sleep (which was regarded as the returning of the soul to the body) some rabbis prescribe the benediction: "... who revivest the dead" (Yer. Ber. iv. 2, 7d); but the form commonly adopted is: "My Lord, the soul which Thou hast given me is pure, Thou hast created and formed it, and Thou didst breathe it into me and preservest it within me and wilt one day take it from me and restore it unto me hereafter. So long as the soul is within me, I will give thanks unto Thee, O Lord my God, Sovereign of all works, Lord of all souls, ... who restorest the souls unto dead bodies."

### Morning Bene- dictions.

(5) On hearing the cock crow, one says: "... who hast given the cock intelligence to distinguish between day and night," (Job xxxviii. 36). Compare "Apost. Const." vii. 34.

(6) On opening the eyes in the morning: "... who openest the eyes of the blind" (after Ps. cxlvi. 8).

(7) When sitting up and moving one's limbs: "... who loosens them that are bound" (Ps. cxlvi. 7).

(8) When dressing: "... who clothest the naked" (Ps. cxlvi. 8).

(9) When standing erect: "... who raisest up those that are bowed down" (compare "Halakot Gedolot," ed. Hildesheimer, p. 77). When sitting up: "Who liftest up those that are low" (*ib.*).

(10) When stepping upon the ground: "... who spreadest forth the earth above the waters" (Ps. cxxxvi. 6).

(11) On stepping forth to walk: "... who hast made firm the steps of man" (Ps. cxxxvii. 23).

(12) When putting on shoes: "... who hath supplied me with every want."

(13) When girding the belt about oneself: "... who girdest Israel with might" (Jer. xiii. 11; Ps. xlv. 7).

(14) When putting on a head-covering: "... who crownest Israel with glory" (Isa. lxi. 10;  $\text{שָׂמַח}$  = "glory," name for mitre).

(The following alternative is not found in the Talmud, and is disallowed in Shulhan 'Aruk, Orak Hayyim, xlv. 6; "... who givest strength to the weary.")

(15) When washing the face: "... who removest sleep from mine eyes and slumber from mine eyelids."

Here follows a prayer for a day free from sin and temptation and graced by favor of God and man, which closes thus: "... who bestowest loving-kindness" (late addition, "upon Thy people Israel").

(16) Every one must offer three benedictions daily, namely: "... who hast made me an Israelite (or who hast not made me a heathen)"; "... who hast not made me a woman"; "... who hast not made me a slave (or a boor)" (Tosef., Ber. vii. 18; Yer. Ber. ix. 2, p. 43b; Men. 43b; "Halakot Gedolot," p. 77. Persian and Greek parallels are given by Jöel, "Blicke in die Religionsgeschichte," I. 119; Kaufmann, "Monatsschrift," pt. 14-18). For woman the benediction is substituted: "... who hast made me according to Thy will."

The following benediction adopted in the Prayer-Book is, according to Yer. Ber. ix. 2, preserved in full in Yalkut, Wa'ethanan, 836, offered by the angels at the time when the Shema' is recited by Israel: "Thou wast one ere the world was created; Thou hast been the same since the world hath been created. Thou art the same in this world and the same in the world to come. Sanctify Thy name through those that sanctify it, ... who sanctifiest Thy name among the multitudes."

(17) Before and after the reading of the Psalms in the morning service: BARK SHE-AMAR and YISUTABBAH.

(18, 19) Before reading Shema' in the morning, "Yoger Or" and AHABAH RABBAH.

(20) After Shema', EMET WE-YAZIB.

(21-30) The "Amidah," seven (or eighteen, increased later on to nineteen), benedictions, consisting of three principal benedictions of praise at the beginning, three at the close, and twelve or thirteen (on week-days; on Sabbath and holy days only one) inserted in the middle (see SIEMONE 'ESRE). In case of need one benediction, HABBINENU, containing the contents of the twelve, is offered as substitute for week-days also (Ber. 28a).

(40) Before the reading from the Law two different benedictions were in use in the third century, and both have been adopted in the Prayer-Book; one beginning, "... who teachest the Law to Thy people Israel," and ending with, "... who hast commanded us to occupy ourselves with the words of the Law"; the other, "... who hast chosen us from all peoples and hast given us Thy Law," and closing with, "... who gavest the Law." After the reading: "... who hast given us the Law of truth and hast planted everlasting life in our

midst"; and closing with, "... who gavest the Law" (see Ber. 11b; "Masseket Soferim," xiii. 8).

(41) The benediction "Hashkibenu" in the evening prayer has been mentioned above; this is followed on week-days by:

(42) "Bark Adonay le-'Olam," Psalm verses corresponding to the "Bark she-Amar," which are concluded with the benediction referring to the Messianic Kingdom: "... the King who will reign forever and aye over all His creatures."

(43) Before and after the recitation of HALLEL as mentioned above.

(44) "Musa" consists of seven benedictions, with the exception of that of New-Year, which has three more.

(45) The benedictions before and after the HAFTARAH, mentioned above.

(46) To the same category as the preceding belong the benediction before and that after the recitation of the Megillah or scroll of the Book of Esther on Purim (Meg. 21b).

(47) The benediction over the reading of the four scrolls (Canticles, on Passover; Ruth, on Shabu'ot; Ecclesiastes, on Sukkot; and Lamentations, on the Ninth of Ab, mentioned in "Masseket Soferim," xiv. 3, has fallen into disuse, as has also the benediction over the reading of the Hagiographa (*ib.* 4).

(48, 49) On putting on the tallit and the lefillin on the arm and the forehead respectively (Ber. 60b; Yer. Ber. ix. 2, 14a; Tosef., Ber. vii. 10; and Men. 36a, 42b).

(50) Benediction for the Aaronites when they offer the priestly benediction (Sotah 39a).

(51) On kindling the lights on Sabbath and festival eve ("Yad," Shabbat, v. 1; Hagahot Mahari' referring to Yer. Ber. ix.); see BLESSING, PRIESTLY.

(52) On kindling the Hanukkah lights, with the additional benediction: "... who hast done wonders to our fathers in days of old at this season" (Shab. 23a).

(53, 54) KIDDUSH and HADDALAH, *q.v.*

(55-62) On affixing a MEZUZAH to a doorpost: "... who hast sanctified us by Thy commandments and enjoined us to affix the Mezuzah." Similarly, on building the battlement for the roof prescribed in Deut. xxii. 8; on the consecration of the HALLAH, or Terumah; on the 'ERUB; at the performance of the ritual slaughtering, and the covering of the blood, special blessings are said, as also at the removal of the leavened bread before Passover and the eating of the MAZZAH; at the counting of the days of 'OMER; at the preparation for and first entering into the SUKKAH; on the blowing of the SHOFAR on New-Year's Day; at the performance of the rite of ablution of persons and vessels (Yer. Ber. ix. 2, p. 14a; Tosef., Ber. vii. 9-10; "Yad," Berakot, xi.; Baer's Prayer-Book, pp. 570-571; Ber. 51a).

(63, 64) On betrothal and marriage, see BETROTHAL and MARRIAGE.

(65) On circumcision, see CIRCUMCISION.

(66) On redeeming the first-born, see PIDYON HA-BEN.

(67) Over the mourners' meal (Ket. 8b), see FUNERAL RITES.

(68) On the arrival of a new season, or of any joyous event in one's life: "... who hast kept us in life and preservest us and permitted us to reach this season."

**Thanks-**  
**giving for** (69) Blessing over the bread: "... who hast brought forth bread from the earth"  
**Enjoyments.** (Ber. vi. 1, 38a, after Ps. civ. 14).

(70) Over the wine: "... who hast created the fruit of the vine" (Ber. vi. 1).

(71) Over food other than bread prepared of flour: "... who hast created various kinds of food" (Ber. 36b).

(72) On eating fruit which grows on trees: "... who hast created the fruit of the tree" (Ber. vi. 1).

(73) On eating fruit which grows on the ground: "... who hast created the fruit of the ground" (Ber. vi. 1).

(74) After having finished the meal, see GRACE AFTER MEAL.

(75) A benediction containing in abridged form three of the usual graces after meals, after having eaten such fruits as the Holy Land is especially blessed with, such as grapes, dates, figs, and pomegranates, and after having taken wine or partaken of other food than bread.

(76) On eating food that does not grow on the ground, or drinking water, or other liquor: "... by whose word all things have been made to exist" (Ber. vi. 3).

(77) After partaking of any of these, or of fruit: "... who hast created beings and what they need. For all that Thou hast created to sustain therewith the life of each living being, blessed be He who livest forever" (Ber. vi. 8; Tos. iv. 16; according to R. Tarfon, before the eating, Yer. Ber. 10b). In Yer. Ber. *l.c.*, and Tosef. Ber. iv. 4 other benedictions over special kinds of food are given; but these were not adopted by the custodians.

(78) On smelling: "Blessed art Thou who hast created fra-

grant woods," "fragrant spices," and "fragrant oils," "odoriferous plants," and "odoriferous fruits" (Ber. 43b).

(79) On seeing lightning, falling stars, lofty mountains, great deserts (also the sun at the beginning of a new cycle of twenty-eight years), or the sky in all its beauty:

**Upon Seeing** " . . . who hast made Creation" (Ber. ix. 2; Tosef., Ber. vii. 6; Ber. 59b).

**Natural Phenomena.** (80) On hearing thunder, or witnessing an earthquake or hurricane: " . . . whose might and power fill the world" (Ber. ix. 2).

(81) At the sight of the sea: " . . . who hast made the great sea" (*ib.*).

(82) On seeing blossoms budding for the first time in the spring: " . . . who hast made Thy world lacking in naught, but hast produced goodly creatures and goodly trees wherewith to give delight to the children of men" (Ber. 43b; R. H. 11a).

(83) On seeing beautiful persons, trees, or animals: " . . . who hast such as these in the world" (Ber. 58b; Tosef., Ber. vii. 4).

(84) On seeing strangely formed beings such as giants and dwarfs, or elephants and apes: " . . . who variest the forms of Thy creatures" (Ber. l.c.; Str. vii. 5).

(85) On seeing persons stricken with blindness, lameness, or loathsome diseases, or holy places in a state of desolation, or on hearing evil tidings: " . . . the true Judge" (Ber. ix. 2 and l.c.).

(86) On hearing good tidings or witnessing joy: " . . . who art good and dispensest good" (Ber. l.c.).

(87) On seeing the rainbow: " . . . who rememberest the covenant, art faithful to Thy covenant, and keepest Thy promise" (Tosef., Ber. vii. 5; a composite prayer, see Ber. 59b).

(88) On seeing holy places restored after long desolation: " . . . who reestablishest the border of the widow" (Ber. 58b, after Prov. xv. 25).

(89) On seeing a friend after a year's separation: " . . . who revivest the dead" (Ber. 58b; compare Pirke R. El. xxxi.). When restored from a dangerous sickness: " . . . Blessed be the Merciful who gave Thee back to us and not to the earth" (Ber. 54b).

**On Seeing Remarkable Persons.** (90) On seeing a scholar or sage of distinction: " . . . who hast imparted of Thy wisdom to flesh and blood" (*ib.*).

(91) On seeing a king or ruler of a country: " . . . who hast imparted of Thy glory to flesh and blood" (*ib.*).

(92) On seeing the myriads of Israel gathered together: "Blessed be He who knowest the secret thoughts of all these" (Ber. l.c.).

(93) After having escaped perils, see GOMEL BENSHEIN.

(94) On seeing a burial-ground: "Blessed be the Lord who hath formed you in judgment, and nourished and sustained you in judgment, and hath brought death on you in judgment. He knoweth the number of you in judgment and will hereafter restore you to life in judgment. . . . who revivest the dead" (Ber. 58b).

(95) On seeing a place where a miracle happened to Israel of old: " . . . who hast performed miracles for our fathers at this place" (Ber. ix. 1).

(96) On seeing a place from which idolatrous practises have been removed: " . . . who hast removed idolatry from this place" (*ib.*). On seeing a place where idolatry is practised: " . . . who showest long-suffering to those who transgress Thy will" (Ber. 57b).

(97) On the appearance of the new moon, see NEW MOON.

**K.**

**BENEDICTUS, COENRAAD:** "Mohel" and surgeon at Surinam, Dutch Guiana, about 1830. Nothing is known of his life nor of his literary activity other than the bare fact that he published at Paramaribo in 1830 (?) a tract describing the operation of circumcision, together with a series of questions and answers for use in examining candidates for the office of mohel. The book is extremely rare. The Hebrew quotations occurring in the text are filled in by the author in his own writing, as there was probably no Hebrew type to be had in Paramaribo at that time. The title of the book is

"Examen voor den Nieuw aan te Nemen Moel of Besnijder der Israël. Kinderen. Hierbij Gedeeftelijk het Mannelijk lid Ontleed, ook Leersame Beschrijving der Besnijdenis en *Circum Cisiona* Operatie . . . in Vragen en Antwoorden."

**G. A. K.**

**BENEDIKT, EDMUND:** Austrian jurist; born at Döbling, near Vienna, Oct. 6, 1851. He studied law at the University of Vienna, and after graduation became the publisher of the "Juristische Blätter." In addition to his editorial labors he wrote: "Reform des Schadenrechts bei Ehrenbeleidigungen," 1885; "Reformation der Konkursordnung," 1887; "Einfluss des Schwurgerichts auf das Materielle Strafrecht," 1888; and "Bemerkungen über das Urheberrecht und den Gesetzwurf der Oesterreichischen Regierung," 1893.

**BENEDIKT, MORITZ:** German journalist, publisher, and editor of the Vienna "Neue Freie Presse"; born at Gnatschitz, Moravia, May 27, 1849. On attaining his majority he chose journalism as a profession, contributing with considerable success to various dailies and periodicals in Germany. In 1872 he joined the staff of the "Neue Freie Presse," becoming editor of the economic section in 1879. The two years following he devoted to the publication of a series of articles on economic, commercial, and financial subjects, which articles attracted considerable attention. In 1880 he became chief editor.

**BENEDIKT, MORIZ:** Austrian neurologist; born at Eisenstadt, Hungary, July 6, 1835. Upon his graduation from the University of Vienna, where he had prepared himself for his professional career under Hyrtl, Brücke, Skoda, Oppolzer, Arlt, and Rokitauský, he received, in 1859, the degree of doctor of medicine and surgery; and immediately enlisted in the Austrian army—the war then going on with France and Italy demanding the services of surgeon-volunteers. At the close of the campaign that was so disastrous to Austria, Benedikt was appointed privat-docent at the University of Vienna, first delivering lectures on electrotherapeutics and later adding a course on neuropathy.

In the mean time, in 1866, Austria became involved in another war, this time with Prussia and Italy, and Benedikt again volunteered his services to the army. At the conclusion of that short but

Moriz Benedikt.

bloody contest which resulted in the establishment of the dual state of Austria-Hungary, Benedikt, who took an active part in the reorganization of the Democratic party in Cisleithania (that is, Austria as distinct from Hungary), was, in 1868, offered a chair of neurology at the University of Vienna. He has remained in that position to the present time, serving also as chief of one of the departments of the polyclinic of the Austrian metropolis.

The greater part of Benedikt's professional work appertains undoubtedly to the domains of neuropathy and electrotherapeutics, but while his investigations in this special field form an important addition to the progress of medicine, and would alone entitle him to a prominent position in the medical world, they in no way overshadow his researches in other lines, especially his important

**A Pioneer Criminologist.** psychological and anthropological studies with regard to criminals. Indeed, it may be said that he is one of the pioneers of modern criminology, which seeks to base its theories directly on anthropological and psychological data.

Among his contributions to the study and treatment of nervous diseases the following deserve first mention: "Electrotherapie," Vienna, 1868; and "Nervenpathologie und Electrotherapie," Leipsic, 1874-75—two treatises embodying the lectures delivered by Benedikt at the University of Vienna. In the field of psychology, both normal and pathological, two works from his pen have met with marked success; namely, "Seelenkunde des Menschen" (also translated into Polish) and "Hypnotismus und Suggestion" (also in Italian).

Among his anthropological studies dealing for the greater part with craniometric and cranioscopic investigations, especially with regard to criminals, may be mentioned "Kranimetrie und Kephalmetrie" (also in French). Another important contribution to modern criminology—namely, his "Anatomische Studien an Verbrechergehirnen," Vienna, 1876—has been translated into English under the title "Studies on the Brains of Criminals."

Besides the above-named larger works, Benedikt has contributed a great number of important papers on anthropology; on normal, comparative, and pathological anatomy; on physiology and neurology; on normal, pathological, and criminal psychology; on ophthalmology and otiatrics. Among these contributions, scattered throughout various periodical publications, the following are noteworthy:

"Experimentelle Studien über die Wirkung von Jod, etc., auf's Nervensystem," in "Jahrbuch der Gesellschaft der Aerzte," Vienna, 1861; "Beiträge zur Neuropathologischen Casuistik," in "Deutsches Archiv für Klinische Medicin," ix. and xiii.; "Zur Pathologischen Anatomie der Lyssa," in "Virchow's Archiv," lxi. lxxii. (and in the "Wiener Medic. Presse," 1874); "Ueber die Innervation des Plex. Choroid. Inf.," *ib.*, lix.; "Zur Lehre der Entzündlichen Kernwucherung," in "Centralbl. für Medic. Wissensch.," 1874; "Zur Lehre des Raubthierotypus am Menschlichen Gehirne," *ib.*, 1876; "Der Hinterhauptstypus der Säugethiere," *ib.*, 1877;

"Zur Frage des Vierwindungstypus," *ib.*, 1880; "Ueber Lymphorrhagie in Graunlardeintegration," in "Mittheilungen des Aerztlichen Vereins," Vienna, 1874; "Ueber Katalepsie und Mesmerismus," in "Wiener Klinik," 1880; "Zur Lehre von der Localisation der Gehirnfunktionen," *ib.*, 1883; "Die Electricität in der Medicin," *ib.*, 1884; "Ueber Einige Grundformeln des Neuropathologischen Denkens," *ib.*, 1886. A number of important papers, which have appeared in the pages of the "Wiener Medic. Presse," between the years 1869 and 1882, deal with neuropathic cases observed by Benedikt, and with electrotherapeutic methods, either demonstrated or invented by him.

**Ophthalmology,** Among his contributions to ophthalmology and otiatrics should be mentioned: "Studien über Augenmuskellähmungen," in "Gräfe's Archiv," vol. x.; "Der Daltonismus bei Sehnervenatrophie," *ib.*; "Die Theorie der Neurotinosis," in "Pester Medic. Presse," 1867; "Hörnerven," in "Wiener Medic. Presse," 1870.

Benedikt has also labored in the field of pure physics, and among the many papers that have appeared over his name in the "Sitzungsberichte der Wiener K. K. Akademie der Wissenschaften" for 1857 are: "Ueber die Aenderung des Magnetismus Durch Reibungselectricität" and "Ueber die Abhängigkeit des Electricischen Leitungswiderstandes von der Grösse und Dauer des Stromes." In the second of these papers the author announces, for the first time, the fact discovered by him, that the resistance of a conductor is affected by the current itself.

In the midst of his various professional duties and extensive scientific research, Benedikt found time to write on social and political questions of the day, and on moral philosophy and esthetics—his articles appearing in French, Italian, and English, as well as in German. At the beginning

**Politics,** of his professional career Benedikt **Ethics,** devoted himself to the study of modern literature, and his first published work was one on dramatic art in Austria, written while he was still a medical student at the university, entitled "Studien über Oesterreichische Dramatische Dichter," Vienna, 1854. Benedikt is a champion of woman's rights, and was the first male president of the Verein für Erweiterte Frauenbildung in Vienna. His valuable professional services have been recognized by different governments as well as by numerous scientific bodies. A recipient of the degree of LL.D. (*honoris causa*) from several prominent universities, he has also been decorated with various orders and crosses. He is corresponding member of the academies of medicine of Paris and of Rome, and member of a great many medical and scientific societies in Europe and the United States.

**BIBLIOGRAPHY:** *Biographisches Lexikon der Hervorragenden Aerzte Aller Zeiten und Völker*, edited by Wernich and Hirsch, Vienna and Leipsic, 1851-88; Ludwig Eisenberg, in *Das Geistige Wien*, Vienna, 1893; and private sources.

**BENEDIKT, RUDOLPH:** Austrian chemist; born at Döbling July 12, 1852; died in Vienna Feb. 6, 1896. He was educated at the Polytechnic (High

School) of Vienna, where in 1872 he was appointed an assistant lecturer of technical chemistry. In 1876 he was nominated to a similar post in connection with the studies in analytical chemistry, and in 1890 was appointed full professor. His principal work is "Die Künstlichen Farbstoffe," 1883. Among his articles in technical journals are: "Ueber Salze und Base," in "Vortrag. Gegeben in der Deutschen Chemischen Gesellschaft," Berlin, 1874; and "Halogenderivate" in "Sitzung-Bericht der Kais. Akademie der Wissenschaften," Vienna, 1884.

**BENET, MORDECAI B. ABRAHAM (MARCUS BENEDICT)**: Talmudist and chief rabbi of Moravia; born in 1753 at Csurgo, a small village in the county of Stuhlweissenburg, Hungary; died at Carlsbad Aug. 12, 1829. As Benet's parents were very poor and consequently unable to engage a teacher, they sent their son when only five years old to his grandmother at Nikolsburg. There Gabriel Markbreiter provided for the tuition of the gifted child for a period of six years, and then sent him to Ittingen, Alsace, the rabbi of which place was Markbreiter's brother-in-law. The latter became Benet's

#### A Gifted Child.

teacher, and took great delight in his pupil's wonderful development. At Benet's "bar mizwah" (religious majority) celebration his teacher showed the guests, to their great astonishment, three of the boy's manuscripts—a commentary on the Pentateuch, a commentary on the Passover Haggadah, and novelke on the Talmud.

From his thirteenth to his fifteenth year Benet devoted himself exclusively to the study of the Bible, with the aid of the Jewish commentaries and of the Haggadah in Talmud and Midrash; and his strictly halakic studies he completed later in the yeshibah of Joseph Steinhard at Fürth, where he remained three years. He then went as a "haber" to Prague, where Meïr Karpeles started a private "klaus" for him;

Mordecai Benet.

and though Ezekiel Landau conducted a large yeshibah in the same city, a number of able Talmudists came daily to hear Benet's discourses. After staying at Prague two years he married Sarah Finkel (died 1828), the daughter of a prominent well-to-do citizen of Fürth, and settled at Nikolsburg (1773), and within a year was made "ab bet din" (ecclesiastical assessor). Thirteen years later he accepted the rabbinate at Lundenburg in Moravia, which he held for six months, when he resigned to become rabbi at Schlossberg, Hungary. His stay in his native country was short; and in 1789 he was made rabbi of Nikolsburg and chief rabbi of Moravia. Later on he received offers also from Presburg and Cracow,

but yielding to the solicitations of his congregation, he remained at Nikolsburg. Overstudy, however, had brought on a nervous affection in his youth, which clung to him throughout life, and was the cause of his death, which, as stated, took place at Carlsbad, whither he had gone for treatment. His body was buried temporarily at Lichtenstadt, near Carlsbad, but seven months later was permanently interred at Nikolsburg in accordance with his will.

Although Benet's works are neither numerous nor exhaustive, they are among the classic products of Talmudic literature in the eighteenth century. They are (1) "Biur Mordecai" (The Commentary of Mordecai), Vienna, 1813, a commentary on **His Works.** Mordecai b. Hillel's compendium; (2) "Magen Abot" (Shield of the Fathers), Zolkiev, 1835, a treatise on the forty-nine acts prohibited on the Sabbath; (3) "Har ha-Mor" (Mountain of Myrrh), responsa, with allusion to the rabbinical explanation of the name "Mordecai" by "Mara dakya" (= pure myrrh); (4) "Parasbat Mordecai" (The Explanations of Mordecai), Szigeth, 1889, responsa; and (5) "Tekelet Mordecai" (Mordecai's Purple Garment), Lemberg, 1892, halakic and haggadic discourses.

All these works clearly show Benet's keenness, wide knowledge of rabbinical literature, and, what is still more important, his logical and strictly scientific method. In contrast to his friends Moses Sofer and Akiba Eger, who were casuists, Benet avoided casuistry in discussing involved halakic questions; gaining his ends by means of a purely critical explanation and a systematic arrangement of the matter. An excellent example of Benet's criticism is his letter to the chief rabbi of Berlin, Zebi Hirsch Levin, whom he tries to convince of the spuriousness of the collection of responsa "Besamin Rosh." This collection was published by Saul BERLIN, Levin's son, as the work of Asher b. Jehiel ("Parasbat Mordecai," No. 5; "Literaturblatt des Orients," v. 53, 55, 140). A comparison of Benet's criticism on the work with Zunz's remarks on it ("Ritus," pp. 226-228) can not fail to excite admiration of Benet's method.

Benet's works differ in other respects from those of his contemporaries. While his style is clear and elegant, and his language a pure Hebrew, the style of his colleagues is confused and barbarous, and their language an incorrect Hebrew mixed with the corrupt Aramaic found in rabbinical literature. Moreover, Benet's attitude toward the strict orthodoxy of his friends and colleagues was exceptional, and may be attributed to his knowledge of modern thought (compare his letter to Zebi Hirsch Levin in "Literaturblatt des Orients," v. 54). These characteristics gave him an independent position in the struggle between orthodoxy and the so-called "spirit of enlightenment."

Though Benet's course in this struggle was in accordance with his early training and station in life, he was probably the only orthodox **Benet** rabbi who thoroughly understood the **Reform Movement.** Jews as well as non-Jews were being drawn at that time. He knew the enemy that confronted him, and realized the futility

of employing for defense the rusty weapons of the Talmud. It is true, he avoided the name of Mendelssohn in his approbation (dated Nov. 8, 1816) to the new edition of the Pentateuch with Mendelssohn's translation; but the very fact that he approved a German translation of the Bible at all shows that he ought not to be classed with men like Moses Sofer. He opposed the attempted reforms of Aaron Chorin; but he did it quietly and temperately, contenting himself with the remark that something more than philosophical study is required to decide theological questions.

Frequently Benet showed an insight lacking in his opponents. In his memorial to the government on the education of rabbis (printed in "Toledot Mordecai," pp. 35-37), he remarked that if the course of studies which the gymnasium demanded of candidates for all other professions were required of a rabbinical candidate, the latter would be fit for anything except the rabbinate. Still, far

**Views on Education.** from objecting to a secular education for rabbis, as he was understood to do (see Löw, "Gesammelte Schriften," ii. 190 *et seq.*), he favored it; but he thought that a rabbi should first of all possess sufficient knowledge of rabbinical matters; and he proposed that a rabbinical candidate should devote his time chiefly to Jewish subjects until his eighteenth year. His opinions concerning the duties of a rabbi, especially in regard to the instruction of children, show the strong influence that modern views had upon him. He wrote a catechism for religious instruction and submitted it in manuscript to the government. To judge from the letter accompanying it, Benet's views on the education of the young were sensible and in accordance with the spirit of the time.

Nevertheless, Benet, conscientiously opposing the new tendency, declared every reform in religious observance to be wrong and harmful. Thus, in a letter to the government concerning the introduction of German into divine service (*ib.* pp. 38-42), he wrote in favor of the preservation of Hebrew. His attitude is significant in view of the fact that, many

**Opposes Religious Reform.** years later, Zacharias Frankel used the same arguments in the convention of rabbis at Frankfort-on-the-Main, 1845; and events have proved the truth of the prophecy made by Benet, that if the prayers are said in another language few Jews will care to study Hebrew, and familiarity with the Hebrew Scripture will gradually cease.

Although Benet was independent in his attitude, his learning and high character gained for him many faithful friends among young and old. Even the Hasidim respected him; and Baer Schneidersohn, the so-called "middle rabbi," speaks highly of him in a letter now in the possession of J. L. Sossnitz of New York. Compare also Weiss, "Zikronotai," pp. 77-81.

The communities of Lichtenstadt and Nikolsburg contended for the honor of interring his mortal remains; and the dispute which later arose over the exhumation of the body was fought with the weapons of learning, and figures in the responsa literature of the time.

**BENET (BENEDICT), NAPHTALI BEN MORDECAI:** Author and rabbi; born at the end of the eighteenth century; died October, 1857, at Schafa, Moravia, where he was rabbi. He was the author of the following works: (1) "Berit Melah" (Covenant of Salt), Prague, 1816, a collection and explanation of the precepts in regard to the laws of salting the meat, in order to remove the blood (*Yoreh De'ah*, 69-78); (2) "Mispel Gadol" (Great Mourning), Vienna, 1830, a eulogy on the death of his father, Mordecai Benet; (3) "Emanat Yisrael" (Israel's Faith), Prague, 1832, a Jewish catechism in Hebrew and German; (4) "Imre Shefer" (Goodly Words, Gen. xlix. 21), Presburg, 1840, a funeral oration on Moses Sofer; (5) "Torat Dat Moshel we-Yisrael" (Doctrine of the Law of Moses and Israel), Prague, 1826, on the principles of the Jewish religion.

The catechism became very popular and passed through several editions. Though Benet's standpoint was strictly orthodox, he did not carry his orthodoxy to extremes, as can be seen from a correspondence with Isaac Samuel Reggio on the question of future punishment ("Keren Henied," i. 9), in which he shows himself vacillating on this point.

Benet's "Torat Dat Moshel we-Yisrael" is also written from a moderate orthodox point of view; but he accepted his father's views in opposing the Reform movement, and assails Aaron Chorin as a man actuated by personal motives in advocating reform.

**BENEVENTO:** City in southern Italy; capital of the province of the same name; about 32 miles northeast of the city of Naples. Benjamin of Tudela visited it about 1165, and found there 200 Jewish families, having at their head three parnasim: Kalonymus, Zerah, and Abraham ("Mas'ot Binyamin," ed. Asher, p. 13). This unimportant community increased after the Spanish exile. When King Ferdinand conquered the kingdom of Naples (1504), he established the Inquisition at Benevento in order to exterminate the Spanish and Portuguese Marranos who had settled there in somewhat large numbers.

**BENFELDEN:** Town in Alsace, 17 miles from Strasburg. It was here, in the year 1348, when Europe was devastated by the Black Death (the spread of which was ascribed to the Jews), that a council was held of the representatives of the towns in Alsace to consider the proper course to be adopted with reference to the Jews. One of the leading spirits in the council was Bishop Berthold of Strasburg, who firmly demanded that the Jews be entirely destroyed. The representatives from Strasburg maintained a gallant struggle against the superstitious bigotry that sought some scapegoat for the evil that had befallen the land, and against the cupidity and rapacity that scented a prospect for plunder.

The struggle was useless, and it was decided that all the Jews should be banished from the cities of the upper Rhine. The results of this decision of the Council of Benfelden constitute one of the most tragic chapters in the gloomy history of the persecution of the Jews.

G.

**BENFEY, THEODOR:** German Sanskritist and comparative philologist; born at Nörten, Hanover, Jan. 28, 1809; became a convert to Christianity in 1848; died June 26, 1881. His father, who had seven children besides Theodor, was a Jewish merchant deeply versed in the Talmud. Theodor received his preliminary training at the gymnasium in Göttingen, which he left at the age of sixteen for the university of the same city. As a university student he devoted himself to classical philology.

*Theodor Benfey*

and remained in Göttingen—with the exception of the year 1827, spent at Munich—until 1830. On Oct. 24, 1828, he received the degree of Ph.D., and the year following became privat-docent. He left Göttingen in 1830 and lived in Frankfort-on-the-Main for two years. Here he occupied himself with a translation of Terence, his only printed contribution to classics; and, what was of far more importance for his life-work, devoted himself seriously to Sanskrit.

In 1832 he left Frankfort for Heidelberg, where he contemplated teaching Sanskrit, but his love for his alma mater was too strong to permit him to become a member of the faculty of another university. Accordingly, in 1834, he returned to Göttingen, where he began his teaching rather in classical than in Oriental or comparative philology. Gradually,

however, he concentrated his energy on Sanskrit and comparative linguistics. Benfey's teaching covered a large range within his chosen limits. In addition to his regular work he lectured on **His Wide Range.** Indian antiquities, on the Avesta, and, going farther afield, gave courses in ethnography from the linguistic point of view (1843), and in Bengali and Hindustani (1863-64). It is interesting to note that, in 1843, he lectured on the affinity of the Egyptian and Semitic groups of languages. This single series of lectures, together with the book which was the result of the course—"Ueber das Verhältniss der Aegyptischen Sprache zum Semitischen Sprachstamm," 1844—is his only important work that deals with Semitic linguistics.

His literary activity began comparatively late. Before 1839 he published very little. Even his doctorate dissertation, "De Liguris," and his dissertation to obtain the *venia legendi*, "Observationes ad Anacreontis Fragmenta Genuina," remained unprinted. Besides the translation of Terence in 1837, already referred to, and a few reviews, his only work published prior to 1836 was one written in collaboration with Moritz A. Stern, "Ueber die Monatsnamen Einiger Alten Völker," 1836.

The silent years before 1839 had been a time of preparation, but after that period his contributions to linguistics were numerous. His "Griechisches Wurzellexikon," 1839-42, won the Volney prize. The year 1840 saw the appearance of his article on "India" in Ersch and Gruber's "Encyclopädie der Wissenschaften und Künste," and his Semitic contribution, already noted, was published in 1844. In 1847 he brought out the first German edition of the Old Persian Inscriptions, basing his work mainly on Rawlinson's results, which had appeared the previous year. The year 1848 was the date of Benfey's edition of the Sāma Veda, with introduction, glossary, and translation. He published in 1852 his "Vollständige Grammatik der Sanskritsprache," and followed this the next year with his valuable "Chrestomathie aus Sanskritwerken," and in 1855 with his "Kurze Sanskritgrammatik." His two English books—the "Practical Grammar of the Sanskrit Language" (1863-66), and the "Sanskrit-English Dictionary," 1866—were, as he himself recognized, less creditable to his scholarship than were his earlier works.

The results of his studies in comparative literature were summed up in his translation and commentary on the Pancatantra, which appeared in 1859, and is still a standard. In the preface of this work, which

comprises the entire first volume, he **His Last Important Works.** traces the development of the various Indian tales through other Oriental literature to European collections of beast fables and stories, partly through the intermediation of Jewish translators (see KALILA WA-DIMNA). His last great work was the "Geschichte der Sprachwissenschaft und Orientalischen Philologie in Deutschland," 1869. Here he traces the history of Oriental research in Germany, both in Semitics and in Indo-Iranian, down to his own time, with a thoroughness which makes the work still one

of value. After 1869 he published no books, although he continued to write reviews and magazine articles. At his death he left material, which he had been gathering for years, for a grammar of Vedic Sanskrit. This he had hoped to make the chief production of his life. Unfortunately this work was left in such a chaotic state that it is impossible to edit it or to know what the author's conclusions were to have been.

Benfey's rise was by no means rapid, yet he never lost patience, even when those inferior to himself in age or ability were promoted over him. Beginning his work at Göttingen in 1834 as privat-docent, he waited fourteen years before he became assistant professor without salary, in 1848, after which a second period of fourteen years elapsed before he was appointed professor in 1862. Under these circumstances he made several efforts to gain a more profitable position elsewhere but all his endeavors in this direction were in vain.

As a teacher Benfey was broad, and his interests were manifold. Few men have exercised an influence over more pupils, for he was a teacher as well as a savant. This breadth of view explains the reason why he founded no school, and trained no pupil who can be said to have succeeded him to carry on, unchanged, his method and tradition. He established a periodical, "Orient und Occident," in 1862, to defend his scientific principles, and both he and his students contributed to it numerous articles. Unfortunately the magazine had to be discontinued in 1866.

He left the Jewish faith in 1848, and with his family joined the Evangelical Church. His change of religion was prompted solely by the social privileges that were then possessed by Christians alone. The result of his abandonment of Judaism was not what he had expected. It was a positive disadvantage to him, and accounts in part for his slow rise to full professorship.

**BIBLIOGRAPHY:** A life of Benfey is given by his daughter Meta in the edition of his *Kleinere Schriften*, edited by Bezzenger.

S. L. H. G.

**BENGAZI** or **BENGHAZY**: City of Tripoli, Africa, on the east coast of the Gulf of Sidra. Little is known of the first settlement of the Jews there; according to local traditions, they came originally from Tripoli.

The chief rabbis of the community in the nineteenth century were: Moses Hakmon, Isaac Boharon, and Rahamin Farju of Tripoli; the last, installed in 1871, still holds office (1901). As rabbinical author must be mentioned Elijah Labi, a centenarian (1783-1883). He wrote the "Sefer Ge'ullat Adoni" (Book of God's Deliverance) (Leghorn, 1864), in Hebrew, and the "Orah Yesharim" (The Path of the Upright) and "Menulah le-Hayyim" (Rest for the Living) (Leghorn, 1872 and 1882), in Judeo-Arabic; i. e., in Rabbinic characters and in Arabic-Tripolitan dialect.

As a bit of history must be mentioned the kidnaping of a young Jewish girl by Arabs, in 1868, an affair that was only adjusted by the intervention of

the Alliance Israélite Universelle and the European consuls.

In 1901 the community numbered 2,000 Jews, in a total population of 38,000. It has two synagogues—the Low Synagogue, which is said to be very old; and the High Synagogue, of more recent date—and four Talmud Torahs, attended by 200 pupils. The community is governed by a supreme judge (Abraham Habib in 1901), in addition to the rabbi and by three syndics ("gabbaim"). The salaries of these officials are paid from the meat-tax, amounting annually to 3,000 francs. There are two societies: the Hebra Qaddisbah, a burial society, and the Bik-kur Holim, which furnishes medicine and physicians to the poor.

The Jews of Bengazi are prosperous. The majority trade in wool, barley, and butter. Others follow trades, as jewelers, tinsmiths, carpenters, etc. A Jew, Hamus Români, is one of the higher officials of the Serail, or administration of the department. The richest families are those of Tchuba, Youeli, and Hakmon. There are very few poor. Some of the Jews have very curious names; e. g., as "Schima," "Touajir," "Bedoussa," etc.

D. M. Fr.

**BENHAM, ARTHUR**: Dramatic author; born 1875; died at Brighton, Eng., Sept. 8, 1895. He was a playwright of considerable promise, and was the author of two plays, "The County" and "The Awakening"—the latter produced for a short run at the Garrick, and the former at Terry's Theater—when he was only twenty years old. He died of consumption when scarcely past his twentieth year. His sister was the actress **Estelle Burney**, who collaborated in his plays, and was his tender nurse during his long illness.

J. G. L.

**BENI-ISRAEL**: Native Jews of India, dwelling mainly in the presidency of Bombay and known formerly by the name of **Shanvar Telis** ("Saturday Oil-Pressers") in allusion to their chief occupation and their Sabbath-day. The Beni-Israel avoided the use of the name "Jew," probably in deference to the prejudice of their Mohammedan neighbors, and preferred the name Beni-Israel in reference to the favorable use of the term in the Koran (sura ii. 110). According to their own traditions, they are descended from the survivors of a band of Jews fleeing from persecution who were wrecked near the Kenery and Kenery islands in the Indian ocean, fifteen miles from Cheul, formerly the chief emporium of the trade between Arabia and India. Seven men and seven women are stated to have been saved from drowning; and from them are descended the Beni-Israel. This is said to have been from sixteen hundred to eighteen hundred years ago. Benjamin of Tudela appears to have heard of them in the twelfth century, and Marco Polo in the thirteenth; but they were first brought to the knowledge of Europeans, simultaneously with the White and Black Jews of Cochin on the Malabar coast, by Christian missionaries in India, like Drs. C. Buchanan and Wilson,

at the beginning of the nineteenth century. On the advent of the Sassoon family at Bombay, more direct interest was taken in the Beni-Israel by Western Jews, and much educational work has since been done among them.

The Beni-Israel themselves refer to two religious revivals among them during their stay in India: the first, placed by them about 900 years ago, due to David RAHABI, and another, about the year 1796, due to Samuel DIVEKAR. According

**Internal History.** to tradition, Rahabi was a Cochin Jew, whose family had come from Egypt, and on visiting the Beni-Israel he found among them several customs similar to those current among Jews, and to test them he gave their

women some fish to cook, including some that had neither fins nor scales. These they separated from the others, saying that they never ate them. Rahabi was thereupon satisfied they were really Jews, and imparted instruction to them. After the attention of the European Jews had been called to the Beni-Israel, the rites and ceremonies of the latter were assimilated to those of the Sephardic Jews, and prayer-books in Mahrati, their vernacular, have been provided for them. Previously, however, to this their festivals and customs differed considerably from the rest of the Jews both in name and in ceremonial.

The festivals of the Beni-Israel, before they became acquainted with the ordinary religious calendar of modern Jews, had only native names, one set of which was in Mahrati and the other in Hindustani. The latter are attributed to the reforms of David Rahabi. Many of the names in the former end in "San," meaning "holiday," and among them are the following:

**Navyacha San** ("New-Year holiday"), kept on the first day of Tishri, the second-day observance not being known among the Beni-Israel.

**Khiricha San** ("Pudding holiday"), on the evening of the fourth of Tishri. This was celebrated by eating "khir," a sort of pudding made of new corn mixed with

coconut-juice and sweets; a censer with burning frankincense being placed near the dish. The khir was eaten by the family after saying the Shema'.

**Darfalnicha San** ("Closing-of-doors holiday"), on the

tenth of Tishri, during which they fasted from five o'clock in the evening until the next evening at seven. During it they did not stir out-of-doors, nor touch nor speak to people of other denominations. They dressed themselves in white, and believed that departed souls visited their habitations on the preceding day and left them on the following day, called **Shita San** ("Stale holiday"), on which day they gave alms to the poor and visited their friends.

**Holicha San**, on the thirteenth and fourteenth of Adar; the former kept as a fast, and the latter as a feast, on which they sent home-made sweetmeats to one another. This corresponds to Purim; but the Beni-Israel did not observe the second day or "Shushan Purim."

**Anasi Dakacha San** ("Anas-closing holiday"), on the fourteenth and twenty-first of Nisan. This was celebrated by closing an earthen chatty or pot containing a sour liquid commonly used as sauce. This festival corresponded to Passover; but, as the Hindus generally did not use any leaven with their rice, the object of the ceremony seems to have been forgotten.

**Birdiacha San** ("Birda-curry holiday"), on the ninth of Ab, on which they ate nothing but rice with a curry of "birda" or pulse. This was served on plantain-leaves. During the preceding eight days no meat was eaten. This corresponds to Tish'a be-Ab, in memory of the destruction of the Temple; but there does not seem to have been any conscious recognition of that fact.

The other festivals, chiefly known by the name of "Roja" (fasting), appear to have been of later introduction, and are connected with the reforms of David Rahabi. These are as follows:

**Ramzan**, a fast held throughout the month of Elul; the name is doubtless derived from the Mohammedan month of fasting, "Ramazan."

**Navyacha Roja** ("New-Year fast"), on the third of Tishri, corresponding to the fast of Gedaliah, but not associated with his murder.

**Elijah Hannabicha Oorus** ("The fair of Elijah the Prophet"), to celebrate the ascension of Elijah on that day at Khandalla in the Konkan. Various kinds of fruit

were placed on plates, together with "malida" (pieces of rice-bread besmeared with sirup), and a censer of burning frankincense. The fruit was eaten by the family.

**Sababi Roja**, a fast on the seventeenth of Tammuz, a reminiscence of the siege of Jerusalem, but not known as such by the Beni-Israel.

From this enumeration of the festivals it will appear that the Beni-Israel retain from the earliest times (as indicated by their Mahrati names ending with "San") the New-Year, Day of Atonement, Purim, Passover, Ninth of Ab, and in addition a form of Tabernacles which has been transferred to the Fourth of Tishri. Later on they introduced, doubtless under the influence of David Rahabi (as

Group of Beni-Israel in Ancient Costume.  
(From a photograph.)

is shown by the Hindustani names), the fasts of Gedaliah, Tebet, and Tammuz, together with the New-Year of the trees, associated with the name of

Beni-Israel of Bombay.  
(From Wilson, "Lands of the Bible.")

Elijah the Prophet; while still later the custom of fasting throughout the whole month of Elul seems to have been borrowed from the Mohammedans. The feasts of Pentecost and Hanukkah seem to have dropped out of use. It would appear that be-

fore the second revival under Samuel Divekar the only other remains of Judaism current among the Beni-Israel were the strict observance of the Sabbath, circumcision, and the reading of the Shema', which is the sole piece of Hebrew retained by them. The latter was said at every meal, at wedding-festivals, at burial-feasts, and indeed on all sacred occasions. The only animals considered fit for food were fowl, sheep, and goats. The Beni-Israel probably refrained from beef, in order not to offend their Hindu neighbors.

It is difficult at this time to determine with any degree of accuracy the relative age of the customs they follow. Even before the religious revival of 1796 the Beni-Israel customarily removed the sciatic nerve from animals used for food, and they salted the meat in order to abstract the blood from it ;

otherwise they did not observe the **Customs.** law of shehitah and bedikah. They also left a morsel of bread or rice in a little dish after they had dined. Among them the birth of a girl was celebrated on the sixth night, and that of a boy on the sixth and eighth; and on the latter day the rite of circumcision was performed. Girls were usually betrothed some months before marriage; and until the wedding they wore the hair flowing from their shoulders. At the betrothal ceremony the intended bride and bridegroom sat face to face and dined together, sweetened rice being served to the assembly. On the day when the marriage ceremony was to take place the bridegroom, who had been crowned with a wreath of flowers, was led in procession on horseback to the bride's house, and the ceremony

BENI-ISRAEL FAMILY AT BOMBAY.  
(From a photograph.)

took place under a booth. At the feast held before the wedding took place a dish containing a piece of leaven cake, the liver of a goat, fried eggs, and a twig of "subja" was placed with burning frankincense on white cloth, and after the Shema' had been

Keneseth Eliyahu Synagogue, Bombay.  
(From a photograph.)

repeated the dish was taken inside and, with the exception of five pieces of the cakes and liver, which were set aside for the person officiating as priest, the food was eaten. Polygamy is allowed, and in some cases divorce is given according to the civil law; but the Beni Israel did not practise "get," "yibbum," or "halizah." An adulteress and her issue are regarded as "Black Israel."

After burials the mourners wash both themselves and their clothes, and on the third day the house is cleansed; the ceremony being known as "Tizova," or the "Third-Day Cleansing." When a person died, all the water was emptied from the pots in the house, and the body was buried with the head toward the east. Grape-juice or milk was drunk by those visiting the mourners in the evening during the days of mourning. It was customary for relatives and friends to bring "meals of condolence" to the house of mourning. On the seventh day after burial there was a mourning ceremony known as the "Jaharuth," in which a dish, containing cakes and pieces of liver, and a glass of liquor, was placed on a white sheet. After repeating the Shema' about a dozen times, the contents of the glass were drunk in honor of the dead; and after the food was eaten, the chief mourner was presented with a new turban by a relative. Jaharuth was also observed on the first, sixth, and twelfth months. If a boy were born after a vow made by the mother, his hair was not shaved for six or seven years, after which period it was completely shaved and weighed against coins (gold

or silver), to be given in charity. The shaved hair was thrown into the sea and not burned. A feast was held in the evening, at which the mother was informed that she was free from her vow.

Formerly the Beni-Israel wore turbans, but now they use mainly the Turkish fez. The women adopt the Hindu dress, and are accustomed to wear anklets and nose-rings. Most of the Beni-Israel names have been changed from Hebrew to Hindu

**Costume and Names.**

forms; thus, "Ezekiel" into "Ilas-saji"; "Benjamin" into "Bunnajee"; "Abraham" into "Abajee"; "Samuel" into "Samajee"; "Elijah" into "Ellojee"; "Isaac" into "Essajee"; "Joseph" into "Essoobjee"; "Moses" into "Moosajee"; "Rahamin" into "Ramajee"; "David" into "Dawoodjee," and "Jacob" into "Akhoobjee." Their surnames are mostly derived from neighboring villages; thus, those who resided at Kehim were called "Kehimker," and those who lived at Pen were named "Penker."

About 1795 Samuel EZEKIEL DIVERKAR, a Beni-Israel soldier in the East India Company's service, was captured by Tipu Sahib. He made a vow that if he escaped he would build a synagogue at Bombay.

**Later History.**

He succeeded in escaping, and built the synagogue Magen David, now called Sha'ar Ha-Rahamin, at Bombay, and introduced the Sephardic ritual from Cochin. The Beni-Israel shortly afterward attracted the attention of Christian missionaries at Bombay, who about 1812 brought Michael SARGON from Cochin, who, though a convert to Christianity, opened schools for the Beni Israel in Bombay, Rebdanda, and Palle for over thirty years; explaining to the children parts of the Old Testament, and rarely, if ever, speaking of Christianity to them.

The chief instrument in introducing the full knowledge of Judaism to the Beni-Israel was Shel-

Second Beni-Israel Synagogue, Bombay, Erected 1848.  
(From a photograph.)

lomo (Solomon) SHURRABI, who was wrecked near Bombay about 1836, and for twenty years acted as religious instructor of the community. Owing to his influence several new synagogues were built

in the vicinity of Bombay, and a general interest in their religion was shown by the Beni-Israel. The advent of the Sassoons at Bombay brought the Beni-Israel into connection with the real life of Israel; and the family, as well as Christian missionaries, liberally supported religious, philanthropic, and educational establishments for the benefit of Beni-Israel. A special school for them was established in July, 1875, which, owing to the support given by the Anglo-Jewish Association, was enlarged in 1881, and now accommodates about 270 children.

As their native name implies, the original Beni-Israel were mainly oilmen or oil-pressers; but during the existence of the East India Company many of them adopted the career of soldier and obtained the

Magen David or Sha'ar Ha-Rahamin Synagogue, Bombay.  
(From a photograph.)

highest rank, that of sirdar bahadur. Owing to the spread of education among them several have gone into learned professions and become engineers, doctors, and teachers.

The following are the chief places where Beni-Israel are to be found, with the population as given by the last accessible census (1891):

**BOMBAY PRESIDENCY.**

Parwell	301		

Of recent years many works suitable for instruction have been translated into Mahrati for the benefit of the Beni-Israel, chiefly by the exertions of Joseph Ezekiel, whose works cover the whole cycle of Jewish ritual and liturgy, besides treatises on

the Jewish religion and text-books of Hebrew grammar. In addition to these, several newspapers in Mahrati were published, among them the "Bene Israelite" (Lamp of Judaism).

The task of determining with any degree of exactness the amount of Jewish blood that at present pervades the Beni-Israel is a very difficult one. In appearance they differ but slightly from their neighbors. They themselves are proud of their purity of descent, and point to the care taken by Jews of Cochin to separate the Black Jews, or proselytes, from the White. The use of the word "Ramzan" for the feast of the month of Elul might seem to indicate that they were originally Mohammedans, and were converted to Judaism by David Rahabi; but, on the other hand, it may have been the word only that was adopted, the custom of fasting during that month being derived from the Sephardic ritual, which is that current in Cochin. If originally Jews, the Beni-Israel retained very little of Jewish custom until the revival under Divekar, except the institution of the Sabbath, the repetition of the Shema', and the rite of circumcision; but in this they resemble the Jews in China, who appear to have kept their purity of descent almost up to the present time. For a full discussion of this question, see COCHIN.

J. E.—J.

**BENISCH, ABRAHAM:** Journalist and theologian; born at Drosau, a small town eight miles southwest of Klattau, Bohemia, in 1811; died at Hornsey Rise, a suburb of London, England, July 31, 1878. He studied surgery in Prague about 1836—while a commentary on Ezekiel which he had written was being published—with a view to preparing himself for a journey to Palestine. Together with his fellow-students, Albert Löwy and Moritz Steinschneider, he was inspired by the lofty mission of restoring Jewish independence in the Holy Land; and while still a student at the University of Vienna, he had attracted round him a large number of his coreligionists, to whom his scheme for the liberation of his Jewish fellow-countrymen commended itself. Largely through his efforts a secret society was formed, of which Benisch was appointed to act as emissary and visit certain foreign lands with a view to finding a suitable basis for the liberation and emigration scheme. The main reliance for support in the carrying out of the plans was placed on the English Jews. In 1841, in pursuance of his mission, Benisch came to London, where he submitted the essential part of his proposals to various persons, who opposed them unanimously. Although temporarily compelled to lay aside his plans, he never completely abandoned them. Soon after his arrival in London he devoted himself to Jewish journalism and literature, and acquired considerable influence in Jewish and Christian circles.

When among Christians Benisch strenuously combated the once rampant conversion idea. In 1854 he became editor of the "Jewish Chronicle," which position he held till 1869, resuming the editorship again from 1875 till the year of his death. His editorial influence was exerted in favor of a moderate orthodoxy. He made quite a feature of the correspondence columns of the paper. Benisch took an active part in communal affairs, and helped to found several learned societies, including The Biblical Institute and its allies, The Syro-Egyptian and The Biblical Chronological societies. These three were afterward fused into the Society of Biblical Archeology. In 1860, when the Alliance Israélite was started, Benisch's hopes and ideals were revived, and by suggesting and aiding the inauguration, in 1871, of the ANGLO-JEWISH ASSOCIATION, he helped toward the realization of many of the hopes and aspirations of his youth.

Benisch wrote numerous works in the domain of Bible studies, biography, travel, the defense of Judaism; and weekly articles contributed to the pages of the "Jewish Chronicle" during a period of nearly forty years. He left the copyright of the paper to the Anglo-Jewish Association, which, shortly after his death, sold it. His most important works were: (1) "Judaism Surveyed, Being a Sketch of the Rise and Development of Judaism from Moses to Our Days," 1874; (2) "Why I Should Remain a Jew," thirty-three letters contributed to the "Jewish Chronicle," and published posthumously. He also wrote: "Two Lectures on the Life and Writings of Maimonides," 1847; "A Translation of the Old Testament, Published with the Hebrew Text," 1851; "An Essay on Colenso's Criticism of the Pentateuch and Joshua," 1863. Benisch also published an "Elementary Hebrew Grammar," in 1852; and a "Manual of Scripture History," in 1853.

**BENJACOB, ISAAC B. JACOB:** Russian bibliographer, author, and publisher; born in Ramgola, near Wilna, Jan. 10, 1801; died in Wilna July 2, 1863. His parents moved to Wilna when he was still a child, and there he received instruction in Hebrew grammar and rabbinical lore. He began to write early, and composed short poems and epigrams in pure Biblical Hebrew which are among the best of their kind in Neo-Hebraic literature. For several years he lived in Riga, where he was engaged in business, always studying and writing in his leisure hours. Later he became a publisher and bookseller and went to Leipzig, where he published his first work, "Miktamim we-Shirim" (Epigrams and Songs), which also contains an important essay on epigrammatic composition (Leipzig, 1842). Of the other works which he published there, his corrected edition of R. Bahya ibn Pakuda's "Hobot ha-Lebabot," with an introduction, a short commentary, and a biography of the author, together with notes and fragments of Joseph Kimhi's translation by H. Jellinek, is the most valuable (Leipzig, 1846; Königsberg, 1859, without the introduction).

In 1848 Benjacob returned to Wilna, and for the next five years he and the poet Abraham Bär Leben-

sohn were engaged in the publication of the Bible with a German translation (in Hebrew type) and the new "Biaurim" (Wilna, 1848-53, 17 vols.), which did much good as a means of spreading the knowledge of German and a proper understanding of the Hebrew text among the Jews in Russia. When this work was done he brought out his corrected and amended edition of Hayyim Joseph David Azulai's "Shem ha-Ge'dolim" (Wilna, 1853; Vienna, 1862), which is still the standard edition of that important work. In 1862 Benjacob announced his intention to begin the publication of popular editions of classical Hebrew works which had become rare or high-priced. He died soon after the appearance of the first volume of Azariah dei Rossi's "Meor 'Enayim," with which he started the series (Wilna, 1863).

In his later years Benjacob was one of the leaders and representatives of the Jewish community of Wilna, and took an active part in all communal affairs. In his correspondence with Isaac Bär Lewinsohn, which is partly published in "Ha-Kerem" (pp. 41-62, Warsaw, 1888), Benjacob throws much light on the condition of the community in the beginning of the second half of the nineteenth century, and especially on the lamentable condition of the Rabbiner Schule (Rabbinical Seminary) which the government established there and in Jitomir in 1848, and closed in 1873. Benjacob himself was originally destined to be one of the teachers of the Wilna Seminary, but never filled the position; and later he became one of the severest critics of that institution. These letters are also interesting on account of the idea they give of the perplexities of the old Maskilim of the Mendelssohnian school in Russia, like Benjacob, who were being swept aside by the younger generation which had the advantage of a Russian training. He could not speak Russian, and most of the representatives of the community suffered from the same disability, excepting a few merchants who cared little for the fate of the seminary; and the older members were at a great disadvantage when pitted against the young students, who could gain whatever they desired from the authorities on account of their correct Russian accent.

Benjacob corresponded with Jewish scholars in Western countries, and was known during his lifetime for his great achievements as a bibliographer, although his monumental work, the "Ozar ha-Sefarim, Thesaurus Librorum Hebraeorum tam Impressorum quam Manuscriptorum," did not appear till seventeen years after his death (Wilna, 1880). It was published by his son Jacob, and contains 17,000 entries of Hebrew printed and manuscript works, with valuable notes by M. Steinschneider. An author-index to the work together with additions has been promised by Steinschneider ("Hebr. Bibl." xx. 73; "Festschrift," p. vii.). It is the greatest Jewish bibliographical work in the Hebrew language, and is still the standard bibliography of printed books down to 1863.

Besides other minor works and articles published in various Hebrew periodicals and collections, Benjacob also commenced a German-Hebrew dictionary and a Mishnaic-Talmudic dictionary with a German translation, both of which were left unfinished.

P. Wl.

**BENJAMIN.**—**Biblical Data:** Youngest son of Jacob by Rachel, who died on the road between Beth-el and Ephrath, while giving him birth. She named him "Ben-oni" (son of my sorrow); but Jacob, to avert the evil omen, called him "Ben Yamin," son of the right hand; that is, of good luck (Gen. xxxv. 17, 18).

Benjamin stayed with his father when his brothers went down to Egypt to buy corn during the famine, but Joseph insisted that he should come down with them on their second visit. Jacob being afraid to let him go from his side, as he was the only remaining son of Rachel, Judah vouched for his safety, and finally obtained his father's permission to take him along (Gen. xlii., xliii. 8-10). Joseph received his younger brother with marks of special attention; but as the time came for the brothers to return to their father with the newly bought corn, he put them severely to test by laying a trap and bringing the charge against Benjamin of having stolen his silver cup, in punishment for which he wanted to keep him as a slave. Judah, faithful to his pledge, stepped before Joseph, begging to be taken as a slave instead of Benjamin, whose failure to return would cause his father to go down in sorrow to Sheol; whereupon Joseph, seeing that the brothers were not so cruel toward one of Rachel's sons as they had been to him, made himself known to them (Gen. xliiii., xlv.). Benjamin, until that time spoken of as "a child" (Gen. xlii. 13, xlv. 20), moved to Egypt with his father, Jacob, himself being the father of ten sons (Gen. xlvi. 21).

The tribe of Benjamin is described in Jacob's blessing (Gen. xlix. 27) as warlike: "Benjamin is a wolf that raventh; in the morning he shall devour the prey, at evening he shall divide the spoil." In the desert, where Benjamin formed part of the camp of the sons of Joseph, the tribe counted 35,400 warriors, and later on 45,600 men (Num.

**The Tribe** i. 36; ii. 22, 23; x. 22-24; xxvi. 41).

**of Benjamin.** In I Chron. vii. 6-11, 59,434 men are given. The astute and pugnacious nature of the Benjamites is evidenced

by the fact that they were drilled as left-handed warriors to attack the enemy unawares (Judges iii. 15-21, xx. 16; I Chron. xii. 2). They were known as brave and skilled archers (I Chron. viii. 40, xii. 2; II Chron. xiv. 7). A cruel act of inhospitality by the men of Gibeah, reminding one of the Sodomites, brought the whole tribe under a ban ("herem"); and a war followed in which all the other tribes very nearly exterminated the little tribe; moreover, they took an oath not to give to the Benjamites any of their daughters in marriage. Only at the last moment, when all but 600 men had been slain, a way was found to provide the survivors with wives in order to prevent the tribe from dying out (Judges xix.-xxi.). Still the little tribe of Benjamin was destined to a prominent place in the history of Israel. It gave the nation its first king, in the person of Saul, son of Kish (I Sam. ix. 1); and when Saul died,

his son, Ish-bosheth, reigned for two years over Benjamin and the other tribes, except Judah (II Sam. ii. 8, 9). In fact, Benjamin considered himself the younger brother of Joseph long after David had united all other tribes with his own of Judah (II Sam. xix. 21 [20]).

But the territory of Benjamin was so favorably situated as to give it prominence beyond its numerical proportions. Bordering on Joseph's to the north and on Judah's to the south, it touched on the Jordan; and, lying on the line leading from Jericho to the northern hills of Jerusalem, it included such cities as Gibeah, Gibeon, Beth-el, and,

**The Territory.** part of the Temple district (Josh. xviii. 11-21; Josephus, "Ant." v. 1, § 22; Sifre, Wezot ha-Berakah. 352). Reference is made to this excellent locality in the blessing of Moses: "The beloved of the Lord shall dwell in safety by him; he covereth him all the day long, and he dwelleth between his shoulders" (Deut. xxxiii. 12). At the secession of the northern tribes, Benjamin remained loyal to the house of David (I Kings xii. 21), and therefore shared the destinies of Judah at the time of the restoration (Ezra iv. 1, x. 9). Mordecai, the loyal Jew, was a descendant of Saul of the tribe of Benjamin (Esth. ii. 5); and Paul, whose Hebrew name was Saul, also claimed to be a Benjamite (Rom. xi. 1; Phil. iii. 5). On the other hand, it is hardly admissible that Menelaus and Lysimachus should have been allowed to officiate as high priests if they were descendants of the tribe of Benjamin, as II Macc. iii. 4 (compare iv. 23, 29) seems to indicate; it is much more probable that the name "Benjamin" in this place is due to a copyist's error, and the passage should read: "Simon was of the [priestly] tribe of Miniamin," if "Bilgah" is not the proper reading. Compare Suk. 56a and art. **BILGAI**; also Herzfeld, "Gesch. des Volkes Israel," 1863, i. 218.

G.

K.

—**In Rabbinical Literature:** The name "Benjamin" is given various meanings by the Rabbis. According to some, בנימין is equivalent to בן ימים ("son of days"), because Benjamin was born to his father in his old age (Testament of the Twelve Patriarchs, Benjamin i. *υἱὸς ἡμερῶν*; Midrash Lekah-Tob; and Rashi, ed. Berliner, on Gen. xxxv. 18). Other rabbis interpret the name Benjamin as "son of the South," since he was the only son born to Jacob in Palestine, the others having been born in Mesopotamia, north of Palestine (Rashi *ad loc.*; "Sefer ha-Yashar," Wayishlah, ed. Leghorn, p. 561b). Benjamin was not granted to his parents until after Rachel had prayed and fasted for a second son a long time (Testament of the Twelve Patriarchs, *l.c.*; Num. R. xiv. 8), and not until Jacob was one hundred years old (Testament of the Twelve Patriarchs, *ib.*; "Sefer ha-Yashar," Wayishlah, *ib.*; compare Heilprin, "Seder ha-Dorot," i. 52, ed. Warsaw).

Benjamin, Joseph's brother, took no part in the selling of Joseph (Sifre, Deut. 352); and in order to comfort Benjamin concerning his brother's fate, God showed him, while awake, Joseph's form and countenance (Testament of the Twelve Patriarchs, Benjamin x.; compare Tan., ed. Buber, Wayeshcb, 8).

When Benjamin was detained as the alleged thief of the cup, Joseph pretended that Benjamin had been instigated by his brothers. But Benjamin swore: "As truly as my brother Joseph is separated from me, as truly as he has been made a slave, I have not touched the cup, and my brothers did not want to make me steal." When asked for a proof that his brother's memory was so sacred that Joseph must believe this oath, Benjamin told Joseph how he had given his ten sons (Gen. xlv. 21) names which referred to the loss of his brother. The first was called Belah (בלע), because Joseph had disappeared (בלע, "swallow"); the second, Becher (בכר), because Joseph was his mother's first-born (בכור); the third, Ashbel (אשבל), because Joseph was made a captive (שבח, "capture"); the fourth, Gera (גרא), because he lived in a foreign (גר) land; the fifth, Naaman (נעמן), on account of Joseph's graceful speech (נעים, "grace"); the sixth, Elī (אחי, "my only full brother"); the seventh, Rosh (ראש, "the older"); the eighth, Muppim (מפים), because Joseph taught Benjamin the things he himself had learned from his father (מפנים, "double mouth"); the ninth, Huppim, "whose wedding (הופה) I have not seen"; and the tenth, Ard, because Joseph was like a rose (רד).

Benjamin's oath touched Joseph so deeply that he could no longer pretend to be a stranger, and so revealed himself to his brother (Tan., ed. Buber, Wayiggash, 7; the meanings of the names are also given in *Soṭah* 36b; Gen. R. xciv. 8). According to another Haggadah (known to so early a work as the Testament of the Twelve Patriarchs, Benjamin ii.), Joseph makes himself known to Benjamin before his reconciliation with the other brothers. The "Sefer ha-Yushar" (Mikḳeẓ 89) narrates that Joseph caused a kind of astrolabe to be brought, and asked Benjamin whether he could not discover by means of the instrument the whereabouts of his lost brother. To Joseph's astonishment Benjamin declared that the man on the throne was his brother, and Joseph revealed himself to Benjamin, telling him what he meant to do with the brothers. His intention was to try them and thus to learn whether they would act in a brotherly manner toward Benjamin if he were in danger of losing his liberty.

The Rabbis lay stress on the name, "beloved of the Lord," by which Benjamin is distinguished (Deut. xxxiii. 12; Sifre, *l.c.*). He is counted among the four men who died by the poison of the serpent in Paradise; *i.e.*, without sin of his own, the other three being Amram, the father of Moses; Jesse, the father of David; and Kileab, the son of David (Shab. 55b). His comparison to the ravening wolf (Cant. R. to viii. 1), "who devours his enemy" (Gen. xlix. 27) is referred to the men of Shiloh who stole their wives (Judges xxi.) or to Ehad or to Saul. By others it is referred to Mordecai and Esther (Gen. R. xcix. and Tan., Wayehi, 14; so also in the original text of the Testaments of the Twelve Patriarchs [Benjamin ii]; whereas a Christian interpolation refers it to Paul).

One interpretation refers the blessing to the early ripening of the fruits in the territory of Benjamin, and the great fertility of the region of Jericho and Beth-el, and another refers the expression "wolf" to the altar of the Temple, which devoured the sac-

rifices in the morning and in the evening (Gen. R. *l.c.*; Targ. O. and Yer.).

6.

The erection of the Temple on Benjamitic ground is explained in several ways. It is related that Benjamin (Sifre, Deut. 332, ed. Friedmann, 146a) was privileged to have the שֵׁרֵי־כִּינּוּן dwell in his territory because all the other tribes (that is, fathers of the tribes) had taken part in the selling of Joseph. For God said: "If they—the Israelites—build me a Temple in some other place and seek my mercy, I can show them as little mercy as they showed their brother Joseph." Origen ("In Genesis," xli. 6), gives another reason, probably based on Jewish tradition (compare Esther R. on iii. 4), *viz.*: Because Benjamin did not bow down before Esau as did his brothers and his father (Gen. xxxiii. 3-7), nor before Joseph (*ib.* xli. 6), his territory was reserved for the worship of God.

The descendants of Benjamin, it is true, did not always show themselves worthy of their ancestor, especially in connection with the incident at Gibeah (Judges xix.). In spite of their wrong-doing the Benjamites were at first victorious (Judges xx. 21-25); but this was due to God's anger against all Israel because they had attacked all Benjamin on account of the crime of an individual, and at the same time quietly tolerated the idolatry which Micah (Judges xvii.) was spreading among them (Pirke R. El. xxxviii.). At first the intention of the other tribes was to efface Benjamin completely, since the number of twelve tribes could be preserved through Ephraim and Manasseh; but they remembered God's promise to Jacob shortly before Benjamin's birth (Gen. xxxv. 11), that "a nation and a company of nations shall be of him"; and they decided that the existence of the tribe of Benjamin was necessary (Yer. Ta'anit iv. 69c; Lam. R., Introduction, 33). The day on which the reconciliation took place between the tribes is said to have been the fifteenth of Ab, and for this reason it was made a festive day (*ib.*; compare AB, FIFTEENTH DAY OF). On another occasion, however, the Benjamites showed themselves worthy of their pious ancestor. When, at the Red Sea, all the other tribes stood in desperation only the tribe of Benjamin trusted in God and leaped into the sea (Mekilta, Beshallah, Wayikra 5; *Soṭah* 36b).

J. SR.

L. G.—K.

—In Mohammedan Literature: In the Koran, Benjamin is not mentioned by name. The story of Joseph is told in *sura* xii., and reference is made repeatedly to a particular brother of Joseph. Thus, *e.g.*, in v. 8, the other brothers say, "Verily, Joseph and his brother are dearer to our father than we." Baidawi explains that Benjamin is so specified because he was brother to Joseph on both sides. Again, in v. 69, "And when they entered to Joseph, he took his brother to him." Baidawi explains this that he made him sit at meat with him or live with him in his dwelling. He adds, as a tradition, that Joseph made his brothers sit two by two; so Benjamin remained alone and wept and said, "If my brother Joseph had been alive he would have sat with me." Then Joseph made him sit at his table.

Thereafter he assigned houses to his brothers, two by two, but took Benjamin to his own house. And he said to Benjamin, "Would you like if I were your brother in the stead of the brother who is lost?" And Benjamin replied, "Who can find a brother like to you? but Jacob did not beget you, nor Rachel bear you."

G.

D. B. M.

—**Critical View:** The story of Benjamin in Genesis is drawn from three different sources: The Elohist, who wrote the story of Benjamin's birth (Gen. xxxv. 16–22), makes Reuben vouch for Benjamin (Gen. xlii. 37); whereas the Jahvist assigns this act to Judah (xliii.–xliv.). The latter makes Joseph give vent to his brotherly feeling at the first sight of his younger brother Benjamin, and give him five times as many presents, without, however, betraying himself (xliii. 30–34), and afterward, at the recognition scene, show his affection for him without reserve (xlv. 14); while the Elohist merely relates at the end that Benjamin was distinguished by receiving five times as many presents as the others (xlv. 22). The genealogical chapter which represents Benjamin as the father of a large family (xvi. 21) is of a far later date than the rest. (In the older sources he appears to be a young child [xlii. 4, 15; xlv. 20].) The blessing of Jacob, in which Benjamin—who, after Joseph, was the last of the sons—is described as being warlike, as was the tribe in the time of Deborah (Judges v. 14), yet without any allusion to Saul's kingdom, is best ascribed to the time of the Judges (Dillman, Commentary). The story of the war at Gibeah (Judges xix.–xxi.), which bears evidences of very late composition and has many legendary features, such as exaggeration of numbers and modes of warfare, has been rather too rashly declared to be a late invention inserted with the intention of covering up atrocities perpetrated by the tribe of Judah under King David against the kinsmen of Saul (Güdemann, "Monatschrift," 1869, p. 357; Geiger, "Jüd. Zeit." 1869, p. 284; Grätz, "Gesch. der Juden," i. 351 *et seq.*; Wellhausen, "Komposition des Hexateuchs," p. 237; Kuenen, "Historisch-Kritische Untersuchung über die Entstehung und Sammlung der Bücher des Alten Testaments," ii. 163). Recent critics think it far more probable that it rests on a historical fact (Moore, Commentary on Judges, pp. 406–408; Hogg, in Cheyne and Black, "Encyc. Bibl.,"; Nöldeke, quoted by the latter on p. 536, note 3). This indeed seems to account for the sudden change in the character of the tribe (see GIBEAN).

In the time of David the tribe of Benjamin followed the leadership of Joseph or Ephraim, considering itself closely related to the latter, and therefore jealous of Judah's rising power (II Sam. xix. 21 [20]). The blessing of Moses (Deut. xxxiii. 12), which represents Benjamin as per-

**Moses' Blessing.** factly identified with Judah's interests, is probably the product of the time of Jeroboam II. (Driver, Commentary, pp. 387 *et seq.*). Stade ("Gesch. des Volkes Israel," i. 161; *idem*, "Zeitschrift," i. 114) and Hogg ("Encyc. Bibl." *s.v.* "Benjamin") explain the name "Benjamin" as a derivative of "Yemini" (compare I Sam. ix. 1, "Ish Yemini," and I Sam. ix. 4, "Erez

Yemini"), denoting the people living to the south or right of the Ephraimite highland; the story of Benjamin's birth in Canaan being taken as reflecting in mythical form the fact of its having branched off from the tribe of Joseph after the other tribes had settled in their various territories (Judges i. 22, 23, 35). The house of Joseph, according to Moore, includes Benjamin. Stade ("Gesch. des Volkes Israel," i. 138) thinks that the account of Benjamin was lost. The report that the large number of 280,000 archers, said to be the tribe of Benjamin, belonged to King Asa (II Chron. xiv. 7; compare xvii. 17) is regarded as unhistorical. Regarding the list of Benjamite towns in Josh. xviii. 21–28, belonging to the late priestly writer (P) and the one in Neh. xi. 31–35, which belongs to the late chronicler, see PALESTINE.

K.

**BENJAMIN II., J. J.** (real name, Joseph Israel): Rumanian traveler; born at Folticheni, Moldavia, in 1818; died at London May 3, 1864. Married young, he engaged in the lumber business, but losing his modest fortune, he gave up commerce. Being of an adventurous disposition, he adopted the name of Benjamin of Tudela, the famous Jewish traveler of the twelfth century, and toward the end of 1844 set out to search for the Lost Ten Tribes. He first went to Vienna, and in January, 1845, started for Constantinople, visiting several cities on the Mediterranean. He landed at Alexandria June, 1847, and proceeded via Cairo to Palestine. He then traveled through Syria, Babylonia, Kurdistan, Persia, the Indies, Kabul, and Afghanistan, returning June, 1851, to Constantinople, and thence to Vienna.

Benjamin II.

After a short stay in the last-named city, he went to Italy, embarking there for Algeria and Morocco. On arriving in France, after having traveled for eight years, he prepared in Hebrew his impressions of travel, and had the book translated into French. After suffering many tribulations in obtaining subscriptions for his book, he issued it in 1856, under the title "Cinq Années en Orient" (1846–51). The same work, revised and enlarged, was subsequently published in German under the title "Acht Jahre in Asien und Afrika" (Hanover, 1858), with a preface by Kayserling. An English version has also been published. As the veracity of his accounts and the genuineness of his travels were attacked by some critics, he amply defended himself by producing letters and other tokens proving his journey to the various Oriental countries named. Benjamin relates only what he has seen; and, although some of his remarks show insufficient scholarship and lack of scientific method,

his truthful and simple narrative gained the approval of eminent scholars like Humboldt, Petermann, and Richter.

In 1859 Benjamin undertook another journey, this time to America, where he stayed three years. The result of his observations there he published on his return, under the title "Drei Jahre in Amerika" (Hanover, 1863). The kings of Sweden and of Hanover now conferred distinctions upon him. Encouraged by the sympathy of several scientists, who drew up a plan and a series of suggestions for his guidance, he determined to go again to Asia and Africa, and went to London in order to raise funds for this journey—a journey which was not to be undertaken. Worn out by fatigues and privations, which had caused him to grow old before his time and gave him the appearance of age, he died poor in London; and his friends and admirers had to arrange a public subscription in order to save his wife and daughter from misery.

In addition to the works mentioned above, Benjamin published "Jawan Mezula, Schilderung des Polnisch-Kosakischen Krieges und der Leiden der Juden in Poland Während der Jahre 1648–53, Bericht eines Zeitgenossen nach einer von L. Lelewel Durchgesehenen Französischen Uebersetzung, Herausgegeben von J. J. Benjamin II.," Hanover, 1863, a German edition of Rabbi Nathan Nata Hanover's work on the insurrection of the Cossacks in the seventeenth century, with a preface by Kayserling.

E. SD.

**BENJAMIN, R.:** A tanna of the second century, contemporary of R. Eleazar ben Shamma'i, with whom he carried on some halakic controversy (Ket. 84a). He is also mentioned in connection with Symmachus (Niddah 21b); and elsewhere (Sem. ix.) he reports a Halakah in the name of R. Akiba. In one halakic controversy, the participants in which leave no doubt as to his identity, his name appears as "Minyamin" (Yer. Soṭah i. 16c), "Polimo" (Palemon, Soṭah 4a; Tan., Naso. 7), and "Penimon" (Num. R. ix. 10). The last-mentioned form is also found in Yer. Ter. iii. 42b as "Abba Penimon," where the context permits of the assumption that it is meant for "R. Benjamin." (For the identity of Benjamin and Minyamin, see ABBA BAR BENJAMIN; "Polimo" and "Penimon" appear to be Hellenizations of "Benjamin.") R. Benjamin may likewise be identified with Abba Benjamin, who, in a group of homilies (Ber. 5b *et seq.*), remarks, "Were the human eye permitted to perceive them no human being would be able to live because of the evil spirits which fill the universe." He also teaches that no prayer is acceptable except that offered in the public house of worship. This he bases on I Kings viii. 28 " . . . to hearken unto the song and unto the prayer": where the song is heard there prayer will be heard (compare Tos. on 'Ab. Zarah 4b, s. v. פָּתַח).

**BENJAMIN (or MINYOMI) ASYA** ("Physician"); A Babylonian rabbinic scholar of the third and fourth amoraic generations (fourth century), contemporary of Rab Joseph and Raba, and founder of a school named after him, Debe Minyomi Asya. It is reported that the disciples of his school spoke disrespectfully of the Rabbis, saying, "Of what benefit are the rabbis to us? They have never proved it to be lawful for us to eat the raven, or to be unlawful to eat the pigeon!" (meaning to say that, in spite of their disputations and hair-splitting arguments, the Rabbis have no authority to alter or abrogate a Biblical precept [Sanh. 99b *et seq.*]). Raba obtained from Benjamin some medical information; and when on one occasion he publicly lectured on the subject before the people of Maḥuza, Benjamin's sons or disciples, who seem to have formed a medical guild, resented this publication of their professional secrets (Shab. 133b; 'Ab. Zarah 28b). Benjamin Asya is probably identical with Minyomi b. Nihumi, the contemporary of Amemar I. (Ket. 69a), to whom Abaye appealed from a decision of Rab Joseph (*ib.* 81b). Brüll identifies Benjamin Asya with Bar Nathan Asya, who once manifested his disregard for rabbinic enactments by traveling on the second day of the Feast of Weeks from Beram (some read "Be Rab" = school) to Pumbedita, on which account Rab Joseph excommunicated him (Pes. 52a; see Dikduke Soferim, *ad loc.*). Brüll discovers in this school the origin of Karaism ("Jahrb." i. 225).

**BENJAMIN, SIR BENJAMIN:** Mayor of Melbourne; born at London in 1836. At the age of nine he accompanied his parents to Victoria. Associating himself at first with the firm of Benjamin & Co., merchants, he subsequently entered into partnership with the late Hon. Edward Cohen. In 1870 he was elected member of the City Council; and in 1881 became an alderman of the ward he had hitherto represented. Notwithstanding heavy municipal labors, Sir Benjamin always took a lively interest

in communal affairs. He identified himself largely with the growth of the Melbourne Hebrew Congregation and its various educational and charitable institutions, on the boards of which he was a most active worker. He is a trustee of the Jewish Philanthropic Society and the Ladies' Hebrew Benevolent Society; a representative of the Melbourne Province in the Legislative Council; and a justice of the peace, both for Victoria and New South Wales. He was elected mayor of Melbourne in October, 1887; and so admirably did he perform the duties of his office that he was unanimously re-elected. In May, 1889, the honor of knighthood was conferred on him in recognition of his distinguished municipal services.

J.

G. L.

**BENJAMIN OF CANTERBURY** or **CAMBRIDGE**: English rabbi; disciple of Rabbi Tam; died at the beginning of the thirteenth century. He is mentioned in the list of medieval rabbis drawn up by Solomon Luria (see Grätz, "Gesch. der Juden," vi. 365). Only one halakic decision of his is known: it forbids the purchase of milk from a Gentile unless a Jew be present when it is drawn (Mordecai, 'Abodah Zarah, ii. 826). But a certain number of notes by a Rabbi Benjamin on Joseph Kimhi's "Sefer ha Galuy" have been attributed by Matthews, the editor of Kimhi's book, to Benjamin of Canterbury ("Jewish Quarterly Review," ii. 327). Benjamin seems to have been a member of the English school of Masorites and grammarians, including Moses ben Isaac, Moses ben Yom-Tob, Berechiah ha-Nakdan, and Samuel ha-Nakdan, the last of whom he quotes. It is possible that he came from Cambridge rather than from Canterbury, the transliteration of the former (קנטברניא) being sufficiently near to that of the latter (קנטבוריא). For while there is no Benjamin mentioned as living at Canterbury in the twelfth century, there is a rather distinguished "Magister Benjamin" of Cambridge mentioned in the Pipe Rolls of the fifth year of John (1204). Berechiah ha-Nakdan, in his commentary on Job, refers to "my Uncle Benjamin," who was probably the same individual.

**BENJAMIN, DAVID**: Communal worker; born in London in 1815; died there June 25, 1893. In 1835 he emigrated to Australia; and, while in Tasmania, assisted in founding a synagogue. Soon afterward he settled in Melbourne, joining his brother Solomon, who is justly regarded as the founder of the Melbourne Jewish community. The firm of Benjamin Bros. was among the early pioneers of the British settlement in the colony of Victoria. The firm prospered greatly, buying crude gold direct from the aborigines, and making large purchases on which the banks were reluctant to venture. Benjamin had also a large interest in the Bank of New South Wales. He endeavored to maintain the Jewish spirit of observance in the colony, and personally attended the Jewish sick in Melbourne. In 1854 he returned to England, where he devoted him-

self entirely to the community, becoming connected with the Jewish Board of Guardians, the Bayswater Synagogue, and the Jews' Hospital and Orphan Asylum. Benjamin was treasurer of the Bayswater Synagogue from 1865 to 1871, and warden from 1871 to 1875. He was a life member of the council of the United Synagogue from its foundation, and was one of the seven elders of the United Synagogue. He was a prominent worker on behalf of the Jewish Board of Guardians, labored untiringly in its cause, and was very munificent in his donations to charity.

**BENJAMIN B. DAVID CASES**. See CASES, BENJAMIN B. DAVID.

**BENJAMIN B. ELIJAH BEER**. See BEER, BENJAMIN B. ELIJAH.

**BENJAMIN B. GIDDEL** (or **GIDDUL**), R.: A Palestinian amora of the fourth generation (fourth century), contemporary of R. Aha III. (Yer. Ma'as. Sh. v. 56b; Yer. Yeb. i. 2b). His name is but rarely met with in the Talmud, and then only in the Halakah (Yer. Ma'as. i. 49a; Hul. 125a). It is probable that he was the son of Giddel b. Benjamin (Min-yomi) and therefore of Babylonian descent.

J. SR.

S. M.

**BENJAMIN GINZAKAYAH** (of Ginzak = Gazaka in Media Atropatene): A Babylonian scholar of the third century, contemporary of Mar Samuel. All that is known of him is that death overtook him when he was on the point of deciding a ritual question in accordance with the views of Rab, as opposed to those of Samuel. Hearing of this circumstance, Samuel thanked God, who had prevented the promulgation of an erroneous decision; and to the prime mover thereof, his friend Rab, he applied the Scriptural saying (Prov. xii. 21), "There shall no mischief happen to the just" (Yer. Ber. ii. 5b). In Babli (Niddah 65a) the name appears as "Minyamin Sakasnaah" (of Sacassana, a province of Armenia).

**BENJAMIN, HILLEL**: Polish architect of the second half of the eighteenth century; born at Lasko. He was the builder of the synagogue at Lutomerz, which was constructed during the reign of the last king of Poland, Stanislaus August I. Benjamin seems to have studied in Germany. He enjoyed in his fatherland a certain reputation; for in the documents he is always called "architect." After finishing the synagogue at Lutomerz, he was commissioned to construct one at Zloczow, which, however, he did not finish. In examining the roof he fell to the ground and died. He is buried in the cemetery of Zloczow.

S.

**BENJAMIN** (or **MINYAMIN**) **B. IHI**: A Babylonian scholar of the second and third amoraic generations (third century); brother of Abbahu b. Ihi, the disciple of Samuel. Both brothers, while intensely exclusive and diffident, so that they would have no dealings with Gentiles (Meg. 28a), were

very considerate toward their servants. One of the brothers arranged that they should receive one dish from their master's table; the other would have them partake of every dish. Legend states that the latter brother was therefore deemed worthy of receiving visits from the prophet Elijah (Ket. 61a).

S. M.

**BENJAMIN B. ISAAC OF CARCASSONNE:** This scholar is known only by his translation from Latin into Hebrew, under the title of "Ezer Eloah" (Divine Help), of the work of Jean de Bourgogne, of the province of Liège, on the corruption of the air by the plague. This work, which contains in the appendix many empiric remedies against divers ills, is preserved in manuscript in the Bibliothèque Nationale of Paris (No. 1191, fol. 141b-194a); only one other manuscript copy being known to exist, and that is in the library of Baron D. de Günzburg. Of the original, which was perhaps written in French, hardly any traces are left; that is, of the treatise described as "On the Epidemic, in Prose," No. 852 of the Library of the Louvre, or the private library of Charles V., king of France. This is undoubtedly the little book, says Leopold Delisle (MSS. de la Bibliothèque Nationale, 1891, iii. 153, note 1), of which there is a copy at the end of MS. Français 12,323, under the title, "The Treatise Which the Masters of Medicine and the Astronomers of Paris Wrote of the Plague Which Physics Calls the Epidemic, in the Year of Our Lord, N. S. MCCCXLVIII," or perhaps the little book written in 1365 by Master Jean de Bourgogne, surnamed "With the Beard," professor of medicine, and citizen of Liège (Delisle, "Observations sur Plusieurs MSS. de la Collection Barrois," p. 55).

The date of the Hebrew work may therefore be fixed, at least approximately. The second book of Jean was written in 1365, and was translated by Benjamin a few years later, about 1370. Now, the author had said in the preface, as far as one can judge from the Hebrew version, that already in the "year 22," when the plague broke out for the first time, he had written a similar treatise beginning with the words אלהי אלהי ("My God, my God") (Steinschneider, "Hebr. Uebers." p. 804). With what does the number 22 correspond? Steinschneider acutely remarks ("Hebr. Uebers." *l.c.*): "The date 22 [ק"פ] could only mean 122 [= 1362]"; but that does not tally with the first outbreak of the Black Death, in 1348. Doubtless a Jewish era was substituted in the translation, probably through a copyist's mistake. Could Jean have meant that he wrote this book twenty-two years before? Then this treatise was written in 1370, as stated by Amplon ("Autre Fonds de la Bibliothèque Bodléienne," No. 1923). This tallies with the note cited by M. Delisle. The doubt as to the date detracts in no wise from the interest of this medical treatise, which was saved from oblivion by the version of Benjamin of Carcassonne.

**BENJAMIN B. JAPHET:** A Palestinian scholar of the third amoraic generation (third century), disciple of R. Johanan and senior to R. Ze'ira

I. (Ber. 33a, 38b; Ket. 77a). He cultivated both the Halakah and the Haggadah; in his halakic deliverances, however, he was not considered very reliable. Thus when, on one occasion, Hiyya b. Abba and he differed on a traditional decision by their master, R. Ze'ira remarked, "What does R. Benjamin b. Japhet amount to compared with R. Hiyya b. Abba?" (Ber. 38b; Yer. Ber. vi. 10a; Yer. Pes. ii. 29c). Nevertheless, this same R. Ze'ira had occasion to thank Benjamin for communicating to him a Halakah in the name of R. Johanan (Shab. 53a). In the Haggadah, Benjamin was a follower of R. Eleazar b. Pedai, whose expositions and sayings he frequently reports (Meg. 16b; Sanh. 7a; compare Ex. R. xli.; Lev. R. x.).—[Yer. Ber. iii. 6d; Yoma 29a; Yer. Sanh. i. 18a; Shebu. 18b; Hul. 52b (correctly quoted in MS. M); Pesik. vii. 63b, viii. 68b; Pesik. R. xvii.; Midr. Teh. xvii.; Gen. R. xliii.; Tan. ed. Buber, Lek Leka, 11.]

**BIBLIOGRAPHY:** Frankel, *Mebo*, p. 63a; Heilprin, *Seder ha-Dorot*, ed. Wilna, ii. 85; Lamez, *Jerusalem*, i. 101, in which Benjamin's grave is said to be at Safed.

**BENJAMIN B. JUDAH LOEB COHEN.** See BENASCH, BENJAMIN.

**BENJAMIN, JUDAH PHILIP:** American statesman and lawyer; born at St. Croix, West Indies, in 1811; died in Paris, May 6, 1884. His parents were English Jews who, some years before his birth, had removed from London to St. Croix, then a British island, in the hope of improving their fortune in the New World. A few years after his birth, his family removed from St. Croix to reside in Wilmington, N. C., and young Benjamin soon afterward was sent to school at Fayetteville. Subsequently he spent three years at Yale College. His parents several times changed their residence, until they finally settled in New Orleans, La. There Benjamin served as a notary's clerk for some time, taught school, studied law, and on Dec. 16, 1832, was admitted to the Louisiana bar.

Louisiana had been acquired by the United States from France but a short time previously, and its language and legal system were still largely those

of France. The broadening influences of the necessary mastery of different systems of law and literature left their mark upon Benjamin, and can be traced in the breadth of grasp, philosophical reasoning, and wide reading to which he subsequently attained. Nor should notice be omitted of certain other formative influences, which the London "Times" (May 9, 1884) commented upon in a sympathetically worded obituary: his inheritance of "that elastic resistance to evil fortune which preserved Mr. Benjamin's ancestors through a succession of exiles and plunderings, and reappeared in the Minister of the Confederate cause, together with the same refined apprehension of logical problems which informed the subtleties of the Talmud."

Benjamin's success at the Louisiana bar was remarkably rapid. At first he had found time to prepare, for his own use, a "Digest of the Reported Decisions of the Supreme Court of the Late Territory of Orleans and of the Supreme Court of Louisiana," which was the earliest digest of Louisiana law. Together with his friend Thomas Slidell, he edited and prepared this for publication in 1834. Soon, however, his law practise became more engrossing; and, as one of the recognized leaders of the Louisiana bar, he rapidly acquired a competence which enabled him to withdraw from the legal arena, purchase a sugar-plantation near New Orleans, and devote himself to sugar-planting and scientific expositions of the best methods of extracting succharine matter from the cane.

Politics also actively interested Benjamin, and from time to time he was elected to various local offices. Thus, he was one of the most

**Sugar-Planter and Politician.** active and influential members of the Louisiana Constitutional Convention of 1844-45, and of that of 1852. In 1849 he was a successful presidential elector at large for the state of Louisiana, and as such cast his ballot for General Taylor as president of the United States. Originally a Whig, Benjamin became, during the change of party ties, a distinguished Democratic leader. Meanwhile, however, the destruction of his property by inundations had driven him back to the active practise of law, where success once more awaited him.

That the number of Benjamin's famous legal cases was very large is evidenced by an examination of the law reports of the period. Particularly notable was his conduct of the cases which grew out of the attempt to recover insurance for a cargo of slaves lost by reason of an insurrection on board the "Creole," and his connection with enormously valuable California land-title cases, in one of which his fee is said to have been \$25,000, a very large sum for that day. During the October (1848) term of the Supreme Court of the United States he was admitted to practise before that body, and soon became one of the leaders of the federal bar. Benjamin's legal talents were so generally recognized that President Pierce tendered him the position of associate justice of the United States Supreme Court; but he preferred his activities at the bar and in politics. Previously, when President Taylor's cabinet was being

formed, Benjamin's name had been under consideration for a cabinet portfolio. In 1852 he was elected to the United States Senate from Louisiana, and was reelected at the expiration of his term, six years later.

In 1856 Benjamin was one of a small **United States Senator.** group of senators that succeeded in securing the nomination of Buchanan for president, as against Douglas, and he enjoyed great influence with the Buchanan administration until immediately before the outbreak of the Civil war.

In the Senate he was soon recognized as one of the ablest debaters; and Charles Sumner considered him

*C. S. Benjamin*

the most brilliant orator in the United States. His readiness in debate was remarkable; and he generally spoke on the spur of the moment without preparation. An examination of the "Congressional Globe" of the time shows that almost invariably friends and foes alike were so much impressed by his oratory as to feel obliged to pay tribute to him on the spot. Of his farewell address, upon leaving the Senate when his state, Louisiana, seceded from the Union, Sir George Cornwall Lewis said to Lord Sherbrooke: "Have you read Benjamin's speech? It is better than our Benjamin [meaning Disraeli] could have done."

Benjamin was frequently called upon to deliver addresses and orations on national holidays and other non-political occasions; and competent judges declare that he was even happier at these times than in his political addresses and arguments. His right to be regarded as one of the greatest of the world's orators is no longer open to dispute. It was recently forcibly evidenced by his inclusion, with appropriate examples of his style and comment, in the comprehensive and judiciously edited series of "The World's Best Orators" (x 97-110) as well as in "The World's Best Orations" (i. 398), the former edited by Prof. Guy Carleton Lee, and the latter by Justice David J. Brewer. Henry L. Dawes, surely no in-

different judge, has well classed Benjamin with Sumner and Beecher, Wendell Phillips, Yancey, and Breckinridge, as having "stirred multitudes, aroused passions, and fired the public heart in terms not less eloquent than the loftiest productions of Fox or Pitt, of Patrick Henry or John Adams."

In the Senate Benjamin's constitutional and legal arguments ever attracted particular attention, and made him the leader *par excellence* in the defense of slavery and, later on, of secession. He never actively identified himself with Jewish communal affairs; but his views and actions led to much unjustified identification of American Jews generally with the pro-slavery cause (see ANTI-SLAVERY MOVEMENT IN AMERICA). Thus, one of his most powerful

**Pro-Slavery Advocate.**

pro-slavery outbursts provoked Senator Wade's satirical reference in the Senate to "Israelites with Egyptian principles"; and even more pronounced attacks in the Senate and in the Northern press generally, on the Jews as favoring slavery, followed, when Benjamin became so prominently identified with the cause of the Confederacy.

The late Isaac M. Wise, in his "Reminiscences," gives an account of an interesting discussion between Benjamin, Daniel Webster, Maury the scientist, and himself, relative to their religious faiths, in the course of which Benjamin declined to permit his Jewish religious views to be described as Unitarian, as Webster had claimed the faiths of all four were in their essence. In 1854 he presented to the Senate, on behalf of American Jewish citizens, a petition calling for governmental action against Swiss anti-Semitic discriminations recognized in a treaty with our government; thus acting as spokesman for the American Jews.

Upon the organization of the Confederate government, President Jefferson Davis immediately called Benjamin into his cabinet as attorney-general (Feb. 25, 1861), to which position was added that of acting secretary of war (Sept. 17, 1861). On Nov. 21, 1861, he became secretary of war, resigning the portfolio of the Department of Justice; and he retained this position till March 17, 1862, when he became secretary of state, which office he retained till the collapse of the Confederacy in 1865.

Throughout, Benjamin was Jefferson Davis' most intimate and most influential adviser, and was generally described as the "brains of the Confederacy."

James Schouler, in his "History of the United States" (vi. 89), remarks:

"Contemporaries had said at the outset that Toombs was the brain of the Confederacy; but that title, as events developed, belonged rather to Attorney-General Benjamin, the ablest, most versatile, and most constant of all Davis' civil counselors, who acted as secretary of war after Walker's retirement in September, and was then by the following March installed secretary of state, to remain premier until the bitter end, sanguine and serene in bearing, through all mutations of fortune and misfortune."

During much of this time, particularly during his incumbency of the secretaryship of war, Benjamin was extremely unpopular; but President Davis never for a moment lost confidence in him. He resigned the war portfolio on account of the Confederate reverses

in connection with the Roanoke Island campaign in 1862, for which he was commonly held in a large degree responsible; but, in spite of censure from the Confederate Congress, President Davis promoted him to the secretaryship of state.

This circumstance has recently been cleared up, through evidence that Benjamin was in no way to blame for these mishaps, but patriotically sacrificed himself, with President Davis' knowledge, by intentionally withholding his justification from the Congressional committee. Disclosure of the true facts would have involved an exposure of Confederate dearth of ammunition, which might, through general publication, have seriously jeopardized the Confederate cause at the time.

Benjamin's most important labors were, however, rendered in connection with the diplomatic activities of the Confederacy. Unfortunately, a thorough study of the diplomacy of the Confederacy has not yet been published, nor any adequate biography of Benjamin, of which that would be the principal chapter. But by such a publication it would be shown how near the Confederacy came to securing European intervention—particularly through the aid of Napoleon III.—by the tempting and statesmanlike efforts of the Confederate state department under Benjamin's direction, and to the probable transformation of an insurrection into a successful revolution in consequence. Even published data, however, not to mention oral reminiscences, justify the conclusion of the late I. M. Wise, who in an editorial in the "American Israelite," May 16, 1884, said that "he was undoubtedly the most distinguished statesman of the Jewish family in this (19th) century and country."

At the close of the Civil war Benjamin fled to the West Indies and then to England, losing his American property by confiscation. Here, at the age of fifty-five, he had to commence bread-winning anew. Early in 1866 as a British subject he entered as a

**Begins Life Anew in England.** law student at Lincoln's Inn, and in June of that year was called to the English bar, the usual term being curtailed by reason of his past eminence and acumen, through the influence of distinguished English judges. In 1868 his work on "The Law of Sale of Personal Property" appeared, and immediately had a marked success on both sides of the Atlantic. It has gone through edition after edition, and may well be described as the most successful and classical legal text-book of the latter half of the nineteenth century. His success at the English bar, after a brief interval during which he had been compelled to take up editorial work on the London "Daily Telegraph," was remarkable, particularly in connection with colonial appeals. His income for a number of years prior to his retirement from the bar (December, 1882) is said to have been upward of \$200,000 per annum. In 1872 he attained the rank of Queen's Counsel.

A farewell dinner was given in Benjamin's honor by the bench and bar of England in the hall of the Inner Temple, London, on June 30, 1883, under the presidency of the attorney-general, Sir Henry James. His standing as the unquestioned leader of the British bar had been generally recognized for

some years prior to his retirement. He died at Paris May 6, 1884, his wife and a daughter—Ninette, wife of Capt. Henri de Bousignac of the 117th regiment of the French line—of British Bar. Benjamin married in New Orleans, at a time when there was no organized Jewish congregation there, a Catholic lady of the name of Natalie St. Martin. Investigation has failed to confirm the rumor that he abandoned the Jewish faith on his death-bed.

A. M. J. K.

**BENJAMIN B. JUDAH OF ROME.** See BOZECCII.

**BENJAMIN B. LEVI, R.:** A Palestinian amora of the fourth century (third or fourth generation), junior contemporary of R. Ammi and R. Isaac (Yer. Peah i. 15a), and senior to Abin H. (Yer. Pes. vii. 34c; Yer. Hor. i. 46a). His name is connected with several Halakot (Yer. Ter. i. 40b; Yer. Pes. ii. 28d; Yer. 'Ab. Zarah ii. 42a, where his patronymic reads "Levai"), but more frequently with homiletic remarks. On God's message by Jeremiah (xxiii. 24), "Can one hide himself in secret places that I shall not see him ["'er'ennu"]?" he observes, "When one sitteth in a corner and occupieth himself with the study of the Law, I show him ["'ar'ennu"] to the public, or when he hides himself for sinful purposes of apostasy, I expose him to public gaze" (Ex. R. viii.; Tan., Wa'era, 9; compare Num. R. ix. 9). According to him, when the time for Israel's restoration shall come, there will be a change in the order of nature; at present when the north wind blows no south wind prevails, and when the south wind prevails there is no north wind; but when God shall restore the exiled, He shall produce an "argestes" (see Jastrow, "Dict." p. 115b), when both winds do service, as it is written (Isa. xliii. 6), "I will say to the north, Give up, and to the south, Keep not back; bring my sons from far," etc. (Esther R. to i. 8; Cant. R. to iv. 16; Lev. R. ix.; Num. R. xiii.) — [Gen. R. lxxxvii.; Midr. Teh. lxxxvii. 2; Pesik. xiii. 112a, xviii. 137a; Pesik. R. xviii.; Lev. R. xxviii.; compare Eccl. R. to i. 3.]

**BIBLIOGRAPHY:** Frankel, *Mebo*, 69b; Bacher, *Ag. Pal. Annot.*, iii. 661 *et seq.*  
J. SR. S. M.

**BENJAMIN B. MATTITHIAH:** Author of a large collection of responsa; flourished in Turkey in the first half of the sixteenth century. His occupation was that of a merchant ("Benjamin Ze'eb," p. 14b), but he also served as a member of the rabbinical college of Arta (vilayet Yanina). In rabbin-

ical literature he is known chiefly through his disputes with many of his contemporaries, which were caused by the great independence he very often displayed in his decisions on legal questions, an independence that greatly offended the rabbinical authorities.

His collection of responsa, "Benjamin Ze'eb" (Venice, 1539), which he published partly in self-justification, was not at all well received by the Italian and Polish rabbis of the time (compare Solomon b. Jehiel Luria, in "Yam Shel Shelomoh," 3b on B. K. viii., No. 72). The work, containing 450 responsa on the most diverse subjects, throws an interesting light on the intellectual as well as the social status of the Jews of that time in European Turkey and in Asia Minor. For instance, Benjamin's ordinance against men and women dancing together met with great resistance, many young people refusing to obey this puritanical precept ("Benjamin Ze'eb," pp. 228b *et seq.*). It should be noted that "Benjamin Ze'eb" is the title of the book, and not the appellation of the author, whose only name was Benjamin.

**BIBLIOGRAPHY:** Azulai, *Shem ha-Gedolim*, i. 36; Conforte, *Kore ha-Dorot*, ed. Cassel, pp. 34b, 40c; Michael, *Or ha-Hayyim*, No. 601; Brüll, in his *Jahrbücher*, i. 89.

L. G.

**BENJAMIN BEN MEÏR:** Polish Talmudist and preacher; lived at Brody, Galicia, in the first half of the nineteenth century. He wrote "Inre Binyamin" (The Words of Benjamin), a homiletic commentary upon the first three books of the Pentateuch (Tarnopol, 1814).

I. BER.

**BENJAMIN B. MEÏR HA-LEVI OF NUREMBERG:** Rabbi at Salonica at the beginning of the sixteenth century. Although German by birth, being a descendant of Jacob MOLIN, he was greatly esteemed by the Spanish-Portuguese Jews of Salonica, and was sent by the entire Jewish population of that city on a diplomatic mission to Constantinople. The contemporary responsa collections contain some of Benjamin's decisions. He also wrote lexical explanations on the Maḥzor of the German rite, which were printed in the Salonica editions of 1526 and 1555-56. The last-named edition also contains some of Benjamin's elegies, among them one upon the occasion of the great fire at Salonica in 1553.

**BIBLIOGRAPHY:** S. D. Luzzatto, in G. I. Polak's Dutch translation of the *Maḥzor*, 1850, p. 4; Michael, *Or ha-Hayyim*, No. 594; Steinschneider, *Cat. Bodl.*, cols. 370, 791.

L. G.

**BENJAMIN, MICHAEL HENRY:** South African politician; born in London in 1822; died June 11, 1879.

Early in life Benjamin went to Cape Colony (about the year 1849), and for ten years resided at Graaff-Reinet, where he was the promoter of several useful institutions. Thence he removed to Port Elizabeth, which town he represented in the Cape Legislative Assembly from the year 1864; and he was also a justice of the peace for the colony. He worked hard to secure the passing of the Eastern District Courts' Bill, and his extensive acquaintance with commercial

matters made his opinions carry considerable authority in the House. Benjamin successfully introduced the Stamp Act into the Legislative Assembly, and was one of the founders of the Standard Bank of British South Africa. Returning to England about 1869, he actively interested himself in a number of communal institutions, becoming a member of the committee of the United Synagogue, the Anglo-Jewish Association, and the Board of Deputies; and sitting on the committees of various London synagogues and public schools.

**J.** G. L.  
**BENJAMIN, MOSES:** Beni-Israel military officer; born in 1830; died at Bombay in December, 1897. The son of a subedar (captain), he joined the Twelfth Bombay Native Infantry as a private. While a non-commissioned officer he was entrusted with the responsible duty of watching over the wives and children of European officers of the regiment left at Deesa during the Mutiny of 1857. He was present at the siege and capture of Kotah, the action of Burnass, and the battle of Meance (1843). Rising by dint of industry, he was gazetted as a commissioned officer (jemidar) in 1861. In 1865 he was made a subedar, in which capacity he superintended the work of the regimental lines, then in course of erection at Dharwar. In February, 1878, he was promoted subedar-major; in November, 1878, he became bahadur. He was a very intelligent officer, remarkably versed in military minutiae. As a reward for his services the governor of India appointed him sirdar-bahadur (June, 1881), and invested him with the Order of British India of the first class. After having served for over thirty-two years, he retired on a pension, and went to Bombay; and the Beni-Israel Old Synagogue Congregation in that city, in appreciation of his capacities, appointed him their chief warden and treasurer. In February, 1892, the governor of Bombay appointed him a justice of the peace.

**BIBLIOGRAPHY:** *Jewish Chronicle*, Dec. 10, 1897.

**J.** G. L.  
**BENJAMIN BEN MOSES:** Italian scholar; lived at Rome at the beginning of the fifteenth century. He took an active part in the administration of the Jewish community of Rome, and was one of the delegates to the assembly of the Italian Jewish communities held at Forlì in 1426. Benjamin is the author of a polemical work entitled "Teshubot ha-Nozrim Mikol ha-Mikra umme-Re'iyot ha-Da'at" (Refutations of Christianity on Biblical and Logical Grounds). The work is still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 2,408, 3; Codex Halberstamm, 32).

**BIBLIOGRAPHY:** Neubauer, as above; Vogelstein and Rieger, *Gesch. der Juden in Rom*, i. 452.

**G.** I. Br.  
**BENJAMIN BEN MOSES NAHAWENDI:** Karaite scholar and philosopher; flourished at Nahawend, Persia, at the end of the eighth century and the beginning of the ninth. According to the Karaite historian Solomon ben Jeroham—the contemporary of Saadia Gaon—Karaism began properly with Benjamin, who surpassed even Anan in learning

(Solomon ben Jeroham's commentary on Psalm lxi. 1). But this assertion can not be verified. Benjamin's work is, for the most part, known only in quotations made by subsequent Karaite writers. But his personality must have been very important, since he was considered by all the Karaites to be as great an authority as the founder of Karaism, Anan himself.

As stated by Japhet ben Ali in the introduction to his commentary on the minor prophets, Benjamin wrote the following works, mostly in Arabic: (1) a commentary on the Pentateuch, in which he frequently refers to Oriental customs; (2) a commentary

**His Works.** on Isaiah; (3) a commentary on Daniel, in which the word "yamim" (days)—in the verse "Blessed is he that waiteth, and cometh to the thousand three hundred and five and thirty days" (xii. 12)—is explained by "years," pointing thus to the year 1010 as the epoch of the arrival of the Messiah; (4) a commentary on Ecclesiastes and Song of Songs, or, as Pinsker thinks, on all the Five Rolls; (5) "Sefer Mizvoth" (Book of Precepts); (6) "Sefer Dinim," or "Mas'at Binyamin" (Book of Laws, or Gift of Benjamin), written in Hebrew, and published at Koslov (Eupatoria) in 1834—containing civil and criminal laws according to Holy Writ.

In the last-named work Benjamin approached in many points the Rabbinites. He adopted many rabbinical ordinances, which, however, he left to the free choice of the Karaites to reject or adopt. In order to enforce obedience to the laws, Benjamin introduced a special form of interdiction, differing but slightly from the excommunication of the Rabbinites. When an accused person refused to obey the summons served on him he was to be cursed on each of seven successive days, after which excommunication was to be pronounced on him. The interdiction consisted in the prohibition of intercourse with all the members of the community, who were also forbidden to greet him, or to accept anything from him ("Mas'at Binyamin," 2a).

Benjamin at times approached the Rabbinites in Biblical exegesis also, and combated Anan's interpretations. Thus he maintained with the Rabbinites, against Anan, that the obligation to marry the widow of a childless brother extended only to the brother of the deceased and not to his further relations. He adopted the Talmudical interpretation of the Biblical words concerning the Sabbath—"Abide ye every man in his place" (Ex. xvi. 29)—maintaining that the prohibition herein expressed has reference, not to the residence, but to a distance beyond 2,000 yards of the town (compare Elijah Bashyazi, "Adderet," p. 63).

However, in spite of many concessions to Rabbinitism, Benjamin adhered firmly to the principle, expressed by Anan, of penetrating Freedom in research of the Scripture. In Benjamin's opinion one ought not to tie oneself down to the authorities, but to follow one's own convictions: the son may differ from the father, the disciple from the master, pro-

vided they have reasons for their different views. Inquiry is a duty, and errors occasioned by inquiry do not constitute a sin (compare Japhet's commentary, cited in Dukes's "Beiträge," ii. 26).

Benjamin seems to have written a work in which he expounded the philosophical ideas contained in the Bible. Judging from the quotations made by later Karaitic writers, such as Jacob al-Kirkisani, Japhet ben Ali, and Iladassi, Benjamin betrayed the influence of Philonic ideas, while he adopted the Motazilite theories on the divine attributes, free-will, and other questions of a like character

**Philosophy of the Bible.** expounded before by Anan. God, he holds, is too sublime to mingle with the material world; and the idea that matter proceeded directly from God is inadmissible. God created first the Glory ("Kabod"), then the Throne ("Kisse"), and afterward an Angel. This Angel created the world, in which he is the representative of God. God Himself never came in contact with men, nor did He speak to Israel on Mt. Sinai. The Law and the communications to the Prophets proceeded from the Angel, to whom are referable all the anthropological expressions concerning God found in the Bible (Hadassi, "Eshkol," 25b). The soul forms a part of the body, and is therefore perishable. The Biblical references to reward and punishment can be applied only to the body (Saadia, "Emunot we ha-De'ot," vi. 4).

This theory of an intermediary power, and the system of allegorizing all the Biblical passages concerning God, upon which Benjamin insists again and again in his commentaries on the Bible, were borrowed from the writings of the sect Magâriyah (Men of the Caves). This sect, the establishment of which, in consequence of a confusion in the text of Shahrastani, has been wrongfully attributed to Benjamin, is identified with the Essenes by Harkavy, who shows that they were called "The Men of the Caves," because they lived in the desert ("Le-Ḳorat ha-Kittot," in the Hebrew translation of Grätz, iii. 497). Benjamin wrote his halakic works in Hebrew, his commentaries probably in Arabic.

**BENJAMIN NABON, JERUSALEM.** See NABON, BENJAMIN.

**BENJAMIN 'OZER B. MEÏR:** Polish Talmudist; died at Zolkiev May 25, 1810. He was rabbi in Clementow, and afterward head of the yeshibah at Zolkiev. He wrote "Eben Ozer" (Stone of Salvation), published by his grandson, Aaron b. Loeb of Pintschew (Zolkiev, 1792). It contains novellæ to a large portion of the Talmud and of Alfasi, as also to Maimonides' "Yad" and Asher b. Jehiel's commentary. He also wrote novelle on the Shulhan 'Aruk, Orah Hayyim, which, under the title of "Eben Ozer," are appended to the Amsterdam edition of the Shulhan 'Aruk. The later Russian

editions (Dubnow, 1820; Wilna, 1884, and others) also give these novellæ.

**BIBLIOGRAPHY:** Buber, in *Ha-Eshkol*, ii. 178.

**BENJAMIN SALONICA.** See SOLNIK, BENJAMIN B. AARON ABRAHAM.

**BENJAMIN, SAMUEL:** French soldier in the Carlist expedition against Madrid in 1837; distinguished for bravery and remarkable devotion to Boulan de Brie, a lieutenant in the regiment in which he served. When De Brie was mortally wounded Benjamin carried him first from the field of battle, and afterward from the hospital where he had been left at the mercy of the enemy after the Carlists' hurried departure from Huesca. De Brie died in Benjamin's arms; and the faithful servant, gratefully remembering the kindness with which he had been treated by the lieutenant's wealthy mother, was disconsolate, and exposed himself recklessly in the most dangerous engagements, performing remarkable acts of valor. Benjamin was a scrupulously religious Jew, and observed all the laws of his religion as far as was possible under the circumstances of the campaign.

P. WI.

**BENJAMIN B. SAMUEL OF COUTANCES:** Talmudist and French liturgical poet of the first half of the eleventh century. The name of the place of his residence, Coutances (department of the Manche, Normandy), was formerly Coustances, in Hebrew קוֹטְסַנְי; and Grätz ("Gesch. der Juden," 3d ed., vi. 53) incorrectly transfers this Benjamin to Constance on the Lake of Constance. The old scholars conferred on Benjamin the honorable title "payyetan"; for he was one of the most prolific and most gifted of the payyetanim. In the various ritual collections thirty-one of his liturgical pieces are preserved.

The fact that most of his poems occur in the French ritual, while the old German and Polish rituals contain each but one of his poems, suffices to show that Grätz's conjecture is wrong. Benjamin wrote in the main for the three festivals and New-Year's Day, and some few poems for the Day of Atonement. It is doubtful whether certain liturgies containing "Benjamin" in acrostic are to be attributed to him or to his younger contemporary, Benjamin b. Zerah.

Benjamin was considered, also, a great Talmudic authority; and one of his decisions, cited by Isaac ha-Levi, Rashi's teacher, is of some importance. In this he shows the connection between Midrash and piyyut, explaining that both originated in public readings, and drawing the conclusion that the opposition to the insertion of piyyuṭim in the prayers is unfounded. Benjamin's preference for Akiba's "Alphabet," which he uses in his liturgical poems, reveals a certain inclination toward mysticism.

L. G.

**BENJAMIN THE SHEPHERD:** A shepherd who lived in Babylonia at the beginning of the third century. The Talmud has transmitted the formula of a blessing of which he was the author. Benjamin, who possessed no knowledge of Hebrew, and was therefore unable to recite the prescribed grace after meals ("birkat ha-mazon"), substituted the following brief ejaculation in Aramaic: "Blessed be the All-Merciful, the owner of this bread" (Ber. 40b). This prayer is still taught little children who are unable to recite the "birkat ha-mazon." Compare "Ba'er Heteb" to Shulhan 'Aruk, Oraḥ Ḥayyim, 187, 1; Bacher, in Brody's "Zeit. für Hebr. Bibl.," v. 154. In Yer. Ber. vi. 10b, bottom, the same story is related of "some Persian"; in both places Rab is cited as approving the plain man's prayer.

**BENJAMIN OF TIBERIAS:** A rich Jew who, when the emperor Heraclius in 628 went to Jerusalem during the Persian war, was accused of hostility toward the Christians. This accusation probably implied that he sided with the Persians. Notwithstanding this charge, however, the emperor became the guest of Benjamin, who provided both for him and for his army. Reproached by Heraclius for his hostility toward the Christians, Benjamin frankly declared: "The Christians, also, are enemies of my religion." When the emperor punished the Jews after his victory, he spared Benjamin on condition that the latter would consent to baptism, and perhaps with the further understanding that he would emigrate to Egypt.

S. KR.

**BENJAMIN OF TUDELA:** A celebrated traveler of the twelfth century. Beyond his journey, no facts of his life are known. In the preface to his itinerary, entitled "Massa'ot shel Rabbi Binyamin" (Travels of Rabbi Benjamin), the information is furnished that he came from Tudela in Navarre, and that his father's name was Jonah. This descriptive work, written in an easy, fluent Hebrew, is compiled, as the preface states, from notes made by the traveler on the spot and brought back by him in 1173 to Castile. The unknown author of the preface probably compiled the account for Benjamin from these notes, retaining the traveler's own words in the first person, but omitting much. Benjamin, for instance, claims to have noted down everything that he saw and all that he heard from the mouths of men of established reputation in Spain. His notes, therefore, may have contained at the same time the names of his informants; but in the book as published only Abraham the Pious is mentioned by name as having given information in Jerusalem.

Benjamin, who probably traveled as a merchant, evinced keen interest in all things, and possessed a clear insight into the conditions and history of the countries he traversed. His journey occupied thirteen years: setting out from Saragossa in 1160, he was back again in Spain in 1173. He made long stays everywhere, taking plenty of time to collect his information and to verify or improve accounts given him. Being an

intelligent Spanish Jew, he took an appreciative interest not only in Jewish affairs in the lands he visited, but also in the general conditions prevailing and in the various historical and educational facts related to him. His account contains numerous valuable details of the political history and internal development of countries and nations; and the history of commerce must always count Benjamin's itinerary as one of its earliest and most valued sources. The commercial importance of Barcelona and Montpellier, of Constantinople and Alexandria, as centers of international trade is vividly depicted. The situation of some cities—as, for instance, Amalfi—is described in terse but graphic words. He gives a clear picture of the peculiarities of the republics of Genoa and Pisa, in which every house was a fortress. His characterization of the Greeks is accurate: waging war by means of mercenaries, he says, they had come to have no warlike spirit themselves and had become women. He is struck by the significance of the victorious progress in Europe of the Seljuks, whom he calls Turks.

**His Accuracy and Shrewdness.**

He treats of the Assassins and Druses with great shrewdness, as well as of the Wallachians, who were invading Greece by way of the Balkan passes. He made the intimate acquaintance of the most important functionaries of the Byzantine empire, and has much to say likewise about the calif in Bagdad, whom he compares to the Christian pope. Many more of these little details of information could be adduced to show Benjamin's acuteness of observation and critical understanding of affairs, both Jewish and non-Jewish.

But Benjamin's chief interest undoubtedly centered in the conditions of the Jewish congregations of the countries he visited, and about which he has registered so many and such important and reliable accounts that his "Travels" are considered a source of the first importance for the history of the Jews in the twelfth century. With the sole exception of the "Sefer ha-Kabbalah," written about the same time by Abraham ibn Daud of Toledo, there is no work which compares with Benjamin's in value. His accounts, moreover, cover the majority of the countries then inhabited by Jews. In a species of panoramic view, he gives full descriptions of the Jews living in all those lands, with accurate data about them, their civil standing, their occupations, their schools, and their leading men.

Benjamin's route to the East took him through Catalonia, southern France, Italy, Greece, the islands of the Levant, Syria, Palestine, and Mesopotamia, to Bagdad. Arrived at that city, which was then again the residence of a Jewish exilarch, he gathered information concerning countries which lay

still farther east and north, and concerning the large Jewish congregations of Persia and of the countries beyond the Oxus. His homeward journey lay through Khuzistan, the Indian ocean, and Yemen, to Egypt, where he stayed a long time; thence by way of Sicily back to Spain. Some remarkable notes are given at the end of the book concerning the Jews of Germany, as also those of the Slavonic lands east of Prague. Likewise northern France, with its incomparable scholars, hospitality, and fraternal feeling, is not forgotten. Benjamin did not himself visit these latter countries, and so was not personally acquainted with any of their leading men. In other places Benjamin—probably not a scholar himself, but possessing a profound respect for scholarship—always enumerates the principal men and the heads of the Jewish communities. His book thus contains the names of no less than 248 of those he knew, among them many well known to history.

Of especial importance are his statistical data; and it is from his accounts that the first accurate representation of the density of the Jewish population in certain districts and cities is obtained. He furnishes also important and reliable accounts of the

civil occupations of the Jews. From him it is learned, for instance, that the Jews of Palestine and of some other countries extensively practised the art of dyeing; that the large Jewish congregation of Thebes, in Greece, was employed in the manufacture of silk and purple; that there were Jewish glass-makers in Antioch and Tyre; that in the last-named town there were also Jewish ship-owners; that among the Druses of Lebanon, Jewish workmen were domiciled; and that in Crissa, at the foot of Parnassus, a large colony of Jewish peasants existed.

Benjamin also gives valuable particulars concerning Jewish sects. He tells of the Karaites in Constantinople, Ashkelon, and Damascus; of a peculiar sect upon the island of Cyprus which fixed the beginning of the Sabbath not on Friday evening, but on Saturday morning; of the Samaritans in Cesarea, Sebaste, Ashkelon, Damascus, and espe-

cially in Nablus (Shechem). He calls the Samaritans "Samaritan Jews," and describes peculiarities of their worship and language. His accounts of the Jews in Bagdad and other cities of the East are very full; and most interesting is his description of the grave of Ezekiel the prophet, and the solemn ceremonies there. His account of the pseudo-Messiah, David Alroy, who appeared shortly before Benjamin's journey, is the chief source of information concerning that remarkable episode of Jewish history.

The details mentioned above will suffice to give an idea of the rich contents of Benjamin's book of travels, which, though perhaps not altogether free from fiction, is preponderatingly marked by sobriety and clearness of narrative and a concise style, avoiding mere verbiage.

Benjamin's itinerary, published in Constantinople in 1543, has been reprinted as follows: Ferrara, 1556; Freiburg in Breisgau, 1583; Leyden, 1633 (with Latin translation); Amsterdam, 1697; Altdorf, 1762; Sulzbach, 1783; Zolkiev, 1805; Lemberg, 1859; War-

saw, 1884. The work was published in Latin by Arias Montanus (Antwerp, 1575), and by C. l'Empereur (Leyden, 1633); in German, by Mordecai ben Moses Drucker (Amsterdam, 1691; Frankfurt-on-the-Main, 1711, perhaps following the Latin of L'Empereur); in French by Bergeron ("Recueil des Voyages," The Hague, 1735, following the translation of Arias Montanus; also Paris, 1830), and by J. Ph. Baratier (Amsterdam, 1734); in English in 1625 (London, from the Latin of Arias Montanus), 1744 (S. Harris, "Collection of Voyages," vol. i.), 1784 (ed. R. Gerrons), 1808 (Pinckerton, "General Collection," vol. vii.); by A. Asher, London, 1840; and in part by M. N. Adler ("Pal. Explor. Fund Quarterly Statement," October, 1894, pp. 288 *et seq.*, from a manuscript in the British Museum); and in Dutch by Jan Bara (Amsterdam, 1666). A new edition has been prepared (1902) by Grünhut in Jerusalem.

W. B.

**BENJAMIN, WILLIAM** (commonly called "Bill Bainge"): English pugilist; born at North-leach, Gloucestershire, England, in 1826. Benjamin's first match was with Tom Sayers, the champion of England from 1857 to 1860, for £200 a side, the battle taking place on the Isle of Grain, in Kent, Jan. 5, 1858. Sayers disposed of his opponent in three rounds. A second match, for the same stakes, was arranged, and took place at Ashford, April 5, 1858. On this occasion Benjamin made a strong defense, but was counted out in the eleventh round, despite his protest at being forced from the ring. This encounter somewhat retrieved Benjamin's reputation, which had been lowered by his poor showing in the first battle. That he ultimately became a capable boxer is shown by the fact that on July 29, 1861, at Home Circuit, he fought Dick James of Aberdare, against whom he had been matched for £100 a side, and beat him in two rounds.

**BENJAMIN HA-ZADDIK** ("the pious"): A philanthropist of the tannaitic period. According to a Baraita, he was manager of certain charitable funds. Once there appeared before him a woman begging alms, but Benjamin protested that the treasury was exhausted. The poor, despairing woman thereupon exclaimed, "Rabbi, if thou wilt not aid me, a woman and her seven children will perish of starvation!" Benjamin then undertook to support the family out of his own means. After the lapse of some time Benjamin became sick unto death. Then, legend says, the ministering angels addressed the Lord, saying, "Master of the universe, Thou hast said, Whosoever preserves a single being in Israel is in Thy sight as if he had preserved the whole world: shall Benjamin, who has preserved a mother and her seven children, die at an early age?" Thereupon the decree of death was annulled, and two-and-twenty years were added to Benjamin's allotted period of life (B. B. 11a).

**BENJAMIN ZE'EB B. SAMUEL ROMANER.** See ROMANER, BENJAMIN ZE'EB B. SAMUEL.

**BENJAMIN ZE'EB OF SLONIM:** Russian Talmudist; lived at the end of the eighteenth century; reputed pupil of Elijah b. Solomon of Wilna, and of the latter's pupil, Hayyim b. Isaac of Volozhin. He wrote a number of letters, published under the title "Mazref ha-'Abodah" (Purifier of the Ritual; Königsberg, 1858; Munkatsch, 1890), containing an alleged correspondence between Benjamin and the friend of his youth, Joseph of Nemerow, on the subject of Hasidism. In the first letter Benjamin asks his friend for information concerning the movement, his investigations not having enabled him to understand how Hasidism could presume to change the old laws, and to conform them to the rules of the Cabalists, particularly of Isaac Luria.

The friend's "answer" follows with a detailed account of the relation of the Cabala to the Talmud, and states how far the former may claim to be authoritative, even when in conflict with the Talmud. Benjamin's next letter, a most interesting piece of work, gives in the form of a dialogue ("wikkuah") between himself and a Hasid, the arguments for and against Hasidism, showing his thorough knowledge of the principles which distinguish the Hasidim and their opponents. Therein the opponent of Hasidism raises nineteen objections, which his anonymous Hasid meets, in almost every case satisfactorily. His friend Joseph of Nemerow then succeeds in convincing Benjamin completely of the truth of Hasidism.

A very slight examination of the letters is sufficient to show their fictitious character and to demonstrate that they are written for the purpose of illustrating the truths of Hasidism by an imaginary conversion of a pupil of Elijah of Wilna; an impression that is confirmed when, although alleged to have been written in 1787, they speak of Elijah as deceased (13b, etc.), whereas he died a decade later. Furthermore, a work of Elijah is cited (17a) which was not published until 1819. Whether the name "Benjamin of Slonim" is also fictitious can not be ascertained, nor is there any clue that might give information concerning the author of this clever apologetic for Hasidism.

**BIBLIOGRAPHY:** Deinhard, *Miflagot be-Yisrael*, p. 89; idem, *Zemir 'Arizim*, introduction, p. 15, considers Judah Bachrach to be the author of the *Mazref ha-'Abodah*, but without sufficient evidence.

L. G.

**BENJAMIN ZE'EB WOLF BEN SHABBETHAI:** Dayyan at Pinczow in the latter half of the seventeenth and at the beginning of the eighteenth century. He edited the *Shulhan 'Aruk*, *Hoshen Mishpat*, with notes that are a digest of the works of the rabbinical authorities of the seventeenth century, to which he occasionally adds his own views or those of his contemporaries. The book was published in Berlin in 1712 under the title "Misgeret ha-Shulhan" = "Border of the Table" (see EX. xxv. 25), with a preface by his son Shabbethai, who lived in Halberstadt in the house of Judah Loeb, the son-in-law of the local rabbi, ABRAHAM BEN JUDAH BERLIN, a patron of rabbinical studies, who seems to have defrayed the expenses of the printing of this work. Benjamin's father, Shabbethai, was a brother of Samuel ROMANER, and Benjamin was therefore a cousin of Benjamin, the rabbi of DESSAU and author of "Ir Binyamin." In an appendix to the work are printed "Tekanot ha-Borehim," the laws on bankrupts passed by the COUNCIL OF THE FOUR LANDS.

D.

**BENJAMIN BEN ZERAH:** Payyetaṅ; lived in southeastern Europe in the middle of the eleventh century. He is called by the later payyetaṅim "the Great," and also "Ba'al Shem" (Master of the Name), on account of the numerous names of God and angels used by him in his piyyuṭim. He wrote 15 poems ("yozerot") for the Sabbaths preceding the feasts, and 40 selihot, published in the *Maḥzor* of the German rite.

His piyyutim have an easy, elegant style. Parallels with Kalir are frequent. Judging from his selihah, שְׁלִיחַ הַיָּדָיִם ("I beseech thee, Lord God")—in which he plays on the name of God—consisting of 22 letters, and his "Ofan," in which he gives the names of angels, Benjamin was inclined to mysticism.

L. G. I. Br.

**BENLOEW, LOUIS:** French philologist; born at Erfurt Nov. 15, 1818; died at Dijon February, 1900. He studied at the universities of Berlin, Leipzig, and Göttingen, and went to France in 1841, where he taught modern languages at Nantes and Bourges successively. He became librarian at the Sorbonne; received the degree of "Docteur ès Lettres" in 1847; was appointed professor of ancient literature at the University of Dijon in 1849; became dean of the faculty of that institution; and was pensioned in 1882. He was a knight of the Legion of Honor. Besides his graduation theses on the style of Sophocles compared with that of Æschylus and Euripides ("De Sophocleæ Dictionis Proprietate cum Æschyli Euripidisque Dicendi Genere Comparata") and the accentuation of the Indo-European languages ("De l'Accentuation des Langues Indo-Européennes"), Benloew was the author of the following works: "Aperçu Général de la Science Comparative des Langues," 1858; "Précis d'une Théorie des Rythmes," 1862; "Recherches sur l'Origine des Noms de Nombres Japhétiques et Sémitiques," 1862; "Les Sémites à Ilion, ou la Vérité sur la Guerre de Troie," 1863; "Essai sur l'Esprit des Littératures," 1870; "Un Dernier Mot sur les Prosateurs," 1871; "La Grèce Avant les Grecs," 1877; "Analyse de la Langue Albanaise," 1879; "Les Lois de l'Histoire," 1881. He also published an edition of Sophocles, and, in collaboration with H. Weil, "Théorie Générale de l'Accentuation Latine," 1885.

J. W.

**BENMOHEL, NATHAN LAZARUS:** The first conforming Jew obtaining a degree in a British university; born at Hamburg about 1800; died in 1869. He settled in Dublin in 1829 as teacher of languages; entered the university after a course of private study in 1832; obtained his degree of B.A. in 1836, and of M.A. in 1846. He held the position of deputy professor of German and French at the Dublin University from 1839 till 1842.

Benmohel composed, but never published, the following works: (1) "Orthographia Hebræo-Anglicana," 1830—a new system of writing English in Hebrew current handwriting, after the usage prevailing in Germany; (2) "An Essay in Verse, Toward a Comparison Between the History of the Children of Israel During their Journeys from Egypt to the Promised Land, and That of the Reformation"; (3) "Primitive Ethnology, Tending to Be a Guide, Basis, and Tribute to 'Sammlung Ahdentscher Eigenamen'" (incomplete). He died in Dublin.

**BIBLIOGRAPHY:** *Anglo-Jewish Exhibition Catalogue*, 1887, pp. 22, 33, 62.

J. L. G. L.

**BENNETT, HENRY:** Sergeant in the British army; born in England 1863; killed in action during the war with the Afridis, November, 1897. He was a grandson of Solomon Bennett, the engraver, who translated the Hebrew Bible into English in 1841. Bennett was at first articled to a firm of solicitors; but in 1882 he enlisted in the British army—joining the first battalion of the Dorsetshire regiment—and went to Egypt, where he saw active service during the events occurring in connection with Arabi Pasha. He assisted in drilling some of the black troops up the country, and his knowledge of Arabic was considered by the authorities to be of great value. He returned with his regiment to England, and when subsequently it was ordered to India he went out with it. After participating in the engagements at the front, he was killed on the retreat from Warren.

**BIBLIOGRAPHY:** *Jewish Chronicle*, Nov. 26, 1897.

J.

G. L.

**BENNETT, SOLOMON:** English theologian and engraver; born in Russia before 1780; died after 1841. He wrote a considerable number of works on Biblical topics, among them "The Consistency of Israel," 1812; "Discourses on Sacrifice," 1815; "The Temple of Ezekiel," 1824; "Critical Remarks on the Authorized Version," 1834.

Bennett began to publish a complete revised translation of the English Bible in 1841; but only two numbers, containing Gen. i.-xli., appeared, and the project was abandoned. His "Temple of Ezekiel" contains as a frontispiece a portrait of himself engraved by Bennett after an original painting by Frazer. Bennett was in Berlin 1795-99, but spent the latter part of his life at Bristol.

M. K.

**BENOLIEL, DON JUDAH:** Moroccan and Austrian consul at Gibraltar; president of the Jewish community there, and of the chamber of commerce; died in 1839. When Sardinia sent a fleet against Morocco, Benoliel was enabled, in his consular capacity, to settle the differences amicably. He earned special credit by his services to the Jewish community of Tangier. On account of a quarrel that had taken place between two Jews in a synagogue of that city, the governor, with the sultan's consent, had all the synagogues of the city demolished. When the sultan Muley Abd al Rahman visited Tangier two years later, Benoliel, who was much respected by him, declining all honors for himself, secured permission for the reconstruction of the synagogues. In memory of this noble self-denial, a special memorial prayer is offered on every Day of

Atonement in the synagogues of Tangier. Judah Benoliel also possessed the full confidence of Cardinal Mastai-Ferretti, afterward Pope Pius IX. When the latter returned to Italy from Chile he entrusted Benoliel with large sums of money.

M. K.

**BENSCHEN:** A Judæo-German word meaning either to say a blessing or to bless a person. It is derived from the Latin "benedicere"; German "benedeien"; old Spanish "bencier"; Portuguese "benzer"; Provençal "benesir," "bencir"; French "bénir." Benschén is used specifically for the saying of grace after a meal. "Gomel Benschén" means to recite the benediction of thanksgiving after having escaped a great danger either in illness or in imprisonment, or after some perilous trip by sea or through the desert, the benediction containing the word "ha-gomel"; "Blessed be thou, O Lord, who bestowest (ha-gomel) mercy upon the undeserving" (Ber. 54b). See **BENEDICTION**.

"Benschén" is used for the blessing of God—"Der Bore [Creator] wird dich benschén." See "Kay ha-Yashar," in Grünbaum's "Jüdisch-Deutsche Chrestomathie," 1882, p. 255, for the blessing of the children on Sabbath, festival days, and other solemn occasions. Benschén is also resorted to in cases of great sickness when there is little hope of recovery; the rabbi or saint is then requested to offer a prayer, often with a change of the name of the sufferer so as to avert his apparently impending fate. See **NAME, CHANGE OF**; and **SUPERSTITIOUS CUSTOMS**. "Benschén" is used also euphemistically for "slapping."

K.

**BENSHEIM, SIMON:** Member of the grand-ducal Oberrat (Upper House) of Baden; born at Mannheim Oct. 14, 1823; died there Oct. 26, 1898. Extremely active in congregational and philanthropic matters, he was annually elected by unanimous vote a member of the synagogal council, and finally its president. The grand duke recognized his worth as a communal leader and as a public-spirited citizen by conferring upon him the Zähringer Löwen-Order of the second class. As a member of the grand-ducal Oberrat he won for himself the respect and esteem of all classes of people.

**BIBLIOGRAPHY:** *Der Gemeindevotz*, p. 2, in *Allgemeine Zeitung des Judenthums*, 1898, No. 49.

M. Co.

**BENTWICH, HERBERT:** English lawyer and communal worker; born in London 1856; educated at University College and the University of London (LL.B.). One of the founders of the Hampstead Synagogue, he is also one of the chief promoters of the Chovevei Zion Association in England, and assisted in affiliating it with the Zionist movement under Dr. Herzl. In that capacity he attended the Basel Congress of 1898, in which he was a member of the presidential council.

Later, when the somewhat diverse aims of the two associations became apparent, Bentwich severed

his connection with the English Zionist Federation. He organized the Maccabean Pilgrimage to Palestine, 1897. Bentwich is an authority on copyright.

**BIBLIOGRAPHY:** Harris, *Jewish Year Book*, 1901, p. 246.

**BENVENISTE** (Hebrew, בֶּנְבֵנִיסְטָה, in Catalan, **Benvenist**): The name of an old, rich, and scholarly family of Narbonne, the numerous branches of which were found all over Spain and the Provence, as well as at various places in the Orient. It is still borne by certain families in Bulgaria, Servia, and Vienna. It was also used as a prænomen (see Steinschneider, "Cat. Bodl." No. 7348; Loeb, in "Rev. des Etudes Juives," xxi, 153).

1. **Abraham Benveniste:** Statesman and chief rabbi (or "court rabbi") of Castile during the reign of Juan II., 1406-54. He was entrusted with the public finances, and, as he himself has stated, he controlled, in conjunction with the constable Alvaro de Luna, the entire administration of Castile. He was rich and learned and an influential representative of the Jews at court, being called thither by various events, of which the most important was the following: On the occasion of a malicious charge of ritual murder preferred against the Jews in a city near Ecija, Abraham Benveniste, together with Joseph ha-Nasi, the chief farmer of the taxes, and Abraham ibn Shushan, repaired to the palace in order to expose the falsity of the accusation and to prevent further danger to the Jews. In compliance with the desire of the Jewish scholars, and the petitions of all the Jewish communities of Castile, the king, or, more strictly speaking, Alvaro de Luna, appointed Benveniste in 1432 chief judge of the Jews and court rabbi (Rab de la Corte).

In order to consider the laws issued against the Jews, to further the neglected study of the Talmud, and to put a check upon the prevalent immorality and the practise of informing, Benveniste, immediately after his appointment, called a synod at Valladolid. It was composed of rabbis, scholars, and other prominent men, and met, not as Graetz has it, in the royal palace, but in the chief synagogue, situated in the Jews' quarter. Under the presidency of Benveniste the synod drew up a statute called the "Tekanah," which was to serve as a basis for the administration of the communities. It dealt with the divine service, with the glorification of the study of the Law, with state taxation, and with the welfare and progress of the communities. It is divided into five sections; namely: (1) concerning the study of the Law; (2) the choice of judges and other functionaries; (3) the practise of informing; (4) taxes and duties; and (5) apparel. The statute was to remain in fore-ten years.

In 1869 M. Kayserling translated this statute into German from a manuscript in the national library in Paris; under the title "Das Castilianische Gemeinde Statut" it appeared in the "Jahrbuch für die Gesch. der Jud. und des Judenthums," iv, 262-334. The Spanish edition by Francisco Fernandez y Gonsales is entitled, "Ordenamiento Formado por los Procuradores de las Aljamas Hebreas . . . en la Asamblea Celebrada en Valladolid en el Año 1432." Madrid, 1886 (see "Revue Etudes Juives," xiii, 187 *et seq.*).

Abraham is renowned for having reinstated the study of the Law and for having, by his liberality, kept many Jews from conversion.

**BIBLIOGRAPHY:** *Shebet Yehudah*, ed. Wiener, pp. 25, 116 *et seq.*; Abraham Zacuto, *Yuhasin*, ed. Filipowski, p. 226; Kayserling, *l.c.* pp. 283 *et seq.*; Grätz, *Gesch. der Juden*, 3d ed., viii, 141 *et seq.*, 417 *et seq.*

**2. Abraham Benveniste:** A scholar known also as "Abraham Benveniste the Elder," to distinguish him from his grandson of the same name. He was born in 1433, in Soría, province of Caceres, Spain, and at his circumcision Joseph Albo made a success. Together with his elder brother Vidal, he furthered the study of the Law and encouraged Jewish scholars by his support.

**BIBLIOGRAPHY:** Abraham Zacuto, *Yuhasin*, ed. Filipowski, p. 226a, ed. Cracow, p. 134a; Grätz, *Gesch. der Juden*, 3d ed., viii, 417 *et seq.*

**3. David Benveniste:** Rabbi of Salonica in 1550; mentioned as a rabbinical scholar by his contemporaries (Conforte, "Kore ha-Dorot," p. 38a).

**4. Hayyim ben Israel Benveniste:** Rabbinical authority; born 1603 at Constantinople; died Elul 17, 5433 (Sept., 1673). He was a pupil of J. Samego, but more particularly of Joseph Trani, who was much attached to him, and who eventually brought about his marriage to the daughter of a wealthy man. Hayyim became rabbi at Constantinople, and later at Smyrna (1655), where he took a prominent part in the Shabbethai Zebi movement. Although his attitude toward the new Messianic pretensions was at first somewhat skeptical, he soon became an adherent of Shabbethai Zebi—a step which later he deeply regretted and sought to efface from his memory by penance. It is uncertain to what extent he was concerned in the dismissal from office of his rabbinical colleague Aaron de la Papa, and whether he hindered the reinstatement of the latter. On his death, the funeral sermon was preached by Daniel Gerasi (see his "Odeh Adonai," No. 2, Venice, 1682). His hitherto unknown epitaph reads:

פאר הדור ריש נלותא מה רר חיים בנבנשת וצוקל  
נתקבל ביישיבה של מעלה י"ז אולו שנת תל"ל לפ"ק.

Benveniste was a man of astonishing learning. At the age of twenty-one he had already begun his commentary to the "Semag" ("Sefer ha-Mizvot") of Moses de Coucy. This was followed by the notable work "Keneset ha Gedolah," a commentary in eight parts on the four codes of the Law, of which the following were published during the lifetime of the author: "Orah Hayyim" (Leghorn, 1657) and "Sheyare" (=Addenda), *ib.* 1671; 2d ed., Constantinople, 1729; both included in 2d ed., Leghorn, 1791-92; "Hoshen Mishpat," Smyrna, 1660; 2d ed. in two parts, *ib.* 1734). The remaining portions of the work were published, 1711, 1716, 1717, 1731, in Constantinople, where the "Dine de-Hayye" (Laws of the Living), or commentary on the work of Moses de Coucy, also appeared in two parts, 1742. The responsa of Benveniste were published at Constantinople in 1743, and another collection of them, dealing with the "Yoreh De'ah" and the "Eben ha-'Ezer," appeared in four parts under the title "Ba'e Hayye" (Necessaries of the Living) at Salonica, 1788-91. In

addition to these there exist "Pesah Me'ubbin," prayers and rites for the first two evenings of Passover; an extract from the "Keneset ha-Gedolah," Venice, 1692; and "Hamra we-Hayye" (Wine and Life), on the Babylonian treatise Sanhedrin, Leghorn, 1802.

**BIBLIOGRAPHY:** Conforte, *Kore ha-Dorot*, p. 51a; Azulai, *Shem ha-Gedolim*, i, 54b; *Zur Gesch. Shabbethai Zebi's*, in *Kobez 'al Yad, Sammelnschrift des Vereines Me'Kize Nirslamim*, Berlin, 1899, pp. 4 *et seq.*; Grätz, *Gesch. der Juden*, 3d ed., x, 202; Michael, *Or ha-Hayyim*, No. 862.

**5. Immanuel Benveniste:** Noted printer and publisher in Amsterdam from 1640 to 1660. He published several rituals and larger works, among which may be mentioned "Aruk," "Shulhan 'Aruk," "Sh'ne Luhot ha-Berit," and a valuable complete and still popular edition of the Talmud. The last named, owing to a lack of purchasers, was offered for sale, soon after publication, at six imperials or less. From his workshop issued several well-known printers, notably the firm of Judah Gumpel and Samuel Levi, as well as Uri Phœbus Levi. In a measure the fame of Amsterdam Hebrew printing can be traced back to Benveniste's influence. Several works issued by him are known by the borders of his title-pages forming a doorway, or by his device of star, lion, and castle.

**BIBLIOGRAPHY:** Ersch and Gruber, *Encyclopædie*, 2d section, xxviii, 65; *Revue Etudes Juives*, xiii, 272; Steinschneider, *Cat. Boll.*, No. 7893.

**6. Isaac Benveniste:** Nephew of Aaron and of PHINEHAS B. JOSEPH HA-LEVI of Montpellier. He was perhaps the author of a ritual work entitled "Likḳute ha-Dinim" (Collection of Laws), containing 118 short decisions. It is still extant in manuscript.

**BIBLIOGRAPHY:** Zunz, *Z. G.* p. 474; Neubauer, *Cat. Boll. Hebr. MSS.* p. 155, No. 786.

**7. Isaac Benveniste (Zag):** Son of Joseph, (11); father of Sheshet Benveniste (No. 19). He was physician in ordinary to the king of Aragon in the early part of the thirteenth century, and lived at Barcelona; such was the esteem in which he was held that he was distinguished by the title of "Nasi" (prince). In 1215 he summoned a meeting of delegates from all the Jewish communities of southern France, from Narbonne to Marseilles, to convene at St.-Gilles. The convention, of which the influential Levi b. Moses of Narbonne was chairman, met for the purpose of electing delegates to Rome in order to frustrate the plans of Pope Innocent III., and to hinder any measures that the Lateran Council might devise against the Jews. The efforts of the deputies, however, were fruitless; for the Lateran Council decided that the Jews were to wear a special badge. It is due in large measure to the efforts of Benveniste that the provisions of this law were not strictly enforced in Aragon. On the recommendation of Jaime I. and with the consent of the bishops of the land, Pope Honorius sent a diploma to Benveniste, exempting him, in recognition of his services, his abstention from usury, and his title of "catholicorum studiosus," from every indignity. It was further stipulated that the Jews of Aragon were not to be forced to wear badges.

**BIBLIOGRAPHY:** Ibn Verga, *Shebet Yehudah*, ed. Wiener; p. 114; Grätz, *Gesch. der Juden*, vi, 405; vii, 21, 26; *Revue Etudes Juives*, xvii, 92, xxxix, 63.

**8. Israel ben Eliezer Benveniste:** Relative of HAYYIM (No. 4) and of JOSHUA BEN ISRAEL BENVENISTE (No. 13); a resident of Constantinople; died 1677. He wrote "Bet Yisrael" (House of Israel), a collection of sermons and funeral orations, published by his son (Constantinople, 1678; Azulai, "Shem ha-Gedolim," ii. 46).

**9. Joseph Benveniste:** Son of the court rabbi Abraham Benveniste (No. 1); lived in Castile in 1450; and is said to have been wealthy, philanthropic, and a patron of Jewish science (Zacuto, "Yuhasin," p. 226).

**10. Joseph Benveniste:** Of Segovia; lived in Smyrna toward the end of the sixteenth century; son of Moses Benveniste, and disciple of Elias Galigo and of Samuel Useda. Of his writings nothing remains but a fragment on the Talmudic treatise Giṭṭin, published by his grandson Solomon Algazi in the work entitled "Dobeh Sifte Yeshenim" (causing the lips of those that are asleep to speak, Cant. vii. 10), Smyrna, 1671.

**BIBLIOGRAPHY:** Azulai, *Shem ha-Gedolim*, i. 77, ii. 29; Steinschneider, *Cat. Bodl.* Nos. 5888, 6437; Benjacob, *Ozar ha-Sefarim*, p. 108, No. 169.

**11. Joseph ben Benveniste:** Grandson of Zerahiah Gerundi, and grandfather of Aaron ben Joseph ha-Levi; lived about 1190 at Montpellier (Gross, "Gallia Judaica," pp. 330 *et seq.*).

G.

M. K.

**12. Joseph ben Ephraim ha-Levi Benveniste:** Castilian minister of finance, and counselor of Alfonso XI.; born at Ecija at the end of the thirteenth century; died at Toledo in 1337. The Infante Don Philip being captivated by Benveniste's great abilities, pleasing manners, and talent for music, recommended him to his nephew Alfonso XI. The latter, not less charmed than his uncle, appointed Benveniste not only minister of finance (*almoxarif*), but also confidential counselor (*privado*). Benveniste's position was a very influential one. He rode out in a state carriage, knights escorted him on his journeys, and grandees dined at his table. This greatness could not fail to excite envy; and Benveniste had to struggle against the plots of his enemies, under whose attacks he finally fell.

As a token of his confidence, Alfonso sent him to Valladolid to bring his sister, Doña Leonora, to Toledo (1328). When the Infante was about to set out, a mob, instigated by Benveniste's enemies, attempted to kill him and his attendants. His life was saved by the princess. She asked the leaders to let him accompany her to the Alcazar of the city, where she promised to give him up. But, when there, she ordered the gates to be shut and refused to deliver him to the rioters. Alfonso on learning what had happened marched against Valladolid, besieged it, burned many houses, and would have destroyed it entirely, had not more moderate persons dissuaded him.

The plot having failed, Benveniste's enemies had recourse to slander. Many complaints against his administration were made to the Cortes of Valladolid; and the king, fatigued at last by these constant complaints, dismissed Benveniste from the council and the position of *almoxarif*.

Benveniste's downfall was, to some extent, due to himself. Samuel ibn Wakar, Alfonso's physician, stood high in the royal favor. Alfonso entrusted him with the farming of the revenues derived from the importation of goods from the kingdom of Granada. Benveniste, jealous of his coreligionist's influence, offered a higher sum for the right of farming the import taxes. Samuel, in order to avenge himself, privately persuaded the king to stop the exportations by the Moors, regardless of existing treaties. This was followed by a war with the Moors. Alfonso's treasury being exhausted, Gonzalo Martinez, who had served under Benveniste and had become influential through his recommendation, proposed to buy from the king ten of the principal Jews, for whom he would pay 800 lb. of silver. The king, compelled by his need of money, consented; and Martinez hastened to seize his former benefactor and to throw him into prison, where he died.

**BIBLIOGRAPHY:** Ibn Verga, *Shebet Yehudah*, ed. Wiener, pp. 30-33; *Chronica de Alfonso XI.* i. 83 *et seq.*; Lindo, *History of the Jews of Spain and Portugal*, pp. 183 *et seq.*; Grätz, *Gesch. der Juden*, 3d ed., vii. 266 *et seq.*

G.

I. Br.

**13. Joshua ben Israel Benveniste:** Rabbi in Constantinople toward the end of the seventeenth century; brother of Hayyim Benveniste (No. 4), and, like the latter, a disciple of Joseph Trani. He was a physician and rabbi at Constantinople in 1660, and was the author of the following works: "Ozue Yehoshua" (The Ears of Joshua), sermons for the Sabbath and special occasions (Constantinople, 1677); "Sedeh Yehoshua" (Field of Joshua), a commentary on several tracts of the Talmud Yerushalmi (*ib.* 1662, 1749); "'Abodah Tammah" (Perfect Service), a commentary on the 'Abodah for the Day of Atonement (*ib.* 1719-20); "Seder ha-Get," on the formula for divorce, written at Bruša and published at Constantinople, 1719. Benveniste's collection of responsa, "Sha'ar Yehoshua" (Gate of Joshua), was destroyed by fire; but several of his responsa are included in the collections of Moses Benveniste and Joseph Trani.

Benveniste prepared (1) "Mishmeret ha-Mizwot" (Observance of the Commandments), a metrical version of the Azharot, with commentary; and (2) "Le-bush Malkut" (Royal Garment), a hymn in the style of Gabirol's "Royal Crown," of which medical science constitutes the foundation. Azulai claims to have seen both of these writings in manuscript at the house of a rabbi in Constantinople.

**BIBLIOGRAPHY:** Conforte, *Kove ha-Dorot*, 51a; Azulai, *Shem ha-Gedolim*, i. 70.

**14. Judah Benveniste:** Son of Abraham Benveniste (No. 2), and grandson of the court rabbi of the same name (No. 1). He immigrated to Salonica with Samuel Frauco and the other Spanish exiles, and with them founded the Sephardic community in that city. He succeeded in preserving a share of his great patrimony sufficient for the purchase of a large collection of books. Several experienced scribes were always employed in copying the Mishnah, the Talmud, and other works at his home, which was the center of the scholarly Spanish exiles. Benveniste's library was always at the disposal of

scholars; and many, among them Jacob ibn Ḥabib, made good use of it.

**BIBLIOGRAPHY:** Jacob ibn Ḥabib, Introduction to 'En Ya'akov; Coronel, *Quinque Decisiones*, p. vii.; Michael, *Or ha-Hayyim*, No. 972.

**15. Judah Benveniste:** Disciple of Asher ha-Kohen ben Ardot and contemporary of David Conforte; lived at Salonica, where he occupied the position of rabbi.

**BIBLIOGRAPHY:** Michael, *Or ha-Hayyim*, p. 448, No. 973; Conforte, *Korc ha-Dorot*, pp. 45a, 50b.

**16. Meïr ben Samuel Benveniste:** Lived at Salonica, where in November, 1559, he completed his work, "'Ot Emet" (The Letter of Truth), containing corrections of the text of the Sifra, Sifre, Mekilta, Midrash Rabbah, Yalkuṭ, etc., as well as of the Sephardic prayer-book (Salonica, 1564; Prague, 1624). In these books Benveniste modestly styles himself "corrector."

**BIBLIOGRAPHY:** Steinschneider, *Cat. Bodl.* No. 6294; Wier, *r. Bibliotheca Friedlandiana*, p. 69, No. 546.

**17. Moses ben Nissim Benveniste:** Grandson of Abraham b. Hananiah, rabbi at Constantinople; was living in 1671. He corresponded with his relatives, Ḥayyim (No. 4) and Joshua Benveniste (No. 13), and with others of his contemporaries. He published "Pene Moshel" (Face of Moses), a tripartite collection of responsa on the ritualistic codes (Constantinople, 1671; 3d part, *ib.* 1719). His work "Rab Leshonot" (Many Languages) has been lost.

**BIBLIOGRAPHY:** Azulai, *Shem ha-Gedolim*, i. 132; Steinschneider, *Cat. Bodl.* No. 6438.

**18. Samuel Benveniste:** Dwelt in Tarragona in 1322, and was living in 1356, contemporaneously with Maestro Leon Medico, Maestro Mose Medico, and Maestro Yuṣef Avendagot (the last mentioned being identical with Joseph ha-Rofe ibn Abu-Ayub). Benveniste resided at the court of King Pedro of Aragon, as physician in ordinary to Don Manuel, the king's brother. Hottinger and Benjacob say that he translated into Hebrew Boethius' "De Consolatione Philosophiæ," a work much read by the Christian scholars of the Middle Ages, but nothing is known about the manuscript. He also rendered into Hebrew from Latin the work on asthma by Maimonides.

**BIBLIOGRAPHY:** *Hebr. Bibl.* viii. 85, 125; ix. 91; x. 84; Steinschneider, *Hebr. Uebers.* pp. 466, 767; erroneously in Landau, *Gesch. der Jüd. Aerzte*, p. 39, who follows Carmoly, *Médecins Juifs*, p. 101.

**19. Sheshet ben Isaac ben Joseph Benveniste:** Physician and writer; lived in the latter half of the twelfth century. Like Isaac (Zag) Benveniste (No. 7), who is supposed to have been his father, he was styled "Nasi" (prince). He received his education at Narbonne, his probable birthplace; afterward he lived at Barcelona, and later at Saragossa, in which city he died about 1209. It is said that he owed his high position to his knowledge of Arabic. He practised medicine, and was the author of a medical work, manuscript copies of which are still extant at Oxford and Munich. Such was his reputation as a physician that patients came long distances to consult him, and some are said to have journeyed even from Mayence (*e.g.*, Solomon ben Hananel). Benveniste, whose generosity is praised by Al-Ḥarizi, was poetically gifted and composed several liturgical songs. Even in his old age he

remained a friend of free investigation, as the following epigram on Meïr Abulafia shows:

"You ask why 'Instrons' he is named,  
Though he the light so cheaply rated;  
Because the dusk we 'twilight' name:  
By language-contrasts thoughts are mated."

Benveniste directed a letter to the congregation of Lunel, in answer to the epistle of Abulafia to that congregation, in which he freely expresses himself upon the value of Maimonides' "Yad ha-Hazaqah," because it enabled the laity to control the judgments rendered by the Rabbis. He carried on a lively correspondence with Nasi Kalonymus b. Todros and with Levi b. Moses of Narbonne, where his brother Joseph also resided. He lost his three sons in their prime.

**BIBLIOGRAPHY:** Steinschneider, *Hebr. Bibl.* xiii. 106 *et seq.*; Grätz, *Gesch. der Juden*, vi. 1, note 1; vii. 41; idem, *Schechet Benveniste über Maimuni's Wirksamkeit*, in *Monatschrift*, xxv. 509 *et seq.* (the letter is reprinted in Grätz, *Hebr. tr.*, 8, Appendix, p. 11); *Revue Etudes Juives*, xxxix. 62 *et seq.*, 217 *et seq.*

**20. Solomon Benveniste (called the Elder):** A prominent scholar and contemporary of Meïr ben Joseph; lived at Narbonne about the middle of the twelfth century (Zacuto, "Yuḥasin," 85a).

**21. Vidal Benveniste:** Lived at Saragossa, Spain, in the fifteenth century. He was elected by the notables of the communities of Aragon chief speaker at the disputation of Tortosa (1414), because of his knowledge of Latin and his reputed wisdom. Benveniste wrote a refutation of the seeming evidences of Jesus as the Messiah, called "Kodesh ha-Kodashim," which is still extant in manuscript. He is not identical with Don Ferrer of Gerona or with Vidal b. Labi de la Caballeria, as claimed by some.

**BIBLIOGRAPHY:** Ibn Verga, *Sheḥet Yehudah*, ed. Wiener, pp. 68 *et seq.*; Grätz, *Gesch. der Juden*, 3d ed., viii. 414 *et seq.*; Michael, *Or ha-Hayyim*, No. 804.

**22. Vidal Benveniste:** Possibly a brother of the court rabbi Abraham Benveniste (No. 1); lived in Aragon at the beginning of the fifteenth century. He was the author of the poem, "Melizat 'Efer we-Dinah," an allegory on pleasure (published, together with a number of Midrashim, at Constantinople, 1516, and at Rimini, 1525) composed as a diversion for the Purim festival (Steinschneider, "Cat. Bodl." col. 2706).

**23. Vidal Benveniste:** Elder son of Joseph Benveniste (No. 9) and grandson of the court rabbi Abraham Benveniste (No. 1). Like the latter, Vidal was a promoter of Jewish science (Zacuto, "Yuḥasin," p. 226).

G. M. K.

**BENVENISTE BEN ḤIYYAH BEN AL-DAYYAN** (called also **Al-Yasis** [the Elder] or **Ibn al-Yasis**): Physician and religious poet of the thirteenth century. Zunz mentions three metrical "baḳḳashahs" (supplications) written by him. At Benveniste's request, Jacob ben Eleazar undertook the translation of "Kabilah we-Dimnah" from the Arabic into Hebrew. To the preface of this translation Jacob prefixed a few verses laudatory of Benveniste.

**BIBLIOGRAPHY:** Steinschneider, *Cat. Bodl.* col. 2703; idem, *Hebr. Uebers.* p. 879; Zunz, *Literaturgesch.* p. 545; Landsuth, "Ammud ha-'Aḇodah," p. 51; J. Berenbourg, *Peux Versions Hébraïques du Livre de Kabilah et Dimnah*, p. 315, Paris, 1881.

G. M. K.

**BENVENISTE BEN JACOB:** One of the officers of the society *Bikkur Holim* of the Spanish synagogue in Venice toward the end of the seventeenth century. He was of Spanish descent, and is mentioned together with Raphael ben Solomon Silva and Isaac ben Baruch Carvalho in the *שֵׁנֶר קְרֻקָה שֵׁנֶי נֶשֶׁי* ("Pulcherrima Inquisitio Animæ"), prayers for the sick and dying used by the members of the above-mentioned society (Venice, Bragadin, 1685). Fürst wrongly attributes the partial authorship of these prayers to Benveniste ("Bibl. Judaica," i. 106; Ben-jacob, "Ozar ha-Sefarim," p. 608, No. 1199); but see Steinschneider, "Cat. Bodl." No. 3333.

G.

**BENVENISTE B. LABI** (בִּנְיָאֵל; also known as **De la Caballeria**): A Jewish Maccenas; son of "Prince" Solomon ibn Labi de la Caballeria; lived at Saragossa, later at Alcañiz, where he died Nov. 30, 1411. He was wealthy, learned, and greatly respected, and often took the part of his coreligionists. He corresponded with the most eminent men of his time; among others with Meir Alguaquez, who, at Benveniste's request, translated Aristotle's "Ethics" into Hebrew; with Hasdai Crescas; with Isaac b. Sheshet; with Joseph Orabuena, chief rabbi of Navarre; and with the physician Astruch Remoch Dios, or, as he called himself when he became a Christian, Francisco Dios Carne.

Benveniste was a patron of science and of scholars. For him Zerahyah ha-Levi (Don Ferrer Saladin) translated Gazzali's "Tahafat al-Filasafah" into Hebrew; and at his request Joshua b. Joseph ibn Vivas Lorki wrote the work (probably now lost) on the virtues and function of foodstuffs, which was afterward translated into Hebrew by his son Joseph Lorki. Benveniste died at Alcañiz and was buried with great honors. In memoriam services were held at Saragossa, Calatayud, Daroca, Soria, and other places.

**BIBLIOGRAPHY:** *Jeschurun*, ed. Kobak, ix. 6 et seq.; see Steinschneider, *Hebr. Uebers.* pp. 211, 378, 762; Grätz, *Gesch. der Juden*, 3d ed. viii. 410 et seq.

M. K.

**BENVENISTE DE PORTA** or **DE LA PORTA:** Bailie ("bayle") of Barcelona, Spain, and brother of Nahmanides (whose secular name was Bon Astruc de Porta; see Grätz, "Gesch. der Juden," vii. 38; "Jewish Quarterly Review," viii. 492, 710). Benveniste was an important capitalist of Barcelona and advanced money to King Jaime I. of Aragon, mainly on the security of the municipal dues owed to the king. Thus on Dec. 17, 1257, he advanced 3,863 sueldos on the dues of his bailiwick (Jacobs, "Sources," No. 134); and on the 15th of the following month he received the right to sell the dues of Barcelona and Gerona for two years (*ib.* No. 142). The total indebtedness of the king was no less than 199,483 sueldos (*ib.* No. 144), which Benveniste was allowed to recover by taking the dues of Lerida and other places of his bailiwick (*ib.* 162). Part of the payment was made by the Jews of Barcelona themselves, who were ordered to hand over 12,000 sueldos to Benveniste (*ib.* No. 168a).

Meanwhile the king continued his applications to Benveniste for funds, drawing a check on him for 5,000 sueldos June 12, 1260 (*ib.* No. 170a); while

two years later the king acknowledged his indebtedness to Benveniste of 15,221 sueldos for payment made on account of the Infanta Donna Juana, May 21, 1262. In return for the advance, the ducs of Villafranca (*ib.* No. 205), as well as 20 squares of land there (*ib.* No. 232), and the dues of the Balearic islands (*ib.* No. 257) and of Perpignan (*ib.* No. 239), were granted to Benveniste. The latter continued to act as banker for the king, since a record is found of acknowledgment of a debt of 15,000 sueldos, paid by Benveniste to the bishop of Barcelona when proceeding on an embassy to France Jan. 1, 1254 (*ib.* No. 355); and as late as Feb. 1, 1268, the dues of the Jews of Gerona were assigned to Benveniste (*ib.* No. 681).

Altogether Benveniste stood high in favor with King Jaime—no doubt for value received—and when on May 29, 1364, his brother Nahmanides was pardoned, two-thirds of the fine he had incurred for the alleged crime of vituperating Jesus in the celebrated controversy of 1263 was remitted, the king expressly stating that the pardon was given "amore Benveniste de Porta, fratris tui" ("Sources," Appendix, No. 4, p. 130).

**BIBLIOGRAPHY:** Jacobs, *Inquiry into the Sources of Spanish-Jewish History*, as above.

J.

**BENZION, BENEDIX:** Russian physician and missionary to the Jews; born in a small town in the government of Kiev, Russia, in 1839. He spent several years in Rumania, and was baptized in Berlin in 1863. Benzion studied medicine and was graduated by the University of Würzburg in 1867. He went to England, and having entered the service of the British Society for the Conversion of the Jews, was sent out to Rumania in 1874 as a medical missionary to the Jews. Transferred to Odessa, Russia, in 1876, he remained there for ten years, acquiring a considerable reputation as a medical practitioner and as a missionary. He left Odessa for Constantinople in 1886, but was not known as a missionary after 1888. He now lives in the United States.

Benzion is the author of "Orah Zedakah," a collection of proverbs and parables in the style of Ecclesiasticus (Odessa, 1876); "Kol Kore el Bet Israel" (translated from the English by Dr. Benzion, London, 1868); a translation into Judæo-German of Jos. H. Ingraham's "Prince of the House of David," under the title "Tiferet Yisra'el" (Odessa, 1883-86); and a translation into Judæo-German of Silvio Pellico's drama, "Ester d'Engedi," under the title "Der Falsche Kohengedel," which has been played at the Jewish theaters of New York.

**BENZION, BENJAMIN ZE'EB WOLF BEN JACOB HA-LEVI:** Talmudist; lived probably in Galicia in the middle of the eighteenth century. He was the author of "Et Razon" (Time of Grace), containing essays on morals, intended for the first part of the Minhah prayer of Sabbath (Zolkiev, 1777). In the introduction to this work, Benzion mentions two other works written by him; but these have not been published.

**BENZION, SAMUEL.** See ENDLER, SAMUEL.  
**BEOBACHTER, DER.** See PERIODICALS.

**BEOR:** 1. Father of Bela, king of Edon (Gen. xxxvi. 32; 1 Chron. i. 43). 2. Father of Balaam (Num. xxii. 5; xxiv. 3, 15; xxxi. 8; Deut. xxiii. 4; Josh. xiii. 22; Micah vi. 5). 11 Peter ii. 15 gives the name as "Bosor."

G. G. B. L.

**BEQUEST:** A gift of personal property in a last will and testament. Modern English law and American law distinguish between a bequest and a devise; the former being a testamentary gift of personal property, and the latter one of real estate. This distinction, however, is based upon the feudal law, and does not exist in Jewish law. Real estate and personal estate may be the subjects of a bequest in Jewish law; and although there is some distinction recognized between these two classes of property by reason of the fact that one

**Definition.** is movable and the other immovable, both of them may be bequeathed in the same manner. Subject to certain well-defined exceptions, modern law requires the bequest to be in writing. Jewish law has no such requirement; and an oral bequest may be entirely valid.

The maxim of the law is, "The words of a sick man are like those written and delivered" (Git. 13a; B. B. 151a); that is to say, the oral bequest of a sick man is in effect equivalent to a gift of immovable property by a deed in writing, or of movable property by delivery of the object. The absence of the usual formalities required in the transfer of real and personal property does not invalidate a bequest. The Jewish law calls a bequest "the gift of one lying on a sick-bed" ("mattanah shekib mera'"), and distinguishes it in several points from the gift of a person in good health (B. B. 153a; Maimonides, "Yad," Zekiyah u-Mattanah, viii. 2; Shulhan 'Aruk, Hoshen Mishpat, 250, 5, 8).

Inasmuch as the validity of a bequest may depend upon the condition of the testator's health at the time when he made it, the law attempts to define the degrees of sickness. A blind, lame, or mutilated person, or one who is suffering pain in the head, eyes, hands, or feet, is for testamentary purposes the same as a person in good health; but if his entire body is weakened through sickness so that he can no longer walk about, and is obliged to take to his bed, he is technically a "sick man" (Maimonides, *ib.* viii. 1, 2).

The law considers a further distinction; namely, between one on his sick-bed and one on his death-bed; and this distinction also has certain important legal consequences. Some authorities are of the opinion that a person on his sick-bed is a "sick man" during the first three days of his illness; and that if the illness be prolonged beyond that period, or if he be suddenly stricken with a dangerous illness, he is to be considered as a man on his death-bed, and his bequest under such circumstances will be subject to certain special regulations (Shulhan 'Aruk, Hoshen Mishpat, 250, 5). The law of bequests is in

fact a subdivision of the law of gifts, a bequest being to all intents and purposes a gift, distinguished, however, from an ordinary gift in that the strictness of the procedure is relaxed in favor of carrying out the intention of the testator.

A distinction must be noted between a testament wherein the property is bequeathed by way of inheritance and one wherein the property is bequeathed by way of gift.

**Bequest by Way of Gift, etc.** By the former, only those persons may be made legatees who would naturally take the property as heirs of the deceased; under the latter, however, any person may be made a legatee.

The law of testamentary succession, as laid down in the Bible (Num. xxvii. 8-11; see AGNATES), is unalterable; and any attempt made by the owner of property to bequeath it as an inheritance to those who would not naturally inherit it is null and void. No one can be made an heir except such persons as are mentioned in this Biblical law; nor can the property be lawfully diverted from the heirs by the substitution, either orally or in writing, of some other person as heir (Mishnah B. B. viii. 5); but the owner of property has such control over it that he may dispose of it by sale or gift to any person, to the exclusion of his heirs. This important distinction, therefore, must be noted, that a bequest by way of inheritance to persons other than the legal heirs is null and void, whereas a bequest by way of gift is valid.

Although the testator can not make a stranger his heir, he may divide the inheritance among the heirs in shares different from those prescribed by the law. This right is deduced by inference from the text, "And on the day when he shall cause his sons to inherit" (Deut. xxi. 16), implying the right on his part to divide the estate among them as he pleases. The heirs may not be excluded by the use of negative phrases; for instance, if the testator says, "My first-born son shall not have a double share of my estate," or "My son shall not inherit with his brothers," such expression is null and void; but if he says, "My son A shall have half of my property and my other sons the other half," this is valid (B. B. 130a *et seq.*; Hoshen Mishpat, 281, 1, 2).

This rule applies only to bequests by way of inheritance. A person in a state of health can not affect the succession unless he does so by a gift with all proper formalities (Hoshen Mishpat, *l.c.* 5, 7).

If one bequeaths his property to a stranger under the belief that his son is dead, the bequest is invalid if the son afterward returns, because it is presumed that the bequest would not have been made to a stranger if the father had known that his son was living; but if the bequest is only of a portion of the property, it is valid, upon the presumption that it was intended to be a gift (B. B. 146b; Hoshen Mishpat, 246, 1).

If a person bequeaths his entire property to one of his children, such one takes it as trustee for the benefit of all, and is entitled merely to an equal share with them; but if the father has bequeathed to him a portion only of the property, or if the instrument on its face shows that it was intended to be an absolute gift, he holds it free from all trust,

as his sole and exclusive property (B. B. 131b, 150b; "Yad," Zekiyah u-Mattanah, vi. 2; Hoshen Mishpat, 246, 4).

The subject of bequests by way of inheritance is treated more fully under INHERITANCE and WILLS. The present article is concerned more especially with bequests by way of gift.

As above stated, by a bequest in the form of a gift the testator may practically disinherit his lawful heirs; hence, if a sick man in making a disposition of his property says distinctly, "I give this not as an inheritance, but as a gift," it is a valid bequest, even though it excludes the lawful heirs (Hoshen Mishpat, 248, 2).

Although the right of the owner of property to bequeath it to the exclusion of his heirs is recognized by the law, it is contrary to its spirit and is deemed a moral wrong. The

**Dis-inheriting the Heir.** Mishnah (B. B. viii. 5) says: "If one deeds his goods to strangers and excludes his sons, his act is lawful, but

the spirit of the sages takes no delight in him." R. Simon ben Gamaliel said: "If, however, his sons were unworthy, his act is praiseworthy." Mar Samuel went so far as to say that the father can not disinherit a wicked son in favor of a good one (B. B. 133b). This, however, is not the law. The Shulhan 'Aruk, after citing the general opinion of the Mishnah, says (*ib.* 282, 1): "It is the practise of the very pious not to witness a will by which the inheritance is taken from the heirs, even though it is taken from an unworthy son and given to another son who is a learned and upright man"; and R. Moses Isserles (*ib.* gloss) adds: "If one leaves general directions that his executors shall dispose of his property according to the best that can be done with it, they ought to give it to his heirs; for there is nothing better than this."

A bequest becomes valid only upon the death of the testator (B. B. 137a; "Yad," Zekiyah u-Mattanah, viii. 8; Hoshen Mishpat, 252, 1); hence, if the bequest is coupled with conditions which are impossible of fulfilment after the death of the testator, it is invalid. Thus, if the testator's bequest is in writing, and the instrument contains the usual formula that symbolic seizure ("kinyan") has been made, but in fact this formality has not been complied with, such bequest is invalid; because it is impossible that the legatee should perform the ceremony of symbolic seizure with the testator after the latter's death (B. B. 152a; Hoshen Mishpat, 250, 17).

A distinction, alluded to above, in cases of bequests requires further amplification. The bequest may be either one in which the testator makes no mention of his death, or one in which he does expressly mention his death (B. B. 151b; "Yad," Zekiyah u-Mattanah, viii. 17-23; Hoshen Mishpat, *l.c.* 7). In the latter case, the bequest, whether made orally or in writing, requires none of the formalities of a

**Death-Bed Bequests.** gift among living persons; all that is necessary is the simple declaration of the dying man, which is carried

into effect through the maxim, "The words of a sick man are like those written and delivered" (B. B. 147b; Hoshen Mishpat, *l.c.* 1; "Yad," *l.c.*).

Where the testator makes no mention of his death, a further distinction is to be noted; namely, whether he has bequeathed his entire property or only a portion of it. If he has bequeathed his entire property without retaining anything for himself, the presumption arises that he has given it on account of his anticipated death, and therefore it is a death-bed bequest; otherwise, it is presumed that the testator would not have given away his entire property. If, on the other hand, he has not bequeathed all of his property, but has retained a portion of it, a contrary presumption arises; namely, that he does not expect to die of this sickness. Such a bequest, therefore, is treated like a gift among living persons, and requires symbolic seizure in order to give it validity (B. B. 151b; "Yad," Zekiyah u-Mattanah, xv. 16; Hoshen Mishpat, 250, 4-7).

If a sick man uses such expressions as "A shall have the whole of my property," or "a part thereof," or "shall acquire it," or "shall enjoy it," or "shall take possession of it," each of these expressions indicates a bequest by way of gift. If, in making the bequest to an heir, he says, "A shall be inscribed in my genealogical register," or "shall inherit from me according to law," it is valid as a bequest by way of inheritance according to the conditions above stated; but if he says, "Let A enjoy my property" or "Let him stand in it" or "rest in it," A acquires no property rights in it. If he says, "I leave my property to A," this is a gift; if he says, "My property shall fall to A," this is an inheritance (B. B. 148b *et seq.*; "Yad," Zekiyah u-Mattanah, ix. 3, 4; Hoshen Mishpat, 253, 2).

A bequest of "my movable property" includes everything with the exception of wheat, barley, and other grain. A bequest of "all my movable property" includes all things except those which are fastened to the ground and not intended to be moved, such as the lower millstone. Technically these are fixtures, and go with the real estate. A bequest of "all my property that may be moved" is held to include even such fixtures (B. B. 150a; "Yad," Zekiyah u-Mattanah, xi. 12-14; Hoshen Mishpat, 248, 10). A bequest of "my goods" includes all decedent's movable and immovable goods ("Yad," *l.c.* xi. 15; Hoshen Mishpat, 248, 11). A bequest of "a piece of ground, and as incidental thereto, all my movable property, gold, silver, vessels, clothing"—in short, everything that may be denominated either money or goods—does not carry with it any other real estate, or slaves, or scrolls of the Law, because these are not acquired as an incident to other things. The use of the phrase "incidental to other" ("aggab") is extremely technical. All sorts of personal property may be acquired without any special ceremony of symbolic seizure as incidental to land; but land can not be acquired as incidental to personal property (Hoshen Mishpat, 248, 12; see ALIENATION).

Where a bequest is made to A for life, and after his death to B, the latter is entitled to take only what is in existence at the time of A's death (B. B. 137a); but if A is a lawful heir of the testator, B receives nothing, because a gift made to an heir is presumed to be given as an inheritance, and an inheritance can not be diverted from the lawful heir

and his descendants (B. B. 129b; Hoshen Mishpat, 248, 1). If the bequest is to A, and after him to B, and after B to C, they succeed

**Bequest for Life, and** one another; but if B dies during the lifetime of A, the heirs of A inherit.

**“on Condition.”** If B, however, is living at the time of the death of A, he takes the property because A is entitled to its use for life

only. If A has sold the property, he is guilty of a moral, but not of a legal, wrong; because, although he is only entitled to its use for life, B's right in the remainder is not a vested right, but is contingent upon the existence of the property at the time of A's death (Hoshen Mishpat, 248, 3). If, however, the gift is specifically to A for a definite period, and after that to B, a purchaser from A takes no title to it, and at the expiration of the fixed period, B may recover the property from such purchaser (*ib. gloss*).

If a bequest is made “on condition,” the condition must be fulfilled before the legatee is entitled to the bequest. If the testator says, “A shall marry my daughter, and he shall be given two hundred dollars,” the condition is a condition precedent, and A can not receive the two hundred dollars before he marries the daughter (Hoshen Mishpat, 253, 12).

A specific bequest may be given to an heir in addition to that which he would otherwise inherit; if the sick man says, “Give my son A two hundred dollars that belongs to him,” he is entitled to this sum as a specific bequest in addition to any other rights he may have in his father's estate (“Yad,” Zekiyah u-Mattanah, xi. 16; Hoshen Mishpat, 253, 8), and he may reclaim it if it has been disposed of by the heirs

**Specific and Demonstrative Bequests.** (Hoshen Mishpat, 252, 2, *gloss*); but if the legacy was not specific and the heirs were merely charged with a moral obligation to carry out the will of the testator, their disposition of the property is valid (*ib.*). If the testator has given three legacies, and the estate

is not sufficient to pay them all, they abate *pro rata* (B. B. 138a; “Yad,” Zekiyah u-Mattanah, x. 13), unless he has indicated the order in which they shall abate (Hoshen Mishpat, 253, 9).

If one bequeaths a specific sum of money, to be paid to the legatee out of a certain claim which is to be collected from a debtor to the estate, the bequest need not be paid until the debt is collected: this is a demonstrative legacy payable out of a certain fund (*ib.* 11). A specific bequest of two hundred dollars to the poor, or a scroll of the Law to the synagogue, is presumed to be intended for the poor of the community to which the testator belonged or for the synagogue which he was in the habit of attending (*ib.* 23). A specific bequest of a “share” of the testator's goods is generally taken to mean one-sixteenth, or, according to some authorities, one-fourth (*ib.* 24).

If one during his sickness has bequeathed his entire property to sacred or charitable uses, or has abandoned it all (see **HEFKER**) and retained nothing for himself, and he afterward recovers, his acts are all voidable; but if he has retained anything for himself, his bequest is equivalent to, and subject to the laws of, an ordinary gift and can not be revoked (“Yad,” Zekiyah u-Mattanah, ix. 19; Hoshen Mishpat, 250, 3, 4).

A bequest of a claim against another person, or of an instrument of indebtedness held against another person, is valid even though none of the formalities required in cases of assignment of claims has been performed; provided, however, that the bequest was made in contemplation of death, or the testator parted with all his estate (B. B. 147b; “Yad,” Zekiyah u-Mattanah, x. 2; Hoshen Mishpat, 253, 20; see **ASSIGNMENT**).

A bequest is revocable either by express words or by implication. Where the testator, after having bequeathed certain property to A, bequeaths the same property to B, the former bequest to A is impliedly revoked. If, however, the article bequeathed has been delivered, or symbolic seizure has been taken by the legatee, the bequest is irrevocable (B. B. 151a; Hoshen Mishpat, 250, 13).

A bequest made by a testator under the belief that he was about to die is revocable, no matter how formally made (Hoshen Mishpat, 250, 14; “Yad,” Zekiyah u-Mattanah, viii. 23). But in

**Revocation.** some cases it has legal effect even though it is revocable; thus, if the testator bequeathed his entire property to his slave, he may, upon recovery, revoke the bequest; but the slave remains a free man, because through the gift he has become free, and freedom once acquired can not be lost (Git. 9a; “Yad,” Zekiyah u-Mattanah, viii. 22; Hoshen Mishpat, 250, 15; see commentary, “Beer ha-Golah,” *ad loc.*). In case, however, the slave takes the bequest under the following form, “I bequeath my property to you from this day, in case I die,” and the testator afterward recovers, the slave has not acquired his freedom; because the bequest was made specifically on condition of death, and, the condition not having been fulfilled, no property rights pass to the slave (“Beer ha-Golah,” *l.c.*).

If a man is about to go on a sea voyage, or into the desert with a caravan, or is being led to a place of execution, or is suddenly stricken with a sickness that steadily grows worse, his bequests made under such circumstances are subject to the rules of death-bed bequests. If he dies, his bequest is valid; but if his life is preserved, it is revocable by him even though there has been “kinyan,” and even though he has not parted with all of his property (“Yad,” Zekiyah u-Mattanah, viii. 24).

G. B. L.

**BERAB, JACOB [B. MOSES?]:** Talmudist and rabbi; born at Moqueda near Toledo, Spain, in 1474; died at Sated April 3, 1546. He was a pupil of Isaac Aboab. When he fled from Spain to Tlem-

gen, then the chief town of the Barbary states, the Jewish community there, consisting of 5,000 families,

chose him for their rabbi, though he was but a youth of eighteen (Levi ibn Ḥabib, "Responst." p. 298b). Evidence of the great respect there paid him is afforded by the following lines of Abraham Gavison ("Omer ha-Shikḥah"):

"Say not that the lamp of the Law no longer in Israel burneth! Jacob Berab hath come back—once more among us he sojourneth!"

It is not known how long Berab remained in Algeria; but before 1522 he was in Jerusalem. There, however, the social conditions were so oppressive that he did not stay long, but went with his pupils to Egypt (Palestine letter, dated 1522, in Lunz, "Jerusalem," iii. 98). Some years later (1527) Berab, now fairly well-to-do, resided in Damascus (Levi ibn Ḥabib, "Responst." p. 117a); in 1533 he became rabbi at Cairo (*ib.* 33a); and several years after he seems to have finally settled in Safed, which then contained the largest Jewish community in Palestine. It was there that Berab conceived the bold idea which made him famous, that of establishing a central spiritual Jewish power.

Berab's undertaking, to be judged correctly, must be considered in connection with the whole current of thought of the younger generation

of Spanish exiles. The overwhelming catastrophe of 1492, which, in view of the wretched condition of the Jews in Germany and Italy, had threatened the very extinction of Judaism, produced phenomena which, while apparently opposite in character, were but natural consequences. Imaginative and sentimental persons thought that the promised Messianic time was approaching; they regarded their great sufferings as the process of purgation, as the *הבלי משיח*, the eschatologic "birth-throes," of the Messianic era. The main representative of this mystical tendency was Solomon Molcho, whose tragic fate by no means extinguished these fond hopes and the desire for martyrdom. But the delusion had quite a different effect upon more practical natures. According to yet another view, the chief advocate of which was Maimonides, the Messiah would not appear suddenly; the Jews would have to prepare for him; and the chief preparatory step needed was the establishment of a universally recognized Jewish tribunal as their spiritual center.

Although the hopes of a Messiah, cherished especially in Palestine, were fundamentally wild and extravagant, they afforded the right person an excellent opportunity to create for the Jews a recognized central authority, spiritual—and perhaps, in time, political—in character. There is no doubt that the man for the purpose was Berab; he was the most important and honored Talmudist in the Orient, and was endowed with perseverance amounting to obstinacy. His plan was the reintroduction of the old "Semikah" (ordination); and Safed he held to be the best field for his activity. The lack of unity in deciding and interpreting the Law must cease. No longer should each rabbi or each student of the Law be allowed to decide upon the gravest matters of religion according to his own judgment.

There should be only one court of appeal, to form the highest authority on subjects relating to the comprehension and interpretation of the Torah.

Though this idea seemed new, it was not without precedent. The Sanhedrin in tannaitic times was, in a certain sense, Berab's model. But the Sanhedrin consisted of such men as could trace their ordination back to Moses; yet for a thousand years no such men had existed. Berab, however, was equal to the difficulty. Maimonides, he was aware, had taught that if the sages in Palestine would agree to ordain one of themselves, they could do so, and that the man of their choice could then ordain others. Although Maimonides' opinion had been strongly opposed by Nahmanides and others, and Maimonides himself had not been quite positive in the matter, Berab had so much self-reliance that he was not to be deterred from his great undertaking by petty considerations. Moreover, the scholars at Safed had confidence in him, and had no doubt that, from a rabbinical standpoint, no objection to his plan could be raised. Thus in 1538 twenty-five rabbis met in assembly at Safed and ordained Berab, giving him the right to ordain any number of others, who would then form a Sanhedrin. In a discourse in the synagogue at Safed, Berab defended the legality of his ordination from a Talmudic standpoint, and showed the nature of the rights conferred upon him. On hearing of this event most of the other Palestinian scholars expressed their agreement, and the few who discountenanced the innovation had not the courage to oppose Berab and his following.

To obtain the good-will of the Jews of the Holy City, the first use that Berab made of his new dignity was to ordain the chief rabbi at Jerusalem, Levi

b. Jacob ibn Ḥabib. Since the latter had for many years been a personal opponent of Berab, and the two had had many disputes in regard to rabbinical decisions and approbations,

Berab's ordination of Ibn Ḥabib shows that he placed general above personal interests. Moreover, the terms in which Berab officially announced Ibn Ḥabib's ordination were kindly ones. Berab, therefore, expected no opposition from that quarter; but he was mistaken. Ibn Ḥabib's personal animus was not appeased, but rather stimulated, by his ordination. He considered it an insult to his dignity and to the dignity of Jerusalem that so important a change should be effected without consultation of the Jerusalem scholars. He did not content himself with an oral protest, but sent a communication to the scholars of Safed, in which he set forth the illegality of their proceeding and declared that the innovation involved a risk to rabbinical Judaism, since the Sanhedrin might use its sovereign authority to tamper with the calendar.

Although Ibn Ḥabib's tone was moderate, every one could read between the lines that he opposed the man Berab as well as his work. An illustration of this is afforded by the remarks made by Ibn Ḥabib when he maintained at length that the scholars of Safed were not qualified to ordain, since they were not unprejudiced in the matter, and when he hinted that Berab was not worthy to transmit ordination. Berab was surprised by the peril in which his

undertaking was now placed; and, embittered by Ibn Ḥabib's personal attacks, he could not adhere to a merely objective refutation, but indulged in personalities. In answer to Ibn Ḥabib's observation, that a sacred ordination must not proceed from learning alone, but from holiness also, Berab replied: "I never changed my name: in the midst of want and despair I went in God's way" (Ibn Ḥabib, "Responsa," p. 298b); thereby alluding to the fact that, when a youth, Ibn Ḥabib had lived for a year in Portugal as a Christian under an assumed name.

The strife between Berab and Ibn Ḥabib now became wholly personal, and this had a bad effect on the plan; for Berab had many admirers but few friends. Moreover, Berab's life was endangered. The ordination had been represented to the Turkish authorities as the first step toward the restoration of the Jewish state, and, since Berab was rich, the Turkish officials would have showed him scant mercy in order to lay hands on his wealth. Berab was forced to go to Egypt for a while, but though each moment's delay might have cost him his life, he tarried long enough to ordain four rabbis, so that during his absence they might continue to exercise the function of ordination. In the mean time Ibn Ḥabib's following increased; and when Berab returned, he found his plan to be hopeless. His death some years later put an end to the dispute which had gradually arrayed most of the Palestinian scholars in hostile lines on the question of ordination.

It is known positively that Joseph b. Ephraim Caro and Moses of Trani were two of the four men ordained by Berab. If the other two were Abraham Shalom and Israel de Curial, then Caro was the only one who used his privilege to ordain another, Moses Alsheik, who, in turn, ordained Ḥayyim Vital Calabrese. Thus ordination might be traced for four generations.

With the exception of some short contributions to the works of others, the only one of Berab's numerous works ever published was his "She'elot u-Teshubot" (Questions and Answers), responsa, Venice, 1663; but the Amsterdam edition of the rabbinical Bible (1724-28) contains notes by Berab on Isaiah and Jeremiah.

L. G.

**BERACHAH** ("blessing"; A. V., **Beracah**):

1. A Benjamite who came to David and joined his forces at Ziklag (I Chron. xii. 3). 2. A valley where Jehoshaphat and his men assembled after having despoiled the Ammonites and Moabites (II Chron. xx. 26). It is identical with the modern Bereket, west of Tekoa (Bnhl, "Geographie des Alten Palästina," p. 97).

e.

G. B. L.

**BERACHAH, "THE HERO"**: A Polish Jewish soldier who was killed in the battle near

Moscow, in the Polish war against Russia in 1610. He was the son of Aaron ha-Kadosh ("The Martyr") of Tishovitz (probably Tyshtovtzy, government of Lublin), and served in the cavalry, "on three horses." In the responsa of Rabbi Meir of Lublin, and of Joel Särkes (ח כ), details are given concerning his bravery and daring, which gained for him the admiration of the Cossacks, who surnamed him "The Hero." A reckless rider, he made many attempts to break the enemy's line, but was struck and killed by a bullet. The Cossacks much lamented his death, afterward burning his body; when on the following day the Poles, aided by the Cossacks, won the battle against the Muscovites, they recaptured his horse and helmet and quarreled among themselves for the possession of his effects.

These facts came to light through the testimony of Moses ben Joseph, who, in the name of eleven Jews who accompanied the army (probably as sutlers), testified in the case of Berachah's widow ("agunah") before the rabbis.

**BERAH DODI** (ברח דודי): Three piyyuṭim forming the GEULAH in the morning service of the first two days of Passover, and of Saturday between the first and the last days of this feast (יבּה חול הכּוּעַד). Each of these piyyuṭim begins with the initial phrase of Cant. viii. 14, having regard to the association of the Song of Solomon with the Festival (see MEGILLOT). Poems in this form were written in various epochs by Benjamin ben Samuel of Contance, France, eleventh century; Shabbethai ben Moses of Rome, 1050; Moses ha-Sofer ben Benjamin of Rome, thirteenth century; Menahem ben Abraham of Imola, fourteenth century; and Joab ben Nathan ben Daniel of Rome, fourteenth century.

The melody to which the verses are recited in some German congregations is that of "Al ha-Rishonim"; but in the more extended "Polish" use, the melody sung is one of the most effective of all the rhapsodies emanating from the wandering precursors of two centuries past. Although clearly of such comparatively late origin and undoubtedly coming from a Jew of northern Europe, it presents that combination of the European minor mode with the second Byzantine ecclesiastical mode (often called the "Oriental chromatic") frequently to be noticed in the finer folk-songs of the Levant, particularly in those which bear the impress of an artistic influence (see Bourgault-Ducoudray, "Trente Mélodies Populaires de Grèce et d'Orient," p. 84, note). The figuration, too, is the same as that in many Levantine, and also Arabic and Persian, songs (see music on p. 48).

**BERAKAH.** See BENEDECTIONS; SYNAGOGUE MUSIC.

**BERAKOT** ("blessings"): The name of the first treatise of Seder Zeraim, the first Order of the Talmud. By the term "Berakot" a special form of prayer is understood, that begins with the words "Blessed art thou, O Lord, our God, King of the Universe." The treatise consists of Mishnah and

Gemara; the latter in two forms, the Babylonian (Babli) and the Palestinian or Western (Di-Bene Ma'araba), better known by the name "Yerushalmi."

The Mishnah, without any introductory remarks, without any previous statement that the Law demands the reading of the Shema' in the evening, be-

(e) blessings (ברכות). Of the nine chapters of the treatise the first three are devoted to the Shema', the next two to prayer, and the last four to blessings, as follows:

Chapter i.: Determines the time and the manner of the reading of Shema' ("Keriat Shema'") in the evening and in the

gius with the question, "From what time is it allowed to read the evening Shema'?" By adopting this

**The Mishnah.** reflects the general opinion of the Talmudic teachers that the Torah with its traditional interpretation is the undisputed basis of the oral law. Another important principle is implied in this question; namely, that the religious day is reckoned by the Law from evening to evening, and that the reading of the Shema' of the evening is therefore the first religious duty of the day. The Mishnah Berakot treats of the three elements of the ritual: (a) Shema' (שמע), (b) prayer (תפלה), and

morning, and the number of blessings which precede and follow the reading.

Chapter ii.: On "kawwanah" (intention and attention); intention to fulfil a divine command ("mizwah"), and attention to the words read.

Chapter iii.: On verses of total or partial exemption from this duty.

Chapter iv.: On the prayer ("Tefillah," "Amidah," or "Shemoneh 'Esreh") of the daily and the additional services ("musaf").

Chapter v.: On the necessity of preparing for prayer and guarding against error, especially with regard to additions to or deviations from the ordinary form of the prayer.

Chapter vi.: Blessings before and after partaking of any kind of food.

Chapter vii.: Form of grace for a company consisting of three members or more.

Chapter viii.: On various differences between the schools of Shammai and Hillel with regard to certain regulations at meals.  
Chapter ix.: Blessings relating to events which cause awe, joy, or grief.

In a few places, such as *ib.* ii. 6, 7, and ix. 5, these subjects have been interrupted by apparently foreign matter. In reality, however, there is always a certain relation between these interpolations and the principal theme of the chapter. The interpolations are original, like the rest of the Mishnah, and do not necessarily belong to a later period.

**Interpolations Are Original.** Z. Frankel, however, is of the opinion that ii. 5-8 was added by later authorities; but his argument

is not conclusive (see preface to Talmud Yerushalmi, ed. Z. Frankel, Vienna, 1874, and his "Darke ha-Mishnah," p. 264). The treatise fitly concludes with the following two regulations: (1) the name of God to be employed in ordinary greetings, in order to emphasize the belief in the existence of God, the Creator and Ruler of the universe; (2) in the responses the phrase "from world to world" to be substituted for the phrase "from [the beginning] of the world," in order to emphasize the belief in the existence of another world or life beyond the present one. The present division of the treatise into chapters and the order of the chapters seem to be the same as fixed by Judah ha-Nasi, since with few exceptions the Palestinian and the Babylonian recensions of the Talmud have the same division and order. Hence the rule, "there is a fixed order of the Mishnah" (יש סדר למשנה), is a principle adopted in the Talmud. As regards the treatise Berakot, Rashi seems to have had in his copy of the Talmud the order of ch. iii. and iv. inverted (see Tos. to Bab. Talm. 17b), beginning שמתו (מי שמתו). The subdivision of the chapters into paragraphs or Mishnahs does not seem to have ever been fixed (Z. Frankel, "Darke ha-Mishnah," p. 265).

The Mishnah contains but a few semi-haggadic elements (i. 5, ii. 2, v. 5, and ix. 5); and noteworthy are the midrashic remarks on Deut. vi. 5; Ps. cxix. 126; and Prov. xxiii. 22.

The Tosefta Berakot has the same order as the Mishnah. Following the division of chapters in the edition of Zuckermann, ch. i. corresponds to ch. i. of the Mishnah; ch. ii. to ch. ii.-iii.; ch. iii. to ch. iv.-v.; ch. iv. to ch. vi.-vii.; ch. v. to ch. viii.; ch. vii. to ch. ix. There remains only ch. v., which does not correspond to any chapter in the Mishnah; it contains regulations with regard to the "kiddush"

**The Tosefta.** (sanctification) on Friday evening, in case the meal commences in the afternoon, and rules for the guidance of guests at a banquet. The Tosefta includes more haggadic elements than the Mishnah (compare end of ch. i.; ch. iv. 14-16). The Palestinian Gemara seems to expound the Tosefta as well as the Mishnah, as is illustrated by the following instance: "In Mishnah i. 4, 'in the morning two blessings are recited before the Shema', a long one and a short one. . . . Where they [the sages] ordained a long one, it must not be shortened; and, vice versa, a short one must not be replaced by a long one. Where a blessing with a concluding formula has been ordained, that formula must not be omitted; and

where it has not been ordained it must not be added." This Mishnah is duly expounded in both the Babylonian and the Palestinian Gemaras. The Tosefta (i. 5) adds: "Where they ordained to bow down, this must not be neglected; and the bowing down must not take place where they have not ordained it." This paragraph is not noticed in the Babylonian Gemara, but is fully discussed in the Palestinian (Yer. i. 3<sup>e</sup> *et seq.*). (See ADORATION.) Another instance is the paragraph on the blessings before the performance of a divine command (mizwah) in ch. vii. of the Tosefta and the corresponding section on the same subject in ch. ix. of the Palestinian Gemara (Yer. ix. 14a).

The Gemara supplements and fully discusses the laws (Halakot) mentioned in the Mishnah, and employs to a much wider extent the method of introducing extraneous matter whenever the subject under discussion gives occasion for such interruptions by a text quoted, a name mentioned, or a lesson taught. This characteristic of the Gemara is more apparent in the Babylonian than in the Palestinian recension.

Of the haggadic topics thus interpolated in the Babylonian Gemara the following may be mentioned:

- (1) On the divine sympathy with Israel (p. 3a).
- (2) On sufferings, which are divided into those sent as punishment, and undesired sufferings sent as trials, termed "sufferings of love" ("yesrin shel ahabah") (5a).
- (3) On invisible evil agents ("mazziḳin") (6a).
- (4) On the method of divine retribution (7a).
- (5) On the relation between God and Israel, based on mutual love. Israel expresses this feeling by communing with God in prayer and by wearing the TEFILLIN containing the declaration of God's unity and sovereignty. Accordingly the idea of God's love toward Israel is figuratively described in the dictum, "God prays—desires to show mercy—and lays tefillin, containing declarations of Israel's distinction" (6a, 7a).
- (6) On the status of the dead, and their intercourse with the living (18b).
- (7) The temporary deposition of the nasi Rabban Gamaliel in Jamnia (p. 27).
- (8) Midrashic account of the prayer of Hannah, and the intercession of Moses for Israel (31a, b).
- (9) King Alexander Jannæus and Simon ben Shetaḥ (48a).
- (10) Midrashic account of Og, king of Bashan (54b).
- (11) A legendary illustration of the dictum, "All dreams follow the interpretation given to them" (55a, b).
- (12) Death of R. Akiba (61b).
- (13) On hospitality (63b).

With regard to the text of the Bible, remarks are met with on the dots over each letter of the word לולא, Ps. xxvii. 13 (4a); on the absence of a verse beginning with the letter "nun" in Ps. cxlv. (p. 4b); on the division of the Psalms (9b). Texts wrongly quoted are: Gen. vii. 23, כוארם ועד בהמה, instead of כוארם עד בהמה (p. 61a); and וילך אלקנה אחרי אשתו, instead of וילך אלקנה הרמתה (p. 11). Here probably the words "to Ramah to his house" are taken as identical with the phrase "after his house." Besides the Bible, other books are mentioned in the

**Books Cited in Bab. Gemara.** Babylonian Gemara: A Book of Haggadot (ספרא דאגדה), 23a; "Hilkot Derek Erez" (Rules of Good Manners), 22a, and "Sefer Refu'ot" (Book of Remedies), 10b.

The Palestinian Gemara includes a short account of the temporary deposition of the nasi Rabban Gamaliel (iv. 7<sup>e</sup> *et seq.*; somewhat differently

narrated in Bab. 27b); the legend of Menahem ben Hezekiah (the predestined Messiah) and his mother (ii. 5a); the meeting of King Jannæus and Simon ben Shetai (vii. 11b; paralleled in Bab. 48a), on which incident the Palestinian Talmud (vii. 11b) quotes from the Book of Ben Sira (Ecclesiasticus). **נָדְרִים וְהוֹרָמוֹת** ("exalt her, and she will raise thee and give thee a place between prince and prince"), where Bab. (Ber. 48a) quotes from Proverbs (iv. 8); the controversy between R. Simlai and the Minim on the use of the plural in the phrase "Let us make" (**פָּעַל**). (**Gen. i. 26**) (Yer. Ber. viii. 12d); and the death of R. Akiba (ix. 14b *et seq.*, parallel to Bab. 61b).

Both Gemaras include a goodly number of original prayers, most of which have found a place in the daily prayer-book. It is noteworthy that in the Yerushalmi the form for **ברכות המצות** (blessings preceding the performance of divine precepts, "mizwot") is given, but is omitted in the Babylonian Gemara. The prayers do not differ essentially in the two Gemaras, either in form or in substance (compare Wiesner, "Gib'at Yerushalayim," pp. 7 *et seq.*). Each Gemara closes with the dictum, "Scholars increase peace in the world," etc.

As to the Halakah, the dictates of the Mishnah seem to have been followed in Palestine more rigidly than in Babylonia. Thus with regard to the reading of the evening Shema', which, according to the Mishnah (i. 1), must not take place before the commencement of actual night, if it have been read before that time, it must, according to the Yerushalmi, be repeated at the proper time (Yer. Ber. i. beginning); no indication of this is given in the Babylonian Gemara (see Rashi on Ber., beginning).

There are no signs in the treatises of later interpolations. Wiesner, however ("Gibeat Yerushalayim," p. 8, Vienna, 1871), suspects Karaite interpolations in the Yerushalmi (ii. 5a) for the purpose of revealing the Rabbinites in a bad light, as praying without devotion. If his argument be correct, a passage in the Babylonian Gemara (p. 6), in which certain pious acts seem to be ridiculed as resulting in no good, may likewise be suspected as of Karaite origin. See **BENEDICTION**.

**BERCHIN, JONAH BORISOVICH:** Writer on early Russian-Jewish history; born at Kriehév, government of Mohilev, 1865; died at Moscow Aug., 1889. Up to the age of fourteen he received a strictly Orthodox education in the house of his uncle, where he became familiar with the Hebrew

language and literature. He then entered the Agricultural School at Gorigorgetzk, and after graduation studied at the High School of Minsk and the Polytechnicum of Riga. In 1888 he became paralytic, and was sent for treatment to Moscow, where he died.

Berchin's historical researches are valuable contributions to early Jewish-Russian history. He published: "Istoricheskaya Zametka," dealing with the sect of Shabbethai Zebi and with Galiatovski's book, "Messia Pravedny," in "Voskhod" for May and June, 1883; "Iz Davno Minuvshavo," in "Voskhod" for July, Aug., Nov., Dec., 1883; "Yevreiski Dokument," etc., in "Kievskaya Starina," Dec., 1884; "Sozhzhenie Lyudei v Rossii v XIII.-XVIII. Stolietii," in "Russkaya Starina," 1885, p. 45; "Izvestie o Yevreyakh v Kieve," in "Voskhod" for July and Aug., 1887; "D'va Vracha Yevrei pri Moskovskom Dvorye," in "Voskhod" for March, 1888.

**BERDYANSK:** District town and seaport in the government of Taurida Crimea, Russia, on the northwestern coast of the Sea of Azof, at the Berdyansk estuary, near the mouth of the rivulet Berdyanka. It was built by the efforts of Prince M. S. Vorontzov in 1827, and soon became a lively little port, the trade to a considerable extent, especially the export of grain, being in the hands of the Jews. In 1892 the Jewish population of the town was 1,653 and the Karaite population 243, of a general total of 21,959. In the district the Jews numbered 3,416 in the general total of 227,780.

H. R.

**BERDYCHEV (Polish, BERDYCZEW):** A city in the government of Kiev, Russia; in historical and ethnographical relations part of Volhynia. It has one of the largest Jewish communities in Russia, and is often called the "Jerusalem of Volhynia." It is difficult to determine the time when Jews first settled there. From the sixteenth century till the end of the eighteenth, Berdychev was under the dominion of Poland; and the Polish family of Tishkewitz, the hereditary owners of that domain, ruled over it as they pleased. In 1593 it is stated that the owners of the "new town" of Berdychev farmed out to a certain Jew the mill- and bridge-taxes. In the eighteenth century the Jewish population increased considerably, and a Jewish "Kahal" (government of the community) was established, as in other large cities of Poland. A trade-union of Jewish tailors was formed in 1732 with the permission of the lady of the domain, Tereza (Theresa) Zawisha, who granted them autonomy and exemption from the rule of the Kahal. In 1794 Prince Radziwill permitted the Jews to elect their own civil judges in addition to the ecclesiastical court.

In 1765 King Stanislaus of Poland decreed that some great fairs be held during each year at Berdychev; and from that time the city became a commercial center, attracting the Jews from all parts of

the country. At the government record office of Kiev some statistical data concerning the Jewish population of that period are preserved, according to which the numbers of Jews at Berdychev were: in 1765, 1,220; in 1784, 1,319; in 1787, 1,504; in 1789, 1,951. According to their occupations, 246 were liquor-dealers, 452 house-owners, 134 merchants, 188 artisans, and 150 clerks, together with 56 idlers. These figures may be considered too low; the taxes of the Polish government being heavy, as many persons as could possibly do so avoided being placed on the registers.

At the end of the eighteenth century, when the movement of the Hasidim among the Jews of Poland was at its height, Berdychev became the metropolis of the Hasidim of Volhynia, owing to the fact that about 1780 the celebrated "Zaddik," Levi-Isaac, the author of "Kedushat Levi" (The Holiness of Levi),

of 62,283. There were seven synagogues and sixty-two houses of prayer.

**BERDYCZEW.** See BERDYCHEV.

**BERDYCZEWSKI, MICAH JOSEPH:** Hebrew author; born in 1865. He represents, to some extent, the Nietzsche school of philosophy in the Hebrew literature of the present day. The son of the rabbi of Bershad, Podolia, Berdycewski received a Talmudical training at home and later at the yeshibah of Volozhyn, of which institution he wrote a short history ("Ha-Asif," iii. 231-241) and a somewhat fantastic description ("Ha-Kerem," 1888,

GREAT SYNAGOGUE AT BERDYCHEV.

(From a photograph.)

made it his headquarters. He created a great commotion by his teachings and by his quarrels with the "Mitnagdim." It is probable that the above-mentioned permission for the election of separate judges, given by Prince Radziwill in 1791, was secured by the Hasidim, who sought to emancipate themselves from the jurisdiction of the Kahal and the rabbis of the Mitnagdim. Great masses of people then flocked to Berdychev to see Levi-Isaac, who ruled there until 1810. At this period a printing-establishment for Hebrew books was in existence in the city.

In 1793, at the second division of Poland, Berdychev, with other cities of Volhynia, came under Russian domination. During the reign of Emperor Nicholas I., Berdychev was the largest commercial center in the Jewish pale. Afterward commerce diminished, and the poverty of the Jews there increased accordingly. Of all cities in the pale, Berdychev has the largest proportion of Jewish inhabitants. In 1899 there were 50,460 Jews in a total population

pp. 63 *et seq.*). His acquaintance with modern literature, which he formed clandestinely in his younger days, soon led him to abandon his former conservatism and to become a freethinker. Berdycewski, who now resides at Charlottenburg, near Berlin, and is engaged mainly with literary labors, is a prolific writer, whose productions, though not always clear, have exerted a certain influence among the young Hebrew nationalists. He is incensed against his former favorites, the Talmudical sages, because they thought more of the yeshibah or high school of Jannia than of the fortress and citadel of Jerusalem. He thinks that King Herod was the real "Uebermensch," the intellectual giant who could, by his aggressive and magnificent plans, have regenerated Israel if he had not been thwarted by the dwarfed religious scruples of the rabbis of his time. Even the last Biblical liberators, Ezra and Nehemiah, displease him, because they obtained the deliverance of their nation by tears and fasting (see

review of Berdyczewski's latest works—which were published in Warsaw by a society of Berlin students—in "Allg. Zeit. d. Jnd." Nov. 9, 1900; also "Un Prophète Neo-Hébreu," in "L'Univers Israélite," v. 56).

Besides the works above mentioned and articles scattered throughout the Hebrew periodical literature for the last twelve or fifteen years, Berdyczewski also wrote two novels, "Mahana'im,"—in which he seems to have described himself; and "Mibayit u-Mihuz"; both published by the Tushia Society in Warsaw, 1900. He was also for some time editor of the "Bet Midrash" a supplement to the "Bet Ozar ha-Sifrut," which had several enlightened rabbis among its contributors.

Berdyczewski wrote in German a philosophical work, "Ueber den Zusammenhang Zwischen Ethik und Aesthetik" (in the series "Berliner Studien zur Philosophie und Ihrer Geschichte," published by Ludwig Stein, vol. ix.), Bern, 1897.

**BEREA**: Place where Bacchides encamped (I Macc. ix. 4). From the context it would seem to be near Jerusalem, though some scholars have identified it on unsatisfactory evidence with Beeroth (Josh. ix. 17; I Esd. v. 19).

J. JH.

G. B. L.

**BEREBI** (ברבי and ברבי; in Greek, *βηρεβι*, "Sitzungsberichte der Akademie zu Berlin," 1885, p. 681). Title of learning in the period of the Tannaim, conferred especially upon scholars who were the sons of scholars, or upon members of the family of the patriarch. The explanation of the word as a compound of **ב** ("house") and **רבי** ("rabbi"), meaning "belonging to the school of an eminent teacher" (see Jastrow, "Dict." s. v.), is not obvious; for one could not think of the patriarch Rabban Gamaliel as being addressed by the title "student," which is what "Berebi" would thus really signify (Kid. 32b). It may be assumed that "Berebi" is a compound of **ב** ("son") in Palestinian Aramaic, and **רבי** ("rabbi"), a formation analogous to "ben ḥorin" (son of a free man) for "a free man." In the same way "son of a scholar" is here used instead of "scholar." One must distinguish from this word "Berebi," as a title, the phrase occasionally used "Had Berebi" (a student), which actually does mean "one of the school." It is found only in the time of the Amoraim; while Berebi as a title is tannaitic.

Among the scholars who bore the title "Berebi," Bar Kappara must be specially named. He is given the designation "Berebi" whenever mentioned by his first name, Eleazar, in order to distinguish him from his father, who bore the same name (Hul. 28b, 56b, 84b, etc.). Yalkuṭ Deut. 923 quotes from Hul. 11b and Mak. 5b once "Eleazar ha-Kappara," and once **ברבי** (so it must be read instead of **רבי**, or **בר**, as ed. Salonica has it); whereas in the two Talmudic passages referred to the name of the tanna has dropped out, and only **ברבי** remains, which has misled some scholars to assume the existence of a tanna by the name of Berebi.

**BERECHIAH I., R.**: A Palestinian scholar of the second amoraic generation (third century), always cited without the accompaniment of patronymic or cognomen. Once only (Lev. R. i. 4) is he quoted as **Berechiah Saba** (the Elder), by R. Abin III., the contemporary of Berechiah II.; and in this instance the designation "Saba" is used to distinguish between the namesakes. Nothing is known of Berechiah's life, and comparatively little preserved of his teachings, though it is quite probable that some of his sayings are attributed to his later and more renowned namesake (compare Frankel, "Mebo," 69b). A discussion of his with R. Hiyya of Kefar Teḥumin is reported on the merit of the study of the Torah. One of them teaches that the whole of this world does not equal the value of a single passage of the Law; and the other argues, "Even the discharge of all the Biblical commandments is not equal to the merit of mastering a single passage of the Law" (Yer. Peah i. 15d). Rabbah b. Nahman, a contemporary of Rabbah b. Huna, transmits in the name of Berechiah a homily on the continuance of the protective influence of patriarchal merit ("zekut abot"; Yer. Sanh. x. 27d; compare Lev. R. xxxvi. 6, where the names of the rabbis are badly corrupted). R. Tanhum b. Ḥanilai, the disciple of R. Joshua ben Levi (B. K. 55a), too, reports Haggadot in the name of Berechiah (Tan., Tazria' 9; Pesik. R. xxi. 110a). Bacher denies the existence of this Berechiah, and to sustain his opinion changes the chronological order in the passages quoted ("Ag. Pal. Amor." iii. 351, 354, note 3; 628, note 7).

S. M.

**BERECHIAH II., R.**: A Palestinian amora of the fourth century. In the Talmud he is invariably cited by his prænomen alone; but in the Midrashim he is frequently cited with the addition of "ha-Kohen," and sometimes with the further addition of the title "Berebi" (compare Pesik. ii. 21a. xii. 107b; Pesik. 3 [ed. Friedmann, p. 8a]; Num. R. xiv. 3; Pesik. R. 3 [ed. Friedmann, p. 9a]; Num. R. l. c.; Tan., Beha'aloteka, 5; Num. R. xv. 7); and according to at least one Midrash (Lev. R. xxx. 1), his father's name was Hiyya (see also Tan., cd. Buber, Hayye Sarah, 6, note 35).

While Palestine may justly claim him as a citizen, Berechiah is probably a Babylonian by birth, since he not only cites teachings of Babylonian scholars ("Rabbanan de-Tamma," Gen. R. lvi. 11, xcviii. 3; Esther R. i. 1; compare Gen. R. xxxvii. 3, where this expression is converted into "Rabbi Hanin," and Mid. Teh. cv., beginning, where "de-Tamma" is omitted), but also shows himself quite familiar with the private history of Babylonian families (Yer. Kid. iii. 64c; Lev. R. xxxii. 7). Judging, however, from the insignificant number of his sayings recorded

in the Babylonian Talmud as compared with his almost innumerable teachings preserved in the Palestinian Talmud and the Palestinian Midrashim, and considering also that his acknowledged masters were Palestinians, it is safe to say that he was in Palestine at an early age. Berechiah's acknowledged master in the Haggadah was R. Helbo (Yer. Kil. ix. 32c; Lam. R. on iii. 23; Cant. R. on i. 2); but it seems that he personally knew R. Helbo's predecessors, Levi and Abba b. Kahana, and witnessed a heated exegetical controversy between them (Gen. R. xvii. 9). If this be so, Berechiah must have lived to an advanced age, for he was in a legal controversy with R. Mana (the Younger) (Yer. Kid. iii. 64b). Rapoport ("Briefe," ed. Gräber, p. 80) makes him a teacher of Jerome.

Berechiah is cited in both the Babylonian Talmud (Ber. 55a; Yoma 71a; Ta'anit 4a; Soṭah 13b) and the Palestinian, in the field of the Halakah (Yer. Ber. vii. 11b; Yer. Peah i. 15a; Yer. Ma'as. v. 52a; Yer. Suk. ii. 53a; Yer. Soṭah vii. 21b; Yer. Kid. iii. 64c; Yer. Sanh. xi. 30b) and in that of the Haggadah; but it is the latter which he cultivated mainly. Few names appear in the Midrashic literature as frequently as does Berechiah's. In Pesikta alone he is cited sixty-eight times, either as originator or as transmitter; in Pesikta Rabbati sixty-one times (see Friedmann, Introduction, p. 18), in Tan. (ed. Buber) seventy-three times (Buber's Introduction, p. 46), in Mid. Teh. eighty-five times (Buber's Introduction, p. 28), and correspondingly numerous are his remarks preserved in the other Midrashim. Some specimens of his teachings are here subjoined.

In accordance with the oneirological views of his days, he asserts that dreams, though realized partly, are never realized fully. "Whence do we learn this? From Joseph, who dreamed (Gen. xxxvii. 9), 'Behold, the sun, and the moon, and eleven stars made obeisance to me'; and at that time his mother, typified in his vision by the moon (*ib.* 10), was no more among the living" (Ber. 55a). He thus construes the Psalmist's saying, "The Lord knoweth the way of the righteous, but the way of the ungodly perisheth" (Ps. i. 6): "When the Holy One—blessed be He!—came to create man, He foresaw that pious and impious men would descend from him, and He said, 'If I create him, the impious will descend from him; if I create him not, how will the pious descend from him?' What did the Holy One—blessed be He!—do? He removed the ways of the impious out of His sight, and by means of His attribute of mercy ["middat ha-Rahamim"] He created man. This is the meaning of the Scripture, 'God knoweth ["holdeth in view"] the way of the righteous'" (Mid. Teh. on *l.c.*; Gen. R. viii. 4). In commenting on Eccl. vii. 17, "Be not overmuch wicked," he says: "The Bible does not mean to teach that it is permitted to sin a little; but it means to say, if thou didst sin a little, say not, 'I am under the wrath of God on account of this little, and can be no worse off for sinning more'" (Eccl. R. on *l.c.*; Mid. Teh. on i. 1; compare Shab. 31b). With reference to the Scriptural saying (Ps. xxxvii. 1), "Happy is he whose transgression is forgiven" (literally, "who is lifted above transgression"), he cites R. Simon [Samuel?] b. Ammi as remarking, "Happy is the man who is master over sin, that sin be

not master over him" (Gen. R. xxii. 6). In the same strain is Berechiah's remark on Solomon's saying, "There is a time to be born, and a time to die" (Eccl. iii. 2): "Happy is he whose hour of death is like his hour of birth; who, as he was pure and innocent in the hour of his birth, is also innocent at the hour of his death" (Yer. Ber. ii. 4d; Eccl. R. on *l.c.*; Deut. R. vii. 6).

#### BERECHIAH BERAK B. ELIAKIM

**GOETZEL**: A grandson of Berechiah b. Isaac; rabbi and preacher of Klementow, Poland, and Jaworow, Galicia; lived toward the end of the seventeenth century and the beginning of the eighteenth. He was a very sincere preacher and suffered much for his outspokenness. The government prohibited the publication of his sermons, only those covering the book of Genesis being published (Halle, Saxony, 1714), under the title, "Zera' Berak Shelishi" (third part of "Zera' Berak"); and "Hiddushim," novellæ on the first portions of Berakot, dealing especially with the Haggadot. Many contemporary rabbis gave their approbation to this work.

#### BERECHIAH BERAK B. ISAAC EISIK:

Galician preacher; died in 1664 at Constantinople. He was educated by Nathan Shapira, rabbi of Cracow, and was appointed preacher of that city, where he spent most of his life. He ultimately left for Jerusalem, but died at Constantinople. His sermons on the Pentateuch, the Megillot, and the Passover Haggalah were collected and published in two volumes under the title, "Zera' Berak." The first was published in 1646 at Cracow. Appended to it was "Ateret Zebi," by Zebi Hirsch ben Shalom Mebo, the brother-in-law of Berechiah and son-in-law of Lipmann Heller. The second volume was published, together with a second edition of the first one, in 1662, and itself went into a second edition, Amsterdam, 1730.

#### BERECHIAH BEN ISAAC GERUNDI

(called also **YIZHAKI**): Payyetaṅ; lived in the twelfth century, probably at Lunel. Although he wrote nothing on the Halakah, his brother Zerachiah Gerundi, in his "Sefer ha-Mnor," cites him as an authority on the treatise *Gittin* (to 15b). Berechiah's poems, the greater part of which are printed in the *Maḥzorim* of diverse rites, are: (1) "Kerobah," a form of *piyyuṭ* for the Sabbath following the feast of Purim; (2) *AZILAROT*, for the feast of Tabernacles, in which all the precepts concerning this feast are enumerated; (3) introduction to *Kaddish*; (4) poems for Purim; (5) prayers for Atonement; (6) a poem on the *Habdalah*.

#### BERECHIAH BEN NATRONAIKRESPIA

**HA-NAQDAN**: Fabulist, exegete, ethical writer, grammarian, and translator; probably identical with **Benedictus le Puncteur**, an English Jew

mentioned as contributing at Oxford to a donum to Richard I., in 1194. Much discussion has taken place concerning the date and native country of this writer. Zunz ("G. S." iii. 237) placing him about 1260 in Provence, with which conclusion Reuben-Neubauer ("Les Rabbins Français," p. 491) and Steinschneider ("Hebr. Bibl." xiii. 83) agreed. Joseph Jacobs, during certain investigations on the medieval history of the fable, arrived at the conclusion that Berechiah should be located in England toward the end of the twelfth century (Jacobs, "Fables of Æsop," i. 175), and this was confirmed by Neubauer's discovery that, in the preface to his fables, Berechiah refers to the "turning of the wheels of fate to the island of the sea [= England] for one to die and the other to live" ("Jewish Quart. Rev." ii. 522), clearly a reference to the English massacre of 1190. The earlier view of Berechiah's date was based on a misreading of a colophon of his son Elijah, which was shown to be dated Wednesday, Oct. 22, 1233 (Jacobs, "Athenaum," April 19, 1890). Steinschneider, however, is still doubtful as to the identification ("Hebr. Uebers." p. 961). The point is of some importance on account of Berechiah's connection with the history of medieval fable.

Berechiah is known chiefly as the author of a set of 107 (113) fables, called "Mishle Shu'alim" (Suk. 28a), probably in imitation of the Talmudic "Meshalot Shu'alim." Manuscripts exist at the Bodleian (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1466, 7, originally belonging to Cotton, and 1421, 5, with six additional fables) and Munich (207 written before 1268).

The first edition appeared in Mantua, in 1557; another with a Latin version by M. Hanel, Prague, 1661; other editions at Berlin, 1706; Lemberg, 1809; Grodno, 1818; Sklov, n. d.; Warsaw, 1874.

The fables themselves give in rimed prose most of the Beast Tales passing under the name of Æsop during the Middle Ages; but in addition to these, the collection also contains fables conveying the same plots and morals as those of Marie de France, whose date has been placed only approximately toward the end of the twelfth century. It has been suggested that these additional fables were derived by Berechiah from Marie, but this is impossible, as Berechiah's versions are closer to the original and in at least one case (No. 28) he did not make a mistake made by her. The following table exhibits the relationship between Berechiah's fables and those of Marie, as well as their connection with the "Romulus," the Latin prose translations of the medieval Æsop. From this it will be seen that Berechiah has only one-half of the additional fables given by Marie, and that he has as many (about 30) which are not found in her collection. Some of these are from Avian, others from Oriental sources; and it has been suggested with some reason that both collections are derived from an Arabic series containing 154 fables, most of which could be traced to classical antiquity, and others from the East. The question can not be said to be settled; but neither Neubauer nor Steinschneider will admit that Berechiah knew Arabic ("Jew. Quart. Rev." xii. 607).

COMPARATIVE TABLE OF CORRESPONDING FABLES IN BERECHIAH, MARIE DE FRANCE, AND "ROMULUS."

ABBREVIATIONS: Ber.=Berechiah; Marie=Marie de France, "Fables"; Rom.= "Romulus" (medieval prose Æsop, ed. Oesterley, 1873); App. or A.=Appendix to Rom.; Av.=Avian, "Fabulae," ed. Ellis. Missing numbers have no parallels in Marie or "Romulus."

As an example of his fables, the following may be given as one of those which has a parallel in Marie de France (No. 73), and is derived from an Oriental source, probably the "Vaka Jataka" (Folk-lore Journal, iii. 359):

THE WOLF AND THE ANIMALS.

The Wolf, the Lion's prince and peer, as the foe of all flesh did appear; greedy and grinding, he consumed all he was finding. Birds and beasts, wild and tame, by their families urged to the same, brought against him before the Lion an accusation, as a monster worthy of detestation. Said His Majesty, "If he uses his teeth as you say, and causes scandal in this terrible way, I'll punish him in such a way as to save his neck, if I may, and yet prevent you becoming his prey." Said Lion to Wolf, "Attend me to-morrow, see that you come, or you'll come to much sorrow." He came, sure enough, and the Lion spoke to him harsh and rough. "What by doing this do you mean? Never more raven the living, or live by ravening. What you shall eat shall be only dead meat. The living you shall neither trap nor hunt. And that you may my words obey, swear me that you'll eat no flesh for two years from to-day, to atone for your sins, testified and seen: 'tis my judgment, you had better fulfill it, I ween." Thereat the Wolf swore right away no flesh to eat for two years from that day. Off went Sir Wolf on his way, King Lion stopped at court on his throne so gay. Nothing that's fleshy for some time did our Wolf eat, for like a gentleman he knew how his word to keep. But then came a day when he was a hanged and he looked hither and thither for meat, and lo, a fat sheep fair to look on and goodly to eat (Gen. iii. 6). Then to himself he said, "Who can keep every law?" and his thoughts were bewildered with what he saw. He said to himself, "It overcomes me the longing to eat, for two years

day by day must I fast from meat. This is my oath to the king that I swore, but I've thought how to fulfill it as never before. Three sixty-five are the days in a year. Night is when you close your eyes; open them, then the day is near." His eyes he opened and closed straightway. It was evening and it was morning, one day (Gen. i. 6). Thus he winked until he had numbered two years, and his greed returned and his sin disappears. His eyes fix the goat (*sic*) they had seen and he said, "See before-hand I have atoned for my sin," and he seized the neck of the goat, broke it to pieces, and filled up his throat as he was wont to do before, and as of yore his hand was stretched out to the beasts, his peers, as it had been in former days and years.

This is nearer the original source than the version of Marie, which gives a Christian turn to the whole story.

Berechiah was also the author of an ethical treatise entitled "Sefer Mazref" (MSS. at Munich and Parma). The treatise is divided into thirteen chapters: i. Introduction, ii. Lust, iii. Affection, iv. Restraint of the Will, v. Justice, vi. Misfortune, vii. Poverty, viii. Honor, ix. Position, x. Rank, xi. Soul, xii. Hope, xiii. Immortality. In it he quotes R. Abraham ibn Daud (died about 1198) without the formula for the dead, so that it is quite probable that the book was composed before 1180. He does not quote Maimonides' "Moreh," finished in 1191, known in Provence shortly after that date and in north France about 1204. Prof. Gollancz has published an edition of the "Sefer Mazref" (London, 1902).

In addition to these, Berechiah wrote a commentary on Job (MS. in the Cambridge University Library, 8; Schiller-Sezinessy, "Catalogue," pp. 40-42, 245). He was acquainted with most

**His Other Works.** of the grammarians of the eleventh and twelfth centuries, and his "Uncle Benjamin," whom he quotes, has been identified with BENJAMIN OF CANTERBURY. The writer of the commentary on Job was also the author of a commentary on the whole Bible, passages from which are quoted in a Leyden manuscript.

Berechiah was certainly a translator, his version being extant of Adelard of Bath's "Questiones Naturales" (MSS. at Munich, Leyden, Oxford, and Florence), as well as of a "Lapidary" containing a description of 63 species of stones (MS. in Bodleian). Besides these works, Berechiah is also said by Zunz to have contributed to the Tosafot (Sanh. 20b), and, as his name implies, was probably an expert in Hebrew grammar, for which reason he is quoted by Moses ben Isaac of England, in his "Sefer ha-Shoham." As this work was probably written before 1215, these references confirm the date and place suggested above.

Berechiah was one of the most versatile writers of the Middle Ages, and if he can be claimed for England, it raises the literary position of that country, as regards Jewish literature, to a considerable height.

Formerly some confusion existed between Berechiah and another Krespia Naqdan, the copyist of certain manuscripts and supposed translator of Saadia's "Emunot we-Deot" (see KRESPIA NAQDAN).

J.

**BERECHIAH DE NICOLE** (Lincoln; also known as **Magister Benedict fil Mosse de Londres**): English Tosafist; died after 1256. He was of the well-known HAGIN family, and son of Rabbi Moses ben Yom-Tob of London. He was the rab or chief rabbi of Lincoln (the Norman-French name of which was "Nicole"), and probably lived in the house now known as "the Jews' house" in that city; for this was in the possession of a certain Belaset of Wallington in 1287, and there is a deed which speaks of Belaset, daughter of the rab Berechiah (Davis, "Sheṭaroth," No. 156, p. 298). It has been conjectured that it was to attend the marriage of this Belaset and to do Berechiah honor that the Jews of England assembled at Lincoln toward the end of August, 1255, when the body of Little HUGH OF LINCOLN was discovered, and all the Lincoln Jews were sent up to London for complicity in a so-called ritual murder. Berechiah was released earlier than the rest of the Jews, on Jan. 7, 1256 (Rymer, "Foedera," ed. 1816, i. 346).

His subsequent fate is unknown; but there are a number of decisions of his in the ritual literature of the time, which show that he was considered an authority in ritual matters. Thus, in Mordecai, Ber. iv. 90, he decided that the evening prayer might be said an hour and a quarter before the legal time of night. On another occasion he declared that nuts prepared by Gentiles might not be eaten by Jews ("Shilṭe ha-Gibborim" on Mordecai, 'Ab. Zarah ii. 831). There is likewise an exegetic remark made by him in "Minḥat Yehudah," 89b.

J.

**BERED:** 1. A son of Ephraim (I Chron. vii. 20). In the genealogy of Num. xxvi. 35 his place is taken by Becher. It may be that Bered and Becher are the same. See BECHER.

2. A place given in the story of Hagar (Gen. xvi. 14). Beer Lahai Roi is there located between Kadash and Bered. Targumim Onkelos and Yerushalmi regard Bered as Shur; Onkelos rendering it "Hagra," which is his usual equivalent for "Shur" (Gen. xvi. 7), while the Jerusalem Targum renders it "Haluzza," which is also "Shur" (Ex. xv. 22). The site has not been identified.

**BEREK, JOSELOVICH** (called also **Berko**): Polish colonel under Kosciusko and Napoleon I.; born at Kretingen, government of Kovno, Russia, in the second half of the eighteenth century; killed in the battle near Kotzk, government of Syedletz, Russian Poland, 1809. He was an agent of Prince Massalsky, the owner of Kretingen and bishop of Wilna, who often sent him with commissions abroad, where he learned the French language. In 1794 he was commissioned by Kosciusko to form a light-horse regiment from among the Jews of Warsaw. Berek revived the courage of his coreligionists in the struggle for the fatherland, and fought bravely with his 500 men, especially in the defense of Warsaw. In the siege of Praga (a suburb of Warsaw) by Suvarov he lost almost all his soldiers. He then served under Napoleon, in the Polish Legion

commanded by General Dombrowski, and was killed in an encounter with Austrian hussars near Kotzk, as before stated. There the people raised a mound to his memory; and until 1831 his widow and son received a pension.

Berek was a knight of the Polish Gold Cross and the *Virtuti Militari*.

H. R.

**BERENDSON, MARTIN:** German publisher; born at Hamburg in 1824; died June 24, 1899. He was the head of the well-known bookselling and publishing firm of his native city, "Gebrüder Berendson." Berendson devoted much of his leisure to Jewish communal affairs and filled several honorable offices in the Hamburg Reform congregation. He was also a prominent Freemason and held high position in the councils of that fraternity.

**BERENDT, GOTTLIEB MICHAEL:** German geologist; born in Berlin Jan. 4, 1836. He studied the science of mining; and in his work, "Die Diluvialablagerungen der Mark Brandenburg, Insbesondere der Umgebung von Potsdam," Berlin, 1863, gave the first geological map of this province. He also prepared and issued maps of a part of the Harz mountain range and of eastern and western Prussia. Having settled in Königsberg, he was, in 1872, made there extraordinary professor; subsequently becoming district geologist and chief of the department for the Lowland in the Prussian Geological Institute at Berlin. Being made professor at the Berlin University in 1875, Berendt distinguished himself by work on the geology of the North German Lowland; and was among the first to recognize the glacial theory in geology. He further issued a geological map of the vicinity of Berlin, and a geological plan of the city of Berlin. His work, "Die Theorie Darwins und die Geologie," Gütersloh, 1870, contains a repudiation of Darwinism. Among his other productions on geology, the more important are: "Geognostische Blicke in Alt-Preussens Urzeit," Berlin, 1872; "Die Umgegend Berlins," Berlin, 1877; "Spuren einer Vergleicheherung des Riesengebirges," Berlin, 1892; "Der Tiefere Untergrund Berlins," Berlin, 1899. He contributed a large number of essays on the same subject to the following periodical publications: "Zeitschrift der Deutschen Geologischen Gesellschaft," Berlin; "Neues Jahrbuch für Mineralogie, Geologie, und Paläontologie," Stuttgart; "Schriften der Physisch-Oekonomische Gesellschaft," Königsberg, and others.

**BÉRENGER OF NARBONNE:** Viscount of Narbonne in the eleventh century. In the midst of the important wars of that century waged for the assertion of their temporal power, the popes still found time to protect the Jews. Alexander II. was their enlightened and zealous protector against any

injustice. Animated by such sentiments, he praised the viscount Bérenger of Narbonne for having energetically interfered in their favor at a time when their persecution was threatened. At the same time Alexander wrote a letter to the bishop Wifred of Narbonne (1063), asking him to protect the Jews no less actively in future than had Bérenger, if similar circumstances should arise.

**BERENICE** (formerly **Hesperides**): City of the Cyrenaic Pentapolis, at the eastern extremity of the great Syrtis, near the river Lathon. The settlement of the Jews in Berenice, as in the other towns of the Greek colony "Cyrenaica," dates from Ptolemy I. Although enjoying the rights of citizenship, they formed an independent municipal community. But instead of having an ethnarch at their head, as in other places, the Jews in Berenice formed a separate "politeuma," and were governed by their own archons. A Greek inscription found in Berenice, dating from the year 13 B. C., according to Böckh's calculation, gives the names of the nine Jewish archons. These are: Cleantropos, Stratonicos, Euphanides, Aristonos, Sozigenos, Sosippus, Andromachus, Marcus, and Lailaos.

**BIBLIOGRAPHY:** Josephus, *Ant.* xiv. 7, § 2; C. I. G. ed. Aug. Böckh, No. 5361, p. 557; Schürer, *Gesch.* iii. 25, 42, 43.

G. I. Br.

**BERENICE:** Daughter of Costobar and Salome, sister of Herod I. Her marriage with her cousin Aristobulus was unhappy. The husband, being proud of his Maccabean descent by his mother, Mariamne, taunted his wife with her low birth. Berenice thereupon complained to her mother, and this fact intensified their mutual bitterness. When, shortly after the marriage (6 B. C.), Aristobulus was assassinated, Berenice was believed to have had a share in his death.

Being now free, Berenice married Theudion, the maternal uncle of Antipater, son of Herod I. Her second husband was put to death for participation in a plot against the life of Herod; and Berenice then married Archelaus. With him she went to Rome to solicit of Augustus the carrying out of her father's testament, and remained there until her death. During her sojourn at Rome she gained the favor of Augustus and the friendship of Antonia, wife of Drusus, who later paid the debts of Agrippa I., the son of Berenice, owed by him to the treasury of the emperor Tiberius.

G. I. Br.

**BERENICE:** Daughter of Herod Agrippa I. and of Cypros, the daughter of Phasael; born in 28. She was first married to Marcus, son of the alabarch Alexander of Alexandria. Her husband dying within a short time, her father married her to his brother Herod of Chalcis (Josephus, "Ant." xix. 5, § 1). Berenicianus and Hyrcanus were the children of this union ("Ant." xx. 5, § 2; "B. J." ii. 11, § 6). Again a widow in the year 48, Berenice went to her

brother Agrippa II., with whom it was whispered she lived in incestuous relations ("Ant." xx. 7, § 3; Juvenal, "Satires," 6). These rumors may not have been unfounded, since Agrippa tried

**Her** to stop them by betrothing Berenice **Marriages.** to Polemo, king of Cilicia. The latter, won by her wealth as much as by her beauty, embraced the Jewish faith and was circumcised.

Berenice, however, soon left her third husband to return to her brother, resuming apparently their old relations. In 60 she went to Caesarea with Agrippa II. to welcome the new governor, Festus, and took part in the proceedings against Paul (Acts xxv. 13 *et seq.*, xxvi.). When, in 66, the governor Florus had by his measures provoked a riot in Jerusalem, Berenice, who was then in the city to fulfil a Nazarene vow, implored him on her knees to stop the bloodshed and to spare the town. But Florus was deaf to her prayers, and, being in danger of maltreatment, she had to seek refuge in her palace ("B. J." ii. 14, §§ 6-9; 15, §§ 1, 2). Berenice appeared with Agrippa before

**Pleads for** the proconsul Cestius Gallus to complain of Florus. Later, when Agrippa in a speech tried to dissuade the people from going to war with the Romans, Berenice stood near him to protect him by her popularity ("B. J." *l.c.*). Agrippa's attempts to maintain peace were unsuccessful. In the ensuing conflict at Jerusalem between the war party and that advocating peace the latter succumbed; and the palaces of Agrippa and Berenice were demolished by the infuriated populace ("B. J." ii. 17, § 6).

Berenice and Agrippa now openly went over to the Romans. After Vespasian had been made emperor by the Egyptian and Syrian legions, Berenice, who was a strong supporter of the Flavian party, summoned her brother Agrippa to Palestine to take the oath of allegiance (Tacitus, "Historiae," ii. 81). Vespasian seems to have held her in high esteem; for only her intercession saved Justus of Tiberias from being beheaded.

About this time Berenice entered into relations with Titus that lasted for many years, although she was much older than he—according to

**Beloved** Wilcken, no less than thirteen years. **by** Her beauty, however, was still irresistible. **Titus.** and, perhaps in the eyes of Titus, her vast wealth was even more attractive (compare Tacitus, "Historiae," ii. 2). These relations continued at Rome, whither Berenice had gone with Agrippa in 75. Titus and Berenice lived on the Palatine Hill; and it was generally supposed that he would soon marry her (Suetonius, "Titus," vii.). So jealous of her was Titus that he caused the Roman general Cæcina, whom he suspected of a secret intrigue with Berenice, to be assassinated (Aurelius Victor, "Epitome," x. 7). Fully expecting Titus to marry her, Berenice tried to hasten the event (Dio Cassius, lxxvi. 15, § 4); but when she publicly appeared as the wife of Titus he was compelled, much against his will, to separate from her, the hatred of the Jews by the Romans being too intense to tolerate such a union (Suetonius, *l.c.*; Dio Cassius, *l.c.*). Still Berenice did not give up

the hope of sharing with Titus the throne of the Roman empire. At the news of Vespasian's death (June 23, 79) she hastened to Rome; but Titus sent her back (Dio Cassius, lxxvi. 18).

Nothing is known of the later life of Berenice. It may be remarked that Berenice on her journeys between Palestine and Rome seems to have formed connections at Athens, as may be gathered from the inscription published in "C. I. A." iii. 1, No. 556.

**BERENSON, BERNHARD:** Art critic and historian; born at Wilna, Russia, June 26, 1865. He was educated in America, and in 1887 was graduated at Harvard. For some time Berenson has been in Italy investigating Italian art, and he is regarded as one of the leading authorities on its technic, following the methods of Morelli in testing the reputed authorship of early paintings. Bernhard Berenson is a contributor to the New York "Nation" and to various French and German reviews of art and archeology. Among his publications in book form are: "Lorenzo Lotto," an essay in constructive art criticism, 1895; "Central Italian Painters of the Renaissance," 1897; and "The Study and Criticism of Italian Art," 1901.

**BERENSTEIN, ISSACHAR BAER B. SAMUEL:** Dutch rabbi; born in Leeuwarden, Holland, 1808; died in The Hague Dec. 13, 1893. He was the son of Rabbi Samuel b. Berish BERENSTEIN, chief rabbi of Amsterdam, and was a dayyan of that town at the time of his father's death in 1838, continuing in that position for the following ten years. In 1848 he became chief rabbi of The Hague, succeeding R. Joseph Asher Lehmann, who had died six years before. He held the latter position for forty-five years, during which time he contributed much to the building up of communal institutions, such as an orphan asylum and a Jewish hospital; he was also the organizer of a Jewish historical and literary society. Berenstein's services were recognized by the government, and he was decorated with the insignia of the Order of the Golden Lion. He died at the ripe old age of eighty-five years, highly honored and respected, and was mourned by the entire population of the Dutch capital, irrespective of race or religion.

P. Wl.

**BERENSTEIN, SAMUEL BEN BERISH:** Dutch rabbi; born in Hanover about 1767; died in Amsterdam Dec. 21, 1838. He was the descendant of a long line of distinguished rabbis, his father and his grandfather, R. Aryeh Loeb—who was the son of Rabbi Jacob Joshua of Cracow, Lemberg, and Frankfurt (author of the "Pene Yehoshua")—having been rabbis of Hanover. Rabbi Samuel Berenstein was educated as a rabbi, and for many years held that office at Gröningen, Holland. He was probably the first rabbi of Holland to preach

in the Dutch language, and a speech which he delivered in 1805 to arouse sympathy for those who were ruined by the great fire that almost destroyed the city of Leyden in that year is preserved in a Hebrew translation ("Ha-Meassef," 1809, pp. 291, 342; 1810, pp. 40 *et seq.*). Later he became rabbi of Leeuwarden, Friesland, and remained there till 1815, when he was elected chief rabbi of the Ashkenazic community of Amsterdam, to succeed his father-in-law, Jacob Moses Löwenstamm, who had held that position since 1790. There is a tradition that R. Samuel was a trifle too liberal to suit the taste of his zealous father-in-law, and that there were many differences of opinion between them during the time of liberal innovation early in the nineteenth century. A letter addressed by Samuel Berenstein to Israel Jacobsohn, whom he calls "friend of my youth," against the introduction of German prayers in the synagogue (B. H. Auerbach, "Geschichte der Israelitischen Gemeinde Halberstadt," pp. 223-225), is couched in remarkably courteous and liberal terms. Still, neither his orthodox nor his skill as a Talmudist is open to the slightest suspicion, as can be seen from a responsum dated 1819, addressed to him by R. Moses Sofer of Presburg. That uncompromising opponent of progress in any form calls R. Samuel "Geon Yisrael," "Ner Yisrael," "Ammud ha-Yemoni," "Patish ha-Hazak," "Kebod Qadosh Shemo Tifarto" (see "Hatam Sofer"; "Eben ha-Ezer," part ii., responsum 139); the last being an appellation which is used only in the case of the greatest and most pious rabbis.

Berenstein is not known to have contributed anything to rabbinical literature; besides a few sermons in the Dutch language ("Leerreden," mentioned by Kayserling, in "Jüd. Literatur," p. 103, where it is wrongly stated that he died in 1808)—one of which, delivered in Amsterdam, 1832, is preserved in the British Museum—and a Hebrew prayer against the cholera (Roest's "Catalogue of the Rosenthal Library"), he left nothing for posterity. He will always be remembered in Holland as one of the first rabbis to favor the spread of a knowledge of the Dutch language among the Jews of that country. In this regard he was a true follower of his great-grandfather, who also advised the Jews of his time to study the languages of the countries in which they live (see S. Bloch's preface to his translation of Menasseh b. Israel's "Teshu'at Yisrael," Vienna, 1813). After the death of R. Samuel, his son R. Issachar Baer, who was a dayyan in Amsterdam, failed in the effort to succeed him, and the office of chief rabbi remained vacant for a quarter of a century, until the election of the present incumbent, Dr. Dünner.

P. Wr.

**BERERAH.**—In Talmudic Law: The concept "Bererah," known to the later Babylonian Amoraim, is a development of the law of joint property, and, just as in Roman law, this branch of the law presents very great difficulties. Girtauner, in "Jahrbücher für Dogmatik," iii, 239 (edited by Gerben and Ihering), says, "Ihering calls it the filigree of

jurisprudence." In his "Die Rechtstellung der Sache und der Eigenthumsbegriff," etc., p. 242, Girtauner further says: "Joint property contains a contradiction to the concept of property. There is no object to which the right of property of the joint proprietor attaches, but it must be assumed as existing, although it is not actually existent." A. Rümelin ("Die Theilung der Rechte," p. 100) says: "The

several dicta of the Roman law concerning joint property can not be brought together under a uniform principle, and they seem to exist independent of one another." It is not, therefore, surprising that the Talmudists formed no clear idea of Bererah, by which they attempted to explain the texts of the Mishnah and Tosefta concerning joint property; more especially because they did not limit this idea to joint property, but extended it so as to include other matters. Contradictions arose because the Tannaim and the Palestinian halakists in general knew nothing of the concept of Bererah, which was a later development of the Babylonian Halakah and modified the stricter ideas of the Palestinian.

In cases of joint property the question arises, Is the proprietor that is using the joint property to be considered for the time being as sole proprietor or merely as owner of part, and as exercising the right of use of the part owned by the other? Furthermore, in cases of division of the joint property, do the joint proprietors receive their original property, or do they receive new property through exchange?

The various answers to these questions result in important differences both from the religious and from the juridical point of view. For instance: One vows not to enjoy the property of his partner. If he, as joint proprietor using joint property, is looked upon as sole proprietor, this vow has no effect, because he is simply using his own property, and not that of his partner; but if he is considered, as to a part of it, simply as exercising the right of use of property belonging to the other, the joint proprietorship must be dissolved, or he must assign his right to another person. In Ned. v. 1, a controversy of the Tannaim is reported: If two joint proprietors vow not to enjoy the property of each other, according to the general view, neither of them may enter upon the estate which they own in common, whereas one of the Tannaim, R. Eliezer ben Jacob, maintains that each of them may say, "I am entering upon my part." Accordingly, therefore, the Babylonian Gemara (B. K. 51b), assuming that the joint property is indivisible, concludes that this controversy of the Tannaim can be explained only through the legal principles Yesh Bererah and En Bererah. The Gemara assumes that R. Eliezer applied the principle Yesh Bererah; namely, that each of the joint proprietors may choose to consider the joint property as his sole property during the time that he is using it. It is an implied legal condition (*conditio juris*) that "during the time in which I use the joint property, it is my property; during the time that you use it, it is your property," or, as it might also be translated, "That which formerly was undetermined is now—by the partner's act—looked upon as determined" (R. Nissim on Nedarim, *l.c.*). The Gemara furthermore assumes that the opponents

of R. Eliezer applied the principle *En Bererah*; namely, that the exercise of such choice is not to be presumed; or (according to Nissim)

**Yesh Bererah** that which was undetermined beforehand is not considered as determined.  
**and En Bererah.** What is said here concerning the use of an indivisible estate is also applicable to the use of any fruit-bearing property. Each takes of it what is then considered as having belonged to him according to the principle of *Bererah*, and therefore the Gemara applies to the use of a common well the arguments in the above-mentioned controversy (B. K. *l.c.*; Bezah 39b; against R. Nissim compare R. Solomon Luria, in "Yam Shel Shelomoh"). Another example may be taken from the case of fruits. In Syria the fruits of the fields belonging to Jews were subject to tithes and heave-offerings, but fruits of a Gentile bought by a Jew were not. Now, in case a Jew and a Gentile are joint owners of a field in Syria, if each of them is considered the sole proprietor, then, upon division, each receives his original property, and the fruits of the Jew, therefore, are liable for tithe and heave, and those of the heathen are not; but if the division is considered as an exchange, then in the share of both the fruits of the Jew and of the Gentile are mixed.

Concerning this case, there is a controversy between Rabbi and R. Simon ben Gamaliel (Bab. Giṭ. 47a and b; Jil. 135b). R. Simon ben Gamaliel permitted the division so that each received his sole property; Rabbi was of the opinion that each received mixed property; and from these opinions it is presumed that R. Simon ben Gamaliel maintained the principle *Yesh Bererah*, and Rabbi that of *En Bererah*. In this manner, the Babylonian Talmud ('Er. 36b *et seq.*) explains the Mishnah Demai vii. 4. In the case of untithed fruit, a part of which is intended for tithes and heave-offerings, there is a mingling of sacred portions and profane ("ḥullin"); the profane portions may be taken away and used, and the balance remains as tithes and heave-offerings. The aforesaid Mishnah as well as Mishnah Demai vii. 1 reflect the principle *Yesh Bererah*. According to the principle of *En Bererah*, both Mishnahs would be different, and would forbid the use of the fruit until after the tithe and heave had been removed.

In the Babylonian Talmud, Raba, who favored the concept "*Bererah*" (see Tem. 30b), if indeed he was not its author, takes pains to prove that not only R. Meir, but also R. Jose, R. Simon, and R.

Judah accepted the principle *Yesh*

**Extension.** *Bererah* (in 'Er. 36b "Riṭba" reads "Raba," and not "Rab"); so also the

Munich manuscript; see Rabinowicz, "Dikduke Soferim," *ad loc.*, and compare Raba's opinion in Yer. 'Er. iii. 21b) who does not accept the concept of "*Bererah*." In the Babylonian Talmud itself Samuel ignores *Bererah*, B. K. 9a; while R. Nahman, the teacher of Raba, accepted *En Bererah* (Giṭ. 48a; see R. Nissim to Ned. 45b). Raba explains the case in Mishnah 'Er. iii. 5 by means of *Bererah*. One may say, "If the instructor [ḥakam] comes to this side, my 'erub [removal of residence on Sabbath for 2,000 ells] shall be on this side; but if he goes to the other, the 'erub shall be on the other side; if one comes to this

side and the other goes to the other side, then that 'erub shall be valid which I shall determine upon tomorrow." From this passage Raba seeks to deduce the principle *Yesh Bererah*, because the locality of the residence ('erub) was uncertain at the time when the condition according to which it was to be determined was made. If the decision is made on the Sabbath, it is retroactive to the period of the commencement of the Sabbath; just as in the case of the division of joint property where the presumption is that an actual division had already been made *ab initio*; hence this is a case of *Yesh Bererah*. Most of the commentators take this view (treated later in this article), but there is a distinction between these two cases. In 'Erubin, there is an express condition after the fulfilment of which the matter is absolutely decided; whereas in the case of the division there is no express condition made beforehand, and it is not absolutely determined even afterward, which part, from the beginning belonged to the one joint owner, and which part to the other.

This led the Tosafists to distinguish between different kinds of *Bererah*. Some accepted *Bererah* where an express condition had been made, others where a doubt is resolved afterward (Tos. to Giṭ. 48a); on the other hand, in the case of the division

they adopted the principle *En Bererah*. Raba did not recognize these distinctions; he considered the division conditioned even if the condition was not expressed (*conditio juris*); see Schürli ("Theilbarkeit als Eigenschaft von Rechten," p. 30), who also calls it conditioned. Abbayī, opposing Raba, calls attention to another distinction. He says the condition "if it shall be my will" can be referred back to *Bererah*, but not the condition "if this will happen," or "if it shall be the will of another" (תולה ברעת) or "if it shall be the will of others" (עצמי ותולה ברעת אחרים) and "dependent on his own will" and "dependent on the will of others"; Giṭ. 25a *et seq.*) In the latter case the retroactive effect of the condition is generally accepted; the former cases are such instance of *Bererah*, concerning which there is a controversy. According to Windscheid, i. § 93, the condition, "if it shall be my will," has no retroactive effect. Raba, however, takes pains to prove that the Tannaim who accept *Bererah* in the one case also maintain it in the other cases, and vice versa. He does not recognize any distinctions, therefore, in the concept *Bererah*. The commentators ask, "What difference is there according to Raba between the concept *Bererah* and the retroactive force of a condition?" Such a difference must exist because the retroactive force of the condition is generally accepted on the ground that he who says "on condition" is like him who says "from now on." Rashi (Giṭ. 25b), who raises this question, is of the opinion that only conditions within man's power to fulfil or not to fulfil have retroactive effect according to

**Retroactive** general opinion, but not such conditions as are in the power of him who is master over life and death, as, for example, "if I die from this disease." In these cases retroaction can only be adopted on the principle *Yesh Bererah*. But in this case *Bererah* contains the idea of predestination; that which has

actually occurred has already been predetermined by Providence. But it is clear that such a view must be kept out of the field of law. Nahmanides sets up the following distinction between Bererah and the retroactive force of a condition: Simple conditions have retroactive force even according to the principle *En Bererah*, whereas a double condition works retroactively only according to the principle of *Yesh Bererah*. The distinction is clear. If one makes a simple condition, his will is directed toward something definite which merely requires the fulfilment of the condition; but if one makes a double condition, he wants either one thing or another, he vacillates, and therefore the idea of *Bererah* must be brought into requisition in order to cause retroactive effect. This view of Nahmanides, however, is not satisfactory, and therefore his distinction between "*Bererah*" and the "retroactive force of the condition" is rejected (see Luria, *l.c.*); but the idea of Nahmanides is correct and merely requires amendment: it is the only correct one, following the view of Raba. If one says to a woman, "I marry you on condition that your father consents," the act is an alternative juridical act. If the condition is fulfilled, the marriage is valid; if the condition is not fulfilled, the union is unlawful; but it has certain legal consequences, for Jewish law does not

recognize the maxim "*Pater est quem nuptiæ demonstrant*." In this case, therefore, there is a double condition, and, nevertheless, after being fulfilled, it has retroactive force exactly as in the case in *Mishnah Demai* vii. 4, where one may eat only on condition that that which was last taken out is presumed to have been "*terumah*" from the beginning. The opponents of this view who maintain that the marriage is valid in any event, even if the father does not give his consent, must assume the principle *En Bererah*, because it is possible to consent only to something definite. In a like manner, there is a double condition in the case, "Here is your bill of divorce, to take effect if I die from this disease," if the view is accepted that the wife remains a lawful wife up to a moment before the death of the husband. The conditions are first, "You shall remain my wife up to a moment before my death," and second, "The bill of divorce shall be effective a moment before my death." His will, therefore, is divided, and nevertheless there is a retroactive effect; hence, the principle *Yesh Bererah* is in action. If his will were only directed toward the divorce, the effect would be that the marriage would be *in suspensio*; and since that is not the case, it follows that the principle *Yesh Bererah* is invoked. In this manner, it seems, Raba has distinguished "*Bererah*" from "the retroactive force of a condition," and only in this manner can the etymology and translation of the word be fixed.

Since the commentators joined in the views of Rashi concerning the discrimination between the personal and the elementary nature of the conditions, they necessarily must find nothing else in the word "*Bererah*" than "retroactive force of condition." *Bererah* is, according to this view, a special form of the retroactive force of conditions which is accepted by some and rejected by others. The word, therefore,

must be explained through the assistance of other words: *הוברר הרבר למפרע*, "the matter has been made clear with regard to the past"; and the translation of the word would imply its secondary meaning, because *ברר* means,

**Etymology and Translation.** in the first place, "to choose," "to select"; as for instance, *בורר אוכל*, "to select the edible from the inedible." In its derived meaning it also means "clear," "clean," "positive." *Bererah* might be translated "certainty"; *i.e.*, that which was formerly doubtful is now certain; but this idea is also contained in the notion of the retroactive force of condition, and the word "*Bererah*" would not cover that special meaning which it was intended to express. In the *Jerusalem Talmud*, there is a phrase which covers "retroactive force of condition" (*Demai* vi. 25d, and elsewhere), *זה הלך המניע לו משעה ראשונה*, "this, his share, was his from the first moment." According to Rashi, the word "*Bererah*" ought to be translated as predestination; but this idea is not in the word. But, in fact, "*Bererah*," derived from *ברר*, "to choose," "to select," means "choice." "*Yesh Bererah*" means "he has the choice"; that is to say, one can make a double condition and afterward choose one or the other; or through the fulfilment of the condition, whichever it may be, one thing or the other is determined. "*En Bererah*" means that one can not make a double condition, so that afterward one of the two may be determined. This was the view of the *Babylonian Talmud* as shown in *Yoma* (55b), where it is argued, "let him choose four *zuzim*," etc. Likewise in another place (*Tem.* 30a; *Bek.* 57a), "let him take one out, and the others will be permitted." It is true that Levy and, following him, Kohut explain the word to mean "choice," but this translation of the word will not be of help in the *Gemara*, unless the above-explained view of Nahmanides is borne in mind. Jastrow, therefore, gives a twofold translation, "choosing or a subsequent selection"; "retrospective designation." According to the above-mentioned explanation, the word "choice" is sufficient. The fact that a condition is retroactive is assumed, and is not expressed in the word; since this is characteristic of all conditions.

Undoubtedly, in practise, Raba has applied the concept of *Bererah* without distinction. Rabbi Isaac, the *Tosafist*, maintains that in every case a decision can be rendered according to Raba; namely, on the principle *Yesh Bererah*. R. Tam at first also decided in this manner, but later he departed from it (see *Tosafot* to *Tem.* 30a, and parallels in marginal notes). In the *Gemara* (*Bezah* 37b *et seq.*), *Mar Zutra* is of the opinion that inasmuch as there is a difference of opinion concerning *Bererah*, the rule of decision should be "In Biblical commands, *En Bererah*; in rabbinical commands, *Yesh Bererah*"; and in this manner Maimonides also decided (*Er.* viii. 7), although many contradictions appear in his work that can not all be reconciled by his interpreters (see Luria, *ib.* 36b; and "*Sha'agat Aryeh*," No. 89). Rabbi Joseph Caro (*Shulhan 'Arnk*, *l.c.*) also notes this division; namely, "In rabbinical commands, *Yesh Bererah*, and in Biblical commands,

En Bererah." One rather illogical exception is made in the case of a Biblical command; namely, in the case mentioned in Ned. (*l.c.*), because it is said to differ from other cases of Bererah (see R. Solomon LURIA).

The Palestinian Halakah is closer to Roman legal concepts than is the Babylonian, and in spite of all separation from that which was foreign,

**Unknown in Palestinian Halakah.** Roman legal concepts current among the people unconsciously forced their way into the Palestinian Halakah, although the rules of law of the two systems differed.

In Roman law, the difference between movable and immovable property shows itself in the concept of divisibility of property. Immovable property can be divided, and movable property can not (*pars pro diviso, pars pro indiviso*). In the case of immovable property an actual division is possible: in the case of movable property only a theoretical or ideal division can be made. Actual division of quantities and genus is likewise possible (*numero fit divisio*), because the value of equal parts remains the same; (see Waechter, "Archiv für die Civilistische Praxis," xxv. 155 *et seq.*); but this rule applies only to obligations and not to joint property. The division of joint property, is looked upon as an exchange (*permutatio*). In place of the formerly undetermined property, each of the joint proprietors receives from the other, by exchange, certain determined property (see Savigny, "Obligationenrecht," i. § 30, and likewise other well-known jurists quoted in "Monatschrift," 1900, *l.c.*).

The Palestinian Halakah likewise distinguishes between joint property in divisible and in indivisible things. This distinction is found in the above-mentioned controversy, in the case of a vow of abstinence by the joint proprietors from any enjoyment of each other's property; and in the other controversy, concerning tithes and heave-offerings in the case of joint property of Jew and Gentile in Syria. The Babylonian Talmud uses these as its principal supports for the controversy concerning Yesh Bererah and En Bererah. In Yer. Demai vi. 25d the latter controversy is discussed, and the Halakah is as follows: In case of a division of heaps of sheaves or even the threshed grain, it is undisputed that in each stalk or each grain there is common property, but in the case of a division of growing grain, there is a controversy between Rabbi and R. Simon ben Gamaliel. The former maintains that in this case also the community of property exists in every single stalk, and the latter maintains that each joint proprietor obtains his separate property.

R. Simon ben Gamaliel's principle is the following: The field being divisible (*pars pro diviso*; (see JOINT OWNERS), there is an implied condition (*conditio juris*) among the joint proprietors that whichever of the two halves falls to the share of either one shall be presumed to have been his from the beginning. This is an alternative condition with retroactive force. This is the meaning of the maxim: "This, his share, was his from the first moment." The Palestinian Halakah has not distinguished the condition "if it shall be my will" from other conditions. Köppen ("Jahrbuch für Dogmatik," xi. 280) maintains that according to Roman law such a con-

dition has retroactive force; so also Derenbourg ("Pandekten," p. 258, § 108, Berlin, 1896). Thus (Yer. 'Er. iii. 21b) the condition, "I may go whithersoever I may desire," is considered a condition with retroactive force. In Yer. Git. iii. 44d, the case cited in the Mishnah—a bill of divorce written for one of two wives of the same name to be determined at the will of the husband—is considered invalid, because a bill of divorce may, under no circumstances, be written conditionally, otherwise the maxim of the law would apply, "that it was written for her from the first moment"; to wit, the condition has retroactive force. In the case of the division of a field, R. Simon ben Gamaliel held such condition to be necessarily implied. Rabbi does not consider such condition valid even if it is actually expressed, because, according to him, the joint property exists not only in that part which is divisible, but in each separate stalk, whereby division becomes impossible. R. Simon ben Gamaliel

**Case of Joint Property.** therefore had to admit that in case a division of a heap of grain is attempted, the joint property continues in every stalk or in every grain, whereby actual division becomes impossible.

In Roman law, the rule is, if the grain of two proprietors is mixed with their consent, "communio" exists, and it cannot be divided. "Quod si frumentum Titii frumento tuo mixtum fuerit, si quidem ex voluntate vestra commune est, quia singula corpora, id est singula grana, que cuiusque propria fuerunt ex consensu vestro communicata sunt"; § 25J. de rerum divisione, 2, 1.

The same controversy would exist even if there was joint property in two separate equal heaps of grain, or two equal pieces of the same kind of property, because, in this case, we have *partes pro diviso*; each part being a body for itself. R. Johanan and R. Eleazar dispute concerning this case (Yer. Kidushin i. 60d; compare Demai, *l.c.*). R. Johanan decided, like Rabbi, that, even in the case of divisible things, community remains in every single piece or heap. R. Eleazar decides like R. Simon ben Gamaliel, "This, his share, was originally his." But it is undisputed that if there is joint property in a single heap of grain, it is indivisible, because the joint property exists in every grain (compare Yer. Demai vi. 25d). The same relation exists in the case of a courtyard held in common. Here, also, a distinction is made whether it is divisible or indivisible. According to Yer. Ned. v. 39a, it is undisputed that if the courtyard is indivisible, the joint proprietors that have through vows mutually resolved to abstain from enjoyment of one another's property may not step into the courtyard (Mishnah Ned. v. 1). The conflict between the general opinion and the view of R. Eliezer ben Jacob exists only if the property is divisible. According to the former view, every square inch of the courtyard is joint property, and therefore may not be divided. In order that they may step into this courtyard, joint proprietors must transfer their right to a third person. R. Eliezer ben Jacob is of the opinion that each joint proprietor has an undetermined half-interest in the entire property, and, through *conditio juris*, each joint proprietor obtains, after the division, his original property. This controversy is exactly like that between Rabbi and R. Simon ben Gamaliel.

Mishnah Demai vii. 2 is explained in Yer. 26b without controversy on the principle that the condition has retroactive force (מכבר לשיאשהה).

The Babylonian Halakah, by setting up the concept Bererah, went far beyond the Palestinian and read this concept into the controversy of the Tannaim. According to the Jerusalem Talmud, the division of indivisible things in the case of joint property is not permitted; according to the Babylonian, it is permitted in the case of rabbinical prohibitions (see an example in "Sha'agat Aryeh," l.c.). According to the Jerusalem Talmud, such a distinction can not be drawn because, following it, the division of indivisible things contains a contradiction, which makes its application equally impossible for rabbinical and Biblical law. Moreover, the controversy between Rabbi and R. Simon ben Gamaliel actually refers to a rabbinical prohibition.

But although the Babylonian Talmud's interpretation of the controversy of the Tannaim must yield to that of the Jerusalem Talmud, the concept Bererah, as such, is nevertheless juridically and logically justifiable. Roman law is not abstractly logical. The Roman law, it is true, establishes the proposition "Dominium plurium in solidum esse non potest," and most of the jurists, starting out with this proposition, take the stand that according to Roman law, in the case of joint property, the right is divided and the division is looked upon as *emptio*.

Göppert explains this view clearly and convincingly ("Beiträge zur Lehre vom Roman und Modern Miteigentum," Halle, 1864). Other Roman Law. doctors of the law, such as Steinlechner, Windscheid, and Eisele, explain joint property as separate property even according to Roman law. Without venturing to express an opinion on Roman law, the statement of Unger seems convincing that there was an evolution in the law. He writes ("Jahrbuch für Dogmatik," xxii. 289):

"A twofold point of view is possible: either theoretically divided property and divided security, or joint property and joint security. In the first case, it is assumed that there are several joint proprietors *pro indiviso*; in the latter case, that all together as one (*unius loco*) have property in the thing. The first point of view was that of the older Roman law, the latter is that of the later Roman law and of modern law, so far as it recognizes suretyship in cases of joint property."

A similar evolution took place in Talmudic law. The Palestinian Halakah takes the point of view that the joint proprietor, particularly of indivisible things, has a theoretical share in the article. It considers division as a purchase or an exchange. In the later Babylonian Halakah (through Raba) the joint proprietor is looked upon as sole proprietor who after the division receives his original property. It did not assume in joint property, consisting of many similar units, that each unit was joint property and had to be divided—division of the property and division of right are the same—but considered that the one-half of the bulk belonged to the one, and the other half to the other, and each one while using the joint property was presumed to be using his own property, and on division received what was always his property (Tos. Git. 48a).

The difference between the views of the deciders of the responsa and the older authorities is particularly noticeable because the former say that in the

case of indivisible joint estate, the vow of the joint proprietor has no force because they have assumed the obligation that one may use the share of the other; but, according to the older conception, the partnership relation contains no such idea of obligation and can be ended at any moment. This is the idea of the Jerusalem Talmud.

The concept Bererah is known in French law. Göppert (*ib.* pp. 64, 65) states: "In French law, the essence of the division of joint property did not consist in a mutual changeable contract, but rather in an *acte déterminatif*, by which it was established what portion of the joint property the joint heir really inherited, from which arose the legal presumption that the property which fell to his share at the division was deemed to have been his from the beginning. A remarkable coincidence! There being no inherent contradiction in the concept Bererah, the Babylonian Halakah, modifying the older view, established the compromise that in Biblical commands the principle En Bererah is followed, and in rabbinical commands Yesh Bererah. But the interpretation of the Babylonian Talmud of the dicta of the Tannaim contains innumerable contradictions, and is a shoreless ocean in which the commentator is lost. By distinguishing between the Palestinian Halakah and the Babylonian, it is believed that the matter has been made clear.

BIBLIOGRAPHY: R. Nissim to Ned. 45b; Solomon Luria, in his work *Yam Shel Shelomoh* to B. K. 31, pp. 34-40, Sülkow, 1836. At the end he enumerates thirty cases referring to Bererah and arranges them in four classes. R. Judah Benjamin Rapoport, in his work *Simlat Benjamin*, pp. 23-27, Dyhernfurth, 1790, criticizes Luria's disquisition. R. Isaac Lampronti, in his work, *Pahad Yizhak*, Venice, 1749, s.r., enumerates most of the passages of the Babylonian Talmud, and also refers to the literature of the responsa. R. Baruch Benedict Goitein, in *Kesef Nibhar*, Lemberg, 1867, classifies and discusses most of the passages together with the codes of Maimonides and *Shulhan 'Arukh*, and he finally distinguishes three classes of Bererah. R. Abraham Tikin wrote a comprehensive article on this subject in his book *Petah ha-Bait*, pp. 16b-22a, Dyhernfurth, 820; he goes into detailed discussion and attempts to solve numerous contradictions by pilipustic methods of argument. R. Jacob Zebi Jollesch, in his book *Melo ha-Ro'im*, Warsaw, 1880, has gathered all the material and has mentioned the various rabbis that adopted the principle Yesh Bererah and those that adopted the principle En Bererah. Aryeh Löw, the author of *Sha'agat Aryeh*, Brünn, 1797, treats of Bererah in numbers 89 to 93, pp. 67-70; finally R. Elijah Wilna, on *Orah Hayyim*, 413, 1, has an excellent summary of the various views concerning Bererah. He is the only one of all the above-named commentators and authors of responsa who suggests the difference in the conception of Bererah between the Jerusalem and the Babylonian Talmud (*Orch De'ah*, 331, 27); *Monatsschrift*, 1849, pp. 369-377; Auerbach, *Das Jüdische Obligationenrecht*, Berlin, 1870, pp. 529 *et seq.*, 1900, p. 50, note 1 (note 2, *ib.*, must be corrected according to the above views). The lexicons of the Talmud (s.r.) of Levy, Kohut, and Jastrow.

BERESHIT. See GENESIS.

**BERESHIT RABBAH** (called also by the ancients **Bereshit derabbi Osha'yah** [**Hosha'yah**], **Bereshit rabbah derabbi Oshaya** [**Hoshayiah**], **Bereshit derabbi Hosha'yah rabba**, **Baraita derabbi Osha'ya**): Expository Midrash to the first book of the Pentateuch, assigned by tradition to the amora Hoshaiah, commonly Osha'yah, who flourished in the third century in Palestine. The Midrash forms a haggadic commentary on the whole of Genesis, in keeping with the character of the Midrashic exegesis demanded by that age. In a continuous sequence, broken only toward the end, the Biblical text is expounded verse for verse, often word for

word; only genealogic passages, and such as furnish no material for exposition (as the reiterated account of Abraham's servant in Gen. xxiv. 35-48), are omitted.

The Bereshit Rabbah contains many simple explanations of words and sentences, often in the Aramaic language, suitable for the instruction of youth; and also the most varied haggadic expositions popular in the public lectures of the synagogues and schools. According to

**Its  
Simplicity  
and  
Sublimity.**

the material or the sources at the disposal of the editor of the Midrash, he has strung together various longer or shorter explanations and haggadic interpretations of the successive passages, sometimes anonymously, sometimes citing the author. Again, he adds to the running commentary longer haggadic disquisitions or narratives, connected in some way with the verse in question, or with one of the explanations of it—a method not unusual in the Talmud and in other Midrashim. The first chapters of Genesis, on the creation of the world and of man, naturally furnished especially rich material for this mode of exegesis. Whole sections are devoted to comments upon one or two verses of the text. Many references to contemporary philosophical thought are made with the purpose of refuting the opinions of the heretics. References to contemporaneous conditions and historical events also occur; indeed, it is characteristic of the Midrash to view the personages and conditions of the Bible by the light of contemporary history. Though the stories embraced in Genesis furnished little occasion for comments on legal topics, Bereshit Rabbah contains a few short halakic sentences and quotations taken from the Mishnah and other sources. This Midrash is eminently rich in sublime thoughts and finely worded sentences, in all kinds of parables, in foreign words, especially Greek, used freely and intentionally for the sake of elegance of diction. Some Greek words, to be found nowhere else in Jewish literature, have been preserved in the Bereshit Rabbah (*e.g.*, קונדיליון, κόνδυλος, section i. in 'Aruk and MSS. ; אליתרופולים, Ἐλεθηρόπολις, section xli. (xlii.) in 'Aruk, corrupted in editions).

This extensive and important Midrash, which forms a complete commentary on Genesis, and exemplifies all points of Midrashic exegesis, is divided

into parashiyot (sections, chapters);

**Form.** and derives its peculiar character from the poems which head these sections;

it is by these means distinguished from the tannaitic Midrashim to the other books of the Pentateuch, such as Mekilta, Sifra, and Sifre. Every chapter of the Bereshit Rabbah is headed by the first verse of the passage to be explained, and is introduced, with few exceptions, by one or more prefatory remarks starting from a verse taken from another Biblical passage as text—generally from the Hagiographa. By various explanations of these texts a transition is effected to the exposition of the particular verse of Genesis heading the parashah. There are in the Bereshit Rabbah (i.-xcvi.) about two hundred and thirty of these passages. A part of them—about seventy—are cited with the name of the haggadists with whom they originated or whose explanation of the verse in

question was used as an introduction to the parashah of the Bereshit Rabbah: as in section i. the six prefatory passages of R. Osha'yah, R. Huna in the name of Bar Kappara, R. Judah b. Simon, R. Isaac, R. Joshua of Sikoin, in the name of R. Levi, and R. Tanhuma.

The greater number of these passages are anonymous and may perhaps be ascribed in part to the

**In-  
troductory  
Passages.**

author of the Bereshit Rabbah: they begin with the verse of the text, which very often stands at the head of the poem without any formula of introduction—more frequently so in the best manuscripts than in the editions. The structure of the prefatory passages is as various as their execution and their extent. In some only the introductory text is given, its application to the verse of Genesis to be expounded being self-evident or being left to a later working out. The single prefaces, of which there is a large number, contain explanations of their text which refer entirely or in its last part to the verse or passage of Genesis to be expounded in that parashah. The composite introductions consist of different expositions of the same Biblical verse, by different haggadists, strung together in various ways, but always arranged so that the last exposition—the last link of the introduction—leads to the exposition of the passage of Genesis, with the first verse of which the introductions often close. For these introductions, which are often quite lengthy, the material for the several expositions was ready at hand. The original work on these passages consisted principally in the combining and grouping of the several sentences and expositions into a coordinate whole, always so arranged that the last member forms the actual introduction to the exposition of the parashah. Definitely characterized as they are in their beginning by these introductions, the parashiyot of the Bereshit Rabbah have no formal ending, although several show a transition to the Biblical passage that is expounded in the following parashah.

In the manuscripts, as well as in the editions, the parashiyot are consecutively numbered; in very many

**The  
Principle  
of Division.** quotations in the 'Aruk the passage of the Bereshit Rabbah is mentioned by the number of the parashah. The total number of the parashiyot, both in

the manuscripts and in the editions, varies from 97 to 101. Nearly all the manuscripts, however, as well as the editions, agree in counting 96 chapters, up to the exposition on Gen. xvii. 28 *et seq.* inclusive (beginning of the pericope Wayehi); and to this point the best manuscripts, as well as the 'Aruk and Yalkut, differ only in a few parashiyot from the division of the chapters in the editions. Hence the counting by chapters or sections is to be considered much older than has been assumed. The principle of division followed in the parashiyot of the Bereshit Rabbah was evidently that of the Biblical text itself as fixed at the time of the compilation of this Midrash, in accordance with the "open" (פתוחות) and "closed" (סתומות) paragraphs of Genesis. There are separate parashiyot in the Midrash to almost all these sections as they are still found in Genesis, with the exception of the genealogical passages. But

there are parashiyot that bear evidences of relation to the pericopes ("sedarim") of the Palestinian triennial cycle, and a careful investigation of these may lead to the discovery of an arrangement of sedarim different from that heretofore known from old registers. However, there are parashiyot, as mentioned above, especially in the beginning of the Midrash, in which only one or a few verses at a time are expounded. The sedarim of the customary one-year cycle are not regarded at all in the divisions of the Bereshit Rabbah, neither are they marked in the best manuscripts or in the *editio princeps* of the Midrash; the parashiyot, therefore, can not be regarded as mere subdivisions of the sedarim, as which they appear in later editions of this Midrash.

Far more difficult than any question concerning the outward form of the Bereshit Rabbah is that of deciding how much of its present contents is original material included in it, and how much of later addition. The parashiyot formed the framework that was to contain the exposition of a number of Biblical verses in continuous succession.

But with the notoriously loose construction of the haggadic exegesis it became easy to string together, on every verse or part of a verse, a number of rambling comments; or to add longer or shorter haggadic passages, stories, etc., connected in some way with the exposition of the text. This process of accretion took place quite spontaneously in the Bereshit Rabbah, as in the other works of the Talmudic and Midrashic literature; between the beginning and the completion of these works—if ever they were completed—a long period elapsed during which there was much addition and collection.

The tradition that R. Hoshay'ah is the author of the Bereshit Rabbah may be taken to mean that he began the work, in the form of the running commentary customary in tannaitic times, arranging the exposition on Genesis according to the sequence of the verses, and furnishing the necessary complement to the tannaitic Midrashim on the other books of the Pentateuch. The ascription of the Mekilta to R. Ishmael and of the Jerusalem Talmud to R. Johanan rests on a similar procedure. Perhaps the comments on Genesis were originally divided into parashiyot that corresponded with the above-mentioned sections of the text, and that contained the beginnings of the simplest introductions, as indeed the first traces of such introductions are found also in the tannaitic Midrash. But the embellishment of the parashiyot with numerous artistic introductions—which points to a combination of the form of the running commentary with the form of the finished homilies following the type of the Pesikta and Tanhuma Midrashim—was certainly the result of the editing of the Bereshit Rabbah that is now extant, when the material found in collections and traditions of the haggadic exegesis of the period of the Amoraim was taken up in the Midrash, and the Bereshit Rabbah was given its present form, if not its present bulk. Perhaps the editor made use also of different collections on the several parts of Genesis. The present Bereshit Rabbah shows a singular disproportion between the length of the first sidra and that of the eleven others. The sidra Bereshit alone comprises twenty-

nine parashiyot, being more than one-fourth of the whole work. Is there not a possibility that the present Bereshit Rabbah is a combination of two Midrashim of unequal proportions; and that the twenty-nine parashiyot of the first sidra—several of which expound only one or a few verses—constitute the extant or incomplete material of a Bereshit Rabbah that was laid out on a much larger and more comprehensive scale than the Midrash to the other sidrot?

The work may have received its name, "Bereshit Rabbah," from that larger Midrash at the beginning of Genesis, unless that designation was originally used to distinguish this Midrash from the shorter and older one, which was ascribed to R. Hoshay'ah.

The opinion that the name of the Midrash finds its explanation in the first words, "R. Hoshay'ah rabbah began," etc., as if the word "rabbah" belonged originally to the name of the amora, and that the name of the work, "Bereshit Rabbah," is an abbreviation of "Bereshit derabbi Hoshay'ah rabbah," is untenable for the reason that in the best manuscripts—and in a very old quotation—the name "R. Hoshay'ah" stands without the addition "rabbah" in the first preface at the beginning of the Midrash. It would be singular if the authorial designation had been lost and yet the attribute had remained in the title of the Midrash.

It is difficult to ascertain the exact date of the actual editing of the Bereshit Rabbah; it was probably undertaken not much later than that of the Jerusalem Talmud. But even then the text was probably not finally closed, for longer or shorter passages could always be added, the number of prefatory passages to a parashah be increased, and those existing be enlarged by accretion. Thus, beginning with the sidra Wayishlah, extensive passages are found that bear the marks of the later Haggadah, and have points of connection with the Tanhuma homilies. The passages were probably added at an early date, since they are not entirely missing in the older manuscripts, which are free from many other additions and glosses that are found in the present editions. In the concluding chapters the Bereshit Rabbah seems to have remained defective. In the parashiyot of the sidra Wayiggash the comment is no longer carried out verse by verse; the last parashah of this pericope, as well as the first of the sidra Wayehi, is probably drawn from Tanhuma homilies; the comment to the whole 48th chapter of Genesis is missing in all the manuscripts (with one exception), and to verses 1-14 in the editions; the remaining portion of this sidra, the comment on Jacob's blessing (Gen. xlix.), is found in all the manuscripts—with the above-mentioned exceptions—in a revision showing later additions, a revision that was also used by the compiler of the Tanhuma Midrash edited by Buber.

The best manuscript of the Bereshit Rabbah is found in the Codex Add. 27,169 of the British Museum, London; it was used for the critical edition issued by J. Theodor.

On this and other manuscripts compare: J. Theodor, "Der Midrash Bereshit Rabbah," in "Monatschrift," xxxvii. 169 *et seq.*, ib. 211 *et seq.*, 452 *et seq.*; xxxviii. 9 *et seq.*; xxxix. 106 *et seq.*; variants of the

Bereshit Rabbah in 'Aruk, Yalkuṭ, and MSS.; on the division into chapters, *ib.* xxxix. 481.

Oldest editions: Constantinople, 1512 (Midr. R. on Pentateuch) (Ber. Rabbah), Venice, 1567; collective editions on Pent. and Meg., Venice, 1545; Cracow, 1587; Salonica (1544?), 1594.

Oldest commentaries: Commentary ascribed to Rashi (appeared first in the Venice ed., 1567; compare Epstein, in "Magazin für die Wissenschaft des Judenthums," 1887, pp. 1 *et seq.*); commentary by R. Naphtali Herz b. R. Menahem, Cracow, 1569; commentary by Ashkenazi Baerman b. Naphtali ha-Kohen (appeared first in the Cracow ed., 1587); commentary "Yefeh To'ar," by Samuel Yafe Ashkenazi, Venice, 1597; Prague, 1689; Fürth, 1692; more recent valuable commentaries by Wolf Einhorn, David Luria, Sam. Straschun, and others in the Wilna ed. of the Midrash. Compare further, for editions and commentaries, Steinschneider, "Cat. Bodl." **BEREZA (Cartuskaya Bereza):** Town in the district of Pruzhany, government of Grodno, Russia; situated on the river Jazelda, on the road between Brest-Litovsk and Bobruisk. The Jewish population in 1890 was 850, out of a total of 2,625.

Jews first settled in Bereza in 1629, as is evident from a document registered by Solomon Michailevich, superintendent of the Jewish congregation of Brest-Litovsk, at the city hall of that place, April 18, 1680. In this document Grand Duke Sapielha (1557-1633), betman and chancellor of Lithuania, declares to his officials of Bereza and to his heirs that, as he desires that Jews shall settle in Bereza, he grants them the privilege of building there a house of prayer where they can hold their divine service undisturbed. They shall have the right to build houses and ornament them according to their desire, and shall enjoy all the privileges granted to the Jewish inhabitants on his other estates, as Rozhana and Kosov. All these rights are also to be granted by his heirs. After the signature of Leon Sapielha on the original document is added a confirmation of the contents in the handwriting of his son, Cazimir Leo Sapielha (1609-56).

H. R.

**BEREZINO:** Village of Russia, in the government of Minsk, having a population (1898) of 1,900, almost exclusively Jews (1,824). About 25 per cent of them are artisans and laborers, chiefly loaders. Twenty-four Jewish families are engaged in gardening. The general economic condition is bad. Upon the introduction (June 14, 1897) of the government monopoly in the wine trade, 99 Jewish families were left without means of subsistence; 155 families depended upon charity for fuel; 210 applied in 1898 for charity during the Passover of that year; and the number of such applicants increases annually.

S. J.

**BERG:** An independent duchy until 1815; at present part of the Prussian Rhine province. Jews settled here at an early period. In 1298 Count Wilhelm of Berg protected them against the hordes led by RINDFLEISCH. At the time of the Black Death in 1349 many were killed by the Flagellants. Many of the Jews driven from Cologne settled in Berg. The rabbi of Cologne, "Pruno Soeskind," settled at Deutz, others went to Siegburg, and still others to Müllheim-on-the-Ruhr. A synagogue was at that time organized at Deutz, the cemetery being outside of the "Severinthor" of Cologne until in 1629 the electoral government presented to the Jews a burial-place.

Even in early times a community had existed at Siegburg, which paid to the abbot a certain sum as protection money (*Geleitgeld*), the Jews being also required to take part, like other citizens, in guarding the gates. The chief of the community acted as its judge, only criminal cases being brought before the abbot. The Jews of Siegburg were slain in 1287 on the accusation of having killed a boy, Johäncken, who was afterward canonized by the Church. Often to their detriment the Jews of Siegburg aided the archbishop and the city of Cologne with money. In 1334 Archbishop Wabram killed Meyer of Siegburg and his son Joelman, and confiscated their property.

The ghetto and synagogue at Müllheim lay in the lower part of the city, on the Rhine; the Jews burying their dead at first in the cemetery at Cologne, and afterward at Deutz. Since 1774 they have had a cemetery of their own. The settlement at Kaiserswerth also dates back to an early period. During the "Soest quarrel" 1,445 horsemen from Cleves invaded Müllheim and Deutz, plundering and carrying off the richest Jews. About 1,400 Jews of Siegburg barely escaped annihilation, a gipsy woman having accused them of a murder. In 1588 the community of Deutz suffered by fire. In 1583 they fled before the troops of Archbishop Truchsess von Waldenburg (who tried to regain his diocese, from which he had been deposed) to Cologne; again, in 1631, before the Swedes, and were temporarily received back on payment of large sums of money. In 1665 some students plundered the Jewish houses in Deutz. In the seventeenth century the Jews of Siegburg were forced to entertain troops contrary to the stipulations of their charter. A Jew, David, was compelled in 1663 to pay the regular taxes, in addition to the eight gold guldens, protection money, he was already paying. The community of Deutz paid one-seventh of all

the taxes; that of Mülheim, as much as any one who owned three "morgen" of land. Lazarus van Geldern became court factor at the court of the principality of Jülich-Berg in 1727. In 1755 the Jews suffered by a violent earthquake, and in 1784 by the floods of the Rhine, during which the synagogue was destroyed. A new synagogue at Deutz was consecrated in 1786, and one at Mülheim two years later. On the advent of the French army all the restrictions placed upon the Jews, such as poll-tax and protection money, were abolished. In 1808 there were 2,905 Jews at Düsseldorf, 1,264 at Cologne, and 1,552 at Cleves.

Rabbi Süsskind, mentioned above, was succeeded by Vivis, well known from his opposition to the resolutions of the synod of Bingen, under Seligmann Bing Oppenheim, at the beginning of the fifteenth century. Vivis was also physician to the duke of Berg. The seat of the district rabbinate was transferred from Deutz to Bonn in the sixteenth century. At this time there also lived at Deutz the physicians Sander (who had permission to visit Cologne) and Solomon ben Isaac Joseph (1560-1631). The latter's son, also a physician, died in 1657. In the seventeenth century the physicians Judah Loeb ben Nathan (died 1670), Jacob ben David (died 1688), Jeremiah ben Solomon of Coblenz (died 1688), and a woman physician named Vögele (died 1731) lived at Deutz, as well as the scholars Kossmann Levi of Essen, and Moser. The latter was the son-in-law of Rabbi Judah Maehler of Cologne, and author of several works.

Among the rabbis of Düsseldorf may be mentioned Samson Levi Fröhlich (1706-50), Mordecai Halberstadt (1751-69), Jacob Brandeis (1769-74); and Judah Loeb Scheuer (1779-1821). Isaac Bonem Rappoport was district rabbi. Jacob Kopenhagen wrote a small book on the floods of the Rhine in 1784.

**BIBLIOGRAPHY:** Brisch, in *Israelit*, 1879, Nos. 4, 6-8; Wedell, *Gesch. der Juden in Düsseldorf*, pp. 80-82.

**D.** **BERGAMO:** City in northern Italy. Here, as in other cities subject to the government of the Venetian republic, the right of residence was granted to Jews, who were chiefly engaged in money-lending. Documents relating to the Jews, and dating back to 1479, are preserved in the City Library and in the municipal archives. But Jews were certainly in Bergamo before that time. They are found in the large neighboring village, Martinengo, where they could own land and houses ("Archivio di Stato Veneto, Senato, Terra," *reg.* 16, *carte* 25). In 1507 a decree was issued compelling Jews to wear a yellow girdle or a red hat. Neither in Bergamo, in Martinengo, nor in any other of the surrounding places are they known to have formed a congregation. They may have had a synagogue and a cemetery, but no traces of these remain. There are no longer any Jews at Bergamo.

**B.** **BERGEL, JOSEPH:** Neo-Hebraic writer of the first part of the nineteenth century. He was a private teacher at Prossnitz, Moravia. In 1826 and 1827, he published some articles and poems in the annual "Bikkure ha-Ittim" (vi. 40, 50; vii. 3, 123, 133, 135). The best of these are the articles, "Hash-'arat ha-Nefesh" (The Immortality of the Soul) in vii. 3-12, and the poem "'Al Keber Abi" (On the Grave of My Father) in vii. 123. He translated a few of Confucius' sayings into Hebrew from the French.

**BIBLIOGRAPHY:** Steinschneider, *Cat. Bodl.* col. 197; Delitzsch, *Zur Geschichte der Jüdischen Poesie*, p. 109.

**S.** **I. BER.**

**BERGEL, JOSEPH:** Judæo-German writer, probably of the seventeenth century. He was the author of "Ein Schön Göttlich Lied," a religious poem. It seems to have been printed at Prague in the seventeenth century as an addition to the poem "Jüdischer Stamm" by Joseph ben Judah Heilbronn.

**BIBLIOGRAPHY:** Steinschneider, *Cat. Bodl.* col. 563.

**G.** **I. BER.**

**BERGEL (BERGL), JOSEPH:** Hungarian physician and author; born Sept. 2, 1802, at Prossnitz, died 1885 at Kaposvar. He was well versed in rabbinical and modern Hebrew literature, and attempted to introduce a new meter into Hebrew poetry in a work he published under the title "Pirḥe Leshon 'Eber" (Hebrew songs), Gross-Kanizsa, 1873. In the German language he wrote: "Studien über die Naturwissenschaftlichen Kenntnisse der Talmudisten," Leipsic, 1880; "Die Eheverhältnisse der Alten Juden im Vergleich mit den Griechischen und Römischen," *ib.* 1881; "Der Himmel und Seine Wunder, eine Archäologische Studie nach Alten Jüdischen Mythografien," which was also published in Leipsic in the same year under the title "Mythologie der Alten Hebräer," 1882. His most important work is "Die Medizin der Talmudisten" (Leipsic and Berlin, 1885), with an appendix on anthropology as it is found in ancient Hebrew writings. These works are not very profound, but they bring together a certain amount of useful information. Bergel also wrote "Geschichte der Juden in Ungarn," published in 1879 in Hungarian and German.

**BIBLIOGRAPHY:** Lippe, *Bibliographisches Lexicon*, v. 1, 2; Kayserling, *Jüdische Literatur*, p. 131; *Revue Etudes Juives*, x. 206, 207; *Ha-Zefrah*, 1885, No. 12.

**S.** **P. Wl.**

**BERGEL, YOM-TOB:** Merchant and communal worker of Gibraltar; born in 1812; died at Gibraltar Oct. 14, 1894. He was one of the wealthiest and most respected merchants of the Gibraltar Jewish community, and for thirty years held the position of president of the Hebrew community. He rendered many communal services; reorganized the Hebrew Poor Fund when it was in a very precarious state; and as one of the trustees of the Jewish estates in Gibraltar acquired, by his efforts, valuable possessions for the benefit of the poor among his coreligionists. Bergel was one of the first members of the Board of Sanitary Commission, a member of the Exchange Committee, and took an active part in the management of the Relief Fund at the time of the cholera epidemic in 1865.

**BIBLIOGRAPHY:** *Jewish Chronicle*, Oct. 26, 1894.

**J.** **G. L.**

**BERGER, EMILE DE:** Austrian oculist and medical author; born at Vienna Aug. 1, 1855. He received his education at the University of Vienna.

From 1882 to 1887 he was lecturer at the University of Graz, and from 1890 to 1896 professor of ophthalmology at Paris. Berger, who, in 1882, was the inventor of an ophthalmoscope having an automatic action of two Rekoss disks, won the Prix Montyon in 1888, and the Prix Rénusat in 1892, for researches in this line of work. He was also the president of the ophthalmic congress held in Paris in 1894.

Berger is the author of: "Gehirn und Retina der Anthropoiden," 1878; "Der Hornhautspiegel," 1886; "Krankheiten der Keilbeinhöhle und des Siebbeinlabyrinthes," 1886; "Beiträge zur Anatomie des Auges," 1887; "Chirurgie des Sinus Sphenoidalis," 1890; "Les Maladies des Yeux dans Leurs Rapports avec la Pathologie Générale," 1892.

BIBLIOGRAPHY: *Revue Bibliographique des Notabilités Françaises Contemporaines*, iii.

S. E. Ms.

**BERGER, ERNST**: Austrian painter; brother of the oculist Baron Emile Berger; born at Vienna Jan. 3, 1857; educated at the gymnasium, the commercial high school, and in 1874 at the Academy of Arts of his native town. Though intended by his father for a commercial career, he soon turned to the study of painting. He became the pupil of Professor Eisenmenger and the painter Hans Makart. Under the latter's direction Berger painted the pictures "Fondaco de' Turchi in Venedig," exhibited at the Vienna Künstlerhaus in 1882; "Burial of Sarah in the Cave of Machpelah"; and "Rebekah Leaving Her Father's House." Since 1882 Berger has lived and worked in Munich. His chief productions are "Traum vom Jungbrunnen," 1886, which obtained the silver medal at the Melbourne Exhibition, and "Altvenetianische Brunnenweihe," 1892.

Berger is also the author of "Beiträge zur Entwicklungs-Geschichte der Maltechnik," 1893-97; "Katechismus der Farbenlehre," 1898; and the articles "Van Eyck's Technik," in "Zeit. für Bildende Kunst," 1895, and "Pflege der Bilder in Gemäldegalerien," in "Kunst für Alle," x., etc.

S.

**BERGER, OSCAR**: German electrotherapist and medical author; born at Münsterberg, Silesia, Nov. 24, 1844; died at Ober-Salzbrunn, Silesia, July 19, 1885. He was educated at the gymnasium of his native town and at the universities of Berlin, Vienna, and Breslau, receiving his degree as doctor of medicine in 1867. In 1869 he engaged in practise as a physician in Breslau, making electrotherapy his specialty. In 1873 he became privat-docent at the University of Breslau, being the first at that institution to lecture on nervous diseases. Five years later he was elected assistant professor. In 1877 he was appointed chief consulting physician and medical inspector of the Breslau poorhouse.

Berger made a special study of neuralgia of the joints, of the relation of neuralgia to diabetes and nephritis, of neuralgia of the face and of the genitals, of the relation of syphilis to tabes, and (with Leidenheim) of hypnotism.

A very prolific writer, he contributed many articles on neurology and electrotherapy to technical journals, and was one of the editors of the "Neurolo-

gisches Centralblatt." For Eulenburg's "Encyklopädie der Gesammten Heilkunde" he also wrote many articles, including "Epilepsie," "Beschäftigungsneurosen," "Paralysis Agitans," "Tetanie," etc. His best-known works are "Die Lähmung des Nervus Thoracicus Longus," Breslau, 1873; and "Zur Lokalisation der Corticalen Sehsphäre beim Menschen," Breslau, 1885.

F. T. H.

**BERGÈR, PHILIPPE**: Christian professor of Hebrew; member of the Académie des Inscriptions et Belles-Lettres; born at Beaucourt, Haut-Rhin, September, 1846; brother of Samuel Bergèr. Graduating at the University of Strasburg, he settled in Paris, where he became professor of Hebrew in the Faculté de Théologie Protestante (now a part of the University of Paris), and sublibrarian of the Institut de France.

Disciple and intimate friend of Renan, whom he succeeded in the chair of Hebrew at the Collège de France, Bergèr devoted himself to the study of Semitic epigraphy, for which his friend and master had a predilection. He collaborated in the redaction of the "Corpus Inscriptionum Semiticarum," published by the Académie.

Among Bergèr's numerous writings two are of special interest for Jewish scholars: (1) "L'Ecriture des Inscriptions Sémitiques," Paris, 1880; and (2) "Essai sur la Signification Historique des Noms des Patriarches Hébreux," Paris, 1887.

**BERGÈR, SAMUEL**: French professor of Protestant theology; secretary and librarian of the Faculté de Théologie Protestante, Paris; born at Beaucourt, Haut-Rhin, May 2, 1843; brother of Philippe Bergèr. He attended the lectures on literature at the Sorbonne, and studied theology at the University of Strasburg, whence he graduated. Among Bergèr's writings the following are interesting for the study of the Bible: (1) "La Bible au XVI. Siècle; Etude sur l'Origine de la Critique," Paris, 1879; (2) "De Glossariis Bibliis Quibusdam Medii Ævi," Paris, 1879; (3) "La Bible Française au Moyen Age; Etudes sur les Anciennes Versions de la Bible Ecrites en Prose de la Langue d'Oïl," Paris, 1884; (4) "Histoire de la Vulgata," Paris, 1893.

**BERGSON, MICHAEL**: Musician; born in Warsaw 1818; died at London March 9, 1898. He was a member of an eminent Jewish family of Warsaw, with which city he always preserved connection. Early in life he became a pupil of Chopin, and afterward settled in Geneva, where he became professor and later on principal of the Conservatoire de Musique. Professor Bergson resided for the greater part of his working life in Switzerland, and in the principal cities of France and Italy; but the last twenty-five years of his life he spent in London. He was, as a pianist, one of the personal inheritors of the Chopin tradition; but he also attained to some distinction as a composer, many of his productions

exhibiting inventive power, taste, and charm. He wrote two operas: "Louisa de Montfort" and "Salvator Rosa." Among his many hundreds of songs, the "Two Hearts," the "Better World," and the "Sérénade Moresque," as well as the clever piano-forte sketch, "A Storm on the Lagoons," were very widely known and admired. His more technical productions, too, have received much commendation, especially the "Douze Grandes Etudes," op. 62, and the "Ecole du Mécanisme," op. 65. Mention should also be made of his "Flute Sonata," of his "Concert Symphonique," and his "Polonaise Héroïque." One of his best-known pieces is the "Scena ed Aria" for clarinet, played by military bands throughout the world.

J.

G. L.

**BERGTHEIL, JONAS**: Pioneer of Natal, South Africa; born in England about 1815; died 1902; emigrated to South Africa about 1844, at a time when the resources of the country were scarcely known, and the mode of living extremely primitive. Settling among the Boers as a farmer, Bergtheil was treated by them with religious tolerance. He served in their government as a member of the Legislative Council from 1855 for eleven years, being four times reelected and resigning office only on his return to England in 1866. During a visit to England in 1847, he advocated, unsuccessfully, emigration to the Cape; then, passing to Germany, his arguments were more successful, and he took with him forty families, who founded a settlement in "New Germany," which trained some excellent colonists. Bergtheil was a large landowner in Cape Colony, possessing at one time nearly 200,000 acres, when land was estimated at the rate of threepence an acre.

Returning to England in 1866, Bergtheil identified himself with the communal institutions in London, serving as warden of the Bayswater Synagogue and as president of the Bayswater Jewish schools, retiring from the latter in 1900.

J.

G. L.

**BERIAH**: 1. A son of Asher, representing, however, not an individual, but a clan (Gen. xlvii. 17; Num. xxvi. 44, 46). A member of the clan was called a **Beriite** (Num. xxvi. 44). The name is also found in the genealogical list, I Chron. vii. 30, 31.

2. A clan of Benjamin (I Chron. viii. 13).

3. A clan of Ephraim (I Chron. vii. 21-23). The chronicler here adds an explanation of the name, "because it went evil with his [father's] house." It has been supposed by some (Bertheau, Commentary, *ad loc.*) that Nos. 2 and 3 are identical, and that Beriah of Benjamin was associated with Ephraim because of its services to that tribe.

4. A Levite of the Gershon line (I Chron. xxiii. 10, 11).

G.

G. B. L.

**BERIAH**, or **'OLAM HA-BERIAH** (the World of Creation): Cabalistic expression for the second of the four celestial worlds of the Cabala, intermediate between the World of Emanation (**AZILUT**)

and the World of Formation (**YEZIRAH**), the third world, that of the angels. It is, accordingly, of the purest essence and without admixture of matter.

K.

**BERIT MILAH**. See **CIRCUMCISION**.

**BERKAMANI** or **BARKAMANI** (ברקמאני) **IBN ABU AL-HASAN** (called **Al-Isra'ili al-Iskandari**): Physician and author; lived probably in the first half of the thirteenth century, and wrote for an emir (Manşur?) a treatise on hygiene in ten chapters, called in the preface: **אלמקאלה אלמחסינה פי חפשי אלנהה אלברניה**. There is a copy of this medical work in manuscript in the Imperial Library of Berlin, and Steinschneider has given an exhaustive description of it in his "Catalogue." Steinschneider rejects the identification of Berkamani with one Jefet b. Sa'id of the twelfth century; though at one time he held him to be the probable author of a responsum (השובה) in Codex Petersburg 625 (compare Neubauer, "Aus der Petersburger Bibliothek," 1866, pp. 25, 118, note xxi.). In the preface to this work it is stated that the treatise was compiled at the request of an Alexandrian statesman, whose name is conjectured to be either Al-Muhsin or Al-Manşur, and to whose personality reference is made on page 91b of the manuscript. The fact that he mentions no earlier author than Maimonides, whom he calls **מוסי אלקרטיבי** (Moses of Cordova), makes the tentative date, above given, all the more probable. It would seem from his familiarity with medical literature that he was a physician.

**BERKO, JOSSELEWICZ**. See **BEREK, JOSELOVICH**.

**BERKOVITS, LAJOS**: Hungarian violinist; born at Budapest in 1874. Here he passed through the schools and finished his musical education. He was graduated from the National Academy of Music, where his teachers were Jenö Hubay and David Popper. In 1895 he went to Paris, where he entered the celebrated Lamoureux orchestra as first violinist, in which capacity he made a tour through England. As a soloist his appearances were frequent and invariably successful. In 1896 he received an engagement in the royal orchestra of the opera at Budapest, and he is still a member of that body as well as of the well-known Grünfeld quartet.

**BERKOWICZ, JOSEF**: Officer in the Polish army; son of Colonel BEREK (Berko). He took part in the battle of Kock, in 1809, in which his father was killed. When he quitted the military service in 1815, he was appointed forester of the government forests of Troki, and in 1826 chief forester of the district of Bielsk.

'During the Polish revolution of 1830 Berkowicz served under General Rozycky as chief of squadron

of the Fifth Regiment, and at the end of the war he removed to Besançon, France. Soon after he settled permanently in England, where he wrote his novel, "Stanislaus, or the Polish Lancer in the Suite of Napoleon from the Island of Elba," which was published in 1846 by his family after his death. He left two sons, Leon and Josef, and his widow, who returned to France, where she died in poverty.

### BERKOWITZ, BENZION JUDAH BEN

ELIAHU: Russian Hebrew scholar; born July 23, 1803; died at Wilna May 11, 1879. He is the author of the following works devoted to the study of the Targum Onkelos: (1) "Oteh Or," Wilna, 1843; (2) *Lehem ve-Simlah*, 2 vols., *ib.* 1850-55; (3) "Haliot Semalot," supplement to vol. ii., *ib.* 1874; (4) "Abne Zion," *ib.* 1877, addenda to Nathan Adler's commentary on Onkelos.

Berkowitz's contributions to the study of the Onkelos are very valuable, their merit being acknowledged by such scholars as Berliner and other specialists on the Targum. He also contributed to the Hebrew periodicals "Pirhe Zafon," "Ha-Karnel," "Ozar Hokmah," and "Ha-Maggid."

**BERKOWITZ, HENRY:** Russian-English educator; born at Warsaw in 1816; died in Gravesend April 5, 1891. He came to London in 1841, and attracting the notice of Chief Rabbi Adler, he was made a member of the latter's household. He afterward opened a school at Gravesend, and by his energy and zeal gradually obtained for it an established position and reputation. Among his scholars were numbered some of the most prominent men in the community. Berkowitz was held in high esteem in non-Jewish circles in Gravesend, made friends among all classes and creeds, and local honors were bestowed on him in abundance, among them that of Justice of the peace, until, in 1887, he was elected Mayor of Gravesend. He was concerned in almost every philanthropic movement of the town.

**BERKOWITZ, HENRY:** American rabbi; born at Pittsburg, Pa., March 18, 1857. He was educated at the Central High School of his native city, at Cornell University, and at the Hebrew Union College of Cincinnati, O. Berkowitz has held the position of rabbi of the Sha'are Shamayim congregation in Mobile, Ala., 1883-88; of the B'nai Jehuda congregation in Kansas City, Mo., 1888-92; and of the Rodoph Shalom congregation, Philadelphia, Pa., since 1892. He is the founder and chancellor of the JEWISH CHAUTAUQUA SOCIETY since 1893, one of the board of governors of the Hebrew Union College, and a member of the publication committee of the Jewish Publication Society. He is a member of the first or pioneer class of Jewish ministers that graduated from the Hebrew Union College. The published works of Berkowitz are as follows:

"Bible Ethics," 1883; "First Union Hebrew Reader" and "Second Union Hebrew Reader," 1883; "Judaism and the Social Question," 1888; "The Pulpit Message," 1892; "The Open Bible," 1896—a guide to a choice of reading from the Old Testament, taking account of the critical standpoint; "Kiddush: Sabbath Sentiment in the Home," illustrated, 1898. Berkowitz has contributed many papers to various Jewish and secular journals.

**BERLIJN, ANTON (ARON WOLF):** Conductor and composer; born at Amsterdam May 21, 1817; died there Jan. 16, 1870. He wrote nine operas, seven ballets, an oratorio ("Moses auf Nebo"), a symphony, a cantata, a mass, several overtures, chamber-music, etc. Of these his symphony, performed by Spohr at Cassel, 1857, is undoubtedly his best work. Berlijn was a skilful contrapuntist, and his compositions are distinguished by grace and brilliancy, though their popularity was confined principally to Holland.

During his long service as conductor at the Royal Theater at Amsterdam, he was held in high regard by the king, who in 1860 bestowed upon him the decoration of the order of merit of the king of Holland. In addition to this he received the gold medal for merit of the king of the Belgians (1845), and similar decorations from the kings of Denmark (1845), Greece (1846), and Sweden (1848), the emperor of Austria (1848), Prince Frederick of the Netherlands (1858), and the grand dukes of Saxe-Coburg (1864) and Nassau. Berlijn was also a member of the St. Cecilia Society of Rome, of the Archaeological Society of Athens, etc.

**BERLIN:** Capital of Prussia and of the German empire. Though mentioned as early as the year 1225, it was an unimportant place during the whole of the Middle Ages. Not much is known of the Jews there during that period, yet there is enough to show that they shared the same fate as their coreligionists of that time in other cities and countries. At the beginning of the fourteenth century the "Reichsgräfin" (countess of the empire) Agnes presented the Jews of Berlin to the magistrate. They were expelled during the Black Death, and their synagogue was given to a Christian citizen (1350); but in accordance with the spirit of the Middle Ages they were allowed to return in 1354. They were not, however, permitted to have a public synagogue, but had to content themselves for a number of years with worshiping in private houses. There is no further mention of the Jews until the beginning of the sixteenth century. In 1509 the Jews of the neighboring Bernau were accused of desecrating the host, and thirty-eight of them, alleged to have committed the crime, were publicly burned by order of the elector Joachim I. (July 19, 1510). Only two accepted baptism, and these were beheaded, the sentence of death at the stake having been commuted to this as "an act of grace." As the usual consequence of such occurrences, the Jews generally were expelled; but they apparently were received again within a very short time, for in the fourth decade

of that century the magistrate again complained of them. About the same time, the court Jew Lippold, favorite of the elector Joachim II., became especially important, he having been entrusted by the latter with the superintendence of all Jewish affairs. When Joachim died suddenly (1571), his successor, Johann Georg, accused Lippold of having murdered the elector. Lippold's admissions on the rack, and the books on magic found in his possession, furnished to his enemies sufficient evidence to procure his condemnation and execution (Jan. 28, 1573). Again an expulsion of the Jews followed.

The real history of the Jewish community of Berlin does not begin until the year 1671. When the Jews were expelled (1670) from Vienna, under Emperor Leopold I., the great elector, who previously had shown his unprejudiced attitude toward the Jews by admitting two Jewish students to the University of Frankfurt-on-the-Oder (see Tobias MOSEVIDES), signified his willingness to receive a number of Jewish families into his dominions, and ordered his resident at Vienna, Andreas Neumann, to open negotiations with the Jews of that city. The edict of admission was published May 21, 1671. The emigrants could freely engage in commerce; but usury was forbidden. They were exempt from tolls in traveling, but had to pay a yearly protection tax of eight thalers per family, and one gold florin for every marriage. In civil cases they were to be judged by the mayor, in criminal cases by the elector. They were not permitted to have a public synagogue. These privileges were at first granted for a period of twenty years. A few months later the Austrian fugitives arrived at Berlin and went to their quarters near the city walls. As the court Jew Israel Aaron was afraid of the competition of the immigrants, he succeeded in having a decree issued, Sept. 6, 1671, under which no Jews would be received in Berlin except after a careful investigation into their financial condition. Instead of the anticipated number of letters of protection, one common writ of privileges was issued to the Veit and Riess families, in which they were expressly forbidden to compete with Aaron. That day (Sept. 10, 1671) is the birthday of the Jewish community of Berlin. In 1672 a cemetery was bought for the new community, and in 1676 a burial society was founded under the name "Gemilluss Chassodim."

**The Great Elector.**

The fear of competition forced the new immigrants to protect themselves against the influx of other Jews, whom they attempted to keep away by threats of excommunication. Though they were forbidden to put this measure into force, the authorities agreed to come to them for information concerning every new immigrant, the signers to such a reference being then held responsible for the person named. This measure did not prevent many "unvergleitete Juden" (Jews having no "Geleitsbrief," or residence permit) from entering Berlin surreptitiously, thus furnishing cause for endless legislation in the electorate of Brandenburg; and the evil was not wholly remedied even by stringent measures. The great elector faithfully kept his promise to protect the Jews. On Jan. 3, 1676, a decree was issued in which occurred the following: "die Juden in Berlin in ihren Freyheiten und Privilegien nicht zu turbiren, noch zu kränken, sondern sie vielmehr dabey gebührend zu schützen" (not to disturb or worry the Jews of Berlin in their grants and privileges, but to protect them properly). But when, nine years later, an accuser, Bendix Levi, rose out of the midst of the Jews themselves, making the most violent accusations

**Privileges Granted.**

against them, he gained the ear of the great elector, who ordered that every Jew should give bonds to the amount of 1,000 thalers (Sept. 8, 1685).

The great elector died in 1688, and was succeeded by the elector Frederick III., who became king of Prussia Jan. 18, 1701. Even in swearing to the coronation oath the council brought up complaints against the Jews. As the twenty years for which the privileges of 1671 were granted were drawing to a close, Frederick instituted a commission to examine the letters of protection (May, 1688), before which every Jew had to appear, and to receive confirmation of his privileges on payment of a certain tax. Most stringent measures were taken against the "unvergleitete Juden," but all to no avail. A special commission was instituted to determine the rights of the Jews (Jan. 24, 1700). The number of Jewish families for the whole electorate was fixed at fifty. Instead of the personal protection-tax (eight thalers), the whole community was taxed in a yearly sum of 3,000 thalers; and a poll-tax was instituted. Another decree was issued (Dec. 7, 1700), which revoked the poll-tax, fixed the protection-money at 1,000 ducats, and placed some restrictions upon commerce. At the request of the shopkeepers'

Exterior of the Old Synagogue, Berlin.  
(After an engraving.)

gild, for instance, Jews were forbidden to keep public shops and stalls. A report on the execution of this measure, however, says: "Ist leyder nicht ein Buchstabe von dieser heylsamen Verordnung in Acht genommen worden" (Unfortunately not a jot of this wholesome measure received any heed). Other restrictions followed. Peddling had been forbidden (Aug. 17, 1692), and now also living in villages (Oct. 16, 1706).

Aversion to the Jews began to show itself also in other matters. Frauz Wentzel brought forward the accusation that

the Jews during the 'ALENU prayer jumped up and spat in derision of Jesus. In consequence a severe edict was issued against the prayer in September of the year 1700. An investigation was instituted, to which delegates of the Jews were called, and as a result there was issued, Aug. 28, 1703, the "Edict wegen des Judengebets 'Avenu, und das sie einige Worte ausslassen, nicht ausspeyen, noch darbey hinwegspringen sollen" (Edict concerning the Jews' prayer 'Avenu, and that they shall leave out some words, shall not spit nor jump up during its recital). This decree was often renewed. According to it the prayer was allowed only to be said in the synagogue and in a loud voice; and a Christian official was appointed to see that this injunction was carried out. It was only after many years that the decree

was revoked, at the instance of Moses Mendelssohn. About the same time appeared Johann Andreas Eisenmenger's book, "Das Entdeckte Judenthum" (Frankfort on-the-Main, 1700). Owing to the efforts of the Jews the book was forbidden by Emperor Leopold I., and continued under that ban, in spite of the repeated objections of the Prussia king Frederick I., who thereupon had it reprinted at Berlin in 1711.

In 1708 a standing commission (which had charge of Jewish affairs until 1750) was instituted, the Jews themselves taking only a very small part in

their own government. The "elders"—most of whom were chosen by the community for a period of three years, subject to confirmation by the government, though some were nominated for life—supervised mainly the collection of the taxes and the carrying out of the regulations pertaining thereto. Among the elders at the beginning of the eighteenth century were Jost Liebmann and Marcus Maguus. Personal enmity between these two grew into a communal quarrel which divided the Jews into two camps and was attended with dire results. Lieb-

mann, who married the widow of Israel Aaron, succeeded the latter in his position at court also, and acquired a large fortune by furnishing diamonds. After Aaron's death the appointment was conferred upon his widow. She gained the favor of the king, who placed her in a position entirely independent of the Jewish community, signifying his esteem by presenting her with a gold chain. While, however, the Liebmann family enjoyed the favor of the king, Maguus was the special favorite of the crown prince. The latent disharmony between the two families became apparent at a trifling occurrence during worship. Marcus Maguus insisting that Lieb-

mann had offended him. A bitter lawsuit resulted which lasted for two years, and was ended only by a royal order (May 7, 1710) commanding both parties, under pain of heavy punishment, to meet henceforth peacefully and quietly ("bey Vermeidung ernster Bestrafung hinaüfiro friedtlich und rubig sich zu begegnen"). The quarrel, how-

#### Family Quarrels.

ever, soon became a communal matter, occasion for dispute being found in the conditions of worship. It has already been mentioned that the Jews had never been permitted to have a public synagogue, the services being held in private houses. One of these was in the house of Veit and Riess. But Liebmann also insisted on having a synagogue and a bet ha-midrash; and his nephew and son-in-law, Aaron Benjamin Wolf, was

Interior of the Old Synagogue, Berlin.  
(After an engraving.)

appointed rabbi. In 1684 Liebmann's synagogue was declared to be the only official one. Nevertheless, the synagogue of Veit and Riess continued, and in 1694 was even officially recognized. In order to prevent the undesirable consequences of such a split, and more especially to injure Liebmann's widow, Marcus Magnus insisted on the necessity of a common public synagogue. The widow of course objected; but, in spite of her protests and of all the quarrels and intrigues of both parties, it was resolved to build the synagogue; and the corner-stone—in a cavity of which was placed a prayer for the royal family, enclosed in a small copper box—was laid Iyar 3, 5472 (May 9, 1712). On New-Year's Day, 1714, the synagogue was solemnly dedicated in the presence of the king and his court; and for many years thereafter it was considered the most beautiful building of its kind in Europe.

Under the new king, Frederick William I., internal improvement in communal affairs kept pace with external betterment. On May 20, 1714, the king issued a decree, for which the Jews paid 8,000 thalers, revoking that of 1700. The Jews were again permitted to keep public shops and to ask a higher rate of interest; and it was made easier for them to engage in trade.

Each privilege was extended to the first child; for the second and third a certain sum had to be paid according to the financial ability of the parents. The

merchant gild protested as usual against the amelioration of the condition of the Jews. A new commission, which was instituted Nov. 29, 1717, tried to introduce some restrictions, among them the prohibition against keeping public shops. As the Jews protested, these restrictions were not carried into effect, and the commission was dissolved. Thereupon the merchant gild of Berlin revenged itself by introducing into its by-laws of 1716 the following malicious paragraph: "Alldieweil die Kaufmannsgülde aus ehrlichen und redlichen Leuten zusammengesetzt, also soll kein Jude, sträfbarer Todtschläger, Gotteslästerer, Mörder, Dieb, Ehebrecher, Meineidiger, oder der sonst mit öffentlichen groben Lastern und Sünden beflecket und behaftet, in unserer Gülde nicht gelitten,

sondern davon gänzlich ausgeschlossen sein und bleiben" (Since the merchant gild is composed of honest, upright people, therefore no Jew, punishable homicide, blasphemer, murderer, thief, adulterer, perjurer, or any one else who is otherwise spotted and stained with manifest heinous vices and sins, shall be suffered in our gild, but shall be and remain entirely excluded). In 1721 a curious occurrence roused the especial anger of the king against the Jews. In that year the purveyor for the royal mint, Levin Veit, who had been considered a very rich man, died, leaving not only no property whatever, but a debt of 100,000 thalers to the royal mint. The king held the whole Jewish community of Berlin responsible for the disappearance of the money, and revenged himself in a very peculiar way. On Aug.

15 all the Jews of Berlin were summoned to the synagogue, which was surrounded by soldiers, and were placed under the ban by the officiating rabbi, Michael Hasid, in presence of the court preacher Jablonsky.

On March 16, 1722 (and in a revised form on Feb. 18, 1723), the new "Aeltesten-reglement" (Constitution of the Jewish Community) was issued, which was intended to do away with the evils that had become apparent in the administration of the com-

Plan of the Interior of the Synagogue in Lindenstrasse, Berlin.

munity, and which, in order to be brought home more thoroughly, was to be read every year in the synagogue. Under this constitution the administration consisted of two permanent chief elders, five elders, four treasurers, and four superintendents of the poor, and assistants; new officers were to be elected every three years by seven men chosen by lot from among the community. The committee were to meet every week in the room of the elders, and to keep the minutes of their proceedings; resolutions, passed by them, becoming law by a majority vote. The exclusion of a member of the community from the Passover was made dependent on the unanimous vote of the committee; the ban could be pronounced only with the consent of the rabbi; and both of these measures were to be subject to ratification by the Jews' commission. The elders were held responsible with their own money for the proper collection of the taxes, but could proceed against delinquent payers. Every year the entire board had to

report to a committee of five chosen by the community. The college of rabbis was to consist of a chief rabbi, with the title **אב בית דין** (vice-rabbi) (ראש בית דין), and two or three assessors. Other taxes were soon added to the existing ones; e.g., on pawnshops, and calendar money for the Royal Society of Science, and marriage licenses. The income from the last was paid into the treasury from which enlisted men received their pay, and its amount (4,800 thalers a year) soon became a permanent tax upon the whole community. A new decree was contemplated in 1727, to contain various restrictions on trade and commerce; but as the Jews protested against it, it was abandoned. After lengthy discussions with them there appeared, Sept. 29, 1730, the "Generalprivilegium und Reglement, wie es wegen der Juden in seiner Königlichen Majestät Landen zu halten" (General privilege and regulations to be observed concerning the Jews in his Majesty's dominions). The number of Jewish families in Berlin was limited to 120, but they soon numbered 180. A royal order that appeared suddenly, April 26, 1737, commanded the families in excess to depart; the king insisting on the measure in spite of all the protests

of the unfortunate ones and of some of the authorities. He even declared that he would rather lose the remaining Jewish families together with their yearly tax of 20,000 thalers than permit the ruinous oppression of his subjects.

The precarious condition of the Jews appeared also in other directions. When the soldiers complained of the filthy barracks that had been assigned to them, the Jews were forced to give up to them their own rented houses and to move into the barracks at a rental arbitrarily fixed by the authorities (Oct., 1737). In the same year the electoral chamber passed new regulations for the Jews of Berlin, which contained more stringent measures, having in view the gradual diminution and ultimate extinction of the community; the death of Frederick William I. (May 31, 1740) prevented their being put into execution.

The condition of the Jews was not improved under his successor, Frederick the Great (1740-86); indeed, in many respects it grew worse. The "philosopher on the throne" showed, even then, that a philosophical and liberal view of the world is not a sufficient protection against prejudice, when Jews are in question. In 1747 he limited the right of residence to one child of every family, and decreed

**Frederick the Great.** that every Jew who became bankrupt should lose his right to protection.

An attempt to determine the rights of the Jews in general was undertaken on the advice of the fiscal-general Ulden. The Jews were divided into "ordinary" and "extraordinary" Jews. The former after death could be succeeded in their rights and privileges by their first-born child (either son or daughter); the remaining children, like the extraordinary Jews in general, enjoying the right of protection for themselves only, and being prohibited from registering their children. A law was passed embodying these conditions, but when it was about to go into effect (1750), the Jews, dissatisfied with

it, and fearing that the restrictions therein contained would ruin their credit with other countries, prayed that it might not be made public; and in fact it was not published until six years later.

In order to stimulate manufacturing in his dominions, Frederick the Great tried by various and even forcible means to press the Jews into the industries. As he disliked any increase of the Jews, either by birth or by immigration, he decreed (Oct. 29, 1757) that no Jews should receive new privileges, unless they promised to start factories. On the same condition they were each permitted to register an additional child. In general, the king looked upon the Jews merely as a source of income, and imposed taxes in various ways. For instance, they had to furnish silver amounting to 8,100 marks a year; and the protection-money was increased from 15,000 to 25,000 thalers. More curious still was the so-called porcelain-tax, which obliged every Jew, when applying for any concession, to buy a certain amount of porcelain in the royal porcelain-factory, and to sell it beyond the frontier. As the cost of transportation was very large compared with the value of the goods, such transactions involved considerable loss. The king was especially strict in carrying out the principle of communal responsibility, holding the elders pecuniarily liable for any theft committed by a member of the community. The first case of this kind occurred in 1769, when the king decided that the law must be upheld, in spite of the protests of the elders and the entreaty of the directory-general ("Generaldirectorium"). In 1784 this communal responsibility of the elders was extended to cases of bankruptcy of members of the community. Thus the philosophic king endeavored by extreme measures to turn the Jews of his country into pariahs.

While these medieval measures still fettered the Jews externally, a movement was in progress that in an incredibly short time was to change their whole life and character and to prove once more that in the history of the Jews spiritual influences are more potent than brute force. Their regeneration came through German literature, which at that time began to flourish anew. In spite of its seclusion the Jewish ghetto also felt the breath of the fresh currents that revived the intellectual life of Germany. Even before Mendelssohn, Aaron Salomon Gumpertz appeared, devoting himself to the sciences, and being one of the first Jews to receive a doctor's degree. But the real representative of this period is Moses Mendelssohn (1729-86). He modestly sought

admission at the gates of Berlin as a poor "Talmud bahur," and within a short time counted the whole of the cultivated classes of Germany among his readers. His translation of the Bible, together with the regenerated Hebrew literature, was pressed into the service of the new illumination. Actuated by the same spirit, David Friedländer and Isaac Daniel Itzig founded a free school, under the name **הנוך נערים**, and, in connection with it, a Hebrew printing-establishment and book-store.

German Judaism was entirely transformed as if by magic. Not so long before, a Jew who had dared to trim his beard had, at the instigation of an

**Moses Mendelssohn.**

eminent member of the community, been commanded by a direct order of the cabinet to spare his locks; and the progenitor of the Bleichröder family had been driven from Berlin because a German book had been found in his possession. Now, the Jews were in the front rank of the promoters of German culture. The Berlin physician Marcus HERZ was an eager apostle of the philosophy of his teacher Kant, with whom he stood in close personal relations; and the lectures on physics, which he delivered at his house, were attended by the minister Zedlitz, and even by the crown prince. The salon of his wife, Henriette Herz, became the center of attraction for the most brilliant people of Germany, and for many of those of other continental countries. With the increase of enthusiasm for German culture, the indifference to and neglect of the religion of the Fathers increased also. While Mendelssohn himself and his circle still clung to their Judaism, even in the midst of the new movement, the younger

**Relaxation** generation tried to get rid of it as quickly as possible. More than one-  
**Discipline.** half of the Berlin community is reported to have been baptized within a short time. The elders strove in vain to stem this flight from Judaism by a law, which they were instrumental in having passed, to the effect that servants and children could be baptized only after producing the certified permission of their masters and parents respectively, and that strangers must be taken to their native places for the ceremony.

In 1792 the Gesellschaft der Freunde, an association of "the high-thinking and liberal against orthodoxy and immorality," was formed. In 1799 appeared the circular letter addressed to the "Very Reverend Chief Councilor of the Consistory and Provost [Probst] Teller at Berlin by some heads of families of the Jewish religion," in which the anonymous author (David Friedländer) signified willingness, in his own name and that of others, to be baptized, if they would not be obliged thereby to believe in the specifically Christian dogmas. Teller emphatically refused his request. The new generation was keenly sensitive to the lower civic status of the Jews. Hence all its efforts were united against the old general privilege, and in favor of emancipation, which had seemed to be more nearly within the reach of the Jews when Frederick William II. came to the throne (1786). The description of these efforts belongs to the history of the Prussian Jews. It is sufficient to mention here that the Jews of Berlin, with David Friedländer at their head, were among the pioneers in that movement; and they found a ready advocate of their efforts in the prime minister Hardenberg, who came into office June 6, 1810. The edict of March 11, 1812, conferred citizenship upon the Jews living in Prussia and enjoying any concessions, and made them

**Edict** subject to military service. On March  
**of March** 11, 1812. 18 the Jews sent to the king a letter of thanks which was signed by the elders David Hirsch, Bendix, Friedländer, and Gumpertz.

But this by no means ended the struggle; for even the rights previously granted were either curtailed or revoked, and new restrictions were introduced.

In spite of their sacrifices and the patriotism displayed by them during the wars of liberation, the Jews were thwarted in various ways. A strong anti-Jewish movement appeared also in the literature of the time. In 1824 the newly instituted provincial estates convened and took up the question of the position of the Jews, the estates of Brandenburg and of some of the other provinces being in favor of restricting their rights. The memorial which the elders presented to the Ministry of the Interior received no answer. Thus all efforts had again to be united in the struggle to obtain justice. The battle was waged more or less successfully, and ended finally in favor of the Jews, when the year 1848 brought the proclamation that all Prussians were equal before the law.

During those years of conflict the intellectual life of the Jews was not neglected. In 1819 the Verein für Kultur und Wissenschaft der Juden was founded by Gans, Moser, and Zunz, Heine also belonging to it. The periodical of the society appeared in 1823, edited by Zunz. But the society was dissolved in the following year, owing to the indifference of the members; and its founder, Gans, together with many members, soon thereafter renounced Judaism.

**Striving** The only remnant of this vain attempt  
**After** was the "Science of Judaism," which  
**Culture.** represented by Zunz, promised a rich harvest for the future. The education of the Jewish youth in accordance

with the new spirit received especial attention. Aside from the free school, of which Bendavid became the director in 1806, a private school, founded by Bock, was continued by Jost and S. Stern. In 1823 Zunz presented to the directors, in the name of the Verein für Kultur und Wissenschaft der Juden, a memorial advocating a reform. A commission, including Zunz, Moser, and Bendavid, was instituted for the purpose of organizing a communal school. On Oct. 3, 1825, was laid the corner-stone of a building which on Jan. 3 following was opened as a public school of four classes, under the direction of Zunz. In 1835 a school for girls was organized upon similar lines. In 1856 a religious school was founded. Training-schools for teachers were also organized. In 1840 a seminary for teachers was opened under the direction of Zunz; but it was closed nine years later by the elders. In 1858 a training-school for teachers was established under the rectorship of Horwitz.

Philanthropy also received the attention of the community. In 1804 the Brüderverein, a society for the relief of unmarried merchants, was founded. Several of the older relief societies still existed, as that for dowries (since 1721; the new by-laws being drafted by Mendelssohn); for circumcision (1715); for sick relief (1703); for burial (1672; see above); also an asylum for the aged (1828). In 1838 the community instituted a commission for the purpose of supervising the relief given to the poor, who had greatly increased since 1812. In 1833 the Baruch-Auerbach orphan asylum for boys was founded; ten years later the asylum for girls; in 1836 the institute for orphans in memory of Moses Mendelssohn; and in 1858 the hospital. For other institutions see list below.

The chief place in the inner development of the community is occupied by the struggle for ritual reform, in which both parties engaged with great bitterness. Shortly after the edict of 1812 Friedländer issued a pamphlet demanding reforms in the religious services, and sent it to the king, who gave an unfavorable answer, although the prime minister Hardenberg advocated Friedländer's propositions. The reforms were soon carried into effect, however; for the wealthy Jacob Herz Beer (the father of Meyerbeer) organized private services according to the new principles, at which Zunz also officiated as preacher. Israel Jacobsohn, the former president of the Westphalian consistory, imitating Beer's exam-

Synagogue on Oranienburgerstrasse, Berlin.  
(From a photograph.)

ple, preached himself, and confirmed his son (Pentecost, 1815). But in 1817 there appeared a royal order which, falling back on the old "Generalprivilegium," commanded the closing of private synagogues. As the public synagogue

**Struggle for Reform.** Beer was designated as a temporary synagogue. The Orthodox members, headed by their rabbi, Meyer Simon Weyl, protested against the order, and continued to worship in the half-completed synagogue. The government now decreed that the ancient Hebrew service should be followed by German prayers and a sermon in German; but at the instance of the Orthodox members a new royal order was issued, Dec. 9, 1823, to the effect "that the religious services of the Jews shall

be held only in the present synagogue, and only according to the customary ritual, without the least innovation in the language or the ceremonial, the prayers and songs, entirely in accordance with the ancient custom." This regulation was so strictly carried out that when Rabbi Oettinger, at the dedication of the new cemetery in 1827, delivered an address in German, the police saw therein a forbidden innovation.

Culture societies were organized in 1841 under the direction of Siegmund STERN, whose lectures in 1845 on the tasks of the Judaism of that time again stirred up the Reform movement. On March 10, 1845, a meeting was held under the leadership of Stern and A. BERNSTEIN, which resolved "that rabbinic Judaism is on the whole and in its parts not in harmony with our scientific convictions and the demands of the present life." The Genossenschaft für Reform des Judenthums, founded in 1846, organized services under the leadership of its rabbi, Samuel HÖLDRHEIM. These were held on Saturdays and Sundays (afterward only on Sundays), and their chief feature was the total exclusion of the Hebrew language. At present (1902) the chief community of Berlin supports, besides the above-mentioned Reform pulpit, five chief synagogues, two of which observe the old ritual and three a modernized one.

The matter of securing suitable rabbis was an especially difficult one, in view of the strong differences of opinion obtaining in the community. This became apparent soon after the death of Chief Rabbi Hirschel Levin in 1800; these differences then were so great that no chief rabbi could be agreed upon. A further attempt was made to fill the office, in 1842, when Zacharias FRANKEL was chosen. As he, however, declined the appointment, notwithstanding certain assurances from the minister Eichhorn, the office remained vacant. Hirschel Levin was succeeded by the assistant rabbi, Meyer Simon Weyl, who was given the title "Vice-Oberlandes-Rabbiner." After his death (1825) Jacob Joseph Oettinger (until 1860) and Elhanan Rosenstein (until 1866) were the acting rabbis, Michael Sachs being associated with them as assistant rabbi after Frankel had refused the chief rabbinate. After Sachs's death (1864) the controversy again broke out. Finally, in 1866 Joseph Aub was chosen, who in the same year consecrated the new synagogue and introduced a new order of prayers. In 1869 Abraham Geiger was chosen, together with Ungerleider as assistant rabbi. For incumbents of the rabbinate in 1901 see below.

It became necessary to change the administration of the community in accordance with the altered conditions. As early as 1793 a new constitution had been instituted, which, for the first time, did not proceed from the government, but was the result of the deliberations of a communal committee of fifteen. When the Jews' taxes were revoked by the edict of 1812, the duties of the elders were materially changed. As the government was slow to offer suggestions, the elders themselves went to work and drafted a set of rules for choosing the representatives. These were adopted May 20, 1849, by a vote of the community, and the election in accordance with the new statute was held June 24. The government, however, refused to recognize it, and

ordered a new election in accordance with the general regulations of 1750, which was held April 11, 1851. It was not till 1854 that the government recognized the new rules of 1849. On Feb. 23 of that year representatives were elected in accordance with those rules and were confirmed by the government. After much deliberation the "Statut für die Jüdische Gemeinde in Berlin" was determined upon (Aug. 31, 1860), which is still in force (1902). According to this statute the Jewish community of Berlin consists of all the Jews in that city and the neighboring places. The community is represented by a directorate and a college of representatives; the latter consisting of twenty-one members and fifteen substitutes, chosen every three years by a ballot of the whole community. The representatives choose the directorate, consisting of seven elders and three substitutes. The resolutions of the representatives are confirmed by the directorate. Differences are decided by a committee of the community or by the board of supervisors. Different branches of the administration are in the hands of special commissions, with a member of the directorate in the chair. The ministers, readers, and all officials who perform religious functions are chosen by a two-thirds majority of the representatives.

Non-Jewish sources mention (1) a certain Cain (meaning probably "Hayyim") as the first rabbi of the mark of Brandenburg, under whom the Jews emigrated from Vienna. His **The Rabbinate.** privilege for the whole electorate was issued Feb. 20, 1672. He probably did not live at Berlin, but at some other town of the mark, perhaps at Landsberg-on-the-Warthe.

(2) Isaac Benjamin Wolf Liebmann succeeded Hayyim May 11, 1685. He lived at Landsberg-on-the-Warthe.

(3) Shemaiah, called Simon Berend, appointed Aug. 23, 1687. He lived at first at Frankfort-on-the-Oder, then in Berlin; died on the last day of the Passover, 5469 (April 2, 1709). He was a high Talmudic authority.

(4) Aaron Benjamin WOLF, son of Isaac Benjamin Wolf Liebmann, nephew and son-in-law of Jost Liebmann, 1709-21.

(5) Michael Hasid, appointed May 17, 1714, who also succeeded to the rabbinate of Frankfort after Aaron Benjamin Wolf's death. (On the ban which Michael pronounced against the Jews of Berlin at the command of Frederick William I., see above.) His works have only partially been printed. He was considered a great Talmudist and also occupied himself with the Cabala, being called by the Jews the "great Cabalist." One of his sons embraced Catholicism, and became professor of Oriental languages at Vienna, under the name "Aloys Wiener von Sonnenfels." Michael Hasid died Feb. 21, 1728. During his rabbinate Marcus Abraham was chosen (1726) as the first rosh bet-din (director of the school-house), superintending as such the Talmudic instruction of the Jewish youth.

(6) Moses Aaron of Lemberg, formerly rabbi in Leipnik. He was chosen contrary to the wishes of the community at the command of Frederick William I., who issued his order in spite of the protests of the elders. In consequence the new rabbi had

violent quarrels with the community. The elders bought for the sum of 4,500 marks permission to choose another rabbi (May 27, 1730). Moses Aaron was forced to accept the rabbinate of Frankfort-on-the-Oder, with the condition to pay 300 marks a year to the rabbi of Berlin. From Frankfort he went to Nikolsburg, where he died, Tebet 17, 5518 (Dec. 28, 1757).

(7) Jacob Joshua of Cracow (born 1680), chosen in the fall of 1730; a high Talmudic authority; author of the celebrated Talmud commentary, "Pene Yehoshua." He had previously been rabbi of Lemberg, as the successor of Hakam Zebi. Though he gained the love of the community by his independent and energetic character, he gave such offense by deciding a case against the influential and powerful Veitel Ephraim that he was forced to leave Berlin, 1735. He went to Metz, where he wrote his commentary, and thence to Frankfort-on-the-Main. He died Shebat 14, 5516 (Jan. 16, 1756).

After Jacob Joshua's resignation, the office was filled by the rosh bet-din Marcus Abraham (mentioned under 5), with whom Naphtali Herz was associated as assistant rabbi. After his death (1743) the community decided to call a younger man, and chose

(8) David Fränkel, who, having been born (1704) at Berlin and educated there, was especially acceptable to the community. Previously he had been chief rabbi at Dessau and at Frankfort-on-the-Oder. As he had many relations in Berlin over whom he could not, according to the law, exercise his office as judge, his brother-in-law, Veitel, agreed to pay a yearly sum for a substitute. Fränkel achieved fame by his commentary on Yerushalmi, and was the teacher of Moses Mendelssohn. He died suddenly Nisan 12, 5522 (April 5, 1762).

(9) Aaron Hirsch, chosen 1763. Author of the "Minhat Aharon." He went from Berlin to Schwabach in 1772, and died in 1780. His name "Aaron Mosessohn" was appended to the thanksgiving sermon written by Mendelssohn after the peace of Hubertsburg.

(10) Hirschel Levin, called also Hirschel Löbel; elected 1772; died Aug. 26, 1800 (see Hirschel LEVIN). By the time of Levin's death the differences of opinion in the community had grown to be so great that it became impossible to have one central administration. The changes in the rabbi question since then have been mentioned above.

The various activities of the Berlin Jewish community may best be summarized under the heads of (I.) worship, (II.) education, (III.) philanthropy, (IV.) miscellaneous.

(I.) **Worship:** Berlin possesses the following synagogues and temples: (1) Alte Synagoge, Heiderentergasse; (2) Neue Synagoge, Oranienburgerstrasse; (3) synagogues in the Kaiserstrasse, Lindenstrasse, and Lützowstrasse; (4) Adas Yisroel, Gipsstrasse (314 families), rabbi Dr. Esra Munk, preacher Dr. M. Hildesheimer; (5) Schöneberger-Ufer, rabbi Dr. Petuchowski; (6) Ahawas Refim, Pringenstrasse (100 families), rabbi Dr. I. Bleichrode; (7) Beth Zion, Brunnenstrasse (150 families), rabbi L. Hörter; (8) Alawas Scholom, Luisenstrasse, rabbi Dr. Stein; (9) Neweh Scholom, Lothringer-

strasse (180 souls), rabbi H. Gruenfeld; (10) Westen, Passauerstrasse (144 members) rabbi Dr. Ph. Kroner; (11) Moabit, Lessingstrasse (500 families), rabbi Dr. Winkler; (12) Jewish Reform Congregation, Johannisstrasse (150 families), rabbis Dr. M. Levin, Dr. P. Klemperer, Dr. I. Oppenheimer, Dr. Jeiski; (13) Ohel Yizhak, Oranienburgerstrasse (150 families), Dr. Liebermann; (14) Lippmann-Tausz Synagoge, Gollnowstrasse (180 families), Dr. D. Lipschütz; (15) Wolff'sche Ez Hayyim, Landsbergerstrasse, Dr. S. Grünfeld (80 families); (16) Alawath Torah, Lausitzerplatz (50 families), Dr. Janowitz; (17) Adat Jeschurun, Alte Schönhauserstrasse, rabbi A. Ellenbogen.

Rabbis of the Jewish community: Drs. S. Maybaum, A. Rosenzweig, J. Stier, S. Weisse, Eschelbacher, Blumenthal.

There is also a Union of Orthodox ("Traditionsgesetzestreu") rabbis.

(II.) **Education:** Hochschule, now called Lehranstalt, für die Wissenschaft des Judenthums, founded by Dr. Abraham Geiger; teachers, Dr. E. Banet, Dr. Maybaum, Dr. Schreiner. Rabbinical Seminary, founded by Dr. I. Hildesheimer, 1873; rector, Dr. D. Hoffmann; teachers, Prof. J. Barth, Dr. A. Berliner, Dr. H. Hildesheimer, Dr. I. Wohlgenuth. Veitel-Heine Ephraim Lehranstalt; lecturers, Prof. M. Steinschneider, Prof. I. Barth.

Schools for religious instruction are attached to all the various congregations, and register from 92 up to 453 pupils of both sexes. The Gemeinde-Knabenschule has 603 boys, the Mädchenschule 402 girls. A training-school for teachers has 45 students. In addition the Zunz-Stiftung, founded 1864, is for Jewish teachers, and there are a "Mädchenheim" (Home for Girls) and a technical school (domestic arts), also for girls.

(III.) **Philanthropy:** Homes for the Aged, Reichenheim Orphan Asylum, Baruch Auerbach Orphan Asylum, Moses Mendelssohn Asylum, Pan-kow Asylum; Deaf-Mute Asylum, Neu-Weissensee; various local relief societies; and, in addition, numerous societies for aiding the respectable poor, furnishing Passover supplies and food to Jewish prisoners; for assisting travelers, furnishing clothing, for aid at circumcisions, lying-in relief, rent aid, fresh-air colonies for children, fuel association, marriage dowry, loan society (founded 1846); free burial society, Jewish nurses' association, kosher meat society, people's kitchen, Sabbath observance association, etc.

(IV.) **Miscellaneous:** Committee for Defense Against Anti-Semitic Attacks (Komitee zur Abwehr Anti-Semitischer Angriffe); Central Verein Deutscher Bürger Jüdischen Glaubens; Zionists' Society; Ezra (for agricultural aid in Palestine); Palästina (for aiding Jewish farmers); B'nai B'rith, Grand Lodge of Germany, office Wilhelmstrasse 118; lodges, Vereinigte Deutsche Reichs-Loge, Leopold Zunz, Berthold Auerbach, Montefiore; society for fostering trades and agriculture among Jews of Russia, founded 1813; society for furthering agriculture among Jews of Germany; military society, Deutsches Vaterland; several students' societies.

A. F.

**BERLIN CONGRESS:** A meeting of the great European powers at Berlin between June 13 and July 13, 1878, to settle questions arising out of the Russo-Turkish war; by it many of the former provinces of Turkey were enfranchised and made independent. In several instances the congress made the grant of full civic and political rights to Jews a condition for the recognition of independence, and it has therefore an important bearing upon the history of Jews in the southeast of Europe in recent times.

Articles of identic form were inserted in the final treaty, requiring that religious conviction should form no cause of exclusion from any civic position in any of the countries liberated by the Congress of Berlin—sections v. (Bulgaria), xxvii. (Montenegro), xxxv. (Serbia), xlv. (Rumania).

The question was first raised at the sitting of June 28, 1878, when Waddington, on behalf of France, required that religious equality should be made a condition of the independence of Serbia. Gortschakoff, on behalf of Russia, protested against the question being introduced without previous notice to the congress, but Waddington was supported by Bismarck and De Launay (Italy) (British Blue Book, p. 128), and section xxxv. was inserted in the draft treaty.

At the sitting of July 1 Messrs. Bratianu and Cogalniceanu presented a note claiming independence for Rumania, without any reference to the Jewish question; but Waddington, on behalf of France, demanded that the same conditions be imposed on Rumania as on Serbia. He was supported by Andrassy (Austria Hungary), Beaconsfield, De Launay, and even by Gortschakoff (Russia), notwithstanding his protest three days before; and the following clause was inserted in the final treaty (British Blue Book, p. 153):

Article 44: In Rumania, difference in religious beliefs and confessions shall not be brought against any one as a ground for exclusion or unfitness as regards the enjoyment of civil and political rights, admission to public offices, functions, and honors, or the exercise of various professions and industries in any place whatever. Freedom in outward observance of all creeds will be assured to all subjects of the Rumanian state, as well as to strangers, and no obstacle will be raised either to the ecclesiastical organization of different bodies, or to their intercourse with their spiritual heads.

The citizens of all states, whether merchants or others, shall be dealt with, in Rumania, without distinction of religion, on the basis of perfect equality.

Bulgaria and Serbia loyally carried out the conditions of the treaty, but Rumania evaded it, claiming that a sudden emancipation of the Jews would be deleterious to the interests of the country. A convention was summoned by the Bratianu ministry to determine how far the constitution was to be revised, and this suggested the following clause vii. of the Rumanian constitution instead of section xlv. of the Berlin Treaty, which Lord Salisbury had proposed to be inserted *en bloc* into the Rumanian constitution:

Article 7: Difference in religious beliefs and confessions does not constitute, in Rumania, an obstacle to the attainment of civil and political rights, nor to the exercise of these rights.

1. A foreigner, without distinction of religion, and whether a subject or not of a foreign government, can become naturalized under the following conditions:

(a) He shall address to the government an application for

naturalization, in which he shall indicate the capital he possesses, the profession or craft which he follows, and his abode in Rumania.

(b) He shall reside, after this application, ten years in the country, and prove, by action, that he is of service to it.

2. The following may be exempted from the intermediary stages:

(a) Those who have brought into the country industries, useful inventions, or talent, or who have founded large establishments of commerce or industry.

(b) Those who, born and bred in Rumania, of parents established in the country, have never been subjected, either themselves or their parents, to any protection by a foreign power.

(c) Those who have served under the colors during the war of independence; these may be naturalized collectively by government decree, by a single resolution, and without any further formality.

3. Naturalization can not be given except by law, and individually.

4. A special law shall determine the manner in which foreigners may establish their home on Rumanian territory.

5. Only Rumanians, and those who have been naturalized Rumanians, can buy rural estates in Rumania.

Rights already acquired shall remain in force.

International agreements at present existing shall remain in force in all the clauses and terms therein contained.

In the summer of 1879 Boreescu was sent on a diplomatic mission to the courts of western Europe to induce them to accept the new clause vii. of the constitution instead of the Berlin Treaty. Austria had no objection, since her own Jewish subjects were protected by a special treaty; Russia could scarcely object to restrictions, having in view her own attitude toward the Jews; and Turkey was not in a position to make any protest. Italy demanded full liberty of conscience for the Jews, but Waddington, on behalf of France, gave way on the assumption that gradual emancipation would be granted, and on Feb. 20, 1880, an identic note of Germany, France, and Great Britain agreed to the independence of Rumania on condition that clause vii. be made part of the constitution. For the manner in which Rumania has utilized the restrictions of clause vii. to disfranchise the Jews of nearly all the rights of human beings, see RUMANIA.

**BERLIN, ABRAHAM.** See ABRAHAM BEN JUDAH BERLIN.

**BERLIN** (sometimes called also **Berliner**), **ARYEH LÖB BEN ABRAHAM MEÏR** (in German, **Löw Mayer**): German rabbi; born 1738 at Fürth, Bavaria; died at Cassel May 21, 1814. When quite young Berlin was dayyan in his native city, and at the same time rabbi of Baiersdorf, Bavaria. In 1789 he was appointed chief rabbi of Bamberg, where he remained until 1794.

During the time he remained in Bamberg, Berlin was involved in a lawsuit which threatened to ruin his reputation. In his capacity of civil judge of the Jews, he was entrusted with the division of an estate valued at 100,000 fl. (\$41,000), and was accused by one of the heirs of having utilized his judicial power for his personal interest. This was the more painful because the judicial procedure and practises of the rabbis had never before been assailed in the courts of Bamberg. The specific charges against

the rabbi were that he accepted illegal fees and failed to account for certain small sums. In the mean time Berlin was elected to the chief rabbinate of Hesse-Cassel; and difficulties were placed by his opponents in the way of his leaving for the new post. However, he was never put under arrest, and subsequently was acquitted of all the charges of dishonesty and was sentenced only to pay a certain sum as a fine, in settlement of an account which seems to have been more entangled than dishonest. The documents relating to the trial are now published by Eckstein, showing that the charges against Berlin were groundless and that only personal hatred supplied the motives. In the summer of 1795 he left Bamberg for Cassel to enter upon his new functions.

When the kingdom of Westphalia was founded, with Cassel as its capital, Berlin gave proof of his loyalty to the new régime by a sermon which he delivered in Hebrew in the Great Synagogue of Cassel, welcoming the new king, Jerome Bonaparte; and by composing a Hebrew song for the same occasion. Both were published, with a German translation, under the title "Dabar be-'Itto Mah Tob" ("Redeem Freudenfeste," . . . Cassel, 1807). This work is erroneously ascribed by Benjacob, in his "Ozar ha-Sefarim," to Judah Löb Karlberg. When the Jewish consistory of Westphalia was organized on the model of the French consistory (October, 1808), Berlin was made chief rabbi, and in 1809 was elevated to the dignity of "Consistorialrath." As a director of the consistory he was in accord with its president, Israel Jacobson, and assented to the declaration that it is permissible to use pulse, tea, and sugar on Passover, against which view the conservative rabbis of the time vigorously protested (see Stern, "Gesch. des Judenthums," pp. 167, 168).

Berlin wrote annotations to the Talmud which appeared in the edition of Fürth, 1829-32, of which only the first three volumes were published. The Talmud, ed. Wilna, 1895, contains his marginal notes to the tractate Shebu'ot, those to the sixteenth volume of Rabinowicz's "Dikduke Soferim," and to the treatise Hullin. Some of his novellæ appeared as an appendix to the work "Aze Almuggim" (Sulzbach, 1779), by his brother, R. Noah Hayyim Zebi Berlin. The latter died when his work, "Ma'yan ha-Hokmah" (Rödelheim, 1804), was in the hands of the printer; and Berlin superintended the publication of his brother's work.

P. W.

**BERLIN, DAVID B. (JUDAH) LOEB:** Rabbi of the three united congregations, Altona, Hamburg, and Wandsbeck; born probably at Eisenstadt, Hungary, in the second half of the seventeenth century; died at Altona March 5, 1771. Very little is known of his life, although he doubtless was a great Talmudic authority, for otherwise he could not have been rabbi of these three congregations. His brother, Isaiah Berlin, and his brother-in-law, Joseph b. Menahem Steinhart, praise him particularly, and his epitaph also—communicated by Wittkower, "Aggudat Perahim," p. 288—mentions his

scholarship and his great piety. The responsa collection, "Zikron Yosef," by J. Steinhart, contains two of Berlin's responsa (pp. 74d, 82a), and the Bodleian Library contains some of his homilies and novellæ on the Talmud. Berlin was at first rabbi in Dessau, and from 1768 to his death rabbi of the three congregations mentioned above.

**BIBLIOGRAPHY:** Berliner, *Isaia Berlin*, 1878, p. 8; Fuenn, *Keneset Yisrael*, pp. 227, 228; Neubauer, *Cat. Bodl. Hebr.* MSS. No. 536.

**BERLIN, FANNY.** See BERLIN, MOSES.

**BERLIN, ISAIAH B. (JUDAH) LOEB** (called also **Isaiah Pick**, after his father-in-law): The most eminent critic among the German Talmudists of the eighteenth century; born in Eisenstadt, Hungary, about October, 1725; died, while rabbi of Breslau, May 13, 1799.

Berlin was the scion of a famous family of scholars which counted among its members Yom-Tob Lipman Heller and Meïr b. Jacob Schiff. The father of Berlin also was a high Talmudic authority, and by him the son was initiated into rabbinical studies, which he later continued in Halberstadt with R. Hirsch Bialeh (also called Hirsch Harif), who exercised considerable influence on Berlin's later methods of teaching.

In 1750 Berlin occupied an honorable position in the community of Breslau; and it may therefore be assumed that he had settled there some time previously. About five years later he married Fromet (born 1736; died June 13, 1802), daughter of the rich and respected merchant, Wolf Loebel Pick. Until 1787 Berlin lived a comparatively private life, engaged in business with a Christian furrier; but in that year he became a member of the rabbinate, and on Nov. 17, 1793, was elected rabbi of Breslau, receiving eighteen votes out of a total of twenty-one. His election was preceded by a bitter contest between the few but rich liberals and the majority of the community. The former (as recorded in an official document) would have preferred to see Berlin appointed as a "rosh besen" ("rosh bet din," or head of the court), so that he would be unable to act so strictly as a rabbi in regard to ceremonials, and would have a smaller stipend from the Breslau community, while exercising less influence on the rural communities.

Berlin, in his humility and unpretentiousness, looked upon the titles and rights withheld from him as of no account, though his salary

**His** was smaller than that of his predecessor, from the fact that he had to divide the income from city and country with the assistant rabbi and the rabbi of Sulz. Wolf Ginsberg, his pupil during many years, relates, as evidence of Berlin's ascetic mode of life, that the latter rested only during the nights of the Sabbath and on festivals, devoting all his other days and nights to study. His liberality is revealed in the fact that he wrote and printed one of his works, "She'elat Shalom" (Peaceful Greeting), for the sole purpose of offering help to the publisher, an indigent Talmudic scholar.

Berlin was greatly admired, even by persons who differed with him in religious views. Joel Brill, Aaron

Wolfsohn, Judah Bensew, and many other Maskilim of Breslau often visited him to seek advice on scientific questions. As the Maskilim always carefully avoided wounding Berlin's religious feelings, he on his part met them half-way in many things. On the occasion of the Peace of Basel, for instance (May 17, 1795), he held a solemn service in the synagogue and exceptionally permitted the use of instrumental music, he himself delivering a discourse which was highly praised by the press ("Schlesische Zeitung," 1795, No. 59). Thus Berlin, by his learning and his character, conciliated the hostile elements of his congregation, and his death was mourned equally by all.

In order fully to appreciate Berlin's literary activity it must be mentioned that he had the habit of annotating almost every book he read; mentioning the sources, or noting parallel passages and variant readings. Such glosses by Berlin have been published on the following books: the Bible (Pentateuch, Dyhernfurth, 1775; the other books, *ib.*,

1807); the prayer-book, ed. Tikkmun

**His** Shelomoh (*ib.*, 1806); Maimonides' **Literary** Yad ha-Hazakah (*ib.*, 1809); Alfasi **Activity.** (Presburg, 1836); the "Hinnuk," by

Aaron ha-Levi of Barcelona (Vienna, 1827); Malachi b. Jacob's methodology, "Yad Malachi" (Berlin, 1825); Elijah b. Moses de Vidas' book of morals, "Reshit Hokmah" (Dyhernfurth, 1811). Although the terse yet clear notes contained in these volumes reveal the immense learning and critical insight of their author, yet Berlin's lasting place of honor among the pioneers of Talmudic criticism rests on the following works which treat principally of the Talmud: (1) "'Omer ha-Shikhah" (Forgotten Sheaf), Königsberg, 1860, containing a large number of Halakot on the Talmud not noted by the codifiers; (2) "Ozar Balum" (Full Treasure), in the edition of Jacob ibn Habib's "'En Ya'akov," published at Wilna in 1899, tracing all the Talmudic passages quoted without sources in the different commentaries on the haggadic elements of the Talmud; (3) "Haggahot ha-Shas" (Notes to the Talmud), textual corrections and notes on the origin of parallel passages (Dyhernfurth, 1800, and in nearly all the editions of the Talmud); (4) "Hatta'ah Sheba-'Arakin" (Detached Orders) (part i., Breslau, 1830; part ii., Vienna, 1859), containing, as the title indicates, explanations and glosses on the 'Aruk; (5) "Hiddush ha-Shas," novellæ on the Talmud (Königsberg, 1860, and in several editions of the Talmud); (6) "Minè Targuma" (Dessert Dishes), Breslau, 1831, remarks on the Targum Onkelos (the word "Targuma" signifying both "Targum" and "dessert," equivalent to the Greek *τράπεζα*) and on the Palestinian Targum; (7) "Kashiyot Meyushab" (Difficulties Answered), Königsberg, 1860, treating of the Talmudic passages which end with **שאל**, and written by Berlin in fourteen days; (8) "Rishon le-Zion" (The First for Zion; Dyhernfurth, 1793; Vienna, 1793, and several times reprinted, the title being a play on **ציון**, "Zion," and **פיו**, "index"), a collection of indexes and parallel passages in the Midrash; (9) "She'elat Shalom" (Greeting of Peace), Dyhernfurth, 1786, a commentary on Aha of Shubha's "She'iltot." Berlin's responsa collection and his

commentary on the Tosefta deserve especial mention, though nothing is known of their fate.

The first place among these works must be accorded to the remarks and explanations on the Talmud. Although they can not compare in acuteness and power of combination with

**Characteristics of Berlin's Works.** the similar work of Elijah of Wilna, yet these two books of Berlin laid the foundation for a critical study of the text of the Talmud, in view both of the numerous textual corrections concerning the minutest details, and of the many parallel passages adduced either directly from the Talmud or from the old authors, in support of new readings.

Berlin, furthermore, was the first—at least among the Germans—who showed an interest in the history of post-Talmudic literature; and it was he, also, who opened the Kalir question (compare his letter to his brother-in-law, Joseph b. Menahem Steinhart, in the latter's "Zikron Yosef," No. 15). Although Berlin's historical remarks have been superseded by modern criticism, the immense material which he accumulated in all his works will always remain of inestimable service to the student.

L. G.

**BERLIN, JACOB** (called **Yokob**): German Talmudist; born 1707, probably at Berlin; died 1749 at Fürth, Bavaria. He was a pupil of Jacob ha-Kohen, author of "Sheb Ya'akob," and later (not after 1734) settled at Fürth, where he lived as a well-to-do private citizen. Of his seven works the following were published posthumously: "Be'er Ya'akob" (Well of Jacob), a selection of responsa, with an appendix, on the terminology of the Talmud, published by his brother Isaac and his son Abraham, and edited by Isaac b. Meïr of Pfalzburg and Fürth, 1767; and "Zikron Ya'akob" (Memory of Jacob), a homiletic commentary on the Pentateuch (*ib.* 1769).

Berlin is not related to the well-known Berlin family of Fürth.

**BIBLIOGRAPHY:** Fränkel, *Literaturblatt des Orients*, viii. 420-422; Steinschneider, *Cat. Boll.* p. 1195; Isaac b. Meïr's introduction to Berlin's *Be'er Ya'akob*.

L. G.

I. BER.

**BERLIN, LEO**: Russian lawyer; son of Moses Berlin; born at Vitebsk Nov. 22, 1854; received his education (1862-72) at a private school in St. Petersburg. He studied law at the University of Bern, Switzerland, whence he was graduated in 1878. In 1881 Berlin received the degree of doctor of criminal law from the University of Moscow. Soon afterward he became engaged to Amalie Hering, M.D., daughter of the physiologist Ewald Hering, who, on account of her (Roman Catholic) religion, was refused a license by the Russian government to marry a Jew. She accordingly joined the Protestant Church; but even then it required the intervention of the poet Turgenev to secure the requisite permission. Berlin is (1902) the head of the law firm of Berlin Brothers in St. Petersburg, but resides in Brussels. He has published many treatises on criminal law in the "Zhurnal Grazhdanskavo i Ugolovnavo Prava" and other periodicals. A rare Torah scroll, which has been in the Berlin family for centuries, is now in his possession.

**BIBLIOGRAPHY:** Private sources.

H. R.

**BERLIN, MOSES (MOISEI JOSIFOVICH)**: Scholar, communal worker, and government official; born at Shklov, Russia, 1821; died in St. Petersburg March 25, 1888. He received a good home education and then was sent abroad, where he studied philosophy and philology at the universities of Königsberg and Bonn. In 1845, while at Königsberg, he published "Meṭab Higgayon," a philosophical treatise in Hebrew with the Latin title "Ars Logica," with an introduction in Latin by Professor Freistadt.

Returning to Russia in 1849, he received a position as teacher in the government Jewish school of Mohilev, and in 1853 was appointed by the minister of the interior as adviser on Jewish affairs to the governor-general of White Russia. Berlin was transferred to St. Petersburg in 1856 and attached to the department of public worship as adviser on foreign creeds, with the title "Uchony Yevrei" (A Learned Jew). In this position Berlin was frequently called upon to participate in the framing of laws concerning the Jews. At the same time he assisted to a considerable extent Count M. A. Korff in organizing and arranging the Imperial Public Library of St. Petersburg.

Moses Berlin.

In 1859 Berlin published "Byedstviya Vremion," a Russian translation of צִנְקַת הַעֲתִימִים, the work of Jeshua ben David of Samosc. This translation appeared in vol. i. of the "Transactions" of the Moscow Society for the Study of the History and Antiquities of Russia ("Trudy Moskovskavo Obshchestva Istorii i Drevnostei Rossii"), and also in book form. In recognition of this work Berlin was elected corresponding member of the society. He published in 1861 "Ocherk Etnografiï Yevreiskavo Naseleniya v Rossii." This work on the ethnography of the Russian Jews was composed at the instance of the Imperial Russian Geographical Society, which elected him an active member. In 1862, in reply to Aleksandr Aksakov's attacks on the Talmud in the journal "Den," Berlin published "Bugulminski Talmudist" and other articles on the Jewish question.

Berlin was very active in the Jewish community of St. Petersburg, and was a member of the two Jewish delegations to Alexander II. in 1868 and to Alexander III. in 1881 respectively.

His son Leo BERLIN is a distinguished lawyer. His daughter **Fanny Berlin Kaufmann** (born at Vitebsk Nov. 8, 1850; died at St. Petersburg 1896) graduated from the women's gymnasium of St. Petersburg, studied law at the University of Bern, and was graduated thence as doctor of law *summa cum laude*. She married Prof. Hilarion Kaufmann, and became prominent in the higher society of St. Petersburg. Her bust by Professor Zalello is exhibited in the Imperial Academy of Fine Arts at St. Petersburg.

**BERLIN, NAHMAN BEN SIMHAH:** A polemical writer against reform; lived at Lissa, Germany, at the end of the eighteenth and the beginning of the nineteenth century. His literary activity was wholly devoted to the cause of orthodoxy, opposing steadfastly and systematically all the attempts at the reform of Judaism, which were so marked a characteristic of his time. To this purpose he wrote the following polemical works: "En Mishpat" (The Critical Eye of Judgment), directed against the editors of the Hebrew periodical "Ha-Meassef," and especially against Aaron Wolfsohn (Berlin, 1796); "Keter Torah" (The Crown of the Law), an introduction to the "Hawwot Da'at" of Jacob b. Moses of Lissa (Dyhernfurth, 1810); "Judah," against the innovators (Berlin, 1818); "Kaddur Kaṭan" (The Small Globe), against several works by different reform writers (Berlin, 1819); "Et le-Dabber" (Time to Speak Out), on the traditions of oral law, as well as on the necessity of having the prayers in Hebrew (Berlin, 1819); "Simḥah" (Joy), a call to unity in religious affairs (Berlin, 1819).

M. B.

**BERLIN, NAPHTALI ZEBI JUDAH** (known also as **N. Z. J. B.**): Head of the yeshibah of Volozhin, Russia; born at Mir, in the government of Minsk, in 1817; died at Warsaw Aug. 10, 1893. In 1831 Berlin, who was a descendant of a scholarly family, married the daughter of Isaac b. Hayyim, the head of the Volozhin yeshibah. After the death of Isaac in 1851 his elder son-in-law, Eliezer Isaac, became principal, and on the death of the latter in 1854, Berlin succeeded him. He followed the path of learning laid out by Hayyim, the founder of the yeshibah, according to the plans of Elijah of Wilna; viz., plain logical reasoning, instead of employing the PILPUL.

A minority of the yeshibah students who cultivated a taste for pilpul seceded and elected as their principal Joseph Baer Soloweitchik, well known as an acute pilpulist and a grandson of Rabbi Isaac. This division created discord between the students of the two factions; and the Russian rabbis sent a delegation to Volozhin to investigate the matter. They quelled the disturbance and established a union headed by Berlin, who was installed as the one head of the yeshibah.

Berlin's whole life was devoted to the welfare of the yeshibah, and all his energy was directed

toward increasing the number of the students, and caring for their support and comfort. He appointed and sent authorized agents ("meshullahim") to different parts of the world for voluntary contributions to assist in maintaining the yeshibah. A large share of the income came from America. Under his guidance the number of the students increased from 100 to over 400; and he also erected a three-story brick building with rooms for study and a library.

However, the "Maskilim," who then advocated the Semi-Reform movement in Russia, opposed the yeshibah on general principles, and demanded the introduction of secular science and modern method of teaching. In answer to their demand Berlin wrote an open letter to the editor of "Ha-Meliz" (No. ix., 1885), explaining his standpoint. He called attention to the failure of the rabbinical seminaries in Germany, and even those of Russia, to produce a single Talmudic rabbi in the full sense of the term; while such rabbis from the Volozhin graduates were numerous. This reply did not satisfy the Maskilim, who advocated the abolition of the yeshibah as a dangerous institution and as being an obstacle in the way of general education to the rising generation. Many derogatory articles in the Hebrew and Russian-Jewish press attracted the attention of the government, which in 1879 decreed to close up the yeshibah. In 1881, however, through diligent and extraordinary efforts, Berlin succeeded in obtaining the government's permit to reopen the yeshibah, which he conducted with renewed energies till 1891, when its doors were again closed by the government as a result of the false accusation that the students were connected with the Nihilistic movement.

Berlin never ceased his endeavors by every means—even visiting Warsaw to obtain the necessary influence—to induce the government to revoke the edict; but they were without avail, and his failure hastened his death.

His contributions to rabbinical literature are of great value, particularly his commentary "Ha'amek She'alah" (Deep Research) on the "Sheiltot" of אֲבָא דִּשְׁבַּת. It was left for Berlin to throw light on the complicated and obscure passages of this most important halakic work of the gaonic period, which was little known among the Talmudists. His commentary shows not only his phenomenal knowledge of the Talmudim and old rabbinic literature, but also a fine critical mind. Berlin did not occupy himself with the later rabbinic literature, but spent all his life in the study of the old authorities, devoting himself especially to the Yerushalmi and the halakic Midrashim. It is said that at the age of twenty-three he compiled a commentary on the Jerusalem Talmud.

Berlin's unselfishness is shown by the notice in his introduction (§ 5, part ii.): "Whoever desires to reprint this book, either in this or in another country, has my permission to do so without any money consideration, and is entirely welcome, as it is my wish to disseminate the teachings of our master (Abā of Shabbā) of blessed memory. All I request

of this most important halakic work of the gaonic period, which was little known among the Talmudists. His commentary shows not only his phenomenal knowledge of the Talmudim and old rabbinic literature, but also a fine critical mind. Berlin did not occupy himself with the later rabbinic literature, but spent all his life in the study of the old authorities, devoting himself especially to the Yerushalmi and the halakic Midrashim. It is said that at the age of twenty-three he compiled a commentary on the Jerusalem Talmud.

of the publisher, if he does so during the lifetime of myself, or my son Hayyim Berlin, is that he will notify either of us, in order that I or my son may add, amend, or correct the style or rearrange the matter."

Berlin's commentary on the Pentateuch, "Biur ha-Amek" (Deep Interpretation), was published with the text (Wilna, 1879-80). His commentary on the Song of Songs, "Metib ha-Shir Bekizzur" (The Essence of the Poem), with an extract from the same appeared at Warsaw 1888. His opinion on Ecclesiastes is that it summarizes the arguments of the naturalists and scientists of that age, and that only the conclusions were inspired (by the Holy Spirit), whereas the Song of Songs and the Proverbs were all inspired (preface to "Sheiltot," part i., § 2). His exegetical works are of little value, although they claim to be PESHAT.

The responsa of Berlin were numerous. Most of his letters end with *הנני עמוס בעבודה* ("I am burdened with work"), as if in haste to finish. Of his responsa, "Meshib Dabar" (Word of Response), (Warsaw, 1894), six are addressed to American rabbis of New York, Baltimore, Cincinnati, and Charleston, on various religious questions (see pp. 13, 15, 19, 93, 117, 136).

J. D. E.

**BERLIN, NOAH HAYYIM ZEBI HIRSCH B. ABRAHAM MEÏR:** German Talmudist and rabbi; born at Fürth 1737; died at Altona March 5, 1802. He was the son of a well-to-do and learned merchant at Fürth, who died Jan. 7, 1780, and whom Jacob Berlin regarded as a Talmudist of some merit. The boy, together with his brother Loeb Berlin, received his education from his father, and became dayyan in Fürth in 1765. He also was appointed rabbi of Marktbreit, Bavaria, and the surrounding villages; and in 1780 became rabbi at Mayence. When Raphael ha-Kohen, rabbi of the three communities of Altona, Hamburg, and Wandsbeck, resigned his position, Berlin received a call to be his successor (1799). Affairs in these communities were very unsettled at that time, and it required much skill and tact to reconcile the various elements struggling for leadership. Berlin satisfactorily solved the problem; and being far removed from the fanaticism of his predecessor, he even successfully avoided wounding the susceptibilities of the latter, who continued to reside privately in Altona (compare Berlin's letter to Hayyim of Volozhin in the responsa collection "Hu' ha-Meshullash," Wilna, 1880).

Berlin was the author of the following works: (1) "Aze Arazim" (Cedar-Trees), Fürth, 1790, an exhaustive commentary on Joseph Caro's Shulhan 'Aruk, Eben ha-'Ezer, which, however, covers only one-third of the work; (2) "Aze Almuggim" (Almug-Trees), Sulzbach, 1779, a commentary on those precepts treated in the Shulhan 'Aruk which are not of Biblical origin; namely, on the washing of the hands ("ne'ilat yadayim"), Sabbath-limits ("erubin"), and the marriages forbidden by the

Soferim ("sheniyot la-'arayot"); (3) "Ma'yan ha-Hokmah" (Source of Wisdom) (Rödelheim, 1804, and reedited several times), the six hundred and thirteen injunctions and prohibitions in metric form, and exhaustive casuistic explanations on the individual precepts; (4) "Tiferet Zebi" (Glory of Zebi), the first part published at Warsaw, 1807, the second at Warsaw, 1818, the third at Josephov, 1867; (5) marginal glosses on the Talmud treatises Berakot, Shabbat (Fürth, 1829-32), and Shebu'ot (Wilna, 1895).

The chief characteristic of Berlin's work is that he pays more regard than any other German Talmudist to Yerushalmi; and he gives many happy explanations of it. Moreover, he possessed numerous works by Sephardic scholars which were unknown to the German and Polish Talmudists; and his teachings were strongly influenced by the Sephardim. Although Berlin, in accordance with the spirit of the times, was a great master of "pilpul," and could represent the pilpulistic method skilfully and intelligibly, he had clear reasoning powers. In his responsa, especially, he separated sophistry from true logic.

It is of interest to note that Berlin not only knew Azariah dei Rossi's works (he cites them unfavorably in "Aze Almuggim," 193b), but had also read the New Testament, which was a very remarkable thing in the circles to which Berlin belonged. In a passage of "Aze Almuggim" (191a) he speaks of Paul as "hakam ehad mehakmehem" (one of their [non-Jewish] sages), and he displays ingenuity in trying to identify him with a certain "Min," a neighbor of Gamaliel, spoken of by the Mishnah ('Er. vi. 1).

Many of Berlin's explanations of the piyyuṭim are found in Wolf Heidenheim's commentary on the Maḥzor.

**BERLIN, RUDOLF:** German ophthalmologist; born May 2, 1833, at Friedland, Mecklenburg-Strelitz; died at Rostock Sept. 12, 1897. He received his education at the gymnasium of his native town and at the universities of Göttingen, Würzburg, Berlin, and Erlangen, and was graduated from the last-mentioned as doctor of medicine in 1858. For the following three years he was assistant to Pagenstecher at Wiesbaden, and in 1861 established himself as a specialist in ophthalmology in Stuttgart, opening a private hospital there.

In 1870 he became privat-docent in physiological optics at the technical high school at Stuttgart, and in 1875 was appointed professor of comparative ophthalmology at the veterinary college in that city. In 1889 he became professor of ophthalmology at the university at Rostock, as successor to Von Zehender; and under his supervision the new ophthalmological hospital was built and opened in 1897.

Berlin was the first to treat ophthalmology systematically in a comparative way. Among his numerous works may be mentioned: "Ueber den Gang

der in den Glaskörperraum Eingedrungenen Fremdkörper," in "Archiv für Ophthalmologie," vol. xiii.; "Ueber Sehnervendurchschneidung," in "Mittheilungsblatt für Augenheilkunde," vol. ix.; "Kränkheiten der Orbita," in Graefe-Sämisch, "Handbuch der Augenheilkunde" (1880); and jointly with Rembold, "Untersuchungen über den Einfluss des Schreibens auf Auge und Körperhaltung der Schulkinder," Stuttgart, 1883.

In 1882, together with Eversbusch, he founded the "Zeitschrift für Vergleichende Augenheilkunde," in which he published many interesting articles; e.g., on the eye of the horse, about glaucoma, etc.

**BERLIN, SAMUEL**: German jurist; born at Bamberg Oct. 11, 1807; died at Fürth Dec. 21, 1896. He was a son of Loeb Berlin, of Bamberg, and afterward "Landesrabbiner" at Cassel, whose other son Max was also a jurist, and became "Oberlandesgerichts-rath" at Nuremberg, being the first Jew to fill a judicial position in Bavaria. Samuel was the first Jewish lawyer in that kingdom. He commenced practising law in Gerolzhofen, where he became the intimate friend of another young attorney, who afterward was "Kultusminister" and "Ministerpräsident," Dr. Freiherr von Lutz. Dr. Berlin himself became "Hofrath," and was at one time in the "Vorstand" of the "Gemeindecollegium" in Ansbach.

**BERLIN, SAUL** (or **HIRSCHEL, SAUL**), after his father, ZEBI HIRSCH [HIRSCHEL] LEVIN; German Talmudist, and one of the most learned Jews of the Mendelssohnian period; born (at Glogau?) 1740; died in London Nov. 16, 1794. He received his general education principally from his father, who was chief rabbi of Berlin, and one of the few rabbis of the time who combined Talmudic learning with secular culture. He consequently educated his gifted eldest son along the same lines. In Berlin and Breslau (whither the young man frequently went to visit his father-in-law, R. Joseph Jonas Fränkel) he came into personal contact with the representatives of the movement for progress in Judaism, and became one of its most enthusiastic adherents. His antecedents, education, and calling, as rabbi in Frankfort-on-the-Oder, made it almost impossible for him openly to renounce the old rabbinism; and he consequently endeavored to advance his ideals anonymously or under a pseudonym.

Berlin began his literary career with an anonymous circular letter, "Ketab Yosher" (An Epistle of Justice) (printed in Berlin, 1794, after the death of the author), which Hartwig Wessely warmly defended in his own contention with the rabbis while pleading for German education among the Jews. With delightful humor, and in a florid though racy style, Berlin describes the absurd methods of the Jewish schools, and points out how the rabbinic casuistry—which then constituted the greater part of the curriculum—injures the sound common sense

of the pupils and deadens their noblest aspirations. In this work Berlin already betrays a morbid tendency to vilify those whom he dislikes for general or personal reasons, thereby injuring the cause which he desires to further.

This tendency is still more evident in his pseudonymous work, "Mizpeh Yoktel" (The Watch-Tower of Yoktel) (published by David Friedländer and his brother-in-law Itzig, Berlin, 1789), a polemic against the "Torat Yekutiel" of RAPHAEL HA-KOHEN. The latter, one of the most zealous advocates of rabbinic piety, was a rival candidate with Levin for the Berlin rabbinate, a circumstance which induced Levin's son to represent ha-Kohen as a forbidding example of rabbinism. Under the name "Obadiah b. Baruch of Poland," Berlin attempted in this work to ridicule Talmudic science, and to stigmatize one of its foremost exponents not only as ignorant, but also as dishonest. The publishers declared in the preface that they had received the work from a traveling Polish Talmudist, and had considered it their duty to print it and submit it to the judgment of specialists. In order to secure the anonymity more thoroughly, Berlin and his father were named among those who were to pass upon it.

**Ridicules** received the work from a traveling Polish Talmudist, and had considered it their duty to print it and submit it to the judgment of specialists. In order to secure the anonymity more thoroughly, Berlin and his father were named among those who were to pass upon it.

Had Berlin been content to illustrate from Raphael's work the senseless methods then current in Talmudic studies, he would have performed a meritorious task, and one for which he was especially fitted by his very great Talmudic learning and his lucid style of exposition. But the entirely unfounded attack upon the honor and honesty of his opponent, whose incorruptibility and firmness of character were admired even by his enemies, only injured Berlin and his cause. As soon as it reached Altona and Hamburg, where Raphael was chief rabbi, the work as well as its author was placed under the ban. The dispute that thereupon arose concerning the validity of the ban turned entirely upon the question whether a personal element, like the attack upon the rabbi of Altona, justified such a punishment.

With the exception of Ezekiel Landau, chief rabbi of Prague and a near relation of Berlin, only a few Polish rabbis declared the ban to be invalid; and even they censured the action of Berlin, who had been forced to acknowledge the authorship.

Before the excitement over this affair had subsided, Berlin created a new sensation by another work. In 1793 he published at Berlin, under the title "Besamim Rosh" (Incense of Spices), 392 responsa purporting to be by ASHER B. JEMIEL, with many glosses and comments which he called "Kassa de-Harsua" (Fish Fare). A few examples will illustrate the true character of these responsa. Berlin says, for instance, that (No. 257) an insight into the principles of the Torah and its commands can not be gained directly from it or from tradition, but only by means of the philosophico-logical training derived from non-Jewish sources. This opinion is coolly ascribed to Asher b. Jehiel, who condemned the study of philosophy and even of the natural sciences as being un-Jewish and pernicious (compare No. 58 of Asher's genuine responsa). The

following edifying opinions are ascribed to the neo-Talmudists of the thirteenth century: "Articles of faith [creed] must be adapted to the times; and at present the most essential article is that we all are utterly worthless and depraved, and that our only duty consists in loving truth and peace and learning to know God and His works" (*l.c.*). R. Asher is also alleged to be the author of the two responsa concerning the modification of the ceremonial laws, especially of such as were burdensome to the Berlin youth. Thus, for instance, it should be permitted to shave (No. 18), to drink non-kosher wine, "yayin nesek" (No. 36), and to ride on Sabbath. Berlin aroused a storm of indignation by thus fraudulently using the name of one of the most famous rabbis of the Middle Ages to combat rabbinism.

Mordecai Benet first attempted to prevent the printing of the book in Austria, and then mercilessly scourged the deception in a circular letter addressed to Berlin's father, by critically analyzing the responsa and proving them to be spurious. Levin tried in vain to defend his son. Berlin resigned his rabbinate, and, in order to end the dispute which he had aroused, betook himself to London, where he died a few months after his arrival. In a letter found in his pocket he warned everybody against looking into his papers, requesting that they be sent to his father. He expressed the curious wish to be buried not in a cemetery, but in some lonely spot, and in the same garments in which he should happen to die.

In order to do justice to this unique personality, it must be borne in mind, as a modern historian remarks, that in Berlin were united as in a focus the rays of a sinking and of a rising period in Jewish history. Being a really great Talmudist, he knew better than any other person the weaknesses

**Berlin's Character.** of rabbinism, and was filled with a burning desire to lead his people toward intellectual freedom. Mendelssohn's and Wessely's timid attempts to inaugurate a new era did not appeal to him. With his youthful ardor he could not understand that the development of the popular consciousness is a slow process. An open championship of his ideas, however, would have meant a breach with father, wife, and children—in short, with all his associates; it being after all doubtful whether his sacrifices would have helped his cause. His anonymous and pseudonymous authorship was a measure of policy and not of cowardice. He could not, however, escape the consequences of such a mode of warfare. It is debasing and embittering to attack secretly those whom one is forced to praise in public; hence Berlin became personal in his polemics, and nervous and dissatisfied with himself and the world, because he knew himself to be misunderstood through his own fault.

Besides the works mentioned above, Berlin is said to have written a large number of rabbinic works, including notes to the whole Talmud.

enough a defense of the authenticity of the responsa collection *Besamin Kosh*); Landshut, *Toledot Aishu ha-Schem*, pp. 84-106, 109; M. Strasschun, in Fuenf, *Kiryah Yecmanah*, pp. 235-238; Zanz, *Ritus*, pp. 226-228, who thinks that Isaac Satanow had a part in the fabrication of the responsa.

L. G.

**BERLINER, ABRAHAM (ADOLF):** German theologian; historian; born in Obersitzko, province of Posen, Prussia, May 2, 1833; received his first education under his father, who was teacher in Obersitzko. He continued his education under various rabbis, preparing himself at the same time for the University of Leipzig, where he received the degree of doctor of philosophy.

After serving for some time as preacher and teacher in Arnswalde, Berliner was called (1865) to Berlin as superintendent of the religious school maintained by the society for Talmudic studies (*Hebrat Shas*); and in 1873, when Israel Hildesheimer opened the rabbinical seminary in Berlin, Berliner was elected professor of Jewish history and literature. In this position, as well as in that of author, he has displayed an untiring activity. His edition of Rashi's commentary to the Pentateuch (1866) first made him known as a scholar; and he added to his reputation by various historical works, the result of his studies in the archives and libraries of Italy, which country he frequently visited, subventioned by the German government.

Abraham Berliner.

Berliner edited for two years (1874-75) the scientific periodical "*Magazin für Jüdische Geschichte und Literatur*," which from 1876 to 1893 he, together with his colleague, David Hoffmann, continued under the title "*Magazin für die Wissenschaft des Judenthums*." It was due to his zeal that the society *Me'ize Nirdamin*, for the publication of works of the older Jewish literature, which had been discontinued for several years, was revived in 1885; and since then Berliner has acted as its director. He further acted as the apologist of Judaism in a pamphlet against Lagarde ("*Prof. Paul de Lagarde, nach Seiner Natur Gezeichnet*," 1887), who denounced all Jewish scholars as dilettanti; and when the blood accusation was revived, he republished (1888) the opinion of Cardinal Ganganelli—afterward Pope Clement XIV.—to prove the falsity of this charge.

While orthodox in his religious views, Berliner was never a fanatic. He not only associated in his scientific work with the liberals, but also paid a high tribute to the merits of M. Steinschneider on the occasion of the latter's seventieth birthday (1886), by compiling a bibliography of that eminent scholar's works.

The following is a list of Berliner's works: (1) "*Raschi, Commentar zum Pentateuch*," 1866; (2) "*Aus dem Inneren Leben der Deutschen Juden im Mittelalter*," 1871; 2d ed., 1900; (3) "*Pléat Soferim:*

Beiträge zur Jüdischen Schriftauslegung im Mittelalter," 1872; (4) "Yesod 'Olam, das Aelteste Bekannte Dramatische Gedicht in Hebr. Sprache, von Mose Saeut," 1874; (5) "Die Massorah zum Targum Onkelos," 1875, 1877; (6) "Migdal Hananel, Ueber Leben und Schriften R. Chananel's in Kairuan," 1876; (7) "Ein Gang Durch die Bibliotheken Italiens," 1877; (8) "Rabbi Jesaja Berlin: Eine Biographische Skizze," 1879; (9) "Beiträge zur Hebräischen Grammatik im Talmud und Midrasch," 1879; (10) "Hebräische Grabchriften in Italien," 1881; (11) "Persönliche Beziehungen Zwischen Juden und Christen im Mittelalter," 1882; (12) "Beiträge zur Geographie und Ethnographie Babyloniens im Talmud und Midrasch," 1884; (13) Targum Onkelos (now the standard edition), 1884; (14) "Aus den Letzten Tagen des Römischen Ghetto," 1886; (15) "Censur und Confiscation Hebräischer Bücher im Kirchensaat," 1891; (16) "Geschichte der Juden in Rom, von der Aeltesten Zeit bis zur Gegenwart (2050 Jahre)," 3 vols., 1893; (17) "Ueber den Einfluss des Ersten Hebräischen Buchdrucks auf den Cultus und die Cultur der Juden," 1896; (18) "Aus Meiner Bibliothek, Ein Beitrag zur Bibliographie und Typographie," 1898.

D.

**BERLINER, EMIL**: American inventor; born in Hanover, Germany May 20, 1851. He was educated at the public schools of his native place and at the Samson Schule, Wolfenbüttel, whence he was graduated in 1865. In 1870 he emigrated to America, settling in Washington, D. C., where he has lived since 1882. He invented the loose-contact telephone transmitter, or microphone, known as "The Berliner," and now universally employed in the telephone and of the utmost importance in its practical use. He is also the inventor of the gramophone and other valuable devices. Berliner is a member of the American Institute of Electrical Engineers, and since 1879 has been a frequent contributor to scientific publications in the United States and Germany. He is, besides, the author of "Conclusions," Philadelphia, 1899. In 1881 he married Cora Adler of Washington, D. C.

A.

**BERMAN, JEKUTHIEL**: Russian-Hebrew novelist; born in 1825; died in Moscow about 1889. He held for over thirty years a responsible position in the employ of the Jewish railroad magnate Samuel Poliakov, and devoted part of his leisure to literary composition. Between 1870 and 1880 he lived in Tver and later in Moscow. A stroke of paralysis in 1887 rendered him incapable of continuing either his vocation or his favorite literary labors.

The first novel by Berman, "Shenot Rainu Ra'ah" (The Years Wherein We Have Seen Evil), which describes the life and sufferings of the Cantonists or child-recruits in the time of Emperor Nicholas I., appeared in the first volume of "Ha-Meliz" (1860). Another novel, "Pesel Mikah" (The Graven Image of Micah), appeared in vol. xx., Nos. 19-43 of the same periodical (1884). "Hashodedim be-Zahara-

yim" (The Noonday Robbers) was first published in vol. viii. of "Ha-Shahar" (1877) and afterward appeared in book form. The fate of his fourth novel, "Ha-Yetomim" (The Orphans), is somewhat singular. The first instalment appeared in Zederbaum's monthly, "Ha-Mizrah," of which only four numbers were published in St. Petersburg in 1886. Ten years later another part appeared in "Ner ha-Ma'arabi," a Hebrew monthly published in New York, which was also soon discontinued.

Berman is one of the purists in modern Hebrew, who insist that no strange words or foreign idioms shall be used by the writers of what is supposed to be the language of the Bible. An eloquent letter from his pen on this subject, and a clever reply by R. A. Braudes of Wilna (now of Lemberg) favoring expansion and modification of the language, are published in Meisach's "Gan Perahim" (Wilna, 1881), pp. 9-21.

**BERMANN, ADOLF** (pen-name, **Kóbor Tamás**): Hungarian writer; born at Presburg in 1867. After completing the study of law he became an employe of the Hungarian Credit Bank. Under the influence of his brother-in-law, Joseph Kiss, the well-known writer of ballads, he early began to develop his talent for belles-lettres, and to-day enjoys a wide celebrity in Hungarian literature. His novels and romances—all satires upon present social conditions—are extensively read.

L. V.

**BERMANN, FRANCO**. See FRANCO BERMAN.

**BERMANN, ISSACHAR HA-LEVI**: Philanthropist; born at Halberstadt Nisan 24, 1661; died there Tammuz 24, 1730; son of Judah Lehmann. At an early age he displayed great commercial enterprise. He afterward went to Hanover, and there became associated with the chief court agent Liepmann, who, appreciating Berman's abilities and integrity, gave him his confidence. In this way Berman had access to many princes, and several of them, such as those of Dessau, of Brunswick, and of Saxony, soon addressed themselves directly to him in their financial transactions. Berman was in especial favor with Friedrich Augustus II., elector of Saxony and, later, king of Poland, to whom he rendered many services in the capacity of banker and as diplomatic agent in Poland. For these services he was rewarded with the title of "Resident" of Poland and Saxony, by which title he is mentioned in the Polish chronicles.

Berman used his prestige for the good of his coreligionists; and his intervention with the Polish lords saved many Jewish lives. The special protection that Halberstadt enjoyed during the reigns of Friedrich I. and Friedrich Wilhelm I. was due to Berman's active influence. Generous by nature, his delight was to protect Jewish learning; and to effect this he built a synagogue at Halberstadt, where many Jewish scholars found support, and their works were printed at his expense.

In 1696 Berman obtained the permission of Friedrich Wilhelm to edit the Babylonian Talmud, copies

of which had become very scarce. The expense of this edition (Frankfort-on-the-Oder), amounting to \$50,000, was defrayed entirely by Bermann; and most of the 5,000 copies printed were presented to scholars.

I. Br.

**BERMANN, MORIZ** (pseudonyms, **Berthold Mormann, Moritz B. Zimmermann, Louis Mühlfeld**, and **Julius Marlott**): Austrian author; born at Vienna March 16, 1823; died there June 12, 1895. Bermann, who came of a family of publishers, was educated for a musical career; but after the death of his father he devoted himself for a time to collecting autographs. He soon became known as the owner of one of the finest biographical libraries in Europe. Shortly after the Hungarian Revolution he began (1851) what was intended to be a twenty-volume work, "Oesterreichisches Biographisches Lexikon," etc.; but, owing to the condition of unrest in Austria, it proceeded no farther than the letter A.

On Jan. 1, 1856, Bermann became editor of the "Wiener Courier" and developed into a remarkably prolific writer of sketches, historical novels, plays, and even dance-music; writing under the pseudonyms mentioned above. Among his works are: "Dunkle Geschichten," 1868; "Maria Theresa und der Schwarze Papst," 1870; "Das Schwarze Kabinett"; "Schöne Sünderin"; "Die Kaisertöchter als Bräute," 1890; and the historical comedies "Ein Stündchen auf der Karlsschule" and "Die Entführung aus dem Auge Gottes."

E. Ms.

**BERN:** Capital of the Swiss Confederation. Jews resided within its territory as early as the sixth century, but the first documentary evidence of Jewish inhabitants in Bern is for the year 1259. Though under the protection of the city, with the emperor as their real liege lord, they were usually in an unprotected state. In the separate Jews' street in which they lived, near the present Casino, was also their cemetery, which, after their expulsion in 1294, became private property; and in the "Inselgasse"—as the Jews' street was called after the convent built by the "Inselchwestern"—there was found in 1888, when the "Inselspital" was torn down, the tombstone of a Jew, dated 1293 (Studer, in "Archiv des Historischen Vereins des Kantons Bern," iv. 1. 38; iv. 2. 15; viii. 56, 212).

The Jews of Bern devoted themselves exclusively to banking and pawnbroking. As in Basel and Zurich, the rate of interest fixed by the government was 43%, two pennies per week in the pound; later it was reduced to 30%.  
**Jews Bankers and Pawn-brokers.** All classes—the clergy and the nobles, the burghers and the peasants, as well as the convents and the towns—regarded the Jews as their brokers; and in order to protect the Christians, the city council decreed, at Easter in 1283, that the term set for repayment should be limited to one year. Through

their money transactions the Jews earned the hatred of the populace, and as the citizens of Bern were deeply in debt to the Jews and, through various circumstances, were reduced to financial straits, they cast about, shortly after the death of Emperor Rudolf, for means of acquittal.

A pretext for action against the Jews was soon found. In 1294 they were accused of having kidnaped and killed a boy named Rudolf (Ruff). This accusation, which was also made at about the same time against the Jews of Colmar and Mayence, sufficed to start a persecution. The Jew Joel (Föli),

**The Jews Tortured or Expelled.**

who was regarded as the real offender, and all other Jews of Bern, women as well as men, were seized and maltreated, and either tortured or driven from the town. This event has been wrongly assigned to the year 1287.

during the reign of Emperor Rudolf (Stettler, "Schweizer Chronik," i. 20; Justinger, "Bernener Chronik," pp. 38 *et seq.*; Ulrich, "Schweizer Geschichte," pp. 144 *et seq.*; "Emek ha-Baka," p. 56; Zunz, "S. P.," p. 33, etc.; compare "Annales Colmariens," 28, for the year 1294; "Judei Bernenses Puerum ut Dixerunt Occiderunt"; Tillier, "Gesch. des Freistaates Bern," i. 72; on the murder of the boy Rudolf, see Stammeler, in "Katholische Schweizerblätter," 1888).

King Adolf, perhaps appealed to by the Jews themselves, appointed a commission to investigate the matter, composed of the bishop Peter of Basel,

**Their Claims Forfeited.**

the knight Gottfried von Merenberg, governor of the realm in Burgundy; Cuno von Bergheim, and Hartmann von Ratzehausen. This commission

decided, June 30, 1294, that the Jews, male and female, should forfeit all their claims against the mayor, the council, the community, and every one living in Bern up to the time of the decree; that they should give up all their securities and pledges; and that, in addition, they should pay to the community one thousand marks in silver, and to the mayor of Bern five hundred marks in silver—according to the standard of weight in Bern. King Adolf confirmed this enactment Aug. 1, 1294, in Frankfort-on-the-Main. The Jews assigned to the mayor in payment of his share their claims against the Knights of St. John, the monastery of Interlaken, Ulrich von Thor, and others. A characteristic expression is found in the receipt of the mayor, Jakob von Kienberg: "Pro occasione pueri, videlicet b. Rudolphi quem dicti Judei, ut dicitur, occiderunt." The same cautious phraseology, "ut dicitur," was employed by King Albrecht six years later, when he confirmed the decree, April 29, 1300 ("Solothurner Wochenblatt," 1828, pp. 192 *et seq.*). The Bernese immediately attached the property of the Jews. A woman, Berehta von Habstetten, was forced to give up a chest filled with gold, silver, ornaments, veils, etc., that had been confided to her by the Jew Vivilin and his partner (document of Aug. 14, 1294, "Monatsschrift," xiii. 49 *et seq.*; Stobbe, "Die Juden in Deutschland," p. 283, which reads "1494" instead of "1294," and "Bertha" instead of "Berehta").

Expelled from Bern, the Jews returned before the middle of the fourteenth century; and when the

Black Death swept the country in 1349, the people of Bern and of Zofingen gained the questionable reputation of fanning everywhere the hatred against the Jews, burning or banishing them and destroying evidences of indebtedness to them, as at the former persecution.

Twenty-five years later there were again Jews at Bern. In 1379 Master Isaac von Tanne, who lived there, loaned to the city of Freiburg 1,470 gold gulden. This "modest man," probably from Thann in Alsace, was, like Master Mathys Eberlin and his wife, Esther Merlinon, a money-lender.

At the end of the fourteenth century the Bernese showed a positively friendly feeling for the Jews, not only permitting them, for financial reasons, to settle in Bern, but naturalizing them for periods of six years, in consideration of a yearly tax of sixty schiltfranken in gold. They were not

**Naturalized and Patronized.** restricted in their worship; on their festival days they were not to be called into court; matters of dispute among themselves could either be decided according to Jewish law or be brought before the Bernese courts; butchers were enjoined to sell the meat killed according to Jewish ordinance, at the same price as other meat. About this time Christians also engaged in the money-lending business in rivalry with the Jews.

As soon as the Bernese were easier financially, the old hatred against the Jews revived, stimulated by Justinger, author of a Bernese chronicle, who was also a notary public, and as such carried on money transactions. His proposition to expel the

**Banished.** Jews found no lack of support, for "the Council and the Two Hundred of the City" decided unanimously, May 10, 1427, to drive the Jews forever from the city and the country. This decision was carried into effect, and matters continued thus for several hundred years.

Not until about 1820 did Jews again settle at Bern, and coming, as they did, mainly from Alsace as French citizens, they were given

**Readmission and Freedom.** absolute religious freedom. In 1865 Bern had twenty-seven Jewish families, which, having had a synagogue since 1855, formed themselves into an

association for worship ("Cultusverein"). In 1875 the community numbered 286 persons; in 1897, 348. It had a religious teacher, a burial society (hebrah kaddishah), and a fund for sick women. The canton of Bern had in 1874 1,000 Jews; in 1897, 1,195. The University of Bern was the first to appoint Jews as professors. The well-known physiologist, G. Valentin, who was the first Jew to be naturalized, obtained a position there as early as 1835. Later on the university numbered among its professors Lazarus Munk, the two Schiffs, Ludwig Stein, and others. In the federal offices J. Dreifuss of Endingen occupied, in 1901, a most respected position.

G. M. K.

**BERN, MAXIMILIAN:** German author; born at Kherson, South Russia, Nov. 18, 1849, where his father practised medicine. On the latter's death Bern and his mother went to Vienna that he might complete his education. The loss of his fortune forced him to abandon his studies at the university, and in 1873 he became private tutor to the apprentices at an equestrian school.

Bern soon tired of this occupation and turned to literature for a livelihood. His first novel, "Auf Schwankem Grunde," met with considerable success, though in this, as in fact in most of his writings, Bern is inclined to the gloomy despair of the majority of Slavonic writers. The success of his first novel enabled him to visit Berlin, Hamburg, Leipzig, Dresden, Frankfort, and Munich, at all of which places he studied assiduously. In 1886 he went to Paris, and a year later married a young Austrian actress, Olga Wohlbrück. In 1888 he settled in Berlin. Bern is the author of: "Gestrüpp," 1876; "Deutsche Lyrik seit Göthe's Tode," 1877; "Meine Geschiedene Frau," 1878; "Sich Selbst im Wege," a sketch of stage-life, 1877; "Ein Stummer Musikant," 1879; "Liliput," 1879; "Anthologie für die Kinderstube," 1879; "Illustriertes Haussehatz für die Jugend," 1880; "Aus der Gesellschaft," an almanac, 1881-82; "Am Eigenen Herd," 1886; "Deklamatorium," anthology, 1887; "Lustige Stunden," 1887; "Himmelan!" 1889; "Christliches Gedenkbuch," 1893; "Evangelisches Deklamatorium," 1895.

**BIBLIOGRAPHY:** *Das Geistige Berlin*, pp. 21, 22; Kürschner, *Deutscher Literatur-Kalender*, p. 89.

S. E. Ms.

**BERN, OLGA** (*née* Wohlbrück): Austrian author; wife of Maximilian Bern; born at Vienna July 5, 1865. She went on the stage under her own name, Wohlbrück, and while at the Odeon, Paris, in 1887, married the German author Bern. She abandoned the stage for literature in 1888. She is the author of "Aus Drei Ländern," 1890, short stories; "Unauslöschlich und Andere Novellen," 1892; "Carrière," 1892; "Glück," short stories, 1893; "Das Recht auf Glück," a drama, 1893; and "Vater Chaim und Pater Benediktus," a novel.

**BIBLIOGRAPHY:** *Das Geistige Berlin*, pp. 22, 23.

**BERNAL, ABRAHAM NUÑEZ:** Spanish martyr; burned at the stake by the Inquisition of Cordova May 3, 1655. His martyrdom is celebrated in a work published by Jacob Bernal (Amsterdam, 1655), entitled "Elogios que Zelozos Dedicaron á la Felice Memoria de Abraham Nuñez Bernal que fue Quemado Vivo, Santificando el Nombre de su Criador," etc., and dedicated to Señor Elian Nuñez Bernal. The work contains, among other items, a sermon in Bernal's honor preached by Isaac Aboab, and poems by Daniel á Ribera, Eliakim Castriel, Joseph Frances of Hamburg, Jonah Abravanel, Samuel de Castro, and Jacob de Pina.

**BIBLIOGRAPHY:** Zunz, *S. P.* p. 345; Kayserling, *Sephardim*, pp. 260, 354; *idem*, *Biblioteca Españ.-Port.-Judáica*, pp. 28, 43.

G

**BERNAL, ISAAC (MARCUS) DE ALMEYDA:** Spanish martyr; born in Montilla 1633; burned at the stake in St. Iago de Compostella

(Galicia, Spain), in the month of March, 1655, at the age of twenty-two. He was a nephew of Abraham Nuñez BERNAL. When only seventeen (1650) he had been thrown into the prison of the Inquisition at Valladolid. Daniel Levi de Barrios mentions Bernal in his "Gobierno Popular Judayco" as a relative. In the volume entitled "Elogios" (see Abraham Nuñez BERNAL) there is a "Relacion del felice martirio del invicto Ishack de Almeida Bernal que murio vivo en fuego santificando el nombre del Señor . . ."; as well as poems in honor of Bernal by Daniel á Ribera, Jonah Abravanel, Jacob de Pina, Samuel de Castro, Abraham Castanho, Isaac Israel, Daniel Arango, and a sermon by Jacob Abendana.

D.

**BERNAL, MAESTRO:** A Marano, ship-physician on the first voyage of Columbus to America. He had lived in Tortosa and had undergone public penance in October, 1490, as an adherent of Judaism. Columbus, by his arrogant conduct, aroused the enmity of the physician, who instigated a conspiracy against the admiral in Jamaica which seriously affected his destiny.

G.

**BERNAL, RALPH:** Politician and art-collector; died in 1854. His ancestors were of Spanish-Jewish origin. His father was Jacob Israel Bernal, a West-Indian merchant, who in 1744 refused the office of *gabay* (treasurer) of the Portuguese congregation because he decided to marry Josebeth Baruh, a "Tudescas" or German Jewess, which he was only allowed to do under humiliating conditions (Picciotto, "Sketches of Anglo-Jewish History," p. 167). Ralph was entered at Christ's College, Cambridge, where he took his degrees of B.A. and M.A. in 1806 and 1809 respectively. In 1810 he was called to the bar as a member of Lincoln's Inn, but inheriting extensive property in the West Indies, he preferred a parliamentary to a legal life. For thirty-four years (1818-52) he had a seat in the House of Commons, where he represented the city of London from 1818 to 1820, and Rochester from 1820 to 1841. During that period he spent £66,000 in election contests. In the latter year he contested the constituency of Weymouth, and was seated on petition. After representing that borough from 1841 till 1847, he returned to Rochester, continuing to sit for it until his retirement from political life in 1852. His parliamentary career was uneventful, although throughout he was prominent in the ranks of the Whigs, and from 1830 till 1850 acted as chairman of committees. Though brought up as a Christian, he recognized the claims of his Jewish ancestry by supporting the bills for the removal of Jewish disabilities, introduced while he was in the House. He was known in his day chiefly as an art-collector in antique china and plate; and at his death an attempt was made to secure his collection for the nation, but it was unsuccessful, and the collection was sold in 1855. Two catalogues of his works of art were issued. He was twice married, and had issue by both wives.

G. L.

**BERNARD, ABRAHAM:** Russian physician; born in 1762. He studied at London in 1789; practised medicine in Hasenpöth, Courland, Russia; became district physician in Shawli, government of Wilna; was subsequently appointed inspector of various military hospitals in Lithuania; and in 1809 was made chief surgeon of the hospital of Slonim. He also received the title of court councillor; practised at Mitau in 1810-11; and then settled in Moscow. He has published: "Gründe für die Inokulation; dem Lithauischen Landvolke Gewidmet," Mitau, 1799; "Observations sur l'Enterrement Pré-maturé des Juifs," Mitau, 1799; and a German translation of this last, under the title "Bemerkungen über das Frühe Beeridgen der Jüdischen Leichen," Mitau, 1802; "Medicinisch-Chirurgische Beobachtungen in den Kriegshospitälern zu Kobrin und Slonim Gesammelt," n. d.; and "Behandlung eines Epidemischen Wurmfieters, das im Jahr 1796 in Kurland Herrschte," in Hufeland's "Journal für Praktische Arzneikunde," 1797, iv. 4, No. 5.

H. R.

**BERNARD OF CLAIRVAUX** (generally known as **St. Bernard**): Church father; born 1091, near Dijon, France; died at Clairvaux Aug. 20, 1153. He was originally a monk of the Cistercian order at Cîteaux; but, on being appointed abbot of Clairvaux, he founded a branch order known by his name, 160 monasteries of which came into existence during his life. He vigorously opposed Abelard in 1140, as well as the introduction of the dogma of the immaculate conception.

St. Bernard is distinguished for his activity in forming the second crusade in 1145-46, during which he traveled through France and Germany, preaching the crusade. One of the consequences of this was a succession of massacres of the Jews throughout the Rhine valley. This called forth an energetic protest by St. Bernard, which was sent to England, eastern France, and Germany (Bouquet, "Recueil," xv. 606). In this letter he laid down the general lines of policy with regard to the Jews by which the Roman Catholic Church has since been guided; and his arguments are those generally given, though without his name, in more recent pronouncements. According to St. Bernard, Jews are not to be disturbed or destroyed, because they are living symbols of the Passion; for which they are to be punished mainly by dispersion, so that they shall be witnesses. But they will ultimately be converted. How can this be if they are ground down? At the same time St. Bernard approves of the papal policy which declares that all usury on debts due by Crusaders shall lapse during their absence in the Holy Land.

G.

J.

**BERNARD** (also **Domeier**), **ESTHER** (*née Gad*): German poetess and authoress; born at Breslau, Silesia, about 1770; died about 1814. On her mother's side Bernard was a granddaughter of Jonathan Eybeschütz, the famous rabbi of Prague and Hamburg.

At the age of about twenty she was married to a certain Bernard, with whom she removed to Berlin. She preferred the latter place to Breslau for the reason she herself gave in a letter to Jean Paul Richter in the following words: "Dort wird man über den Menschen nie den Juden vergessen; und besäße ich die grössten Verdienste, so würde ich doch in Eure besseren Zirkel nicht aufgenommen werden" (There [in Breslau] the Jew is never forgotten in the man, and were I to possess the highest merit, I should never be admitted to your higher circles). Her marriage with Bernard must have been unhappy, for after a few years she obtained a divorce and married Dr. Domeier of London, with whom she went to live in Malta.

Even in her girlhood Esther Bernard showed great talent for poetry and literature. Before her marriage to Bernard she contributed many poems to "Plumken's Magazin" and Rausch's "Unterhaltungen." To the latter she contributed also a short story in English, "Marens and Monima," 1795. While the wife of Bernard she wrote "Beschreibung einer Wasserreise von Aussig Nach Dresden" (in "Deutsche Monatsschrift"); "Eine Nachricht über das Dresdener Museum" (in "Archiv der Zeit," Nov., 1799, p. 445). She was also a contributor to "Der Cosmopolit" (June, 1795, pp. 577-599), and "Bäcker's Erzählungen" (1798, iv. 272) for which she wrote some poems. "Bäcker's Almanach" for 1800 contains two poems by Bernard, one of which has been set to music by Neuman, "Ueber Schiller's Piccolomini," in "Merkwürdigkeiten der Mark Brandenburg," March, 1800, p. 382.

In Berlin, Bernard made the acquaintance of Comtesse de Genlis, the authoress of "Les Mères Rivaless," which she translated into German under the title "Die Beiden Mütter," 2 vols., 1800.

After her marriage to Dr. Domeier she wrote "Gesammelte Blätter," Leipzig, 1805; "Briefe Während Meines Aufenthaltes in England und Portugal," 2 vols., Hamburg, 1803; "Kritische Auseinandersetzungen Mehrerer Stellen in dem Buche der Frau von Staël über Deutschland," Hanover, 1814.

At the erection of the Wilhelmsschule in Breslau, in 1791, for the instruction of Hebrew children, Esther Bernard celebrated the event in a poem in which she hailed the dawning of an era of freedom and equality for the Jews of Silesia.

S. R.

**BERNARD OF GORDON:** Christian physician; born probably at Gordon in Guienne, department of Lot, France; professor of medicine at Montpellier about the year 1300. His "Lilium Medicinæ" was much read by Jews, and several Hebrew translations of it are extant; e.g., that by Jekuthiel b. Solomon (Maestro Bonsenior) of Narbonne in 1387

(שׂוֹרֵן הַרְפוּאָה); and another by Moses ben Samuel of Roquemaure (Gard), 1360 (פֶּרֶת הַרְפוּאָה).

**BIBLIOGRAPHY:** Steinschneider, *Hebr. Uebers.* p. 785; Renan-Neubauer, *Ecrivains Juifs*, p. 386.

G.

M. S.

**BERNARD, HERMANN:** Teacher of Hebrew in the University of Cambridge, England; born of Austrian parents at Uman, or Human, a small town in southern Russia (at that time Poland), in the year 1785. His father being a converted Jew, he was brought up as a Christian. He went to England in 1825; settled in Cambridge as a private teacher in 1830; and was appointed "Præceptor Linguae Sacrae" in the university on Oct. 18, 1837, succeeding Josephus Crool. He died at Cambridge, aged seventy-two, on Nov. 15, 1857, after teaching there with marked success for twenty-seven years.

Bernard published the following works: "The Creed and Ethics of the Jews Exhibited in Selections from the Yad ha-Hazakah of Maimonides" (1832); and "Ha-Menahel" (The Guide of the Hebrew Student), 1839. During Bernard's blindness in 1853 appeared "Me Menuhot" (Still Waters), an easy, practical Hebrew grammar, in two volumes, by the Rev. P. H. Mason (afterward fellow and president of St. John's College) and Hermann Bernard. Bernard's lectures on the Book of Job, edited by his former pupil, Frank Chance (afterward a member of the Old Testament Revision Committee), appeared in one volume in 1864, but the editor's promised appendix was never published.

J.

C. T.

**BERNARDINUS OF FELTRE:** Franciscan friar; born at Feltre, Italy, in 1439; died Sept. 28, 1494. He was one of the bitterest enemies the Jews ever had, and openly advocated their utter extermination. He traveled throughout Italy preaching a crusade against them, the burden of his sermons being: "Let Christian parents keep a watchful eye on their children, lest the Jews steal, ill-treat, or crucify them." As a worthy disciple of Capistrano, whom he held up as the type and model of a true

Christian, he knew that his eloquence would be of no avail among the aristocracy, the members of which, guided by their interests, protected the Jews.

He therefore endeavored to inflame the lower classes and to arouse the ill-will of the populace against the Jews.

Because certain Jewish capitalists had been successful, he depicted all Jews as vampires and extortioners. In his sermons he was wont to say: "I, who live on alms and eat the bread of the poor, shall I be a dumb dog and not howl when I see the Jews wringing their wealth from Christian poverty? Yea! shall I not cry aloud for Christ's sake?"

These sermons bore fruit. At Ravenna Bernardinus incited the populace to such a degree that he was enabled to expel the Jews with violence and to send deputies to Venice to solicit a legal sanction for the expulsion. The authorities of Florence were constrained to order Bernardinus to quit the country, so that a rising which was imminent might be prevented (1487). At Campo San Pietro Bernardinus expelled a Jewish pawnbroker and established a gratuitous pawnbroking institution.

All Jewish occupations and enterprises were equally the objects of Bernardinus' reprobation. The inhabitants of Sienna engaged a Jewish physician. Bernardinus delivered a series of sermons in which he reproduced all the idle tales spread among the people respecting the hatred that the Jews nourished toward Christians. He related that a Jewish physician of Avignon on his death-bed recalled with delight the fact of having killed thousands of Christians through his drugs. The consequence of these sermons was that the lower classes and the women abstained from having recourse to the Jewish physician.

These partial successes notwithstanding, the efforts of Bernardinus mostly failed of effect. The Italian people were actuated by good common sense, and the authorities sorely hindered Bernardinus in his Jew-baiting. It was in the Tyrol that he succeeded in bringing about a bloody persecution.

While Bernardinus preached in the city of Trent, some Christians called him to account for his hatred of Jews, remarking that the Jews of Trent were worthy people. "Ye know not," replied the monk, "what misfortune these folks will bring upon you. Before Easter Sunday is past they will give you a proof of their extraordinary goodness." Chance favored him with a good opportunity.

During Holy Week of the year 1475 a Christian child named Simon, who was three years old, was drowned in the Adige, and his body was caught in a grating near the house of Trent. The Jew gave notice of this occurrence to Bishop Hinderbach.

The body was removed to the church and exhibited, and Bernardinus and other hostile priests raised an outcry against the Jews, saying that they had put the child to torture and then slain him and flung him into the water. The bishop ordered the imprisonment of all the Jews, who, with one exception, when subjected to torture confessed. Thereupon all the Jews of Trent were burned, and it was determined that thereafter no Jew should settle in the city (see SIMON OF TRENT).

Bernardinus endeavored to make use of this occurrence to bring about the ruin of the Jews. At his instigation the corpse was embalmed, and commended to the people as a sacred relic. Pilgrimages to the remains were made by thousands of persons, and before many days several of them claimed they had seen a halo about the body. This new miracle was announced from every chance, and fomented the excitement of the rabble against the Jews to such a degree that even in Italy they dared not go outside the towns, in spite of all that the doge and the Senate of Venice as well as Pope Sixtus did to stem the tide of hatred. Gregory XIII. canonized both—Bernardinus as a prophet, and Simon as a martyr.

**BERNAYS, ISAAC** (known as **Hakam Bernays**): Chief rabbi in Hamburg; born 1792 at Mayence; died May 1, 1849, in Hamburg. After having finished his studies at the University of Würzburg, in which city he had been also a disciple of the well-known Talmudist R. Abraham Bing, he went to

Munich as private tutor in the house of Herr von Hirsch, and afterward lived at Mayence as a private scholar. In 1821 he was elected chief rabbi of the German-Jewish community in Hamburg, to fill a position where a man of strictly Orthodox views but of modern education was wanted as head of the congregation. After personal negotiations with Lazarus Riesser (father of Gabriel RIESSER), who went to see him in Mayence, Bernays accepted the office on characteristic terms; namely, that all the religious and educational institutions of the community were to be placed under his personal direction; he wanted to be responsible to the government only. Besides this he required a fixed salary, independent of incidental revenues, and wished to be called "clerical

Isaac Bernays.

functionary" or "hakam," as the usual titles, "moreh zedek" or "rabbi" did not seem to him highly esteemed at that time.

In 1822 he began the reform of the Talmud Torah school, where the poorer children of the community had till then been taught Hebrew and arithmetic. He added lessons in German, natural science, geography, and history as important parts of the curriculum, and by 1827 what had formerly been merely a religious class had been changed to a good elementary public school, which could well prepare its pupils for life. In spite of this great progress the council of the community wanted to take a greater part in the supervision of the course of instruction, and in consequence of differences with the hakam resulting from these claims, they withdrew the subvention of the school in 1830; but through the intervention of the senate of Hamburg this was again granted in 1832, though Bernays was denied the presidential seat he had till then occupied in the council of the school and was made instead "ephorus" of the school. In 1849 he died suddenly of apoplexy, and was buried in the Grindel cemetery.

Bernays possessed wide philosophical views, a rare knowledge of the Bible, Midrash, and Talmud, and an admirable flow of language: he was indeed a born orator. He was the first Orthodox German rabbi who introduced the German sermon into the service, and who tried to interpret the old Jewish feeling in modern form and to preserve the ancestral creed even in cultured circles. His antagonists were therefore to be found in the ranks of the ascetic fanatics of the "klaus" as well as among the adherents of the "Temple," a reform synagogue founded in 1819, against whose prayer-book Bernays had pronounced an anathema. By lectures on the Psalms, on Judah ha-Levi's "Cuzari," etc., he tried to strengthen and to deepen the religious life of the community, the institutions of which he supervised very carefully. His influence is still felt in the Hamburg community, where Jewish traditions and the study of Jewish literature are often found united with modern education.

Bernays left no literary works. A small anonymous essay, "Der Bibelsche Orient"—of great linguistic learning and original and wide historical views on Judaism—was supposed to have been written by him in early years; but he denied the authorship, and never in later life showed any conformity with the views of the little book. Of his sons the celebrated philologist Jacob Bernays, professor and chief librarian at the University of Bonn, kept faithful to the religious views of his father, while the well-known literary historian Michael Bernays, who was only fourteen years old on his father's death, was converted to Christianity. Bernays' best pupil was Samson Raphael Hirschen, the well-known leader of modern Orthodoxy.

A. FE.

**BERNAYS, JACOB:** German philologist; born at Hamburg Sept. 18, 1824; died at Bonn May 26, 1881. He was the eldest son of the ḥakam Isaac Bernays, who carefully guided his elementary education until he was sent, in 1844, to Bonn to attend the university. There he studied philology under G. Weleker and F. Ritschl, becoming particularly attached to the latter. His philosophical studies he pursued under Brandis. It was during his four years' career at the university that in competition for a gold prize he submitted a treatise on Lucretius, which won for him not only the prize, but also the admiration of Ritschl, who strongly advised him to devote himself to a professional career. The work was afterward published under the title "Die Ausgabe des Lucretius" (Leipzig, 1852). Bernays graduated in 1848, and in the same year issued his "Heracleiten" (Bonn, 1848). In the following year he became privat-docent at his *alma mater*, and in the same year published at Bonn his "Florilegium Resancentes Latinitatis." He was also engaged in editorial work on the "Rheinische Museum," founded by Niebuhr, and conducted by Weleker and Ritschl.

The serious work of organizing the Jewish Theological Seminary at Breslau, the funds for the establishment of which had been provided by Jonas

Fränkel, was actively begun in 1853, and the work was practically of a pioneer nature. Bernays was among the first to be called upon to be associated with Zacharias Frankel, Graetz, and Joël in this task of outlining the plan and method of study to be pursued in the new seat of learning, where rabbis were to be trained in accordance with the scientific educational ideas of the time, instead of with the antiquated methods of the yeshibah. Bernays was indeed peculiarly fitted to cooperate in such an undertaking; for, besides his profound classical learning and his university experience, he was a thorough Hebrew scholar and, moreover, was intensely Jewish in thought, feeling, and mode of life.

When the seminary was opened (Aug. 10, 1854) Bernays began his actual teaching; his subjects including not only regular courses in Greek and Latin, but special courses as well in the history of German literature, history of Hebrew poetry, the philosophy of religion, illustrated by the "Cuzari" and "Moreh Nebukim." In addition he conducted exercises in German style. The annual reports of the seminary were enriched each year with some treatise prepared by one or another of those connected with the institution. Bernays contributed three of these during the twelve years of his association with the faculty: "Ueber das Phokylidische Gedicht" (Berlin, 1856); "Die Chronik des Sulpicius Severus" (Berlin, 1861); and "Theophrastos' Schrift über Frömmigkeit" (Berlin, 1866). These were afterward published separately.

Bernays' activity during his sojourn at Breslau was not, however, confined to his work at the seminary, as he had at once connected himself with the University of Breslau as privat-docent with remarkable success. As a consequence his general literary productiveness was considerable and noteworthy. In 1855 there appeared in Berlin "Die Lebensbeschreibung des Joseph J. Scaliger." Two years later was produced the work upon which,

probably more than on any other one of his writings, his claim upon the notice of scholarly posterity will have to rest, "Grundzüge der Verlorenen Abhandlung des Aristoteles über die Wirkung der Tragödie" (Breslau, 1857). As late as 1882, in his report on the Aristotelian literature in the "Jahresbericht für die Alterthums-Wissenschaft," Dr. Susemihl of Greifswald speaks of the deluge of writings called forth by the "Grundzüge" as not having even then subsided. Another contribution to Aristotelian literature by Bernays during this period is "Die Dialoge des Aristoteles im Verhältniss zu Seinen Uebrigen Werken" (Berlin, 1863).

From his *alma mater* there came at last the recognition that was his due. Ritschl left his position at

Bonn University in 1866; and the call was sent to Bernays to fill the place of assistant professor and chief librarian. With the greater responsibilities now thrust upon him, however, he still found time for the production of some of the best and most scholarly of his writings. "Die Heraklitischen Briefe" was published at Berlin in

1869. In 1872 appeared his "Uebersetzung der Drei Ersten Bücher von Aristoteles' Politik." "Ueber die unter Philo's Werken Stehende Schrift: Ueber die Unzerstörbarkeit des Weltalls" was issued in 1876, and "Lucian und die Cyniker" in 1879. In 1880 there appeared "Zwei Abhandlungen über die Aristotelische Theorie des Dramas," which is a republication of the "Grundzüge" of 1857 and the "Ergänzungen zu Aristoteles' Poetik." His last work was "Phokion und Seine Neuern Beurteiler" (Berlin, 1881).

Suddenly, amid this congenial activity, Bernays was stricken with sickness, which very soon and unexpectedly ended fatally. He was but fifty-seven years of age; and the grief felt at his early demise was profound and wide-spread, alike among professors and students and his coreligionists. Though fifteen years away from the Jewish Seminary at Breslau, he still remained devoted to it, and bequeathed to it his Hebrew library.

Bernays' collected writings, edited by Usener, were published in two volumes, Berlin, 1885.

**BERNAYS, MICHAEL:** German historian of literature; born at Hamburg Nov. 27, 1834; died at Carlsruhe Feb. 25, 1897; son of Hakam and brother of Jacob Bernays. He attended the Johanneum in his native city, where, principally under the guidance of Adolph Kraft, he devoted himself to the study of the classics. In a performance of "Antigone," arranged at the gymnasium by Töpfer, Bernays appeared as *Kreon*, and is said already at this time to have excited admiration by the originality of conception revealed in his rendering of the lines. A few months later he entered the University of Bonn, where at first he devoted himself to the study of law, but soon abandoned it for that of classical philology, which, notwithstanding many unfavorable external circumstances, he thenceforth prosecuted with unflagging perseverance. After completing his course at Bonn he went to Heidelberg, where he became a pupil of Gervinus and Holtzmann. Shortly after his arrival there Bernays, although then scarcely twenty-one years of age, lectured on Shakespeare before a literary student society which he had founded, and whose members had bestowed upon him the title of "master." In 1855 he received his doctorate and prepared to qualify himself for a professorship, while at the same time prosecuting his manifold literary labors.

In 1859 Bernays published a festival play for the one hundredth anniversary of Schiller's birthday, and in 1864 he composed verses on the

**Literary Labors.** tricenennial celebration of the birth of Shakespeare. Shortly afterward he wrote an explanatory text to Beethoven's music to "Egmont," which was not only frequently spoken, but produced so lasting an impression that, thirty years later, the directors of the Carlsruhe Theater ordered from Bernays a similar prologue for Mozart's "Requiem." Despite these occasional literary productions, however, Bernays steadily pursued his studies; and he even refused an offer from Treitschke to participate in the editor-

ship of the "Preussische Jahrbücher," fearing that the duties of such a position might divert him from his main purpose. In the same year, 1866, he published his first celebrated work, "Zur Kritik und Geschichte des Goetheschen-Textes," in which he once for all established the necessity of applying the methods of classical philology in the criticism of the modern masters.

Shortly after the Franco-Prussian war, which so powerfully stimulated the general interest in the national poetry, Bernays received a call to the University of Leipsic, and such was his popularity as a lecturer there that within a very short time after his arrival the largest hall of the university was inadequate to accommodate the audience. It was the enthusiasm thus aroused that now induced the art-loving king of Bavaria, Ludwig II., to found a special chair of German literature—the first to be established—at Munich, and to summon Bernays thither as extraordinary professor, who thus, at the age of thirty-nine, already beheld the fulfilment of his dearest wishes. After an activity of eighteen months Bernays received a regular professorship, and this position he held until his resignation in 1889, when he removed to Carlsruhe.

In striking contrast with many university professors, Bernays rarely confined himself to the written copy before him; for he was gifted, above all, with a marvelous memory. It is said **Professor of German Literature.** that he could recite lengthy poems and dramas, such as "Hermann und Dorothea" and "Tasso," from beginning to end without faltering or betraying any evidence of fatigue. With this faculty, which he had cultivated from early youth, Bernays united an unusually extensive yet accurate knowledge of the literature of ancient and of modern times. Thus he constantly enriched his discourse with copious and pertinent citations reflecting the inmost nature of the author under discussion. When to these qualifications are added a voice of exceptional flexibility and power, and a carefully studied eloquence of gesture, the great popularity of the lecturer can be readily understood.

In his published works Bernays aimed to transfer the methods of classical philology to the domain of modern literary history and criticism, **As Author.** and endeavored to elevate these studies to an equality with the other academic sciences. Among his most popular writings, besides those mentioned, are: "Briefe Goethe's an F. A. Wolf," Berlin, 1868; "Zur Entstehungsgeschichte des Schlegelschen Shakespeare," Leipsic, 1872; "Der Junge Goethe"—a collection of the poems and letters of Goethe during the years 1764-76—3 vols., Leipsic, 1875; "Goethe und Gottsched"—two biographies—Leipsic, 1880; an introduction to a revised edition of Schlegel and Tieck's translation of Shakespeare, Berlin, 1871-72; an introduction to a centenary edition of Voss's translation of Homer, Stuttgart, 1881.

Apart from his literary activity, Bernays was frequently called upon to officiate on public occasions; as, for example, in 1883, when he was requested by the city of Munich to preside at the public dinner given in celebration of the emperor's birthday; and

in 1892 at Carlsruhe, when he delivered the dedicatory address at the unveiling of the Scheffel monument (see Bettelheim, "Biographische Blätter," 1895). In contradistinction to his brother Jacob, who strictly observed the ordinances of Judaism, Michael Bernays early embraced Christianity.

**BIBLIOGRAPHY:** Bettelheim, *Biographisches Jahrbuch und Deutscher Nekrolog*, 1897; *Münchener Allgemeine Zeitung*, Feb. 26, 1897; Brockhaus, *Conversations-Lexikon*, s.v. s. J. So.

**BERNBURG.** See **ANHALT**.

**BERND, JULIUS D.:** American merchant and philanthropist; born in 1830; died at Pittsburg, Pa., Nov. 30, 1892. Bernd was a successful business man and highly esteemed by his mercantile associates in Pittsburg. He was a member of the chamber of commerce. Being actively interested in philanthropic work, he was a director of the Gusky Orphanage and Home of Western Pennsylvania, an earnest worker for the Humane Society, and a member of the Rodef Sholem congregation. By his will he left a large amount to various charities, particularly to the Union of American Hebrew Congregations, the Hebrew Union College, and the Gusky Orphanage. After giving to every charitable institution in the county of Allegheny, without regard to creed or color, he bequeathed the residue of his estate, share and share alike, to the Hebrew Union College of Cincinnati, O., and to the city of Pittsburg, Pa., the bequest to the city being conditioned on its creating a department or alcove in the Carnegie Library of Pittsburg, to be known as the "J. D. Bernd Alcove," which was accordingly instituted.

A. J. Co.

**BERNFELD, SIMON:** German publicist and rabbi; born in Stanislaw, Galicia, Jan. 6, 1860. His father, who was a good rabbinical scholar and also well versed in secular knowledge, was his first instructor. He took to writing Hebrew very early; and at the age of thirteen he translated a German novel into that tongue. His first article, "About the Expulsion of the Jews from Nuremberg," was published in "Ha-Maggid" of 1879 (No. 22), as were various other contributions from his pen.

In 1879 Bernfeld went to Königsberg, where he held for some time an editorial position on M. L. Rodkinson's Hebrew weekly, "Ha-Kol." In the fall of 1880 he left Königsberg for Breslau, where he spent several months in great distress. Early in 1881 he went to Lyck, Prussia, to become the assistant of David Gordon, editor of "Ha-Maggid." He remained there for nearly a year, and continued to contribute articles and editorials for that periodical for several years after leaving Lyck. He returned to Königsberg late in 1881, and after a year's preparation entered the university of that city, where he remained until the summer of 1883.

A brighter period in Bernfeld's life began with his arrival in Berlin in the summer of 1883. He entered the university of the German capital, and at the same time attended the Hochschule für die Wissenschaft des Judenthums. In 1885 he became a regular contributor to "Ha-Melitz" (St. Petersburg), and in the same year obtained his doctor's degree. In March, 1886, he was elected chief rabbi of the Spanish and Portuguese community of Belgrade, the cap-

ital of Servia, and director of the Jewish school in that city. This position he held for about seven years.

Bernfeld now resides at Berlin, and occupies himself mainly with writing in Hebrew and German. He is a German writer of varied and considerable attainments. His "Juden und Judenthum im Neunzehnten Jahrhundert" (Berlin, 1898), which forms vol. iii. of the series "Am Ende des Jahrhunderts," edited by Dr. Paul Bornstein, is a work of merit, and the same can be said of his essay, "Der Talmud, Sein Wesen, Seine Bedeutung, und Seine Geschichte" (Berlin, 1900). His new translation of the Bible, now in course of publication, has also been highly praised (see "Allg. Zeit. des Judenthums," 1901, No. 13). His chief significance, however, lies in the field of Neo-Hebraic literature. He belongs to the younger class of clear and forceful writers who have brought new life into modern Hebrew literature and have lifted the journalistic part of it to an eminence which it had not before attained. A clever journalist, Bernfeld writes on various subjects. In addition to innumerable articles in various periodicals, he has compiled popular works on history, philosophy, and kindred subjects; while in the field of the history of the Jews, of which he made a special study, he has done valuable original work.

The most important of his works are: "Da'at Elohim" (Knowledge of God), a history of the religious philosophy of the Jews from rudimentary philosophical systems of the Bible down to that of Asher Ginzberg, the thinker of modern national Judaism (Warsaw, 1897); "Dor Tabapukot," a monograph on the Mendelssohnian period (*ib.* 1896-98); and biographies of S. L. Rapoport (1899), of Michael Sachs (Berlin, 1900), and of Gabriel Riesser (Warsaw, 1901).

**BERNHARDT, MARTIN:** German neuropath and medical author; born at Potsdam April 10, 1844. He was educated at the gymnasium of his native place and at the University of Berlin, where he studied under Virchow and Traube. After graduating as M.D. in 1867, he was appointed assistant to Leyden at the Universitäts-Klinik at Königsberg; and two years later, physician at the Charité (free dispensary and hospital) at Berlin under Westphal. The Franco-German war interrupted his clinical work, for he went to the front with the Landwehr, receiving a medal for bravery under fire. On his return in 1872, he was appointed privat-docent of medicine and as specialist for neuropathy at the University of Berlin, and, ten years later, assistant professor.

Bernhardt, in addition to contributing numerous articles to medical publications, has been the editor-in-chief since 1885 of the "Centralblatt für die Medizinischen Wissenschaften," and the correspondent of neuropathy and electrotherapy for Virchow-Hirsch's "Jahresberichte." He is also one of the collaborators of Eulenburg's "Realencyklopädie der Medizin." His principal works are: "Die Sensibilitätsverhältnisse der Haut," 1873; "Beiträge zur

Symptomatologie und Diagnostik der Hirngeschwülste," 1881: "Electricitätslehre für Medizin." 1884, in collaboration with Professor Rosenthal: "Erkrankungen der Peripherischen Nerven," 1895-1897.

E. Ms.

**BERNHARDT, SARAH (ROSINE BERNARD)**: French actress; born at Paris Oct. 22, 1844, of Dutch Jewish parentage. She was received into the Roman Catholic Church at the request of her father. Her early years were spent at the Convent Grand-Champs, Versailles, where she remained until fourteen years old, when she was received into the Conservatoire, where she studied dramatic art under Prévost and Sanson. Though, like Rachel, naturally inclined to comedy, Bernhardt won a prize for her work in tragedy. On Aug. 11, 1862—four years after beginning her dramatic studies—she made her début at the Comédie Française in "Iphigénie." Her success was but partial; and the experiment—for such it really was—resulted in further study and a short trip to Spain. On her return to Paris the young actress went to the Théâtre du Gymnase, the Porte-Saint-Martin, and the Odéon (1864), and, a year later, back again to the Porte-Saint-Martin. There she appeared as *Armande* in "Les Femmes Savantes," as *Cordelia* in "King Lear," and in her first male rôle, *Zanetto*, in François Coppée's "Le Passant" (1869).

The outbreak of the Franco-German war interrupted her career for a time, the interval being spent in study and nursing the wounded. Her next appearance was on Nov. 6, 1872, when she played *Mlle. de Belle-Isle* at the Comédie Française. For the next seven years Bernhardt remained a member of this famous institution, of which she became a "sociétaire" in 1875. Her greatest artistic triumphs were achieved there in "Phèdre"; "Andromaque"; "Zaïre"; "Alcmène"; "Ruy Blas" (*Marie de Neubourg*); "La Fille de Roland" (*Berthe*); "Rome Vaincue" (*Posthumia*, the blind woman); "Le Sphinx"; "L'Etrangère"; and in the classic plays of Racine and Corneille.

In 1879 Bernhardt's eccentric behavior and temper led to a severance of her associations with the Comédie Française; and on a civil suit the actress was ordered to pay damages amounting to 100,000 francs. After a tour to London, Copenhagen, and America (1880-81) with a company of her own, Bernhardt returned to Paris, where she assumed the direction of the Théâtre Ambigu (1882). The same year she was married to the actor Jacques Damala (died 1889), and played *Pierrot* at the Trocadéro in a pantomime written by Richepin. She afterward leased the Théâtre Vaudeville, which she opened Dec. 11, 1882, with "Fédora," playing the title-rôle herself. Soon after, she returned to the Porte-Saint-Martin, which she opened Sept. 17, 1883, with "Frou-Frou." This was followed by "La Dame aux Camélias," "Nana Sabib," and "Théodora." During the season of 1886-87 she toured the United States, and on her return to the Porte-Saint-Martin appeared in "La Tosca." She revisited America in 1888-89, and on her return

played at the Porte-Saint-Martin in "Jeanne d'Arc" and "Cléopâtre" (1890).

Then followed an interval during which the actress toured Europe. Returning to Paris, she engaged in 1893 the Théâtre de la Renaissance, producing "La Femme de Claude," Lemaitre's "Les Rois," Bardé's "Médée," "Magda," Rostand's "La Samaritaine" and his "La Princesse Loïtaine" (1895), and *Yzeïl* in D'Annunzio's "La Ville Morte" (1898). While leasing this house, Bernhardt gave the use of it to Duse, who played the French actress's rôle in "La Dame aux Camélias," while Bernhardt played the title-rôle in "Magda."

Her latest and most successful lease of a theater was when she took the Théâtre de l'Opéra Comique, formerly known as the Théâtre Municipal des Nations, and converted it at considerable cost into the Théâtre de Sarah Bernhardt (Jan. 18, 1899). Here she first essayed *Hamlet* and later the *Duc de Reichstadt* in Rostand's "L'Aiglon." In 1900-01 she again toured the United States, with Coquelin.

In addition to being an actress, Bernhardt is a dilettante sculptor and author. Her bust of Sardou attracted attention. Her writings consist of a book, "Dans les Nuages" (1878), and "L'Aveu," a play produced at the Odéon in 1888. She has also written a rather frank autobiography, evoked by Marie Colombier's attack on Bernhardt in her notorious pamphlet "Sarah Barnum."

As an actress, Sarah Bernhardt is the embodiment of the theatrical; every pose, every movement, every intonation of her voice being the result of careful, patient study. She belongs to the intellectual school of actors, splendidly intelligent, but rarely touching the heart. Bernhardt is always admirable, but never aught save Bernhardt. Her voice is remarkable for its flexibility and timbre, and her grace of movement is one of her chief attractions. Whether she plays the blind *Posthumia*, or *Frou-Frou*, or *Hamlet*, or the *Duc de Reichstadt*, her personality is always preponderant and she ever remains the French actress, Sarah Bernhardt.

**BERNHARDY, GOTTFRIED**: German philologist and historian of literature; born at Landsberg in the Neumark, province of Brandenburg, March 20, 1800; died at Halle May 14, 1875. His father was a merchant who had been successful and prosperous, but who in Gottfried's childhood had a series of business reverses that left him in a position where he had to struggle for the bare necessities of life and with but little prospect for providing the boy with a liberal education. At this juncture when the lad was about nine years old, two well-to-do brothers of his father, living in St. Petersburg, arranged to provide the means for his schooling, and he was entered at the Joachimsthal Gymnasium, Berlin, where he remained six years, being admitted to the Berlin University in 1817. Here in the pursuit of his philological studies, to which he now especially applied himself, he had the good fortune to study under F. A. Wolf—though the latter was

already in the declining years of his life—as well as under Böckh and Buttman. He received his degree as doctor of philosophy on Oct. 30, 1822, and in the same year published his first work, "Eratosthenica," a collection of the widely scattered fragments of the early Alexandrian astronomer.

In 1823 he became privat-docent in philology at his alma mater, and two years later was appointed associate professor. He received a call from Halle in 1829 to assume the position of full professorship in the university there, and that of director of the philological seminary. This call he accepted, and Halle was the sphere of his activity for the rest of his life. During the two years from 1841 to 1843 he officiated as prorector of the university, and in 1844 he was appointed chief librarian, the duties of which position he fulfilled in addition to his work of instruction—not in any perfunctory fashion, but by reorganizing the library of the university in a complete and systematic manner.

From the very beginning of Bernhardt's professional career he prosecuted his literary labors as well. During the first year of his advent to Halle, there appeared his "Wissenschaftliche Syntax der Griechischen Sprache." In 1830 the first edition of his "Grundriss der Römischen Litteratur" was published. Of this successive revisions were issued in the years 1850, 1857, 1865, and 1872. The "Grundlinien zur Encyklopädie der Philologie" was issued in 1832. In the following year, work was begun on his version of Suidas, but the appearance of Gatsford's great edition at Oxford necessitated a change of plan, and the work was not completed until 1851. Upon its publication the king of Prussia conferred an order upon Bernhardt. The first part of the "Grundriss"—comprising the prose literature—was published in 1836, subsequent editions being issued in 1861 and 1867-72. The poetical portion, constituting the second part, was published in 1845. This went into a second edition in 1856, and was again republished in 1859 and 1867-72. Bernhardt began the editing of the "Bibliotheca Scriptorum Latino-rum" in 1838; but the work was not continued beyond the first volume, as his contributors resented his extraordinary methods of revision by voluminous additions and amendments. His last literary work was the collecting and editing of the minor writings, both Latin and German, of F. A. Wolf, which were issued in two volumes in 1869.

Bernhardt had always manifested a deep interest in all the local educational work at Halle, and had frequently been active in supervising the examinations. In 1867 the city of Halle honored him by appointing him a member of the Curatorium of the newly erected gymnasium. Five years before he had been appointed privy councilor (*Geheimer Regierungsrath*). The fiftieth anniversary of his doctorate was enthusiastically celebrated in Oct., 1872—professors, students, and civil authorities joining in making the event notable and worthy. His former students, in honor of the occasion, collected a fund of one thousand thalers to establish a Bernhardt fund to aid students of philology.

He was married in 1829 to Henrietta Meyer of Berlin (died 1853). It is said by Le Roi—who, however, gives no data as to time or place—that Bern-

hardt lived during the later period of his life as a Christian, and suggests that he was possibly converted during his student life. He attained the age of seventy-five years, dying in honor amid the scenes of his great activity. Professor Beyschlag delivered the funeral oration.

**BERNHEIM, ABRAM C.:** American lawyer; born at New York city Feb. 1, 1866; died there July 24, 1895. Bernheim was educated in public schools of his native city and later in the Columbia College, subsequently taking a course of instruction at the University of Berlin. During his attendance at Columbia College he was twice selected prize lecturer on the political history of the state of New York, and in 1894 was made permanent lecturer in this branch.

Bernheim contributed money and books to his *alma mater*, and took deep interest in free art exhibits on the east side of New York and in the University Settlement Society, of which latter he was one of the founders and the treasurer. He was also secretary of the Tenement House Building Company for the improvement of the dwellings of the poor. He was a member of the Stock Exchange and of the Chamber of Commerce.

In addition to his philanthropic work, Bernheim wrote a number of articles on sociological and political subjects, among them being: "The Relations of the City and the State of New York," in the "Political Science Quarterly," Sept., 1894; "A Chapter on Municipal Folly," in the "Century Magazine," May, 1895; "Results of Picture Exhibitions in Lower New York," in the "Forum," July, 1895.

**BERNHEIM, ERNST:** German historian; born at Hamburg Feb. 19, 1850. On completing his elementary and preparatory studies, he attended the universities of Berlin, Heidelberg, Strasburg, and Göttingen. It was from Strasburg that he received his degree as doctor of philosophy, having offered as his thesis a study on "Lothar III. und das Wormser Konkordat." This was published in that city in 1874, and though the production of a youth of but twenty-four years, which frankly stated the occasion of its preparation, it was at once received as something more important than an ordinary doctorate dissertation. It was in fact a scholarly pursuit along the line of research undertaken by Friedberg, whose demonstration of the historical errors based on the "Narratio de Electione Lotharii" Bernheim confirms by a mass of newly discovered evidence. He shows, too, that Lothar's election was mainly the work of Archbishop Adelbert of Mayence.

In the year after the appearance of "Lothar III." he was appointed privat-docent at the University of Göttingen (1875). Here he produced "Zur Geschichte des Wormser Konkordats" (Göttingen, 1878), in which he pieces together from original sources a picture of the party struggles of 1122, the extremist tendencies of the papal and imperial factions, and the devel-

opment of a compromise which was ultimately embodied in the Concordat. He shows, too, how Henry V. strove to free himself from the limitations of the Concordat. This production firmly fixed his place among the historical scholars of Germany. Two years later appeared his "Geschichtsforschung und Geschichtsphilosophie," Göttingen, 1880. In 1882, while still at Göttingen, he joined Weizsäcker and Quidde in the task of editing the "Deutsche Reichstagsacten unter Ruprecht," which was published under the supervision of the Historische Kommission in Munich, and the third volume of which was published at Gotha in 1888. The work is indeed monumental, covering as it does only the first decade of the fifteenth century. Fully three-fourths of the material had never before been published.

In the mean time, Bernheim had received a call to the University of Greifswald as assistant professor of history (1883). Upon his marriage (1885) he embraced Christianity. Here, besides his work in the lecture-room, he continued his labor on the "Reichstagsacten," and wrote his "Lehrbuch der Historischen Methode," Leipzig, 1889. In the same year he was promoted to be professor ordinary of history. Two years later, in conjunction with Wilhelm Altmann, he completed "Ausgewählte Urkunden zur Erläuterung der Verfassungsgeschichte Deutschlands im Mittelalter," Berlin, 1891. Considerable stir was occasioned in university and general pedagogic circles by the appearance of his eighty-page pamphlet, "Der Universitäts-Unterricht und die Erfordernisse der Gegenwart," Berlin, 1898. In this treatise he attacks the German system of university instruction, and insists that the lecture method should be modified by providing some efficient system of exercises in connection with the lectures.

In 1899 Bernheim was elected rector of the University of Greifswald, and in the following year the Order of the Red Eagle was conferred upon him.

**BERNHEIM, HIPPOLYTE:** French physician and neurologist; born at Mülhausen, Alsace. He received his education in his native town and at the University of Strasburg, whence he was graduated as doctor of medicine in 1867. The same year he became a lecturer at the university and established himself as physician in the city. When, in 1871, after the Franco-Prussian war, Strasburg passed to Germany, Bernheim removed to Nancy, in the university of which town he became clinical professor. When the medical faculty took up hypnotism, about 1880, Bernheim was very enthusiastic, and soon became one of the leaders of the investigation. He is a well-known authority in this new field of medicine.

Bernheim has written many works, of which the following may be mentioned here: "Des Fièvres Typhiques en Général," Strasburg, 1868; "Leçon de Clinique Médicale," Paris, 1877; "De la Suggestion dans l'État Hypnotique et dans l'État de Veille," Paris, 1884; "De la Suggestion et de son Application à la Thérapeutique," Paris, 1887.

S. F. T. H.

**BERNICH, SOLOMON** (called also **Berenicus** and **Beronicus**): Scholar, poet, and adventurer of doubtful origin, who appeared in Holland about 1670 and attracted much attention. He spoke Greek, Latin, Italian, French, and Dutch with equal facility, and was able to recite by heart whole classical works and to put into verse on the spot anything that was told to him in prose. He was thought by many to be an escaped monk from France, but Yung ("Alphabetische Liste Aller Gelehrten Juden . . .," Leipzig, 1817) states that he was a Jew, a native of Eger, in Bohemia, who was educated in Vienna and in Italy. Bernich, or Berenicus, despised conventional scholarship and all the restraints of cultured life, and chose to associate with the lower classes; working sometimes as a chimney-sweep, and sometimes as a grinder of knives and scissors. He was found dead in a swamp, in the outskirts of Rotterdam, into which he had probably fallen while in a state of intoxication. Two works from his pen—one a collection of Latin poetry with a Dutch translation (Amsterdam, 1692; 2d ed., *ib.* 1716), and the other called "Georgarchontmachia," with a biography of the author by B. Borremansius—are in the British Museum general catalogue under the name "Beronicus, Petrus Joannes."

**BERNOT, JULIE.** See **JUDITH, MME.**

**BERNSTAMM, LEOPOLD BERNARD:** Russian sculptor; born at Riga April 20, 1859. At the age of thirteen he entered the studio of Prof. D. Jensen at Riga, and at fourteen the Imperial Academy of Fine Arts of St. Petersburg, where he was awarded the highest prizes. In 1883 he made a number of busts of celebrated Russians, among them being those of Dostoyevski, Rubinstein, Fonvisin, and K. Brandt. This established his reputation as a portrait-sculptor, and within the next two years he made about thirty busts of various representatives of Russian art, science, and literature.

After a sojourn in Rome (in 1884), where he supported himself by making portraits from photographs, Bernstamm went to Florence, and there continued his studies under Professor Rivalti. At this time he exhibited in Rome his "Neapolitan Fisherman," "David," and "Head of a Monk," all of which received high commendation. In 1885 he settled in Paris, where he won the friendship of Dr. Labadie-Lagrave. He soon became famous by his sculpture-portraits of eminent Frenchmen, such as Renan, Sardou, Flaubert, Halévy, Coppée, Déroulède, Zola, and many others. In 1890 Bernstamm exhibited his works at the galleries of George Petit. The exhibition attracted considerable notice, and was visited by President Carnot. It consisted of a collection of charming statuettes, reproducing in an astonishing variety of costumes all foreigners that had come to Paris during the Exposition of 1889.

Since 1887 Bernstamm has exhibited every year at the salon of the Champs-Élysées, at which he has manifested his talent on a larger scale in such works as "An Pilori," "The First Arrow," and "The Executioner of John the Baptist." In 1889 he was

awarded, by the jury of the Exposition, a silver medal for various groups and busts. He also produced "Floquet," a plaster cast; "La Modestie," a marble bust bought by Count Torelli, chamberlain of the king of Italy in 1891; "Christ and the Woman Taken in Adultery" (1894); and "Jules Chéret," bronze bust (1895). In 1896 he was called to Tzarskoe-Selo to make busts from life of the emperor Nicholas II. and the empress of Russia. For the Exposition of 1900 he finished a group intended for the czar: "Peter the Great Embracing Louis XV." In 1901 he produced the statue of Rubinstein ordered by the St. Petersburg Conservatory. Some of his works were bought by Czar Alexander III. and some by the Italian government. Bernstamm was made chevalier of the Legion of Honor in 1891.

J. G. L.

**BERNSTEIN, AARON (DAVID)** (pseudonym, **A. Rebenstein**): German publicist, scientist, and reformer; born April 6, 1812, in Danzig; died Feb. 12, 1884, in Berlin. His was one of the most versatile and productive Jewish minds of the nineteenth century. Intended by his parents for a rabbi, he received a thorough Talmudical education, which made him a formidable adversary in the controversies on religious reform in which he later participated (Holdheim, "Gesch. der Entstehung . . . der Jüdischen Reformgemeinde in Berlin," p. 54, Berlin, 1857). At an advanced age, when he was recognized as one of the great political leaders of Germany, he could still write in the style and the spirit of an old-time Polish rabbi ("Ha-Zefirah," 1875, ii., No. 2).

He went to Berlin at the age of twenty, and by his own efforts, without the help of school or university, familiarized himself with the German language and literature. He soon began to write on many and diverse subjects, and attracted attention

by his graceful and lucid style as well as by his force and originality. For some years he was an antiquarian bookseller in Berlin; but his literary labors absorbed most of his attention; and finally he took up writing as a profession.

His earliest works, most of which appeared under his pseudonym, are: A translation of the Song of Songs, with critical notes and a bibliographical preface by Zunz (Berlin, 1834); "Plan zu einer Neuen Grundlage für die Philosophie der Geschichte" (*ib.* 1838); "Novellen und Lebensbilder" (*ib.* 1840); "Eine Abhandlung über die Rotation der Planeten" (*ib.* 1843). In the same year appeared his anonymous pamphlet, "Zahlen Frappieren," a defense of the Prussian Ministry of Finance against the attack of Bülow-Cunmerow. It created a sensation in political circles, and was thought by many to have been written by the minister of finance himself.

His scientific and political studies did not prevent Bernstein from taking an interest in Jewish affairs; and he became the principal contributor to Wilhelm Freund's monthly magazine, "Zur Judenfrage," which appeared in Berlin from July, 1843, to June, 1844. Bernstein was one of the leading spirits in the inception of the movement for religious reform

in those days, and his great rabbinical knowledge and his conciliatory spirit made even the opposition respect him. One of the most acute and objective writers against the Reform movement said that of Rebenstein's attacks on Judaism it might be said "Faithful are the wounds of a friend";

**Active** while the remainder of the verse (Prov. in Jewish xxvii. 6), "but the kisses of an enemy **Affairs.** are profuse," was appropriate to the defense of it advanced by some of his contemporaries (see Phineas M. Heilprin, "Teshubot be-Anshe Awen," Frankfort-on-the-Main, 1845, letter I).

Bernstein was one of the committee appointed March 10, 1845, to work out a plan for a line of progress in Jewish religious affairs. A fragment of a remarkable speech which he delivered at the meeting which chose that committee is preserved in Holdheim's above-mentioned work, where, by the way, Bernstein is considered to have been the only "theologian" present. He agreed with Dr. Stern in recognizing the importance of the Talmud and in deploring the arrest of its development along the lines of the exigencies of practical life. Bernstein

Aaron Bernstein.

was chosen to edit and amend the "Entwurf" of the committee; and he is one of the principal authors of the famous "Aufruf" for the organization of a religious Reform movement among the Jews in Germany, which appeared in the Berlin newspapers early in April, 1845. He and Dr. Stern were the authors of the prayer-book for the newly organized Reform congregation of Berlin; and while Bernstein refused to become its rabbi, it seems that he often officiated in that capacity before a regular rabbi was engaged. He was also the editor of the monthly "Reform-Zeitung: Organ für den Fortschritt im Judenthum," which appeared in Berlin in 1847.

In 1849 Bernstein founded the "Urwählerzeitung," a political monthly which advocated the principles of political reform in the same conciliatory but determined spirit that had characterized his advocacy of religious Reform in Judaism. It soon gained a large circulation and brought the editor much fame; but it also brought him into inevitable conflict with the authorities, which resulted in a sensational trial

under the press law, with a sentence **Imprisoned** of four months' imprisonment for the **Under** editor. In the same year when the **Press Law.** "Urwählerzeitung" was suppressed

(1853), Bernstein founded the Berlin daily "Volkszeitung," which soon attained a large circulation, and of which he remained the chief editorial writer for more than a quarter of a century. In that paper first appeared Bernstein's valuable popular scientific essays, which later were published in book form as "Naturwissenschaftliche Volksbücher" (4th ed., Berlin, 1880, 21 vols.), and were

translated into the principal European languages. A Hebrew translation, entitled "Yedi'ot ha-Teba'" (Knowledge of Nature), appeared in Warsaw, 1881-91. It was prepared partly by P. Rudermann (see S. Bernfeld's autobiographical sketch in "Sefer Zik-karon" (Book of Remembrance), but mostly by D. Frischmann.

Bernstein also wrote two novels of Jewish life, "Vögele der Maggid" and "Mendel Gibbor," which first appeared in Josef Wertheimer's "Jahrbuch für Israeliten" and then in book form (Berlin, 1860; 7th edition, *ib.* 1892). They were translated into many languages, even into Russian (St. Petersburg, 1876), and place their author among the most important ghetto novelists, second only to Komper (Kayserring, "Jüdische Litteratur," p. 171, Treves, 1896). These novels were, unlike the ghetto stories of today, written for Jews only, and therefore employ the German-Jewish idiom to an extent that almost brings them into the class of dialect stories. Bernstein's "Ursprung der Sagen von Abraham, Isaak, und Jakob" (Berlin, 1871) is a valuable contribution to Biblical criticism, although Wellhausen ("Prolegomena zur Geschichte Israels," i. 31) objects to its political tendencies. The most important of Bernstein's political essays and articles appeared in book form under the title "Revolutions- und Reaktionsgeschichte Preussens und Deutschlands, von den Märztagen bis zur Neuesten Zeit" (Berlin, 1883-84, 3 vols.). He also wrote numerous other less important works on a great variety of subjects.

The achievements of Bernstein as a practical scientist are also worthy of notice. As early as 1856 he patented an invention by which two distinct telegraph messages could be sent over the same wire at the same time. He was one of the first to advocate the laying of telegraph wires underground, and was also the inventor of an automatically closing gate for railroad crossings. He was, besides, an expert photographer; and he taught photography free of charge to many striving young men, thus enabling them to earn their livelihood.

Bernstein enjoyed great popularity in his later years, and when he died was mourned as one of the great popular teachers of the German nation. The degree of doctor of philosophy was conferred on him by the University of Tübingen in 1876. Julius Bernstein, now professor at Halle, is his eldest son.

**BERNSTEIN, BÉLA:** Hungarian rabbi and author; born in Várpalota, Hungary, 1868; was graduated as Ph.D. at Leipsic, 1890, and as rabbi at the Budapest Seminary in 1893; since 1894 has officiated as rabbi at Szombathely (Stein-am-Anger). He published "Die Schrifterklärung des Bachja ben Ascher," Berlin, 1891, and collaborated in a Hungarian translation of the Pentateuch, published by the Jewish Hungarian Literary Society, 1898. A monograph upon the Hungarian Revolution and the Jews was also published in Hungarian by the same

association in 1898; "Die Toleranztaxe der Juden in Ungarn," Breslau, 1901.

S.

L. V.

**BERNSTEIN, BERNARD:** Actor; born at Warsaw in 1861. He sang in the chorus of the Polish opera of that city, and appeared there as a comedian (1882) in the rôle of *Grandmother Jachne* in A. Goldfaden's comedy, "Die Zauberin." He played in several Jewish theaters in Russia, and when the Jewish theater was forbidden in that country (Sept. 14, 1883), he went to Galicia, in Austria, and then to Rumania, where he played in various rôles, usually comic. In 1892 he was engaged by Pool's Theater of New York, where he appeared first as *Zingitang* in Goldfaden's "Shulamith," and later in many other plays. He was especially successful in the rôle of *Shamai* in "The Jewish King Lear," by J. Gordin. Bernstein now (1902) resides in New York.

H. R.

M. SE.

**BERNSTEIN, EDUARD:** Socialist leader, editor, and author; born in Berlin 1850. Beginning life as a clerk in a bank, Bernstein's mind became early imbued with socialistic ideas. In 1872 he joined the Social-Democratic party, and in 1878 gave up business to assist in editing, in Switzerland, the party organ, "Die Zukunft," which became afterward "Das Jahrbuch der Sozialen Wissenschaft." When the anti-Socialist law of Bismarck endangered the party's existence, and it became necessary to establish abroad a socialist organ to sustain and direct the young movement, Bernstein was entrusted with the editorship of the new organ, "Der Sozialdemokrat," published at that time in Zurich. When he was expelled from Switzerland and removed to London, the publication of "Der Sozialdemokrat" was also transferred thither (1888), and continued till it became unnecessary, after the downfall of Bismarck and the revocation of the anti-Socialist law in 1890. Since then he has acted as London correspondent of the Berlin "Vorwärts," and has written for the "Neue Zeit," "Sozialistische Monatshefte," and other periodical publications. In England he contributed a number of essays to the "Progressive Review" and "The New Age." Bernstein's sketch of Lassalle—contributed to an edition of his speeches and writings—has been translated into English and edited by him (3 vols., Berlin, 1893) under the title, "Ferdinand Lassalle as a Social Reformer," London, 1893. Bernstein is the author also of "Communistische und Demokratisch-Sozialistische Strömungen Während der Englischen Revolution des 17. Jahrhunderts," published in a collection of essays on the history of Socialism, entitled "Vorläufer des Neuen Sozialismus," Stuttgart, 1895.

The latest of Bernstein's productions, "Die Voraussetzungen des Sozialismus und die Aufgaben der Sozialdemokratie," Stuttgart, 1899, has roused general controversy throughout Europe. Professor Diehl, though not himself a Socialist, characterizes Bernstein as "one of the most talented, most learned, and clearest adherents of scientific Socialism," which opinion is shared by even the extreme Socialistic opponents of Bernstein—Kautsky and Mehring. Bourdeau regards this book as the most important that has appeared on Socialism since Marx's "Das Kapital." In this book, Bernstein, after having

been for more than twenty years a champion of so-called "orthodox" Marxism, comes to the conclusion that many of Marx's views no longer correspond to the facts of modern social phenomena, and must be replaced by others more in consonance with modern society. Of the views peculiar to Marx, he does not place so much value upon the purely economic conception of history; he minimizes the importance of the theory of value, and repudiates the Hegelian dialectic method, though at the same time he claims that he still adheres to the spirit and evolutionary principles of Marx. Bernstein further emphasizes the great importance of cooperative associations, and urges the Socialist party to free itself from revolutionary phraseology and illusory hopes of the immediate downfall of bourgeois society, and to work hand in hand with all the democratic elements that fight for social reforms. Bernstein even concedes that the Social Democracy is practically acting on the proposed lines; but he wants a more consistent policy, as it seems to him that the remains of former conceptions still prevail in the party and hamper the progress of Socialism and the gradual realization of its ideals. In 1901 Bernstein was allowed to return to Germany, and in March, 1902, he was elected to the Reichstag on the Socialist ticket from Breslau, to succeed Dr. Schönlanck, deceased.

B. B.

**BERNSTEIN, ELSA** (pseudonym, **Ernst Rosmer**): German dramatist; daughter of Heinrich Porges, the friend of Richard Wagner; born at Vienna; educated at Munich; and, for a short time, on the stage. An affliction of the eyes forcing her to retire, she thenceforth devoted herself to dramatic literature. Shortly after her marriage in 1892 to Max Bernstein, she wrote her first play, "Wir Drei," which created considerable discussion. It was really a dramatized version of the matrimonial and sexual views of Taine and Zola. Her next plays fell rather flat: "Dämmerung," 1893; "Die Mutter Maria," 1894; "Tedeum," 1896; "Themistokles," 1897; and "Dagny Peters." But unbounded admiration was elicited by "Die Königskinder," 1895—a dramatic fairy-tale. Though its plot was simple, the beauty of the theme and its poetry were such as to class it with Fulda's "Der Talisman."

**BIBLIOGRAPHY:** *Das Jüngste Deutschland*, pp. 317-320; Kürschner, *Deutscher Literatur-Kalender*, 1901, p. 91; *Lexikon Deutscher Frauen der Feder*, i. 61; *ib.* ii. 203.

s. E. Ms.

**BERNSTEIN, HERMANN:** Russian-American writer; born Sept. 20, 1876, at Shirwindt, Russia. When he was seven years of age his parents moved to Mohilev on the Dnieper, and Hermann was edu-

cated at the Jewish free school of that city. In 1893 the family emigrated to America and settled in Chicago. At first Bernstein struggled hard to make a living. In 1897 he engaged in literary work in New York, and was soon successful. He has made translations from the Russian, among them "Foma Gordeyev," by Gorki, New York, 1901; and has written "The Flight of Time, and Other Poems," 1899. A series of ghetto stories by Bernstein appeared in the New York "Evening Post," in "Ainslee's Magazine," and in "The Scroll," and these were reprinted in book form under the title "In the Gates of Israel," New York, 1902.

H. R.

F. T. II.

**BERNSTEIN, HIRSCH:** Russian-American editor and publisher; born in Vladislavov (Neustadt-Schirvint), government of Suwalki, near the Prussian frontier, March 25, 1846. He received the usual Jewish education and learned to write Hebrew fluently. He emigrated to the United States in 1870, settling in New York, where he still (1902) resides. While following from the first commercial pursuits, he has continued his Hebrew studies in his leisure hours. In 1870 he started "The Post," the first Judæo-German or Yiddish periodical in America; but, like many subsequent publications of that nature, it had but a short existence. In the same year he founded the "Ha Zofeh be'Erez ha-Hadashah," the first publication in the Neo-Hebraic language in America. It appeared weekly for five years and contained many interesting contributions, which throw light on local and contemporary Jewish history. Bernstein was at one time a constant contributor to "Ha-Maggid," "Ha-Lebanon," and "Ha-Karmel," and, after Ch. G. VIDAVER, was probably the first regular American correspondent to European Hebrew periodicals.

P. Wt.

**BERNSTEIN, HUGO KARL** (pseudonym, **Karl Hugo**): Hungarian dramatist; born in Budapest 1808; died at Milan 1877. He began the study of medicine, but lacking means sufficient to continue it, he entered the army, where within twenty months he succeeded in laying by a sum that enabled him to qualify himself for medical examination. In 1830 he served during the Polish insurrection as army surgeon at Warsaw, whence he proceeded to Budapest, where he practised as homeopath. In 1839 he went to Paris, whither he had been called by Hahnemann. This was a turning-point in his career. The cosmopolitan French capital with its numerous theaters reawakened his youthful inclination for the stage and for poetry. He proceeded to Hamburg, where, in 1840, he published "Die Sehnsuchts-Klänge eines Hagestolzen." It was here, also, that he wrote the plays "Brutus und Lucretia," "Das Schauspiel der Welt," and "Der Stein der Weisen." In 1844 he returned to Budapest, where he resumed the study of the Hungarian language, which by this time he had almost forgotten. Here he published his "Psalmen eines Armen Poeten," "Egy Magyar Király," and the well-known "Bankier und Baron." He also wrote two French dramas, "La Comédie Infernale" and "L'Hiade Finie." In Berlin he was arrested for

lèse-majesté, because of a book published by him under the title "Hugo Amber Bernstein, oder Das Verkannte Genie": he was, however, released upon the plea of insanity. Though a genius, he was possessed by the idea that he alone had been appointed to revolutionize art, science, and religion—in short, the entire intellectual life of man.

S.

L. V.

**BERNSTEIN, IGNACY:** Polish bibliophile and writer on proverbs; born at Vinnitza, government of Podolia, Jan. 30, 1836, where his father Samson had an important banking business. He was educated by the learned Moses Landau, son of Rabbi Samuel and grandson of R. Ezekiel Landau of Prague. In 1856 he married Eliza, the daughter of Meir Edler von Mises of Lemberg; and in 1858 he removed with his parents to Warsaw, where he still resides, ranking among the prominent members of the Jewish community. In 1881, at his instance, a library of Jewish books was founded in connection with the Great Synagogue of Warsaw. Bernstein from the beginning took an active part in the management of the library and is now its chairman. He did much useful work in collecting proverbs of all nations. In 1888–89 his "Jüdische Sprichwörter"—a collection of Judæo-German proverbs—were published in the "Hausfreund," Warsaw; and in 1900 he published a remarkable illustrated catalogue of his library of about 4,800 works on proverbs, folk-lore, ethnography, etc., accompanying the list with valuable explanatory notes. This catalogue is unique in its way, being also a typographical art book. Many titles and ornaments of the more ancient works are reproduced from the originals. The full title of the catalogue is "Katalog Dziel Tresci Przysłowiowej Składających Bibliotekę Ignacego Bernsteina," 2 vols., Warsaw. He is now (1902) preparing a new and enlarged edition of his Judæo-German proverbs.

BIBLIOGRAPHY: S. Orgelbrand, *Encyklopedia Powszechna*, ii., Warsaw, 1898; and private sources.

H. R.

**BERNSTEIN, IGNATI ABRAMOVICH:** Russian railroad engineer; born in Kremenetz, government of Volhynia, 1846; killed July 5, 1900, on the steamship "Odessa," between Harbin and Chabarovsk. He was educated at the high school of his native town, and at the St. Petersburg Institute for Engineers, from which he graduated.

In the eighties, while yet a student, he was received by the czar as a delegate from many Jewish families who petitioned for a restoration of their right of settlement outside the pale, of which they had been unlawfully deprived. Bernstein pleaded their cause so earnestly that the czar granted their request.

After serving as assistant district engineer on various railroads, Bernstein was in 1896 appointed first engineer at Vladivostok, and in the following year was sent to Tzitzikar, where he was given the direction of the fifth district of the Eastern Chinese Railway. On July 2 he sailed for Chabarovsk. When the vessel was three days out it was attacked by Chinese Boxers, who killed thirteen of the passengers, Bernstein being one of the victims. A memorial service was held Aug. 19 in the Great Synagogue at St. Petersburg.

H. R.

**BERNSTEIN, ISRAEL:** Russian Hebrew publicist; born about the middle of the nineteenth century at Velizh, government of Vitebsk; studied pharmacy at Moscow, and worked as a druggist in the colony Shehedrin, near Bobruisk. Bernstein's "Ha-'Atudim ha-'Olim 'al ha-Zon" (The Goats Which Leaped upon the Flock), in "Ha-Shahar" (vi. 366–382, 401–415), is a severe and vindictive attack on the misdeeds of the "Melammedim," the rabbis and the leaders of the Jewish communities (kahal), especially in the smaller towns. His "Binyan Zeqenim u-Setirat Yeladim" (How the Old Build and the Young Destroy), which occupies over forty pages of vol. vii. in the above periodical, is written in the same spirit as the first; but here the author tries more to glorify the "Haskalah," or progress, and to point out the probability that the vivacious and active Hasidism of southern Russia will regenerate itself sooner than the dry scholarship and pedantry of the north or Lithuania.

In his third important article, "Le-maher Ge'ulah" (To Bring About Speedy Redemption), in "Ha-Shahar," x. 230–241, 288–297, Bernstein tries to prove that the great necessity of the times is that the rabbis and the rich Jews shall cease to use unlawful and revolting means to save their sons from being drafted into military service. This last article was written late in 1880, shortly before the great changes which took place after the assassination of Emperor ALEXANDER II. in the following year.

Like all progressists who did not join the new nationalistic movements, Bernstein remained silent for a long time, and in a "letter to the editor" ("Keneset Yisrael," i. 7, Warsaw, 1886), Bernstein admits that the persecutions of the last five years have shattered all his former optimistic views and the hopes that the Jews of Russia by improving their conduct will obtain equal rights and be recognized as men and brethren. He admits his mistakes, and is overwhelmed by the despair which has seized most of the advocates of progress and assimilation in these trying chauvinistic times.

**BERNSTEIN, JOSEPH ("JOE"):** American pugilist; born in November, 1877, in New York city. He first appeared in the ring in 1894, during which year he gained no less than five victories. In 1895 he won four fights and drew two, thus establishing himself as a featherweight of acknowledged prowess. In succeeding years he added greatly to his reputation.

Probably no other adept in boxing of his age has appeared in the ring so often as Bernstein, who has fought nearly 80 battles in seven years. Of these he has won 44, drawn 26, and lost 7, and in one case there was no decision. He defeated Jack Connors, James Larkins, William O'Donnell, and Solly Smith.

F. H. V.

**BERNSTEIN, JOSEPH:** Polish physician; born at Warsaw in 1797; died there in 1853. After graduating from the Warsaw Lyceum in 1815, he

studied medicine at the Berlin University, from which he was graduated in 1822. After his return to Poland he was for a year assistant physician at the university clinic of Warsaw; in 1829 he was appointed house-physician of the Warsaw Jewish Hospital; and in 1834, chief physician. He is the author of "De Phthisi Pulmonum," published in 1818.

## II. R.

**BERNSTEIN, JULIUS:** German physiologist and medical writer; born at Berlin Dec. 8, 1839; son of Aaron Bernstein (1822-84). He studied at the University of Berlin, whence he was graduated as doctor of medicine in 1862. In 1865 he was admitted as privat-docent to the medical faculty of Heidelberg, and became in 1869 assistant professor of physiology. Two years later he obtained the appointment of professor of physiology at the University of Halle, a position he still (1902) occupies. In 1898 he received the title of "Geheimer Medizinalrath."

Bernstein is one of the leading physiologists of the day. Besides contributing numerous articles regularly, since 1865, to technical journals ("Archiv für die Gesamte Physiologie des Menschen und der Thiere"; "Archiv für Physiologie"; "Archiv für Anatomie und Physiologie"; "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin," etc.), he, since 1888, has edited the "Untersuchungen aus dem Physiologischen Institut in Halle." He has written: "Untersuchungen über den Erregungsvorgang im Nerven- und Muskel-System," Heidelberg, 1871; "Die Fünf Sinne des Menschen," Leipzig, 1875 and 1900; "Lehrbuch der Physiologie," Stuttgart, 1894 and 1900.

## F. T. H.

**BERNSTEIN, KARL ILYICH:** Russian jurist, professor of Roman law; born at Odessa Jan. 13, 1842; died at Berlin in 1894. He belongs, on the maternal side, to a Jewish family that has produced several noted scholars. He graduated from the Odessa Gymnasium in 1857, and after studying the ancient languages in Dresden, he attended successively the universities of Halle, Heidelberg, and Berlin, under Professors Vengerov and Gneist, who exercised great influence over him. In 1864 he obtained the degree of doctor of law from the University of Berlin, being the first Jew to receive it from that institution.

For two years Bernstein attended the sessions of the Halle circuit court, in order to familiarize himself with the practise of law. Toward the end of 1865 he returned to Russia with the intention of lecturing on Roman law, but found that he was debarred by his religion from holding a professorship in Russia. He thereupon applied himself to the study of Russian law, and subsequently practised it at Odessa and St. Petersburg successively. Bernstein continued his theoretical studies, and in 1871 presented at the University of St. Petersburg a thesis on Russian civil law, obtaining the degree of master of law.

In 1872 Bernstein married Felice Leonovna, a daughter of the Russian banker Leon Rosenthal, and after a prolonged tour through Europe permanently settled in Berlin. For eight years (1878-86) he lectured on Roman law at the University of Berlin as a privat-docent; in 1886 he was appointed associate professor; and in 1887 professor. In the latter year he renounced his allegiance to Russia and became a German subject. About this time there was established in connection with the university an institute for the instruction in Roman law of Russian students sent abroad by their government to prepare themselves for professorships, and Bernstein was appointed one of its directors.

Bernstein always took great interest in Jewish affairs. When the exodus of Russian Jews to the United States began, in 1881, he was an active member of the Berlin colonization committee, and for many years corresponded with Michael Heilprin on colonization matters.

Most of Bernstein's writings were published in various law periodicals; but some were issued in book form. His first published work was "De Delegationis Naturæ," Berlin, 1864. A Russian translation, under the title "O Sushchestvye Deleġatzi po Rimskomu Pravu," was published in St. Petersburg in 1871. In this dissertation the author's views relating to delegation and novation anticipated those expressed in the famous treatise of Salpius. Bernstein's "Ucheniye o Razdylitelnykh Obyazatelstvakh po Rimskomu Pravu i Novcishim Zakonom," St. Petersburg, 1871, was the first attempt ever made to apply the principles of Roman and common law to Russian legislation. Its leading idea was further developed in "Zur Lehre von dem Alternativen Willen und den Alternativen Rechtsgeschäften, Abtheilung I.: der Alternative Wille und die Alternative Obligation." Bernstein was also the author of the following works: "Zur Lehre vom Legatum Optionis," in "Zeit. der Savigny-Stiftung," 1880, pp. 15f. *et seq.*; "Ueber die Subjectiven Alternativen Rechtsgeschäfte von Todeswegen," *ib.* 1883, iv.; "Die Alternative Obligatio im Römischen und im Modernen Rechte," in "Zeit. für Vergleichende Rechtswissenschaft," II.; an analysis of Pescatore's "Die Sogenannte Alternative Obligatio," in "Zeit. für Handelsrecht," xxix.; "Zur Lehre von den Datis Dictis," in "Festgabe für Beseler," Berlin, 1884.

## II. R.

**BERNSTEIN, MAX** (pseudonym, **Silas Marner**): German author; born May 13, 1854, at Fürth, Bavaria; now (1902) practising law at Munich. His literary activity is directed mainly to the stage. The most noteworthy of Bernstein's comedies are: "Cœur-Dame," "Mein Neuer Hut," "Ritter Blaubart," "Unbefangen," "Alles in Ordnung," "Ein Guter Mensch," and "Ein Dunkler Punkt." Of his dramas may be mentioned: "Dagnar," "Ruth," and "Gold." He also wrote a collection of short stories "Kleine Geschichten," "Die Plauderei," and "Ein Kuss," as well as numerous miscellanies that have appeared either in newspapers or in book form. While Bernstein's works are very popular among

the general reading public, they are little noticed by the critics and the literary historians. His wife is the author Elsa Bernstein.

BIBLIOGRAPHY: Kürschner, *Deutscher Litteratur-Kalender*, s.v.  
S. I. BER.

**BERNSTEIN, NAPHTALI HERZ:** Author; lived in Russia about the first half of the nineteenth century. Being engaged in business, he devoted his leisure hours to study; applying himself especially to Biblical subjects, and writing much thereon, without, however, publishing any of his work. His defense of the Talmud, under the title "Eder Hakamin" (Mantle of the Wise), Odessa, 1868, was published after his death by his son, and edited by S. I. Abramowitsch. Bernstein wrote this little work in London (where he resided for several years), as a reply to McCaul's attack on the Talmud and rabbinical Judaism, and dedicated it to Solomon Herschel, the chief rabbi of England. In his defense he deals chiefly with the general principles underlying the Talmud, without touching upon the several points of McCaul's work, a fact which greatly lessens the value of his apology.

BIBLIOGRAPHY: Introduction to *Eder Hakamin*.

L. G.

**BERNSTEIN, NATHAN OSIPOVICH:** Russian physiologist; born at Brody, Galicia, in 1836; died in Odessa Feb. 9, 1891. He received his first education from his grandfather, the eminent Solomon Eger, chief rabbi of the province of Posen; and, on the removal of his parents to Odessa in 1849, entered the gymnasium of that place, from which he graduated in 1853. He studied medicine at the University of Moscow in 1853-58, where he was awarded a gold medal in 1857 for his treatise, "Anatomia i Fiziologia Legochno-Zheludoch-navo Nerva." In 1861 he became consulting physician of the city hospital of Odessa, and associate editor of the Russian-Jewish periodical "Sion," until its suppression by the government in April, 1862. In 1865 he was appointed instructor of anatomy and physiology at the newly established New-Russia University at Odessa; and from 1871 lectured there on anatomy as assistant professor, but was not confirmed in this position by the government. He devoted much of his time to the Society of Physicians of Odessa, having been secretary of it for two years, vice-president for eight years, and president for fourteen years. He was an alderman of the Odessa city council, director of the Talmud Torah, director of the city hospital, and honorary justice of the peace. His works appeared in the following publications: the "Moskovskaya Meditzinskaya Gazeta," 1858; "Moskovskoe Obozryenie," 1859; "Biblioteka Meditzinskikh Nauk," 1859; "Sion," 1861-62; "Meditzinski Viestnik," 1864; "Sovremennaya Meditzina," 1863; "Arkhiv Sudebnoi Meditziny," 1864; "Gazette Médicale de Paris," 1865; and many other medical periodicals. Of his manual on physiology, entitled "Rukovodstvo Chastnoi Fiziologii," two parts were published at Odessa in 1868.

**BERNSTEIN-SINAIEFF, LEOPOLD** (usually called *Sinaieff*): Russo-French sculptor; born at Wilna Nov. 22, 1868. He studied drawing in his native town, and at the age of fourteen settled in Paris. As a student under Dalou, his first exhibited work was a bust at the salon of the Champs Elysées in 1890. Since then he has produced busts in bronze and marble of many distinguished persons, among whom were Count Waldeck, Rambaud, Nicholas de Giers, the Russian ambassador, and Léon Reynier, the violinist. One of his masterpieces is "Ezra Mourning." This statue, in plaster, became the property of the state in 1892, and was given to the museum at Sens; in 1897 it was reproduced in marble. At the Paris Exhibition of 1900 this and other statues, portraits, groups, and mortuary monuments were exhibited; and they received a medal. Among other distinctions conferred upon him, Sinaieff was created a chevalier of the Legion of Honor in 1901. He is at present (1902) engaged upon a bust of Tolstoi.

**BERNSTORFF, CHRISTIAN GÜNTHER, COUNT OF:** Danish and Prussian statesman; born April 3, 1769, in Copenhagen; died March 28, 1835. As early as 1787 he entered the diplomatic service through the influence of his father, Count Andreas Bernstorff. From 1789 to 1794 he served in Berlin, first as secretary of legation, then as ambassador, and was finally sent to Stockholm in the same capacity. On the death of his father, in 1797, he was appointed secretary of state, and in 1800 prime minister, which position he held till 1810. He represented Denmark at the court of Austria from 1811 to 1815, and participated in the Congress of Vienna (Sept., 1814, to June, 1815), where, in behalf of his government, he advocated the emancipation of the Jews of Holstein. From 1817 to 1818 he represented Denmark at the court of Berlin. When, in Sept., 1818, Lewis Way presented his memorial in behalf of the Jews to Alexander of Russia, then at Aix, Bernstorff declared himself ready to give any information with regard to the question of the emancipation of the Jews.

In 1818 Frederick William III. of Prussia appointed Bernstorff Prussian minister of foreign affairs, in which capacity he served till his retirement in 1832.

G. B. L.

**BERR, CERF JULIA.** See EPSTEIN, JULIA BEER.

**BERR, EMILE:** French journalist; born at Lunéville, France, June 6, 1855. Having finished his classical studies at the Lyceum of Vanves and afterward at the Louis-le-Grand Lyceum in Paris, he engaged in a commercial career from 1875 to 1880 and attended to exchange transactions from 1880 to 1886. During the latter period he made his début in journalism, writing for "La France du Nord," and contributing essays on economic questions to the "Nouvelle Revue," which was then just founded. In 1886 he gave up his business career altogether, and thenceforth devoted himself to journalism, working first on the "Petite République Française," then on the "Petit Parisien"—on which latter he applied himself especially to economic questions—and in July, 1888, on the "Figaro," with which he has since been identified. He has contributed also to the following: "Figaro Illustré," "Illustration," "XIXme Siècle," "Liberté," "Revue Bleue," "Vie Parisienne." In the last-mentioned weekly he published between the years 1892 and 1894 some notes of travel under the pseudonym "Guy," and in 1898 a series of comments on topics of the day under the title "Confidential Letters," which latter attracted much attention. He also published in this journal his notes on Norway, which appeared in book form under the title "Au Pays des Nuits Blanches," Paris, 1900.

Berr has done much work as foreign correspondent for his paper, interviewing personages of high political and social standing; and for this purpose undertook several trips to England, Switzerland, Belgium, Tunis, Bulgaria, Bosnia, Russia, and Alsace-Lorraine. He represented the "Figaro" in Asia Minor at the opening of the railway from Mondania to Broussa; and then, in 1891, he had an interview with Stambouloff at Sofia, which was commented on by the European press. In 1894 he was appointed chief of the auxiliary service of the "Figaro," and in this capacity edited its literary supplement. In 1896, when the "Figaro" was enlarged to six pages, Berr resumed his place in its editorial office, where (1902) he writes sometimes under his own signature and sometimes under the pseudonym "Fabien." Since 1885 Berr has been a member of the Société d'Economie Politique, and also of the Société des Journalistes Parisiens. In 1900 he received the cross of the Legion of Honor.

I. B.

**BERR, GEORGE:** French actor and dramatist; born at Paris July 31, 1867; brother of Emile Berr. He was educated at the lycées of Vanves and Charlemagne, but, yielding to an irresistible love for the stage, he, at the age of sixteen, left his classical studies for the Conservatoire, and became the pupil of Got. In 1886 he won the first prize for comedy in a scene from "Les Plaideurs," and joined the Comédie Française. In 1892 he was nominated a member (*sociétaire*), and since then has acted the comic parts in the classical and modern repertoires.

Berr is equally excellent in purely lyrical works. He interprets the "Romanesques" of Edmond Rostand with the same superiority as the "Gringoire" of Théodore de Banville, in which he is considered to equal Coquelin, the creator of the rôle, who has never been replaced since he left the Théâtre Français. It is in this wide range of characters that the originality of Berr's talent manifests itself. In 1901 he succeeded M. Worms in the Conservatoire as professor of declamation.

As a dramatist Berr is known by the pseudonym "Colias," which is an anagram of his mother's name, "Ascoli." It is therefore probable that the Berrs are connected with the family of Chief Rabbi Ascoli, and M. Ascoli, who took part in the centennial commemoration of the Institut de France.

Berr has published two volumes of comedies: "Pour Quand on est Deux" and "Pour Quand on est Trois." In 1899 he, together with Maurice Froyez, staged in the Théâtre Cligny a farce-comedy, "Plaisir d'Amour," which was a great success. He is the author of a great number of unpublished humorous songs, which were circulated in manuscript among his colleagues.

**BERR ISAAC BERR OF TURIQUE:**

French manufacturer; born at Nancy in 1744; died at Turique, near Nancy, Nov. 5, 1828. He came of a rich and estimable family; received an excellent education, especially in Hebrew and rabbinical literature—in the latter from Jacob Perle, chief rabbi of Nancy. Inheriting the title of syndic of the Jewish community of Nancy, bestowed upon his father in 1753 by King Stanislaus, he took an active part in the direction of the affairs of the community.

In 1789 he was elected by the Jews of Alsace deputy to the States-General, where he was admitted to plead for Jewish emancipation before the Assembly. At about that time he published a pamphlet in which he refuted the anti-Jewish discourse delivered by De la Farre, bishop of Nancy. Berr was appointed successively member of the Assembly of Notables and member of the Sanhedrin; and he co-operated effectively in the organization of Jewish worship in France and in Italy. In his old age he retired, pensioned by the king, to one of his estates called "Turique"—the name of which he added to his own with the royal permission.

Berr was the author of the following works: (1) "Discours des Députés des Juifs des Provinces des Evêchés d'Alsace et de Lorraine, Prononcés à la Barre de l'Assemblée Nationale," Paris, 1789; (2) "Lettre du Sieur Berr Isaac Berr à Monseigneur l'Evêque de Nancy," Paris, 1790; (3) "Lettre d'un Citoyen," Nancy, 1791; (4) "Réflexions sur la Régénération Complète des Juifs en France," Paris, 1806; (5) "Lettre du Sieur Berr Isaac Berr à Grégoire, Sénateur," Nancy, 1806; (6) "Discours du Sieur Isaac Berr," Paris, 1806.

**BERR, MICHEL:** The first Jew to practise in France as a barrister; born at Nancy 1780; died

there July 4, 1843. His father, Isaac BERR DE TURIQUE, who made himself known by his great ability as a writer and as a champion of Jewish emancipation, intended his son to continue his work. With this end in view, he had him carefully educated by the most eminent masters. The poet Wessely recommended to him as a teacher a learned young man of Breslau, Benjamin Wolf, who in France assumed the name of "Louis." Under the direction of this Louis, Michel made rapid progress in the study of the Hebrew and German languages and literature. With no less success he attended the lectures of the central school of Nancy. At Strasburg, where he studied law, being at the time scarcely twenty years old, he began his career

**An Author at Twenty.** "Appel à la Justice des Nations et des Rois," or "Adresse d'un Citoyen Français au Congrès de Lunéville, au Nom de Tous les Habitants de l'Europe qui Professent la Religion Juive." This was an eloquent protest against the oppressive anti-Jewish laws then existing in the greater part of Europe.

On graduating from the university Berr returned to Nancy, where he pleaded brilliantly in several celebrated cases. At the same period he addressed to the minister of public worship observations on the speeches delivered by the latter on the law of Germinal 18, tenth year: he protested chiefly against the omission of any mention of Jewish worship in the Concordat.

About 1803 Berr accompanied his father-in-law, Berr-Bing, to Paris, where he soon made himself known by several literary articles in the "Décade Philosophique." Three years later he was elected deputy to the Assembly of Jewish Notables, and in the following year was appointed secretary of the Grand Sanhédrin. Through this hon-

**Secretary of Sanhedrin.** orable title and the French translation he made of the Hebrew poems of Kargan, Cologne, and Meyer in honor of the emperor, he gained the favor of the government and was called to the post of chief of division in the Ministry of the Interior in the new realm of Westphalia. There he made the acquaintance of the Swiss historian Johannes Müller, who, in his letters to his brother, speaks of Berr in most enlogistic terms.

On his return home, in 1809, Berr was appointed head of the office at the prefecture of Meurthe. At this period he published his "Essai sur la Vie et les Ouvrages de Bitaubé," and many papers on various subjects mentioned in the memoirs of the Academy of Nancy. In 1813 he returned to Paris, and, giving up his practise at the bar, devoted himself to literature. For three years he collaborated

**Leaves Law for Literature.** with the "Mercure de France," "Mercure Etranger," and "Magasin Encyclopédique." In 1816 he lectured on German literature at the Athénée

Royal of Paris, and translated into French the tragedy "Luther" by Werner, accompanied by notes. His competence as a translator was much appreciated; and in 1817 he was appointed translator of the German papers at the Foreign Office, a post which he occupied until it was abolished in 1823.

The great reputation that Berr enjoyed excited the hostility of the envious; and attacks in the press made by his adversaries affected him deeply. He was particularly disheartened by his unsuccessful candidature for membership of the Central Consistory, this position being one that he greatly coveted. In 1826 he went to Brussels, and devoted himself to politics. On his return he wrote on the works of Salvador, and contributed to the "Gazette des Cultes." In 1837 he left Paris and settled at Nancy, where he quietly worked until his death.

Besides the above-mentioned works, Berr contributed numerous articles to scientific journals. The most important for Judaism were: (1) "Notice Littéraire et Historique sur le Livre de Job" (Paris, 1807); (2) "Notice sur Maimonides" (Paris, 1816); (3) "Du Rabinisme et des Traditions Juives" (Paris, 1822); (4) "De la Littérature Hébraïque et de la Religion Juive" (Paris, 1829); (5) "De l'Immortalité de l'Âme chez les Juifs Anciens et Modernes" (Paris, 1822); (6) "De la Fête du Nouvel An et du Jeûne des Expiations, ou Grand Pardon chez les Juifs" (Paris, 1829); (7) "Nouveau Précis Élémentaire d'Instruction Religieuse et Morale, à l'Usage de la Jeunesse Française Israélite" (Nancy, 1839); (8) "Rite et Règlement pour le Culte Israélite de Metz" (Nancy, 1842).

**BERRUYER, JOSEPH ISAAC:** French Jesuit; born at Rouen Nov. 7, 1681; died at Paris Feb. 1758. He was the author of a work entitled "Histoire du Peuple de Dieu," Paris, 1728, a history of the Jews from the earliest times to the birth of Jesus, according to the Bible, and a critical study of the Gospels and the Epistles. This work, written in a non-religious spirit, and interspersed with hazardous observations, provoked the indignation of the Church leaders. The discussions it called forth made it popular, and numerous editions and translations of it appeared.

**BERSHAD:** Town in the district of Olgopol, province of Podolia, Russia, on the road between Olgopol and Balta, at the rivers Dakhna and Bershadka. In 1900 the Jewish population was 4,500, out of a total population of 7,000. The Jewish artisans numbered about 500. The community possessed one synagogue and six houses of prayer. In June, 1648, during the uprising of the Cossacks under Chmielnicky, the most bloodthirsty of his leaders—Maksim Krivonos—conquered Bershad and slew all the Jews and Catholics. S. A. Bershadski, the celebrated historian of the Russian Jews, descended from a Cossack family at Bershad, where his great-grandfather officiated as a Greek Orthodox priest.

Bershad was famous in the middle of the nineteenth century for its Jewish weavers of the "tallit" (scarfs used by the Jews during prayer in the daytime). But at the end of the century the demand decreased, and the industry declined, leading many of the weavers to emigrate to America.

H. R.

**BERSHADSKI, SERGEI ALEKSANDROVICH:** Russian historian and jurist; born at Berdyansk March 30, 1850; died in St. Petersburg 1896. He graduated from the Gymnasium of Kerch in 1868, and from the University of Odessa in 1872; lectured at the University of St. Petersburg on the history of the philosophy of jurisprudence, from 1878 to 1883; and was appointed in 1885 assistant professor. At the Lyceum he delivered lectures also on the history of Russian jurisprudence; and at the Military Law School of St. Petersburg, on general jurisprudence. His famous work on the Lithuanian Jews, "Litovskie Yevrei," published in 1883, is the first attempt in this field of historical investigation.

Bershadski's father was a Greek Orthodox priest, while his great-grandfather on his mother's side, Kovalevski, was a *hetman* of the Cossacks. The Cossack traditions of his family found expression in his violent prejudice against the Jews. He states, in his autobiographical notes, how in his childhood he learned of the horrors of the times of CHMIELNITSKY in connection with the "homicidal Jews." From the old blind bandore-player (bandurist) at the fairs, from the reaper in the field, and from the peasant girls at the spinning-wheel on long winter evenings, he had heard the same tale of the Jew as "the defiler of the sanctuary." This incited him to make a study of the Jewish question. "I started," he declares, "as a confirmed Jew-hater." His Jewish colleagues at the university remember how he used to threaten them, saying, "Wait, some day I will expose you!" He went to the Archives and there began to search for material for his threatened exposures. The result was his work, "Opyt Novoi Postanovki Nyekotorykh Voprosov po Istorii Yevreistva v Polshye i Litvye," an attempt to put into a new light some questions concerning the history of the Jews in Poland and Lithuania. To the surprise of some of his friends this appeared in the "Yevreiskaya Biblioteka." And their surprise grew when they read its important and on the whole favorable statements. The result of further researches appeared soon after in the "Voskhod," and in the "Russki Yevrei," both of them Jewish publications, and the name of Bershadski became so closely connected with Jewish topics, that most of the readers of these periodicals were firmly convinced that this so-called "Jew-hater" was a Jew himself. Soon afterward appeared his principal work, "Dokumenty i Regesty," etc., containing about 700 original documents and records from the early period of Jewish settlement in Lithuania, 1388-1569. Russian historiography shows no other instance of an equal collection devoted to one special subject. About the same time he published his "History of the Lithuanian Jews." Though this work covers a period of only two hundred years, it endeavors to depict the entire course of Lithuanian-Jewish history.

Bershadski's chief characteristics as a writer are a keen historical eye and truthfulness. He has the merit of having been the first impartial historiog-

rapher of the Jews in Lithuania. His published works are: (1) "Litovskie Yevrei, Istoriya ikh Yuridicheskavo i Obshchestvennavo Polozheniya v Litvye," St. Petersburg, 1883, being a history of the legal and social conditions of the Jews at Lithuania in 1388-1569; (2) "Dokumenty i Regesty k Istorii Litovskikh Yevreyev," St. Petersburg, 1882, bearing upon the history of the Jews in Lithuania; (3) "A. E. Rebiichkovich, Podskarbi Velikavo Knyazhestva Litovskavo," Kiev, 1888; (4) "Yevrei Korol Polski," St. Petersburg, 1890, concerning a Jew king of Poland. Many articles on Jewish-Polish and Jewish-Lithuanian history in the periodicals were contributed by him in "Yevreiskaya Biblioteka," "Voskhod," "Russki Yevrei," and other periodicals.

H. R.

**BERSHADSKY, ISAIAH** (pseudonym for **DOMOSHEVITZKY**): Russian novelist; born in Saimoscha, near Slonim, government of Grodno, 1874; now a teacher in Yekaterinoslav. Bershadsky is one of the youngest Neo-Hebraic writers of fiction in Russia, and one of whom much may be expected. His "Zikronot Tugal" (Sad Memories), in "Ha-Shiloah," vi. 405-416, is the story of a Talmudist who went into business, imitated the vices and extravagances of the rich, and, after being ruined by living above his means (a fault common to old-style Russian merchants), is a mental and physical wreck at fifty-five, with a devoted wife who did not share his pleasures but comforts him in his despair. The author shows power and keen insight into human nature, and has the sympathy for his erring characters which denotes the true artist. In his silhouettes, "Ma'asim be-Kol Yom" (Every-Day Occurrences), which appeared in the "Alhiazaf" calendar for 1901, he places before the reader with a few masterly strokes types and incidents which are not easily forgotten. The best of them is probably "Ha-Shemu'ah" (The Report). This describes the agony of a liberal Jew when he learns from his sons, whom he has established in business in a great city, that they are compelled to embrace Christianity in order not to be ruined by expulsion. The anomalies of religious life are presented in their most cruel phases; for the author states that the old man was liberal and cared little about the religious conduct of his sons, sometimes even encouraging transgression in small things, but that he is crushed by their conversion, which is to some extent the outcome of their training under his supervision.

In his novel, "Be'en Mat'arah" (Without Aim), Bershadsky ably describes the life of progressive Hebrew teachers in Russia, and the superiority of a Zionist idealist over a brilliant cynic, *Adamovich*, who is the hero of the novel, and who has no aim in life. These novels as well as two others, "Defusim u-Zelatim" (Types and Shades) and "Neged ha-Zerem" (Against the Current), were published in the last two years by the "Tuschia" of Warsaw. Bershadsky also contributed several short sketches to "Ha-Dor."

P. Wl.

**BERSOHN, MATHIAS:** Polish bibliographer, archeologist, and writer on fine arts; born at Warsaw 1826. He is the owner of a choice library which contains a valuable collection of rare books and manuscripts. Among other works he wrote: (1) "W. Stosie," 1870; (2) "Tobias Kohn," Cracow, 1872, the biography of a Jewish physician of the seventeenth century, the author of "Ma'ase Tobia"; a supplement, taken from a work entitled "Metryka Koronna," giving important documents on the history of the Jews of Poland, is added to "Tobias Kohn"; (3) "Marcin Teofil Polak," 1889; (4) "Studency Polacy na Uniwersytecie Colonskim xvi i xvii, w"—a pamphlet on old South-Russian synagogues; and many articles in the Polish periodicals "Tygodnik Ilustrowany" and "Biblioteka Warszawska."

**BIBLIOGRAPHY:** S. Orgelbrand, *Encyklopedia Powszechna*, ii., s.v., Warsaw, 1898.

**BERTENSOHN, BERNARD:** Russian teacher and translator; born at Odessa at the end of the eighteenth century; died there 1859. He received a careful education in the school of Basilius Stern, and for many years was a teacher of languages in Odessa. Bertensohn contributed to the "Odesski Vyestnik" and other periodicals, and in 1841 translated into Russian L. Philippon's novel, "Die Marannen."

**BIBLIOGRAPHY:** *Voskhod*, 1884, iv. 146.

V. R.

**BERTENSOHN, JOSEPH VASILIEVICH:** Russian court-physician; born at Nikolaiev, government of Kherson, in 1835. He received his early education at the gymnasium of Odessa, whence he was graduated in 1849; studied at the Richelieu Lyceum in Odessa, at the University of Kharkov, and then at the University of Dorpat, from the latter of which he graduated in 1857 with the degree of doctor of medicine. In 1859 he was appointed physician of the city hospital at Vitebsk. He went abroad in 1861 and attended the lectures of Virchow, Traube, Skoda, and Helmholtz. In 1862 he became attached to the medical department of the Ministry of the Interior, and soon after was appointed a member of the St. Petersburg board of health. He assumed the editorship of the "Arkhiv Sudebnoi Meditsiny Obshchestvennoi Higieny" in 1865. The municipal government of St. Petersburg entrusted him, in the following year, with the management of the Cholera Asylum, which in 1867 was transformed into the First City Hospital. To his efforts were due the establishment of a field-hospital and a training-school for medical assistants. Bertensohn is still director of these institutions, the first of their kind in Russia. In 1875 he established a free dispensary, which was named in honor of Grand Duchess Maria Alexandrovna. During the Franco-Prussian war he accompanied the celebrated surgeon Pirogov to the battlefield. From there he sent a series of valuable articles on military hygiene. He is a privy-councilor, an honorary physician to the Russian court, a member of many learned societies, and an honorary member of the medical associations of Vitebsk, Kiev, and St. Petersburg. His works on various questions of public hygiene and sanitary reform have been of

great practical importance. Bertensohn was one of the most ardent propagators of Pirogov's advanced ideas and has done a great deal toward their realization. Besides numerous articles contributed to medical periodicals, he has published the following works: (1) "O Ghermafroditismye, etc., v Sudebno-Meditsinskom Otnoshenii"; (2) "Barachnye Lazarety v Voyennoe i Minnoe Vremya," St. Petersburg, 1871; (3) "Baraki St. Peterburgskavo Damskavo Lazaretnavo Komiteta," St. Petersburg, 1872; (4) "L'Hôpital Baraque Etabli par le Comité des Dames de St. Pétersbourg, d'Ordre de S. M. l'Impératrice," St. Petersburg, 1874.

**BIBLIOGRAPHY:** Vengerov, *Kritiko-Biograficheski Slovar*, iii., St. Petersburg, 1892; *Eutziklopedichski Slovar*, ixi., St. Petersburg, 1892.

H. R.

**BERTENSOHN, LEV BERNARDOVICH:** Russian physician; born at Odessa Aug. 10, 1850; son of Bernard and nephew of Joseph Bertensohn. He graduated in 1867 from the Larin Gymnasium, St. Petersburg, and in 1872 from the St. Petersburg Medical Academy. He was assigned to duty in the clinical military hospital, under Eck and Eichwald. From 1876 to 1887 Bertensohn lectured at the Rozhdestvenskaya Hospital on the diagnosis and treatment of diseases. In 1887 he was appointed, by the minister of crown domains, president of the commission for the improvement of the mineral springs system of the Caucasus. Bertensohn published his chief work on balneology in 1873, under the title "Mineralnye Vody, Gryazy, i Morskiya Kupanya v Rossii i Zagranitsei," being assisted therein by Dr. Vronikhim. Among his other works may be mentioned "Pseudoleukemia Prinyataya za Tif," 1879 (reprinted in German in "St. Petersburg Medicinische Wochenschrift," 1879, No. 12). Bertensohn also published in the "Meditsinski Vyestnik," in 1883, an article on Turgenev, who, in his closing years, was treated by Bertensohn. With Ivanov Bertensohn translated Kuntz's "Lehrbuch der Praktischen Medicin," and with Dr. Popov he issued a work on the Caucasian mineral waters, "K Voprosu ob Ustroistvye Kavkazskikh Mineralnikh Vod," 1887.

**BIBLIOGRAPHY:** Vengerov, *Kritiko-Biograficheski Slovar*, iii., 123, St. Petersburg, 1892; *Bolshaya Eutziklopediya*, iii., ib. 1901.

H. R.

V. R.

**BERTENSOHN, VASILI ALEKSEYEVICH:** Russian agriculturist; born in Odessa Sept. 12, 1860. He belongs to the hereditary nobility, his father, Dr. Aleksei Vasilievich Bertensohn, having been a state councilor and knight of the Order of St. Vladimir. Vasili graduated from the technical high school of Odessa in 1879, studied for a year at the Imperial New-Russian University at Odessa, and then at the Petrovsko-Razumovskoye Agricultural Academy in Moscow, whence he graduated in 1884. From 1885 to 1894 Bertensohn was attached to the Department of State Domains, and was stationed at Odessa as adviser to the superintendent of the governments of Kherson and Bessarabia. He was at the same time secretary to the Odessa committees on phylloxera and sericulture, and undertook several agricultural commissions for the department.

In 1889 Bertensohn was commissioned to western Europe for the purpose of studying the conditions

of sericulture and viticulture. In 1893 he was appointed agricultural expert to the southern governments, and commissioned to investigate the needs of sericulture and other agricultural problems in those districts. The following year, Bertensohn was made an extra official in the Department of Agriculture and State Domains, in addition to his other appointments. In 1900 he became chief expert on agriculture to the governments of Podolia and Volhynia, and chief expert on sericulture in South Russia. He is the representative of the Department of Agriculture and State Domains in connection with the various agricultural institutions of Odessa; and was commissioned by his department to inspect the agricultural section of the Paris Exposition of 1900.

Bertensohn is an aulic councillor and knight of the orders of St. Stanislav and St. Anne. He was also decorated by Emperor Alexander III. with his "commemoration" medal; and Bertensohn's department has awarded him a special medal for his services to agriculture. In connection with Jewish charitable institutions Bertensohn has been very active. The farm of the Odessa Hebrew Orphan Asylum was organized on lines proposed by him, and he superintended it for a considerable time. In 1893, at the invitation of Baron de Hirsch, he visited Paris and London for the purpose of joining in the deliberations on the proposal to establish Jewish colonies in the Argentine Republic. He was offered the position of superintendent of the agricultural sections of these colonies, but did not accept it.

Bertensohn has been a prolific contributor to the agricultural journals "Zemledyeheskaya Gazeta," "Zemledyelic," and the "Odesski Vyestnik," as well as to several periodicals. On agricultural education, in connection with the Jewish question, he has published essays in the "Voskhod" and "Odesski Vyestnik." Many of these have been issued in pamphlet form; among them "Vinogradarstvo na Peshchannoi Pochvye," "Shelkovodstvo v Khersonskoi, Bessarabskoi i Tavricheskoi Guberniakh," and "Polskaya Pshenitza."

**BIBLIOGRAPHY:** Vengerov, *Kritiko-Biograficheski Slovar*, iii., St. Petersburg, 1892; and private sources.

**BERTHEAU, ERNEST:** Biblical and Oriental scholar; born Nov. 23, 1812, in Hamburg; died May 17, 1888, in Göttingen. In 1843 he was appointed ordinary professor in the University of Göttingen, where he lectured on Oriental languages, Biblical exegesis, Hebrew archeology and history. Bertheau was the author of the following works: (1) "Die Sieben Gruppen Mosaischer Gesetze," Göttingen, 1840; "Zur Gesch. der Israeliten," Göttingen, 1842; and (in the "Kurzgefasstes Exegetisches Handbuch zum Alten Testament") commentaries on Judges and Ruth, Leipsic, 1845; Proverbs, Leipsic, 1862; Chronicles, Leipsic, 1854; Ezra, Nehemiah, and Esther, Leipsic, 1862. Noteworthy also is his edition of the smaller Syriac grammar of Bar-Hebraeus, Göttingen, 1843.

**BIBLIOGRAPHY:** Brockhaus, *Konversations-Lexikon; La Grande Encyclopédie*.

B. B.

**BERTHOLD OF REGENSBURG:** Monk and itinerant preacher; born about 1220; died in

Regensburg (Ratisbon) Dec. 14, 1272. This most celebrated popular preacher of the Middle Ages, known to the people as "Rusticanus," traveled through Bavaria, the Rhine Provinces, Alsatia, Austria, Moravia, Hungary, Silesia, and Bohemia, and exercised an enormous influence upon the populace by his fiery speech and his lofty moral ideals. The last part of his life-work was spent in the interest of the Crusades.

It is supposed that in his many journeys he came in contact with the Jews, though there are no direct data on this point. In his numerous sermons, however, occasional references to the Jews show that he belonged to those ecclesiastics who, though good churchmen and brought up in the traditions of their church respecting the Jews, were liberal-minded enough to treat them as human beings to whom the state owed a certain amount of protection. Some qualities, which Berthold must have observed among the Jews who came under his notice, appealed strongly to him; and on one occasion he warned his hearers to be constant in their morning and evening prayers, adding, "In this the Jews put you to shame." On another occasion he used the same expression in regard to the holiness of family life. It is more surprising, however, to see how forcibly he speaks against what in his time was becoming the fashion of the day—the attempt to compel the Jews to become Christians. He declares it to be foolish to forcibly push the Jews into the water. He is also very decided in his distaste for another method then growing common; namely, that of forcing the Jews to see the error of their ways. The many disputations, which from that time on were held, were regarded by Berthold as quite useless; for he says: "You all desire to have a dispute with the Jews. You are ignorant; they are learned in Holy Writ. They know well how to out-talk you; and because of this you always emerge the weaker." In regard to the position of the Jews before the law he has this to say: "Kings ought to guard the Jews as they guard the Christians in respect of their persons and their chattels, if taken in during time of peace; and he who kills a Jew must stand for it as must a Christian, when the emperor has received them in time of peace." He then quotes the usual reasons given by the Church for permitting Jews to live among Christians: "First, because they are witnesses that our Lord was by them crucified . . . ; secondly, because those of them who shall be living at the time of Antichrist will all have become Christians before the last day."

There are, however, many indications that, despite these liberal expressions, Berthold was still the child of his day, and his ecclesiastical dislike of the Jews was increased by the great horror which he had of usury in any form; but it must be remembered that, like Bernhard of Clairvaux (1146) and the minnesinger Rumelant (thirteenth century), he is as vigorous against Christian usury as against Jewish. This popular prejudice is seen in his speaking of "des stinkenden Juden falschen Geschwätz," and mentioning them in connection with thieves, robbers, heathens, heretics, and perjurers. On one occasion he did not scruple to say: "Mr. Jew, the devil had

long ago broken thy neck, had it not been for the angel that watches over thee."

Berthold is also of interest in the history of mysticism; for in him is seen the close connection between Christian and Jewish mysticism of the thirteenth century. He believed in a most elaborate angelology; and even the mystic value of the letters of the alphabet was not unknown to him.

**BIBLIOGRAPHY:** The passages dealing with the Jews are quoted in Güdemann's *Geschichte des Erziehungswesens und der Cultur der Juden in Frankreich und Deutschland*, Index, s.v. *Berthold*, Vienna, 1880. The literature on Berthold will be found in Hauck's *Realencyklopädie für Protestantische Theologie und Kirche*, ii. 649, Leipsic, 1897.

## G.

**BERTINORO, OBADIAH (YAREH) B. ABRAHAM** (called also *Bartinoro*): Celebrated rabbi and commentator on the Mishnah; lived in the second half of the fifteenth century in Italy; died in Jerusalem about 1500. He was a pupil of Joseph b. Solomon Colon (see the latter's *Responsa*, No. 70, ed. Venice, 62a), and became rabbi in Bertinoro, a town in the province of Flori, whence he derived his by-name, and in Castello. The desire to visit the Holy Land led him to Jerusalem; and he arrived there March 25, 1488, having commenced his journey Oct. 29, 1486. His advent in Palestine marked a new epoch for the Jewish community there and indeed for the whole country. The administration of Jewish communal affairs in Jerusalem had fallen into the hands of iniquitous officials who tyrannized over great and small. The poor were pitilessly taxed for the Mohammedan government; the rich were similarly treated and driven from the city by exorbitant demands upon them, so that the Jewish community was on the brink of ruin (see *JERUSALEM*).

Bertinoro's strong personality, his eloquence, and great reputation as a scholar led to his being accepted as the spiritual head of the community immediately upon his arrival. His first care was to raise the intellectual plane of the community, and for this purpose he interested the younger generation in the study of the Talmud and rabbinical lore, and he delivered sermons every other Sabbath in Hebrew, although the vernacular language was Arabic, one which Bertinoro never

**Influence** acquired. His connections in Italy **in** supplied him with money for the support of the poor, which also added not a little to his influence. He succeeded in securing the abolition of the annual tax of 400 ducats, which had afforded such opportunity for oppression and injustice; in lieu a simple poll-tax payable direct to the government was instituted. When, on the expulsion of the Jews from Spain in 1492, many of the exiles settled in Jerusalem, Bertinoro became their intellectual leader. These Spanish Jews, far superior in intelligence, culture, and learning to the Arabian Jews of Palestine, presented Bertinoro with a site for a yeshibah in Jerusalem, which he founded, more than a thousand years after the extinction of the last academy in Palestine (see *ACADEMIES IN PALESTINE*). Considerable support for the maintenance of the yeshibah was given by the Jews of Egypt and Turkey at Bertinoro's written solicitation. Isaac b. Nathan ibn Shulal, *naggid* or prince of Egypt, was especially helpful.

In the decade during which Bertinoro thus controlled the best interests of the Jewish community at Jerusalem, a radical change for the better developed. Shortly after his arrival he had actually been compelled upon one occasion to dig a grave because the community had provided no one to perform that labor; a few years later there had come into existence such benevolent institutions as hospitals, charitable relief societies, and similar associations, all under excellent management. His fame and reputation spread to all parts of the Orient, and he came to be looked upon as a rabbinical authority of highest eminence; even the Mohammedan population frequently called upon him to decide judicial cases. His scrupulous conscientiousness and moral earnestness were especially recognized. For instance, he harshly reproved the rabbis for exacting fees for services at weddings and divorces, a custom then general in Germany, and did not hesitate to style them robbers (commentary on *Bekorot*, iv. 6). He believed it their duty to perform religious ceremonies without monetary remuneration.

Bertinoro is usually known as the best commentator of the Mishnah; the importance of his commentary is illustrated by the fact that since its appearance (Venice, 1549) hardly an edition of the Mishnah has been printed without it; even Surenhuis in his Latin translation and commentary upon the Mishnah (Amsterdam, 1698-1703) translated Bertinoro.

Its excellence lies in the fact that he selected the best afforded by Rashi **Literary** and Maimonides and gave this in clear **Activity.** and easily comprehensible fashion; in the matter of originality, however, Bertinoro does not approach his distinguished predecessors, nor even his successor in this department, Yom-Tob Lipmann Heller.

Bertinoro is also the author of a supercommentary upon Rashi's Pentateuch commentary (published under the title "*Amar Naki*" [Pure Wool], Pisa, 1810; reprinted in the collective work "*Rabbotenu Ba'ale ha-Tosafot*," Warsaw, 1889). His commentary upon Abot is, as Jellinek showed, only an extract from Simon Duran's work upon that book ("*Monatsschrift*," iv. 119, and an appendix added to a few copies of Jellinek's edition of Duran's Abot-commentary, Leipsic, 1855). Some liturgical productions by Bertinoro exist in manuscript in the Bodleian Library, Oxford (Nos. 1061; 2266, 6; in the first the name of his father is mentioned). He also wrote descriptions of his travels; and his letters to his relations in Italy, although intended only as private communications, are of great historical value. Most interesting in these letters (first published by S. Sachs in the "*Jahrbuch für Gesch. der Juden*," 1863, iii. 195-224) is the fund of information concerning the social and intellectual conditions of the Jews in Greece, Egypt, and Palestine. He shows himself therein not only a close observer, but a conscientious and unprejudiced chronicler. For example, he studied attentively the conditions of the Karaites in Alexandria, and did not hesitate to praise them for the possession of the very virtues which the Rabbinites denied to them, such as generosity and liberality (*l.c.* p. 208; the text is to be emended according to the manuscript mentioned in

Steinschneider, "Hebr. Bibl." vi. 131). His description of the Samaritans in Egypt (*i. e.* pp. 206-208) is one of the most valuable and reliable of medieval times.

His letters have been translated into German by Neubauer, "Jahrbuch," *i. e.* pp. 225-270, and separately, Leipzig, 1863; into French by M. Schwab, "Lettres d'Obadiah," Paris, 1866; into English in the "Miscellany of Hebrew Literature," i., 1872.

No. 7. All these translations, however, are based upon a very imperfect manuscript (see Steinschneider, *i. e.* vi. 131, xiii. 124, who gives many emendations from another manuscript). The Hebrew edition, published by M. T. Schwedseharf, Kolomea, 1886, is simply a reprint of the same text. Collated passages from another manuscript, as well as a short letter by Bertinoro, were published by Steinschneider in "Yehudah we-Yerushalayim," ii. 1878. The Almanzi library contained Bertinoro's novella upon Moses of Coucy's work, "Sefer Mizwot ha-Gadol" ("Semag")—see Luzzatto, in "Hebr. Bibl." v. 145; the work is now very probably in the British Museum.

**BERTOLIO, ABBÉ:** French cleric; member of the Commune of Paris in 1790. The National Assembly conferred citizenship upon the Jews of Bordeaux, Bayonne, and Avignon Jan. 28, 1790; but deferred granting it to those of Alsace and Lorraine. Hence, when the Jews of France petitioned the Assembly, Dec. 24, 1789, delegates from Paris appeared before the General Assembly of the Commune with the request that it pledge itself to support the petition of the Jews. On Jan. 30, 1790, the latter Assembly listened to the report of Abbé Bertolio, who, while favoring the Jews' request, proposed that the Assembly should take no steps in their behalf before consulting the districts and having obtained their approbation of the pledge requested. His proposition was adopted, and on Feb. 28 a deputation from the Commune, with the Abbé Mulot as spokesman and Bertolio as a member, appeared before the National Assembly, requesting it to extend to the Jews of Paris the decree giving citizenship to those Jews known as Portuguese, Spanish, and Avignonese. As is well known, this intervention of the Commune was not immediately effective.

I. L.

**BERTRAM, CORNEILLE BONAVENTURE:** Protestant clergyman and Hebraist; born at Thouars, France, in 1531; died at Lausanne, Switzerland, 1594. He studied at Poitiers, Paris, Toulouse, and Cahors. Learning, in the last-mentioned city, that the authorities had received an order to massacre all the Protestants, he fled to Geneva, where, in 1567, he became professor of Oriental languages in the university. Among many valuable works he wrote the following on Hebrew matters: (1) "Gal 'Ed" (Heap of Testimony), "Comparatio Grammaticæ Hebraicæ Aramaicæ," Geneva, 1574; (2) "De Politia Judaica tam Civili quam Ec-

clesiastica," Geneva, 1580, a work on Hebrew institutions and history, which enjoyed great popularity, and passed through many editions; (3) "Grammatica Hebraica et Arabica," Geneva, n. d.; (4) "Lucubrations Frankentallenses, seu Specimen Expositionum in Difficiliora Utriusque Testamenti Loca," Frankenthal, 1586. Bertram also published a translation of the Bible very much appreciated at that time, Geneva, 1588. In this translation he followed Sebastian Munster and Tremelinus; and very often he made use of rabbinic commentaries.

**BIBLIOGRAPHY:** Haag, *La France Protestante*, ii. 229-231; Drexel du Radier, *Notice de C. B. Bertram*, in *Bibliothèque Historique et Critique de Poitou*, iii. 1 et seq.; Steinschneider, *Bibliographisches Handbuch*, p. 22.

T.

I. Br.

**BERURIAH** (= probably **Valeria**): Daughter of the martyr R. Hananiah ben Teradion, and wife of R. Meir; born in the first quarter of the second century, she lived at Tiberias after the Hadrianic persecutions. Her traits of character, gleaned from Talmudic passages, show her to have been a helpmate worthy of her great husband, and to have possessed a personality corresponding to the emergencies of the troublous times following upon the failure of Bar Kokba's insurrection. They betray intellectual qualities and attainments as well as womanly tenderness and staunch virtues. It is said that she studied three hundred Talmudic subjects daily (*Pes.* 62b), and R. Judah endorsed a decision of hers, on a question about clean and unclean, in which she went counter to the view of "the wise" ("hakamim") (*Tosef.*, *Kelim*, B. M. i. 6).

Her womanly tenderness is shown by a Biblical interpretation (*Ber.* 10a): Her husband, grievously vexed by wicked neighbors, prayed for their extermination. Beruriah exclaimed: "What! do you dare pray thus because the Psalmist says: 'Let haṭa'im be consumed out of the earth?' (*Ps.* civ. 35) Observe that he does not say hoṭe'im ["sinners"], but haṭa'im ["sins"]. And then look to the end of the verse: 'And the wicked will be no more.' Once sins are rooted out, there will be no more evil-doers." Of her ready wit the following is a specimen (*ib.*): In a dispute between Beruriah and a sectary, the latter quoted *Isa.* liv. 1: "Sing, O barren, thou that didst not bear," and mockingly asked whether barrenness is cause for singing. Beruriah directed him to look to the end of the verse: "More are the children of the desolate than the children of the married wife." The principle upon which both interpretations rest, "Look to the end of the verse" (שפי' ללסיפיה רקרא), became an exegetical rule current among the later Talmudical sages.

In 'Er. 53b *et seq.* there are other examples of her knowledge of Jewish Scriptures and her almost coquettish playfulness, coexisting

in her with a capacity for righteous indignation, displayed when it was proposed, for her father's sake, to pay funeral honors to her scapegrace brother. Father, mother, and sister alike denounced his conduct, the last applying to him *Prov.* xx. 17 (R. V.), "Bread of falsehood is sweet to a man; but afterward his mouth shall be filled with gravel" (*Sem.* xii.; *Tam.* R. iii. 16).

Beruriah's life fell in calamitous times. Not only did she lose her father through the Hadrianic persecutions, but her mother at the same time suffered a violent death, and her sister was carried off to Rome, or perhaps Antioch, to lead a life of shame under coercion. At Beruriah's instance, R. Meir set out to save her sister's honor, and succeeded ('Ab. Zarah 18a; Sifre, Deut. 307; Eccl. R. vii. 11). In consequence he had to flee to Babylonia, and Beruriah accompanied him.

Beruriah is best known in connection with the touching story of the sudden death of her two sons on the Sabbath, while their father was at the house of study. On his return, at the conclusion of the Sabbath, he at once asked for them. Their mother replied that they had gone to the house of study, and, feigning to disregard her husband's rejoinder, that he had looked for them there in vain, she handed him the cup of wine for the Haddalah service. His second inquiry for them was evaded by a similar subterfuge. After R. Meir had eaten his evening meal, Beruriah asked formally for permission to put a question to him. "Rabbi," she then said, "some time ago a deposit was left with me for safe-keeping, and now the owner has come to claim it. Must I return it?" "Can there be any question about the return of property to its owner?" said R. Meir, half astonished and half indignant that his wife should entertain a doubt. "I did not care to let it go out of my possession without your knowledge," replied Beruriah, seemingly in excuse, and, taking him by the hand, led him into the room in which the bodies of their two sons were lying on the bed. When she withdrew the cover, R. Meir broke out in tears and plaints. Gently Beruriah reminded him of his answer to her question about the return of a treasure entrusted to one for safe-keeping, adding the verse from Job (i. 21): "The Lord gave, and the Lord hath taken away; blessed be the name of the Lord." This story, which has found a home in all modern literatures, can be traced to no earlier source than the *Yalkuṭ* (Prov. 964, quotation from a Midrash).

With Beruriah's death is connected a legend mentioned by Rashi ('Ab. Zarah 18b). To explain R. Meir's flight to Babylonia, the commentator relates the following:

"Once Beruriah scoffed at the rabbinical saying, 'Women are light-minded' (Kid. 80b), and her husband warned her that her own end might yet testify to the truth of the words. To put her virtue to the test, he charged one of his disciples to endeavor to seduce her. After repeated efforts she yielded, and then shame drove her to commit suicide. R. Meir, tortured by remorse, fled from his home."

The historical kernel of this story can not be disengaged. As told, the narrative is wholly at variance with what is known of Beruriah's character and that of R. Meir. Beruriah probably died at an early age.

**BERUSH.** See BAER OF MESERITZ.

**BERYL** (הַרְיָטִיט): A stone, ranging in color from blue to pale yellow and found all over the world;

three kinds are to be distinguished—beryl, aquamarine, and emerald. According to Ex. xxviii. 20 and xxxix. 13, the beryl was the first on the fourth row of the breastplate of the high priest. It is also mentioned frequently in the apocalyptic literature; e.g., Ezek. i. 16, x. 9, xxviii. 13; Dan. x. 6).

**BERYTUS.** See BEIRUT.

**BESALU** (Latin, *Bisuldum*): City in Catalonia, Spain. Its small Jewish community had the same privileges as that of the neighboring Gerona, and was taxed together with it. A number of documents dealing with taxes of the Jews of this place are preserved in the archives of Aragon at Barcelona. Besalu is the birthplace of the family Caslar (called in Jewish documents Descaslars, דֵּרִישְׁקָסְלָר), of Abraham b. David Caslar, Joseph ibn Zabara, and others.

M. K.

**BESANÇON:** City and county of France, in the department of Doubs. Although no mention is made of this city in Jewish sources, it is known that it had a prominent part in the history of the Jews and was also of some importance even from a literary point of view. By his marriage with Jeanne of Burgundy, Philip the Tall, king of France, became ruler of this province in 1316. In a letter of Dec. 14, 1321, he gave to the queen the spoils from the Jews, who he had driven from his territory. Some years afterward they were recalled, but when in 1348 the Black Plague broke out, the inhabitants accused the Jews of being the cause, persecuted them, and had many of them executed, and finally (1360) the wretched survivors who had escaped the massacres were exiled from the province by a decree of Princess Marguerite.

There is no mention of Jews in the city of Besançon (which is the capital of the county) before 1320, when, in the depth of winter, they were driven from the environs, and knocked at the gates of this free city, which was under the patronage of the emperor of Germany. Five of them, on account of previous commercial relations, having succeeded in entering the city, asked permission to remain at least until the end of the winter. The leading men of the city, in order to please the barons D'Arlay, who were favorably inclined toward the Jews, gave their consent that the fugitives should reside among them.

The new inhabitants of Besançon, however, paid for their right to remain by many and burdensome obligations. They were required to pay a heavy poll-tax every month to the city treasury, were forbidden to appear in the city without a white and red cloth attached to the breast, and were ordered to dwell in a specified street, the gates of which were closed every evening. The street which they inhabited is now called "Rue Richebourg"; and it is said the Jews' sojourn there gave rise to this name. A piece of land, chosen by the leading men of the city, was assigned to them as a burial-place. The Jews acquired free access from the city and province only after the French Revolution.

As a matter of interest to the student of Jewish

history, it may be mentioned that the library of the city contains a manuscript copy of the Hebrew Bible (2 vols. folio) with curious illuminations, showing that the manuscript, which is not dated, and is written in square characters, emanates from the fourteenth century. Moreover, it appears from a Judeo-Arabic inscription on the initial page that the manuscript was sold in Yemen in Iyyar, 5252 (May, 1492). After various transfers it came during the Revolution from the Benedictine abbey into the city library of Besançon.

As regards administration, the Jewish community of Besançon belonged formerly to the jurisdiction of the consistorial district of Nancy, having as its spiritual head Solomon Wertheimer. Since 1858 it has been reattached to the jurisdiction of the district of Lyons which in that year was made a consistorial department. Since the death of Wertheimer, in 1865, J. Auscher has served as pastor, first with the title of rabbi, and later as consistorial chief rabbi; for, in 1872, after the emigration of the Jews from Alsace and the redistribution of the districts following the Franco-German war, the community of Besançon became the seat of a consistory. It now (1902) includes the following Jewish communities: Dôle, Baume-les-Dames, L'Île sur Doubs, and Montbéliard.

**BESANT, SIR WALTER:** English writer; novelist; born at Portsmouth Aug. 14, 1836; educated at King's College, London, and at Christ's College, Cambridge; died in London June 11, 1901. Besant was among those persons who helped the Russian and Polish Jews who flocked to the East End of London. He lived to see at least one of his many novel views on social subjects and aspirations realized—the Palace of Delight, which figured in his "All Sorts and Conditions of Men" (1882), having given rise to the People's Palace in the East of London. While this was not meant exclusively, or even partially, to benefit Jews, yet it did so, owing to its situation, which was in the center of a large Jewish population.

From 1868 to 1885 Besant acted as secretary of the Palestine Exploration Fund. During this period he wrote in collaboration with E. H. Palmer, the Orientalist, a "History of Jerusalem" (1871), and acted as editor of "The Survey of Palestine." In 1893 he published his novel, "The Rebel Queen," in which the heroine and many of the minor characters were Jewish.

**BESCHAU.** See MARRIAGE CUSTOMS.

**BESCHREIEN** (compare English "beshrew"): A Judeo-German word for lauding a person or thing to such an extent as to cause him or it to be harmed by malevolent spirits. This superstitious belief is of old German or Teutonic origin. Grimm ("Deutsche Mythologie," ii. 864) enumerates various terms, such as "berufen," "beschwatzen," "be-

schwören," besides beschreien, comparing them with "incantare" (whence "enchanter"), "carminare" (whence the English "charm"), all of which denote the exertion of evil power by means of certain words. Wuttke ("Der Deutsche Volksglaube," p. 155) casts more light on the subject; stating that what the evil eye is for the beautiful object exposed, evil speech is to persons or things lauded for some good quality. The superstition, he says, is rooted in the universal pagan fear of a deity begrudging man's perfect happiness, rather than in that feeling of humbleness which restrains man from boasting of his health, wealth, or the like. Little children especially are exposed to the evil influence of loud praise; wherefore it is customary, when children are lauded for their beauty, strength, or intelligence, to add the word "unbeschrieben" or "unberufen"—which means, "Let that not cause them to be bewitched." There are special formulas in use against such beschreien (see Wuttke, *l.c.* pp. 163, 264). Some use as a prophylactic measure the formula: "God protect him!" "Behüt's Gott!" The Jews adopted both the expression and the superstition from the Germans in the Middle Ages (see Güdemann, "Gesch. d. Erziehungswesens und der Cultur der Juden in Deutschland," p. 205). It has been claimed, however, that the ancient Hebrew greeting, "The Lord bless thee!" offered by the passer-by to the laborers in the cornfield at harvest time (Ps. cxxxix. 8; Ruth ii. 4; Judges vi. 12) originated in a similar view, the blessing being intended to avert the evil influence of a begrudging glance or speech.

A. K.

**BESHT, ISRAEL OF MIEDZYBOZ** (or **MEDZHIBOZH**). See BAAL SHEM-TOB, ISRAEL.

**BESOR:** A wadi or river-bed where two hundred of the followers of David stopped while the rest of the force pursued the Amalekites (I Sam. xxx. 9, 10, 21). Guerin ("Judée," ii. 213), identifies Besor with the modern Wadi el-Ghazza, which has an outlet into the Mediterranean sea, southwest of Gaza.

J. JR. G. B. L.

**BESSARABIA:** Government in southwest Russia; separated by the Pruth and Danube from Rumania on the west, by the Dniester from Podolia and Kherson on the north and east, and bordering on the Black Sea from the Sulina mouth of the Danube to the estuary of Ovidiopol. The population in 1889 was 1,628,876, the Jews numbering 180,918. In 1897 the population was 1,936,392, of whom 225,637, or 11.65 per cent, were Jews. According to statistics of the Jewish Colonization Association, the Jewish population in the cities in 1898 was 173,641. Official documents show that Jews first emigrated to Bessarabia from Poland and Germany in the sixteenth century. They settled there in great numbers, not being permitted to live in the neighboring principality of Moldavia. At the present time a considerable part of Bessarabia is forbidden ground for the Jews, the MAY LAWS of 1882 being administered in a hostile spirit by the local authorities, who have officially declared their towns to be "villages" in which no Jews may reside. Moreover, many places in Bessarabia are situated within a distance

of fifty versts (33 English miles) from the frontier; and here only such Jews are permitted to live as were registered there before the issue of the edict of 1858.

Bessarabia excels among the Russian governments in the culture of the vine; and in this, as in the cultivation of tobacco, large numbers of Jews are employed. The chief articles of export are grain, fruit, and wine.

Until the middle of the nineteenth century most of the local commerce was in the hands of the Jews. Many Jews also were engaged in agriculture on leased lands, while many were innkeepers and farmers of post-stations. The May Laws and the introduction of the liquor monopoly by the government reduced many Jewish families to a deplorable condition. Zashchuk, who endeavors to foster the view that Jewish commercial activity is harmful to the general population, admits that, owing to the indolence and incapacity of the Bessarabians, the Jews are indispensable to the development of all branches of trade. From statistics gathered by the Jewish Colonization Association, the artisan class in 1898 comprised 20,976 persons; viz., 8,580 masters, 7,075 journeymen, and 5,321 apprentices. A small number of the Bessarabian Jews live as agriculturists in colonies founded between 1836 and 1854. (See AGRICULTURAL COLONIES IN RUSSIA.) The Bessarabian colonies are established on parcels of land leased from private proprietors. There are six colonies in the districts of Soroki and Beltzy: Dombroveny, Bricheva, Valya-Lui-Vlad, Vertinzhany, Lublin, and Markuleshty. Their present condition is as follows:

	Land in Deciatines.	Number of Farms.	Number of Colonists.
Dombroveny .....	1,179	139	1,132
Lublin .....	234	62	411
Vertinzhany .....	390	47	397
Valya-Lui-Vlad .....	346	82	716
Bricheva .....	289	83	820
Markuleshty .....	504	123	820
Total .....	2,942	536	4,296

The following table shows the number of Jews in the district and the percentage of the total population:

GOVERNMENT OF BESSARABIA (CENSUS, 1897),  
JEWISH POPULATION.

Districts.	Males.	Females.	Total.	Per Cent of the Total Population.
Kishinev .....	25,450	27,793	53,243	19.01
Akerman .....	6,016	6,266	12,282	4.64
Bendery .....	8,214	8,261	16,475	8.44

H. R.

S. J.

In the year 1840 David Zelensky of Kremenchug, Joseph Rabinovitch of Pavlograd, and Jacob Goldenweiser of Uman presented a petition to Count M. S. Vorontzov asking for his cooperation in the realization of their plan for the founding and organization of a Jewish agricultural colony in Bessarabia. The unsatisfactory condition of Jewish agricultural colonies established before that time was due, they said, to the social and religious conditions of the Jews, to the habits forced upon them by many centuries of artificial life, and to the deep-rooted prejudices against them. The petitioners did not ask for material aid, but for the moral support of the government, and for the privilege of buying from the government 5,000 deciatines of land in Bessarabia suitable for the founding of a model Jewish agricultural colony, purposing "to awaken among other Jews the inclination to agricultural occupations; to pay due attention to the industries relating to agriculture, such as cattle-breeding, gardening, and truck-farming, as well as sheep-raising, bee-keeping, the breeding of horses, the development of the silkworm industry, and of wine-making." The number of the first settlers was to be limited to 50 families; each family was to possess at least 450 rubles for traveling expenses and establishment, and was to promise to pay off in twenty years the price of the land assigned. Vorontzov enthusiastically seconded the efforts of the organizers, and called for expression on the subject from the military governor of Bessarabia. Lieutenant-General Feodorov, who was at that time acting in this capacity, replied that there was no single piece of unoccupied territory of 5,000 deciatines available for the purpose. Vorontzov, therefore, was obliged to inform the petitioners of his unsuccessful efforts, and the proposed plan was never realized.

**Proposed Colony of 1840.**

The more liberal spirit of the reign of Alexander II. brought with it the extension of the rights of his Jewish subjects, and the privilege of purchasing landed property within the pale of settlement. Seventeen Jewish colonies, which had been founded between the years 1836 and 1854, covered an area of 9,305 deciatines. These colonies (Dombroveny, Markuleshty, Vertinzhany-Rogojeni, Mershevka-Lankantzi, Bricheva, Nemovka-Lublin, Kapreshi, Novie Teleneshti, Zguritsa, Aleksandreni, Valya-Lui-Vlad, Lomitchanets, Konstantinovka, Jchenkar, Ivanos-Nikolavka, Shibko, and Romanooka) were, under Alexander II., in a comparatively prosperous condition. Moreover, Bessarabia was at that time the only region complying with the requirements of the law prohibiting the Jews from acquiring other than unoccupied land, and many Jews were accordingly attracted to the Bessarabian lands.

The first Jewish landowner in Bessarabia was "Honorary Citizen" Joseph [Jevzel] Günzburg, the progenitor of the present Baron Günzburg. He purchased in the districts of Jassy, Soroki, Akerman, and Bendery 14,004 deciatines and 76,000 falcchs of land for a sum of 287,209 rubles. This led to the presentation of two different and opposing petitions to the government within the same year. On the

the first Jewish landowner in Bessarabia was "Honorary Citizen" Joseph [Jevzel] Günzburg, the progenitor of the present Baron Günzburg. He purchased in the districts of Jassy, Soroki, Akerman, and Bendery 14,004 deciatines and 76,000 falcchs of land for a sum of 287,209 rubles. This led to the presentation of two different and opposing petitions to the government within the same year. On the

one hand, a group of Jewish capitalists in St. Petersburg petitioned for permission to purchase land occupied by freedmen, and for all the privileges conferred upon non-Jews through the territory within the pale of settlement, with the provision that neither the Jewish owners nor any of their coreligionists should sell spirituous liquors. On the other hand, the nobles of Bessarabia petitioned the government to enforce the old laws prohibiting Jews from purchasing or owning any land in Bessarabia. A. G. Stroganov at first decided the case against the Jewish petitioners, and the military governor, General Ilyinski, also reported unfavorably. Notwithstanding this, however, the czar (March, 1859) decided in favor of the Jews, who showed that the land had increased in value.

The timber trade, which, at the beginning of the nineteenth century, was not an unimportant factor in the life of New Russia, owed its

**Foreign** growth and prosperity to foreign  
**Jews.** Jews. Notwithstanding the decision of the government (1824) forbidding

the settlement of foreign Jews in Russia and even ordering the expulsion of those that had already become Russian subjects, the government gave unstinted support to the pioneers in this new branch of commerce, in the hope that the example of the foreign Jews would inspire their Russian coreligionists to give up their petty commercial transactions for those of a broader character and greater usefulness to the community.

At the beginning of 1840 the petition of eight Austrian Jews, for the privilege of retail trade in timber along the entire course of the Dniester river, was transmitted to the minister of finances, who called for a report on the matter by the governor-general of New Russia, M. S. Vorontzov. Vorontzov answered that "since there was great need for timber all along the lower Dniester, and the supply from Austria insufficient, he thought it advisable to permit the petitioners, as well as all foreign dealers in timber floating their merchandise from Austria down the Dniester, to sell it unhindered all along the course of the river." This expression led to the decision of the committee of ministers, indorsed by the emperor, to grant for three years (1840-43) the privileges solicited. The favorable result of this petition encouraged another group of Austrian Jews to ask for similar privileges along the river Pruth. These were granted as an experiment for two years, and in 1842 were extended for an additional four years. When the additional four years had come to an end (1847), the merchants petitioned for at least one year for the liquidation of their business. The matter was referred to Feodorov, governor-general of New Russia, and received his favorable comment; whereupon the government granted the petition of the Austrian Jews, and was so favorably impressed with the results of their enterprise that six years were granted them instead of the one year requested.

H. R. J. G. L.

**BESSELS, EMIL:** German-American Arctic explorer and naturalist; born at Heidelberg June 2, 1847; died at Stuttgart March 30, 1888. At the university of his native place he studied medicine

and zoology. In 1869, under the encouragement of Petermann of Gotha, he made his first journey to the Arctic ocean, during which he traced the influence of the Gulf Stream to the east of Spitzbergen. In 1870 he joined the German army as a military surgeon, and received public commendation from the grand duke of Baden for his services. A year later he volunteered to go as a surgeon and naturalist with the Hall expedition, which sailed on the "Polaris" from the Brooklyn (N. Y.) navy-yard. Nothing of moment took place until the ship reached 82° 9' north latitude, when Captain Hall, who had been on a short hunting expedition, returned to the ship, partook of a cup of coffee, and shortly after became violently ill (Oct. 24, 1871). Bessels treated him; but the patient several times disregarded the physician's advice. About Nov. 2 Hall showed signs of insanity, refusing to partake of food, and having the idea that he was being poisoned. He died Nov. 8, 1871.

Upon the return of the members of the expedition in 1873, after numerous mishaps and disasters, Morton, second mate of the "Polaris," brought a charge of murder against Bessels, alleging that the latter had administered morphine instead of quinine to Captain Hall. The secretary of the navy directed an inquiry, which was conducted by Surgeon-General of the Army J. K. Barnes and Surgeon-General of the Navy J. Beale, who reported "that Captain Hall died from natural causes—viz., apoplexy—and that the treatment of the case by Dr. Bessels was the best practicable under the circumstances."

Bessels, after this, spent some years at the Smithsonian Institution, Washington, in preparing for publication the scientific results of the voyage, the most striking of which was the proof of the insularity of Greenland deduced from tidal observations. His most important work was "Scientific Results of the United States Exploring Expedition Steamer 'Polaris,'" Washington, 1876. He published numerous papers on general natural-history subjects (see "Royal Society Catalogue of Scientific Papers," vii. 164; ix. 229, 230). Later Bessels joined an ethnological voyage on the U. S. S. "Sarauc" to the northwest coast of America; but the vessel was wrecked in Seymour Narrows, B. C.

**BET:** The second letter of the Hebrew alphabet. Its numerical value is two, wherefore the bet in the word **בְּיָרֵךְ** (Gen. xxi. 12) is interpreted as an allusion to the two worlds Isaac is destined to inherit—this world and the world to come (Yer. Ned. iii. 38a), or in the existence of which Isaac and his descendants believe (Gen. R. liii.). According to Bar Kappara, the Torah begins with the letter bet in allusion to the present and the future worlds (Gen. R. i. 14); according to R. Levi, in order to suggest by its shape (ב) that men should not pry into the secrets of what is above or beneath or behind, but simply inquire into the work of creation that lies

open before them (*ib.* i. 13). See also AKIBA BEN JOSEPH, ALPHABET OF.

**BIBLIOGRAPHY:** Buxtorf, *Tiberias*, xiv., xviii. On the origin of the letter, see I. Taylor, *The Alphabet*, 1883; A. J. Evans, *Primitive Pictographs*, 1894; *Cretan Pictographs*, 1895; *Further Discoveries*, etc., 1897, 1898; and the works named in Nos. 1 and 2 in the bibliography of ALPHABET.

**BET BELTIN** (בֵּית בִּלְתִּין) (called also **Bati Baltan**, **Biltin**, and in the Talmud **Beram**): A steep hill above the Euphrates, on which is built the modern town of Bir; lat. 37° 3' N., long. 38° E. Travelers and caravans from Aleppo to Diarbekir, Bagdad, and Portia cross the Euphrates at this point. According to the Mishnah (R. H. ii. 4), Bet Beltin was the extreme point of Palestine to which messengers came from Jerusalem to announce the new moon. This they did by kindling fires on the summit of the hill.

J. SR.

I. BR.

**BET DIN** (בֵּית דִּין; pl. *batte din*): Rabbinical term for court-house or court. In view of the theocratic conception of the law, which pervades Biblical legislation and is strictly carried out by rabbinical Judaism, including both civil and religious law, the bet din is not only a civil, but also a religious authority.

The "Bet Din ha-Gadol," or Great Sanhedrin at Jerusalem existing during the time of the Temple, was called also "Sanhedrin Gedolah" or, briefly, "Sanhedrin" (*Soṭah* i. 4, ix. 11; *Sanh.* i. 6; *Shebu.* ii. 2.) According to the Talmud, this bet din represented the supreme court of the country mentioned in Scripture (*Deut.* xvii. 8-13), and acted chiefly as court of last instance in legal or ritual disputes, in which case its decisions had to be obeyed on pain of death (compare rebellious ELDER). It also had a certain voice in the affairs of the state—no war of offense (מִלְחַמַּת הַרְשָׁוָה) could be undertaken without its permission—and it was in charge of civil affairs to the extent of appointing the judges of the country. The principal passages regarding this bet din are: *Sifre*, *Deut.* 152-153; *Sanh.* i. 5, 6; *Hor.* i. 1-5. The president, who bore the title "Nasi," was in a way the supervisor, but not a member of the court, which consisted of seventy members, corresponding to the seventy "elders" appointed by Moses (*Num.* xi. 25). The most learned and important of these seventy members was called "Ab Bet Din," a title similar to that of vice-president (see זָרוֹר). It is highly improbable that there was a bet din of this class in Jerusalem before the destruction of the Temple (compare SANHEDRIN). The detailed description of

**The Great Bet Din.** such an authority found in the Talmudic works is probably theoretical

even in its chief points, and may have had its origin in the fact that the bet din instituted after 70 was considered the ideal by the Rabbis, and that they were reluctant to omit it from the earlier periods of Jewish communal life. Hence the Talmudic sources speak very freely of a bet din that existed from the time of Moses to that of the Rabbis (*R. H.* ii. 9), mentioning even the bet din of Gideon, Jephthah, Samuel (*Tosef.*, *R. H.* ii. [i.] 3), or those

of Shem, of Samuel, and of Solomon (*Mak.* 23b), which they imagined similar to a later rabbinical court. And, furthermore, since the conditions in heaven were supposed to be analogous to those on earth, they likewise spoke of the heavenly bet din (בֵּית דִּין יְיָ מַעְלָה) (*Mak. l.c.*), calling it the "Great Bet Din" (בֵּי דִינָא רַבָּה) (*Soṭah* 22b).

The bet din as the highest religious as well as civil authority of the Jews can only be proved to have existed for the period between 70 and the end of the third century. It was Rabban Johanan b. Zakkai who made his bet din the intellectual center of the Jews when the destruction of Jerusalem deprived them of their bond of unity. He could not, of course, give his bet din the political importance of the old Sanhedrin; but, considering the new conditions under which the Jews were living, he succeeded in investing it with greater powers than any authority had before possessed. It had entire charge of the calendar system, and hence became the religious and national center not only of Palestine, but also of the Diaspora. Its power and influence increased under Rabban Johanan's successor, Rabban Gamaliel II., culminating under Judah

**Bet Din ha-Nasi I.**, whose grandson, Judah at Jabneh. Nesia, may be regarded as the last person under whom the bet din was the real center of the Jews. Hence the Talmudic sources speak of Rabban Gamaliel and his bet din (*Tosef.*, *Ber.* ii. 6), and of R. Judah ha-Nasi and his bet din ("Ab. Zarah ii. 6), meaning thereby the central body representing the highest civil as well as religious authority of the Jews.

On the death of Judah ha-Nasi the bet din of the Nasi lost its importance in consequence of the rise of Jewish scholarship in Babylonia toward the middle of the third century, as well as the increasing oppression of the Palestinian Jews under the Roman rule. Although the dignity and, also, to some extent, the power of the Nasi continued until the end of the fifth century (compare Origen, "Epist. ad Africanum," xiv.), the bet din was no longer an intellectual center. According to Talmudic sources, decrees (טַקָּאָנוֹת) binding for all Judaism were issued by the patriarchs before and during the time of Judah Nesia; but his successors had not such authority. In Babylonia no bet din was ever considered a central authority, even for Babylonia alone, although, of course, the higher the reputation of a scholar, the greater was the authority of the bet din under him. Similar conditions obtained there even in the time of the Geonim, for no central bet din could exist on account of the rivalry of the two academies. From about 500 there was not even any formal and authoritative ordination, and members of an actual bet din must be ordained at least. Alfasi made an attempt to reestablish the former central bet din, considering his bet din the highest ecclesiastical authority, and claiming for it prerogatives which belonged to the Bet Din ha-Gadol (*R. H.* iii., beginning; compare Nahmanides, "Milhemet," on the passage). If Jacob Berab had succeeded in reintroducing ordination, his bet din would have achieved the position of that of Rabban Johanan ben Zakkai; but he encountered too much opposition.

Aside from the Bet Din ha-Gadol and the similar bet din of the Nasi, the term was applied to every court, consisting either of 23 members,

Other members, who sat only in capital cases—**Classes of** **Beate Din.** **רִיבֵי נִשְׁתֵּה**, or of three (according to some, five), who decided in monetary affairs—**רִיבֵי מִמְנוֹת** (Sanh. i. 1–4;

Tosef., *ib.* i. 1). Yet even in Talmudic times it was usual to have at least 11 scholars present at court (Sanh. 7b), a custom observed in later times also, at least in difficult cases. A scholar of standing (**מוֹמְהָה**) required no assistant for holding court (Sanh. 5a), so that, during the Middle Ages as well as in modern times, the local rabbi alone frequently represented the bet din. In larger communities, however, there is a bet din consisting of at least three members, which sits daily except on Sabbath and holidays, and decides ritual as well as legal questions. The local rabbi generally presides, but in large communities the direction of the bet din is an office in itself, the incumbent of which bears the title "rosh bet din." The associate rabbi of a place has the same title, while among the Ashkenazim, and especially among the Polish-Russian Jews, the rabbi proper is designated as "ab bet din" and "resh mata." Compare **AUTHORITY, COURTS OF JUSTICE, JUDGES, KAHAL, NASI.**

**BET HILLEL AND BET SHAMMAI:** The "School (literally, "house") of Hillel" and the "School of Shammai" are names by which are designated the most famous antagonistic schools that flourished in Palestine during the first century (first tannaitic generation), and which more than others contributed to the development of the oral law.

Down to the advent of Hillel and Shammai, who were the founders of the great schools bearing their names, there were but few casuistic differences among the schools. Between Hillel and Shammai themselves three (or, according to some authorities, five) disputes are mentioned in the Talmud (Shab. 15a; Hag. ii. 2; 'Eduy. i. 2, 3; Niddah i. 1); but with the increase of their disciples disputations increased to such an extent as to give rise to the saying, "The one Law has become two laws" (Tosef., Hag. ii. 9; Sanh. 88b; Soṭah 47b).

The prevailing characteristics of the disputes are the restrictive tendency of the Shammites and the moderation of the Hillelites. Three hundred and sixteen controversies between these two schools are preserved in the pages of the Talmud, affecting 221

Halakot, 29 halakic interpretations, and 66 guard-laws ("gezerot"); and out of the whole number only 55 (or about one-sixth) present the Shammites on the side of leniency. More over, even where the characteristic tendencies appear to have changed

masters, the practical result remains the same; being the logical and consistent resultants of some opinions expressed elsewhere, and in line with the natural tendencies of the respective schools; and some of their restrictive views the Hillelites subsequently rejected, adopting what were exceptionally the more moderate views of the Shammites ('Eduy. i. 12 *et seq.*; compare Weiss, "Dor," i. 179 *et seq.*). That

the latter, as a school, ever receded from their standpoint to join the ranks of their more moderate antagonists is nowhere indicated; though individuals of that school, like Baba ben Buta, sometimes acknowledged the unreasonableness of their party by deserting its standard for that of Bet Hillel (Bezah 20a; Yer. Hag. ii. 78a). Hence it is that the Mishnah introduces some of their controversies with the remark, "These are of the lenient views of Bet Shammai and the restrictive views of Bet Hillel" ('Eduy. iv. 1; Tosef., 'Eduy. ii. 2).

The reason assigned for their respective tendencies is a psychological one. The Hillelites were, like the founder of their school (Ber. 60a; Shab. 31a; Ab. i. 12 *et seq.*), quiet, peace-loving men, accommodating themselves to circumstances and times, and being determined only upon fostering the Law and bringing man nearer to his God and to his neighbor. The Shammites, on the other hand, stern and unbending like the originator of their school, emulated and even exceeded his severity. To them it seemed impossible to be sufficiently stringent in religious prohibitions. The disciples of Hillel, "the pious and gentle follower of Ezra" (Sanh. 11a), evinced in all their public dealings the peacefulness, gentleness, and conciliatory spirit which had distinguished their great master; and by the same characteristic qualities they were guided during the political storms which convulsed their country. The Shammites, on the contrary, were intensely patriotic, and would not bow to foreign rule. They advocated the interdiction of any and all intercourse with those who either

**Character-** were Romans or in any way contrib-  
**istics.** uted toward the furtherance of Roman power or influences. Dispositions so heterogeneous and antagonistic can not usually endure side by side without provoking serious misunderstandings and feuds; and it was owing solely to the Hillelites' forbearance that the parties did not come to blows, and that even friendly relations continued between them (Tosef., Yeb. i. 10; Yeb. 14b; Yer. Yeb. i. 3b), for a time at least. But the vicissitudes of the period exerted a baneful influence also in that direction.

When, after the banishment of Archelaus (6 C. E.), the Roman procurator Coponius attempted to tax the Jews, and ordered a strict census to be taken for that purpose, both schools protested, and the new measure was stigmatized as so outrageous as to justify all schemes by which it might be evaded. The general abhorrence for the system of Roman taxation manifested itself in looking with distrust upon every Jew who was officially concerned in carrying it out, whether as tax-collector ("gabbai") or as customs-collector ("mokes"); these were slunned by the higher ranks of the community, and their testimony before Jewish courts had no weight (B. K. x. 1; *ib.* 113a; Sanh. iii. 3; *ib.* 25b). About this time the malcontents held the ascendancy. Under the guidance of Judas the Gaulonite (or Galilean) and of Zadok, a Shammitite (Tosef., 'Eduy. ii. 2; Yeb. 15b), a political league was called into existence, whose object was to oppose by all means the practise of the Roman laws. Adopting as their organic principle the exhortation of the father of the

Maccabees (1 Macc. ii. 50). "Be ye zealous for the law, and give your lives for the covenant of your fathers." these patriots called themselves "Kanna'im," Zealots (Josephus, "B. J." iv. 3, § 9, and vii. 8, § 1; Raphall, "Post-Biblical History," ii. 364); and the Shammites, whose principles were akin to those of the Zealots, found support among them. Their religious austerity, combined with their hatred of the heathen Romans, naturally aroused the sympathies of the fanatic league, and as the Hillelites became powerless to stem the public indignation, the Shammites gained the upper hand in all disputes affecting their country's oppressors. Bitter feelings were consequently engendered between the schools; and it appears that even in public worship they would no longer unite under one roof (Jost, "Gesch. des Judenthums und Seiner Sekten," i. 261; Tosef., R. H. end). These feelings grew apace, until toward the last days of Jerusalem's struggle they broke out with great fury.

As all the nations around Judea made common cause with the Romans, the Zealots were naturally inflamed against every one of them; and therefore the Shammites proposed to prevent all communication between Jew and Gentile, by prohibiting the Jews from buying any article of food

**Relation to External World.**

or drink from their heathen neighbors. The Hillelites, still moderate in their religious and political views, would not agree to such sharply defined exclusiveness; but when the Sanhedrin was called together to consider the propriety of such measures, the Shammites, with the aid of the Zealots, gained the day. Eleazar ben Ananias invited the disciples of both schools to meet at his house. Armed men were stationed at the door, and instructed to permit every one to enter, but no one to leave. During the discussions that were carried on under these circumstances, many Hillelites are said to have been killed; and there and then the remainder adopted the restrictive propositions of the Shammites, known in the Talmud as "The Eighteen Articles." On account of the violence which attended those enactments, and because of the radicalism of the enactments themselves, the day on which the Shammites thus triumphed over the Hillelites was thereafter regarded as a day of misfortune (Tosef., Shab. i. 16 *et seq.*; Shab. 13a, 17a; Yer. Shab. i. 3c).

Bet Shammai and Bet Hillel continued their disputes—probably interrupted during the war times—after the destruction of the Temple, or until after the reorganization of the Sanhedrin under the presidency of Gamaliel II. (80 C.E.). By that time all political schemes and plans for the recovery of the lost liberty had become altogether foreign to the ideas of the spiritual leaders; and the characteristics of the Hillelites once more gained the ascendancy. All disputed points were brought up for review (see *AKABIA*); and in nearly every case the opinion of the Hillelites prevailed (Tosef., Yeb. i. 13; Yer. Ber. i. 3b; Grätz, "Gesch. der Juden," 2d ed., iv. 424, note 4). Thenceforth it was said: "Where Bet Shammai is opposed to Bet Hillel, the opinion of Bet Shammai is considered as if not incorporated in the Mishnah" ("Bet Shammai bimekom Bet Hillel

enah Mishnah"—Ber. 36b; Bezah 11b; Yeb. 9a); that is, null and void.

Of the personnel of these schools there is no record, they being invariably cited collectively as "Bet Shammai" or "Bet Hillel." Nor can

**Constituent Members.**

their number be stated with exactitude. In round figures, the Babylonian Talmud (Suk. 28a; B. B. 134a) gives the number of Hillel's disciples as eighty, while the Palestinian Talmud (Yer. Ned. v. 39b) makes of them as many pairs. Both sources mention two of them by name, Jonathan ben Uzziel and Johanan ben Zakkai; and it is added that Jonathan was the greatest and Johanan the least among the whole number. No such traditions are recorded of the Shammites. Of their buta (Bezah 20a), Dositai of Kefar Yetma ('Orlah ii. 5), and Zadok (Tosef., 'Eduy. ii. 2); but they are mentioned simply because, though Shammites, they sometimes upheld the views of the Hillelites. See HILLEL and SHAMMAI.

J. SR.

**BET HA-MIDRASH:** High school; literally, "house of study," or place where the students of the Law gather to listen to the MIDRASH, the discourse or exposition of the Law. It is used in contradistinction to the Bet ha-Sefer, the primary school which children under thirteen attended to learn the Scriptures. Thus it is said in Gen. R. lxiii. 10: "Esau and Jacob went together to the bet ha-sefer until they had finished their thirteenth year, when they parted; the former entering the houses of idols, and the latter the batte ha-midrashot." Elsewhere it is stated, "There were 480 synagogues (batte kenesiot) in Jerusalem, each containing a bet ha-sefer, (primary school for the Scriptures), and a bet Talmud (same as bet ha-midrash), for the study of the Law and the tradition; and Vespasian destroyed them all" (Yer. Meg. iii. 73d; Lam. R., Introduction 12, ii. 2; Pesik. xiv. 121b; Yer. Ket. xiii. 35c, where "460" is a clerical error). The same tra-

**Meaning.**

dition is given somewhat differently in Bab. Ket. 105a: Three hundred and ninety-four courts of justice were in Jerusalem and as many synagogues, "batte ha-midrashot" (high schools), and "batte soferim" (primary schools). According to Yer. Ta'anit iv. 7, p. 69a; Lam. R. ii. 2, iii. 51, there were 500 primary schools in Betar, the smallest of which had no less than 300 pupils (compare Soṭah 49b, Giṭ. 58a, which speak of 400 schools, each with 400 pupils). The number of schools (480) in Jerusalem besides the one in the Temple is derived by gematria from the word מִלְּשֵׁנֵי = 481 (Lam. R. *l.c.*).

The bet ha-midrash in the Temple hall (Luke ii. 46, xx. 1, xxi. 37; Matt. xxi. 23, xxvi. 55; Joh. xviii. 20) is called the "bet ha-midrash ha-gadol," the great high school (Tanna debe Eliyahu R. ix. [x.], xvi., and elsewhere). It formed the center of learn-

ing, and was, of course, the oldest one, standing in close relation to the "Bet Din ha-Gadol," the high court of justice in the Temple. Its history can not well be traced. A "bet wa'ad," meeting-place of scholars, existed as early as the days of Jose ben Joezer of Zereda, the martyr of the Maccabean time, who teaches: "Let thy house be a bet wa'ad for the wise" (Ab. i. 4). The name "bet wa'ad" is met with also in Soṭah ix. 15; Yer. Ber. iv. 7c; Yer. Ta'anit iv. 67d, and elsewhere. The hearers or disciples were seated on the ground at the feet of their

teachers (Ab. *l.c.*; Luke x. 39; Acts xxii. 3). In the first century, schools existed everywhere at the side of the synagogues (Acts. xix. 9, "the school of one Tyrannus"). The primary school, bet ha-sefer, was, however, instituted at a later time, first by Simeon ben Shefat, about 100 B.C. at Jerusalem (Yer. Ket. viii. 32c), and later introduced generally, for the benefit of all children, by Joshua b. Gamla in the first century (B. B. 21a; see EDUCATION). The Haggadah reflects a later mode of life when speaking of a bet ha-midrash of Shem and Eber which was attended by Isaac, occasionally also by Rebekah, and regularly by Jacob (Targ. Yer. to Gen. xxii. 19, xxiv. 62, xxv. 22; Gen. R. lxiii.; Tanna debe Eliyahu R. v.); of that of Jacob at Sukkot, which Joseph frequented (Targ. Yer. to Gen. xxxiii. 17, xxxvii. 2; Num. xxiv. 5); of that which Judah was sent to build for Jacob in Egypt (Gen. R. xcv.; Tan., Wayigash, xi.); or of that of Moses, where Moses and Aaron and his sons taught the Law (Targ. Yer. to Ex. xxxix. 33; compare Num. R. xxi.: "Joshua arranged the chairs for the scholars attending the bet wa'ad of Moses"). Similarly the prophet Samuel had his "bet ulphana" (Aramaic for "bet ha-midrash") in Ramah (Targ. to I Sam. xix. 19). Solomon built synagogues and schoolhouses (Ecl. R. ii. 4). King Hezekiah furnished the oil for lamps to burn in the synagogues and schools, and threatened to have killed by the sword any one who would not study the Law; so that soon there was no 'AM HA-AREZ to be found in the land, nor a child or woman unfamiliar with all the precepts on Levitical purity (Sanh. 94b). Especially those of the tribe of Issachar devoted their time to the study of the Law in the bet ha-midrash, Zebulun the merchant furnishing them the means of support (I Chron. xii. 33; Deut. xxxiii. 18; Gen. R. lii., xcix.; Targ. Yer. *l.c.*).

Jethro was promised that his descendants would never see the schoolhouses (batte ha-midrashot) disappear from among them (Tanna debe Eliyahu R. v.; compare Mek., Yitro, 'Amalek, 2).

In Mishnaic times (Shab. xvi. 1) it appears that public discourses were held in the bet ha-midrash; but Targ. Yer. on Judges v. 9 indicates that it was used later for the study of the Law, and the popular discourses were delivered at the synagogue.

The first bet ha-midrash of which there is authentic record is the one in which Shemaiah (Sameas) and Abtalion (Pollion) taught, and which

**Earliest** Hillel, when a youth, could attend only **Forms.** after having paid admission-fee to the janitor (Yoma 35b). Whether or not this charge of a fee, so contradictory to the maxim of the men of the Great Synagogue (Abot i. 1), "Raise

many disciples," was a political measure of the time, it seemingly stands in connection with a principle pronounced by the Shammaites (Ab. R. N., I, iii.; B, iv., ed. Schechter, p. 14), that "only those who are wise, humble, and of goodly, well-to-do parentage should be taught the Law." On the other hand, the Hillelites insisted that "all, without exception, should partake of the privilege, inasmuch as many transgressors in Israel, when brought nigh to the Law, brought forth righteous, pious, and perfect men." Against the Hillelite principle, R. Gamaliel wanted to exclude all those who had not stood the test of inner fitness. He was outvoted, with the result that 400 (or, according to some authorities, 700) chairs were necessarily added in order to seat the newcomers (Ber. 28a). The customary seating of the pupils on chairs marks an improvement, and this new feature gave to the schoolhouse the name "yeshibah" (Abot ii. 7) or "metibta" (B. M., 85a, b).

The bet ha-midrash of Jabneh was called "vineyard," either because it stood in a vineyard (Schürer, "Gesch." 3d ed., ii. 325, note 49) or, as rabbinical tradition asserts, because it was built in semicircular shape, thus resembling a vineyard (Ket. iv. 6; 'Eduy. ii. 4; Yer. Ber. iv. 7d). At all events the name "vineyard" became the usual appellation for the bet ha-midrash; hence Song of Songs vii. 13 (A. V. 12), "Let us get up early to the vineyards," was applied to the bet ha-midrash ('Er. 21b).

It is frequently recommended as highly meritorious to be one of the first to come to the bet ha-midrash and the last to leave (Shab. 127a; Git. 7a; Meg. 15b; Suk. 28a; Sanh. 3b).

It was believed to bring misfortune to sit at meals during the time that the discourse was being held in the bet ha-midrash (Git. 38b). It was forbidden to sleep in the bet ha-midrash.

**Rules of** (Tanna debe Eliyahu R. xiii., xiv.). **the Bet ha-** In Babylonia, where scholars spent **Midrash.** their whole time in the school, exception was made to this rule (Ber.

25a; Meg. 28a). Mothers won special merit by training their children to go to the bet ha-sefer, and wives by waiting for the return of their husbands from the bet ha-midrash (Ber. 17a). Every session at the bet ha-midrash was expected to offer some new idea to the student; hence the frequent question: "What new thing was offered at the bet ha-midrash to-day?" (Tosef., Soṭah, vii. 9; Hag. 3a; Yer. Git. v. 47d; and elsewhere). The bet ha-midrash ranks higher than the syna-

**Im-**gogue; consequently a synagogue **portance of** may be transformed into a bet ha- **the Bet ha-** midrash; but the latter can not be **Midrash.** changed into a house of worship (Meg. 26b, 27a). "He who goeth from the

synagogue to the bet ha-midrash—that is, from the divine service to the study of the Law—will be privileged to greet the majesty of God; for so says Ps. lxxxiv. 8 [A. V. 7]. "They go from strength to strength, every one of them appeareth before God in Zion" (Ber. 64a). To the bet ha-keneset (synagogue) and the bet ha-midrash in Babylonia are referred the words of Ezek. xi. 16, Hebr.: "I will be to them as a little sanctuary in the countries where they

shall come" (Meg. 29a). The Haggadah finds allusions to the bet ha-midrash in Ps. xc. 1: "Thou hast been our dwelling-place in all generations"; and Ps. lxxxvii. 1, Hebr.: "God standeth in the midst of the congregation of [those who seek] God" (*ib.*; Gen. R. xlviii.); and also in Balaam's words (Num. xxiv. 5): "How lovely are thy tents, O Jacob, thy tabernacles, O Israel" (Targ. Yer. to Num. *l.c.*; Sanh. 105b); likewise in Cant. viii. 10: "I am a wall and my breasts like towers" (Pes. 87a), and Cant. ii. 8, 9, refer to the synagogue and the schoolhouse: "The voice of my beloved! behold he cometh leaping . . . ; my beloved is like a roe," meaning that God proceeds from one synagogue to the other, and from one bet ha-midrash to the other, to bless Israel (Pesik. v. 48b).

God also has His bet ha-midrash in heaven, and teaches the Law to the righteous (Tanna debe Eliyahu R. i., iii., iv., v., viii., ix.); it is called the "upper yeshibah" or "metibta" (B. M. 86a; Ber. 18b; Ta'anit 21b). "He who accustoms himself to go to the bet ha-keneset and bet ha-midrash in this world shall also be admitted into the bet ha-keneset and bet ha-midrash of the world to come" (Joshua b. Levi, in Deut. R. vii.; Midr. Teh. to Ps. lxxxiv. 5 [A. V. 4]).

The name "bet ha-midrash" recurs in the Arabic "madrash," for school; and Jews under the influence of Arabic life called the bet ha-midrash also midrash (Güdemann, "Gesch. des Erziehungswesens und der Kultur der Juden in Frankreich und Deutschland," i. 92 *et seq.*, 265; "Quellenschriften zur Gesch. des Unterrichts," p. 99). A systematic plan of education of the thirteenth century, published and translated by Güdemann, *l.c.*, proposes to impose on each member of a congregation in the whole country or district the old half-shekel tax for the maintenance of the great bet ha-midrash or high school to be built in the capital near the synagogue, and for primary schools to be in each town, where the disciples, together with the teachers, should live during the week, separated from their parents and removed from all contact with the outside world. During the Middle Ages the bet ha-midrash was open day and night for both public discourses and private studies. It contained usually a large library for the use of the students, and became an attractive center and meeting-place also for scholars of other cities. Inevitably this privilege was frequently abused, and the bet ha-midrash often became the resort of idlers and poor homeless strangers who spent their time in gossip rather than in study. The official name given by non-Jews to the bet ha-midrash in Nuremberg (1406) is "Judenschule" (see Güdemann, "Gesch. d. Erziehungswesens und der Kultur d. Abendl. Juden," p. 67, note 10). Whether the same name, "Judenschule," for the synagogue, given to it by the Christian population (Güdemann, *l.c.* p. 94, note 2), originated from the use of the bet ha-midrash also as a place of worship by the students, customary as early as Talmudical times (Ber. 8a), or from other causes, the proverbial "noise of the Judenschule" seems to refer to the lively discussions which took place in the bet ha-midrash (though at times the synagogue

was used also for learned disputations), and not to any disorder in connection with the divine service.

The number of hearers or disciples at the bet ha-midrash was not limited as was the case in the **HEDER**, or primary school (Abrahams, "Jewish Life in the Middle Ages," p. 349). The rabbis or ordained teachers, as a rule engaged by the community to take charge of the studies in the bet ha-midrash, often dwelt in the same house; thus in Germany where the bet ha-midrash received the Latin name *Clausa* (Claus = cloister), also called "Claus Rabbis" or "Clausner." The synagogue and bet ha-midrash were often in the same building or adjoining each other. For the course of studies and other regulations concerning the bet ha-midrash, see the articles **EDUCATION AND TEACHER**; also **ACADEMIES**, **BAHUR**, **HEDER**, and **YESHIBAH**.

K.

**BET-TALMUD:** Hebrew monthly review, devoted to Talmudical and rabbinical studies and literature; founded in 1881 by Isaac Hirsch Weiss and Meir Friedmann, at Vienna, and published by the former until its discontinuance in 1886.

Besides the editors, among the contributors to this monthly were such scholars as Buber, Brüll, A. Epstein, Güdemann, Reifmann, Schechter, and many others prominent in the domain of Jewish learning. Some of the articles published in "Bet-Talmud" were also printed separately.

L. G.

I. BR.

**BETERA, BENE.** See **BATHYRA**.

**BETH-ANATH:** A Canaanite city in the territory of Naphtali, the name of which contains, as one of its elements, the name of a god, **ANATH**. Though the Israelites did not succeed in conquering this city, the Canaanitish inhabitants became tributary to them (Josh. xix. 38; Judges i. 33). The city is mentioned several times in Egyptian inscriptions (W. Max Müller, "Asien und Europa," pp. 195, 220). The exact location can not be definitely ascertained. It is generally supposed to be on the site of the present village 'Ainitha, in a fertile valley southeast of Tibnin in Galilee; but it is doubtful whether an impregnable fortress could have stood there. Since Rameses II. speaks of a mountain Beth-anath, W. Max Müller holds that the city itself lay in the valley.

J. JR.

F. BU.

**BETH-ANOTH:** City in the hills of Judah (Josh. xv. 59). It has been identified by both Conder and Buhl ("Geographie," p. 158) with the modern Beth Ainän.

J. JR.

G. B. L.

**BETH-ARABAH** ("house of Arabah"): A town situated, according to Josh. xv. 61, in the wilderness of Judah. It was a border-town between Judah and Benjamin, and hence is credited to the former (Josh. *ib.*); while in Josh. xviii. 22 it is enu-

merated among the towns of Benjamin. Lying to the south of Beth-hoglah in the Jericho plain, indications point to its identification with the modern 'Ain al-Feshkha, as proposed by the late Robertson Smith. In Josh. xviii. 18 the name is given as "Arabah."

J. JR.

G. B. L.

**BETH-ARAM** (Josh. xiii. 27) or **BETH-HARAN** (Num. xxxii. 36): A city east of the Jordan. The Talmud speaks of it as "Bethramta" (בֵּית־רַמְתָּא); Eusebius as "Bethrampta"; and Josephus as "Betharamatha." Herod the Great built a palace there which was destroyed after his death. The city was rebuilt by Herod Antipater and called "Julias," in honor of the wife of Augustus. As the original name of the empress was Livia, Eusebius and others called the town "Livias." The site is indicated by the ruins on the hill Tell-er-Rameh, in a fertile part of the Jordan.

J. JR.

F. Bt.

**BETH-ARBEL**: Mentioned only once (Hosea x. 14) as a city destroyed by Shalman. Opinions vary both as to the location of the place and as to the identification of Shalman. The most probable location is that of the modern Irbid on the east side of the Jordan (G. A. Smith, "Historical Geography of the Holy Land"). As for Shalman, Schrader ("K. A. T.," ii. 440-442) says he is a Moabite king, Shalamanu. Conder favors Shalmaneser III.; Wellhausen ("Kleine Propheten") and Nowack (Commentary) Shalmaneser IV. A solution may be found in the Septuagint reading, "Beth-Jeroboam" for "Beth-arbel" and "Shallum" for "Shalman." The passage would then refer to the destruction of the house of Jeroboam by Shallum (II Kings xv. 10).

J. JR.

G. B. L.

**BETH-AVEN**: A city on the border of Benjamin in the wilderness (Josh. xviii. 12), east of Bethel (Josh. vii. 2) and west of Michmash (I Sam. xiii. 5). It was the scene of a battle between Saul and the Philistines, in which the latter were defeated (I Sam. xiv. 23).

In Hosea iv. 15, v. 8, x. 5, Beth-aven is probably a disguise for Beth-el, particularly in x. 5, where calves of Beth-aven as objects of idolatry are mentioned.

J. JR.

G. B. L.

**BETH-AZMAVETH**. See AZMAVETH.

**BETH-DAGON**: The name of several places apparently in ancient Palestine. The second element is the name of the Philistine god Dagon. In the Old Testament mention is made of a city called "Beth-dagon," allotted to the tribe of Judah (Josh. xv. 41; compare Tosef., Oh. iii. 9); and within the territory of the tribe of Asher there was also a Beth-dagon (Josh. xix. 27; compare Tosef., Sheb. vii. 13). Sennacherib also mentions a Bit-daganna on his inscriptions (see Schrader, "K. B." ii. 92; Delitzsch, "Wo Lag das Paradies?" p. 289) which appears to be a third distinct locality. Beth-dagon occurs at the present day as the name of various places in Palestine; but it is doubtful whether any ancient cities can be associated with them. The Beth-dagon southeast of Jaffa is probably too far north for the Judean city mentioned in Josh.

xv. 41; the Beth-dagon in the district of Acre, mentioned by Scholz, answers the required conditions.

**BETH-DIBLATHAIM**: City of Moab (Jer. xlvi. 22) identical with ALMON DIBLATHAIM.

J. JR.

G. B. L.

**BETH-EL**: A city famous for its shrine, on the boundary between Ephraim and Judea—the site of the present little village of Bēitin, on the southern slope of the Ephraimitic mountains. (See illustration on page 120.) Originally the town was called Luz (Gen. xxviii. 19); but this name was displaced by that of the shrine, Beth-el ("house of God"). According to Gen. xii. 8, Abram erected an altar east of Beth-el; but the erection of the shrine—that is, of the holy stone—is ascribed to Jacob (Gen. xxviii. 18; compare Gen. xxxv. 6, 14). Since in these narratives (Gen. xxviii. 19, xxxv. 7) Beth-el, "the holy place," is distinguished from the city Luz, the shrine must have been outside the city. A suitable place would be the hill to the east of Bēitin, where now are the ruins of a small fort. But Schlatter ("Zur Topographie Palästina's," pp. 236 *et seq.*), who thinks that the name Beth-aven in the Old Testament (Hosea iv. 15 *et seq.*) is merely a sarcastic disguise of "Beth-el" (so also the Talmud; Neubauer, "G. T." p. 155), concludes from Josh. vii. 2 (compare Gen. xii. 8) that the shrine must be sought somewhat more to the east at Deir Diwān. The statement in the text of Josh. vii. 2, and Josh. xvi. 3, also, which places Beth-el, together with Luz, on the boundary-line of Ephraim, can not, for textual reasons (compare the Septuagint reading), be taken as a conclusive proof that the shrine was at a great distance from the city. According to Judges xx. 18, 26 *et seq.*, the shrine was of great importance in the days of the Judges; still more so after the division of the kingdoms, when Jeroboam made it the chief Ephraimitic shrine (I Kings xii. 29 *et seq.*; compare II Kings x. 29), "the king's chapel," as it is called in Amos vii. 13. At the time of Elisha there was a community of prophets at Beth-el (II Kings ii. 3). The oldest prophets name Beth-el as one of the centers of degenerate Israelite cult (Amos iii. 14, iv. 4, v. 5; compare Hosea iv. 15, v. 8, x. 5). Amos came into the city at a great feast, and raised a storm of indignation among the priesthood and the people by his merciless condemnation of Israel (Amos vii. 10 *et seq.*).

Even after the conquest of Ephraim the shrine of Beth-el retained its importance (II Kings xvii. 28). When Josiah took possession of this old part of the Ephraimitic dominions he uprooted the illegitimate cult (II Kings xxiii. 15). After the Exile, Beth-el belonged to Judea (Ezra ii. 28). At the time of the Maccabees it is sometimes named as the seat of Syrian garrisons (I Macc. ix. 50). Otherwise, the place is only mentioned by the first Christian topographer, the Pilgrim of Bordeaux, and by Eusebius, as a small country town. In Lam. R. ii. 3 it is stated that Hadrian placed a guard at Beth-el to capture Jewish fugitives.

F. Bt.

**BETH-EMEK**: A town on the border between Asher and Zebulun, belonging to the latter (Josh. xix. 27). It lay to the east of Acco; but its exact location has not been determined.

J. JR.

G. B. L.

**BETH GUBRIN**: Name of a city mentioned in the Talmud and in the Midrash (Neubauer, "G. T." pp. 122 *et seq.*), called "Betogaboa" by Ptolemy and others. It does not occur in the Old Testament; but Reland shows that it was one of the Idumean forts captured by Vespasian (Josephus, "B. J." iv. 8, § 1). It was also called "Eleutheropolis," under

coincides with the so-called "Mount of the Franks" (Jebel Furêdis), a high peak south of Jerusalem. But since it was on this hill that Herod the Great built a fort called "Herodion," it could hardly have become a mere village in the days of Jerome. If the statement of Jerome be true (and there is no sufficient reason to doubt it), Beth-haccerem can not be the 'Ain Karim, west of Jerusalem, as Cheyne ("Eneye. Bibl." i. 556) has it. This latter is rather to be identified with the "Kerem" mentioned in the Septuagint to Josh. xv. 59. However, the village Beth-Kerem, which, according to the Mishnah (Niddah ii. 7), had a reddish color, may be identical with the Biblical Beth-haccerem.

J. JR.

F. Bt.

VIEW OF BETH-EL.  
(From a photograph by Bouffé.)

which name it is often mentioned by Eusebius. In his time it was the capital of the province within which it lay. The site of the ancient city is determined by the present village Bêt Gibrûn in southwestern Judea, that contains some ruins. In the vicinity are many natural caves, artificially enlarged; hence it is thought that the name "Eleutheropolis," that is, "free city," arose through a confusion between "hor" (cave) and "hor" (free). The original name, which was not supplanted by the Greek form, is found in even the oldest Mohammedan writers.

J. JR.

F. Bt.

**BETH-HACCEREM**: According to Neh. iii. 14, a Judean city; described in Jer. vi. 1 as a high place visible at a great distance. Jerome (on the passage) speaks of Beth-haccerem as a village still existing on the road between Jerusalem and Tekoa. This

**BETH-HILLEL, DAVID DE**: Beni-Israel; author of a book of "Travels," Madras, 1832, the first work by a Jew published in India. He describes his travels through India, but is otherwise of little importance.

**BIBLIOGRAPHY**: *Catalogue of Anglo-Jewish Exhibition*, No. 939.

J.

**BETH-HORON**: Name of two villages at the western end of the Ephraimite mountains, called respectively "upper Beth-horon" (Josh. xvi. 5) and "nether Beth-horon" (Josh. xvi. 3, xviii. 13; 1 Kings ix. 17). They are nowadays spoken of as the two villages "Bet 'ûr et-Tahta" (the lower) and "Bet 'ûr el-Foka" (the upper). They were situated on an old road leading from Gideon to the plain on the coast; this is mentioned in the Old Testament as a difficult and steep road between the villages of

Beth-horon (Josh. x. 10; ἡ ἀνάβασις Βαθωρόν, I. Macc. iii. 16), or Morad Beth-horon (Josh. x. 11; ἐν τῇ καταβάσει Βαθωρόν, I. Macc. iii. 24). In ancient times the road was the principal highway between the mountains and the plain. Here the Canaanites fled from Joshua (Josh. x. 10 *et seq.*); and by this road the Egyptian king Shishak probably invaded the country, since Beth-horon is mentioned in the inscription relating his victory (W. Max Müller, "Asien und Europa," p. 166). It was for strategic reasons that Solomon fortified the lower Beth-horon. In Grecian times the Syrian general Seron attempted to force an entrance by Beth-horon into the country, but was repulsed by Judas Maccabeus (I Macc. iii. 13 *et seq.*). Nicanor afterward met with the same fate (I Macc. vii. 39 *et seq.*). When Bacchides became master of the Jewish country he strongly fortified this important point. It is again mentioned when the Romans under Cassius sustained heavy losses there (Josephus, "B. J." ii. 19, § 8). It may also be gathered from the Old Testament that these two villages were built by the daughter of Ephraim (I Chron. vii. 24), and that Sanballat, the adversary of Nehemiah, came from there (Neh. ii. 10, 19; xiii. 28). For the form "Horóni" compare Ὠρονί; *i. e.*, "Horonaim" in Septuagint of Josh. ix. 10 and 11; Sam. xiii. 24. Several of the Talmudic scholars came from Beth-horon (Neubauer, "G. T." p. 154).

J. JR.

F. BU.

**BETH-JAAZEK:** According to the Mishnah (R. H. ii. 4), a large court in which the Sanhedrin awaited the announcement of the new moon. The Palestinian Talmud ascribes its name to the fact that the calculation of the calendar was settled (פּוּר) there.

J. JR.

F. BU.

**BETH-JESHIMOTH:** Town in the district east of the Jordan, allotted to the tribe of Reuben according to Num. xxxiii. 49 and Josh. xii. 3, xiii. 20; but in Ezek. xxv. 9 it is mentioned as a Moabitish city. Josephus calls the city "Besimoth" ("B. J." iv. 7, § 6). Eusebius speaks of it as "Bethsimuth," and states that it was situated on the Dead Sea, 10 Roman miles southeast of Jericho. Its exact site is said to have been on a sandy hill southwest of Beth-haran. From this it appears that the Talmudic assertion that Beth-jeshimoth is 12 miles distant from Abel-shittim is not correct (Neubauer, "G. T." p. 251).

F. BU.

**BETH HA-KENESETH.** See SYNAGOGUE.

**BETH-LEHEM-JUDAH** (I Sam. xvii. 12; Judges xvii. 7, xix. 1): The modern Bait Lahm, situated about 5 miles south of Jerusalem, some 15 minutes' walk east of the road to Hebron, on a range of hills surrounded by fertile and beautiful valleys. The city was also called "Ephrath" (Josh. xv. 60, LXX.; Micah v. 1 [A. V. 2]; Ruth i. 2, iv. 11; but hardly Gen. xxxv. 16, 19; xlviii. 7). In I Chron. ii. 50 *et seq.*, iv. 4, Ephrath is the wife of Caleb from whom Beth-lehem descended. Beth-lehem is mentioned among the cities of Judah in Josh. xv. 60, in a passage which is missing in the Hebrew text, but which has been preserved in the Septuagint.

In the epic stories of the Book of Judges neither Beth-lehem nor any other city of Judah is mentioned.

In the additions to this book it is named as the home of the Levite who migrated to Ephraim (Judges xvii. 7). Beth-lehem is also the scene of the idyl of Ruth. It was through David, whose family lived at Beth-lehem, that the little country town achieved an unexpected fame. The characteristic story told in II Sam. xxiii. 13 *et seq.* shows how much David was attached to his native city. But he did not remain there. He chose a larger capital, and thus Beth-lehem could continue undisturbed in its quiet ways. According to II Chron. xi. 6, the town was fortified by Rehoboam. Micah (v. 1) predicted that Beth-lehem, Ephrath or (omitting "lehem") Beth Ephrath would be the birthplace of a new Messianic David.

Nothing further is found in the Old Testament concerning this country town, that was probably nothing more than an insignificant village, except that a number of its citizens returned to Judah after the Exile (Ezra ii. 21). It is not mentioned in the Book of Maccabees, nor in post-Biblical times by Josephus. But it became of world-historic importance as the traditional birthplace of Jesus, and as such is still the goal of pious pilgrimages. Hadrian built here a shrine to Adonis, in order to irritate the Christians; this shows how important the town had become to the Christian world. As early as the second century a stable in one of the grottoes close by the town was pointed out as the birthplace of Jesus (Justin Martyr, "Dial. cum Tryph." pp. 70, 78). Constantine built a splendid basilica in Beth-lehem, substantially the same church which is still admired by modern travelers. Below the church is the grotto regarded as the birthplace of Jesus. Jerome occupied a grotto near by when translating the Bible. During the Crusades Beth-lehem suffered greatly from Mohammedan violence. To-day it is a flourishing town, inhabited only by Christians.

F. BU.

**BETH-PEOR:** A place in the valley of the Jordan which, in Josh. xiii. 20, is apportioned to the Reubenites. In Deuteronomy (iii. 29, iv. 46, xxxiv. 6) it is stated that the people were in the valley of the Jordan, opposite Beth-peor, when the Deuteronomic law was promulgated. Hosea (ix. 10) probably means the same place when he speaks of Baal-peor. According to Eusebius ("Onomastica," ed. Lagarde, ccxxxiii. 78; ecc. 2), the city was situated 6 Roman miles from Livias (or Beth-haran) near Mount Peor (compare Num. xxiii. 28). According to another statement of Eusebius ("Onomastica," ccxiii. 47), this mountain lay on the road from Livias to Heshbon; and according to Jerome (*ib.* cxv. 1), it was 7 miles distant from the latter. But no place corresponding to these descriptions has as yet been found. The references to Beth-peor in the Talmud, collected by Neubauer, "G. T." pp. 252, 253, prove that the place survived the destruction of the Second Temple.

J. JR.

F. BU.

**BETH-REHOB** or **REHOB:** An Aramaic city which sent reinforcements to the Ammonites during the war with David (II Sam. x. 6, 8; compare

I Sam. 14, 47, LXX.). According to Judges xviii, 28, the city of Dan was built in the plain of Beth-rehob. The latter is also mentioned as the northern frontier place of Palestine (Num. xiii, 21). Robinson tried to identify Beth-rehob with the fort Ilunên along the western border of the upper Jordan valley; but judging from the statements in the Old Testament, it must be a place east of the Jordan. It is possible that Beth-rehob is the ancient name of Banias, assuming that this place is not to be identified with Hasar Enan (compare BAAL-GAD).

J. JR.

F. Br.

**BETH-SHAN.** See BETH-SHEAN.

**BETH-SHEAN** or **BETH-SHAN**: Fortified town of Canaan. The Baisân of to-day, in the lower part of the Jalûd chasm, 120 meters below the level of the sea. The Israelites did not succeed in conquering this city, which was strongly fortified by nature (Josh. xvii, 16; Judges i, 27). Whether it was conquered by the Philistines or whether the Canaanites opened their city to them is not clear from the stories of I Sam. xxxi, 10 and II Sam. xxi, 12. But like all the other cities that had not been vanquished, Beth-shean had fallen into the hands of the Israelites by the time of Solomon (I Kings iv, 12). In Greek times it was Hellenized and named Skythopolis (Judges i, 27, LXX.; II Macc. xii, 29; Judith iii, 10; Josephus, and elsewhere). But the Hebrew name is used not only in I Macc. v, 52, xii, 40 *et seq.*, but also in the Talmud (see Neubauer, "G. T." pp. 174 *et seq.*), and has entirely supplanted the Greek name. At the time of Hircanus the city again fell into the hands of the Jews, but became free under Pompey and belonged to the league DEKAPOLIS. During the war for independence Beth-shean was taken by the Jews, but it was soon recaptured by the pagans, who took bloody vengeance on the Jews. Interesting ruins of temples, bridges, a theater, etc., bear witness to the flourishing condition of the city in Græco-Roman times. The Talmud speaks of the fertile surroundings of this town, and of the strictness with which the Jews living there fulfilled the Law (Neubauer, "G. T." *ib.*). The forms Beth-shean and Beth-shan rest upon slightly variant spellings of the Hebrew form, "shan" representing a natural contraction of "shean."

J. JR.

F. Br.

**BETH-SHE'ARIM**: According to rabbinic accounts, the Sanhedrin was destined to pass through ten exiles during the period 30-170, and to be compelled to wander from place to place. One of its stations was to be the city of Beth-she'arim, in which R. Judah I. resided for a long time (R. H. 31b; Sanh. 32b; Ket. 103b). As the next place of sojourn was Sepphoris, Beth-she'arim is identified with El-Shajerah (Al-Shajarah), south of Sepphoris (Neubauer, "G. T." p. 200). From the etymology of the name, תערה=שער, Schwarz ("Das Heilige Land," p. 138) identifies it with the modern village Turan at the Jebel Turan northeast of Sepphoris (Fischer and Guthe's Map of Palestine, c. 3).

According to Tosef., Ter. vii, 14, Johanan b. Nuri also dwelt in Beth-she'arim; and, as the same place is called בית שרי in Yer. Ter. viii, 46a, the two names

must be identical. The latter name of the place is used also in Yer. Kil. ix, 32b and Yer. Ket. xii, 35a; thither was conveyed the coffin of R. Judah I., who died in Sepphoris. בית שרי is also mentioned as a place of burial in Yer. M. K. iii, 82c. Certain texts of the latter, however, substitute Bet-biri in the neighborhood of Caesarea.

**BETH-SHEMESH (IR-SHEMESH** in Josh. xix, 41).—**Biblical Data:** A city of the hill-country between Judea and the coast on the southern side of Wadi Sarâr, called to-day 'Ain Shems. According to Josh. xix, 41, it was one of the cities of Dan, and according to Josh. xv, 10, it was on the boundary-line of Judea. In Josh. xxi, 16 it is named as a Levitic city. The Ark of the Covenant of YHWH remained here for a time after it had been released by the Philistines (I Sam. vi, 9 *et seq.*). At the time of Solomon, Beth-shemesh was the seat of one of the royal officers (I Kings iv, 9). Later on Amaziah, king of Judea, incurred a serious defeat there. Under Ahaz, Beth-shemesh was conquered by the Philistines (II Chron. xxviii, 18). Nothing further is heard of the town, although it still existed at the time of Eusebius. Another Beth-shemesh was situated in the territory of the children of Naphtali (Josh. xix, 38; Judges i, 33). There seems to have been still another Beth-shemesh, mentioned in Josh. xix, 22. Neither of these latter two has been identified. The Beth-shemesh of Jer. xliii, is generally supposed to be the Egyptian Heliopolis, which is called Ox in the Old Testament. On account of this discrepancy Winckler ("Alttest. Untersuchungen," p. 180) would strike out Beth, and translate shemesh "pillars of the sun."

J. JR.

F. Br.

—**In Rabbinical Literature:** Various explanations are offered for the disaster which, according to the Masoretic text, befell fifty thousand people in the very moment of their rejoicing over the return of the Holy Ark (I Sam. vi, 19). Josephus explains ("Ant." vi, 1, § 4) that they sinned in presuming, not being priests, to lay their hands upon the Ark of the Law. The Talmud affirms that the inhabitants of Beth-shemesh were irreverent, greeting the appearance of the Ark with the cry, "Who angered thee that thou wert wroth, and who then hath appeased thee that thou art kindly disposed toward us?" Another account is that these people perished because they were so sordid as not to pause in their work in the fields at the appearance of the Ark.

The somewhat curious wording of the passage (I Sam. l.c.), "He smote of the people seventy men, fifty thousand men" ("and" does not appear in the Hebrew text), is explained by rabbinical authorities as indicating that this enumeration refers to two classes of people: the learned, whose number seventy represents the Sanhedrin, and the ordinary people, represented by the larger number. Other exponents, no doubt referring to the Septuagint reading which mentions only the seventy men, interpret this as meaning that only the members of the Sanhedrin perished, but that on account of their

prominence their loss was equal to the loss of fifty thousand of the plain people (Soṭah 35a, b; Yer. Sanh. ii. 20b; compare also the Targum and pseudo-Jerome, "Quæstiones," upon I Sam. vi. 19).

L. G.

**BETH-SHITTAH** ("place of acacia-trees"): A place near Abel-meholah. To it the Midianites fled when pursued by Gideon (Judges vii. 22). The name occurs only here; the place has not been identified.

J. JR.

G. B. L.

**BETH-ZUR**: A city in southern Judea (Josh. xv. 58; I Chron. ii. 45; Neh. iii. 16) which was fortified by Rehoboam (II Chron. xi. 7). It was a strongly walled place, situated on the eastern boundary-line of Judea. The town was repeatedly besieged during the time of the Maccabees (I Macc. iv. 28 *et seq.*, vi. 50, ix. 52, x. 14, xi. 65). Its situation is indicated by the ruins near a hill of Bêt-sur, or Burj-sur.

J. JR.

F. Bc.

**BETHABARA**: An unidentified place mentioned in John i. 28. According to Origen's reading, the name is brought into connection with the Hebrew "abarah" (crossing), and is supposed to refer to one of the many fords of the Jordan. Another reading is "Bethany" (*Bethavia*), but no place of this name east of the Jordan is known. Grove, Wilson, and Cheyne combine both readings into *Βηθαβάρα*—that is, "Beth-nimra" in the Jordan valley, northeast of the Dead Sea.

J. JR.

F. Bc.

**BETHANY** (*Bethavia*): A place referred to in the Gospels, and probably also in the Talmud, under the forms *בית חני*, *בית חני*, *בית חני*, and *בית חני*, but not mentioned in the Old Testament (Pes. 53a; Tosef., Shebi'it, ed. Zuckerman, 30, 71). According to John (xi. 18), it was "nigh unto Jerusalem, about fifteen furlongs off"; according to Jerome ("Onomasticon," ccviii.), "in secundo ab Ælia milliario" (at the second mile-post from Jerusalem). This is the site of the village El-Azariyeh on the southeastern slopes of the Mount of Olives. The identification is established by the name "El-Azariyah," which is the Arabic form for "Lazarium," as Bethany was sometimes called by the Christians. The village, with its olive-, fig-, almond-, and carob-trees, is a little oasis in that barren region. The figs (Hebr., "te'enah"), which are also mentioned in the Talmud, probably gave the place its name.

J. JR.

F. Bc.

**BETHAR**: City in Palestine, scene of the war of Bar Kokba (132-135), and mentioned as such in Mishnah Ta'anit iv. 6; Yer. Ta'anit 69a; Babil Ta'anit 26b, 29a; Lam. R. to chaps. ii. 2 and iv. 8; Yer. Ber. 3d; Tosef., Yeb. xiv. 8; Bab. Yeb. 122a; Sanh. 17b; R. H. 18b, as well as in many other passages in Talmud and Midrash. The name is written in various ways: usually *ביתר*, but in the Cambridge and Hamburg MSS. (Ta'anit iv. 6), *ביתרת*; so also in "Halakot Gedolot," ed. Hildesheimer, p. 189, and Sherira's "Letter," ed. Neubauer ("Medieval Jewish Chronicles," i. 4, MSS.); but *ib.* ii. 109, *בית תר*, the reading in Kohut, "Light of Shade," p. 41; *בית תר*, in Cant. R. to chap. ii. 17, but *בית תור*.

Neubauer, *ib.* i. 171. These sources indicate that Bethar was a town of importance as early as the time of the destruction of Jerusalem, and was, moreover, the seat of a Sanhedrin; its inhabitants, who frequently suffered at the hands of the Jerusalem pilgrims, are said to have rejoiced exceedingly over the fall of that city. Bar Kokba made Bethar the chief base of the uprising against the Romans; and upon its suppression, Bethar—within the walls of which large masses of Jews had sought refuge—was closely surrounded by the Romans under Julius Severus, and was besieged for two and a half years (132-135); see concluding part of Seder 'Olam R. compared with Yer. Ta'anit 69a, and Lam. R. ii. 2, according to which this period of time does not refer to the duration of the war, but to that of the siege of Bethar; the war itself, according to Jerome (on Dan. i. 9, end), lasting three years and six months. During the war Bethar afforded shelter to an enormous population, which fact gave rise to exaggerated rabbinical accounts that Bethar had several hundred schools for children, and that the school youth boastingly declared that they could overthrow the enemy with their pen-reeds. When the stream, Yoredet ha-Zalman, ran dry in summer, the city began to suffer from want of water. The Samaritan Book of Joshua (ed. Juynboll, xlvii.) relates that the provisions, which were secretly conveyed to the town, suddenly, as if by miracle, ceased to be supplied. It is said that there were two subterranean passages leading from the city to Jericho and Lydda; that the Jews made use of them for the transportation of provisions; and that the Samaritans betrayed this secret to the Romans and thus brought about the fall of Bethar. Rabbinic sources (Yer. Ta'anit 68d; Lam. R. to chap. ii. 2) also speak of a Samaritan's treachery that, furthermore, caused the death of the pious R. Eleazar of Modin. Hence it may be concluded that Bethar was situated close to the Samaritan territory, and that the story of the underground passages to Jericho and Lydda can not be credited, for they are plainly features of the siege of Jerusalem, transferred to Bethar. Neubauer is therefore incorrect in locating Bethar in the vicinity of Beth-shemesb, basing his opinion on the *Βαθάρ* of the Septuagint on II Sam. xv. 24; for this place is not found in the Masoretic text, and thus no light is conveyed from that source as to its locality. Eusebius ("Hist. Eccl." iv. 6) calls the city *Βιθθηρα* (variant *Βεθηρα*, *Βηθηρα*)—which agrees with the above-cited spelling, *ביתרת*; and he states that Bethar lay in the vicinity of Jerusalem. On this account Schürer and others (Ritter, Tobler, Derenbourg, Renan) identify Bethar with the modern Bittir, which is situated at a distance of three hours southwest from Jerusalem and contains the remains of an old fortification on a steep neck of land. The *Βηθάρης* of Josephus ("B. J." iv. 8, § 1) is said to be different from this Bittir. If, however, Bethar had been situated near Jerusalem, it is inconceivable that Jerusalem should have taken no part in the war. Grätz ("Gesch. der Juden," 3d ed., iv. 144), on the other hand, declares the statement of Eusebius to be erroneous and locates Bethar north of Antipatris, four Roman miles south of Cæsarea. This would put Bethar in the neighborhood of Samaria.

Lebrecht (in "Magazin für die Wissensch. des Judenthums," iii. 1876) also places Bethar in this region—that is to say, at a great distance northward from Jerusalem—and endeavors to prove that Bethar is identical with the Roman Castra Vetera of Sephoria; with **בֵּיתָר** was said to be the equivalent of "Vetera" (compare Hoffmann, "Magazin," 1878, p. 188). This view is followed by Kohut, Fürst, and Krauss in their Talmudic dictionaries. Nevertheless, the site of Bethar must still be considered doubtful. From the Talmud it can be determined only that the town was situated near the sea (Git. 57a; compare Yer. Ta'anit 69a), for the blood of those killed is said to have flowed into the sea. Bethar was destroyed on the same day as Jerusalem, on the Ninth of Ab (Ta'anit iv, 6; compare Jerome on Zech. viii., where instead of "Bethel" read "Bethar"); the killed (**הַרְגוּ בֵּיתָר**) were left to decay in the open field; and only after the hatred of war had abated was it made possible to give them burial.

**BIBLIOGRAPHY:** Herzfeld, in *Monatsschrift*, 1856, p. 105; Lebrecht, *Die Stadt Bethar, ein 15-hundertjähriges Mysterium*, in *Magazin*, iii. 27 *et seq.*, also as a separate pamphlet, Berlin, 1877; Neubauer, *Geographie du Talmud*, pp. 103-114; Schäfer, *Gesch.*, 3d ed., I. 383 *et seq.*; Grätz, *Gesch. der Juden*, iv., 3d ed., p. 144; Bäderer, *Palästina und Syrien*, 5th ed., p. 16.

S. KR.

[In favor of the identification with Bittir, however, it might be mentioned that in 1874 Clermont-Ganneau discovered there a Latin inscription mentioning detachments of the fifth (Macedonica) and the tenth (Claudia) legions, the very ones which had been called from the Danube to put down the revolt of Bar Kokba. A Roman garrison was left at Bittir just because of its strategic importance. See Clermont-Ganneau, in "Académie des Inscriptions, Comptes Rendus," 1894, pp. 149 *et seq.*; Hanauer, in "Pal. Explor. Fund, Quart. Statements," 1894, p. 149; Buhl, "Geogr. des Alten Palästina," p. 165; Cheyne, in "Encyc. Bibl." i. 555.—G.]

**BETHEL**, or **DE SYNAGOGA** (**בֵּית בֵּיתָר**, "of the house of God"): An Italian-Jewish family, several members of which are known as liturgical poets and copyists. According to a family tradition, it was one of the four prominent Jewish families deported by Titus to Rome after the destruction of the Temple. The name "Bethel," however, seems to be derived from Casadio (= house of God, "beth-el"), probably their place of origin.

Traces of this family are found as early as the twelfth century. By the middle of the fifteenth century the name had almost disappeared, and the family had assumed the name of ANAW, of which family the Bethelides had always been a branch.

The following members are best known to fame:

**Ismael ben Moses Bethel:** Physician; lived in the middle of the sixteenth century.

**Jehiel ben Matithiah Bethel:** Physician; lived at Pisa in the fourteenth century (compare "He-Ḥaluz," ix., part 2, p. 50).

**Jekuthiel Bethel:** Son of the preceding; copyist; lived at Rome at the beginning of the fifteenth century. The library of Parma possesses a "Maḥzor" written by him for Nathaniel ben Abraham (see Steinschneider, "Hebr. Bibl." vii. 115).

**Joab b. Benjamin Bethel:** Liturgical poet; lived at Rome at the end of the fourteenth century and the beginning of the fifteenth. He was the author of a "Qaddish" in 8 strophes (compare Zunz, "Literaturgeschichte," p. 490; Landshut, "Amude ha-Abodah," p. 80). He is mentioned by Rieti in his "Paradiso," p. 105.

**Joab ben Nadan ben Daniel Bethel:** Liturgical poet; lived at Rome in the fourteenth century. He was the author of a "Reshut" on "Nishmat" for the Feast of Pentecost (compare Luzzatto, "Mebo," p. 23).

**BIBLIOGRAPHY:** Zunz, *Gesammelte Schriften*, iii. 167 *et seq.*; Mortara, *Indice Alfabatico*, p. 8; Vogelstein and Rieger, *Gesch. der Juden in Rom*, I. 290, 307, 332.

I. BR.

**BETHESDA:** A pool in Jerusalem. According to John v. 2—the only passage wherein it is mentioned—it was "by the sheep market," hence on the north of the Temple-hill. Its exact location can not be definitely fixed. The Pilgrim of Bordeaux (about 333) and also Eusebius ("Onomasticon," cclx., ed. Lagarde) describe it as a double pond with reddish water, surrounded by five colonnades. Hence it might be identified with the two ponds below the convent of the Sisters of Zion. During the Middle Ages, Bethesda was supposed to be the pond on the western side of the French church of St. Anne (compare "Palestine Exploration Fund," 1888, pp. 115 *et seq.*). There is a later tradition, entirely without foundation, that identifies Bethesda with the Birket Israel, a large basin at the northeastern corner of the Temple-hill.

J. JR.

F. BT.

**BETHPHAGE:** Town mentioned in several passages of the New Testament (Matt. xxi. 1; Mark xi. 1; Luke xix. 29), in all of which it is brought into connection with Bethany, or the Mount of Olives. It was, therefore, on the road to Jericho, near Jerusalem, and outside of the wall. This is known also from Talmudical references, where it is given as the Sabbath distance limit (Neubauer, "G. T." p. 147). According to some passages of the Talmud, also, it would appear that Bethphage (Tos. Pes. viii.) was near, yet outside, Jerusalem **בֵּית פִּתְיָה** (Soṭah 45a). Yet it is referred to as surrounded by a wall (Pes. 63b, 91a; Men. 78b), which description does not exactly correspond to any known locality in the immediate neighborhood of Jerusalem. The exact location, however, has not been determined (see Buhl, "Geographie des Alten Palästina," p. 155).

J. JR.

G. B. L.

**BETHSAIDA:** A town in northern Palestine not mentioned in the Old Testament, but referred to in the Gospels, and by Josephus, Pliny, and others. According to Josephus ("Ant." xviii. 2, § 1; 5, § 6; "B. J." ii. 9, § 1; iii. 9, § 7), Philip transformed the village Bethsaida—situated on the Jordan where it discharges into the Sea of Galilee—into a large, flourishing city, which he called Julias. The Gospels mention the village Bethsaida; Jesus sometimes stayed there; and Philip, Andrew, and Peter came from there (Matt. xi. 21; Mark vi. 45; viii. 22, 26; Luke ix. 10; John i. 44, xii. 21). It has been falsely

assumed from some of these passages that there was a Bethsaida west of the Jordan. The statement of John (xii. 21) that Bethsaida lay in Galilee is not convincing, as Josephus and others sometimes consider portions of the eastern coast of the lake as belonging to Galilee (compare Buhl, "Geographie des Alten Palästina," p. 242). But one must probably make a distinction between Bethsaida-Julias and the fishing village Bethsaida mentioned in the Gospels. The latter was probably close by the lake, while the city of Philip lay higher up, near the little plain of Batiba.

J. JR.

F. BR.

**BETHUEL.**—**Biblical Data:** 1. According to Gen. xxii. 22, a descendant of Arphaxad (compare Gen. xi. 13-22). He was the son of Nahor and Milcab, and father of Laban and Rebekah. Since in Gen. xxv. 20 and xxviii. 2, 5, Bethuel is called "the Syrian [Aramean] of Padan-aram," he must have been, according to this source, a descendant of Aram, the brother of Arphaxad (Gen. x. 22; compare Budde, "Urgeschichte," pp. 421-426). In the story of Rebekah's marriage (Gen. xxiv.) he is only mentioned once, as taking an active part in events (verse 50, "then Laban and Bethuel answered"). Some critics omit his name here, and assume that Bethuel was already dead at that time (Ball, "S. B. O. T." *ad loc.*; Holzinger, Commentary to Gen. p. 170). Other critics (*e.g.*, Dillmann, *in loco*) suppose that throughout Gen. xxiv. the name "Bethuel" is a later addition. Gunkel (Commentary to Gen. pp. 226, 229) finds here two traditions, and supposes the Bethuel of verse 50 to be a younger brother of Laban. Some critics think that Bethuel may have been the name of an Aramean tribe in Mesopotamia.

2. Name of a town in the tribe of Simeon (Josh. xix. 4; I Chron. iv. 30), the site of which has not yet been identified.

J. JR.

B. E.

—**In Rabbinical Literature:** Bethuel, being king of Haran, exercised the *jus primæ noctis* in his dominions. The people consented, only on condition that he should use this privilege also toward the members of his own family. God, therefore, let him die suddenly when Eliezer wooed Rebekah for Isaac, in order to spare her the dreadful ordeal. This explains why, in the Biblical account of Eliezer's wooing (Gen. xxiv. 50), Bethuel is at first mentioned, but afterward only Rebekah's mother and brother are referred to, Bethuel having died during the night (Yalk. i. 109, probably from the lost Midrash Abkir). Another legend states that Bethuel intended to kill Eliezer when he saw the treasures which the latter brought with him, and, not being able to carry out his purpose, on account of Eliezer's great strength (see ELIEZER, IN RABBINICAL LITERATURE), he mixed poison with his food. The angel who accompanied Eliezer changed the plates, however, so that Bethuel ate the poisoned portion which he had intended for Eliezer, and died therefrom (Yalk. *loc.*, Midrash Aggadah, ed. Buber, Vienna, 1894, i. 58, 59). According to the old Midrashim, Bethuel refused to give his daughter in marriage, and for that reason God caused him to die

suddenly, while Eliezer was staying in his house (Gen. R. lx. 12).

L. G.

**BETHULIA** (Βαιουλίαια, Βαιουλίαια, Βετιλίαια, Βαιουλίαια; Vulgate, **Bethulia**): Name of the city which, according to the Book of Judith, was besieged by Holofernes; the home of Judith. In the shorter version of the legend published by Gaster ("Proceedings of the Society of Biblical Archeology," 1894, xvi. 156 *et seq.*), Jerusalem is the besieged city. The name "Bethulia" may, therefore, be assumed to be an allegorical one, meaning perhaps "Beth-el" (house of God), or it may be a word compounded of "betulah" and "Jah" ("YHWH's virgin"). In the better-known longer version, however, the whole context points to the situation of the city as having been on the mountains to the south of the large plain of Jezreel. Bethulia is, moreover, spoken of in a way to distinguish it decidedly from Jerusalem. It may therefore be accepted that in the longer version the story has been connected with a definite tradition current in that locality. The original allegorical name, however, may have been applied to a place in that region; but it has not yet been possible to find traces of the name in the region to the south of the large plain. The name "Matilye," a place on a hill south of the small fertile plain Merj-el-Gharaḥ, comes nearest to it; but this point is too far south to correspond to the details given in the Book of Judith. This objection applies even more strongly to the fort Sānūr, which is still farther south, and to which, among others, Guérin refers it. Marta ("Intorno al Vero Sito de Betulia," 1887) has tried to identify the city with El-Bared, west of Jennina, a location that, topographically considered, is quite possible. According to Willrich ("Judaica," 1900), "Bethulia" is a corruption of "Bethalagan."

**BETROTHAL** (אֵרוּסִין in Talmudic Hebrew): The term "betrothal" in Jewish law must not be understood in its modern sense; that is, the agreement of a man and a woman to marry, by which the parties are not, however, definitely bound, but which may be broken or dissolved without formal divorce. Betrothal or engagement such as this is not known either to the Bible or to the Talmud, and only crept in among the medieval and modern Jews through the influence of the example of the Occidental nations among whom they dwelt, without securing a definite status in rabbinical law.

Several Biblical passages refer to the negotiations requisite for the arranging of a marriage (Gen. xxiv. : Song of Songs viii. 8; Judges xiv. 2-7),

**In the Bible.** which were conducted by members of the two families involved, or their deputies, and required usually the consent of the prospective bride (if of age); but when the agreement had been entered into, it was definite and binding upon both groom and bride, who were considered as man and wife in all legal and religious aspects, except that of actual cohabitation.

The root אָרַס ("to betroth"), from which the Talmudic abstract אֵרוּסִין ("betrothal") is derived, must be taken in this sense; *i.e.*, to contract an actual though incomplete marriage. In two of the

passages in which it occurs the betrothed woman is directly designated as "wife" (II Sam. iii. 14. "my wife whom I have betrothed" ("erasti"), and Deut. xxii. 24, where the betrothed is designated as "the wife of his neighbor"). In strict accordance with this

was allowed to pass before the marriage was completed by the formal home-taking ("nissu'in," "lik-kuhin"). In case the bride was a widow or the groom a widower, this interval was reduced to thirty days (Ket. v. 2; Shulhan 'Aruk, Eben ha-'Ezer, 56).

SCENE AT A BETROTHAL OF GERMAN JEWS, EIGHTEENTH CENTURY.  
(From Bolenschatz, "Kirchliche Verfassung.")

sense the rabbinical law declares that the betrothal is equivalent to an actual marriage and only to be dissolved by a formal divorce.

After the betrothal a period of twelve months

After the dispersal of the Jews had brought them into contact with the Western peoples, this arrangement was felt to be inconvenient and out of harmony with the prevailing views. It therefore became

customary to perform the entire marriage ceremony, betrothal and home-taking ("erusin" and "nissu'in"), at one time; and an affiancing or

**Betrothal and Home-taking.** Engagement similar to that prevailing among non-Jews was introduced.

**Taking.** This was not an entire innovation, as its roots already existed in the custom of "shiddukin" or consent to marry, which existed in the days of the Talmud and probably also in the Biblical age. It was considered indispensable by the rabbis that a man should gain the good-will and consent of his prospective bride before entering upon a contract of marriage. Rab, the Babylonian

There is now no legal duration of time between betrothal and marriage, the length of the engagement being left entirely to the option of the parties concerned, except that the marriage may not take place in less than seven days after the agreement to marry has been reached (Nid. 66a; Shulhan 'Aruk, Yoreh De'ab, 192).

In Talmudic days, as in modern times, gifts formed an important feature of betrothal and marriage customs. These were of several kinds. The gifts which the groom sent to his bride were called "siblonot" or "sablonot," a term which Benjamin Musafia and Kohut explain as derived from

BETROTHAL SCENE AT NUREMBERG.  
(From Kirchner, "Judisches Ceremoniell," 1728.)

amora, was accustomed to punish severely any one who married without first having persuaded and gained the consent of his wife (Kid. 13a; Yeb. 52a *et al.*).

What was in the Talmudic age a mere personal matter became in later times a formal custom, which was celebrated with much pomp. At these occasions it was customary to make out a formal contract to marry and to stipulate that a penalty should be imposed upon either party who should fail to fulfil his or her part of it. Such agreements were known as "shiddukin" (consent to marry), and also as "tenaim" (conditions), or among German-speaking Jews "kenas-mahl" (penalty-feast), because of these stipulations and penalties. They are still customary in many countries in modified form.

the Greek *συνβολον* ("a gift or payment made as a sign or a mark by which to infer something; a token") ("Aruk ha-Shalem," vol. vi.,

**Gifts.** *s.v.* סבלנות. This derivation is corroborated by the fact that the Talmud (Kid. 50b) debates the question whether the sending of siblonot can be considered a proof of marriage or not. Jastrow, however ("Dict." *s.v.* סבלן), derives the term from סבל ("to carry"), corresponding to the Biblical "massa" and "masset." It was also customary for the male friends of the groom to send gifts, which sometimes took the form of money donations and were useful in assisting the groom to defray the expenses of the wedding. These presents were termed "shoshbinut" (friendship-gifts), from the Aramaic "shoshbina" (friend or neighbor),

supposed by Musafia and Kohut to be derived from the Greek *συναμνος* ("one living in one's tent; mess-mate; but see Payne-Smith, "Thesaurus," s. v.). Sachs ("Beiträge zur Sprach- und Aelterthums-Forschung," 1852, pp. 82 *et seq.*) derives the word from *שׂוּמְנָה*, the myrtle-bearing companions of the bridegroom.

Silver-Gilt Betrothal Ring, Bearing Letter  $\beth$  for "Mazal Tob."  
(From the Victoria and Albert Museum, London.)

Betrothal in its legal sense ("erusin") is performed in the following manner: After the ordinary benediction over wine, the person performing the ceremony continues as follows: "Blessed art Thou, O Lord, our God, King of the universe, who hast sanctified us with Thy commandments and given us commandments concerning forbidden connections, and hast forbidden unto us those who are merely betrothed, and permitted

seven wedding benedictions forms the completion of the wedding ceremony. See WEDDING.

unto us those lawfully married to us through 'canopy' ["*huppah*"] and 'betrothal' ["*kiddushin*"]. Blessed are Thou, O Lord, who sanctifiest Thy people Israel **The Legal Ceremony.** through *huppah* and *kiddushin*," after which the groom hands to the bride a ring or some object of value (not less than a *perutah*, the smallest current coin), saying, "Be thou betrothed unto me with this ring [or object] in accordance with the laws of Moses and Israel" ("kedat Moshel we-Yisrael").

As stated above, this act of betrothal is at present combined with the rite of home-taking; and after the placing of the ring upon the finger of the bride, the marriage contract (*ketubah*) is read, to form an interval between the two acts. The recitation of another benediction over wine and of the customary

toward the second half of the eighteenth century, in Presburg. To account for its origin the following episode is related in the family records:

There was a Jewish merchant in Presburg, whose modest demeanor gained for him the esteem of his fellow-townsmen. He was popularly called "Ein ehrlich Jud" (honest Jew). His wife was a woman of surpassing beauty, and many magnates of the country, hearing of her charms, traveled to Presburg to see her. Count Bethlen was particularly persistent, and, failing to attract her attention, he decided to abduct her. Mounted on his charger, he appeared one day in the open market, where the virtuous Jewess was making purchases, and, in the sight of hundreds of spectators, lifted her on his horse, and, heedless of her cries of entreaty, was about to gallop off with her, when her husband appeared on the scene and, after a fierce personal combat, succeeded in rescuing her.

That a Jew should engage in a hand-to-hand encounter with a nobleman of the rank of Count Bethlen was so unprecedented, and the deed itself was

so daring in view of the social status of the Jews of those times (which remained unchanged until the liberal laws of Emperor Joseph II. were promulgated), that the populace thenceforth styled the hero of the story "Bethlen-Jude." This name clung to him until the royal edict, bidding Jews to assume family names, went into force, and then the name was changed to "Bettelheim." Among the family relics preserved by a scion of the house in Freystadtel, on the Waga, is an oil-painting which depicts the daring rescue of the Jewess from the hands of her abductor.

Of the descendants bearing the name of Bettelheim the following are the most prominent:

1. **Albert (Aaron) Siegfried Bettelheim:** Rabbi and Hebraist; born in Hungary April 4, 1830; died at sea Aug. 21, 1890. At the age of eleven he

of London journals, and acted as private tutor ("Hofmeister") to Count Forgács, then governor of Bohemia, and afterward Hungarian court-chancellor. In the early fifties Bettelheim removed to Temesvár, Hungary, where he was director of the Jewish schools and editor of a political weekly called "Elöre" (Forward). In 1856 he became the "official translator of Oriental languages and censor of

**Becomes

Books.**

Hebrew books" at Czernowitz, where, in 1858, he married Henrietta Weintraub, the first female Jewish public-school teacher in Hungary. In 1860 he became rabbi at Komorn, Hungary, where he was appointed superintendent of all the schools—the first Jew to gain such a distinction. Thence he went to Kaschau, where he

PROCESSIONS OF BRIDEGROOM AND OF BRIDE, CIRCA 1700.  
(From Kirchner, "Jüdisches Ceremoniell," 1726.)

entered the yeshibah of Presburg, and afterward studied in the Talmudical schools at Leipnik, Moravia, and Prague; enjoying the tutelage of S. L. Rapoport, from whom, at the age of eighteen, he obtained his rabbinical diploma. Bettelheim officiated for a short time as rabbi and religious teacher at Münchengrätz, and then returned to Prague to enter the university, whence he graduated with the degree of Ph. D.

In 1850, and for several years thereafter, Bettelheim was the Austrian correspondent of a number

of London journals, and acted as private tutor ("Hofmeister") to Count Forgács, then governor of Bohemia, and afterward Hungarian court-chancellor. In the early fifties Bettelheim removed to Temesvár, Hungary, where he was director of the Jewish schools and editor of a political weekly called "Elöre" (Forward). In 1856 he became the "official translator of Oriental languages and censor of Hebrew books" at Czernowitz, where, in 1858, he married Henrietta Weintraub, the first female Jewish public-school teacher in Hungary. In 1860 he became rabbi at Komorn, Hungary, where he was appointed superintendent of all the schools—the first Jew to gain such a distinction. Thence he went to Kaschau, where he officiated as rabbi until 1862. While at Kaschau he edited a Jewish weekly, "Der Jude" (jargon), to combat the views of the Jewish Congress, then holding animated conventions at Budapest. There, too, he edited a political weekly, whose progressive ideas were discountenanced by his congregation and held to be prejudicial to Judaism. The fanaticism of his people became so pronounced that, being threatened with excommunication by one of the colleagues of his former domicile in Komorn, he decided to emigrate to America with his family.

In 1867 Bettelheim was elected rabbi of the Crown street congregation (now Beth Israel) of Philadelphia, and became a professor at the Maimonides College. In 1869 he became rabbi of congregation Beth Ahabah, of Richmond, Va., where he established and edited a German weekly, "Der

Patriot" (afterward changed into a daily, with the title "The State Gazette"). While in Richmond he entered the Medical College, and was graduated with the degree of M.D.

He intended to write a work on Jewish medicine, and has left behind a number of monographs and other documentary material not yet published.

Though assured of a remunerative practise as a physician, Bettelheim, at the solicitation of his congregation and of clergymen of other denominations, whose honored associate he was, did not forsake the pulpit. In 1875 he was elected rabbi of the Ohabei Shalom congregation of San Francisco, Cal., where he became chairman of the Society for the Study of Hebrew, composed entirely of Christian clergymen, and director of the Society for the Suppression of Vice. He held other public offices, and delivered the baccalaureate sermon at various high schools and colleges. He occupied the pulpits of the Unitarian and Baptist churches in San Francisco, and afterward in Baltimore, where, in 1887, he became rabbi of the First Baltimore Hebrew Congregation, an office he held till his death. In Baltimore he became identified with a number of public institutions and charitable organizations, and instructed some non-Jews in the elements of the Hebrew language.

While on the homeward voyage from a visit to Europe, he died on board ship, and was buried Aug. 21, 1900. Two Catholic priests, whose acquaintance Bettelheim had made on the voyage, read the Jewish burial service and recited the "Kaddish" as the body was lowered into the sea.

Bettelheim's literary activity was of the most varied kind. Besides the items enumerated above, it may be noted that he was the art critic of a prominent San Francisco journal; coeditor of the "Jewish Times" (now the "Jewish Times and Observer") of San Francisco, from 1880 to 1886; a regular contributor to the "Argonaut" of that city; a frequent contributor to the "Jewish Exponent" of Philadelphia, and the "Menorah Monthly" in New York. He was the author of some

charming ghetto tales and stories of Jewish life, two of which—"Yentil the Milk-Carrier" and "The Baal-Milhamah-Rabbi"—were translated into German, Hungarian, and Hebrew. He was at work for over twenty years on a Revised English Bible, about three-fourths of which he had completed in manuscript at the time of his death. Many of his suggestions and scholarly notes are incorporated in the last two volumes of Kohut's "Aruch Completum."

His Literary Activity.

G. A. K.

**2. Anton Bettelheim:** Austrian critic and journalist; born at Vienna Nov. 18, 1851. He studied law, and for some time was engaged in active practise, but abandoned the profession for a literary career. Although he had received his degree of "doctor of law," he attended the lectures of Giesebrecht and M. Bernays at Munich on literary subjects. Fired by the eloquence and enthusiasm of the latter, he undertook the study of Beaumarchais' life and writings, and, to this end, resolved to make original investigations in the libraries of London, Paris, The Hague, Carlsruhe, and Spain. After an extended tour through Germany, France, England, and Spain, Bettelheim became, in 1880, the feuilleton editor of the Vienna "Presse." He retained this position until 1884, when he became editor of the "Deutsche Wochenschrift." In 1886 he joined the editorial staff of the "Deutsche Zeitung," which position he resigned shortly after to publish the "Biographischen Blätter," subsequently issued as "Biographisches Jahrbuch und Deutscher Nekrolog."

Bettelheim's works are: "Beaumarchais," a biography, 1886; a translation of Littré's "Wie Ich Mein Wörterbuch der Französischen Sprache zu Stande Gebracht Habe," 1887; "Volkstheater und Lokalbühne 1887," 1887; "Ludwig Anzengruber, der Mann; Sein Werk, Seine Weltanschauung," 1891; "Die Zukunft Unseres Volkstheaters," 1892; "Deutsche und Franzosen," 1895; "Acta Diurna, Gesammelte Aufsätze," 1899; and "Führende Geister," 1890-97.

Bettelheim is also one of the editors of Anzengruber's complete works, published by Cotta, 1890.

**3. Caroline von Bettelheim-Gomperz** (also called **Tellheim**): Court singer and member of the royal opera, Vienna; born June 1, 1845, at Pesth. She studied piano with Karl Goldmark, and singing with Läufer. At the age of fourteen she made her début as a pianist, and two years later appeared for the first time in opera at Vienna. She eventually obtained a permanent engagement at the Royal Opera in that city. She has occasionally starred in her favorite rôles in other cities of Germany as well as in London. She is the wife of Julius Ritter von Gomperz, president of the Austrian chamber of commerce and member of the Upper House.

J. So.

**4. Felix Albert Bettelheim:** Physician and surgeon of Panama; born in Freystadtel, on the Waag, Hungary, Sept. 2, 1861; died in Baltimore, Md., April 4, 1890. He was the son of the rabbi Aaron Siegfried BETTELHEIM, and emigrated to the United States in the sixties. In his seventeenth year he was graduated from the University of California with high honors, and three years later from the Medical College in San Francisco. From 1880 to 1881 he was resident physician of the San Quentin state prison; from 1881 to 1883, ship's surgeon of the Pacific Mail steamship "Colima"; 1883-89, surgeon-general of the Panama Railroad and Canal

Company. Through his efforts the first hospital in Panama was built; and he became one of its staff of physicians. He held several high offices and received a number of medals and testimonials from the government in recognition of his services.

Bettelheim was the discoverer of a new germ peculiar to tropical countries, an account of which is given in medical records. In 1889 he studied clinical methods in the great European cities. On his return to America he died from a tropical liver complaint which was held by American authorities to be unique and was described by Professor Osler, of Johns Hopkins University, in a London medical journal. He was a frequent contributor to the "Lancet" and other periodicals, and left a posthumous work, "On the Contagious Diseases of Tropical Countries," still unpublished. A text-book by Dr. Thorington of Philadelphia, on the diseases of the eye, is dedicated to Bettelheim's memory.

**5. Jacob Bettelheim** (pseudonym, **Karl Tellheim**): German dramatist; born at Vienna Oct. 26, 1841. He attained considerable prominence by his first attempt in the field of literature, "Elena Tacano," a romance. This he followed with "Intime Geschichten" (novelettes) and a drama, "Nero," written in collaboration with Von Schönthan in 1889, the year in which he married Fräulein Brentano. A farce, "Die Praktische Frau," was his next production, after which came in quick succession "Giftmischer" and "Vater Morin," two plays; two dramas, "Ehelüge" and "Sein Bester Freund"; "Madame Kukuk," a farce; "Sirenen," a drama; "Seine Gewesene," farce; "Aus der Elite," farce, 1894; "Der Millionbauer," drama, in collaboration with M. Kretzer; "Verklärung," drama, 1897; "Verklärung," farce, 1898; "Der Retter," comedy, 1898; "Onkel Jonas," a popular drama, in collaboration with O. Klein, 1898; "Victorinen's Hochzeit" (translated from George Sand's play), 1879; "Marguerite" (from Sardou), 1886; "Der Erbe" (from De Maupassant), 1894; and "Im Verdacht" (from Labiche).

E. Ms.

**6. Karl Bettelheim:** Austrian physician; born at Presburg, Hungary, Sept. 28, 1840; died July 27, 1895. He received his medical education at the University of Vienna, where he studied under Hyrtl, Brücke, Rokitsky, and Skoda. In 1868, two years after obtaining his doctorate, he was appointed assistant to Oppolzer, and served in that capacity until 1870. Three years later he became docent of medicine (*Innere Medizin*) at the University of Vienna. From 1870 to 1878 he was editor of the "Medicisch-Chirurgische Rundschau," and for several years was chief of the department of internal diseases at the Polyclinic, and physician-in-chief of the Rudolfinerhaus at Unterdöbling, near Vienna.

The scientific investigations of Bettelheim are chiefly on the pathology of the heart and blood-

vessels. His experimental researches on mitral insufficiency and on the mechanics of the heart following compression of the coronary arteries are considered of great value.

Bettelheim's writings comprise a number of papers on diseases of the blood and circulatory organs, on certain affections of the alimentary canal, and reports of interesting clinical cases, which he published in the leading medical journals. His most important contributions are: "Ueber Bewegliche Körperchen im Blute," and "Ueber einen Fall von Phosphorvergiftung," in the "Wiener Medicinische Presse," 1868; "Ein Fall von Echinococcus Cerebri," "Stenose eines Astes der Pulmonalarterie," and "Bemerkungen zur Diagnose des Magencarcinoms," in "Vierteljahrsschrift für Psychiatrie"; "Die Sichtbare Pulsation der Arteria Brachialis, ein Beitrag zur Symptomatologie Einiger Erkrankungen der Circulationsorgane," in the "Deutsches Archiv für Klinische Medicin," 1878; "Die Bandwürmer beim Menschen," in the "Sammlung Klinischer Vorträge," 1879. He translated from the French R. Lepin's "Pneumonia Lohwin," Vienna, 1883; and "Diseases of the Spinal Cord," by the English neurologist Gowers. Bettelheim also described the origin of the second sound in the carotid artery ("Entstehung des Zweiten Tones in der Carotis," in "Zeitschrift für Klinische Medicin," 1883).

**7. Leopold (Meyer Leb) Bettelheim:** Hungarian physician; born in the second half of the eighteenth century. He was not only eminent in his profession, but was considered a Hebraist of some importance. He lived in Freystadt, on the Waag, and there held the responsible office of physician-in-ordinary to Count Joseph Erdödy, the influential court chancellor of Hungary, in whose private residence are still preserved the surgical instruments used by Bettelheim in saving the lives of the count and his family, together with documents recording some remarkable cures effected by him.

In 1830 Bettelheim was the recipient of a gold medal of honor from the emperor Franz I. for distinguished services to the royal family and to the nobility.

**8. Samuel (Shemuel Zebi) Bettelheim:** Son of Leopold (No. 7); physician, merchant, and political agitator during the troublous years preceding the Revolution of 1848; afterward served in the army. His wife, **Eva**, was a woman of unusual scholarly attainments, and an earnest student of the Bible and its commentaries. She was an excellent Talmudist and wrote a number of disquisitions on learned rabbinical questions. The famous reformer Hodza, an evangelical pastor and organizer of a violent Slavonic movement in northern Hungary in 1848, was her instructor in classical and modern literature.

**BIBLIOGRAPHY:** *Gróf Erdödy József Krónikája* (printed for private circulation only), pp. 84-86; *Pozsonyi Közlöny*, 1863, p. 6; a transcript from old family records supplied for this biography by Dr. Joseph Bettelheim in Budapest.

**BETTING:** The mutual agreement of two parties as to gain and loss upon a certain contingency. It seems to have been unknown in Biblical times. There is no mention of it in the Scriptures, unless an allusion to this kind of easy gain is intended in such proverbs as the following:

"He that tilleth his land shall have plenty of bread, but he that followeth after vain things [A. V. "vain persons"] is void of understanding" (Prov. xii. 11). "Wealth gotten by vanity shall be diminished, but he that gathereth by labor shall have increase" (ib. xiii. 11, A. V.). "He that maketh haste to be rich shall not be unpunished" (ib. xxviii. 20, A. V.). "He that hasteth after riches hath an evil eye, and knoweth not that want [or disgrace] shall overcome him" (ib. xxviii. 22, Hebr.).

An interesting case of betting is related in Ab. R. N. xv. and Shab. 30d *et seq.*: "Two men (A and B) bet whether it was possible to provoke Hillel to anger. One of them (A) said, 'I can do it.' They agreed that, if he did provoke Hillel to anger he should receive from the other (B) 400 zuz [the alternative of the bet, that in case of failure he was to pay to B the same amount, is not mentioned]. He tried his best, but failed. Then he exclaimed: 'If thou art Hillel, the prince of Israel, I hope that there are not many in Israel like thee; for through thee I lose 400 zuz.' Hillel replied: 'Learn to control thyself; the lesson learnt by Hillel's patience is worth even twice the stake.'"

If two parties have bound themselves by a bet, however blamable the act of betting may be, they have to act in accordance with the moral precept, "That which is gone out of thy lips thou shalt observe and do" (Dent. xxiii. 24 [R. V. 23]). They are at least morally bound; but it is not certain whether the loser is also forced by law to abide by the agreement. In the Mishnah (R. H. i. 8; Sanh. iii. 3) betting seems to be among the vices that disqualify those addicted to them from giving evidence. The passage runs thus: "The following are disqualified from giving evidence; He who plays at dice ["mezaheq be-kubia"] or lends on interest, or bets on pigeons." The original for the last expression is "mafrilhe yonim" (literally, "causing pigeons to fly") and is thus explained in the Gemara (Sanh. 25a): "If thy pigeon comes before the other" [supply] "then I pay thee so and so much." Another explanation is offered by Hama, who can not adopt the first definition of "mafrilhe yonim," because the principle of betting is already mentioned in the phrase "playing at dice."

Two reasons are given why a betting man can not be heard as witness: (1) Rami b. Hama says: "The winner has no right to take the money of the loser; and if he takes it, he is guilty of robbery." (2) Rab Sheshet says: "A person addicted to betting wastes his time in idleness, and does not fulfil his duty as a human being of contributing by his work his share to the welfare of mankind" ["eno 'osek beyishshub shel 'olan"]. Both agree that betting disqualifies a person from giving evidence, but with this difference: Rami b. Hama declares a betting man guilty of robbery, and therefore disqualified even if he bets only occasionally; while Rab Sheshet would not declare

him disqualified, unless betting is his sole occupation (Sanh. 24b).

Whether a betting man is guilty of robbery or not depends on the legal value of the betting transaction. Two parties frequently agree to certain conditions, because either party hopes to gain by them, and thinks only of the one eventuality that is favorable to him. The reverse seems to him to be out of question; and neither party is actually prepared for the loss. Such a transaction is called "asmakta" (see ASMAKTA). Rab Sheshet denies that the rule of asmakta applies to the case of mezaheq be-kubia, or playing at dice. The Tosafot, in discussing this subject, come to the conclusion that when a certain sum of money is laid on the table with the understanding that the winner shall take it, the transaction is legally valid; but that games which are played on credit are asmakta, and the stake is not recoverable by law.

Maimonides, in his commentary on the Mishnah, speaks of the immorality of the above-named games as follows: "He who indulges in this game spends his time in things which

**Maimonides' Views.** do not contribute to the well-being of his fellow-man; and it is one of the principles of our religion that man

ought to occupy himself in this world either with the study of the Torah, in order to perfect his soul in the wisdom of the Torah, or in some useful work or handicraft or trade; but so that he finds some time for the study of the Law." In the same sense he speaks, in his *Yad ha-Hazakah*, *Gezeleh we-Abedah*, vi. 11: "Our sages declare many things as forbidden because they involve robbery; viz., playing at dice, and the like, and even where the term 'robbery' does not apply, it is forbidden as a useless occupation" ("osek bi-debarim betelim"). There are some authorities who consider a game at dice less serious, and allow it as harmless (compare Shulhan 'Aruk, *Hoshen Mishpat*, 207, 13, note).

**BIBLIOGRAPHY:** Besides the authorities quoted in the article, Maimonides, *Yad ha-Hazakah*, 'Eduh, xi. 4; *Shulhan 'Aruk*, *Hoshen Mishpat*, 34, 16; *Pithei Uziel*, s.v. 87228, 3, sr. M. F.

**BETURIA, PAULINA:** Roman proselyte to Judaism (about the year 50), known under the name "Sarah," who, according to her Latin epitaph, was eighty-six years and six months old at the time of her death. For sixteen years she was a Jewess, a mother of the synagogues ("mater synagogarum") of the Campanian and Volturnian communities in Rome. A proselyte variously mentioned in Talmudic sources as Beluryah, Beruryah, Behurit, and Beruzia, who was learned in the Jewish law, and who induced her slaves to become proselytes (Mek., Bo, 15; R. H. 17b; Yeb. 46a; Gerim ii. 4), is perhaps identical with Beturia.

**BIBLIOGRAPHY:** Grätz, *Gesch. der Juden*, 3d ed., iv. 102; Vogelstein and Rieger, *Gesch. der Juden in Rom*, i. 74, 6. S. KR.

**BEUGNOT, AUGUSTE ARTHUR, COUNT:** French statesman and scholar; born at Bar-sur-Aube March, 1797; died at Paris March 15, 1865. Originally he adopted the profession of advocate, but soon abandoned it in order to devote himself entirely to the study of history, and especially the history of the Crusades. He was scarcely thirty-five

years old when he was elected member of the Académie des Inscriptions et Belles-Lettres.

Among many valuable works he wrote, "Les Juifs d'Occident, ou Recherches sur l'État Civil, le Commerce, et la Littérature des Juifs en France, en Espagne, et en Italie Pendant la Durée du Moyen-Age," Paris, 1824. This essay is not free from errors such as are common to those that obtain their information from secondary sources. In the preface, in which he passes in review the period of the struggles of the Jews with the Romans, and the state of the Jews exiled under the Roman emperors, Benignot betrays scant knowledge of ancient Jewish history. Thus he asserts, contrary to the most authentic documents, that Julian the Apostate never granted to the Jews permission for the rebuilding of the Temple. Nevertheless, the work contains much information on the history of the Jews of France, Spain, and Italy, which has proved valuable to later historians. The author, who was a Catholic, does not attempt to extenuate the horrors of the persecution of the Jews in the Middle Ages.

I. BR.

**BEUTHEN:** City of Prussian Silesia. No precise information is forthcoming as to when Jews first settled in the city. The mention of Beuthen in the *Mainzer Memorbuch* (year 1231) is uncertain; but it is known that Jews lived there as early as 1421. The first documentary evidence relating to the Jews of Beuthen dates from the year 1612. In 1617 there was one Jew there, Mauth Arendator by name; and in 1639 two more Jews were admitted to residence. In 1640 a Jew named Kretscham received from Count Gabriel Hentzel the privilege of establishing an inn, and in 1653 another received the right to sell liquor. In 1656 a court Jew resided here; and in the following year an investigation as to the number of Jews was made for the purpose of increasing the taxes. The responsa of Menahem Krochmal in 1657 mention the rabbinate of Beuthen. The Jews were often ill-treated and sought protection from the count, who, in 1688, wrote in their behalf to the city authorities.

In 1715 there were only four families in Beuthen; in 1732 the Jews received a plot for a cemetery, the oldest tombstone still in existence dating from the

year 1743. The number of families had in 1782 increased to twenty-three; and in the same year the first prayer-meetings were held in the house of the Boehm family. These were followed by the first synagogue in 1809; the second being inaugurated in 1869, when also the first reader and shohet were appointed.

In 1808 a Jew had been elected member of the common council. The community, which in 1811 consisted of 255 persons, had increased in 1855 to 1,110, in 1885 to 2,290, and in 1901 to 3,026 persons.

The first rabbi, Moses Israel Freund, officiated from 1790 to 1813; the second, Mendel Cohen, until 1829; the third, Israel Deutch, author of several writings, until 1853; the fourth, Jacob Ezekiel Levy, until 1864; while the fifth, Ferdinand Rosenthal, served from 1867 to 1887, being succeeded in 1889 by M. Kopfstein.

**BEVIS MARKS GAZETTE.** See PERIODICALS.

**BEVIS MARKS SYNAGOGUE** (known officially as the **Synagogue Saar ha-Samayim**):

The oldest Jewish house of worship in London; established by the Sephardic Jews in 1698, when Rabbi David Nieto took spiritual charge of the congregation. At that time the worshippers met in a small synagogue in Cree Church lane; but the considerable influx of Jews made it necessary to obtain other and commodious quarters. Accordingly a

Interior of the Bevis Marks Synagogue, London.

(After a photograph.)

committee was appointed, consisting of Antonio Gomes Serra, Menassch Mendes, Alfonso Rodrigues, Manuel Nunez Miranda, Andrea Lopez, and Pontaleo Rodriguez. It investigated matters for nearly a year, and on Feb. 12, 1699, signed a contract with Joseph Avis, a Quaker, for the construction of a building to cost £2,750 (\$13,335). On June 24 of the same year, the committee leased from Lady Ann Pointz (alias Littleton) and Sir Thomas Pointz (alias Littleton) a tract of land at Plough Yard, in Bevis Marks, for sixty-one years, with the option of renewal for another thirty-eight years, at £120 a year.

Avis began building at once, incorporating in the roof a beam from a royal ship presented by Queen

Anne herself. The structure was completed and dedicated in 1702, and, with the exception of the roof, which was destroyed by fire in 1738, and repaired in 1749, is to-day as it was 200 years ago. In the interior decorations and arrangement the influence of the great Amsterdam synagogue of 1677 is apparent. In 1747 Benjamin Mendes da Costa bought the lease of the ground on which the building stood, and presented it to the congregation, vesting the deeds in the names of a committee consisting of Gabriel Lopez de Britto, David Aboab Ozorio, Moses Gomes Seria, David Franco, Joseph Jessurun Rodriguez, and Moses Mendes da Costa.

The Bevis Marks Synagogue was for more than a century the religious center of the Anglo-Jewish world, and served as a clearing-house for congregational and individual troubles all the world over; e.g., the appeal of the Jamaican Jews for a reduction in taxation (1736); the internecine quarrel among the Barbados Jews (1753); and the aiding of seven-year-old Moses de Paz, who escaped from Gibraltar in 1777 to avoid an enforced conversion.

The synagogue formed the center of the Sephardic community of London till the foundation of the Bryanstone Street Synagogue, in 1866, after which the attendance at the functions declined so much that in 1886 the "yeħidim" contemplated selling the ground and the building; but a Bevis Marks Anti-Demolition League was founded, under the auspices of H. Guedalla and A. H. Newman, and the proposed demolition was given up. The synagogue held its bicentenary celebration with great pomp in 1901.

Chron.* May 31 and June 7, 1901; Gaster, *History of the Ancient Synagogue of the Spanish and Portuguese Jews*, 1901.

E. Ms.—J.

**BEZAH** ("Egg"): Name of a Talmudic treatise of Seder Mo'ed, the second of the six "sedarim" or orders of the Talmud. Its place in the Seder is not fixed. In the Babylonian Talmud it occupies the fourth place and follows immediately after Pesachim. This arrangement coincides with that of the Pentateuch, where the law concerning the holy days is directly connected with the description of Passover (Ex. xii. 16).

In the Mishnah and Talmud Yerushalmi another method is followed, and the treatise occupies the seventh and the eighth place respectively. The name "Bezah" has its origin in the fact that the treatise begins with this word; a solitary instance among the treatises of the Talmud, it has a parallel in the name "Eykah" for Lamentations, in the Hebrew names of the five books of the Pentateuch, and in the names of the chapters of each treatise of the Talmud. Instead of "Bezah" the treatise is frequently called "Yom-Tob" (Holy Day), in accordance with its contents. The general rule laid down in the Bible in the words "No servile work shall be done in them, save that which every man must eat, that alone may be done of you" (Ex. *l.c.*), is assumed as clear and known; and this rule was held to constitute the difference between "all servile work" (כל מלאכה), prohibited on holy days, and "all manner of work" (כל מלאכה), prohibited on the Sabbath. But certain problems resulting from these principles had to be solved; and these are discussed in the five chapters of this treatise.

Chapter i.: The main theme of this chapter is the law of "muḳzeh," "a thing laid aside" so as not to be used for the present. The opposite of muḳzeh is "mukan," "a thing kept ready" for use. This distinction is based on the divine command (Ex. xvi. 5), "And they shall keep ready [והכינו] what they bring in"—in reference to the manna, which had to be kept ready for the Sabbath from the sixth day. Traditional interpretation generalized the idea expressed in this commandment as follows: A thing which before the commencement of the Sabbath or holy day was not intended for use on these days is muḳzeh, and must not be used or handled on these days. There are various degrees of muḳzeh; e.g., "muḳzeh meḥamat issur"—muḳzeh on account of some forbidden act which its use would necessitate; "nolad" (born), that which has not existed on the eve of the Sabbath or holy day, and is therefore muḳzeh. There is a difference of opinion between the schools of Shammai and Hillel as to the force of the above law of muḳzeh. The preparation of food permitted on holy days sometimes necessitates the carrying of things out of the house, or fetching of things from outside into the house—an act forbidden on the Sabbath, under the title of "hozaah" (taking out) (Mishnah Shab. vii. 2), as "taking out," one of the thirty-nine kinds of work included in the precept "Thou shalt do no manner of work." The application of this prohibition to holy days forms a point of difference between the aforementioned schools.

Chapter ii.: The permission to prepare food on holy days is restricted to food required for those days; but if a holy day is closely followed by the Sabbath, the food for the Sabbath may be prepared on that holy day, provided such preparation has commenced on the eve of the festival. This first instalment of the preparation for the Sabbath on the eve of a holy day is called "erub tabshilin," "the link that unites the cooking" for the Sabbath on the eve of the holy day with that done on the holy day, and causes the latter to be permitted. The next point discussed in the chapter is the question whether things other than the preparing of food, if required for the celebration of the festival, or for the well-being of man—such as slaying certain sacrificial animals, or warming water for a foot-bath—may be done on a holy day.

Chapters iii., iv.: The permission to prepare on a holy day the food wanted for the day does not include hunting, fishing, or the purchase or fitting of implements required for the preparation of food (e.g., whetting the slaughtering-knife, burning charcoal, etc.).

Chapter v.: On certain acts which are prohibited, not as "servile work," but as a preventive ("gezerah") against breaking any of the divine laws concerning the holy day. Such prohibitions are termed "shebut" (abstention from doing), commanded by the Talmudic sages.

The Tosefta calls the treatise "Yom-Tob," and has four chapters, contracting chapters ii. and iii.

**Frequently Called "Yom-Tob."**

and known; and this rule was held to constitute the difference between "all servile work" (כל מלאכה)

into one. The treatise occupies the place between Sukkah and Rosh ha-Shanah, as in the Mishnah. The Gemara, both Palestinian and Babylonian, discusses the laws contained in the Mishnah with but a few short digressions, such as those in Bab. 4b; remarks on Yom-Tob Shenai, or the second days of festivals; (*ib.* 15b) Rabbi Eliezer's censure on those who left before his lecture was concluded; (16a) how Sham-mai and Hillel, each in his own way, showed their gratitude to God for the enjoyment of good food; (25b) on good manners in taking food; and others.

Of special commentaries on the treatise of Bezah the following two are noteworthy: "Shittah Me-kubbezet," by Rabbi Bezalel Ashkenazi, and the commentary of Rabbi Menahem Meiri.

**BIBLIOGRAPHY:** Z. Frankel, *Hodogetica in Mishnam*, Leipzig, 1867; Wallerstein, *Letter of Rabbenu Sherira*, Krotoschin, 1861; *Hiddushe ha-Rab ha-Meiri on Bezah*, Berlin, 1858; Ashkenazi, *Shittah Mekubbezet*, special ed. on Bezah, Budapest, 1820; Maimonides, *Mishneh Torah*, iii.; *Zemanim, Hilkot Yom-Tob; Shulhan Aruk, Oraḥ Hayyim*, 495-527. J. SR. M. F.

**BEZAI:** A family, 324 of whose members returned with Zerubbabel (Ezra ii. 17, and the parallel account, Neh. vii. 23). The name also occurs in the list of those who signed the covenant with Nehemiah, and may there be identified with the leader of the clan (Neh. x. 19); who in I Esd. v. 16 is called **Bassai**. It is interesting to note that the name "Besai" occurs on a clay tablet found at Nippur (Hilprecht, "Pal. Explor. Fund. Quarterly Statement," Jan., 1898, p. 55).

J. JR. G. B. L.

**BEZALEL** (A. V., **Bezaleel**).—**Biblical Data:** In Ex. xxxi. 1-6, the chief architect of the Tabernacle. Elsewhere in the Bible the name occurs only in the genealogical lists of the Book of Chronicles, but according to cuneiform inscriptions a variant form of the same, "Zil-Bel," was borne by a king of Gaza who was a contemporary of Hezekiah and Manasseh. Apparently it means "in the shadow [protection] of El." Bezalel is described in the genealogical lists as the son of Uri, the son of Hur, of the tribe of Judah (I Chron. ii. 18, 19, 20, 50). He was said to be highly gifted as a workman, showing great skill and originality in engraving precious metals and stones and in wood-carving. He was also a master-workman, having many apprentices under him whom he instructed in the arts (Ex. xxxv. 30-35). According to the narrative in Exodus, he was definitely called and endowed to direct the construction of the tent of meeting and its sacred furniture, and also to prepare the priests' garments and the oil and incense required for the service.

J. JR. C. F. K.

—**In Rabbinical Literature:** The rabbinical tradition relates that when God determined to appoint Bezalel architect of the desert Tabernacle, He asked Moses whether the choice were agreeable to him, and received the reply: "Lord, if he is acceptable to Thee, surely he must be so to me!" At God's command, however, the choice was referred to the people for approval and was indorsed by them. Moses thereupon commanded Bezalel to set about making the Tabernacle, the holy Ark, and the sacred utensils. It is to be noted, however, that Moses mentioned these in somewhat inverted order, putting the Tabernacle last (compare Ex. xxv. 10,

xxvi. 1 *et seq.*, with Ex. xxxi. 1-10). Bezalel sagely suggested to him that men usually build the house first and afterward provide the furnishings; but that, inasmuch as Moses had ordered the Tabernacle to be built last, there was probably some mistake and God's command must have run differently. Moses was so pleased with this acuteness that he complimented Bezalel by saying that, true to his name, he must have dwelt "in the very shadow of God" (Hebr., "bezel El"). Compare also Philo, "Leg. Alleg." iii. 31.

Bezalel possessed such great wisdom that he could combine those letters of the alphabet with which heaven and earth were created; this being the meaning of the statement (Ex. xxxi. 3): "I have filled him . . . with wisdom and knowledge," which were the implements by means of which God created the world, as stated in Prov. iii. 19, 20 (Ber. 57a.). By virtue of his profound wisdom, Bezalel succeeded in erecting a sanctuary which seemed a fit abiding-place for God, who is so exalted in time and space (Ex. R. xxxiv. t; Num. P. xii. 3; Midr. Teh. xci.). The candlestick of the sanctuary was of so complicated a nature that Moses could not comprehend it, although God twice showed him a heavenly model; but when he described it to Bezalel, the latter understood immediately, and made it at once; whereupon Moses expressed his admiration for the quick wisdom of Bezalel, saying again that he must have been "in the shadow of God" (Hebr., "bezel El") when the heavenly models were shown him (Num. R. xv. 10; compare Ex. R. l. 2; Ber. *l.c.*). Bezalel is said to have been only thirteen years of age when he accomplished his great work (Sunh. 69b); he owed his wisdom to the merits of pious parents; his grandfather being Hur and his grandmother Miriam, he was thus a grand-nephew of Moses (Ex. R. xlviii. 3, 4). Compare **ARK IN RABBINICAL LITERATURE**.

L. G.

**BEZALEL:** Palestinian amora of the fourth century, who is known in Midrashic literature only as the author of *haggadic* sentences. Two of these have been handed down by Berechiah, the well-known *haggadist* and transmitter of *haggadic* traditions. In *Pesik.* xxi. 145b (where the name is corrupted, but easily recognizable) Bezalel interprets the peculiar form "kehalallonot" (כהללונות) (Ezek. xl. 25) by saying, "The windows of the Temple were 'kehot' [dull] (כהות); they were opaque, narrow within, and widening toward the exterior, in order to send light forth to the world." The second saying reported by Berechiah in the name of Bezalel is a simile referring to Ex. xxv. 40 (Cant. R. iii. 11; in *Pesik.* i. 4b, and in other parallel passages the name is miswritten or has dropped out). A third sentence contains an allegoric explanation of Hosea ii. 7 [A. V. 5]. "Her 'mother' is the Torah, which, like a harlot, becomes an object of contempt among the ignorant, when those who are engaged in its study make the Law contemptible by their conduct." Bezalel gave this explanation in answer to a question which the above-mentioned Berechiah asked him (Ruth R. i. 1 [parashah 1], where the name of Berechiah has been omitted by mistake).

**BEZALEL B. MOSES HA-KOHEN**: Talmudist; born at Wilna, Russia, Jan. 14, 1820, where he died April 13, 1878. He was a competent Talmudist at the age of eighteen, and felt himself qualified to criticize the "Mishkenot Ya'akov" of Jacob b. Aaron of Karlin, one of the chief Talmudists of the time, in a letter addressed to him. In 1840 Bezalel became ecclesiastical assistant in Wilna, and held the position until his death. Although the title was a subordinate one, Bezalel was in reality—at least from 1860 to 1878—the spiritual head of the large community at Wilna. Moreover, he not only cared for this community, but answered religious questions directed to him from far and near. Consequently many of Bezalel's answers to the questions, which were theoretical as well as practical in their bearing, are to be found in the responsa literature of the time. Equally numerous were Bezalel's contributions to the works of others, especially those printed in Wilna. His independent work, longer than the others, is "Reshit Bikkurim" (Firstlings), Wilna, 1869, responsa and treatises on Talmudic topics. The Romm edition of the Talmud contains marginal glosses on many of Bezalel's treatises.

Bezalel differed from his more narrow-minded colleagues in showing an inclination for secular sciences. He had, also, a fine historical and critical feeling for rabbinical literature, and some of his historical and critical notes possess considerable value. His wide reading in modern Talmudic literature is remarkable, even if conditions in Russia be taken into account, religious study there being limited almost entirely to the Talmud. Bezalel's extraordinary modesty and active goodness are still frequently praised.

**BEZALEL BEN SOLOMON OF KOBRIN**: Preacher at Sutzk, government of Minsk, Russia; later at Boskowitz, Moravia; died before 1659. He was the author of the following works: (1) "Amudeah Shib'ah" (Her Columns Are Seven), containing homilies on the Bible; divided into seven parts, each of which bears the title of a Biblical expression connected with the name of Abraham, Isaac, Jacob, Moses, Aaron, David, or Solomon (Lublin, 1666). This work was published by the order of the Council of the Four Lands and of the Lithuanian Rabbinical Assembly, held at Lublin in 1666. (2) "Korban Shabbat" (Sacrifice of Sabbath), on some ritual laws and religious customs concerning Sab-

bath; divided into thirty-nine chapters (Dyhernfurth, 1691). (3) "Pelah ha Rimmon" (The Piece of the Pomegranate), containing twenty explanations of the forty-nine which had been written by Bezalel on a difficult Midrashic passage (Amsterdam, 1659). (4) "Haba'azet ha-Sharon" (Rose of Sharon), commentary on Psalm cxix., mentioned in the introduction to the preceding work. (5) "Zayit Ra'anau" (Green Olive-Tree), homilies on the Pentateuch. (6) "Emek ha-Baka" (Vale of Tears), commentary on Lamentations. The last two works are still extant in manuscript.

**BEZEK**: 1. The scene of battle between the tribes of Judah and Simeon, and the Canaanites and Perizzites (Judges i. 4-6). 2. Place where Saul collected his forces for the fight against the Ammonites (I Sam. xi. 8). Identified with the modern Khirbet Izb'ig, 14 miles southwest of Beisan (Moore, commentary to Judges i. 5).

J. JR.

G. B. L.

**BEZER**: A city of refuge in the territory of Reuben (Deut. iv. 43; Josh. xx. 8). It was also one of the cities allotted the Levites by the tribe of Reuben (Josh. xxi. 36, Septuagint; I Chron. vi. 63 [A. V. 78]). In the Mesha inscription it is a Moabite city, probably the same as the Bozrah of Moab mentioned in Jer. xlvi. 24. Bezer has not yet been identified with any of the cities whose ruins are found in the plateau of Moab. It must be distinguished from Bosor or Bosora.

J. JR.

F. BU.

**BEZETHA**: According to Josephus, the name of a hill north of the Temple-mound, and separated from the latter by a valley. After the erection of the third wall it became part of the city of Jerusalem. Josephus ("B. J." ii. 15, § 5; ii. 19, § 4; v. 4, § 2; v. 5, § 8) gives the meaning of the name as "New City," according to which "Bezetha" is a strange transcription of בית חרבה. A more correct rendering is "house of olives" (בית זית). It is not certain whether this place is identical with "Bezeth" in I Macc. vii. 19, where Baechides pitched his tents after leaving Jerusalem. In "Ant." xii. 10, § 2 it is called Βηθζιθω (variant reading, Βηθζιθω), and is referred to as a village.

**BÉZIERS** (formerly Bediers, Beders, Besers, and Bezares; Hebr., ביריט בדריש, בדריש ביריט, ביריט בדריש, בדריש ביריט, ביריט בדריש): Town of France in the department of Hérault. The date of the settlement of the Jews in Béziers is lost in antiquity. Two letters of Sidonius Apollonarius and the canons of the council held at Agde in 506 establish the existence at that time of numerous and prosperous Jewish communities in the province of Langue-

doc (Vaissète, i. 243; Sidonius Apollonarius, iii., epistle 4; iv., epistle 5). The **Earliest Mention.** Jews of Béziers did not escape the fate of the other Jewish communities in this province, which had to endure the most violent persecutions during the reign of the Visigoths. After

the defeat of the Saracens by Charles Martel in 732, the condition of the Jews of Béziers, as that of those of other towns, became more favorable; and this state lasted during the reign of the Carolingians. In the eleventh century the Jews of Béziers were affected by the persecutions that broke out in western France.

But the Jews of Béziers were fortunate in comparison with those of other towns. The viscounts cherished the most kindly feelings for them, and the greater part of the Christian inhabitants, being Albigenses, lived on friendly terms with **Albigenses**, their Jewish fellow-citizens. Even the restrictions gradually disappeared and were transformed into taxes imposed for the benefit of the princes or of the bishops, which they had to pay in addition to the poll-tax common to all the inhabitants. Thus, through the intervention of the viscount Raymond Trencaval, the bishop Guillaume abolished, in 1160, the custom of throwing stones at the Jews during Holy Week, and substituted a yearly payment of two hundred melgorian sous and a yearly tax of four livres of the same coinage. The good-will of the viscounts of Béziers displayed itself far beyond mere toleration; they even entrusted the Jews with important public offices. The Jews, on their side, were attached by bonds of gratitude to the viscounts and did not participate in the plot which, in 1167, brought about the assassination of Raymond Trencaval. They were therefore excluded from the massacre of the inhabitants that Roger II., with the help of his Aragonian allies, perpetrated in order to avenge this crime.

Roger II. gave the Jews numerous tokens of his confidence and favor. He took the notables among them under his personal protection. Thus in 1172 he interceded in behalf of the Talmudist Abraham ben David (RABAD), and, having taken him from the prison into which the lord of Posquières had thrown him, granted him shelter in Carcassonne. The functions of bailiff, under his government, were often entrusted to Jews. A Jew called Nathan figures with the title of bailiff as a witness to a deed of Roger II. Raymond Roger, the successor of Roger II., followed the example given by his father and assigned for his Jewish bailiffs a distinguished rank among the barons of his court. A Jew of Béziers, called Samuel, figures, together with the barons, on a deed by which Raymond Roger granted the bishop many rights.

The prospects of the Jews of Béziers darkened in the thirteenth century. In the bloody crusade that

the pope undertook against the Albigenses, the Jews had their share of suffering. In the **Thirteenth Century**, the ambitious Count Simon de Montfort marched against Raymond Roger, who was doubly hated by the pope for his secret friendship with the Albigenses and his protection of the Jews. On July 22, 1209, Béziers was stormed and the inhabitants massacred. Two hundred Jews lost their lives in this massacre, and a large number were driven into captivity. In consequence of the victory over Raymond Roger, the Church acquired a supremacy which it often used to molest the Jews. The council of Avignon (1209) and the Lateran council (1215) had

prescribed various restrictions upon the Jews; and the council held at Béziers in 1246 prohibited them from practising medicine. But these restrictive measures were not always carried out, and the Jews of Béziers could evade them more easily than those of other towns, since the Christian inhabitants of Béziers were more accustomed to tolerance; but as that evasion required heavy pecuniary sacrifices, this formerly flourishing community became gradually impoverished, and Philip le Bel in banishing them, Sept., 1366, in order to get hold of their property, must have been disappointed.

Béziers was a focus of Jewish learning. Abraham ibn Ezra visited it, and about 1155 wrote there his work, "Sefer ha-Shem" (Book of the Name), in which he mentions the names of the scholars Abraham ben Hayyim and Isaac ben Judah, to the latter of whom he gives the title "Prince." Benjamin of Tudela, who visited Béziers in 1165, praises the scholars Solomon Halafra and Joseph Nathan. The Talmudist Meshullam ben Moses, the author of "Sefer ha-Hashlamah" (Book of Completeness), lived in Béziers in the first half of the thirteenth century. In a responsum drawn up at Béziers, Solomon ben Asher and Joseph ben Gerton are mentioned as colleagues of Meshullam. Solomon ben Joseph ibn Ayub settled at Béziers at the request of several notables of the town, and translated from Arabic into Hebrew many philosophical works. The cabalist Jacob Cohen of Segovia stayed at Béziers at the end of the thirteenth century. Poetry was represented there in the persons of Abraham ben BEDERSI, who derived his name from the town, his son Jedaliah, Don Astruc Eleazar Azobi, and Meshullam Azobi.

**BHORUPKAR, SAMUEL BAPUJI:** Beni-Israel soldier; born near Bombay, India, about 1790. He entered the Fourth Bombay Regiment on Feb. 2, 1811. In 1813 he served with the Poona Brigade under Colonel Cooke, and in 1814 was engaged in Katyawar and on the banks of the Rumm against the Waghurs; in 1815 in Guzerat, at Bhuj, in Katyawar and Ookamundul; was present at the capture of the forts of Anjor, Kunkote, Dhingkee, and Joonkee; in 1816 was at Jamnuggur and Dwarka, and at the taking of Deesa, Palampur, Veeerumpur, and Kurrunjah; in 1817-18 served in the whole of the campaign in Malwa in pursuit of Holkar, and in 1819 was at the capture of the forts of Newtee and Raree in the southern Konkan. From 1821 to 1827 he was employed on various field services in Guzerat, at the taking of the fort Limbuj, and at Dongerpur, and subsequently in the southern Konkan on several occasions.

Bhorupkar was promoted to the rank of a jemidar Jan. 9, 1828, and to that of subedar on Dec. 28, 1833; was appointed subedar-major on Jan. 1, 1839; was admitted to the Second Class Order of British India, with the title of bahadur, on March 24, 1841; and retired from service Feb. 3, 1847.

**BIACH, ALOIS:** Austrian physician and medical writer; born in Lettowitz, Moravia, Austria, May 1, 1849. He was educated at the gymnasium at Brünn and at the University of Vienna. After graduating as M. D. in 1873, he established himself in Vienna, where he was appointed a member of the board of health. In 1883 he became privat-docent of medicine (*Innere Medizin*) at the university in that city. Biach has occupied the position of secretary to the society of physicians of Lower Austria.

In addition to his work on "Die Neueren Antipyretica," Vienna, 1889, he is the author of many essays, of which the following may be mentioned: "Ueber Aneurysmen an den Herzklappen," in "Jahrbücher der Gesellschaft der Aerzte in Wien," 1878; "Ueber Jaborandi und Seine Alkaloide," in "Mittheilungen des Vereins der Aerzte in Niederösterreich," 1879; "Versuche über die Physiologische Wirkung des Chinolins," in Virchow's "Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin," 1881; "Cirrhosis Hepatis mit Wandständiger Thrombose der Vena Portae und Vena Meseraica Superior," in "Mittheilungen des Vereins der Aerzte in Niederösterreich," 1884; "Entwicklung von Krebs des Magens auf der Basis eines Runden Magengeschwürs," in "Wiener Medizinische Presse," 1890.

**BIAL, RUDOLF:** Violinist, conductor, composer, and manager; born at Habelschwerdt, Silesia, Aug. 26, 1834; died at New York Nov. 13, 1881. He began his career as a violinist in an orchestra at Breslau, and then made a tour of Australia and Africa with his brother Karl, a pianist of distinction. On his return to Germany, Bial settled in Berlin, where he successively became orchestral director at Kroll's Theater; the Wallner Theater (1864), where many of his operettas, etc., were given; of Kroll's Opera House, where, for several years, the most distinguished artists of Europe sang under his management. Later, Bial was a concert agent in New York.

Bial was a prolific composer of operettas, farces, orchestral pieces, and dances; and several of his compositions enjoyed considerable popularity.

**BIALA.** See RUSSIA.

**BIALEH, ZEBI HIRSCH BEN NAPHTALI HERZ** (called *Harif*, "the keen"): Rabbi and Talmudist; born about 1670 at Lemberg, Galicia; died Sept. 25, 1748, at Halberstadt, Prussia. He conducted a Talmudic high school in his native city until 1718, when he received a call as chief rabbi to the rich community at Halberstadt. His humanity, gentleness, and unselfishness won him the love and admiration of the people as well as of his colleagues; and he became known as a Talmudic authority throughout Germany. Bialeh was particularly fond of teaching, and when he left Lemberg to go to Halberstadt eighteen of his pupils went with him. His attitude toward them was that of a brother; and he possessed a certain tolerance for the secular sciences, the study of which was then

beginning to make headway among the young Jews of Germany. Among his numerous pupils were Elhanan Ashkenazi, Isaiah Berlin, and Meir Barbi.

Bialeh was restrained by modesty from publishing any works; but he left several manuscripts, which are in the possession of some private persons in Halberstadt; and some of his approbations appeared in the works of his pupils and colleagues. Both in his writings and orally he denounced the prevalent exaggeration of the pilpulistic method; as, for instance, in his approbation to Jehiel Michael's "Nezer ha-Kodesh." In general he seems to have followed the logical method, and to have preferred the simple interpretation of the Talmud (see his responsum in Samuel ben Elkanah's "Mekom Shemucl," No. 5).

His sons were: **Solomon Dob Berush**, rabbi at Glogau; **Naphtali Herz**, rabbi at Dubno; **Abraham**, rabbi at Rawitsch; **Samuel**, assistant rabbi at Halberstadt; and **Simḥah**, rabbi at Dessau.

**BIALLOBLOTZKY, CHRISTIAN HERMANN FRIEDRICH:** Jewish convert to Christianity; born April 9, 1799, at Pattensen, near Hannover; died March 28, 1868, at Ahlden-on-the-Aller. Bialloblotzky studied Christian theology and philosophy, and received the degree of D. D. at the University of Göttingen in 1824, the subject of his thesis being "De Legis Mosaicæ Abrogatione." He wrote several works on Christian theology, and published the following on Jewish subjects: (1) "The Chronicles of R. Joseph ben Joshua Meir, the Sephardi," a translation of Joseph ha-Kohen's "Dibre Hayamim," published by the Oriental Translation Fund, in two volumes, London, 1834-36; (2) "Ozar ha-Shorashim, Lexicon Radicum Hebraicarum," in Hebrew and Latin, London, 1843; (3) "Sefer ha-Shorashim," a lexicon of the Hebrew roots, in Hebrew and English, *ib.*

**BIALYSTOK, LITHUANIA.** See BYELOSTOK.

**BIBAGO, ABRAHAM BEN SHEM-TOB** (*Bibaz* and *Bibas-Vivas* are corruptions of the name): Spanish religious philosopher and preacher; born at Saragossa; resided in 1446 at Huesca, and was still living in 1489. At the court of John II. of Aragon, he was, as he himself relates, engaged in controversy when only a young man with "a renowned Christian sage" on the dogma of the Trinity. Like Joseph ben Shem-Tob, his older countryman, he was familiar not merely with the entire Arabo-Judean philosophy, but also with Christian theology as presented in Latin. He studied the latter so as to be able to defend the Jewish faith in a scholarly manner. Bibago was not "a mere preacher who wrote philosophical homilies," as Grätz says ("Gesch. der Juden," viii. 227), nor "an opponent of philosophy," as Renan represents him

to be in his "Averroës et l'Averroïsme" (3d ed., p. 198), but a rational believer censuring in unsparring language those zealots that "cling only to the shell but reject the kernel, and pose as pious while vilifying a thinker such as Maimonides."

The writings of Bibago include: (1) "Derek Emunah" (The Path of Faith), his chief work, written toward the close of his life, and printed in 1521 at Constantinople. Like all his writings, it has, according to Steinschneider, not received the full recognition it deserves. It is, as the title suggests, a presentation and, at the same time, a

**His Defense of Judaism.** God and to eternal happiness. It is divided into three treatises, which are subdivided into divisions or parts (called "gates") and chapters. The first treatise deals with: (gate 1) the doings of God; (gate 2) His knowledge; and (gate 3) His providence. The second treatise deals with: (gate 1) the intellect; (gate 2) its nature and object; (gate 3) man's highest object; (gate 4) the blending of faith and knowledge—which topic is but slightly touched; (gate 5) the problem of matter and sin; (gate 6) the question whether Moses sinned; and (gate 7) the true faith. The third treatise deals with: (gate 1) the fundamentals of faith; (gate 2) miracles; (gate 3) creation of the world; (gate 4) ethics; and (gate 5) the special articles of faith. In the fifth part he warmly defends the creed of Maimonides against his antagonists; and his arguments were subsequently literally reproduced by Abravanel in his "Rosh Amanah." In this work, in which many Biblical and rabbinical passages are explained, he takes cognizance of Christian and Mohammedan theology. He quotes Greek philosophers like Plato, Aristotle, and Pythagoras; also Euclid and Ptolemæus, Galen and Themistius, as well as Arabic thinkers like Averroës, Avicenna, Alfarrabi, and Gazzali, and even the fable-book "Kalila we-Dimna." Of Christian writers he quotes Eusebius; and of Jewish writers often not only Maimonides, Nahmanides, and other philosophers, but also cabalistic works like the "Bahir," the "Zohar," "Sefer Yezirah," and the "Hekalot." He indorses a saying of a sage that "Reason and Religion are the world's two luminaries"; and he strongly opposes prayers "addressed to angels or to the departed, a practise customary among the Christians."

Isaac Arama, Bibago's contemporary, used the book freely. Joseph Solomon del Medigo, the well-known physician and writer, speaks with warm praise of the work, though he complains that the Cabala had crept into it. But the fact must be taken into consideration that, as Steinschneider says, "the cabalists at the close of the thirteenth century had made philosophy the handmaid of the Cabala, and this caused the philosophers on their part to take into consideration the writings and the ideas of the Cabala that had grown into prominence." It is true that Jacob ibn Habib, in his "En Ya'akov" at the close of Berakot, censures Bibago for putting constructions upon the Biblical texts that they could not bear; nevertheless he praises "the beauty of these interpretations, which insinuate themselves into our hearts."

(2) "Ez Hayyim" (Tree of Life) deals with creation, and has for its object the refutation of the arguments advanced by Aristotle, Averroës, and others in favor of the eternity of the world. The

author quotes this treatise three times in the "Derek Emunah" and gives a fair insight into it. (3) A homily on Gen. v. 29, "Zeh Yenaḥemenu," published at Salonica in 1522, treats also of creation and the Sabbath; but is not, as is stated by Michael ("Or ha-Hayyim"), part of "Ez Hayyim" (see Steinschneider, "Monatsschrift," 1883, p. 95). (4) From quotations in the "Derek Emunah" it appears that Bibago wrote a work under the title of "Maḥazeh Shaddai," treating of the belief in resurrection. (5) A work on sacrifice as means of communion with God. (6) A refutation of the objections raised by Nahmanides against Maimonides. (7) "Ma'amar 'al Ribbui ha-Zurot," a treatise on "The Plurality of Forms, Particularly in Man"—Paris manuscript 1004, though without his name. (8) Two philosophical letters to Moses Arondi. (9) A compendium of therapeutics after Galen; besides a number of philosophical works in the form of commentaries to Averroës. (10) A commentary on Averroës' work on logic, "Demonstration" (דַּמוּסְטְרוֹס), written at Huesca in 1446, exists in manuscript, Vatican and Paris. In this work Bibago defends Averroës against Levi ben Gerson. (11) A commentary on Averroës' "Physics," referred to in (12) a commentary on Averroës' "Metaphysics"—still extant in manuscript at Munich. In the introduction he deplors the lack of philosophical research among his coreligionists, who are unable to defend their faith against Christian scholars that study philosophy and science in their schools; and in view of this deficiency he undertook the explanation of Aristotelian metaphysics, however much opposed

**Encourages Philosophical Study.** it was to the pure and sacred ancestral faith. This work shows familiarity not only with all Arabic philosophers, but also with Boethius, with the works of Duns Scotus and Occam, known to him probably through the translation of Elijah Habbilo, and with Nicholas Bonettus, a Spanish monk who lived in 1486. Without originality of thought, Bibago nevertheless represents, says Steinschneider, "that class of learned and productive writers which Spanish Judaism produced at the close of a brilliant epoch."

S. B.—K.

**BIBEL'SCHE ORIENT, DER:** A magazine of which only two numbers appeared (Munich, 1821), these being supposed to be edited by Isaac Bernays. Its object, as stated in the first announcement, April 24 (the second bears date of Aug. 12, 1812 [1821]), was "to exhibit the spirit of the sacred books in all their purity and clearness, but without any learned verbosity, and to determine the rank of these fiery utterances from olden times as well-defined expressions of the human soul, aside from

their strongly marked peculiarities and their value as important historical documents."

"Der Bibel'sche Orient," whose style is dark, mystical, and confused to a degree, carries mythology into the Scriptures: it betrays the influence of Schelling's quaint philosophy. While regarding the Bible and the development of the Jews from a world-historical point of view, its editor comes to the conclusion that all religions can manifest themselves only by exerting reformatory influences. Though looking with contempt upon Mendelssohn and his disciples, the author was even more in favor of the Reform movement than were the latter.

"Der Bibel'sche Orient" attracted considerable attention upon its first appearance, but was soon forgotten.

**BIBLIOGRAPHY:** Zunz, *Zeitschrift für die Wissenschaft des Judenthums*, pp. 177-196; Grätz, *Gesch. der Juden*, ii. 428. G. M. K.

#### **BIBIKOV, DMITRI GAVRILOVICH:**

Russian soldier, administrator, and statesman; born 1792; died 1870. In 1837 Bibikov was appointed military governor of Kiev, and governor-general of Volhynia and Podolia. During the fifteen years of his administration of the southwestern provinces, he more than once resorted to harsh measures with regard to the Jews who were directly or indirectly involved in the Polish agitation, for the suppression of which he was responsible. Hence his marked animosity, especially toward the Jews of Berdychiv, which city was at that time one of the centers of Polish revolutionary intrigues, and in which a secret branch of the Polish national bank was established. While attacking abuses, Bibikov nevertheless manifested on many occasions a spirit of consideration for the educated Jews. It was due to his remonstrations with the government of Nicholas I. that several severe restrictive laws were relaxed in behalf of the Jews. Such were the measures allowing Jewish residents of the government of Kiev to visit that city for business purposes; that annulling the order of the Jitomir authorities which prohibited the Jewish blacksmiths in Jitomir from following their trade; that permitting the Jews of Starokonstantinov, Zaslav, Ostrog, and Kovno to obtain passports and gild certificates from the local district treasuries instead of procuring them from Novogradvolynsk; that granting to Jewish merchants of the first gild the right to farm inns in crown dominions of the western provinces; and that permitting the Jews to elect from their own number city brokers and notaries public in places where the population consisted of both Jews and Christians.

In 1852 Bibikov was made minister of the interior, which post he filled until 1855. It seems that in this capacity he became more than ever imbued with the prevailing anti-Jewish spirit of Nicholas' régime. In one case, at least, his name is mentioned in connection with a measure prohibiting the Jews from living in certain parts of Jitomir, the restriction being promulgated in compliance with Bibikov's proposition. His brother, Iliá Gavrilovich Bibikov, governor-general of Wilna, was favorably disposed toward the Jews, and was interested particularly in

their educational affairs. The Hebrew poet Abraham Baer LEBENSOUX composed a poem, "kol Ne'urim," commemorating his visit to the Wilna Talmud Torah, which was published in his "Shire Sefat Kodesh," ii. 85, Wilna, 1869.

B. B.

**BIBLE CANON:** § 1. The Greek word *κανών*, meaning primarily a straight rod, and derivatively a norm or law, was first applied by the church fathers (not earlier than 360) to the collection of Holy Scriptures, and primarily to those of the so-called Old Testament (Credner, "Zur Gesch. des Canons," pp. 58-68). But although the older Jewish literature has no such designation for the Biblical books, and it is doubtful whether the word was ever included in the rabbinical vocabulary,

**Meaning and Scope.** it is quite certain that the idea expressed by the designation "canonical writings" (*γραφαὶ κανονικαί*), both as including and as excluding certain books, is of Jewish origin. The designation "Apocrypha" affords a parallel instance: the word is Greek; the conception is Jewish (compare the words "Genuzim," "Genizah").

The idea of canonicity can only have been suggested at a period when the national literature had progressed far enough to possess a large number of works from which a selection might be made. And the need for such selection was all the more urgent, since the Jewish mind occupied itself in producing exclusively writings of religious import, in which category, however, were also included various historical and didactic works. Which writings were included in the recognized collection, and in what manner such collection was made, are questions belonging to the history of the canon, and are discussed in this article; the origin and composition of the separate books come under the history of Biblical literature.

§ 2. The oldest and most frequent designation for the whole collection of Biblical writings is ספרים

"Books." This word, which in Dan. ix. 2 means all the sacred writings, occurs frequently in the Mishnah, as well as in traditional literature, without closer definition. The expression ספרי הקדש ("Holy Books") belongs to later authors. It is employed first by the medieval exegetes; for instance, Ibn Ezra, introduction to "Yesod Morah" and "M'ozne Lashon ha-Kodesh"; see also Neubauer, "Book of Tobit," 43b, Oxford, 1878; Grätz, "Gesch. der Juden," 3d ed., vii. 384; Margoliouth, "Cat. Hebr. and Samaritan MSS. Brit Mus.," Nos. 181, 193; and elsewhere infrequently, but never in Talmud or Midrash. This fact goes to show that the ancients regarded the whole mass of the national religious writings as equally holy. The Greek translation of the term is τὰ βιβλία, which (as may

be seen from the expressions *καὶ τὰ λοιπὰ τῶν βιβλίων* and *καὶ τῶν ἄλλων πατρῶν βιβλίων* is used by the grandson of Sirach in the introduction to Ecclesiastics (Sirach) to designate the whole of the Scriptures.

The canonical books, therefore, needed no special designation, since originally all were holy. A new term had to be coined for the new idea of non-holy books. The latter were accordingly called **ספרים היצויים** ("outside" or "extraneous books"); that is, books not included in the established collection (Mishnah Sanh. x. 1)—a distinction analogous to that afterward made, with reference to the oral law itself, between "Mishnah" and "Out-  
**Outside**" side-Mishnah (**מישנה היצויה ומיטנה**) or its Aramaic equivalent **בריתא**, "Baraita"). Possibly this designation was due to the fact that the Apocrypha, which in popular estimation ranked nevertheless with religious works, were not included in the libraries of the Temple and synagogues (for illustration of this see Books, and Blagov, "Zur Einleitung in die Heilige Schrift," i. *et seq.*). Another designation, **מקרא** ("that which is read"), applied to the whole of Scripture, is founded upon the custom of reading the Holy Scriptures to the people on Sabbaths and holidays; it is a term frequently opposed to **מישנה** and **מדרש**, which designate oral teaching (Ned. iv. 3; Kid. i., end; Abot v., end). A third designation is **כתבי הקדש** ("Holy Scriptures," Shab. xvi. 1; B. B. i., end, and elsewhere), the Greek equivalents of which are *γραφαὶ ἁγίαι* (Rom. i. 2) and *ἑρὰ γράμματα* (II Tim. iii. 15). This term indicates, not the writings belonging to the sanctuary, nor of Israel (Geiger, "Nachgelassene Schriften," iv. 12), but holy writings in contradistinction to profane works (**כתבי הקדש** and **כתבי הייט**, Toscf., Yom-Tob. iv.; ed. Zuckermundel, p. 207, 12), perhaps works inspired by the Holy Spirit. This interpretation is also favored by the expression *πᾶσα γραφή θεόπνευστος* (II Tim. iii. 16; compare Eusebius, "Eclogie Prophetice," ed. Gaisford, p. 106).

A fourth designation for the entire Bible is **תורה** ("Law") (Mek., Beshallah, 9; ed. Friedmann, pp. 34b, 40b; Pesik. R., ed. Friedmann, 9a, and elsewhere), also found in the New Testament under the form *νόμος* (John x. 34; II Esdras xix. "Torah." 21). This designation owes its origin to the opinion that the entire Holy Writ is the Word of God, and that the Prophets and the Hagiographa are included in the Torah (see below). It is also possible that, since "Torah" was the title of the first and principal part of the Biblical writings, it was transferred to the entire collection.

The fifth designation, **כתוב** (literally, "it is written"), frequently found personified (as, for instance, **הכתוב אומר**, etc.) ("the 'Katub' saith"; compare Bacher, "Aelteste Terminologie der Jüdischen Schriftauslegung," p. 90), is, strictly speaking, an abbreviation, and should be supplemented with the name of the book in which "it is written." The Greek equivalent is *γραφή*; *πᾶσα γραφή* (II Tim. iii. 16), a translation of **כל הכתוב**, which, strange to say, is found in the works of Profiat Duran, though certainly it is very old. The sixth designation is **דיאθήκη**

("covenant"), from which the term *παλαια διαθήκη* (*Vetus Testamentum* = Old Testament) in the Christian Church has been derived. Even **Testament**. in Eccles. (Sirach) xxiv. 23 the Pentateuch is called *βιβλος διαθήκης*, and the term **הברית ספר** ("Book of the Covenant," Ex. xxiv. 7; II Kings xxiii. 2, 21) is similarly translated in the Septuagint. Though "diathēkē," like "Torah," came to be applied to Holy Writ (first by Paul, II Cor. iii. 14; compare Matt. xxvi. 28), the expression **ספר הברית** ("Book of the Covenant") is never found with this significance in Jewish tradition, except in an apparently polemic utterance of Simon ben Yoḥai (about 150), where a reference to the name "diathēkē" for the Torah occurs (Yer. Sanh. 20c; Lev. R. xix.). In all probability this designation, which, like the term "Old Testament," involves a Christian point of view, was used very rarely. In post-Talmudic times other designations were employed; e.g., **עשרים וארבעה ספרים** ("The Twenty-four Books") (see G. Margolionth, "Cat. Hebr. and Samaritan MSS. Brit. Mus.," i. 22b, 25a, 27a, 35a); **מהזור** ("the cycle," in the Masorah; in a codex of the year 1309; and in Ginsburg, "Introduction," p. 564); **מקדשיה מקדשיה** (Ginsburg, *l.c.* p. 748). Medieval authors called the Holy Writ also **פסוק**, which originally meant "verse"

**Other Ex-** (Bacher, "Rev. Etudes Juives," xvi. **pressions.** 278). Another very common designation is **ת. נ. כ.**, the initials of **תורה נביאים כתובים** ("Law, Prophets, and Holy Writings"), an expression frequently occurring in Talmud and Midrash. A similar acrostic name is **כ. נ. כ.**, an abbreviation of the words **אורייתא נביאים כת**. In the Middle Ages these mnemonic terms were conveniently regarded as real words, and received translations; namely, "ear-tips" and "plumb-line" respectively.

In the Mishnah (compare Yad. iii. 5) the canonicity of the Holy Books is expressed indirectly by the doctrine that those writings which are canonical "render the hands unclean." The term connoting this quality, **מטמאין את הידים**, thus comes very near to the technical equivalent for the word "canonical." The nature of the underlying conceit is not altogether clear. It is most likely that it was meant to insure greater caution against the profanation of holy scrolls by careless handling or irreverent uses (Yad. iv. 6; Zab. v. 12; Shab. 13a, 14a). It is an open question whether this capacity to render "the hands unclean" inhered in the scroll kept in the Temple. It appears that originally the scroll in the Temple rendered food unclean; while only outside the Temple were hands made unclean (Kelim xv. 6; R. Akiba, Pes. 19a). At all events, the term **מטמא את הידים** was extended to all the writings included in the canon, and designated ultimately their canonical character or its effects as distinguished from non-canonical books (Yad. iii. 2-5; iv. 5, 6; Toscf., Yad. ii. 19; Blau, *l.c.* pp. 21, 69 *et seq.*; Friedmann, "Haggoren," ii. 168, but incorrect).

§ 3. The Jewish canon comprises twenty-four books, the five of the Pentateuch, eight books of the Prophets (Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, the Minor Prophets), and eleven Hagiographa (Psalms, Proverbs, Job, Song of Solomon, Ruth, Lamentations, Ecclesiastes, Esther,

Daniel, Ezra, and Chronicles). Samuel and Kings form but a single book each, as is seen in Aquila's Greek translation. The "twelve"

**Contents and Divisions.** prophets were known to Ecclus. (Sirach) as one book (xliv. 10), and the separation of Ezra from Nehemiah is not indicated in either the Talmud or the Masorah. A Bible codex written in Spain in 1448 divides Samuel, Kings, and Ezra into two books each (Ginsburg, *l.c.* p. 586). These books are classified and arranged into three subdivisions, "Torah," "Prophets," and "Hagiographa"; Greek, *νομος και προφηται και αλλα βιβλια* (Ecclus. [Sirach]). In Yalk. ii. 702 they are styled as abstracts. "Law, Prophecy, and Wisdom." תורה נבואה חכמה; compare Yer. Mak. 31d. below, and Blau, *l.c.* p. 21, note. The division of the Prophets into נביאים ראשונים ("Earlier Prophets") and נביאים אחרונים ("Later Prophets") was introduced by the Masorah. By the former expression the Talmud understands the older Prophets, such as and Later Prophets. Propiets, Haggai, Zechariah, and Malachi (see Sifre, Deut. ii. 27, 357; Yer. Ber. 8d, 23, etc.). In contradistinction to the last three, Samuel, David, and Solomon are sometimes called the old Prophets (Soṭah 48b, top). The entire Holy Writ is also designated by the term "Torah and Prophets" (R. II. iv. 6; compare Meg. iv. 5; Tosef., B. B. viii. 14; Sifre, Deut. ii. 218), and the same usage is found in the New Testament (Matt. v. 17, vii. 12, xxii. 40; Luke xvi. 16, 29, 31). The abstract terms "Law and Prophecy" are found once in Pesik., ed. Buber, 111a.

Another division is that into "Torah and Kabbalah" found in Ta'an. ii. 1; Tosef., Niddah, iv. 10; Sifre, Num. i. 112, 139; "Kabbalah" signifying tradition, which is regarded as having been carried on by the Prophets. The Aramaic equivalent for קבלה is השלמה, the Masoretic name for the Prophetical Books, and Hebraized as שלום by Ben Asher ("Dikduke ha-Te'amim," p. 2).

Still another division is "Torah" and "Mikra." In Sifre, Deut. ii. 317 "Mikra" is used as a general term for the Prophets and the Hagiographa—a usage which may also underlie Gen. R. xvi. (ed. Wilna, 75b) and Cant. R. xvi. 6. below (see, however, Bacher, "Aelteste Terminologie," cxviii. 7). The Midrash on "plena et defectiva" opposes "Torah" to "Mikra" (Berliner, "Peletat Soferim," p. 36), as does also Ben Asher (Blau, "Masor. Untersuchungen," p. 50). The Masorah and Spanish authors use the word in the same sense (Bacher, *l.c.* pp. 118 *et seq.*; also in "Hukke ha-Torah," in Guedemann, "Gesch. der Cultur der Juden in Deutschland," p. 268), and it probably came to have this meaning because it is abbreviated from the expression שאר נבואה, "the remaining Mikra."

The third division, "the Holy Writings," may have received its name in a similar way. Originally, the whole Bible was called "Holy Writings," but subsequently men perhaps spoke of the "Law and the Prophets," and the "other holy writings," and finally briefly of the "Holy Writings." Similarly, the current name "Ketubim" (Writings) is

probably also an abbreviation of the fuller expression, "the other writings," or the "Holy Writings." This etymology is supported by the usage of Sirach's grandson, who calls the Hagiographa τα λοιπα των βιβλιων, and of Ben Asher a thousand years later, who speaks of "the Law, the Prophets, and the other books" (*l.c.* 44; emended text in Blau, "Zur Einleitung," xxix. 3). This is not the only instance of Asher's fidelity to older traditions. Characteristic evidence of the threefold division may be noted in the following citations:

"In the New-Year's prayers, ten passages of the Bible (from the Torah, Prophets, and Hagiographa) must be introduced at least three times" (Tosef., R. H. iv. 6). "Ben Azzai connected the words of the Torah with those of the Prophets, and the latter with those of the Hagiographa" (Yer. R. xvi. 3). "This is the progressive method of studying: first, a primer (passages of the Pentateuch) is read; then the Book (ספר, Torah), then the Prophets, and finally the Hagiographa. After completing the study of the entire Bible, one took up the Talmud, Halakah, and Haggadah" (Deut. R. viii. 3). "To be considered conversant with the Bible one had to be able to read accurately the Torah, Prophets, and Hagiographa" (Kid. 49a). "Just as the Torah is threefold, so Israel is threefold, consisting of priests, Levites, and Israelites" (Pesik., ed. Buber, 165a). "Blessed be God, who gave the threefold teachings to the threefold nation, by three persons on the third day of the third month" (shab. 88c). In answer to the question of the Sadducee, concerning the Biblical basis for the belief that God causes the dead to rise, the patriarch Gamaliel sought proof "in Torah, Prophets, and Holy Writings" (sanh. 90b). This doctrine is written in the Torah, repeated in the Prophets, and a third time in the Hagiographa (Meg. 31a; compare Mak. 10b, 15). Hanina set up the rule that "kesef" (silver) means simply a "selah" in the Torah, a "litra" in the Prophets, and a "talent" in the Holy Writings (Bek. 50a; Yer. Kid. 59d; see also M. K. 21a; Ta'an. 30a; Sanh. 101a).

For passages of similar import from the Jerusalem Talmud and from the Midrash, see Blau, "Zur Einleitung," xxii. 5, xxiii. 1.

§ 4. Tannaite literature makes no mention anywhere of the number of the Biblical books, and it does not seem to have been usual to pay attention to their number. This was felt to be of importance only when the Holy Writings were to be distinguished from others, or when their entire range was to be explained to non-Jews. The earliest two estimates (about 100 C.E.) differ. II Esdras xiv. 44-46 gives the number as 24; all variant readings of the passage (94, 204, 84, 974 books) agree in the unit figure, 4.

Epiphanius' division of the number 94 into 72 + 22 ("De Ponderibus et Mensuris Liber," in Lagarde, "Symmicta," ii. 163) is artificial. Josephus expressly puts the number at 22, as does Origen (Eusebius, "Hist. Eccl." ii. 25); while Jerome (Preface to Samuel and Kings) mentions 22, but nevertheless counts 24. Since both of these church fathers studied under Jewish teachers, it is probable that some authorities within the synagogue favored counting 22 books; and the hesitation between 22 and 24 can be explained by a Baraita (B. B. 13b), according to which each book of the latter two divisions (Prophets and Hagiographa) had to be written separately as one roll. Since Ruth with Judges or with Psalms (Jerome, and Baraita B. B. 14b) might form one roll, and Lamentations with Jeremiah another, the rolls would be counted as 22, while the books were actually 24. That there were 24 books will be apparent from the classical Baraita on the

**The Hagiographa.**

question (see § 5 of this article). But in more than ten passages of the Midrash 24 books are expressly mentioned; and the authorities adduced are exclusively amoraim. Simeon ben Lakish (about 250) compares the books with the 24 ornaments of a bride (Isa. iii. 18-24); saying that just as the bride must be decorated with 24 ornaments, so the scholar must be adorned with the knowledge of all the 24 books (Ex. R. xli. 5; Tan., Ki Tissa, xi., ed. Buber, p. 111; Cant. R. iv. 11). R. Berechiah compares them with the 24 divisions of the priests and Levites and with the 24 nails driven into sandals (Num. R. xiv. 4, xv. 22; Eccl. R. xii. 11; Pesik. R. ix. a, ed. Friedmann); while, according to Plinias ben Jair (beginning of third century), the 24 books (Num. R. xiv. 18) correspond to the 24 sacrificial animals (Num. vii.). The fact that the 24 books of the written Law and the 80 of the oral tradition make up 104 (Num. R. xiii. 16) recalls the number of the books mentioned in II Esdras. Counting the Minor Prophets as 12, the number 35 is obtained (23 + 12), as in Num. R. xviii. 21 and Tan., Korah, ed. Stettin, 552.

For the understanding of the concept of a canon, the following passages, literally rendered, are especially important:

Eccl. xii. 12 teaches: "And further, my son, be admonished by these [understood as reading "against more than these, my son, be cautioned against confusion"; the Hebrew "mehemah" (more than these) being read "mehumah" (confusion)] that he who brings more than twenty-four books into his house brings confusion. Thus, the books of Ben Sira or Ben Tigra may be read, but not to the degree of 'weariness of the flesh'" (Eccl. R. on the passage).

"And further, by these, my son, be admonished," saith God: "Twenty-four books have I written for you; take heed to add none thereto." Wherefore? Because of making many books there is no end. He who reads one verse not written in the twenty-four books is as though he had read in the 'outside books'; he will find no salvation there. Behold herein the punishment assigned to him who adds one book to the twenty-four. How do we know that he who reads them wears himself in vain? Because it says, 'much study is a weariness of the flesh' (Eccl. xii. 12), from which follows, that the body of such a one shall not arise from the dust, as is said in the Mishnah (Sanh. x. 1), 'They who read in the outside books have no share in the future life'" (Num. R. xiv. 4; ed. Wilna, p. 117a; compare also Pesik. R. ix. a and Yer. Sanh. xxviii. a).

The chief difference between these two passages is that in the first only the "weariness of the flesh," that is, the deep study (but not the reading) of other than the Holy Writings, which were learned by heart, is forbidden; while in the second passage the mere reading is also forbidden. The older point of view is undoubtedly the milder, as the history of the book of Ecclesiastes (Sirach) teaches. The Babylonian teachers represented the more liberal view (compare Sanh. 100a and Yer. Sanh. xxviii. a, 18).

There is probably an allusion to twenty-four books in Yer. Sanh. xx. d, 4 and Gen. R. lxxx., beginning. The Babylonian Talmud (Ta'an. 8a) mentions 24; Targ. to the Song of Solomon v. 10 the same. Dosa ben Eliezer, in a

**The**  
**"Twenty-four"**  
**Books.**  
 very old Masoretic note; Ben Asher ("Dikduke," pp. 5 [line 12], 56); Nissim of Kairwan (Talmud (Steinschneider "Festschrift," Hebrew section, p. 20, below); and many medieval writers and codices count twenty-four books. The number 24 was also known in ancient times in non-Jewish

circles (Strack, in Herzog, "Real-Encyc. für Protestantische Theologie und Kirche," ix.<sup>3</sup> 757).

§ 5. The classical passage for the sequence of the books is the Baraita in B. B. 14b. With **Sequence.** the exclusion of interjected remarks chronicled there, it runs as follows:

"The sequence of the Prophets is Joshua, Judges, Samuel, Kings, Jeremiah, Ezekiel, Isaiah, the 12 [minor] prophets; that of the Hagiographa is Ruth, Psalms, Job, Proverbs, Ecclesiastes, Song of Solomon, Lamentations, Daniel, Esther, Ezra, Chronicles. Who wrote the books? Moses wrote his book, the section of Balaam and Job; Joshua wrote his book, and the last eight verses of the Torah; Samuel wrote his book, Judges, and Ruth; David wrote the Psalms, by the hand of the ten Ancients; namely, through Adam (Psalm cxxxix. 16, perhaps also xlii.), through Melchizedek, Ps. cx.; through Abraham, Ps. lxxxix. (אברהם explained to = Abraham); through Moses, Ps. xc.; through Heman, Ps. lxxxviii.; through Jeduthun, Ps. lxxii.; perhaps lxxvii.; through Asaph, Ps. l., lxxxiii.-lxxxviii.; and through the three sons of Korah, Ps. xlii., xlix., lxxxviii., lxxxiv., lxxxv., lxxxviii. [The question whether Solomon should be included among the Psalmists is discussed in Tosafot 15a.] Jeremiah wrote his book, the Book of Kings, and Lamentations; King Hezekiah, and his council that survived him, wrote Isaiah, Proverbs, Song of Solomon, and Ecclesiastes; the men of the Great Synagogues wrote Ezekiel, the Twelve Prophets, Daniel, and Esther. Ezra wrote his book and the genealogy of Chronicles down to himself."

From the fact that in this account of the authors Moses is mentioned as the author of the Torah, it may be inferred that in the collection from which the Baraita is cited the sequence also of the five books of the Torah was probably given. But it is also possible that the Pentateuch, from its liturgical use in the synagogue, was so familiar as to be regarded almost as a single book, of the separate parts of which no enumeration was necessary.

The most striking sequence in this passage is that of the Prophets, given as Jeremiah, Ezekiel, and Isaiah, a sequence commented on

**Prophets.** in the Talmud. There it is explained that this is because the Book of Kings ends with destruction, Jeremiah begins and closes with destruction, Ezekiel begins with destruction and ends with consolation, while all of Isaiah consists of consolation. Thus, destruction appropriately follows upon destruction, and consolation upon consolation. The artificiality of this interpretation needs no explanation; but it must be remarked that such sequence is not chronological. The clearest explanation is that of Strack, who claims that the Baraita evidently arranged the prophetic books according to their size, a principle apparently followed also in the arrangement of the Mishnah treatises. According to their length, Jeremiah, Ezekiel, Isaiah, and the twelve Prophets stand to one another in the ratio of 41, 36, 32, and 30. The same principle is apparent in the sequence of the older Hagiographa, where the insertion of Job between the Psalms and Proverbs (the works of father, David, and son, Solomon) is particularly noticeable. Since the Baraita regarded Moses as the author of Job, this book might quite appropriately have been placed at the head of the Hagiographa, as was indeed recommended by the Talmud. Now, according to their lengths, the Psalms (with Ruth), Job, and Proverbs stand to one another in the ratio of 39, 15, and 13; and Job, therefore, follows Psalms. The sequence of the three Solomonic books, wherein the placing of

Ecclesiastes before the Song of Solomon is especially remarkable, illustrates the same principle of arrangement, the largest being placed first.

The author of Ecclesiasticus (Sirach) has the chronological order of the modern Bible: Isaiah, Jeremiah, Ezekiel, and the twelve (Minor) Prophets (see

miah, and Ezekiel; three manuscripts agree with the Talmud, while two have the following peculiar order, Jeremiah, Isaiah, and Ezekiel (Ginsburg, *l.c.* p. 6).

Ginsburg (*l.c.* p. 7) has collected, in the following table, eight varying sequences of the Hagiographa:

VARYING SEQUENCES OF THE HAGIOGRAPHA.

	I.	II.	III.	IV.	V.	VI.	VII.	VIII.
	Talmud and six MSS.	Two MSS. Paris and London	Add. 15252	'Adat Debarim and three MSS.	Ar. Or. 16	Or. 2626-28.	Or. 2201	Five early editions.

Ecclus. [Sirach] xlvi. 22; xlix. 6, 8). Since the Baraita does not enumerate the books according to the succession of their origin and their age (even within the divisions of Prophets and Hagiographa), it must have considered only the order of Biblical writings so far as they belonged to the same section and were therefore to be written in one roll. Since (as is apparent from B. B. 13) the question which books were permitted to be included in one roll, or whether each book had to be written separately in one roll, was much discussed in the second century, the above-mentioned Baraita, which was also current in Palestine (see Yer. Talmud, Soṭah v., end), may well be assigned to the second century; and there is no justification for considering it of older date. But this much is surely ascertainable from this Baraita, that the first half of the prophetic canon (Joshua-Kings) had a fixed sequence dating from preceding times, and concerning which there was no doubt. That is to say, these four books

follow one another and, continuing the

**The Earlier Prophets.** This is seen from II Macc. ii. 13, where, in mentioning the books "concerning the Kings and Prophets," the prophetic canon is divided into two parts. In post-Talmudic times, also, there is no variation in relation to the sequence of Joshua, Judges, Samuel, and Kings; while the order of the Greater Prophets is irregular, the only uniformity preserved being in placing the Minor Prophets invariably at the end. Most of the manuscripts (including the St. Petersburg codices, which, dating from the years 916 and 1009, are the oldest known), and the oldest five editions, have the generally adopted chronological order, Isaiah, Jere-

A closer examination of the table reveals that actually three arrangements only are given; for Nos. i., ii., iii., and vii. differ only in regard to the position assigned to the Five Rolls, and represent the Talmudic arrangement; the five early editions also follow this sequence, but have the Five Rolls in the order followed in the liturgy, and put the Psalms, instead of Job, after Proverbs; Nos. iv. and v. vary only in regard to Ruth. No. vi., however, is entirely unique, apparently arranging the books according to their size, if Ezra and Nehemiah be considered as two books.

**Hagiographa.**

The Five Rolls, however, form a class by themselves, and follow the order, in which they are employed on successive festivals, in the liturgy. Leaving out of account this last-mentioned sequence, two types remain: the Talmudic and the Masoretic. The most striking point of difference is the position assigned to the books of Chronicles, which are placed in the Talmud at the end, but in the Masoretic text at the beginning. The Talmudic sequence is chronological; the Masoretic considers the size of the books. In regard to the Five Rolls

**The Five Rolls.** of which Ginsburg [*l.c.* p. 4] gives a table showing five lists of varying order), it should be noted that, in reality, they show only two sequences: one following the chronology of the authors; the other, the liturgical custom of the synagogue ("Jew. Quart. Rev." xii. 223). These variations in the order of the last Prophets and of the Hagiographa—particularly the latter—are significant for the history of the canon; for they show that these writings acquired canonical importance at a later period than the first Prophets and the Law. Owing to the

of which Ginsburg [*l.c.* p. 4] gives a table showing five lists of varying order), it should be noted that, in reality, they show only two sequences: one following the chronology of the authors; the other, the liturgical custom of the synagogue ("Jew. Quart. Rev." xii. 223). These variations in the order of the last Prophets and of the Hagiographa—particularly the latter—are significant for the history of the canon; for they show that these writings acquired canonical importance at a later period than the first Prophets and the Law. Owing to the

earlier canonization of these latter, their sequence was so firmly established as never to give rise to question.

§ 6. The most radical criticism agrees that the Torah is the first and oldest part of the canon. The narrative of Neh. viii.-x., which describes an actual canonization, is of prime importance for the history of the collection of the Holy Writings.

**Collection.** It is thus generally agreed that in the middle of the fifth century B.C. the first part of the canon was extant. There is no foundation for the belief that, according to Neh. viii.-x., the Pentateuch was not fully completed until that date. The opinions of the synagogue will be discussed later; here only external testimony concerning the canonization will be considered. Perhaps the last three verses of the Book of Malachi, the last prophet, are to be considered as a kind of canonization. The warning concerning the teachings of Moses, and the unusually solemn words of comfort, make it seem probable that herein is intended a peroration not only to the speeches of the last prophets, but also to the whole twofold canon, the Law and the Prophets. These verses could not have come from Malachi; but they may very probably have been added by another anonymous prophet, or by some appropriate authority, in order to let the words of the Holy Scriptures conclude with a Divine reminder of the Torah, and with a promise of great comfort. Another example of what may be called "canonical ending" for the entire Holy Writ may be seen (N. Krochmal, "Moreh Nebuke ha-Zeman," viii., No. 11) in the last three verses of the Book of Ecclesiastes. This declamation against the makers of books sounds like a canonical closing; and it was really considered such by the oldest Jewish exegetes (see above, § 4). The admonition to keep the Commandments, and the threat of divine punishment, may be compared to the reminder of the Torah and the idea of punishment in Malachi.

While there are no other evidences in Holy Writ itself of a collection of the Holy Writings, there are some outside of it, which, in part, may now be mentioned in chronological order. The author of the apocryphal book Ecclesiasticus (Sirach) was a contemporary of the high priest Simon—either the first or the second of that name—who lived at the beginning or at the end of the third century B.C. He knew the Law and Prophets in their present form and sequence; for he glorifies (ch. xlv.-xlix.) the great men of antiquity in the order in which they successively follow in Holy Writ. He not only knew the name שנים עשר הנביאים ("The Twelve Prophets"), but cites Malachi iii. 23, and is acquainted with by far the greatest part of the Hagiographa, as is certain from the Hebrew original of his writings recently discovered.

**Evidences covered.** He knew the Psalms, which he ascribes to David (Eccles. [Sirach] xlvii. 8, 9), and the Proverbs: "There were those who found out musical harmonies, and set forth proverbs [A. V., "poetical compositions"] in writing" (xlv. 5). An allusion to Proverbs and probably to the Song of Solomon is contained in his

words on King Solomon: "The countries marveled at thee for thy songs, and proverbs, and parables [or "dark sayings"], and interpretations" (xlvii. 17); the last three words being taken from Prov. i. 6, while the Song of Solomon is alluded to in "songs." He would have had no authority to speak of "songs" at all from I Kings v. 12; he must have known them. While he had no knowledge of Ecclesiastes, his didactic style proves that he used Job, as is also indicated by the words חכמי ישר בספרתם (xlv. 4, and afterward, ומיטלים). Ecclesiastes, Esther, and Daniel are not included in his canon (see Halévy, "Etude sur la Partie du Texte Hébreux de l'Ecclésiastique," pp. 67 *et seq.*, Paris, 1897); he considers Chronicles and Ezra-Nehemiah as Holy Scripture (xlix. 12 = Ezra iii. 2; xlix. 13 = Neh. iii. and vi.; compare Neh. vi. 12); he mentions distinctly "the laws and prophets" (xxxix. 1); in the following sentences there are allusions to other writings; and verse 6 of the same chapter leads to the supposition that in his time only wisdom-writings and prayers were being written.

The grandson of Sirach (132 B.C.), who translated his ancestor's wisdom from Hebrew into Greek, tells in his preface no more about the canon than is apparent from the book itself; but he tells it more clearly. He mentions three times the Torah, Prophets, and "other writings;" he knew no "terminus technicus" for the canon's third part, as one was not coined until two hundred years later. In the original these passages are respectively as follows: *δια τοῦ νόμου καὶ τῶν προφητῶν καὶ τῶν ἄλλων τῶν κατ' αὐτοῖς ἠκολούθηκόντων δεδομένων . . . εἰς τε τὴν τοῦ νόμου καὶ τῶν προφητῶν καὶ τῶν ἄλλων πατριῶν βιβλίῶν . . . ὁ νόμος καὶ αἱ προφητεὶ καὶ τὰ λοιπὰ τῶν βιβλίων.*

In the Second Book of Maccabees (124 B.C.; Niese, "Kritik der Beiden Makkabäerbücher"), written only a few years later than the Greek Sirach, the following is stated: "The same things also were reported in the records, namely, the memoirs of Neemias; and how he, founding a library, gathered together the books concerning the kings, and the prophets, and those of David, and the epistles of the kings concerning holy gifts. And in like manner also Judas gathered together all those books that had been scattered by reason of the war we had, and they are with us. If now possibly ye have need thereof, send such as will bring them unto you" (II Macc. ii. 13-15). The Torah is not mentioned; its general circulation rendered its "collection" unnecessary. The second part of the canon is unmistakably intended by "books concerning the kings" (Joshua, Judges, Samuel, and Kings) and by "prophets" (Isaiah, Jeremiah, Ezekiel, and the Minor Prophets). Since the Hagiographa had not yet received a definite name, they are mentioned as "those of David" (the Psalms), as the first and most important book—a custom followed in the New Testament even at a time when there was no doubt concerning the existence of collected Hagiographa. The expression, "the books of the kings concerning holy gifts," seems to refer to the royal letters mentioned in Ezra and Nehemiah, and if this be so, then the Hagiographa do find mention: viz., Psalms and Chronicles, their first and last books.

It should also be noted that Nehemiah and not Ezra is named: a circumstance which indicates the age of these statements; since the son of Sirach likewise glorified Nehemiah and made no mention of Ezra, whereas even the oldest rabbinical authorities consider Ezra as a writer far superior to Nehemiah, the aristocrat.

Philo, in his extant works, makes no mention of Ezekiel, Daniel, or the Five Rolls. Since, however, even Sirach mentions Ezekiel, Philo's

**Philo.** silence about him is undoubtedly accidental; consequently, his failure to name the other books can not be taken as a proof that they were not in his canon. Moreover, the Laws, Prophets, Psalms, and other books are referred to by title in his "De Vita Contemplativa," § 3. It is true, Lucius ("Die Therapeuten," Strassburg, 1880) doubts the genuineness of this work; but Leopold Cohn, an authority on Philo ("Einleitung und Chronologie der Schriften Philo's," p. 37, Leipzig, 1899; "Philologus," vii., suppl. volume, p. 421), maintains that there is no reason to do so. Consequently, Siegfried's opinion ("Philo," p. 61, Jena, 1875) that Philo's canon was essentially the same as that of to-day, is probably correct (H. E. Ryle, "Philo and Holy Scripture," London, 1895).

The New Testament shows that its canon was none other than that which exists to-day. None of

the Apocrypha or Pseudepigrapha is ever quoted by name, while Daniel is

**New Testament.** expressly cited in Matt. xxiv. 15. Matt. xiii. 35 (= Luke xi. 51) proves that Chronicles was the last canonical book. The statement, "That upon you may come all the righteous blood shed upon the earth, from the blood of righteous Abel unto the blood of Zacharias," contains a reference to II Chron. xxiv. 20. The three chief divisions are enumerated in Luke xxiv. 44—"Law," "Prophets," and "Psalms"—as they are in Philo. Usually, however, only the Law and the Prophets are mentioned (Matt. v. 17; Luke xvi. 16); but by them the three divisions are intended just as the Talmudic teachers include the Hagiographa under Prophets (see § 3). This usage is to be attributed, on the one hand, to the lack of a current technical term for the Hagiographa, and on the other to the opinion that the collected books of the Holy Writings were written by the Prophets. In view of these facts, the silence of the writers of the New Testament concerning Canticles, Ecclesiastes, Esther, and Ezra has no bearing on the question whether these writings were or were not included in the canon (see Strack, *l.c.* p. 750).

Josephus (c. 38-95) enumerates 22 books, which he divides as follows: 5 books of Moses; 13 histories, containing the history of Israel from Moses' death down to Artaxerxes I., written by the Prophets; and 4 remaining books consisting of hymns and admonitions. "It is true our history hath been written since Artaxerxes very particularly, but hath not been esteemed of the like authority with the former by our forefathers, because there hath not been an exact succession of prophets since that time; and how firmly we have given credit to these books of our own nation is evident by what we do; for during so many ages as have already passed, no one

hath been so bold as either to add anything to them, to take anything from them, or to make any change in them" ("Contra Ap." i. 8). It is evident that Josephus, instead of counting Ruth and Lamentations as separate books, combined them with Judges and Jeremiah, respectively. As historical books he considered all that narrated anything historical, and thus included Job. He considered Psalms, Proverbs, Song of Solomon, and Ecclesiastes non-historical. No other arrangement would have been possible for Josephus; for it is known from Talmudic and Midrashic literature that in his time, when the Tannaites flourished most, all the now familiar books were considered canonical. For various interpretations of Josephus' narrative, see Strack, *l.c.* p. 752.

The evidence of the church fathers, such as Melito of Sardis (about 170; in Eusebius, "Hist. Eccl." iv. 26) and Origen (died 253; in

**Church Fathers.** Eusebius, *l.c.* vi. 25), both of whom count 22 books, but mention 24, is unimportant; since they invoke the authority of their Jewish teachers, whose canon is known from the tannaite literature. Of still less weight is the evidence of Jerome (died 420), who also had Jewish instruction, and simply repeats what was current opinion among the Amoraim ("Prologus Galeatus" and preface to Daniel).

§ 7. In addition to the written evidence mentioned above, the circumstance that the Samaritans (who considered themselves Jews) accepted

**The Prophetical Canon.** only the Pentateuch and part of Joshua is of great importance in determining the historical development of the canon. It brings out the momentous fact that a recognized canon of the Prophets did not exist in the middle of the fifth century B.C.; while, on the other hand, it is certain from Sirach (see § 6 of this article) that the prophetical canon was completed by 200 B.C. at the very latest. Since Sirach considered prophecy as long since silenced, and had no recollection of any authoritative close of this canon, the view that the list of the Prophets was completed at least one hundred years before his time is very plausible. Consequently, the prophetical canon must have been closed, at the very latest, at the beginning of the era of the Seleucids (312). Zunz ("G. V." ed. i., p. 14) says with reason: "The holy books, containing the Law and the Prophets, must have been collected a few generations after Nehemiah. Their age extends back far beyond that epoch. The decided predilection shown toward this part of the Biblical books, still visible in later times and in all religious institutions, must be explained by the fact that it had long been honored as the only surviving monument of the Jewish state at a time when the latter no longer existed, and other national writings, whether of earlier or later time, were attracting attention" (compare also *ib.* p. 33). Ryle ("Canon of the Old Testament," p. 123) assumes that the prophetical canon was completed during the high priesthood of Simon II. (219-199 B.C.). He adduces in proof the prophetical books themselves, which, according to him, contain many additions of a late date, showing that previous to this period they had not been canonized; K. Marti (commentary on Isaiah, in "Kurzfassetes Handbuch") even argues

that in Hillel's time the canon was not yet closed. However, the fact that Daniel is not included in the Prophets is of importance, and demonstrates that the prophetic canon must have been closed before 165 B.C.; for the best of criticism is agreed that Daniel belongs to the Maccabean era; it would have been included in the Prophets had at that time the canon still been open.

§ 8. While Sirach (see § 6) knew and made use of most of the books of the Hagiographa, his chapters contain no allusion whatever to Ecclesiastes, Esther, or Daniel. It does not follow from this that he did not know these books, but that he

**Determina-** simply did not consider them Holy  
**tion of** Writings; moreover, it is certain that  
**the Hagiog-** in 200 B.C. the canon of the Hagiog-  
**rapha.** rapha did not exist in its present

form. A second foundation for this theory would be the date of the Book of Daniel, which in its present form, and with its allusion to Antiochus Epiphanes, was not known before 165. A third argument is deduced from the fact that while the translator of Sirach in 132 knew no technical name for the Hagiographa, he nevertheless speaks plainly of a third part of Holy Writ. Accordingly, there is no sound reason to doubt the statement in II Macc. ii. 14 (see § 6 of this article) that Judas Maccabee collected the books scattered during the wars.

No doubt, the Syrians in their persecutions had diligently searched for scrolls of the Torah, and (since they knew no difference between the various Hebrew writings) for other Biblical books (I Macc. iii. 48). Under the circumstances, it is quite comprehensible that the warlike Maccabean and his pious followers took special care to collect the Holy Books. On the other hand, under the rule of the princes who followed Simon, most of whom sided with the Sadducees, circumstances were unfavorable for determining a canon for the third portion of Scripture by agreement as to which books should be included and which excluded. It was impossible to determine the canon in the post-Maccabean period, because then the various schools of tradition began to flourish. So important a matter as the canon would not have been easily settled, as the controversies of 65 and 90 C.E. show (see § 11), and indeed there are no traces of a discussion of the subject. In view of all these circumstances, one is warranted in assuming as most probable that not long after the Maccabean wars of freedom the Jewish community had reached an agreement as to the books of the third canon.

Everything points to the correctness of the opinion of Zunz (*l.c.* p. 34) "that long before the destruction of the Temple, and not long after Sirach was translated, the Holy Writings comprised the present cycle." Ryle (*l.c.* pp. 184 *et seq.*), also, believes that the Hagiographa were completed before the death of John Hyrcanus (106 B.C.). To be sure, he distinguishes two periods; that from 160-105 B.C. for the admission, and that from 90-110 C.E. for the final ratification of the complete canon. But this distinction makes no difference as to the principal matter in issue.

§ 9. Jewish tradition adopts the view that every

word of Holy Writ was inspired by the Divine Spirit. This Spirit is believed, in every case, to have rested upon a prophet; and, consequently, every Biblical book was said to have been written by a prophet. The chronicler attributes the author-

**Principle of Canonization.**

ship of the Book of Samuel, which he designates as "the acts of David" (I Chron. xxix. 29) to Samuel, Nathan, and Gad. The oldest Baraita (see above, § 3; B. B. 14b), dealing with the sequence and authors of the Biblical writings, assumes the author of every book to have been a prophet, and finds him either in the titles or the sequence of the books themselves. Moses, Joshua, Samuel, Ezra, and the Prophets wrote their own books; Moses wrote Job, the hero of which was his contemporary; Joshua wrote the last eight verses of the Pentateuch ("so Moses, the servant of the Lord, died," etc.); Samuel wrote Judges and Ruth; Jeremiah the Books of Kings, which preceded his own book, and Ezra the Chronicles (see Blau, *l.c.* p. 33). There is thus an unbroken chain of prophets from Moses to Malachi; the chain of tradition in Abot i. 1 mentions prophets but no priests: "Forty-eight prophets and seven prophetesses prophesied for Israel. None of them took from or added anything to the Law, except the reading of the roll of Esther" (Baraita Meg. 14a; compare "Seder 'Olam," xx., xxi.).

Not only the Patriarchs, but David and Solomon also were considered prophets. Thus the Psalms, written by David; Proverbs, Canticles, and Ecclesiastes, written by Solomon ("Seder 'Olam," xv.; compare Cant. R. i. 35; Lam. R. xi. 1; and B. B. 15a); Ruth, by Samuel; Lamentations, by Jeremiah; Daniel, by Daniel; and Chronicles and Ezra-Nehemiah, by Ezra (who is identified with Malachi, Meg. 15a), are all of prophetic origin. Esther alone apparently is without a prophetic author. For this reason, "Seder 'Olam" (end of ch. xx.) considers that Mordecai was a prophet who, contemporary with Haggai, Zechariah, and Malachi, prophesied at the time of Darius; while Daniel (who in Esther R. iv. 5 is identified with Hatach), according to his own book, lived as early as the reign of Nebuchadnezzar. Josephus—who believes that prophecy ceased in the time of Artaxerxes I.—considers as divine only the books written by prophets (see the passage, "Contra Ap." i. 8, quoted above; compare Grätz, "Monatschrift," xxxv. 281 *et seq.*). Thus only works regarded as having been inspired by the Holy Spirit were included in the canon. Neither the Talmud nor Midrash knew the difference between prophecy and the Holy Spirit, as drawn in the Middle Ages. Take the following examples:

Esther was a *prophetess*; for it is said (Esther ix. 29): "Esther wrote" ("Seder 'Olam," *l.c.*). Chajes ("Torat Nebim," last page, Zolkiev, 1836) has rightly inferred from this passage that, according to tradition, every written word was of prophetic origin. Rabbi Levi says: "Formerly, if man did anything of importance, a prophet came and wrote it down; but now . . ." (Lev. R. xxxiv. 8). David prays in Psalm xix. 15 (A. V. 14): "Let the words of my mouth be acceptable"; that is, "may they be transcribed for later generations, and may the latter not read them as Homer is read, but let them meditate upon them and be rewarded for doing so, as they are for studying Nera'im and Ohalot (Midrash Shohar Tob, i. 8, ed. Buber, p. 50). Of Ps. xlii. 5 it is said (Lam. R. Introduction, p. 24): "There were 600,000 or even 1,200,000 prophets. Every prophecy which was of impor-

tance for its own time or later generations was published; but, on the other hand, those prophecies having significance for their own, but not for future times, were not published" (Cant. R. vi. 11). "God said to Moses, 'copy the Torah, Prophets, and Hagiographa, that you may have them in writing'; Halakot, Midrash, Haggadot, and Talmud, however, are to be preserved only verbally" (Ex. R. xlvii. 154a). R. Isaac considered that "all that the prophets foretell in every generation, they learned on Mt. Sinai" (*ib.* xxviii. 100a). "The entire Holy Writ is really the word of God, so that the authors are to be considered merely as media." "When Hagzal, Zachariah, and Malachi died, the Holy Spirit left Israel" (Tosef., Soṭah, xiii. 2; Yer. Soṭah, end; Sanh. 11a).

Therefore, whatever is in the Holy Writ must have been written, at the very latest, during the time of these last three prophets, frequently mentioned in Talmud and Midrash. The Great Synagogue had many prophets among its members, and therefore had the right to have the Esther scroll written down (Shab. 104a; Meg. 2a; Yoma 80a; Tem. 15b).

§ 10. It was due to the principle referred to in the preceding section that the Wisdom of Sirach (Ecclesiasticus), which was used as a school-book many centuries after the completion of the canon (hence called

**Ben Sira and Other Apocrypha.**

*Παρθαγωγός*, whence the Jewish "Alphabets" of Ben Sira), either found no place in the canon, or was excluded from it. Since, in his work, the author names himself and the high priest Simon, the post-prophetic origin of the work was evident:

In the Tosefta it is stated (Yad. ii. 13, ed. Znekermandel, p. 683): "Neither the books of Ben Sira nor any of the books written thereafter [that is, in post-prophetic times] render the hands unclean, [that is, are canonical]. The Mishnah (Sanh. x. 1) adduces this dictum in the name of R. Akiba: "He who reads the outside books (ספרי חיצוניים) shall have no share in the life to come." To this the Palestinian Talmud adds: "for example, the books of Ben Sira and Ben La'ana." But the reading of Homer and all other books written thereafter shall be accounted as the reading of a letter. On what ground? They may be read, but not to weariness" (Sanh. 28a). This passage is usually considered incomprehensible. In the first place, its severity against Ben Sira is not intelligible; secondly, it is not clear why the books of Homer should be preferred to Ecclesiasticus (Sirach); thirdly, in one of the Baraitot (Sanh. 100a) it is said that the books of heretics are meant (ספרי בניינים), and only Joseph, a Babylonian amora of the beginning of the fourth century, states: "The book of Ben Sira also is not to be read." This prohibition is indeed contradicted by historical facts; for since Sirach's wisdom is frequently cited by the Talmudists (compare the latest compilation of citations in Cowley and Neuhauer, "The Original Hebrew of a Portion of Ecclesiasticus," Oxford, 1897), the reading of his work can not have been forbidden. Moreover, as the context clearly shows, passages of Ben Sira are twice cited as though they were part of the Hagiographa ("Er. 65a, by Rab from Sirach vii. 10, and B. K. 92b by Rabba bar Mari; see also "Jew. Quart. Rev." x. 241). Even if it be supposed that these two cases arose from a confusion due to lack of memory, the two Talmudic teachers thinking the verses quoted by them to be from a Biblical book, withal it clearly follows that Sirach *was* read, and so high an authority as Akiba could not possibly have declared that whoever read in Ben Sira would destroy his future salvation. As a result of these difficulties it has been decided to amend the passages of the Jerusalem Talmud in question (Joel, "Blicke in die Religionsgeschichte," i. 71 *et seq.*; Grätz, "Monatsschrift," xxxv. 287). It would seem that all these difficulties might be obviated by keeping clearly in mind the fact that the Talmudic teachers distinguished two kinds of reading: (1) reading in public and aloud, or zealous study, and (2) private reading. The Midrash on Eccl. xii. 12 (see above, § 4) forbids adding another book such as that of Ben Sira or Ren Tigla to the twenty-four books; but says they may be read, expressing this opinion in the same way as does the Talmudic passage under discussion. The whole passage therefore bears out the following construction: Akiba maintains that not only he who denies the divine origin of the Torah forfeits his share in

the future life, but also he who reads the outside books as though they were Holy Writings; that is, who treats them as such either by reading them aloud or by interpreting them before the community. This or a similar penalty is not threatened in the case of apocryphal works in general, but only in connection with a well-known and highly prized book; consequently Akiba's statement must have been directed exclusively against Ben Sira's collection of proverbs. Concerning this book, Epiphanius also states (*l.c.* in Lagarde, "Symmieta," ii. 157) that it does not belong to the Holy Writings, and adds: "but the ספרי חיצוניים and other works written in post-prophetic times may be read [that is, read privately]; for, according to Ecclesiastes xii. 2, they may be read, but not to the extent and in the manner of wearing the flesh."

From these passages it is evident that no attempt was made to stamp out the Apocrypha; on the contrary, an influence was certainly exerted which was not altogether unfavorable to them (see above, § 4). In conclusion, be it remarked that Maimonides ("Hilkot 'Ab. Zarah," ii. 2) holds Akiba's expression, "outside books," to refer to idolatrous, non-Jewish, extracanonical writings, and that in the fourth century, in the passage in Sanh. 100a, a reason was sought for forbidding the reading of Sirach. Accordingly, the prohibition against reading non-canonical works generally can not have been old.

§ 11. There were controversies concerning the admission into the canon of the Book of Ezekiel, Solomon's three books (Proverbs, Ecclesiastes, Song of Solomon), and Esther. But no controversy arose concerning the Apocrypha: all were agreed that they were non-canonical. The opposition to Ezekiel was only temporary; owing to its contradictions of the Pentateuch, many wished to hide it away

(that is, to prevent its use); but "Hananiah ben Hezekiah ben Garon spent three hundred jars of oil to release it." Others wished to prohibit its use because a child in school, having read the first chapter, made a picture of the "hāshmal" (A. V., "color of amber") which then emitted flames; nevertheless, Hananiah championed it (Hag. 13a; Shab. 13b; Men. 45a). The opposition to Proverbs, because they contained contradictions, was very slight. For the same reason, it was contended that Ecclesiastes ought not to be read (Shab. 30b). Apparently the opponents belonged to the strict school of the Shammites (Bacher, "Ag. Tan." i. 21). Others wished to prohibit the reading of Ecclesiastes on the ground that it expressed heretical ideas (Lev. R. xxviii., beginning, and elsewhere).

A longer struggle raged around the question whether Ecclesiastes "rendered the hands unclean" that touched it, necessitating their washing. The passages bearing on these controversies (see also above under § 2) read as follows:

"All books, except that of the Temple-court, defile the hands" (Kelim xv. 6). [By this expression all Biblical books are meant, as is clear from the Tosefta (*ib.* ii. 5, 8, p. 584). "The hands are defiled not only by the book of the Temple-court (ספר צורה, read ספר צורה) that was taken thence, but also by the prophets, by the separate books of the Pentateuch, and by another book (ספר אהרן = Hagiographa; see Blau, *l.c.* p. 21) that is put there."] "The heave-offering is defiled by the book." (Mishnah Zabim v. 12; Shab. 14a, Rashi: "all the sacred writings.") "The holy writings defile the hands"; "the thongs of the phylacteries defile the hands"; "the upper and lower edges of the book, as well as those at the end, defile them." "Even though a book be so blurred that only 85 letters (as many as in Num. x. 35, 36) remain, it will defile." "All holy writings (ספרי חיצוניים) defile"; so also the Song of Solomon and Ecclesiastes, as R. Judah said: "The Song defiles; Ecclesiastes is in dispute." R. Simon said: "Ecclesiastes belonged to the few cases in which the Shammites were lenient in their decision and the Hillelites severe." R. Simon b. Azzai said: "I have a statement, from the seventy-two elders and dating from the day

when R. Eliezer ben Azariah became head of the school, that the Song and Ecclesiastes defile." R. Akiba replied: "God forbid! No Jew has ever contended that the Song defiled; for the whole world is not worth so much as the day when the Song was given to Israel. Thus while all the Hagiographa (כְּתוּבֵי חֵן) are holy, the Song is most holy; if there was any dispute, it was only concerning Ecclesiastes." R. Johanan b. Joshua, son of R. Akiba's father-in-law, said: "The controversy was as Ben Azzai states, and so it was decided." The Aramaic passages in Ezra and Daniel defile, but if the Aramaic be written in Hebrew, or the Hebrew in Aramaic, or ancient Hebrew characters, it would not be so. "A book defiles only if it is written in Assyrian (modern Hebrew characters) on animal skin, and with ink" (compare Blau, *l.c.* pp. 69 *et seq.*). The Sadducees said: "We complain of you, Pharisees, for you say, 'The Holy Writings, but not the books of Homer (כְּסֵפֵי הַמִּירֵה) defile.'" Then said R. Johanan ben Zakkai: "Have we only this against the Pharisees that they say the bones of an ass do not defile, but those of the high priest Johanan do?" The Sadducees replied that they believed bones were declared impure lest wicked people should make use of the bones of their parents (Niddah 55a: "that people might not make saddlery out of their parents' skins"). Johanan answered, that according to them, there was also impurity in the Holy Writings, but that the books of Homer, which were not honored, did not defile (Tosef., *Yad. ii. 19*: "in order that no covering for an animal might be made out of the books").

The chief passages in the Mishnah Yadayim (iii. 2-5; iv. 5, 6) are to the same effect. The Tosefta Yadayim takes the same general view, but makes the important addition that the Evangelists (Gospels) and the books of heretics (הַגְּלוּתִים וְסֵפֵרי הַמִּינִים) or Ben Sira and all books written "thereafter" (post-prophetic times) did not defile (ii. 13, 683; compare 129, 2, and Shab. 116a). It should also be noted that, according to R. Simon ben Menasya, while "The Song defiles, since it was inspired by the Holy Spirit, Ecclesiastes does not, because it was produced solely by the wisdom of Solomon" (ii. 14; compare 'Eduy. ii. 7, and Mishnah v. 3; Meg. 7a). The following passage, however, as will be apparent from its contents, dates from a later period:

"Formerly the Proverbs, the Song of Solomon, and Ecclesiastes, because they contained only proverbs, and did not belong to the Hagiographa, were hidden (נִסְתָּרִים) declared non-canonical, until the men of the Great Synagogue explained them" (Ab. R. N., A, i, B, i, pp. 2, 3, ed. Schechter; compare Midr. on Prov. xv. 1). R. Akiba said: 'He who, for the sake of entertainment, sings the Song as though it were a profane song, will have no share in the future world' (Tosef., Sanh. xii. 10, p. 433; Sanh. 101a).

These passages show that the struggle concerning Ezekiel and Solomon's three books had arisen even before the destruction of the Temple. Canticles and Ec- clesiastes had attained such considerable magnitude that Akiba was compelled (about 100) to threaten the forfeiture of future life, in order to save Canticles. Since, immediately before the destruction of the Temple, the Sadducees and Pharisees were disputing concerning the defilement of hands by the Holy Writings, the law which declared that the latter did render hands unclean can not have been anterior to this time. In fact, it can not have been made much earlier than one hundred years after the Temple's destruction.

Grätz ("Kohelet," p. 149) argues that there was about 65 C.E. an assembly of the Hillelite and Shammaite schools in Jerusalem, and that in the year 90, on the day that Gamaliel II. was dismissed, the teachers of the Law decided which books were to be honored as canonical.

The Tannaites of the second century attempted to show that the Esther scroll might be written down; and they based their decision upon Ex. xvii. 14 (Mek., Beshallah, 6; Meg. 7a; Yer. Meg. lxx. a). This eagerness proves that there was at least some question as to its admissibility. The inquiry whether Esther was revealed, and was therefore to be reckoned as Scripture, was by no means discouraged (Yoma 29a). Many sages, Akiba

**Esther.** among others, tried to prove from separate sentences (as, for instance, "Haman spoke in his heart") that it was dictated by the Holy Spirit (Meg. 7a). According to the eminent rabbi Samuel (after 200), Esther "does not defile." Simeon (150) states that only Ecclesiastes is doubtful; while Ruth, the Song of Solomon, and Esther "defile the hands." It is evident from many sources (compare Sanh. 100a; Yer. Ber. xiv. 15; Meg. 19b) that the canonicity of this book was not certain. The controversies in the Church are merely echoes of the voices raised (but suppressed) in the synagogue against the canonical respect paid to various writings.

§ 12. It is almost impossible to-day to form an adequate conception of the love and admiration felt by the Biblical scribes for the Torah. Of the many passages illustrating this the following are, in many respects, characteristic:

"The Torah is one of the seven things that existed before the Creation. According to Simeon ben Lakish, it is 2,000 years older (Pes. 54a; Gen. R. viii. 2; Cant. R. v. 11). Even Abraham obeyed all its laws (Mishnah Kid., end), and when Moses ascended to heaven, he found God with the Torah in His hand and reading the passage about the Red Heifer, Num. xix. 1-10 (Pesik. R. 68b). It was given to Israel unconditionally (Mek. 60b) by Moses, who made one copy each for every tribe and corrected them all from the copy of Levi (Pesik. 197a). He gave it closed up, according to others, in a roll (Git. 68a). He wrote the last eight verses also; for not a single letter emanates from any one else. According to a more liberal opinion, however, Joshua was supposed to have written these verses (B. B. 15a). Before him who denies its divine origin the doors of hell shall never close, and he shall be condemned to stay therein eternally" (Akiba in "Seder 'Olam," iii., end, and Tosef., Sanh. xiii. 5; compare Sifre, Num. i. 112, 116; ii. 102; Sanh. 99a; Yer. Sanh. 27d and elsewhere). "The Law will endure forever" (Mek. 19a). "Any prophet who attempts to annul one of its laws will be punished by death" (Tosef., Sanh. xiv. 13). "Though all mankind should combine, they could not abolish one yod (the smallest letter) of it (compare Matt. v. 18). When Solomon took unto himself many wives, the yod of יִרְבָּה ('he shall multiply'; Deut. xvii. 17) cast itself down before God, and denounced the king (according to others, this was done by Deuteronomy). Then spake God: 'Solomon and hundreds like him shall be destroyed, but not one of your letters shall ever be annihilated'" (Cant. R. v. 11; Gen. R. xvii.; Num. R. xviii.; Tan., Korah, No. xii; for the accusing letters, compare Pes. 106a). "The whole world is but a thirty-two-hundredth part of the Torah" (Er. 23b). "When a copy of the Law was burned, people rent their clothes as though one of their dearest relatives had died, and such rents were never to be sewed up (Yer. M. K. 83b, and elsewhere); but a copy written by a heretic (כִּזְיָ) might be burned, and one written by a non-Jew had to be buried" (Git. 45b). "Before the Torah the people had to stand up in the synagogue; and while it lay unrolled on the reader's desk, speaking (even about Halakah) and leaving the synagogue were forbidden" (Ket. 33b; Pesik. 118a). At least one copy had to be in every town (B. B. 43a; Tosef., *ib.* xi. 23). Scholars would even take one with them when on a journey (Mishnah Veb., end). Even if a copy were inherited, it was considered proper to write oneself another copy; and if possible this had to be a beautiful copy (Sanh. 21b; Nazir, 2b). Before birth each one is taught the Torah; but when he sees the light of day an angel touches his mouth, and makes him forget it all (Niddah, 30b).

In those days the knowledge of the Bible was astounding: many scholars were able to write it entire from memory (Yer. Meg. 74d). Instruction in it was gratuitous (Ned. 37, and elsewhere). Even to its last letters the Torah comes from Moses, through whom God gave it to Israel, for only the Decalogue was revealed from the mouth of God Himself, in ten utterances (Sifre, Deut. ii. 305, 357; Mek. 46a). Moses is therefore called the "great writer of Israel," "the great sage, father of the wise men and of the prophets" (Soṭah 13a; Sifre i. 134, ii. 306). In countries other than Palestine, the Word of God was revealed only in a clean place or near a river (Mek. 106a, note 14).

Just as all prophecy came from Moses, so all Holy Writings began in the Torah; for there is nothing

**Relation of Torah to Prophets, etc.** that is not at least suggested in the Torah (Num. R. x. 6). Hence the question: "Is there anything that was not suggested in the Torah?" The answer is given: "Like the latter, the

Prophets and the Hagiographa came from God Himself." In Sifre, Dent. ii. 306, to an utterance of Jeremiah is applied: "Lord of the Universe! Thou wrotest [it]"; and of every book it is said either that God wrote it, or that He caused it to be written. For Talmudic scholars the twenty-four books form one book, known to the Patriarchs, and even to the primeval generations; and accordingly every favorite verse is attributed to some Biblical hero: "Solomon said"; "David declared"; "Daniel stated"; "Moses, too, affirmed it" (Tosef., Yoma, ii. 1).

Nevertheless, a distinction was made between the Torah, on the one hand, and the Prophets and the Hagiographa, on the other; for, while the study of the latter books would bring the same reward as would that of the Torah (Lam. R. i. 13, iii. 10), the Prophets and the Hagiographa were not of equal importance with the Torah. Thus, the transgression of a commandment in the Prophets or the Hagiographa was not punishable by scourging (Yer. Yeb. iv. 19a; Pesik. R. 61b). Any inference drawn from the Prophets or the Hagiographa had to be authenticated in the Torah (Yer. Kid. 66a). Simeon b. Laḳish said outright, "What need have I of the Psalms? It is stated in the Torah" (Pesik. R. 21b; compare 22a, below; 146a, 10; 174a, below). The Prophets and the Hagiographa are only transmitted קבלה (Naz. 53a; M. K. 5a), so that no legal (Torah) deductions are to be drawn from the prophecies (רברי תורה רברי לא ילפינן מרברי קבלה לא ילפינן, B. K. 2b, etc.).

As the first and actual revelation of God, the Torah stood far above the Prophets and the Hagiographa; while in the future the latter will cease to be, the existence of the Torah will be an unending one. Tradition thus distinguished, as to rank, between Moses and the other prophets; but it knew nothing of a difference between the prophetic gift (רוח נבואה) and the Holy Spirit (רוח הקדש), as defined by Maimonides; such distinction rests upon verbal expressions for "prophets" and "Holy Writings." In the treatise Soferim, and elsewhere, the Hagiographa are called קרושה ("holiness") in distinction from the Prophets, which are styled קבלה

("revelation"). The older terminology, however, applied קבלה, also, to the Hagiographa; and there is no mention of any alleged difference in degree of inspiration between the two.

—**Untraditional View:** The word "canon," borrowed probably from the Phenicians (κανών, κανη, from קנה = "rod," "carpenter's rule"; compare קנה המרה, Ezek. xl. 3), but found already in Homer ("Iliad," viii. 193, xiii. 407, xxiii. 761), seems to have been used among the rhetoricians of Alexandria to denote a collection of literary models or standard works, and a list of such classics (Quintilian, "Inst. Or." x. 1, 54, where "ordo" and "numerus" are translations of κανών; compare, Jerome, "Ep. liii., ad Paulinum" and "Prologus Galeatus in II Regg."). In this sense it is used also by Aristaeus (c. 35 C.E.) ("Ep. ad Philoeratem," clxiii., ed. Wendland). In Gnostic circles the authority of the sayings of Jesus was characterized by this term (Ptolemy [c. 200 C.E.], "Ep. ad Florum," in Epiphanius, "Hereses," xxxiii. 37). As the name of a catalogue of sacred books, the term is used by Athanasius ("Ep. Festalis," xxxix. 1, 168) in 367 C.E., in the spurious canon 60 of the Council of Laodicea (after 364), and in the possibly genuine "Iambi ad Seleucum" by Amphilochius (d. 395). Books that were regarded as sacred (γράφοι ἁγία) and God-inspired (θεόπνευσται) and had been generally adopted for public reading (δεδιμοστυμέναι), in distinction from esoteric or heretical writings withdrawn from public use (ἀπόκρυφαι), were designated "canonical" (κανονικαί).

In Palestine such sacred writings were declared by the Pharisees to be objects "making the hands unclean" (מטמאין את הידים), Yad. iii. 2, 5; iv. 5, 6), apparently necessitating a ritual ablution after contact with them. While protesting against this innovation, the Sadducees (ib. iv. 6) seem to have been agreed in recognizing a body of sacred Scriptures (כתבי הקדש) and in cherishing these above certain other books. The introduction of this custom would naturally tend to fix the limits of the canon. Only contact with books that were actually used or regarded as fit for use in the synagogue would demand such a washing of the hands. It was their employment in the cult that rendered them sacred.

What was, or might be, read in public worship (המקרא) constituted the canon. Therefore the question could arise whether the Aramaic targums

made the hands unclean. The new ritual, by accentuating the sanctity of the books publicly read, necessarily abridged the liberty of introducing new works, and raised doubts concerning the fitness of some that had been used. The finally established canon must be looked upon as the result of a critical process reducing the number of books approved for public reading.

Among the works eliminated by this process were, undoubtedly, on the one hand, many of the writings that maintained their place in the Alexandrian canon, having been brought to Egypt and translated from the original Hebrew or Aramaic, such as Baruch, *Ecclesiastes* (*Sirach*), *I Maccabees*, *Tobit* and *Judith*; and, on the other hand, books like *Jubilees*, *Psalms of Solomon*, *Assumption of Moses*, and the *Apocalypses of Enoch*, *Noah*, *Baruch*, *Ezra*, and others. In some cases the critical tendency may have led only to the removal of what was rightly deemed to be later accretions, such as the additions to *Daniel* and *Esther*, while **Inclusion and Exclusion of Apocrypha.** in regard to disputed writings, such as *Canticles*, *Ecclesiastes*, *Esther*, *Ezekiel* (and probably *Daniel*), the more liberal policy finally prevailed.

While this criticism still continued in the second century of the common era, its main results appear to have been reached as early as the end of the first. *Josephus* ("Contra Ap." i. 8), about the year 100, counted twenty-two sacred books. The Greek Bible he used had evidently been brought down to the number required in Pharisaic circles. It is not known with certainty what books were included. It is probable, however, that *Lamentations* and *Baruch* formed one book with *Jeremiah*, and that *Ruth* was an appendix to *Judges*. *Esther* still seems to have had its additions. Among *Josephus'* thirteen prophets none was included that he regarded as later than *Artaxerxes Longimanus*. It may perhaps be doubted whether he could have described *Canticles* as a work laying down principles of conduct (*ἐπιποθήκας τοῦ βίου περιέχουσαν*). This would better suit *Ben Sira*. But the consideration of supposed greater age and Solomonic authorship may have decided in favor of *Canticles*. That the number may be the same and yet the constituent books to some extent differ, is evident from the fact that *Melito* in Palestinian synagogues found a canon containing twenty-two books in which *Esther* was lacking and *Ruth* separate (*Eusebius*, "Hist. Eccl." iv. 26), while *Origen* reports the twenty-two books with their Hebrew titles as including *Esther* and with *Ruth* joined to *Judges* as *Baruch* and *Lamentations* to *Jeremiah* (*ib.* vi. 25). Again, in *Athanasius*, *l.c.*, *Esther* is wanting among the twenty-two canonical books, whereas in Canon 60 of the *Laodicean Council*, dependent on *Athanasius*, *Esther* occurs, as also among the twenty-two canonical books enumerated by *Jerome* in his "Prologus Galeatus." It is scarcely by accident that this number coincides with that of the letters of the Hebrew alphabet. The same tendency that led poets to write alphabetic psalms prompted scribes to arrange the canon so as to make the total twenty-two.

According to the *Apocalypse of Ezra* xiv. 44, 45 (c. 95 B.C.), this prophet wrote ninety-four sacred

books: first twenty-four for the worthy and the unworthy to read, and then seventy to be withheld and to be given only to the wise. This legend shows that twenty-four books were

**Twenty-two or four Books.** looked upon by this author as intended for public reading. Although the books are not enumerated, there is no reason to doubt that this canon was substantially identical with that of *Josephus*. The difference may be simply due to the fact that, in some circles, *Ruth* and *Lamentations* were copied on separate rolls for convenience in public reading on *Shabuot* and on the Ninth of *Ab*. This may have involved the rejection of *Baruch*, and the removal of the threnody on *Josiah* from *Lamentations*. If an additional reason for counting twenty-four books were needed, the twenty-four priestly families (*I Chron.* xxiv.), or the twenty-four celestial representatives of *Israel* (*Rev.* iv. 4), would readily supply it (if not the twenty-four letters of the Greek alphabet). This number, given in the *Baraita* preserved in *B. B.* 14b, coexisted with the other (*Jerome, l.c.*), and ultimately prevailed.

It is manifest that to *Pseudo-Ezra* the seventy books were more important than the twenty-four. They had been hidden, preserved as treasures, until they should be made known to the wise. This idea had already been used by *Daniel* to explain the late appearance of his prophecies (*Dan.* xii. 4, 9). These apocalypses were too precious to be read to "the unworthy." Possibly this conceit was designed to serve a double purpose: accounting for their recent discovery, and also making a virtue of their rejection from use in the synagogue. With pride and affection their friends called them נְנִימִים (*ἀπέκρυφα*); to those who rightly saw in this literature a danger to the supremacy of the Law, the term נְנִי came to mean the removal of a book from synagogue use, as in the case of rolls that had been worn out, or of rolls not thought to render the hands unclean (see, however, *APOCALYPTIC LITERATURE*).

If some critics continued to urge the exclusion of this or that book from the canon of twenty-two or twenty-four rolls (see below), there are not lacking, on the other hand, signs of a readiness to include one or another of the "hizonim" (outside books). Thus *Sirach* is occasionally quoted (*B. K.* 92b) as a representative of the *Hagiographa*; and *Baruch* was still read on *Yom Kippur* in some synagogues in *Origen's* time (*Eusebius*, "Hist. Eccl." vi. 25). Outside of Pharisaic circles the earlier and less rigid conception of the canon maintained itself, as is evident from the extent of the Greek Bible used by *Christian apologists* for controversial purposes, and a number of works quoted or used as authorities by *New Testament writers*, not found even in this Bible, such as "Jeremiah the Prophet" (*Matt.* xxvii. 9), "The Wisdom of God" (*Luke.* xi. 49), *Enoch* (*Jude* 14-16), *Assumption of Moses* (*Jude* 9), the *Apocalypse of Elijah* (*Eph.* v. 14; *I Cor.* ii. 9), the *Martyrdom of Isaiah* (*Heb.* xi. 37).

In *B. B.* 14b the canon is divided into three parts; viz., (1) the Law, comprising the five books ascribed to *Moses*; (2) the Prophets, including *Joshua*, *Judges*, *Samuel*, *Kings*, *Jeremiah*, *Ezekiel*, *Isaiah*, and the *Minor Prophets*; and (3) the Writings,

Ruth, Psalms, Job, Proverbs, Ecclesiastes, Canticles, Lamentations, Daniel, Esther, Ezra, and Chronicles. The passage indicates what **Rabbinical Canon.** was regarded, on the basis of a tradition preserved in the school of Hoshaya b. Hama (c. 230 c.e.), as the proper manner of arranging the component parts of the canon when larger volumes were prepared.

This tripartition no doubt implied an estimate of relative value. The Law, being the first to acquire authority, remained at all times the highest authority. All non-Mosaic books were called קבלה ("tradition"), whether Prophets or Hagiographa, and considered in the light of a commentary on the Law, as it were, another expression of the oral law (compare Zunz, "G. V." 1832, p. 44). This is suggested also by the use of the term νόμος for the entire canon (II Esdras xiv. 21, iv. 23; I Cor. xiv. 21; John x. 34, xii. 34, xv. 25), by the absence of the Torah in the description of the library of religious books in II Macc. ii. 13, and by the fact that the Samaritans limited their canon to the Torah. The veneration for the Law long antedated the completion of the Pentateuch, naturally increasing with the growth of this work. The so-called Covenant Code, Ex. xx. 23-xxiii. 33, must have enjoyed wide recognition in the eighth and seventh centuries, probably because emanating from some sanctuary whose priesthood traced its descent to Moses, since the Deuteronomic code apparently was intended at the outset to take its place. This law-book was enjoined on the people by Josiah in 621 b.c. (II Kings xxii. 8-xxiii.).

It is an exaggeration to say that Judaism became a book religion, or that the canon was born, in that year. While its humanitarian spirit commended this law to many, and some found in its ordinances a source of knowledge concerning the will of YHWH (Jer. viii. 8), written oracles and royal decrees had existed before; and prophets like Jeremiah were not misled by its Mosaic guise (*l.c.*). During the Chaldean and Persian periods it naturally grew in importance as the common law of the people. Yet it did not suppress the Jahvistic and Elohist records with their earlier codes and narratives reflecting quite different religious conceptions. These, with the annals of the kings, were subjected to a Deuteronomistic redaction. As theocracy developed, the attention centered upon the cult. Regulations touching sacrifices and other rites, etiological legends, cosmogonic myths, and genealogical traditions were added.

These priestly additions are now generally regarded as a separate work compiled in Babylonia, brought to Palestine by Ezra, and promulgated at the great assembly described in Neh. viii.-x. in 444 b.c. It is more natural, however, to suppose that they gradually grew up at the sanctuary in priestly circles reinforced from time to time by returned exiles. Recent investigations tend to show that the Artahshasta under whom Nehemiah lived was Artaxerxes II. Mnemon (404-358), that his governorship extended from 385 to 373, and that Ezra came after him, probably in the seventh year of Artaxerxes III. Ochus (352). The story of Ezra

is evidently overlaid with a later tradition. Yet it is possible that his zeal for the law of Moses led this "scribe" to write in one book all the material recognized as Mosaic—leaving out Joshua-Kings—and to inculcate obedience to this law. When Manasse at length secured from Alexander the permission to build a temple to YHWH on Gerizim, which Ochus and Darius had good reasons for refusing, in view of the effect upon Jerusalem of rebuilt walls and a well-regulated cult (Josephus, "Ant." ii. 7, § 8), he had precisely the same interest as his relatives in Jerusalem to possess the law of YHWH in its completest form containing the most explicit directions as regards the cult. At the time when the necessary Aramaic Targum took the form of a version on the Alexandrian model, the same motive was again operative. According to some critics, additions were made to the Law as late as the second century. Then "there arose a certain reluctance to write down the further developments of the law."

Zech. i. 4-6 shows that the pre-exilic prophets were held in high honor as early as 519. But their words naturally came to be read in the light of contemporaneous prophecy, which was exhortation to observance of religious ceremonies enjoined by the Law. Such exhortations could not have as great authority as the Law itself. Dan. ix. 2 shows that the author was acquainted with works ascribed to Jeremiah in which an exile of seventy years was predicted; the sections Jer. xxv. 1-13, xlvi., xlvii., xlix. and Jer. xxvii.-xxix. were probably known to him. Daniel took his place with the other prophets, as is evident from the Greek versions, and from Matt. xxiv. 15 and Josephus, "Contra Ap." i. 8; Job (Eccus. [Sirach] xlix. 9), Ezra, and Mordecai were still counted as prophets by Josephus (*l.c.*). In the reaction against the "Genuzism" (Apocrypha),

**The Prophets.** probably occasioned by their use by Essenes and Christians, Daniel had maintained a place among the books that made the hands unclean, and as a prophet. The critical movement, however, had not spent its force at the end of the first century; a hundred years later Daniel was no longer accorded a place among the Prophets (B. B. 14b). On the other hand, the effort to remove Ezekiel had proved unsuccessful. The limitation of the prophetic canon to eight books was consequently later than the redaction of the canon as a whole to twenty-two or twenty-four books. How many books were counted as prophets by the grandson of Sirach, who wrote his preface after 132 b.c., by the author of II Macc. ii. 13 *et seq.*, or by the New Testament writers, can not be determined. Josephus numbered thirteen. That Sirach had before him a volume of twelve prophets is not certain. The presence of xlix. 10 in the Hebrew text does not prove that he wrote this verse. Between 180 and 132 the manuscript may have been retouched, as is suggested by the descriptions of Phinehas and Simon. No conclusions can, therefore, be drawn from this passage as to the date of Jonah or of Zech. ix.-xiv., or the title "Malachi."

Sirach's grandson speaks of "other books" in addition to the Law and the Prophets. II Macc. ii. 13 mentions the Psalter (*τὰ τοῦ Δαβὶδ*) and "letters of kings concerning temple gifts." Philo, if he is the

author of "De Vita Contemplativa," refers to "hymns" as well as "laws" and "inspired words of the prophets" (ii. 475, ed. Mangey). Josephus adds to the thirteen Prophets four books containing "hymns to God and precepts for the conduct of human life" ("Contra Ap." i. 8). In Luke xxiv. 44 "the Psalms" are mentioned as also furnishing predictions of the resurrection. These passages, while indicating a special class of books, containing hymns, moral precepts, and temple history, do not suggest either a completed prophetic canon or a definite number of additional works. The finally prevailing number and estimate of the "writings" can only have been the result of the critical process by which the extent of the canon and the number of the prophets were determined. The attempts to make such books as Ezekiel (Shab. 13b; Men. 45a,

### The Hagiographa.

Canticles (Yad. iii. 5; Meg. 7a), Ecclesiastes (Yad. *l.c.*; 'Eduy. v. 3; Shab. 30a, b), Esther (Meg. 7a; Sanh. 100a), and probably the books of Daniel, Job, and Ezra, share the fate of the Genuzim, were only temporary. The use of Canticles, Ecclesiastes, and Esther on certain feast days gave needed support to their canonicity. In the course of the second century of the common era a fixed group of hagiographa, to which relatively less importance was ascribed than to the Prophets, was constituted. The earliest testimony as to the contents of this group is B. B. 14b.

The order of the Prophets and the Hagiographa in this Baraita presents neither the original sequence nor the finally adopted arrangement. In earlier times the reader no doubt was quite free in the choice of his selections. As long as each book formed a separate roll the order could not have been regarded as of much consequence. This apparently was still the case in the year 100 (compare Luke iv. 17; B. B. 13b). It was when larger volumes were produced that the question would arise as to the order in which their constituent parts should be copied. Practical considerations no doubt counteracted the more obvious chronological principle that seems to have been followed in Alexandria. A valuable intimation of this is found in the Baraita quoted. It declares that Isaiah was placed after Jeremiah and Ezekiel because "the Book of Kings ends in desolation, Jeremiah is all desolation, Ezekiel begins with desolation and ends with consolation, and Isaiah is all consolation." This is not to be set aside as a mere rabbinic fancy. For the principle of making the beginning of a book attractive and the end encouraging is even characteristic of editorial activity in the arrangement of the smaller collections out of which the larger volumes grew, and is based on a due regard for the effect upon the reader. The transfer of Isaiah to the first place may have been due to external considerations of size. The idea that the twelve Minor Prophets were written by "the men of the Great Synagogue" (אנשי כנסת הגדולה) was determining. Kuenen asserts that "the Great Synagogue" is only an unhistorical reflection of the assembly described in Neh. viii.-x. Even if it could be proved that the name was used in the Persian period to denote a regularly con-

stituted authority, the functions ascribed to it would still remain projections into the past of much later conditions. When it is said that "the men of Hezekiah" or "the men of the Great Synagogue" wrote certain books, it is probably meant that by divine inspiration they produced authoritative texts from material already extant in oral or written form.

The Psalter furnished the natural starting-point for the differentiated group of Hagiographa. But when Ruth was detached from Judges, and Lamentations from Jeremiah, the former was recognized as an auspicious and suitable introduction to the Psalms, and the latter was assigned to its chronological position between the three Solomonie writings and Daniel (B. B. 15b). As the custom developed of arranging the five Megillot by themselves (Masorah and Spanish MSS.), and subsequently in the order of the feasts—viz., Canticles, Ruth, Lamentations, Ecclesiastes, Esther (German and French MSS.), Chronicles was transferred from the end to take the place of Ruth (Masorah and Spanish MSS.).

That Chronicles concluded the collection in the time of Jesus can not be proved from Matt. xxiii. 35 (Luke xi. 51); for this passage drawn from "The Wisdom of God" contains no word of Jesus, and does not refer to Zechariah b. Jehoiada mentioned in II Chron. xxiv. 20, but to Zechariah, the son of Baruch, mentioned in Josephus ("B. J." iv. 6, § 4). The connection of Chronicles with Ezra was original and ultimately prevailed; as did also the chronological order of the erstwhile prophetic books, Daniel, Esther, and Ezra.

Two tendencies are visible in the history of the canon: the one, critical, inclining to reduce the number of sacred books by applying rigid standards of doctrinal consistency; the other, conservative of an earlier and truer estimate, and on this account more liberal to new works of the same general character. Both have rendered great service. The former has issued in a recognition of divergent types of teaching and different degrees of credibility in the canon, and of the rights of private judgment to appraise its contents; while the latter has resulted in the preservation of many precious monuments of man's religious life, and the sense of historic continuity and collective growth.

**BIBLE CONCORDANCES.** See CONCORDANCES; DICTIONARIES.

**BIBLE DICTIONARY.** See DICTIONARIES.

**BIBLE EDITIONS:** The advantages of the newly discovered art of printing were quickly recognized by the Jews. While for the synagogue service written scrolls only were (and are still) used, the printing-press was very soon called into service to provide copies of the Bible for private use. All the editions published before the Complutensian Polyglot were edited by Jews; but afterward, and because of the increased interest excited in the Hebrew Bible by the Reformation, the work was taken up by Christian scholars and printers; and the editions published by Jews after this time were largely influenced by these Christian publications. It is not possible in the present article to enumerate all the editions, whole or partial, of the Hebrew text. This account is devoted mainly to the incunabula (many of which were used as manuscripts by Kennicott in gathering his variants; see his Report for 1766, p. 103).

The first to establish a Hebrew printing-press and to cut Hebrew type (according to Ginsburg, in the Chwolson Memorial Volume, p. 62) was Abraham b. Hayyim dei Tintori, or Dei Pintti, in 1473. He printed the first Hebrew book in 1474 (Tur Yoreh De'ah). In 1477 there appeared the first printed part of the Bible in an edition of 300 copies. It is not really an edition of a Biblical book, but a reprint of Kimhi's commentary on Psalms, to which the Biblical text of each verse is added; the text being in square, the commentary in Rabbinic characters. Each verse is divided off by a "sof-pasuk." The first four Psalms have the vowel-points; but the difficulty of printing them seems to have been too great, and they were discontinued. The "ketib" is replaced by the "keri"; but the text is badly printed and contains many errors. The Psalms are not numbered, but simply divided, as in the manuscripts, into five books. From the type used it is conjectured that the printing was done at Bologna. The printers were Maestro Joseph Baria, Hayyim Mordecai, and Hezekiah of Ventura. A facsimile of a page is given in Simonsen, "Hebraisk Bogtryk," p. 9 (see also De Rossi, "De Hebr. Typ." p. 10; idem, "Annales Hebr o-Typographici," p. 14). The Psalms alone seem to have been reprinted before 1480, in Rabbinic characters similar to those

used in the 1477 edition; and a third time together with an index of the Psalms and the text of the Birkat ha-Mazon. It is supposed that these two reprints were issued at Rome (Simonsen, in "Steinschneider Fest-schrift," p. 166; compare De Rossi, "Annales," p. 128).

The first edition of the Pentateuch appeared at Bologna Jan. 26, 1482, with vowel-signs and accents.

The raphe-sign is liberally employed. **First Edition** of carded. The Targum (along the side) **Pentateuch**, and the commentary of Rashi (at the top and the bottom of the page) are printed with the text. The cost of publication was borne by Joseph ben Abraham Caravita. The publisher was Maestro Abraham b. Hayyim dei Tintori (Dei Pintti) of Pesaro; the corrector, Joseph Hayyim ben Aaron Strassburg, a Frenchman. According to De Rossi ("Origine," p. 16; "Annales," p. 22), the editor made use of a Spanish manuscript; but Ginsburg ("Introduction," p. 799) believes that German and Franco-German manuscripts were used. A facsimile is given by Simonsen (p. 10). About the same time, and at Bologna, there appeared an edition of the Five Scrolls, with Rashi above and below the text and with the commentary of Ibn Ezra on Esther ("Annales," p. 130). This was followed, Oct. 15, 1485, by an edition of the Former Prophets (without vowels), together with Kimhi's commentary, brought out at Soncino in the duchy of Milan by Joshua Solomon Israel Nathan Soncino. That this edition was very carefully printed is attested upon the fly-leaf. The Divine Name is printed יהוה אלהים (*ib.* p. 40). In the following year the Later Prophets appeared at the same place; though neither date nor printing-office is mentioned in the book itself. The passages in Kimhi dealing with Christianity are not omitted, as is the case in later editions (*ib.* p. 131). It was this same printing-house that brought out, Feb. 23, 1488, the first complete edition of the Bible, the text provided with vowels and accents, in two columns to the page. The Pentateuch in this edition is followed by the Five Scrolls. Soncino was aided in the printing by Abraham ben Hayyim dei Tintori, mentioned above. According to De Rossi (*ib.* p. 56), German codices were at the basis of this edition.

Prior to this, portions of the Bible were printed at Naples: Proverbs, with a commentary of Immanuel ben Solomon, by Hayyim ben Isaac ha-Levi the German (1486); and in the same **Portions of year** (Sept. 8) Job with the commentary of Levi ben Gerson, Lamentations with that of Joseph Kara, and the rest of the Hagiographa with Rashi. The editor of this last edition was Samuel ben Samuel Romano (*ib.* p. 52). This edition was completed with the Psalms (March 28, 1487) with Kimhi's commentary, edited by Joseph ben Jacob the German, and corrected by Jacob Baruch b. Judah Landau (*ib.* p. 48). In 1487 (June 30) an edition of the Pentateuch without commentary appeared at Faro in Portugal, upon the basis of Spanish manuscripts, in Spanish-Hebrew characters, with vowel-points—at times incorrectly applied—and with no accents. The expenses for the edition were paid by Don Samuel Gacon (Stein-

ובאשר ירחק על האל תברך הוא על ררך ששל בלשון בני אדם שיחמק האדם וילעג לשי טבוה או  
 אותה ואינו נחשב בעיניו לכלום וכן ואתה יי' תחמק לטוב הלעג לכל הבאים יי' ישמח לו כי יראה כי

 שאל ממני ואתנה גרים נחלתך כמו שאמר לו ואכריתה את כל אויביך טעניך ועשיתי לך טם כטסם  
 הגדולם אשר בארץ ואישר ריה ארום עברים לדוד ותהי ארם לעברים לדוד ואוטר ויבא טס דוד בכל  
 הארצות ויי' נתן פתרו על כל הגרים והו שאמר ואתנה גרים נחלתך ואמולתך אפסי ארץ והם קנינה הא  
 פארץ ואנש וקן קרובים בענין :

**הרועם** וכן אשר לי על כל הגרים שיקטו עלי אשר לי הרועם בשכש בחול ככלי ידני הנשטם  
 הרועם פי השברט וכן הרועם ברול ידוע כהירים וכן הנשטם הוא ענין טבר אבל עם התור כי השוטם

sehneider. "Cat. Bodl." No. 1072). The only copy known is printed on vellum.

In 1490 an edition of the Pentateuch without vowel-points or accents was published by Abraham ben Isaac b. David at Ixar (Hijar) in Spain, together with the Targum Onkelos in small square type and Rashi in Spanish-Rabbinic type (De Rossi, "Annales," p. 73); and one of the Psalms was issued at Naples (Dec. 12), together with Proverbs and Job (*ib.* p. 79). Another copy of the Pentateuch seems to have been issued at Ixar between 1490 and 1495, together with the Haftarot and the Five Scrolls. It is said by De Rossi to contain the printer's mark of a lion rampant, such as is seen in the other Ixar prints. The printer was Eliezer b. Abraham Alantansi, and it is spoken of as "elegantissima editio" (*ib.* p. 143; "Cat. Bodl." No. 1011a). In the year 1491 two editions of the Pentateuch left the press: one at Naples (Soncino), with vowel-points and accents together with Rashi, the Five Scrolls, and the scroll of Antiochus ("Annales," p. 82); the other at Lisbon (July-Aug.), with Onkelos and Rashi. The Lisbon copy was edited by David b. Joseph ibn Yahya and Joseph Calphon. It is declared by Le Long and De Rossi (*ib.* p. 81) to be the most celebrated and beautiful Hebrew print of the fifteenth century. The elegant characters are provided with vowels and accents even in the Onkelos, and the raphe-signs are used throughout (facsimile in Simonsen, *l.c.* p. 12). It was published in two volumes, probably at the same press from which came the editions of Isaiah and Jeremiah with Kimhi's commentary (1492) and Proverbs with the commentary of David b. Solomon ibn Yahya (*c.* 1492; see "Annales," pp. 92, 143). From another press in Portugal, at Leira, were issued, July 25, 1492, Proverbs with Targum and the commentaries of Levi ben Gerson and Menahem Meiri (printed by Samuel d'Ortas), and in 1494 the Former Prophets with Targum and commentaries of Kimhi and Levi b. Gerson (*ib.* pp. 92, 104).

Gerson b. Moses Soneino established a printing-press also in Breseia, from which there issued a Pentateuch with the Five Scrolls and the Haftarot,

Jan. 23, 1492; a second edition of this

**Soneino Pentateuch**, Nov. 24, 1493; Psalms, Dec. 16, 1493; and a complete Bible, May 24-31, 1494 (*ib.* pp. 88, 98, 102;

Baer-Delitzsch, "Liber Psalmorum," p. iv.). This last edition is in most copies merely a reprint of the 1493 edition as regards the Pentateuch; and it is of especial interest as being the one used by Luther in making his translation into German. Luther's copy is preserved in the Berlin Royal Library (Kennicott, Reports, pp. 81, 85; Bachmann, "Alttestament-Untersuchungen," p. 101, with facsimile). It is interesting to note that Gerson seems to ignore most of the peculiarities of the Masoretic text as laid down; *e.g.*, by Jacob b. Hayyim (König, "Einleitung," p. 52).

As none of the polyglot Bibles were the work of Jewish printers or editors a short account only of them need be given here. The idea

**Polyglot Bibles.** seems to have originated with Origen (185[?]–253), who drew up in parallel

columns the Hebrew text, its transliteration into Greek, and various other Greek recensions in fifty scrolls or books which were then de-

posited in the library of Pamphilus at Cæsarea (this Hexapla was preceded by a Tetrapla). The idea was not revived until the sixteenth century, when the first edition of the Hebrew text by Christians appeared in the Complutensian Polyglot (Alealá de Henares, 1514–17, 6 vols.). Renouard believes that the plan originated with Aldus Manutius, who, in the preface to the Psalter of 1497, speaks of the probability of his publishing a Hebrew-Greek and Latin Bible in one. Only the first sheet, however, of this was printed. The honor of being first in the field belongs to Cardinal Ximenes; though among those who helped him were the Maranos Alfonso of Zamora and Paul Nuñez Coronel. The three columns on each page contain the Hebrew, the Septuagint, and the Vulgate. The Targum of Onkelos is added, of which Alfonso made the Latin translation. Ximenes had to east his own Hebrew type for this work: "ḥaṭefs" are sparingly used; of the accents, only "athnah" and "sof-pasuk." The Masoretic divisions are discarded; and the text for the first time is arranged after the model of the Vulgate, the chapter-numbering of which is printed in the margin. By means of a letter, reference is made from each Hebrew word to its Latin equivalent; and the Hebrew roots are also placed on the margin.

The Hebrew text of the Complutensian was repeated in the Antwerp Polyglot (1569–72, 8 vols.), the editor of which was Arias Montanus, and the printer Christopher Plantin. It is known also as the "Biblia Regia," because Philip II. defrayed the expenses. In addition to the texts in the Complutensian, it contains an additional Targum and a number of tracts on lexicographical and grammatical subjects. Only 500 copies were printed, most of which were lost at sea on their way to Spain. The polyglot of Elijah Hutter (Nuremberg, 1599–1601), contains, besides the older versions, a number in modern European languages; and it is peculiar from the fact that the radical letters of the Hebrew text are printed in full characters, and the servile letters in hollow ones. A decided advance is made in the Paris Polyglot (1629–45, 10 vols.), done at the expense of Michel le Jay. Here the Complutensian and Antwerp polyglots are repeated; but there are added the Syriac and Arabic as well as the Samaritan, Hebrew, and Aramaic versions, and a Latin translation of all the versions. It is also highly prized for its typographical excellence.

Still more ambitious than the Paris was the London Polyglot edited by Brian Walton (1654–57, 6 vols., and "Lexicon Heptaglotton," 1669, 2 vols.).

The first four volumes contain the Old Testament, where, in addition to the **Polyglot**, Hebrew, the following texts are to be

found: Samaritan-Hebrew, Samaritan-Aramaic, Septuagint with readings of the Codex Alexandrinus, Old Latin, Vulgate, Syriac, Arabic, Targum Onkelos, Pseudo-Jonathan and Jerusalem Targums, Targum Jonathan and Targum of the Hagiographa, Ethiopic and Persian in varying completeness. All of these were accompanied by Latin translations. This polyglot was the second book in England to be published by subscription. It was originally dedicated to Cromwell; but as he died during the printing, it was finally dedicated to

Charles II. A few copies, however, left the press before the change was made; and these are called "Republican" copies, to distinguish them from the "Royal" ones.

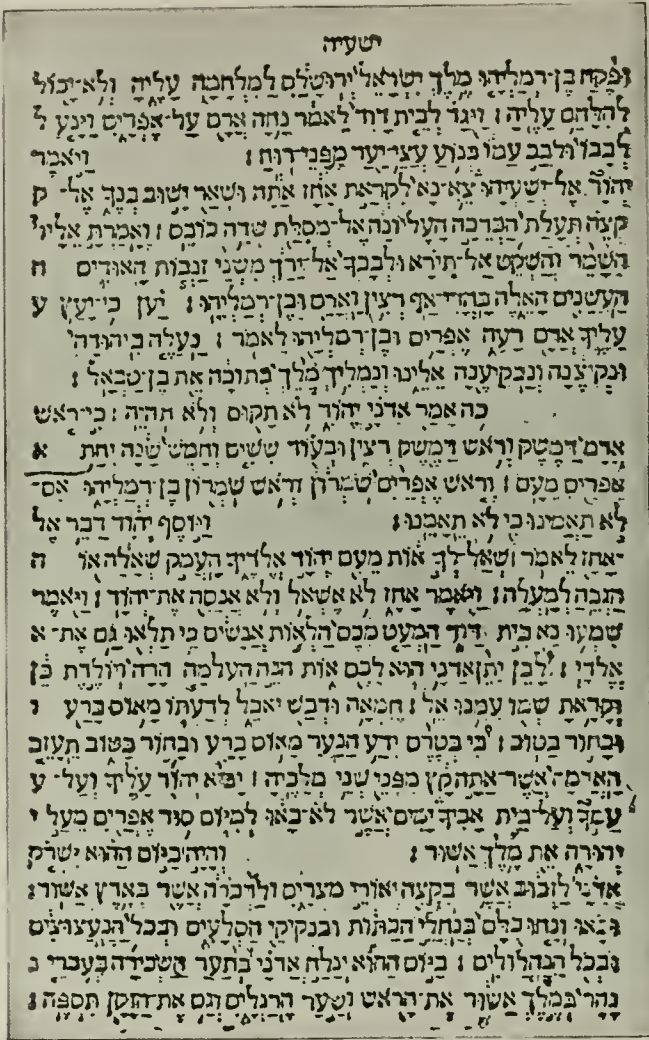

The polyglot of Christian Reineccius (Leipsic, 1750, 3 vols.), which contains the Hebrew (with Masoretic notes), the Greek, Latin, and Luther's German version; that of E. Hutter (Hamburg, 1599), of which only the Pentateuch, Joshua, Judges, and Ruth were published; and that of S. Bagster (London, 1821), in which the Hebrew text is that of Van der Hooght, the Samaritan that of Kennicott, need no further mention. The Heidelberg or Bertram's polyglot (*ex-officina Sancti-Andreeana*, 1586; Commeliniana, 1599, 1616, 3 vols.), Hebrew, Greek, and Latin, is based on the Complutensian text. Polyglot Psalters containing the Hebrew text were published at St. Germain des Prés in 1509 and 1513 by the elder Henry Stephen, at Genoa in 1516 by Agostino Justinian, and at Cologne in 1518 by Potken. The only Jewish polyglot issued was the Pentateuch (Constantinople, 1547), which contained, besides the text, the Targum, and the Persian translations in Hebrew characters. The most recent polyglots are those of Stier and Thiele (Leipsic, 1847-63; 3d ed., 1854-64) with Hebrew, Septuagint, and Vulgate, and of R. de Levante (London, 1876, 6 vols.).

Another class of Bibles, and these distinctively Jewish, are those that are known as Rabbinic Bibles, or Mikra'ot Gedolot. The first of these was published at Venice 1517-18; the editor was Felix Pra-

tensis. It contains the Pentateuch with Onkelos and Rashi, the Former and Later Prophets with Targum Jonathan and Kimhi's comments (the anti-Christian passages omitted); Psalms with Targum and Kimhi; Proverbs with the commentary known as "Kaw we-Naki"; Job with the commentaries of Nahmanides and Abraham Farrisol; the Five Scrolls with the commentary of Levi b. Gerson; Ezra and Chronicles with the commentaries of Rashi and Simon ba-Darshan. To these were added the Jerusalem Targum to the Pentateuch; Targum Sheni to Esther; the variant readings of Ben Asher and Ben Naphtali; the thirteen "articles of faith" of Maimonides; the 613 precepts according to Aaron Jacob Haasan; and a table of the parashiyot and Haftarat according to the Spanish and German rites. This edition is the first in which Samuel, Kings, and Chronicles are divided into two books, and Nehemiah is separated from Ezra. It is the first also to indicate in the margin the numbers of the chapters in Hebrew letters (Ginsburg, "Introduction," p. 26). The keri consonants are also given in the margin.

The edition was not, however, pleasing to the Jews, perhaps because its editor was a convert.

Elijah Levita, in his "Masoret ha-Masoret," severely criticizes the Masoretic notes. This edition was replaced in 1525 by the second Bomberg text, which was edited by Jacob b. Hayyim of Tunis under the title *Sefer יהוה הקדוש*. This text, more than any other, has influenced all later ones; though readings from the Complutensian and from the Soccino edi-

tion of 1488 have occasionally found their way in. It is peculiar as being the first to insert the letters **פ** and **צ** for the purpose of indicating the open and closed sections, and to designate the *keri* by the letter **ק**. Here also the first attempt is made, though incompletely, to collect the Masorah, both "Magna" and "Parva." As in the best manuscripts, the larger Masorah is printed above and below the text (Hebrew and Targum in parallel columns); while the lesser Masorah is printed between the columns. Besides the elaborate introduction to the Masorah by Jacob b. Ḥayyim himself, an index to the Masorah, Ibn Ezra's introduction to the Pentateuch, Moses ha-Naḥḥan's treatise on accents, the variations between the Easterns and the Westerns and between Ben Asher and Ben Naphtali, it contains the Pentateuch with Targum, Rashi, and Ibn Ezra; the Former Prophets with Rashi, Ḳimḥi, and Levi b. Gerson; Isaiah with Rashi and Ibn Ezra; Jeremiah and Ezekiel with Rashi and Ḳimḥi; the Minor Prophets with Rashi and Ibn Ezra; Psalms with Rashi and Ibn Ezra; Proverbs with Ibn Ezra, Moses Ḳimḥi, and Levi ben Gerson; Job with Ibn Ezra and Levi ben Gerson; Daniel with Ibn Ezra and Saadia; Ezra with Ibn Ezra, Moses Ḳimḥi, and Rashi; Chronicles with Pseudo-Rashi; and the Five Scrolls with Rashi and Ibn Ezra. This Bible was reprinted, with readings inserted from the edition of Felix Pratensis (Venice, 1525-28).

The third edition of the Bomberg Rabbinic Bible (1546-48) was edited by Cornelius Adelkind. It was practically a reprint of the second, except that the commentary of Ibn Ezra on Isaiah was omitted; while that of Jacob ben Asher on the Pentateuch and that of Isaiah di Trani on Judges and Samuel were inserted. This third Bomberg edition was repeated in the fourth edition by Isaac b. Joseph Salam and Isaac ben Gerson (Treves). Part of the Masorah omitted in the third edition has here been reinserted. The fifth edition was a reprint of De Gara's (Venice, 1617-19, by Pietro Lorenzo Bragadini, and revised by Leo di Modena). It was, however, expurgated by the Inquisition. The sixth edition, by Johannes Buxtorf (Basel, 1618-19, 2 vols.), was a reprint of the 1546-48 copy. To this was added the editor's "Tiberias," a Masoretic work. The seventh *Biblia Rabbinica* was published at Amsterdam, 1724-28 (4 vols., fol. 1), under the title "Ḳehillot Mosheh." It contains, besides the Hebrew text, the Targum on the whole Bible; Rashi, Ibn Ezra, Levi ben Gerson, Obadiah Sforno, Jacob b. Asher, Hizkuni, and 'Imre No'am on the Pentateuch; David Ḳimḥi on the Prophets and the Chronicles; Isaiah di Trani on Judges and Samuel; "Keli Yaḳar" on the Former Prophets, and "Keli-Paz," by Samuel Laniado, on the Later Prophets; Meḥr Arama on Isaiah, Jeremiah, and the Song of Solomon; Jacob Berab on Isaiah, Jeremiah, Ezekiel, and some other Later Prophets; Samuel Almosnino on the Later Prophets; Isaac Gerson on Malachi; "Torat Hesed" by Isaac ben Solomon; Ya'bez on Psalms, Job, Canticles, Ruth, Lamentations, Ecclesiastes, Daniel, Ezra, Nehemiah, and Chronicles; Joseph ibn Yahya on the Hagiographa; "Mizmor le-Todah," by Samuel Arepol, on Psalm cxix.; "Ḳaw we-Naḳi" on Proverbs; Menahem Meḥri on Proverbs; Moses Ḳimḥi on Proverbs, Ezra, Nehemiah;

Naḥmanides, Farissol, and Simon ben Zemah Duran on Job; Saadia Gaon on Daniel; Yalḳuṭ Shim'on on Chronicles; Moses of Frankfurt's annotations, entitled "Ḳomaz Minhah," on the Pentateuch; "Minhah Ḳeṭannah" on the Former Prophets; "Minhah Gedolah" on the Later Prophets, "Minhat 'Ereb" on the Hagiographa; the introduction of Jacob b. Ḥayyim of Tunis; and the tract on the accents by Moses ha-Naḥḥan.

The latest *Biblia Rabbinica*, with thirty-two commentaries, is that published at Warsaw by Levensohn (1860-68, 12 vols., small fol.). It contains, besides the original Hebrew, the Targums Onkelos and Yerushalmi on the Pentateuch, the Targum Onkelos on the Prophets and Hagiographa, and the Targum Sheni on Esther.

Of commentaries it contains that of Rashi on the whole Bible; Aaron Pesaro's "Toledot Aaron"; Asheri's commentary and Norzi's notes on the Bible; Ibn Ezra on the Pentateuch, the Five Megillot, the Minor Prophets, the Psalms, Job, and Daniel; Moses Ḳimḥi on the Proverbs; Naḥmanides on the Pentateuch; Obadiah Sforno on the Pentateuch, the Song of Solomon, and Ecclesiastes; Elijah Wilna on the Pentateuch, Joshua, Isaiah, and Ezekiel; S. E. Lenczyz and S. Edels on the Pentateuch; J. H. Altshuler on the Prophets and Hagiographa; David Ḳimḥi on the Later Prophets; Levi ben Gerson on Joshua, Kings, Proverbs, and Job; Isaiah di Trani on Judges and Samuel; S. Ocoda on Ruth and Lamentations; Eliezer ben Elijah Ashkenazi on Esther; Saadia on Daniel. It also contains the Masorah Magna and Parva, tracts on the vowels and accents, the various readings of Ben Asher and Ben Naphtali, and the introduction of Jacob ben Ḥayyim of Tunis.

Several editions were published at Venice by Daniel Bomberg, 1517, 1521, 1525-28. Of later editions, only a few of the more important can be mentioned here. Joseph Athias (Amsterdam, 1661) edited the text, using Buxtorf's edition and the traditional one, that had come down from Soncino (1488), with a comparison of two manuscripts. This was reprinted by Leusden in 1667. A third edition was brought out by Daniel Ernest Jablonski (Berlin, 1690), but with a comparison of all the earlier editions (other editions 1712, and, without vowels, 1711). Jablonski's, in turn, became the foundation of that of J. H. Michaelis (Halle, 1720), for which the latter compared five Erfurt manuscripts and nineteen printed editions. The Mantuan Bible of 1742-44, edited by Rafael Ḥayyim b. Abiad Shalom Basilea and Felice (Maṣṣliah) Marini, was in a measure only a reprint of Michaelis; Raphael in his edition of the excellent text, as corrected by Norzi ("Minhat Shai," Mantua, 1732-44), tried to unify the text and not simply to reprint the older editions.

The basis of all the modern editions of the Bible is that of E. van der Hooght (Amsterdam and Utrecht, 1705). It is practically a reprint of the Athias-Leusden edition;

#### Van der Hooght.

but at the end it has variants taken from a number of printed editions. It has been much prized because of its excellent and clear type; but no manuscripts were used in its prep-

Revised.

PEDIGREE OF HEBREW BIBLE.

aration. This text was followed, even when variants were added, by Proops, Houbigant, Simon, Kennicott, Lahn, etc. The text of D. H. Opitz (Kiel, 1709) seems to be a mixed one; three manuscripts, a number of the earlier editions, and the polyglots having been laid under contribution. But still the Van der Hooght was considered to be a sort of "textus receptus," the edition of M. Letteris (Vienna, 1852) showing very few changes. This last edition was reprinted with clear-cut type by the British and Foreign Bible Society (Berlin, 1866, etc.), and in New York by Wiley & Son (1872-75). The first Hebrew Bible in America, published by William Fry at Philadelphia in 1814, was from the text of Van der Hooght, and it was reprinted in Philadelphia by Isaac Lesser in 1849.

No serious attempt was made to issue a text of the Bible after the best manuscripts and the Masorah until S. BAER commenced his publications with the help of Franz Delitzsch (1861 *et seq.*). His edition, unfortunately not completed, has become the standard. Based upon a much fuller comparison of manuscripts is the edition of the Masoretic Bible of Chr. D. Ginsburg (London, 1895), which may be considered to represent the truest Masoretic tradition. Of quite a different character is the polychrome edition of the Bible, now (1902) nearly completed, published by Paul Haupt (Leipzig and Baltimore, 1893 *et seq.*) with the aid of the foremost Biblical scholars. Under the title "The Sacred Books of the Old Testament," it endeavors to give a critical edition of the Hebrew text on the basis of the versions and the results of modern critical inquiry. The supposed sources are distinguished by various colors.

T.

G.

**BIBLE EXEGESIS.**—**Jewish:** 1. Israel has been called "the People of the Book"; it may as fitly be called "the people of Scripture exegesis," for exegesis in the largest sense of the word is in a way the one indigenous science which Israel has created and developed, after having produced, during the first long period of its history, the actual subject of this science, the Bible itself. During the thousand years following the collection of the different books of the Scripture, the intellectual activity of Judaism was directed almost exclusively to the exegetic treatment of the Bible and the systematic development of the Law derived from it. When, through contact with Hellenic and Arabic learning, the Jewish intellect was led into new channels, Bible exegesis still retained its position of chief interest; it was the first to feel the influence of the new thought; and it gave birth to auxiliary Hebrew philology, the only science which originated in the Judaism of the Middle Ages. That other great production of medieval Judaism, the philosophy of religion, likewise developed into Bible exegesis in order to take on a Jewish character, although it substantially reproduced alien

views. Finally, the younger sister of the philosophy of religion, the mysticism of the Cabala, also assumed the form and character of Bible exegesis.

During the centuries of decadence and increasing ignorance the exposition of the Bible in its various aspects still remained the most popular and assiduously cultivated occupation of the Jewish mind. The epoch known as the Mendelssohnian begins with a renaissance in the field of Bible exegesis. And modern Judaism is especially characterized by two reforms founded on the study and exposition of the Bible; viz., the reinstatement of the Bible in its legitimate place in the instruction of the young, where it had long been secondary to the study of the Talmud; and the sermon in the synagogue, based as it is on the Biblical text. Corresponding with this importance of Bible exegesis in the intellectual life of Israel, sketched here in a few words, is the magnitude of the exegetical literature, which will now be briefly reviewed in its chief phases and products.

2. The beginnings of Jewish Bible exegesis go back to a period when a part of the books collected later on into the Biblical canon did not yet exist. The original designation of **Jewish** for the expositor's function, the verb **Exegesis**. "darash" (דרש), from which the original name of Scriptural exegesis, the noun "midrash" (מדרש), was formed, is used in the well-known reference to Ezra (Ezra vii. 10) that he "prepared his heart to seek the law of the Lord." The verb denotes "to investigate," "to seek," and, in connection with the Bible, meant, therefore, to examine the text, to search into what it means. This reference to Ezra is the earliest mention of Scriptural exegesis, and its history dates from his activity. Ezra, who by his endeavors placed the Pentateuch on the pinnacle of its importance for the new Jewish community of the Second Temple, and hence for the subsequent ages of Judaism, may also be regarded as the founder of Scriptural exegesis, which latter was confined at first to the Pentateuch as representing the entire sacred writings. Two institutions that originated in this period, the synagogue and the academy, assured a lasting home to the intellectual activity concentrated upon the examination and exposition of the Bible. In the synagogue the sacred text of the Pentateuch, and later that of the Prophets, were read and expounded; in the academies and schoolhouses the same texts were used for teaching the young and for investigation and in the instruction of adults. Thus, in harmony with its origin and the character of these two institutions, exegesis became a matter of oral instruction and oral tradition; hence any written exegetical literature of the Bible during those first formative centuries is out of the question.

3. There are no contemporary accounts of the development of the academy and the method of instruction among the Palestinian Jews during the time of the Second Temple: the historic records speak of them only after they had been firmly established and recognized. Frequent references in traditional literature, traceable down to the decades immediately preceding the Christian era, show that the national science, as developed by the Pharisees since the time of the Maccabees, was divided into two

groups, Bible and tradition ("Mikra" and "Mishnah"), and that the latter comprised three branches, in which the work of traditional literature originated. These three branches

**Midrash, Halakah, and Haggadah.** (1) Midrashot (in the singular, "Midrash"); (2) Halakot (or Halakah); (3) Haggadot (or Haggadah). This order of the constituents of Mishnah in its most comprehensive sense corresponds with the historical development of these branches. First in time was the MIDRASH, *i. e.*, the exposition of the Scripture, especially of the Pentateuch and more particularly of its legal portions. From this branched off, on the one hand, the Halakot—the statutes derived exegetically from the written law, to which were added other statutes, which had been transmitted orally, and which the teachers endeavored to connect exegetically with the Biblical text—and, on the other, the Haggadot, which included the exegesis not connected with the Law, with its manifold material derived from the sacred writings. Through this differentiation the branch designated as "Midrash" was specialized into exposition of the Law or halakic exegesis. The derivation of the Halakah from the Biblical text was also called "Talmud," so that "Talmud" originally meant the same as "Midrash" in the above-mentioned stricter sense.

The Mikra, the fundamental part of the national science, was the subject of the primary instruction, and was also divided into three parts;

**Mikra.** namely, the three historic groups of the books of the Bible, the Pentateuch, the Prophets, and the Hagiographa. The intelligent reading and comprehension of the text, arrived at by a correct division of the sentences and words, formed the course of instruction in the Bible. The scribes were also required to know the TARGUM, the Aramaic translation of the text. The Targum made possible an immediate comprehension of the text, but was continuously influenced by the exegesis taught in the schools. The synagogues were pre-eminently the centers for instruction in the Bible and its exegesis. The reading of the Biblical text, which was combined with that of the Targum, served to widen the knowledge of the scholars learned in the first division of the national science. The scribes found the material for their discourses, which formed a part of the synagogue service, in the second division, the several branches of the tradition; the Haggadah, the third of these branches, especially furnished the material for the sermon.

4. The tannaitic traditional literature is derived from the three original branches of the traditional science, as taught in the schools of both Palestine and Babylonia. Although part of this literature has been lost, its most important products are still extant. The Mishnah, in its strict **Traditional Literature.** sense, and its supplement, the Tosefta, as well as a mass of other halakic sentences (Baraitas, see BARAITA), preserved in the two Talmuds, are derived from the second of those branches. This part of the tannaitic literature retains many traces of its descent from the Midrash, in the many Biblical exegetical details which it contains. The branch of the Midrash pre-

served as its documents the Midrashim to the last four books of the Pentateuch; viz., Mekilta, on Exodus; Torat Kohanim, or Sifra, on Leviticus; and Sifre, on Numbers and Deuteronomy. These works, which are running commentaries on the Biblical text, and as such the earliest of their kind, contain also the exegetics belonging to the third branch.

But there are also tannaitic Haggadah collections, such as were produced in great number in the post-tannaitic period, preserving those haggadic traditions of the tannaitic time which continued in existence. One of these Haggadot, for instance, is the "Seder 'Olam," a chronology of Bible history based on haggadic exegesis. In the period of the Amoraim, beginning with the redaction of the Mishnah, the method of instruction was changed in that the Mishnah became the text-book for lectures and discussions in Palestine as well as in Babylonia. The two Talmuds, which drew their material chiefly from the Halakah and halakic exegesis (the Midrash in the exact sense), but gave a considerable place also to the Haggadah, are the result of these lectures and discussions. The haggadic exegesis was cultivated especially in Palestine, leading to the haggadic Midrash collections on the Pentateuch, the pericopes ("Pesiqtas"; see PESIQTAS), and other Biblical books, which were based principally on the sermons. The final editing of these collections belongs to the post-amoraic time, though they represent chiefly the exegesis of the Amoraim. Side by side with the writings here sketched, which were always connected in some way with Biblical exegetics, there came to maturity during the time of the Tannaim and Amoraim the Targum literature, originating in the institution of reading the Targum at divine service. This Targum was extended to the whole Bible, as was also the Masorah, which latter is the determination of the rules and principles governing the text of the Bible. These were the two branches of study which transmitted to later generations the knowledge and correct reading of the Bible text.

5. The products of the traditional literature described above have this trait in common, that they are not the exclusive work of certain writers, but are the outcome of a long series of oral traditions, that were finally given a certain form in a written work. Therefore the exegesis found in these works does not belong to one single epoch, but to different epochs extending over a number of centuries. From the days of Hillel (30 B.C.) the names of the compilers of the traditional exegesis were

**Tannaitic and Amoraic Exegesis.** also handed down; so that the originators of a large part of that early Bible exegesis and many of the Tannaim and Amoraim are known as more or less important exegetes. An old tradition reports of Hillel's teachers, Shemaiah and Abtalion, that they were great exegetes ("darshanim"). Hillel himself marks an epoch in halakic exegesis, since he formulated the seven rules according to which the Bible text must be explained. Hillel's pupil, Johanan b. Zakkai, followed a kind of symbolic exegesis.

The period between the destruction of Jerusalem and the Hadrianic war was the most fruitful and important epoch for early exegesis, and its repre-

sentatives were Johanan b. Zakkai's pupils and their disciples. Chief among these in the field of halakic exegesis are Ishmael b. Elisha and AKIBA BEN JOSEPH, between whose teachings there existed a fundamental opposition which extended to the Haggadah. Ishmael expanded Hillel's rules into the well-known thirteen rules for exegesis, and postulated, besides others, that of the human mode of expression in Scripture, a thesis that was to have an important influence on later Jewish exegesis. Akiba, imbued with the incomparable importance of the Biblical text, successfully defended the opinion he derived from his teacher, Nahum of Gimzo, that not even what might seem to be the most insignificant word of the text was without its especial meaning; hence everything contained in the text must become the subject of interpretation. Akiba's work was continued by his pupils, the leaders in the post-Hadriatic time, who were voluminous exegetes. One of them, Eliezer, son of the Galilean Jose, formulated thirty-two rules for haggadic exegesis. The great teachers of the Law (halakists) of the tannaitic period were also eminent Biblical exegetes, although there were also some tannaites whose pre-eminence lay solely in the domain of exegesis; as, for instance, Eleazar of Modiim in the pre-Hadriatic period, and the above-mentioned Eliezer b. Jose in the post-Hadriatic period.

The Halakists and Haggadists were more sharply distinguished during the time of the Palestinian Amoraim. Although even then some eminent heads of academies were at the same time masters of the Haggadah, e.g., Johanan, Simeon b. Lakish, Eleazar b. Pedat. The most important Bible exegetes were mostly haggadists by profession, as Samuel b. Nahman, Simlai, Isaac, Levi, Judah b. Simon, Huna, Judah, Judah b. Shalom, Tanhuma. These students of the Haggadah, as they were called, preserved also the old exegetic traditions, and produced in the post-amoraic times the above-mentioned Midrash collections. In Babylonia the haggadic exegesis was cultivated in a less independent spirit, being mostly under the influence of the Palestinian schools. There were, however, eminent haggadists among the great teachers, as Rab in the third and Raba in the fourth century.

The exegetics of the traditional literature that was not transmitted with the names of the authors, especially the anonymous portions of the tannaitic Midrash, originated in part at a very early date. It is a noteworthy fact that the exegetic phraseology of the tannaites, and consequently the earliest terminology of Bible exegetics as a whole, were already in existence when the historic period of Jewish Bible exegesis began with Hillel; that terminology may therefore be considered as a monument of the period before Hillel.

6. These sources of Jewish Bible exegesis, belonging to the first period, which ended with the final redaction of the Talmud (500

**Early Bible Translations.** C.E.), were supplemented by others of an entirely different nature. These complete the account that has to be given of the exegesis of that period.

First in order are the old translations of the Bible; they, like the Aramaic Targum, were intended to

spread the knowledge of the Bible and naturally reflected the exegesis of the school from which they proceeded. The Septuagint demands especial attention, being the earliest literary translation as well as a source for early exegesis. Aquila's translation represents the school of Jabneh, especially Akiba's. But the other Greek versions are also based on Jewish exegesis, and so is, in great part, the Peshitta. Jerome in turn endeavored to establish the "Hebrew truth" in his Latin version, on the basis of oral instruction received from Jewish exegetes of Palestine. Philo, the great representative of the Alexandrian exegesis, takes a foremost place; his writings are, in part, comprehensive and explanatory paraphrases of the stories and ordinances

**Philo.** of the Pentateuch, and, in part, a running allegorical commentary on the Bible text. Philo's allegorical exegesis was the first and most consistent attempt to prove by means of Biblical exegesis that Greek philosophy underlay the superficial meaning of the words of the Bible.

In Palestine, too,—indeed as early as the time of Philo—opinions and speculations on God and the Creation, in part of extraneous origin, were connected with two chapters of the Bible (Gen. i. and Ezek. i.); and their exegesis was the real subject of the esoteric doctrine called after those sections, "Ma'ase Bereshit" and "Ma'ase Merkabah." The chief work of the historian Josephus may also be considered as a source of the Bible ex-

**Josephus.** egesis of this time; the first part of his "Antiquities" being a running commentary on the narrative portions of the Scripture. Finally, the Bible exegesis contained in the books of the New Testament must be mentioned. It proceeded from the exegesis current at the time, and belongs to the same class as the other products of the early Haggadah. It became the actual foundation for the new faith, just as the Biblical exegesis, the Midrash of the Palestinian schools, may be considered the basis for the reshaping of Judaism after the destruction of Jerusalem and the Second Temple.

7. The Bible exegesis of the Tannaim and the Amoraim, which may be best designated as exegesis of the Midrash, was a product of nat-

**Midrash; Peshat; Masorah.** ural growth and of great freedom in the treatment of the words of the Bible. But it proved an obstacle to further development when, endowed

with the authority of a sacred tradition in the Talmud and in the Midrash collections edited subsequently to the Talmud, it became the sole source for the interpretation of the Bible among later generations. The traditional literature contains, indeed, an abundance of correct explanations that are in harmony with the wording and the context; and it bears everywhere evidence of a fine linguistic sense, good judgment, and an acute insight into the peculiarities and difficulties of the Bible text. But side by side with these elements of a natural and simple Bible exegesis, of value even to-day, the traditional literature contains an even larger mass of expositions far removed from the actual meaning of the text. In the halakic as well as in the haggadic exegesis the expounder endeavored not so much to

seek the original meaning of the text as to find authority in some Bible passage for the concepts and ideas, the rules of conduct and teachings, for which he wished to have a Biblical foundation. To this were added, on the one hand, the belief that the words of the Bible had many meanings, and, on the other, the importance attached to the smallest portion, the slightest peculiarity of the text; hence the exegesis of the Midrash strayed further and further away from a natural and common-sense interpretation.

Again, it must be remembered that the Midrash exegesis was largely in the nature of homiletics, expounding the Bible not in order to investigate its actual meaning and to understand the documents of the past, but in order to find religious edification, moral instruction, and sustenance for the thoughts and feelings of the present. The contrast between the simple natural explanation of the literal sense and the Midrash, that did not feel bound to follow the mere words, was recognized even by the Tannaim and the Amoraim, although their idea of the literal meaning of a Biblical passage may not be allowed by more modern standards. The above-mentioned tanna, Ishmael b. Elisha, even said once, rejecting an exposition of Eliezer b. Hyrcanus: "Truly, you say to Scripture, 'Be silent while I am expounding!'" (Sifra on Lev. xiii. 49). The tannaitic exegesis distinguishes principally between the actual deduction of a thesis from a Bible passage as a means of proving a point, and the use of such a passage as a mere mnemonic device, a distinction that was also made in a different form later in the Babylonian schools. The Babylonian Amoraim were the first to use the expression "Peshat" (פֶּשֶׁט) to designate the primary sense, contrasting it with the "Derash," the Midrashic exegesis. These two terms were later on destined to become important features in the history of Jewish Bible exegesis. And, again, in Babylonia was formulated the important principle that the Midrashic exegesis could not annul the primary sense. This principle subsequently became the watchword of the common-sense Bible exegesis; but how little it was known or recognized may be seen from the admission of Kahana, a Babylonian amora of the fourth century, that while at eighteen years of age he had already learned the whole Mishnah, he had only heard of that principle a great many years later (Shab. 63a). Kahana's admission is characteristic of the centuries following the final redaction of the Talmud. The primary meaning is no longer considered, but it becomes more and more the fashion to interpret the text according to the meaning given to it in traditional literature. The ability and even the desire for original investigation of the text succumbed to the overwhelming authority of the Midrash. It was, therefore, providential that, just at the time when the Midrash was paramount, the close study of the text of the Bible, at least in one direction, was pursued with rare energy and perseverance by the careful Masorites, who set themselves the task of preserving and transmitting the pronunciation and correct reading of the text. By introducing punctuation (vowel-points and accents) into the Biblical text, in the seventh century, they supplied that protecting hedge which, accord-

ing to Akiba's saying, the Masorah was to be for the words of the Bible. Punctuation, on the one hand, protected the tradition from being forgotten, and, on the other, was the precursor of an independent Bible science to be developed in a later age.

8. Karaism gave the first impulse toward an independent investigation of the Bible and a denial of the autocratic authority of the Midrash. The "Bene Mikra" (Sons of the Exegesis. Scripture), as the sect founded by Anan (eighth century) called itself, rejecting the Talmudic tradition, posited as first principles the duty to investigate the Bible itself and to draw from it the foundations for religious knowledge and rules of conduct by means of an exegesis independent of tradition. But Karaism exerted a lasting influence on the further development of Jewish Bible exegesis not so much by its own achievements as by its reaction on the large majority of the Jews who remained faithful to tradition. For undoubtedly Saadia, the great originator of the new Jewish knowledge, was stimulated by the Karaite movement to enter upon his pioneer activity. He proved his genius as a Bible exegete in the first instance in polemics against the Karaites; and they, in turn, were stimulated by Saadia and his partly polemic, partly positive work, to a richer and more significant activity in their own field than that which obtained before his appearance. The Karaite leaders in exegesis and Hebrew philology were accordingly either Saadia's contemporaries or belonged to the post-Saadian times.

In the century and a half between Anan and Saadia, Karaism produced no exegete of lasting importance. But the numerous exegetes and founders of sects mentioned in clear and unmistakable terms by the Karaites themselves, though they often disapproved of them, demonstrate the vigorous intellectual activity of Eastern Judaism after Anan. Not long after him Benjamin of Nahawendi, one of the fathers of Karaism, applied the allegoric method of exposition in a way reminding one of Philo. Yuldghan of Hamadan (Judah the Persian) laid down the principle that the Torah had an esoteric as well as an esoteric significance. Qivi of Balkh, of the middle of the ninth century, proposed a rational criticism of the subject-matter of the Bible, at the same time finding two hundred reasons against the authenticity of the Pentateuch, mainly on historical, but also on legal grounds. Most of the Karaite exegetes, either Saadia's contemporaries or following immediately after him, wrote commentaries on the Pentateuch and on other Biblical books, under Saadia's influence and controverting him. Among these may be mentioned Solomon b. Yeroham, Sahal b. Mazliah, Abu Yusuf Ya'qub al-Kirkisani, and the prolific Karaite exegete, Japheth b. Ali, frequently cited by Abraham ibn Ezra.

As the exposition of the sacred text was not possible without philological explanations, the commentaries of the Karaite exegetes contain, of course, many grammatical and lexical explanations. But even here they were not originators, and were only stimulated by Saadia's example and instruction to more penetrating philological research into Hebrew. The earliest Karaite grammarians of whom anything

definite is known, as well as David ben Abraham, the earliest Karaite lexicographer, were all subsequent to Saadia. The earlier Karaites contributed to the development neither of Hebrew philology nor of exegesis, which began to flourish about the tenth century among the Eastern and Western Jews still clinging to tradition. But contemporaneously with the later golden age of Rabbinic exegesis, and influenced by it, exegetic literature flourished among the Karaites, its chief representatives being Abu-Fara'i Harun (at the beginning of the eleventh century), Jeshua b. Judah (at the end of the eleventh century), Jacob b. Reuben, Levi b. Japheth, Japheth b. Sa'id, and Judah Hadassi (contemporary of Ibn Ezra). At the end of the thirteenth century Aaron b. Joseph wrote a commentary on the Pentateuch ("Sefer ha-Mibhar"), in imitation of Ibn Ezra and using Nahmanides; and not long after Aaron b. Elijah, the younger, who was influenced by Maimonides, wrote his commentary on the Pentateuch ("Keter Torah"), a work that worthily ends the exegetic literature of the Karaites.

9. The new epoch in the history of Jewish Bible exegesis beginning with Saadia may fitly be characterized as "the period of the Peshat." As already mentioned, this phrase signified among the Babylonian Amoraim the primary sense of the Bible text, in contradistinction to its interpretation as found in the Midrash. Now

**Period of the Peshat.** the phrase became the watchword for the exegetes who broke away from the authority of the Midrash and went direct to the Bible text without regard to traditional exegesis. The authors writing in Arabic also use the phrase in this sense; and Ibn Janah calls Saadia the representative of the Peshat. It was a matter of no little importance for the new method of exegesis that its founder held the highest position in the gift of the tradition-loving Jews of his age; for the fact that it was the "Gaon of Sura" who opened up new paths for exegesis facilitated the recognition and further development of this method among the large majority of the Jews who still held by tradition. But the genuine merit of Saadia's labors also assured their success. His most important work in the field of Bible exegesis is his Arabic translation of the Bible, which chiefly aimed to bring about a right understanding of the original text by means of the Arabic reproduction. In his version Saadia leaves nothing obscure. Although he does not paraphrase, he translates freely; disregarding the syntactical character of the original, and connecting the verses and parts of the verses in a way to make them at once comprehensible. Saadia's translation shows the same characteristic as his Bible exegesis, as far

as it is known from the extant fragments of his commentaries, and from his chief religio-philosophical work. This characteristic is his rationalism: reason is for him the basis even in Scriptural exegesis; and in accordance with it the exposition of the text must contain nothing that is obscure or that contradicts logical thought. He does not confine himself to reproducing the exact meaning of the single words and sentences, but he takes a general view of the context, the whole chapter, the whole book, and

explains their interrelation. Saadia's rationalism, which became the standard for the following centuries, accorded with his belief in the divine origin of the Bible and in the Biblical miracles; these, he thinks, serve as witnesses to the veracity of the Prophets and of Scripture. Saadia's rationalistic exegesis is systematized in his book on religious doctrines and beliefs, "Emunot we-De'ot." This is largely exegetic, and harmonizes the anthropomorphic figures of speech employed in Scripture passages referring to God and His works with philosophic speculation in a way that has become the pattern for later exegetes (see ANTHROPOMORPHISM).

In addition to the authority of reason, Saadia recognizes also the collateral authority of the Scripture itself as a source for exegesis; and as he is familiar with the Bible, he makes copious use of its contents for the purposes of illustration and exposition.

Saadia's third authority is tradition. This he uses in his Bible exegesis as far as he finds necessary and practicable; and he recognizes its influence on exegesis, pioneer of an independent exegesis though he was.

Saadia created Hebrew philology, the most important prerequisite for a sound exegesis. His grammatical and lexical works were as epoch-making for a scientific knowledge of the Hebrew language as his Bible exegesis for the exposition of Scripture, and his religio-philosophic works for all philosophic speculation on the doctrines of Judaism. In these three branches, which all belong in the larger sense to Bible exegesis, Saadia was a pioneer; and his labors were of lasting influence because of the great authority which he rightly enjoyed.

10. The work of Saadia as the originator of Hebrew philology and of rational Bible exegesis was not carried toward completion in the Orient, where he himself had been active; the leadership in this field passed, soon after Saadia's death, into the hands of Western Judaism, the Diaspora of North Africa and Spain. In the East, as noted above, Saadia's literary activity stimulated in the first instance his Karaite opponents; but he found no successors for his work among the Rabbinite Jews at the academies. It was not until many years after his death that a worthy successor to Saadia was found in Samuel b.

Hophni (died 1034), another gaon of the Sura, whose Arabic version and commentary on the Pentateuch, as well as his exegesis, closely followed Saadia both in its comprehensiveness and in details. HAI GAON, Samuel b. Hophni's son-in-law (died 1038), the last famous gaon of Pumbedita, devoted himself to Bible exegesis, not only in his lexicon, but also in his commentary on Job. It is characteristic of Hai, who was also a great Talmudist, that he consulted the Koran in order to explain Biblical passages; and once he sent to ask the Syrian Catholics how a certain difficult passage in the

**School of Kairwan.** Psalms was explained in the Syriac translation of the Bible. Long before the splendor of the Gaonate faded after Hai's death, Kairwan (in Tunis) had become a seat of Jewish scholarship. The physician and philosopher Isaac ISRAELI, the elder contemporary of Saadia, was active here; he wrote a somewhat diffuse

commentary on the first chapter of Genesis. His pupil, Dunash ibn Tamim, was one of the first to introduce the comparative study of Hebrew and Arabic as a fruitful source for Bible exegesis. Already before him another North African, Judah ibn Koreish, had written a work in which he systematically carried out a comparison of Biblical Hebrew with Arabic, Aramaic, and Neo-Hebrew, and warmly recommended, for linguistic reasons, the study of the Targum, that had been neglected. In this curious piece of work, which is still extant, there is also a long excursus on the anthropomorphisms and the anthropopathisms of the Bible, in which for the first time the important tannaite postulate, that the Torah speaks in human language, uses human forms of speech, is applied in a sense which deviated from the postulate's original meaning, but which thereafter became paramount. The oldest representative of Jewish learning in Italy, Shabbethai Donolo, also interpreted this adage (which is not found in Saadia) in the same way; his commentary on the book Yezirah (written in 946) was prefaced by an exegetic treatise on the Biblical account of the creation of man. Another eminent exegete, who was honored by posterity as the representative of the Peshat, was the great Talmud commentator Hananeel b. Hushiel in Kairwan, a contemporary of Hai. Only fragments of his commentary on the Pentateuch and on Ezekiel are extant: he, however, largely admitted Midrashic elements into his exegesis.

11. The most solid foundations of Jewish Bible exegesis were laid in Spain through the development of Hebrew philology, which reached its highest point in this new home of Jewish learning, from the middle of the tenth to the beginning of the twelfth century; although its products belong primarily to the domains of grammar and

**Philology** lexicography, they yet can be included in Spain. in exegetic literature. It was only after philologic literature had reached

its culminating point in the works of ABULWALID ibn Ganah, that the classic literature which marks the golden age of medieval literary activity was enriched by Bible commentaries. In the beginning of this period a commentary on the Psalms by the celebrated Joseph ibn Abitur (Ibn Satanah) is mentioned; but the existing fragments of this commentary show its method to have been that of the Midrash, and reveal nothing else concerning the method of exegesis (see ABITUR). The Bible exegesis of the Spanish Jews, which was pursued with unusual ardor, was directed, in the first instance, to the investigation of the Biblical language. From the time of Hasdai ibn Shaprut to that of Samuel ibn Nagdela (second half of the tenth to first half of the eleventh century), eminent and gifted scholars vied with one another in placing the science of Hebrew grammar on a firm basis—a basis that has not been overthrown even by the philology of the nineteenth century. They also developed Hebrew lexicography to a point far in advance of all preceding endeavors. Menahem ben Saruk's dictionary; Dunash ibn Labrat's critical work; the polemics of the pupils of Menahem and Dunash; Judah b. David Hayyuj's work, that came like a revelation; Abulwalid's critical work;

the literary controversy between him and Samuel ibn Nagdela; and the writings of both as well as of others belonging to their circle; and finally Abulwalid's chief work, composed of a grammatical and a lexical part—all these works mark the development of the philologic literature in Spain. Those of Hayyuj and Abulwalid especially furnished a firm basis for a Bible exegesis that, on its linguistic side at least, was free from gross errors and mere guesswork. But all these compositions contain more than simple grammatical and lexicographical contributions to Bible exegesis; and especially Abulwalid's chief work—which is generally designated by its separate parts, **Abulwalid ibn Ganah**. "Luma'" (Hebr., "Rikmah") and the "Book of Roots"—is so rich in multifarious exegetic material that these works may be considered as equivalent to a continuous Bible commentary.

Abulwalid's exegesis draws largely upon rhetoric, and regards the Biblical expressions from the point of view of the metaphors and other tropes familiar to him from Arabic literature. Many textual difficulties he cleared away hermeneutically, being led by his method to the same results as are obtained by modern textual criticism, although he accepted the authority of the Masorah without question. He assumes a sweeping transposition and interchange of letters, and proceeds in many Biblical passages on the theory that the Biblical author himself by mistake put one word for another that he really had intended. He recognizes traditional exegesis as the true and authoritative criterion in much that is unascertainable or doubtful in Scripture; but he does not hesitate to contradict tradition if the natural and literal sense requires it.

12. Nothing has been preserved of Bible exegesis proper in the form of commentaries from the period preceding Abulwalid. His younger contemporary, the poet and philosopher Solomon ibn Gabirol, perhaps embodied in a special work his allegorical exposition of individual Biblical passages; for the examples of his exposition quoted by Abraham ibn Ezra would seem to have been taken

**Exegetics** from such a work. Ibn Ezra is also in Spain. the only source of information concerning a curious example of early Pentateuch criticism by one of the grammarians of the eleventh century, Isaac ibn Yashush, who asserted that Gen. xxxvi. 31–43 was written at the time of King Jehoshaphat. Ibn Ezra also controverted another unnamed critic of the same period, who, applying Abulwalid's above-mentioned method, explained almost two hundred Scriptural passages by substituting other words for those that seemed to him incorrect. In the golden age of Jewish culture in Spain two eminent philologists also directed their attention to Bible exegesis proper, parts of whose commentaries, written in Arabic, have been preserved—namely, Moses ibn Gikatilla of Cordova and Judah ibn Balaam of Toledo. Moses ibn Gikatilla endeavored to explain the Biblical miracles rationalistically; while Ibn Balaam attacked these attempts, and otherwise bitterly criticized Ibn Gikatilla's exegesis. Ibn Gikatilla's commentary on Isaiah and on the Psalms, from which Ibn Ezra copi-

ously quoted, was the first sustained attempt to explain those books historically. Thus, he refers the predictions of the second part of Isaiah to the time of the Second Temple, and in the same way he assumes that some psalms are exilic. Judah ibn Balaam's commentary on Isaiah is extant in full, and a comparison of this work with Saadia's translation shows the advance made by Bible exegesis during the century lying between them.

In addition to Hebrew philology, so closely related to exegesis, two special fields of intellectual activity, Hebrew poetry and philosophic speculation, were likewise influenced, and in turn promoted the advance of Bible exegesis during this golden age of Jewish-Spanish culture. Through the introduction of Arabic prosody, poetry had indeed been led into

forms foreign to the genius of the old Biblical poetry; but in consequence of the definite knowledge of the forms of speech and the better comprehension of the words of the Bible, the new Hebrew poetry that blossomed into un-

expected luxuriance on Spanish soil was marked by a certain classical perfection and finish. Love of poetry and the practise of riming likewise sharpened the perception for the poetic beauties and other literary qualities of Scripture. One of the most renowned poets of this period, Moses ibn Ezra, devoted a long chapter of his work on rhetoric and poetics to Biblical rhetoric; applying to it, in a much more specific way than Abulwalid had done, the terminology and definitions of Arabic rhetoric. As for the relation of the philosophy of religion to Bible exegesis, it is sufficient to mention the names of Bahya ibn Paḳuda, Solomon ibn Gabirol, Abraham ibn Hiyya, Moses ibn Ezra, Joseph ibn Zaddik, Judah ha-Levi, and Abraham ibn Daud. The works of these thinkers embody the principle, first logically enunciated by Saadia, that on the supreme questions of religious knowledge the Scriptures teach nothing beyond human reason. Allegory was used only to a limited extent. As a result of this conviction of the necessity for agreement between the postulates of reason and the Bible, a high-handed freedom of treatment of the Biblical word became current, that was often imposing in its daring. In consequence the elements of a new form of Midrash found their way into Bible exegesis, made subservient to philosophic speculation. The Peshat exegesis, which had been freed from the fetters of the early Midrash contained in the traditional literature, found itself now confronted by a new enemy—the philosophic Midrash.

13. While the system of the Peshat was nearing its complete development in the countries influenced by Arabian culture, the Midrashic exegesis had remained paramount among the Jews of Christian countries. The Midrashic literature was enriched by new compilations; and the exegetes

**The "Darshanim."** also, striving for a certain independence, found the material for their commentaries mostly in the traditional literature. These exegetes are called "Darshanim" in the history of Jewish literature. To them belong Moses ha-Darshan in Narbonne (middle of eleventh century), Tobiah b. Eliezer in Castoria, Bulgaria

(end of eleventh century), and Menahem b. Solomon in Rome (first half of twelfth century). Here must also be named the compiler of the "Yalkuṭ Shime'oui," the most complete Midrash compilation on the whole Scripture, dating perhaps from the beginning of the thirteenth century. In this field represented by the Darshanim there arose quite unexpectedly in northern France a school of Bible exegesis, which, in entire independence of the Spanish-Arabian school, endeavored to search into the Peshat, the simple, natural, primary sense, in avowed contrast to the Midrash, without, however, severing its connection with the latter. The founder of this school was Solomon ben Isaac (Rabbi Solomon Yizḥaki), commonly called RASHI (died 1105); his commentary on the Talmud is for all time an indispensable aid to the study of that work; and his commentary on the Bible, especially on the Pentateuch, has never been surpassed in enduring popularity and large circulation. Rashi's commentary has in many respects the character of a compilation of Midrash collections; but he takes from the traditional literature chiefly those explanations that he can best harmonize with the wording and the connection of the Biblical text; and he expressly rejects those that he can not bring into such agreement. Besides this, he endeavors to arrive independently at the meaning of the Scriptural words, guided by the Talmudic principle, everywhere emphasized, that no Biblical verse may be deprived of its plain, self-evident meaning, no matter what varied interpretations are put upon it by the Midrash. In addition, he pays constant attention to the linguistic side of exegesis; showing an acute and often intuitive sense of language, and supplementing by these means, as well as by his complete command of diction, the inadequacy of his sources.

Joseph Kara and Samuel b. Meir were still more pronounced representatives of the Peshat. Joseph Kara was a nephew of Menahem b. Hebo (an elder contemporary of Rashi, who even before him had followed the same tendency); the title "Kara" (compare "Mikra," Scripture), found already in the Talmud, marks him as a Bible exegete. He was a prolific writer, and more independent in his exegesis than Rashi. He was given to postulating general rules of interpretation, and to explaining the chapters of the Bible as a whole. Nor did he hesitate to differ from tradition in regard to the time of composition of the Biblical books; ascribing, for instance, the Book of Samuel, on account of I Sam. ix. 9, to a later period than that to which it was generally assigned. He posited the principle that Scripture must be interpreted by itself, without the help of the traditional literature. This principle was especially applied by Rashi's learned grandson, Samuel b. Meir, whose commentary on the Pentateuch

may be regarded as the foremost Northern France. His brother, Jacob Tam, wrote no Bible commentary, but showed interest and aptitude for linguistic research in Hebrew in his Responsa, in which he defends Menahem ben Saruk against Dunash ibn Labrat. Jacob Tam's pupil, Joseph Bekor Shor, was the last important representative of the Peshat

**Exegesis in Northern France.** His brother, Jacob Tam, wrote no Bible commentary, but showed interest and aptitude for linguistic research in Hebrew in his Responsa, in which he defends Menahem ben Saruk against Dunash ibn Labrat. Jacob Tam's pupil, Joseph Bekor Shor, was the last important representative of the Peshat

of northern France. His commentary on the Pentateuch is marked by acumen and deep insight into the continuity of its meaning. Anticipating later Biblical criticism, he assumed duplicate accounts in the Pentateuch. The Bible exegesis of the school of northern France, which was supplemented neither by scientific research into the Hebrew language nor by mental training in philosophical or other scientific studies, may be designated as the exegesis of plain, clear common sense; its products are in many ways equal to those of the Spanish-Arabian school.

14. All Biblical lore in the countries of the Mohammedan culture, which developed in such fulness after Saadia, was confined, on account of the language in which it was written, to those circles where Arabic was spoken. Abraham ibn Ezra was the first one to disseminate it on a large scale in the

Christian countries of Europe. A mature man, who had absorbed the whole culture and learning of Spanish Judaism in the flower of its intellectual development, he left his home and spent nearly three decades (1140-67) in different cities of Italy, Provence, northern France, and England; every where, as he says, "writing books and revealing the secrets of knowledge." The chief products of his astonishing many-sided activity are his exegetic works. His commentaries, although written far away from Spain, are the most important product, in the field of Bible exegesis, of the golden age of Spanish Judaism, not only on account of the opinions of many representatives of this period, which are therein cited and disseminated, but because their whole spirit, import, and material are the outcome of the extraordinary learning and insight that he took from home with him. These commentaries, written in Hebrew, also display throughout Ibn Ezra's originality and his mastery over both subject and material; and they are especially attractive not only on account of their form—combining clearness and vivacity, wit and profundity—but also because of the author's consummate handling of the Hebrew language, which had already been abundantly displayed in his classical poems.

Ibn Ezra's Pentateuch commentary has always been, side by side with Rashi's, one of the most popular works of Jewish exegetical literature, and both in their turn became the subjects of numerous supercommentaries. Ibn Ezra explained his own exegetical method in his introduction to the Pentateuch commentary by characterizing and criticizing the various methods employed hitherto by the exegetes, such as the exegesis of the Geonim, the exegesis prevalent in Christian countries depending on the Midrash, the exegesis of the Karaites, hostile to tradition, and the typological-allegorical exegesis customary among Christians. As regards Ibn Ezra's conception of the relation between the traditional and the Peshat exegesis, he sees in the traditional exegesis—derived by the oral teaching (Halakah) from the words of the Biblical text, and which so often contradicts the natural literal sense—not an actual exegesis of the Bible text, but only a "suggestion," a "reminder" (mnemonic device). In the same way he distinguishes between the "word

of the Derash," the homiletic manner of haggadic exegesis, and the Peshat, by which only the literal signification of the Biblical text is arrived at. He knows nothing of the principle of the multiplicity of meanings of Scriptural words, which the leaders of the exegetic school of northern France acknowledged in order to justify the haggadic Midrash. Through this clear separation of the Peshat from the Derash he accords only a limited place in his exegesis to the new Midrash, which introduces philosophy into the Bible text. He connects his philosophic speculations, either in longer passages or in brief allusions, with the explanation of the names of God (especially the Tetragrammaton), of the divine attributes and the Biblical precepts, and with single suitable passages. Ibn Ezra's endeavors to defend the Biblical text against everything that might injure its integrity, may also find mention here. But he is nevertheless regarded, since Spinoza wrote his "Tractatus Theologico-Politicus," as the precursor of the literary Pentateuch criticism of to-day. To judge from certain allusions, rather than from positive statements, he seems to have held that the Pentateuch, although undoubtedly composed by Moses, received in later times a few minor additions. He also obscurely alludes to the later origin of Isaiah, ch. xl.-lxvi.

Ibn Ezra's contemporary, Joseph Kimhi, was similarly active in Narbonne as propagator of the Spanish-Jewish science; he also was of Spanish origin and knew Arabic. He wrote a Hebrew grammar in Hebrew, and also commentaries on different Biblical books. His work was continued by his sons Moses and David (see Kimhi, David). The fame of the latter very soon eclipsed that of the father and brother. In the introduction to his chief exegetical work, the commentary on the Prophets, he based the privilege, or rather the duty, of exegetic research on religious motives. The Kimhis do not differ from Ezra in their search for the natural meaning of Scripture; and they, too, consider grammar and rationalism to be essential in exegesis.

David Kimhi, whose didactic talents appear in his grammar as well as in his Bible commentary, recognizes also the Midrash exegesis, as well as Maimonides' philosophic opinions; and, like the latter, he does not hesitate to pronounce certain Biblical stories to be visionary accounts. His commentary on the Psalms is especially interesting by reason of its polemics against Christian exegesis.

15. It fell to the lot of Moses Maimonides, Ibn Ezra's younger contemporary, to represent, like him, the high intellectual culture of the Spanish Jews outside of Spain, and to bring it to a fuller development than Ibn Ezra. Living in the midst of the Arabian culture in North Africa and in Egypt, his activity was a natural continuation of the Jewish intellectual impulse which was so highly developed in Moorish Spain. But his influence extended far beyond the boundaries of the Arabic language; and he became a teacher for the whole Diaspora, as no one had been since the days of the Geonim. Maimonides' activity marked an epoch not only in the history of Judaism, but also in that of Jewish Bible exegesis. He enriched exegetic literature by no

The Kimhis. his Bible commentary, recognizes also the Midrash exegesis, as well as Maimonides' philosophic opinions; and, like the latter, he does not hesitate to pronounce certain Biblical stories to be visionary accounts. His commentary on the Psalms is especially interesting by reason of its polemics against Christian exegesis.

commentary, but his chief philosophical work, written in Arabic, the "Moreh Nebukim" (Guide of the Perplexed), contains much exegetic material. The "perplexed" for whom the work was to be a "guide" are those readers of Scripture who are harassed by doubts because of the

**Moses**  
**Maimonides.** contradictions between the Biblical text and the postulates of rational speculation. The "Moreh Nebukim" strives to clear away such contradic-

tions by a correct explanation of the text. The author, therefore, places at the head of his work a number of explanations of Biblical expressions to serve as a key for ascertaining the true meaning of Scripture.

A fundamental principle of Maimonides' Bible exegesis is that the Bible makes use of all the resources of language that have been invented by the human mind, in order to reveal or to conceal thought; and in his expositions he almost devotes more space to what the language of the Bible conceals than to what it has undisguisedly made known. He holds that the metaphoric and the figurative modes of speech, as forms of expression, are founded in the very nature of prophecy, and that to this fact is due their important place in Scripture. In regard to the statements of Scripture concerning the Deity, the old postulate of the human mode of speech of the Bible becomes with Maimonides an important canon, by which everything unsatisfactory and obscure is removed from the idea of God. The ruling principle of his exegesis is the assumption of the exoteric and the esoteric sense. The "secrets of the Law" hidden in the Biblical words are found by investigation into the esoteric meaning. But such secrets, as sought by Maimonides, have nothing to do with mysticism; he undertakes the investigation with absolute rationalism, as may be seen particularly in his explanation of certain Bible stories and his exposition of the reasons for the Law. He finds the teachings of the Aristotelian physics and metaphysics in the chapters on Creation (Gen. i.) and in that of the Heavenly Chariot (Ezek. i.). His rationalism, however, halts at the facts of prophecy and of the Bible miracles, though here, too, rational investigation comes into play. One of his most original and daring aids to exegesis is evolved by his doctrine concerning prophecy—namely, the theory of visions—whereby he transfers a number of Bible stories from the realm of fact into the realm of psychic experience. The principle of the exoteric and the esoteric sense of Scripture leads him to allegorical exegesis, with the theory of which he prefaces his "Guide"; but his allegory remains within the bounds prescribed to it by his rationalism on the one hand, and by his faith in tradition on the other. Yet there appear certain traces of that extensive allegorization that not long after him appears among his disciples, as, for instance, in his exposition of Canticles, of the adulterous woman in Proverbs, and of the prologue to Job.

16. Through Maimonides' "Guide of the Perplexed," which, even during his life, was circulated in Hebrew translations, Aristotelian philosophy found an abiding-place in Jewish thought, and became a chief factor also in Bible exegesis. During

the following three centuries many Bible commentators were primarily concerned with finding the tenets of philosophy in Scripture. Especially the Biblical Wisdom books—Proverbs, Ecclesiastes, and Job—lent themselves to such study; so also did the Song of Solomon, an ancient and a most fruitful field for allegorization. Philosophic allegory had already been applied to the last-mentioned book, and rejected by Abraham ibn Ezra, Maimonides' pupil. Joseph ibn Aqnin, now wrote a philosophico-allegoric commentary on it; Samuel ibn Tibbon, the

**Philosophical Exegesis.**

translator of Maimonides' work, commented on Ecclesiastes; his son Moses, on the Song of Solomon. Samuel ibn Tibbon's son-in-law, Jacob b. Abba Mari Anatolio, collected his sermons

on the pericopes of the Pentateuch in a work entitled "Mahnad ha-Talmidim," which is the most important monument of the philosophic Scriptural exegesis current in Provence in the century following Maimonides—an exegesis that allegorized even Biblical personages in the manner of Philo. This allegorization, which detected abstract philosophic concepts and postulates in the personages and occurrences of the Pentateuch stories, and which even forced itself into the Sabbath sermons of the preachers, led at the beginning of the fourteenth century to the second great controversy between the Maimonists and anti-Maimonists in Provence and northern Spain. This controversy, suddenly terminated by an external event, did not bring philosophic Bible exegesis to an end. Its most eminent representative was LEVI BEN GERSHON (died 1344), a strict Aristotelian, who wrote commentaries on most of the Biblical books. In those on the Pentateuch and the historical books he exhaustively summed up the ethical and other maxims (practical applications) deducible from the Bible narrative. The philosophic commentary on the Pentateuch by Nissim b. Moses of Marseilles, written at the beginning of the fourteenth century, was less well known. A similar commentary was written by Samuel Zarza of Valencia in the fourteenth century. The last great exegetic work written in Spain before the expulsion was the "Akedat Yizhak" (Offering of Isaac) by Isaac Arama, consisting of sermons in a philosophic setting and partly philosophical in nature. The commentaries of Isaac Abravanel also give a large place to religio-philosophic discussion.

17. Side by side with the philosophical mode of exegesis another was developed, from the beginning of the thirteenth century, that was based, like it, on the fundamental conception that there must be a deeper meaning in the Scriptural word than is implied in the literal sense. This conception, together with the assumption that all truths about God and creation, the universe and man, which are cognizable by the human mind, and which have been so cognized, must be found in Scripture, was most clearly laid down in the introduction prefixed by Moses Nahmanides to his thoughtful commentary on the Pentateuch (written about 1268). Although the mystical exegesis is here secondary, and confined to a small number of guarded allusions, the new esoteric doctrine is here first openly promulgated, and powerfully supported by the authority of the

writer, who was one of the foremost personalities of his time. This doctrine, "Hokmah Nistarah" (Secret Wisdom), was first formulated in Gerona, Nahmanides' home. It was also called "Cabala" (*i.e.*, tradition). In its chief tenets, consist-

**Mystic Exegesis.** ing of originally formulated philosophic theorems, such as the neo-Platonic doctrine of emanation, it connected with the remnants and reminiscences of a much earlier mysticism.

Contemporaneously with these beginnings of the Cabala in northern Spain, another kind of mysticism connected with Scripture arose in Germany, in the writings of Eleazar b. Judah of Worms, his exegetic method consisting in the interchange and combination of the letters of the Scriptural text, and in computing their numerical value (see GEMATRIA). The exegetic method of the Cabala is founded on the foregoing, combined with the allegoric (and also typologic) exegesis. Cabalistic exegesis is given full recognition, together with the other methods of exegesis, in the Pentateuch commentary of Bahya ben Asher of Saragossa (1291), which became one of the most popular exegetic works. Four methods of exegesis are enumerated in the introduction to this commentary, each of which is to be applied to Scriptural passages: (1) the way of the Peshat, (2) the way of the Midrash, (3) the way of Reason (*i.e.*, philosophic exegesis), and (4) the way of the Cabala, "on which the light dwells—a path for the soul that refuses to be illumined by the light of life." Contemporaneously with Bahya's Pentateuch commentary there also appeared in Spain a book which was destined to become the basic work of the Cabala, and which owed its unprecedented success to the fact that it purported to be a relic of the earliest mysticism and a work of the same school of sages that had produced the old traditional works, the Mishnah, the Talmud, and the Midrash. This book is the ZOHAR, in its form a running Midrashic commentary on the Pentateuch, but interrupted by many and various digressions, and supplemented by original additions. Like Bahya b. Asher's book, but on a different basis, the Zohar also assumes four

kinds of exegesis, or rather a fourfold "Pardes." meaning: Peshat, Remez (allusion, typological sense, allegory), Derash, and Sod (secret, mystical sense). In formulating this doctrine of a fourfold meaning, the Christian mode of exegesis (which was well known to the Spanish Jews) probably served as a model; in this the fourfold sense (historical or literal, tropological or moral, allegorical, and anagogical) had long since been formulated (by the Venerable Bede in the eighth, and by Rhabanus Maurus in the ninth century). The initial letters of the words Peshat, Remez, Derash, Sod, forming together the word "Pardes" (פרדס), became the designation for the fourfold meaning, in which the mystical sense given in the Cabala was the highest point. The tenet of the fourfold meaning and its designation, "Pardes," have been erroneously ascribed to the beginning of the Jewish Bible exegesis, the Tannaite time, on account of the expression "Pardes" (pleasure garden), which is used metaphorically in an account of the mysticism of the Tannaites (Mag. 14b); but in

point of fact the designation "Pardes" marks the arrest, for a long time, of the development of the Jewish Bible exegesis.

**18.** The four methods of Scriptural exposition, as applied side by side by Bahya b. Asher in his Pentateuch commentary, characterize all the numerous works in the field of Jewish Bible exegesis during the three centuries following Maimonides. The Peshat was more or less recognized and appreciated above the other methods, and even the Zohar borrowed much from Rashi and Ibn Ezra, both of whom were more and more regarded as the greatest exegetes, their Pentateuch commentaries being frequently commented upon. But new commentaries in harmony with the Peshat were also written. The Peshat did not supplant the Midrash; and side by side with it the ancient sources of the traditional exegesis were held in high estimation and employed. The extent to which the philosophic mode of exegesis was used has already been stated; henceforward the mystical exegesis also gained in favor. An Italian, Menahem of Recanate (beginning of the fourteenth century), wrote a cabalistic commentary on the Pentateuch, in which the Zohar was freely drawn upon. The chief personalities of the exegetic literature of this period (which ended with the expulsion of the Jews from the Pyrenean peninsula), that have not been mentioned above, are as follows: In the East, Tanhum Yerushalmi (thirteenth century) wrote a commentary in Arabic on the greater part of the Scripture, prefixing to it a general and pithy introduction. Eleazar Ashkenazi, otherwise unknown, who calls himself a son of the Babylonian ("Bagdados") Nathan, wrote in 1364 a commentary in Hebrew on the Pentateuch, that contains original views, and rationalistically explains away many miracles. Exegetic writings of this period, both from southern Arabia and by the Persian Jews of Central Asia, have recently come to light. Simon b. Zemah Duran (1361-1444) of North Africa wrote a commentary on Job. Jacob b. Asher (1280-1340) of Spain wrote a commentary on the Pentateuch, of which the interpretations of letters and numbers are well known. Samuel b. Nissim wrote at the same time in Toledo commentaries on Job and on other books, which he himself called "Midrash." The prolific and many-sided Joseph Caspi (d. 1340) of southern France must also be mentioned, who explained many of the Hagiographa, as also Isaac Nathan b. Kalonymus, author of the first Hebrew Bible concordance (*c.* 1440). In northern France a lively interest in Bible exegesis was sustained, especially by the polemics against the Christian manner of exegesis. The TOSAFISTS, so-called, who continued the labors of Rashi and his grandsons in the field of Talmudic study, contributed isolated remarks also to Bible exegesis, especially to the Pentateuch, which were collected in different compilations. Hezekiah b. Manoah and Eliezer of Beaugency wrote special commentaries. In Germany may be mentioned Menahem b. Meir of Speyer, author of a cabalistic commentary on the Pentateuch (fifteenth century), and Lipmann of Mühlhausen in Prague (about 1400), author of the "Nizzahon." In

Italy a voluminous exegetic literature was developed in the second half of the thirteenth and the early decades of the fourteenth century, its representatives being Isaiah of Trani the Younger, Benjamin b. Judah, Zerachiah b. Isaac b. Shealtiel, and especially the poet Immanuel b. Solomon of Rome. The last-named wrote commentaries on the greater part of the Scriptures, mostly of a grammatical and rationalistic nature, but also philosophic or mystico-allegoric. He also wrote an interesting text-book on Biblical hermeneutics. From the fifteenth century may be mentioned: Aaron b. Gerson Abulrabi of Catania in Sicily, who, in a supercommentary on Rashi, propounded very original and often daring expositions; Johanan Alemanno, author of a philosophic-cabalistic commentary on the Song of Solomon; and Judah Messer Leon, who applied Cicero's and Quintilian's rhetoric to the Bible.

19. The days of the Epigoni, as the centuries after Maimonides may be called, were followed by an epoch of stagnation and degeneracy which ended with the appearance of Moses Mendelssohn (middle of the eighteenth century). This epoch was characterized by a decline in general culture and science, by a one-sided study of the Talmud that became more and more involved in an extravagant dialectic, by a minute and servile development of the ritual law, and by the increasing authority of the Cabala. Although many Bible commentaries were added to the exegetic literature, nothing of real importance and lasting influence was produced. Isaac Abravanel, standing on the threshold of this epoch, still belonged to the preceding period. He was a Bible exegete on an extensive scale, who prefaced his commentaries on the several books with introductory remarks, made use of his experience as a statesman in explaining the historical books, and also drew upon Christian exegesis. In Italy, where Abravanel completed his commentary, Elijah Levita also wrote his epoch-making work on the Masorah, "Masoret ha-Masoret." There, too, Solomon Norzi wrote his important Masoretic commentary on the Bible, and Menahem Lonsano also displayed activity in the same direction.

**Sixteenth Century to Middle of Eighteenth Century.** Italy was the home of Azariah dei Rossi, who treated of questions of Biblical chronology in his critical work, "Me'or 'Emayim," and of Abraham de Portaleone, the first Biblical archaeologist in Jewish literature.

Commentaries were written in Italy by Obadiah Sforno; Reuchlin's teacher; Joseph b. David ibn Yahya; and Moses Hefez (Gentile), whose interesting Pentateuch commentary draws also upon the principles of secular science. New centers of Jewish learning were formed in the East through the numerous settlements of the exiles from Spain:

Solomon b. Melek of Constantinople was here the representative of the **Moses Alsheik of Safed**, though his work, "Miklal Yofi" (Perfection of Beauty), contains mostly extracts from Kimhi. Moses Alsheik of Safed (sixteenth century) was the most prolific exegetical author, writing exhaustive commentaries—partly homiletic in character—on most of the Biblical books. Other

Eastern Bible commentators of the sixteenth century are: Joseph Taitazak, Isaac b. Solomon Kohen, Baruch ibn Yaish, Samuel Laniado. In Holland in the seventeenth century Manasseh ben Israel wrote a work in Spanish, "El Conciliador," to reconcile the contradictions in the Scriptures. Isaac Aboab wrote a Spanish commentary on the Torah, Isaac Akosta (1722) one on the Former Prophets. Baruch Spinoza had already passed beyond the pale of Judaism when he laid down in his "Tractatus Theologico-Politicus" his opinions on prophecy and on the origin of the Biblical books, opinions that became momentous in Biblical learning (see BIBLE EXEGESIS, MODERN AND NON-JEWISH).

Among Jews using the German language those of Poland were the leaders during this period. The study of the Talmud was pursued by them with renewed ardor, and gradually supplanted the study of the Bible itself. Abraham b. Judah Krennitz (end of sixteenth century) wrote a commentary on the Prophets and the Hagiographa. The physician Eliezer Ashkenasi (died 1586 in Cracow), a man of philosophic attainments, explained the Pentateuch narrative in a special work ("Ma'ase Adonai"). The extravagant attempts to find a multiplicity of interpretations for one Biblical passage are characteristic of this Polish exegesis. Nathan Spira (1630) explained the words of Deut. iii. 24 *et seq.* in two hundred and fifty ways; Elijah Oettinger, in three hundred and forty-five ways. The mania

**Hiddushim and Peshatim.** Hiddushim for finding the new and unexpected, and fostered by the pilpulistic methods of Talmudic study, thus dominated Bible exegesis and produced the literature of the "hiddushim" (novellae) and "peshatim" (explanations) on the Pentateuch, that flourished especially in the eighteenth century.

The picture of the exegetic literature of this period would be incomplete without a reference to the Bible translations that it produced. Mention may be accordingly made of Abraham Usque's Spanish version (Ferrara, 1553), Jehuthiel Blitz's Judeo-German version (1676-78), revised by Josef Witzgenhausen. The picture is completed in another direction by the literature of the "derashot" (sermon), that flourished especially in this period. The chief material for them was taken from the haggadic or cabalistic literature, the Bible text being used only in connection with it.

20. The new intellectual epoch in the history of Judaism inaugurated by Moses Mendelssohn marks also an epoch for Jewish Bible exegesis. Mendelssohn exerted his great and reshaping influence on his German coreligionists and on the German-speaking Jews of other countries in the first instance through his translation of the Pentateuch, that acted as a mighty and enduring leaven for culture. But this influence was equalled by his importance as an exegete. The Hebrew commentaries on the Pentateuch written by him and his collaborators mark the return to the simple, natural Bible exposition, the restitution of the Peshat to its rights. Mendelssohn himself referred to the classic writers of the Peshat, Rashi, Samuel b. Me'ir, Ibn Ezra, and Nahmanides, as models for true Bible exegesis. Hand in hand with this exegesis went the renewed study of He-

brew grammar and the formulation of a new Hebrew style aiming at correctness and simplicity. Mendelssohn, who combined in his person Judaism and Jewish scholarship with the intellectual culture—the literary, esthetic, and philosophic learning—of his time, combined in his Bible interpretation the traditions of Jewish exegesis with the elements of that developing in new directions outside of Jewish circles. The Biblical science of Protestant Germany

**Mendelssohn and His School.**

that became paramount in the second half of the eighteenth century strongly influenced this reawakening Jewish exegesis even in Mendelssohn; and subsequent generations could not escape its influence.

The work of Mendelssohn, who had issued (1773) a Hebrew commentary on Ecclesiastes even before the appearance of his version of the Pentateuch (1783), and who had published also a German version of the Psalms, was sedulously continued after his death. His collaborators on his Pentateuch commentary (written in Hebrew) were the eminent grammarian Solomon Dubno, the linguist and poet Naphtali Hartwig Wessely, Aaron Jaroslaw, and Herz Homberg. From its name, "Bi'ur" (exposition), the authors who similarly translated and annotated the other books of the Bible were called BIURISTS. These men were in a way the rediscoverers and reconquerors of the Bible;

**The Biurists.**

for large sections of European Judaism that had become estranged from the Bible, through a one-sided study of the Talmud and through the decline of culture, had lost the perception for its simple meaning and its literary beauties. The first Biurists were, like the above-mentioned collaborators on the Pentateuch commentary, pupils and personal followers of Mendelssohn, and they were joined by other enthusiastic disciples in the early decades of the nineteenth century. Next to Germany, Austria was the home of the Biurists' activity. The most complete editions of the whole Bible, with German translation printed in Hebrew characters, and Hebrew commentary by different Biurists, appeared in Vienna and (in a different arrangement) in Prague, and were frequently reprinted with new additions by later authors. These Biurist Bibles, that perpetuated Mendelssohn's work on the Pentateuch, were important factors in the process of intellectual transformation taking place among a large section of European Judaism in the first half of the nineteenth century. The activity of the Biurists prepared the soil for the new science of Judaism as the most important fruit of that transformation.

21. Moses Mendelssohn and the Biurists had provided for students and teachers, as means for the revived study of the Bible, translations printed in Hebrew characters, and commentaries, written in Hebrew, on the Biblical books; to these were added in the course of the nineteenth century similar works on the Bible, with the substitution, however, of German type in the translations, and with German annotations in conformity with the progressing conditions of the time. These works, consisting of the mere translation, or sometimes offering longer or shorter comments, were primarily intended not for

specialists, but for general students of the Bible, for the school, and for the congregation. But they were compiled chiefly by specialists, who continued the activity of the Biurists, while paying due regard to the advances in Biblical science. One of these translations is known by the name of Leopold Zunz, who edited the versions of the several books by H. Arnheim, Michael Sachs, and J. Fürst; translating himself one book only, that of Chronicles. Besides this, similar works by Herzheimer, Philippson, and J. Fürst were widely circulated. Aside from these works, dealing with the entire Scriptures, single portions also were thus treated; and commentaries were also written in Hebrew after the manner of the Biurists, the latter especially in eastern Europe.

Similar aims were pursued outside of Germany; and translations of the Bible by Jews and for Jews were produced in the different European languages. The French, English, Italian, Dutch, Hungarian, Polish, and Russian Jews thus received their own translations of the Bible; the necessity for these increasing toward the middle of the nineteenth century with the growing number of the Jews unable to read the Bible in the original text. Among the non-German versions the Italian one by S. D. Luzzatto deserves especial mention, as well as the French work of Samuel Cahen, which contains, in addition to the translation, a commentary and valuable literary notes.

Although the endeavors sketched above were intended primarily for the unlettered, Bible exegesis as a scientific study was included in the science of Judaism, which rapidly advanced from the second decade of the nineteenth century. It reached, however, no important independent development. The leaders of Jewish science contributed little to that great progress in Bible exegesis and its auxiliary studies which was one of the signal achievements of the last century. Various causes contributed to this. In the first place, the history and literature of the Judaism of the post-Biblical and ensuing periods engaged the creative and pioneer activity of Jewish scholars; since in this department there was little collaboration to be expected from other quarters. Moreover, during the last period Jewish science suffered from the lack of that organization which the universities and learned societies offered to the development and steady pursuit of the various branches of human knowledge, and by means of which Biblical science attained to its eminent position and flourished so richly in German Protestantism. The founding of the rabbinical seminaries was an insufficient substitute; and the lack of organization referred to above was acutely felt in the whole field of Jewish science, and stood in the way of a methodical and continuous cultivation of the correlated branches of Bible study. At the same time the number of Jewish scholars who devoted themselves to study voluntarily dwindled, for well-known reasons; while the rabbis of the communities, who by virtue of their position were naturally students, were increasingly diverted from Jewish studies by the changing conditions and the various duties imposed by their office.

Finally, many Jewish scholars hesitated to apply

ruthlessly the higher criticism to the Scriptures, especially to the Pentateuch, lest they should offend the traditions that formed part and parcel of the whole religious life of Judaism. Although the Jewish contributions to Bible study during the nineteenth century were limited in number, for the reasons mentioned above, yet some of the founders and leaders of the new Jewish science turned their attention also to Bible exegesis and to the multiform Biblical problems. Zunz, Rapoport, and Nachman Krochmal dealt with various questions of Biblical criticism with much acumen. Geiger, in his chief work, "Urchrift und Uebersetzungen der Bibel," is extremely radical. In his lectures he left an introduction to the Scriptures, which, however, is but a sketch. Graetz, after finishing his history, which included also Biblical times, devoted himself entirely to Bible exegesis, especially to textual criticism. Luzzatto was a highly gifted Bible exegete, with a rare insight into the niceties of the Hebrew language. Many other scholars could be mentioned who contributed important works to Biblical isagogics, Biblical archeology, textual explanations, and criticisms. It is primarily due to Jewish scholars that the works of the early Bible exegetes were recovered from obscurity and appreciated as aids to modern exegesis. Indications are not lacking that Jewish scholars increasingly devote their attention to Biblical science; leading to the hope that the sons of Jacob will duly take part in the researches into the sacred documents of Israel.

—**Modern and Non-Jewish:** The history of modern Bible interpretation divides itself best into: (1) the Reformation period, to the end of the sixteenth century; (2) the Confessional or Dogmatic period, to the middle of the eighteenth century; and (3) the Critical period, to the present time.

The influences that have chiefly promoted modern exegesis are: broadening culture; the art of printing; theological discussion; philological progress; historical research; discoveries in Bible lands; philosophical conceptions of the order of

**Impulses,** revelation; the doctrine of human development, or evolution. The chief notes of the progress of modern exegesis are:

**Principles,**

**and**

**Results.**

changes in methods of Biblical study, in principles of interpretation, and in theories of the degree and nature of Scriptural authority. The main practical results are seen in: a redivision of the contents of the

Bible; changed opinions as to the authorship of many of the books; altered views as to their unity or literary form; a rearrangement of the books or their contents in the true order of their composition; and a comparative treatment of the Biblical institutions in the order given by the rearranged texts.

**1. Period of the Reformation:** The chief prerequisite to a progressive study of the Old Testament was a general knowledge of the language in which it was written. The impulse to the study of Hebrew in the influential centers in Europe came in part from a deeper interest in religious questions. The study of Greek, as the classical idiom of science and philosophy, seemed to involve the study of Hebrew as the ancient language of the true religion, in which, moreover, the greater portion of the current Christian Scriptures was originally written. It was naturally from Jewish scholars that most help could be obtained: Reuchlin (1455-1522), the founder of modern Hebrew science, though not the earliest Christian Hebraist, was as a humanist second only to Erasmus in influence. He obtained nearly all his knowledge of the language from his Jewish teachers, and the grammar contained in his epoch-making "Rudimenta Linguae Hebraicae" (1506) was based chiefly on David Kimhi. His friend and (in these matters) his disciple, Martin Luther, was the first great Christian exegete: his University of Wittenberg had been founded in 1502 partly for the purpose of promoting the new learning.

What distinguished Luther, Melancthon, Calvin, and the other reformed expositors was their fundamental exegetical principle that Scripture is to be taken in its literal sense. Thus, Lu-

**Exegetical** ther's "Observationes in Psalmos" **Merits of** (1519) has, on this ground, been called **the** the first scientifically exegetical book **Reformers.** of the Reformation. In his comments on Gen. iii., xv., and xxx. he deals severely with the time-honored allegorizing method. In Calvin's commentaries on Isaiah (1551) and the Psalms (1564) the high-water mark of the exegesis of the sixteenth century is reached; the advance being shown chiefly in an increased regard for philological accuracy and for the historical setting of the sacred writings. Thus, though the Reformers were themselves no great Hebraists, their expositions are the most enduring mark of the revival of Hebrew and Biblical learning in their time.

A surer grammatical and historical exegesis was made possible in this age by the publication of the original texts of Scripture. From the earliest days of the art of printing the text of the Old Testament had been circulated under Jewish auspices; and soon the current Vulgate version was compared with the original, the first simple step in that process of textual criticism which has been the surest foundation of modern interpretation. Two great undertakings are the monuments of this era of text publication. One was the Complutensian Polyglot of Cardinal Ximenes (1514-17) in six volumes, four of them devoted to the Old Testament, the Septuagint, the Targums, and the Vulgate appearing side by side with the original. The other was the Hebrew and Rabbinical Bibles of Bomberg (Venice, 1518-26), in which the chief help was given by R. Jacob ben

Hayyim of Tunis. Finally, the publication of texts facilitated the translation of the Bible into the vernaculars of the various countries of western Europe, upon the basis of the Hebrew and not of the long dominant Latin Vulgate—a process which was itself an exercise in the exegetical art.

**2. Period of Confessionalism or Dogmatism:** It can not be said that any great advance was made in the understanding of the Bible during the following century and a half. It is true that neither the study of Hebrew nor that of the sacred text was neglected; but the ends sought were mainly theological, or rather confessional, in the narrowest sense. There is only

**Effect of Dogmatics.** here and there a trace of any desire to find out the inner connection of the parts of Scripture and the progress of its teaching from step to step in the development of revelation. In Germany, especially, little advance is to be noted until the middle of the eighteenth century. There theological controversy and the framing of sectarian symbols were most assiduously practised; and it is a melancholy indication of the barrenness of such pursuits that there is no evidence in the whole history of exegesis that the larger understanding of the Bible has ever been promoted by dogmatic discussion.

Probably the most valuable work of these later "Middle Ages" of Christianity was the labor that went to the making of the great polyglots. That of Cardinal Ximenes, referred to above, had already in the sixteenth century been followed by the Antwerp Polyglot (1569-72), four of whose eight volumes were devoted to the Old Testament. This work, executed under the auspices of Philip II. of Spain, was superintended by the learned Spaniard Arias Montanus. Its improvement upon the Complutensian is shown partly in its greater accuracy and partly in its fuller reproduction of the Targums.

An essential advance is shown in the Paris Polyglot (1629-45), published under the auspices of the advocate Le Jay, in which were given the Syriac and Arabic versions and the Samaritan Pentateuch and Targum. The London Polyglot (1654-57) was further enriched by the Ethiopic version and valuable prolegomena by the chief editor, Brian Walton.

Many of the contributors to these monumental works were among the foremost scholars of their time. Thus, Edmund Castell (Castellus), who wrote the "Lexicon Heptaglotton" (1669), was the chief linguistic authority in the making of the last-named polyglot, and his dictionary has scarcely ever been surpassed as an effort of independent scholarship. It served as the basis of most of the lexicons of the individual languages until the nineteenth century. The Buxtorfs, father and son (died 1629 and 1664, respectively), in Basel, by their lexicons and handbooks, were largely instrumental in bringing the treasures of rabbinical and Talmudical literature within the reach of the Christian world. It was also no slight service that was performed by the Arabists of the seventeenth and eighteenth centuries, Edward Pocock (1604-91), another contributor to the London Polyglot, and Albert SCHULTENS (1686-

1750) employed their Arabic erudition in the work of Scripture exposition and illustration. Nor must the achievements of Job Ludolf (1624-1704) in the more remote sphere of the Ethiopic be overlooked. All study of the Semitic languages and literatures in the days before the rise of comparative linguistic and historical science was made directly in the interest of the Bible and Biblical literature.

Help scarcely less important was afforded by those scholars who devoted themselves to Biblical and Oriental archeology. The works of Samuel Bochart (1599-1667) on sacred geography and zoology ("Phaleg et Canaan," 1646, and "Hierozoicon," 1675) are replete with knowledge not yet antiquated. John SELDEN (1584-1654), "the Coryphaeus of antiquaries," left in his "Syntagmata de Dis Syris" (1617) a work of enduring value, as did John Spencer of Cambridge in his great work, "De Legibus Hebraeorum Ritualibus" (1685), and Adrian Reland also in his "Palestina" (1716). These proved to be basic works in their respective spheres of research.

But in the more specific work of interpreting the sacred text in detail the Christian Church, taken as a whole, had forgotten the spirit and maxims of Luther and Calvin, and was hopelessly fettered by the dogma of the plenary inspiration of the Scriptures. Inasmuch as this doctrine necessarily implies the absence of any inner development in the Bible, it paralyzed the search for historic truth. Stagnation reached its climax when the "Formula Ecclesiarum Helveticarum" (1675) declared, as the doctrine of the Church, that the Masoretic vowel-points and accents were divinely inspired. Elias Levita (1472-1549) had

made it plain to intelligent Jews and Christians alike that the points were introduced about the sixth century of the common era; and when Louis Cappel (Cappellus), "Reformed" professor at Saumur (1585-1658), vindicated the same opinion in his "Critica Sacra" (1650), the orthodoxy of the time was left without excuse or defense, and the error gradually died out of itself. This book was the real beginning of textual criticism in the Christian Church. Moreover, the mysticism of Böhme (1575-1624) and the pietism of Spener (1635-1705) had an effect far beyond the spheres of religious sentiment and of philosophy, in liberating the minds of many from the tyranny of formalism.

Also, the original and independent John Koch (Cocceius, 1603-69), in pointing out the progressiveness of the divine revelation, gave, notwithstanding his extravagances as a typologist, a lasting impulse to earnest inquiry into the essential meaning of the Bible. His legitimate successor was VITRINGA (1659-1722), the famous commentator on Isaiah, a striking combination of the grammarian and the allegorist, whose diligence in seeking first of all the primary sense of the text was stimulated by the example of the common-sense literalist GROTIUS (1583-1645) and of the ingenious but cautious philologist De Dieu (1590-1642). All of these were of

Progress.**

the Reformed Church in Holland, where almost the only great commentators of the seventeenth and eighteenth centuries were trained and labored.

**3. Period of Criticism:** The ideas that most germinal and potential in interpretation came, however, not from Holland (concerning Spinoza, see later on), but from England and, above all, from Germany. They can be traced succinctly along the lines of esthetic appreciation, literary criticism, philological research, and philosophical constructiveness. It is with the middle of the eighteenth century that the unbroken advance begins. Up to that time the theologians, by their unsympathetic treatment, had done their best to consign the Bible to the rubbish-heap of creeds and confessions; and they seem to have almost succeeded.

**Esthetic Appreciation.**

The first essential to a correct estimate was to observe the form and structure of the sacred writings. Robert Lowth (1710-87), an Englishman, has the distinction of having pointed this out. His "De Sacra Poesi Hebraeorum" (1753) and his translation of Isaiah (1778) set forth and illustrated the several forms of PARALLELISM in Hebrew poetry, and showed how they could be traced out in the original, and how they could be reproduced in any properly made version. In this exposition he rightly professes to have applied largely the principles of Azariah dei Rossi (1513-77). This was the opening of a new world to Christian readers, who were now enabled to discern the poetic structure of a large part of the Old Testament.

**Lowth and Herder.**

Lowth's esthetic taste and spirit were more than matched by the German HERDER (1744-1803), whose enthusiasm for Oriental antiquity had been in large measure kindled by Hamann (1730-88). Herder's "Geister Hebräischer Poesie" (1782) did most to imbue his age with admiration for Hebrew literature. But the Bible was the main inspiration of his literary and philosophical writings, in all of which he strove mightily for the uplifting and enlarging of the spirit of humanity. What has been gained since Herder's time in the literary appreciation of the Bible is due in the main to a more accurate knowledge of details.

Bible exegesis came to its rights when scientific literary criticism was combined with accurate philological methods and more complete historical and archeological knowledge. The year 1753 is the natal year of what, in distinction from textual criticism, is called "higher criticism."

**Beginnings of Higher Criticism.** Then appeared along with Lowth's "Sacred Poetry of the Hebrews" a still more epoch-making

book by Jean Astruc (1684-1766), physician to Louis XIV. of France, entitled "Conjectures sur les Mémoires Originaux dont il Paroit que Moïse s'est Servi pour Composer le Livre de la Génèse." The book was published with an apologetic aim—to save the consistency of the sacred writers—and nobly has this purpose been justified in the final result of the critical inquiry thus begun. It had long been maintained by some of the more daring spirits, as by Abraham ibn Ezra (1093-1168) and the philosophers HOBBS (1588-1679) and Spinoza (1632-77), that there

were many portions of the Pentateuch which could not have been written by Moses, on the ground that their statements refer to events which occurred after his time. Of these Spinoza advanced furthest, following up the dicta of Ibn Ezra and Isaac de la Peyrère (1592-1676). In his "Tractatus Theologico-Politicus" (1670) Spinoza not only disputed the Mosaic origin of the Pentateuch, but

**Precursors of the Higher Criticism.**

asserted that in the historical books as far as Kings much of the contents pointed to a late authorship. His sagacity was further shown by his putting Chronicles long after the time of Ezra and in perceiving the composite character of several of the prophetic books. Richard SIMON, a father of the Oratory in Paris (1638-1712), the most acute critic of his day, while denying that the Pentateuch in its final form could have come from Moses, propounded the theory that the Old Testament was compiled with considerable freedom from the works of inspired historiographers.

Astruc made the beginning of progressive criticism by observing the distinction in usage of the two names for God, ELOHIM and YHWH. It had already been conjectured by Vitranga and others that Moses made use of earlier documents. Astruc hit upon the thought that these two names, running through separate sections of Genesis, marked a distinction of authorship. He assumed also nine smaller documents distinguished by other marks. J. G. Eichhorn, along with other hypotheses, showed in 1779 that this distinction

**Chief Points in the Line of Progress.**

was further justified by peculiarities of linguistic usage. In 1798 K. D. Ilgen declared his belief that the Elohim sections in Genesis were not the productions of a single author. De Wette demonstrated in 1805 that Deuteronomy differed in essential character from the other books of the Pentateuch. Friedrich Bleek in 1822 pointed out that the Book of Joshua was a direct continuation of the Pentateuchal narrative, and therefore must have been included in the same historical framework now known as the Hexateuch, including the Pentateuch and Joshua. Ewald in 1831 showed that the Elohim document and the Jehovah document were separately traceable throughout the Pentateuch. In 1853 Hupfeld developed the happy conjecture of Ilgen, made more than half a century before, into a demonstration that there were two independent Elohist sources, one of which was very closely related to the Jahvistic.

Thus, in a round century after 1753, the fundamental analysis of the first six books of the Old Testament was completed. The few facts

**Summary of Theories.** just given indicate merely the general line of assured progress, leading to the establishment of the hypothesis

that the Hexateuch was made up of a series of independent documents. Other theories, such as that the Pentateuch was a late composition made up of a collection of fragments (the "Fragmentary" hypothesis), or that it consisted of one fundamental (Elohist) work, others having been attached for the purpose of completing it (the "Supplementary" hypothesis), grew out of the original impulse toward

analysis and construction. They were long defended by able scholars, but have now practically disappeared from the arena of discussion.

Meanwhile a great awakening of what may be summarily called the historic interest had taken place in the world of criticism, and Bible study has been perhaps the principal gainer by the whole movement to which that awakening has given vitality and permanence. The dominant influences are, moreover, still operative a century and a half after the date of Lowth and Astruc.

Comparative philology has been influential in two main directions. It has called attention to the contrasts as well as to the resemblances of distinct families of mankind, and has compelled men to find out characteristic types of thought and modes of expression in their literary monuments. It has also provoked a rational and scientific study of words and sentences, so that the modifications of their usages from age to age are made a key to unlock the meaning,

**Com-  
parative  
Philology.** or shades of meaning, which they have expressed. Hence, on the one hand,

the impulse to the literary study of the Bible given by Lowth and Herder was continued by highly endowed men of various schools, of whom it may suffice to name Eichhorn, De Wette, Goethe, Ewald, Coleridge, and Matthew Arnold. On the other hand, the grammatical and lexical study of Hebrew was placed upon a new and ascending grade. Witness the successive productions of Gesenius (whose practical linguistic work is the most vital and persistent known to modern times), Ewald, Olshausen, Stade, and Koenig.

To the demand for verbal accuracy, as well as to the search after the form of the original text, are due

**Textual  
Emenda-  
tion.** the many attempts that have been made to amend the Masoretic text. That emendation is often needed was long ago felt by independent inquirers.

But no great advance was made in method from the days of Cappellus and Lowth to those of Ewald and Hitzig, except in connection with a critical study of the ancient versions and a wider collation of manuscripts. This was resumed with better efforts in the monumental works of Holmes and Parsons, of Field and Lagarde, who enforced stricter principles of textual correction.

But all these influences combined will not account for the tremendous revolution which Bible criticism

**New  
Vitalizing  
Con-  
ceptions.** and exegesis have undergone since the middle of the eighteenth century. Two new forces have been applied to Biblical study which may fairly be called vitalizing and regenerative.

The one has come from the now ruling conceptions of the history of human thought and experience; the other, from the prevalent views as to the actual growth of human society. The one is chiefly philosophical; the other, mainly empirical. The practical result of the cooperant workings of the two conceptions is a rearrangement of the Old Testament books in the order of the natural development of their ideas, and in accordance with the growing capacity of ancient Israel for apprehending or receiving them

The chief points on which the representatives of modern Biblical exegesis are agreed are:

1. In the Hexateuch four authors at least were concerned, besides a redactor or redactors. Of these

Moses is not one, though it is not **Results** proved that he contributed no mate-  
**of the New** rials. One of the sources appears in  
**Exegesis.** Deuteronomy (D); another (P) in Le-

viticus and in large portions of the other books; while two others (J and E) often inseparably combined (J E) form the remainder. J (Jahvist) and E (formerly called the second Elohist) give a sort of historical résumé of the early history of Israel from the standpoints of southern and northern Israel respectively, and are dominated by the prophetic movement. They were completed in the ninth and eighth centuries B.C. The groundwork of D was the "Book of Instructions" found by Hilkiah in the Temple in 621 B.C. It ministered both to the prophetic spirit and to the cultus, and served as directive for the reformation of Josiah. P was composed for the promotion of the ceremonial code which it contains, and treats besides of the early history from the point of view of the priesthood. While including earlier elements, it was essentially the work of writers that were concerned with the ritual of the Second Temple, being substantially the law-book of Ezra. J E therefore precedes D, and D precedes P. The mode and time of the redaction are not so clear.

2. The aims or tendencies of these several productions—prophetic, deuteronomic, and priestly—do not stop with the Book of Joshua, but run through all the historical literature. In brief, while Judges, Samuel, and Kings are mostly of the prophetic or deuteronomic spirit, Chronicles, Ezra, and Nehemiah, all of which three came from one hand near the close of the canon, are controlled by the priestly tendency, so prominent in P of the Hexateuch.

3. The prophetic books have also been rearranged and readjusted in accordance with their ascertained historical order. Moreover, many of them have been found to contain prophecies which did not proceed from the principal authors. The portions thus separated are usually later than the genuine prophecies. Isaiah and Zechariah, for example, have each been credited with more than one important work in addition to their own proper utterances.

4. The titles of the Psalms are not original or reliable. Psalm-composition with a high spiritual intent and content began after the time of David, and, like hymn-writing in every age, flourished chiefly in times of religious and social stress and trial.

5. The writings ascribed to Solomon are, in their present form, of very late date. Ecclesiastes is wholly, and Proverbs largely, the product of the Persian or Grecian period. The Book of Daniel belongs to the time of the Maccabees.

6. Not only have the history of Israel and its historical records been arranged anew, but the whole career of Israel in Palestine now appears, in the light of the archeological disclosures of the last half-century, to have been, in its external incidents, but an incident in North-semitic history, which began several thousand years before the Hebrews became a nation.

7. The development of the religious conceptions and institutions of ancient Israel can be traced in a rational order and illustrated by similar phenomena elsewhere.

**BIBLE INSPIRATION.** See **INSPIRATION.**

**BIBLE MANUSCRIPTS:** By this term are designated handwritten copies and codices of the Hebrew Bible as a whole, or of several books arranged in groups according to a certain order (see **BIBLE CANON**), or of single books. Sometimes, though not often, they contain collections of detached prophetic selections (see **HAFTARAH**), generally in connection with the Pentateuch (see **Strack**, "Zeitschrift für die Gesamte Lutherische Theologie und Kirche," 1875, p. 594). A distinction is made between manuscripts intended for use in the synagogue and in public reading and those for private purposes. Originally both the sacred or public copies and the private or profane were in the shape of scrolls, this being the only style of book-making known to antiquity. After the leaved form of books came into vogue (from the fourth century of the common era), adherence to the ancestral model was insisted on in the case of those reserved for holy uses at public worship. While demanded only for the Pentateuch and the Book of Esther, this conformity must, as the name indicates, have been at one time exacted also for the four remaining Megillot, read as lessons on certain festivals. Why they and the collections of the Haftarah ceased to conform to the historical model can not be ascertained.

The Pentateuch and Esther, when designated for synagogal use, are required to be written with scrupulous attention to rules laid down in the Law (see **SOFERIM**). They must be written in square characters (כתב מרובע, also known as כתב אשורי; see **ALPHABET**), without vowel-points and accents, on parchment made from the hides of

**Rules for Writing.** "clean" animals, which, when duly prepared, are sewn together by threads of the same origin. If four mistakes are found in one column, or a single error is discovered in the "open" and "closed" sections of the Law, or in the arrangements of the metrical portions, the whole copy is rendered unfit for use (פסול) and must be buried. Great age—through long use, and exposure to climatic and other influences involving decay and other imperfections—is among the causes which render a copy unserviceable; and this

circumstance explains why very old copies are not found.

The manuscripts intended for private use vary considerably in size, material, and character. They are in rolls, and in book form—folio, quarto, octavo, and duodecimo. Some are written on parchment, some on leather, others on paper; some in square characters, others in rabbinical (the latter only in modern times). They are usually provided with vowel-points, written in a different color from the consonants, which are always in black. Initial words or letters are often in gold and silver; some, indeed, are artistically illuminated. Sometimes on the inner margins of the columns are given Masoretic notes; the outer ones are reserved for scholia and, in more modern manuscripts, for rabbinical commentaries. Yemenite manuscripts have usually no columns; and each verse is accompanied by the corresponding verse from the Targum Onkelos and the Arabic translation by Saadia. The space at the bottom of the pages is sometimes occupied by the commentary of Rashi.

Generally, the manuscripts are provided with inscriptions giving the name of the copyist and the dates of writing. Several eras are used in the computation of these dates: **Colophons and Inscriptions.** that of the creation of the world; that of the Seleucids; that of the destruction of the Temple; and, finally, that of the Babylonian exile (see **ERA**). The age of undated manuscripts is approximatively determined by the ink, the quality of the parchment, the presence or absence of Masoretic notes, and by paleographic signs (see **PALEOGRAPHY**).

As indicated above, extant manuscripts are not of very great antiquity. In addition to the explanation already given, this phenomenon, all the more curious because, according to Jewish law, every Jew ought to have at least one copy in his house, is very plausibly accounted for on the theory advanced by Brian Walton; namely, that with the definitive settlement of the Masorah in the seventh century, many copies must have been discarded because of their infractions of the established Masoretic rules.

If Talmud Yerusbalmi (Ta'anit lxviii, 1) is to be credited, while the Temple was still standing, standard codices of the Pentateuch were officially recognized. These were deposited in the court of the Temple and served as models for accuracy. According to the passage quoted, three were known by the following names respectively: "Sefer Me'on," so called on account of its reading מעון instead of מעונה (Deut. xxxiii. 27); "Sefer Za'atute," because of its reading זעטוט instead of נערי (Ex. xxiv. 5); and "Sefer Hii," because of its reading הייא with a yod in nine passages instead of eleven. The Masorites, too, seem to have consulted standard manuscripts celebrated for their accuracy in the redaction of the text and in the compilation of the Masoretic glosses. Though none of these has been preserved, the following are referred to as authorities in almost every manuscript of importance:

**Codex Muggeh**, i. e., the corrected Codex: Quoted by the Masorites either by its full title (בספר מונה) or simply as "Muggeh" (מונה).

**Codex Hilleli** (ספר הללי): The origin of its name

השמים להבדיל בין הארץ ובין הים  
 והיו לאות ולמועדים ולמים ושנים  
 והיו לאות ברקיע השמים להאיר  
 על הארץ והיו כן ויעש אלהים את  
 שני המרת הלילות את המאור  
 הגדל למשלת היום ואת המאור  
 הקטן למשלת הלילה והוא הנכבש  
 ותקאם אלהים ברקיע השמים  
 להאיר על הארץ ולמשל בין  
 ובלילה ולהבדיל בין האור ובין החשך  
 וירא אלהים טוב ויהי ערב ויהי  
 בקר יום רביעי  
 ויאמר אלהים ישרעלהמים שרץ  
 נפש חיה ועוף יעופף על הארץ על  
 פני רקיע השמים ויברא אלהים את  
 התנינם הגדלים ואת כל נפש החיה  
 הרמשת אשר ישרעלהמים למיניהם  
 ואת כל עוף כנף למיניהו וירא אלהים  
 כי טוב ויברך אתם אלהים לאמר  
 פרו ורבו וכלאו את המים במים ויעוף  
 ירבה הארץ ויהי ערב ויהי בקר יום  
 חמישי  
 ויאמר אלהים תלמא הארץ נפש חיה  
 למיניהם בהרמה ויהי תוארין למינה  
 ויהי כן ויעש אלהים את הית הארץ  
 למינה והוא הבהמה למינה והוא את כל  
 רמש הארמה למינהו וירא אלהים  
 כי טוב ויאמר אלהים נעשה אדם  
 בעלמט כדמותנו וירדו בדתהים  
 ובעוף השמים ובהמה ובכל הארץ

**ו**יאמר אלהים את  
 השמים ואת הארץ והארץ  
 והתהוה וכהוה שרץ  
 פני תהוה ורוח אלהים כמרת ער  
 פני המים ויאמר אלהים יהי אור והי  
 אור וירא אלהים את האור כי טוב  
 ויברל אלהים בין האור ובין החשך  
 ויקרא אלהים לאור יום ולחשך  
 קרא לילה והיה ערב ויהי בקר יום  
 אחרי  
 ויאמר אלהים יהי רקיע בתוך המים  
 ויהי מבדיל בין מים למים ויעש  
 אלהים את הרקיע ויברל בין המים  
 אשר מתחת הרקיע ובין המים אשר  
 מעל הרקיע ויהי כן ויקרא אלהים  
 לרקיע שמים והיה ערב ויהי בקר יום  
 שני  
 ויאמר אלהים יקוו המים מתחת  
 השמים אל מקום אחד ותרא  
 הכשה ויהי כן ויקרא אלהים לכשה  
 ארץ ולמקוה המים קרא ימים וירא  
 אלהים כי טוב ויאמר אלהים תשא  
 הארץ שא עשב מדריע זרע עין  
 פרי עשה פרי למיט אשר זרעו כל  
 על הארץ ויהי כן ותניא הארץ וירא  
 עשב מדריע זרע למינהו ויעין עשה  
 פרי אשר זרעו למינהו וירא אלהים  
 כי טוב ויהי ערב ויהי בקר יום שלישי  
 ויאמר אלהים יהי כארות ברקיע

ILLUMINATED HEBREW BIBLE (GEN. I.)  
 WRITTEN IN SPAIN 1476  
 (FROM THE BODLEIAN LIBRARY, OXFORD.)

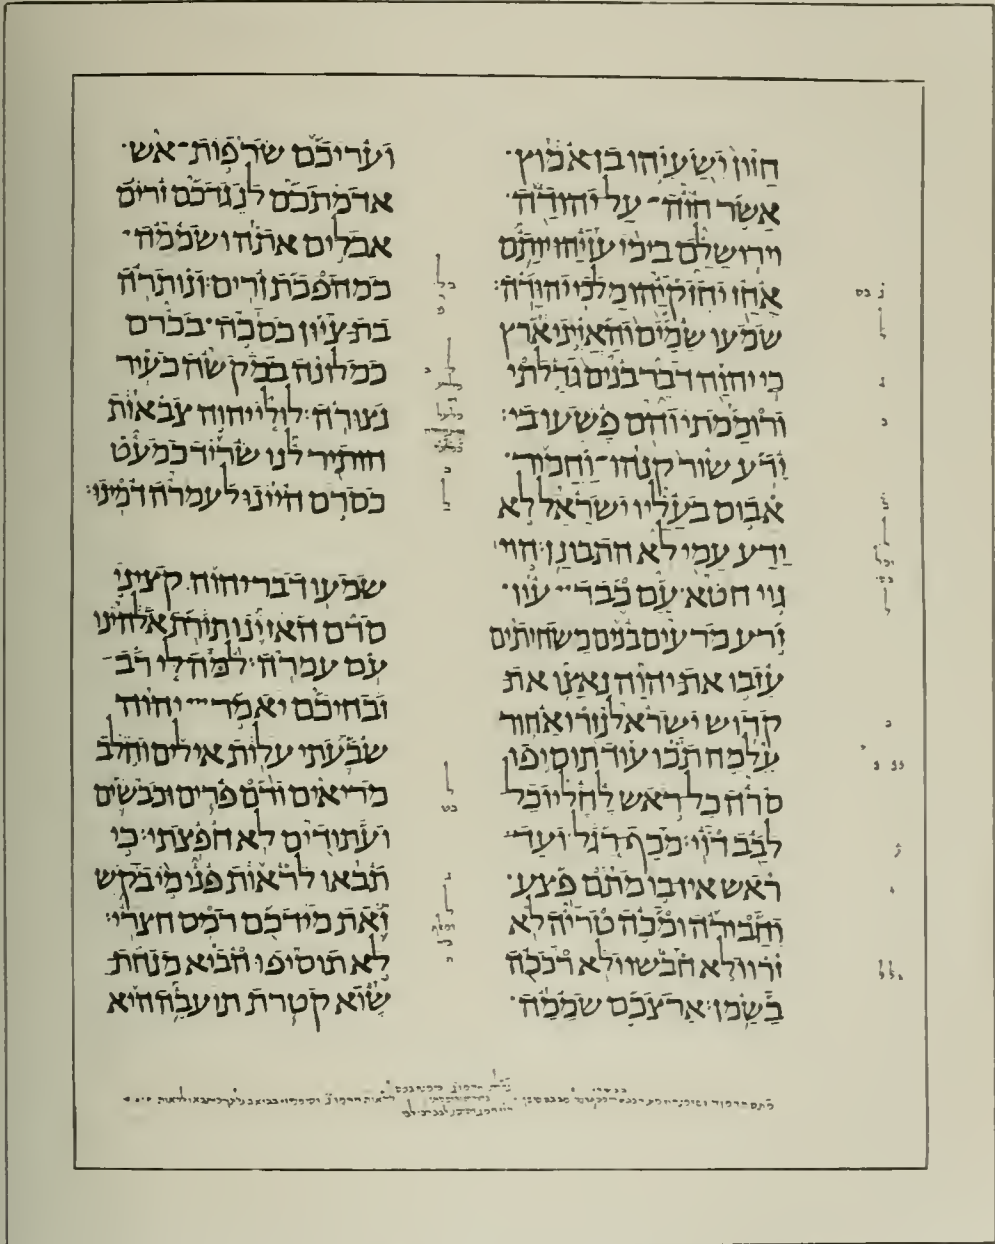

is not known. According to Zacuto, this codex was written by a certain Hillel at about 600 of the common era. In his Chronicle, compiled about 1500, Zacuto expresses himself as follows:

"In the year 4957, on the twenty-eighth of Ab (Aug. 14, 1197), there was a great persecution of the Jews in the kingdom of

remaining two parts of it, containing the Former and Latter Prophets, written in large and beautiful characters: these had been brought by the exiles to Portugal and sold at Bugia in Africa, where they still are, having been written about 600 years ago. Kimbi in his grammar on Num. x. 4 says that the Pentateuch of the Hillel Codex was extant in Toledo."

Codex Sanbuki: Frequently quoted in the

PAGE OF THE HEBREW BIBLE, WITH SUPERLINEAR PUNCTUATION, FROM THE ST. PETERSBURG CODEX.

Leon at the hand of the two kingdoms that came to besiege it. At that time they removed thence the twenty-four sacred books which were written about 200 years before. They were written by R. Hillel ben Moses ben Hillel, and hence his name was given to the codex, which was called "Hilleli." It was exceedingly correct; and all other codices were revised after it. I saw the

Masorah Parva, and highly praised for its accuracy by Menahem de Lonzano in his "Or Torah." According to Christian D Ginsburg, the name of this codex is derived from "Zanbuki" on the Tigris, to which community it belonged.

**Codex Yerushalmi:** As attested by Kimhi ("Miklol," ed. Fürth, 1793, p. 184b), the codex was for many years in Saragossa, and was extensively used by the grammarian and lexicographer Ibn Ganah. It is often quoted in the Masorah as exhibiting a different orthography from that of the Codex Hilleli.

**Codex Jericho,** also called **Jericho Pentateuch** (חוקמי יריחו): The name seems to imply that the manuscript embraced only the Pentateuch. It is mentioned by Elijah Levita, in "Shibre Luhot," as most reliable for the accents.

**Codex Sinai** (ספר סיני): Many opinions exist as to the derivation of its name. The most plausible is that it was derived from "Mount Sinai," just as the codices Jericho and Yerushalmi denote the places of their origin. It is mentioned in the Masorah, and is also cited by Elijah Levita in his work quoted above.

**Codex Great Mahzor** (מחזורא רבה): This probably contained the annual or triennial cycle ("Mahzor") of lessons to be read on week-days, Sabbaths, feasts, and fasts; hence its name.

**Codex Ezra:** Quoted in the Masorah Parva. A manuscript professing to be a copy of this codex is in the possession of Christian D. Ginsburg.

**Codex Babylon** (ספר בבלי): Differences (הלכות) "hillufin") existed between the Western schools (מערבא), the chief seat of which was Tiberias, and the Eastern (מזרחא), the principal centers of which were Nehardea and Sura, in the reading of many passages; this codex gives the Eastern recension (see MASORAH).

Another standard codex which served as a model at the time of Maimonides was that written in the tenth century by the renowned Masorite AARON BEN MOSES BEN ASHER of Tiberias (compare Maimonides, "Yad," Sefer Torah, viii. 4). This codex was for a long time believed to be identical with that preserved in the synagogue at Aleppo (Jacob Saphir, אבן ספיר, i. 12b; Grätz, in "Monatsschrift," 1871, p. 6; 1887, p. 30; Strack, "Prolegomena Critica," pp. 44-46). [E. N. Adler ("Kaufmann Gedenkbuch," p. 130) argues that the Aleppo Codex is a copy, not the original; but Wickes ("Hebrew Accentuation," Preface, p. vii., Oxford, 1887) makes it clear that "the statement assigning the codex to (Aaron ben Moses) Ben-Asher is a fabrication."—E. C. H.]

Two celebrated manuscripts believed to be very ancient are still extant in Syria. One of these, the Damascus Codex, which, according to the inscription on its title-page (added, however, by a later hand), was written in the third century of the common era, belongs to a Jewish family of Damascus named Parhi, and is exhibited to the inhabitants on feast-days. The other is kept in a grotto by the inhabitants of Guber, near Damascus.

The number of Hebrew Bible manuscripts found in European libraries is very considerable. The oldest collection is that in the Imperial

**Number of Library, St. Petersburg, and formerly MSS.**

at the Biblical Society of Odessa. A description of some of these manuscripts was given by Ephraim Moses Pinner in a pamphlet entitled "Prospectus der Alten Hebräischen und Rabbinischen Manuscripte," etc., Odessa,

1845. A full description by Strack and Harkavy is given in their catalogue. The oldest manuscript of this valuable collection is a Pentateuch brought from Derband (Daghestan), written before 604 of the common era. It consists of forty-five skins having 226 columns, and is composed of six pieces: (1) Gen. i.-xlvi. 25, end (9 skins, 52 columns, 51 lines; TAGGIN by a later hand). (2) Gen. xlvi. 26-Numbers (24 skins, 134 columns, 50 lines, without Taggin). (3) Dent. i.-xvii. (4 skins, 21 columns, 51 lines, without Taggin). (4) Dent. xviii.-xxi. 4 (1 skin, 3 columns, 51 lines). (5) Dent. xxi. 5-xxiii. 23 (1 skin, 3 columns, 51 lines). (6) Dent. xxiii. 24-end of Dent. (4 skins, 13 columns, 51 lines).

The oldest manuscript in book form at the library of St. Petersburg dates from 916. It consists of 225 folios, each folio divided lengthwise into two columns with 21 lines to the column, with the exception of folio 1a and folio 224a-b, which exhibit epigraphs. It contains the Latter Prophets. Two lines of Masorah Magna appear in the lower margin of each page; while the Masorah Parva occupies the center space between the columns. The vowel-points are superlinear in the so-called Babylonian system. The total number of the Bible manuscripts in the St. Petersburg library is 146.

The British Museum possesses 165 Bible manuscripts, the oldest of which is the Masoretic Bible written about 820-850. This contains the Pentateuch and consists of 186 folios, 55 of which were at one time missing, but have been added by a later hand. The Bodleian Library, Oxford, possesses 146 Bible manuscripts, the oldest of which dates from 1104. Cambridge counts 32, the oldest believed to be of the tenth century. Bible manuscripts in goodly numbers are also to be found in private libraries in England, the most important collection being that of E. N. Adler. This contains about 100 codices, the oldest dating from the ninth century. The Bibliothèque Nationale, Paris, has 132 Bible manuscripts, the oldest with the date 1286. The number of Bible manuscripts in the Vienna Library is 24. The oldest (given by Kennicott under No. 126) contains the Latter Prophets and the Hagiographa, written in the tenth century. Steinschneider describes 14 Bible manuscripts in the

**In Royal library of Berlin; none of them Libraries.** is very old. De Rossi describes 848 manuscripts (now at Parma), the oldest of which is No. 634, containing Lev. xxi. 19-Num. i. 50, written in the eighth century. The Vatican Library possesses 39 Bible manuscripts, which have been described by Joseph Simon Assemani and Stephen Ephodius Assemani. Several Bible manuscripts are in the libraries of Leipsic, Munich, and Leyden.

Some Bible manuscripts have been brought from China. They are partly synagogue rolls, partly private copies, whose text does not differ from the Masoretic Bibles. A Pentateuch of the Malabar Jews is now in England. It resembles, on the whole, the usual synagogue rolls, except that it is written on red skin.

Samaritan manuscripts of the Pentateuch are to be found in the British Museum, the Bodleian, St. Petersburg, Parma, and the Vatican libraries; for a

description of them, the respective catalogues may be consulted.

As curiosities may be mentioned a Hebrew Pentateuch in Arabic characters, now in the British Museum; the Pentateuch in Latin characters in the Bodleian Library; and, finally, the fragments of the Pentateuch written in inverted alphabet discovered lately in the Cairo genizah.

E. G. II.

I. BR.

**BIBLE IN MOHAMMEDAN LITERATURE:** Through intercourse at Mecca, at Medina, and on his various journeys in the seething, germinating Arabia of his day, Mohammed learned to distinguish between idol-worshippers and such people as he termed "the People of the Book": holders and followers of a written revelation. Most prominent among these were the Jews and Christians; thrice mention is made in the Koran of the Sabaeans as being in the same class as, and once of, the Magi. As to the nature and contents of their books, Mohammed had only one fixed idea: These taught the same doctrine exactly as he taught: could, in fact, teach no other, as all doctrines came from the one Lord.

There are vague references to certain "leaves" being delivered to Abraham; but what eventually became of them Mohammed does not say. The later Moslem theory is that they were taken back into heaven, and that whatever light the Sabaeans and Magi enjoy is derived from them. One practical result is that Islam does not reckon Zoroastrians and worshippers of the host of heaven as idolaters, but consents to enter into treaty with them. But the books of the Jews and Christians were clearly there; they had remained unto Mohammed's day. To Moses, the "Tawrat" had been revealed; to David, the "Zubur" (Psalms); and to Jesus, the "Injil" (Evangelium). Thus, the Torah, the Psalms, and the "Gospel" represented for Mohammed the Scriptures of the Old and New Testaments. How vague his idea was and how both Jews and Christians must for him have melted together into one is evident from his belief that Miriam, the sister of Moses, was the same as Mary, the mother of Jesus.

To the series of prophets involved in this scheme of religious history Mohammed claimed to be heir. In the providence of God the time had now come when the Arabs, in their turn, were to have a prophet sent to them, speaking in their tongue, sprung from their blood, and calling them to repentance and to the acceptance of the one God and His doctrine as the other prophets had done with their respective peoples. Mohammed seems to have been quite satisfied that what he taught stood clearly written already in the Tawrat, the Zubur, and the Injil. The Jews and Christians, he felt, must recognize that he was exactly such a prophet as those who had come before; that he fulfilled all the conditions called for in the Books. This, evidently, was rooted in his self-consciousness, and, with his scheme

of religious policy, was all the basis he had. Of direct knowledge of the sacred books, as then in the hands of the Jews and Christians, he appears to have had none. He felt no need of it. When, therefore, the Jews and Christians refused to recognize his doctrine and to accept his prophethood, he could only ascribe their conduct to perverse obstinacy. They concealed passages in their books; they misinterpreted others, "twisting their tongues in them" (Koran iii. 72).

In time he gave up the attempt to secure such support, and fell back on the simple weight of his own authority. Traditions, which may have taken form later, indicate, in their substance at least, the attitude to which he came. "Have nothing to do," he is reported to have said, "with the People of the Book and their books; say unto them, 'We believe in that which has been revealed to both of us; your

God and our God is the same.'" Essentially he meant, "My revelation is the same as that which stands in your books. You misinterpret, conceal, and pervert; my revelation is certain and is enough." Such, apparently, was the attitude of Mohammed himself to the Scriptures. In illustration, reference may be made to the following passages in the Koran, suras ii. 85, 129, 209; iii. 60, 72, 179, 184; iv. 161, 169; v. 47, 85, 109; xix. 28; xxvi. 192; xxix. 45; xlii. 11; lvii. 25; lxi. 6; lxii. 5; lxvi. 10.

But such a position could only be maintained by Mohammed himself with his intense consciousness of the truth of his mission. After his death came rapid changes which were natural in themselves, but the definite origin of which is mostly obscure to us. The only means of access which the earliest Moslems had to the sacred books of the Jews and Christians was through proselytes; and these proselytes, from a variety of causes, misled much more than they instructed their new coreligionists. For one thing, the Moslems regarded them as authorities on the history of the past. They asked innumerable questions, and expected answers. The more marvelous the answer, the better they seem to have been pleased. Only on one point these converts had to be wary: Their replies must square generally with the Moslem scheme of thought and theology; otherwise their heads were in danger. Under these conditions of risk, marvelous tales sprouted freely. The Midrashimun doubtfully helped; but the imaginations of the converts, thus stimulated, probably accomplished more. Of the latter, two names are worthy of mention as romancers of quite astonishing capacity; viz., Wabb ibn Munabbih (d. 728) and Ka'ab al-Ahbar (d. 652).

To the labors of these men, then, to the Oriental horror of a vacuum, and to the Oriental indifference as to how a vacuum is filled, is due the overwhelming mass of misinformation on the Old and New Testaments that still oppresses the Moslem world. First, the Torah is confused with the Tables of the Law, and the latter are increased in number. Again, the Torah is enormously increased in bulk: it is alleged to contain a varying number of parts, up to 1,000, and to make seventy camel-loads. Each single part takes a year to read through. Only four

FIRST PAGE OF EXODUS.

(From an illuminated manuscript, formerly in the possession of the Duke of Sussex.)

men—Moses, Joshua, Ezra, and Jesus—have studied it all. Clear statements, all imaginative, are given as to how it begins and ends. Quotations of the wildest character are introduced as from it; and the quoter will say calmly, "I have read them in the Torah." The same exactly holds good in regard to the Gospel and the Psalter. As to the Psalter, there exists in Arabic one of one hundred and fifty chapters, only the first two of which agree with the Psalms; the rest being a free imitation of the Koran. Possibly the Torah and the Gospel may at one time have been similarly perverted, but of such corruptions no traces now exist. The Torah was said to begin like sura vi. of the Koran and to end like sura xi. In it was an exact description of Mohammed and of some other persons associated with the beginning of Islam. For the Gospel, the following statement by an early authority will probably suffice: "I found in the Gospel that the keys of the treasure of Karum [Korah] were a load for sixty mules; no one of them was larger than a finger, and each key served for a separate treasury."

**False Citations from Torah.**

Besides these three books which Mohammed recognized, there are also given references to the Wisdom literature; and in this case a much closer approximation is made to the truth. There are quotations from the Wisdom of Solomon, the Testament of Solomon (apparently part of Proverbs), and the Wisdom of the Family of David, and these have usually at least a possible source. Further, it must not be thought that all this characterized only the earliest times and the most ignorant and careless minds. Al-Gazzali (d. 1111), the greatest theologian of Islam, and a man of the intellectual rank of Augustine or Thomas Aquinas, quotes almost as credulously and rashly as any. Nor does he ever dream of verifying a quotation. Fakhr al-Din al-Razi (d. 1209), another theologian of eminence, boasted that he knew the Torah and the Gospel by heart; and yet in his commentary on the Koran the most incredible things are cited as being contained in these. The best we can say for him is that either there were a pseudo-Torah and a pseudo-Gospel, which deceived him, or else that he lied. Such were the results of the mendacity of the early proselytes to Islam and of the credulity and carelessness of the Moslems. As some excuse for the last may serve the feeling which grew up that there was sin as well as danger in reading the books of Jews or Christians. Even Ibn Khaldun (d. 1405), the first philosophical historian of Islam, disapproved of such study; Mohammedans had certainty in the Koran, he held, and should be content with that.

Among the various general statements in the Koran that Mohammed had been foretold in the earlier books, only one gives the impression that Mohammed had had a specific passage in mind. It is in sura lxi. 6, where Jesus says, "O Sons of Israel, lo, I am a messenger of God to you . . . giving you good tidings of a messenger who will come after me, whose name will be Ahmad." This seems a tolerably clear reference to the promise of the paraclete in John's Gospel, ch. xiv. *et seq.*, and a very early Moslem tradition so takes it, quoting an Ara-

bized form of the Greek παρακλητος. Another passage is Deut. xviii. 18 *et seq.*: "I will raise them up a Prophet from among their brethren, like unto thee." This, it is explained, could only refer to a prophet of the line of Ishmael; for he was the brother of Isaac, and there was no prophet of the line of Esau; and "their brethren" excludes the line of Jacob. In Isa. xxi. 6-9 the rider on the ass is Jesus and the rider on the camel is Mohammed. The details in Isa. lx. 4-7 are regarded as applying very exactly to Mohammed. Also, in Deut. xxxiii. 2 "Sinai" refers to the Mosaic revelation; "Seir" is a mountain in Syria where Jesus served his Lord; and "Paran" is either a mountain of the Bannu Hashim, where Mohammed similarly worshiped, or Mecca itself. These are accepted as good proofs by the great scientist Al-Beruni (d. 1048).

But meanwhile, and alongside of this mass of traditional ignorance, a beginning had been made in Islam of the direct study of the older sacred books. It belonged to the brief period of scientific life and liberty under the first Abbassids and especially under Al-Mamun. Through the Persian Aristotelians and physicians, the Syrian monasteries, and the heathen of Harran, Greek civilization and its methods began to affect Islam. So the historians of the time show a commendable desire to go back to original sources and to test and examine for themselves. Ibn Waḡal, who wrote about 880, had an excellent knowledge of the Scriptures, as also, of parts at least, had Ibn Ḳutaibah, who died in 889. Yet in the works of both of these writers are included wild legends that had come down from the earlier times, which the Moslem "ḳuṣṣaṣ" or story-tellers had delighted to retouch and expand, side by side with sober translations from the Hebrew and Greek. And, just as the flourishing time of science under the Abbassids was short, so, too, with this branch of it. Ṭabari (d. 921) is already less affected by it; and Mas'udi (d. 957), although a free-thinking theologian, seems to have gone back to traditionalism. The result was simply that another set of assertions, much more trustworthy, was added to the contradictory jumble which was being passed on from writer to writer.

With Ibn Ḥazm, the Zahirite (d. 1064), however, a new development was reached, with results lasting to the present day. Ibn Ḥazm is distinguished in Moslem history for having applied to theology the principles of literal interpretation already used by the Zahirites in canon law, and for the remorseless vigor and rigor with which he carried on his polemics. He now marked a similar era in treating the doctrine of the older Scriptures, declaring them to be forgeries. Modern education in India and elsewhere has spread a more exact knowledge of the Jewish and Christian Scriptures.

For the present-day position of more orthodox Islam, reference may be made to Pfander's "Mizan al-Ḥaḳ," a translation of which appeared in London in 1867, and to the reply to it by Rahmat Allah, "Izhar al-Ḥaḳ," a translation of which by Carletti was published in Paris in 1880.

For the present-day position of more orthodox Islam, reference may be made to Pfander's "Mizan al-Ḥaḳ," a translation of which appeared in London in 1867, and to the reply to it by Rahmat Allah, "Izhar al-Ḥaḳ," a translation of which by Carletti was published in Paris in 1880.

**BIBLE, POLYGLOT.** See BIBLE EDITIONS.

**BIBLE TEXTS.** See MASORAH.

**BIBLE TRANSLATIONS:** Jewish translations of the Old Testament were made from time to time by Jews, in order to satisfy the needs, both in public service and in private life, of those that had gradually lost the knowledge of the ancient national tongue. In Palestine itself, Hebrew was driven out first by Aramaic, then by Greek, and finally by Arabic. Portions of the Bible itself (in Daniel and Ezra) are written in Aramaic; and there is no consensus of opinion among scholars as to whether these parts were originally written in that tongue or were translated from the Hebrew. Though Hebrew remained the sacred and the literary language, the knowledge of it must have faded to such a degree in the second century preceding the common era that it became necessary for a "meturgeman" to translate the weekly Pentateuch and prophetic lessons as read in the synagogue (Berliner, "Onkelos," p. 7; Friedmann, "Akylos und Onkelos," p. 58). The assertion made by the two scholars just cited, that the Targums date from the time of Ezra, is unwarranted; since they are written in a West-Aramaic dialect. The authorities of the synagogue did not willingly allow such translations to be written down. They felt that this would be putting a premium upon ignorance of the text, and that the Biblical word would be in danger of being badly interpreted or even misunderstood. They sought to minimize the danger by permitting only one verse to be read and translated at a time in the case of the Law, and three in the case of the Prophets (Meg. iv. 4). Certain passages were never to be translated publicly; e.g., Gen. xxxv. 22; Ex. xxxii. 21-25;

The Num. vi. 23-26; Lev. xviii. 21 (Meg. Targums. iv. 10; see Berliner, *l.c.* p. 217; Ginsburger, "Monatsschrift," xlv. 1).

These passages are to be found in Pseudo-Jonathan and in the Midrashim for private use. It is distinctly stated that no written copy of the Targum was to be used in the public service (Yer. Meg. iv. 1); though for private purposes copies were allowed to be made. The Talmud, it is true, mentions a written Targum to the Book of Job which was in the possession of Rabban Gamaliel I. during the Second Temple, about 20-40 c. e. (Tosef., Shab. xiv. 2; Bab. Shab. 115a; Sofetim xv. 2; compare Berliner, *l.c.* p. 90), and which was then buried by order of Gamaliel. In Yer. Shab. xvi. 1 a variant tradition tells of such a Targum having been in the hands of both the elder and the younger Gamaliel. Though this tradition is accepted even by Bacher (see ARAMAIC LANGUAGE), there are no means of verifying this statement, the existing Targum to that book being of a much later date. The tradition certainly can not refer to a Greek translation, as Grätz ("Monatsschrift," xxvi.

87) holds. According to Blau ("Einleitung," p. 79) the reference is to a copy written in the Old Hebrew script. The Targum is largely a paraphrase, reproducing the rabbinical tradition as regards the meaning of the text. For a history of this Targum see TARGUMS.

In passing a word should be said about the Samaritan version of the Pentateuch in the West-Aramaic dialect, which the Samaritans at one time spoke. It is as yet not possible to say in which century this version was made. Even though the citations under the caption τὸ Σαμαριτικόν, which are found in the scholia to Origen's Hexapla, refer to it, Kohn believes that they are drawn from a Greek translation of the Samaritan made in Egypt. The text has been edited in Samaritan characters by H. Petermann and K. Vollers (Berlin, 1872-91), and in Hebrew characters by A. Brüll (1873-75), from the London Polyglot. M. Heidenheim's edition in Hebrew characters, of which Genesis only has appeared ("Bibliotheca Samaritana," i., Leipzig, 1884), has been very severely criticized (see Nestle, "Übersetzungen der Bibel," p. 205).

The settlement of large numbers of Jews in various parts of the Greek world, the Hellenization of Palestine, and the presence in Jerusalem of Jews from all countries, especially from those under Greek influence, in course of time forced the Rabbis to treat the question more liberally. According to Meg. ii. 1, it was forbidden to read the Megillah in Aramaic or in any other non-Hebrew language, except for the foreign Jews (לענות) in Jerusalem (compare the Baraita in Bab. Meg. 18a; Shab. 115b); and that such foreign Jews were in the city in large numbers is seen from Acts ii. 5-11. So, also, it is found, according to another tradition (Meg. i. 8), that it was permitted to write the Biblical books in any language (לשון); though R. Simon ben Gamaliel would restrict this permission to Greek (Yer. Meg. i. 1): "After careful examination it was found that the Pentateuch could be adequately translated only into Greek." Evidence exists of the

**Influence of Hellenism.** fact that in the synagogue of the לענות Greek was freely used (Tosef., Meg. iv. 13). There is even a tradition that Greek letters were engraven upon the chest in the Temple in which the shekels were kept (Shek. iii. 2); and there is also Christian testimony to this effect (Justin, "Cohortatio ad Græcos," xiii.; Tertullian, "Apologia," xviii.; Frankel, "Vorstudien," p. 56). It is reported that in Asia Minor R. Meir was unable to find a Megillah written in Hebrew (Tosef., Meg. ii. 4); and the weekly lessons both from the Law and the Prophets were at an early date read in Greek in Alexandria ("Jew. Quart. Rev.," ix. 730). This makes comprehensible the statement that "the Law can be read in any language" (Sotah 33a; Meg. 17b). The well-known passage in the Mishnah (Yad. iv. 5) which mentions the Levitical impurity occasioned by touching Biblical books, and which especially excepts the Targum from these provisions, has been very properly explained by Blau as referring to different degrees of sanctity only; no translation could, of course, be put upon the same level with the original Hebrew.

At a later time—perhaps in the second century of

the present era—a different view seems to have prevailed; and it was said that the day on which the Law was translated into Greek was as unfortunate for the Jews as that on which the Golden Calf was made (Soferim i. 8, 9). Even to teach children Greek was forbidden (Soṭah ix. 14); though it was still permitted to teach a girl Greek, as a knowledge of that language was considered to be an accomplishment. Evidently this change of view was occasioned by the rise of the Christian Church, which used the Bible only in the Septuagint Version. It will be seen that in the Middle Ages the desire to please the women during the service and to instruct them led to the introduction of the vernacular, especially for the prophetic lessons. The treatise Soferim even makes it a duty "to translate, for the women, the weekly readings from the Pentateuch and the Prophets before the close of the service. The translation was not read verse by verse after the Hebrew, but as one continuous passage" (Abrahams, "Jewish Life in the Middle Ages," p. 345).

The oldest and most important of all the versions made by Jews is that called "The Septuagint" ("Interpretatio septuaginta virorum" or "seniorum"). It is a monument of the Greek spoken by the large and important Jewish community of Alexandria; not of classic Greek, nor even of the Hellenistic style affected by Alexandrian writers. If the account given by Aristeas be true, some traces of Palestinian influence should be found; but a study of the Egyptian papyri, which are abundant for this particular period, is said by both Mahaffy and Deissmann to show a very close similarity between the language they represent and that of the Septuagint, not to mention the Egyptian words already recognized by both Hody and Eichhorn. These papyri have in a measure reinstated Aristeas (about 200 B.C.) in the opinion of scholars. Upon his "Letter to Philocrates" the tradition as to the origin of the Septuagint rests. It is now believed that

**The Septuagint.** even though he may have been mistaken in some points, his facts in general are worthy of credence (Abrahams, in "Jew. Quart. Rev." xiv. 321). According to Aristeas, the Pentateuch was translated at the time of Philadelphus, the second Ptolemy (285-247 B.C.), which translation was encouraged by the king and welcomed by the Jews of Alexandria. Grätz ("Gesch. der Juden," 3d ed., iii. 615) stands alone in assigning it to the reign of Philometor (181-146 B.C.). Whatever share the king may have had in the work, it evidently satisfied a pressing need felt by the Jewish community, among whom a knowledge of Hebrew was rapidly waning before the demands of every-day life.

It is not known when the other books of the Bible were rendered into Greek. The grandson of Ben Sira (132 B.C.), in the prologue to his translation of his grandfather's work, speaks of the "Law, Prophets, and the rest of the books" as being already current in his day. A Greek Chronicle is mentioned by Eupolemus (middle of second century B.C.); Aristeas, the historian, quotes Job; a foot-note to the Greek Esther seems to show that that book was in circulation before the end of the second century B.C.; and the Septuagint Psalter is quoted in I Macc. vii.

17. It is therefore more than probable that the whole of the Bible was translated into Greek before the beginning of the Christian era (Swete, "An Introduction to the O. T. in Greek," ch. i.). The large number of Greek-speaking Jewish communities in Palestine, Syria, Mesopotamia, Asia Minor, and northern Africa must have facilitated its spread in all these regions. The quotations from the Old Testament found in the New are in the main taken from the Septuagint; and even where the citation is indirect the influence of this version is clearly seen. This will also explain in a measure the undoubted influence of the Septuagint upon the Syriac translation called the "Peshitta."

Being a composite work, the translation varies in the different books. In the Pentateuch, naturally, it adheres most closely to the original; in Job it varies therefrom most widely. In some books (*e.g.*, Daniel) the influence of the Jewish Midrash is more apparent than in others. Where it is literal it is "intolerable as a literary work" (Swete, *ib.* p. 22). The translation, which shows at times a peculiar ignorance of Hebrew usage, was evidently made from a codex which differed widely in places from the text crystallized by the Masorah. Its influence upon the Greek-speaking Jews must have been great. In course of time it came to be the canonical Greek Bible, as Luther's translation became the German, and the Authorized Version the English. It is the version used by the Jewish Hellenistic writers, Demetrius, Eupolemus, Artabanus, Aristeas, Ezekiel, and Aristobulus, as well as in the Book of Wisdom, the translation of Ben Sira, and the Jewish Sibyllines. Hornemann, Siegfried, and Ryle have shown that Philo bases his citations from the Bible on the Septuagint Version, though he has no scruple about modifying them or citing them with much freedom. Josephus follows this translation closely (Freudenthal, "Hellenistische Studien," ii. 171; Siegfried, in Stade's "Zeitschrift," iii. 32). It became part of the Bible of the Christian Church.

Two things, however, rendered the Septuagint unwelcome in the long run to the Jews. Its divergence from the accepted text (afterward called the Masoretic) was too evident; and it therefore could not serve as a basis for theological discussion or for homiletic interpretation. This distrust was accentuated by the fact that it had been adopted as Sacred Scripture by the new faith. A revision in the sense of the canonical Jewish text was necessary. This revision was made by a proselyte, AQUILA, who lived during the reign of Hadrian (117-138).

**Aquila.** He is reported to have been a pupil of R. Akiba and to have embodied in his revision the principles of the strictest literal interpretation of the text; certainly his translation is pedantic, and its Greek is unsmooth. It strove only to reproduce the text word for word, and for this reason it grew rapidly in favor in strictly Jewish circles where Hebrew was yet understood. Not only in the days of Origen was it thus popular, but, according to the testimony of Jerome and Augustine, down to the fourth and fifth centuries. Of this translation a few fragments have come down to us, together with many citations made by Christian writers from Origen's Hexapla. In the middle of

the sixth century a certain section of the Jews in Byzantium wished to read the Sabbath lections in Greek as well as in Hebrew; but the Rabbis and authorities desired that only Hebrew should be read. The discussion came before the emperor, Justinian, who in the year 553 issued a novella in which it was expressly stated that "the Hebrews are allowed to read the Holy Writ in their synagogues in the Greek language"; and the emperor advised them to use

words. Strange to say, his version of Daniel entirely displaced that of the Septuagint; and in other portions his translations are occasionally found in ordinary Septuagint manuscripts. For this fact no sufficient reason has yet been given. Fragments of his work are also found in the remains of Origen's Hexapla. A third translator, Symmachus, whose date is not known, tried to smooth down Aquila's un-Grecian Greek by the use of both the Septuagint

PAGE FROM THE VATICAN MANUSCRIPT OF THE SEPTUAGINT VERSION OF EXODUS XIX. 14-XX. 17.

either the Septuagint or the version of Aquila (Grätz, "Gesch. der Juden," v. 435).  
 A second revision of the Septuagint was made by one Theodotion, perhaps a native of Ephesus, who may have lived toward the end of the second century. He is sometimes said to have been a convert to Judaism. His revision, also, is in the nature of a recurrence to the Hebrew text, but he avoids entirely the pedantry of Aquila, and his Greek gives a readable text; the only evidences of pedantry are his transliterations of a number of Hebrew

and Theodotion. He seems to be the best stylist of all. According to Epiphanius, he was a Samaritan convert to Judaism; but Eusebius and Theodotion Jerome make him out an Ebionite. Of the three other fragmentary translations into Greek used by Origen in compiling his Hexapla, very little is known. It is not even certain that they are the work of Jews.  
 Toward the end of the fourteenth century or at the beginning of the fifteenth another translation of

the Bible into Greek was made, of which the portion covering the Pentateuch, Ruth, Proverbs, Canticles, Ecclesiastes, Lamentations, and Daniel is still preserved in manuscript (MS. Gr., No. vii.) in the library of St. Mark's, Venice. It has been edited in a final form by Oscar von Gebhardt ("Græcus Venerus," Leipsic, 1875), with a preface by Franz Delitzsch. According to Von Gebhardt, Delitzsch, and Freudenthal ("Hellenistische Studien," p. 129), the author was a Jew, who for some reason or other preferred the commentary of David Kimḥi to that of Rashi. The author has also used the former Greek versions. The body of the work is done into Attic Greek; the Aramaic portions of Daniel are rendered into Doric. Delitzsch has tried to identify the author with a certain Eliseus, a learned Jew at the court of Murad I. (see "Theol. Lit. Zeit." i. 107; Swete, *l.c.* p. 56; Nestle, *l.c.* p. 84). On the other hand, P. Frankl has tried to show that the translator was a Christian and not a Jew ("Monatsschrift," xxiv. 372). According to Grätz ("Gesch. der Juden," vii. 318), Shemariah of Negroponte (1328-46) rendered the Book of Genesis into Greek, in an attempt to bridge over the cleft separating Karaites from Rabbinites. But Shemariah's work was a commentary and not a translation (Steinschneider; "Hebr. Bibl." xv. 39). On translations of the Haftarah into Greek see "Magazin," ii. 5.

The first attempt to translate the Bible into modern Greek was made by a monk of the island of Crete, Agapion by name. In 1543 he published a rendering of the Psalms which followed closely the Septuagint translation. This preceded

**Modern Greek.** the first Jewish translation by only a few years. One column of the Polyglot Pentateuch (Constantinople, 1547)

contained a Neo-Greek version in Hebrew characters. The dialect used is that of Epirus; and no single word of Turkish is to be found in it. Though full of Hebraisms, it is said to be of importance for the study of Greek linguistics. The few copies of this edition which are now known to exist do not agree; and it has been suggested that corrections were made in the text during printing. In the "Revue des Etudes Grecques" (iii. 288 *et seq.*) Belleli has reprinted the first four chapters of Genesis; and a facsimile of the whole has been published by D. C. Hesselung, "Les Cinq Livres de la Loi" (Leyden, 1897; compare the discussion in "Rev. Etudes Juives," xxxv. 132, 314). A translation of Jonah into modern Greek is found in a manuscript volume of prayers in the library of the University of Bologna; and it is known, from R. Meir Katzenellenbogen, that in his day (1470-1565) it was customary in Padua to read the Haftarah of the Atonement Day in the vernacular; this was also the case in Candia (Kapsali, ed. Lattes, p. 22). L. Modena has shown ("Cataloghi dei Codici Orientali," p. 335, Florence, 1876) that this thirteenth-century manuscript, which came originally from Canea, is similar to MS. No. 1144 in the Bodleian collection (Neubauer, "Cat. Bodl. Hebr. MSS." col. 333; "Rev. Etudes Juives," xxiii. 135). In 1576 Moses ben Elijah Phobian, or Popian, published at Constantinople a Neo-Greek translation of Job for the express purpose of facilitating the teaching of Hebrew (Belleli, in "Rev.

Etudes Juives," xxii. 250; compare *ib.* xxiii. 136, xxiv. 160, and Güdemann, "Quellen" pp. 239-289).

The Syriac translation of the Old Testament was undoubtedly made directly from the Hebrew; though at Antioch, during the third century of the present era and at later periods, it was revised so as to make it conform to the Septuagint.

**The Peshitta.** The history of its origin is obscure; but it was probably made in Mesopotamia during the first century. As with most of the older translations, various hands have been at work here, Perles ("Mcletemata Peschittoniana," Breslau, 1859), Prager ("De Veteris Testamenti Versione Peschitto," Göttingen, 1875), and Bacher (see ARAMAIC LANGUAGE) believe it is the work of Jews; but this has not yet been proved; and the view of Dathe, Eichhorn, Hitzig, Nöldeke, and Renan, that it owes its origin to Judæo-Christians, seems more probable. Perles, however, has shown that there are unmistakable evidences in the Peshitta of the influence of the Targum, especially in Genesis. This has been confirmed for Ezekiel by Cornill ("Das Buch Ezekiel," p. 154), for Chronicles by S. Fränkel (in "Jahrb. für Protestantische Theologie," 1879), and for Job by Stenig ("De Syriaca Libri Jobi Interp.," Helsingfors, 1887), Mandl ("Peschitto zu Iliob," Leipsic, 1892), and Hauman (in Stade's "Zeitschrift," xix. 29). The closest agreement between the two versions is found in the Book of Proverbs; but it is now generally held that in this case the Targum reflects the Peshitta and not vice versa, as Maybaum contends (Merx, "Archiv," vol. ii.). This view is upheld by a consideration of the general character of the translation (Pinkuss, in Stade's "Zeitschrift," xiv. 101; see also Duval, "Littérature Syriacque," 1899, pp. 31 *et seq.*).

It is impossible to tell at how early a time the Jews commenced to translate the Bible into Arabic. After the early victories of the Mohammedans, Arabic civilization and Arabic surroundings brought

**Arabic Versions.** the Jews into very close connection with the Arabic language. Even where Hebrew was still kept up, the

Hebrew alphabet must at times have gone out of fashion; for there exist some Karaite manuscripts of the tenth century, giving the Hebrew text in Arabic characters and with the letters used as vowel-signs (R. Höning, "British Museum Karaite MSS." London, 1889; Margoliouth, "Cat. Hebr. and Samaritan MSS. Brit. Mus." i., Nos. 103, 104). That the Jews had little scruple in reading the Bible in Arabic may be seen from Judah ibn Tibbon's advice to his son to read the Sabbath lessons in that tongue ("Jew. Quart. Rev." xii. 484). There are no facts, however, which prove that the early Jews of Arabia possessed any Arabic translation of the Bible. There is a tradition, going back to Abu Huraya, a contemporary of Mohammed, that "The People of the Book used to read the Tanrah [Torah] in Hebrew and interpret it in Arabic to the followers of Islam"; which tradition is the basis of the polemics of Abu Mohammed ibn Ḥazm (d. 1064). Another tradition says that "Ka'ab the rabbi brought a book ["sifr"] to Omar the calif and said, 'Here is the Torah, read it'" (Goldziher, in "Z. D. M. G." xxxii. 344). The evidence is insufficient; and there

is even less warrant for Sprenger's idea that apocryphal writings were current in Arabia during Mohammed's days (see Kuenen, "Volksreligion," p. 297). At a later time, however, such translations must have existed, even though little credence can be placed upon the assurances of the polemical writers that they had "read this in the Torah" or "in the Zabur [Psalms]" (*ib.* p. 351; compare Stade's "Zeitschrift," xiii. 315). The Fihrist (ed. Flügel, i. 22) of Al-Nadim mentions an Ahmad ibn Abd Allah ibn Salam who translated the Bible into Arabic, at the time of Harun al-Rashid. Fahr al-Din al-Razi mentions a translation of Habbakuk by the son of Rabban al-Tabari ("Z. D. M. G." xlii. 645). Many of the Arabic historians, as Al-Tabari, Mas'udi, Hamza, and Biruni, cite passages and recount the early history of the Jews in a most circumstantial manner. Ibn Kutaiba, the historian (d. 889), says that he read the Bible; and he even made a collection of Biblical passages in a work which has been preserved by Ibn Jauzi of the twelfth century (see Haupt and Delitzsch, "Beiträge zur Assyriologie," iii. 46; Stade's "Zeitschrift," xv. 138).

The first important Arabic translation is that of Saadia Gaon (892-942). The influence of this translation was in its way as great as that of the gaon's philosophical work. It has remained to this day the version for the Jews in Arabic-speaking countries. It is dignified by the name "Targum"; and in many of the South Arabian Bible manuscripts it follows the Aramaic verse by verse, as the Aramaic follows the Hebrew. Saadia in the main takes the Targum as his guide, especially in doing away with all anthropomorphisms. His chief

**Saadia Gaon.** thought, however, is to produce a readable and intelligible translation.

In this sense his translation may be called free; he was evidently working for a general reading public, both Jewish and Mohammedan, and not for scholars. Ibn Ezra blames him for the apparent ease with which he passes over difficulties. But, in calling this translation a "tafsir" (explanation), he meant to indicate that he aimed to present the simple sense ("basit" = "peshat") of the Biblical text; and Abul-Walid looks upon him as the chief representative of this method. His fervent belief in the verbal inspiration of the Biblical text kept him free, on the one hand, from the influence of his rationalistic philosophy and, on the other, from the allegorical method of the Talmud (Editio Derenbourg, v. x.; Bacher in Winter and Wünsche, "Jüdische Litteratur," iii. 244). When no word in Arabic will exactly express his meaning, he uses the Hebrew word or adopts the Hebrew construction. In addition, he attempts to reproduce Hebrew words by Arabic words with a similar sound (Munk, in Cahen's "Bible," ix. 127). Saadia, in the introduction to the commentary on the Pentateuch, states that he translated it twice: once with a diffuse commentary; the second time without the commentary. Of the first translation only a few fragments and citations by Abraham ibn Ezra, Bahya ben Asher, Abraham Maimonides, etc., have been preserved (Derenbourg's ed. of the Pentateuch, Hebrew part, p. vii.; "Monatsschrift," xli. 205; "Jew. Quart. Rev." xii. 536). Of this work, at one time complete, only the Penta-

teuch, Isaiah, Minor Prophets, portions of Judges, Psalms, Job, Proverbs, and Daniel are now extant.

Saadia's translation was first printed in the Polyglot Pentateuch, Constantinople, 1546. It was reproduced in Arabic characters in the Paris and London Polyglots (1645-57). From time to time more or less critical editions of various portions have been published; a complete list of these editions as well as of the extant manuscripts is given by Steinschneider in the "Kaufmann Gedenkbuch," pp. 153 *et seq.* (see also "Monatsschrift," xli. 124, and Engelkemper, "De Saadia Gaonis Vita, Bibliorum Versione, etc.," Münster, 1897). A definite edition of the translation and commentaries was commenced by the late Joseph Derenbourg, "Œuvres Complètes de R. Saadia," Paris, 1893 *et seq.*, and is being carried on by Hartwig Derenbourg and Mayer Lambert; the Pentateuch, Isaiah, Proverbs, and Job have appeared (1902).

A number of other translations into Arabic must have existed. Abul-Walid mentions some of them, though it can hardly be determined to-day to which translations he refers (Bacher, "Leben und Werke des Abulwalid," p. 99). Some of them, though bearing no direct relation to that of Saadia, show evident traces of his influence. This is true at least of a translation of the Minor Prophets, Isaiah, Jeremiah, and Ezekiel, found in Codex Huntington (No. 206 in the Bodleian Library, Oxford). From this manuscript Hosea was published by R. Schröter in Merx,

"Archiv," i. 28 *et seq.* M. Peritz has edited "Zwei Alte Uebersetzungen des Buches Ruth," Berlin, 1900 ("Monatsschrift," 1899, pp. 49 *et seq.*). The second of these, from a manuscript in

the British Museum, though it shows most of the peculiarities of Saadia's translation, is not by him (see also Poznanski, in "Zeit. für Hebr. Bibl." iv. 167). Nothing is known of the fragments of the Arabic version of the Pentateuch found in the twelfth-century manuscript, St. Petersburg, Nos. 137 and 138 (Harkavy-Strack, "Catalog," p. 164). Another translation of the Five Scrolls is found in British Museum MSS., Nos. 146, 147 (Poznanski, in "Rev. Etudes Juives," xli. 302). A rimed version of the Psalms was made by one Hafz al-Kufi (tenth century), which is contained in a manuscript of the Ambrosian Library in Milan (Hammer-Purgstall in "Bibl. Ital. di Letteratura," civ. 36), copied in 1625 from a manuscript in the Escorial, which has since been lost. It is cited by Moses ibn Ezra in his "Poetics"; but it is evident that this translation was made by one who was not even, as has been supposed, a baptized Jew ("Hebr. Bibl." x. 26). Neubauer has pointed out ("Rev. Etudes Juives," xxx. 65) that it contains Christian quotations; and the term "the Goth" (*ib.* p. 318) would sufficiently indicate that the author was a Christian. A version of Ecclesiastes by Judah ibn Ghayyat has been published by J. Löwy, Leyden, 1884 (see Rahmer's "Jüdisches Litteratur-Blatt," May 29, 1884, p. 88). In the thirteenth century a translation of the Pentateuch was made by an African Jew, who also based his work on that of Saadia. It is known as the "Arabs Erpenii" ("Pent. Mosis Arabice," Lug.-Bat. MS., No. 1622). (On a supposed translation of

the Psalms by Saadia ben Levi Azankot see Steinschneider, "Cat. Bodl." col. 2227.) In modern times several Arabic translations of the Bible have been published in India; *e.g.*, by Ezekiel Shem-Tob David, Bombay, 1889, and the Apocrypha by Joseph David, Bombay, 1895.

It was natural that the Karaites should refuse to make use of the version in Arabic made by their arch-enemy, Saadia. Only two or three of their attempts to replace it have come down; and even these have been preserved in a most fragmentary form only. One of the earliest of these

**Karaite attempts** was that made by Joshua

**Versions.** b. Ari, or, to give him the name by which he is better known, Abu al-Faraj Furkan ibn Asad, a learned Jerusalem Karaite of the middle of the eleventh century. A portion of his Arabic translation of the Pentateuch is to be found in MS. Or. 2491 of the British Museum. It shows occasionally a decided rationalistic tendency, explanatory glosses being introduced here and there into the text (G. Margoliouth, in "Jew. Quart. Rev." xi. 190). Whether Japheth ha-Levi (Ibn Ali al-Basri) really translated any parts of the Bible (Margoliouth, "Descriptive List," pp. 25 *et seq.*), is undetermined; but it is known that he had the ambitious desire to write an extensive commentary upon the whole Bible (Steinschneider, "Hebr. Uebers." p. 941). According to Margoliouth ("Cat. Hebr. and Samaritan MSS. Brit. Mus." p. 71), MS. Brit. Mus. 101 (Or. 2481) contains an Arabic translation of the Pentateuch based upon that of Japheth.

The translation of Saadia, as is said above, had become a standard work in Egypt, Palestine, and Syria. But to the Samaritans it was as distasteful (Harkavy, "Hadashim," No. 7, p. 22) as it no doubt had been to the Karaites, because of the rabbinical interpretations which it represented.

**Samaritan Revision** At some time, perhaps during the thirteenth century, it was revised by of Saadia. a Samaritan with the express purpose of adapting it to the use of his coreligionists. This revision is usually held to have been made by Abu Sa'id ibn abu al-Husain ibn abu Sa'id, and has claimed the attention of European scholars such as De Sacy ("Mémoires de l'Académie," 1808, xlix. 1 *et seq.*), Gesenius ("De Pentateuchi Samaritani Origine, Indole et Auctoritate," p. 120, Halle, 1815), and Juynboll ("Commentatio de Versione Arabico-Samaritana," Amsterdam, 1846). Of it Genesis, Exodus, and Leviticus have been edited by A. Kuenen (Leyden, 1851-54; see Kohn, "Zur Sprache der Samaritaner," p. 134; Nestle, *l.c.* p. 153). Abu Sa'id was supposed to have lived about the year 1070; but Wreschner ("Samaritanische Tradition," 1888, p. xix.) has shown that he flourished in the thirteenth century. According to Joseph Bloch, "Die Samaritanisch-Arabische Pentateuch Uebersetzung," p. 16, Berlin, 1901, the real translator is perhaps the Tyrian, Abu al-Hasan, and Abu Sa'id is only a scholiast. If this be true, it was not the first translation; for one was made in the twelfth century by Šadaqa ibn Munajja of Damascus, a physician in the service of Sultan Malik al-Ashraf (Haji Khalifah, ii. 402; Neubauer, "Chronique Samaritaine," p. 112).

It is not known at what time the first translations of the Bible were made into Persian. From quotations in the "Dinkard" and the "Shikand Gumanik Viyar" (theological works of the Sassanian period), James Darmesteter has supposed that one existed in Pahlavi ("Rev. Etudes Juives," xviii. 5); but the

supposition is unsupported by any real evidence. Blau also ("Einleitung," p. 95) seems to incline to this opinion, because Bab. Meg. 18a speaks of a scroll of Esther in the Elamite and Median languages. According to Maimonides, the Pentateuch was translated into Persian many hundred years previous to Mohammed (Zunz, "G. V." 2d ed., p. 9). This statement also can not be further substantiated. The earliest version of which we have any knowledge is that made by Jacob ben Joseph Tawus, and printed in Hebrew characters in the Polyglot Pentateuch, Constantinople, 1546. This was transcribed into Persian characters and translated into Latin by Thomas Hyde, in which form it was published in the London Polyglot. Kohut ("Erläuterung der Persischen Pentateuch-Uebersetzung," 1871) places Tawus in the first half of the sixteenth century (compare also Zunz, "G. S." iii. 136). According to Steinschneider ("Jewish Literature," p. 321), Tawus made use of an earlier translation made in the thirteenth century (see Munk, in Cahen's "Bible," vol. ix.), which followed the Targum and the commentary of David Kimhi. A number of translations into Persian are to be found in the various collections of manuscript, of which the following is a partial list:

- Pentateuch: Vatican MS. 61 (Guidi, in "Rendiconti . . . dei Lincei," 1885, p. 347).  
Codex Adler B. 63, written in 1776 ("Jew. Quart. Rev." x. 596).  
Codex St. Petersburg 141 (not by Tawus; Harkavy-Strack, "Cat." p. 166).  
Psalms: Vatican MS. 37; Bodleian MS. 1830.  
Vatican MS. 42; Bodleian MS. 1827 (Jewish? Horn, in "Z. D. M. G." li. 7).  
Codex Adler B. 27 ("Jew. Quart. Rev." x. 592).  
Brit. Mus. MSS. 159, 160 (transl. about 1470 by Baba b. Muriel of Ispahan; Margoliouth, "Cat. of Hebr. and Samaritan MSS. Brit. Mus." p. 120).  
Brit. Mus. MS. Or. 4729 (dated 1822; "Jew. Quart. Rev." vii. 119).  
Proverbs, Canticles, Ruth, Ecclesiastes: Paris MS. 116 ("Cat. des MSS. Hébr. de la Bibl. Nat.").  
Proverbs, Canticles, Ecclesiastes: Codex Adler B. 46 ("Jew. Quart. Rev." x. 595).  
Paris MS. 117 ("Cat. des MSS. Hébr. de la Bibl. Nat.").  
Proverbs: On a translation now lost, see Lagarde, "Synnicta," ii. 14.  
Job and Lamentations: Codex de Rossi 1003 (Zunz, "G. S." iii. 135).  
Paris MS. 118 ("Cat. des MSS. Hébreux de la Bibl. Nat.").  
Job: Codex St. Petersburg 142 (Harkavy-Strack, p. 167).  
Paris MSS. 120, 121 ("Catalogue," etc.).  
Song of Songs: Codex Adler B. 12 ("Jew. Quart. Rev." x. 589).  
Daniel: Paris MSS. 128, 129 ("Catalogue," etc.).  
Esther: Codex Adler T. 16 and 27 ("Jew. Quart. Rev." x. 598, 599).  
Paris MS. 127 ("Catalogue," etc.).  
Tobit, Judith, Bel and Dragon, Antiochus: Codex Bodleian 130.  
Minor Prophets: Codex St. Petersburg 139 and Codex B. 18 (Harkavy-Strack, pp. 165, 262).  
Haffarot: Codex St. Petersburg 140 (Harkavy-Strack, p. 166).

There are also some quite modern translations into Persian, as **ס. הלהים עם תרגום פריס**. Vienna, 1883 (transl. by Benjamin Cohen of Bokhara; see "Lit.-Blatt für Or. Phil." i. 186); **משלי עם תרגום**

יהודית פארסי יהודית, Jerusalem, 1885; Job, *ib.*; the latter two also translated by Benjamin Cohen.

For the use of the Karaites in the Crimea and Turkey, a translation has been made into the Tshagatai-Tatar dialect. The Pentateuch was printed (text and Tshagatai in Hebrew characters) by 'Irab Ozlu & Sons, Constantinople, 1836, with the title **ספר בראשית עם פרוש המלות בלשון ישמעאל וכו**; on the margin are the **מנחם המצות**; and

**Tatar Versions.** acrostic poems are added by Abraham ben Samuel, Sindhah ben Joseph **אנני** (Chages?), Isaac Cohen, and Isaac ben Samuel Cohen of Jerusalem. The whole Bible was printed in Tshagatai by Mordecai Trishkin (4 vols., Goslov, 1841-42; see "Jew. Quart. Rev." xii. 686). Extracts are also to be found in the **זכר הרב** of Musafia, printed at Ortaköi (Constantinople), 1825, and published by the same firm that edited the Pentateuch of 1836 ("Jew. Quart. Rev." xiii. 549). Manuscripts of such translations exist also in the Imperial Library at St. Petersburg (Nos. 143-146; Harkavy-Strack, "Cat." pp. 167-170).

Talmud tradition expressly speaks of a Coptic translation of the Bible (Meg. 18a; Shabbat 115a). Cornill, in his examination of the Coptic text of

Ezekiel, finds the one published by **Coptic and Hungarian.** Tattam to be of composite character and not simply a translation of the Septuagint. Blau believes that it was made directly from the Hebrew text ("Einleitung," p. 91; "Jew. Quart. Rev." ix. 728).

No Jewish translation into Hungarian was made until quite recently, the Jews of Hungary making use of the Catholic and Protestant versions of the sixteenth and seventeenth centuries. About the middle of the nineteenth century M. Bloch (Ballaghi) attempted such a rendering; but he was not successful. His plan has recently (1902) been carried out; and the Pentateuch (by M. Bernstein and M. Blau), Joshua, Judges, Samuel, and Kings (by Julius Fischer, Bánóczy, Bacher, and Krauss) have appeared (see "Rev. Etudes Juives," xliii. 158).

The translation of the Bible into the German dialect spoken by the Jews of middle Europe was commenced at an early date. A manuscript in the collection of De Rossi, dated Mantua, 1421, contains a Judæo-German translation of Joshua, Judges, Jonah, and four of the Megillot. De Rossi

**Judæo-German.** supposed them to be written in Polish because they were brought to Italy by Polish Jews (Neubauer, in "Jew. Quart. Rev." iv. 703). Such translations were technically known as "Deutsch-Hummash." A printer had innocently placed the words **צנינה ורנינה** (Cant. iii. 11) on the title-page of such a translation made by Jacob ben Isaac of Janow (Lublin, 17th century?), from which they became familiarly called "Ze'enah U-re'annah"; and down to the time of Mendelssohn's translation they were popular reading-books, especially for women on Saturdays. They were embellished with all manner of explanations, legends, and moral sayings, which were inserted into the text (Steinschneider, "Volksliteratur der Juden," p. 17). The first rendering of this kind was made by a convert, Michael Adam, the translator of Yosippon into Judæo-German. It was published by Paulus

Fagius, Constance, 1543-44 (Steinschneider, "Cat. Bodl." Nos. 1187, 4333; Perles, in "Monatsschrift," xxv. 361; *ib.* "Aramäische Studien," p. 167; "Rev. Etudes Juives," v. 143, 315), and was reprinted at Basel in 1583 and 1607. It has nothing in common with Luther's translation, as Wolf ("Bibl. Hebr." iv. 198) supposes. This Pentateuch was reprinted at Cremona, 1560 (ed. Judah ben Moses Naphtali); Basel, 1583; *ib.* 1603; Prague, 1608, 1610; Frankfurt-on-the-Main, 1687. A rimed version of it appeared at Fürth, 1692, and Wilmersdorf, 1718; and a second rimed version of Genesis was made by a certain Aaron of Prague during the seventeenth century. In 1543-44 Paulus Emilius published a similar translation of the Pentateuch (Augsburg, 1544). It is uncertain whether Emilius simply copied the edition of Adam or not (Steinschneider, in "Zeit. für Gesch. der Juden in Deutschland," i. 286). Emilius also edited at Ingolstadt (1562) the Judæo-German rimed translation of Samuel in German characters. This was a mere copy of the edition in Hebrew characters by Hayyim ben David Schwartz, Augsburg, 1544 (*ib.* i. 285). It was called the **שמואל בוך** ("Samuel Book"). This was reprinted at Mantua about 1562; Cracow, 1593; Prague, 1609; Basel, 1612. Schwartz also published a rimed translation of Kings, **דש ספר מלכים אין טוייטער שפראך** (Augsburg, 1543; Prague, 1607). A translation of Judges (rimed) appeared at Mantua in 1561; one of Joshua, "derneut in teutscher Sprach, wol gereimt . . . hübsch mit Midraschim," at Cracow in 1588 or 1594; one of Canticles, by Isaac Sulkes, at Cracow in 1579; another by Moses Särtels, Prague, 1604; one of Jeremiah, *ib.* 1602; one of Ezekiel (rimed), *ib.* 1602; and one of Jonah, "**ספר יונה** mit viel **הרושים** und alle Midraschim" (rimed), Prague, before 1686.

The first Judæo-German translation of the Psalms was that of Elijah Levita (Venice, 1545; Zurich, 1558, etc.); it was arranged in the order of the psalms said on each day of the week. A rimed **ההלים בוך** by Moses Stendal appeared at Cracow in 1586. Proverbs was translated by Mordecai ben (Isaac) Jacob Töplitz, Cracow, 1582 (a version also appeared at Amsterdam, 1735); and Job by the same (?), Prague, 1597. A translation of Kings appeared at Cracow in 1583 (Neubauer, in "Rev. Etudes Juives," v. 144); one of Esther, *ib.* 1596; and one of Daniel, "**רניאל בוך** in teutscher Sprach hübsch und bescheidlich, gar kurzweilig darin zu leien Weiber und Meidlich," Cracow, 1588. These editions of Cracow came from the press of Isaac ben Aaron Prossnitz, whose intention it was to publish the whole Bible in Judæo-German in order that "women and children might be able to read without the help of a teacher" (Perles, in "Monatsschrift," xxv. 353).

The first complete Bible in Judæo-German was that of Isaac Blitz, Amsterdam, 1676-78. It was for the use of the Polish Jews who had fled thither

a few years previously because of the Isaac Blitz's Bible. Chmielnicki persecutions. It must have been the intention of the translator to push its sale in Poland also; for letters patent were granted for it by John Sobieski III. This translation exercised very little influence, as the Judæo-German in which it

was written contained many Dutch words and expressions (Wiener, "Yiddish Literature," p. 19). A second translation, in opposition to that of Blitz, was published in Amsterdam in 1679 by Joseph Witzenhause, formerly a compositor in the employ of Uri Phoebus, the printer of the former edition. Witzenhause was able to secure the approbation of the Council of the Four Lands, and his attempt to make the Athias edition supersede that of Phoebus occasioned much bad blood (see Joseph ATHIAS). A second edition of this last translation was published at Amsterdam in 1687, and a third, in German characters, at Wandsbeck in 1711. A third translation, by Süßman Rödelheim and Menahem Man Levi, under the title *מניני מנה*, appeared at Amsterdam in 1725-29. At the same place in 1735 there was published an edition of Proverbs ("Cat. Rosenthal. Bibl." i. 207). It was more than one hundred years before another complete German translation was published, namely, at Prague, 1833-37; but this was of a composite character, as its editor, W. Meyer, made use of various translations (in general, compare Grünbaum, "Jüdisch-Deutsche Chrestomathie," Leipsic, 1882).

The growing acquaintance of the Jews with German literature soon produced a marked discontent with these Judæo-German translations. This discontent was voiced by the rabbis of Berlin, Mecklenburg, and Courland (Zunz, "G. V." 2d ed., p. 467). To meet this want Mendelssohn stepped into the

**German  
Transla-  
tion—  
Mendels-  
sohn.**

breach; and his translation of the Pentateuch is worthy of more than a passing notice. It had a special importance in that it not only aroused an esthetic interest in literature on the part of those who read it, but also paved the way for a more general use of High German among the Jews of Germany, among whom it may be said to have introduced a new literary era (Kayserling, "Moses Mendelssohn," p. 286; "Literaturblatt des Orients," 1840, p. 320; Auerbach, in "Zeitschrift für Gesch. der Juden in Deutschland," i. 25; Wogue, "Hist. de la Bible et de l'Exégèse," p. 329). Mendelssohn undertook the work for the instruction of his own children; but upon the advice of Solomon Dubno, consented to its publication on condition that Dubno should write a commentary explaining the reason why Mendelssohn chose his various renderings. A specimen, "Allim Litrafah," was edited by Dubno (Amsterdam, 1778), and aroused the liveliest interest on the part of Christians as well as of Jews. It was natural that it should also evoke strenuous opposition, especially on the part of those Jews who feared that the reading of High German would cause the Jewish youth to neglect their Hebrew studies. Foremost in this opposition were the rabbis Ezekiel Landau (d. 1793) of Prague, Raphael ha-Kohen (1722-1803), of Hamburg, Altona, and Wandsbeck, Hirsch Janow (1750-85) of Fürth, and Phineas Levi Horwitz (1740-1803) of Frankfurt-on-the-Main.

In June, 1799, the proposed translation was put under the ban at Fürth. It was also forbidden in some cities of Poland, and is said even to have been publicly burned. An additional ban was laid upon it by Raphael ha-Kohen (July 17, 1781; see Grätz,

"Gesch. der Juden," xi. 585, note 1). Work on it was, however, continued with the assistance of Solomon Dubno, Hertz Homberg, and Aaron Jaroslav. Dubno became frightened at the continued opposition, and retired, forcing Mendelssohn himself to do an additional share of the work. Though the translation was in High German, it was printed in Hebrew characters under the title *ס' נתיבות השלום*, with a Hebrew commentary or "biur," the commentaries of Rashi, etc., and an introduction by Naphtali Hertz Wessely. It appeared in parts—Genesis, Berlin, 1780; Exodus, *ib.* 1781; Leviticus, *ib.* 1782; Numbers and Deuteronomy, *ib.* 1783—and has often been republished both in German and in Hebrew characters.

An attempt was made in Mendelssohn's time to issue an edition in German characters; but the German Jews at that time looked upon the work as so exceptionally strange that its publication had to be suspended (Bernfeld, "Juden im 19. Jahrhundert," p. 9). Mendelssohn also published (Berlin, 1783) a translation of the Psalms (which, however, follows closely that of Luthier; "Literaturblatt des Orients," 1840, p. 320) and one of the Song of Solomon (*ib.* 1788). These translations attempted a conscientious reproduction of the text, and sought to make the pathos of the original felt in the German; and they were followed by a large school of translators (see BURUS). C. E. J. Busen ("Vollständiges Bibelwerk," I. xvii.) calls these and similar translations "Synagogenbibeln." He says "they do not speak in the historical German language, but in the Hebræo-rabbinical Judæo-German"; a verdict which is wholly one-sided, if one excepts the proper names, where an attempt was made to reproduce the Hebrew originals ("Monatsschrift," ix. 156).

Only a few of Mendelssohn's followers can be mentioned here. His translation of the Song of Solomon was published after his death by Joel Löwe and Aaron Wolfson. The first of these also published a translation of Jonah (Berlin, 1788); while the second translated Lamentations, Esther, and Ruth (Berlin, 1788), Job (*ib.* 1788; Prague, 1791; Vienna, 1806), and Kings (Breslau, 1809). Isaac Enchel translated Proverbs (Berlin, 1790; Dessau, 1804), introducing, however, philosophical expressions into the text, thereby often clouding the meaning. David Friedländer, who translated Ecclesiastes (in German characters, Berlin, 1788), wrote in a beltristic style. Meir Obornik translated Joshua, Judges, and Samuel, and, together with Samuel Detmold, the Second Book of Samuel (המנחה הרשעה), Vienna, 1792). M. Philippson, Joseph Wolf, Gotthold Salomon, Israel Neumann, and J. Löwe were the translators of the Minor Prophets published in Dessau, 1805, under the title *מנחה טהורה* (stereotyped as early as 1837). Wolf also published a translation of Daniel (Dessau, 1808); David Ottensosser one of Job (Offenbach, 1807), Isaiah (Fürth, 1807), and Lamentations (*ib.* 1811), and together with S. J. Kohn, of Jeremiah (*ib.* 1810). A translation of Isaiah, Jeremiah, Ezekiel, Daniel, Ezra, Nehemiah, and Chronicles by Ottensosser, Kohn, and Schwabacher appeared at Fürth, 1807-23. Isaiah was also translated by Isaiah Hochstetter (Winter and Wünsche, "Die Jüdische Litteratur," iii. 744), Jere-

mial by Heinemann (Berlin, 1842). Job by Beer Blumenfeld (Vienna, 1826), and Psalms by Shalom Kohn (Hamburg, 1827). The period of the Mendelssohnian biirists may be fittingly said to end with the Bible published by Moses Landau (20 parts, Prague, 1833-37, mentioned above. Of this work the translations of the Pentateuch, Psalms, and Five Scrolls were those of Mendelssohn; the translations of the other books were contributed by Moses Landau, J. Weisse, S. Sachs, A. Benisch, and W. Mayer; and the Minor Prophets were reprinted from the edition of Dessau, 1805 (Steinsehneider, "Cat. Bodl." No. 972). It may also be added here that an edition of Proverbs, Job, and the Five Scrolls, with translations by Obernik, Euehel, Wolfson, Mendelssohn, and Friedländer, had already appeared at Vienna in 1817-18; and in Hebrew characters at Basel in 1822-27.

The translation of Mendelssohn threatened to become canonical: but the German Jews had tasted of modern learning; and toward the latter end of the first half of the nineteenth century various individual attempts were made to provide better translations for the general public, which should reflect the progress then already made in Biblical science. The first in the field was

**Other  
German  
Versions.**

Joseph Johlson (Asher ben Joseph of Fulda), whose attempt, though worthy of notice here, was not successful, notwithstanding the fact that the text was accompanied by learned philological notes (Minor Prophets, Carlsruhe, 1827; Pentateuch, *ib.* 1831; the historical books, *ib.* 1836). Bunsen (*l.c.* p. xvii.) even declares his work to be "geistreich und scharfsinnig" (compare Geiger's "Zeitschrift," 1836, p. 442; 1837, p. 121). Mention may also be made of A. A. Wolff's double translation (word for word and metrical) of Habakkuk; Phebus Philippsohn's "Hosea, Joel, Jonah, Obadiah und Nahum in Metrisch-Deutscher Uebersetzung." Halle, 1827; A. Rebenstein's (Bernstein's) sentimental translation of the Song of Solomon (Berlin, 1834; compare "Literaturblatt des Orients," 1840, p. 324); S. H. Auerbach's Ecclesiastes (Breslau, 1837), into which he reads his own philosophy; and Michael Sachs's Psalms (Berlin, 1835). The last was a clear protest against previous attempts, which reflected too much the individuality of the translators. Sachs tried to give "a purely scientific and philological" rendering of the original, taking Rückert as his guide, whose translation of Ps. lxxviii. he inserted bodily (see Zunz, in Geiger's "Wiss. Zeit. Jüd. Theol." ii. 499, and in "G. S." iii. 116, who characterizes the work as "somewhat stiff and awkward"). It was reprinted in the edition of the Prophets and the Hagiographa פְּרָשׁוֹת מִסִּילָה. Fürth, 1842-47 (Zedner, "Cat. Hebr. Books Brit. Mus." p. 119), and was revised for Zunz's Bible ("Monatschrift," xxxviii. 507). This protest was carried to excess by Gotthold Salomon, who, in addition to his work on the Dessau edition of the Minor Prophets (see above), translated the Pentateuch (Krotoschin, 1848-49; see the criticism of Hess in "Allg. Zeit. des Jud." 1839, p. 80, and of L. Skreinka in "Literaturblatt des Orients," 1840, pp. 468 *et seq.*). The translations of Job (Glogau, 1836) and of the Pentateuch (*ib.* 1840) by Heimann Arnheim, though in

Hebrew characters and intended chiefly for use as part of the ritual, show good judgment and philological schooling ("Literaturblatt des Orients," 1840, p. 641). Only a mere mention can be made of L. Herzberg's Ecclesiastes (Brunswick, 1838; see Zunz, in Jost's "Annalen," 1839, p. 102) and of L. H. Löwenstein's metrical translation of Proverbs and Lamentations (Frankfort-on-the-Main, 1837-38). Gotthold Salomon's "Deutsche Volks- und Schul-Bibel" (Altona, 1837) was the first translation of the entire Old Testament in German characters made by a Jew. It was stereotyped and was intended to be sold so cheaply that every one could afford to buy it (see the correspondence in Jost's "Annalen," 1839, Nos. 12 *et seq.*).

More important was the attempt made by L. Zunz to provide a Bible for school and home. As editor, he translated only the books of Chronicles, the rest of the work being done by H. Arnheim, Julius Fürst, and M. Sachs (Berlin, 1838). Zunz succeeded in a large measure in producing a translation which, while it kept strictly to the Masoretic text, was abreast of the scholarship of his day and free from the circumlocutions and idiotisms of previous translators, though it still preserved the transliteration of the Hebrew names (Nestle, "Bibel-Uebersetzungen," p. 142). Mendelssohn had translated neither Prophets nor Hagiographa; and it is therefore no wonder that the Zunz Bible passed through at least six editions up to 1855 and twelve up to 1889 (see Rosin, in "Monatschrift," xxxviii. 512). Only a few years later another popular translation was produced by Solomon Herxheimer (Berlin, 1841-48; 3d ed. of the Pentateuch, 1865), to which an explanatory and homiletic commentary was added. Though evidently meant to take the place of Mendelssohn's biur, Herxheimer expressly states that his work was done "for Jews and Christians" (Jost's "Annalen," 1839, pp. 312 *et seq.*; "Literaturblatt des Orients," 1840, p. 513).

A still more ambitious attempt was that of Ludwig Philippson. He translated the text anew, aiming to include the latest assured results of criticism and to produce what in every sense might be called a family Bible. For this reason for the first time illustrations were added, together with introductions and an extensive commentary intended for the intelligent layman. This work occupied Philippson for eighteen years, and was published at Leipsic, 1839-56; 2d ed., 1858-59; 3d ed., 1862. His translation was then published, together with the Doré illustrations, by the Israelitische Bibel-Anstalt, revised by W. Landau and S. I. Kämpf (Stuttgart, 1875). Of this translation separate editions of the Pentateuch, the Psalms, and of the Pentateuch together with Isaiah, were published (see M. Philippson, in "Rev. Etudes Juives," xlii. 30). But even the slight concessions made in these translations to the modern exegetical spirit gave offense in some quarters; a rival Bible-house, the Orthodoxe Israelitische Bibel-Anstalt, was established, which, on the basis of J. Z. Mecklenburg's "Ha-Ketab we-ha-Kabbalah" (Leipsic, 1839), produced a translation of the Bible strictly on the lines of Jewish traditional exegesis (*ib.* 1865). The Pentateuch translation by

J. Kosmann (Königsberg, 1847-52) had a similar end in view. Still further in this direction, and in evident protest against modern Christian radical exegesis, which he entirely ignores, went Samuel Raphael Hirsch. In his translation of the Pentateuch (Frankfort-on-the-Main, 1867; 3d ed., 1899) and of the Psalms (1882), as well as in the translation of the Minor Prophets by his son, M. Hirsch (*ib.* 1900), a return is seen to the "derash," from which the whole school of Mendelssohn and his followers had tried to free themselves (see "Zeit. für Heb. Bibl." v. 78). Of L. J. Mandelstamm's "Die Bibel Neu Uebersetzt," partly with the assistance of M. Kirchstein, only Genesis and the Song of Solomon seem to have appeared (Berlin, 1862-64). In 1901 a new translation by S. Bernfeld was commenced. It keeps strictly to the Masorah and preserves the Hebrew form of the proper names.

During all this time many translations of individual books appeared, of which the following is a partial list, cited under the names of their respective authors:

- Israel ben Abraham, Job, in Hebrew characters, Prague, 1791.  
 Shalom Kohn, Psalms, Hamburg, 1827.  
 Mendel Stern, Proverbs, in Hebrew characters, Presburg, 1853.  
 J. Wolfson, "Das Buch Hiob. . . Neu Uebersetzt. . ." Breslau-Leipsic, 1843.  
 E. J. Bücher, "Ruth, mit Deutscher Uebersetzung," Lemberg, 1843.  
 M. Löwenthal, "אֵיבֹב . . . Nebst Uebersetzung . . ." Frankfort-on-the-Main, 1846.  
 "Das Hobe Lied . . . Neue Deutsche Uebersetzung," Vienna, 1847.  
 Samuel Aschkenazi, 'ס בראה הלכנון (Song of Solomon, in Hebrew characters), Presburg, 1847.  
 הרנוכס רבי רב (A new translation of the Pentateuch, in Hebrew characters), Königsberg, 1856.  
 "Odiosus," "Das Buch Ijob im Engeren Anschluss an den Mass. Urtext" (see "Hebr. Bibl." vi. 101).  
 S. Horwitz, "Das Hohe-Lied, das Aelteste Dramatische Gedicht," Vienna, 1863 (see *ib.* vi. 62).  
 Adolph Brecher, "Die Psalmen Nebst Uebersetzung," Vienna, 1864.  
 Israel Schwarz, "Tikvat Enosh" (Job, in German characters), Berlin, 1868.  
 SINGER, Maleachi, 1868.  
 Benjamin Holländer, Das Hohelied, Budapest, 1871.  
 Hermann Tietz, Das Hohelied, 1871.  
 M. Levin, 'ס קהלת (with Judeo-German translation), Odessa, 1873.  
 H. Grätz, "Krit. Commentar zu den Psalmen, Nebst . . . Uebersetzung," Breslau, 1882 (compare his Kohelet, 1871, and Song of Songs, 1871).  
 S. I. Kämpf, Das Hohelied, Prague, 1877; 3d ed., 1884.  
 K. Kohler, Das Hohelied, Chicago, 1878.  
 Hermann Tietz, "Das Buch der Elegie Metrisch Uebersetzt," Serrim, 1881.  
 J. Landsberger, Das Buch Hiob, Darmstadt, 1882.  
 D. Leimdörfer, "Kobelet . . . Nebst Uebersetzung," Hamburg, 1892.  
 Herman Rosenthal, "Worte des Sammlers (Kohélet) . . . in Deutsche Reime Gebracht," New York, 1885; 2d ed., 1893. *Idem*, "Das Lied der Lieder, in Neue Deutsche Reime Gebracht," New York, 1893.  
 M. Jastrow, "Der Neunzigste Psalm; Uebersetzt," Leipsic, 1893.  
 Salomon Plessner (transl. of Nahum, in his "Biblisches und Rabbinisches," pp. 29 *et seq.*), Frankfort-on-the-Main, 1897.

It was not before the forties of the nineteenth century that the desire made itself really felt among the English Jews for a Bible translation of their own in the vernacular, though David Levi had in 1787 (London) produced an English version of the Pentateuch (Steinschneider, "Cat. Bodl." No. 926). Wherever an English Bible was needed by them,

they had freely used the King James Version; as is seen in the Pentateuch (including Haftarat and Scrolls) which was published in London, 1824, under the title תקן סופרים. But the impropriety of the use of this version, with its Christian headings and its Messianic interpretations, did in the end impress

#### English Trans- lation.

itself upon the English Jews (see, for example, S. Bennett, "Critical Remarks on the Authorized Version," London, 1834; Seelig Newman, "Emendations of the Authorized Version of the O. T." London, 1839; Benjamin Marcus, "מקור חיים (Fountain of Life): Mistranslations and Difficult Passages of the O. T. Corrected and Explained," Dublin, 1854).

The veneration for this masterpiece of English literature had impressed itself upon the Jews also. When the Revised Version was published (May 17, 1881) it was eagerly seized upon as being much more suitable for Jewish readers, since in it the headings had been removed and the Christology of many passages toned down. The Revised Version is used as a basis for such books as C. G. Montefiore's "Bible for Home Reading," London, 1896, 1901. That the revision is not complete from the Jewish point of view can be seen from the leaflet issued by the Jewish Religious Education Board, "Appendix to the Revised Version" (London, 1896), which sets forth the "alterations deemed necessary with a view to placing the Revised Version in the hands of members of the Jewish faith." These alterations were limited to the following sets of cases: viz., "where the R. V. departs from the Masoretic text," and "where the R. V. is opposed to Jewish traditional interpretation or dogmatic teaching." Isa. lii. 13-14, 12 is there reprinted in full.

The first to attempt to produce an independent Jewish translation was D. A. de Sola of London, who in 1840 issued a "Prospectus of a New Edition of the Sacred Scriptures, with Notes Critical and Explanatory." Morris J. Raphall and J. L. Lindenthal were associated with him in the work. Only one volume, Genesis, appeared (London, 1841; 2d ed., 1843). Of a similar attempt by S. Bennett, "The Hebrew and English Holy Bible," only Gen. i.-xli. appeared (1841); though in the same year Francis Barham published "The Hebrew and English Holy Bible," which contained Bennett's revision of the English and a revision of the Hebrew by H. A. Henry. Another translation was published by A. Benisch, "Jewish School and Family Bible" (1851-56); and still another by M. Friedländer, "כתבי הקודש. The Jewish Family Bible" (1884). This last has had the sanction of the chief rabbi of the British Jews. A. Elzas has published translations of Proverbs (Leeds and London, 1871), Job (1872), Hosea and Joel (1873), in an attempt "to put the English reader, at least in some degree, in the position of one able to read the Hebrew text." None of these versions, however, can be said to have replaced either the Authorized or the Revised Version in the esteem of the Jewish Bible-reading public.

In the United States the same feeling as in England had been engendered against the headings of the Authorized Version. Isaac Leeser attempted to rectify this and at the same time so to translate

the Bible as to make it represent the best results of modern study. The Prophets, Psalms, and Job are practically new versions. In the

**The United States.** very closely followed; and though in most cases the changes Leeser made bring the translation nearer to the

Masoretic text, the beauty of the English was often sacrificed. A quarto edition was published in 1854, and a duodecimo edition in 1856. Despite its insufficiencies, the smaller edition has had a wide circulation, due especially to the development of Jewish religious school instruction in the United States. The inadequacy of Leeser's translation has, however, been felt; and the Jewish Publication Society of America in 1898 took in hand the preparation of a complete revision. This is now (1902) being made by a number of scholars, with M. Jastrow, Sr., as editor-in-chief, and K. Kohler and F. de Sola Mendes as associate editors (see Reports of the Jewish Publication Society of America, 1898 *et seq.*).

Nowhere in Europe is the history of the translation of the Bible into the vernacular so interesting as it is in Spain. Translations were here made as early as the thirteenth century, despite the fact that

**Spanish Versions.** in 1234 Jaime I., by means of secular legislation, prohibited their use (Lea, "History of the Inquisition in the Middle Ages," i. 324). As Berger has

shown, the earliest Castilian renderings, even when made by Christians, stand much closer to the Hebrew original than do those of any other country. This seems to have been due to the early and intense influence of the Jews in the peninsula and to the Oriental coloring of its whole culture. This similarity is seen even in the outward form. The Spanish translations follow the Hebrew division of the Bible into three great parts; and it is significant that the first polyglot (Complutensian) saw the light of day in Spain. In the production of these translations both Jews and converts took a laudable part. One of the earliest of such Castilian translations is found in the Aragonese MS. i. j. 8 in the Escorial Library, Madrid. The Psalms in this manuscript are distinctly said to be the translation "que fizo Herman el Aleman, segund euemo esta en el ebraygo." Herman must undoubtedly have known Hebrew, though Berger thinks that he made use of Jerome's "Psalterium Hebraicum" and not of the "Psalterium Gallicum." This Herman the German is the well-known Latin translator of Aristotle, and lived between 1240 and 1256.

In the fifteenth century several revisions of these older translations were made, but always according to the Hebrew text. Such a revision is represented by MSS. i. j. 5 and i. j. 3 in the Escorial and MS. cxxiv. 1, 2 (dated 1429) in the Library of Evora. In a number of places these translations ostentatiously follow the Hebrew original and run counter to the usual Church tradition. MS. i. j. 3 of the Escorial is richly illuminated with miniatures, which may perhaps have been the work of Hebrew miniaturists. In this manuscript not only is the order of the books in the Canon the same as in the Hebrew, but the Pentateuch is divided into sections which agree with

the parashiyot and sedarim. The proper names also follow the Hebrew and not the ordinary Latin version. Berger thinks that this manuscript may be the work of the baptized Jew, Juan Alfonso de Buena, who was in the service of Jaime II. (1416-54). An additional interest attaches to these revisions, as they formed the basis for the Spanish of the Constantinople Pentateuch of 1547 and for the Ferrara Bible; the Ferrara Bible, in its turn, was the basis for the Protestant Bible translation by Cassiodoro de Reina (1569); for the revision by Cyprian de Valera (1602), the "Psalterio de David Conforme a la Verdad Hebraica" (Lyons, 1550), and the Psalter of Juan Perez (Venice, 1557; see Samuel Berger, in "Romania," xxviii.).

A still further revision, again upon the basis of the Hebrew, was made by Rabbi Moses ARRAGEL (1430) for Don Luis de Guzman, master of the Order of Calatrava. According to Berger, this revision was made on MS. Escorial i. j. 3. It is provided with a commentary, and profusely illustrated, perhaps by Jewish artists. A manuscript of the Prophets, in two languages, in the library of the Academy of History in Lisbon follows Arragel's translation so closely that it may possibly represent the first attempt of Arragel.

This Castilian translation (or revision) was carried by the Spanish exiles into Italy and Turkey. It also became the Bible of the Spanish Jews in the Netherlands. It appears first in Hebrew characters in the Polyglot Pentateuch (Hebrew, Onkelos, Rashi, Neo-Greek, and Spanish), published at Constantinople by Eliezer Bekor Gerson Soncino (see Belleli, in "Rev. Etudes Juives," xxii. 250; Grünbaum, "Jüd.-Span. Chrestomathie," p. 6). The Neo-Greek represents a different translation from that of the Spanish. From this polyglot it found its way into the celebrated Ferrara Bible of 1553, which bears the title "Biblia en Lengua Española, Traduzida Palabra por Palabra de la Verdad Hebrayca por Muy Excelentes Letrados, Vista y Examinada por el Oficio de la Inquisicion. Con Privilegio del Ylustrissimo Señor Duque de Ferrara." Two editions seem to have been published: one, for Jews, signed by Abraham Usque; the other, for Christians, signed by Jerome of Vargas (De los Rios, "Juifs d'Espagne," p. 432).

De los Rios (*l.c.* p. 436) thinks that the author of "Retratos o Tablas de las Historias del Testamento Viejo," Lyons, 1543, a popular exposition of the Bible, was a Marano; but this does not seem to have been proved.

The Ferrara Bible of 1553 became the basis for the Spanish and Ladino translations which were published at Salonica and Amsterdam. This is seen also in the title, which usually runs "Biblia en Lengua Española, Traduzida Palabra por Palabra de la Verdad Hebrayca." This is also true of the "חלק השלישי מהארבעה ועשרים נביאים אחרנים" etc., published by Joseph b. Isaac b. Joseph Jabez in 1568, as Kayserling (*l.c.* p. 28) has clearly shown. In Amsterdam the translation remained substantially the same, though it was often revised ("reformada"): 1611; 1630 and 1646, Gillis Joost; corrected by Samuel de Caeres and printed by Joseph Athias (1661);

corrected by Isaac de Abraham Dias and printed by David Fernandes (1726): "con las anotaciones de Or Torah," Proops, 1762. This translation also appeared in Venice, 1730; Constantinople, 1739-43; *idem*, 1745; Vienna (ed. by Israel Bahor Haim and Aaron Pollak), 1813-16; and Smyrna, 1838. A Ladino translation, in Rashi script, was published at Vienna, 1841 (2d ed., 1853), by W. S. Schaufler for the American Bible Society (see Twenty-sixth Annual Report of the society, 1842, p. 120). According to Grünbaum, it bears many points of resemblance to the Pentateuch of 1547 and to the Ferrara Bible.

Various portions of this translation appeared separately, an edition of the Pentateuch appearing in the same year (1533) and at Ferrara. To this may be added the following:

"Humas de Parasioth y Aftharoth," ed. Manasseh ben Israel, Amsterdam, 1627; ed. Ymanuel Benveniste, *ib.*, 1643; another edition was published by Manasseh himself, *ib.*, 1655 (though he says of it, "Obra nueva y de mucha utilidad"); "Parafraſis Comentada sobre el Pentateuco," ed. Isaac da Fonseca Aboab, *ib.*, 1681; "cinco Libros de la Ley Divina . . . de Nuevo Corridos," by David Tartas, *ib.*, 1691; "Los Cinco Libros . . . Interpretados en Lengua Española," ed. Joseph Franco Serrano, *ib.*, 1695; 1705 and 1724 (Isaac de Cordova); "Cinco Libros," corrected by David de Elisha Pereyra, *ib.*, 1733; "El Libro de la Ley," published in Constantinople in 1873, is, according to Grünbaum (*l.c.*, 12), a different translation.

The Psalms were reprinted: Ferrara, 1533; Salonica, 1582; Amsterdam, 1628, 1730; Vienna, 1822; Constantinople, 1836. Several other translations of the Psalms were produced during the seventeenth and eighteenth centuries. David Abenatar Melo, a Marano who escaped the Inquisition at Madrid and became a Jew again in 1611, published in 1626 ("En Franquaforte") "Los CL Psalmos de David, en Lengua Española, en Varias Rimas." In these Psalms he has inserted, when appropriate, an account of his own and his people's sufferings (*De los Rios*, *l.c.*, pp. 468 *et seq.*; Kayserling, "Bibl. Esp.-Port.-Jud.," pp. 67, 68). A prose translation was made by Ephraim Bueno and Jonah Abravanel (Amsterdam, 1650; 2d edition, 1723; see *De los Rios*, *l.c.*, p. 498). A third translation was made by Jacob Judah Leon Templo (קרטש הללוים), "Las Alabanzas de Santidad," Amsterdam, 1671—a verbatim prose translation of the original (*De los Rios*, *l.c.*, p. 570; Kayserling, *l.c.*, p. 58).

Of all the Biblical books, Canticles was most frequently reprinted. A translation was published in Hamburg, 1631, by David Cohen Carlos "de lengua Caldayca"; but the favorite rendering was that of Abraham de Isaac Lañado, published in Hebrew characters at Venice, 1619, 1654, 1655, 1672, 1716, 1721, 1739, 1805; Leghorn, 1769, 1787; Vienna, 1820. The Venice edition was published in Roman characters by Moses Belmonte, Amsterdam, 1644, and was reprinted at Amsterdam, 1664, 1683, 1701, 1712, 1724, and 1766. An edition of the Megillot appeared at Constantinople in 1813 (see Kayserling, *l.c.*, p. 30); a Megillah in Spanish, dating from the early part of the eighteenth century, exists in the British Museum ("Jewish Chron." March 21, 1902, p. 24); but the provenience of the translation is unknown (on such Megillot see Abrahams, "Jewish Life in the Middle Ages," p. 345). A Portuguese translation of the Psalms, under the title "Espejo

Fiel de Vidas," by Daniel Israel Lopez Laguna, appeared in London, 1720 (Kayserling, *l.c.*, p. 55).

Both Zunz ("G. V." 2d ed., p. 457) and Güdemann ("Erziehungswesen in Italien," p. 206) refer to early translations of the Bible into Italian; the latter even speaks of their existence in the thirteenth and fourteenth centuries. Steinschneider has shown ("Monatsschrift," xlii, 117) that this is an error. It is true that some of the authorities (such as Zedekiah ben Abraham and Isaiab de Trani, the younger) laid stress upon the necessity of translating the Bible into the speech of the country; but Judah 'Azahel del Bene (Ferrara, *c.* 1650) advised against the practise of teaching girls Italian, as he feared they would conceive a love for amorous poetry (Vogelstein and Rieger, "Juden in Rom," ii, 300). It was not before the sixteenth century that attempts were made to produce versions of portions of the Bible in Italian. Steinschneider (*l.c.*, p. 318) has given a list of the existing manuscript translations.\* It was toward the end of that century that the first translations were published. David de Pomis (died after 1593) brought out an edition of Ecclesiastes with Italian translation at Venice in 1571. It was dedicated to Cardinal Grimani of Aquileja (Steinschneider, "Cat. Bodl." No. 218). He also translated Job and Psalms, but never published them ("Monatsschrift," xliii.

**Italian Versions.** 32). Hezekiah Rieti published (Venice, 1617) the text of Proverbs with Italian translation ("Cat. Bodl." No. 418); but no reliable account can be found of a translation of Job (Rome, 1773) mentioned by Zunz.

The translations made in the nineteenth century were all more or less under the influence of Mendelssohn's biur. In 1818 I. S. Reggio published at Vienna, as a specimen, ten verses of Genesis. He then brought out the whole Pentateuch (ס הוורת אלהים "colla Traduzione Italiana"), Vienna, 1821; and ten years later "Il Libro d'Isaia, Versione Poetica" (Udine, 1831). Severe criticism was passed upon this version, because it seemed to weaken the force of many of the Messianic prophecies (see Fürst, "Bibl. Jud." iii, 140). In 1844 there appeared at Leghorn (המיט העניית) an Italian translation of Job (Fürst, "Bibl. Jud." ii, 282, says it is by Luzzatto); and in 1872 a "Pentateuch, rev. von Letteris, mit Ital. Uebersetzung von Diodati" (Vienna; perhaps also London, 1836, 1864). Lelio della Torre of Padua translated the Psalms (Vienna, 1845). But these were completely overshadowed by the exact and careful versions of S. D. Luzzatto, whose poetical and literary judgment made him an excellent stylist (see "Hebr. Bibl." vi, 99; Elbogen, in "Monatsschrift," xlv, 460). He translated the greater part of the Old Testament: Isaiah ("Il Profeta Isaia Volgarizzato"), Padua, 1855-63; Pentateuch, Rovigo, 1860, Padua, 1876; Prophets, Rovigo, 1868; Isaiah, Padua, 1867; Job, Trieste, 1853; generally with a valuable Hebrew commentary. Other Italian translations were produced: by Giuseppe Barzilai, "El Cantico dei Cantici" (Triest, 1865) in dramatic form, following Mandelstamm's and Horowitz's German translations; Lamentations (Trieste, 1867); by David Castelli, Ecclesiastes (Pisa, 1866); by Benjamin Consolo, Lamentations, Job, and Psalms (Flor-

ence?); by Gino Morpurgo, Ecclesiastes (Padua, 1898), and Esther (1899).

Translations of the Old Testament into French were not made by Jews prior to the first half of the nineteenth century. In 1831 Samuel Cahen began a monumental work, "La Bible, Traduction Nouvelle"

(Paris, 1833-46, in 18 volumes), to which French were added many essays by Munk, Transla- Zunz, Dukes, and others, and also a tions. somewhat rationalistic commentary.

This work was somewhat severely criticized (Abbé B. M. B., "Quelques Mots sur la Traduction Nouvelle," etc., Paris, 1835; "Allg. Zeit. des Jud." 1839, p. 30; "Literaturblatt des Orients," 1840, pp. 368 *et seq.*; Wogue, "Hist. de la Bible," p. 342); but it held the field for many years. A more faithful version of the Pentateuch was published in 1860 by Lazare Wogue. Among other translators may be mentioned A. ben Baruch Créange (Psalms), and B. Mossé of Avignon (Psalms). But a popular and cheap Bible in French was sorely needed by the French Jews. Such a work has been taken in hand by the present chief rabbi of France, Zadok Kahn, and the other members of the French rabbinate. Wogue's translation was employed as the basis for the Pentateuch. The author himself made the necessary corrections; and before his death he was able to finish the translation of the prophetic books down to the First Book of Kings (vol. i., Paris, 1899). At the same time and under the same auspices, a children's Bible ("Bible de la Jeunesse") is being brought out.

Few translations have been attempted by the Dutch Jews into their vernacular: the Spanish and Portuguese Jews in Holland made use of Spanish; the Ashkenazic Jews, of the Judaéo-German version. The version of the Psalms in Dutch printed by Joseph Athias was made by Johann

Leusden. During the nineteenth century translations were made by Samuel J. Mulder (see his "Tets over de Vertalingen der Heilige Schrift," Amsterdam, 1859); Pentateuch, 1826-42; Major Prophets, 1827; Five Scrolls, 1835, 3d ed. 1859; Proverbs, 1836; Psalms, 1838; all published in Amsterdam. He also published a "Bijbel voor de Israel. Jeugd," Leyden, 1843-54. In 1844 Gabriel J. and M. S. Polak published a Dutch translation of Job, which was to have been followed by a translation of the Prophets and the Hagiographa. This seems never to have been completed. A translation of Isaiah by G. A. Parsen also exists; while a new translation of the Pentateuch, together with Targum and Rashi, was brought out by A. S. Ondervijser in 1901.

Jewish translations into Russian are of very recent date. The writer knows only of L. I. Mandelstamm's Psalms (Berlin, 1864; 3d ed. 1872); Pentateuch (תורה עם תרגום רוסי, 3d ed., Berlin, 1872); Aaron Pumpiansky's Psalms (Warsaw, 1871); J. Cylkow's Psalms (1883); and a version of Esther in German (Hebrew characters) and Russian (Warsaw, 1889). A Polish translation has been published by D. Neufeld.

**BIBLEITZY (BIBLISTS)**, called also **Bibleiskoe Bratstvo (Bible Brotherhood)**: Name given to a body of religious reformers, organized in the spring of 1882 among the Jewish working classes of Elizabethgrad, South Russia, subsequent to the riots against the Jews. The founders of the brotherhood, believing that Talmudism in that region was chiefly to blame for the false accusations of the anti-Semitic press, decided to do away with dogmatic theology and all religious ceremonies, including even prayer. As one of their leaders, E. Ben Zion, expressed their views: "Our morality is our religion. . . . God, the acme of highest reason, of surest truth, and of the most sublime justice, does not demand any useless external forms and ceremonies."

Several of the members of the new brotherhood were among the first of the Russian Jewish immigrants who came to the United States in 1882, and who were incorporated into the "First Jewish Agricultural Colony," established by H. Rosenthal at Sicily Island, near Bayou Louis, Catahoula parish, Louisiana. The air of freedom and cosmopolitanism that they found on reaching the United States has left them without a legitimate ground for their propaganda.

II. R.

**BIBLICAL ETHNOLOGY:** The view of race-relationship expressed in the Bible. It is customary to designate the tenth chapter of Genesis as the oldest ethnological division of mankind. Earlier than this, however, the Egyptians, as known from their pictorial representations, distinguished between four principal types (races) of mankind; viz., the brown Egyptians, the negroes (in the south), the light-complexioned Libyans (in the west), and the light-brown Asiatics (in the east). These races were distinguished from one another also by their hair-dressing and their costume.

It is natural that as soon as a people has a history and has, through intercourse with other nations, become conscious of its individuality, it

**Ethnology** should reflect whether it be related to in these nations. In the earliest times

**Genesis.** the Hebrews occupied themselves with such questions. A great part of the tales of primeval and patriarchal history recorded in Genesis is ethnological in its bearing; that is, these stories were given to elucidate the question of interracial relationship. Therefore the more clearly the people of Israel became conscious of their independent position among the nations, the livelier became their interest in Israel's special position among the nations, and in the questions regarding the origin of neighboring peoples. The consciousness of an especial relation to God must necessarily have reacted to strengthen the conviction that their position among the nations must be a very distinguished one when regarded also in the light of descent.

In order to understand what is narrated in these accounts of Genesis and of other sources, regarding the relation of the several nations and tribes to Israel, it is necessary to consider for a moment the form in which these statements are always made. The relations between the peoples are invariably represented in the form of genealogical tables showing the descent from remote progenitors. The Edomites and the Israelites are the most closely related. This is expressed in the form of a statement that Esau and Jacob, the progenitors of the two peoples, are brothers. The genealogical tables of the nations, in Gen. x., reveal at a glance that a great number of the names are not used to designate persons, but peoples, and even whole lands; as, for instance, Cush, Mizraim, Asshur, Aram, etc. The relations between these persons must therefore be understood as explaining the relations between the peoples in question.

This mode of representing the international relation is by no means, however, based upon a poetic personification of the tribes. The Hebrew writer does not interpret such a form of expression figuratively; on the contrary, it is based by him upon a definite conception regarding the origin of nations, a conception which assumes that the tribes and peoples are in reality a development of the family, and may thus be traced to one progenitor. By means of marriages and births the family grows to the clan, and the clan to the tribe; this again ramifies into various tribes, which, under certain conditions, unite to form a people, as in the case of the twelve tribes of Israel; or they may separate, as did Moab and Ammon, constituting two distinct tribes. This theory, again, goes back to the view shared by all Semites, according to which blood-relationship alone can constitute a strong and permanent bond in a group of people, and impose binding obligations.

The ancient form of genealogy is well adapted for the representation not only of purely ethnological, but also of ethnographical, geographical, and historical relations. In this regard antiquity makes no close discrimination. When, for example, one nation is to be characterized as more powerful than another, the former is represented as a first-born son, the other as a younger brother; or the former is the son of a favorite wife, the other the son of a concubine. Esau is a hunter; Jacob, a herdsman, a distinction serving to characterize the respective peoples. Similarly, geographical proximity converts Sidon and Heth into sons of Canaan.

The interest of antiquity was naturally directed more closely to the neighboring nations with which Israel, from the beginning, cultivated close relations.

To Ammon, Moab, Edom, and the Arabian tribes, Israel felt closely related; hence, Edom (Esau) is the brother of Jacob; Ishmael, the brother of Isaac; and Ammon and Moab are sons of Abraham's nephew, Lot. Their relationship to the Arameans is also close; Jacob's wives are daughters of the Aramean Laban. The reverse, however, is true of the inhabitants of the land west of the Jordan, the Canaanites,

with whom Israel will have nothing in common; for which reason, according to the old accounts of Noah, these tribes are held to belong to an entirely different branch of the human family. This is comprehensible in view of the mutual hatred growing out of the historical situation, the conflicts for the land, and other opposing elements. The conception, however, can not endure before modern investigation. It has been shown beyond a doubt that the Canaanites, both as regards language and descent, were very closely related to the Hebrews, and that they are to be classed, not among the Hamites, but among the Semites.

With the extension of the political horizon of the Israelites, and the continual absorption of new peoples, these ethnological views were inevitably extended. Based upon the ancient accounts of the patriarchs, a theory gradually developed, assuming a homogeneity and relation between the several peoples; and it is this theory which has been perpetuated in Gen. x., the so-called genealogy of the nations. In connection with the accounts of Noah (Gen. ix. 18 *et seq.*), the whole race of man, which is descended from his sons, is divided into three great classes: Shem, Ham, and Japheth. In the original narrative of Noah the three sons are named Shem, Canaan (not Ham), and Japheth. The reason for this division into three sons, or three races, is not known. The Egyptians, as already stated, distinguished four races; nor can a parallel to the Hebrew classification be found among the Babylonians. According to Winckler, the ternary division is probably associated with the great importance attached to the figure "3" in the old system of cosmography (compare Stade, "Geschichte Israels," ii. 275 *et seq.*), Others (*e.g.*, Stade, *ib. i.* 109 *et seq.*), basing their assumption upon the above statement that Ham was originally called "Canaan," believe that a purely Palestinian triad was meant, consisting of the Hebrews, Philistines, and Canaanites (Shem, Japheth, and Ham), and that this triad was afterward extended to include all mankind. The most recent commentary by Gunkel declares that the ternary division indicates the conditions of a very ancient pre-Israelitish period, when Canaan, in the widest sense of the name—that is, the land between the Taurus and Egypt—was subjugated from the east by nomad Semitic tribes, while at the same time the Hittite migrations brought down Japheth from the north to spread over the land of Canaan. But this is uncertain; and no definite reason has hitherto been assigned for the tripartite ethnological division.

The scope of this genealogical table of the nations is, of course, narrow from the modern point of view. The nations mentioned in it are the peoples known to the Israelites, either through actual contact or by report, and grouped principally about the Mediterranean in Asia Minor and eastern Palestine. In the ethnological phraseology of the present they would be classed among the Caucasian nations. Even from the standpoint of the Israelites, the ethnological list given in Genesis has no claim to completeness, inasmuch as not only the negroes, who were undoubtedly known to the Israelites of a later period, but also the Persians are omitted from it. As the last-mentioned people were well known to the post-exilic

### Early Attempts at Ethnology.

### Based on Sympathies and Antipathies.

Jews, their omission from the genealogical table is perhaps to be explained by the fact that they were not numbered among those ancient nations whose origin dates from the Flood.

As regards the division of the individual peoples into these three great classes, the considerations of complexion, linguistic differences, historical conditions, etc., obtaining at the present day were certainly not determinative at that time. Indeed, it appears that the fundamental distinction was purely geographical. To the Japhetic race belonged the peoples of the northern zone, of Asia Minor, and of the islands and coastlands of the northern Mediterranean. The Semites dwelt in the middle zone, and included the Hebrews and the nations to the east of Palestine. The nations in the south were the sons of Ham, who lived in northern Africa and southern Arabia, and who, as represented by the ancients, constituted a homogeneous people. There is only one exception to this genealogical arrangement: Canaan with his sons, the Phenicians, Hittites, and others, dwelt in the middle zone, but were considered as belonging to Ham. The reasons for this have been given above.

For details bearing on the foregoing explanation of the genealogical tables, see the commentaries on Genesis, particularly those of Dillmann. For the other data, compare the articles on HAM, JAPHETH, RACES OF THE OLD TESTAMENT, and SHEM.

I. BE.

**BIBLIOGRAPHY:** The science that deals with the description and classification of books. As applied to books of Jewish interest, it includes (a) **Hebraica**, or books written or printed in Hebrew characters; and (b) **Judaica**, or books in other languages, written by or about Jews. Strictly speaking, the whole of Biblical and Apocryphal literature and the vast array of commentaries thereon would belong to Jewish bibliography; but this is so fully treated elsewhere, that Jewish bibliographers as a rule have not paid so much attention to it. Even with this limitation, the extent of the subject is wide enough, a conservative estimate giving 30,000 as the number of Hebrew works in existence; and the same number of works in modern languages on Jewish topics have been published during the past forty years alone in the special journals devoted to this subject. Any person desiring to keep himself fully acquainted with Jewish literature in its wider sense would probably have to take account of over 3,000 (800 Biblical) publications per annum. Many of these still remain undescribed; and for others search must be made in various quarters.

The materials from which a description of the extent of Jewish literature can be set forth consist, in the first instance, of the collections of

**Materials.** books and manuscripts made by various **BOOK-COLLECTORS** in the past, especially of those collections of collections which go to make up public **LIBRARIES**. The earliest accounts of Jewish literature were based in large measure upon such collections; as Bartolucci's on that of the Vatican, and Wolf's on the Oppenheimer collection. Later, with the growth of knowledge about the extent of the literature, any description of it would depend in large measure upon published

accounts, or **CATALOGUES**, which have naturally been devoted largely to manuscripts. With the growth of interest in the history of printing in general, special attention began to be paid to the earliest Hebrew printed books, especially those printed before 1540, and known as **INCUNABULA**.

Having in view the fact that the majority of early Hebrew printed books were produced in Italy, it is not surprising that the earliest account of Hebrew literature in its rabbinic phases should have been made by an Italian; though it is a matter for some surprise to find that he was a Christian.

**Earliest Bibliographies.** Bartolucci, in his "Bibliotheca Magna Rabbinica" (Rome, 1675-94), arranged the books under the names of 1,960 rabbis; and his work was supplemented by Imbonato, whose "Bibliotheca Latino-Hebraica" gives, under 1,319 numbers, 2,166 works written in Latin on rabbinic subjects. These were followed by the first Jewish bibliographer, Shabbethai Bass, who, in his "Sifte Yeshenim" (Amsterdam, 1680), mainly used the books of the Bet ha-Midrash and the library of Aguilar. Bass adopted the method of arranging the books according to their titles, giving an index of authors and subjects at the end. This plan is specially applicable to Hebrew books, the titles of which rarely indicate their contents (see **TITLES OF BOOKS**). Bass's work forms the main foundation of Jewish bibliography of Hebrew books; his method having been continued and supplemented by J. Heilprin and Benjaeb, whose "Ozar ha-Sefarim" is the most complete title-list of Hebrew books in existence. S. Wiener, in his elaborate catalogue of the Friedland collection at the Asiatic Museum, St. Petersburg, also adopts the title-list as the most suitable in dealing with Hebrew books.

These attempts of Bartolucci and Bass were, however, entirely superseded by the great work of John Christian Wolf, who in his "Bibliotheca Hebraea" (4 parts, Hamburg, 1715-33) brought together almost all the accessible information relating to Jewish authors and their works, as well as to

**J. C. Wolf.** the writings of Christians on Jewish subjects. The first part gives a catalogue of authors with the names in Hebrew, which leads at times to somewhat curious results; the second is more of a subject classification of the whole of early Jewish literature, including a fair account of the Talmud and of the Targumim, from which later writers have frequently drawn; and the remaining two parts are supplements containing the additional knowledge acquired by Wolf in the later years of his life. In the main, Wolf's materials consisted of the remarkable Oppenheimer collection, which ultimately went to the Bodleian Library, Oxford; and for this reason Steinschneider's great catalogue of the Bodleian collection repeats in improved form much of Wolf's information. Considering his opportunities, Wolf shows remarkable acumen and accuracy; and in some respects his work still remains of value. A sort of supplement was provided by Köcher in his "Nova Bibliotheca Hebraica" (Jena, 1783-84).

The next name of importance is that of Hayyim Joseph David Azulai, whose "Shem ha-Gedolim" (Leghorn, 1786-96) added considerably to Shabbethai

Bass, mainly from works printed at Leghorn. He was supplemented by the joint labors of Nepi and Ghironi (Triest, 1853), who gave an account of the Italian rabbis and their voluminous but not very important productions. Azulai's work was consolidated and rearranged by Benjacob in the Wilna edition, 1852.

By a fortunate chance the attention of an Italian professor, J. B. de Rossi, was drawn to the subject of early Hebrew printing in Italy; and in a number of monographs on that subject ("De Typographia Hebr.-Ferrari. Comment. Historicus," Parma, 1780; "Annali Ebreo-Tipografici di Sabionetta," Erlangen, 1783; "Annales Hebræo-Typographici," sec. xv., 1795; "Annales Hebræo-Typographici ab Anno 1501 ad 1540," Parma, 1799) he laid a firm foundation for a description of all Hebrew

**In-cunabula.**

books printed up to 1540. The few additional lists that have been made in similar lists by Cassel and Steinschneider, Schwab and Chwolson, have only served to show the comparative completeness with which De Rossi did his work. Renewed attention has been paid to the subject of early Hebrew printed books during the last decade.

With the rise of Jewish science under Rapoport and Zunz, bibliography entered upon a new era. The same accuracy, thoroughness, and critical acumen which were being devoted to the contents of books were also exercised in the description of their external characteristics. Zunz himself devoted considerable attention to the subject, especially to an enumeration of the productions of the printing-presses of Mantua and Prague; and he also gave a summary account of the Italian libraries. Among the workers in the field of Jewish bibliography in the early part of the nineteenth century may be mentioned Dukes and Carmoly; while Michael offered all the treasures of his library—full of the rarest books—to anybody interested in the subject, though an account of them appeared only after his death. The "Literaturblatt des Orients," founded by Julius Fürst, also helped to revive the study of Jewish literature; while its review columns kept Jewish scholars acquainted with contemporary productions.

All these various activities were summed up in the ambitious attempt of Julius Fürst in his "Bibliotheca Judaica," Leipsic, 1848-63. This work gave short titles of about 13,500 (Fürst says 18,000) Hebrew books, and of perhaps twice that number of Judaica. The latter contained many, if

**Julius Fürst.** not most, of Wolf's useless Latin dissertations by Christian writers, as well as a considerable amount of merely Biblical

exegesis and criticism by Christian theologians. Notwithstanding its errors of omission and commission, Fürst's work still retains considerable value as the first attempt to cover the whole field of Jewish bibliography. The names of many writers and books are to be found only in its pages; and the clearness of print and the shortened form of titles make it easy to consult. On the other hand, its dates, and indeed data generally, are far from trustworthy; and more than four-fifths of his information was confessedly from second-hand sources.

The only possibility of improvement in regard to accuracy was seen to be in more careful cataloguing; and the epoch after Fürst is characterized by a succession of masterpieces in this direction, mainly executed by Moritz Steinschneider (b. 1816), by whose gigantic labors Jewish bibliography has

**Catalogues.**

been organized and made an adequate instrument for the study of Jewish literature and history. As the result of thirteen years' continuous labor, he produced his colossal catalogue of the Hebrew books in the Bodleian Library ("Catalogus Librorum Hebræorum in Bibliotheca Bodleiana"), including all works not in the library, but published up to 1732. Besides accurate descriptions of each book from personal examination, Steinschneider generally gives notes upon the author and his works. In addition to this, he has described the manuscripts in the libraries at Hamburg, Leyden, Munich, and Berlin, besides some private collections, and in every way has given a model of conciseness and accuracy in the description of Hebrew works. The same qualities are shown, perhaps in an even higher degree, in the "Catalogue of the Hebrew Books in the Library of the British Museum," by J. Zedner (London, 1867), whose punctilious accuracy and painstaking determination of names and dates leave nothing to be desired. The example of the latter authority has been followed by Roest in his catalogue of the Rosenthal collection at Amsterdam ("Catalog der Hebraica und Judaica aus der L. Rosenthal'schen Bibliothek," Amsterdam, 1875). Steinschneider's work with regard to manuscripts has been supplemented by the careful but somewhat sparse account of the Hebrew manuscripts in the Bodleian Library by A. Neubauer (Oxford, 1886).

Besides devoting so much attention to the bibliography of the past, Steinschneider founded an organ, "Hebräische Bibliographie," in 1858 for the actual description of the Jewish literature of the present. The "Literaturblatt des Orients," and even the general Jewish press, had sporadic-

**Periodical Literature.** ally reviewed publications of Jewish interest as they appeared; but Steinschneider was the first to attempt a systematic, continuous, and complete account of Judaica and Hebraica, accompanied by short critical notices by himself and friends. This has been continued in the "Zeitschrift für Hebräische Bibliographie" (1898, in progress). In addition to these may be mentioned N. Brüll's elaborate reviews in his "Jahrbücher" (1874-89); the lists given in the "Orientalische Bibliographie"; the periodical bibliographical notices which appeared in the "Revue Etudes Juives" (especially the careful ones of the late I. Loeb); besides the series of special bibliographies such as the Biblical ones in Stade's "Zeitschrift" and the "Theologischer Jahresbericht," and the historical in the "Jahresberichte für Gesch. Wissenschaft." Mr. Israel Abraham gives in the "Jewish Chronicle" a summary account of current Jewish bibliography which is at once up-to-date and trustworthy. M. Schwab has compiled (1899-1900) a useful author and subject-index to Jewish periodical literature. The only subject-index that has hitherto been published, including both books

and periodicals, is the careful one, compiled by Rev. A. Löwy, of the small collection of Hebraica and Judaica in the Guildhall Library, London. A much more ambitious attempt is being made by A. S. Freidus to compile a card catalogue (author, subject, and title) of the 12,000 volumes and pamphlets of the New York Public Library, which already (1902) runs to about 25,000 entries, including articles in periodicals, and even references to Jewish topics found in the works of the general library. That collection has been minutely arranged on the shelves according to a comprehensive plan containing about 500 subdivisions, which may be considered the first elaborate scheme for classifying Jewish literature for library purposes (see LIBRARY CLASSIFICATION). No attempt has been made since Fürst to compile a complete author bibliography; but his work has been supplemented by a bookseller, C. D. Lippe of Vienna, who, in three successive issues of a "Bibliographisches Lexicon" (1881-99), gives a tolerably full but inaccurate account of contemporary Jewish writers (mainly contributed by themselves); while William Zeitlin has made an attempt to enumerate modern Hebrew works (1789-1890) in his "Bibliotheca Hebraica Post-Mendelssohniana" (Leipsic, 1891-95).

The present phase of Jewish bibliography is tending toward the compilation of lists of works relating to special subjects. Here, again, Steinschneider has been the pioneer. Most of his works, while professedly dealing with special topics, concentrate attention upon the bibliography of the subject; and among other topics which he has thus bibliographized may be mentioned the polemical literature of Jews and Mohammedans, mathematical writers among the Jews, Hebrew translations, chess, etc. Besides these, his treatises on Jewish literature in Ersch and Gruber's "Allg. Encyc. der Wissenschaft und Künste" (English translation, London, 1857, and on Italian Jewish literature in the "Monatsschrift," 1898-99) are in large measure bibliographical guides. While an immense debt of gratitude is due to Steinschneider for the facilities he has thus afforded, it must be confessed that the style in which he has presented his results is sometimes unclear owing to excessive conciseness; and he has the unfortunate habit of piling up notices which turn out, on inquiry, to be perfectly useless.

Having in view the present tendency of Jewish bibliography, it may be suitable and useful to conclude this rough account with a short bibliography of the special bibliographies that have more recently been made. Lists made by Wolf and repeated by Fürst are of no value for practical purposes.

**BIBLIOMANCY**:\* The use of the Bible for magic or superstitious purposes. The practise of employing sacred books, or words and verses thereof, for divination or for magic cures is universal alike among pagans and believers in God. What the Vedas were to the Hindus (Stenzler, "Abhandlungen für die Kunde des Morgenlandes," vol. vi., Leipsic, 1878), Homer to the Greeks (Heim, pp. 496, 514), and Ovid and Virgil to the Romans (Lampridius, "Alexander Severus," p. 14; "Sortes Virgiliæ"), the Old Testament was to the Jews, the Old and New Testaments to the Christians (Kraus, s.v. "Loos," ii. 344; "Sortes Sanctorum"; compare i. 153, "Evangeliorum"), and the Koran and Hafiz to the Mohammedans (Lane, "An Account of the Manners and Customs of the Modern Egyptians," vol. xi.). The desire of man to discern the hidden future, or to obtain the mastery over nature in hours of great anxiety, by some superstitious resort to superhuman forces, is never altogether extinct in the multitude. Deut. vi. 8, 9; xi. 18; and Prov. iii. 22-

26, vii. 3, admonishing the people to bind them (the words of God) as a sign upon the hand, and have them as frontlets between the eyes, and to write them upon the posts of the house and upon the gate, certainly induced the Jews to use the Bible, or parts of it, for protective or talismanic purposes (Targ. to Cant. viii. 3; Ber. 23b; Yer. Peah i. 15d). Likewise are the sixty letters of the Priestly BLESSING (Num. vi. 24-26) called sixty guardian

For powers of Israel against the terrors of Protective the night (Cant. R. to iii. 7; Tan. Purposes. Num. 16; compare Pesik. R. 5 and Num. R. xii.), "a talisman against the

evil eye." So was Ps. xci., perhaps originally composed as an incantation psalm (see PSALMS) and known in rabbinical literature as "Shir shel Pega'im," or "Song against Demons," employed as a protective (Midr. Teh. to Ps. xci.; Yer. Shab. vi. 8b), found also in a tomb at Kertch, Crimea (Blau, "Das Alt. Jüdische Zaubrewesen," p. 95). Ps. iii. was employed for that purpose (Shebu. 15b); Ex. xv. 26 was used for healing purposes, according to Mishnah Sanh. x. 1; as was also Lev. i. 1, according to Sanh. 101a. To ward off evil dreams, the Rabbis prescribe the recitation of corresponding Bible verses (Ber. 55b, 56b); in order to escape the danger befalling one who drinks uncovered water on Wednesday and Saturday nights, the recitation of Ps. xxix. is prescribed (Pes. 112a). Tos., Shab. xiii. 4; Shab. 115b, writings containing Biblical matter used for amulets, are mentioned, which Blau (*l.c.* p. 96) compares with two magic papyri of the second or third century showing a Jewish origin; the one published by Deissmann (pp. 21-48), the other by Dieterich, "Abraxas," pp. 138 *et seq.*, both of which prove the use of Biblical passages for magic purposes.

It was common in Talmudical times to accept the verse selected at random and recited by the schoolchildren as a good or a bad omen (Hag. 15a, b; Giṭ. 58a; Hul. 95b), and this was observed through the Middle Ages (Tur Yoreh De'ah, 179). This same custom was observed by the Christians at the close of the seventh century (Kayser, "Die Canones Jacob's von Edessa," 1886, pp. 22, 126, 136; and "Gebrauch von Psalmen zur Zauberei," in "Z. D. M. G.," xlii. 456-462). In the last-named article a prescription of the use of the various Psalms for magic purposes, written in Syriac and taken from Sachau's collection

of Syriac manuscripts, No. 218, is published and translated. Whether Good or Bad Omens. This served as a model for Jewish writers or followers of the "Shimmush

Tehillim" (the magic use of the Psalms), or originated with the Jews, is rather difficult to say. Certain it is that both the authorities of the synagogue (Maimonides, "Yad," 'Akkum, xi. 12; Tur Yoreh De'ah, 179, according to Shebu. 15b) and of the Church prohibited the use of the Bible either as a whole or in part for magical cures (Kayser, *l.c.* p. 126; Hefele, "Conciliengeschichte," ii. 274); yet both failed to eradicate the custom. According to "Sefer Hasidim" (ed. Lemberg, 1870; Jitomir, 1879, §1140; not in the Berlin edition), the Book of Leviticus was placed under the head of a child when first put into the cradle. Sometimes the Torah-scroll was brought into the lying-in room in order to facilitate

\* For the titles of works cited under abbreviations, see bibliography at the end of the article.

the birth ("Pitḥ Teshubah" on Yoreh De'ah, 179), or laid upon the sick babe ("Yad," *l.c.*; Tur Yoreh De'ah, *l.c.*), or on the head of the new-born child, or during the eight days following the circumcision ("Mitteilungen," i. 83, 85). Also in the curious womb-blessing, the Torah-scroll was used for protection, the words spelled being: "Baermutter [womb], lie down; with these words I adjure thee; with nine Torahs, with nine pure Sefer Torahs!" (Güdemann, in "Monatsschrift," v. 57). When a person was dangerously ill, the Pentateuch was opened, and the name which first met the eye was added to the patient's name, in order to avert the evil destiny (see SHINNUY HA-SHEM). The words found at the

**Use of the Pen-tateuch.** beginning of a page of the Bible when it was opened at random, or touched by the thumb at the opening, were also frequently used as an oracle (Berliner, "Aus dem Leben," p. 24). The Pentateuch in the form of a book, not a scroll, was employed also in the FATE BOOKS ("Loos Bücher"). Genesis was opened as a protection against thunder and hail-storms (Kayser, *l.c.*).

The following single verses may be mentioned as having been used both in the original Hebrew and in translation (pronounced over wounds, Rashi on Sanh. 101a; Shulḥan 'Aruk, Yoreh De'ah, 179, 8):

- Use of Bible Verses.**
- Gen. i. 1: To make oneself invisible (S.Z. 32a).  
i. 1-5: (The last letters only.) To confuse a person's mind (M.V. 25); as preservative against pollution (S.Z. 11b); and for other purposes ("Cat. Anglo-Jew. Hist. Exh." No. 1874; Schwab).  
xxi. 1: To lighten childbirth (M.V. 59).  
xxiv. 2: On using a divining-rod (M.V. 80).  
xxv. 14: Against the crying of children (M.V. 64).  
xxxii. 31: Against danger on a journey (M.V. 34).  
xlx. 18: To shorten one's way on a journey (M.V. 23); in the lying-in room (M.V. 80).
- Ex. xi. 7: For protection against a fierce dog. (For greater security, the traveler is advised to carry a stout stick as well, which gave rise to the saying, "He has both a way [posuk] and a stick [stecken] with him," applied to one well fortified on every side.)  
xl. 8: To lighten childbirth (M.V. 59).  
xv. 2: To shorten one's way (M.V. 24).  
xv. 16: To shorten the way (M.V. 23); to insure safety in a court of law (M.V. 32); against fear (M.V. 65).  
xvii. 16: Against bleeding (M.V. 45).  
xxii. 17: In the lying-in room (M.V. 91).  
xxxiii. 23: Against witchcraft (M.V. 41).  
xxxiv. 6: To shorten the way (M.V. 23).
- Lev. i. 1: The same (M.V. 23).
- Num. xi. 2: Against fire (M.V. 10, 11; S.Z. 27).  
xi. 12: Against the evil eye (M.V. 41).  
xxiii. 23: In lying-in rooms (M.V. 91).
- Dent. vi. 4-9: Against fever (M.V. 50).  
xxxiii. 4: On taking children to school (S.Z. 30b).

In addition to verses from the Pentateuch, the following from other books are cited as being efficient in the cases indicated:

- Josh. i. 4: To awaken understanding; "Shinmush Tehilim," *exix*.  
Ilsa. xxvi. 1: To strengthen memory (S.Z. 30b).  
xlii. 5; xliii. 2: Against a storm at sea (M.V. 35).  
xliii. 14: At sea (S.Z. 31b).  
i. 4: On taking children to school (S.Z. 30b).  
Jer. xxxi. 15: Against the crying of children (M.V. 64).  
Ezek. iii. 3: On taking children to school (compare Berliner, "Aus dem Leben," p. 27).

- Prov. xvi. 1: To strengthen one's memory (S.Z. 30b).  
xviii. 10: To gain favor (M.V. 28).  
Joh xxxii. 9: To strengthen one's memory (S.Z. 30b).

The Psalter especially was employed, an entire chapter at a time, for all manner of incidents, serious or trivial. An **Use of Psalms.** tract may here be given from the above-mentioned "Shinmush Tehilim" (frequently reprinted), which indicates the various uses made:

- Ps. i.: Against miscarriage. Verse 3, against trees shedding their fruit (Heim, 520).  
ii.: Against a storm at sea.  
iii.: Against headache and pain in the shoulders (Grünw., to drive out demons).  
iv.: To find favor.  
v.: Against evil spirits (Kayser, on appearing before a judge). Verse 8 may be said to have been used in a certain sense to avert the evil eye; for in the time of the Geonim, the ten words of this verse were employed to ascertain if the requisite quorum, called "minyān," were present before beginning divine service; thus avoiding the necessity of pointing with the finger, or using numerals, both of which were considered harmful (Barkavy, "Reponsen der Geonim," p. 157). In the same way the ten words of Ps. xviii. 51 are employed to-day; so that when the tenth man arrives, it is said not "The tenth man is here," but "The 'Olam' [the tenth word of the Hebrew verse] is here."  
vi.: Against diseases of the eye and danger on land or water.  
vii.: Against enemies; in a law-court (against robbers, M.V. 36).  
viii.: Against crying children.  
ix.: Against the same and enemies.  
x.: Against obsession by evil spirits.  
xi.: Against evil spirits and wicked men; against various perils (Grünw., to drive out demons).  
xii.: Against temptation and evil counsel.  
xiii.: Against unnatural death and diseases of the eye (Grünw., to drive out demons).  
xiv.: Against defamation, and when one's veracity is doubted.  
xv.: Against obsession.  
xvi.: To discover a thief, and against enemies, and to awaken intelligence. Employed by Christians to discover thieves; Männling, "Denkw. Kuriositäten," in Rubin, "Gesch. des Aberglaubens," p. 111.  
xvii.: On a journey.  
xviii.: Against robbers and all manner of sickness.  
xix.: Against evil spirits; difficult labor; and to awaken intelligence.  
xx.: In a court of law.  
xxi.: To maintain oneself before a spiritual or temporal authority.  
xxii.: To ford a river, against wild animals, and to sharpen intelligence.  
xxiii.: In interpretation of dreams.  
xxiv.: In a storm at sea.  
xxv.: In distress.  
xxvi.: In distress and imprisonment.  
xxvii.: To conquer a city; as a vermifuge.  
xxviii.: To appease an enemy.  
xxix.: Against an evil spirit.  
xxx.: Against every evil.  
xxxi.: Against the evil eye.  
xxxii.: The same.  
xxxiii.: For a woman whose children die young, and against epidemics (Kayser, in time of war).  
xxxiv.: To secure the favor of princes and governments (Kayser, against witchcraft. Heim, xxxv. 9, to preserve wine until the ensuing autumn).  
xxxv.: Against mischievous busybodies (Grünw., to expel demons).  
xxxvi.: Against evil tidings.  
xxxvii.: Against drunkenness.

- Ps. xxxviii.: Against defamation.  
 xxxix.: Against evil design on the part of the king.  
 xl.: Against evil spirits.  
 xli.: When one's position has been given to another.  
 xlii.: In interpretation of dreams.  
 xliii.: In a storm at sea (M.V. 35).  
 xliv.: To escape from an enemy.  
 xlv.: Against a wicked woman.  
 xlvi.: When one tires of his wife.  
 xlvii.: To win favor.  
 xlviii.: To frighten one's enemies.  
 xlix.: Against fever. Verse 6, against pollution (M.V. 62).  
 l.: Against enemies and robbers (Grünw., against noxious animals).  
 li.: When one feels guilty. Verse 3, against loss of blood (Heim. 52b).  
 lii.: To keep off slander.  
 liii.: To frighten one's foes.  
 liv. and lv.: To be avenged on one's foes.  
 lvi.: When in chains; also against evil inclination.  
 lvii.: To have good fortune.  
 lviii.: Against vicious dogs.  
 lix.: Against evil inclination.  
 lx.: Before a battle.  
 lxi.: Upon entering a house where one has cause for apprehension.  
 lxii.: For forgiveness of sins.  
 lxiii.: On accounting with one's business partner, and to have good fortune in trade.  
 lxiv.: On fording a river.  
 lxv.: To exert influence over anybody.  
 lxvi.: Against evil spirits.  
 lxvii.: Against continuous fever; also for a prisoner. This psalm, written upon parchment in the form of a "menorah" (branched candlestick), and surrounded by moral sentences, is frequently found printed in prayer-books. It is claimed that the psalm was engraved upon David's shield in this form. Without the superscription, it contains seven verses and forty-nine words; the fifth verse, counting the dageshes as two, contains forty-nine letters. It is owing to the first fact that this psalm is used together with Ps. cxliv. in the ritual at the departure of the Sabbath. For the connection of David with the departure of Sabbath, see "Mitteilungen der Gesellschaft für Jüdische Volkskunde," i. 76. On the second fact is based the reading of this psalm in the forty-nine days of 'omer (see 'OMER), between Passover and Pentecost. The Catholic Church also designates a special psalm for daily recital between Easter and Pentecost (see Grünw. 109).  
 lxviii.: Against evil spirits (Grünw., as an exorcism for travelers' use).  
 lxix.: Against evil longing.  
 lxx.: Before a battle (Grünw., to appease an enemy).  
 lxxi.: In prison.  
 lxxii.: To win grace and favor.  
 lxxiii.: Against compulsory baptism.  
 lxxiv.: Against a mob, whether of men or spirits.  
 lxxv.: For forgiveness of sins.  
 lxxvi.: Against flood and fire.  
 lxxvii.: Against all manner of distress.  
 lxxviii.: To win grace and favor at court.  
 lxxix.: To be rid of one's foes.  
 lxxx.-lxxxii.: Against idolatry.  
 lxxxiii.: When on an important mission.  
 lxxxiii.: In time of war. Grünw. connects the expression in verse 14 (A.V. 13), "make them like a wheel," with the Jews' badge, which was sometimes in the form of a wheel.  
 lxxxiv.: Against sickness.  
 lxxxv.: To win favor.  
 lxxxvi.: Against an evil spirit.  
 lxxxvii.: To deliver one from prison.  
 lxxxviii.: To save a city or a community.  
 lxxxix.: Against the effects of sickness.  
 xc.: Against lions or evil spirits. Verse 17, against fever (M.V. 50); shortening a journey (M.V. 23); general protection (M.V. 31).

- Ps. xci.: The same; and against all kinds of evil; to make oneself invisible (M.V. 36); verses 5 and 10, against epilepsy (M.V. 52); molding wax for a sick child, see Rubin, l.c. p. 134. For the connection between traveling and archangels, and the employment of this psalm by both Jews and Christians, see Grünw. 99.  
 xcii.: Before waiting upon high dignitaries.  
 xciii.: For support in a lawsuit.  
 xciv.: Against enemies.  
 xcvi.: Against being betrayed into baptism.  
 xcvi.: To give happiness to one's family.  
 xcvi.: The same. Verse 2, against theft (M.V. 16).  
 xcvi.: To make peace between enemies.  
 xcix.: To become pious.  
 c.: To gain a victory.  
 ci.: Against an evil spirit.  
 cii.-ciii.: Against childlessness.  
 civ.: To be rid of one's enemies.  
 cv.: Against a quartan ague.  
 cvi.: Against a tertian ague.  
 cvii.: Against continuous fever.  
 cviii.: To have happiness in one's house.  
 cix.: Against enemies.  
 cx.: To make peace. Verse 6, against an evil spirit (M.V. 31); verse 7, at sea (S.Z. 31b).  
 cxii.: To gain new friends.  
 cxiii.: To increase one's strength.  
 cxiii.: To secure the removal of idolatry.  
 cxiv.: To be fortunate in business.  
 cxv.: To be victorious in debate.  
 cxv.: Against an unnatural or sudden death.  
 cxv.: Against slander.  
 cxviii.: In medicine (Grünw. 118); against scoffers to answer (an epikores), and to maintain oneself in law.  
 cxix.: On the performance of a religious precept; to sharpen the intellect; for disease of the eye; when one is in deep perplexity; valuable for preachers; against sin; wholesome for the spleen and kidneys; against temptation; to win favor; against weakness in the hands; upon a journey; against catarrh; against weakness in the feet; against earache; against dizziness; on taking children to school (Berliner, l.c. p. 7). Verse 49, before study (S.Z. 30b); verses 33-40, against temptation (M.V. 65).  
 cxx.: On seeing a snake or a scorpion; in the lying-in room (M.V. 91).  
 cxx.-cxxxiv.: On the dedication of a house which has been inhabited by evil spirits (Grünw.).  
 cxxi.: When traveling alone at night.  
 cxxii.: On appearing before a high potentate.  
 cxxiii.: When a slave has run away.  
 cxxiv.: On fording a river.  
 cxxv.: Against enemies; on a journey (M.V. 34; S.Z. 31a).  
 cxxvi.: For a woman whose children die.  
 cxxvii.: For protection.  
 cxxviii.: For an expectant mother.  
 cxxix.: On the performance of a religious act; at sea (S.Z. 31b).  
 cxxx.: To escape arrest by the night watchman.  
 cxxx.: Against undue presumption.  
 cxxxii.: On fulfilling a rash vow.  
 cxxxiii.: For friendship and love.  
 cxxxiv.: Before studying.  
 cxxxv.: For repentance and amendment.  
 cxxxvi.: To confess one's sin.  
 cxxxvii.: To remove enmity.  
 cxxxviii.: For love.  
 cxxxix.-cxli.: To awaken love between a man and a woman.  
 cxli.: Against heart-disease.  
 cxlii.: Against lumbago.  
 cxliii.: Against pain in the arm.  
 cxliii.: To heal a fractured or dislocated hand; against demons. Verse 2, at sea (M.V. 35); by Christians against fever (Grünw. in M.A.).  
 cxlv.: Against sudden fright.  
 cxlvi.: Against sword wounds.  
 cxlvii.: Against the bite of serpents.  
 cxlviii.-cxlix.: Against a fire.  
 cxlix. 6.: Against pollution (M.V. 62).  
 cl.: Thanking God for all His works.

For single words or names taken from the Bible and used for mantic purposes, see **Use of Biblical Names.** The names of the following individual personages of the Bible have been employed in bibliomancy:

- Adam and Eve:** For use in amulets, see **AMULETS.**
- The Serpent:** Ofek, Samael in Schwab. Concerning the human figure with serpentine feet, see "Sefer Hasidim," ed. Lemberg, § 1166, "the serpent went upon two feet and had partly a human form." On Samael together with Serafiel, M.V. 21; Targ. Yer. on Gen. iii. 6 interprets the serpent as Samael, and "Yalkut Hadash" makes the serpent identical with Samael and Satan; see also **ABRAHAM.**
- Enoch:** To induce trade, S.Z. 22. See Steinschneider, "Zur Pseudepigraphischen Literatur," pp. 53 *et seq.*; Harkavy, "Responsen der Gaonim," p. 344.
- Abraham, Isaac, and Jacob:** In amulets for the lying-in room, M. V. 91.
- Sarah, Rebekah, Rachel, and Leah:** The same.
- Joseph:** Against pollution, M.V. 62; against the evil eye, compare Berakot 55b; see Blau, p. 155; in the ceremony of "Tashliḥ," with reference to Gen. xlix. 22.
- Moses:** Against fire (after Ex. ii. 8), M.V. 58; for hard labor, M.V. 10; to awaken intellect ("Pseudepigrapha"), M.V. 66; against gangrene, M.V. 48.
- Korah:** Korḥin=evil spirits, M.V. 17.
- Joshua:** To arouse intelligence ("Pseudepigrapha"), M.V. 66.
- David:** See **DAVID, SHIELD OF.**
- Doeg:** See under **Abithophel** (compare Mishnah, Sanh. x. 2).
- Abithophel:** Name of the author of a fate-book (Steinschneider, "Hebr. Bibl." vi. 120). Regarded as a colleague, as it were, of Balaam, and as a species of Mephistopheles (*idem*, "Zur Pseudepigraphischen Literatur," p. 80).
- Absalom:** In the preparation of divining-rods, M.V. 80.
- Solomon:** In conjunction with Ashmedai, M.V. 56; concerning his shield and seal-rings, see M.V. 39.
- Queen of Sheba:** See below, under **Lilith**, M.V. 11, 17, 29.
- Elijah:** See MS. 1863, pp. 286, 288, 293; also S.Z. 22; M.V. 47.
- Job:** Against tooth-ache ("Pseudepigrapha"), M.V. 47.
- Satan:** For amulets in lying-in room, M. 71.
- Boaz:** Against pollution, M.V. 62.
- Daniel:** Against wild beasts, M.V. 33; Hananiah, Mishael, and Azariah; in a conjuration against fever, Shab. 67a.
- Lilith:** Identical with the Queen of Sheba, MS. 1870, 187; also Kelifa, MS. 1880, p. 536; Klippe, M.V. 62. For a masculine **Lil**, and a plural **Lilivot**, see M.V. 62.
- The creatures around the throne** (Ezek. i. 15): To shorten one's journey, M.V. 24.
- Names of rivers:** The rivers of Eden, M.V. 69; Kidron, Wohlstein, 17.

Other single names or words are rarely employed. Only the following can be mentioned: **סנה** ("the bush"), Ex. iii. 2 *et seq.* For a magical cure of a burning fever, the bush is mentioned in Shab. 67a, and is addressed as the tree "upon which God allowed His Shekinah to dwell."

The words **מגן** ("shield") and **אמן** ("so may it be") are sometimes found interwoven with other words or with each other so that each of their three letters is made the initial of a magic word; thus **נקדש, נקדש, נקדש** (M. V. 50), **אמן, אמן, אמן**, *(ib.)*; compare 38). The last letter, "N," serves as the last letter in the name of the good angels (M. V. 61).

"Ezel" (**אזל** = "the stone Ezel"), I Sam. xx. 19, is interpreted as consisting of the initials of the words **אור זרוע לצדיק** ("light is sown for the righteous," Ps. xvii. 11) and is sometimes found; see M. V. 55.

Concerning the mode of application of these Bible passages and words, it is only necessary to state here that they were written in various places and on numerous objects; *e.g.*, paper (M. V. 40, 64); clean ("kosher") parchment (M. V. 28, 31, 35, 57, 60 *et seq.*); stag parchment (S. i.); the wall (M. V. 30);

walking-cane (B. B. 73a); on bread (M. V. 43); a human skull (M. V. 49); cheese (M. V. 28); an apple (M. V. 25); clay (Sh. 2 M. V. 56, 60); [see "Sefer Raziel," in Wohlstein, 132]; especially on new clay vessels (M. V. 24, 25); an egg (Sh. 119, S. Z. 30b, M. V. 43); and on a cake (S. Z. 30b).

In addition, they were pronounced or whispered (Sh. 10, 29, 31; compare M. V. 56, 59) over olive-oil (Sh. 3, 5, 33, 45, 89), dust (Sh. 7 *et seq.*), especially over well-water (Sh. 7, 10, 20, 37, 69, 119), water upon which the sun had never shone (Sh. 29, 84), on plucking vegetables or herbs (Sh. 13), over oil of sesame (Sh. 51), oil of roses (Sh. 20, 21), salt (*ib.*), willow branches (Sh. 29), leaves of a palm-tree that had not yet blossomed (Sh. 29), wine (Sh. 111); and over all of these only at certain fixed times (Sh. 29, 62, 119; M. V. 80). Sometimes they were not uttered at all, but were dwelt on in thought (M. V. 37).

The formulas are recited once only, or several times in succession (M. V. 23, 31, 32, 34, 65, 80); at times backward, at times forward (M. V. 65, 68); in combinations or in permutations (M. V. 30); sometimes in gematria (compare Kircher, "Arithmologia," Rome, 1665; M. V. 628); sometimes abbreviated (M. V. 23); on other occasions with one letter left off at a time.

**BIBLIOPHILES, JEWISH.** See **BOOK COLLECTORS.**

**BIBLIOTHÈQUE NATIONALE, PARIS:** National library of France, founded in 1354. The Hebrew manuscripts in this library have always stood at the head of the Oriental collections, their number now amounting to 1,390. In importance and number of volumes, this library is second only to the Bodleian at Oxford.

The foundation of the Bibliothèque Nationale dates from the time of Charles V. of France, about the middle of the fourteenth century; though it is not known whether any Hebrew manuscripts were contained in the libraries of Charles V. and Charles VI. It is not even certain that manuscript No. 715, said to be "written in the letters of the Jews," was really a Hebrew book (Delisle, "Le Cabinet des Manuscrits," i. 48, note 1). A number of Hebrew books might have been expected to be found in these two

collections. Charles V. ordered a selection to be made among the Hebrew manuscripts at the Trésor des Chartes, and in 1372 these manuscripts were brought to the Louvre. A second collection of Hebrew books was delivered to Gilles Mallet about 1397. It comprised 44 volumes, 4 rolls, and portions of the Bible and the Talmud which had been found in the house of a Jew living in the Faubourg St. Denis after the Jews were expelled from Paris (V. H. Sauval, "Histoire et Recherche des Antiquités de la Ville de Paris," ii. 520). From this source have probably come the two French rituals confiscated during the reign of Philippe-le-Bel, and formerly preserved in the treasury (now Hebrew MSS. 634, 637). The Renaissance largely enriched the Hebrew stores of the library. Guillaume Pellicier, bishop of Montpellier and ambassador of France to Venice, says in a letter addressed to King Francis I., Aug. 29, 1540, "Sire, it will please you to learn that since I have been in this city by your command, I have, up to the present time, kept a force of copyists at work, and now I still have eight of them, including the Hebrew, who write for me the rarest works I am able to find in this language" (Delisle, *ib.* i. 155). These are, without doubt, the books in the library the bindings of which bear the arms of Henry II.

In an inventory of the library of Blois, which in 1544 was united with that of Fontainebleau, there are only 3 Hebrew volumes. Henry II. had in all only 30 Hebrew manuscripts, to which 20 volumes were added in 1599 from the library of Catherine de Médici. These volumes came originally from the collection of Gilles de Viterbe (see the report of M. Taschereau, published at the head of the catalogue of this collection). On Jan. 12, 1668, Louis XIV. ordered an exchange of printed books and manuscripts between the library of the College Mazarin and that of the king. In this way 200 manuscripts were added to the king's collection.

On May 18, 1673, Dupont, consul of France at Aleppo, announced to Minister Colbert that Father Besson had procured about 50 volumes from private libraries in the country, and from some of the synagogues. Under the librarianship of Baluze no less than 60 Hebrew manuscripts were added (Delisle, *ib.* p. 446). One hundred and twenty-seven Hebrew manuscripts were in the collection of Gilbert Gaulmin, 14 in that of the archbishop of Reims (1700), and 12 in that of Thevenot. The Colbert collection enriched the library by 171, so that in 1739 the total number of manuscripts was 516.

It is worthy of note that the general centralization of books by the French republic has brought to the library a considerable number of Hebrew manuscripts: 207 from the Paris churches of the Oratory, 34 from the churches of St. Germain. At the same period as many as 258 came to the library from the Sorbonne, Hebrew books having been a part of the library there as early as 1414 (Delisle, *ib.* iii. 41, note), and the collection of Oriental manuscripts having been enriched by those of the Marquis de Brières, which came into the Sorbonne collection with the library of Cardinal Richelieu. These can be recognized by the cardinal's arms on their covers. In modern times important gifts have enriched the

collection. In 1862, 8 Hebrew manuscripts were added from the Trésor des Chartes, and in 1867 the Empress Eugénie presented to the library a Bible, for which, because of its illustrations and supposed antiquity, she had paid 25,000 francs ("Rev. Et. Juives," xxxvi. 112). About 1872 two further additions were made by Baron James Edouard de Rothschild (Nos. 1322, 1323). All departments of Jewish literature are represented in this collection, besides works in Aramaic, in Arabic (Hebrew characters), and in Judæo-Spanish.

The most ancient Bible is dated 1286; others are of the fourteenth century ("Archives Israélites," 1894, iv. 397). A number of these volumes

**Bibles.** coming from Italy and the Orient are of the fifteenth or sixteenth century.

Others are of more recent date. A few volumes contain miniatures: e.g., No. 584, *Sefer ha-Mizwot*, in Arabic; No. 586, *Mishagim* in Judæo-German; Nos. 592, 593, 617, Catalan and Italian rituals; Nos. 643, 644, 646, and especially No. 1,333, containing a curious *Passover Haggadah* according to the Oriental rite, and dating from the beginning of the fifteenth century ("Jour. Asiatique," 1892, i. 172-185).

In addition to the manuscripts already mentioned, fragments of others have been found within printed volumes, among these being an elegy on Joseph Caro ("Rev. Et. Juives," ix. 304); and Hebrew manuscripts found in non-Hebrew books, such as the three autograph letters of David Cohen de Lara, incorporated in the French manuscript 19,213 (*ib.* xi. 95); or some business memoranda in semi-cursive Hebrew of the twelfth and thirteenth centuries, found in Latin manuscript No. 5097.

As regards the cataloguing of this collection, the beginnings were made by a converted Jew, Louis de Compiègne, in 1689, by order of Louis XIV. (Franklin, "Les Anciennes Bibliothèques de Paris," ii. 190). This work, revised by the Abbé Renaudot, served as a basis for the Hebrew part of the catalogue of Oriental manuscripts, printed in 1739. The deficiencies of this latter work were soon noticed; and a Jew of the Comtat Venaissin, Bernard de Valabrègue, examined the manuscripts,

**Cataloguing of the Collection.** while Richard Simon gave an account of the Hebrew manuscripts of the Oratory (at this period this latter collection was not yet incorporated with the Bibliothèque Nationale). It was, however,

found necessary to have the catalogue completely revised. From 1838 to 1850 this work was done by S. Munk. When in 1850 his eyesight failed, he was superseded by Joseph Derenbourg. The catalogue published in 1865 contained 1,313 manuscripts and 16 Samaritan works. Since that time the collection has been increased by about 75 manuscripts ("Rev. Et. Juives," xxxvii. 249). The work of cataloguing the collection was completed by M. Zotenberg, who added a description of the Samaritan manuscripts.

In regard to the printed books a different system of grouping has been followed. In the Bibliothèque Nationale printed books are distributed according to subject-matter. The number of books in the Bibliothèque Nationale in 1897 was 2,048,893; and as the Hebrew works are distributed among these, it is no

easy task to ascertain their existence in the library. Thus almost all the incunabula enumerated by De Rossi may, it is true, be found there, but in order to discover them, they must be laboriously sought in the numerous subject-divisions.

From a collection of valuable objects of ancient, mediæval, and modern times, Louis XIV. constituted the Cabinet de France, or, as it is called, the "Cabinet des Médailles et Antiques." The Hebraica in this collection are to be found in the three main sections denominated: (a) ancient medals;

(b) early Middle Ages; (c) modern Jewish specimens. The series of ancient Jewish coins includes 28 from Galilee, 204 from Samaria, and 417 from Judea.

The last number, the greater part of which are Greek or Roman coins, includes also the coins of Simon Maccabee (9 in silver and 11 in bronze), as well as the coins minted during the insurrection of Bar Kokba. S. Munk, in his "Palestine," has reproduced, on plate 21, 6 of these Maccabean coins (Reinach, in "Rev. Et. Juives," xv, 56, xvii, 42, xviii, 304).

After the medals come in chronological order the cups with magic inscriptions in Judæo-Aramean. Of these the Cabinet contains several specimens (see BOWLS, MAGIC).

In addition to these, there are specimens with texts in square characters of comparatively modern date. Some are in the shape of coins, upon which are Hebrew inscriptions. These date from the sixteenth or seventeenth century ("Rev. Et. Juives," xxv, 132, xxvii, 317). There are about forty specimens in this class. They comprise: (a) inscriptions with historic names recalling the rabbinical traditions of coins referring to Abraham and Sarah, to Isaac and Rebekah (B. K. 97b); some of these referring to Moses, others to Aaron, David, and Solomon; (b) amulets and talismans; (c) magic squares and astrological symbols; (d) Christian documents with Hebrew and Latin words taken from the Bible. There is also a medal said to have come from Lyons (J. Derembourg, in "Revue Israélite," i, 4-8), a cameo with the name of Gracia Nassi ("L'Officiel," Nov. 7, 1877), and a Jewish seal of the fourteenth century (A. Blanchet, in "Revue Numismatique," 1889, p. 483). Finally, there are a number of talismans called Abraxas ("Rev. Et. Juives," xxxi, 149; Catalogue von E. Babelon, No. 27).

The department of engravings in the Bibliothèque Nationale comprises 2,300,000 pièces, preserved in 145,000 volumes and 4,000

portfolios (Delaborde, "Le Département des Estampes à la Bibliothèque Nationale," p. 6). This collection was originally made by the Abbé de Marolles in 1667. The Jewish subjects can be found by means of the catalogues and alphabetical lists of engravings. Among these may be mentioned the engraving of a mediæval anti-Jewish statue, called the "Truie de Wittenberg" (Kaufmann, in "Rev. Et. Juives," xx, 269, xxiii, 313), and an engraving of the so-called martyrdom of St. Simon of Trent in 1472, a xylograph of some interest and one frequently described.

M. S.

**BICK, JACOB SAMUEL:** Austrian author; born in the eighteenth century; died in Brody, 1831. He was a satirical writer of force and ability, and one of the ablest pioneers of the "haskalah" (culture) movement among the Jews of Galicia. His contributions to the "Bikkure ha-'Ittim," "Kerem Hemed," and other Hebrew publications of his time contain strong pleas for the spread of secular knowledge and industry among the Galician Hebrews; and, like all his contemporaries among the Maskilim or progressionists, he was strongly in favor of agricultural pursuits by Jews. He died of cholera in 1831 and left several manuscript works, both in prose and poetry, which were burned in the great conflagration in Brody in the spring of 1835, when the house of his son-in-law, Isaac Rothenberg, was totally destroyed. Bick was highly respected for his piety, learning, and ability; and the destruction of his literary remains was at the time deplored as a great loss.

BIBLIOGRAPHY: *Kerem Hemed*, I, Vienna, 1833, note to Letter 22; *ib. ii.* 131.

P. Wt.

**BICKELL, GUSTAV WILHELM HUGO:** Christian Hebraist and professor in the University of Vienna; born July 7, 1838, at Cassel. After graduating at Marburg, where he studied Semitic languages, he renounced Protestantism and entered the Roman Catholic Church, becoming two years later (1867) professor of Christian archeology and Semitic languages in the University of Innsbruck. In 1892 he was called to the University of Vienna. Bickell's works include the following on Hebrew subjects: "Grundriss der Hebräischen Grammatik," in two vols., Leipsic, 1869-70 (English translation by S. I. Curtiss, Leipsic, 1877); "Dichtungen der Hebräer," in three vols., according to the versification of the original text, Innsbruck, 1882-84; "Kohelet's Untersuchung über den Wert des Daseins," *ib.*, 1886; "Kalilag und Damnag," Leipsic, 1876; "Der Prediger," 1884; "Krit. Bearbeitung der Proverbien," in "W. Z. K. M." 1891; "Kritische Bearbeitung des Jobdialogs," in "W. Z. K. M." 1893, and "Das Buch Job" (metrical translation), 1894. His construction of Job and Kohelet is given in popular form in Dillon's "Sceptics of the Old Test.," 1895. He has published also the "Carmina Nisibena" of Ephraem Syrus, 1866, and, from Syrian Fathers, "Ausgewählte Gedichte," 1872, and "Ausgewählte Schriften," 1874. For his critical studies of Ben Sira, see "Zeitschrift für Theologie und Kirche," 1882, and "W. Z. K. M.," vol. xiii.

**BIDKAR:** A captain under Jehu, by whom he was ordered to cast the body of Jehoram into the field of Naboth (II Kings ix, 25).

J. JR.

G. B. L.

**BIDPAI FABLES IN HEBREW.** See KALILA WE-DIMNA.

**BIE, OSKAR:** German archeologist and professor at the Technische Hochschule at Charlottenburg, near Berlin; born at Breslau Feb. 9, 1864. He studied at the gymnasium and university of his native town. Besides his position at the Technische Hochschule, he occupies at present (1902) that

of editor-in-chief of the "Neue Deutsche Rundschau." Bie is the author of the following works: "Die Museen in der Antiken Kunst," 1886; "Kampfgruppe und Kämpfertypen in der Antike," 1890; "Zwischen den Künsten," 1895; and "Das Klavier," 1898. He is a convert to Christianity.

S.

**BIEDERMANN, MICHAEL LAZAR:** Austrian jeweler and merchant; born at Presburg, Hungary, Aug. 13, 1769; died at Vienna Aug. 24, 1843. When fifteen years old he went to Vienna and was apprenticed to an engraver. In 1787 he gained a prize for modeling in wax, and in 1789 one for engraving. Prior to 1792 he was known as Michael Lazar, but in that year he received permission to live in Vienna as a seal-engraver, and to adopt the name Biedermann. He was entrusted with the engraving of the imperial seals. Thus he at once became prominent in his trade, and by 1800 was enabled to open a jeweler's store.

Visiting the fair at Leipsic, Biedermann became interested in the wool trade, and in 1802 commenced business as a wool merchant. Here, as in the jewelry business, he was eminently successful. In 1807 an English firm bought wool from him at the Leipsic fair to the amount of \$300,000. In 1808 he received from the Austro-Hungarian government a permit to trade as a wholesale merchant, and through his energy a wide field was opened

Michael Lazar Biedermann.

to Austrian agriculture, and to the manufacture of woolen goods, the methods of which he greatly improved. He succeeded in making his firm one of the leading houses of Austria.

Biedermann took great interest in the welfare of the Jewish community of Vienna, of which he was the representative from 1806 till his death. In 1807 he instituted a fund for the sick, and in 1839 a pension fund for officers of the community.

In 1830 Biedermann received the title of "Jeweler to the Emperor of Austria."

Jahrhunderts*, zunächst aus Oesterreich-Ungarn, part i., p. 9, Vienna, 1882; Kohut, *Berühmte Israelitische Männer und Frauen*, p. 377, Leipsic, 1900.

F. T. H.

**BIEGELEISEN, HENRY:** Polish critic and author; born 1855 in Galicia. He studied at the universities of Lemberg, Munich, and Leipsic, receiving from the last named the degree of doctor of philology for his treatise, "Characteristik Trembecki's, ein Beitrag zur Slavischen Litteratur-Geschichte" (Leipsic, 1882). He is now (1902) director of the Hebrew school at Lemberg.

Biegeleisen has published: "Franciszek Bohomol-

nik," 1879; "Tymon Zalorowsky," in the "Athe-neum," 1883; "Pan Tadeusz Mickiewicz," a study of literary esthetics, Warsaw, 1884; "Julius Slomatzky," 2 vols., Lemberg, 1895; and "Posthumous Letters of Slomatzky" ("Genezis z Ducha"), etc., 1886. He has also contributed to various periodicals, among other articles, the following: "Karol Dickens"; "Fiziognomika w Smietle Nojnomszych Badan"; "Ewolucja Piskno Przyroda"; and "Henry Ibsen."

**BIBLIOGRAPHY:** Orgelbrand, *Encyklop. Powszechna*, Warsaw, 1898.

L. E.

**BIEL (BIENNE):** Town in the canton of Bern, Switzerland. It had Jewish inhabitants as early as the city of Bern itself. In 1305 a few Jewish families were naturalized in consideration of a yearly tax of fifty pfennigs each. According to the patent or "Jew-letter" granted them (see Ulrich, "Sammlung Jüdischer Geschichten in der Schweiz," p. 482, Basel, 1768), they were not to be hindered in any way in their trade or traffic. A pledge left in pawn by a Christian could be sold by them after the lapse of a year and forty days. Curiously enough, weapons were allowed to be taken in pawn. In case of emergency these had to be delivered, even on the Sabbath, against adequate security, to the mayor in presence of two or three councilors; when the danger was past, they were to be returned as quickly as possible to the Jews. Nothing further is known concerning the Jews of Biel; even the date of their expulsion is unnoted. At present (1902) there are at Biel about forty-five Jewish families, who hire their synagogue, maintain a teacher, and provide a fund for the poor and the sick.

D.

M. K.

**BIELGORAJ:** A district town in the government of Lublin, Russian Poland. According to the "Zuk ha-'Ittim," during the uprising of the Cossacks under Chmielnicki (1648-49), all the Jews of Bielgoraj were killed, among them Rabbi Hirsch, brother-in-law of the author of that work, and his brother Rabbi David. Its Jewish population in 1890 was 3,430, in a total population of 7,812. In the district there were 6,811 Jews in a total population of 88,667. The Jews possess one synagogue and three prayer-houses, a Hebrew school, and a hospital. A large number of the Jews of Bielgoraj are artisans.

**BIBLIOGRAPHY:** *Zuk ha-'Ittim*, Venice, 1556; *Regesty i Nadpisu*, No. 924, St. Petersburg, 1899; *Entzyklopedicheski Slovar*, v., St. Petersburg, 1896.

H. R.

**BIELTZY:** District town of the government of Bessarabia, Russia. At the census of 1897 the population was 18,526, including over ten thousand Jews, most of them engaged in handicrafts, but some in agriculture and commerce. There were at the same date 1,188 Jewish artisans (25 per cent of them tailors or tailoresses). In the neighborhood of Bieltzy there are many Jewish farmers, cultivating their own or rented land; 50 of them raise tobacco on rented farms covering about 405 acres of land. The economic condition of the Jews has grown worse since the government monopolized the liquor trade (1896), in which 300 Jewish families were engaged.

In 1898, 200 Jewish families petitioned for charity at Passover, and also for coal during the winter. There is a Jewish hospital, a poor-house (maintained at an annual expense of 3,700 rubles), and a Talmud Torah, attended by 135 pupils. The statistical information given here was supplied by the Jewish Colonization Association of St. Petersburg, Russia.

H. K.

S. J.

**BIEN, JULIUS:** American lithographer; son of Emanuel M., hazan, lecturer, and lithographer; born at Naumburg, near Cassel, Hesse-Nassau, Sept. 27, 1826. He was educated at the Academy of Fine Arts, Cassel, and at Stüdel's Institute, Frankfurt-on-the-Main, and studied under Prof. M. Oppenheim of the latter place. Bien came to New York, established a lithographic business there in 1850, and was successful in scientific production, issuing many geographical and scientific works, such as atlases and geological and hydrographic charts. He received medals and diplomas at various exhibitions: Philadelphia, 1876; Paris, 1878; Chicago, 1893; and Paris, 1900. He was president of the National Lithographers' Association from 1886 to 1896, and is a member of numerous scientific societies. Bien was president of the order B'NAI B'RITH (1854-57 and 1868-1900), and instrumental in giving it an international character.

A.

**BIENSTOK, LEV MOISEIEVICH:** Russian writer, educationist, and communal worker; born April 6, 1836, at Lnkachi, government of Volhynia; died Oct. 22, 1894, at Jaffa, Palestine. He received his first education in theheder and in the Russian public school at Turin, district of Kovel; in 1847 entered the gymnasium at Jitomir, and in 1848 the Hebrew Theological Seminary at the same place, graduating from the latter in 1858. He was appointed teacher at the Jewish school of Starokonstantinov, and acted as rabbi of the Jitomir community from 1859 to 1862. From 1863 to 1867 he was instructor in the Jewish religion at various gymnasia in Jitomir.

In 1867 Bienstok was appointed assistant editor of the "Volynskiya Gubernskiya Vyedomosti," the official newspaper of the government of Volhynia, and from 1867 to 1882 was adviser on Jewish matters ("uchony yevrei") to the governor of Volhynia. In 1880 Bienstok settled at St. Petersburg as secretary of the Jewish community there; but after the anti-Jewish riots he returned to Jitomir, and in 1892 the Russian-Jewish Aid Society for Agriculturists and Artisans of Odessa appointed him as its representative in Jaffa. There he brought order into the affairs of the society, and reported on the condition of the agricultural colonies of Palestine.

Bienstok was one of the pioneer collaborators of the first Russian-Jewish periodicals, "Razsvyet" and "Sion." He also contributed to the Russian periodicals: "Moskovskiya Vyedomosti," "Russki Vyestnik," "Sovremennaya Lyetopis," and others.

Bienstok was the author of: (1) "Otzy i Dyety" (Fathers and Sons), a translation of the Hebrew novel, "Abot u-Banim," by S. Abramovich; (2) "Yevreiskiya Zemledyelcheskiya Kolonii Yekaterinoslavskoi Gubernii 1890" (On the Jewish Agricul-

tural Colonies of the Province of Yekaterinoslav in 1890, (St. Petersburg, 1890). Among his magazine articles on Jewish topics were: "Vopros ob Yevreiskikh Uchilishchach," a paper on Jewish schools, in "Russki Vyestnik" for 1866, Nos. 11, 12; "Yevrei Volynskoi Gubernii," a series of articles on the Jews of the government of Volhynia, and containing valuable information on the ethnography of the Russian Jews (published in the "Volhynskiya Gubernskiya Vyedomosti" for 1867; "Iz Nedavnavo Proshlavo," in the same periodical 1867; "Otkrytoe Pismo U. Aksakovu" in "Voskhod," 1882, No. 4; "Vtoroe Otkrytoe Pismo Aksakovu," in "Russki Kurier," 1883, No. 251, and "Vospominanie o Finlyandii," reminiscences of Finland, in "Odesski Listok" for 1883, Nos. 187, 189, 201, 202.

**BIESENTHAL, JOACHIM HEINRICH**

(**RAPHAEL HIRSCH**; pseudonym, **Karl Ignaz Corvé**): Theologian and author; born at Lob-sens, Posen, 1800; died in Berlin, 1886. He was destined for the rabbinate; but while attending the University of Berlin (1827-35) he made the acquaintance of the Oriental scholar Wilhelm Vatke, with whom he studied Christian theology. In 1837 he published "Auszüge aus dem Buche Sohar, mit Deutscher Uebersetzung," in which he tried to prove from Jewish literature the doctrine of the Trinity and other Christian dogmas.

The following year he was converted to Christianity, joined the Evangelical Church, and entered the service of the Jewish Mission of Berlin. In 1844 he became a member of the London Missionary Society, and engaged in missionary work among the Jews. His literary activity continued unabated.

Biesenthal's works, which give evidence of an extensive knowledge of rabbinical literature, and a thorough command of the Hebrew language, include: "Hebräisches und Chaldäisches Scholwörterbuch über das A. T." (1836-37); David Kimhi's ספר הישרים (in conjunction with F. S. Lebrecht), Berlin, 1838; "The Book of Psalms; Hebrew Text, with a Commentary," Berlin, 1841; "The Book of Isaiah; Hebrew Text and Commentary," Berlin, 1841; "Chrestomathia Rabbinica sive Libri Quatuor, Complectens Analecta e Rerum Scriptoribus, Cosmographis, Grammaticis, Exegetis, Philosophis, Cabalisticis et Poetis, Partim e Codicibus Sumta, cum Versione Latina et Vitis Scriptorum," part i., Berlin, 1844; "Zur Geschichte der Christlichen Kirche in Ihrer Ersten Entwicklungsperiode bis zum Anfange des 4ten Jahrhunderts," in which he makes much use of Talmudical material, and endeavors to prove that the Jews stood in close connection with the early Christian Church; and a Hebrew translation of the Epistles to the Hebrews and the Romans, with a commentary based on rabbinical lore, and a biography of Paul, 1857-58.

In 1840, at the time of the blood accusation at Damascus, Biesenthal, under the name "Karl Ignaz Corvé," defended the Jews in his interesting work, "Ueber den Ursprung der Wider die Juden Erhobenen Beschuldigung bei der Feier Ihrer Ostern sich des Blutes zu Bedienen, Nebst Kurzer Darstellung

des Jüdischen Rituals in Beziehung auf den Genuss des Blutes," Berlin, 1840. Biesenthal received the degree of doctor of theology from the University of Giessen.

**BIGAMY.**—Biblical Data. See POLYGAMY.

—In Rabbinical Literature: According to Merrill's "Encyclopedia of Law," ii. 192, bigamy consists in "going through the ceremony of marriage with another while a former husband or wife is still alive and not divorced." This definition finds no place in rabbinical law, according to which, in order to constitute bigamy, the second marriage must be a lawful union. Hence it follows that bigamy can be committed only by a man, since a woman who is neither divorced nor widowed can not enter at all into marriage with another, and any cohabitation is considered adultery.

In Biblical as in Talmudical times polygamy was a recognized institution; hence there could be no question of bigamy. The singular opinion in the Talmud, that a wife can compel a divorce from her husband if he take a second wife, seems to have remained without following. So long as a man could support them, he was free to have as many wives as he chose, even against the wish of his first wife (Yeb. 65a, below; Maimonides, "Yad," Ishut, xiv. 3). The rabbinical prohibition against bigamy dates from the beginning of the eleventh century; Rabbi Gershon b. Judah of Metz forbade it under penalty of excommunication. His decree was accepted with-

out opposition by the French and German Jews; though not in the Orient and in Spain and Portugal, where his authority was questioned. Polygamy is still actually to be found among the

Jews in Oriental countries where it is permitted by the law of the land.

Among the Jews of Europe, bigamy is now a crime in the eyes of religion, because of the prohibition of Rabbi Gershon, and because custom sanctions monogamy; he who transgresses is excommunicated. A curious suggestion that R. Gershon's prohibition was intended to hold only until the year 1240, the beginning of the fifth millennium of the Jewish calendar (Joseph Colon, *Responsa*, No. 101), was never recognized; the great majority of the "Poskim" agree that the prohibition is in perpetuity.

The following cases are not to be considered as constituting bigamy. In localities where the levirate marriage (see LEVIRATE MARRIAGE) is practised, a married man is allowed to marry his brother's widow under certain circumstances as prescribed. But this view is steadily opposed by the majority of

German rabbis (Shulhan 'Aruk, Eben ha-'Ezer. 1. 10). The same difference of opinion rules also in the case of a barren marriage; many authorities permit the husband to take a second wife when a union has continued childless for ten years. When a wife becomes hopelessly insane, the husband may take a second wife only

when the case has been investigated by 100 rabbis from three different countries, and permission given by them. According to most authorities a man may take a second wife when his first one, of openly immoral character, or one who has without reason abandoned her husband, refuses to go through the usual form of divorce. When a Jewish wife embraces another religion, thus, according to rabbinical sentiment, making it impossible for her husband to live happily with her, the latter may marry again without formality in some localities. In other places, however, the bet din appoints some person to receive a letter of divorce on behalf of the wife (Shulhan 'Aruk, l.c.). If a Jew commit bigamy, all the resources of Jewish justice are invoked to compel him to divorce his second wife, and the first wife can not be compelled to live with a bigamist. Compare DIVORCE, POLYGAMY.

**BIKHAKHANIM:** Reigning princess of the Taman peninsula, Crimea. She was married in 1419 to the Genoese Jew Simeone de Guizolfi, who through this marriage became possessor of that country, where one of his heirs, Zacharias de Guizolfi, was still reigning in 1482. The Russian historian F. K. Brun, in "Trudy Pervavo Arheologicheskavo Syezda v Moskve," 1869, ii. 386, suggests that the name of the princess might not have been "Bikhakhanim," but "Bikhakhatun," and that, if so, she was the daughter of the Georgian prince Bek II. (d. 1391), the ruler of Samtze and Clarzhet (Brosset, "Hist. de la Géorgie," ii. 206). See GUIZOLFI, SIMEONE DE.

**BIKKURE HA-'ITTIM** ("First-Fruits of the Times"): An annual edited and published in Vienna, 1820-31, by S. J. Cohen. It first appeared as a supplement to the Hebrew calendar עתים מוזנים, and was intended for young people only. In 1822 it ceased to be a mere supplement, and became an independent magazine. It was adopted by the Galician MASKILIM as their organ for the purpose of fostering culture and education among the Galician Jews. According to Delitzsch, the "Bikkure ha-'Ittim" became the organ of the New-German school of poetry in Austria, the influence of Schiller being as apparent in this magazine as was that of Lessing in the "Meassef" (see HA-MEASSEF).

The influence of the "Bikkure ha-'Ittim" on the European Jews of the first half of the nineteenth century was inestimable. The magazine became a kind of college of Jewish learning for the Israelites of those days. Its success was largely due to the energy and indefatigable labor of its editor, who was a man of considerable literary ability and an ardent lover of Jewish literature. The first numbers, with their curious mixture of Hebrew and German articles (the latter being in Hebrew characters), and with their many reprints of articles from the "Meassef"—which had ceased to exist—proved to be rather inferior literary fare. Gradually, however, the magazine improved both in style and in matter, and finally became the literary resort of the greatest Hebrew scholars of the age, men like S. D. Luzzatto, S. L. Rapoport, and I. S. Reggio contributing to it for many years. The "Bikkure ha-'Ittim," in fact, stimulated the powers of many promising young Hebrew writers. Thus the great Hebrew stylist, Isaac Erter, published therein some of those papers which are now so greatly admired for their elegant composition and stinging wit (see ERTER, ISAAC).

As the name of the magazine signifies, it was one of the forerunners of modern Hebrew journalism; and it was undoubtedly one of the factors in the revival of modern Hebrew.

M. RA.

**BIKKURIM** ("First-Fruits"): Name of the last treatise of Seder Zera'im. It treats of the way of carrying out the commandment concerning first-fruits mentioned in Deut. xxvi. 1-11. The commandment includes two things: (1) the bringing of the first-fruit, and (2) a declaration to be made by him who brings it, that he owes everything to the kindness of God toward the Israelites, from the times of the Patriarchs up to the present day. The treatise deals with this subject in three chapters.

Chapter i. deals with the conditions that necessitate the bringing of the first-fruits. The Mishnah enumerates three classes of landowners: (a) Those that can not bring the first-fruits, either because the fruit is not entirely the product of their land, e.g., when part of the root is outside their land; or because they are not the real or the legitimate owners of the land; or because the produce of their land includes none of the seven kinds enumerated in Deut. viii. 8, or is only of inferior quality unfit for bik-

kurim. (b) Those that bring the first-fruits but do not make the declaration; viz., proselytes, freed slaves, guardians who manage the property of orphans, delegates, females, half-males, and undeveloped persons (ANDROGYNOS and ΤΥΤΤΥΜ). (c) Those that bring the first-fruit and make the declaration; viz., the owners of land (including those who have bought three trees growing in another man's land) producing some of the seven kinds, of average or superior quality; provided they bring the first-fruit between the Feast of Weeks and the Feast of Tabernacles. When brought after the festival, the declaration must not be made.

In chapter ii. a comparison, as to legal classification; is made between "terumah" (given to the priest), "ma'aser" (the second tithe, which had to be brought to Jerusalem and consumed there), and "bikkurim" (to be brought to the Temple and given there to the priests). Other similar legal comparisons are given: between citron, trees, and vegetables; between the blood of human beings and that of cattle and creeping things; and between beast, cattle, and "koy" (כוי), an intermediate between cattle and beast.

Chapter iii. contains a full account of the way the first-fruits were brought to the Temple.

A fourth chapter, containing a comparison between the laws referring to man, woman, and androgynos (intermediate between man and woman), has been added by some of the editors of the Mishnayot. It is part of the Tosefta Bikkurim. The Tosefta by this name contains two chapters on a line with the Mishnah.

There is no Gemara in the Babylonian Talmud. The Palestinian Talmud has Gemara on Bikkurim, in which the laws of the Mishnah are discussed in the usual way, with a few digressions, noteworthy among which is that on Lev. xix. 32, "Thou shalt rise before the hoary head and honor the face of an old man," and on the value of the title "zaken" (elder) conferred on scholars in Palestine and outside Palestine (Yer. iii. 65c).

J. SR.

M. F.

**BIKKURIM:** A Hebrew annual that appeared in Vienna for two years (1864, 1865), Naphtali Keller being its editor and publisher. The greatest Hebrew scholars of the age, as J. H. Weiss, Jelinek, Reifmann, Lewisohn, Gottlob, Meyer Friedmann, Letteris, and others, were among its contributors. Before Keller had time to prepare the second volume for publication, he died, and Jelinek, together with Meyer Friedmann, took up the work of arranging all the material Keller had amassed; and with the publication of this volume the issue was discontinued. The two volumes published contain little poetry or fiction, and are almost exclusively devoted to questions of Jewish scholarship, history, and literature.

G.

M. RA.

**BILDAD** (LXX., Βαζδάδ): One of the three friends of Job (Job ii. 11). The meaning of the name is not clear; opinions of scholars vacillate between rendering "Bel has loved" (compare "Eldad," Num. xi. 26 *et seq.*, and "Elidad," Num. xxxiv. 21; Nöldeke, "Z. D. M. G." xlii. 479) and regarding it as a softened pronunciation of "Bildad," which would then be identical with "Bir-dadda" that appears in

Assyrian inscriptions. Delitzsch ("Wo Lag das Paradies?" p. 298) mentions also Bedad, the father of the Idumean King Hadad. Bildad was descended from Shuah, a son of Abraham and Keturah, mentioned in Gen. xxv. 2, and now generally associated with the place Sôhu on the Euphrates, south of Carchemish (compare Delitzsch, *l.c.* pp. 297 *et seq.*; "Zeitschrift für Keilinschriften," ii. 91 *et seq.*; Glaser, "Skizze," ii. 446). Bildad appears three times in the dialogue with Job; in the first speech (Job viii.) he dwells chiefly on the wisdom of the fathers, who preach the destruction of the wicked; in the second speech (*ib.* xviii.) he pictures this destruction; and in the third speech (*ib.* xxv.) he confines himself to a few words, because he has in reality nothing more to say. He speaks of God's "dominion and fear . . . in His high places" only to emphasize man's impurities and imperfections, and leaves it to Job to apply the doctrine to his own case. All attempts to lengthen this last short speech by additions from other parts of the book have proved failures, and are indeed unnecessary (compare Budde, "Das Buch Hiob," pp. 142 *et seq.*).

J. JR.

W. N.

**BILEAM.** See BALAAM.

**BILGAH.**—**Biblical Data:** One of the twenty-four divisions of the priests who officiated in the Temple. According to I Chron. xxiv. 14, Bilgah is the fifteenth in order, and is immediately preceded by that of Jeshebeab. Among the Babylonian exiles who returned, there was also a priest, Bilgai (Neh. x. 9 [A. V. 10]) or Bilgah (*ib.* xii. 5) by name, whose descendant, Shammua, became the head of a priestly house (*ib.* xii. 18). In the Septuagint the names read Βελγιά, Βελγιάί, and Βελγιάς; and Josephus mentions a certain Meirus as a son of Belgas ("B. J." vi. 5, § 1). The traditional meaning given the name is "rejuvenation." Modern lexicographers explain it as "cheerfulness."

—**In Rabbinical Literature:** According to a Talmudic tradition preserved in "Halakot Gedolot" (ed. Hildesheimer, p. 631), Bilgah was assigned to the group which officiated on the second and sixth days of the Feast of Tabernacles. The priests, when entering upon their duties, received their share in the northern part of the Tabernacle, because this was near the seat of their activity. The section assigned to each division of the priesthood was furnished with an iron ring fastened to the floor, for the purpose of securing the animal designed for slaughter, and there were accordingly twenty-four openings in the wall where the knives used for slaughtering were kept. Bilgah alone received his share in the south, his ring being nailed down, and his wall-closet tightly sealed, as a punishment for the apostasy of a woman of that house by the name of Miriam, who, during the Greek dominion under Antiochus Epiphanes, had denied her faith and married a hipparch (Tos., Suk. iv. 28; Suk. 56b; Yer. Suk., end; "Rev. Et. Juives," xxxix. 54). It is further related that when the Greeks forced their way into the Temple, this woman beat her sandals upon the altar, crying: "Wolf, wolf [Λίκος, λίκος], thou hast swallowed the substance of Israel, but hast deserted us in the day of our need!"

According to another opinion, the priests of Bilgah delayed too long in entering upon the performance of their functions; so that those of the division Jeshebeab were compelled to act in their place, and consequently received the prerogatives of Bilgah (Tos., *l.c.*; Yer. Suk., end); to which the Jerusalem Talmud adds that in this instance the division Bilgah was neither abolished nor amalgamated with the other twenty-three divisions, because this would have interfered with the ancient institution. The opinion of Buxtorf, that Miriam, daughter of Bilgah, was a member of a sacred order of virgins, deserves mention only as a curiosity. Kalir's dirge, מִצְבָּה יִצְבָּה, which, on the basis of the Midrash, mentions the divisions of the priesthood, contains no reference to Bilgah; see art. BENJAMIN.

Juives*, xxxix. 54; Rahner, *Die Hebräischen Traditionen in den Werken des Hieronymus*, p. 58; Grätz, *Gesch. der Juden*, ii. 434, note 1.

K.

S. KR.

**BILHAH:** A locality in southern Judea (I Chron. iv. 29), evidently the same as "Balah" (בלה). Josh. xix. 3) and "Ba'alalah" (בעלה), Josh. xv. 29).

G.

W. N.

**BILHAH** (בלהה); LXX. Βαλλά; but in I Chron. vii. 13 Βαζάου or Βαζαάου.—**Biblical Data:** Rachel's handmaid, given by Rachel as a concubine to Jacob, to whom, according to Gen. xxx. 3 (compare Gen. xxx. 29, xxxvii. 2), she bore Dan and Naphtali upon Rachel's knees. The expression signifies that Rachel, who is also represented as choosing the names "Dan" and "Naphtali," regarded them as her own children or actually adopted them. In Gen. xxxv. 22 (I Chron. v. 1) there is a reference to an incestuous intercourse between Bilhah and Reuben.

J. JR.

W. N.

—**In Rabbinical Literature:** According to Gen. R. lxxiv. 14, Bilhah was one of the daughters of Laban. When Rachel died she was replaced by Bilhah in Jacob's affections, and he took up his residence in her tent. This displeased Reuben, who saw in Bilhah a new and favored rival of his mother Leah; he therefore removed Jacob's couch from Bilhah's tent. It was to this episode that the Rabbis considered Jacob to allude in the farewell to his children (Gen. xlix. 4): "Because thou wentest up to thy father's bed" (Gen. R. xlviii. 4; somewhat different in Shab. 55b). After Jacob's death Bilhah was the "messenger" sent by the brothers to Joseph to crave his mercy (Gen. l. 16). They told her she had been deputed to relate to Joseph all the words of the parting blessing conferred by Jacob upon his favorite son; which untruth was regarded by them as permissible for the sake of peace (Tan., ed. Buber, iii. 18). This legend seems to have been contained in the passage, Gen. R. l. 16, as read by the ancients, Rashi, and Yalkut, although not found in modern editions.

K.

L. G.

—**Critical View:** It is no longer disputed that in this and in every other genealogical account, tribal and not personal relations are designated. Marriage symbolizes in these early traditions the fusion of two tribes originally distinct. The husband represented the stronger tribe and gave his name to both; and the wife represented the weaker which

merged in the stronger. If the weaker tribe was greatly the inferior of the stronger in authority and power, it was represented as a concubine (compare Stade, "Gesch. des Volkes Israel," 2d ed., i. 30). Consequently Bilhah (like Hagar, Keturah, and others) is to be regarded as the name of a tribe; even though there are no further indications of the fact, and the meaning of the name has not been determined. There is no proof of the accuracy of Ball's conjecture ("S. B. O. T." on Gen. xxx. 3) that "Bilhah" is connected with the Arabic "baliha" (simple, artless, easily misled).

Since Dan and Naphtali appear as the sons of the handmaid of Rachel, the mother of the tribe of Joseph, they are thus characterized as tribes of the second rank subordinate to Joseph. This is confirmed by such historic evidence concerning the tribes as has been preserved. It has not been determined whether Naphtali was always joined to Dan or was added at the period when the latter was driven from its settlement and forced to move to the north. It is possible that at first Dan was only a clan of the tribe of Joseph, like Benjamin, unsuccessfully trying to establish itself outside the original tribe; and it is not improbable that the portion of Dan which settled in the north came into intimate relations with the adjacent tribe of Naphtali. Such circumstances as these are reflected in the genealogical accounts.

According to Gen. xxxv. 22a, Reuben committed adultery with Bilhah; and according to Gen. xlix. 4, his downfall was due to his defiling his father's couch. The meaning of this story is doubtful. Dillmann, in his commentary on the passage, and Stade, *ib.* i. 151, think that reproach is attached to Reuben for adhering to the old custom by which the

son inherits his father's concubines, at a time when the other Israelitish tribes had adopted different customs. A point against this assumption is that there are proofs of the existence of the custom in the land west of the Jordan as late as the time of the kings

(compare II Sam. xvi. 21; I Kings ii. 13-25). The following explanation, suggested by Holzinger in his commentary on Gen. xxxv. 22, seems more likely: Reuben's position as first-born designates his greater power, which, however, was soon lost in one way or another. In the time of his strength he had tried to extend his power westward through the tribes descended from Bilhah; and later generations regarded this as a sin against Jacob. An analogy to this interpretation is to be found in the disapproval expressed in Gen. xxxiv. 30 of the treacherous attack on Shechem made by Simeon and Levi.

LEATHER BINDING OF "OR ANIM," 1537, TOOLED IN GOLD.  
(In the collection of Hon. Mayer Sulzberger.)

**BILL OF DIVORCE.** See DIVORCE.

**BILL OF EXCHANGE.** See EXCHANGE.

**BILL OF MANUMISSION.** See SLAVERY.

**BILSHAN.**—**Biblical Data:** One of the important men who came to Jerusalem from Babylon with Zerubbabel (Ezra ii 2; Neh. vii. 7). In I Esd. v. 8 he is called "Belsarus," which points to the form Belshar (= "Belshar-ussur" = O Bel, protect the king); while "Bilshan" points to "Belshumu" (His Lord). J. Halévy ("Revue Etudes Juives," x 3) translates the name "père de la langue" (אב לישון).  
G. B. L.

—**In Rabbinical Literature:** According to the Rabbis, Bilshan is not a proper name, but a surname to the preceding name, Mordecai. The latter was given this epithet because of his linguistic attain-

ments, Bilshan meaning "man of language" (בעל לשון). He not only spoke many languages—the seventy corresponding to the number of nations according to the Rabbis—but also understood the language of the dumb (Men. 64b, 65a). L. G.

**BINA BEN DAVID:** Cabalist, and rabbi at Loekaeze, Poland, in the middle of the seventeenth century. Bina was the author of "Zer Zahab" (Crown of Gold), Cracow, 1647, an alphabetical index to, and extracts and explanations from, the Zohar and Midrash. At the end are novellæ on many Talmudical passages. A considerable portion of the

point, a kind of three-cornered flap, to which ribbons or straps are sewed to tie the volume together. Such bindings are still largely used among the Jews of Yemen. Another kind of binding with overlapping parchment or leather was intended to protect the free edge, and on it the name of the book or the titles of parts of it were often marked. The stitching-thread often goes entirely through the book, making it difficult to open.

After the invention of printing rich owners frequently ornamented Bibles and prayer-books with clasps and mountings of gold and silver, this being especially the case with the prayer-books given by

SILVER BINDING OF A HEBREW PRAYER-BOOK.

(In the collection of J. Kauffmann of Frankfort-on-the-Main.)

work was translated into Latin by Knorr von Rosenroth in "Cabbala Denudata." Steinschneider ("Cat. Bodl." col. 545) incorrectly cites Bina as "Baruch" (see Zedner, "Cat. Hebr. Books Brit. Mus." p. 152).

**BIBLIOGRAPHY:** Steinschneider, *Cat. Bodl.* col. 545; Zedner, as above; Fürst, *Bibl. Judaica*, i. 290; Benjacob, *Ozar ha-Sefarim*, p. 161.

I. BR.

**BINDING:** The art of fastening together sheets of paper, leaves of parchment, or folios, and of covering them with parchment, leather, linen, or pasteboards. It was originally practised by the writer of the book. When books were written on scrolls, these were connected together by bands and protected from dust by mantles (see SCROLLS OF LAW). The earliest extant book-covers—those of the Cairo Genizah—are of parchment on both sides, long enough to overlap each other. The back ends in a

the bridegroom to the bride. To-day the book takes the place of the medieval *SIBLOXOS*-girdle, presented by the bride to the bridegroom. Pressed leather bindings are often decorated with flowers and garlands. The entire issue of a book is usually in the same binding, but occasionally it is issued in two different kinds of binding, as in the case of Simon Duran's *Responsa*, Amsterdam, 1738. Clasps of precious metal are found, often finely chased, and in the shape of a hand or representing the figures of Moses and Aaron. Bindings entirely of silver, intended as gifts for eminent persons, were used chiefly in Italy. Jewish binders were to be found at Prague and in almost every ghetto.

**BINDING AND LOOSING** (Hebrew, "asar we-hittir"; Aramean, "asar we-sheira"). Rabbinical term for "forbidding and permitting." The expression "asar" (to bind herself by a bond) is used in the Bible (Num. xxx. 3 *et seq.*) for a vow which prevents one from using a thing. It implies binding an object by a powerful spell in order to prevent its use (see Targ. to Ps. lviii. 6; Shab. 81b, for "magic spell"). The corresponding Aramean "sheira" and Hebrew "hittir" (for loosing the prohibitive spell) have no parallel in the Bible.

The power of binding and loosing was always claimed by the Pharisees. Under Queen Alexandra, the Pharisees, says Josephus ("B. J." i. 5, § 2), "became the administrators of all public affairs so as to be empowered to banish and readmit whom they pleased, as well as to loose and to bind." This does not mean that, as the learned men, they merely decided what, according to the Law, was forbidden or allowed, but that they possessed and exercised the power of tying or untying a thing by the spell of their divine authority, just as they could, by the power vested in them, pronounce and revoke an anathema upon a person. The various schools had the power "to bind and to loose"; that is, to forbid and to permit (Hag. 3b); and they could bind any day by declaring it a fast-day (Meg. Ta'an. xxii.; Ta'an. 12a; Yer. Ned. i. 36c, d). This power and authority, vested in the rabbinical body of each age or in the Sanhedrin (see AUTHORITY), received its ratification and final sanction from the celestial court of justice (Sifra, Emor, ix.; Mak. 23b).

In this sense Jesus, when appointing his disciples to be his successors, used the familiar formula (Matt. xvi. 19, xviii. 18). By these words he

**In the New Testament.** virtually invested them with the same authority as that which he found belonging to the scribes and Pharisees who "bind heavy burdens and lay them on men's shoulders, but will not move them with one of their fingers"; that is, "loose them," as they have the power to do (Matt. xxiii. 2-4). In the same sense, in the second epistle of Clement to James II. ("Clementine Homilies," Introduction), Peter is represented as having appointed Clement as his successor, saying: "I communicate to him the power of binding and loosing so that, with respect to everything which he shall ordain in the earth, it shall be decreed in the heavens; for he shall bind what ought to be bound and loose what ought to be loosed as knowing the rule of the church." Quite different from this Judaic and ancient view of the apostolic power of binding and loosing is the one expressed in John xx. 23, where Jesus is represented as having said to his disciples after they had received the Holy Spirit: "Whosoever sins ye remit, they are remitted unto them; and whosoever sins ye retain, they are retained." It is this view which, adopted by Tertullian and all the church fathers, invested the head of the Christian Church with the power to forgive sins, the "clavis ordinis," "the key-power of the Church."

K.

**BING, ABRAHAM:** German rabbi and Talmudist; born in 1752 at Frankfort-on-the-Main; died in 1841 at Würzburg, Bavaria, where he had been chief rabbi until his resignation at the beginning of 1839. Before officiating at Würzburg, he was rabbi at Heidingsfeld, Bavaria. Bing was a pupil of Nathan Adler of Frankfort, and belonged to the old orthodox school which admitted no innovations in religious matters, even in externals. A decided opponent of the reform movement, he declared it to be the duty of every orthodox Jew to refuse to go to the temples of the reformers. He was director of a large yeshibah and had a great reputation as a Talmudist. Among the Talmudic works which he left at his death, only the glosses on the Shulhan 'Arak, Orak Hayyim, have been printed, these bearing the title, "Zikron Abraham" (Presburg, 1892, edited by Isaac Bamberger).

I. BER.

**BING, ALBERT:** Austrian physician; born at Nikolsburg, Moravia, Sept. 20, 1844. He attended the gymnasium in his native city, and studied medicine at the University of Vienna, where he completed his course in 1870. The following year he received the degree of doctor of medicine, and one year later that of doctor of surgery, both conferred by the University of Vienna. In 1871 he was appointed on the staff of the Vienna General Hospital with the title of adjunet physician. Bing held this position until 1873, when he became assistant to the famous otologists Politzer and Gruber in the newly erected clinic for diseases of the ear, remaining in this position three years. After a lapse of five years he was made privat-docent of otology at the University of Vienna. Bing has held clinics for the diseases of the ear since 1878, at the hospital of the sisters of charity at Gumpendorf, near Vienna, and has been otologist to the royal guard. He has been a frequent contributor to a number of medical papers, and is the author of over twenty-four monographs on otology, which he published in that "Allgemeine Wiener Medizinische Zeitung"; "Monatsschrift für Ohrenheilkunde"; "Wiener Medizinische Blätter"; "Wiener Medizinische Wochenschrift"; "Zeitschrift für Diagnostik und Therapie"; "Centralblatt für die Ohrenheilkunde"; "Centralblatt für die Gesamte Therapie"; "Wiener Medizinische Presse"; and the transactions of various scientific bodies. His writings treat chiefly of the pathology, symptoms, and treatment of the diseases of the ear; a few papers, however, being devoted to the technique of the examination of the ear. The most important of Bing's publications include: "Vorlesungen über Ohrenheilkunde," with twenty-seven wood-cuts and one double plate, Vienna, 1890; "Die Entzündliche Anwendung des Hörrohres. Ein Neues Diagnostisches Hilfsmittel bei der Untersuchung Schwerhöriger," in "Monatsschrift für Ohrenheilkunde," 1876; "Neue Behandlungsweise der Sclerosirenden Mitelohrentzündung," in "Wiener Medizinische Blätter," 1879; "Ein Neuer Stimmgabelversuch; Bei

trag zur Differential Diagnostik der Krankheiten des Mechanischen Schallleitungs- und des Nervösen Hörapparates," in "Wiener Medizinische Blätter," 1891, iv. 41; "Zur Analyse des Weberischen Versuches," in "Wiener Medizinische Presse," 1891, Nos. 9 and 10.

W. S.

**BING, MEYER HERMANN:** Danish art publisher and manufacturer; born at Copenhagen June 4, 1807; died there Sept. 15, 1883. As a boy he was employed in his father's book- and stationery-store, assuming charge of it with his younger brother at their father's death. In 1846 he set up for himself and became the publisher of many important art periodicals and books, and founded, together with the engraver W. Terslev, a lithographic establishment. Bing also founded a china factory in company with his brother and Frederik Gröndahl, which gained a reputation almost as great as the Royal Danish china factory. In 1863 he transferred his publishing-house to his son and son-in-law. Bing was elected president of the first congress of Scandinavian booksellers in 1856. From 1858 to 1871 he was town councilor in Copenhagen; in 1868-71 president of "Industriforeningen"; and up to his death director of the two Jewish free schools in Copenhagen.

**BIBLIOGRAPHY:** Salmonsens, *Store Illustrerede Konversations-Lexikon*.

A. M.

**BING, SOLOMON:** German physician; son of Dr. Abraham Bing of Bingen, and son-in-law of the well-known physician and scholar Joseph Solomon del Medigo; born about the year 1615. In his boyhood he attended the colleges of the Jesuits in Mayence and Prague to learn Latin and other languages; and then devoted himself to the study of medicine, first under the tutorage of Del Medigo, and finally in the University of Padua, where he received the degrees of doctor of philosophy and of medicine. Upon the departure of his father-in-law, Del Medigo, from Frankfort-on-the-Main for Prague, in 1645, Bing applied to the authorities of Frankfort for permission to succeed him as physician of the Jewish quarters. After considerable trouble—being a graduate from the University of Padua he refused to be reexamined as requested by the authorities—he obtained the necessary permission, and practised medicine among both Jews and Christians. But, like the other Jewish physicians, he suffered from the ill will of his rivals. In 1653 he was accused of having caused the death of one of his Christian patients by injurious drugs. In consequence of this accusation the practise of Jewish physicians was limited to the Jewish quarter.

**BINGEN:** City of Hesse, situated on the Rhine. Jews lived there from the earliest times, for they are mentioned by the traveler Benjamin of Tudela, who

visited Bingen toward the middle of the twelfth century. In May, 1254, Bingen joined the union of Rhenish cities which, for financial reasons, protected the Jews. But this favorable condition of things was soon changed, for at the time of the Black Death (1348-49) the Jews of Bingen, in common with the other Jews in Germany, suffered severe persecutions. The community, however, was never quite extinguished. In the first half of the fifteenth century a rabbinical synod assembled there. During the time of the Reuchlin and Pfefferkorn controversy, Pfefferkorn went to Bingen, where, with the help of the authorities, he confiscated a number of Hebrew books. The celebrated rabbi of medieval times, Seligman Bing Oppenheim, was a native of Bingen.

At the present day the Jewish community numbers 685, of whom 122 are house-owners. There are a number of charitable societies for the dowering of Jewish brides and the care of the poor, sick, and dead. Bingen is a grand-ducal rabbinat, Dr. R. Grünfeld being the rabbi. His predecessor was M. Lebrecht. For further particulars see HESSE.

**BINNUI:** 1. A Levite (Ezra viii. 33). 2. One of the Bene Pahath Moab who had taken foreign wives (Ezra x. 30). 3. One of the Bene Bani, also found in the list of those who had taken foreign wives (Ezra x. 38). 4. Son of Henadad, who built part of the wall of Jerusalem (Neh. iii. 24) and sealed the covenant with Nehemiah (Neh. x. 10 [A. V. 9]). 5. Head of a family who returned with Zerubbabel (Neh. vii. 15).

**BIRAH.** See ACRA.

**BIRCH-HIRSCHFELD, FELIX VICTOR:** German pathologist and medical author; born at Klüvensiek, near Rendsburg, in the province of Holstein, Prussia, May 2, 1842; died at Leipsic Nov. 19, 1899. He received his education at Kiel and Leipsic, graduating from the latter university as doctor of medicine. He was then appointed assistant at the pathological laboratory, and later at the university hospital. In 1869 he filled the position of assistant physician at the asylums for the insane at Sonnenstein and Kolditz, Saxony, successively.

During the Franco-German war, in 1870, he was surgeon at the Reservelazareth at Uebigau, near Dresden. At the close of the war, in 1871, he became prosector at the municipal hospital in Dresden, of which institution he was appointed chief physician in 1882. From 1871 to 1875 Birch-Hirschfeld was lecturer on pathology at the postgraduate courses for military surgeons at Dresden. In 1875 he was appointed a member of the Sächsische Medicinische Collegium. In 1885, when but forty-three years old, Birch-Hirschfeld succeeded Cohnheim as professor of pathology at the University of Leipsic, one of the leading medical institutes of Germany, and in 1891 he represented the university in the upper house of the Sächsische Ständekammer.

Among his prominent works are: "Lehrbuch der Pathologischen Anatomie," Leipsic, 1877; "Die

Bedeutung der Muskelübung für die Gesundheit, Besonders der Deutschen Jugend," Leipsic, 1883; "Grundriss der Allgemeinen Pathologie," Leipsic, 1892; and of his numerous essays the following are the more important:

"Hoden-Krebs," "Geschwulstembolie," "Cylindromfrage," "Ueber Akuten Milztumor," "Pyämie," "Syphilis Neugeborener," in "Archiv für Hygiene," vols. ix.-xvi.; "Die Entstehung der Gelbsucht Neugeborener Kinder," in "Virchow's Archiv für Pathologische Anatomie und Physiologie und für Klinische Medizin," vol. lxxxviii.; "Uebergang von Tuberkelbazillen aus dem Mütterlichen Blut auf den Fötus," in "Beiträge zur Allgemeinen Pathologie und zur Pathologischen Anatomie," Jena, 1890; "Ueber Sarkomatöse Drüsengeschwulst der Niere im Kindesalter," *ib.* 1898; "Skrofulose und Krankheiten der Lymphdrüsen," in Ziemssen's "Handbuch der Speciellen Pathologie," xiii., part 2; "Ueber die Krankheiten der Leber und Milz," in Gerhardt's "Handbuch der Kinder-Krankheiten," iv., part 2.

Birch-Hirschfeld's knowledge in his special branch of medicine was very extensive; and he was self-sacrificing in the practise of his profession.

F. T. H.

**BIRDS.**—**Biblical Data:** The general designation for winged animals is "of" (עוף, Hosea ix. 11; Isa. xvi. 2) or "of kanaf" (עוף כנף, Gen. i. 21), "zippor" (צפור, Gen. xv. 10), or "zippor kanaf" (צפור כנף, Deut. iv. 17; Ps. cxlviii. 10), or "ba'al kanaf" (בעל כנף, Prov. i. 17). The expression "zippor," however, denotes an individual bird in distinction from "of," the generic term. "Ayit" (עיט, Isa. xviii. 6; Gen. xv. 11) denotes birds of prey; compare "ayyah" (איה, Lev. xi. 14; Deut. xiv. 13).

The frequent mention of birds in the Bible shows that they abounded in Palestine, in which country many birds are found at the present time. The only domesticated birds among the Israelites were the dove ("yonah," יונה) and the turtle-dove ("tor," תור). Endeavors were probably made to lure the shy rock-pigeon to the neighborhood of dwellings and tame it by providing suitable

**Domes-  
ticated  
Birds.** nesting-places. Neither the Hebrews nor the Egyptians knew of poultry until the contact with the Medes and Persians, who in their advance toward the west introduced the breeding of chickens. At the time of Jesus chicken-breeding was quite common in Palestine (compare Matt. xxiii. 37, xxvi. 75; Luke xiii. 34).

Though representations of ducks are found on Egyptian monuments, it is doubtful whether the Israelites knew of them; and the meaning of "barburim abusim" (ברבורים אבוסיים, I Kings v. 3 [A. V. iv. 23]), "fatted fowl," which is sometimes explained as "ducks," may be questioned. Sparrows evidently were as numerous in olden times as today, although the term "zippor," by which they were designated, also means small birds in general (compare *σπορβιον*, Tobit ii. 10). Then, as now, the sparrow was used as food (Matt. x. 29; Luke xii. 6).

The partridge ("kore" [קורה], I Sam. xxvi. 20; Jer. xvii. 11) also abounded, or, to be more exact, the ptarmigan, a species of the red-legged partridge which lives in mountains and waste places.

The following migratory birds are mentioned (1) The swallow ("sus," סוס, perhaps ענור, Isa. xxxviii. 14, for which Jer. viii. 7 has ענור). Since in the Septuagint ענור is missing in both passages, the word is perhaps only an explanatory gloss. It may also be questioned whether "deror" (דרור, Ps. lxxxiv. 4; Prov. xxvi. 2) means the swallow. Whenever the latter is mentioned as a migratory bird, the swift is probably meant. (2) The quail ("selaw," שליו), which in September and October gathered in immense flocks on the shores of the Mediterranean, in order to migrate to the warmer regions of Asia and Africa. In early spring it returned northward, flying mostly with the wind (Ex. xvi. 13; Num. xi. 31; Ps. cv. 40). (3) The stork ("hasidah," חסידה, mentioned as a migratory bird (Jer. viii. 7) which nests on the cypress-tree (Ps. civ. 17; compare Job xxxix. 13 *et seq.*; Zech. v. 9). (4) "Anafa" (אנפה, Lev. xi. 19; Deut. xiv. 18), which means perhaps a heron, or is a generic name for the different species of heron.

The following birds of prey ("ayit") are mentioned: (1) "Shahaf" (שהף, Deut. xiv. 15), according to the Septuagint and the Vulgate, the gull (*Larus*), which abounded in different species.

**Birds  
of Prey.** But perhaps a kind of hawk or falcon is meant, which the Arabians call "sa'af."

(2) The eagle ("nesher," נשר), which is often mentioned because of the lightning-like rapidity with which it pounces upon its prey (Hosea viii. 1; Hab. i. 8). Sometimes the word "nesher" includes also the vulture, which is as large as an eagle, and which in the East is found much oftener than the eagle. Micah i. 16 refers probably to the vulture, perhaps to the carrion kite (*Falco peregrinus*; compare Matt. xxiv. 28; Luke xvii. 37), distinguished from the eagle by its bald head and neck. The lammergeier is perhaps meant by (3) "peres" (פרס, Deut. xiv. 12, compare Tristram, "The Fauna and Flora of Palestine," p. 94). Some take it to signify the sea-eagle, which the Septuagint and the Vulgate identify with (4) "azniyyah" (עזניה, *ib.* 12), also a species of eagle or vulture. (5) "Raham" (רהם, Lev. xi. 18), "rahamah" (רהמה, Deut. xiv. 17), which is certainly the carrion kite (*Falco peregrinus*). (6) "Da'ah" (דאה, Lev. xi. 14) or "dayyah" (דיה), which is possibly the kite, chiefly the black kite (*Milvus migrans*). (7) "Ayyah" (איה, Job xxviii. 7) which denotes probably the falcon. (8) "Nez" (נץ, Lev. xi. 16), perhaps a name for a hawk, including probably some species of falcon (compare Job xxxix. 26). (9) "Oreb" (ערב, Gen. viii. 7), the raven or birds of that order, as the hooded crow, roller, daw, magpie, etc. (10) "Yanshuf" (ינשוף, Lev. xi. 17; Deut. xiv. 16), probably a species of owl, perhaps the eagle-owl. (11) "Tinshemet" (תנישמת, Lev. xi. 18; Deut. xiv. 16), probably also a species of owl. (12) "Kus" (כוס, Lev. xi. 17; Deut. xiv. 16), which likewise belongs to the owl order; it is perhaps the wood-owl or the little owl, which lives among ruins. (13) "Shalak" (שלך, Lev. xi. 17; Deut. xiv. 17), probably the cormorant, which pounces upon its

prey from cliffs or rocks or from a height in air. (14) "Kat" (קַט, Lev. xi. 18; Deut. xiv. 17), which, according to the translators, is the pelican; but this is doubtful (see Isa. xxxiv. 11; Zeph. ii. 14). Among the birds was also included the "atalef" (אֲטַלֵּף), the bat, of which several species are found in Palestine, where it abounds, as it does generally in the south.

Since some of these birds were eaten, the Law naturally separated them into clean and unclean (compare Lev. xi. 13 *et seq.*; Deut. xiv. 20 *et seq.*). For the sacrifice the dove ("yonah" or "tor") only was used (compare Lev. v. 7; xii. 8; xv. 14, 29). Whether, however, the Israelites, like the Chaldeans, practised *ACCURY*, we have no means of knowing.

Birds were caught in two ways: either by (1) a spring-trap ("pah") or by (2) a sling with a wooden or stone projectile, by which the bird was brought down (compare Amos iii. 5; Hosea vii.

**Mode of Capture.** 12, ix. 8). Seven different kinds of bird snares are referred to in the Old Testament, the chief of which are

the throw-stick, spring, clap-net, the trap, and the decoy-bird. All are used at the present day.

The people had a genuine fellow-feeling for birds as well as for the domestic quadrupeds (Deut. xxii. 6 *et seq.*); and the many references to bird-life testify to the interest taken in it. The eagle that "stirreth up her nest . . . fluttereth over her young," becomes the prototype of YHWH's protecting love of Israel (Deut. xxxii. 11; Ex. xix. 4; compare Isa. xxxi. 5). In Prov. xxvii. 8 the homeless wanderer is compared to the "bird that wandereth from her nest" (compare Isa. xvi. 2). In Hosea xi. 11, people returning from Egypt and Assyria are compared to the doves returning to their dove-cotes. Jeremiah viii. 7 contrasts the people that "know not the judgment of the Lord" with the birds that "observe the time of their coming." Proverbs xxvi. 2 compares the unjust curse to the birds flying away. Israel's enemies are often compared to the birds pouncing upon their prey with lightning-like rapidity (Deut. xxviii. 49; Isa. xlvi. 11; Hosea viii. 1; compare Jer. xii. 9). The complete annihilation of man is often metaphorically expressed by the idea of giving his flesh up to the birds; compare Gen. xl. 19; Deut. xxviii. 26; I Sam. xvii. 44, 46; I Kings xiv. 11, xvi. 4, xxi. 24; Jer. vii. 33, xvi. 4, etc. These and similar references show how numerous and manifest the birds must have been; in fact, passages like Job xli. 5 and Bar. iii. 17 display their intimate connection with the life of the people.

J. JR.

W. N.

—**In Rabbinical Literature:** The general name for birds in rabbinical literature is עופות. They are said to have been created from water mixed with sand, being thus intermediate between mammalia (בהמות), created from earth, and fishes, created from water (Hul. 27b). The eagle (Hag. 13b) is the king of birds, while the rooster is the most obstinate (Bezah 25b).

The numerous species are divided into the clean and the unclean, both minutely described by the Talmud (compare CLEAN AND UNCLEAN); but it should be noticed that while there are only twenty-

nine classes of unclean birds, the number of the clean is unlimited (Hul. 63a, b). It happens, however, that the unclean birds sometimes hatch the eggs of the clean, and vice versa. Among partridges the male sometimes sets on the nest (Hul. xii. 2, 138b). Some of the eggs are not fertile; such are those produced by the hen when she sits in the warm sun, these being, however, better for food (Bezah 7a). The formation of the chick begins at the broad, flat end of the egg (Hul. 64b; compare Rashi on the passage). In addition to their production of eggs (referring only to those of the clean species, Hul. *l.c.*), birds are useful for other purposes. The meat, though less desirable than beef (Me'i. 20b), is esteemed as a delicacy among the rich, while the poor seldom eat it (Bek. 10a; Ket. 5a), the flesh of poultry being considered particularly good for old people (Yer. Peah viii. 21a).

The wings (Kelim xvi. 19), claws (Hul. 25b; compare Rashi on the passage), and eggs of birds are put to various uses, the last being sometimes covered with a glaze (Kelim *l.c.*). Blown egg-shells are used to hold oil for lamps (Shab. ii. 11, 29b); and even as early as Talmudic times the strength of an egg-shell placed on end was recognized, for sometimes an egg is placed under the foot of a bedstead to make the latter stand even (Bezah 4a). The use of quills for writing was unknown in Talmudic times, and in the twelfth century the casuists questioned whether it was lawful to use them for the writing of Torah scrolls (Löw, "Ha-Mafteah," p. 349; Lewysohn, "Die Zoologie des Talmuds," p. 161).

The Talmud names about one hundred classes and varieties of birds, but it is extremely difficult to identify them. For example, it mentions

**Classes of Birds.** שְׁנַיִם אֲנָדָרִים (probably a Persian term; Kohut, "Aruch Completum," *s. v.*, suggests "dar-

pash" = finch), one of which bears the royal by-name "Shapur" and was clean, while the other, also called after a Persian king, the "Firuz," is unclean (Hul. 62b). Mention is also made of a bird כְּרוֹם (= χρῶμα, color), found in the neighborhood of Babylonia, which becomes iridescent at sunrise (Ber. 6b; Lewysohn [*ib.* p. 183] refers to the pajaro del sol, "sun-bird"). A similar many-colored bird is the צְבוֹת ("many-colored"), which shows not less than three hundred and sixty-five hues (Gen. R. vii. 4), "zabua" being the Hebrew name for peacock, which in rabbinical literature is usually designated by its Greek name טוֹוס. *Tāos*, as shown from a parallel passage in the Midrash cited (Tan., Tazria', ed. Buber, iii. 33).

The Talmud describes many birds, giving details of their natures and uses. The falcon (בֶּר הִירִיא) is used in the chase. The hunter, seated on his horse, has the falcon at his side, releasing it at sight of another bird (Shab. 94a; Sanh. 95a). The keen sight of the vulture (רִיחַ) is indicated in the following passage: "It can be in Babylon and see a corpse in Palestine" (Hul. 63b). The strong, piercing cry of the crane (כְּרוּבִיָּה) originated the saying: "Cry like a crane" (Kid. 49a). The heron (אֲנָפָה, "quarreler") in the Bible is a cruel bird that quarrels (אָנָּף) constantly with its companions, as its name suggests. It belongs to the family of vultures, its real name

being רייה רמנית ("angry dayah"). Another member of this family is the stork, or white dayah, called also "the pious one" ("hasidah"), because it shares its food with its mates (Hul. 63a, b). The stork's gall is an antidote for the sting of the scorpion (Ket. 50a). In addition to the dayah family, of which there are said to be no less than one hundred varieties (Hul. l. c.), the Talmud mentions the numerous varieties of the raven family (see RAVEN IN RABBINICAL LITERATURE). Hens, geese, and doves are considered domestic poultry, and the wild varieties are also named. Some birds, particularly song birds, and those of beautiful plumage, are kept as pets by the wealthy, and there is an allegory about a free bird which envies a friend in a cage its rich food, forgetting that the friend has paid for the food with its freedom (Pesik., ed. Buber, xxv, 164a, b). The social life of birds originated the proverb: "Every bird dwelleth according to his kind, and so doth man according to his like" (B. B. 92b; the passage quotes verses from Ecclus. [Sirach] xiii, 16, xvii, 9, as if they were from the Scripture).

Among Jews, as among most nations (Gubernatis, "Zoological Mythology," on Birds), birds were thought to possess supernatural knowledge, because they soared in the air. Thus in rab-

**In Jewish** binical literature, both Babylonian and **Folk-Lore.** Palestinian, there are numerous references to the folk-lore on birds (see ARGURY; Zohar, "Badak," iii, 148b *et seq.*). In Noah's Ark only the clean ones dwelt in the part with Noah and his family; the others were in another part (Sanh. 108b). King Solomon knew the bird language (see SOLOMON IN LEGEND).

Parts of the body of some birds were used as remedies (Joel Heilprin, "Mifa'ut Elohim"; David Tevel Ashkenazi, "Bet David"). Compare BAR YOKNI, COCK, DOVE, EAGLE, GOOSE, PIGEON, RAVEN.

L. G.

**Birds as Souls:** In Psalm xi, 1 the soul is compared to a bird: "Flee as a bird to your mountain." As living beings which move and fly through the air, birds have suggested themselves at all times and in all lands to primitive man as images of the soul, the name for which in most languages is taken from breathing ("nefesh," "neshamah," = "anima," or "psyche"); the soul was represented in the form of a butterfly, as illustrated by the tombs of the early Christians (Aringhi, "Roma Subterranea Novissima," ii, 324). The soul of the king of Egypt was pictured on the monuments as a bird; and the genius ("frawashi") of the kings of Assyria and Persia retained the wings of the bird (Rawlinson, "Herodotus," ii, 105, note 1; *idem*, "Ancient Monarchies," ii, 28, iii, 353; compare also Smrock, "Handbuch der Deutschen Mythologie," p. 461).

The Arabs also regarded the soul as a bird, and believed that after death it hovered at times around the body, screeching like an owl (Mas'udi, "Les Prairies d'Or," iii, 310, Paris, 1864; Sprenger, "Das Leben Mohammeds," i, 358, note; Kremer, "Gesch. der Herrschenden Ideen des Islams," 1868, pp. 166 *et seq.*). This view was shared by the Jews. They believed that all souls are gathered in a great cage

or treasure-house in heaven, a columbarium, called "Guf"; and so Rabbi Assi teaches that the Messiah, the son of David, can not come until all the souls have been taken out of the Guf, and have gone through human bodies (Yeb. 62a, 63b; Niddah 13b; and elsewhere). In the Greek Baruch Apocalypse (ch. x.), Baruch sees in the fourth heaven a lake full of birds, and is told that these are the souls of the righteous, who continually sing the praise of God. These stories are repeated by Christian saints who affirm having seen the souls of the righteous in the shape of doves in paradise (M. R. James, in "Texts and Studies," v, lxix.; *idem*, in "Anecdota Græco-Byzantina," p. 181, quoted in Kautzsch, "Die Apokryphen und Pseudepigraphen des Alten Testaments," p. 455).

The souls of the righteous which dwell in the Acherusian lake were consulted as God's counselors at the creation of man, according to Gen. R. 8, having their parallel in the Zendavesta ("Bundahish," ii, 10; Mbir Yast xxv, in "Sacred Books of the East," xxiii, 145).

In the Zohar the sparrow and the swallow, spoken of in Ps. lxxxiv, 3, are compared to the souls of the righteous which dwell in paradise, exactly as are those mentioned in the Baruch Apocalypse. Three times a year, in Nisan and Tishri, they rise upon the walls of paradise and sing the praise of the Master of the universe; whereupon they are ushered into the palace where the Messiah is hidden, called the great "Souls' Nest." They are adorned with crowns in his honor when he appears to them, and from beneath the altar of heaven, where dwell the souls of the righteous, they prepare the erection of the Temple of the future (Zohar ii, 7b, iii, 196b). Grätz ("Gesch. der Juden," vii, 9) failed to see that this rests on an old tradition.

It is customary among German Jews, when a death occurs, to open a window in order that the soul may fly away like a bird (compare Liebrecht, "Zur Volkskunde," 1879, p. 271). On birds around God's throne see MERKABAH.

**BIRKAT KOHANIM.** See BLESSING, PRIESTLY.

**BIRKAT HA-MINIM.** See SHEMONEH 'ESREH.

**BIRMINGHAM, ALA.:** Capital of Jefferson county, Alabama, founded in 1871. The first congregation, Emanu El, was organized in 1882; the corner-stone of its building being laid in July, 1886, and the building dedicated in 1889. The rabbis of the congregation have been: Alexander Rosenspitz, 1885; Maurice Eisenberg, 1886-90, Samuel Ullman, 1891-94; David Marx, 1894-95; Morris Newfield, 1895-. A second congregation, Knesses Israel, was founded in 1899. Birmingham has a Hebrew Ladies' Benevolent Relief Association, founded 1883; a social club, the Phoenix, established in the same year; and a Hebrew Aid Association, founded 1898. A lodge of the B'nai B'rith was organized 1884; a Youths' Auxiliary, 1897, a branch of the Council of Jewish Women, 1898; and a lodge of the B'rith Abraham, 1900.

Among the prominent citizens of Birmingham are: Samuel Ullman, alderman of the city, 1895-97, mem-

ber of the board of education since 1884, and its president since 1893; Benjamin M. Mayer, editor of the "Age Herald"; Emil Leeser, police commissioner, 1897-99, and editor of the Birmingham "Courier" (German); and Simon Klotz, Freuch consul.

Birmingham has about 1,400 Jews in a total population of 38,415.

**BIRMINGHAM, ENGLAND:** Chief town of Warwickshire. The Jewish community consists (1902) of a population of about 4,000, having grown to this number from 140 families (700 souls) in 1851. The first Jewish settlement is believed to have taken place about the year 1700; but the earliest records of the community are lost. Jews were probably attracted to Birmingham by the facilities which the chief productions of the town, hardware and jewelry, afforded for peddling and hawking. It was their custom to leave the town every Monday with a box of cheap jewelry and hardware, and to return on Friday for the Sabbath.

The first synagogue of which any record exists was erected as early as 1780 in a part of the town called "The Froggery," which has since been demolished. A Jewish cemetery existed in the same quarter of the town in 1730; but meetings for prayer were at that time held in a private residence. The present cemetery, in the suburb of Witton, was consecrated Feb. 14, 1871, prior to which, in addition to the burial-place in Granville street, there was another in a thoroughfare turning out of Bath row, which came to be known as Betholom row.

It was at Birmingham that Lord George Gordon was circumcised and received into the synagogue. In 1791 the synagogue in the Froggery was succeeded by one in Hurst street; and in 1810 another synagogue was established in Severn street, which is now used as a Masonic hall. A Hebrew philanthropic society was established on a modest scale as early as 1838, and it still exists. The present synagogue on Singer's Hill was consecrated in 1856; it accommodates upward of 600 seat-holders in the body of the building. The more modern Board of Guardians was founded in connection with this in 1870, after the model of the London body.

The earliest name of any official connected with the synagogue is that of Rabbi Isaiah Phillips, who was minister between 1785 and 1835. Other ministers have been Dr. M. J. Raphall and the Rev. A. P. Mendes, 1851-58. The present minister, the Rev. G. J. Emanuel, was appointed in 1864.

Schools connected with the synagogue have been in existence since 1840; and in 1843 Sir Moses Montefiore laid the foundation-stone of a new school in Hurst street. Of recent years a considerable number of societies and associations have been formed in Birmingham to meet the influx of Russian Jews, such as the Naturalization Society and Workingmen's Club.

Zionism is in considerable favor among the Birmingham Jews, a branch of the Chovevei Zion and a B'nai Zion Association having been recently founded among them.

L. J. G.—J.

**BIRTH, NEW:** Renewal of a man's nature by casting aside the impurity of sin which cleaves to him from his former life, thus turning him into a pious and righteous child of God. The idea of man's regeneration was first expressed by the prophet Ezekiel (xxxvi. 25 *et seq.*; compare xi. 19, xviii. 31; Ps. li. 12): "I will sprinkle clean water upon you; from all your filthiness and from all your idols will I cleanse you, and I will give you a new heart, and a new spirit will I put within you." It was probably suggested by the rite of ablution, which was connected with every conversion (see Zech. xiii. 1 *et seq.* and Isa. iv. 4; compare "Shibbole ha-Leqet," p. 145a, quoted by Schechter, in "Jew. Quart. Rev.," xii. 421) and signified a change of the whole man; exactly as Naaman the proselyte, after bathing in the Jordan seven times, became clean "and his flesh like that of a little child" (II Kings v. 14). The expression used by the Rabbis for the person who underwent a change of heart through repentance and conversion is, therefore, "beriah hadashah" (a new creature). The verse, "The people which shall be created shall praise the Lord" (Ps. cii. 19 [18]), is explained in Midr. Teh. on the passage (compare Pesik. d. R.K. xxviii. 181) thus: "The people who shall be reborn through repentance of their sins shall praise the Lord"; and it is either referred to the Messianic future, "the generation to come," or to the annual regeneration on the Day of Atouement, which, by blotting out the old year's sins, renders Sukkot "the first day" "of the reckoning of sins" (Tan. and Lev. R. to Lev. xxiii. 40).

The proselyte who casts off the impurity of idolatry and turns to the God of life becomes a "new creature" (Gen. R. xxxix.; Soṭah 12b; compare ASENATH, PRAYER OF).

**The Proselyte.** who turns away from uncircumcision and becomes a Jew is like one who turns away from the grave and requires cleansing," was the maxim of the Hillelites (Pes. viii. 8). Hence arose the halakic rule that "a proselyte is like a newborn child whose family relations are no longer the same as before his conversion" (Yeb. 22a, 48b, 97b; Maimonides, "Yad," Issure Biah, xiv. 11). It is therefore more than improbable that NICODEMUS, a member of the Sanhedrin (John vii. 50) and a leader in the synagogue (iii. 10), should not have understood the words of Jesus: "Except a man be born again he can not see the kingdom of God" (John iii. 3-10). On the contrary, this idea of a new birth and the term, "a new creature," used by Paul (Gal. vi. 15; II Cor. v. 17; I Peter i. 3, 23; ii. 2; Clementine "Homilies," xi. 26; "Recognitions," vi. 9; Barnabas xv. 7) with reference to Christian baptism, are directly borrowed from the rabbinical schools, as is also the expression, "Except ye be converted and become as little children ye shall not enter into the kingdom of heaven" (Matt. xviii. 3), which has the same meaning as the saying in John iii. 3 (compare Yer. Bik. iii. 65d; Midr. Sam. xvii. 1). Accordingly the fundamental doctrine of Paul's preaching, that

in baptizing in the name of Jesus, the sinful man should die through the death of Jesus and rise again to a new life through the resurrection

**A** of Jesus (Rom. vi. 3-10, vii. 6, xii. 3; **Rabbinical** Titus iii. 5; and elsewhere), is not **Notion.** original with him. Paul merely gave to the Jewish idea of the new birth an antinomian character. The original story in the New Testament of Jesus' baptism was regarded as signifying his rebirth as the Son of God; the heavenly voice is said to have cried in the words of Ps. ii. 7: "Thou art my son; to-day have I begotten thee" (compare Heb. i. 5, v. 5; Acts xiii. 33, with Matt. iii. 17; Mark i. 11; Usener, "Religionsgeschichtliche Untersuchungen," 1889, i. 47 *et seq.*).

The new birth through the water and the spirit, of which Jesus speaks (John iii. 5), has its parallel in the passage Mek., Yitro 5: "Israel received the law in the desert amid fire and water" (compare Sanh. 39a: "True baptism is by fire"). James i. 18 speaks of rebirth through the word of truth: "Of his own will begat he us by his word of truth that we should be the firstlings of his creatures."

**K.**

**BIRTHDAY:** There are no positive data in the Bible or in rabbinical literature concerning birthday festivals among the ancient Jews. This silence on the subject is, however, no warrant for the conclusion that the Jews altogether abstained from following a custom which was general among the Egyptians (Gen. xl. 20), Persians (Herodotus i. 133), Syrians, and Greeks. Even if not common among the people, yet kings and princes probably practised it, following the custom of their heathen contemporaries. Birthday festivals were not considered by the Rabbis as "hukkot ha-goyim" (customs of the heathen; see Maimonides, *Yad ha-Hazaqah*, 'Ak-kum we-Hukotehem, xi. 12), although Lightfoot held a contrary opinion ("Hore Hebr." on Matt. xiv. 6).

A close study of the Biblical text shows that the Bible is not altogether wanting in references to the subject; for, while it lacks positive

**Biblical** accounts, it contains passages from **References.** which it may be inferred that the custom of remembering birthday anniversaries was not wholly unknown among the Jews. "The day of our king" (Hosea vii. 5), on which the princes made the king sick with bottles of wine, and the king himself "stretched out his hand with scorn," alludes more probably to a birthday festival than to a solemn occasion, such as the anniversary of his installation, which would have been observed with more decorum (see Josephus, "Ant." xv. 9, § 6).

Birthdays might not have been celebrated by the common people with great solemnity, yet they did not pass wholly unnoticed, and were remembered by congratulations, as in modern times. Jeremiah not only cursed the day of his birth, but wished that it should not be blessed (Jer. xx. 14), as though such had been the custom.

It is said of Job, "and he cursed his day" (Job iii. 1). The emphatic and determining expression "his day" implies the idea that he, like everybody else, had a certain day of the year singled out for a cer-

tain purpose, which we learn further was the anniversary of his birth.

The second or third birthday of a child whose coming into the world was very much desired by his parents was usually made the occasion of a feast, because the child was then weaned, and had consequently passed the dangerous and uncertain stage of infancy. Abraham made a great feast on the day Isaac was weaned (Gen. xxi. 8). This occurred, ac-

**Weaning** according to Rashi, at the expiration of **on Second** twenty-four months. Bishop Ely **Birthday.** ("Holy Bible Com." *l.c.* on the passage) says: "By comparing I Sam. i. it would seem that this was very prob-

ably a religious feast." Hannah postponed the yearly family feast at Shiloh until she had weaned Samuel, in order to celebrate his birthday at the same time (I Sam. i. 23, 24). According to Rashi and Midr. R. Samuel, *l.c.*, this also occurred at the end of twenty-four months. Yet from II Chron. xxxi. 16 it may be inferred that Samuel was weaned at the end of his third year; for only from that age were children admitted to the service of the Temple.

Two instances of birthday celebrations are mentioned in post-Biblical literature, from which it may be assumed that this was customary in the Herodian family. They used to celebrate birthdays with great pomp, and in the same manner as the Egyptian kings had done more than 2,000

**In Post-** years earlier (Gen. xl. 20), by exten- **Biblical** sive public entertainments, which were **Times.** made the occasions of granting favors to friends and pardons to those in dis-

grace. Agrippa I. solemnized his birthday anniversary by entertaining his subjects with a festival, and decreed the recall of his banished general Silas, which recall, by the way, the latter stubbornly declined (Josephus, "Ant." xix. 7, § 1). Herod the Tetrarch celebrated his birthday with a great feast, at which the daughter of Herodias danced before the guests, the king promising "to give her whatsoever she would ask" (Matt. xiv. 6).

The Jewish people in general may have had reasons to avoid feasting on birthdays in the times of the Tammim and Amoraim: first, because they had been at one time grievously offended on such festivals (according to II Macc. vi. 7, the Jews were forced, in the time of Antiochus, to eat of the sacrifices which were offered "in the day of the king's birth every month"); secondly, because no "Talmid hakam" would attend as a guest at such a feast, since the Rabbis condemn the Talmid hakam who partakes of a meal or feast which is not a "se'udat mizwah" (commendable meal). And to the son of him who frequented feasts were applied opprobrious epithets, such as "son of an oven-heater," "son of a market-dancer," etc.

**The Bar** Since the fifteenth century (Löw, "Le- **Mizwah.** bensalter," p. 210) the thirteenth birthday of a boy has been made the occasion of a family feast because it coincides with his religious majority (BAR MIZWAN).

In modern times the widely spread custom of celebrating some particular birthday of a great man by a banquet or by some literary production has enriched Jewish literature with many gems of Hebrew learn-

ing and poetry. Jewish scholars of great renown have become the recipients of marks of deference and homage on the part of their friends and admirers on their seventieth or eightieth or ninetieth birthday by the publication of a jubilee-book, to which scholars from far and near have contributed some of their best work. Of these publications are:

**Special Birthdays of Scholars.** (1) "Jubelschrift zum Neunzigsten Geburtstag des Dr. L. Zunz," Berlin, 1884, produced on the occasion of Dr. Zunz's ninetieth birthday; (2) "Jubelschrift zum Siebenzigsten Geburtstag des Prof. Dr. H. Graetz," Breslau, 1887, in celebration of Graetz's seventieth anniversary; (3) "Festschrift zum Achtzigsten Geburtstag des Dr. Moritz Steinschneider," Leipzig, 1890, on the eightieth birthday of Dr. Steinschneider; and (4) "Shay la-Moreh" (A Present to the Teacher), Berlin, 1890, dedicated to Dr. Israel Hildesheimer by his friends and students on his seventieth birthday.

Some have confined themselves to the sending of a letter of homage or a poem. Smolenskin remembered Dr. Zunz on his ninetieth birthday with a letter of congratulation, "Miktab Shalom" ("Ha-Shahar," xii. 327). H. S. Slonimski was greeted on his seventieth birthday by a letter of homage, "Iggeret Hen," signed by twenty-eight of his friends, all poets and "maskilim" ("Ha-Zefirab," vii.). S. Scherschewski wrote a magnificent poem on the same occasion (*ib.*). There is a poem by A. Gottlober dedicated to the famous hazan and musical composer, Solomon Sulzer, on his seventieth birthday ("Kol Shire Mahallal," vii. 29). Gottlober also wrote six poems on several birthdays of his own (*ib.* pp. 31-40). There are several birthday poems in the "Shire Sefat Kodesh," by A. Lebensohn ha-Kohen, most of them dedicated to his son Michael Joseph (*ib.* i. 220; ii. 162, 163-184).

The birthday anniversaries of heathen kings, **יום גנינוסא**, are considered by the rabbis of the Talmud as legal heathen holidays, which count among those holidays on the three days preceding which Jews are by Talmudic law required to abstain from concluding any business with a heathen (Mishnah 'Ab. Zarah i. 3).

About the meaning of **יום גנינוסא** of the Mishnah, which seems to correspond with *ἡμέρα γενεσῶς* (LXX., Gen. xl. 20), some doubts have been raised because, by the side of **יום גנינוסא של מלכא** ("birthday of the king") mention is also made of **יום הלידה ויום המיתה** ("the day of birth and the day of death"). In the Babylonian Talmud ('Ab. Zarah 10a) the decision is reached in favor of **יום גנינוסא** as meaning "the day of coronation." It is accepted by Maimonides (see Commentary to the Mishnah, and *Yad ha-Ḥazakah*, 'Akkum we-Ḥukotehem, ix. 5). The glossary "Kesef Mishneh," *ad loc.*, thinks that Maimonides may have read **כינוסא** ("assembly") for **גנינוסא**. Rashi explains **גנינוסא** as equivalent to "the birthday of the king"; while the Talmud Yerushalmi ('Ab. Zarah i. 39) explains **גנינוסא** as "birthday." This agrees with the use made of the word in many instances (Gen. R. lxxxviii.; Ex. R. xv.; Yer. R. H. iii. 8; Yalk., Job. 584; Compare Rashi, Gen. xl. 20). Graetz (in "M. G. Y." 230) is of the opinion that **גנינוסא** means the day of death of the king.

All these difficulties and differences may be obviated if **יום המיתה ויום הלידה** be explained as indicating Christian festivals of the early Church. By **יום הלידה** may be understood the Nativity, or Christmas, and by **יום המיתה** Easter, or the Resurrection. Cave (in "Primitive Christianity," part 1, vii. 194, cited in McClintock and Strong's "Cyclopedia," &c. "Christmas") traces the observance of Christmas to the second century, about the time of the emperor Commodus. According to David Ganz ("Zemah David," i., year 3881), Commodus reigned 183-185, at the time of Rabbi Meir of the Mishnah, who counted those days as legal holidays.

A. S. R.

**BIRTHRIGHT.**—**Biblical Data:** The right of possession into which the eldest son is born. The first son born to the father occupied a prominent place in the Hebrew family (Gen. xxvii. 19, xxxv. 23, xli. 51, xlix. 3; II Sam. iii. 2). Such a one is the "first-born" in the proper sense, and is to be distinguished from sons who are "first-born" merely in the sense of being the first child born to one of the several wives that men might have (Ex. xiii. 2, 12, xxii. 28; xxxiv. 19; Num. xviii. 15).

The first-born son took rank before his brothers and sisters (Gen. xxvi. 31, 32; xliii. 33). Usually the father bequeathed to him the greater part of the inheritance, except when a favored wife succeeded in obtaining it for one of her sons (Gen. xxvii.; I Kings xi. 11-13). In early days the will of the father fixed the part of the chief heir, but the law of Deuteronomy demands for him a double portion of all the possessions and forbids favor being shown to a younger son (Deut. xxi. 15-17). After the death of the father the first-born son was the head of the family; he had to provide for the widows of his father and for his unmarried sisters, since they ordinarily did not have any hereditary rights. The later rabbinical law (Ket. 68a) obliges him to give a dowry when one of them was to be married. The old law claims all the first-born sons (in the larger sense, "whatever opens the womb") for **YHWH** (Ex. xiii. 2, xxii. 29). Some explain this by ascribing a certain sacredness to the first-born (Benzinger, "Arch." p. 470); others suppose that the elders were obliged to consecrate them as "nazir" (Smend, "A.-T. Religionsgesch." p. 276). But from Ex. xiii. 12, xxii. 29; Ezek. xx. 25, 26, it is evident that they were to be set aside as an offering for the Deity. It is possible that such offerings were brought in the oldest times, but very soon it became customary to offer an animal instead of the child (Gen. xxii.); and the later law obliges the father to redeem the child (Ex. xiii. 13; xxxiv. 20) for five shekels (Num. iii. 47; xviii. 15). See **FAMILY; FIRST-BORN, REDEMPTION OF; JUNIOR RIGHT; PRIMOGENITURE.**

**BIBLIOGRAPHY:** Jacobs, *Studies in Biblical Archaeology*, iii.; Benzing, *Hebr. Archäologie*, pp. 354-355; Nowack, *Hebr. Archäologie*, i. 348-350. J. JI.

B. E.

—**In Rabbinical Literature:** The Talmud recommends, as a rule of education, that a father should never show any preference for one of his children over the others, and points to the unhappy relations between Joseph and his brothers as illustrating the disastrous consequences that may follow

if one child is privileged (Shab. 10b). The prerogatives of the first-born, as the real head of the family after the father's death, were, however, so deeply rooted in the domestic life of the Jews that the Rabbis could not attempt to make any changes here. In connection with inheritance the expression "first-born" refers only to the **בְּכוֹר מֵאָב** ("the first-born son of the father"), and not to the **בְּכוֹר מֵאִמָּה** ("the first-born of the mother"); although the latter had many advantages in ritual matters (compare **FIRST-BORN**) which the former could not claim (Bek. viii. 1; B. B. 126b). The **בְּכוֹר מֵאָב** always had the rights of the first-born, whether he were a legitimate or an illegitimate son, and even if he were a **BASTARD** (Yeb. ii. 5; Gem. *ib.* 23a; Sifre, Deut. 215), although the Roman law, on the contrary, distinguished between legitimate and illegitimate children in connection with the law of inheritance (Köppen, "System des Heutigen Römischen Erbrechts," p. 171). The right of the first-born was also possessed by the child that was preceded by a miscarriage, either of a fully developed but still-born infant or one dying just after birth (Bek. viii. 1; Gem. 46b), whereas a child born under such conditions could not be considered a "mother's first-born" (Bek. *l.c.*). In order to enjoy the primogeniture, the first-born had to be born naturally; hence, that child was excluded at whose birth artificial means were employed; *e.g.*, the Caesarean operation (Bek. viii. 2). A son, however, whose father had previously had children by a slave or a non-Jewess, had the full rights of the first-born; for, according to Talmudic law, these children were in no wise related to their father (Bek. viii. 1; compare "Maggid Mishnah" on Maimonides, "Yad," *Nahalot*, ii. 12).

In doubtful cases, especially with twins, where the primogeniture was not certain, the three following persons were entitled to determine

**Identification of the First-Born.** it; viz., the midwife, the mother, and the father, who, however, were not equally privileged as regards the term of the availability of their testimony.

The midwife could testify only immediately after the delivery; the mother, only during the first seven days after the birth; while the father was entitled to do so from the eighth day after the birth—*i.e.*, the day of the circumcision—onward (Kid. 74a).

The father's identification of the first-born was most important; for, in case there were no witnesses, only he was the first-born whom the father recognized as such, even should it be contrary to the general presumption (**חֻזְקָה**) (B. B. 127b; Sifre, Deut. 216). Even if the father merely by an incidental remark indicated that such a one was his first-born, the latter had the primogeniture (B. B. 126b). Any doubt as to priority of birth debarred from rights of primogeniture, the rule **מִמֹּן הַמוֹטֵל בְּסֵפֶק חוֹלְקִין** ("moneys of doubtful ownership must be divided between the claimants") *not* being observed here (B. B. 127a). The birthright belonged not only to the first-born, but also to his descendants; so that if A, the first-born of B, died during B's lifetime leaving a daughter, C, this daughter entered upon the full rights of A at B's death (B. B. 117a). A posthumous child, however, is excluded from the

primogeniture, although a son so born has a part in the heritage. Thus, if two sons of the same mother or of two wives were born after the father's death, the estate is divided between them in equal shares. If there are five sons besides the posthumous one, the first-born receives as his birthright **חֵלֶק בְּכוֹרָה**,  $\frac{1}{3}$ , and for his ordinary share **חֵלֶק פִּישׁוּט**—like the other brothers— $\frac{2}{5}$ , making  $\frac{1}{3}$  of the property (B. B. 142).

The first-born receives a double share of the real and personal estate (B. B. 122b, below; Sifre, Deut. 217). In the division of the real es-

**Division of Property.** tate by lots, the first-born has the right to claim as the second share the lot adjoining the first share that fell to him (*Hoshen Mishpat*, 277, 2; 174, 2; compare B. B. 123b). The birthright includes only the property the father had in his possession at his death, and not that added later to the estate, either by inheritance or by the collection of debts (B. B. 124a, b; Toscf., Bek. vi. 15).

In recent times the question has often been raised as to whether government bonds should be considered as outstanding debts in regard to the birthright. Ezekiel Landau regarded stocks and bonds as ordinary promissory notes, since they were subject to the fluctuations in the market; but compare Isaac Elhanan Spector's responsum in M. Horwitz, "Ma'atzeh Lewi," p. 48, Frankfort-on-the-Main, 1891. It is also a matter of discussion whether, in case a father left assets and liabilities and also ready money sufficient to cover his debts, these should be paid out of his assets or out of the ready money; in the first case, the eldest son would receive a double share of the ready money; in the second, he would receive none of the assets. Most of the authorities have decided this case against the first-born (Lampronti, "Paḥad Yizḥaq," letter 8, p. 25e).

Nor does the first-born receive a double share of any improvements (**שִׁבְבָה**) of the estate if the heirs have contributed to it with their own labor or cost (B. B. 124a). (If the father stipulated before his death that the heritage should remain intact for a certain period, then the "bekor" receives also a double share of the profits that have accrued in the business, because he has been obliged to assist in maintaining it (Lampronti, *l.c.*). The birthright extends only to the estate of the father, and not to that of the mother or of the brothers or sisters (B. B. viii. 4).

Although the father can not directly deprive his first son of the right of primogeniture, he is at liberty to divide his whole property during his lifetime; thus making the share of the first-born equal to that of the other sons, or passing him over entirely (B. B. viii. 5; Gem. *ib.* 126b). According to Maimonides on Deut. xxi. 16, a father violates a religious law if he does not make provision for his first-born to come into his rights. In accordance with this opinion in countries where the law does not recognize the rights of primogeniture, it is a father's religious duty to make special provision on this point (see Spector, in M. Horwitz, *ib.*). When the first-born enters upon his inheritance, it is his duty to contribute a double share to the payment of his father's private debts; he may, however, renounce his birthright, and thus be free of the obligation (B. B. 124a). Compare **FIRST-BORN, INHERITANCE**.

**BIRTHS.**—Statistical: The number of births among the Jewish populations of the world is generally found to vary from that of the surrounding population in a manner showing the influence of some cause common in its operations to all Jews.

**Frequency:** The following table, giving the birth-rate per thousand, seems, at first sight, to show a lower proportion of births among Jews than among the general population of the lands in which they dwell.

BIRTH-RATE PER THOUSAND.

This result is surprising in view of the fact that the increase of the Jewish population is almost everywhere greater than that of the general population. It is probably due to the smaller number of deaths under five years among Jews, in consequence of which the non-nubile portion of the population is greater among them than among Christians, and any percentage is less when reckoned on the whole population than it would be if reckoned upon the number of adults only. Thus, according to Körösi ("Die Hauptstadt Budapest im Jahre 1881"), the percentage of Budapest's Jewish population under twenty years was 45, while that of the Christian population was about 34; and it was approximately the same in 1871. Now, if the same proportion held good in 1873, the birth-rate, instead of being 38 per 1,000 for Jews and 43 for Christians, reckoned on the whole population, would be 69 for Jews and 65 for Christians, reckoned on the adult population only. Hence, it is probable that the birth-rate of Jews is only apparently lower, and would actually be higher, if applied only to adults. Ruppin, however, in a recent study of Prussian Jews in Conrad's "Jahrbücher," March, 1902, shows that for Prussia the lower rate is justified, and is due to a change in the social condition and marital habits of the Jews.

**Fecundity:** Statisticians ascertain the average number of children to a marriage by dividing the number of births in a year by that of the marriages. As is evident from the following table, investigation shows that a Jewish marriage is almost invariably more fruitful than a Christian one:

BIRTHS TO A MARRIAGE.

According to Professor Tait, who has deduced the law that the younger the age at marriage the greater the number of children, this fertility is due to the indisputable fact that Jewesses marry earlier than others. A striking confirmation of this explanation is given by the case of Russia, which forms an exception as regards both the earlier age of Jewish marriages and their greater productivity. Other causes of this fertility may be the lower rate of stillbirths among Jewesses, and the greater proportion of first-cousin marriages among the race. Joseph Jacobs ("Studies in Jewish Statistics," London, 1891) states that in investigating forty-five such marriages, he found an average of 4.7 children living per family.

Mixed marriages, however, are very infertile.

CHILDREN TO A MIXED MARRIAGE.

Place.	Epoch.	Pure.	Mixed.	Authority.
Bavaria..	1876-80	4.7	1.1	"Zeit. Bayr. Stat.," 1881, pp. 118, 213
Berlin....	1898	2.5	0.9	"Statist. Jahrb.," 1900, pp. 29, 73
Hungary..	1896	4.6	0.3	"Magyar Stat. Évkön.," iv, 51, 65
Prussia ..	1875-83	4.4	1.7	"Zeit. Preuss. Stat.," 1883, p. 239

But Ruppin points out that mixed marriages are increasing, and the usual method of reckoning fecundity by dividing marriages by births is delusive, since there are fewer marriages of early date to contribute their quota.

**Plural Births:** So far as the scanty materials that are obtainable go, there appear to be fewer twins among Jews than among the general population. Thus, while in Russia in 1867 there were 2.5 per cent of twins to all births, the percentage of Jewish twins was only 1.1 ("Mouvement de la Population en Russie," p. 11), and only 25 out of 100,000 would earn "the czar's bounty" for triplets as against 35 of the general population. In Galicia between the years 1870-75, Jewish twins showed 0.9 per cent, Christian 1.2 per cent, of all births ("Statist. Monatschrift," 1877, p. 178). In Wieselburg (Mosouy), Hungary, 1833-55, there was one case of

Jewish twin-birth in 174 births; while among the Hungarians the proportion was 1 in 102, and among the Croats 1 in 75 (Glatter "Lebenschancen," p. 13). In Budapest during 1897 40 Jewish twins were born, and this number was less than 1 per cent of the total number, 4,514 ("Stat. Evkönyv," pp. 98, 110, Budapest, 1901).

**Sex:** The following table, giving the proportion of boys to 100 girls born alive in the places cited, shows a remarkable predominance of boys among Jewish children:

The fact was noticed by Burdach at the commencement of the nineteenth century, by Hofacker ("Eigenschaften," 1838), and by Darwin ("Descent of Man," 2d ed., p. 243); but while numerous suggestions have been made, the cause of the predominance has not been determined. The best-known suggestion is that of Sadler and Hofacker, according to which boys are peculiarly the offspring of early marriages. This is to some extent confirmed by Jewish statistics; but the predominance of boys among the Jews is equally marked in Russia, where early marriage is the custom with the general population.

It is established that boys are more likely to be born in towns than in the country; and Jews live mostly in towns. Lagneau suggests that the greater number of boys is due to the observance of the laws of Niddah (Lev. xv. 19); while E. Nagel ("Der Hohe Knabenüberschuss der Neugeborenen der Jüdinnen," in "Stat. Monatsschrift," 1884, pp. 183-186) attributes it to (1) the greater care which Jewish wives take of their health, and (2) the smaller number of illegitimate births. The suggestion is that fewer boys die in still-birth among Jews because there are fewer illegitimate births among them.

It is probable, however, that the predominance is not so great as it would seem from the table; and, as Lagneau suggests, the abnormal figures for Austria, Russia, and St. Petersburg are probably due to some error in the registration of Jewish female children. The later and presumably more accurate

statistics for Hungary and Vienna do not show any marked Jewish superiority.

**Illegitimacy:** The rate of illegitimate births is lower among the Jews than almost any other sect or nation. This is evident from the following table, giving the percentage of illegitimate births to total births at the places cited:

PERCENTAGE OF ILLEGITIMATE TO TOTAL BIRTHS.

"	1897	13.4	....	"Stat. Jahrb. für 1897"

The high figure for Austria is almost certainly due to the practise of omitting civil registration of marriage among the poorer class of Jews; thus causing their offspring to be reckoned as illegitimate. Thus, at Storozynce, the percentage of Jewish illegitimate children is put at the absurd figure of 99.61, which simply means that the Storozynce Jews never register their marriages.

It should be noted, however, that where the isolation of the Jews is being modified, their illegitimacy rate is increasing. Bergmann ("Beiträge," pp. 129-130) shows that there has been a perceptible rise in this rate in most of the eastern districts of Prussia; and where a diminution has occurred as in Westphalia, it has been less than that in the general population.

The few facts available do not confirm Nagel's theory that the low rate of illegitimacy (where male births are rarer) causes a more decisive predominance of the male sex among Jewish births in general; for the following table—based on the same authorities as before—giving the number of viable boys to 100 girls in illegitimate births, shows the same predominance:

NUMBER OF VIABLE BOYS TO 100 GIRLS IN ILLEGITIMATE BIRTHS.

	Pesth.	Prague.	Prussia.	Vienna.
Jews .....	106	114	101	110
Christians.....	104	104	103	104

**Still-Births:** It is usually asserted that there is a lower rate of still-births among the Jews than among non-Jews; and this might be expected,

considering their lower infant mortality in general. The following table, giving the percentage of still-born to viable children, makes the percentage quite evenly balanced; but the trustworthiness of the Prussian statistics confirms the general impression:

PERCENTAGE OF VIABLE TO STILL-BORN CHILDREN.

The difference is attributed to the more favorable age at which Jewesses marry, or to the greater care the latter take of themselves. This superiority, however, is by no means proved. And though Nagel maintains that the smaller number of still-births is the cause of the preponderance of Jewish boys, Jacobs (*l.c.*) points out that in Budapest, 1876-78, the proportion of boys in still-births was 122 to 100 girls among Jews, and 116 to 100 girls among Christians; while the figures for St. Petersburg would seem to indicate 185 for the former against 126 for the latter, but this is probably due to some fault of enumeration.

J.

**BIRZHI** (Polish, *Birze*): District of Poniwicz, government of Kovno. The population of 1,500 includes 600 Jews, the majority of whom are engaged in handicrafts. The traditional Jewish charity is here developed in the highest degree; the philanthropic institutions including a hospital, and the following societies: Malbish 'Arummim (for distributing clothes among the poor), Po'ale-Zedek (for mutual help), Gemilat Hesed (for advancing loans without interest), and a Talmud Torah, attended by eighty-eight children. The Jews in the neighborhood of Birzhi are engaged in agriculture on rented land, either cultivating it themselves, or with the help of others. For the history of the Jewish community of Birzhi, see KOVNO, LITHUANIA, RADZIWILL.

**BISCHITZ DE HEVES, JOHANNA** (*née Fischer*): Hungarian philanthropist; born in Tata in 1827; died in Budapest March 28, 1898; daughter of a porcelain manufacturer and wife of David Bischitz. She was the founder and president of the Jewish Women's Association, and the Jewish People's Kitchen, of Budapest; vice-president of

the Christian "Maria Dorothea Charitable Union"; member of the committee of the Red Cross Society; and honorary member and honorary president of more than 100 philanthropic societies of the province. In 1867 Baron Moritz de Hirsch founded at her instance and gave into her charge a relief bureau in Buda-pest, as a center for Hungary, placing at her disposal a yearly sum of 120,000 gulden for distribution among the poor. During her presidency more than 3,000,000 gulden were distributed. Her philanthropic

Johanna Bischitz de Heves.

labors were not only recognized by Emperor Francis Joseph I., who twice decorated her, but were acknowledged by King Leopold I. of Belgium.

**BISCHOFFSHEIM, LOUIS RAPHAEL:**

French banker and philanthropist; born in Mayence, Germany, in 1800; died in Paris, Nov. 14, 1873. His father's sudden death, combined with the general upheaval of public affairs that followed the events of 1815, compelled Bischoffsheim to abandon the studies he was pursuing at the gymnasium of his native city and to enter commerce. He found employment as clerk in a banking-house at Frankfurt-on-the-Main, and mastered his business so rapidly that at the age of twenty he was director of a bank which he himself had founded in Amsterdam. Ten years later, on the separation of Belgium from Holland, he was appointed consul-general of the former state at Amsterdam.

His business grew so rapidly that he established branch houses in Antwerp (1827), London (1836), and Paris (1846). In 1850 he left Holland, and settled in the French metropolis, where his son Raphael Louis was pursuing his studies at the Ecole Centrale (see Raphael Louis BISCHOFFSHEIM). Paris thus became the headquarters of his large banking firm, Bischoffsheim himself undertaking the personal direction of the business.

Interested in every commercial enterprise of importance, and taking part in all the great financial operations of his time, Bischoffsheim soon acquired immense wealth. He financed the great southern railway company, the Compagnie du Chemin de Fer du Midi, and became director of the Société Générale de la Banque des Pays-Bas, of the Crédit Foncier Colonial, of the Franco-Egyptian Bank, and of the Société du Prince Impérial.

A large portion of Bischoffsheim's fortune was devoted to charitable and educational purposes. He was president of the Association Philotechnique and founder of the Athénée. At the latter it was his intention to have entertainments for charitable

objects; but the enterprise failed, and the Athénée finally became an ordinary theater.

**BIBLIOGRAPHY:** *La Grande Encyclopédie*, s.v.; Paul Guérin, in *Dictionnaire des Dictionnaires*, s.v.  
s. A. S. C.

**BISCHOFFSHEIM, RAPHAEL JONATHAN:** Belgian financier and philanthropist; born at Mayence in 1808; died at Brussels Feb. 6, 1883. He left his native town when quite young and went to Belgium. Endowed with good judgment, being a tireless worker, and having early become familiar with business operations, he was soon engaged in important financial transactions, in which his mere name and his experience inspired the public with confidence. He opened a bank at Antwerp and another at Brussels, both of which rapidly succeeded. Bischoffsheim was one of the most active founders

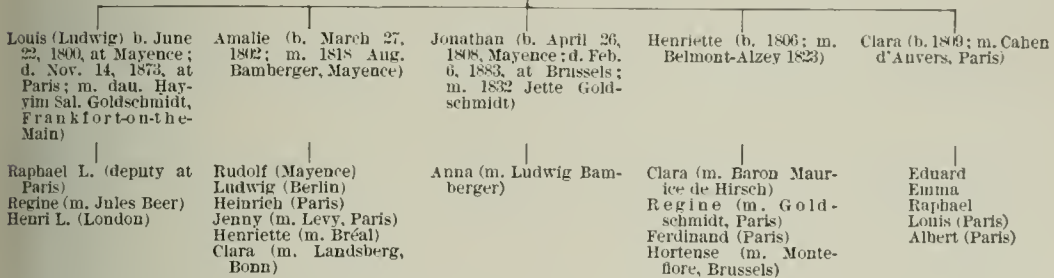

he had lived, was changed to that of "Boulevard Bischoffsheim"; and the community of Watermael-Boitfort placed his bust in the hall where the sessions of the Communal Council were held.

s. M. BL.

**BISCHOFFSHEIM, RAPHAEL LOUIS:** French banker; member of the Institute of France; son of Louis Raphael Bischoffsheim; born July 23, 1823, in Amsterdam. He received his early education in his native city, and was then sent by his father to Paris to take a special course preparatory to entering the Ecole Centrale des Arts et Manufactures, where he was admitted in 1842. On graduating from that school he was appointed inspector of one of the southern railway lines belonging to the system controlled by his father, and remained in that position until 1873, when he succeeded his father in the banking firm.

#### GENEALOGY OF THE BISCHOFFSHEIM FAMILY.

Raphael (Nathan) Bischoffsheim (b. 1773 at Bischofsheim-on-the-Tauber; d. Jan. 22, 1814, at Mayence; m. Helene, dan. Herz Moses Cassel of Mayence).

of the Union du Crédit, instituted in the hard times of 1848, and which since then has been specially serviceable to small traders; of the Comptoir de Prêts sur Marchandises at Antwerp; of the Union du Crédit at Liège; and of the National Bank, of which he was successively examiner and director, and which he saved from imminent failure in 1841, receiving for his services on that occasion the Cross of the Order of Leopold. Bischoffsheim had a high standing in political as well as in financial circles. He was a member of the communal council of Brussels, and for twenty years represented the arrondissement of that name in the Senate, often advising the ministers of finance.

Bischoffsheim founded several philanthropic institutions; among them, at Brussels, two professional schools for girls, two normal schools, a model school, courses of lectures for women, an association for encouraging study among women, the Educational League, and committees for supplying food and clothing to needy school-children, and a chair of Arabic at the university. He was also actively interested in Jewish philanthropy, and for many years was a member of the Central Consistory.

He received special naturalization papers in 1859 for exceptional services rendered to the state, and he was decorated with many foreign orders. His funeral was attended by all classes of the whole city; the name of the Boulevard de l'Observatoire, where

Bischoffsheim in a short time acquired the reputation of a public-spirited man; and his munificent gifts to charitable and scientific institutions won for him the exceptional honor of "grande naturalization," by which, on April 24, 1880, he became a citizen of the French republic.

Attracted by the marvelous advance of astronomy, and deeply interested in that science, Bischoffsheim spared no expense in aiding astronomical institutions and enterprises. The observatories of Paris and of Montsouris owe to him in great measure the excellency of their modern equipment. He has also given his financial support to the observatory established by General Nansouty on the summit of the Pic du Midi.

Bischoffsheim's most valuable contribution to the progress of astronomy, however, was the observatory of Mont-Gras near Nice, one of the largest and best-equipped institutions of the kind in Europe, which he founded with an endowment of 1,500,000 francs. This observatory was formally inaugurated Oct., 1887, and was selected for the meeting-place of the international geodetic congress of that year. The Académie des Sciences sent its most illustrious representatives on the occasion, and later recognized the valuable nature of Bischoffsheim's services to astronomy by electing him member (*membre libre*) of the Institut de France; while the French government bestowed upon him the Cross of the Legion of

Honor. He received two gold medals at the Paris Universal Exposition of 1889; one for his observatory at Nice, the other for his professional school on the Boulevard Bourdon, Paris.

In 1881 Bischoffsheim was chosen to represent the electoral district of Nice in the Chamber of Deputies; but he insisted upon preserving the independence of his political opinions, and as he would attach himself permanently to no political faction, he was not reelected in 1885.

**BISCHOFFSHEIM, RAPHAEL (NATHAN):** Merchant and prominent philanthropist; born at Bischoffsheim-on-the-Tauber, 1773; died at Mayence Jan. 22, 1814. He went to Mayence during the French Revolution, and from a small merchant became a purveyor to the army. Bischoffsheim was president of the Jewish community of Mayence. In a list dated April 21, 1808, he is included in the twenty-five foremost Jews of that city, from among whom the authorities were to choose notables for the great Sanhedrin of Paris.

**BIBLIOGRAPHY:** Family records in the register's office, Mayence, Nos. 55 and 459; record of deaths, *ib.*, for the year 1814, No. 1039; *Le Guide de la Ville de Mayence*, year ix. of the republic; *Mainzer Memorbuch*, 1583-1837, No. 1239; *Allg. **BISCHOFFSHEIM-ON-THE-TAUBER:** City in the district of Mosbach, Baden. At Landa and the neighboring Tauber-Bischoffsheim seven prominent Jews were tortured and burned, Jan. 1 and 2, 1235, on the accusation of having murdered a Christian. Nearly the whole community was annihilated by the hordes under Rindfleisch July 24, 1298, and again by those under Armleder's leadership June 10, 1337. Another persecution took place in 1343; and on the appearance of the Black Death in 1348 many Jews were martyred. Jacob of Bischoffsheim, with his wife and son, is mentioned at Nuremberg in 1329. In 1336 the brothers Johann and Eberhard Voyte ratified an agreement that of the yearly tax on the Jews of Bischoffsheim one-half should thenceforth go to Otto, bishop of Würzburg, and the other half to themselves until the chapter should have bought back the city from them. On Dec. 23 of the same year they agreed to turn over their share to the town council. In 1338 Archbishop Heinrich of Mayence released the knight Johann von Rieden and his family from all the claims of the Jews of Bischoffsheim on account of the Jews that had been slain in that city. In 1343 Archbishop Adolf of Mayence promised to cease taxing the Jews in the nine cities of the archbishopric to which Bischoffsheim belonged. On June 27, 1400, the burgrave Friedrich addressed a letter to Isaac of Bischoffsheim. In 1710 the houses of two Jews, near the church, were exchanged for others. In 1731 and 1746 the electoral government issued decrees forbidding the desecration of Sundays and holidays by Jews. The

poll-tax of the Jews amounted to 20 kreutzer in 1724. From early times the city belonged to the electorate of Mayence, and the Jews were included in the rabbiniate of Aschaffenburg, or Mayence; representatives of Bischoffsheim are mentioned in all transactions of the electorate. When Baden became independent Bischoffsheim came under the rabbinical jurisdiction of Wertheim. The first and the last rabbi of Bischoffsheim-on-the-Tauber was Jacob Löwenstein (1851-69); while his learned son, Leopold Löwenstein, rabbi at Morbach, had charge of the rabbiniate in 1870-71. At present (1902) the community numbers 40 families, and is included in the rabbiniate of Morbach.

Jacob ben Eliezer Brandeis, who died in 1768, is mentioned as rabbi of Neckar-Bischoffsheim. A Rabbi Hellmann, of the family of Chief Rabbi Löb of Prague, was the author of a commentary on the Shulhan 'Aruk, Eben ha-'Ezer. He died at an early age, and was succeeded by Rabbi Moses Bamberger, who died in old age in 1820. The latter's only son, Koppel Bamberger, rabbi of Worms, died in 1864. The Jew Joseph, baptized in 1705, was a native of this place.

Jews are also mentioned as living at Rhein-Bischoffsheim.

**BISENZ:** Town in Moravia, Austria. About the earliest history of its Jews nothing is known. Pesina, whose "Mars Moravicus" was published in 1677, calls it "nidus Judaorum."

In the time of the margraves (up to the fifteenth century) the Bisenz Jews must have enjoyed great privileges; for, according to the oldest "mountain-laws," they were permitted to own vineyards, it being a matter of great importance to the margraves to market their wine through the agency of Jewish traders. In the wars between George Podiebrad of Bohemia and Matthias of Hungary (c. 1458), Bisenz, and with it the Jewish quarter, was entirely devastated and came under constantly changing feudal proprietors.

According to the feudal "Urbarium" of 1604, the Jews even then possessed thirty-two houses, a hospital, and seventeen smaller buildings, called "Hoferi Zidovisti." But only a year later (May 2, 1605) the Jewish community was totally destroyed by Stephen Boeskaï; so that in 1655, when the new edition of the land-register was made out, twenty-five Jewish holdings still lay in ruins.

In the first Silesian war (Feb., 1742) the Jewish community suffered severely from the Prussian invasion, especially as its inhabitants had to bear their share of the general levies. At the close of this war the empress Maria Theresa in 1753 issued the so-called "Familien-Verordnung" (Family Ordinance), according to which only 5,442 Jewish families were allowed to live in Moravia; and of these 137 were allotted to Bisenz. On May 17, 1777, almost the

entire Jewish ghetto, in which there were ninety-three houses, was burned. Up to 1782 the Jewish community was subject to the feudal lord; but in criminal matters they were under the jurisdiction of the city authorities.

Of recent events may be mentioned the organization of the Jewish congregation into a political community in 1852, and the building of a new synagogue in 1863.

D. J. HF.

**BISHKA, NAHMAN BEN BENJAMIN COHEN ZEDEK:** Russian Talmudist; lived in the second half of the eighteenth century. Together with his brother, **Shabbetai Bishka**, he wrote the "Shebet Ahim" (The Brothers' Sitting), essays on different passages of the Talmud, with an appendix entitled "Shem 'Olam" (Eternal Name), being comments on different passages of the Hagadah and the Bible. The work was published (Wilna-Grodno, 1833) by his grandson, Joshua ben Kalonymus Cohen Zedek, who added an appendix of his own Talmudic essays under the title "Nahal Yabbok."

L. G. I. BER.

**BISHOP OF THE JEWS (Episcopus Judæorum):** Title given to an official of the Jews in the Rhine country and in England in the twelfth and thirteenth centuries. At Cologne it appears to have been used as an equivalent to "parnas," or warden of the synagogue. In England the parnas is mentioned under that name, and there appear to have been in each large community three, and three only, of these "episcopi" (for example, in the communities of London and Lincoln); and it has therefore been inferred that they were equivalent to the three dayanim or ecclesiastical assessors who constitute the bet din in the Jewish community, known in the English records as a "chapter of the Jews" (*capitulum Judæorum*). Originally an official title, the name became afterward a cognomen; and in French-speaking countries several Jews are found with the name "Evesque" or "Levesc." Some TALLIES of the English Exchequer have lately been discovered in which the Latin name is given as "Levesc," but is signed in Hebrew as "Cohen"; and it has been suggested that the name when used as a family name is simply equivalent to "Cohen."

Besides the bishops, there was in England a **PRESBYTER**, who appears to have been a kind of chief rabbi, associated chiefly with the treasury; he would correspond to the ab bet din.

**BISLICHES** or **BISSELICHES, MORDECAI LOEB:** Editor of some valuable Hebrew works of medieval authors; born at Brody, Austria, at the end of the eighteenth century; died about 1851. He was married at the age of thirteen (a fact of which he bitterly complains), ultimately divorced his wife, and, after the death of his children, went to Paris. There he was very prosperous in business, devoting his leisure to the study and publication of Hebrew manuscripts in the Paris Library. Later he went to

Holland and Italy, where he collected a number of Hebrew manuscripts. Returning to his birthplace, he prepared for publication, with the aid of his brother Ephraim, the following works:

(1) "Yeshu'ot Meshiho," of Isaac b. Judah Abravanel, Carlsruhe, 1828; (2) "S-fer ha-Nefesh," of Shem-Tob Palquera, Lemberg, 1835; (3) "Moreh ha-Moreh," of Shem-Tob Palquera, Presburg, 1837; (4) "Ma'amar Yik'kavu ha-Mayim," of Samuel b. Judah Tibbon, Presburg, 1837; (5) Moses Nahmanides' Hiddushim on "Shabbat," under the title, "Ozar Nehmad," Presburg, 1837; (6) "Minhat Kena'ot," of Abba Mari b. Moses of Lunel, Presburg, 1838; (7) "Sefat Yeter," of Abraham ibn Ezra (edited with preface by Meir Letteris), Presburg, 1838; (8) "Ha-Palli," a catalogue of eighty valuable Hebrew manuscripts in the possession of Bisliches (described by L. Zunz, with additional critical remarks by Senior Sachs), Berlin, 1850.

BIBLIOGRAPHY: His pre-faces to the books *Ma'amar Yik'kavu ha-Mayim*, and *Ha-Palli*; Steinschneider, *Cat. Bodl.*, cols. 800, 962, 1959; Fürst, *Bibl. Jud.*, i. 129; Zedner, *Cat. Hebr. Books Brit. Mus.*, s.v.; Geiger, *Jüd. Zeit.*, iii. 282.

D. H. M.

**BISMARCK, PRINCE OTTO EDUARD LEOPOLD:** Prussian statesman; born at Schönhausen April 1, 1815; died at Friedrichruh July 30, 1898; member of the Prussian Diet (Vereingter Landtag), 1847-51; representative of Prussia at the Bundestag at Frankfurt-on-the-Main, 1851-59; Prussian ambassador at St. Petersburg from March, 1859, to May, 1862, and at Paris from May to Sept., 1862; secretary of state and premier from Sept., 1862, to Aug., 1866; then chancellor of the North German Federation until 1870, and of the German empire from Dec., 1870, to March 20, 1890.

As a delegate to the first Prussian Diet, convened in 1847, Bismarck, a strong adherent of the feudal party ("Junkerpartei"), opposed the new law which favored the emancipation of the Jews. He eloquently advocated the idea of a Christian state in which Jews might have all personal liberties, but should not be accorded the right of serving as magistrates. He evinced the same spirit of religious or, rather, racial prejudice when Eduard Simson was elected speaker of the Erfurt parliament and himself one of the secretaries: "My late father," he said, "would thrice turn in his grave should he hear that I had become the secretary of a Jewish savant" (Simson had been baptized). In 1881 Bismarck praised Simson as one of the most distinguished and patriotic representatives of the national idea.

Time and experience wrought a change in Bismarck's views. Many years later (1870), at Versailles, he confessed that he had heard and had delivered "many a stupid speech at this Diet."

As Prussian minister of state, he acquiesced in the full emancipation which had come to the Jews through the revolution of 1848; and under his chancellorship the North German Federation passed the law of July 3, 1869: "All existing restrictions of civil and political rights, restrictions derived from the difference of religion, are hereby abolished. Especially the right of participating in the representation of the municipality and of the state, and of holding public office, shall be independent of the religious creed." In words and deeds Bismarck proved himself a staunch defender of these principles, which were embodied in article 3 of the constitution of the empire. "I shall never consent to any attempt at curtailing the constitutional rights of the Jews" (Poschinger, "Fürst Bismarck," p. 227). With the

same emphasis he declared his opposition to the anti-Semitic movement: "I decidedly disapprove of this agitation against the Jews, be it on religious or on racial grounds."

In 1868, when the agitation began against the Jews in Rumania, he took the part of the persecuted, and tried to influence Prince (afterward King) Karl in their favor, as is seen from a letter addressed to Crémieux by Count von der Goltz, Prussian ambassador to the French court (April 2): "From the letter of the president of the cabinet of Feb. 22 you may have learned already of the deep interest which the royal government takes in this affair. The readiness with which Count Bismarck has complied with your wish expressed in your letter of March 26 is a new proof thereof. His Excellency authorizes me to inform you that the Prussian consul-general at Bucharest has been ordered by telegraph to remonstrate with Prince Karl against the proposed law concerning the Israelites, which has just been submitted to the Rumanian legislature."

At the Berlin Congress of 1878, Bismarck, pleading for the rights of the Rumanian Jews, remarked to Prince Gortschakoff that perhaps the sad condition of the Jews in Russia was due to the fact that they were deprived of civil and political equality. That no political considerations but the sentiments of justice and humanity dictated his actions is shown in the answer made by his coadjutor, Von Bülow, secretary of state for foreign affairs, to the representatives of the Alliance Israélite Universelle, who, desiring the chancellor's intercession in behalf of the Jews of the Balkan districts, had pleaded for toleration: "Gentlemen," said Von Bülow, "'toleration' is an incorrect word; not toleration, but unrestricted exercise of all their rights shall we demand, at the congress, for your coreligionists."

And yet the "iron chancellor," who had it in his power to crush the anti-Semitic movement at its beginning, was led by political reasons to foster it for some time. Having changed the liberal policy which he had followed since 1867, and in which he had had the support of the prominent Jewish statesmen Lasker and Bamberger, he sought the alliance of the Conservative party, which in 1878 had gained the ascendancy in the Reichstag. The court chaplain, Adolf Stöcker, founder of the Christian-Socialist party and of its offspring, anti-Semitism, was not hampered in his reactionary agitations. Bismarck considered this new movement an efficient auxiliary in combating liberalism and democracy. But this strange fellowship, which, especially in Berlin, had pernicious consequences, was not of long duration. Bismarck never yielded to the demands of the agitators, and strenuously checked their attempts to deprive the Jews of the rights guaranteed to them by the fundamental laws of the empire.

S. MAN.

**BISNA, BISINAH, BISNI (BIZNA):** Palestinian scholar of the fourth amoraic generation (fourth century); contemporary of BERECHIAH II., with whom he appears in a halakic discussion (Yer.

Ma'as. v. 52a—"Bisnah"; Yer. Ned. iii. 37d; Yer. Shebu. iii. 34d, where "Yosnah" is to be corrected). His name is connected with several Halakot, for the most part, however, as transmitting opinions of his predecessors and contemporaries (Yer. Pes. iv. 31a; Yer. M. K. i. 80a; Yer. Yeb. iii. 5a). In homiletic literature he also transmitted remarks in the names of others (Tan., Shemini, 8 [ed. Buber, xii.]; Gen. R. xiv. 9, "Bisni"; Deut. R. iv. 6).

In his own name but few Haggadot are preserved; of these, the following interpretation of a Biblical verse may serve as a specimen:

"Blessed is the man whom thou chastenest, O Lord, and teachest out of thy law" (Ps. xciv. 12). "No man on earth is entirely exempt from pain. If his eye hurts him, he can not sleep; a toothache keeps him wakeful all night. But here is a scholar engaged in the study of the Law, and he spends a whole night in thoughtful meditations. The former is awake through pain, the latter voluntarily; blessed is he who chasteneth himself with wakefulness over the study of the Law" (Tan., Mikkez, ed. Buber, xvi.; Yalkut 850 reads "Bizna").

**BISTRITZ, KALMAN KOHN:** Hungarian Neo-Hebraic poet; lived at the beginning of the nineteenth century. He was the author of the Purim drama "Goral ha-Zaddikim" (The Lot of the Righteous) which appeared in Vienna, 1821. He belonged to the same family as Meir Kohn Bistriz, and is considered a good epigrammatist.

**BIBLIOGRAPHY:** Fürst, *Bibliotheca Judaica*, i. 120; Kayserling, in *Winter und Wünsche, Jüdische Litteratur*, iii. 896 (both mistakenly cite Bistriz's work as *Genul ha-Zaddikim* [The Reward of the Righteous]); Berliner, *Beiträge zur Gesch. des Jüdischen Drama*, appended to his edition of R. Moses Zacuto's *Yesod 'Olam*, p. xviii., Berlin, 1874.

L. G.

P. Wt.

**BISTRITZ, MEIR KOHN:** Hungarian Neo-Hebraic poet and author; born in Vag-Bistriz, Hungary, 1820; died in Vienna Sept. 7, 1892. He lived the greater part of his life in Vienna, where he published most of his works. The first of these was his notes and German translation of Mordecai b. Meir Kalman's didactic poem, "Tabnit ha-Bayit" (The Shape of the House) (1858). In the following year he published "Kol Rinnah" (The Voice of Rejoicing), a Hebrew poem with a German translation, both composed by him on the occasion of the dedication of the new temple in Budapest. In 1863 he produced a new and improved edition of the anonymous "Aruk ha-Kazer" (Abridged Dictionary). A year later he edited and published "Ziyyun le-Zikron 'Olam" (Sign of Eternal Remembrance), a work in honor of the seventieth birthday of Isaac Noah Mannheimer, containing addresses, songs, essays, etc., in Hebrew and German. He wrote other minor poems, and a humorous essay on the proverb "Wenn die Chassidim reisen, regnet es" ["Jüdisch-Deutsches oder Deutsch Jüdisches Sprichwort," Vienna, 1889]. He was also the author of a lengthy article in the Hebrew periodical "Bet Talmud" (iv. 140, 177, 206), to explain the difficult passages in Midrash Tanhuma, which were pointed out by Jacob Reifman.

Bistriz's last and largest work was the "Bi'ur Tif ha-Yawen" (The Cleaning up of the Mire; Presburg, 1888), a vindictive attack on the radical criticism of Osias H. Schorr in explaining the Talmud.

The book is full of diatribes against Schorr's personality, and is written in abusive and bombastic style. Schorr's pupils or followers, and all Polish Jews who have adopted modern dress or modern views, come in for their share of abuse. The work, which is, however, not without merit as a contribution to the lexicography of the Talmud, closes with sixteen epigrams aimed at another alleged follower of the liberal editor of "He-Ḥaluz," Asher Simḥa WEISSMAN, author of "Ḳedusbat ha-Tanak."

**BIBLIOGRAPHY:** Lippe, *Bibliographisches Lexicon*, i. 243, 621; Zeitlin, *Bibliotheca Hebraica*, pp. 178, 179; Kayserling, in Winter and Wünsche, *Jüdische Literatur*, iii. 896.  
L. G. P. WI.

**BITHIAH.**—**Biblical Data:** Daughter of Pharaoh, whom Mered of the tribe of Judah married (I Chron. iv. 18). In the Midrash (Lev. R. § 1) she is called the foster-mother of Moses.

J. JR.

G. B. L.

—**In Rabbinical Literature:** Daughter of Pharaoh; identified in the Midrash with Moses' foster-mother. The name is explained as follows: God said to her, "You have called Moses your son, although he was not your son, therefore I will call you my daughter ["Bithiah" = "bat," daughter; "Yah," God], although you are not my daughter" (Lev. R. i. 3; Meg. 13a; and elsewhere). Bithiah is also identified with "his wife Jehudijah," mentioned in the same verse (I Chron. iv. 18), and the name is interpreted as signifying that she became a Jewess, giving up the idolatry of her father. The names of the men whom "she bare," which are enumerated in that verse, are taken to be different designations for Moses (compare MOSES IN RABBINICAL LITERATURE), Bithiah being represented as Moses' mother in the passage, because the person who rears an orphan is regarded as the veritable parent. Mered, whom Bithiah subsequently "took," was Caleb, who was called Mered ("rebellion") because, as she rebelled against her father and her family, so did Caleb "rebel" when he refused to follow the evil counsels of the spies (*l.c.*; Sanh. p. 19b; Targ. on the passage; compare also the pseudo-Jerome commentary on the passage).

Bithiah bathed in the Nile, because, having a skin-disease, she could bathe only in cold water; yet she had hardly touched the casket in which Moses lay, when her disease left her, and she then knew that the boy was destined for great things (Pirḳe R. El. xlviii.; Ex. R. i. 23). When her attendants suggested to her that it was unseemly that Pharaoh's daughter should act against her father's commands, the angel Gabriel appeared and slew them; and Bithiah herself took the casket out of the water. As it was a considerable distance from the bank, her arm was miraculously lengthened so as to enable her to reach it (Soṭah, p. 12b; Meg. p. 15b). Bithiah was the first-born of her parents, but, through Moses' prayer, was spared at the time of the death of the first-born (Pesik., ed. Buber, vii. 65a). She is numbered among the persons who entered paradise alive; having saved Moses, she was forever freed from death ("Derek Erez Zuṭta," i.; Yalk. i. 42, ii. 367). Compare MOSES IN RABBINICAL LITERATURE.

K.

L. G.

**BITHYNIA:** A province in the northwest of Asia Minor, adjoining the Propontis, the Thracian Bosphorus, and the Euxine. A Jewish colony existed there as early as the first century of the common era. In his address to Caius, the Judean Agrippa speaks of the Jews of Bithynia (Philo, "Legatio ad Cajum," § 36; ed. Mangey, 587). A Greek tumulary inscription bearing all the characteristics of its Jewish origin was discovered in 1891 at Arnaut-Keni in Bithynia. It runs as follows: "Ἐνθάδε κατέκειται Σανθάτις, υἱὸς Γεροντίου πρ[εσβυτερον], γραμματεὺς καὶ ἐπιστάτης τῶν παλαιῶν Εἰρήνη ("Here lies Sanbatis [= Shabbethai], son of Gerontios, presbyter, scribe, and president of the elders. Peace!"). It is thus evident that organized Jewish communities existed not only in the important cities, like Nicæa and Nicomedia, but also in the small towns. These communities, like all those of the Byzantine empire, underwent many persecutions during the Middle Ages. In 1326 Bithynia was conquered by the sultan Orkhan, and the condition of the Jews was greatly improved.

At present Bithynia forms a part of the vilayet of Brusa, which contains about 5,800 Jews. They are chiefly engaged in the sale of textile materials and undressed silk, in brokerage, money-changing, and various handicrafts. The Alliance Israélite Universelle has established several schools for children.

I. BR.

**BITTER HERBS.** See PASSOVER.

**BITTERN** ("kippod"): From an examination of the passages in which "kippod" occurs it would seem that a bird is meant by the word. In Isa. xxxiv. 11, "But the cormorant and the kippod shall possess it; the owl also, and the raven shall dwell in it," any meaning for "kippod" other than the name of a bird would be decidedly out of place. In Zeph. ii. 14 it is again mentioned by the side of the cormorant, and is spoken of as singing "in the upper lintels." From Isa. xiv. 23 it is clear that the kippod was one of the wading birds. Hence there seems to be good ground for translating the term by "bittern," as the bittern is a nocturnal bird, dwells alone, and belongs to the wading class. The ancient versions have "porcupine" instead of "bittern," and the later usage of Hebrew and the Arabic "kunfud" support this translation; but the difficulties aroused by the reading "porcupine" in the Biblical passages are formidable.

J. JR.

G. B. L.

**BITTOON, ISAAC** (sometimes called **Pittoon**): English pugilist, fencing master, and teacher of "the noble art of self-defense"; born in 1778; died in Feb., 1838. His first encounter was with Tom Jones of Paddington, whom he met and defeated at Wimbledon, Surrey, July 31, 1801. This victory was followed by a drawn battle with George Maddox, which took place Dec. 13, 1802, on the same spot, and was called off after seventy-four rounds. On July 16, 1804, on Willesden Green, near London, Bittoon fought a drawn battle with William Wood, a London coachman, interrupted in the thirty-sixth round by the appearance of officers from Bow street.

Subsequently he appeared in the ring only as a second; and on Nov. 16, 1812, assisted Jack Carter in his match against Jack Power.

Soon after his last appearance as a principal, Bittoon retired from the prize-ring, and established an athletic school in Goulston street, Whitechapel, London, where he gave instruction in boxing and fencing. He was buried in the Jewish cemetery near Bethnal Green.

F. H. V.

**BITUMEN**: A substance said (in Gen. xi. 3) to have been used for mortar. It belongs to the class of hydrocarbons, and is a resultant from petroleum, after having gradually undergone evaporation and oxidation. The continuation of this process upon this mineral tar produces the asphalt so abundant at the southern end of the Dead Sea. Indeed, this material gave that sea the name of the asphaltic lake (Asphaltites Laeus). Deposits of this substance are found in many parts of the world, and almost always in close proximity to bitumen springs. The best known among those in the East to-day are at Hit, not far from the site of ancient Babylon. This bitumen was used in coating and thus in increasing the durability of sun-dried bricks, and for various other useful purposes. Hull thinks that the bitumen in the basin of the Dead Sea is probably derived from the bituminous limestones of the Cretaceous series, and that it reaches the surface through fissures in the rock. Of slight commercial importance, the springs of Hit are still used by the native boat-builders.

I. M. P.

**BIURISTS** (from בִּיאָר, "commentary"): A class of exegetes of the school of Mendelssohn. Not content with giving a simple meaning, most of the Biblical commentators immediately preceding Mendelssohn had interpreted the Biblical passages from an individual point of view, and had so distorted the literal sense of the words that they failed completely to make clear the actual meaning. Mendelssohn

compiled for his children a literal German translation of the Pentateuch; and to this Solomon Dubno, a grammarian and excellent Hebraist, undertook to write a "biur" or commentary. As soon, however, as a portion of the translation was published, it was criticized by rabbis of the old school, including Raphael ha-Kohen of Hamburg, Ezekiel Landau of Prague, Hirsch Janow of Posen, and Phineas Levi Horwitz of Frankfurt-on-the-Main. Fearing that the charm of the German language would lead the Jewish youth to study the translation rather than the Torah itself, and believing that they would thus be led away from orthodox Judaism, the rabbis united forces, and in June, 1779, issued a ban against "the German Pentateuch of Moses of Dessau." This act led Solomon Dubno to give up his work after having finished Genesis; but, in order that the undertaking might be completed, Mendelssohn himself undertook the commentary. Finding, however, that the work was beyond his strength, he committed to Naphtali Herz Wesel (Hartwig Wessely) the biur to Leviticus, to Aaron

**Translation of the Pentateuch.**

Jaroslav that to Numbers, and to Hertz Homberg that to twenty-two of the middle chapters of Deuteronomy.

Thus the work that was to revolutionize Bible-study among the Jews was completed in March, 1783, under the title "Netivot ha-Shalom" (The Paths of Peace). It is preceded by an introduction in Hebrew, written by Mendelssohn, in which he discusses the history of the work and the rules of idiom and syntax followed in his translation. Mendelssohn wrote, also, a German translation of the Psalms, with a Hebrew introduction ("mebo") on Biblical poetry, for which

Joel Löwe (Joel Bril, בְּרִיל = the initials of בֶּן רַי יְהוּדָה לֵב, conjointly with Mendelssohn's Aaron Wolfsohn (Aaron of Halle, a translator of the Song of Solomon), wrote the biur. The biur to Kaplan Rabe's translation of Ecclesiastes was written by Mendelssohn. The work begun by Mendelssohn was continued by his followers, the Biurists, whose writings are given in the following columns:

Joel Löwe (Joel Bril, בְּרִיל = the initials of בֶּן רַי יְהוּדָה לֵב, conjointly with Mendelssohn's Aaron Wolfsohn (Aaron of Halle, a translator of the Song of Solomon), wrote the biur. The biur to Kaplan Rabe's translation of Ecclesiastes was written by Mendelssohn. The work begun by Mendelssohn was continued by his followers, the Biurists, whose writings are given in the following columns:

Author.	Biur to	Author.	Biur to
Aaron Wolfsohn	Esther	Moses Philipsson (Moses Arnswalde)	Daniel Hosea Joel Habakkuk
M. Obernik	Joshua Judges	Israel Neumann	Amos Nahum Haggai Malachi
M. Obernik and Samuel Detmold	Samuel	Joseph Wolf	Micah Obadiah Zephaniah Mishah Teborah (12 minor prophets)
Isaac Euchel	Proverbs	Joel Löwe	Jonah
David Ottensosser of Fürth	Isaiah Job	Solomon Levy of Sandersleben	Zechariah
David Ottensosser, Helman Schwabacher (Fürth), S. J. Kohn (Wollstein)	Jeremiah Ezekiel Hagiographa		

In the nature of the biurist movement was the undertaking of Moses Landau, who in 1806 published a biuristic Bible, in which the above-mentioned biurim were superseded as follows:

Author.	Biurim.	Author.	Biurim.
Wolf Mayer	Joshua 1 Kings Samuel Isaiah Jeremiah	Ben Ze'eb	Minor Prophets and introduction to the prophetic books.
Solomon Sachs	Ezekiel		
Abraham Benisch Marcus Goldman			

Mendelssohn's biuristic school extended from Poland to Alsace, from Italy to Amsterdam, London, and Copenhagen; and it called forth many imitators, such as Samuel J. Mulder, who translated into Dutch the Pentateuch, five Megillot, and the former Prophets; G. A. Parsen, who translated and commented in Hebrew on the Book of Isaiah; I. Neufeld, who translated the Bible into Polish; and J. L. Mandelstamm, who translated the Bible into Russian. Isaac Samuel Reggio also followed in the footsteps of the Biurists with an Italian translation and Hebrew commentary to the Pentateuch, and an

Italian translation of Isaiah; Samuel David Luzzatto translated the Bible into Italian, and wrote *biurim* to Job, Isaiah, and the Pentateuch, and some glosses to Jeremiah, Ezekiel, Proverbs, and Job; and M. Rosenthal, J. Mannheimer, and M. Stern translated the Psalms into Hungarian. The movement later crossed the Atlantic, and Isaac Leiser of Philadelphia translated the Bible into English according to the interpretations of the Biurists; while in Europe steps were taken toward the perpetuation of the movement, in the foundation of the *Hebra Doresh* Leshon 'Eber (Society of Investigators of the Hebrew Language) by Isaac Abraham Euchel and Mendel Breslau, and in the establishment of the periodical "*Ila-Meassef*" (The Gleaner).

The Biurists laid the foundation of a critical historical study of the Bible among the modern Jews, the first-fruits of which may be seen in Philippson's German Commentary, 1827. The commentator groups and examines critically the most important exegetical explanations of the Bible exponents; penetrating into the actual import of the Holy Scripture and searching the spiritual context, so as to explain the Bible by the Bible itself. As regards grammar and lexicography, Philippson touches these only in so far as is necessary to the comprehension of the text.

**BLACK DEATH:** A violent pestilence which ravaged Europe between March, 1348, and the spring of 1351, and is said to have carried off nearly half the population. It was brought by sailors to Genoa from south Russia, whither it had come from central Asia. During March and April, 1348, it spread through Italy, Spain, and southern France; and by May of that year it had reached southwest England. Though the Jews appear to have suffered quite as much as their Christian neighbors (Höniger, "*Der Schwarze Tod in Deutschland*," 1882; Häser, "*Lehrbuch der Gesch. der Medizin*," iii. 156), a myth arose, especially in Germany, that the spread of the disease was due to a plot of the Jews to destroy Christians by poisoning the wells from which they obtained water for drinking purposes. This absurd

theory had been started in 1319 in Franconia (Pertz, "*Monumenta Germanie*," xii. 416). On that occasion punishment had fallen upon the lepers, by whose means the Jews, it was alleged, had poisoned the wells. Two years later, in the Dauphiné, the same charge had been brought against the Jews.

In 1348, once the accusation was raised, it was spread with amazing rapidity from town to town; and official reports were sent by the mayors of various cities containing alleged confessions of Jews who had been seized under the accusation and put to torture (see Schilter, in "*Königshoven Chronik*," pp. 1021 *et seq.*).

The first outbreak seems to have occurred in northern Spain, in Barcelona, Cervera, and Tarrega, in the months of June and July; but the actual myth of well-poisoning in connection with the Black Death seems to have arisen in Switzerland in the autumn of that year, though Clement VI. had issued in July a bull declaring its falsity (Baronius, "*Annales*," 1348, No. xxxiii.). When the pestilence reached Chillon, Jews of that place were arrested and put to the torture. A certain Balavignus "confessed" that an elaborate plot had been concocted by some Jews in a town in the south of France—Jacob à Paskate from Toledo, Peyret of Chambéry, and one Aboget. These had compounded a poison the ingredients of which were Christians' hearts, spiders, frogs, lizards, human flesh, and sacred hosts, and had distributed the powder made out of this concoction to be deposited in the wells whence Christians drew water. The report spread to Chatel, Chatelard, and Bern; and from the last-named place special messengers were sent to all the Swiss and Upper Rhine towns, which soon produced the natural effect. At Zurich, where the new charge was combined with the old blood accusation, several Jews were burned (Sept. 21, 1348), while the rest were expelled (Schudt, "*Jüdische Merkwürdigkeiten*," i. 323). During the month of November the rumor reached Augsburg (Nov. 22), Würzburg, and Munich, and spread through eighty towns of Bavaria, where massacres of the Jews occurred. In the following month the great epidemic reached the Upper Rhine with the same results. At Freiburg in Breisgau, Jan. 30, 1349, all of the Jews, except twelve of the richest, were slain, the latter being reserved solely that their riches might be appropriated. Here it was reported that four Jews of Breisach had been sent to Freiburg with the poison, which they had obtained at Basel, and that all of the Jews of Strasburg, Basel, Freiburg, and Breisach were in the conspiracy. On Jan. 22 the Jews of Speyer fell victims, several being slain, and several killing themselves to escape baptism, while others, less firm-spirited, accepted baptism as the sole refuge from death.

Meanwhile correspondence had been carried on between the town councils of Basel, Cologne, Chillon, and Strasburg, containing the substance of the so-called confessions. At Strasburg the mayor refused credence to the rumors, and declared his intention of sustaining the Jews; whereupon he was removed from his post, and more than

**Outbreak at Strasburg.** 2,000 Jews of the city were put to death (Feb. 16, 1349). The deeds belonging to the latter were seized and destroyed (showing the real motive of the act); and the debtors of the Jews gave assurances to the citizens of protection from the consequences of the massacre (Stobbe, "*Juden in Deutschland*," p. 189). The Jews of Worms were the next victims, and no less than 400 of them were burned March 1; while on July 24 the Jews of Frankfurt preferred to offer themselves up as a holocaust, and in so doing burned part of the city. The largest number of victims is recorded at Mayence, where no less than 6,000 are said to have been slain Aug. 22, 1349. Here the Jews for the first time took active

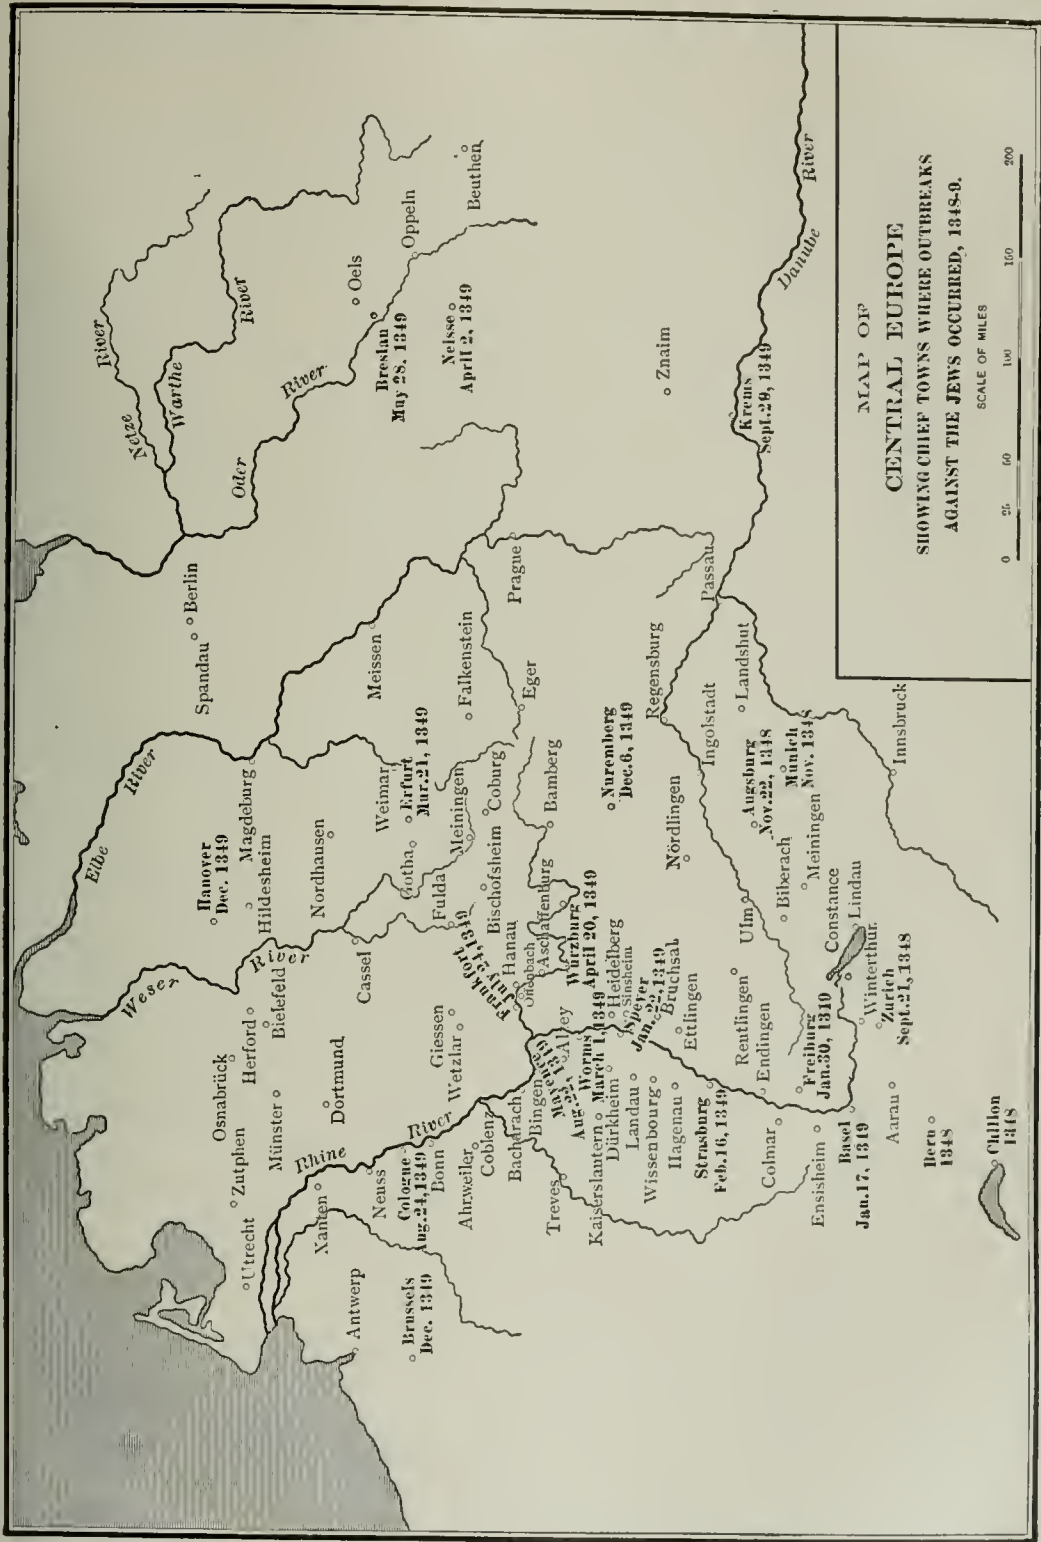

measures against their oppressors, and killed 200 of the populace; but finding the task of freeing themselves hopeless, they barricaded themselves in their dwellings, and when the alternative of starvation or baptism faced them, set fire to their houses and perished in the flames. Two days afterward the same fate befell the Jews of Cologne; and, seemingly in the same month (though other records assign March 21 as the date), the Jewish inhabitants of Erfurt, 3,000 in number, fell victims to the popular superstition and hatred.

Meanwhile the protection of the duke of Austria had prevented the madness from reaching his dominions; but at last, on Sept. 29, the passions of the mob at Krems overcame the authority of the soldiery, and all the Jews of that town were burned. The last month of the year 1349 saw attacks at Nuremberg (Dec. 6), Hanover, and Brussels. With this the popular fury died out; and the rulers of German principalities and cities had to determine what punishment was to be meted out to the slayers of the Jews, and what disposal should be made of the rich possessions the Jews had left behind them. Very little was done in the former direction: the whole social fabric had been overturned by the terrible pestilence; and even with the best will, if they had possessed it, the rulers could not have increased the devastation by adequate punishment of the murderers. The emperor, however, claimed the huge fine of 20,000 marks in silver from the inhabitants of Frankfurt for the loss he had sustained by the killing of the Jews; and other fines were inflicted by the officers of the imperial treasury. But the chief punishment took the form of claiming the inheritance of the Jews' debts, which, by the imperial law, belonged to the emperor; so that, except in cases where the records of their debts had disappeared, the debtors of the Jews gained little by these murders.

In the preceding account, only the chief outbursts have been specially referred to. The following list contains the names of all towns where the Jews were attacked on account of the Black Death, according to the records given in the Nuremberg "Memorbuch." It is of importance not alone for its testimony to the wide area of the attacks upon the Jews, but also as recording almost every town in Germany, outside the Austrian dominions, in which Jews dwelt in the middle of the fourteenth century:

It is somewhat difficult to account for the complete helplessness of the authorities against these outbursts of popular fury. It was fully recognized at the time—as, for example, by the town council of Cologne—that an outbreak against the Jews might imperil the social order generally. The loss to the imperial and princely treasuries was immense. Yet, so far from taking any steps to prevent the outbreaks,

the emperor in several instances gave

**Results.** beforehand practical immunity to the perpetrators of the crime, by making

arrangements as to what should be done with the houses and goods of the Jews in the event of a riot. This happened at Nuremberg, Regensburg, Augsburg, and Frankfort, and, doubtless, in other towns. There can be little doubt that the authorities shared the prejudices of the mob, and, with few exceptions, believed in the dread rumor of well-poisoning.

The effects on the Jews of Germany were little less than disastrous. The loss of life resulting from the massacres was terrible. Many of the Jews' debtors died from the pestilence; while others refused acknowledgment of their debts. The Jews of Bavaria, for example, were so impoverished, owing to their losses, that the margrave granted them freedom from all taxes for two years (Scherer, "Rechtsverhältnisse," p. 577).

From this time onward the Jews in all German towns lived in perpetual dread of similar attacks; and the civil authorities adopted the plan of expulsion as the only means of getting rid of the Jewish question in the towns. By the end of the fifteenth century there were only three considerable communities left in the whole of Germany.

**BLANC, PIOTR:** Polish financier of the eighteenth century; court banker under King Stanislaus Augustus Poniatowski (1764-95); date and place of birth unknown; died at Warsaw in 1797. Together with the bankers Dekert and RAFALOWITZ he formed the tobacco monopoly in 1776 and the government lottery in 1781. With Tepper he negotiated the Holland loan. In 1790 he was raised to the nobility, and in the following year became the owner of a palace near Senatorska street, Warsaw, and of a villa in the suburb of Fawory. When Ignacy Potoszky and Piotoli in 1792 worked out a plan to improve the condition of the Polish Jews, Blanc and

his influential friends guaranteed the payment of five million rubles, which the Jews of Poland pledged themselves to contribute, instead of the usual taxes, for the amortization of the king's debts.

**BLAND** (*née* Romanzini), **MARIA THERESA:** English actress and singer; born in 1769 of Italian-Jewish parents; died at London Jan. 15, 1838. When only four years old she took a part in a performance at Hughes' Riding School, London. After studying for some years she made her reentry at Drury Lane Oct. 24, 1786, where she was so successful that she became leading lady in succession to Mrs. Wrighten. Her best rôle at this time was that of *Antonio* in Grétry's "Richard Cœur-de-Lion." In 1789 Maria Theresa played in Liverpool, returning to London a year later, when (Oct. 21, 1790) she was married to Mr. Bland, brother of Mrs. Jordan of Drury Lane. The following year she sang at the Haymarket in "Iukle and Yarico." Subsequently she appeared as *Miss Notable* in "Lady's Last Stake"; *Nina* in "The Prisoner"; *Mary Ann* in "School for Guardians"; *Madelon* in "Surrender of Calais," and *Sally* in "The Shipwreck." Her mind began to fail in 1824, and she was forced to retire, her last appearance being at her benefit at Drury Lane July 5, 1824.

E. Ms.

**BLASER, ISAAC B. SOLOMON:** Russian rabbi and educator; born in Wilna about 1840. Educated to be a rabbi, he is recognized as the foremost pupil of Israel Lipkin and the best exponent of his moral teachings and methods of study. Blaser became the rabbi of the Jewish community of St. Petersburg about 1864, and held the position for sixteen years. He left the Russian capital and settled in Kovno, where he still resides as head of the so-called PERUSHIM (men who separate themselves for study) of Kovno. A considerable sum (about 100,000 marks) was donated in aid of the Perushim by Caspar Lachman of Berlin, an ardent admirer of the above-mentioned Lipkin. The income from this endowment being insufficient, Blaser sends out emissaries or "meshullahim" to all Orthodox Jews to collect money for these zealous students, to whom the Russian Jewry now looks for its rabbis, just as it formerly looked to the graduates of yeshivot. Blaser, or, as he is familiarly called, "Reb Itzele Peterburger," is known and trusted among Russian Jews everywhere, and the emissaries from Kovno, who frequently visit the United States, are always well received and generously assisted.

Blaser is also identified with another movement, in which he continues the work of his teacher Lipkin. He is the head of the so-called MUSSAR'NIKES ("Moralists"). The Jewish world is not so much interested in the "mussar" movement—which seeks no publicity and no outside financial assistance—as in the Perushim, but the personality and the position of

Blaser have influenced many of the latter to join the Mussar'nikes.

Blaser is the author of "Peri Yizhak" (The Fruit of Isaac), responsa, and various rabbinic researches (Wilna, 1881).

**BLASOM, VIDAL.** See MOSES NARBONI.

**BLASPHEMY:** Evil or profane speaking of God. The essence of the crime consists in the impious purpose in using the words, and does not necessarily include the performance of any desecrating act.

The Jewish law is based on the case of the blasphemer, one of the mixed multitude that went out of Egypt with the children of Israel (Lev. xxiv. 10-23). He blasphemed the name of the Lord and cursed; was sentenced to be taken without the camp; and it was decreed that all who heard him should lay their hands upon his head, and that all the congregation should stone him. The judgment in his case was formulated in a general law in verses 15 and 16.

The term "we-nokeb shem Yvwh," used in verse 16 ("And he that blasphemeth the name of the Lord," A. V.), does not seem to signify that the mere pronunciation of the Ineffable Name was considered blasphemy, but that it was blasphemous to curse or revile the same. The later law, however, took the word "nokeb" in the sense of "pronouncing," and declared that the Ineffable Name must have been pronounced before the offender could be subjected to the punishment provided by the Law.

Both the lawgiver and the prophets speak of the blasphemer of God and of the king. To revile the king, who was God's representative, was apparently considered a species of blasphemy (Ex. xxii. 27; Isa. viii. 21). This is furthermore shown in the case of Naboth, the indictment against him being: "Thou didst blaspheme God and the king" (I Kings xxi. 10). Beyond the reference to cursing in the text of Leviticus, there is nothing in the Biblical laws to indicate what constitutes the crime, and nothing to show that, to prove blasphemy, it was required to prove that the blasphemer had uttered the name of God. The Mishnah, however, laying stress on the term "nokeb," declares that the blasphemer is not guilty unless he pronounce the name of God (Mishnah Sanh. vii. 5). The Gemara goes further and extends the crime to an impious use of any words which indicate the sacred attributes of God, such as "The Holy One" or "The Merciful One." As long as the Jewish courts exercised criminal jurisdiction, the death penalty was inflicted only upon the blasphemer who used the Ineffable Name; but the blasphemer of God's attributes was subjected to corporal punishment (Sanh. 56a). According to Talmudic tradition, the Sacred Name was in early times known to all; but later its use was restricted (Kid. 71a; see ADONAI; NAME OF GOD).

Even in taking testimony during the trial of a blasphemer, the witnesses who heard the blasphemy were not permitted to repeat the very words, but an arbitrary phrase was adopted to indicate the

blasphemy. Thus R. Joshua ben Karjah said, "Throughout the examination of the witnesses, 'Yosé' should be used for  $\Upsilon\eta\omega\upsilon\eta$ , and they should say, 'Yosé shall strike Yosé,' to indicate the blasphemy" (Mishnah Sanh. *ib.*). At the conclusion of the trial sentence of death could not be passed by such testimony only, and it thus became necessary for one of the witnesses to use once the very words which they had heard. The court directed all persons not immediately concerned in the trial to be removed, and the chief witness was then addressed thus: "State literally what you heard"; and when he repeated the blasphemous words the judges stood up and rent their garments, that being the common sign of mourning. And the rents were not sewed up again, indicating the profound degree of the mourning. After the first witness had thus testified, the second and the following witnesses were not called on to repeat the identical words; but were obliged to say, "I also heard it thus" (Mishnah Sanh. *ib.*).

The text of the law in Leviticus provides that the stranger, as well as the native born, is liable to punishment for blasphemy. Talmudic tradition states that blasphemy was one of the seven crimes prohibited to the Noahides (Sanh. 56a), *i. e.*, according to natural law. Although, according to Jewish law, a Jew who blasphemed a heathen deity was not guilty of the crime of blasphemy, Josephus ("Ant." iv. 8, § 10, after Philo, "Vita Mosis," 26; ed. Mangey, ii. 166) to the contrary notwithstanding, yet a heathen might be guilty if he blasphemed the name of the Lord (Baraita Sanh. 56a). The crime of the heathen blasphemer, though subjecting him to the penalty of death, did not oblige the Jewish bystanders to rend their garments. The Talmud bases the custom of rending the garments in such cases upon the Biblical precedent in II Kings xviii. 37, where Eliakim and others rent their garments when they heard the blasphemy of Rab-shakeh; and in order to bring this view into harmony with the practise requiring the rending of garments only on hearing a blasphemy by a Jew, the Talmud states that Rab-shakeh was an apostate Jew (Sanh. 60a).

According to R. Hiyya, the rending of garments was no longer required after the fall of the Temple ("He who hears blasphemy nowadays is not obliged to rend his garments, because otherwise his garments would be nothing but tatters," Sanh. *ib.*); for the criminal jurisdiction of the Jewish courts had ceased, and the fear of death no longer deterred the blasphemers. The later law, however, restored the practise of rending the garments. In an opinion rendered by Gaon Rab Amram ("Teshubot Geone Mizrah Uma'arab," collected by Joel Müller, No. 103) he says, "He who hears his neighbor blaspheme must excommunicate him in these days, no matter what language was used. This is the practise of the pious. It is not necessary that the blasphemy be in Hebrew, and it makes no difference whether the Ineffable Name or the attributes of God be mentioned, whether the offender be a Jew or a non-Jew, whether the language be Hebrew or any other. These distinctions were made to distinguish the capital crime from the lesser offense, but for purposes of excommunication, it makes no difference whether the blasphemer be a heathen or a Jew, whether he

use the Sacred Name or the attributes, nor what language he uses; he must be excommunicated." And this opinion is, with slight modification, repeated in the *Yoreh De'ah* (340, 37) as follows: "He who hears the Name blasphemed, or even an attribute of God, such as 'The Forgiving One,' 'The Merciful One,' etc., even if pronounced in a foreign language, must rend his garments, provided he hear it from an Israelite (and an apostate is in these days considered a heathen); and even if he hear it from the mouth of the witness stating how the blasphemer blasphemed. But the witnesses testifying in court need not rend their garments again, having once done so when they first heard the blasphemy."

The excommunication of the blasphemer was substituted as a punishment for the death penalty (see EXCOMMUNICATION), rendering it unnecessary for the witnesses to repeat the identical words of the blasphemy, as this was required only when the death penalty was inflicted (*Pitḥe Teshubah* to *Yoreh De'ah*, 340, 37). Abba Saul was of the opinion that, in addition to the punishment inflicted by human power, the blasphemer is also excluded from the life in the world to come ('Ab. Zarah 18a). See SACRILEGE, INFIDELITY, SCOFFING; SIEM HA-MEFORASH.

**BLAU, HEINRICH:** German journalist and playwright; born in Neu-Stettin, Pomerania, Sept. 21, 1858. He received his education at the Jewish school and the Sophien Realschule in Berlin, whither his parents had removed when he was a small child. When only thirteen years of age he wrote a metric translation of the Psalms. Blau in 1878 went to London, where he found employment on the "Londoner Journal," a German paper, whose chief editor he became later. Since then he has been engaged on the staffs of various German publications in the English capital.

Blau soon became a proficient journalist, writing both in English and in German; acting as correspondent of papers in Germany, and contributing to such English reviews as the "Nineteenth Century" and the "Contemporary." He also translated literary works from and into English and German, besides writing feuilletons. During all this time he studied Sanskrit and Oriental literature; and the

result was shown in "Gautama," a dramatic poem in German in four acts.

Blau is the author of a drama in German blank verse, "Thomas Chatterton," and of "Some Notes on the Stage and Its Influence upon the Education of the Masses," and "Some More Notes" on the same subject, for which essays he received a gold medal from a London society. He also wrote libretti for light operas—"San Lin" and others—and the texts of the opera "Das Erbe Judas" and the oratorio "Samuel," as well as the dramas "Scherben," "Bianca Capello," "Die Prophezeiung," and "Götzen."

In 1893 Blau came on a visit to the United States, but remained only a short time.

**BLAU, LUDWIG:** Hungarian scholar and publicist; born April 29, 1861, at Putnok, Hungary; educated at three different yeshivot, among them that of Presburg, and at the Landesrabbinnenschule in Budapest (1880-88); studied philosophy and Orientalia at the Budapest University; received there the degree of Ph.D. *cum laude* in 1887, and the rabbinical diploma in 1888.

In 1887 Blau became teacher of the Talmud at the Landesrabbinnenschule, in 1888 substitute, and in 1889 professor of the Bible, the Hebrew and Aramaic languages, and the Talmud. Since 1899 he has also been librarian and tutor in Jewish history. He is (1902) president of the folk-lore section of the Jewish-Hungarian Literary Society, and (since 1891) editor of the "Magyar Zsidó Szemle." Blau's scientific publications have dealt chiefly with the literature and life of the Jews in the Talmudic and early post-Talmudic periods (*e.g.*, "Beiträge zur Erklärung der Mechilta und des Sifre," in the Steinschneider "Festschrift," 1896; "Quelques Notes sur Jésus ben Sirach," in "Revue Etudes Juives," xxxv. 19-47; "Das Altjüdische Zauberwesen," Strasburg, 1898), with the Jewish traditions regarding the Masorah ("Massoretische Untersuchungen," Strasburg, 1891; "Masoretic Studies," in "Jewish Quarterly Review," viii., ix.), and the canon of Scripture ("Zur Einleitung in die Heilige Schrift," Strasburg, 1894). This latter work is especially valuable for the light it throws upon the history of the Bible text in the early synagogue. Blau has also published "Der Concursus Vitorum nach Talmudischem Recht," Budapest, 1887; and "Die Erwählung Israel's" (in Hungarian), *ib.* 1890; and has contributed to the "Monatsschrift," "Zeitschrift für Hebräische Bibliographie," "Jahrbuch des Ungarischen Literaturvereines," "Jahrbuch der Deutschen Literaturvereines," etc.

**BLAUSTEIN, DAVID:** Educator; born May 5, 1866, at Lida, near Wilna, Russia. He received his first education in Hebrew in the *heder* and *yeshibah* of his native town; went at the age of eighteen to Prussia, where he studied Hebrew and rabbinical literature under Israel Lipkin; subsequently, on his removal to Mecklenburg-Schwerin, he studied Jewish history and philosophy under Dr. Feilchenfeld. Being still a Russian subject, he was ordered to leave Germany, and in 1886 came to the United States and settled in Boston, where he

opened a private school. He actively engaged in educational and communal work, being one of the founders of the Sheltering Home for Immigrants. About 1890 he entered Harvard University, but left it after three years to devote himself entirely to congregational work at Providence, R. I., where from 1892 to 1896 he acted as rabbi, and became a member of the executive board of the Society for Organizing Charity. In 1896 he was appointed lecturer on Semitic languages at Brown University, and in 1898 became connected with the Educational Alliance of New York, where he fills the office of superintendent. Blaustein went to study the conditions of the Rumanian Jews in the summer of 1900, visiting for this purpose Bucharest and other cities, accompanying Mr. Wachthorn, delegated by the United States government to study the Jewish question.

**BLAUSTEIN, OZER:** Russian teacher, and writer in Russian and Judæo-German; born at Düna-burg in 1840; died in Warsaw April 27, 1899. His Russian grammar was recommended for Jewish public schools by the Ministry of Public Instruction. He is the author also of a "German Method" and a "Manual for the Study of Hebrew"; and has translated into Russian the Hebrew prayer-book and the *Maḥzor*. Of his numerous novels, published in the Judæo-German dialect, may be mentioned: "Der Armer Gvir," Wilna, 1893; "Die Gvald-Shiduchim," Wilna, 1880; "Der Sohn als Schadhān," 2d ed., Wilna, 1893; "Der Bitterer Tropfen," Wilna, 1894; "Die Waisse mit die Schwarze," Wilna, 1894; "Der Baal Tove," Wilna, 1895.

H. R.

**BLAYNEY, BENJAMIN:** English divine and Hebraist; born 1728; died Sept. 20, 1801. He was educated at Oxford, took the master's degree in 1735, and became fellow and vice-principal of Hertford College in 1768. He was employed by the Clarendon Press to prepare a corrected edition of the Authorized Version. This appeared in 1769, but most of it was destroyed by fire in the Bible warehouse, Paternoster Row, London. Blayney then studied Hebrew, and in 1787 took his degree as doctor of divinity.

His principal works are: "A Dissertation by Way of Inquiry into the True Import . . . of Dan. ix. 24 to the End," etc., 1775-97, which was translated into German by J. D. Michaelis; a new translation of Jeremiah and Lamentations, 1784; an edition of the Samaritan Pentateuch in Hebrew characters, 1790; a new translation of Zechariah, 1797. He was a good scholar and a useful writer.

**BLAZON.** See COAT OF ARMS.

**BLEEDING:** In accordance with the pathology of its epoch, the Talmud declares, "At the head of the list of human ailments stands plethora (B. B. 56b). The Rabbis say elsewhere (Bek. 44b), "Where there is an abundance of blood, there is also an abun-

dance of eczema." Bloodletting is therefore considered of great importance; and the scholar is forbidden to reside at a place where no bloodletter ("uman," surgeon) is at hand (Sanh. 17b; Maimonides, "Yad," De'ot, iv. 23). The following are the rules, partly pathological and partly astrological or demonological, which the Rabbis recommend for the operation.

A man ought to be bled once every month, but with advancing years the intervals must be extended. The first, fourth, and sixth days of the week are the most appropriate for the operation. On the fourth day of the week, which falls on the fourth, fourteenth, or twenty-fourth of the month,

**Necessity** or after which remain less than four **and Time of** days till the new moon, there must be **Operation.** no bloodletting, since at such times it

is dangerous. On the first and second days of the month the operation is enervating, and on the third day dangerous. The operation is not permitted on the eve of a Biblical festival; neither must it be performed on a cloudy or a stormy day, or soon after eating a hearty meal, after partaking of cress, or while suffering with fever, while having sore eyes, or while exposed to a draft (Shab. 129a; Yeb. 72a; Ned. 54b; 'Ab. Zarah 29a). On entering the operating-room, the patient must offer the following prayer: "May it please Thee, O Lord my God! that this my project effect healing unto me; and do Thou heal me, for Thou, O God! art the true Physician, and Thy healing is true." After the operation one should say, "Blessed be the gratuitous Healer" (Ber. 60a; Maimonides, "Yad," Ber. x. 21; Oraḥ Hayyim, 230, 4).

Immediately after the operation one should drink one-fourth of a log of red wine, as a substitute for the red blood lost. This is of so much importance that the very poor patient who can not buy the wine is permitted to obtain the prescribed quantity by calling at shops and tasting the wine, on pretense of intending to purchase a large supply. Or, failing in this, he must eat seven black dates, anoint his temples with oil, and then sun himself, in order to become thoroughly heated. Under ordinary circumstances, however, eating is to be deferred until such time has elapsed after which one can walk half a mile. A little rest after the operation is heartily recommended. Washing the hauds is considered to be of almost equal importance, the omission of which will render the patient nervous for seven days (Shab. 129a; Pes. 112a; Oraḥ Hayyim, 4, 19). One must eat a good meal after the operation. So urgent are the Rabbis concerning this particular injunction that, although they have laid down the rule that a man should sell the roof of his house to buy himself shoes in case of necessity, they also prescribe that, if necessary, a man should sell his shoes in order to procure a good meal after bloodletting. Furthermore, they assert that the one who

**Dietary** makes light of the meal on such an **Rules After** occasion will receive but slight sus- **Operation.** tenance from Heaven; if he does not prize his life, why should Heaven prize

it? For this meal meat is recommended, or a dish of milt; but the flesh of fowls will produce palpitation of the heart. Fish is said to be beneficial when eaten

a day before or a day after bleeding; but on the third day it is to be avoided as dangerous. Milk, cheese, onions, and cress are dangerous after the operation, and he who is imprudent enough to partake of them must drink a mixture made of one-fourth of a log of wine and the same quantity of vinegar (Shab. 129a; Ned. 54a; 'Ab. Zarah 29a).

Nearly all of these rules emanate from Rab and Samuel, who were among the earliest and most prominent Babylonian amoraim (third century). But not all of them met with general approval. A century later it was said of them, "Now that many trample these precepts under foot, and yet escape serious hurt, one can realize the truth of the psalmist's saying (Ps. cxvi. 6), 'The Lord preserveth the simple'" (Shab. 129b; Yeb. 72a). See Brecher, "Das Transcendentale im Talmud," § 57, and ABBA THE SCRIBEON (UMANA).

**BLEEK, FRIEDRICH:** Christian theologian; born July 4, 1793, at Ahrensböck, Holstein; died at Bonn in 1859. After a preparatory course at the gymnasium of Lübeck and two years of philosophical study at Kiel, he entered the University of Berlin, where he studied under Schleiermacher, De Wette, and Neander; becoming tutor at the university in 1818, and assistant professor in 1823. In 1829 he was appointed professor of theology at Bonn, which position he held until his death.

The researches of Bleek were devoted principally to the Old and New Testaments. His work in the former field only will be considered here. Bleek first became known through his series of investigations on the origin and compilation of the Sibylline Books ("Ueber die Entstehung und Zusammensetzung der Sibyllinischen Orakel," in "Berliner Theologische Zeitschrift," 1819-20), which work, as the first systematic endeavor to illuminate this obscure field, must be regarded as epoch-making. Next followed the two treatises, "Ueber Verfasser und Zweck des Buches Daniel" ("Berliner Theologische Zeitschrift," 1822) and "Einige Aphoristische Beiträge zu den Untersuchungen über den Pentateuch" (Rosenmüller, "Repertorium," 1822). In 1831 appeared in the "Theologische Studien und Kritiken" his "Beiträge zu den Forschungen über den Pentateuch," an endeavor to point out such portions of the Pentateuchal legislation as may be traced to the authorship of Moses.

Bleek also made an important contribution to the history of the criticism of the Pentateuch in his program for the University of Bonn (1836), entitled "De Libri Genesios Origine atque Indole Historica Observationes Quaedam contra Bohlenium," in which he vigorously defends the supplementary hypothesis of Von Bohlen, although sharply controverting the late epoch assigned by the latter to the various portions. In 1852 he published in the "Studien und Kritiken" the dissertation "Ueber das Zeitalter von Scharja Cap. 9-14, Nebst Gelegentlichen Beiträgen zur Auslegung Dieser Aussprüche."

In 1860, shortly after the death of Bleek, his son Johannes, and his foremost pupil and subsequent successor, Adolf Kamphausen, edited, from the manuscript of his class-room lectures, the "Einlei-

tung in das Alte Testament" (4th ed., 1878; edited by Wellhausen). The lucidity, thoroughness, and thoughtfulness with which all the results of the so-called "Vermittlungstheologie" are combined in this work, have served to make it highly popular and useful. The eminently reliable scientific works of Bleek are characterized by extensive learning, thoroughness, ingenuity, and incorruptible veracity.

**BLEICHRÖDER, GERSON, BARON VON:** German banker; born Dec. 22, 1822; died Feb. 19, 1893, in Berlin. At the age of sixteen he entered the banking firm founded by his father, and on the death of the latter, in 1855, assumed its management. It was due to his large experience and practical ability that the firm acquired a world-wide reputation.

Bleichröder enjoyed the full confidence of Prince Bismarck, and is said to have been a close friend of the emperor William I., who often consulted him on important financial operations. In 1865 he went, at the invitation of King William, to Carlsbad, and, to extricate the government from a financial embarrassment, proposed the cessation of its participation in the Köln-Minden railroad interests. In 1867 he was made commercial privy counselor (*Geheimer Commerzienrath*). It was owing to these circumstances and to his connections with the Rothschilds that after the Franco-Prussian war (1870-71) Bleichröder was summoned to Versailles as financial adviser on the question of the war indemnity. For the services thus rendered in the peace negotiations the Prussian government conferred upon him the Iron Cross. In 1872 he was created a hereditary nobleman in recognition of his financial services to Rumania, which helped to consolidate the Hohenzollern dynasty in that country.

Bleichröder took much interest in the fortunes of his coreligionists, and his high position in the financial and political world was of great value to the representatives delegated by the Alliance Israélite Universelle to follow, in the interests of the persecuted Jews of the eastern states, the proceedings of the Berlin Congress. Many decorations were conferred upon him by various European governments; and for nearly a quarter of a century he filled the position of British consul-general in Berlin. He left a fortune estimated at 70,000,000 to 100,000,000 marks.

**BLEMISH:** The Hebrew term for "blemish" (מום or מומים) seems to have originally meant a "black spot" (compare Gesenius-Buhl, "Handwörterbuch," s. v.). It denotes anything abnormal or deviating from a given standard, whether physical, moral, or ritualistic. Biblical legislation makes certain kinds of blemishes a ground of disqualification of animals for sacrifice, and of priests for the performance of the priestly functions. It moreover prescribes qualifications for certain inanimate things

**Blemishes** that come upon the altar, the absence of which qualifications constitutes a blemish, or disqualification. Some of **Sacrifice.** the blemishes are constitutional; others are transitory. All the physical blemishes in animals and priests are external bodily defects.

The later Halakah, however, considers blemishes in priests with regard also to the priestly blessing pronounced in temple and synagogue; in Levites with regard to their service in the Temple; in persons in general with regard to the vitiating effect of such blemishes on the marriage-contract; and, finally, internal ones in animals.

**Blemishes in Animals.** (a) **Bodily Blemishes:** The bodily defects disqualifying an animal from being offered as sacrifice are enumerated in Lev. xxii. 20-25. The Halakah has extended them to seventy-three, of which number fifty are blemishes also in priests (Bek. v.; Maimonides, "Yad," Issure ha-Mizbeah, ii.). In addition to these external defects the Halakah adds such internal defects as cause the animal to be unlawful for food (see **TEREFAH**); and the absence of any internal organ. The reason for the requirement of faultlessness in sacrificial animals is given in Mal. i. 8: "If ye offer the blind for sacrifice, is it not evil? and if ye offer the lame and sick, is it not evil? offer it now unto thy governor; will he be pleased with thee, or accept thy person? saith the Lord of hosts."

The laws of "terefah" are also applicable to fowl; but the seventy-three blemishes are not. If, however, the fowl have a marked defect—

**Laws of** as a blind eye, an atrophied wing, the **Terefah.** loss of a leg—it is disqualified on the general principle that a sacrifice must be "perfect" (Maimonides, *ib.* iii.).

(b) **Ritualistic Blemishes:** The disqualifications under this head are: unnatural birth; hybridity, actual or suspected; indefinability of sex; carnal use by man or woman; having been worshiped as a deity, or set aside for idolatrous practices; if acquired as harlot's wages, or in exchange for a dog (Deut. xxiii. 19 is taken by the Halakah in its literal sense), or by stealth or robbery; if it have killed a man; if it be younger than seven full days; if it be not of the best kind obtainable (Maimonides, *ib.*).

(c) In the case of first-born animals, all the blemishes that disqualify sacrifices are also disqualifications in first-born, with this difference, that the blemishes in the latter must be constitutional, and the fact of its being first-born must be established beyond a doubt ("Yad," Bekorot, ii.).

The disqualifications in meal-offerings, oblations, incense, and altar-wood are: Levitical uncleanness, which in this case extends even to incense and wood;

spoiled condition, or change from natural state; lack of prescribed ingredients, or presence of leaven and honey; lack of required fineness in materials; wine left uncovered; produce of the first three years (ערלה), or of the new harvest before the first fruits are offered; produce grown in a field with mixed seed (כלאים), or unfitted ("Yad," Issure ha-Mizbeah, v., vi.).

Expert examiners were appointed to investigate blemishes, who were paid out of the Temple funds (Ket. 106a), but for the inspection of first-born animals they took a fee also from their owners ("Yad," Bekorot).

**Blemishes in Priests.** (a) **Bodily Blemishes:** The twelve blemishes enumerated in the Bible (Lev. xxi. 17-23) were extended by the Halakah to 142 (Bek. vii.; "Yad," Biat ha-Mikdash, vii., viii.). Besides, persons suffering from mental debility (שוטה) were not tolerated as priests.

In the Second Temple a special chamber was set apart in the court in which the Great Sanhedrin examined all priests. Those who were declared to be unfit for the sacred office put on black garments, wrapped themselves in a black cloak, and went away in silence, to be subsequently employed for such services as selecting wood for the altar.

Those found perfectly qualified put on white garments and a white cloak, and at once joined their brethren to assist in the sacred functions. They gave to their friends a feast, which they opened with this benediction: "Blessed be the Lord because no blemish has been found in the seed of Aaron the priest, and blessed be He because He has chosen Aaron and his sons to stand and to serve before the Lord in His most holy sanctuary" (Mid. ii. 5, v. 4).

(b) **Ritualistic Blemishes:** The disqualifications under this head are: Levitical uncleanness; birth in unlawful wedlock (הלל), or in an unnatural way (ויצא רופח); uncertainty as to sex (אנדרגיניום = טומטום, see **ANDROGYNOS**); state of mourning; or of inebriety; disheveled hair, and rent garments ("Yad," Biat ha-Mikdash).

In this connection may be mentioned the incident with King John Hyrcanus, to whom a Pharisee remarked that he should be satisfied with royal power and give the high-priesthood to some one else, since, as rumor had it, his mother had been once a captive in Media; the purity of his birth, therefore, was not beyond cavil, and he was not entitled to hold the sacred office (Kid. 66a).

(c) **Moral Blemishes:** The Pentateuch makes no mention of moral blemishes; but it is known that priests convicted of idolatry, homicide, or any other great offense were not permitted to officiate (see II Kings xxiii. 20; Ezek. xliv. 13).

(d) **Blemishes in Regard to Priestly Blessing:** The following six blemishes disqualify a priest from pronouncing the blessing in temple or synagogue: Defective articulation of speech; malformation of face, hands or feet, or unusual appearance of hands (when, for instance, they are discolored with dye, for thus they attract the attention of the audience); moral delinquency, as idolatry or murder; insufficiency of age (his beard must be fully grown); state of

inebriety; and not having washed his hands. אֲבִיבִי, an offspring of an unlawful marriage, is debarred from the pronouncement of the blessing, because he is not considered a priest at all (Maimonides, "Nesiat Kappayim," xv.).

(c) **Reason for Disqualification:** According to Philo ("De Monarchia," ii. 5) and others, the faultlessness of the body was meant to be a symbol of the perfection of the soul. Maimonides ("Moreh," iii. 45) explained it as being designed to make the Temple honored and respected by all; for the multitude does not appreciate a man for his true worth, but for the perfection of his limbs and the beauty of his garments. The correctness of such views has been disproved by Bähr ("Symbolik des Mosaischen Cultus," ii. 55) and Kalisch (commentary on Lev. ii. 465; compare also Philippson, "Der Pentateuch," p. 639). According to Kalisch, everything associated with the perfect God was to be perfect, and above all His ministers, who approached His altars to present faultless offerings, and "came near" the curtain which shrouded His mysterious presence. They were to be perfect not only in their lives, but also in their persons, which were to be the fit abodes of pure souls, and reflect the divine similitude and holiness. They were to be distinguished by health and harmony, vigor and freshness.

**Blemishes in Levites.** The blemishes disqualifying Levites from performing their official functions were only two: transgression of the prescribed age limits and loss of voice (Hul. 24a).

With reference to blemishes invalidating the marriage-contract, or yielding a sufficient ground for divorce, man and woman are treated unequally. In regard to woman, all the bodily defects considered blemishes in priests apply also to her, and, besides, several other blemishes are added, such as make intercourse with her unbearable to the husband. In the case of man, however, only a few blemishes are mentioned (Ket. vii. 7-10, 75a-77; "Yad," Ishut, vii.; compare "Eben ha-'Ezer," 39).

k.

C. L.

[Blemish, or "mum," in rabbinical literature assumed also a spiritual meaning. "Whosoever is proud has a blemish," says R. Ashi with reference to Bar Kappara's homily on Ps. lxxviii. 17 [16]. He explains the passage, "Why leap ye, ye high hills?" as follows: "Why do you enter into a dispute with the hill God desireth to dwell on? Since you are all swollen with pride" (the word "gabnunim" being taken as identical with "gibben" ["crook-backed," Lev. xxi. 20]), "that is, since you have a blemish which unfits you to be God's mount, while Mount Sinai is humble and has therefore been chosen by God as His seat of revelation" (Meg. 29a). Abraham before his circumcision was not altogether without blemish. Circumcision fitted him for his high mission as father of the priest-people (Gen. R. xlv.).

Hence the ethical maxim (B. M. 59b), "Mum shebak al tomar le-habrak" (Do not accuse thy fellow-men of the blemish that you have). Another maxim is, "Do not cast a blemish on thyself" (Pes. 112b).

The court of justice must be free from physical as well as from moral blemish, for it is said (Song of Songs iv. 7): "Thou art fair, my love; there is no

blemish ["spot," A. V.] in thee" (Yeb. 101b). A common Hebrew adage is: "Kol baposef bemumo posef" (He who finds faults in others is influenced by the blemish in himself, Kid. 70b).—k.]

**BLES, DAVID S.:** Communal worker at Manchester; born at The Hague, Holland, in 1834; died at Vienna on Oct. 14, 1899. He was senior partner in the firm of Messrs. S. D. Bles & Sons, merchants and shippers of Manchester; from which firm he retired in 1897 in order to devote himself to philanthropic pursuits. Bles was a city magistrate for thirteen years, being elected in 1886; and for many years he held the office of vice-consul of the Netherlands.

In the year 1897 the queen of Holland conferred on Bles the Order of Orange and Nassau. He was president of the Manchester Jewish Board of Guardians; manager of the Manchester Jews' School; a trustee and member of the Council of Founders of the Manchester Reform Synagogue; a member of the Hospital Sunday Committee and of many other charitable organizations. He founded at the Victoria University a Bles Hebrew scholarship.

G. L.

**BLESSING OF CHILDREN:** In the domestic life of the ancient Hebrews the mutual respect existing between parents and children was a marked feature. While prominent among other Semitic peoples (Smith, "Rel. of Sem." p. 60), it was of first importance with the Hebrews, as is evident from the frequent mention of the duties toward parents (Ex. xx. 12, xxi. 15; Lev. xix. 3, xx. 9; Num. xxvii. 4; Deut. xxvii. 16; I Sam. ii. 25; II Sam. xix. 20; Jer. xxxv. 18; Mal. i. 6; Prov. i. 8, iii. 12, x. 1, xxix. 3, xxx. 11; I Chron. xvii. 13). The natural accompaniment of this was the value placed on the favor of parents, and notably on their blessing pronounced upon the children. The words spoken by parents were supposed to be fraught with power to bring good or ill, blessing or curse. Happy was he who was so fortunate as to receive the father's blessing; wretched he upon whom

**Among the** rested the father's curse. These statements are based particularly upon incidents in the lives of the Patriarchs, as set forth in the Book of Genesis.

Noah (Gen. ix. 26) blesses Shem and Japheth, the sons who had covered his nakedness, and curses Ham, the disrespectful son; and that blessing and curse were looked upon as determining the future superiority of the descendants of the two first-mentioned sons and the eternal servitude of the offspring of Ham. In the story of the blessing of Isaac (*ib.* xxvii. 7 *et seq.*), Rebekah makes every effort to secure the paternal benediction for her favorite (*ib.* xxiv. 60). The importance attached to the blessing appears also from Esau's heartrending cry, "Hast thou but one blessing, my father? bless me, even me, also, O my father" (Gen. xxvii. 38). The blessing, even though obtained by deceit, could not be recalled. The father's voice was the instrument through which God spoke; and the words, once pronounced, were regarded as the declaration of the Deity.

The paternal blessing was the most valuable heritage that parents could bequeath to children. In recognition of all the good that he had enjoyed at Joseph's hands and of all the honors received during his sojourn in Egypt, Jacob bestowed a particular blessing upon Joseph's sons: "Bring them, I pray thee, unto me, and I will bless them" (Gen. xlviii. 9). Especial importance attaches to this blessing of Ephraim and Manasseh by Jacob, because it became the formula by which, in later days throughout Israel, the children were blessed by their parents, in accordance with the word of the patriarch, "In thee shall Israel bless, saying, God make thee as Ephraim and as Manasseh" (*ib.* 20). And the favorite son Joseph was given the assurance, "The blessings of thy father have prevailed above the blessings of my progenitors unto the utmost bound of the everlasting hills; they shall be on the head of Joseph, and on the crown of the head of him that was separate from his brethren" (Gen. xlix. 26). It is thus evident from the whole spirit of Biblical ethics that the parents' good-will and blessing were regarded as the greatest happiness that could come to children, and it is well known to those who are at all familiar with Jewish domestic life that this sentiment continues to the present day.

The customs of a people do not always find expression in its literature. The very prevalent sentiments are frequently not set down in words, for the very reason that, being so commonly held, they do not call for comment. Fortunately, however, there are several expressions in later Jewish literature showing the value attached to the parents' blessing. The author of Ecclesiasticus undoubtedly voices the belief of his generation when he declares, "The blessing of the father builds houses to the sons, the curse of the mother destroys them" (Eccles. [Sirach] iii. 9); and the Rabbis indicate their attitude by the remarkable statement, "Scripture ranks the cursing of father and mother with the cursing of God" (*Kid.* 30b). The feeling of reverence and awe for the parental benediction well expresses the sentiment

**In Later Jewish Literature.** that has always prevailed in most Jewish communities. One of the most beautiful of Jewish customs is the blessing of the children by the father on all important occasions, notably on the Sabbath eve, on the holidays, on the setting forth on a journey, etc. Ludwig Philippson's memoirs (in "Allg. Zeit. des Jud." 1887, p. 750) mentions that his grandfather blessed him on Sabbath morning after divine service. This blessing as pronounced upon the boys is, "May God make thee like Ephraim and Manasseh" (Gen. xlviii. 20), and upon the girls, "May God make thee like Sarah, Rebekah, Rachel, and Leah" (compare Ruth iv. 12); and, in addition to this regular formula, any special blessing may be added according to the desire of the one bestowing the benediction.

There is no means of knowing how old this beautiful custom may be. The earliest mention of it is found in a passage in the "Brautspiegel," a popular treatise on morals, written by Moses Henochs; the book appeared in Basel in 1602. In the forty-third

chapter, which is devoted to advice on the training of children, the writer says, "Before the children can walk they should be carried on Sabbath and holidays to the father and mother to be blessed; after they are able to walk they shall go of their own accord with bowed body and shall incline their heads and receive the blessing (Güdemann, "Quellen-schriften zur Geschichte des Unterrichts und der Erziehung beider Deutschen Jnden," p. 167). Buxtorf, in "Synagoga Judaica," which was first published in 1604, writes in the fifteenth chapter of the book entitled "How the Jews Prepare for the Sabbath and Begin It," the following:

**Occasions for the Blessing.**

"After the service [on Sabbath eve in the synagogue] is finished, they seek their home; in parting from one another they wish each other not good-day nor good-night, but a happy Sabbath: the parents bless their children, the teachers their pupils." At the beginning of the seventeenth century the custom was general. Another mention of it, at a much later date, occurs in the prayer-book of Rabbi Jacob Emden, printed first in Altona, 1748. A long passage in this book begins with the words: "It is the custom in Israel to bless the children on Sabbath eve after service or upon entering the house." He says further that this blessing brings God's spirit upon the children who are not yet old enough to secure it by their own deeds. This indicates that as in early Biblical days, so in later times, the parental blessing was believed to be invested with a certain higher power, and to be efficacious for good. To this day this blessing is prized highly by the children.

The value thus laid upon the benediction spoken by the father and mother represents the constancy in Jewish life of the working of forces that make for righteousness; and it is one of the constituent factors of what Lazarus has so well termed the "continuity of the Jewish spirit" ("Ethics of Judaism," pt. ii., p. 213).

D. P.

**BLESSING AND CURSING:** The Hebrew verb for "bless" is "berak" (ברך). Since in Assyrian and Minaean the corresponding verb appears to be "karabu," it is not likely that the Hebrew is connected with its homonym "berak" (ברך), which means "knee." The substantive "blessing" is "berakah" (ברכה). "To curse" is "arar" (ארר); substantives are "kelalah" (קללה), "me'erah" (מיארה). Synonyms are קבב, קלל, אלה; and it is noteworthy that the word "curse" should have numerous synonyms, whereas for "bless" we have only one word. Both "blessing" and "cursing" were founded upon the belief that the individual, the tribe, or the nation could use its relation to the Deity or to the supernatural world for the benefit or the injury of others. It

**Efficacy of Blessing and Cursing.** is readily understood that special efficacy attached to the blessing and cursing by sacred persons in close relations with the Deity—by the Patriarchs, by Moses, and by Aaron, by the priests and the Prophets in general, and also by a father; for not only was the father the priest of the family,

but it was he who introduced his son to the Deity; and naturally it was supposed that he could influence the Deity to his son's benefit or injury.

Such blessing or cursing did not involve the use of empty words, but implied the exercise of a real power; the word once pronounced was no more under the control of the speaker (Gen. xxvii. 35), and must perforce accomplish its mission. On this conception is founded not only the possibility but also the whole structure of Jacob's deceit, as well as the story of Balaam. Even in later times the possibility seemed dreadful that Balaam, instead of blessing, might have cursed (Micah vi. 5; Neh. xiii. 2). At the same time the story of Jacob proves that blessing and cursing did not always rest on moral grounds. Noah (Gen. ix. 22 *et seq.*) and Jacob (Gen. xlix. 2 *et seq.*), it is true, were guided by the moral conduct of their sons; but Isaac was governed by caprice in his blessings. He was moved by the venison which Esau was to bring him and by his son's affectionate manner (Gen. xxvii. 26 *et seq.*).

Since cursing was considered a material power the unknown thief was cursed; and the mother of the Ephraimite Micah hastened to render the curse ineffective by a blessing after her son had confessed his sin (Judges xvii. 2). For this reason every alliance and every oath was accompanied by a curse directed against the person who should break the alliance or violate the oath; and the laws of Israel, and the treaties of the Assyrian and the Babylonians (compare Schrader, "K. B." vols. ii. and iii. *passim*), derived particular strength from the addition of a blessing and a curse (Lev. xxvi.; Deut. xi. 29 [compare 28]; Josh. viii. 34). Goliath cursed David "by his gods" (Sam. xvii. 43), and Balak desired Balaam to curse the Israelites, the enemies of Moab (Num. xxii. 6), because cursing was supposed to move the divine power for the injury of the enemy. Hence severe punishment was inflicted on those who cursed their parents (Ex. xxi. 17; Lev. xx. 9; compare Deut. xxvii. 16) or the authorities (Ex. xxii. 28).

However, with the gradual development of pure monotheism the conception of blessing and cursing came to be modified. While in early times it was the belief that a father by his blessings or his curses determined the fate of his son (Gen. xlix. 4, 7; Prov. xxx. 11), in later times the father became a seer (Gen. xlix. 1, xlvi. 17 *et seq.*). In fact, Prov. xxvi. 2, distinctly declares that "the causeless curse" will not be fulfilled.

**BLESSING, JACOB'S.** See JACOB, BLESSING OF.

**BLESSING, MOSES'.** See MOSES, BLESSING OF.

**BLESSING, PRIESTLY** (called, R. H. iv. 5, *Birkat Kohanim*; now *Dukan*): One of the most impressive and characteristic features of the service both in the Temple of Jerusalem and in the synagogue, having its origin in the blessing pronounced by the Aarouites in accordance with the command and the formula ordained in Num. vi. 22-27: "And God spake unto Moses saying, Speak unto Aaron and unto his sons, saying, On this wise

shall ye bless the children of Israel, saying unto them; The Lord bless thee and keep thee; the Lord make his face shine upon thee and be gracious unto thee; the Lord lift up his countenance upon thee, and give thee peace! And they shall put my name upon the children of Israel; and I will bless them." Thrice in the Pentateuch the priestly blessing is mentioned; once in speaking of Aaron (Lev. ix. 22; compare Sifra, Shemini, and Soṭah 38a), and twice in referring to the priests (Deut. x. 8, xxi. 5). In the historical books of the Bible there are two references to the blessing of the people by the priests (Josh. viii. 33; II Chron. xxx. 27).

Many rules were observed by the priests when pronouncing the blessing. These rules made some distinctions between the service in the Temple of Jerusalem and the services elsewhere. Thus, in the Temple the blessing was spoken after the sacrifice of the daily offering (Soṭah vii. 6; Tamid v. 1, vii. 2; Meg. 18a); elsewhere it was pronounced during the daily morning service and on Sabbath and holidays at every service, with the exception of that in the afternoon, because this followed shortly after the midday meal, at which the priests

**In Temple and Synagogue.** were permitted to drink wine; and it was feared that this might unfit them to perform the function properly. On fast-days, however, the blessing was

pronounced also at the afternoon service (Ta'anit 26a, b; Maimonides; "Yad," Tefillah, xiv. 14; Shulḥan 'Aruk, Oraḥ Ḥayyim, 39. 1). In the Temple the priests used the Tetragrammaton, *יהוה*, pronouncing it distinctly in uttering the blessing; elsewhere the pronunciation *ADONAI* was substituted (Soṭah, 38a; Num. R. xi. 4; Sifre, Naso, 39; "Yad," *l.c.* 10). According to one report, the priests discontinued using the Tetragrammaton, even in the Temple, after the death of Simon the Just, in order that no man who was not respected and worthy might learn it (Yoma 39b). In the Temple the three portions of the blessing were spoken without pause, and at the close the people responded: "Blessed be the Lord God, the God of Israel from eternity to eternity" (see DOXOLOGY). Elsewhere the priests paused after each sentence, and the people responded with an "Amen."

The blessing was given with uplifted hands. In the Temple service the priests raised their hands above their heads, while in other places they lifted them only to their shoulders. Any Aarouite who had attained manhood's estate was enjoined to perform the function; there were, however, certain disqualifications due to physical, moral, or ritualistic defects (Meg. 24b; Ber. 32b; "Yad," Tefillah, xv. 1-6; Shulḥan 'Aruk, Oraḥ Ḥayyim, 128. 30-41; see BLEMISH); viz., if a priest had ever killed a human being (even though unintentionally), committed idol-

**Re-strictions and Regulations.** aty, violated any of the Levitical purity or marriage laws pertaining to the priests, committed any crime without having repented, or had indulged unduly in drinking wine (this is based upon the juxtaposition of the chapter on the Nazarite, Num. vi. 1-21, and the priestly blessing, Ta'anit 26b, 22-27); if he were crippled, a hunchback, or blind even in one eye, or had any

defect on his hands, or if his speech were not distinct; and, finally, without ablution of the hands, he was disqualified. (Compare BLEMISH.) Should any priests who were thus incapacitated, or who considered themselves unworthy, be present at the service, they were compelled to leave before the reader in his prayer gave the signal to the priests, for otherwise they would violate the command, "Thus shall ye bless the children of Israel."

The blessing was to be spoken standing, as were the blessings in Deut. xxvii. (Soṭah 38a; Sifre, *l.c.*; Num. R. *l.c.*). The priests faced the congregation out of respect for the people; but the latter were not allowed to look at the priests while the blessing was spoken, lest their attention should be distracted and their devotions disturbed ("Yad," *l.c.* xiv. 7). In all motions connected with the blessing, such as advancing to the platform, or turning toward the Ark or the congregation, the priest was always to go to the right ("Yad," *l.c.* xiv. 13 after Soṭah 15b).

The blessing was to be spoken in Hebrew because of the command "thus"; that is, only in the prescribed words and language. It was to be pronounced in a loud voice so that all the congregation could hear. The priests were required to discard their leather foot-wear (sandals) when they ascended the platform to pronounce the blessing (Soṭah 40a). They were required to wash their hands before proceeding to the performance of the function (Soṭah 39a).

Originally the priestly blessing was a function performed every morning at the regular service, provided the necessary number of ten

**Its Place** persons were present (Shulḥan 'Aruk, in the Orah Hayyim, 128, 1). But in the **Liturgy.** course of time, as the daily business became too pressing to allow the people

to spend so much time on their devotion, the blessing was merely recited by the reader and introduced by a brief prayer such as is inserted in the common daily ritual; and the priestly blessing was reserved for Sabbath and holy days (Ḳol Bo, 128). Finally, in view of the fact that on the festival days people are better disposed, both in body and in soul, for the reception of the divine blessing, owing to the purifying ablutions of the previous day and to their greater cheerfulness of spirit, the festival day alone was retained for the imparting of the priestly blessing, and not the "Shaharit," but the "Musaf" service was selected, on which occasion the attendance is large (see Bet Josef, Ṭur Orah Hayyim, *l.c.*; Moses Isserles, to Shulḥan 'Aruk, Orah Hayyim, i. 44, and the commentators; also Magen Abraham for the reason why the blessing is not imparted when the holy day falls on the Sabbath). In Amsterdam and other places the blessing is recited every Sabbath.

The main idea pervading the whole function of the priestly blessing rests upon the NAME of God (Shem ha-Meforash), which is to be "put upon the children of Israel." While originally every greeting or blessing was accompanied by the pronunciation of the Name to make it efficient (see Ber. ix. 4; compare Ps. cxviii. 26), it became later only the privilege of the priests to use the Name in blessing the people; and the reverential sanctity attached to

the Name lent to the priestly function a mystical and almost magical power. Hence the belief prevailed that during the lifting up of the hands by the priests, the Shekinah was hovering over their heads and its rays streamed through their open fingers, the people not being allowed to look on lest, like those who gazed at the sacred Ark in ancient times, they might be hurt, struck with dimness of the eyes and other misfortunes (Ḳag. 16a; Soṭah 39b; Yer. Meg. iv. 75c; Cant. R. ii. 9; Num. R. xi.; "Aruk," *s.v.* בְּרָכָה; see, however, Tosaf., Ḳag. 16a; and Yer. Meg. *l.c.*, for more rationalistic views regarding the time when the Name was no longer pronounced). That great magical powers were long afterward ascribed to the priestly blessing may be learned from the advice given in the time of Rab Ashi to those troubled by bad dreams; viz., to offer a prayer that God might turn every curse into blessing (Ber. 55b)—a prayer which has been embodied in the common ritual, and is still recited during the singing of the blessing; the medieval mystics having added strange, fantastic, angelic conjurations to make it still more efficacious.

Another opinion (Cant. R. on iii. 7; Num. R. xi. 9) is that the mere listening to the priestly blessing is a charm against every malign influence, the sixty letters of the blessing being "the threescore valiant men, each his sword upon his thigh because of the fear in the night" (Song of Songs iii. 8).

Even the haggadic comments and the Scripture parallels given in Soṭah 39b–40a, Sifre and Num. R. *l.c.*, to the priestly blessing have been embodied in the ritual; and they are, partly on the recommendation and partly with the disapproval of the Rabbis, recited during the singing of the blessing by the priests (see Tos. Soṭah 40a; Ḳol Bo, *l.c.*, and ABUDARIAM).

After the "Modim," the reader introduces the priestly blessing with the words: "Our God and God of our fathers, bless us with the threefold blessing which is in the Torah, written by Moses, Thy servant, spoken by Aaron and his sons, the priests, Thy holy people." Then the Aaronites proceed to the platform and offer the following invocation silently: "May it be Thy will, O Eternal our God, that this blessing wherewith Thou hast commanded us to bless Thy people Israel may be a perfect blessing; may it be imparted without stumbling and error now and ever" (Soṭah 39a). The benediction is also prescribed which the priests recite before giving the blessing.

In the Reform ritual the priestly blessing is usually recited by the rabbi at the close of each service before the dismissal of the congregation; the assumption being that the Aaronites have ceased to possess special claims and obligations as priests, since with the destruction of the Temple the people of Israel became the priest-nation (see CONFERENCES, RABBINICAL).

The great danger in all blessings by priests lies in the possibility that the people may believe such blessings to have mediatorial power. This idea has always been foreign to the spirit of Judaism. The priest is not a mediator. The blessing which he utters has no magical power for good or ill. It is merely a portion of the prescribed ritual. Not the

priest, but God, blesses (see Sifre, *l.c.*): "I (God) will bless them." These words are used so that the Israelites may not say that their welfare depends upon the blessing by the priests: God alone can bless. Furthermore, these words are used that the priests may not say, "We will bless Israel." From God alone do blessings flow: no man has power to bestow them (Sifre, *l.c.*: Hul. 49a, where, in opposition to R. Ishmael (the priest), R. Akiba interprets the words "And I will bless them" as referring to Israel and not to the priests, since these could merely pronounce the blessing, while the real blessing comes from God).

Each word of the priestly blessing was a fruitful theme of comment and interpretation.

"May God bless thee" with wealth, and "keep thee" in health.

"May He let His countenance shine toward thee"; *i.e.*, "May He give thee the light of the eyes"; or, according to Rabbi Nathan, "the light of the Shekinah."

"May He be gracious to thee" with knowledge and understanding, with learning, instruction, and wisdom.

"May He lift up His countenance toward thee"; *i.e.*, "May His anger pass away from thee."

"May He grant thee peace" in thy going out and in thy coming in, with all men, in thy house, and without end.

"Great is peace, for through it alone is blessing secured."

"Great is peace, because it seals all the blessings" (Num. R. xi. 7; Sifre, Naso, 40-42).

—**Music:** The ceremony of pronouncing the benediction is termed in the Talmud (Hul. 132b; Meg. 24b *et passim*) "nesiat kappayim" (raising of the hands), from Lev. ix. 22. It is also familiarly called "dukan" (platform), from the position of the priests during the ceremony. These stand on a dais or platform, such as that upon which the Levitical choir in the Temple was placed. Hence the Judæo-German verb in common usage, "duchanen."

The hands as upraised during the priestly blessing.

tical art, imprints of books, etc., and is still so used, being frequently surmounted by a crown ("keter kehunah") (see KOHANIM). The fear that the people might gaze at the priest during the blessing, which was regarded as a perilous irreverence, gave rise to the custom of covering the head (and usually the hands as well) with the tallit during the recital of the benedictions. As the reader commences to intone the first of the three passages which form the conclusion of every "Amidah," those Aaronites who desire to be released from the performance of the Biblical command withdraw from the synagogue, in order that they may not hear the reader call upon the Kohanim to carry out their duty. With them withdraw any Aaronites who may be mourners, or under the age of puberty, defective in person or speech, accidental manslaughter, or married to divorced women—all these being excluded from participation. Those remaining remove their leather boots, after which water is poured over their hands by the Levites. The priests then assemble on the steps of the ARK with their faces toward it, each covering his head with his tallit; and when, during the service, the reader calls out to them, "Kohanim," they face right about, spread their hands horizontally above their heads, palms downward, in the manner indicated, and chant together: "Blessed be Thou, Lord our God, king of the universe, who hast sanctified us with the holiness appertaining to Aaron, and commanded us to bless Thy people Israel in love." Word by word the three verses are then dictated by the reader, the priests swinging north and south at suitable words in order to include the congregants standing right and left as well as those in front of them. At the close of each verse the response "amen" is given; and after the third verse they face about again, remaining before the Ark until the reader concludes the 'Amidah with the next paragraph.

From the first the benedictions appear to have been uttered with the singing rather than the speaking voice (compare Maimonides, "Yad," Tefillah, xiv. 14). Even in Talmudical times the singing seems

from one another, some appearing to be of very ancient origin. One of these is preserved in the traditions of the Sephardim, to which each of the fifteen words of the benediction is sung at length; and this has been seriously claimed to be the identical melody sung by the priests in the Temple. But while obviously antique, being practically melismatic psalmody in the sixth ecclesiastical mode, yet its structure, particularly its coda, is so close a reproduction of many another strain in the music of the southern Jews, of acknowledged peninsular origin by them, that no claim could be allowed to an origin more remote than Moresque Spain, even were not the resemblance to some of the later Mozarabic intonations so unmistakable. (See p. 246.)

**The Spanish Chant.**

The origin by them, that no claim could be allowed to an origin more remote than Moresque Spain, even were not the resemblance to some of the later Mozarabic intonations so unmistakable. (See p. 246.)

ists in several variants, and is in most instances reserved for the concluding days of the festivals ("Hazkamat Neshamot, Matnat Yad"), when departed relatives are called to mind. From this it has come to be widely known as "Niggun Metim" or "The Chant of the Dead." Its recent history is of particular interest.

**"The Chant of the Dead."** Developed with insight and feeling by Cantor NAUMBOURG of Paris, an instrumental arrangement was published in E. Pauer and F. L. Cohen's "Traditional Hebrew Melodies," London, 1896, which attracted the attention of the late Queen Victoria, and was played as the introductory voluntary at several memorial services of the British royal family. In its original simple form this chant is as follows:

**BIRKAT KOHANIM**

*Andante.*

Ah!.....

*D.C.*

{ Ye - ba - re - ke - ka. Ah!..... A - do - nai.  
 { May He bless thee. The Lord.....  
 { We - yish - me - re - ka.  
 { And keep..... thee. (AMEN follows.)

The Ashkenazim have a large number of melodies to which the words of the benediction are sung. Almost every congregation, indeed every family of Kohanim, has its own tradition. Often, however, these airs are but distinctive melodies of a particular festival, or echoes of seventeenth- and eighteenth-century German folk-song. Only two have any claim to antiquity like that of the Spanish chant. The older is a medieval German melody, which ex-

The other old northern chant is of Polish origin, probably of the seventeenth century, and is perhaps even more extensively known. At **The Polish Melody.** once beautiful in itself and very characteristic, it is to many lovers of music a typical example of Hebrew melody. In most British synagogues the whole ceremony is performed to its melodious phrases.

**BLIN D'ELBŒUF**: French manufacturer who introduced into France woolen cloth for ladies' use. It was soon considered the best in Europe, and obtained the prize at the Vienna Exhibition of 1870. Blin in presenting a sample of his cloth to President Carnot said: "We are all the more proud of it, for it reminds us of a victory gained by French industry over foreign."

BIBLIOGRAPHY: Bloch, in *Revue Etudes Juives*, xxxviii. 23. I. Br.

**BLIND, THE, IN LAW AND LITERATURE**: The ancient nations regarded blindness as the lowest degradation that could be inflicted upon man; hence gouging out the eyes of an enemy was a form of national retaliation. The Philistines bored out the eyes of Samson, and the king of Babylon blinded Zedekiah. Nahash the Ammonite demanded as a condition of surrender that he should thrust out the right eye of every man of Jabesh-gilead, as a reproach upon all Israel (I Sam. xi. 2).

The blind, together with cripples and lepers, were outcasts of society and kept quarantined outside the town limits; they became paupers and a menace to passers-by. When David besieged the Jebusites at Jerusalem, the blind and crippled men-

**In the Bible.**

dicants were so numerous that he was compelled to take stringent measures against them (II Sam. v. 6). In the eyes of the ancient Hebrews the maimed, and especially the blind, were thought to possess a debased character. Balaam, the prophet of the Gentiles, according to Talmudic tradition, was lame and blind of one eye (Sanh. 105a). The blindness of Isaac is said to have been the cause of Rebekah's action in transferring the blessing from Esau to Jacob, as she considered herself better able to judge the merits and demerits of her two sons (Yalk.). Jacob would not marry Leah because she had "tender eyes." On this account the Talmud says that a bride whose eyes are beautiful needs no further examination (Ta'an. 24a).

To counteract the prevailing notion that bodily ailments and defects are the punishment of sin, special legislation was provided for the protection of the blind and afflicted: "Thou shalt not . . . put a stumblingblock before the blind" (Lev. xix. 14). "Cursed be he that maketh the blind to wander out of the way" (Deut. xxvii. 17).

The Talmud compares the blind, the leper, the childless, and the pauper to the dead (Ned. 64b), quoting from Lamentations (iii. 6): "He hath set me in dark places as they that be dead of old."

Judah ha-Nasi is the first person mentioned in rabbinic literature who helped to remove the stigma of the blind. It is related that he and R. Hiyya, while traveling, came to a certain town and inquired whether there were any learned man whom they could honor by a visit. The townsmen directed them to a blind scholar. R. Hiyya said to the prince, "Do not disgrace thy excellence. Let me visit him." Judah insisted, however, and went with him. When they were about to leave, the blind man gratefully acknowledged the visit, saying: "Ye have honored by your audience one who is seen

but sees not. Ye shall be blessed and acceptable before One who sees but is invisible" (IIag. 5b). R. Abba b. Jacob offered a high seat in his house to a blind visitor, which action caused the people to believe the latter a great man and secured for him an honorable position. He bestowed the above-mentioned blessing upon R. Abba (Yer. Peah, end, ch. viii.). R. Hoshaiah the Great, engaged for his son a blind teacher with whom he dined daily. On one occasion, when visitors were at the house, the teacher was not invited to the table. R. Hoshaiah apologized afterward for the omission, saying he did not wish to embarrass or disgrace him before the assembly; whereupon the blind teacher rejoined, "May thy apology be acceptable before the Invisible" (*ib.*). For euphemistic reasons the Talmud calls a blind man *מְהַר מְהַר* ("a man of abundant light").

The blind are exempt from all religious duties. They may perform any religious service for themselves, but can not be a proxy for others. Thus a blind man when saying the eighteen benedictions need not face the Temple of Jerusalem (the east), being unable to distinguish the points of the compass, but he shall direct his heart toward his Father in heaven (Ber. 29a). Yet he must not utter His name in vain. R. Judah would not permit him to say the benediction before the Shema': "Blessed be the Lord who formed light and created darkness," inasmuch as the blind derives no benefit from light. The "wise men" differ, however, claiming that the light indirectly benefits the blind. R. Yosé (the tannaite) could not understand an apparently illogical passage in Deuteronomy: "And thou shalt grope at noon-day as the blind gropeth in darkness" (xxviii. 29); until he chanced to meet a blind man who was walking at night with a lantern in hand, and who explained that the lantern was of great service to him, to enable passers-by to guide and protect him from obstacles and pitfalls (Meg. 24b).

R. Joseph, who was blind, said that at one time he would have welcomed one who could assure him that R. Judah was right in the statement that the blind were exempt from the performance of religious duties; for in that case he (R. Joseph), who, although blind, performed these duties, would deserve a greater recompense than one who was not blind. Hearing R. Johanan, however, assert that "one who performs his prescribed duties is greater than a volunteer," Joseph said that he would offer a banquet to the rabbis if they could assure him that R. Judah was wrong in his statement.

R. Joseph, and R. Sheshet, another blind Talmudist, hold the opinion that the blind are under obligations to perform all religious duties, and accordingly they recited the Haggadah on Passover eve before the assembled family (Pes. 116b), which was contrary to the decision of R. Aha b. Jacob, who excused a blind man from saying the Haggadah (*ib.*).

Interesting stories are related of the totally blind R. Sheshet, showing his exquisite and instinctive knowledge of his surroundings while the guest of the Chief of the Captivity (Git. 67b), and his remarkable discernment of the approaching Persian king among many legions (Ber. 58a). A blind rabbi was accustomed to cite Mishnaic traditions before Mar Samuel,

**Respect for the Blind.**

rected them to a blind scholar. R. Hiyya said to the prince, "Do not disgrace thy excellence. Let me visit him." Judah insisted, however, and went with him. When they were about to leave, the blind man gratefully acknowledged the visit, saying: "Ye have honored by your audience one who is seen

and on one occasion forgot to provide for the cooking of food on a holiday preceding Saturday (Bezah 16b), an instance showing that the blind were not entirely free from religious duties.

The authorities differ as to the extent of the exemption, whether from a Mosaic or rabbinic point of view, whether from mandates, or even obligations from prohibitions ("not to do"). The development of customs and laws regulating the blind has abrogated many distinctions, and the tendency of the recent authorities is to remove all disabilities and to give the blind equal religious and civil rights. The gradual emancipation or, rather, the participation of the blind in all matters of religion and law, is shown by the following quotations ranging from the Mosaic law to the latest codes and responsa: A blind priest was not permitted to offer sacrifices on the altar (Lev. xxi. 17), and he was exempt from a pilgrimage to Jerusalem on holidays, this applying even if he were blind only of one eye, for R. Johanan says: "One must see as he is seen" (Mishnah Hag. ch. 1, § 1). A blind man who committed unpremeditated homicide was exempt from banishment to a city of refuge, according to R. Judah, who interprets literally the verse, "Seeing him not" (Num. xxxv. 23; see Mak. 9b). Maimonides concurs in this decision, holding that homicide was in this case an unavoidable accident ("Yad," Rozeah, vi. 14).

The Mishnah prohibits the ordination of a blind justice, although a blind witness is permitted to testify. An exception is noted of a blind justice who was allowed to practise without protest (Sanh. 34b). The Shulhan 'Aruk prohibits the appointment and practise of a totally blind man as a judge, but tolerates one who is blind only of one eye (Hoshen Mishpat, 7, 2). R. Jerucham permits even a totally blind judge to render decisions (Bet Yos. *ib.*). R. Isaac Lampronti rules that the defendant can claim the right to submit his case before a resident blind justice, on the ground that some authorities raise no objection to such a proceeding. R. Ben Sasson and R. Ben Nehemiah, two blind justices, practised at Venice ("Pahad Yizhak," Letter Samek, 24b, ed. Lyck, 1866). Lampronti gives as his reason for this decision that nowadays the judge merely follows the precedents established in the various books, and does not render new decisions.

The public reading of the Pentateuch by a blind man is prohibited, as the "words of Holy Writ may not be recited orally" (Meg. 24a). This decision in Shulhan 'Aruk, Oraḥ Hayyim, 53, 14, is reversed by later authorities (Magen Abraham, *ib.* Reciting the Scriptures, 139, 104) on the ground that to-day the person who is called up to read the Torah merely repeats mentally the words dictated by the reader. R. Moses Zacuto relates that the rabbis of Poland did not permit a blind man to read the Scriptures. Nevertheless he agreed with other rabbis at Mantua (1678) to allow the blind R. Benjamin Ashkenazi of Prague to read; while at Ferrara such permission was refused to a blind man named Norzi, though an exception was allowed in the case of R. Jacob Lianna, on account of his superior Biblical and Talmudic learning ("Pahad Yizhak," *ib.*).

Among blind scholars after Talmudic times may be mentioned R. Judah gaon, of Pumbedita (Sherira's letter in Neubauer, "Med. Jewish Chronicles," ii. 3), the accredited author of "Halakot Gedolot"; Isaac Sagi Nahor ben David, ראב"ד, "the father of the cabala" (end of twelfth century); and R. Abraham Judah Zafig, born blind at Tunis and lived at Jerusalem, author of עיני אברהם ("The Eyes of Abraham"), Amsterdam, 1784. The blind R. Joseph b. Azriel ha-Levi Schmitzler is the author of an illustrated commentary on the last nine chapters of Ezekiel explaining the whole plan of the Temple, courts, gates, etc., which he dictated to R. Zarah ha-Levi, the reader of the Hamburg congregation in London (London, 1825). Of modern authors who lost their sight are Salomon Munk, Adolph Neubauer, Joseph Derenbourg, and Abraham M. Luncz.

G. J. D. E.

**BLIND-COHEN, FERDINAND:** German student who made an attempt on the life of Prince Bismarck May 7, 1866, and on the following day committed suicide in prison. He was a stepson of the well-known radical Karl Blind, whose name he assumed. Blind-Cohen left a letter in which he stated that he had no accomplices. He declared Bismarck to be the worst enemy of German liberty, and expressed the hope that his own self-sacrifice might promote the welfare of Germany, as Orsini's attempt on the life of Napoleon III. had led to the liberation of Italy. Blind-Cohen was known as a young man of considerable talent. He spent the last few years of his life at an agricultural academy in Hohenheim, Württemberg. He was buried at the expense of his stepfather.

**BLINDNESS:** Statistics, wherever obtainable, show that the proportion of blindness is greater among modern Jews than among their non-Jewish neighbors. Thus, according to Dr. Georg Mayr ("Die Verbreitung der Blindheit, der Taubstummen, des Blödsinns, und des Irnsinns in Bayern," p. 11), in Bavaria the proportion of blindness was as follows: among Protestants (per 10,000), 7.84; among Catholics, 8.27, among Jews, 13.81, the Jews thus showing a rate of blindness about double that of the Protestants. In Bavaria at the censuses of 1840 and 1858 the Protestants also showed relatively the least number of blind, and the Jews again the largest proportion.

For Prussia, Dr. Cohn (in Eulenburg, "Real-Encyc. der Gesammt. Heilkunde," iii. 139) presents the following figures for 1880: Among 10,000 Protestants, 8.2; among 10,000 Catholics, 8.4; among 10,000 Jews, 11.0; showing a considerable excess of blindness among the Jews. The same census showed that there was also a larger proportion of congenital blindness among Jews (about 8 per cent) than among non-Jews (only 4.7 per cent). The absolute numbers are given in "Zeit. des Statist. Bureau für

Preussen," 1882, pp. 190 *et seq.*, and the percentages in a special article by A. Guttstadt in the following year.

Blindness is not found very frequently among the Jews of the United States of America, probably because the stringent immigration laws prevent the entrance of defective classes, including the blind.

Judging from the etiology of blindness, it might have been expected that the number of blind should be less among Jews than among non-Jews. The most important cause of blindness in the new-born is in from 30 to 50 per cent of cases due to gonorrhoeal infection from the mother. It is a well-known fact that gonorrhoea is comparatively infrequent in Jewish women. This granted, it would be reasonable to expect that Jews would have at least 25 per cent less blindness than non-Jews.

To account for the great prevalence of blindness among the Jews, some authors have adduced the greater frequency of consanguineous marriages among them. But all those who have carefully investigated the subject, as G. Darwin Lanery, Huth, Trousseau, and many others, have reached the conclusion that, apart from heredity, consanguinity is not a factor in the production of blindness.

Any explanation of the frequency of blindness among the Jews must also account for the great frequency of eye-diseases among them. Trachoma, glaucoma, and various diseases of the cornea and of the uveal tract are found among the Jews in a greater proportion than among non-Jews. All these diseases often lead to blindness. Heredity, again, shows itself in eye-disease with great frequency; and in this manner the disease is perpetuated.

M. Fr.

**BLOCH (BLOCH), IVAN STANISLAVOVICH**: Russo-Polish financier, economist, and railway contractor; distinguished as an advocate of uni-

versal peace; born at Radom, Poland, July 24, 1836; died at Warsaw Dec. 25, 1901. He attended the Industrial High School of Warsaw, and then entered upon a few years of commercial activity, first with the banking house of Teplitz at Warsaw, and later under the patronage of General Tiesenhaus at St. Petersburg. There he adopted Christianity in the form of Calvinism. With the banker Kronenberg of War-

Ivan S. Bloch.

saw, whose sister he married, Bloch participated in the construction of the railroads of the Great Russian Company; and, observing the faults of foreign methods, he published a monograph in 1864, showing how these could be improved, making particular application to Russian conditions. With the view of putting on a precise scientific basis the general

system of railroad management, he wrote a voluminous work, published in 1875 at St. Petersburg, with double text in Russian and French, under the title "Russkiya Zhelyeznyya Dorogi, Otnositelno Dokhodov, Raskhodov Eksploatazii, Stoimosti Provoza i Dvizheniya Gruzov"—treating Russian railroads with respect to their revenues and running expenses, freight rates, and the movement of freight. For this work he was awarded a medal of the first class at the geographical exhibition of Paris, and was heartily indorsed by the Imperial Russian Geographical Society.

Another problem of considerable importance which attracted Bloch's attention was the question of pensions for railroad employees. The subject was in a chaotic state, there being no general rules or regulations. At his suggestion a committee was appointed by the general assembly of representatives of the Russian railroads to draw up, under Bloch's supervision, a plan for the establishment of a system of pension funds. In 1875 Bloch, conjointly with Vishnegradski, published the results of the committee's labors, in a treatise that was received as an authoritative statement of the pension problem. On

the same question he wrote in French "Calculs Servants des Bases pour des Caisses des Retraites" (Warsaw, 1875), and published an edition of the same in Polish. At the request of the Min-

istry of the Interior, he wrote a detailed monograph, published in 1876 under the title "Izlyedovanie po Voprosam Otnosyashchimsya k Proizvodstvu, Torgovlye i Peredvizheniyu Skota i Skotskikh Produktov v Rossii i Zagranitzei"—an inquiry into the subject of the breeding, sale, and transportation of cattle and cattle-produce in Russia and abroad.

In 1877 Bloch published, in "Vyestnik Yevropy" (Sept.-Dec.), a series of essays on the economic condition of Russia, past and present, under the title "Ekonomicheskoe Sostoyanie Rossii v Proshlom i Nastoyashchem." The object of these essays was to calm the public apprehensions with regard to the financial embarrassments of Russia at that time. The rapid construction of railroads had absorbed enormous capital; and the public at large was inclined to see in this the chief cause of all financial trouble. Bloch endeavored to show that these enterprises were an absolute necessity, and that, although they made the financial crisis more acute for the time being, they would ultimately raise the productive power of the country, increase

profits, and revive trade. The same

subject is more extensively treated by Bloch in a massive five-volume work, published at St. Petersburg in 1878, entitled "Vliyanie Zhelyeznykh Dorog na Ekonomicheskoe Sostoyanie Rossii," which states more particularly the effect of railroads upon the economic conditions of Russia. This work, translated into French and Polish, was awarded a gold medal at the Paris Exposition of 1878. The above-named writings gained for him a membership in the so-called "committee of scholars" (Uchony Komitet) of the Ministry of Finances.

With the view of refuting the unjust attacks upon the financial policy of the government in the seventies, Blioch published in 1882 a work on the finances of Russia in the nineteenth century, entitled "Finansy Rossii xix Stolietiia," in which he demonstrated the improvement in the condition of the country's finances as compared with those of the epoch of Nicholas I. This treatise contains interesting memoirs of the former ministers of finance, Reutern and Greigh. It has been translated into German, Polish, and French. In Polish, Blioch published "Przemysl Fabryczny Krolestwa Polskiego," on the industries of the kingdom of Poland; "Statistics of the Kingdom of Poland"; and, on financial and railroad topics, a series of articles in the periodicals "Biblioteka Warszawska" and "Ateneum." At the invitation of the president of the commission on agriculture, he composed

**Other Economic Works.** a treatise on the policy, adopted by Russia and other countries, of giving governmental aid to agriculture by means of loans. It was published at St. Petersburg in 1892 under the title "O Selskokhozaistvennom Melioratsionnom Kreditye v Rossii i Inostrannykh Gosudarstvakh."

When the Russian press took up the discussion of the rights of the Jews, Blioch published a work presenting a comparison of the material and moral welfare of the Western Great Russian and the Vistula provinces. This was entitled "Sravnenie Materialnava i Nravstvennava Blagosostoyaniya Guberni Zapadnykh, Veliko Rossiskikh i Privislanskikh," and in its five volumes (with an atlas) are presented the results of an investigation into the conditions of life and industry of the divers regions. It contains a historical view of the fortunes of the Jews in Europe, as well as a sketch of the origin of anti-Semitism. In this painstaking publication (an abstract of which is given in his pamphlet: "Les Ouvrages Statistico-Economiques," pp. 22-41) the author adduces a mass of statistical evidence exposing the hollowness of the charges that had been brought against the Jews of Russia for the purpose of justifying the atrocities perpetrated upon them in the early part of the reign of Alexander III. The cruel measures adopted by the imperial government—measures that formed a sequel to the other atrocities—are also adduced. He sets forth the manner in which the cause of the Jews was invariably pre-

**Exposure of Anti-Semitic Charges.** judged in the numerous official investigations that were conducted with the ostensible purpose of ascertaining the conditions and motives leading to the outbreaks. The modus operandi of these inquiries, Blioch contends, was regularly so framed as to invite testimony hostile to the Jews, and the very fact that such massacres had occurred was taken as evidence that the provocation for the measures existed. The notion, sedulously propagated, that the atrocities represented an uprising of the people against Jewish exploitation, is pronounced baseless, in view of the fact that the worst outbreaks originated not in the rural districts but in the cities. The charge that in those provinces where the Jews have resided in numbers, they have impoverished and brutalized the peasantry

through liquor traffic, is met by Blioch with statistical evidence to the effect that the provinces closed to the Jews are in a worse condition as regards the evil effects of drink. He points out the gross manner in which the criminal statistics of the empire have been manipulated to arouse prejudice against the Jews in order to justify their expulsion from the villages. In like manner he exposes the unfairness of the statistical data adduced to show that the Russian Jew had shirked his military duties. Blioch arraigns the supineness, amounting to connivance, of the imperial government in the matter of the anti-Semitic massacres of 1881-82; and argues that a resolute attitude against them would soon have put an end to the outbreaks, as was evinced by their speedy suppression when Count Dmitri Tolstoi was entrusted with the Ministry of the Interior.

Concerning the Jews, Blioch makes the following statements: The value of land in the Pale of Settlement is 19 per cent higher than in the governments where Jews are not allowed to reside. Prostitution and crime are far less prevalent, there being 1 Jew criminal to 2,170 individuals, whereas among non-Jews the proportion is 1 to 715. In the Pale the arrears of taxes are less than in governments which have no Jews; and in the 25 governments of the Pale 8,000,000 rubles less are spent every year in drink, a saving which enables the peasants to improve their land and pay their taxes. The Jews in the Pale who carry on business form more than half of the trading population, but the total value of their income is 436 million rubles, against that of 489 million rubles of the Christian minority. The great majority of Jews are small retail dealers and artisans, who earn from 20 to 60 copecks a day; and in order to make even this small profit they must carry on their business from 12 to 16 hours daily.

In 1898 Blioch produced his famous work, in six volumes with atlas, on war in the future, "Budushchaya Voina," which has been translated into German and French and also into English. This is said to have inspired Czar Nicholas II. to issue his famous "peace" declaration, which resulted in The Hague Conference in 1899. The leading idea of the book is that the development

**War and Its Solution.** and improvement of military art practically tend to make war altogether impossible or at least improbable. The destructive power of modern firearms and the radical dislocation of the economic and political fabric produced by war on a large scale are certain to make it such a calamity for the nations concerned that even the greatest success would not in the least compensate them for the desolation caused. Blioch then sets forth a scheme for the solution of all international conflicts by arbitration. Considered from a scientific standpoint, the work is not without grave faults. It represents a collection of uncritical, not always well-digested, material, striking in the manner of its presentation, but abounding in details that obscure the paramount problem. It contains a great mass of facts concerning the art of war, as well as political, economic, and financial reflections, and a discussion of means for preventing war. Unfortunately, in Blioch's consideration of the great

problem he does not possess that tempered regard for expediency which is indispensable to the real efficacy of any reform. However, the work must not be underrated by applying to it a scientifically exacting criterion.

Bloch, who participated, as stated above, in the construction of the lines laid by the Great Company of Russian Railroads, built also the Landvarovo-Romny and Ivangorod-Dombrova roads, and organized the Company of the Southwestern Railroads. He has been president of various railroads, and has taken part in the work of railroad legislation. Shortly before his death he retired from business life and devoted himself exclusively to science and literature. The family testament left by Bloch begins with the words: "I was my whole life a Jew and I die as a Jew."

H. R.

**BLITZ, JEKUTHIEL BEN ISAAC:** Corrector of the press in the Hebrew printing-office of Uri Phoebus at Amsterdam; lived there in the second half of the seventeenth century. He translated the Bible into Judæo-German (Amsterdam, 1679). The translation, which was the first of its kind of the entire Old Testament, has three introductions, one in Hebrew and one in German, written by Blitz, and the third in Judæo-German by the printer, together with a letter-patent of the king of Poland, Johann III. Sobieski, and approbations by various rabbis. [On the opposition translation of Witzgenhausen, which was printed by Joseph Athias, see vol. ii., p. 268]. Blitz also translated into Judæo-German Levi ben Gerson's "To'aliyyot" on Joshua, Judges, and Samuel, published together with the preceding work.

**BLOCH, ANDRÉ:** French musician; son of a rabbi at Wissembourg, Alsace; born in that city in 1873. At the age of seven Bloch began to compose music, writing a waltz for the piano, for four hands, which pleased a publisher so much that he printed it. In order to procure for their gifted son the best musical advantages, the parents removed to Paris and entered him at the Conservatory.

The young musician made rapid progress. In 1884 he received the first prize for solfeggio; in 1889, the first prize for piano; in 1890, the first prize for harmony; finally, in 1893, by a unanimous vote, the first prize of Rome. He was trained by Massenet and André Gedalge.

Bloch's work is full of charm, originality, and distinction. Besides the cantata that obtained for him the "prix de Rome," his best works are: "Poème Nomade," for chorus and orchestra, words by J. Richepin; and several pleasing songs and pieces for the piano, for two and for four hands. Bloch is not merely a musician, being interested also in astronomy and magnetism, which he studies with his friend Camille Flammarion.

**BLOCH [ISSACHAR] BAER B. SIMSON HASID:** Austrian rabbi of the eighteenth century; a native of Hamburg, and son of the author of the Tosafot 'Ijadashim on the Mishnah. Bloch was rabbi of Eiwanoowitz, Moravia, when, in 1767, he was called to the rabbinate of Kojetcin, in the same province, to succeed Ephraim Zülz. About 1787 he became rabbi of Semnitz, Hungary, and later occupied a similar position in Boscowitch, Moravia. He was also for some time rabbi of Dolitschau. He was the author of "Binat Yissakar" (Issachar's Wisdom), a collection of sermons, published in Prague, 1785.

**BLOCH, BIANCA** (pseudonym, **B. Waldow**): German authoress; born at Lauban, Silesia, Jan. 19, 1848, where her father was attendant at a local court. Owing to the reduced circumstances of the family, she was restricted to merely a rudimentary education, but subsequently made up for the deficiency by extensive reading. In this, as in her literary work, she was encouraged by Dr. Bernhard Stavenow of Görlitz, who recognized her talent and developed it. In collaboration with C. von Breckheyde (Aline Neumann) she wrote two plays, "Ein Heisser Tag"—a farce, 1881; and "Vor dem Fest"—a comedy, 1889. Her other works are: "Blaue Augen"—a farce, 1891; "In Ernster Zeit"—a drama; "Lieutenant und Assessor, oder Maiwein"—a comedy; and "Stroh Wittwer"—a farce, 1892.

**BLOCH, ELISA:** French sculptress; born at Breslau Jan. 25, 1848. After receiving a thorough education at Paris, whither her parents had removed, Elisa Bloch devoted herself to sculpture. In 1878 she first exhibited in the Salon. Encouraged by the praises of the critics and the exhortations of the great sculptor Chapu, she persevered in her efforts, and continued to exhibit numerous productions in subsequent Salons, among which may be mentioned: "The Golden Age" (Salon, 1885); "The Tribune Virginius Swearing to Avenge His Daughter Virginia" (Salon, 1889); and "Moses." The last-named work obtained honorable mention in the Salon of 1896, and was reproduced in bronze and exhibited at the centenary of French art (French Exhibition, 1900). Many monuments erected in various French towns by national subscription are the product of the chisel of Elisa Bloch. She distinguished herself also as a statuary, having reproduced busts of a great number of modern celebrities, among whom were Jules Oppert and Zadoc Kahn.

E. A.

**BLOCH, EMIL:** German otiologist; born at Emmendingen, Baden, Dec. 11, 1847. He was educated at the universities of Heidelberg, Würzburg, Vienna, and Freiburg in Baden; being graduated from the last-named as doctor of medicine in 1871. After a postgraduate course at the University of Berlin and in hospitals in London, he established himself as a physician in Freiburg. In 1886 he took

up the study of laryngology and rhinology under Hack, and of otology under Thiry at the University of Freiburg. In the following year he became assistant to Thiry, which position he held till 1892, when, on the death of the latter, he became his successor as chief physician at the otological dispensary and privat-docent at the university. In 1894 Bloch was appointed assistant professor of otology; and under his supervision the clinic for this branch of medicine was opened in 1899.

Bloch is the author of the following works and papers: "Untersuchungen zur Physiologie der Nasenatmung," Wiesbaden, 1888; "Pathologie und Therapie der Mundatmung," *ib.* 1889; "Sprachgebrechen," *ib.* 1891; "Ueber das Biaurale Hören," in "Zeitschrift für Ohrenheilkunde," 1893; "Die Methode der Centripetalen Pressionen und die Diagnose der Stapesfixation," *ib.* 1894; "Einheitliche Bezeichnung der Otologischen Punktionsprüfungsmethode und Ihre Ergebnisse," Wiesbaden, 1898.

BIBLIOGRAPHY: Pagel, *Biographisches Lexikon*, s.v., Vienna, 1901.

**BLOCH, GUSTAVE:** French historian and archeologist; born at Fegersheim, Alsace, July 21, 1848. After passing through the Ecole Normale Supérieure he became professor of rhetoric at the lycée of Besançon. Subsequently he was a member of the French schools at Rome and Athens, and professor of Greek and Roman archeology at the University of Lyons. He is now (1902) in charge of the courses in ancient history at the Ecole Normale Supérieure.

Bloch's works include: "Les Origines du Sénat Romain," 1883; "De Decretis Functorum Magistratum Ornamentis," 1883; "La Gaule Celtique et Romaine," being the first volume of the "History of France," published under the direction of M. Lavissee (1900). He has also contributed to the "Dictionnaire des Antiquités" of Daremberg and Saglio, as well as to many critical and historical reviews.

S.

**BLOCH, HEINRICH:** Austrian philologist; born Feb. 4, 1854, at Herman-Mestec, Bohemia; son of Moses Bloch, president of the Jewish Theological Seminary in Budapest. He received his education at the gymnasium at Teschen, Silesia, and at the University of Vienna, whence he was graduated as doctor of philosophy in 1878. In 1881 he was appointed professor of history and classical philology at the Jewish Theological Seminary in Budapest, where he has since lived.

Bloch is the author of: "Die Quellen des Flavius Josephus in Seiner Archaeologie," Leipsic, 1879, and is a contributor to many European newspapers and journals; *e.g.*, "Mittheilungen aus der Historischen Litteratur," Berlin, vols. xi.-xxx., 1883-1901 (historical essays); "Vom Fels zum Meer," Stuttgart; "Le Moyen Age," Paris; "Allgemeine Zeitung" of Munich, 1884-96; "Frankfurter Zeitung," 1884-1901; "Pester Lloyd," 1885-1901; "Vienna Freudenblatt," 1894-99; "Breslauer Zeitung"; "Jüdisches Litteraturblatt"; "Allgemeine Zeitung des Judenthums"; "Magyar Zsidó Szemle"; "Ev-könejo," etc.

S. F. T. II.

**BLOCH, HERMANN (HAYYIM):** German author; born at Breslau April 26, 1826; died Nov. 19, 1896. He was a grandson on his mother's side of the learned Abraham Tiktin, chief rabbi in Breslau and author of numerous learned works, and in his early years received halakic instruction from his uncle Solomon Tiktin, also chief rabbi in that city. His studies were completed in Hamburg, and at the age of twenty-seven he issued the first part of his "Mebo ha-Talmud" (Introduction to the Talmud), in which he endeavored with astonishing learning to trace a new theory of the development of the Halakuh. But to perfect this new theory—a consummation which was never vouchsafed to him—he found it necessary to accumulate vast stores of learned material; thus he devoted extraordinary industry and acumen to the endeavor to formulate the principles upon which the 613 precepts of Judaism reposed. He gave samples of his work to the world in the shape of four parts of his book "Hirbure Torah" (The Torah's Thoughts), published 1887 to 1893, which treated of the "law of the majority" (Ex. xxiii. 2) according to Mosaic and Talmudic conceptions, and consisted of 519 quarto pages. Connected with these studies was also an attempt to reproduce the plan of the Temple of Herod ("Zurat ha-Bayyit") (The Form of the House), published in 1883, a book which was supplemented with a model. Private misfortunes bore heavily upon him, and he found consolation in the Wisdom literature of the Bible and Talmud, publishing a poetical elaboration of 107 Oriental proverbs and maxims under the title of "Omri Inshi" (Men Say) (1884). He lived as a merchant in Rawitsch and Breslau, and ended his days as resident scholar in the Mora Leipziger Bet ha-Midrash in Breslau, leaving voluminous literary material awaiting publication.

M. BR.

**BLOCH, ISAAC:** French rabbi; born at Sultz, Alsace, July 17, 1848. He received his education at the lyceum at Strasburg and at the Jewish Seminary in Paris. During the Prussian siege of Paris (1870-71) he served as assistant chaplain. In 1873 he was employed in the office of the Alliance Israélite Universelle. Two years later he was elected rabbi at Remiremont; in 1878 he was appointed chief rabbi of Oran; in 1882 he became chief rabbi of Algiers; and in 1890 was appointed to the chief rabbinate of Nancy, which position he still (1902) holds.

Besides a great number of sermons, Bloch has published a novel, "Les Fils de Samson," 1887; and "Inscriptions Tunulaires des Anciens Cimetières Israélites d'Alger," 1888. In 1877 he translated from the German into French S. Kohn's novel entitled "Gabriel." He has been a frequent contributor, both in prose and in verse, to "L'Univers Israélite," "Archives Israélites," "Revue des Etudes Juives," etc.

S. F. T. II.

**BLOCH, IVAN.** See BLOCH, IVAN STANISLAVOVICH.

**BLOCH, JOSEF:** Violin virtuoso and composer; born at Budapest Jan. 5, 1862. He made his first appearance in public at the age of twelve, and attended the National Academy of Music and the National Conservatory. His teachers were R. Volkmann (composition), A. Gobbi, and K. Huber. Bloch is said to have been one of the most distinguished pupils of Huber. When barely sixteen years old he became assistant teacher at the National Conservatory; but his eagerness to learn more impelled him to attend the Paris Conservatoire, where for seven years he participated in public concerts. On his return to Budapest he became a member of the Hubay-Popper String Quartet until its dissolution in 1892. In 1889 he became professor at the National Conservatory at Budapest and also at the National Academy of Music, but since 1899 has been connected solely with the latter institution. Bloch composed short pieces for the violin, two orchestral suites, exercises for the violin—all of which are published in three volumes.

**BLOCH, JOSEF SAMUEL:** Austrian rabbi and deputy; born at Dukla, a small city in Galicia, Nov. 20, 1850. His parents, who were poor, destined him for the rabbinical career, and he devoted himself to the exclusive study of the Talmud. He frequented the yeshivot, especially that of the celebrated Rabbi Josef Saul Nathanson at Lemberg, who, in his responsa, mentions Bloch, when he was only fifteen years old, as one of his most intelligent pupils. After having finished his studies at the colleges (gymnasias) of Magdeburg and Liegnitz, he went to the University of Munich. Thence he went to the University of Zurich, where he obtained his degree of doctor of philosophy. He was appointed rabbi in Rendsburg, Holstein, afterward in Kobylin, Posen, and Brüx, Bohemia; and finally he ended his rabbinical career in Floridsdorf, near Vienna. The anti-Semitic movement had at that time (about 1880) almost reached its climax in Austria.

During the Tisza-Eszlár trial Professor Rohling, of the Catholic theological faculty of the Prague University, made a written offer to substantiate under oath the blood-ritual of the Jews. Bloch then came to the front with a series of articles in which he openly accused Rohling of having offered to commit wilful perjury; denouncing him, moreover, as a person utterly ignorant in Talmudic learning. After several successful attempts to delay the proceedings, Rohling preferred to withdraw, thus tacitly acknowledging defeat (see **BLOOD ACCUSATION**).

At this time, 1883, Bloch founded a periodical, "Oesterreichische Wochenschrift," with the aim to defend the political rights of the Jews, to refute unjust attacks, and to inspire its readers with courage and faith in the conflict that had been forced upon them. Bloch also attended several meetings held by workmen, and lectured with some success on the Talmudic principles of labor and on the laboring classes in the Old Testament.

After the death, at Cracow, in 1884, of the chief rabbi S. Schreiber, who had been deputy for Kolomea in parliament, Bloch was elected as his successor; in 1885 he was reelected, and after a hard struggle with Dr. Byk, in 1891 he was elected for the third time. As a member of the Chamber of Deputies he withdrew from his rabbinical post in order to devote himself entirely to his public functions and journalistic labors.

In 1893, instigated by one Deckert, an anti-Semitic pastor in Vienna, a baptized Jew named Paulus Meyer declared in the "Vaterland" of May 11 that a number of Russian rabbis from Lentschna had performed a ritual murder in his presence. In the name of the children of these rabbis, Bloch at once instituted criminal proceedings against Deckert, Meyer, and the publisher of the paper, and on trial, Sept. 15, a conspiracy was unmasked and the three defendants were sentenced to heavy punishment.

When in 1896 Christian socialism had gained a strong footing in parliament, and the government had commenced to recognize the Socialist party, Bloch was sacrificed and everything imaginable was done to prevent his reelection. Through the combined efforts of the government, the Christian-Socialist party, and the Polish club (party of Polish deputies), all of whom supported the election of the Jewish burgomaster of Kolomea, Bloch failed of reelection. Since that time he has devoted himself exclusively to journalism. Bloch published the following works: "Ursprung und Entstehung des Buches Kohelet," Bamberg, 1872; "Studien zur Geschichte der Sammlung der Alt-Testamentlichen Litteratur," Leipsic, 1875;

**His Works.** "Die Juden in Spanien," Leipsic, 1876; "Hellenistische Bestandtheile im Biblischen Kanon," 2d ed., Vienna, 1880; "Quellen und Parallelen zu Lessing's Nathan," 2d ed., Vienna, 1881; "Jean Bodin, ein Vorläufer Lessing's," Vienna, 1882; "Drei Streitschriften Gegen Prof. Rohling," Vienna, 1882-83; "Die Arbeiter bei Griechen, Römern, und Palestinsern," Vienna, 1882; "Elementarschule, oder Erziehungswesen bei den Alten Völkern," Vienna, 1883; "Armenpflege und Heimatsrecht, eine Social-Talmud. Studie," Vienna, 1884; "Einblicke in die Geschichte der Entstehung der Talmudischen Litteratur," Vienna, 1884; "Aus der Vergangenheit für die Gegenwart," Vienna, 1886; "Acten und Gutachten im Prozesse Rohling-Bloch," Vienna, 1892; "Open Letter to My Esteemed Colleagues of the Italian Parliament," London, 1895 (published also in Italian and German); "Talmud und Judentum in der Oesterreichischen Volksvertretung," Vienna, 1900 (parliamentary speeches).

S. W. REL.

**BLOCH, JULIENNE:** French educator and writer; died Nov. 12, 1868. She was the eldest and most distinguished daughter of Simon Bloch, founder and director of the journal "L'Univers Israélite"; the other three daughters being **Pauline**, **Jenny**, and **Hélène**. When only sixteen years of age Julienne received a license to teach, and having a natural gift for instructing, she devoted

herself to the education of her young coreligionists. For two years, when she was about twenty-five years of age, she directed the institution for young girls at Lyons, founded in 1857 by the Jewish community of that city. Afterward she taught in the establishment of her sister, Mme. Pereira, at Passy.

Under the title "Lettres Parisiennes," Mlle. Bloch published, from June, 1854, to Aug., 1861, a series of articles in her father's paper ("L'Univers," vols. ix.-xvii.). "Nothing could be more suitable," says her panegyrist, M. Maurice Bloch (*ib.* 1895, part i., li. 32), "than the title of these letters, for they show true French wit, and, moreover, wit of the best quality. They remind me of the letters of Mme. Emile de Girardin."

M. S.

**BLOCH, LOUIS**, or **LEO**: Swiss educator; born in 1864; since 1896 privat-docent in archeology and mythology at the University of Zurich. Bloch has written extensively on classical life and literature, Latin and Greek mythology, archeology, and on religious customs. His more important works are: "Der Kult und die Mysterien von Eleusis," Hamburg, 1896, and "Römische Altertums-kunde," Leipsic, 1898. The latter manual presents a complete history of the ancient Roman political institutions and customs of the people, and an account of the private life, religion, and culture of the Romans.

**BIBLIOGRAPHY**: Kobut, *Berühmte Israelitische Männer und Frauen*, part xlii., p. 170, Leipsic, 1900.

A. M. F.

**BLOCH, LUDWIG**: German dramatist; born at Berlin Dec. 6, 1859; son of the theatrical publisher Eduard. Bloch was educated at the Friedrich-Wilhelm Gymnasium, entering his father's business in 1875. Six years later he traveled through Great Britain, France, and the United States, resuming work with his father in 1883. He is the author of: (1) "Dekorirt," a comedy; (2) "Am Stammtisch," a farce under the pseudonym R. Elbe; (3) "Frisch Durch die Welt," a musical composition; (4) "Am Wickeltisch," a musical composition; (5) "Werther und Lotte," for piano. In his capacity as editor of his father's publications, Bloch has produced various popular works relating to the stage.

**BIBLIOGRAPHY**: *Das Geistige Berlin*, 1897, p. 32.

**BLOCH, MARCUS ELIEZER**: German ichthyologist and physician; born at Ansbach in 1733; died in Carlsbad Aug. 6, 1799. His parents, being very poor, gave him hardly any education, so that on arriving at manhood he was almost illiterate, and till the age of nineteen could not even read German. Some knowledge of Hebrew and rabbinical literature enabled him, however, to obtain a teacher's position in the house of a Jewish surgeon in Hamburg. Here he learned German thoroughly and mastered some Latin, taking up also the study of anatomy. Scientific enthusiasm being thus aroused, Bloch went to Berlin, where, with remarkable zeal, he devoted himself to the study of all branches of natural science and medicine, being supported by some relatives. After taking the degree of M.D. at

Frankfort-on-the-Oder in 1747, he settled in Berlin and practised his profession for many years.

In 1774 Bloch published a volume of medical treatises, "Medicinische Bemerkungen, Nebst einer Abhandlung vom Pyrmonter Sauerbrunnen," Berlin, 1774; but after that he devoted himself almost exclusively to research in natural science, especially in ichthyology. Travel increased his knowledge, and he made a fine collection of specimens of fishes, which, upon his death, was acquired by the Prussian government and presented to the Academy of Science, now to be seen in the Berlin Zoological Museum. In 1781 Bloch

Marcus E. Bloch.

published "Die Oekonomiegeschichte der Fische Deutschlands, Besonders des Preussischen Staates," followed in 1782-84 by "Oekonomiegeschichte der Fische Deutschlands"; and during 1785-95 these works were completed by his "Naturgeschichte Ausländischer Fische." These series of publications, under the general title "Allgemeine Naturgeschichte der Fische," Berlin, 1781-95, 12 vols., provided with 432 excellent plate-illustrations, formed the principal work on ichthyology in the eighteenth century. But this great work, which Bloch began to publish at his own expense, would not have been finished were it not for the enthusiasm that the enterprise roused throughout Germany, it being regarded as almost a national affair; so much so indeed that all the princes and patrons of science participated in the publication expenses of the last six volumes, each plate bearing the name of the person at whose cost it had been prepared. Notwithstanding the fact that the science of ichthyology has since been altogether modified, and that, although splendidly characterizing the fishes of Germany, the work is not always precise in the description of fishes inhabiting waters outside that country, it still possesses great value, particularly on account of the illustrations. The "Allgemeine Naturgeschichte der Fische" was translated by Lavaus into French, Berlin, 1785. In a prize-essay on the generation of intestinal worms and the means of their extermination, entitled "Abhandlung von der Erzeugung der Eingeweidewürmer und den Mitteln Wider Dieselben," published in Berlin, 1782, and in Strasburg, 1788—a problem proposed by the Copenhagen Royal Academy of Sciences—Bloch proved that these worms were hereditary. He left an incomplete scheme of an ichthyological system, published after his death by I. G. Schneider under the title "Systema Ichthyologiae Iconibus CX. Illustratum," Berlin, 1801.

**BLOCH, MATTITHIAH ASHKENAZI:** Cabalist; lived at Jerusalem in the seventeenth century. A blind adherent and indefatigable apostle of Shabbethai Zebi, he was appointed by him one of his prophets charged with the announcement of the Redemption.

**BIBLIOGRAPHY:** Sasportas, *Zizat Nobel Zebi*, p. 13; Kahana, *Eben ha-To'om*, p. 14; Grätz, *Gesch. der Juden*, x, 199, 202, k. I. Br.

**BLOCH, MAURICE:** French educator and writer; born at Colmar, Alsace, Aug. 5, 1853. He received his first education at the Jewish communal school of his native city, of which his father, **Joseph Bloch**, was director. Thence he passed to the lyceum, and after the Franco-Prussian war finished his studies at Paris. He became "agrégé des lettres" in 1881. After teaching at the Ecole Monge, he became director of the Ecole Bischoffsheim in 1883. He has acted as director and juror at several international expositions. He is a laureate of the Académie des Sciences Morales et Politiques, and an officer of public instruction.

Bloch has written numerous reports, and lectured especially for the Société des Etudes Juives, which has published his addresses, including "La Femme Juive dans le Roman et dans le Théâtre"; "L'Œuvre Scolaire des Juifs Français"; "Les Vertus Militaires des Juifs"; "Les Juifs et la Prospérité Publique." Among his books for young people are "Les Mères des Grands Hommes" and "Epouses et Sœurs," which have been very well received and have passed through several editions (Paris, Delagrave). He is also the author of "Femmes d'Alsace" (Paris, Fischbacher), and has contributed to various Jewish and non-Jewish journals and reviews.

Bloch has been a member of a number of bodies interested in the education of the young. S.

**BLOCH (BALLAGI), MORITZ:** Hungarian Christian theologian and lexicographer; born March 18, 1815, at Inócz, Zemplén, Hungary; died Sept. 1, 1891, at Budapest. He was the son of a tenant-farmer, from whom he received his first instruction in the Bible and the Talmud. After continuing his Talmudic studies at Nagyvárad and Pépa, Bloch taught at Moór and Surány, where he became acquainted with the Greek and Roman classics. During 1837 and 1838 he attended lectures in geometry and higher mathematics at the University of Pest, and at the same time began his literary activity by contributing articles to the "Pester Tageblatt" and by his "Hasznos Mulatságok" (Useful Talks), which were favorably received. The talented author was recognized as a new champion of the Hungarian national cause. Bloch as Jew could, however, not obtain a diploma; he therefore, in the fall of 1839, went to Paris, to continue his studies. In his absence a memorable agitation in favor of the emancipation of the Jews was brought forward in the Hungarian Parliament (1840), and Bloch was by men in authority considered as the man fit to awaken interest for the cause in Jewish circles. Thereupon he wrote his pamphlet, "A Zsidókról" (On the Jews), and, at the instance of Baron Joseph Eötvös, returned to Hungary in order to devote himself to religious literature and the Magyarizing of the Jews. In 1840-41 Bloch published his Hun-

garian translation of the Pentateuch with philological and explanatory notes. After the appearance of the first book of the Pentateuch, Sept. 5, 1840, he was appointed corresponding member of the Hungarian Academy of Science in recognition of his patriotic and scientific endeavors. His "Nyelvészeti Nyomozások" (Philologic Investigations) appeared in 1841, and was followed in quick succession by "Ungarischer Unterricht in der Kleinkinderschule," Ofen, 1841; "Jisrael Könyörgései Egész Evre," i. Rész (Israel's Prayers for the Whole Year, 1st part), Buda, 1841; "Első Jósok" (The First Prophets); the Book of Joshua, Hungarian translation with commentary, Buda, 1842; "Ausführliche Theoretisch-Praktische Grammatik der Ungarischen Sprache," Pest, 1842.

In addition to his literary work, Bloch devoted his attention to the establishment of a Hungarian rabbinical seminary, in which he interested, among others, Count Stefan Széchenyi, and which he advocated in the "Pesti Hirlap," the then most influential organ of liberal Hungary. As the plan miscarried, Bloch again left Hungary; going to Tübingen to study theology under Ewald, Baur, and others. He was baptized in Notzingen May 11, 1843, and from that time to the end of his life associated with Josef Szekács and others. Bloch worked for the cause of Protestantism. In 1844 he accepted a call to the Protestant college of Szarvas. He remained in this position until the Revolution of 1848, when he became secretary to Görgei; later on he occupied a similar post in the Ministry of War.

Bloch's literary activity embraced religion, theology, politics, and philology. In 1851 he became professor of theology in Budapest; in 1858 he founded in that city the "Protestantische Kirchen- und Schulzeitung," which soon became the principal organ of liberal Protestantism in Hungary. His books, "Die Protestantenfrage in Ungarn und die Politik Oesterreichs," Hamburg, 1860; "Tájékozás" (Expositor), 1863; and "The Struggle of Protestantism Against Ultramontanism" (in Hungarian, 1869), advocated the same liberal policy. He founded many institutions of Hungarian Protestantism, and as professor, writer, and editor contributed largely to the material and intellectual growth of that Church, which regarded him as one of its most eminent supporters and representatives. Bloch's chief services, however, were rendered to the Hungarian language, which he cultivated throughout his life. His grammars, readers, and lexicons were for a long time important factors of Hungarian culture, and have materially aided the Magyarizing of Hungary. Although superseded in part by more recent works, his "Ausführliche Theoretisch-Praktische Grammatik der Ungarischen und Deutschen Sprache" (8th ed., Budapest, 1880); "Vollständiges Wörterbuch der Ungarischen und Deutschen Sprache" (5th ed., *ib.* 1882); "Collection of Hungarian Proverbs and Sayings" (Hungarian, 2 vols., 2 ed., *ib.* 1855) are still of value.

**BIBLIOGRAPHY:** Pallas *Lexikon*; Meyer, *Konversations-Lexikon*. E. N.

**BLOCH, MOSES:** French rabbi; born at Wintzenheim, Upper Alsace, Jan. 2, 1854; died Nov.,

1901; educated at the Lycée Colmar, the Paris Rabbinical Seminary, and the Ecole des Hautes-Etudes, where he studied Arabic. He was rabbi of Remiremont (Vosges) from 1878 to 1883; assistant secretary of the Alliance Israélite Universelle; assistant professor of Arabic at the Paris Rabbinical Seminary from 1886 to 1888. In that year he was appointed rabbi at Versailles, which position he held until his death. He prepared a French translation in four volumes of the *Maḥzor* ("Traduction Française du *Maḥzor* Selon le Rite du Temple de la Rue de la Victoire à Paris, pour Toute l'Année"). Bloch also translated into French the third, fourth, and fifth volumes of the "History of the Jews" by Graetz, 1888-97, as well as Gross's "Gallia Judaica," 1897. In 1888 he published the Arabic text, with Hebrew annotations, of Maimonides' "Sefer ha-Mizwot"; and he was a contributor to the "Revue des Etudes Juives" (vols. i. and v.) and to "L'Univers Israélite." S.

**BLOCH, MOSES:** German rabbi; born at Gailingen, Baden, in 1805; died at Buchau March 3, 1841. He pursued his Talmudical studies at Emdingen, Mannheim, and Carlsruhe, and then entered the University of Heidelberg. After passing his examination for the rabbinate, he first became assistant rabbi at Oberdorf, Württemberg (1829), and then rabbi at Buchau (1834). Bloch belonged to the liberal religious party. In addition to a few sermons, he published an essay upon Jewish fasts in Geiger's "Jüdische Zeitschrift" (iv. 176 *et seq.*).

S. M. K.

**BLOCH, MOSES LÖB:** Rector of the rabbinical seminary at Budapest; born at Ronsperg (Bohemia) Feb. 15, 1815. Among his ancestors were Isaac, rabbi at Cracow; the grandson of the latter, Phinehas Selig, author of the "Aṣeret Paz"; and the latter's son, Aryeh Löw, a well-known Talmudist, who was the father of Eleazar Löw, the author of "Shemen Roḳeah."

After studying under Philipp Kohner, a pupil of Ezekiel Landau, district rabbi of Pilsen, Bloch was entrusted to the care of his uncle, Wolf Löw, author of the "Sha'are Torah." Löw, who guided the boy's studies for seven years (1827-34) in his house at Gross-Tapolcsány (Hungary), is often quoted in his nephew's lectures. On graduating from the gymnasium at Pilsen, he went in 1840 to the University of Prague, and was appointed a rabbi at Wotitz in 1841, when he married Anna Weisbut (died 1886). He was called as rabbi to Hermannsteece, Bohemia, in 1852, and to Leipnik, Moravia, in 1856, where he remained until Oct., 1877. In that year he was called as professor and rector to the Rabbinical Seminary at Budapest.

Bloch published the following works: (1) "Sha'are Torat ha-Tekanot" ("Die Institutionen des Judenthums nach der in den Quellen Angegebenen Geschichtlichen Reihenfolge Geordnet und Entwickelt"), 4 vols., Vienna and Cracow, 1879-1902, 3 vols., Budapest, 1902; (2) "Das Mosaisch-Talmudische Polizeirecht" (special print from the "Annual Report" of the Rabbinical Seminary), Budapest, 1879; (3) "Die Ethik in der Halacha" (also in Hungarian; appeared in the "Annual Report" of the

Seminary for 1885), Leipsic, 1886; (4) "Das Mosaisch-Talmudische Erbrecht" (in the "Annual Report" for 1889); (5) "Sefer Sha'are Teshubot Maharam" ("Die Bisher Unedirten Responsa des R. Meir von Rothenburg"), Berlin, 1891 ("Mekize Nirdamin" publications); (6) "Der Vertrag nach Mosaisch-Talmudischem Rechte" (from the "Annual Report" for 1893), Budapest, 1893; (7) "Das Mosaisch-Talmudische Besitzrecht" (from the "Annual Report" for 1897). The works published in the reports of the Landes-Rabbinerschule (National Rabbinical School) have all appeared also in the Hungarian language.

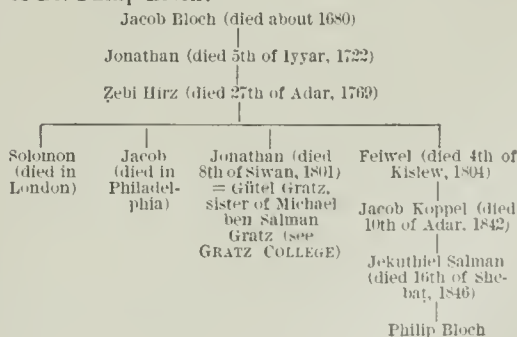

**BIBLIOGRAPHY:** *Bloch Moses, Rabbi* (Festschrift zu Ehren Sr. Ehrwürden des Herrn Rabbiners Moses Bloch Anlässlich Seines 50. Geburtstages), edited by the professors of the Rabbinical Seminary, 1895.

A. F. G.

**BLOCH, PHILIP:** Rabbi and author; born in Prussia May 30, 1841. He studied at the University of Breslau, and under Frankel, Grätz, and Jacob Bernays at the Jewish Theological Seminary; graduated as Ph.D. in 1864; and received his rabbinical degree in 1867. He organized a Jewish congregational school at Munich in 1869; and became rabbi of the Israelitische Brüdergemeinde at Posen in 1871. Interested at first in religio-philosophic and haggadic studies, he devoted himself later to historic researches on the Jews of Poland.

Bloch is the author of the following works: "Glauben und Wissen," a translation of the introduction and first book of Saadia's "Emunot we-De'ot," 1879; "Die Willensfreiheit von Chasdai Kreskas," which is chap. v. of the second treatise of the "Or Adonai" translated and explained, 1879; "Die Generalprivilegien der Polnischen Judenschaft," 1892; "Geschichte der Entwicklung der Kabbalah und der Jüdischen Religionsphilosophie," 1894; "Heinrich Grätz, a Memoir," 1898—prefatory to the index volume (vi.) of the American edition of Grätz's history. Among the numerous essays which he contributed to the various magazines may be mentioned: "Studien zur Haggadah," contributed to "Monatsschrift," 1885, pp. 166 *et seq.*; "Die Piskoth für die Drei Trauersabbathe, עשרת ימי אבל, Uebersetzt und Erläutert," in "Festschrift zum Achtzigsten Geburtstage Moritz Steinschneider's," 1896, pp. 41 *et seq.*; "Die Sage von Saul Wahl, dem Eintagskönig von Polen," in "Zeitschrift der Historischen Gesellschaft für die Provinz Posen," 1889, p. 233; "Judenwesen, Jahr 1793," in "Das Urkunden und Aktenstücke zur Organisation Südpommerns," 1895, p. 591.

The following sketch-pedigree gives the descent of Dr. Philip Bloch:

All of these were Talmudists, but the most important was

**Jonathan Bloch:** Founder of the Congregation Langendorf in Russia; bought a cemetery, and had a Talmudic school from which were graduated some well-known rabbis.

s.

P. B.

**BLOCH, ROSINE:** French singer; born in Paris in 1844; daughter of a merchant. She was very beautiful and had a magnificent mezzo-soprano voice. She studied at the Conservatoire, and received in 1865 the first prize for singing and the first prize for opera. Finding an engagement soon after at the Opera in Paris, she made a brilliant début in the rôle of *Azucena* in "Il Trovatore." In 1867 she created the rôle of *Chloris*, in "La Fiancée de Corinthe," by Duprato; and in 1873 that of *Clarribel* in "La Coupe du Roi de Thule," by Diaz. When, in 1880, "Aïda" was put on the stage, Bloch undertook with great success the rôle of *Amneris*. For fifteen years she was a member of the Opera at Paris.

She might have attained to the foremost rank in grand opera had her magnificent voice been supplemented by a temperament less cold and by a more pronounced dramatic instinct.

s.

A. A. G.

**BLOCH, SAMSON (SIMSON) B. ISAAC HA-LEVI:** Galician author; born in Kulikow, near Lemberg, 1782; died there Oct. 7, 1845. He received the usual Talmudical education, but was also sufficiently instructed in the Bible and Hebrew grammar, things uncommon in the Galician curriculum of those times. In the house of his uncle, Baruch Zebi Neu, Bloch made the acquaintance of his uncle's illustrious pupil, Nachman Krochmal, who was three years his junior, and their friendship, which ripened as the years went on, lasted till Krochmal's death in 1840. Bloch married while very young, and engaged in business without any training or knowledge of the world. Success under such circumstances was almost impossible; and he was thrown or drifted from one occupation into another, remaining poor all his life. But his thirst for knowledge and his firm resolve to make a name for himself in literature helped him to bear with fortitude all the vicissitudes of fortune. He studied in his leisure time and familiarized himself with German and other languages, also with many Jewish and non-Jewish commentaries on the Bible.

Bloch early became an enthusiastic devotee of the "Haskalah." His first literary attempt was the publication of the epistle which Solomon b. Adret wrote against the study of philosophy, especially by young men, and the famous response by the poet Jedaiah Penini or Bedersi, which is known as "Hitnazlut ha-Bedarshi" (Bedersi's Defense of Philosophical Studies), Lemberg, 1809. The letters are preceded by a long introduction in which Bloch throws much light on the controversy which shook Judaism to its foundations early in the fourteenth century.

In 1812 Bloch was called to Vienna to fill the place of corrector in the Hebrew printing-establishment of Anton Schmid, made vacant by the death of the grammarian Ben Ze'eb. There he translated

into Hebrew Manasseh b. Israel's "Vindiciae Judaeorum" from the German translation of it by Dr. Marcus Herz, and published it with an introduction and a biographical sketch of the author (Vienna, 1813). He was compelled by family affairs to return to Kulikow, and, after several years of continual struggle with poverty, he listened to the advice of his friends Krochmal and Rapoport, and took up the writing of Hebrew books as a profession. In 1822 appeared the first volume of his important work, "Shebile 'Olam" (Paths of the World), a description of the geography and the nations of Asia (Zolkiev). It still has a literary if not a scientific value on account of its incomparable style and of the attacks on the folly and superstition of the Eastern nations contained therein, which were really intended for fools and deluded people nearer home. The second volume (Africa) is even better than the first, and is interspersed with biographies of Alfasi, Maimonides, and other famous Jews who were born or lived in Africa (Zolkiev, 1827).

Bloch made a journey through Hungary, Bohemia, Moravia, and Austria, in order to obtain subscriptions for his work. He was honored and assisted by the enlightened wherever he came; but the treatment accorded to Hebrew authors by the general public, especially by the ignorant among the wealthy classes, so disgusted him that he never finished the volume on Europe, although the divisions containing descriptions of Spain, Portugal, and part of France were already written. His last years were spent in poverty and disappointment, the dreariness and loneliness of his native city being rather accentuated than relieved by his occasional visits to the neighboring cities of Lemberg and Zolkiev. He died in Kulikow, leaving his nine-year-old daughter to the guardianship of his intimate friend R. Hirsch Chajes of Zolkiev.

Besides the above-mentioned works, Bloch also translated into Hebrew Zunz's biography of Rashi, to which he wrote an introduction and many notes (Lemberg, 1840). This work bears unmistakable traces of decadence, both in style and virility. He also wrote many letters on literature which appeared in various Hebrew periodicals and collections. The most important of them is probably the one about philosophy and on Kant, in "Kerem Hemed," v. 1, letter 34. The unfinished part of his geography of Europe was published under the title "Zehab Sheba" (The Gold of Sheba) (SBII. = Samson Bloch ha-Levi, Lemberg, 1855).

**BLOEMFONTEIN.** See SOUTH AFRICA.

**BLOGG** or **BLOCH, SOLOMON BEN EPHRAIM:** German author; native of Neuwägen in Hanover; died Feb. 11, 1858. He was a teacher of the Hebrew language, and founded Telgener's printing-press at Hanover in 1827. At the time of his death he was nearly eighty years old, and had been engaged in literary labors for forty-five years.

His printing-press was noted for the scientific accuracy of its productions. Many of his works are important for the history of the Hebrew language and literature. Blogg wrote: "Abrégé de la Grammaire Hébraïque," Berlin, 1810; "Erster Unterricht in der Englischen Sprache," Hanover, 1813; "Moses, der Vertraute der Gottheit," *ib.* 1824; "Hebräische Grammatik für Anfänger," *ib.* 1825; "Gründliche Beweise, wie der Jude bei einer Eidesleistung Gesonnen Ist," *ib.* 1826; "Geschichte der Hebräischen Sprache und Literatur Nebst einem Anhang, die Targumim Betreffend," 2d ed., *ib.* 1826.

He edited "Sammlung Aller Gebräuche, Observanzen und Gebetformeln der Heutigen Polnischen und Deutschen Israeliten für das Ganze Jahr, Ursprünglich Verfasst von Salm. London, aber Bereichert und Vielfach Verdeutsch," *ib.* 1830. This work of London appeared in Hebrew at Amsterdam in 1744, and was published in Jüdisch-Deutsch at Frankfort-on-the-Oder, in 1799. Blogg's "Binyan Shelomoh, Edificium Salomonis" (*ib.* 1831), treats of the Hebrew language and the Talmud in their historical aspects.

**BLOIS** (בלויש, ביבליאיש, ביאוליאיש, ביבלואים) (בלאייש): Capital of the department of Loir-et-Cher, France. Although of small importance itself, Blois occupies a prominent place in Jewish history through the somber drama of which it was, in 1171, the theater.

On the testimony of a Christian servant of the mayor, a Judæophile, the Jews of Blois were accused of having crucified a Christian child for the Passover, and of having then thrown the body into the river. Count Theobald thereupon commanded that all the Jews should be cast into prison, with the exception of a woman named Pulcelina, for whom he entertained a particular affection. At first the accused hoped to escape by paying heavy ransom. Indeed, the count sent a Jew of Chartres to negotiate concerning the price of their acquittal. But a priest intervened, beseeching the count to punish the Jews severely should the accusation be well founded. As the accused could not be easily convicted, the authorities determined to submit the witness to the water test. The mayor's servant was conveyed to the river and there placed in a boat filled with water. As he did not sink, the count and the populace were convinced that his statement was true; and consequently all the members of the Jewish congregation were condemned to death by fire. When they were brought to the *auto da fé*, a priest begged them to embrace Christianity and thus preserve their lives; but, with very few exceptions, they refused, and died (May 26, 1171) in the flames while chanting the prayer "Alenu," containing the profession of faith in one God (Pulcelina died with the others).

This was the first time in France that the Jews had been accused of using blood in their Passover.

The anniversary of this martyrdom was decreed by R. Tam as a fast-day. Four dirges, composed by Hillel ben Jacob, Ephraim ben Jacob of Bonn, Gershom ben Isaac, and Menahem ben Jacob of Worms, and inserted in the *sehitot*, perpetuated the memory of this sad event. The "Memorbuch" of Mayence has preserved the names of the martyrs:

Baruch; Baruch ben Menahem; Isaac ben Ehezzer; Jehiel ben Isaac ha-Kohen; a pious rabbi, disciple of R. Samuel, probably Rashbam (compare "Gallia Judaica," p. 117); Jekuthiel ben Judah; a rabbi, disciple of R. Samuel; Judah ben Aaron (brother of Isaac of Treves); Judah ben Meir; Judah ben Samuel; Moses ben Nun; Samuel ben Menahem; the young Panyan; Bona (wife of Samuel the hazan); Eiguefina; Hanna (daughter of R. Samuel); Hamia (with her little daughter born in the *auto da fé*); Leah (wife of R. Samuel), and her two daughters, Miriam and Miriam (wife of R. Judah); Rachel; Sarah; Zephora; Zephora.

The same "Memorbuch" mentions another *auto da fé* of Blois which took place in 1298, during the Rindfleisch persecutions. It is, however, difficult to believe that Jews ever settled there after this event.

**BLOOD.**—**Biblical Data:** The importance of blood for the continuance of life must have been recognized even in most remote antiquity and under the most primitive conditions. Any one could see that the death of wild animals during the chase and of slaughtered domestic animals was due to loss of blood. Almost every one had occasion, more or less frequently, to notice that wounded men became unconscious after having lost a certain amount of blood, and that they died if the bleeding did not cease. "To shed blood" is therefore synonymous with "to kill," "to murder," and guilt for a person's death is expressed by "damim," plural of "dam" (blood). For instance, in Josh. ii. 19 the spies say to Rahab: "And it shall be that whosoever shall go out of the doors of thy house into the street, his blood shall be upon his head [דמו בראש], and we will be guiltless; and whosoever shall be with thee in the house, his blood shall be on our head [דמו בראשנו], if any hand be upon him." So long as the blood circulates, the man or the animal lives; hence the assertion: "The life [Hebr., "soul"] of the flesh is in the blood [נפש הבשר בדם הוא]" (Lev. xvii. 11), and (verse 14), "it is the life [Hebr., "soul"] of all flesh"; R. V., "the blood thereof is all one with the life thereof." Even of animals it is said, "the life [Hebr., "soul"] of all flesh is the blood thereof [נפש כל בשר דמו הוא]" (*ib.*), and "the blood is the life [הדם הוא הנפש]" (Deut. xii. 23; compare Gen. ix. 4). The blood, then, is the seat of life or of the soul. All life originates in the breath of a being which God Himself sends forth: "Thou sendest forth thy spirit, they are created" (Ps. civ. 30); "Thou takest away their breath, they die" (*ib.* 29). It is therefore easy to understand how blood became an object of sacred awe; nor is it difficult

to explain the origin of the prohibition against the partaking of the blood of beasts or birds, or of meat that is still full of blood—a prohibition repeatedly

and explicitly emphasized in the Old Testament (Gen. ix. 4; Lev. iii. 17, vii. 26, xvii. 10, xix. 26; Deut. xii. 16, 23; xv. 23). That this law was really observed, and that its transgression was regarded as a sin, is proved by I Sam. xiv. 32 *et seq.*; Ezek. xxxiii. 25; Judith xi. 12. The apostle (Acts xv. 29; compare xv. 20, xxi. 25) exhorts the Gentiles to "abstain from meats offered to idols, and from blood, and from things strangled." The ordinances referring to blood, "ἀπέχεσθαι αἵματος καὶ πικρῶν," were obeyed by the Judæo-Christians from the very first (compare Clementine, "Homilies," vii. 4; Sibyllines, ii. 96), but by the Gentiles only after the historic books of the New Testament, and especially the Acts, were declared to be canonical. In J. G. Sommer's "Das Aposteldekret" (ii. 46, 60 *et seq.*, Königsberg, 1889) it is shown how the decree in Acts xv. 29, under the influence of the Torah and of the Jews that were consulted, led to a new ceremonial law, the import of which may be gathered from the penitential ordinances, "Libri Pœnitentiales." It may be incidentally remarked that the Koran also forbids the eating of blood (sura v. 4; compare ii. 175, xvi. 115).

In addition to their natural aversion to the tasting of blood, the Jews had another reason for abstaining from it, which is indicated in Lev. xvii. 11, where God says: "I have given it [the blood] to you upon the altar to make an atonement for your souls." God, in His mercy, ordained that blood should be a means of atonement; for which reason its place is upon the altar, and man shall not taste of it (compare also K. C. W. F. Bähr, "Symbolik des Mosaischen Cultus," ii. 200 *et seq.*, Heidelberg, 1839).—**In Rabbinical Literature:** In conformity with the general development of Judaism after Ezra, the Jews of later times multiplied and intensified the commands against partaking of blood (compare especially Shulhan 'Aruk, Yoreh De'ah, 65-68). There are very explicit directions regarding the elimination of blood from food, such as the soaking and salting of meat to be prepared for the table (compare ELEAZAR OF WORMS, in "Roqeah"; Naphtali Benet, in "Sefer Berit Melah," Prague, 1816; Ludwig Stern, "Die Vorschriften der Thora," § 18, Frankfort-on-the-Main, 1882; compare also DIETARY LAWS). In the medicine of the Talmud blood plays a purely negative part. Compare the sentence in B. B. 58b: "At the head of death stand I, the blood; at the head of all remedies stand I, the wine." In other words, most diseases arise in the blood. Blood is therefore not considered a remedy; but, on the contrary, bleeding and cupping (that is, the removal of blood) are recommended as modes of treatment (compare Leopold Löw, "Gesammelte Schriften," iii. 375-379, Szegedin, 1893).

—**In Folk-Lore:** The supreme importance of blood for human and animal life explains its prominence in folk-lore, where it is employed for the confirmation of compacts, for remedial, superstitious, and criminal purposes (compare Paulus Cassel, "Die Symbolik des Blutes und 'Der Arme Heinrich,' von Hartmann von Aue," p. 265, Berlin, 1882; H. C. Trumbull, "The Blood Covenant," p. 390, Philadelphia, 1893).

Owing to the command against tasting blood, and also to the Talmudic law forbidding any use to be made of a corpse (מת אסור בהנאה), practises of this kind were abhorred by the Jews at all times. See BLOOD ACCUSATION.

**BIBLIOGRAPHY:** Hermann L. Strack, *Das Blut im Glauben und Aberglauben der Menschheit, mit Besonderer Berücksichtigung der Volksmedizin und des Jüdischen Blutritus*, 8th ed., pp. 1-102, Munich, 1900; and the bibliography there given.

H. L. S.

**BLOOD ACCUSATION:** A term now usually understood to denote the accusation that the Jews— if not all of them, at all events certain Jewish sects— require and employ Christian blood for purposes which stand in close relation to the ritual, and that, in order to obtain such blood, they commit assault and even murder.

In the polemic of Josephus against the Alexandrian grammarian Apion ("Contra Ap.," ed. Niese, ii. 8, § 95), the latter is charged with having accused the Jews of annually fattening a Greek in the Temple, killing him, offering his body as a sacrifice, eating of his internal organs, and swearing an oath of enmity against all Greeks (according to the ancient

Latin translation, "Ejus corpus sac-

**History.** rificare secundum snas solemnitates

et gustare ex ejus visceribus et jus-

jurandum facere in immolatione Græci, ut inimicitias contra Græcos haberent"; the Greek text of the passage is unfortunately lost). Similar in import is the following statement of a certain Democritus, which the Greek lexicographer Suidas (tenth century) has preserved: "Every seven years the Jews catch a stranger, whom they offer as a sacrifice, killing him by tearing his flesh into shreds" (ὅτι κατὰ ἑπταετίαν ξένον ἀγροίοντες προσέθερον καὶ κατὰ λεπτὰ τὰς σάρκας διέζαινον καὶ οἶτος ἀνηνον). Nothing further is known of Democritus. Perhaps he drew his information from Apion's book.

In Socrates' "Hist. Eccles." there is an account of some drunken Jews who accidentally killed a Christian lad whom they had hung up in derision of Haman at Purim, but it is doubtful whether this could have given rise to the myth.

During all antiquity and far into medieval times there is no trace of any similar accusation against the Jews, not even in the Occident, although the work of Josephus was, upon the recommendation of Cassiodorus Senator, translated into Latin in the sixth century, and of this translation there are still more than twenty-four copies extant. Neither by that bitter enemy of the Jews, Agobard, bishop of Lyons (ninth century)—the statement to the contrary by August Rohling is a falsehood—nor by the monk Rudolph von Mainz, who inveighed against the Jews in 1146, and called them enemies of the Christian religion, nor by Bernard of Clairvaux (1091-1153), was the accusation repeated.

The first case in which Jews were actually accused of having killed a Christian child for ritual purposes was that of St. William of Norwich in 1144. According to an account recently discovered (Jessopp and James, "St. William of Norwich," Cambridge, 1899), the disappearance of the boy was explained by a Jewish convert, one Theobald of Cambridge, as due to a universal conspiracy of the

European Jews, who every year cast lots where the annual sacrifice of a Christian child at Passover should take place. In the preceding year the lot had been cast at Narbonne and had fallen on Norwich. Absolutely no evidence was adduced that a murder had been committed; it seems indeed that the lad had been merely in a cataleptic fit when found, and was buried alive by his own relatives. None of the Jews were tried or punished for the alleged crime, yet the mere statement of the Cambridge convert led to the bringing of similar charges at Gloucester in 1168, at Bury St. Edmunds in 1181, and at Winchester in 1192. In none of these cases was there any trial; but popular rumor was considered sufficient to establish the martyrdom of the lads, and this proved a considerable source of attraction to the cathedrals and abbeys of these towns.

In Dec., 1235, five children of a miller residing in the vicinity of the city of Fulda, Hesse-Nassau, were murdered, in consequence of which thirty-four Jews and Jewesses were slaughtered by the Crusaders. The Jews were accused of the deed, and those put to the torture are said to have confessed that they murdered the children, in order to procure their blood for purposes of healing ("ut ex eis sanguinem ad suum remedium elicere"). It is necessary to note here (1) that the reports say nothing of the presence of witnesses; (2) that the confessions were elicited through torture, and were consequently worthless; (3) that these confessions speak only of the intention to procure a remedy ("remedium"), and contain no reference to ritualistic ceremonies; (4) that the German emperor, Frederick II., in order to sift the matter thoroughly, invited a large number of scholars and distinguished Jewish converts to Christianity from all parts of Europe, who, in answer to the question whether the Jews required Christian blood for their Passover ceremonies ("Judæi Christianum sanguinem in parasceve necessarium habent"), replied: "Neither the Old nor the New Testament states that the Jews lust for human blood: on the contrary, it is expressly stated in the Bible, in the laws of Moses, and in the Jewish ordinances designated in Hebrew as the 'Talmud,' that they should not defile themselves with blood. Those to whom even the tasting of animal blood is prohibited surely can not thirst for that of human beings, (1) because of the horror of the thing; (2) because it is forbidden by nature; (3) because of the human tie that also binds the Jews to Christians; and (4) because they would not wilfully imperil their lives and property." The judgment of the emperor reads: "For these reasons we have decided, with the general consent of the governing princes, to exonerate the Jews of the district from the grave crime with which they have been charged, and to declare the remainder of the Jews in Germany free from all suspicion."

This judgment did not suffice to clear the Jews of Germany from the general suspicion aroused by the Fulda incident.

The affair may, however, have been a symptom, not a cause; since the accusation soon after became still more frequent in other countries. As early as 1247 a trial, conducted in the little town of Valréas (Vaucluse, France), showed that the judges of the

Inquisition there had heard of the blood accusation against the Jews. On the Wednesday before Easter (March 27) a two-year-old girl was found dead in the town moat, with wounds upon her forehead, hands, and feet. The fact that the child had been previously seen in the ghetto sufficed to fasten the suspicion of guilt upon the Jews. They were brought to trial, and, after being tortured, confessed even to the most absurd charges. One Bendig, for example, declared that the Jews had desired to celebrate communion on Easter Saturday, in accordance with a custom observed annually in large Jewish communities and particularly in Spain, where a Saracen was bought for this purpose whenever a Christian could not be obtained. This confession appears to have been based on the rumor set afloat by the renegade Theobald of Cambridge in connection with St. William of Norwich. Bendig further declared that, fearing detection, the Jews of Valréas had poured the blood of the child into the cesspool. In the same year (1247) the Jews of Germany and France complained to Pope Innocent IV. that they were accused of employing the heart of a Christian child in the celebration of communion during the Passover festival.

According to present information, the blood accusation against the Jews dates from the middle of the thirteenth century. The first literary reference to it is made about this time in the following passage from the writing, "Bonum Universale de Apibus," ii. 29, § 23, by Thomas of Cantimpré (a monastery near

**Earliest Mention.** Cambray): "It is quite certain that the Jews of every province annually decide by lot which congregation or city is to send Christian blood to the

other congregations." Thomas also believes that since the time when the Jews called out to Pilate, "His blood be on us, and on our children" (Matt. xxvii. 25), they have been afflicted with hemorrhages: "A very learned Jew, who in our day has been converted to the [Christian] faith, informs us that one enjoying the reputation of a prophet among them, toward the close of his life, made the following prediction: 'Be assured that relief from this secret ailment, to which you are exposed, can only be obtained through Christian blood ['solo sanguine Christiano']. This suggestion was followed by the ever-blind and impious Jews, who instituted the custom of annually shedding Christian blood in every province, in order that they might recover from their malady." Upon the basis of the information furnished by this convert, Thomas adds that the Jews had misunderstood the words of their prophet, who by his expression "solo sanguine Christiano" had meant not the blood of any Christian, but that of Jesus—the only true remedy for all physical and spiritual suffering. It is a pity that Thomas does not mention the name of the "very learned" proselyte. Possibly it was Nicholas Douin of La Rochelle, who in 1240 had a disputation on the Talmud with Jehiel of Paris, and who in 1242 caused the burning of numerous Talmudic manuscripts in Paris. It is known that Thomas was personally acquainted with this Nicholas.

Of the alarmingly large number of ritual trials only a few of the more important and instructive can here be mentioned:

The case of Little St. Hugh of Lincoln is mentioned by Chaucer, and has thus become well known. A little lad of eight years, named Hugh, son of a woman named Beatrice, disappeared at Lincoln on the 31st of July, 1255. His body was discovered on the 29th of August, covered with filth, in a pit or well belonging to a Jew named Jopin. On being promised by John of Lexington, a judge, who happened to be present, that his life should be spared, Jopin is said to have confessed that the boy had been crucified by the Jews, who had assembled at Lincoln for that purpose. King Henry III., on reaching Lincoln some five weeks afterward, at the beginning of October, refused to carry out the promise of John of Lexington, and had Jopin executed and ninety-one of the Jews of Lincoln seized and sent up to London, where eighteen of them were executed. The rest were pardoned at the intercession of the Franciscans (Jacobs, "Jewish Ideals," pp. 192-224).

In 1267, at Pforzheim, Baden, the corpse of a seven-year-old girl was found in the river by fishermen. The Jews were suspected, and when they were led to the corpse, blood began to flow from the wounds; led to it a second time, the face of the child became flushed, and both arms were raised. In addition to these miracles, there was the testimony of the daughter of the wicked woman who had sold the child to the Jews. A regular judicial examination did not take place; and it is probable that the above-mentioned "wicked woman" was the murderess. That a judicial murder was then and there committed against the Jews in consequence of the accusation is evident from the manner in which the Nuremberg "Memorbuch" and the synagogal poems refer to the incident (Salfeld, "Martyrologium," pp. 15, 128-130).

At Weissenburg, Alsace, in 1270, a miracle alone decided the charge against the Jews. Although, according to the accusation, the Jews had suspended a child (whose body was found in the Lauter river) by the feet, and had opened every artery in its body *in order to obtain all the blood*, its wounds were said to have bled for five days afterward (!).

In 1286, at Oberwesel, miracles again constituted the only evidence against the Jews. The corpse of the eleven-year-old Werner is said to have floated up the Rhine (against the current) as far as Bacharach, emitting a radiance, and being invested

**Thirteenth Century.** with healing powers. In consequence, the Jews of Oberwesel and many other adjacent localities were severely persecuted during the years 1286-89. Emperor Rudolph I., to whom the Jews had appealed for protection, issued a public proclamation to the effect that great wrong had been done to the Jews, and that the corpse of Werner was to be burned and the ashes scattered to the winds.

The statement was made, in the "Chronicle" of Conrad Justinger (d. 1426), that at Bern in 1294 the Jews had shockingly tortured and murdered the boy Rudolph. The historical impossibility of this widely credited story was demonstrated by Stammer, the pastor of Bern (see "Katholische Schweizer-Blätter," Lucerne, 1888).

In 1462, at Rinn, near Innsbruck, a boy named Andreas Oxner was said to have been bought by Jewish merchants and cruelly murdered by them in a forest near the city, his blood being carefully collected in vessels. The accusation of drawing off the blood (without murder) was not made until the beginning of the seventeenth century. The older inscription in the church of Rinn, dating from 1575, is distorted by fabulous embellishments; as, for example, that the money which had been paid for the boy to his godfather was found to have turned into leaves, and that a lily blossomed upon his grave.

In 1475 occurred the case of the boy Simon of Trent. The confessions elicited by torture here themselves preclude the possibility of a ritual murder. The Feast of Passover in 1475 began on the evening of March 22, that is, on Wednesday. According to the charge, however, the boy did not disappear before Thursday, and he was murdered on Friday. The Jews could, therefore, have employed the blood neither for their unleavened bread ("mazzot") nor for the four cups ("arba kosot"). Nevertheless, they are alleged to have admitted that they required "fresh Christian blood" for this particular year, as being a Jubilee year. But, in truth, the Jews have not counted or celebrated the Jubilee year (Lev. xxv.) since the destruction of the Temple by Nebuchadnezzar. The year 1475, however, was a Jubilee year of the Catholic Church; and the ignorant torturers, believing that the Jews also celebrated it as a jubilee, forced their victims to confess accordingly. The publication of the documents in the case of the boy Simon (collected and copied by Moritz Stern, Berlin) is much to be desired (compare the extracts in Hermann Strack, "Das Blut," pp. 126-131).

At La Guardia, near Toledo, Spain, the accusation recurred in 1490. Here no inquiry was made as to the remains, the clothes of the child, the instruments of the murder, or the time and place of its commission. Modern historians even deny that a child had disappeared at all (Loeb, "Rev. Etudes Juives," xv. 203-232; Lea, in "English Historical Review," iv. 239-250). Nevertheless, Lope de Vega employed this supposititious incident as the plot of a play.

In a case at Tyrnau, Hungary, in 1494, the absurdity, even the impossibility, of the statements forced by torture from women and children shows that the accused preferred death as a means of escape from the torture, and admitted everything that was asked of them. They even said that Jewish men menstruated, and that the latter therefore practised the drinking of Christian blood as a remedy.

At Bazin (= Bösing), Hungary, in 1529, it was charged that a nine-year-old boy had been bled to death, suffering cruel torture; and thirty Jews confessed to the crime and were publicly burned. The true facts of the case were disclosed later, when the child was found alive in Vienna. He had been stolen by the accuser, Count Wolf of Bazin, as an easy but fiendish means of ridding himself of his Jewish creditors at Bazin.

In Feb., 1840, at Damascus, Syria, Father Thomas, a Capuchin, and his servant were murdered. In

this instance, also, confessions were obtained only after the infliction of barbarous tortures. A trustworthy witness of the proceedings was the converted Jew G. W. Pieritz, who said of himself that he was no friend or defendant of rabbinism ("Persecution of the Jews at Damascus," London, 1840). See DAMASCUS AFFAIR.

In 1882, at Tisza-Eszlár, the victim was Esther Soly-mosi (compare Paul Nathan, "Der Prozess von Tisza-Eszlár," Berlin, 1892). See TISZA-ESZLÁR AFFAIR.

At Corfu, during the night of April 12, 1891, an eight-year-old girl was murdered. It was commonly reported that the child had been a Christian. Maria Desylla by name, and that Jews had murdered her and then taken her blood. Her teacher, however, declared, in a document attested by the French consul at Corfu, that the child's name was Rubina Sarda, and that she was a Jewess.

In 1891, at Xanten, Rhenish Prussia, a butcher, Adolph Buschhoff, was accused of murdering the boy Johann Hegmann, five and one-half years of age, and of drawing and concealing his blood. The two public prosecutors, after carefully collecting all the evidence, declared that the accused could not have committed the deed, and that there was no evidence showing that blood had been concealed (see Strack, *l.c.* pp. 153-156).

On April 1, 1899, at Polna, Bohemia, there was found in the forest near the town the body of Agnes Hruza, a seamstress, nineteen years old, with a gash in the throat. A Jew, Leopold Hilsner, an idler, twenty-three years of age, was accused of the deed, and in the same year was sentenced to death by the court at Kuttenberg for complicity in the murder. The public prosecutor, Schneider-Swoboda, and the advocate, Dr. Baxa, averred (the former indirectly, the latter openly) that a ritual murder was involved. But the medical faculty of the Czech University of Prague have demonstrated that the obtaining of blood must be excluded as a motive for the deed. No blood was missing: a quantity proportionate to the size of the body was found in the saturated garments, in the hair (which was caked with blood), in the pool of blood near the body, and in the body itself. After the Court of Cassation at Vienna had set aside the first verdict, Hilsner, in Oct., 1900, was condemned a second time by the court at Pisek, and again upon the charge of complicity, although there was no evidence that more than one person had been engaged in the murder. This decision was again attacked, but was upheld, May, 1901, by the Court of Cassation at Vienna. Whether Hilsner is the sole murderer, an accomplice, or entirely innocent, in no case is a ritual murder here involved, or a murder of which the object was the obtaining of blood. See POLNA AFFAIR.

Despite the strenuous efforts of the police, the murderer of Ernst Winter, a nineteen-year-old pupil at the gymnasium at Konitz, West Prussia, has not yet been discovered. There is no trace of a ritual murder, or of a desire on the part of the murderer to appropriate any of the blood. The dismemberment of the body is fully explained as having been done for the purpose of safely removing the remains from the scene of the murder.

The origin of the blood accusation has not yet been discovered. The annals of Erfurt state that the Jews used waxed sacks ("in saccis cera linitis") for collecting the blood of the children killed at Fulda in Dec., 1235. According to the Marbach annals (also contemporaneous with the event) the Jews confessed that they wished to utilize the blood for remedial purposes. The annals also state that the emperor Frederick II. (as mentioned above) consulted a number of distinguished converted Jews in order to ascertain whether the Jews required Christian blood on Parascève—a term fre-

quently used to designate Good Friday. As early as the twelfth century it was several times reported that Jews had crucified Christian children during Easter (*e.g.*, William of Norwich, 1144, see above; Gloucester, 1171; Blois, 1179; Richard of Paris, in Poiteuse). Whether all or part of these reports agree with the facts, or are alike unworthy of credence, the theory of a ritual murder is in no case justified; and, if the accounts are historical, it can only be assumed that the Jews in one instance or on several occasions put Christians to death. A ritualistic feature was imparted to these real or supposed crucifixions or other murders of Christians, and especially of Christian children, by the suggestions: (1) that the murders involved the acquisition of blood; and (2) that the crimes were related to the Passover festival. The emperor had probably already heard that Christians had been crucified or otherwise murdered by Jews at the period of the Christian Easter; he now heard of the bleeding of the victims, and asked (if the expression "in Parascève" is correct) whether the Jews did at that time actually require Christian blood. This explains why the Jews of Valréas in 1247 were forced to confess that they wanted the blood of the murdered child in order to celebrate communion on Easter Saturday. The absurdity of such a confession on the

part of Jews was so obvious that even the most stupid inquisitors could not afford to have it often repeated. The most dangerous consequences, on the

other hand, followed from the establishment of a connection between the blood accusation and the period of the Jewish Passover festival. A statement to this effect appears to have been first made by Richer of Sens in the "Gesta Senoniensis Ecclesie," published between 1239 and 1270. He mentions the event at Fulda as occurring on the day before Passover ("quarta decima luna")—that is, March 22, 1236—whereas both the "Memorbuch" of Nuremberg and the annals of Erfurt irrefutably establish the date as Dec. 28, 1235 (Salfeld, "Martyrologium," pp. 13, 122). The false statement of Richer is probably traceable to the fact that he could find no connection between the bleeding and the Christian Easter. The untrustworthiness of Richer's chronology is evident also from the fact that he places the scene of the murder at Hagenau, Alsace, instead of at Fulda, although it is firmly established that the corpses of the children were brought to Hagenau. Reference has already been made to the petition presented by the Jews of Germany and France to Pope Innocent IV., to the effect

that they had been accused of celebrating the Feast of Passover with the heart of a murdered Christian boy, in answer to which the pope issued a bull (July 5) decreeing that the Jews should not be persecuted because of this false accusation. Examples of the association of ritual murders with the Feast of Passover are found as follows: at Weissensee, Thuringia, 1303; Savoy, 1329; Trent, 1475; Boleslaw, Galicia, 1829; Tarnow, Galicia, 1844; Ostrovo, in the Russian government of Lublin, 1875; Eisleben, 1892; Bakau, Rumania, 1892 (see Strack, *l.c.* ch. xviii.).

Several circumstances conduced to spread the belief that the use of human blood among the Jews was directly associated with the Feast of Passover. The mazzot, for example, were, to secure purity and absolute absence of leaven, prepared with peculiar ceremonies incomprehensible to Christians, and were, therefore, invested with an element of mystery—a circumstance enhanced by the great and somewhat superstitious value then (and even today) placed by many Jewish people upon the Passover bread. It was natural to compare it to the wafers used at the Christian communion, when, by eating the wafer, the pious Christian believed that he partook of the body and blood of Christ; the blood purifying from all sin, and working miracles, "Without blood, no atonement" was both Old Testament and Christian doctrine. Since the destruction of the Second Temple, however, the blood sacrifices of the Jews had, as stated above, ceased; and the assumption would naturally arise that the Jews had endeavored to find a substitute. The blood of Christ was visible neither in the bread nor in the wine of the holy communion; was it not possible that the mazzot contained a similar invisible ingredient, operating as a mysterious agency? The Jews also preferably used red wine for the four cups which they were commanded to drink on the first two evenings of the Passover festival; the red color of the wine, according to the legend, being reminiscent not only of the blood of the Israelitish children (Ex. R. ii. 23) shed to prepare a bath for the leprous Pharaoh, but also of the numerous Jews who had died for their faith. This red wine has been interpreted by the enemies of the Jews as being actual blood; and consequently David ha-Levi b. Samuel, in his commentary "Ture Zahab" to the Shulhan 'Aruk, Orah Hayyim, 472, 8, has warned against its use. So much for a real or imaginary association between the blood accusation and the Feast of Passover. It but remains to mention one other circumstance. For the healing of the wound caused by circumcision the Jews frequently used the so-called "dragon's blood," a dark or blood-red gum of a species of palm (*Culamnis Draco*, *Pterocarpus Draco*, *Dracæna Draco*). Whoever held this gum to be blood unjustly accused the Jews of employing blood for ritual purposes.

But all this does not suffice to explain that the accusation of employing blood for ritual purposes has, during six and one-half centuries and throughout a large part of Europe, rested heavily on the Jews. The Christians have never had more than a very imperfect knowledge of the language, religion, and customs of the Jews dwelling among them; whereas the Jews, as a whole, had far better informa-

tion, at least as regards the language and customs of the nation among which their lot was cast. This circumstance also accounts for the superstitious and distrustful attitude toward the Jews. Just as the Roman Catholic clergyman in specifically Protestant districts was frequently invested with wonder and mystery, the Jews in Christian lands frequently became the subjects of superstitious misconceptions on the part of the Christian population. In the strife, waged at Bern in 1507, between the Dominicans and Franciscans, the assertion was made that the Dominicans had used the blood and eyebrows of a Jewish child for secret purposes (Grünneirus, "Berner Chronik," 1585, p. 622). In 1890 the magician Wawrzek Marut was sentenced in Galicia for stealing the corpses of two Jewish children from the cemetery, in order to fumigate a peasant's hut after typhoid fever. He declared that there were two kinds of typhoid: one a Catholic type, banishable through the Lord's Prayer; the other a Jewish type, removable only by means of Jewish bones (compare A. Wuttke, "Der Deutsche Volksaberglaube der Gegenwart," Berlin, 1869, Index).

Furthermore, the belief in the miraculous properties of blood may be traced far into antiquity, and its high importance to vitality must ever have been obvious (see BLOOD). A severe loss of blood causes faintness, syncope, and even death: "For the life of the flesh is in the blood" (Lev. xvii. 11). Hence, a sanguinary sacrifice, and particularly a human sacrifice, is regarded by the ignorant as the most precious. Hence, also, the custom of using blood to symbolize important actions: friendship was pledged and alliances were formed by intermingling the blood of both parties. At this very day blood-brotherhood is cemented in this way in Africa, as, for example, in Madagascar and Kamerun. These circumstances, in their turn, account for the belief that blood, human as well as animal, is invested with

extraordinary properties. Even in ancient times human blood was considered a remedy for epilepsy (see Pliny, "Naturalis Historia," xxviii. 1, § 2; 4, § 10); and this belief has survived

to the present day, the blood of newly executed persons being regarded as a particularly powerful remedial agency. As a specific against leprosy, bathing in human blood was recommended both in ancient and in medieval times. Pliny (*l.c.* xxvi. 1, § 5) relates that when the Egyptian kings were stricken with elephantiasis they took such baths; and this statement is in singular accord with the passage from Exodus Rabbah (i., end), which states that the leprous Pharaohs, upon the advice of their sages, commanded that 150 Jewish children should be slaughtered every morning and every evening, in order that the monarchs might bathe in blood. For other medicinal and folk-lore uses, see BLOOD.

Blood has a deep signification in the religion of the Old Testament. God Himself has designated blood as a means of atonement (Lev. xvii. 11). In no other religion is the specific import of blood so clearly enunciated. Hence the oft-repeated and emphatic prohibition (existing among no other nation

### Anti-Jewish Prejudice the Real Basis.

### General Belief in Efficacy of Blood.

in such form) against the partaking of blood as food (Lev. iii. 17, vii. 26, xix. 26; Deut. xii. 16; I Sam. xiv. 32, 33; Ezek. xxxiii. 25; compare also Acts xv. 29). When with the destruction of the Second Temple the sacrifices ceased, the sprinkling of the altar with blood ceased also. But the

#### Similar Jewish Belief.

abhorrence of the tasting of blood remained; indeed, the later Jewish legislation went even further in this respect than that of the Old Testament (see Shulhan 'Aruk, Yoreh De'ah, 65, 1; 67, 1, 39; Eleazar of Worms, in "Roqeah"; Naphthali Benedict, in "Sefer Berith Melah," Prague, 1816; S. B. Bamberger, "Amirab Lebet Ya'akob," 2d ed., Fürth, 1864). Another important principle of the Jewish law reads: כֹּת אִסּוּר בְּהִנְחָה (any utilization of a dead body is forbidden; 'Abodah Zarah 29b; compare J. Rabinowicz, "Der Todtencultus bei den Juden," Frankfort-on-the-Main, 1889, §§ 21-23).

Both these sets of laws have constituted and still constitute a serious impediment to the inception and furtherance among the Jews of those ideas on blood and its applications that are found among other nations. Superstition, it is true, exists among the Jews; and there are also superstitions Jewish in origin. Furthermore, popular conceptions on medicine also were not lacking among the Jews (see the works cited in Hermann Strack, "Das Blut," p. 98; M. Grunwald, "Aus Hausapotheke und Hexenküche," in "Mittheilungen der Gesellschaft für Jüdische Volkskunde," i. 1-87, Hamburg, 1900). But many of these ideas did not originate among them; and references to the blood and its employment are rare. Occasionally a Jew uses his own blood—that is, externally—for the purpose of stopping a hemorrhage (forming a clot). Nowhere, so far as the present writer is aware, is there any reference whatever to the drinking of human or animal blood for medicinal or superstitious purposes, or to the swallowing of it when dried. Finally, there is no instance of a Jew having committed murder in order to drink blood. There is always, of course, the possibility that a Jew—like one of any other race—may commit a murder. But, even if such a murder should be proved against a Jew, the only justifiable conclusion would be that the culprit committed the crime, not as a Jew, but merely as a superstitious person; just as in the case of Hundssattler and Bliefernicht, who devoured the flesh of their victims, the Christian religion could not be held accountable for the crimes committed.

It may be positively asserted that there is no Jewish ritual which prescribes the use of the blood of any human being. Were there such a ritual, or were such a procedure even tolerated, there would certainly be some reference to it in the colossal mass of halakic literature which enters into every detail of ritualistic observance and of domestic life. But neither the well-informed among Christian theologians nor the inimical among converted Jews have ever been able to cite

#### No Jewish Blood-Ritual.

a passage from these sources showing that such prescription exists. The statements to the contrary by the Austrian professor, August Rohling, have served only to demonstrate the ignorance and malice of the man.

In consequence of the undeniable weightiness of these reasons, the assertion is now frequently made that while the traditions concerning a sanguinary rite do not obtain among Judaism as a whole, they are, nevertheless, accepted by one or several sects. But this opinion, also, is untenable; for if the Talmudic Jews, collectively or in individual cases, had cultivated sanguinary rites, the Karaites would certainly not have failed to emphasize that fact again and again. Nor would the Talmudic Jews have been silent had it been possible for them to accuse the Karaites of such a ceremony. Nothing of the kind has ever been asserted by either side.

In order to increase the plausibility of a blood ritual among the Jews, it has become customary to speak of the "slaughterer's cut," and the application of the slaughterer's knife: it is the communal slaughterer ("shohet"), too, who is preferably accused of the murder of Christian children. It is noteworthy, therefore, that Joseph Teomim, in his commentary ("Peri Megadim") to the Shulhan 'Aruk, Yoreh De'ah, 8, should relate the following: "A slaughterer bought, for use in slaughtering, a knife which an executioner had employed. R. Joseph declares this to be prohibited; for human

flesh is prohibited, and in consequence Connection with the "Slaughterer's Cut."

of the former close contact of the knife with it, the flesh of the animals slaughtered with it would also be prohibited." Whoever accepts, therefore, the ritual killing of Christian children by Jews, must assume that the slaughterers are equipped with two sets of knives, one set for animals, and the other for Christian children! It is noteworthy, also, in this connection that in the very cases in which the "slaughterer's cut" was most vigorously discussed—as, for example, at Xanten in 1891—a close inspection of the wound demonstrated beyond a doubt that such a cut had not been made. Finally, it should be mentioned that those who charge an intentional secreting of the blood for ritual purposes have an entirely erroneous conception of the actual quantity of blood in the body. The weight of the blood constitutes only one-fourteenth to one-thirteenth (7.17-7.7 per cent) of the total weight of the body. The total quantity of blood lost in the case of death through wounds is only about one-half of this blood-content of the body, or, in the case of decapitation (where the loss of blood is heaviest), about 72 per cent of it. Thus, the quantity of blood that can possibly be found on the spot and on the clothing of the victim is much smaller than most persons suppose (compare "Der Xantener Knabenmord vor dem Schwurgericht zu Cleve," July 4-14, 1892, Berlin, 1893, pp. 54 *et seq.*, 61 *et seq.*, 481 *et seq.*; J. Marcus, "Etude Médico-Légale du Meurtre Rituel," Paris, 1900).

The proselytes who have confirmed the blood accusation against the Jews have always been malicious and ignorant enemies of their people; and upon their testimony, devoid as it is of proof, no reliance can be placed. Among these proselytes were: Samuel Friedrich Brenz, author of the book "Jüdischer Abgestreifter Schlangen-Balg," Nuremberg, 1614; Paul Christian Kirchner, author of "Jüdisches Ceremoniel," Frankfort, 1720; and Paulus Meyer (see

Strack, *l.c.* pp. 105-160 *et seq.*) It is very noteworthy, however, that such pronounced anti-Jewish proselytes as J. Pfefferkorn ("Speculum Adhortationis Judaicæ ad Christum," 1507) and Accusation Julius Morosini ("Via della Fede Mos-Pronounced trata agli Ebrei," 1683) have pronounced the accusation false. In recent times August Rohling of Prague has become widely recognized as the principal authority for such anti-Jewish statements; but Strack, in "Das Blut" (ch. xvii.), furnishes unassailable proof that, both from a scientific and from a moral point of view, Rohling's assertions are utterly unreliable.

Among the large number of observant Jews and Christians who have refuted the blood accusation are the following; viz., Jews: Manasseh b. Israel, author of "Vindicie Judeorum," London, 1656, who took a solemn oath that the Jews were guiltless of this charge, an oath which was repeated at London June 30, 1840, by the rabbis Solomon Hirschell and David Meldola. Other Jews who protested were Jacob Emden and Jonathan Eybeschütz. Protests have also been expressed in poetry and "Memorbücher" designed only for Jewish readers. Proselytes: Johann Emanuel Veith, the eminent preacher in the Cathedral of St. Stephen, Vienna; and Alexander McCaul, who, in "Reasons for Believing that the Charge Lately Revived Against the Jewish People Is a Baseless Falschood," London, 1840, published a protest signed by fifty-eight converts, of whom the first was M. S. ALEXANDER, bishop of the Anglican Church at Jerusalem (d. 1845). It runs as follows: "We, the undersigned, by nation Jews, and having lived to years of maturity in the faith and practise of modern Judaism, but now, by the grace of God, members of the Church of Christ, do solemnly protest that we have never directly nor indirectly heard, much less known, among the Jews, of the practise of killing Christians or using Christian blood, and that we believe this charge, so often brought against them formerly, and now lately revived, to be a foul and Satanic falsehood." Popes: See "Die Päpstlichen Bullen über die Blutbeschuldigung," Berlin, 1893, and Munich (Aug. Schupp), 1900, contains the bulls of Innocent IV., Gregory X., Martin V., Paul III., and the opinion of Lorenzo Ganganelli (later Clement XIV.). Many popes have either directly or indirectly condemned the blood accusation; no pope has ever sanctioned it. Monarchs: The German emperors Frederick II. (1236); Rudolph of Habsburg (1275); Frederick III. (1470); Charles V. (1544); the Bohemian kings Ottocar II. (1254), etc.; the Polish kings Boleslaw V. Pius (1264); Casimir III. (1334); Casimir IV. (1453); Stephen Báthori (1576); and others. For Hungary see the constitution of 1791; for Turkey, 'Abd al-Majid (1840). Christian scholars and divines: Johann Christoph Wagenseil (1633-1705); Johann Jakob Schudt, author of "Jüdische Merkwürdigkeiten" (1714); Johann Salomo Semler (1725-91); Alex. McCaul; Franz Delitzsch (1813-90); J. J. I. von Döllinger (1799-1890); and many others.

**BLOOD-MONEY**: Ransom paid by a murderer to the avenging kinsmen of a murdered man, in satisfaction for the crime. Among the Anglo-Saxons and other Germanic peoples blood-money or "wergeld" was commonly paid, and a regular scale of prices fixing the value of lives was established by law (Kemble, "The Anglo-Saxons in England," ii. 276 *et seq.*). Blood-money was unknown in Roman law. All crimes except murder could be satisfied by payment of a fine; but for murder the death penalty was invariably inflicted (see "The Law of the Twelve Tables," Table VIII.).

The Jewish law went further than the Roman law in this respect. The code of the Twelve Tables simply states that for murder the death penalty shall be inflicted, and for lesser crimes the money compensation may be received in satisfaction, thus inferentially prohibiting the taking of blood-money for murder. The Biblical law (Num. xxxv. 31, 32), however, expressly prohibits it. It forbids (1) the taking of blood-money for the life of a murderer, allowing him to escape; and (2) the taking of it for a murderer who has fled to a city of refuge, allowing him to return to his home. The crime of taking human life was the most heinous known to the Jewish law (*ib.*, xxxv. 34).

According to another Biblical code (Ex. xxi. 28-32), the owner of a goring ox who, knowing the dangerous nature of the animal, still did not keep it in subjection, was put to death if the ox killed a human being. But as the death in this case was not directly caused by the owner of the ox, a concession was made in his favor, and he was permitted to ransom his life. The Talmud modifies the severity of the law through the following process of reasoning: If the owner of the ox committed the murder, he was forced to die according to the law (Num.

xxxv. 31); but if his ox killed a person, the ox was slain, and the owner paid blood-money. If the ox were not slain, then the owner was put to death; hence R. Hizkiyah said, "The law in Num. xxxv. 31 requires only the actual murderer to be killed; and you can not put a man to death because of a death caused by his ox" (Sanh. 15b).

The murderer who had come to the city of refuge, if guilty of wilful murder, was given into the hands of the avenger to be executed; but if guilty of accidental homicide, remained in the city of refuge until the death of the high priest (Num. xxxv. 25). It appears, therefore, that even one guilty of accidental homicide could not expiate the offense by the payment of blood-money, but must serve his full term in the city of refuge (Ket. 37b). The strict application of this law led the rabbinical authorities to the conclusion that the death penalty was an absolute satisfaction for the crime and its consequences, and that therefore the relatives of the murdered person had no claim in damages against the murderer. The law in Ex. xxi. 22 was thus explained: "If there is no danger to life from the injury, the murderer is punished by fine; but if death results, he is not punished by fine, because he is subjected to the death penalty" (Mishnah Ket. iii. 2).

Maimonides states the matter as follows: "The court must take care that no blood-money be taken from the murderer even if he would give all the money in the world, and even if the avenger would be willing to release him; because the life of the murdered man is not the property of the avenger, but the property of God, and God has said, 'Ye shall take no blood-money for the life of a murderer' (Num. xxxv. 31); and 'There is no sin so great as that of murder, for blood defileth the land' (Num. xxxv. 33)"; (Maimonides, "Yad," Rozeah, i. 4; see articles DAMAGES, HOMICIDE, RANSOM).

D. W. A.

**BLOOD-MONEY IN RUMANIA:** According to the common law of Moldavia and Wallachia, the murder of a person entailed not only the execution of the murderer, but also the imposition upon him, or if he were unknown upon the village nearest to the spot where the murder had been committed, of a heavy fine ("prezul sangelui" = blood-money), which fell to the relations of the victim. Villages that could not pay the fine were depopulated.

This legislation applied to Jews in common with the other inhabitants, and the communities were made collectively responsible for the fines. As commercial travelers and pedlers, the Jews journeyed constantly, and while the Rumanians were hospitable to every traveler, they considered it hardly a mortal crime to murder a Turk, a Tatar, or a Jew (Cantemir, "Descriptio Moldaviae," Rumanian ed., p. 260, Jassy, 1851). The fine imposed for the murder of a Jew was very heavy; a decree of Prince Petrasheu of Wallachia, in 1553, mentions that Mireea the Great (1382-1409) amerced the village of Vianul, beyond the Olt, in the sum of 40,000 aspers, upon the complaint of the wife and the mother of a Jew who had been murdered in that vicinity. The villagers, being unable to raise such a sum, implored the clemency of the prince, who paid the amount out of his own treasury.

In order to evade payment of blood-money, villagers, on finding a corpse, would often throw it into a river or pond, or perhaps inter it, to avoid notice by the authorities. This practise caused great hardship to Jewish wives who, in addition to the loss of their husbands, saw themselves doomed to perpetual widowhood by the Jewish law concerning disappearances (see AGUNAH).

The institution of blood-money was abolished by the law of 1831, but the murders of Jewish travelers and Jewish tavern-keepers (especially numerous on the main highways) continued unabated. A singular consequence of these frequent murders among Rumanian Jews, more especially in Moldavia, is the custom of regarding Jewish tavern-keepers who have thus been foully dealt with, as martyrs in a religious cause, for the reason that they have lost their lives in the endeavor to provide "kosher" food for their traveling condigionists. The sons of such are called to the Torah by the proud title "Ben ha-Kedoshim" (Son of the Saints).

**BLOOD-RELATIONSHIP.—Biblical Data:**

Family connection between persons otherwise than by marriage. To the casual reader of the Old Testament, blood-relationship seems always to have been reckoned by the Hebrews from father to son. The genealogies are all drawn up on this basis (compare Gen. iv., v., x., xxii. 20-24, xlvii.; I Chron. i.-ix., etc.). These genealogies, however, are not uniform. Some of them give the name of the mother (as Gen. xxii. 20, 24), while many of them give the names of father and son merely. Another interesting variation is that one set of passages represents the mother as naming the children (see, for example, Gen. iv. 1, 25; xxix. 32-35), while another set of passages attributes that function to the father (e.g., Gen. xvii. 19; xli. 51, 52). For further light on the ideas of relationship see the CRITICAL VIEW.

Blood-relationship was interpreted broadly as a brotherhood which bound together by peculiar ties all who were descended from a common father. In II Sam. v. 1 all the tribes of Israel are said to be bone of David's bone and flesh of his flesh; i.e., to be his brethren. Similarly, in Lev. xxv. 39-46 all Israelites are considered brethren, as opposed to the people of other nations. This idea of brotherhood

was founded on a belief that they were all sharers in a common blood.

**Historical Survey.** While these broad conceptions of brotherhood prevailed, they did not obscure in the Hebrew mind the fact that in every generation men of one father (i.e., brothers in a narrower sense) were under more peculiar obligations to one another than others of the same nation. Thus, in certain cases restitution had to be made to the nearest of kin (Num. v. 7, 8), and in other cases peculiar duties devolved on the nearest kinsman (compare Ruth ii. 20, iii. and iv. *passim*; see GOEL). Other evidence that in the later time degrees of

relationship were recognized is shown by Tobit vi. 10 and Luke ii. 36.

The recognition of certain differences in the degrees of kinship belongs to an early period; for marriages within certain degrees of

**Marriage Prohibitions.** kinship were prohibited from very ancient times. In Lev. xviii. marriage with a father or mother, son or daughter, grandson or granddaughter, or with a consort of any of these, is prohibited, as is the marriage of a man to a woman and her daughter, or to two sisters at the same time. There is involved in some of these prohibitions a recognition of an artificial relationship; but even these are based on the strong feeling of kinship with those of one family. Not all the prohibitions of this law are, however, primitive; for it defines a sister (verse 9) as "the daughter of thy father or the daughter of thy mother"; though in ancient times marriages seem to have been permitted between children of the same father, if they had different mothers; cases in point are the marriages of Abraham and Sarah (Gen. xx. 12), and Amnon and Tamar (II Sam. xiii. 13).

As among the Arabs, it was regarded by the Hebrews a duty to avenge the blood of a murdered relative; and if this were not done,

**Blood Avenger.** YUWII was thought to be displeased. Thus Joab avenged his brother Asahel (II Sam. iii. 27); and YUWII sent a famine because the Gibeonites were not avenged of the house of Saul (II Sam. xxi. 1 *et seq.*). It was in consequence of this custom that the CITIES OF REFUGE were founded. See also AVENGER OF BLOOD.

—**Critical View:** It is a feature of primitive culture to form clans artificial in organization though not necessarily of different stocks, which select some totem as their emblem (compare Giddings, "Principles of Sociology," pp. 270-272; and Keasby, in "International Monthly," i. 393 *et seq.*). These clans in the course of time regard all their members as brethren descended from the common totem. In order to account for the growth of the clan it has been supposed by some scholars that clans meeting others who have for some reason chosen the same totem will naturally regard one another as brethren too. In this way an enlarged and artificial brotherhood is formed, which is, however, conceived as real. The existence of "Leah," "Rachel," and "Caleb" (denoting wild cow, ewe, and dog) as clan names among the Hebrews, taken in connection with the evidence from other parts of the Semitic world, makes it probable that relationships originally artificial were by the Hebrews counted as blood-relationships (compare W. R. Smith, "Animal Worship and Animal Tribes Among the Arabs and in the Old Testament," in "Journal of Philology," ix.; *idem*, "Kinship and Marriage in Early Arabia," ch. vii.; Jacobs, "Studies in Biblical Archaeology," iv.; and Barton, "Semitic Origins," ii.).

Among the Semites also kinship was originally reckoned, as among many other primitive nations, through the mother (see W. R. Smith, "Kinship," etc., pp. 145-165, 246-253; Barton, *op. cit.* ii.). This seems to have been also the case among the Hebrews. In the earlier Jahvistic document the mother names the child, which, as Wellhausen points

out, is a relic of maternal kinship (compare "Nachrichten der Königlichen Gesellschaft der Wissenschaften zu Göttingen," 1893, p. 478, note 2). By the time of the production of the Priestly Code, relationship was reckoned through the father; so that the mother's name was then suppressed, and the father named the child. In accordance with the system of maternal kinship, the children of Jacob are said (Gen. xxxi. 43) to belong to their mother's clan. The marriage of Abraham and Sarah and that of Amnon and Tamar—though in each case between children of the same father—are explained by the fact that blood-relationship was counted only through the mother.

Some further instances of the artificial assumption of blood-relationship, which differ in character from the primitive totemic system, remain to be considered. Adoption, in the sense of the legal transfer of filial rights from one person to another, seems not to have been known in Israel as it was among the Romans.

There are three possible instances of it in the Old Testament: (1) the adoption of Moses by Pharaoh's daughter (Ex. ii. 10), which does not seem to have made the blood-bond to his own people less binding; (2) the adoption of Genubath by the Egyptian queen (I Kings xi. 20), which seems to have been a survival of kinship through the mother; and (3) the adoption of Esther by Mordecai (Esther ii. 7), which was done under foreign influence. Adoption in the modern sense of the word played no important part in Israel's system of relationship (see ADOPTION).

Closely related to adoption was the system of the levirate, whereby when a man died without issue his brother or nearest kinsman was required to marry the widow, and the first son born of such levirate marriage was counted as the son of the dead brother (Gen. xxxviii.; Deut. xxv. 5-10; Ruth *passim*; Matt. xxii. 25 *et seq.*). A similar custom prevailed among the Arabs (compare W. R. Smith, "Kinship," etc., p. 87) and among the Abyssinians (compare Letourneau, "Evolution of Marriage," p. 265), as well as among many non-

**Levirate.** Semitic peoples (compare Starcke, "Primitive Family," pp. 157, 158; "International Journal of Ethics," iii. 463; and Westermarck, "History of Human Marriage," pp. 510-514). (For the origin and meaning of the custom see LEVIRATE.) It is enough to note here that it introduced a system of blood-relationship in part artificial.

In Lev. xviii., where the degrees of kinship in which marriage is prohibited are enumerated (compare also Lev. xx.), the consort of a near kinsman or kinswoman is counted as within the prohibited degrees, thus recognizing a certain artificial kinship. Some writers hold that Lev. xviii. 16 and xx. 21, by prohibiting marriage with a deceased brother's wife, abolished the levirate (so Nowack, "Hebräische Archäologie," i. 346; and Benzinger, "Hebräische Archäologie," p. 346); and a confirmation of this is found in Num. xxvii. 1 *et seq.*, which provides for the succession of daughters in case a man dies without male issue. Others hold that Leviticus gives the general prohibition, while Deut. xxv. 5-10 contains the one exception (so Driver, "Deuteronomy,"

p. 285). At all events, the levirate seems to have survived till the first century of the common era.

In ancient Semitic society, blood-relationship rested not only upon the basis of common blood, but upon the fact that kinsmen constantly ate together and renewed the physical bond (compare W. R. Smith, "Religion of the Semites," 2d ed., pp. 269 *et seq.*). Covenants of brotherhood were made between those who were really not related to one another, by opening the veins of the covenanters and tasting each other's blood, as well as by eating together (compare Trumbull, "Blood Covenant," and W. R. Smith, *op. cit.*, pp. 315, 479). Such artificial brotherhoods seem to have been recognized in Israel (compare Amos i. 9).

G. A. B.

**BLOOMFIELD, MAURICE:** Professor of Sanskrit and comparative philology in Johns Hopkins University, Baltimore, Md.; born at Bielitz, Austrian Silesia, February 23, 1855; emigrated to America in 1867. He studied at Chicago and Furman, (S. C.) universities, and at Yale, Berlin, and Leipsic, and received the degree of doctor of philosophy from Johns Hopkins in 1879, while Princeton conferred on him the honorary degree of doctor of laws in 1896.

Bloomfield is one of the most prominent Sanskrit scholars in America, and is recognized as the chief living authority on the Atharva Vêda. Besides Sanskrit, Bloomfield has made contributions to comparative grammar, Greek, Latin, and Balto-Slavic, and has treated various problems of the science of religion, especially in relation to India and its literature. He is a member of the American and German Oriental societies, American Philological Association, Royal Bohemian Society of Prague, and other learned bodies.

Among Bloomfield's chief works are: an edition of the "Kauçika-Sutra," New Haven, 1890; a volume of selected hymns from the Atharva Vêda, with extracts from the ritual and commentary, forming vol. xlii. of Max Müller's "Sacred Books of the East," Oxford, 1897; and "Atharva Vêda," Strasburg, 1899, forming a portion of the "Grundriss der Indoarischen Philologie" of Bühler and Kielhorn. His latest contribution, in which he has been assisted by Richard Garbe of Tübingen, is a magnificent photographic edition of the Paippalada recension of the Atharva Vêda, 3 vols., Baltimore, 1901.

L. H. G.

**BLOOMFIELD-ZEISLER, FANNY:** American pianist; sister of Maurice Bloomfield; born at Bielitz, Austrian Silesia, July 16, 1866. In 1868 her parents settled in Chicago, Ill., and there she received her first instruction in piano from Bernhard Ziehn and Carl Wolfsohn. At the age of

ten she played at a public concert in Chicago, and two years later went to Vienna to study with Leschetizky. At the expiration of five years she returned to the United States, where, from 1883 to 1893, she repeatedly gave recitals, playing with all the leading orchestras throughout the country.

In 1893 Bloomfield-Zeiser made a tour through Europe; and such was her success at Berlin, Leipsic, Frankfort, Vienna, and elsewhere, that she prolonged her stay abroad until 1895. During the season 1895-96 she gave upward of fifty concerts in America, and in 1897 made a tour of the Pacific states. In 1898 she again went abroad, and gave a series of concerts in Great Britain and France. She now (1902) resides at Chicago.

A. M. F.

**BLOWITZ, HENRI GEORGES STEPHAN ADOLPHE OPPER DE:** Special correspondent

at Paris of the London "Times"; born at Blowitz, Bohemia, Dec. 28, 1825. At the age of sixteen he left his native country for France, where he was appointed professor of German at the Lycenm of Tours. Upon leaving that institution he visited Limoges, Poitiers, and Marseilles. He then took a course at the university until 1860, and on May 6 of that year received permission to assume the present form of his name. At this time he occupied himself with the invention of a machine for wool-carding by steam, but soon devoted himself to the study of foreign politics, contributing to several periodicals, such as the "Gazette du Midi" and "La Décentralisation" of Lyons. In this capacity of journalist he revealed the history of Ismail Pasha's special train, which caused the defeat of De Lesseps in the election of 1869; he was not prosecuted, however, owing to the efforts of M. Thiers in his behalf.

At the close of the Franco-Prussian war Blowitz rendered valuable assistance to General Espirent de la Villeboisnet in facilitating the suppression of the Commune at Marseilles, by establishing telegraphic communication with M. Thiers at Versailles by means of a private wire when all other means of communication had been destroyed by the insurgents. In recognition of this achievement Blowitz, in June, 1871, received the medal of the Legion of Honor. In the following month he became correspondent of the London "Times," and in 1874 was appointed special Paris correspondent of that paper, in which capacity he, on May 9, 1874, secured permission to communicate with the London office daily from 9 A.M. to 3 P.M. by special wire.

In 1875 he revealed certain plans of the German

government which were said to aim at a second invasion of France; and he secured the full text of the Treaty of Berlin for the London "Times" before the signatures of the plenipotentiaries had been affixed to the document.

It is, however, as an interviewer that Blowitz is best known, and among the numerous celebrities interviewed by him may be mentioned: Bismarck, the Sultan of Turkey, Abd al-Hamid, Alfonso XII., Charles, King of Rumania, Pope Leo XIII., Thiers, Gambetta, Prince Lobanoff, Comte de Chambord, Marquis Tseng, Cardinal Jacobini and the French statesmen Duclerc and Jules Ferry. Blowitz is a doctor of philosophy and officier de l'Académie, and on July 30, 1878, he was elevated to the rank of officer of the Legion of Honor. He has been a contributor to the "Contemporary Review," "Harper's Magazine," and "Paris Vivant," and he is the author of the following works: "Feuilles Volantes," 1858; the comedy, "Midi à Quatorze Heures"; "L'Allemagne et la Provence," 1878; "Le Mariage Royal d'Espagne," 1878; "Une Course à Constantinople," 1884. Blowitz, however, is more especially renowned for his journalistic activity, and he is said to have contributed more than 4,000 columns to the London "Times."

**BIBLIOGRAPHY:** *Men and Women of the Time*, 1899; *Who's Who*, 1901; *Harper's Magazine*, 1891; *Contemporary Review*, 1893.

J. So.

**BLÜCHER, EPHRAIM ISRAEL:** Austrian rabbi and author; born Oct. 2, 1813, at Glocksdorf, Moravia; died at Budapest April 6, 1882. For some years he was tutor in Hebrew at the University of Lemberg; then officiated as rabbi at Osviecin, Galicia, and Kosten, Moravia; afterward he went to Vienna, where he founded a real-gymnasium, which had but a brief existence. Later he lived for a time at Neuhausel, Hungary, and finally at Budapest.

Blücher is the author of a Hebrew grammar, "Marphe Lashou Arami" (Healing of the Aramaic Tongue), treating of the Biblical, Targumic, and Talmudic Aramaic in eighteen sections; preceded by "Maggid me-Reshit," a Hebrew translation of a portion of Julius Fürst's "Lehrgebäude der Aramäischen Sprache" (Vienna, 1839). He also issued "The Book of Ruth," with German translation and Hebrew commentary, Lemberg, 1843; and "Die Synagogenfrage für Deutsche Israeliten," Vienna, 1860. In the last years of his life, driven by stress of circumstances, he issued several periodicals under different titles; but in each case only a few numbers appeared.

**BIBLIOGRAPHY:** *Litteraturblatt des Orients*, 1841, No. 1; Steinschneider, *Cat. Bodl.*, col. 801; Lippe, *Bibliographisches Lexicon*, 1, 46; Zeitlin, *Bibliotheca Hebraica*, p. 34; Fuenn, *Keneset Yisrael*, p. 151.

c.

M. K.

**BLUM, ABRAHAM:** French major; born in 1823; died at Boulogne, France, in 1894. He distinguished himself in the Crimean war in 1854, having been wounded in the shoulder, and received from the sultan the Order of Medidje. Upon his return to France, where he had been counted among the fallen on the battle-field, he was accorded the cross of the Legion of Honor.

In 1859 Blum left for Italy to participate in the war with Austria; was again wounded at the battle of Solferino, and then promoted on the field to the rank of captain. Having retired in 1870 as chief of battalion, he was appointed, at the outbreak of the Franco-Prussian war, adjutant-major of the National Guard of Paris. In 1875 he received an appointment in the newly organized territorial army.

**BIBLIOGRAPHY:** *Jewish Chronicle*, Feb. 9, 1894, p. 9.

s.

B. B.

**BLUM, DAVID:** German Talmudist of the middle of the sixteenth century; rabbi at Sulzburg, near Freiburg in Baden [?]. He was classed among the best Talmudic authorities in Germany. Among his pupils Joseph B. Isaac ha-Levi ASHKENAZI was proud to have had Blum for his master (see his epistle against Meïr b. Gedaliah reprinted in Zunz, "Ir ha-Zedek," note 35). Blum copied and compiled various works. The city library of Hamburg contains a copy of the "Nizzaḥon" and a collection of "sheṭarot" (documents) marked as copied by him.

It is uncertain whether Blum is identical with David b. Moses Blumes (בלומיס), a friend of Solomon b. Jehiel Luria, in whose collection of responsa (No. 37, ed. Fürth, p. 24a) is included a responsum of Blumes. If he is identical, he was at one time in Palestine, as Luria's friend wrote from that country. Blum is probably identical with David of Sulzburg, whom Joseph b. Gershon ha-Kohen of Cracow in his responsa (No. 31) calls "meḥuttan" (relative by marriage).

L. G.

**BLUM, ERNEST:** French dramatist; born in Paris Aug. 15, 1836. The son of an actor, he began at an early age to work for the theater. At eighteen he produced his first piece, for the Variétés, entitled "Femme Qui Mord." His subsequent works for various theaters included the following: for the Délassements Comiques: "L'Escarcelle d'Or" (in collaboration with Al. Flan), "Suivez le Monde," "Les Délassements en Vacances" (1860), "L'Almanach Comique" (1860), "A Vos Souhais" (1860), "Paris Journal," "Le Plat du Jour," "La Tour de Nesle pour Rire" (1861), "En Zigzag" (1861), "Les Jolies Farceurs" (1862), "Les Noces du Diable" (1863), etc.; for the Gaité: "La Petite Pologne" (with Lambert Thiboust, 1861); for the Variétés: "Crockbête et Ses Lions" (with Clairville, 1863), "Montjoie Fait Peur" (with Girardin, 1863), "La Revue au Cinquième Etage" (with Girardin and Clairville, 1863); for the Ambigu: "Rocamboles" (with Anicet Bourgeois, and Ponson du Terrail, 1864), "Rose Michel" (1875), "L'Espion du Roi" (1876); for the Châtelet: "La Lanterne Magique" (with Clairville and Monnier, 1865), "Cendrillon" (with the same, 1866), "Le Diable Boiteux" (with Clairville and Flan, 1866), "Les Voyages de Gulliver" (with Clairville and Monnier, 1867), "Le Vengeur" (with F. Brisebarre, 1868); for the Renaissance: "La Jolie Parfumeuse" (with H. Crémieux, 1874). He also wrote "Une Avant-Scène" (1876),

with Toché, "La Revue des Variétés" (1879), "Belle Lucrette" (1880), "La Noce d'Ambroise" (1881), "Le Château de Tire-Larigot" (1884), "Le Petit Chaperon Rouge" (1885), "Mademoiselle Gavroche" (1885), "Le Parfum" (1888), "Les Femmes Nerveuses" (1888), "Le Cadenas" (1889), "Paris Fin de Siècle" (1890), "Madam Mongodin" (with Toché), at the Vaudeville (1890); "Madame l'Amiral" (1892), "Monsieur Coullisset" (1892), "La Maison Tamponin" (1893), "La Riense" (1894), "Le Carnet du Diable" (1895), "Le Carillon" (1897).

In book form he has published "Entre Bicêtre et Charenton" (1866), "Journal d'un Vaudevilliste" (1891,) and "Les Mémoires d'un Vieux Beau" (1896). He is also the author of a "Biographie Complète d'Henri Rochefort" (Brussels, 1868.)

Blum was for several years on the editorial staff of the "Charivari," and he has been associated with "Le Rappel" since its establishment in 1869.

J. W.

**BLUM, ISAAC AUGUST:** French mathematician; born at Paris in 1831; died there Jan. 5, 1877. He entered in 1831 the Ecole Polytechnique and was graduated lieutenant of marine, but resigned in 1833 and devoted himself to teaching. Involved in the events of 1848, he was connected editorially with the "Journal des Travailleurs," and was appointed vice-president of the commission of Luxembourg. Blum was arrested for having taken part in the publication of an injurious libel addressed to the president of the Assemblée Constituante, but was soon released. He then took up his scientific occupation.

Blum is the author of: (1) "Résumé d'Algèbre Élémentaire"; (2) "Résumé d'Arithmétique," Paris, 1843, both of which are comprised in the "Collection des Tableaux Polytechniques"; (3) "Cours Complet de Mathématiques," in two volumes, Paris, 1843-45. In 1844 he founded a scientific review, "Bulletin Polytechnique," which, however, he soon discontinued; and in 1855 a daily paper treating of mathematics, "La Science," which is still published as a weekly.

I. Bn.

**BLUM, JULIUS** (also known as **Blum Pasha**): Austro-Egyptian financier; born at Budapest, Hungary, in 1843. In 1869 he became director of the Austro-Egyptian bank at Alexandria; in 1877 he was appointed state secretary in the Egyptian Ministry of Finance, by the khedive; and two years later, pasha and minister of finance. He retained this position until 1890, when he accepted the appointment of director of the Austrian Credit-Anstalt at Vienna. Blum has received many decorations; he is K.C.B., C.M.G., commander of the French Legion of Honor, grand officer of the Italian Order of the Crown, knight of the Rother Adler Orden, etc.

M. K.

**BLUMENBERG, LEOPOLD:** American soldier; born in the province of Brandenburg, Prussia, Sept. 28, 1827; died at Baltimore Aug. 12, 1876. He was the son of Abraham and Sophia Blumenberg, and the twenty-first of a family of twenty-two children. Soon after his birth Blumenberg's

parents moved to Frankfort-on-the-Oder, and at an early age he was graduated from the gymnasium of that city. He served in the Prussian army in the Danish war of 1848, enlisting as a private and being promoted to the rank of first lieutenant. He was decorated for his services, but the anti-Semitism prevalent deprived him of his medal; and, resenting such treatment, he left for America in 1854, settling in Baltimore, where he was engaged in mercantile pursuits until 1861.

When Fort Sumter was attacked Blumenberg assisted in organizing the fifth Maryland infantry regiment, of which he was commissioned major. His efforts for the Union cause won for him the hatred of the Secessionists, forcing him to be guarded constantly to prevent their attacking and hanging him. He first served near Hampton Roads, was later attached to Mansfield's corps in the peninsular campaign, and commanded his regiment as colonel at Antietam, where he was severely wounded in the thigh by a sharpshooter. This ultimately caused his death. He returned home, and was confined to his bed for several months.

President Lincoln appointed Blumenberg provost marshal of the third Maryland district, with headquarters at Baltimore. He held this office from 1863 to 1865, making himself very unpopular by a strict enforcement of the laws. President Johnson appointed him to a position in the revenue department, and commissioned him brigadier-general United States volunteers, by brevet. For a long time resident in Baltimore, he was extremely popular with the German and the Hebrew element of that city. He held the office of president of the National Schuetzen-Verein of America, and was an active member of Har Sinai congregation and of the Hebrew orphan asylum.

A. M. F.

**BLUMENBERG, MARC A.:** American musician and editor; born at Baltimore, Md., May 21, 1861; educated in the public schools of that city, and later at the College of Loyola. After a thorough course in the various branches of music, he became musical critic of the Baltimore "American," and subsequently was associated with the Baltimore "Sun" in a similar capacity. In 1879 he removed to New York, where, in the following year, he established the "Musical Courier," one of the most influential musical weekly papers in existence, with branch offices in Germany, France, England, and Italy. Blumenberg is president of the Blumenberg Press Association, a member of the Social Science Association of New York, and of the Society for Psychological Research, London.

A.

J. So.

**BLUMENFELD, ARON WOLFF:** German composer; born at Kurnik, Posen, Feb. 29, 1828. In 1846 he went to Berlin, where he studied with Rungenhagen, and afterward established himself as a teacher and composer. His more important works are an opera entitled "Künstlerleben," and a can-

tata first performed in 1851. Among his pianoforte compositions — mostly *morceaux de salon* — are the following: "La Fée Dansante," op. 9; "L'Espérance," waltz, op. 20; "Les Adieux de Berlin," op. 22; "Dentscher Triumphmarsch"; "Hochzeitsmarsch," op. 32; "Aideutschlands Klage," funeral march, op. 40. An interesting compilation is the "Blumenlese," concert-music for 6 to 20 instruments arranged in a series of 96 separate books, many of them consisting of several numbers, and containing arrangements of German, Russian, Norwegian, American, English, French, and other songs, and transcriptions of dances, marches, operatic pieces, and various other selections from the works of Schumann, Lindblad, Seifert, Blomquist, and many other composers.

J. So.

**BLUMENFELD, BERISH:** Galician Hebraist; flourished in the first half of the nineteenth century. He was one of the wealthy Hebrew scholars of that part of Poland who contributed much to the spread of knowledge among their brethren, and whose work in the field of Neo-Hebraic literature was a true labor of love. Blumenfeld is the author of a German translation of the Book of Job, which he published with a Hebrew commentary (Vienna, 1826). His views on the authorship and date of Job were the subject of an interesting correspondence with S. D. Luzzatto, who insisted that Job was one of the oldest books of the canon. Blumenfeld also corresponded with Isaac Beer Levinsohn and assisted in the spread of the latter's works. He was an intimate friend of Simson Bloch ha-Levi, who dedicated to him his Hebrew translation of Manasseh b. Israel's "Vindiciae Judæorum." A poem, "Matar ha-Adam" (Superiority of Man), by Blumenfeld, is published in "Bikkure ha-Ittim," iv. 150-158.

**BIBLIOGRAPHY:** *Kerem Hemed*, i. 53-58; *ib.*, ii. 123-125; *Sifer ha-Zikronot*, pp. 71, 72; Fürst, *Bibl. Jud.* i. 123.

P. Wl.

**BLUMENFELD, FEITEL (FADEI):** Russian rabbi; born in 1826; died at Kherson Dec. 4, 1896. He graduated from the rabbinical college at Jitomir, and for about forty years officiated as rabbi in Kherson and in the Jewish agricultural colonies of Kherson and Bessarabia, in whose development he always took an active part. He introduced many useful reforms in the Jewish community of Kherson, and, being familiar with the Jewish question in Russia, was repeatedly summoned by the government to the conferences of Jewish rabbis at St. Petersburg. He contributed largely to the Jewish-Russian periodicals "Russki Yevrei" and "Razsvyet," especially on the Russian-Jewish agricultural colonies.

**BIBLIOGRAPHY:** *Luah Ahtasaf*, 1897.

II. R.

**BLUMENFELD, HERMANN FADEYE-VICH:** Russian lawyer, son of Feitel (Fadei); born in Kherson Sept. 2, 1861; received his education at the high school of his birthplace. He was graduated in 1883 from the New-Russian University of Odessa, which awarded him a gold medal and a prize for his treatise on the various kinds of landed

property in Old Russia, entitled "O Formakh Zemlevladyeniya v Drevnei Rossii," Odessa, 1883. Blumenfeld has published an article on Crimean-Tatar landed property, entitled "Krimsko-Tatarskoe Zemlevladyenie," Odessa, 1888. He has been an extensive contributor to the Russian-Jewish periodicals "Voskhod," "Yevreiskoe Obozryenie," and others. His articles deal especially with the economic, industrial, and commercial activity of the Jews in South Russia.

**BIBLIOGRAPHY:** Vengerov, *Kritiko-Biograficheski Slovar*, iii., St. Petersburg, 1892.

II. R.

**BLUMENFELD, IGNATZ (ISAAC):** Austrian publisher and merchant; born March 25, 1812, at Brody, Galicia; died Oct. 2, 1890, at Geneva, Switzerland. He was one of the wealthy Galicians who took delight in encouraging and spreading the new Hebrew literature. He visited Switzerland and Italy on a pleasure trip in the summer of 1834, and in the latter country met S. D. Luzzatto and J. S. Reggio, with both of whom he corresponded on literary subjects. He lived for several years in Odessa, between 1840 and 1850, and afterward returned to Vienna, where he remained until 1885, from which year until his death he lived in Switzerland.

Blumenfeld deserved well of modern Hebrew literature by his publication of four volumes of the "Ozar Nehmad," Vienna, 1856-63, a collection of literary letters on various subjects relating to the science of Judaism, which were thus made accessible to the average Hebrew scholar. These publications are to some extent a continuation of Goldenberg's "Kerem Hemed" and of the "Bikkure ha-Ittim"; but they are more scientific and historical, giving less space to translations and to the feeble attempts at belles-lettres which filled so large a part of the former collections. Blumenfeld himself contributed very little to the "Ozar Nehmad," but Rapoport, Luzzatto, Geiger, and other learned contributors recognized the great service which he was rendering Jewish science by giving currency to works which, but for his generosity, would have remained unpublished.

**BIBLIOGRAPHY:** *Ozar Nehmad*, i. 181; ii., Preface and p. 17; Letteris, *Mikhteh Ben Kedem*, p. 104, Vienna, 1866.

**BLUMENFELD, J. C.:** Polish litterateur and revolutionist; born about 1810; died before 1840. Blumenfeld was one of the leaders of a band of young Poles concerned in the Polish revolution of 1831. The rising having proved a failure, Blumenfeld fled to London, where he produced a fantastic work, "Eccc Homo im Process mit dem König und dem Priester, oder Die Selbsterlösung der Menschen, ein Evangelium vom Jüngsten Gerichte," 1835. An English edition, under the title "The New Eccc Homo at Issue with King and Priest," appeared in London in 1839. The work contains dialogues in prose alternating with verses, the main subject of which is the scheme of kings and priests to enslave humanity, including a compact between Rome and the Church to degrade Israel. The book shows some power, but is wild and wandering.

**BIBLIOGRAPHY:** Grätz, *Gesch. der Juden*, xl. 468-470; *Cat. British Museum*, s.v.

J.

**BLUMENFELDT, SIMON** (called also **Simon Sofer**): Russian calligrapher; born in Mitau, Courland, 1770; died at the same place 1826. He possessed the gift of writing in characters so small that they could be read only by the aid of a microscope. The Lord's Prayer was thus written by him nine times on a piece of paper the size of a square inch. He could write readable letters and words even on the very edge of ordinary vellum paper. He was also a skilful draftsman, and he used to embellish his excellent pencil sketches with all kind of verses and sentences. He traveled extensively through Europe, and received rewards from many sovereigns. Blumenfeldt presented numerous script portraits to Emperor Alexander I. of Russia, and a Pentateuch in Hebrew, of the size of a finger, to Pope Pius VII. He left in manuscript: "Diaries of Travel"; "Pene Shim'on," a commentary on the Bible, published by his son Moses in his work, "Magid Mesharim," Hanover, 1851; "Tenaim u-Ketubah le-Shew'ot we-Purim," a humorous poem.

**BLUMENSTOCK VON HALBAU, LEO**: Austrian physician; born at Cracow March 11, 1838; died there Feb. 28, 1897. Educated at the gymnasium and university of his native town and at the university at Vienna, he was graduated as doctor of medicine in 1862. He engaged in practise as a physician in Cracow, and became privat-docent in 1864 and in 1869 assistant professor in the faculty of law in the university of that city. In 1881 he was appointed to the chair of forensic medicine in the same university by the medical faculty. He held also the position of "Landesgerichtsarzt" (medical expert at the judicial court), and was raised to the nobility with the name "von Halbau" in 1891. Blumenstock is the author of: "Zur Lehre von der Vergiftung Durch Cloakengas," in "Vierteljahresschrift für Gerichtliche Medizin," lviii., 2d part; "Die Wreden-Wendtsche Ohrenprobe und deren Bedeutung in Foro," in "Wiener Medizinische Wochenschrift," 1875; "Tod Durch Dynamit," in Friedreich's "Blätter für Gerichtliche Medizin," 1876, 1877; "Ueber Aphasie," *ib.* 1878. He has also contributed many essays on forensic medicine to the Polish journals of Cracow, Lemberg, and Warsaw. From 1877 until his death he was editor of the Polish medical weekly "Przegląd Lekarski."

**BLUMENTHAL, HEINRICH**: German manufacturer and philanthropist; born at Darmstadt, Hesse, March 12, 1824; died there March 27, 1901. Even as a boy his love for technical work was noticeable, in consequence of which his father sent him to the technical high school of his native town. On being graduated thence he went to Vienna, Nuremberg, and Paris, working in those cities as an ordinary mechanic, and thus acquiring extensive knowledge.

Returning to Darmstadt, Blumenthal started a factory for the manufacture of agricultural implements, which became one of the largest factories of steam threshing-machines in southern Germany. He took great interest in the improvement of the condition of the farmers, and urged the passage of laws for their benefit. He also organized and took a leading part in agricultural societies. During the Franco-Prussian war he was very active in sending relief to the Hessian troops at the front, and supported from his own means a hospital on his estate in Darmstadt.

Blumenthal did much for the beautifying of his native city and toward ameliorating the condition of the laboring classes. In acknowledgment of his services in this respect, one of the leading thoroughfares in Darmstadt was named after him.

It was his influence with the Grand Duke of Hesse, during the anti-Semitic movement in Germany, which caused the government of Hesse to take a decided stand against the agitators and to protect the Jews. For a quarter of a century Blumenthal was a member of the city council, and for more than two decades the president of the Jewish community of Darmstadt.

Blumenthal was an active philanthropist, supporting many benevolent societies of different creeds, and assisting the worthy poor. In appreciation of his services to city and state he received the title of "Kommerzienrath," and was decorated with the Hessian Ludwig cross, the Prussian Order of the Crown, the Hessian cross for merit, and the medal for non-combatants.

s.

F. T. H.

**BLUMENTHAL, JOSEPH**: American communal worker; born in Munich, Germany, Dec. 1, 1834; died in New York March 2, 1901. In 1839 he went to the United States with his parents, and in 1854 entered business at Mariposa, Cal., remaining there for five years. He then moved to New York, where he remained for the rest of his life.

Soon after his return from California Blumenthal interested himself in military matters, and was for a time a staff officer of the third regiment of cavalry of the National Guard of the State of New York.

Blumenthal soon became deeply interested in political, social, and Jewish communal affairs. He, together with W. M. Everts and Joseph H. Choate, was a member of the famous Committee of Seventy which was instrumental in the overthrow of the notorious Tweed ring. In 1873-74 and 1888-91 he served as member of the New York Assembly, in which he was appointed to important committees, and he was for several years head of the Bureau of Inebriatees. From 1893 to 1895 he was commissioner of taxes and assessments.

In Jewish communal affairs he displayed the greatest interest. As member, trustee, and president of the Congregation Shearith Israel he labored indefatigably. He was also affiliated with various orders, such as the B'nai B'rith and the Masonic fraternity, attaining to honors in their ranks. But the achievement to which he devoted the last fifteen years of his life was the establishment and maintenance, in conjunction with the Rev. Dr. Sabato Morais and other workers, of the Jewish Theological

Seminary, of which institution he was president from its foundation in 1886 until his death.

A.

B. D.

**BLUMENTHAL, MARK:** American physician; born July 11, 1831, at Altenstadt-on-the-Iller, Bavaria.

He came to America with his parents in Aug., 1839, attended the academy at Chambersburg, Pa., the public and high schools at Philadelphia, Pa., and graduated as doctor of medicine from the College of Physicians and Surgeons at Columbia University, New York, in 1852. He was assistant physician at Blackwell's Island Hospital during 1851-52; deputy coroner of New York city in 1853; and visited Europe in 1854, attending hospitals in London, Paris, and Munich. On his return he was appointed resident and attending physician to Mount Sinai Hospital (then called Jews' Hospital), New York, from 1855 to 1859, organizing its medical administration and formulating its records and monthly reports as in use to this day. From 1862 to 1894 he was president of and physician to the Institution for the Improved Instruction of Deaf Mutes, founded and supported by Jews for the benefit of Jewish and other children.

The special features of the system of teaching adopted by Blumenthal, and which was then almost unknown in this country, were: (1) reading from the lips of the speaker; and (2) the use of articulate speech, instead of the finger and sign language (daetylogy) then and still generally employed in most of the state institutions.

During the Civil war Blumenthal was surgeon-major in the Third Regiment, National Guard. Besides many professional offices, such as president of the Medical Union, of the Northwestern Medical and Surgical Society, and of the Medical Board of the United Hebrew Charities, Blumenthal was one of the founders of the Young Men's Hebrew Association, founder and president of the Sabbath Observance Society of New York, and president of the Jewish Chautauqua (1901-02).

J.

**BLUMENTHAL, NISSEN:** Russian *hazan*; born in Jassy, Rumania, 1805; died in Odessa Feb. 9, 1902. Though educated for the rabbinate, his excellent voice and musical ability fitted him for a *hazan*. He emigrated to Russia, became cantor of Berdychev and also of Yekaterinoslav, and in 1841 was made chief cantor of the Brody congregation of Odessa, which position he held for fifty-five years, when old age forced him to retire. His son Leonhard, a singer in the Kharkov operahouse, died before him. Blumenthal was confined to his home by paralysis for the last six years of his life. His fortune was left to the choir of the temple which he made famous. He was the model "chor<sup>hazan</sup>" of Russia, and did much to introduce systematic singing and the use of musical notes in Russian synagogues. P. MINKOVSKY declares his compositions more characteristically Jewish than those of the great cantors of Western countries.

**BIBLIOGRAPHY:** *Allg. Zeit. des Jud.* 1891, No. 24, and 1902, No. 14; P. Minkovsky, in *Ha-Shiloah*, viii., Nos. 4 and 5; *Ha-Melitz*, xl., No. 39; *Ha-Zehrah*, xxix., No. 50; *Der Jud.* Supplement, Nos. 13 and 14, Cracow, 1902.

**BLUMENTHAL, OSKAR:** German author and playwright; born at Berlin March 13, 1852. He was educated at the gymnasium and the university of his native town, and at the university at Leipsie, where, in 1872, he received the degree of doctor of philosophy. After having been editor of the "Deutsche Dichterhalle" in Leipsie, he founded in 1873 the "Neuen Monatshefte für Dichtkunst und Kritik." In 1875 Blumenthal moved to Berlin, where he became theatrical critic of the "Berliner Tageblatt," holding this position until 1887, when he opened the Lessing Theater, of which he was director till 1898. From 1894 to 1895 he was also director of the Berliner Theater. Since 1898 he has been engaged exclusively in literary work.

Oskar Blumenthal.

Blumenthal is well-known as a critic and playwright. His critiques in the feuilletons of the newspapers sparkle with humor, at the same time doing justice to authors and actors. His plays have had merited success, and many of them have been well received at the leading German theaters. As a theatrical manager he was very successful.

Blumenthal is the author of many plays and novels, among which may be mentioned: "Allerhand Ungezogenheiten," Leipsie, 1874, 5th ed., 1877; "Für Alle Wagen- und Menschenklassen," *ib.* 1875; "Bummelbriefe," Danzig, 1880; and the comedies "Der Probepfeil," 1882; "Die Grosse Glocke," 1887; "Der Zaungast," 1889; "Grossstadtluft," 1891; "Hans Hucklebein," 1897; "Im Weissen Rössl," 1898, the last three together with G. Kadelburg; "Merkzettel," 1898; and "Verbotene Stücke," 1900. He also edited "Grabbe's Werke und Handschriftlicher Nachlass," *ib.* 1878.

**BIBLIOGRAPHY:** Meyers, *Konversations-Lexikon*, s.v.; Brockhaus, *Konversations-Lexikon*, s.v.

**B'NAI B'RITH, or SONS OF THE COVENANT:** The largest and oldest Jewish fraternal organization. It has (1902) a membership of about 30,000, divided into more than 330 lodges and 10 grand lodges, distributed over the United States, Germany, Rumania, Austria-Hungary, Egypt, and Palestine. It was founded at New York in 1843 by a number of German Jews, headed by Henry Jones, for the purpose of instilling the principles of morality among the followers of the Mosaic faith—uniting them on a platform upon which all could stand regardless of dogma and ceremonial custom—and of inculcating charity, benevolence, and brotherly love as the highest virtues. Political and religious discussions were to be barred forever in order that harmony and peace might be preserved in the deliberations of the Order.

A constitution was adopted for the administration of the affairs of the Order; and in 1851, a sufficient number of lodges having been organized, the first grand lodge was established in the city of New York, and in the same year District Grand Lodge No. 2 was founded in the city of Cincinnati. The Order spread rapidly. Lodges were formed in nearly all of the Eastern and Western states; so that in 1856 District Grand Lodge No. 3 was instituted, with its seat in Philadelphia, Pa. The supreme authority was placed in a central body, which met annually and was composed of one representative from each lodge. At the meeting of the supreme body in 1857 a membership of 2,889, with an accumulated capital of \$78,000, was reported. At the same session the constitution was remodeled, giving

B'nai B'rith Building, New York.  
(From a photograph.)

it a more democratic and representative character. A new ritual, the work of Dr. David Einhorn, was also introduced in keeping with the progressive spirit of the age.

A new era of development began in 1868, when, at a convention held in the city of New York, composed of representatives from each lodge, the present constitution was adopted. Meanwhile, three new grand lodges had been instituted: No. 4 in San Francisco, Cal.; No. 5 in Baltimore, Md.; and No. 6 in Chicago, Ill. The Order at that time numbered more than 20,000 members. Under the new constitution the supreme authority was placed in a president, to hold office for five years, and in an executive committee and a court of appeals, each of which was composed of one representative from each district, elected for five years. The first president was Julius Bien of New York, who had been the mastermind of the new constitution. He held the office until 1900, when he declined reelection on account

of his advanced years; and Leo N. Levi of New York was unanimously chosen as his successor.

In 1873 another new grand lodge, No. 7, was added, which held jurisdiction over the Southern states. A new sphere opened for the Order in 1882, when Moritz Ellinger, as the deputy of the executive committee, instituted the first lodge in Berlin, Germany.

Meanwhile a number of institutions had arisen in the United States, founded and supported by the Order, such as the Orphan Asylum in Cleveland, housing nearly 1,000 inmates, supported by Districts 2, 6, and 7. Its erection was due to Benjamin F. PEIXOTTO. Another institution is the Home for the Aged and Infirm at Yonkers, N. Y. The Atlanta Hebrew Orphan Asylum was established by District No. 5, through the influence of Simon WOLF of Washington, D. C. The Jewish Widows' and Orphans' Home of New Orleans and the Touro Infirmary at the same place are supported by District No. 7. Finally, the Denver National Jewish Hospital for Consumptives was established by District No. 2. The Order also established a public library, known as the Maimonides Library, in New York city; the B'nai B'rith Manual Training School at Philadelphia, and other educational institutions throughout the country. The Order presented to the United States a statue of Liberty, chiseled by Moses Ezekiel, a native of Cincinnati. At the suggestion of the Order, Benjamin F. Peixotto was commissioned to represent the United States as consul in Rumania, in order to influence the Rumanian government on the question of affording protection to its Jewish subjects. As there was no

Seal of the B'nai B'rith Order.

provision in the American budget for the maintenance of a consulate in Rumania, the Order provided the necessary funds.

When, in 1885, a sufficient number of lodges had been founded to warrant the establishment of a grand lodge for Germany, Julius Bien visited that country to inaugurate it. Meanwhile

**Extension to Europe.** the growth of the Order in Rumania and Austria-Hungary had led to the institution of grand lodges with seats at Bucharest and Prague, and to the establishment of many useful benevolent institutions.

In America the Order established the *MEXORAN*, a monthly magazine, edited first by Benjamin F. Peixotto, afterward by Moritz Ellinger, and for a time

by F. de Sola Mendes. In Vienna the Order publishes a quarterly review; in Berlin, a monthly report.

With the spread of the Order its usefulness as an international medium for the relief of the persecuted in various parts of the world has been established, and the principle of self-help has been inculcated in communities which had always looked to others for protection and aid. Of late the Order has established working relations with the great educational and relief associations of Europe, such as the Alliance Israélite Universelle of Paris, the Jewish Colonization Association of London, and the Israelitische Allianz of Vienna. At the Quinquennial Convention of the Order, held in Chicago (April 29 to May 3, 1900), a commission was appointed to invite the cooperation of all European and American kindred associations in instituting measures for the introduction of industries, agricultural employments, and modern education among the Jews of Galicia. The Order has also been active in finding employment for the Rumanian Jews, who through religious intolerance were compelled to leave their native country. This it does through the district lodges, which organize means whereby many individuals may, from time to time, obtain a livelihood by manual labor. Numbers of Rumanian Jews, on arriving in New York, are distributed among the district lodges.

During its existence the Order has expended millions of dollars in aiding the distressed among its members by means of donations to the sick, by loans, and by endowments to widows and orphans.

Immediately after the great storm at Galveston, Texas, Sept. 8, 1900, a fund of over \$27,000 was contributed by the various lodges and members, and through the president, Leo N. Levi, it was employed to give a new start in life to Jewish sufferers by the storm. The fund was raised by telegrams in a few days, and the relief was almost immediate.

Following is a list of the district grand lodges, showing the jurisdiction of each, and the number of members:

District Grand Lodges.	Jurisdiction.	Number of Members.
No. 1.....	Massachusetts, New York, Rhode Island, Connecticut, Canada..	5,140
" 2.....	Colorado, Indiana, Kansas, Kentucky, Missouri, New Mexico, Ohio.....	3,100
" 3.....	Delaware, New Jersey, Pennsylvania, West Virginia.....	1,450
" 4.....	Arizona, California, Idaho, Montana, Nevada, Oregon, Utah, Washington, British Columbia.	2,400

**BOAR, WILD** (distinguished from the swine merely by the designation as "swine of the forest," הוֹר כִּיָּעַר [Hebr., "bazir"]): In Psalm lxxx. 14 the wild boar is introduced in a metaphor and described as coming out of the wood to root up the vine. Wild hogs have always been known in Palestine.

Richard Cœur de Lion is said to have had an encounter with a boar when crusading in that country, and the animal is still found in the morasses of the Jordan, around the Sea of Galilee, around Mount Tabor, and on the River 'Aujeh, north of Joppa (compare Thomson, "The Land and the Book," p. 49). See SWINE.

**BOAS, EDUARD:** German author and traveler; born at Landsberg-on-the-Warthe Jan. 1, 1815; died there June, 1853. He was destined for a commercial career by his parents; and, for the purpose of acquiring a knowledge of international trade methods, was sent through southern Europe. Instead of turning the voyage to this account, Boas utilized the experience and knowledge gained in writing sketches, novels, and other literary productions. His first effort in this direction, "Deutsche Dichter," was published in 1837, followed three years later by "Nachträge zu Schiller's Sämmtlichen Werken." The next year he published a similar work on Goethe, and followed this in a few months by "Des Kriegscommissär Pipitz Reisen nach Italien"—a comic romance revealing considerable talent. In 1842 he wrote "Sprüche und Lieder eines Indischen Brahmanen"; and in 1844 "Pepita," a novel, and "In Skandinavien." His other works are: "Reiseblüthen aus der Oberwelt"; "Reiseblüthen aus der Sternenwelt"; and "Schiller und Goethe im Xenienkampf," 1852.

**BOAS, IMAR:** German physician and medical author; born at Exin, province of Posen, Prussia, March 28, 1858. After having completed his studies at the gymnasium, he attended the medical courses at the universities of Berlin, Halle, and Leipsic, graduating as doctor of medicine in 1880. In 1882 he established a practise in Berlin, studying especially the diseases of the digestive tract, and opening a dispensary and hospital for the diseases of the abdominal section of the alimentary canal, the first of its kind in Germany. Since then Boas has become a specialist in this branch of medicine.

Boas is the author of numerous essays and of the following works: "Diagnostik und Therapie der Magen-Krankheiten," Leipsic, 1890; "Diagnostik und Therapie der Darmkrankheiten," Leipsic, 1899. Since 1895 he has been editor of the "Archiv für Verdauungs-Krankheiten."

**BOAT.** See SHIP.

**BOAZ.**—**Biblical Data:** One of the relatives of Elimelech, husband of Naomi; a wealthy Judean, living at Bethlehem in Judah (Ruth ii. 1). He was one of the kinsmen of Ruth; as such he had the privilege of redeeming the family estate sold by Naomi after Elimelech's death. Therefore when Ruth appealed to his kinship, he redeemed the property (Ruth iii. 9, iv. 3). In consequence of this he had to marry Ruth, in order "to raise up the name of the dead" (Ruth iv. 5, 10). Their son Obed was, according to tradition, the grandfather of David (Ruth iv. 22).

J. JR.

B. E.

—**In Rabbinical Literature:** Boaz is identified by some rabbis with the judge Ibzan of Bethlehem (Judges xii. 8). It is further said that he lost all his sixty children during his lifetime because he did not invite Manoah, Samson's father, to any of the marriage festivities in his house. For, since Manoah was at that time without children, Boaz thought that he need not consider on such occasions a childless man who could not pay him back in kind (B. B. 91a). According to Josephus, "Ant." v. 9, § 1, Boaz lived at the time of Eli. Boaz was a just, pious, and learned judge, and the custom of using the Divine Name in greeting one's fellow-man (Ruth ii. 4) formulated by him and his bet din received the approval of even the heavenly bet din (Mak. 23b; Yer. Ber. ix. 14c; Ruth R. to ii. 4).

Being a pious man, Boaz on his first meeting with Ruth perceived her conscientiousness in picking up the grain, as she strictly observed the rules prescribed by the Law (compare GLEANING OF THE FIELDS). This, as well as her grace and her chaste conduct during work, induced Boaz to inquire about the stranger, although he was not in the habit of inquiring after women (Ruth R. to ii. 5; Shab. 113b). In the conversation that followed between Boaz and Ruth, the pious proselyte said that, being a Moabite, she was excluded from association with the community of God (Deut. xxiii. 4). Boaz, however, replied that the prohibition in Scripture applied only to the men of Moab, and not to the women. He furthermore told her that he had heard from the Prophets that she was destined to become the ancestress of kings and prophets; and he blessed her with the words: "May God, who rewards the pious, also reward you" (Targ. Ruth ii. 10, 11; Pesik., ed. Buber, xvi. 124a). Boaz was especially friendly toward the poor stranger during the meal, when he indicated to her by various symbolic courtesies that she would become the ancestress of the Davidic royal house, including the Messiah (Ruth R. to ii. 14; Shab. 113b). As toward Ruth, Boaz had also been kind toward his kinsmen, Naomi's sons, on hearing of their death, taking care that they had an honorable burial (Ruth R. to ii. 20).

Although Boaz was the prince of the people, he himself supervised the threshing of the grain in his barn, in order to circumvent any immorality or theft, both of which were rife in his days (Tan., Behar, ed. Buber, viii.; Ruth R. to iii. 7). Glad in his heart

that the famine was over in Israel, he sought rest after having thanked God and studied for a while in the Torah (Tan., *l.c.*; Targ. Ruth iii. 7; and Ruth R. *ib.*). Aroused out of his first sleep by Ruth, he was greatly frightened, as he thought that she was a devil; and he was convinced of the contrary only

after touching the hair of her head, since devils are bald (Tan., *l.c.*). When Boaz and Ruth. he perceived the pure and holy intentions of Ruth he not only did not

reprove her for her unusual behavior, but he blessed her, and gave her six measures of barley, indicating thereby that six pious men should spring from her, who would be gifted by God with six excellences (compare Isa. xi. 2; Sanh. 93b; Num. R. xiii. 11; Ruth R. and Targ. to Ruth iii. 15; the names of the six men differ in these passages, but David and the Messiah are always among them). Boaz fulfilled the promises he had given to Ruth, and when his kinsman (the sources differ as to the precise relationship existing between them) would not marry her because he did not know the Halakah which decreed that Moabite women were not excluded from the Israelitic community, Boaz himself married her (Ruth R. to iv. 1). Boaz was eighty and Ruth forty years old (*idem* to iii. 10), but their marriage did not remain childless, though Boaz died the day after his wedding (Midrash Zuṭṭa, ed. Buber, 55, below).

—**Critical View:** The historical value of the genealogy (Ruth iv. 18–22) is denied by Wellhausen, Cornill, and modern critics generally. They suppose it to be the product of a tendency that existed at one period in post-exilic times, of finding a foreign origin for the most renowned families. But others are of the opinion that David's flight into Moab (1 Sam. xxii. 3) is a circumstance that lends historical plausibility to the Moabitic origin of RUTH (so Kuenen, "Historisch-Critisch Onderzoek," etc., i., § 36, *g.*; Nowack, "Ruth," p. 184).

**BOAZ, ISRAEL MICHAEL.** See CRESSON, WARDER.

**BOBOVNIA.** See MINSK.

**BOBRUISK:** City in a district of the same name, in the government of Minsk, Russia; situated on the right bank of the River Berezina. It is mentioned the first time in official documents concerning Jews, issued in 1511. The inhabitants of Bobruisk, with those of other towns, petitioned King Sigismund to allow them to pay their taxes directly to the crown instead of the secretary of the treasury, Abraham YESOPOVICH. In a list of duties paid at the custom-house of Brest-Litovsk for the year 1583, a Jew named Ilya Lipsnitz is mentioned as having sent merchandise to Bobruisk.

Bobruisk was of little importance until the early part of the nineteenth century, when, under Alexander I., it began to increase rapidly in population, on account of the important fortress he had erected there. It had (1898) 19,125 Jewish inhabitants in a total population of 35,177; and the district (inclu-

ding the city has 49,858 Jews in a total of 256,095. It is a prosperous city. The commerce, consisting chiefly of dry-goods, grain, and wood, is mainly in Jewish hands.

The community is divided into Hasidim and Mitnagdim, who live harmoniously together. The present rabbi (1902) of the Hasidim is Shemariah Noah Shneerson, a descendant of the rabbis of Lyubavich. Raphael Shapiro, an excellent Talmudic scholar, is the rabbi of the Mitnagdim. Bobruisk possesses four official synagogues and many charitable and social institutions, among which the most noteworthy is a refuge for old men, which was founded by the philanthropist, Hayyim Boaz Rabbínowicz.

**BIBLIOGRAPHY:** *Semenor*, i. 273; *Regesty*, Nos. 242, 642; *Keneset ha-Gedolah*, ii. 35 et seq.

I. BR.

In the district of Bobruisk there are at least 500 persons who depend for their subsistence mainly upon the cultivation of several deciatines of the soil. Most of the dairies are in the hands of Jews (110 families), who have lost all other resources for a livelihood since the introduction of the government monopoly of the liquor trade. In the vicinity of Bobruisk there are plantations, upon which about 100 Jewish girls work in the summer. In the town are 20 small factories which employ 120 Jews. The manufacture of leather goods is considerable, many of the large workshops producing uppers for shoes for export to the neighboring towns and villages. Brick making is also well developed. There are about 3,139 Jewish artisans, 285 tailoring establishments (employing 367 hands), and 275 shoe- and boot-making establishments (employing 165 hands). There are 444 Jewish laborers, employed chiefly in carting (1902). The following charitable institutions have been established: a Jewish hospital, a cheap kitchen, an institution for the aged, a society for the aid of the sick poor at their homes, and a "Imilat-Khasodim," which lends money without interest. Besides the general schools, attended by comparatively few Jewish children, there are also schools for Jews exclusively: two private schools for girls (300 pupils), a female technical school (160 girls), a primary public school (160 boys), and the Jewish People's Technical School (60 boys).

On May 3, 1902, a fire destroyed the greatest part of the city, and thousands of Jewish families were rendered homeless ("Budushechnost," 1902, No. 17).

**BOCCACCIO, GIOVANNI, IN JEWISH LITERATURE:** Among the translations into Judæo-German of popular books and legends, such as Bevis of Hampton, the Arthur legend, and Till-

Eulenspiegel, there is one of seven stories from the "Decameron" of Boccaccio (1313-75). The translator, Joseph (of) Maarsen, published several Judæo-German works. The little volume of 36 folios appeared in Amsterdam in 1710 under the title "Schöne Artliche Geschichten," and contains, according to Steinschneider, the following tales: "Andrew of Perugia," "Beritola," "Gifford," "The Three Brothers," "Landolf," "The Daughter of the Sultan of Babylon," and "The Count of Anguerra." It may have been taken from the Dutch version of Boccaccio published in 1644. On the title-page the translator has printed a rimed account of the merits of the book, and speaks of editing parts ii. to v., in addition to part i. In the preface he says:

"The book out of which I have copied these Ma'asim was over 100 years old; and at that time the Dutch language was much harsher than it is now. The kind and gentle reader will therefore excuse me, if my language here and there is not quite proper. I have tried to make it so that any one can understand me. I might have translated it into pure German (Saubere Deutsch); but then it would have been unintelligible in Holland. I could also have translated it into Dutch (Hollandsch-Deutsch). But then the 'Hoch-Deutsche Yehudim' would not have understood it. I have, therefore, written it in neither too high nor too low German."

He says, also, that he was careful not to introduce Hebrew words, as he holds it to be a sin to mingle the holy tongue with a strange one.

**BIBLIOGRAPHY:** Steinschneider, *Cat. Bodl.* vol. 1507; *idem*, *Jewish Literature*, p. 250. On the influence of Boccaccio, see the remarks of Jost, printed in Brann's *Jahrbuch*, xl. 19, and Steinschneider, in *Monatsschrift*, xlii. 471.

G.

**BOCHART, SAMUEL:** One of the greatest scholars of the seventeenth century, and an illustrious representative of the science and theology of the French Reformed Church; born at Rouen in 1599; died in Caen, May 16, 1667. His parents were persons of note. After a thorough study of theology and the Oriental languages in France, England, and Holland, he was called as pastor to Caen in Normandy, where he died on the day that his only grandson had made a three hours' brilliant defense of certain philosophical theses at the Academy of Caen. He first attracted general admiration by engaging in a nine-days' debate with the Jesuit Véron, who was deputed by the government to travel through France with a view to the conversion of the Huguenots. The report of this debate was printed in 1630 at Saumur. Out of his scholarly preparation for sermons on Genesis came the two monumental works by which Bochart's name is still known: "Geographia Sacra seu Phaleg et Chanaan," 1646, the first part of which, "Phaleg," treats of the names contained in the Table of Nations in Gen. x., while the second part, "Chanaan," is devoted to the colonies and the language of the Phœnicians; and "Hierozoicon sive Bipartitum Opus de Animalibus Sacre Scripture," 1663, a marvelously erudite collection of everything contained in Biblical, classical, and Oriental literature on the animals mentioned in the Bible. [Much of the material of these two works is still of value.—r.]

K. H. C.

**BOCHIM:** Name of a place near Beth-el. The Septuagint reads in Judges ii. 1. "The place of weeping to Beth-el and to all Israel." It may be identical with Beth-el itself (see Moore, *Judges*, *ad loc.*).

J. JIN.

G. B. L.

**BOCHNER, HAYYIM B. BENJAMIN ZE'EB:** Cabalist, Talmudist, and grammarian; born at Cracow, Galicia, in the first quarter of the seventeenth century; died at Fürth, Bavaria, Feb. 2, 1684. He was the son of one of the wealthiest Jews of Cracow, who owned a stone mansion and two adjoining stores on Casimir place, a street otherwise uninhabited by Jews.

Bochner received both a rabbinical and a liberal education, and was a pupil of Israel Ganz—whose daughter he afterward married—and of the cabalist and grammarian Jacob Temerls. On the death of his father (1647) Bochner became heir to a portion of his father's business and other properties; but he sold his share to his three brothers and one sister, receiving in lieu a weekly allowance in order to be able to pursue his studies. He established at his own house a free rabbinical school, and enjoyed the friendship of Lipmann Heller and other renowned scholars. Having received a call to Ebenfurth, and afterward to Lackenbach, as rabbi and head of the bet din, he continued to keep up a yeshibah in both places. For reasons he himself gives in the introduction to his book, "Or Hādash" (New Light), he removed to Vienna, where he stayed until the expulsion of the Jews from that city in 1670.

Bochner, who combined a spirit of observation with his extensive Talmudical knowledge, and who while traveling had seen a great deal of the world, spent the rest of his life in writing and publishing books and in editing other valuable works. He wrote: (1) The above-mentioned "Or Hādash," a compilation of laws concerning the ritualistic benedictions, in which he embodied the "Or Yisrael" of his teacher Israel Ganz, and selections from some works of his own; e.g., "Birkat ha-Nehenin" (Benedictions for Enjoyments), which formed part of another work, "Orhot Hayyim" (The Ways of Life), a commentary on Isaac Tynau's "Minhagin." These works he published, first separately with approbations by Lipmann Heller and Isaac Eulenburg in 1659, and then as a whole, Amsterdam, 1671. (2) "Patora di Dahaba" (Table of Gold), a compendium of the Shulhan 'Aruk, which remained unpublished. (3) "Mayim Hayyim" (Living Waters), containing homilies and comments on Bible and Talmud according to the four methods: פְּרָשׁוֹת (Peshat, Remez, Derush, and Sod). (4) "Ilana di Hayye" (The Tree of Life). (5) "Tozeot Hayyim" (The Issues of Life), on grammar, Hamburg, 1710. (6) **בֵּית הַפְּלֵה** ("The House of Prayer"), a grammatical and mystical commentary on the prayer-book, together with all the laws concerning prayers; also under the title "Arba'ah Roshim" (Four Divisions), on account of the four different treatises it contains. (7) "Luah Hayyim" (Tablet of Life), a work on dietetics, Cracow, 1669, erroneously ascribed to a certain Raphael, and translated into Latin by Wagenseil, 1687.

Bochner also edited the "Midrash Konen," Amsterdam, 1669; the "Sefer ha-Niḳḳud" (Book of

Vocalization), on Hebrew grammar, and "Sod ha-Hashmal," a cabalistic work, both by Moses Gikatilla, Cracow, 1648; and "Iyyun Teillah" (Book on Meditation of Prayer), by Hayyim Rashpitz, Amsterdam, 1671.

**BOCHNIA, AUSTRIA.** See GALICIA.

**BOCK, ALFRED:** German novelist; born at Giessen, Hesse-Darmstadt, Oct. 14, 1859. He received his education at the gymnasium and the university of his native town, and traveled through Denmark, Italy, Turkey, and Greece. He now (1902) lives in Giessen.

Bock is the author of: "Gedichte," Dresden, 1889; "Aus einer Kleinen Universitätsstadt," Giessen, 1896; "Wo die Strassen Enger Werden," Berlin, 1898; "Die Pflastermeisterin," *ib.* 1899; "Bodo Sikkenberg," *ib.* 1900; "Der Flurschütz," *ib.* 1901; "Kinder des Volkes," *ib.* 1902. He has also written some dramas, of which may be mentioned: "Die Alte Jungfer," "Die Prinzessin von Sestri," and "Der Gymnasialdirektor."

s.

F. T. H.

**BOCK, M. H.:** German educator; born at Magdeburg, 1784; died at Leipsic April 10, 1816, while on a journey. He was one of the ablest modern Jewish teachers in Germany at the beginning of the nineteenth century; and the fashionable private school (Lehr- und Bildungsanstalt) which he founded in 1807 at Berlin, and to which Christian as well as Jewish pupils were admitted, enjoyed a great reputation. He was also for some time tutor at the Kölnisches Gymnasium in Berlin. After his death his school was conducted by I. M. Jost.

He wrote the following essays and works: (1) "Nachrichten von der Lehr- und Bildungsanstalt Jüdischer Familien," Berlin, 1807 (part of this is reprinted in "Sulamith," ii. 2, 39 *et seq.*); (2) "Hebräisches A B C Buch," Berlin, 1812; (3) "Katechismus der Israelitischen Religion," Berlin, 1814; (4) "Moda' l'Yalde B'ne Israel: Israelitischer Kinderfreund," a manual of the rudiments of knowledge, in Hebrew, German, and French, for the instruction of Jewish children at home and at school, 3 vols., Berlin, 1811-12; (5) in collaboration with David Fränkel, "Die Fünf Bücher Mosis, mit Moses Mendelsohn's Uebersetzung in Deutschen Lettern," Berlin, 1815; (6) "Predigt am Sabbath nach der Erscheinung des Königlichen Ediktes: die Bürgerlichen Verhältnisse der Juden in den Preussischen Staaten Betreffend in Erbauungen," ed. by Kley and Günsburg, i. 448 *et seq.*; (7) "Predigten zur Kirchlichen und Häuslichen Erbauung," Berlin, 1824, published by his brother, A. Bock, a convert to Christianity.

**BODEK.** See BEDIKAH.

**BODEK, HERMAN:** Galician Hebraist; born in Brody Sept. 27, 1820; died at Leipsic Aug. 19, 1880. He was descended from a highly respected family, and was the son-in-law of S. L. Rapoport. For a long time he lived in Leipsic, where he was translator of Hebrew at the courts of law, and was also engaged in business.

Bodek was well acquainted with rabbinical and Neo-Hebraic literature, and contributed articles on various subjects to the Jewish periodical press of several countries. He was the author of "Eleh Dibre ha-Berit" (These Are the Words of the Covenant), Leipsic, 1880, a catechism of the ritual signs, allegories, and objects of Freemasonry. It was based on the works of O. Marbach and R. Fischer on that subject, and was intended mainly for Jewish Masons in the Orient, or for those in Europe who could not read any language other than Hebrew. Bodek was himself a member of the Apollo Lodge of the Masonic Order in Leipsic.

**BIBLIOGRAPHY:** *Allgemeine Handbuch der Freimaurerei*, p. 18, Brockhaus, Leipsic, 1879; Zeitlin, *Bibliotheca Hebraica*, p. 36; Lippe, *Bibliographisches Lexicon*, i. 577-578.  
L. G. P. Wl.

**BODEK, JACOB, OF LEMBERG:** Galician Hebraist; died at Lemberg 1856. He published "Ha-Ro'eh v-Mebaqqer Sifre Mehobre Zemanenu" (Spectator and Critic of Contemporary Works), which contains long articles from his own pen, from that of his brother-in-law, A. M. Mohr, and others, against the works of S. L. Rapoport, S. D. Luzatto, and S. J. Reggio (part i., Lemberg, 1837; part ii., Ofen, 1839). Later he published, in conjunction with Mohr, a periodical entitled "Jerusalem," which appeared at irregular intervals (vol. i., Zolkiev, 1844; ii., Lemberg, 1845; iii., Prague, 1845). He republished with notes the chronicles of Abraham Trebitsch, "Korot ha-Itim," which cover the period from 1741 to 1801, and "Korot Nofafot," a continuation until the year 1850 (Lemberg, 1851). His biography of his friend, R. Zebi Hirsch Chajes of Zolkiev, appeared in "Ha-Maggid," i., Nos. 8-11.

**BIBLIOGRAPHY:** Zeitlin, *Bibl. Post-Mendels*, pp. 35-36, Leipsic, 1881.  
S. P. Wl.

**BODENHEIMER, LEVI:** Consistorial rabbi at Krefeld, in the Rhine province; born Dec. 13, 1807, at Karlsruhe; died Aug. 25, 1867, at Krefeld. He occupied the position of rabbi at Hildesheim in 1837. Bodenheimer published: (1) "Das Testament Unter Benennung einer Schenkung, nach Rabbinischen Quellen" (Krefeld, 1848); (2) "Das Paraphrastische der Arabischen Uebersetzung des R. Saadja Gaon"; (3) *ווארט הברכה* ("The Blessing of Moses"); and (4) *האזינו* ("The Song of Moses"), the last two being scientific comparisons of the translations contained in Walton's Polyglot, with a special reference to the Greek and Arabic variants.

**BIBLIOGRAPHY:** Lippe, *Bibliographisches Lexicon*; Winter and Wünsche, *Die Jüdische Litteratur*, iii.  
S. J. D. B.

**BODENSCHATZ, JOHANN CHRISTIAN GEORG:** German Protestant theologian; born at Hof, Germany, May 25, 1717; died Oct. 4, 1797, at Baiersdorf near Erlangen. In his early education at the gymnasium of Gera he became interested in

Oriental and Biblical subjects through his teacher, Schlensner; and later (1733), at the Jena University, he took up Oriental languages as a special study.

Bodenschatz entered the Church, and was vicar of Uttenreuth, ultimately (1780) becoming superintendent at Baiersdorf. He devoted his life to Jewish antiquities, and is said to have made elaborate models of the Ark of Noah and of the Tabernacle in the wilderness. In 1748 he summarized the results of his researches in his "Kirchliche Verfassung der Heutigen Juden, Sonderlich Derer in Deutschland" (in four parts, Erlangen). This important work gives, besides a short history of the Jews, which is derived mainly from Schudt and Basnage, a full account of Jewish ceremonial, drawn by the author from both written and oral sources and illustrated with engravings. Of these engravings some are imitated from Picart, but most of them were especially designed and engraved for the work; several have been reproduced in the JEWISH ENCYCLOPEDIA.

Bodenschatz generally gives an accurate account of Jewish ceremonial and custom, and without bias; his work is consequently an original source for the actual practise of Jewish ceremonial in mid-Germany in the first half of the eighteenth century. A second edition appeared at Frankfort in 1756 under the title "Aufrichtig Deutscheredende Hebräer, oder Die Gebräuche und Ceremonien der Juden."

**BODENSEE.** See CONSTANCE, LAKE OF.

**BODENSTEIN, JULIUS:** German landscape-painter; born in Berlin Aug. 4, 1847. He studied at the Berlin Academy under Schütze and Hermann Schnee, and in 1873 went to Munich, where he became a pupil of Ad. Lieber. He is prominent as a painter of subjects from nature, his "Twenty-five Views in the High Alps" (1879) being very artistic productions. In 1883 he exhibited "Isle of Sylt" at Munich. Among his other works are: "Approaching Storm in the Jura Mountains," "View Near Trafoi with Glaciers," "Oyster-Fishing on the North Sea," and "Twilight on the Isle of Sylt."

S. A. M. F.

**BODLEIAN LIBRARY:** The well-known University Library at Oxford, England. The building which at present forms the reading-room of the Bodleian Library was begun in 1444 by Humphrey, duke of Gloucester, and received continual accessions of books. Its life as a library, however, lasted little more than a century; for in the troubles that followed the Reformation it suffered the same fate as other abodes of religion and learning. Its manuscripts were burned or sold as waste paper, and its fittings treated as so much timber. The history of the present collections, therefore, begins with the refoundation by Sir Thomas Bodley in 1598. Whether any Hebrew works were included among Bodley's own gifts is uncertain. The earliest recorded donation of the kind is a Hebrew lexicon presented by John Savile in 1601, which was followed by Hebrew manuscripts from Dr. John Lhuud in 1602.

It was not till 1640 that the Hebrew collection began to assume any importance. In that year about forty-eight manuscripts were received from Sir Kenelm Digby and Archbishop Laud; and in 1654 John Selden bequeathed to the university such of his Talmudical and rabbinical books as were not already to be found in the

**Early  
Donations  
and  
Purchases.**

library. But by far the greatest part of the present treasures of the Bodleian was acquired by purchase. Thus in 1693 Pococke's library of 420 manuscripts (including a number in Hebrew) was bought for £600, and 600 manuscripts of Huntington's for £700. In the eighteenth century very few acquisitions were made; but in 1817 the great Canonici collection, including 135 manuscripts on vellum, chiefly in Hebrew, was bought for £5,444, and twelve years later the still more important library of R. David Oppenheimer (of Prague) was acquired at a cost of £2,080. The importance of this addition may be estimated from the fact that it consisted of 780 manuscripts and over 4,000 printed books, embracing every department of Jewish literature and learning. The collection is still called by the name of the original owner, and

subsequent acquisitions were till recently referenced as Oppenheimer additions, the whole being housed together in the "Hebrew Room," where an engraved portrait of the rabbi may be seen presiding over this monument of his learned industry.

The Bodleian thus rose at once into the front rank of Hebrew libraries. But its value was still further increased soon afterwards. In 1845 about 483 printed volumes from the library of Gesenius were purchased, as well as 320 books from a Berlin bookseller. In 1848 the manuscripts (862 volumes) belonging to H. J. Michael were bought for £1,030, but his large collection of 5,471 printed volumes went to the

British Museum. Two years later considerable additions were again made by the purchase of sixty-two manuscripts and numerous printed volumes from various sources. The Oppenheimer and last two collections bought thus *en bloc* were seventy-two Reggio manuscripts in 1853, and a number of volumes in 1864.

During the last thirty years the Hebrew collection has steadily increased in value, chiefly through the watchfulness and discrimination of the late Oriental sub-librarian, Adolph Neubauer. Besides other manuscripts, he was the means of acquiring a number of Karaite and Yemen manuscripts, as well as a

great quantity of fragments from the Cairo "genizah," which are now bound up in about 180 volumes. It is to be feared, however, that the time for startling purchases is past. The important private collections have mostly gravitated to the large libraries; the competition between buyers is keener than ever before; while lack of funds and the serious demands made by other branches of learning on the resources of the Bodleian and of the University alike threaten to hinder further development on any large scale.

EWER WITH HEBREW INSCRIPTION, IN THE BODLEIAN LIBRARY.  
(From a photograph specially taken for the "Jewish Encyclopedia.")

In the above account only the more striking acquisitions have been noticed, and these very briefly. Further information will be found in the various catalogues. The Pococke and Huntington manuscripts, with others, are described in John Uri's catalogue, published in 1787. For the Oppenheimer

manuscripts a catalogue was issued, in Hebrew and Latin, at Hamburg in 1826. For the Michael collection a catalogue was published by Steinschneider and Zunz, Hamburg, 1848. A conspectus of all the Hebrew manuscripts in the library is appended by Steinschneider to his great catalogue, or rather

bibliography, of the printed books. All these, however, are now superseded by Neubauer's "Catalogue of Hebrew Manuscripts," published in 1886, containing 2,602 numbers, to which a supplement is in course of preparation, dealing with subsequent additions, about 300 volumes up to the present time. For the printed books the indispensable and only guide is Steinschneider's "Catalogus Librorum Hebraeorum in Bibliotheca Bodleiana," published in 1860, of which an interleaved copy in the library is kept up to date by manuscript additions.

Outside the Hebrew manuscripts and books, the chief object of Jewish interest at the Bodleian is a bronze ewer 9 $\frac{3}{4}$  inches high, and 30 inches at greatest circumference, found in a Suffolk brook in 1698. It bears a Hebrew inscription showing it to have been presented by "Joseph, son of the martyred Rabbi Yehiel." The precise object for which it was used is doubtful; some think as a "charity box," others as a laver for washing the dead.

A. Co.

**BODO;** Bishop and chaplain of Emperor Louis the Pious. After a dissolute life at court, he made (838) a pilgrimage to Rome, was converted to Judaism, assuming the name of Eleazar, and married a Jewess. He then went into military service at Saragossa. Bodo incited the Moorish government and the people to oppose the Spanish Christians, who asked aid of the king of the Franks. In 840 he corresponded with the knight Pablo Alvaro of Cordova, a baptized Jew; each convert endeavoring in vain to lead the other back to his old faith. Many of their letters have been preserved.

G. H. V.

**BODY IN JEWISH THEOLOGY:** In Hebrew the idea of "body" is expressed by the term "basar" (Assyrian, "bishru"), which, commonly translated "flesh," originally denoted blood-relation, clan (see Gen. ii. 23, 24), the physical appearance being regarded as the evidence of consanguinity, and only secondarily the "body," and hence the general state or condition of man, or man as a creature of flesh, and finally mankind, "all flesh" (Isa. lxvi. 23). A less frequently employed term is "gewayāh," which with rare exceptions is used to designate not the living body, but the corpse. The Greek translators employ σάρξ, or, rarely, σῶμα, the former, in accordance with Greek usage, generally in the plural. In later Hebrew the words "goshem," "gushma," and "guph" were used, or the combination "basar wadam" (σάρξ καὶ αἷμα). This latter phrase implies the distinction between God and man, as, for instance, in contexts contrasting "the Holy One, blessed be He!" with "the king of flesh and blood," which contrast is rooted neither in the thought of man's sinfulness over and against the perfection of the Creator nor in the opposition of the material to the spiritual—the antithesis posited by Philo between the ψυχὴ or the νοῦς on the one hand, and the σῶμα, the "dead nature of ours," on the other—but in the

conception of man as a weak, dependent, and mortal creature.

According to Gen. ii. 7 the body is formed of dust and is, therefore, frail and mortal. It will return to dust, whence it was taken (*ib.* iii. 19). It lives because the spirit of life was breathed into it (*ib.* ii. 7; Ezek. xxxvii. 8).

The defiling character of the dead or the diseased body, which is so prominently referred to in the purity laws in the Levitical code, has, by the modern critical school, been recognized as belonging to a range of ideas universally found in all religions at a certain stage of their development, and as being an adaptation of observances pertaining to an anterior phase of religious thought and practise. Speculations on the nature of sin, and its seat in the body of man, do not lie within the plane of the unreflected religious consciousness which is characteristic of Old Testament literature and life.

The following may be accepted as representing the rabbinical views on the nature, the function, and the destiny of the body.

In accordance with the Book of Genesis, man is considered to be created of two originally uncombined elements, soul and body; the

**Rabbinic Conception.** former coming from the higher world, and the latter taken from the lower (Gen. R. viii. 14; Hag. 16a). The destiny of the latter is to serve the former, and it is organized to fulfil the Torah. The dust of which the body of man (Adam) was formed was composed of contributions from all the regions of the earth (Sanh. 38a; Rashi to Gen. ii. 7).

A shapeless body ("golem") came from the hand of the Creator (Gen. R. xiv.), and filled the whole earth, or, according to another version, reached from earth to the sky. Bisexed, this creature had also two faces until, through the later differentiation according to sex, man found in woman his counterpart. This (ultimate) body of man retains (in the nails) traces of an original coat of light (Rashi on Gen. ii. 21), but as now constructed it consists of 248 members (bones) and 365 nerves (compare Targum Yer. to Gen. i. 27), which numbers are assumed to correspond to the number of the mandatory and prohibitive commandments of the Law (see ANATOMY).

The psychology of the times connecting certain functions of the soul with certain organs of the body is recognized in the rabbinical writings; while symbolism in reference to the various purposes of the organs and the processes of physical life also holds a place in the anatomical science of the Talmudical teachers. As to the relation which the body holds to the soul, and the questions when the soul enters the body, whether the soul is preexistent, and whether for every newly created body there is also a newly created soul, opinions differ; though the majority are in favor of the preexistence of the soul.

The body is *not* regarded as impure. The adjective "tamé" (impure), used of the body in contrast to the pure soul (Mek., Beshallah, Shirab, 2; compare Sanh. 91a, b), refers rather to the physical process through which the body is produced from a "malodorous" drop (Abot iii. 1). To strain the meaning of the word "saruhah," used to convey

this idea, as does Weber ("Alt-Synagogale Theologie," p. 229), is inadmissible. The body is the seat of the "yezer hara'" (evil inclination). This latter is natural and necessary; it is not in itself a manifestation of congenital sinful depravity (Gen. R. ix.).

Body and soul are alike responsible

**Body for deeds committed** (Tan., Wayikra, and Soul. 6) (see YEZER HARA'). Aaron ben Elijah, the Karaites ("Ez Hayyim,"

cxii.), bases upon this responsibility of the body an argument in favor of resurrection (compare the parable of the blind and the lame in Rabbi Judah ha-Nasi's argument before the emperor Antoninus, Saah. 91b).

To provide food and drink and dress in proper quantity and becoming style is a religious duty (Maimonides, "Yad," De'ot, v.). Mutilations of the body are prohibited (Lev. xix. 27, 28; Deut. xxiii. 3).

Even after death the body was regarded as demanding respectful treatment. Once the "temple" (tabernacle) of the soul and its servant, the ceremony of dust was to be guarded against sacrilegious dissection (Hul. 11b). Hence the Levitical laws rendering impure the persons touching the dead body, according to the explanation of R. Johanan ben Zakkai (Yad. iv. 6; Num. R. xix.; see also Einhorn, "Ner Tamid," pp. §3 et seq., Philadelphia, 1866).

The body decays; but it will rise again at the time of the resurrection. The bodies of the risen are reproductions of those which they tenanted while living; cripples and the deformed will rise with the old deformities (Gen. R. xiv., xev.) (see LUZ and RESURRECTION). Early Talmudic conceits ascribe feeling to the body even after death (Shab. 152b; see הַיְבֻט הַא־קֶבֶר; Wolff, "Muhamed. Eschatologie," p. 62, Leipsic, 1872).

Post-Talmudic Judaism virtually accepts the foregoing views, as does, for instance, Saadia, "Emunot we-De'ot," vi., where he controverts the idea that the soul is abused by being made to reside in the body. The latter is the soul's necessary agent, and this body is the one best suited for the ends of man. The body is not impure. The

**Later Law declares certain secretions of the Views.** body to be unclean, but only after they have left, not while they are in,

the body (Bahya ben Joseph, "Hobot ha-Lebabot"). The human body evidences the Creator's wisdom (see בַּחְיָא בֶּן יוֹסֵפִין).

Like a red thread through the speculations of the medieval Jewish and Arabic thinkers runs the doctrine of the four elements. Man being the microcosm, and the world the macrocosm, the effort is made to establish a correspondence between the body of the former and that of the latter. The four elements are discovered in the four humors of man's body. Israeli's work on the elements, based upon the "Sefer Yezirah," influenced all subsequent thinkers in this direction. In Donolo and in Ibn Gabirol there is the theory that the blood in man corresponds to the air; the white humor, to the water; the black humor, to the earth; and the red bile, to the fire. The five senses of man are also very prominent in the symbolic and allegorical inter-

pretation of the Biblical texts. Ethics and poetry as well borrowed instruction and inspiration from the five senses (Kaufmann, "Die Sinne," Leipsic, 1884) (see ADAM). The body of man was thus studied from many points of view, but was always regarded as a marvelous construction witnessing to the wisdom of the Creator, whose praise was sung in benediction (Ber. 60a). The latter, after dwelling on the wonderful adaptability of the bodily organs to their functions, names God as "the Healer of all flesh and the wonderful Artificer."

It may be noticed that Reform Judaism has relinquished the belief in the resurrection of the body. The catechisms and prayer-books of the modern synagogues, however, teach that "the body is intended by the Creator to be the servant of the immortal soul, and as such is not congenitally depraved." "This very body—woven of dust—Thou hast dignified to be a dwelling-place of Thine, a minister unto Thy spirit. Even it issued pure from Thine hand. Thou hast implanted in it the capacity for sin, but not sin itself" (David Einhorn's "Prayer-Book," 2d Eng. ed., Chicago, 1896, part ii. 207).

E. G. H.

**BOESCHENSTAIN, JOHANNES** (sometimes spelled **Boeschenstein**): German Hebraist; born at Eslingen in 1472; said to have been of Jewish parentage, this statement, however, being denied by himself. He was among the earliest to revive the study of Hebrew in Germany, having been a pupil of Moses Möllin and a teacher of Hebrew at Ingolstadt in 1505, at Augsburg in 1513, and at Wittenberg in 1518. He produced an elementary grammar at Augsburg in 1514, another at Willenburg, 1518 (second edition, Cologne, 1521), and in 1520 edited Moses Kimhi's מַהֲלֵךְ at Augsburg, whither he had returned. During a wandering life he taught Hebrew at Nuremberg, Antwerp, and Zurich; at the last-named place having the reformer Zwingli among his pupils.

Boeschenstein gave particular attention to the Jewish prayers: publishing a German translation of some, in 1525, under the title "תפלות העברים, Vil Guter Mahnungen," and, in the same year, at the end of his edition of Ruth, the prayers for the dead. The Jewish grace before and after meals he translated in 1530.

**BOETHUSIANS** (בֵּיתוּסִיָּם): A Jewish sect closely related to, if not a development of, the Sadducees. The origin of this schism is recounted as follows by the Midrash: Antigonus of Soko having taught the maxim, "Be not like the servants who serve their masters for the sake of the wages, but be rather like those who serve without thought of receiving wages," his two pupils, Zadok and Boethus, repeated this maxim to their pupils. In the course of time they were understood to express thereby the belief that there was neither a future

world nor a resurrection of the dead; and the consequence was that these pupils of Zadok and Boethus renounced the Torah and founded the sects of the Sadducees and the Boethusians. They lived in luxurious splendor; using silver and golden vessels all their lives, not because they were haughty, but because (as they claimed) the Pharisees led a hard

life on earth and yet would have nothing in the world to come (Ab. R. N. of Name. v., ed. Schechter, p. 26. The text is corrupt. According to one version, Zadok and Boethus were themselves the founders of the sects).

Historical in this story is the statement that these two sects denied the immortality of the soul and resurrection. Again, the Midrash is on the whole correct in saying that the sects found their followers chiefly among the wealthy; but the origin of the sects is legendary. The Mishnah, as well as the Baraita, mentions the Boethusians as opposing the Pharisees in saying that the sheaf due at the Passover (compare 'OMER) must be offered not on the second feast-day, but on the day after the actual Sabbath of the festival week, and, accordingly, that Pentecost, which comes seven weeks and one day later, should always be celebrated on the Sabbath (Men. x. 3; compare also Hag. ii. 4). In another passage it is narrated that the Boethusians hired false witnesses in order to lead the Pharisees astray in their calculations of the new moon (Tosef., R. II. i. 15; Bab. *ib.* 22b; Yer. *ib.* ii. 57d, below; compare Geiger, "Urschrift," pp. 137, 138). Another point of dispute between the Boethusians and the Pharisees was whether the high priest should prepare the incense inside or outside the Holy of Holies on the Day of Atonement (Tosef., Yoma, i. 8; Yer. *ib.* i. 39a). The parallel to the last-named passage (Yoma 19b) has "Sadducees" instead of "Boethusians"; and in other passages the Talmud undoubtedly uses these two terms indifferently in designating the same sect. Graetz's assumption, therefore, that the Sadducees were the political and the Boethusians the religious opponents of the Pharisees, is untenable.

The prevailing opinion now is that the Boethusians were only a variety of the Sadducees, deriving their name from the priest Boethus. Simon, son of Boethus from Alexandria, or, according to other sources, Boethus himself, was made a high priest about 25 or 24 B. C. by Herod the Great, in order that Boethus' marriage with the latter's daughter Mariamne might not be regarded as a mésalliance (Josephus, "Ant." xv. 9, § 3; xix. 6, § 2.

**A High-Priestly Family.** This Mariamne II. must be distinguished from the first of the Hasmonean Mariamnes). Furthermore, to the family of Boethus belonged the following high priests; Joezer, who filled the office twice (*ib.* xviii. 1, § 1); Eleazar (*ib.* xvii. 13, § 1); Simon Cantheras (*ib.* xix. 6, § 2); his son Elionous (*ib.* xix. 8, § 1); and the high priest Joshua b. Gamla, who must also be included, since his wife Martha (Miriam) belonged to the house (Yeb. vi. 4). The hatred of the Pharisees toward this high-priestly family is shown by the words of the tanna Abba Saul b. Batnit, who lived about the year 40 of the

common era at Jerusalem (Pes. 57a; Tosef., Men. xii. 23). It must be especially noticed that "the house of Boethus" heads the list of the wicked and sinful priestly families enumerated by Abba. It is, however, only an assumption—although a highly probable one—that the Boethusians were the followers of this Boethus and members of his family; for the assumption is not proved, as there may have been another Boethus who really was the founder of the sect. As the beginnings of this sect are shrouded in obscurity, so also is the length of its duration. The Talmud mentions a Boethusian in a dispute with a pupil of Akiba (Shab. 108a; Soferim i. 2); yet it is probable that the word here means simply a sectarian, a heretic, just as the term "Sadducee" was used in a much wider sense later on. A Boethus, son of Zonim, and nearly contemporaneous with Akiba (compare Yer. *l.c.* 10b), is mentioned in the Mishnah (B. M. v. 3); he was not, however, a Boethusian, but a pious merchant. A Palestinian amora, c. 300 C. E., was also called "Boethus." Compare HIGH PRIESTS, PHARISEES AND SADDUCEES.

**BIBLIOGRAPHY:** On the origin of the Sadducees and the Boethusians, see E. Baneth, *Ueber den Ursprung der Sadduäer und Boethusier* in Berliner-Hoffmann, *Magazin*, ix. 1-37, 91-95 (also printed separately, Dessau, 1882); Geiger, *Urschrift*, 1857, pp. 105 *et seq.*; Grätz, *Gesch. der Juden*, iii. 89, 223, 4th ed.; Schürer, *Gesch.* ii. 217-218, 409-419. **BOGNAR, FREDERIKE:** German actress; born at Gotha Feb. 16, 1840. Her father was a singer, and Frederike was destined for a musical career. After appearing a few times in children's parts in Budapest, she was sent to Munich to study music under Mme. Behrend-Brandt, who was her aunt. She sang for some time on the concert platform, but finally decided to become an actress. After studying under Denker, and later under Laube, she made her début at Zurich in 1856. In the following year Bognar went to the Hamburg Stadttheater, where she remained until 1858, when she went to the Hofburgtheater, Vienna, with which she was associated until 1870. In that year she began a starring tour that lasted for several years. Bognar then went to the Deutsches Landestheater in Prague, and in 1892 joined the Deutsches Volkstheater in Vienna.

In her younger days Bognar played the parts of Gretchen, Clärchen, Thekla, Desdemona, Emilia Galotti, Marie in "Herz und Welt," Ophelia, Louise Miller, Lady Tartuffe, and Marguerite in "La Dame aux Camélias." Later in life she portrayed Medea, Maria Stuart, Frau Alving in "Die Gespenster," Judith, and Pompadour.

**BOGOLYUBSKI, ANDREI:** First grand duke of Russia (1169-74). He conquered Kiev after the death of Vladimir Monomakh (1169), but selected the northern city of Vladimir as the capital of the kingdom. At that time Kiev was an important commercial center with a considerable Jewish population, the Jews controlling the trade between western Europe and the Far East. The Jewish travelers

Benjamin of Tudeka (1160-73) and Pethahiah of Regensburg (1175-85) visited the city. Admission to service in the prince's militia ("druzhina") of old Russia was not confined to any nationality or creed, and the soldiers enjoyed many liberties. Bogolyubski was the first Russian autocrat, and he curtailed many of these privileges of the druzhina. Besides this, Christianity had made considerable progress in Russia, so that the religious freedom of the militia was also attacked. Bogolyubski, who surrounded himself with foreigners from all countries, both Christian and non-Christian, took pride in showing them the splendid church of the Virgin in Vladimir, in order that those of a different religion might be attracted to the Greek Orthodox Church and be baptized. The chronicler of Kiev praises Bogolyubski especially for his Christian deeds and his conversion of many Bulgars and Jews. It was probably two of these converts, ANBAL THE JASSIN, and Ephraim Moisch, who took part in the successful conspiracy against the life of Bogolyubski. The latter, having banished his brothers and all the boyars who would not implicitly obey him, had become gradually more tyrannical, forgetting that he had been elected by the people. He burdened the latter with heavy taxes, and at his pleasure sentenced them to death. Thus it is not strange that Jews, even though his confidential servants, took part in the conspiracy. The terrible cruelties perpetrated by Bogolyubski's favorite, the bishop Fiodor, cast a deep shadow upon the reign. Nevertheless, he must have had many devoted subjects among the Jews, as is evident from the lamentations of his servant Kuzmischev after the assassination: "Even the Bulgars and the Jews and the pagans weep for you."

M. R.

**BOGROV, GRIGORI ISAACOVICH:** Russian writer: born March 13, 1825, in Poltava; died May 10, 1885, at Derevki, government of Minsk. He received his early education from his father, who was a Hebrew scholar and who left in manuscript a Hebrew work on astronomy. Grigori devoted himself exclusively to the study of the Talmud and rabbinical literature until his marriage at the age of seventeen. He then without a teacher studied Russian, German, and French, and also learned to play the violin with a certain amount of skill. Being unhappy in his family life, he separated from his wife.

In his first work, "Zapiski Yevreya" (Memoirs of a Jew), Bogrov portrays the vicissitudes of his life and his surroundings. This was published in the "Ote Chestvennyya Zapiski," 1871-73, and in book form in 1874. Although by reason of its style and its descriptions of Russian and Russo-Jewish life his work is considered a valuable contribution to Russian literature, yet the author's undignified revelations of his family affairs called forth severe criticism.

Having established his reputation as a writer, Bogrov moved from South Russia to St. Petersburg, where he occupied himself entirely with literature. In the last years of his life Bogrov joined the Greek Orthodox Church, and married again.

Besides the above-mentioned work he published: "Yevreiski Manuskript," St. Petersburg, 1876; "Nyezhy Bratetz," St. Petersburg, 1878; "Zhit' ili ne Zhit' Yevreyam Povsemestno v Rossii," in "Slovo," 1872, No. 2; "Lassall's Tovo Svyeta," in the same journal; and many other novels and sketches from Russo-Jewish life, which appeared in the periodicals "Razvyet," "Yevreiskaya Biblioteka," "Russki Yevrei," and "Voskhod," from 1879 to 1883.

**BIBLIOGRAPHY:** Vengerov, *Kritiko-Biograficheski Slovar*, iii., s.v., St. Petersburg, 1885.

II. R.

**BOGUSLAV:** Town in the government of Kiev, Russia. It is mentioned in official documents dated 1195. Nothing is known of the date of the Jewish settlement there. Russian and Polish historians record that Boguslav was one of the cities which suffered most severely from the uprising of Chmielnicki; Jewish sources, however, do not mention it among the communities destroyed. The town has a population of about 12,000, of which 10,000 are Jews. In 1809 a Jewish printing-office was established in Boguslav, and the first work published there was "Besamim Rosh," by Joseph Katz.

**BOHEMIA:** \* Crown land in the northernmost part of the Austro-Hungarian empire. The history of the first settlement of Jews in Bohemia is wrapped in legend. The oldest Jewish sources designate Bohemia as "Erez Kena'an," that is, "Slavonia" (so called because those districts plied a vigorous trade in slaves, in which traffic Jews themselves took part), under which term, however, in a larger sense the countries eastward as far as Kiev are to be understood (Zunz, "Ritus," p. 72; Ar. pp. 54, 131, 989; Salf. p. 151; Vita s. Alberti, in Grätz, "Gesch. der Juden," vi. 68). In Ar. p. 29, an archbishop asks for a Jewish or a Slavonic physician, and in *ib.* p. 50 Ibrahim ibn Ya'akub speaks of "ailments of the Slaves" (see "Reisebericht über die Slavischen Länder" published by F. Westberg in the publication of the St. Petersburg Academy, Nov., 1899). Jews resident there are called "Bene Het" (Children of Heth). Inasmuch as intercourse with the East was always very active (Ar. p. 50; M. pp. 31, 363, ["Erez Yawan"]; Gudemann, "Gesch. des Erziehungswesens," i. 114), and in view of the fact that there are Byzantine resemblances in the older ritual of the Prague Altshul, it is supposed that the earliest Jewish settlers in Bohemia came from the East. In the train of the Germans at the time of the Black Death, Jews also found their way into Bohemia from Germany (Pod. pp. 10 *et seq.*), and they were joined by coreligionists from France (Rapoport, "Introduction to Gal 'Ed"), Poland, Austria (Kisch, M. p. 25) and Hungary. Their

\* For the full titles of works cited under abbreviations, see Bibliography at the end of the article.

vernacular was Slavonic, as appears from the explanations of words given by Jewish writers and from proper names current in the Middle Ages (M. pp. 26, 31, 318, 372; Sp. Ur. pp. 24 *et seq.*; Pod. p. 21; Grün, p. 14).

The first accredited statement concerning the residence of Jews in Bohemia comes from Leitmeritz,

where they, as well as others who brought salt or other goods into the town, had to pay a toll to the Stephan's Church (1067) (Ar. p. 66). But the first actual settlement was in PRAGUE,

which is described in Jewish divorce papers as "the city called Mezigrade (מֵזִיגְרָדָה), situated on the river Vltava (וולטָוּוּא), and on the Bottich (בוטִיךְ) stream." This specification points to the oldest portion of the city, called Vysehrad, as the scene of the first Jewish settlement. There and in the Prague Vorstadt (probably the present Altstadt), closely adjoining the former ghetto (now the Josephsstadt), lived alongside of other merchants and immigrant Germans (1091) "many Jews very rich in gold and silver" (*ib.* p. 77). They held the same legal standing as the Germans and French (*ib.* p. 78; compare pp. 106, 198, 200, 254). The first Crusade and the attendant persecutions of the Jews found the Israelites of Prague prepared for a brave defense of their lives, supported by Duke Vratislav II., as well as by the bishop Cosmas; but the temporary absence of the duke in 1096 at once caused excesses to break out in Prague, Vysehrad, and Bubenium (*ib.* p. 92; Salf. p. 151). Jews who had been compulsorily baptized in 1096, sought to emigrate in 1098 to Poland or Hungary with their possessions; but the duke, who had been apprised of their intention, stripped them of their property, leaving them only the barest necessities of life (Ar. p. 95). In spite of these sufferings, the beginnings of scholarship are exhibited in a ritual question addressed by the Jews of Prague to Moses B. Jekuthiel in Mayence (Grün, p. 9).

They seem to have gradually recovered some of their former favor. In 1124 the Jew Jacob, who after his baptism had become a favorite of Vratislav I., and had risen to be vice-dominus at his court, returned to Judaism and removed the Christian altar and holy relics from a synagogue. He was immediately arrested by his royal master and thrown into prison. The Jews are said to have offered three thousand pounds of silver and a hundred pounds of gold for his ransom (Ar. p. 101).

The prohibition against holding Christian slaves was in all probability disregarded in Bohemia as it

was in Moravia, and that by the Christian "slaves" themselves, who enjoyed kindly treatment at the hands of their Jewish masters (Fr.-Gr. p. 10).

The attitude of the Church toward the Jews was on the whole benevolent (Ar. p. 10f). The community, which in 1142 suffered the loss of its synagogue and many houses by fire, probably during the siege of Prague by Conrad II. of Znaim (*ib.* p. 106), displayed a lively interest in theological studies, which led to close relations with the neighboring congregation of Regensburg, and even with the scholars of northern France. In Prague there lived the Tosafist Isaac

b. Mordecai, known as R. Isaac of Prague; in Bohemia lived also Moses b. Jacob and Eliezer b. Isaak, mentioned in the Tósafot. Isaac ben Jacob ha-Laban (from "Albis," the Elbe, Bohemian "Laba") was a rabbinical teacher in Prague, and the brother of Pethahiah of Regensburg, who set out on his travels from Prague (*ib.* p. 131; Grün, p. 10).

In the thirteenth century the circumstances of the Jews were even more favorable. On leaving the country for a journey they had to pay a lighter tax even than the Christian clergy (Ar. p. 186). In 1235 they extended their settlements into the plains of Bohemia (Pod. p. 6). Though it is true that in that year the Jews contemplated leaving Bohemia in expectation of the Messiah's coming (Ar. p. 21f), this was not due in any way to oppression. All their old privileges were secured to them; the friendly bull of Innocent IV. (1254) was confirmed by Ottocar II., and, in expressed opposition to the hostile resolutions of the Vienna council, was again confirmed in 1267 (*ib.* pp. 255, 257; Wertheimer, p. 172). The following regulations applied to the Jews in Bohemia as well as to the king's other Jewish subjects: a Christian might testify against a Jew only in conjunction with another Christian and a Jew; a Jew was to be tried only in the synagogue (with "coram suis scolis," in Ar. p. 255). In disputes between Jews the decision was not to rest with the municipal judges, but with the lord of the manor or the chief chamberlain; the Jewish judge had jurisdiction in such cases only if the charge had been brought originally before him. Desecration of the Jewish cemetery was punishable with death, the offender's property escheating to the head of the state. A Jew could not be compelled to deliver upon a Jewish festival a pledge upon which he had lent money. In loan transactions with the Church the Jew was advised for his own good—as also by the municipal laws of Iglau, 1249 (*ib.* p. 244)—to exercise especial caution.

Jews were also found in Tachau, among them being Moses ben Hisdai, "one of the grays of Bohemia." His contemporaries were Jacob, son of the above-mentioned Isaac ha-Laban, and Abraham ben Azriel called Isaac Or-Zarua, whose history seems to have been intimately associated with Prague, and whose teachers were counted among the scholars of that city. A Pentateuch commentary was written by a disciple of Judah the Pious, who lived probably in Bohemia. In the second half of the thirteenth century, a grammarian, Jekuthiel b. Judah ha-Kohen or Solomon ha-Nakdan, lived in Prague. Thus Saadia, Hayyug, Ibn Ezra, and Maimonides, together with the exegetes of northern France, may be said to have found a new home in Bohemia (M. pp. 31, 316, 360; Grün, ii. 13).

A fitting prelude to the horrors of the fourteenth century was afforded by the massacre of the Prague community, which, it would appear, had its own quarter, the "Vicus Judeorum," as

**The Fourteenth Century.** early as 1273 (Grün, p. 24). In 1290 fleisch's robber-band (Grün, p. 16), fell upon the ghetto there, to avenge an alleged insult to the host. As early in the century as 1305 the charges of ritual murder which sprang up

in so many German towns found victims in Prague (Kohut, "Gesch. der Deutsch. Jud." p. 162). In 1321 seventy-five Jews were burned at the stake there ("Jahrb. Gesch. der Jud." iv. 147). John of Luxemburg in 1336 plundered the synagogues because by the newly introduced customs duty he could not quickly attain his end (Grün, p. 17). In the same year 53 Jews were burned in Prague ("Jahrb. Gesch. der Jud." iv. 147). At the instigation of the Armleders and their like the Jews in Budweis (Wertheimer, p. 177), where there were in 134 three families, had increased considerably in numbers; those in Czaslau, Prichowitz, and Neuhaus were plundered and murdered (Salf, p. 240). The archbishop of Prague, Arnest I., in 1347 made new charges against them (Wertheimer, p. 173); but they were shielded by the utterance of the emperor Charles IV. in that year, who said that the Jews were his "serfs" ("Kammerknechte"), and that his rights in them must be respected (M. 1894, p. 371). His representative in 1339 likewise protected certain Jews, who had been baptized and had reverted to Judaism again, from the vengeance of the Church; for his humane interference he was promptly excommunicated (Wertheimer, p. 175). On the other hand, however, Charles IV. felt himself justified in considering all the property of his "serfs" as quite his own, and at his pleasure released debtors to the Jews from their obligations. He divided with his nobles the possessions of the Jews massacred in the fearful outbreaks of 1348 and 1349 which accompanied the Black Death in Prague and Eger (*ib.* p. 174; Salf, pp. 250, 268; Kohut, *ib.*; concerning the Jews in Eger, see Wertheimer, p. 176; for those in Kolin; M. 1894, p. 220). All these bloody scenes of the century were brought to a fitting close with the repeated massacres excited in 1388 by the charge of ritual murder (Wertheimer, p. 74); in 1389, by the charge of insulting the host (Salf, p. 306; Zunz, "Ritus," p. 127), during which latter outbreak even the grave-stones in the Jewish cemetery were broken, the Altschul synagogue burned, and the walls of the Alt-Neuschul synagogue streaked with the blood of Jewish martyrs (Pod, p. 84; see Abigdor Kara's elegy). Finally, in 1391 the charge of poisoning the wells was made, on which occasion Lipmann of Mühlhausen was among the sufferers (Kohut, *ib.* p. 318).

Such an unbroken period of suffering could not but result in the most terrible conditions, but the worst feature, particularly in Prague, was a system

#### The Fifteenth Century.

of shameful espionage and denunciation of the authorities which raged for more than two centuries, and which sometimes involved rabbis and wardens of the congregations. As lords of their "serfs," Wenzel and Sigismund frequently exacted scrupulous compliance with their alleged "rights" over the Jews (Wertheimer, p. 177; "Zeit. für die Gesch. der Juden in Deutschland," ii. 173; on the relations between Wenzel and Abigdor Kara, and between the Jews and Hussites, see Güdemann, "Gesch. des Erziehungswesens," iii. 154, and Berliner, "Ans dem Leben," etc., p. 55). The Jews were no longer, together with the trade-gilds, considered privileged traders. The fifteenth century witnessed a constant succession of massacres and pil-

lagings (Wertheimer, p. 175), 1422, 1448, 1476 (compare "Gal 'Ed," Nos. 5, 50), etc., which, in part, were no doubt to be ascribed to the turmoil of the Hussite wars, but also to the blood accusation in Trient, 1476. The congregation in Eger alone shows satisfactory development; with it, especially with its teacher Nathan, Isserlein b. Pethahiah kept in touch (M. pp. 18, 134; compare pp. 316, 322).

The pretentious resolution of the imperial Diet in 1501 (Wertheimer, p. 178), never again to expel Jews from Germany, was very quickly belied by the expulsions of 1503, 1504, 1506, 1507, 1512, and 1516. A similar decree of 1520 was revoked in consideration

of a very heavy money contribution (*ib.* pp. 175, 177; Pod, p. 40; "Jahrbuch," *l.c.* p. 147). Systematic persecutions took place under the fanatical Ferdinand I.; in 1527 he confirmed that high-sounding resolution which had been agreed to by Ladislaus II., but in 1541 he negotiated with the Bohemian nobles for the expulsion of the Jews. For the first time a charge of high treason was made against them; they were charged with intriguing with the Turks; and Ferdinand was most zealous in the restoration of the almost forgotten regulations concerning the distinctive Jewish garb (1541, 1544, 1551 ["Zeit. für die Gesch. der Juden in Deutschland," i. 251], 1571). In 1540 (Kohut, *ib.* p. 554; formerly every scholar had to pay two pfennig for his writing materials; Wertheimer, p. 181) he imposed a special property tax upon the Jews, compelling each one to swear upon the Decalogue as to the value of his possessions. In 1541 (*ib.* p. 179) the Jews, with the exception of fifteen families, were expelled from Prague, greatly to the satisfaction of Luther (Grätz, "Gesch. der Juden," ix. 313), Ferdinand's bitterest enemy. In 1554 they were welcomed back again, in return for heavy financial considerations; in 1559 they were again expelled, to be readmitted two years later ("Gal 'Ed," p. 22; Pod, p. 42). Again, in 1562-64 the edict of expulsion was launched against them (Wolf, Th. p. 61, note), but the warmth with which the empress (Pod, p. 42) and archdukes pleaded the part of the Jews was at least a gratifying incident of the decree. In 1568 they were expelled from Kolin and Kuttenberg, and in 1571 from Mattersdorf ("Hebr. Bibl." iv. 149).

The internal development of the community meanwhile had progressed satisfactorily. In 1512 the first Hebrew book was printed in Prague; the Jewish printing business founded there by the Gersonides remained the distinguishing feature of the community until the eighteenth century. In 1547 the censorship made itself felt ("Gal 'Ed," p. 20), and in 1559 suspicions professed concerning the Jewish prayer-book led to an examination in Vienna of all Hebrew books that could be seized in Prague. Even matters of internal management were not free from the interference of the authorities; *e.g.*, the confirmation of the rabbi Abraham L. Abigdor, called "Abraham of Prague" (Kohut, *ib.* pp. 361, 582; compare "Gal 'Ed," p. 121). Unfortunate contentions in the congregation resulted in 1567 in the transfer of the superintendence of Jewish affairs to the Bohemian chambers ("Zeit. für die Gesch. der Juden in Deutschland," i. 310).

But in the last third of the sixteenth century the circumstances of the congregation changed for the better and were brighter than ever before. Trade with the interior of Austria, and with Bavaria and Saxony, which the Jews controlled, and the financial transactions of the imperial house enriched Mordecai Meisel, the well-known benefactor of the congregation. He built the synagogue named after him, half a century after Aaron Meisel. Meshullam b. Isaiah Horwitz had established the Pinkus synagogue ("Gal 'Ed," p. 24). Conjoined with Meisel we find as friend and counselor Löw b. Bezaleel, "the chief Rabbi Löw" (founded, in 1654, in conjunction with Eliezer Ashkenazi, the burial society; on his celebrated audience with Rudolph II, see Pod, pp. 1, 2, 3). The historian, geographer, and astronomer, David Gans, and Lipmann Heller of Wallerstein, author of the "Tosafot Yom-Tob," were their contemporaries and fellow-countrymen.

Maximilian II. and Rudolph II., in whose time the Prague congregation attained its highest development (in 1609 the first rabbi is recorded in Jung-Buntz-lau; see Grünwald, "Jungbunzlauer Rabbiner"), were followed by Ferdinand II., who distributed all manner of favors to the Jews in the hope of securing their conversion. His court-steward, Jacob Bassev (Bathsheba) Schmieles, was raised by him to the nobility as "Von Trenenberg." The first step heretofore was taken by the institution of the Jesuits' sermons, to which the Jews were compelled to listen (1623 and 1630). But the Passau expedition of 1611 (Znuz, "Ritus," p. 129; "Gal 'Ed," p. 13); the Thirty Years' war (Kisch, Pr. pp. 7, 10), in which the Jews of Bohemia remained loyal to the emperor, receiving in return the protection of his generals (for a letter by Torstenson protecting Jung-Buntz-lau see "Zeit. für die Gesch. der Juden in Deutschland," i. 288), and being especially rewarded by the emperor for their defense of Prague against the Swedes; the conflagrations ("Jahrbuch," *l.c.* p. 147) of 1654, 1679, and 1689; the invasion by the French in 1680 (Kohut, *ib.* p. 654)—all brought severe sufferings to the Jews of Prague. Their numbers were increased by emigration from Vienna and in 1650 from Poland (at the head of the latter being Ephraim Cohen of Wilna; see K. Of. pp. 14, 18), in compensation, as it were, for those who at the expulsion of 1542 left Bohemia with Jacob Pollack and Solomon Sheelna b. Joseph to settle in Poland. In 1636 the congregation contained 7,815 souls, in 1679 only 7,113 ("Zeit. für die Gesch. der Juden in Deutschland," i. 317). The Prague community attended to the assessment and collection of the taxes from the provincial congregations, and the rabbi was appointed upon the city-tax commission, a circumstance which in 1625 subjected Lipmann Heller to the machinations of Jewish informers (Wolf, Ferd. p. 17). The "Prague Purim," on IJeshwan 14 (Kisch, Pr. p. 12), and the "Vorhang Purim," on Tebet 22, are memorials to-day of events happening in the seventeenth century. In 1627 the Prague Jewish quarter was independent of municipal authority, governing itself. Celebrated teachers at that time were Salomon Ephraim Lenczyc and Isaiah Horwitz, while Joseph Salomon del Medigo ended his checkered career here.

The eighteenth century, which in its last quarter was to see the gates of the ghetto flung wide open, was marked by a blot upon the reign of Maria Theresa, which all the formal edicts of toleration could never remove. The Eighteenth Century. The confiscation of their books in 1715 had reminded the Jews of their utterly defenseless condition (M. pp. 41, 359). They may have hoped to recover grace by their conspicuous loyalty, shown first in 1741 on the occasion of the birth of Joseph II. and the empress' first visit to the church (Kohut, *ib.* p. 655), and again particularly at the walls of Prague in 1742 and 1743, where with permission of their rabbi, Jonathan Eybeschütz, they stanchly fought against the French even on the Day of Atonement ("Jahrbuch," *l.c.* p. 151). Their loyalty was rewarded by an edict in 1745 which, without any reason, at one stroke banished them, 60,000 souls strong, from Bohemia, after their payment of a fine of 160,000 gulden. Representations by Venice, Holland, England, Hamburg, and other liberal powers were of no avail. Jonathan Eybeschütz wrote to the French congregations, and even to the pope (Kohut, *ib.* p. 658). Embittered to the extreme by the treachery of the nobles, the authorities desired to make an example of the Jews, especially as the opposition emperor, Charles VII., had shown himself well disposed toward them, and as Frederick the Great was considered by the people as a "father of the Jews" (K. Bur. p. 3). That the authorities did not themselves believe in the accusation of treachery made against them is shown by the fact that it is nowhere alleged as the reason for the expulsion, and that later, in 1771, the Bohemians themselves defended the Jews from a similar accusation (Wolf, Th. p. 69); on the excommunication of Jewish traitors, issued in 1756 by Ezekiel Landau, see H., 1894, p. 416; Wolf, Th. p. 64. The sad results of this outrage affecting the whole country, the stagnation of all business, and the outspoken complaints of the people induced the authorities finally to readmit the Jews. From the edict of recall, it appears that before the expulsion the Jews had been permitted to live in Kaurzim, Tabor, Neuhaus, Pisek, Schuettenhofen, Wodnian, Pilsen, Miess, Klattau, Rokizan, and Laun. They were still to be excluded from the following cities where they had formerly lived: Czaslau, Budweis, Eger, and Leitmeritz ("Jahrbuch," *l.c.* p. 188; in memory of the bloody rule of the Croats in 1745, to which R. Jonah, among others, fell a victim, a fast-day is still observed in Böhmisch Leipa, on Tebet 4; see Kohut, *ib.* p. 658). After this expulsion Maria Theresa treated the Jews on the whole more favorably than before (Wolf, Th. p. 60). But such laws as the FAMILIANTEN GESETZ (Fr. Gr. p. 171), limiting the number of married persons in a community, the restrictions imposed upon Jewish trade (Wolf, Th. p. 77), rigorous insistence upon the wearing of the Jew badge (yellow collar on the coat; abolished in 1781; "Zeit. für die Gesch. der Juden in Deutschland," i. 27), and the limitations imposed upon Jewish physicians (Wolf, Th. pp. 75-77; the first doctor was graduated in 1778), still showed the same intolerance. All of these, however, were wiped away at one stroke by the edict of tolerance issued by Joseph II. in 1782. The Prague Jewish

quarter was incorporated (1784); Jewish physicians were allowed to treat Christian patients in 1785 (Lieben, "Gal 'Ed," p. 18), and Jews were drawn for military service (Kohut, *ib.* p. 757). The home conditions of the Prague Jews likewise improved. On the great fire of 1754 see K. Heine, p. 43; Pod. p. 92. David Oppenheimer, the book-collector, laid the foundation for Jewish bibliography. Jonathan Eybeschütz, a living exemplar of the destructive influence wrought by the Shabbethai Zebi imposition (Kohut, *ib.* p. 680), and Ezekiel Landau, his opponent, were the chief scholars of this period. Upon the other side, Peter Beer and Ilersz Homberg sought to introduce reforms in the Jewish ritual, but met with determined resistance, particularly as Joseph II. himself would have nothing to do with Mendelssohn and his "enlightenment."

The nineteenth century must be said to evidence retrogression in the condition of the Jews in Bohemia, since, in spite of the example of Joseph II., the Jews were treated throughout in the spirit of his predecessors. The Family Law (the *Familianten Gesetz* and its evils, and the various imposts levied, were not abolished until the adoption of the constitution, March 4, 1849. The fact that a few individual Jews have occasionally been raised to the ranks of the nobility has exerted no influence upon the general circumstances of the Jews. Nevertheless, Prague has flourished under the inspiring breath of modern times, and has become a focus of Jewish learning. Zacharias Frankel was born here; Rapoport, Zunz, and Michael Sachs labored here. The Slavonicizing of Bohemia makes itself evident here and there among the Jews in the adoption of the Czech language at general meetings and occasionally in the pulpit.

**BIBLIOGRAPHY:** Periodical literature is given in the second volume of the *Zeitschrift für die Gesch. der Juden in Deutschland*. *Copia Eines Schreivens, Welches ein Jude aus Prag an Einen Seiner Guten Freunde in Frankfurt Abgassen, die Ursache Ihrer Emigration Betreffend*, translated from the Hebrew original into the High German tongue, 1745, signed Mantsche Israel. A. KÜ.

**BÖHM, MOSES:** German physician; flourished in the middle of the eighteenth century. In 1740 he was engaged by the Jewish community of Halberstadt to attend to the medical needs of its poor members; and his salary, 175 thalers per annum, was paid to him regularly, according to the communal records, until 1747. He soon became very popular with Gentiles as well as with Jews, and was consulted professionally by the nobility and high dignitaries. It is supposed that Böhm remained in the service of the community after 1747, but his increased prosperity enabled him to dispense with his salary, which was a heavy charge on the community. Various anecdotes of his skill as a physician and his generosity are preserved among the Jews of Halberstadt, from which it is evident that he must have occupied an important position in that city. There are extant Hebrew letters written by him against the use of amulets, and against the early and hurried burials of the dead, which were common among the Jews of his time. In these epistles he proves himself a good Hebraist, an excellent reasoner, and well versed in rabbinical literature.

**BIBLIOGRAPHY:** Auerbach, *Gesch. der Israelitischen Gemeinde Halberstadt*, pp. 111-116. Halberstadt, 1866.  
P. WI.

**BÖHMER, ISRAEL B. JOSEPH:** Russian Neo-Hebraist and lexicographer; born about 1820; died in Slutsk, government of Minsk, April 4, 1860. His father, R. Joseph Böhmer (1796-1864), was a prominent Talmudical authority, one of the first

graduates from the yeshibah of R. Hayyim of Volozhin, and rabbi of Slutsk for thirty-five years. Israel traveled in western countries and knew several European languages. His works abound with Latin, German, and French quotations, and show a familiarity with scientific methods of investigation. His chief work is "Kitbe Israel Böhmer" (The Writings of Israel Böhmer), part i. or letter i., Warsaw, 1849, a treatise on the Essenes, containing many etymological explanations of Hebrew and Talmudical terms. His "Kezad Ma'arikin" (How to Arrange) is a contribution to Talmudical or rabbinical lexicography, and was published as a specimen of a large work on the subject (Berlin, 1855). Böhmer edited, in conjunction with G. Polak of Amsterdam, "Ezba' Elohim" (The Finger of God), a sketch of the life of R. Isaac Tirmau, with notes and appendix (Königsberg, 1857). He also published, together with E. L. Silberman, for whose "Ha-Maggid" he worked about nine months, a new and annotated edition of Samuel Shullam's Hebrew translation of Josephus' work, "Contra Ap." (Lyck, 1858). His lexicographical articles appeared in "Kerem Hemed," iii. 13-22, 116-149 (of which the above "Kezad Ma'arikin" is practically a reprint). There also appeared from his pen "Lexicalische Beiträge zum Talmud," in "Literaturblatt des Orients," 1850, ii., Nos. 25, 27, 39. His Hebrew is far from being pure or classical, and contains many curious Germanisms ("Reformer and Jewish Times," New York, vol. x., No. 20).

**BÖHMER** (בײַמער), **JOSEPH B. MEÏR**: Lithuanian rabbi and Talmudist; born at Skudy in 1796; died May 7, 1864, at Slutsk. One of the most eminent pupils of R. Hayyim of Volozhin, Böhmer attained such a reputation as Talmudist that legal questions were sent to him even from Palestine and Babylon. Following the methods of his teacher, he was especially remarkable for his strictly logical treatment of the Talmud and rabbinical literature, being a decided opponent of the pilpul. Böhmer was greatly beloved and respected in his community for his personal qualities as well as for his scholarship. He officiated as rabbi for thirty-five years, and left a large collection of responsa, and scholia to the *Yad ha-Hazakah* and the *Shulhan 'Aruk*, which are still extant in manuscript. Böhmer was succeeded in the rabbinate of Slutsk by his son Meïr.

**BIBLIOGRAPHY:** *Ha-Karmel*, iv. 278; *Fuenn, Kenesset Yisrael*, p. 493.

L. G.

**BOIL**: The rendering, in the English versions of the Scriptures, of the Hebrew word "shehin," which comes from a root meaning "to warm," and indicates an inflamed spot. In the Bible it is used to describe two distinct forms of disease, each characterized by a local swelling, exceedingly painful and accompanied by a discharge of pus: (1) the simple boil, limited to one spot and not contagious (Lev. xiii. 23); and (2) the loathsome eruptions characteristic of endemic elephantiasis, a form of leprosy so called because the feet of the victim swell to a great size and resemble the feet of an elephant.

This seems to have been the form of disease with which Job was afflicted (Job ii. 7), although the suddenness with which he was "smitten with sore boils from the sole of his foot unto his crown" is more suggestive of plague.

That the Jews distinguished between the first and the second type—which latter seems to have been known as the "botch [or boil] of Egypt" (Deut. xxviii. 27)—is clearly demonstrated by the law set forth in Lev. xiii. 18-23. Doubtful cases were brought before the priests. If the scar left by a boil was lower than the skin, and the hair upon it was white, the case was pronounced one of leprosy. In the absence of these signs the afflicted one was shut up for seven days. If at the end of that time the disease had spread it was a case of leprosy; if not, the scar was recognized as that of a simple boil, and the man was declared clean. See **LEPROSY**.

J. JR.

C. F. K.

**BOJANOWO**: A town in the district of Radvitsch, province of Posen, Germany. A Jewish community of one hundred and forty-four souls dwelt in Bojanowo as early as 1793. They were under the protection of the Boyanowskis, the lords of the manor, who had founded the town in 1638. They received from the lords the privilege of free trade, the right to buy houses, and the right to pursue all handicrafts, for which they had to pay in per capita taxes twelve full-weight groschen to the king, eight thalers and ten silver groschen to the lord of the manor, and eight silver groschen to the city, for permission to reside in it. In the beginning of the nineteenth century Samuel Samwel Munk, "who knew how to read and write German, and was in the habit of reading German books and even journals in the hours that are neither day nor night," held the position of rabbi at Bojanowo, whence he was called to Wollstein (Graetz, "History of the Jews," index volume, p. 7, Philadelphia, 1898). The synagogue, built as early as 1793, was burned down during the great fire in 1857, but was rebuilt the following year. The Jewish cemetery was opened in 1817. In 1900 Bojanowo counted a Jewish population of only fifty-eight out of a total of 2,200.

D.

M. L. B.—H. R.

**BOKHARA**: Capital of the khanate of the same name in Central Asia; a principal seat of Islam and, with Samarcand, a center of Mohammedan culture in Central Asia since early times. The city probably had a Jewish population even at the beginning of the Mohammedan rule. The Jews of Bokhara, whose mother-tongue points to their Persian origin, consider themselves descendants of the Ten Tribes, and identify the Biblical "Habor" (II Kings xvii. 6) with the name "Bokhara." In support of this theory, their chief rabbi in 1832 pointed out the identity of the consonants in the two names to the well-known missionary Wolff ("Narrative of the Mission of Dr. Wolff to Bokhara," p. 30, New York, 1845). According to the same informant, the documents relating to the earliest history of the Jews under Genghis Khan's rule (1218-26) have been lost.

Half a century before the conquest of Bokhara by the Mongols, Benjamin of Tudela, during his sojourn in Persia, gathered information relating to

the Jews living on the Oxus, especially concerning one independent Jewish tribe that claimed to derive its descent from the Ten Tribes, and was in friendly relations with the Turkish nomadic tribes of Transoxiana. Benjamin does not mention Bokhara, but he speaks of Samarcand, where, according to his statement, there were 50,000 Jews, among them men eminent for wealth and learning. Bokhara, no doubt, had its Jewish population also at that time

**Under  
Mongol  
Rule.**

the intellectual activity that may be presupposed among the Jews of that region is the curious dic-

tionary of Solomon b. Samuel (see Bacher, "Ein Hebräisch-Persisches Wörterbuch aus dem 14. Jahrhundert," Strassburg, 1900), a work completed in 1338 in Oorghenj (Gurgang), hence in the country bordering Bokhara on the west. The conclusions that may be drawn from this work regarding the intellectual status of the Jews in the countries bordering on the Oxus may certainly also be applied to Bokhara.

More than three centuries separate Solomon b. Samuel from the next name from Central Asia recorded by Jewish literary history. This was the poet, known in non-Jewish circles under the name of Yusuf Yehudi (Joseph the Jew), who flourished in Bokhara at the end of the seventeenth and in the first half of the eighteenth century. With the exception of the names and a few dates no biographical notices have been preserved, either of him or of the other members of the Judæo-Persian poetic circles that flourished contemporaneously at Bokhara. In 1688 Yusuf Yehudi, whose full name was Mollah Joseph b. Isaac, completed the "Seven Brothers"

(referring to the seven martyrs and their mother; see II Maccabees vii. 1), a poem still popular among the Jews of Bokhara. He died in 1755 at an advanced age. Yusuf Yehudi and his fellow-poets, who were generally called "Mollah" (from the Mohammedan word for "scholar"), used Jewish material in their Persian poems, but also assiduously cultivated Persian poetry. As their own poems were written in the Hebrew script, they transcribed the Persian classics, Nizami, Hafiz, etc., into this script for the benefit of the Jews of Bokhara; and also translated Hebrew poems, such as those of Israel Najjara, into Persian verse. The Persian translation of the Pentateuch, which is now used by the Jews of Bokhara, seems to date from a much

earlier time, and is probably the earliest literary monument of the Jews of Bokhara (on Yusuf Yehudi and the circle of poets of Bokhara, see Bacher, in "Z. D. M. G." liii. 389-427; *idem*, in "Jew. Quart. Rev." xiv. 116-128).

The next name to be mentioned from Bokhara is that of the poet Ibrahim ibn Abu al-Khair in the beginning of the nineteenth century, author of an account of a contemporaneous event; namely, the martyrdom of Khudaidad (*i. e.*, El-Nathan) at Bokhara in the reign of the fanatical Emir Mas'um (d. 1802). In addition to the pic-

Jews of Bokhara celebrating the Feast of Tabernacles.  
(From a photograph by the American Colony, Jerusalem.)

ture of Mohammedan fanaticism under which the Jews of Bokhara had to suffer, this poem, based on fact (see Bacher, in "Zeit. für Hebr. Bibl." iii. 19-25; *idem*, in "Z. D. M. G." lii. 190-212; Gottheil, in "Amer. Jour. Semit. Lang." xv. 124), gives an insight into their inner life and their domestic and social conditions. Hoja of Bokhara, who in 1816 wrote a Book of Daniel in the Persian language, was perhaps a brother of the martyr (see "Jew. Quart. Rev." vii. 119).

In 1832, some decades after Khudaidad's martyrdom, the first European came to Bokhara, and after having visited the city again in 1844, **Wolff's Visit.** gave some detailed information concerning the Jews there. This was the missionary Wolff, mentioned above, who recounts the following in his book (*l.c.* ii. 3):

"In Bokhara there are 10,000 Jews, who are mostly dyers and silk merchants; they wear a small cap, and a girdle around the chest, in order to be distinguished from the Mohammedans. Their synagogue is a very old building, although excellently preserved. During my sojourn there the emir [Nasrullah Khan, who reigned 1826-60 (see Vámbéry, *l.c.* ii. 165)] gave them permission to repair but not to enlarge the building."

Wolff says that the same emir frequently went to the house of the rabbi Simḥah during the Feast of Tabernacles to witness the celebration and to partake of the feast.

A Jewess of Bokhara.  
(After a photograph.)

In 1849 the traveler J. J. Benjamin II. ("Eight Years in Asia and Africa," p. 173, Hanover, 1859) met at Bombay a Bokhara coreligionist, Messiah (Mashiah) by name, who gave the following information concerning the Jews of his city:

"He told me that nearly 2,500 Jewish families live at Bokhara and in the neighborhood who support themselves by trade, agricultural labor, and mechanical employment. They are obliged to wear on their garments a piece of old stuff, by which they can be distinguished from the Tatars."

In view of the great oppression that the Jews of Bokhara suffered, it is not strange that, as Wolff recounts, an African Jew, Rabbi Joseph Moghrabi, who came to Bokhara in the first quarter of the nineteenth century, was wont to say: "O Lord! when will the time come that the followers of Jesus shall take possession of this country?" (*l.c.* i. 14).

Bokhara was opened up to Europeans in 1863. Soon afterward Russian aggression commenced in central Asia. Tashkent was annexed by Russia in 1866; in 1868 Samarcand was seized, and a large part of the khanate of Bokhara was added to the government of Russian Turkestan. Bokhara itself remained the capital of the emir, who, however, became more and more a dependent of Russia. At present he is hardly more than a Russian governor. The Russian occupation of the territory of Bokhara brought comparative freedom to the Jews. In his work entitled "Russia in Central Asia in 1889 and the Anglo-Russian Question," p. 172, London, 1889, Lord Curzon, at present viceroy of India, who visited those regions in 1888, has the following to say concerning the Jews of Bokhara:

"The Jews are here a singularly handsome people, of mild feature and benign aspect. Confined to an Oriental ghetto and for long cruelly persecuted in Bokhara, they still exhibit in their prescribed dress and appearance the stamp of a peculiar people. The head is shaven save for two long locks hanging in a curl on either temple; they wear a square black calico bonnet trimmed with Astrakhan border, and a girdle round the waist. To my astonishment, I met with one who could speak a little French."

Franz von Schwarz, who from 1874 to 1890 was astronomer of the observatory of Tashkent and director of the meteorologic institute of Turkestan, gives valuable information on the Jews of Bokhara in his suggestive book, "Turkestan, die Wiege der Indogermanischen Völker" (Freiburg in Baden, 1900), from which the following passages (pp. 441-445) may be quoted:

"Just as in Turkestan usury is almost exclusively in the hands of the Indians, so the Jews of Bokhara devote themselves to commerce and industry. . . . Nearly all the dyers, especially the dyers of silk, are Jews [compare p. 384:

**Occupations.** "The dyeing of silk is done chiefly by the Jews, their occupation being easily recognized by their hands, which are always blue"; p.

431: "The Jews of Bokhara have in a way monopolized the commerce with dyed raw silk"]; the native apothecaries and physicians are also Jews. The Bokharian Jews are as cleanly as the Sarts, eminently modest and polite, and produce on the whole a more pleasing impression than the Sarts and Uzbeks. It is impossible to describe how the Jews of Bokhara have hitherto been treated in all the Central Asiatic khanates, and in part even to-day in the independent states. . . . Like lepers, they are obliged to live in their own quarters. In Bokhara no Jew is permitted to wear a turban or belt; he must gird himself instead with a rope, and must wear a fur cap of a prescribed shape [compare Curzon, *l.c.*]. . . . As far as the restrictive regulations will permit them, the Jews prefer to dress like the Sarts, Uzbeks, and Tajiks. They also shave the head like the Mohammedans, leaving, however, two long curls on the temples. . . . They are monogamous, and are remarkable for their large families. Notwithstanding all oppression, they are on the whole wealthy and have already acquired ownership of a number of houses, built in the European style, in the Russian city of Tashkent. The Jews enjoy full religious liberty in the Russian provinces of Central Asia, and have the same political as well as social

**Social Position.** status as the other inhabitants. Hence they everywhere look upon the Russians as their rescuers and liberators, and on every occasion assiduously further the Russian advances."

What Schwarz says here of the leaning toward the Russians is substantiated in an interesting way in the Russifying of Jewish names, for apparently they now prefer to add the Russian endings "of," "uf," to their names. Thus, the young interpreter who rendered invaluable services to Elkan N. Adler during his stay at Bokhara, in the summer of 1897,

was called Abo Chachmanof ("Jew. Quart. Rev." x. 584). The author of the "Ritual Compendium," the Persian translation of which appeared at Jerusalem in 1901 (see "Zeit. für Hebr. Bibl." v. 147-154), is named Abraham Aminof; and names like Nathanael Davidof, Mattath Suleimanof, Benjamin Abrahamof, are found among the subscribers to the edition of the Pentateuch with Persian translation now appearing in Jerusalem for the benefit of the Jews of Bokhara.

The prosperity mentioned by Schwarz is also substantiated by the settlement that the Jews of Bokhara founded at Jerusalem in 1893. Only five years later this settlement included 179 houses, among

previously printed a Persian translation of the Psalms (Vienna, 1883) and of the Proverbs (Jerusalem, 1885).

The Persian dialect spoken by the Jews of Bokhara, as may be gathered from the literary documents mentioned and from others, shows many lexical and some grammatical peculiarities; being remarkable for many Turkish, particularly eastern Turkish, words, as appears especially in the above-mentioned "Ritual Compendium" (see Bacher, "Jüdisch-Persisches aus Buchara," in "Z. D. M. G." vols. lv., lvi.; *idem*, "Türkische Lehnwörter und Unbekannte Vokabeln im Persischen Dialekte der Juden Buchara's"; "Kelchi SzeMLE" in "Rev. Orien-

INTERIOR OF THE GREAT SYNAGOGUE AT BOKHARA.

(After a photograph by E. N. Adler, London.)

them two synagogues and two schools. It became a kind of intellectual center for the Jews that had remained at Bokhara, for in the last few years different works were printed at Jerusalem to supply the religious and literary needs of the Jews of Bokhara. Among these were the above-mentioned Pentateuch edition and Abraham Aminof's "Ritual Compendium," both of which were translated into Persian by Simeon Hakam, a man remarkable for his activity, his knowledge of Jewish lore, and his thorough acquaintance with Persian. In his preface to the Pentateuch edition there are interesting remarks on the traditional Persian Pentateuch translation used by the Jews of Bokhara and their pronunciation of Persian. Benjamin Kohen of Bokhara had

tale," 1902, iii.). For further information concerning the literary activity of the Jews of Bokhara see PERSIAN-JEWISH LITERATURE.

G.

W. B.

There are perhaps 20,000 Jews in the country, most of whom live in the towns. Jews have for centuries been resident in both country and capital. Like their neighbors, the Afghans, the Bokharians in general, and especially the Turkomans, are by many believed to be descended from the Ten Tribes; but the Jews of Bokhara are Talmud Jews, and are probably descended from the Babylonian Jews who migrated eastward after the conquest of Jerusalem by the Romans. Their family

#### Present-Day Conditions.

names prove that many came from Persia via Merv and some from Khiva.

The Chinese Jews of Kai-Fung-Fu (see **CHINA**) are probably originally from Bokhara, the Persian rubrics in their liturgies being in the Bokharian dialect. The Bokhara Jews themselves have a tradition that their ancestors settled in various parts of Persia, and especially at Sabzawar, two days' journey from Meshed; that they were removed thence under the conqueror Genghis Khan (1220) to Balkh and Samarcand; and that when Samarcand fell into ruin, under Babi Mehemet Khan, the conqueror of Shah Abbas (1598), they went to Bokhara, where there was a Jewish colony; and some of them emigrated thence to Tsheen Patsheen (China), but soon ceased to have communication with their mother-country, though they "carried their genealogies with them."

The present writer visited Bokhara in 1897, and found four or five thousand Jews there, inhabiting a special quarter and wearing a special badge on their clothing. They seemed intelligent and hospitable. Many of them were great travelers; one man had been to China; while several had

**Statistics and Occupations.** visited India by way of Afghanistan and the Khai-bar Pass. At least two hundred had made the pilgrimage to Jerusalem; and there are at the present time (1902) at least that number of Bokharians settled in Jerusalem with the pious purpose of living and dying there.

Most of the traveled Jews of Bokhara had been to Moscow, many to Paris, and some to London. One old man had been five times to Moscow. His first journey there, forty years ago, had been by caravan by way of Astrakhan and the Volga, occupying eighty days and costing 500 rubles.

None of the Bokharian Jews were rich, but most of them seemed to earn a livelihood. Some were cotton-growers; some grew grapes, some cultivated tobacco; while many were merchants trading with Moscow, where they exchanged carpets for manufactured goods, and importing Indian tea from Bombay via Batum and Baku. The greater part of the cotton trade of the khanate is in the hands of the Jews, and 500,000 poods (about 18,000,000 lbs.) of cotton are annually exported from Bokhara.

The largest synagogue of Bokhara is some 500 or 600 years old, with modern additions that resemble chapels in a cathedral, divine service being held separately in each. It has a genizah, or hidden chamber, in the roof, for the preservation of disused sacred writings.

The present chief rabbi is Mollah Hezekiah ha-Kohen, whose father was rabbi before him. In 1832, when the missionary Wolff, mentioned above, visited Bokhara, Mollah Pinchas, the elder, was chief rabbi, and there were four synagogues in the city. Wolff estimated the number of Jews at 10,000, and states that they paid only \$300 per annum by way of tax to Bahadur Khan. He also states that there were 300 Jewish families, converts to Mohammedanism, who were scorned by the general population, and who intermarried with the Gholoom or slaves of Persia and not with the Uzbeks. Crypto-Jews from Meshed are still found in Bokhara.

Toward the end of the eighteenth century one Joseph ben Moses Maimon, a native of Tetuan, and therefore called "Mughrebi," came to Bokhara via Jerusalem and Bagdad. He found the Jews ignorant and unobservant, and revolutionized their ritual and practise, sending to Europe for Hebrew books. The Jews have now forgotten their old Persian liturgy and have adopted that of the Sephardim of Italy, in the belief that they

**Liturgy and Rabbis.** are descended, as Maimon was, from the Spanish refugees of 1492. Rabbi Joseph Maimon had an unsuccessful rival in a learned Yemenite Jew, Rabbi

Zachariah ben Mazliab.

The present writer brought back with him about seventy Hebrew and Hebrew-Persian manuscripts from Bokhara and its neighborhood, one of which was written in Herat, many of them being transliterations into Hebrew of the great Persian poets, such as Sadi, Jami, and Nizami, and lesser local celebrities, like Tuili, Zeribu of Samarcand, and Musabfiki.

In 1490 there flourished Uzziel Moses ben David, who wrote poems in Hebrew and Persian. Other poets were Yusuf Yehudi ben Isaac (1688-1755), mentioned above, and his friends, Uzbek, Elisha, and Solomon Mollah. Somewhat later were David ben Abraham ben **דוד**, Uzziel, Benjamin Siman-Tob, and Eleazar ha-Kohen, and, in the beginning of the nineteenth century Ibrahim ibn Abu al-Khair, author of the "Khudaidad" (ed. Salemann, St. Petersburg, 1897).

E. N. A.

**BOLAFFIO, LEONE:** Italian jurist; born at Padua July 5, 1848. He was educated at Padua; attended the public schools, the Talmudic college—where S. D. Luzzatto was his teacher—and the University of Padua. Bolaffio afterward practised law at Venice for fifteen years, at the same time acting as professor in the Istituto Tecnico. Then he became professor in the law department of the University of Parma and that of Bologna. He is a member of the Royal Commission for the Reform of the Commercial Code, commander of the organization known as the Crown of Italy, and a chevalier of the Orders of SS. Maurizio and Lazzaro. Bolaffio was the first to advocate the introduction of Gabelsberger's system of stenography into the public schools of Italy, and he himself wrote a manual for this system. He was also the founder, at Padua and Milan, of the Society for Stenography. Since 1876 he has been the editor of the judicial paper "Temi Veneta," founded by himself. Bolaffio's principal work is his "Commento al Codice di Commercio," 2d ed., 1899. He has also advocated the

abolition of bankruptcy proceedings in the case of business men of small means.

**BIBLIOGRAPHY:** Boccardo, *Nuova Enciclopedia Italiana*, vol. ii, Supplement, 1891.

S.

**BOLAFFIO, LUIGI FILIPPO:** Italian journalist and publisher; born in Venice 1846, died at Milan 1901. While he was still a youth his parents moved to Genoa, and there Bolaffio founded "La Favilla," a literary magazine. He returned to Venice in 1866 and became a contributor to the "Rinnovamento" and "Venezia." In 1880 he went to Milan, where he edited the political newspaper "L'Italia." Owing to differences with the publishers, he abandoned this, and founded the "Caffè, Gazzetta Nazionale," which he afterward disposed of to a syndicate holding monarchic but liberal views. The "Gazzetta Nazionale" reflected the opinions of the Lombard aristocracy. Bolaffio's political utterances involved him in many duels, in one of which, with Marin, the socialist and member of the Italian Parliament, he wounded his opponent almost mortally.

On the death of one of his little sons, Bolaffio retired from politics and founded the well-known Milan publishing-house, the Casa Editrice Verri, which issues "Il Mondo Umoristico" and many other popular journals.

During the past twenty years Bolaffio, in conjunction with his wife (Sulamith, the daughter of Baer Jolles of Berlin), wrote sixteen volumes of guide-books on Italy, Switzerland, and Paris, issued by Treves Brothers, Turin. Many of them have been translated into French, English, and German. Bolaffio was also the author of "Il 14 Giugno, 1859," a historical memoir, Venice, 1867, and "Augusta," a novel, Milan, 1888.

**BOLAT.** See BULAT, ABRAHAM BEN.

**BOLECHOW:** Town in the district of Dolina, Galicia, Austria, the population of which in 1890 was 4,402, of whom half were Jews. The Jewish community dates from the day of the foundation of the place in 1612 by Nicholas Giedzinsky. According to the privileges granted the Jews by the founder and confirmed by King Sigismund III. of Poland, they enjoyed equal freedom and rights with the Christians. They were released from all burdensome taxes and from the compulsory supply of relays. They had the right to build in any part of the town, and were granted a plot of ground for a garden to each house. Both were their exclusive property, subject only to the payment of a small tax to the lord of the manor. A place to build a synagogue and land for a cemetery were granted them gratis and were free from taxes forever, as were also the other communal buildings that might be erected on the grounds of the synagogue. Charges by Christians against the Jews were under jurisdiction of the lord of the manor or of the judge appointed by him, in accordance with the existing statutes and the privileges granted the Jews by the king. The Giedzinskys were always favorably disposed toward the Jews, who had the right to be

elected as jurymen and even as mayors. When, in 1660, the first city mayor was sworn in, he made oath as follows: "I solemnly swear to live in harmony and to defend the rights of the Roman Catholics, the Greek Catholics, and the Jews; of the rich and of the poor alike."

That the Jews of Bolechow were greatly esteemed by their Christian neighbors is evinced by the fact that when the Cossacks, in 1669, burned down the castle of Zydaczow with all the official documents and privileges, the town of Bolechow elected two Jewish delegates—Leib Ilkowitz and Lipman Lazarowitz—to enter the privileges of the town in the new books of that place. When the Tatars invaded Bolechow in 1670 and destroyed and burned down many houses, and the Jewish population was impoverished, the lord of the manor, George de Giednie Giedzinsky, bishop of Lemberg, furnished many loans to the Jews.

**BOLESŁAW I. CHROBRY** ("the Brave"): King of Poland from 992 to 1025. According to the Polish preacher Matheus Bembo, a contemporary of Sigismund III. (beginning of the seventeenth century), the first Jews settled in Poland in the reign of Boleslaw Chrobry; and the historian Maciejowski ("Zydzi w Polsce na Rusi i Litwie") states that this king treated the Jews with the utmost kindness. There are traditions, however, to the effect that the Jews had lived in Poland as early as the ninth century, enjoying considerable privileges granted by the earlier Polish princes, and that during the war that Boleslaw waged against the German emperor, Henry II., all their manuscripts were destroyed by fire, among which were the parchments containing records of those privileges. Some historians assert that Boleslaw, fearing that too much reading might enervate his subjects, ordered the burning of the manuscripts.

**BIBLIOGRAPHY:** W. A. Maciejowski, *Zydzi w Polsce na Rusi i Litwie*, Warsaw, 1878; A. Kraushar, *Historja Żydow w Polsce*, vol. i.

H. R.

**BOLESŁAW III. KRZYWOUSTY** ("the Wry-Mouthed"): King of Poland from 1102 to 1139. In his time, according to Naruszewicz, the Jews spread through Poland and Lithuania as far as Kiev, where they carried on a lively trade, especially in salt with Holic and Przemysl, and probably also in slaves. Being, as Dlugosz asserts, a brave soldier and a magnanimous ruler and conqueror, it is safe to assume that the Jews during his reign enjoyed considerable freedom.

**BIBLIOGRAPHY:** A. Kraushar, *Historja Żydow w Polsce*, i. 62.

H. R.

**BOLESŁAW POBOŻNY** ("the Pious"): Duke of Kalisz; died 1278. He was distinguished for his courage and administrative ability. Boleslaw aimed at furthering the welfare of his subjects rather than at the enlargement of his domains by wars. Emigration from the neighboring countries had greatly increased the number of Jews in the duchy. This made it imperative to issue special regulations for their government, and in 1264 Boleslaw issued an edict granting them many privileges. This edict

consists of thirty-six articles, which display a spirit of toleration far in advance of the age. In 1334 these privileges were extended by Casimir the Great to the Jews of the whole of Poland.

**BIBLIOGRAPHY:** A. Kraushar, *Historja Żydów w Polsce*, i. 69 et seq., Warsaw, 1865.

H. R.

**BOLESŁAW V. WSTYDLIWY** ("the Bashful"): King of Poland (1228-79). During his reign (1240) the Mongols under Batu-Khan, the grandson of Genghis Khan, invaded Poland and carried away many thousand Jews as slaves to Asia. His reign is memorable also for the fact that he encouraged the immigration of German artisans into Poland and introduced the Magdeburg law (*Jus Teutonicum*). This influx of Germans evoked against the Jews the hatred that had already taken root in western Europe during the Crusades. This period forms the beginning of the persecutions of the Jews in Poland, which lasted until **BOLESŁAW POBOŻNY** inaugurated (in 1264) his beneficial legislation.

**BIBLIOGRAPHY:** A. Kraushar, *Historja Żydów w Polsce*, i. 68.

**BOLESO.** See HUNGARY.

**BOLOGNA:** Capital of the province of Bologna and of the division of Emilia, in northern Italy. As early as the beginning of the fourth century there were Jews in Bologna, but it is difficult to ascertain the exact date of their settlement. In 302 they had a cemetery, where, from malicious motives, two Christian martyrs were buried ("Ambrose," v. 302, ed. Rome, 1579). Nothing further is recorded of the Jews until 1171, when they were expelled from the city for unknown reasons. By the end of the thirteenth century Jews had again settled at Bologna, for they called from Forlì the celebrated

Rabbi Hillel of Verona. In 1308 they

**Early** presented to Fra Aymerico, prior of  
**Records.** the Dominicans, a Pentateuch written on vellum, and made in the form

of a scroll like the copies used in the synagogue. Only the portions of this manuscript containing Numbers and Deuteronomy are now extant, and these are preserved in the university library. In 1700 it was still complete, with a Hebrew inscription erroneously asserting the manuscript to have been written by Ezra.

In 1366 the Jews were enclosed in a ghetto; but by the end of the fourteenth century they owned houses in all parts of the city and also held real estate. The two brothers Moses and Elia, of the Ne'arim family, came in 1394 from Rome to Bologna, bought houses, and founded one of the most beautiful synagogues of Italy. This family claimed to be descended from one of the four noble families carried captive by Titus to Rome. The two brothers were buried in a cemetery bought by themselves: the famous rabbi of Imola, Gedalia Yahia, mentions that he had seen their tombstones. In 1417 Albergati, bishop of Bologna, persecuted the Jews, and ordered them to wear the distinctive yellow badge; this command was withdrawn after a time, but renewed in 1458. In the same year a congress of rabbis was held at Bologna to consider the interests and security of the Jews, and it reassembled in the following year at Forlì. (Its conclusions and ordi-

nances, תקנות, have been published by Halberstamm; see the "Grätz Jubelschrift.") In 1419 a delegation was sent to Pope Martin V., who afterward issued a bull favorable to the Jews. Fra Bernardino da Feltre preached against them at Bologna in 1473, but without effect.

A series of persecutions began in the second half of the sixteenth century; in Sept., 1533, the Talmud, together with a multitude of other Hebrew books and even copies of the Bible, was publicly burned by order of Pope Julius III. In May, 1556, the Jews were again enclosed in a ghetto by order of Paul IV. A respite came under Pius IV. (1559-66). At that

time the community of Bologna had eleven synagogues. In 1569, when Pius V. banished the Jews from the pontifical dominions excepting Rome and Ancona, 800 of them left Bologna. The Jewish cemetery was given to the monks of St. Peter, with the permission to disinter and burn the bodies ("Archivio Domaniale, Monache di S. Pietro," No. xxvi.); consequently some interesting sepulchral stones are preserved in the museum of Bologna. In 1586 Sixtus V. permitted the Jews to return, and in 1593 there were already more than 900 in the city. But in that year Clement VIII. again drove them out, and they departed, carrying with them the bones of their dead, which they buried in the small Jewish settlement of Pieve di Cento.

From 1593 to 1796 the Jews were forbidden to establish themselves at Bologna; a few at a time being allowed to stop in the city for two or three days by special permission. On Sept. 5, 1796, General Sallietti, the commissioner of the French Directory, issued a decree which accorded to Jews the same rights that were given to other citizens. The number of them in Bologna now steadily increased. When the city was restored to the popes in 1814, Pius VII. showed himself very friendly to them. Leo XII. made an effort to revive the oppressive laws, but did not cause much suffering at Bologna. Pius IX., liberal at first, afterward grew intolerant, and the Jews were made painfully conscious of this by the abduction of the boy Edgar MORRARA, who had been secretly baptized by a servant during an illness, and four years later, in 1858, was forcibly taken from his family and carried to Rome. The offense created a great sensation throughout the civilized world. On Aug. 10, 1859, a decree of the governor of the Romagna (which had been united with the kingdom of Italy under Victor Emmanuel) proclaimed the civil and political equality of all citizens. The number of Jews in Bologna now increased rapidly, growing from 229 in 1861 to 350 in 1871. Formerly the dead were buried in the cemetery of the neighboring community, but later the municipality permitted their internment in the communal burying-place.

At the beginning of the twentieth century there were about 1,200 Jews in Bologna, these having come in part from the territory of Mantua, Modena, and other places. They have a synagogue and a chief rabbi. The ritual used in the synagogue is the so-called Roman (Zunz, "Ritus," p. 78).

V. C.

The Hebrew printing-press was introduced at a very early time into Bologna, though the exact date is not known. Some bibliographers ascribe the first edition of the Psalms with the commentary of David Kimhi (published Aug. 29, 1477, by Joseph Hayyim Mordecai, and Hezekiah of Ventura) to this city (Rabbinowitz in Merzbacher's "Ohel Abraham," No. 4041; compare De Rossi, "Annales," i. 14, and Steinschneider, "Cat. Bodl." col. i.). In 1482 Joseph b. Abraham Caravita (or Crovetta) set up a printing-press in his own house; and at this press Abraham

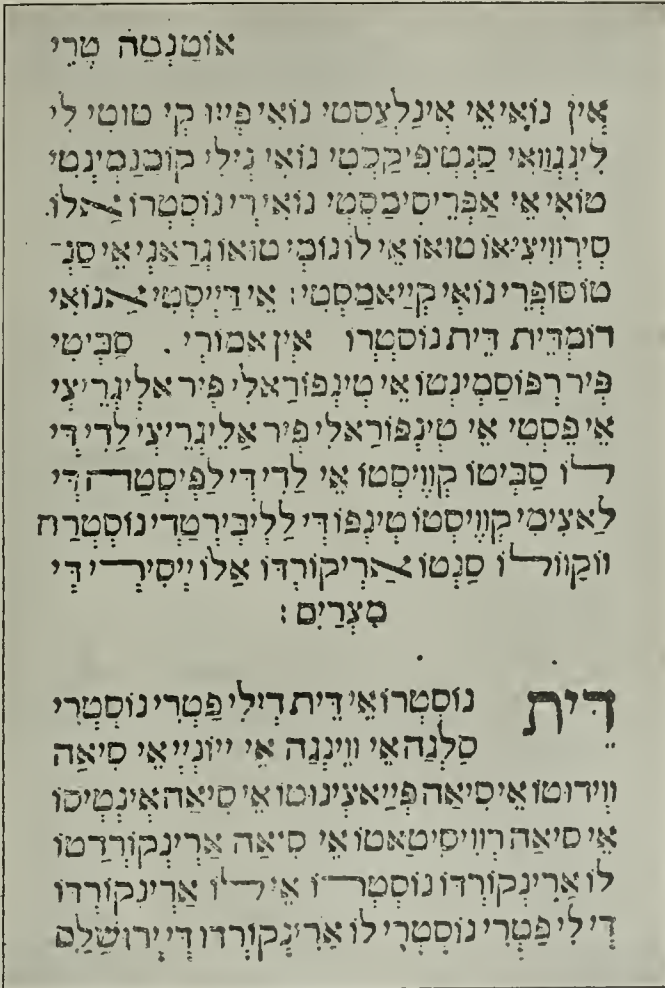

For more detailed information, see De Rossi, "Annales Hebraeo-Typographicæ," § xv., passim; *idem*, "De Hebraicæ Typographiæ Origine," passim; M. Schwab, "Incunables Orientaux," Nos. 5, 23, 24, 467, 472, 473, 476, 484, 489, 495, 514; Freimann, in "Centralbl. für Bibliothekswesen," xix., part 3. In the university library of Bologna is a collection of about twenty-eight volumes of Hebrew MSS. which have been described by Leonello Modono in "Cataloghi Codici Orientali di Accademia Bibliotechæ d'Italia," Florence, 1878, pp. 323 *et seq.*

**BOMBAY, INDIA.** See BENI-ISRAEL, INDIA.

**BOMBERG, DANIEL:** Christian printer and

publisher of Hebrew works; born at Antwerp; died at Venice in 1549. After having learned from his father, Cornelius, the art of printing and of type-founding, he went to Venice, where, from 1517 to 1549, he published many editions of Hebrew works, including the following: The editio princeps of the "Biblia Rabbinica" (מקראות גדולות), the Hebrew Bible with commentaries and three Chaldaic versions or Targumim; the first Hebrew Bibles; editions of and commentaries on the Pentateuch and other Biblical books; many grammatical and lexicographical works; philosophical and ethical treatises; rituals; Mekilta; Sifra; Sifre; parts of the Mishnah;

"Tefillot Latini." Italian Jewish Prayers Printed in Hebrew Characters, Bologna, 1538. (In the Library of Columbia University.)

ben Hayyim de Tintori printed the first edition of the Pentateuch, with Onkelos and Rashi, which was finished Jan. 26 of the same year (Zunz, in Geiger's "Wiss. Zeit. für Jüd. Theol." v. 38; Steinschneider, *ib.* col. i.). It is supposed that the edition of the Five Scrolls with Rashi to the whole, and Ibn Ezra to Esther, was issued from Caravita's press, and in the same year (De Rossi, *ib.* i. 130; Steinschneider, *ib.* No. 1031). Again, in the sixteenth century a Hebrew printing-press was active, notably between the years 1537 and 1540, when a company of silk-weavers furnished the means for this work. The following is a partial list of the publications during this period:

In 1537, Joseph ben David ibn Yahya's (the younger) "Torah Or" (Steinschneider, *ib.* col. 1477); Obadiah of Sforza's (the elder) "Or 'Ammim" (*ib.* col. 2076); (May 15), "Roman Ritual," together with Elijah Zaken's "Seder Ma'areket" (*ib.* No. 2074); in 1538, Joseph ben David ibn Yahya's (the younger) commentary to the Five Scrolls and the Hagiographa (*ib.* col. 1476); Menahem de Recanat's "Piske Halakot" (*ib.* col. 1737); Judah be-Hasid's "Sefer ha-Hasidim"; ed. Abraham ben Moses Cohen (*ib.* col. 1321); "Tefillot Latini," Italian in Hebrew characters, the text vocalized (*ib.* No. 2436); in 1539, Solomon ben Adret's "Teshubot" (*ib.* col. 2273); in 1540 (Oct.), "Mahzor," Italian rite, with the commentary of Johanan ben Joseph Trèves to the whole and that of Obadiah Sforza to Pirke Abot (*ib.* No. 2579);

several Midrashim; and, under the auspices of Pope Leo X., the first complete editions of the Babylonian Talmud (with the commentaries of Rashi, Tosafot, and R. Asher b. Jehiel) and the Jerusalem Talmud. In the selection and editing of works to be printed he was assisted by Hiyya b. Meir (for Isserlein), Baruch Adelskind (for Colon), and Jacob b. Hayyim (for the Talmud), and others. The following is an approxi-

	Jacob Weil's Responsa.....1549

Though not actually the father of Jewish typog-raphy, as he is sometimes called, Bomberg began a new epoch in that art, and during the latter part of his life had many rivals and imitators even at Venice: these including Fran-cesco Brucello, the two Dei Farri brothers, Marco Antonio Giustiniani, the Bragadini, Jean de Gara, and Zan-etto. Some of these having won from Bomberg his ablest assistant, Cornelius Adelkind, acquired

**His  
Typog-  
raphy.**

considerable wealth in their profession; but Bomberg himself expended so much money on the paper, en-gravings, and types for which his works were noted, that before his death he had lost almost his whole fortune.

**BONA SFORZA:** Polish queen; born 1493; died 1557; second wife of King Sigismund I. She was remarkable for her beauty and energy, but thoroughly hated in Poland for her intrigues and avarice. She sold high government offices, and her courtiers and "voyevod's" were bribe-takers. Her favorite, the influential crown marshal, Peter Kmita, obtained bribes simultaneously from both Jewish and Christian merchants, promising either party to protect its interests at the Diet or before the king. During the last years of Sigismund's reign Queen Bona not only assumed equal sovereign power with him, but often exercised absolute rule.

There are many documents extant granting privi-leges to the Jews in Bona's name, which privileges were confirmed by subsequent rulers of Poland (see SIGISMUND I., THE OLD; SIGISMUND AUGUST, and POLAND).

SEPH.** See AZARIA B. JOSEPH.

**BONAFOS, MENAHEM BEN ABRAHAM** (called also Bonafoux, Abraham of Perpi-gnan): French philosopher; flourished at the end of the fourteenth century and at the beginning of the fifteenth. He was the author of a work en-titled "Sefer ha-Gedarim" (Book of the Definitions), or, as it is also called, "Miklal Yofi" (Perfection of Beauty), a dictionary of technical expressions in Hebrew works on philosophy, ethics, and medicine, especially the terms found in the "Guide of Per-plexed." The author aimed rather to give a clear explanation of the terms than their etymology, though drawing sometimes upon Arabic and Greek for help in his explanations. The work was pub-lished with some notes by Isaac אר״י (probably "Arroyo") at Salonica in 1567, and at Berlin in 1798, with a Hebrew commentary by Isaac Satanow. to influence his brother, Crescas Vidal of Perpignan, against the study of philosophy. Bonafos' two letters to his brother are printed in the collection "Minhat Kena'ot" (pp. 45, 491, Presburg, 1838). To Moïse-Nathan, author of the ethical poem entitled *התענות היים* (printed in the *ידות* of Menahem Lonzano, pp. 142-150, Venice, 1638) (MSS. Paris, No. 1284, 1), were addressed some pieces of verse on the subject of his writing, and one of these was composed by Bonafos Vidal. Neubauer, however, doubts whether this is the same rabbi who was connected with the disputes of Abba Mari. The identity of Bonafos with Bonafos Vidal of Salon, whose name is given as the owner of a manuscript now in Rome (Vatican, No. 107, 7), is not clear. This manuscript contains a prayer for the Feast of Purim, composed by Kalonymus b. Kalonymus.

**BONAFOUX, DANIEL ISRAEL:** An active adherent of Shabbethai Zebi; lived at Smyrna in the seventeenth century. He was not disappointed when the apostasy of the latter was announced. At Shabbethai's death he pretended to have had visions and to have received the gift of prophecy. He maintained that Shabbethai was not dead, but bidden, and that he would reappear after forty-five years.

People at that time were so excited that every charlatan found followers. Realizing the danger of such a state of things, the rabbinate of Smyrna addressed itself to the *cahi* and obtained the banishment of Bonafoux. He then settled with his followers at the small town of Kasaba, near Smyrna, where he continued his preaching. At the same epoch, Abraham Michael Cardoso, the founder of cabalistic dualism, who had been banished from Tripoli for misconduct, arrived at Smyrna and found in Bonafoux a warm friend. The agitation begun by Bonafoux lasted for several years, until he, like his master, Shabbethai Zebi, embraced Islam.

**BONAFOUX, MENAHEM B. ABRAHAM.**  
See BONAFOS, MENAHEM B. ABRAHAM.

**BONALD, LOUIS-GABRIEL-AMBROISE:** French philosopher, politician, and anti-Jewish writer; born Oct. 2, 1774; died at Nomma Nov. 23, 1840. Being opposed to the Revolution of 1789, he emigrated in 1791 and settled at Heidelberg, where he wrote his first important work, "*Théorie du Pouvoir Politique et Religieux dans la Société Civile*," which was condemned by the Directorate. Later he returned to France, and became the leader of the political and ecclesiastical reaction. He endeavored to reduce the Jews to their former degraded position.

In an article, "Sur les Juifs," in the "*Mercure de France*," Feb. 8, 1806, Bonald repeated the usual anti-Semitic accusations. The burden of his tirade was that the Jews were at war with morality, that

they formed an "imperium in imperio," and that the majority of them were parasites. Before Jews could be emancipated they must be uplifted morally and religiously; in other words, they must embrace Catholicism. The French Jews, not realizing the full import of Bonald's attacks, did not defend themselves energetically enough; only Moses Pinado of Berdeaux replying to his diatribes.

After the Restoration, Bonald became a member of the council of public instruction, and from 1815 to 1822 he sat in the Chamber as a deputy. His speeches and votes were invariably on the extreme conservative side. From 1816 onward he was a member of the Academy; and in 1830 he retired to his country seat, where he remained till his death.

**BONAN, DAVID:** Rabbi of the Livornian community of Tunis; died in that city in 1850. After his death his family defrayed the expenses of the publication of his works, "*Nishal David*," "*Ohel David*," both containing responsa (Leghorn, 1857); "*Mo'ed David*," a commentary on "*Abodat ha-Kodesh*" of Solomon Adret (Jerusalem, 1887); "*Ma'aneh David*," and various treatises on ritual divorce (*ib.* 1889). In collaboration with Judah Levy of Gibraltar he wrote "*Dai Hashab*"—responsa on the command to women not to show their hair (Leghorn, 1846); and "*Dai Heshib*"—a commentary on the treatise *Sanhedrin* (*ib.* 1846). He also edited some works of his father and of others.

M. K.

**BONAN, ISAAC:** Author; father of David Bonan; lived in Tunis at the end of the eighteenth century. After his death the following works of his were published: "*Ohole Yizhak*" (Isaac's Tents)—commentaries on several treatises of the Babylonian Talmud and on the *Yad ha-Hazakah*, Leghorn, 1821; "*Ohel Yesharim*" (The Tent of the Righteous)—Talmudic novella in alphabetic order, Leghorn, 1846; and, added to this latter work, "*Berit Abraham*" (Abraham's Covenant)—commentaries on the Pentateuch, the Psalms, the Proverbs, and other books, as well as on the Passover Hag-gadah.

**BONAPARTE, NAPOLEON.** See NAPOLEON I.

**BONASTRUĆ DESMAËSTRE** (רסמאטרי) (called also *Astruc Maestre* or *R. Astrug*): Spanish controversialist at the disputation at Tortosa 1413-14. Bonastruc was a prominent citizen in Gerona. When, under a penalty of 1,000 florins, he was summoned to appear with his fourteen-year-old son and his little granddaughter before the queen dowager of Aragon in order to defend himself against a charge brought against his family, the lawyers of the town interceded in his behalf (April 21, 1411) before the council of the queen dowager, seeking to excuse his absence, and saying that it would be impossible for him to obey the royal summons, since

the hostility against the Jews rendered the journey dangerous (see Girbal, "Los Judios en Gerona," p. 35).

In February of the same year Bonastruc wrote to Zerachiah ha-Levi, called Don Ferrer Saladin, concerning a lawsuit which he was prosecuting, in consequence of the betrothal of his son Bonastruc with a young orphan already affianced to another ("Rev. Et. Juives," xv. 34). Whether the summons to the presence of the queen was in any way connected with the lawsuit, or whether the letter of Bonastruc to Zerachiah ha-Levi was wrongly dated, has not been determined.

On Dec. 8, 1412, at the request of Pope Benedict XIII., Bishop Ramon de Castellar of Gerona, through a notary, invited Bonastruc, Azay (not Azag) Toros (Todros), Nissim Ferrer, Jaffuda (Judah) Alfaquim, and Bonastruc Joseph (the last-named not a physician) members of the Jewish community of Gerona, in order to communicate to them the letter from the pope requesting the city to send four, or at least two, of its most learned men to the disputation at Tortosa, adding, "et quia Bonastruch maestre eruditus in talibus asserrit, ipsum volumus inter ceteros principaliter transmittatis, ministrando eis expensas seu salaria in similibus assueta" (Girbal, *ib.* pp. 35, 83). Hence Bonastruc, together with the rabbis Todros and Ferrer, was sent as a delegate from Gerona. Bonastruc, who disputed with Geronimo de Santa Fé on Feb. 10, 11, and 15, on one occasion aroused the anger of the pope (who was present) to such an extent that his fellow-delegates became frightened, and on their return bitterly reproached him, saying: "We had not agreed among ourselves to speak as you have done." It is noteworthy that Bonastruc, together with the rabbis Todros and Ferrer, the delegates from Gerona, conducted the dispute. The report sent as a circular letter to the community at Gerona was probably not written by Bonastruc.

**BONASTRUC, ISAAC:** Rabbi at Palma in Majorca at the end of the fourteenth century; probably born in Barcelona. After the loss of his entire fortune during the persecutions of 1391, he went to Algiers and forced his services as rabbi upon the Jewish community there, stipulating for an annual salary of thirty doubloons. Bonastruc had shown himself quarrelsome in Palma; and after his advent in Algiers he opposed Isaac ben Sheshet, who had been installed as rabbi by the Jewish community. Bonastruc even tried through slander to drive the latter from his position. Together with Simon Duran and Isaac ben Sheshet, he officiated for a number of years in the rabbinate.

**BONAVOGLIO (HEFEZ), MOSES, OF MESSINA:** Sicilian physician; born at the end of the fourteenth century; died 1447. Renowned for his learning and eloquence, he was deputed in 1428 by seventeen Jewish communities of Sicily to wait on King Alfonso V. for the purpose of obtaining the abrogation of anti-Jewish laws enacted in that year. Bonavoglio succeeded in his mission, and gained the favor of Alfonso, who appointed him his physician and counselor. At the death of Joseph Nesia, Bonavoglio was elected chief rabbi ("naggid") of Sicily.

**BONDAVIN, BONJUDES:** Physician; lived at the end of the fourteenth century and the beginning of the fifteenth. He practised medicine at Marseilles from 1381 to 1389, and in 1390 went to Sardinia, settling at Alghero. In addition to his medical skill, Bondavin possessed great knowledge of Talmudical literature; and the Jewish community of Cagliari elected him rabbi. The king confirmed this election and extended Bondavin's jurisdiction over all the Jews of Sardinia. This official post gave him much influence, and he was admitted among the high dignitaries who attended King Martin II. when the latter sojourned at Cagliari. Bondavin carried on a scientific correspondence with Isaac ben Sheshet Barfat (Ribash), who answered the question propounded to him in his *Responsa*, No. 171.

I. BER.

**BONDI, ELIJAH BEN SELIG:** Austrian preacher; born at Prague at the end of the eighteenth century; died there about 1860. He studied Talmud at Presburg under the direction of Meshulam Tismenitz, and later at Alt-Ofen with Moses Münz. In 1826 he was appointed preacher in his native town, a position which he held until his death.

Bondi was the author of two series of sermons, published at Prague, 1832-56: (1) "Sefer ha-She'arim" (Book of Gates), containing philosophical homilies on various ethical subjects, collected from Bahya, Judah ha-Levi, Albo, and others; (2) "Tiferet Adam" (The Beauty of Man), forming the second part of "Sefer ha-She'arim," and containing extracts from religious philosophical works.

I. BR.

**BONDI, JONAS:** American rabbi; born at Dresden, Saxony, July 9, 1804; died at New York March 11, 1874. He was educated at the University of Prague and in the theological circles of that city. He was president of the synagogue of his native city, and in 1859 came to America, where he accepted the position of rabbi-preacher in the Norfolk street ("Anshe Chesed") congregation of New York city. He served there but one year, when he became the proprietor and editor of a Jewish paper, "The Hebrew Leader," published in English and German. One of his daughters, Selma, became the wife of Isaac M. Wise of Cincinnati.

A.

**BONDI, MORDECAI (Marcus):** German author; lived at Dresden in the first quarter of the nineteenth century. He wrote, together with his brother Simon Bondi, the "Or Ester," a Hebrew dictionary of the Latin words occurring in the Talmud, Targumim and Midrashim. Some of his essays are also extant in the periodical "Jedidja" (i. 117-125; iii. 72, 196; iv. 35).

**BONDI, NEHEMIAH.** See BONDI, ABRAHAM B. YOM-TOB.

**BONDI, PHILIP (Jacob Koppel):** Austrian rabbi; born at Jinoschitz, Bohemia, Feb. 26, 1830. After having received a good education at home under the care of his father (Samuel), Bondi entered the gymnasium at Prague in 1844, and studied Talmud and Rabbinica under Raphael Schulhof and Solomon J. Rapoport, who in 1852 conferred upon him the title of Morenu. Continuing his philosophical studies, Bondi in 1857 received his doctor's degree from the University of Prague and his rabbinical diploma from Aaron Kornfeld and Daniel Frank, whose yeshibah he had attended.

In the same year he taught at Budweis, and from 1859 to 1868 at Kassejovic. From 1868 to 1876 he was rabbi at Brandeis. Being a strong partizan in the Bohemian movement, he was appointed preacher in the vernacular by the newly founded Jewish-Bohemian society, Or Tamid (Continual Light), at Prague, after whose collapse he became a teacher

of religion at the Bohemian Jewish schools, and rabbi at the synagogue founded by Porges.

In 1886 he published five Bohemian sermons under the title "Kol Ya'akov" (Voice of Jacob). He also began to publish a Bohemian translation of the Pentateuch.

**BÔNE (BONA)** [Arabic, Beled el-'Anab]: Town in the province of Constantine, Algeria, called by the Romans "Hippo Regius." It had many Jewish inhabitants as early as the first centuries of the common era, as is attested by several epitaphs found in the environs of the place. Like the Jews of other communities in Mauritania, those of Bône suffered many vicissitudes. Under the dominion of pagan Rome they enjoyed complete freedom, even making many proselytes among the Kabyles, their neighbors; but in the fourth century, when the city became the see of Augustine, they began to suffer persecution. In 431 Bône was destroyed by the Vandals, and was not rebuilt until the seventh century, this being done by the Arabs.

There are no records concerning the date of settlement of Jews at Bône after its reconstruction; but it may be supposed that the city, which, according to Ibn Haukal, was very prosperous in the tenth century, attracted many of them. The second half of the twelfth century brought disaster to all the Jewish communities in the Maghreb, particularly that of Bône. The fair treatment of the Jews during the dynasties of the Aglabites and Almoravides was followed by the terrible persecutions by the fanatical Almohades; and many of them were compelled either to immigrate to the East or to embrace Islamism. In 1152 Roger of Sicily led away captive all the inhabitants of Bône. During the fifteenth century, in consequence of the exile of the Jews from Spain, the Jewish community of Bône greatly increased; but at the beginning of the sixteenth century the city fell into the hands of the Spaniards, and the Jews underwent many sufferings. In 1541, however, the defeat of Charles V. before Algiers freed the community of Bône, and during the Turkish domination it enjoyed a fair amount of religious freedom.

Like all Algerian communities, Bône was governed by a "muḳaddam," assisted by a council ("Tobe ha-'Ir"). Since the French conquest of Algeria the system of consistories has been introduced, and Bône belongs to that of Constantine, having at its head a rabbi and a president. The Jewish community of the city contains 1,000 souls. It possesses an old synagogue called "Al-Gharibah" (The Wonderful), which is held in great veneration even by the Arabs, on account of a scroll of the Law which is said to have been miraculously preserved there.

**BONET, JACOB BEN DAVID BEN YOMTOB (BONJOB)**: Spanish astronomer; lived probably at Perpignan in the fourteenth century. He was the author of astronomical tables prepared at Perpignan in 1361. These tables, still extant in manuscript (Bibliothèque Nationale, Paris, MS. No. 10,901; Neubauer, "Cat. Bodl. Hebr. MSS." No. 2072, 2), enjoyed a great reputation. They were translated into Latin in the fifteenth century, and were the subject of many Hebrew commentaries, among which was one written by Joseph ben Saul Kimḥi (Vatican MSS. Nos. i., v., 1, 7). Many manuscripts of these tables were retranslated from Latin into Hebrew.

**BONET DE LATES** or **LATTES** (known in Hebrew as **Jacob ben Immanuel Provinciale**); Physician and astronomer; known chiefly as the inventor of an astronomical ring-dial by means of which solar and stellar altitudes can be measured and the time determined with great precision by night as well as by day; lived in the latter part of the fifteenth century and the beginning of the sixteenth. Originally from Provence, and belonging to a family that had its origin in Lattes near Montpellier, he was forced to leave Provence with the rest of his brethren and settled in Carpentras. Thence he went to Rome, where he became physician to Pope Alexander VI. (1430-1503), and later to Pope Leo X. (1503-13). At this time he became

III.—20

rabbi of the Jewish community, to which he was able to render much assistance. He married the daughter of the physician Comprat Mossé of Aix. Bonet described the use of his instrument in a treatise written in Carpentras, the full title of which is: "Boneti de Latis, Medici Provenzalis, Annuli per eum Composti Super Astrologie Utilitate." It appeared as a supplement to the "Calculatio Composita in Rima de Juliano de Dati," Rome, 1493, and was dedicated to Pope Alexander VI. At the end Bonet craves pardon for his bad Latin, on the score of being a Hebrew. The treatise was republished by Jacob Faber of Etaples, together with his own commentary on John Sacrobosco's "De Sphæra Mundi" and Euclid's "Geometry," Paris, 1500. Editions were also published in 1507, 1521, and 1534. Two editions appeared later at Marburg, in 1537 and 1557. In bad Latin, Bonet wrote a treatise entitled "Prognosticum," published at Rome in 1498, and dedicated to cardinals Valentiniani and De Borgia, in which he predicted the coming of the Messiah in the year 1505. A full account of the book is to be found in Abraham Farrisol's manuscript, "Magen Abraham," or "Wikuah ha-Dat."

A pupil of the above-mentioned Jacob Faber, Charles Bovillus, 1470-1553, relates in the preface to his "Dialogi de Trinitate" that he met Bonet de Lates in the Roman ghetto in 1507, and went to his house in order to see the ring that he had invented. The top part of the house was a synagogue containing the ark, hidden by a curtain, and books, lamps, and praying-scarfs. Here, also, Bonet's thirty-two-year-old son was discovered deeply immersed in the study of philosophy. Toward the end of the nineteenth century, in dredging the Tiber a long marble slab was found with the inscription הרב מיסר בניט יצו, which had probably been affixed to this house of Bonet's. Bovillus refers, also, to a lengthy theological argument that he had with Bonet, and he seems to imply that the son was in the end convinced of the truth of the Christian faith.

It is evidence of the position held by Bonet at the papal court that on Oct. 13, 1513, Reuchlin begged him to use his influence in order that the examination of the "Augenspiegel" should not be given into the hands of a commission made up of strangers, at all events not of Dominicans. Further, Bonet's intercession seems to have been successful.

Bonet is known to have had two sons. One, Joseph, continued to remain in the papal favor; the other, Immanuel, was also in the service of the pope, from whom he received a regular salary.

G.

**BONET DE LUNEL, SEN** (i.e., "Senior"): French author of the Middle Ages. He wrote a supercommentary on Ibn Ezra's Bible commentary, which is mentioned by Nathaniel Caspi in his commentary on the "Cuzari," written in 1387, and is still extant in manuscripts (among others, in "Cat. Bodl." No. 1229).

**BONET B. MESHULLAM B. SOLOMON.**

See ABIGDOR, ABRAHAM.

**BONFED, SOLOMON BEN REUBEN:**

Rabbi at Saragossa, and poet; lived at the end of the fourteenth century and the beginning of the fifteenth. His diwan, still extant in manuscript (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1984), is interesting intrinsically, as well as for the historical information contained in it. Bonfed was present at the controversy of Tortosa (1413-14); and many of his poems are addressed to those who took part in it.

The diwan contains also an answer, in rhimed prose, to a letter of the converted Jew, Astruc Raimuch of Fraga, in which the neophyte enthusiastically propounds the dogmas of Christianity, and endeavors to demonstrate the Trinity, Original Sin, and Redemption, from the Bible. Apologizing for discussing the contents of a letter not addressed to him, Bonfed minutely examines the Christian dogmas, and proceeds to show how irrational and untenable they are. He says: "You twist and distort the Bible text to establish the Trinity. Had you a quaternity to prove, you would demonstrate it quite as strikingly and convincingly from the Old Testament."

I. BR.

**BONFILS, IMMANUEL BEN JACOB:**

Physician, mathematician, and astronomer; lived at Orange, France, and later at Tarascou, in the fourteenth century. He was the contemporary of the astronomer Levi ben Gerson of Bagnols. At one time Bonfils taught astronomy and mathematics at Orange. He was the author of the following works: (1) a treatise on the relation between the diameter and the circumference, followed by rules for extracting the square root, and with an explanation of a passage of the "Book of Creation," dealing with arithmetic (Bibliothèque Nationale, Paris, MS. No. 1290, 5); (2) arithmetical propositions respecting division, and extraction of the square root, and notes on astronomy (*ib.* No. 1081, 1, 2); (3) "Derek Hilluk" (Way of Division), notes on the decimal numbers (*ib.* No. 1054, 6); (4) "Bi'ur me-Luhot," treatise on the middle course of the planets (*ib.* No. 1054, 6); (5) table for the calculation of the declination of the sun; (6) "Luah Mattauah Tobah" (Table of Good Gift), on the determination of the planet Venus from 1300 to 1357; (7) "Bi'ur Asiyat ha-Istrolab," on the construction of the astrolabe (*ib.* Nos. 1050, 6; 1054, 2); (8) note on the cycles (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1483, 4); (9) "Kanfe Nescharim" (Wings of Eagles), or "Shesh Kenafayim" (Six Wings), a treatise on conjunctions, appositions, eclipses, etc. (this work enjoyed great popularity in the Middle Ages, being translated into Latin in 1406, commented upon by Chrysoceca, and the Hebrew text published by Nahmu Bibowitz, Jitomir, 1872); (10) "Ma'amar 'Erek ha-Hilluf" (Treatise on the Value of Inequalities), dealing with the inequalities of the course of the sun and the moon, and the necessity of taking into consideration

these inequalities in calculating conjunctions, appositions, eclipses, etc. (Bibliothèque Nationale, Paris, MS. No. 1054, 13); (11) astrological treatise on the seven constellations (*ib.* No. 1048, 4); (12) a commentary on a passage of Ibn Ezra's commentary on Ex. xxx, 2, relative to the Tetragrammaton (*ib.* No. 825, 8; MSS. Munich, Nos. 343, 386); (13) "Bi'ur 'al Mo'zene Hanok," commentary on the balances of Enoch and Hermes, mentioned in Abraham ibn Ezra's "Sefer ha-Moladot" (*ib.* No. 903, 1); (14) note on the nine comets, attributed to Ptolemy, but believed to belong to Bonfils; (15) "Toledot Alexander," the legend of Alexander, translated from the "Historia de Preliis" of Leon.

I. BR.

**BONFILS, JOSEPH B. SAMUEL** (Hebrew, **Tob 'Elem** = "Good Child"; called also **ha-Gadol** = "the Great"); French Talmudist, Bible commentator, and "payyetañ"; lived in the middle of the eleventh century. Of his life nothing is known but that he came from Narbonne, and was rabbi of Limoges in the province of Aujou (see Jacob Tam's "Sefer ha-Yashar," ed. Rosenthal, p. 90, and ed. Vienna, p. 74b; the passage is badly corrupted).

The activity of Bonfils was mauysided. A number of his decisions which earned the high esteem of his contemporaries and of posterity are to be found in the "Mordecai." These passages are enumerated in Kohu's "Mordecai b. Hillel," p. 137; in Maḥzor Vitry, and in many other codices and compendiums. Among his numerous legal decisions one deserving mention is that pronouncing money won in play an illegal possession, and compelling the winner to return it ("Haggahot Mordecai," upon Sanh. pp. 722, 723). Another important decision ordered a lighter tax on the Jewish farmer than on the merchant, for the reason that agriculture was less profitable than trade ("Mordecai," B. B. i, 481). Little is known of the collections of his responsa mentioned in Moses Alashkar's *Responsa* (ed. Sabbionetta, No. 60, p. 121a; No. 100, p. 162a), or of his collection of the responsa of the Geonim. His Bible commentaries, mentioned by some of the old writers, have also disappeared.

Bonfils devoted himself to restoring the correct texts of older works, especially the Masorah—works of the Geonim. His critical notes upon Judah's "Halakot Gedolot" and the "Seder Tannaim we-Amoraim" show marked departures from the current text.

The ability and activity of Bonfils are best judged from his contributions to the poetry of the synagogue, no less than sixty-two of his piyyuṭim occupying prominent places in the French, German, and Polish liturgies. These compositions

As a show that he was more than an ordinary poet (Zunz) among the Franco-German payyetañim of his time. Few equaled him in beauty of imagery and facility of expression. The poetry of the synagogue is furthermore deeply indebted to Bonfils for the introduc-

tion of the piyyuṭim into the prayers, in face of great opposition. Of his many piyyuṭim, the best-known is that written for the "Great Sabbath" (Sabbath before Passover), beginning with the words "Elohei ha-ruhot," and containing the rules for the Passover-cleaning ("bi'ur") and the narrative service for the evening. The importance of Bonifils is shown by the fact that the Tosafists in many places occupy themselves with the explanation of obscure points in this piyyuṭ. Samuel b. Solomon of Falaise, a French Tosafist, composed a commentary upon it.

Joseph Bonifils must not be confused, as he is by Azulai, with another scholar of the same name, who lived in 1200 and corresponded with Simḥah of Speyer (Responsa of Meïr b. Baruch of Rottenburg, ed. Cremona, No. 148).

**BIBLIOGRAPHY:** Azulai, *Shem ha-Gedolim*, l. 40a; Fuenn, *Keneset Yisrael*, pp. 472, 473; Gross, *Gallia Judaica*, pp. 308, 309; Landshuth, "Ammude ha-'Abodah," pp. 96-98; Luzzatto, *Beṭ ha-Ozar*, pp. 46b, 55b; Rapoport, Introduction to Cassell's ed. of the *Responsa of the Geonim*, pp. 4b, 6a, 7b; Zunz, *Literaturgesch.*, pp. 129-138; idem, *Z. G.* p. 61; idem, *G. V.*, 2d ed., p. 403; idem, *S. P.* pp. 179-180 (translation of a selihah); Schorr, in *He-Ḥaluz*, viii. 139; Neubauer, *Cat. Bodl. Hebr. MSS.* No. 1208, 3, containing a halakic treatise by Joseph Tob-'Elem, who is probably identical with this Bonifils.

L. G.

**BONGODAS CASLARI.** See CASLARI.

**BONGODAS COHEN:** Provençal physician; flourished in 1353. No details of his life can be ascertained. He was the author of a Latin work on obstetrics, still extant in a Turin manuscript (Pasini, cod. 80, 3). If Steinschneider is right, and "Cohen" (כהן) is a mistake for "Nathan" (נתן), Bongodas may be identical with Judah NATHAN, a Provençal writer on medicine and translator, between the years 1352 and 1358.

**BIBLIOGRAPHY:** Steinschneider, *Jewish Literature*, p. 368; idem, *Hebr. Uebers.* p. 306; Neubauer, *Cat. Bodl. Hebr. MSS.* col. 736.

G.

**BONGODAS, MEÏR BEN SOLOMON:** Provençal poet; lived at the end of the thirteenth century. He is quoted in the diwan of Abraham Bedersi, who was chosen arbitrator between Bongodas and Don Solomon in a controversy on the value of their Aramaic poems. According to Neubauer (in "Zunz Jubelschrift," p. 139), Meïr Bongodas is identical with Meïr ben Solomon Dels-Enfantz, to whom Jedaiah Bedersi dedicated his work, "Oheb Nashim."

I. Br.

**BONGORON or BONJORN, DAVID BEN YOM-TOB:** Astronomer; lived at Perpignan in the middle of the fourteenth century. The name "Bongorn" or "Bonjorn" is the Provençal equivalent of the Hebrew name "Yom-Tob," the Provençal Jews often prefixing to their own names those of their fathers. Judah Mosconi, in his supercommentary on Ibn Ezra, mentions Bongoron as one of the greatest astronomers of that time. Steinschneider connects the name of Bongoron with that of בונירון רבן, who was implicated in the divorce case of Bona Dona, daughter of En Astrug Caravida of Gerona, mentioned by Isaac de Lattes (Responsa, pp. 127-

139) and by Hisdai Crescas ("Zikkaron Yehudah," p. 23b). Steinschneider further supposes that Bongoron is identical with the astrologer and philosopher David ben Yom-Tob ibn Bilia, father of the astronomer Jacob Poel.

**BONIFACE VIII. (BENEDICT GAETAN):**

One hundred and ninety-eighth pope; born at Anagni, Italy; elected pope Dec. 24, 1294; died 1303. He succeeded Celestin V., who resigned six months after his election. Boniface cherished kindly feelings toward the Jews, and gave them many tokens of his solicitude for their welfare. The Roman Jews owed him much for having delivered them from a threatening danger. The Inquisition issued (Nov. 18, 1297) a bull according to which an accuser or witness could remain unrevealed to the accused when the latter was a person of influence. The Jews were naturally classed among the powerful persons; and a simple denunciation sufficed to condemn them. They appealed to Boniface; and the latter, by a bull dated June 13, 1299, declared all the Jews "unimportant" except those who were of recognized influence.

Boniface had for his physician a Jew named Isaac, to whom he was much attached.

I. Br.

**BONIFACE IX. (PIETRO TOMACELLI):**

Two hundred and eighth pope; born at Naples; elected pope Nov. 2, 1389; died at Rome in 1404. His pontificate was very favorable for the Jews in general and for the Roman Jews in particular. At the request of the latter, Boniface issued a bull in which he ordered the senators, the conservators, and all other functionaries of the city of Rome to protect the Jews from every kind of drudgery, overreaching, and violence, under the penalty of excommunication and a fine of 1,000 gold florins. The wearing of the badge by Jews was repealed. No Jew could be molested on a simple writ of an inquisitor, unless by a sealed order of a collateral of the curia; for, according to the bull, "all Jews and Jewesses residing in the city, and sojourning there with their families, must be treated as Roman citizens."

Boniface showed especial favor to the Jewish physicians Angelo di Manuele and Solomone de Sabalduchio of Perugia. The Senate had in 1376 exempted from all taxes the physicians Manuele and his son Angelo, and their families, residents of Rione Trastevere, for services they had rendered as physicians to the Roman citizens, and chiefly to the poor. This favor was enforced on Aug. 8, 1385, by the Senate, which accorded the Jewish community of Rome a yearly reduction of 30 florins for the taxes of Manuele and Angelo. July 1, 1392, Boniface appointed Angelo his "familiaris" and physician, and confirmed, by a bull issued April, 1399, the special diplomas of Roman citizenship delivered by the Senate to Angelo and his father. On Oct. 23, 1392, he appointed the physician Solomone de Sabalduchio his "familiaris," and bestowed upon him many favors.

**BIBLIOGRAPHY:** The bulls are published in Stern, *Urkundl. Beiträge zur Stellung der Päpste*, pp. 17, 18; *Revue Orientale*, li. 461; Berliner, *Gesch. der Juden in Rom*, i. 62; Vogelstein and Rieger, *Gesch. der Juden in Rom*, i. 317 et seq. G.

**BONIHOMINIS, ALPHONSUS.** See ALPHONSUS BONIHOMINIS.

**BONIRAC** (perhaps = Bon Isaac), **SOLOMON:** Spanish translator; lived at Barcelona in the middle of the fourteenth century. He translated from the Arabic into Hebrew Galen's medical work on the crisis, under the title, "Sefer Buhran" (Book on Vapors). The translator probably possessed no Hebrew expression for "crisis," and so preserved the Arabic word "buhran" used by the Arabic translator, Honein ibn Ishak. The "Sefer Buhran" is still extant in manuscript at Leyden (Scaliger, 2, 15).

I. Br.

**BONN:** City in Rhenish Prussia. It had a Jewish community at an early date. Ephraim ben Jacob of Bonn (b. 1133), as a boy of thirteen, was among the Jews who, in September, 1146, sought refuge from the Crusaders in the fortress Wolkenberg near Königswinter. He has left a graphic description of the persecutions under the Crusades. He is also known as a Talmudic and liturgic writer. The Tosafist Joel ben Isaac of Bonn, author of several *sefihot*, also lived about this time. Jews of Bonn are often mentioned in the Jewish congregational archives of Cologne during the thirteenth and fourteenth centuries. In June, 1288, calamity fell upon the community, and many Jews, including Rabbi Meir ben Alexander, who had formerly been rabbi at Cologne, were slain. New sorrows came with the persecutions during the Black Death, Bonn being one of the places of martyrdom in the year 1349. The Jews of Bonn were further oppressed by taxes, as the emperor Frederick I. compelled them to pay 400 marks to the archbishop of Cologne.

The community, which was not an unimportant one in the Middle Ages, was considerably increased by the Jews expelled from Cologne in 1426; it was estimated to number 200 persons, and had to pay a yearly assessment of 1,500 reichsgulden. Documents show that the present "Judenuergasse" was called "Judengasse" in 1578.

In 1587 Martin Schenk, whom Queen Elizabeth of England had sent to aid the party of the lord high steward, took possession of Bonn, murdered and plundered in the Jews' quarter, and made many prisoners, who subsequently had to be ransomed for large sums. Among the prisoners was Rabbi Reuben Fulda, the teacher of the historiographer David Gans. The baptized butcher Kraus, who has become proverbial through his denunciations, was also a native of Bonn. In the first half of the seventeenth century he kept the Jews on the Rhine in a continuous state of terror. Another native of Bonn was Abraham Breitingen, father-in-law of the Frankfurt scholar Juspa Hahn; he as syndic successfully opposed Kraus.

The Jews fared better during the Thirty Years' war. The above-mentioned Hahn narrates that the

Protestants of Bonn hid their property in the ghetto. Later, however, the Jews were subjected to many annoyances. In 1651 their cattle trade was restricted, all Jews not under the protection of the government were expelled, and the maximum rate of interest which they were permitted to take was fixed at 12 per cent. In 1747 and 1750 electoral ordinances had to be issued prohibiting Christians from insulting and threatening Jews. In 1755, when severe earthquakes terrified the people of the Lower Rhine and Bonn, Rabbi Samuel Ashkenazi and Mordecai Halberstadt,

Synagogue at Bonn.

(From a photograph.)

rabbi at Düsseldorf, designated several psalms for a service of prayer, and wrote a penitential invocation ("tehninah") for the occasion. On Feb. 27, 1784, all the Jews fled from the ghetto, which was almost entirely destroyed by an overflow of the Rhine. In this time of distress Moses Wolf (died 1802), physician to the elector, and the president of the community, Baruch ben Simon, were especially conspicuous for their unselfish activity. Simon Kopenhagen of Bonn has described these occurrences in a Hebrew book entitled "BeKi Naharot," Amsterdam, 1785. The French Revolution saved the Jews of Bonn.

In 1798 the great procession of the "Cisrhenanes," proceeding by way of the Vierecksplatz, went to the Judengasse, where they determined upon an especially solemn act, intended as an announcement to the Jews, by a memorable sign, that they would henceforth be citizens with equal rights. For this purpose several carpenters had been included in the

procession, who cut down the gate of the Jewry; Jewish girls were then taken into the procession and led triumphantly through the city. In 1808 the Jews were compelled to take personal names and surnames. The city of Bonn became the seat of a consistory founded by Napoleon. In 1865 a Jewish congregation was formed in conformity with the law of 1847; the new synagogue on the banks of the Rhine was dedicated in 1879. In 1902 the community numbered 900 persons.

In the twelfth century the Tosafist Samuel ben Natronai, the halakist and liturgic poet Joel ben Isaac ha-Levi, and his friend Ephraim ben Jacob, also known as liturgic poet, lived at Bonn. In the fifteenth century the scholar Solomon of Bonn, and a teacher, Mordecai Sachs, were there. Reuben Fulda, as stated above, was rabbi there in the sixteenth century, and was succeeded by Hayyim Treves, son of Johanan Treves, known as a Maḥzor commentator, who died at Ahrweiler

**Scholars and Rabbis.** in 1598. Joseph Ashkenazi, who later was rabbi at Metz; Moses Birgel; Naphtali ben Kalonymus; and Judah Ashkenazi, who was buried at Bonn in

1688, were among the rabbis of the seventeenth century. In the eighteenth century several physicians, including Moses ben Abraham Wolf (mentioned above), lived at Bonn. Among the rabbis was Judah Mehler, formerly rabbi at Cleve (born 1661 at Bingen; died at Bonn 1750). He was succeeded by Samuel Ashkenazi (d. 1766), formerly at Peine near Hildesheim; then came Isaac Rapoport, who died 1788. The first rabbi of the consistory was Simḥah Bunem Rapoport, appointed in 1788, died 1816; he was the author of several halakic works. He was followed by Abraham Auerbach, who, in 1837, resigned ostensibly on account of his great age, but really in order that his son might succeed him. In fact, he contrived to have his son elected as soon as he announced his resignation, without giving time to candidates to present themselves. This election caused much agitation in the community, and a protest against its illegality was brought before the president of the province of Cologne. A new election was ordered by the government, and Auerbach's son was elected for the second time. He was succeeded in 1877 by Emanuel Schreiber, and by Falk Cohn (1882-1902).

G. A. F.

**BONN, JONAS BEN MOSES:** Physician; lived in Frankfort-on-the-Main in the seventeenth century. Though not in the employ of the community, his name is subscribed to the articles of agreement drawn up in 1656 between the congregation of Frankfort and its physicians, Solomon Bing and Abraham Hein. According to these articles, the Jewish physicians pledged themselves not to attend patients who were not members of the congregation without the permission of two elders of the synagogue. They also promised to visit the poor gratis; to respond to calls day and night; not to attend to any patient outside of the Jewish quarters; and not

to accept the presidency of the congregation before the age of sixty.

**BONSENIOR, SOLOMON.** See YEKUTIEL B. SOLOMON.

**BONSENIOR, IBN YAḤYA:** Chess expert. No details of his life can be obtained. The name is probably Provençal, and he lived certainly not later than the fifteenth century. Bosenior was the author of an interesting work on chess, entitled "Melizat Seḥok ha-Ishḥaki" (Essay on Chess-Playing), first published at Mantua in 1557. It was translated into French by Leon Hollaenderski, and published, together with Ibn Ezra's "Ma'adane Melck" on the same subject, under the title "Délices Royales on le Jeu des Echecs, . . . par Aben Ezra et Aben Ye'hia, Rabbins du XII<sup>e</sup> Siècle" (Paris, 1864).

G. I. Br.

**BONSENYOR, ASTRUC** (in Spanish chronicles, **Struch** or **Nastruch** = **En Astruc**): From 1259, if not earlier, dragoman and Arabic secretary to Jaime I. of Aragon; died 1280. He was a native of Barcelona. He accompanied the king on his campaigns, acting as interpreter, and in that capacity rendered valuable services. In 1265 the king sent him as one of a commission to Murcia, to deal with the besieged Saracens.

Bonsenyor stood in special favor with the king, who gave him permission to add doors and windows to his house, which was in the Jewish quarter and adjacent to the Plaza del Rey and the Monastery of San Domingo. He was also allowed to make other architectural changes. He is mentioned in a Barcelona document of the year 1258 (Jacobs, "Sources of Spanish-Jewish History," No. 159).

G. M. K.

**BONSENYOR, ASTRUC:** Grandson of Astruc Bosenyor, the dragoman of Jaime I. of Aragon; father of Judah Bosenyor. He was a physician in Barcelona, and in the year 1334 was accorded the privileges which had been enjoyed by his grandfather.

G. M. K.

**BONSENYOR, ISAAC:** Son or grandson of Judah Bosenyor; lived in Barcelona; in 1391 became a Christian, and took the name Ferrario Gracia de Gualbis.

G. M. K.

**BONSENYOR, JUDAH (Jaffuda):** Notary-general of Aragon, and translator from the Arabic; son of the elder Astruc, and, like his father, interpreter, first to Alfonso III. and then to Jaime II.; died about 1334. In 1287 he accompanied Alfonso III. on his war of conquest against Minorca; and

seven years later (1294) Jaime II. appointed him notary-general for the kingdom and the royal dependencies. By virtue of this appointment all merchants doing business in the country who were acquainted only with the Arabic language, and who desired to have documents translated from the Arabic into Spanish, or duplicated, or acknowledged, were forced to appear before Bonsenyor or his representative.

In 1305 Jaime II. granted him a passport to enable him to visit Provence, probably in the interests of Jewish studies, which at that time were proscribed. On Nov. 4, 1310, as a sign of royal favor, and by the influence of the king's body-physician, John Amely, Bonsenyor was exempted from all taxes, whether personal or public, to which the Aljama of Barcelona was subject. The king also ordered that neither Bonsenyor nor his children should be molested on account of unpaid taxes, and that he should be at liberty to enter or leave the "Juderia," or Jewish quarter, at will. Bonsenyor was especially honored when the king ordered him to gather Arabic maxims and translate them into Catalan for the use of the princes. This collection, which for centuries remained in manuscript, was published in part in "Documentos Ineditos de la Corona de Aragon," vol. xiii., and in the "Revista Catalana" (1889). The same year this work, copied from a manuscript in Palma, appeared complete under this title: "Jehuda Bonsenyor, Libre de Paraules e Dits de Savis e Filososfs, Los Proverbis de Salomo, . . . per Gabriel Llabrés y Quintana" ("Biblioteca d'Esriptors Catalans"; Palma, Majorca, 1889). Jacob Zadik de Ucles undertook a Spanish translation of this work in 1402 under the title "Libro de Sabios é Philosophos."

The sayings gathered by Bonsenyor are 753 in number and are divided into 67 chapters. Because of their terseness and their bearing upon local conditions, they are used to this day by the people in Majorca and Catalonia. Some of them are exceedingly pithy and to the point, such as: "Whoever answers quickly, errs easily"; "Whoever hears badly, answers badly"; "Wealth has its own nobility"; "Too many sailors will sink the ship," which corresponds to the English proverb, "Too many cooks spoil the broth." Bonsenyor took most of this collection from Hebrew adaptations of Arabic originals; a part is taken bodily from a similar collection, the "Mibhar ha-Penimim," by Solomon ibn Gabirol.

**BIBLIOGRAPHY:** Gabr. Llabrés, as quoted, on Introduction and Appendix, with several original documents; Kayserling, *Gesch. der Juden in Spanien*, i. 161; *idem*, in *Jewish Quarterly Review*, viii. 632; Steinschneider, *Hebr. Uebersetzungen*, pp. 977-979; *Revue Etudes Juives*, iv. 58.

M. K.

**BONVIVA**, or French **BONNEVIE** (Hebrew בִּנְיָאֵר, **BEN ISAAC**: French Tosafist; flourished probably early in the thirteenth century at Château-Thierry. He and his father are mentioned in the manuscript Tosafot to the treatise Bezah 6a, owned by R. N. Rabinovicz. Since these Tosafot are presumably older than those printed, the Bonnevie father and son are believed to have lived at the beginning of the thirteenth century. "Bonne-

Vie" is probably another name for Hayyim ben Isaac, one of whose important juristic decisions is cited in "Mordecai" (B. B. ix. 626), "Hayyim" being the Hebrew term for the French "Bonne-Vie."

**BOOK-CLASPS.** See **BINDING.**

**BOOK-COLLECTORS:** The ideal of learning being so characteristically Jewish, it is natural that many Jews should have collected materials of learning for their own and others' use. The Talmud interprets Ps. cxii. 3 as applying to those who buy books and lend them out, since by this means "their righteousness [clarity] endureth always" (Ket. 50a). Judaism is probably the only religion in which it becomes a duty to collect books. Each Jew ought either to write a scroll of the Law himself, or if he does not do so, must have it written for him. This he must not sell except in order to marry, to study the Torah, or to redeem captives (Shulhan 'Aruk, Yoreh De'ah, 270). References are met with in early ethical wills like that of Judah ibn Tibbon, showing that a great deal of care was taken both to collect and to preserve books. At the same time the continual expulsions of the Jews rendered it difficult to keep libraries together, as they could rarely be transported; accordingly, it is not until the sixteenth century that traces are found of any very considerable collections, the earliest of these occurring, as might have been expected, mainly in Italy, at Mantua and Ferrara. From Italy, after a time, the fashion spread to the Turkish empire, where Jacob ben Isaac Roman and Joseph del Medigo collected valuable manuscripts, many of which can still be traced.

But it was with the growth of the community of Amsterdam that the taste for book-collecting among the Jews rose to dimensions worth mentioning. Here only in all Europe had they sufficient wealth and liberty to collect private libraries; those of Manasseh ben Israel, Moses Raphael de Aguilar, Isaac Aboab, and Samuel b. Isaac Abbas being all of the seventeenth century. The Amsterdam Jews have continued their interest in Jewish books up to the present day, the libraries of Isaac da Costa and Salomon de Mesa in the eighteenth and those of Rodrigues de Castro and David Montezinos in the nineteenth century keeping up the tradition; while the great Rosenthal collection, originally founded at Hanover, has reached a final home in the Dutch capital.

But the book-loving propensities of the Dutch Jews were far exceeded by those of a German Jew, a member of a distinguished Viennese family—the Oppenheimers—who, in the latter part of the seventeenth century, brought together what until recently was the largest collection

**The Oppenheimer Collection.** of Hebrew books ever made by one man, aggregating about 7,000 printed volumes and 1,000 manuscripts, almost entirely Hebraica. It was originally founded by Samuel Oppenheimer with the aid of Prince Eugene, whose court Jew he was. His son, David Oppenheimer, increased the collection; but, although

he was stationed in Prague, he dared not have his books there for fear of the censor; he accordingly placed them in the house of his father-in-law, Lipmann Cohen, at Hanover. Hirsch Oppenheimer succeeded to the library, which, however, was pledged for 50,000 marks; and on this account it passed into the possession of Isaac Cohen of Hamburg, nephew of the former holder. After futile attempts at a sale, at which Mendelssohn's help as appraiser was called in, it was sold (1829) to the Bodleian Library, Oxford, for the absurdly small sum of 9,000 thalers.

Only second in importance to this was the collection made by H. I. Michael of Hamburg, about six or seven thousand volumes, the printed books of which ultimately came into the possession of the British Museum, and the manuscripts into that of the Bodleian Library. By these accessions, England became the most important center in the world for rare Jewish books and manuscripts during the latter part of the nineteenth century. The recent acquisition of the Halberstamm manuscripts by Jews' College and the private collections of Dr. Gaster and E. N. Adler have further increased the importance of England in this regard. Recently, however, strenuous attempts have been made in Russia, the home of the largest Jewish population of the world, to make collections of the national literature. The collections of Fuenn and Straschnu now adorn the communal library of Wilna. Dr. Chazanowicz, a physician of Bialystok, brought together an excellent library which he presented to the Abarbanel Library of Jerusalem. But the greatest col-

**Russia.** lection in Russia is that formed by M. A. L. FRIEDLAND (born 1826), who acquired a number of other collections which had been made, such as that of Bampi of Minsk, which formed the foundation of the whole library, and of E. L. Rabbinowicz, also of Minsk, a shoet, who had collected a fine library, a thousand books from which were acquired by Friedland. Friedland also gathered into his net the collections of S. Zueckermann of Mobelev, of Joseph Masal of Viazona, and of M. Landsberg. In 1892 Friedland presented the whole collection, then amounting to 300 volumes of manuscripts and 14,000 printed books, to the Asiatic Museum of St. Petersburg. Next in value to his collection is that of Baron David von Günsburg of St. Petersburg; this is very rich in Hebrew MSS.

Still more recently, Jewish students in the United States have turned their attention, with gratifying results, to the collection of Hebrew books. The Sutro collection at San Francisco is said to contain 135 manuscripts—some of great rarity—and many thousands of Hebrew books. A. M. Bank of New York has made one collection which he has sold to the New York Public Library, and he is forming another. Of particular distinction is the collection made by Judge Mayer Sulzberger of Philadelphia, which contains over 220 incunabula before 1540—probably the largest number in the possession of any private individual.

The fate of the Oppenheimer and Friedland collections points to the natural history and ultimate destination of large aggregations of books. Com-

paratively small collections of books are first made. These are often sold intact to larger collectors, forming rills which go to feed the streams, and ultimately these debouch into some great lake, represented by a public library. But it invariably requires the zealous enthusiasm of the book-collector to bring together any special set of works; and this must always be the case with Hebrew literature.

As a rule, collectors of books of Jewish interest have been mainly Jews; but a few Christian Hebraists interested in Jewish learning have also from time to time collected manuscripts and books. The Buxtorfs conducted quite a lively correspondence with booksellers of the east of Europe in order to acquire rare books. Widmanstadt collected the most valuable set of manuscripts now at Munich; while the Bodleian Library contains many valuable manuscripts from the collections of Selden, Pococke, and Hyde. By far the most distinguished of these Christian Hebraists was J. B. de Rossi, whose library of manuscripts, which exceeded 1,000 volumes, is now in the Grand-Ducal Library of Parma. Bishop Kennicott was interested in *varia lectioes* of the Bible, and brought together a number of Biblical manuscripts.

The following list gives the names of the chief book-collectors that can be traced, either from the catalogues of their works (indicated by a star) or from the accounts given by Zunz ("Z. G." pp. 230-249) and Fürst ("B. J." Preface to vol. iii.). Whenever the place is known to which a library went, in whole or in part, this is given in parentheses at the end of the statement. When the number of books or manuscripts is known, this also is given in parentheses, after the name. The dates are sometimes those of the deaths of the owners, sometimes of publication of catalogues or other year of importance for the library in question. The names of Christian collectors are printed in italics.

**BOOK OF LIFE.**—Traditional View: The book, or muster-roll, of God in which all the worthy are recorded for life. God has such a book, and to be blotted out of it signifies death (Ex. xxxii. 32, 33).

It is with reference to the Book of Life that the holy remnant is spoken of as being written unto life (A. V., "among the living") in Jerusalem (Isa. iv. 3; compare also Ezek. ix. 4, where one of the six heavenly envoys "who had the scribe's inkhorn upon his loins" is told to mark the righteous for life, while the remainder of the inhabitants of Jerusalem are doomed). The Psalmist likewise speaks of the Book of Life in which only the names of the righteous are written "and from which the unrighteous are blotted out" (Ps. lxxxix. 28; compare Ps. cxxxix. 16). Even the tears of men are recorded in this Book of God (Ps. lvi. 9 [8]). "Every one that shall be found written in the book . . . shall awake to everlasting life" (Dan. xii. 1 *et seq.*). This book is probably identical with the "Book of Remembrance" in which are recorded the deeds of those that fear the Lord (Mal. iii. 16).

The Book of Jubilees (xxx. 20-22) speaks of two heavenly tablets or books: a Book of Life for the righteous, and a Book of Death for those that walk in the paths of impurity and are written down on the heavenly tablets as adversaries (of God). Also, according to *ib.* xxxvi. 10, one who contrives evil against his neighbor will be blotted out of the Book of Remembrance of men, and will not be written in the Book of Life, but in the Book of Perdition. In Dan. vii. 10 and Enoch xlvii. 3 "the Ancient of days" is described as seated upon His throne of glory with

"the Book" or "the Books of Life" ("of the Living") opened before Him. So are, according to Enoch civ. 1, the righteous "written before the glory of the Great One," and, according to Enoch cviii. 3, the transgressors "blotted out of the Book of Life and out of the books of the holy ones." To this Book of Life reference is made also in Hermes (Vision i. 3; Mandate vii.; Similitude ii.); in Rev. iii. 5, xiii. 8, xvii. 8, xx. 12-15, where "two Books" are spoken of as being "opened before the throne, the Book of Life, and the Book of Death, in which latter the unrighteous are recorded together with their evil deeds, in order to be cast into the lake of fire." It is the Book of Life in which the apostles' names are "written in heaven" (Luke x. 20), or "the fellow-workers" of Paul (Phil. iv. 3), and "the assembly of the first-born" (Heb. xii. 23; compare I Clem. xlv.). To these Books of Records allusion is made also in Enoch lxxxi. 4, lxxxix. 61-77, xc. 17-20, xcvi. 76, civ. 7; Apoc. Baruch, xxiv. 1; Ascensio Isa. ix. 20.

While the prevailing tendency among apocryphal writers of the Haisidean school was to give the Book of Life an eschatological meaning—and to this inclines also Targ. Jon. to Isa. iv. 3 and Ezek. xiii. 9 (compare logical Targ. Yer. to Ex. xxxii. 32)—the or Annual Jewish liturgy and the tradition relating to the New-Year's and Atonement days adhered to the ancient view

which took the Book of Life in its natural meaning, preferring, from a sound practical point of view, the this-worldliness of Judaism to the heavenliness of the Essenes. Instead of transferring, as is done in the Book of Enoch, the Testament of Abraham, and elsewhere, the great Judgment Day to the hereafter, the Pharisaic school taught that on the first day of each year (Rosh ha-Shanah) God sits in judgment over His creatures and has the Books of Life and Death opened, together with the books containing the records of the righteous and the unrighteous. And out of the middle state of the future judgment (see Testament of Abraham, A. xiv.) there arose the idea of a third class of men who are held in suspense ("Benonim," the middle), and of a corresponding third book for this middle class (R. II. 15b). In Tos. Sanh. xiii. 3, however, the annual (Rosh ha-Shanah) judgment (Yom ha-Din) is not yet recognized (compare Tos. R. II. i. 13, R. Jose's opinion in opposition to that of R. Akiba and R. Meïr, which has become the universally accepted one).

The origin of the heavenly Book of Life must be sought in Babylonia, whereas the idea of the annual Judgment Day seems to have been adopted by the Jews under Babylonian influence in post-exilic times. The Babylonian legends (see "Creation Tab." iv. 121, and the "Zu" legend, ii. 7, quoted in Harper's "Babylonische Legenden," in "Beitr. z. Assyriologie" by Delitzsch and Haupt, 1892, ii. 2, p. 412) speak of the Tablets of Destiny; also of the tablets of the transgressions, sins, and wrong-doings, of the curses and execrations, of a person which should be "cast into the water"; that is, to be blotted out (compare Micah vii. 19 and the art. TASHLIK). As to the resemblance of the Babylonian Zagnuku or New-Year to the Jewish New-Year see the art. ROSH HA-SHANAH. K.

סֵפֶר הַחַיִּים (Ps. lxxix. 29, "book of the living"; so LXX., Vulg., R.V. [margin]). The living are the righteous (second half of the verse), who alone are admitted to citizenship in the theocracy. The wicked are denied membership therein: they are blotted out of God's book (Ex. xxxii. 32 *et seq.*). The figure is derived from the citizens' registers (Ezek. xiii. 9; Jer. xxii. 30; and Ex. xxxii. 30-34, accordingly assigned by Holzinger to a late stratum; see his commentary). The life which the righteous participate in is to be understood in a temporal sense. In Dan. xii. 1, however, those who are found written in the book and who shall escape the troubles preparatory to the coming of the Messianic kingdom are they who, together with the risen martyrs, are destined to share in the everlasting life referred to in verse 2. The eternal life is certainly meant in Enoch xvii. 3, civ. 1, cviii. 3, and frequently in the New Testament (especially in Revelation). The Targum (Isa. iv. 3; Ezek. xiii. 9) speaks of the "Book of Eternal Life." Temporal life is apparently prayed for in the liturgical formula: "Inscribe us in the Book of Life" (see ATONEMENT, DAY OF). The Mishnah tells us that the deeds of every human being are recorded in a book (Abot, ii. 1; see iii. 16). The "Sefer Haisidim" (xxxiii.) pointedly adds that God is in no need of a book of records; "the Torah speaks the language of man"; *i. e.*, figuratively.

**BOOK-PLATES (Ex-Libris):** Labels with emblematic designs, with references to the names of the owners of the books in which they are inserted. Book-plates came in almost as soon as the art of printing, but one of the earliest known instances of their adoption by Jews is the book-plate of David Friedländer, given on page 314. So far as is known, none of the great Jewish

Book-Plate of De Pinto Family.

Book-Plate of D. H. de Castro.

book-collectors had any special sign by which their books could be identified, as most of them contented themselves with inserting their initials.

With the revival of the fashion of book-plates in recent times many Jews of means adopted the custom, but few of their book-plates have any specific Jewish interest.

Of recent years the artist LILJEN has designed book-plates of distinctly Jewish character, two of which are reproduced in this volume. See p. 315).

**BOOK-TRADE:** The trade in books was carried on by Jews long before the invention of printing. A catalogue of a bookseller of the twelfth century was unearthed a few years ago in the Postat Genizah ("Jew. Quart. Rev." xiii. 52). The poet Immanuel of Rome (about 1300) relates that a bookseller named Aaron of Toledo traveled to Rome with 180 Hebrew manuscripts, which, however, he sold at Perugia.

With the introduction of printing, the book-trade centered in Italy, where Hebrew printed books were first produced. Itinerant booksellers, after providing themselves with their merchandise at the depots of Venice, Mantua, Padua, Cremona, etc., traveled from place to place, offering their goods wherever Jews were to be found. Thus, Benjamin Ze'eb of Arta (1500) says that there were many itinerant booksellers who greatly aided the propagation of Jewish books (*Responsa*, 63a). In the sixteenth century, with the increase of printing-offices in Germany, Bohemia, and Moravia, Italy gradually ceased to be the headquarters of the book-trade; so that in the middle of the seventeenth century De la Grange writes to Buxtorf the elder, who traded in Hebrew books, that he is unable to find a bookstore in Venice ("Rev. Etudes Juives," viii. 75). About this time Frankfort-on-the-Main became the center; all books published in Germany, Bohemia, and

**Frankfort** Poland being exhibited at the fair in a Center. that city. Two booksellers of Frankfort, Gabriel Luria and Jacob Hamel,

were in correspondence with Buxtorf in reference to the book-trade (*ib.*).

Bookselling—the only part of the book-trade with which this article deals—lacked organization in the seventeenth century, and collectors had great difficulty in obtaining Hebrew books, as is attested by the correspondence of Buxtorf and the high prices the latter charged for not very rare books. Thus, the commentary of Nahmanides on the Pentateuch with the text was sold for 9 reichsthalers; "Obadiah Bartenora" for 9; Shulhan 'Aruk for 3; "Keli Hemdab" for 5; "Ralbag" for 10; Colon and Ro-keah for 6; and Perush on Megillot for 3.

The organization of bookselling as a trade is first met with in Amsterdam, which city was the center of the Hebrew book-trade from the middle of the seventeenth century to the beginning of the nineteenth. The name of Solomon ben Joseph Proops appeared on Hebrew books with the description מוכר ספרים, the technical term for "bookseller." In 1730 he published, under the title "Apiryon Shelomoh," a catalogue of his stock of books. Proops's firm supplied Hebrew books to small booksellers throughout the world. Another important firm in Amsterdam was that of Isaac Fundam, and, at the end of the eighteenth century, that of Johanan Levi Rofe. In the first half of the nineteenth century the Hebrew book-trade of Amster-

dam, although it had lost its former importance on account of the relaxation of Hebrew studies in Europe, was still of considerable proportions. Great collections of books were sold through the firms of Herz van Embden, David Proops, Levison, Müller,

and many others. At present there are only two bookselling firms of any importance in Amsterdam; namely, those of Joachimsthal, and Levison, the successor of Proops.

From the middle of the seventeenth century to the first half of the eighteenth Frankfort-on-the-Main

rasowitz, Köhler, and Richter, at Leipzig; R. N. Rabinowitz and L. Rosenthal at Munich; J. J. Heckenbauer at Tübingen; and Jollowicz at Posen.

From the second half of the eighteenth century to the middle of the nineteenth the Hebrew book-trade of Alsace-Lorraine was carried on at Strasburg, Metz, and Lunéville by the printers Moses May, Ephraim Hadamar, and Joseph Meir Samuel. At present the trade there is quite unimportant. France has never been a congenial field for the trade. Only three firms—and these are of no importance—can be found to-day at Paris; namely, those of Durlacher, Lipschütz, and Blum.

In London two important firms, Abrahams and Valentine, have existed for at least a century and a half.

Italy, which, as stated above, was the cradle of the Hebrew book-trade, had in the nineteenth century only a few firms at Leghorn, Turin, and Florence. At the beginning of the sixteenth century Prague and Cracow were important centers; the trade being carried on by the Gersonides family of printers in the former city, and by Wedekind, Kurzins, Isaac ben Aaron of Proctitz, and others in the latter. Later several other places, such as Brody,

Book-Plate of R. Brainin.  
(Designed by E. N. Lillien.)

was the center of the Hebrew book-trade in Germany. The leading booksellers of the seventeenth century were: Isaac and Seligmann Reis, Joseph Trier Cohen, Simon Trier, and Solomon Hanau; in the eighteenth, Solomon ben Raphael London, Elijah ben Azriel of Wilna, Löb Schnapper, Simon Wolf ben Abraham Mainz, David ben Nathan Grünhut of Heimerdingen, and Moses ben Kalman Speier. From the middle of the eighteenth century the book-trade in Frankfort gradually declined. At present (1902) there are but three Hebrew booksellers of importance in that city; namely, J. Kauffmann, Joseph Baer, and Hofmann, who deal mainly in second-hand books.

Among the other places in Germany where the Hebrew book-trade was carried on in the eighteenth century may be mentioned Altona, Dyhernfurth, Frankfort-on-the-Oder, Fürth, and Berlin. The leading booksellers in Germany in the nineteenth century, besides those mentioned above, were: Adolf & Co., Asher & Co., Benzian, Bislicher Brothers, Calvary, and Poppelauer, at Berlin; Jacobsohn at Breslau; J. G. Müller at Gotha; H. W. Schmidt at Halle; Goldschmidt at Hamburg; Baer, Otto Har-

Book-Plate of Dr. Emil Simonson.  
(Designed by E. N. Lillien.)

Lemberg, and Vienna, became conspicuous in the trade. The leading booksellers in the nineteenth century in Austria were: Knoepflmacher, Lippe-Löwy, Schlesinger, Schmid, at Vienna; Landau and Paschles at Prague; Schönblum at Lemberg; Faust at Cracow.

Small and unimportant as was the book-trade in Poland and Lithuania, it developed in course of the

nineteenth century to such an extent that it now practically controls that of all other countries.

The voluminous productions of the **Poland and Lithuania** and Warsaw reach the remotest parts of the world. Every city of importance in Russia has its Hebrew booksellers; and the smaller towns are frequently visited by itinerant booksellers, who exhibit their goods in the synagogues. The leading bookselling firms in Russia are: Tikaschinsky, Lipschütz, Juditzky, at Byelostok; Sheftel at Berdychew; Jacob Ginzburg at Bobrinsk; S. Dezenzel at Brest-Litovsk; J. D. Miller at Grodno; Krassik at Kiev; Hirsch Perlah at Lodz; Dychna, Ulrich, and Nitzsche (Christian firm), at Odessa; H. Shereschewski at Rostov; Sirokin at Pinsk; Achiasaf, A. S. Shapiro, Tushiyah, Zuckermann, at Warsaw; Katzenellenbogen, Matz, Romm, Funk, at Wilna; and Sirkin at Wolozhin.

In the East the Hebrew book-trade was actively carried on in Constantinople, Salonica and Smyrna, in the sixteenth, seventeenth, and eighteenth centuries; but it gradually declined, and at present is insignificant. The only place which shows any revival of activity is Jerusalem, where the following firms are established: Wertheimer, Hirschensohn, Frumkin, and Lunz.

Consequent upon the increasing immigration of Russian Jews to the United States, the Hebrew book-trade in America has developed considerably. There are now many well-known bookselling firms, of which the following may be mentioned: Chinsky, Deinard, Druckermann, Freedman, Germansky, Katzenellenbogen, Rabinowitz, Wasserman, Werbelowski, Jewish Publishing Company, at New York; Shidinsky and W. Schur at Chicago.

**BOOKBINDERS.** See BINDING.**BOOT.** See SHOES.

**BOOTH:** A rendering, in the English versions of the Bible, of the Hebrew word "sukkah"; also occasionally translated "pavilion" or "cottage." The ordinary habitation of the nomad is the tent, a rough textile fabric of goat's hair, stretched on poles (see TENT). This tent is distinguished in the Old Testament from the booths, or habitations formed of branches, foliage, etc., occasionally constructed with the aid of clay, examples of which may still be found among the Arabs of the Sinaitic peninsula. According to the law as given in Lev. xxiii. 42 *et seq.*, the custom of dwelling in booths during the Feast of Tabernacles was instituted for the purpose of reminding the Israelites that, in the journey across the desert, their forefathers had also dwelt in booths. But the term here is undoubtedly employed in a general and not in a specific sense, and probably signifies every species of this form of habitation.

The passage Gen. xxxiii. 17 proves that the nomads also used their tents as shelters for their cattle, and it is probable that the peasant of fixed habitation did likewise. These huts were also erected for the watchmen in the field (Isa. i. 8), as

well as for the soldiers encamped before the city (II Sam. xi. 11). But they served above all as a protection against the sun; and the prophet Jonah before Nineveh seeks shade under a booth (Jonah iv. 5). Even to-day it is customary in certain parts of Palestine to erect arbors of leafy branches upon the housetops as a protection against the heat; and during the harvests of the orchards and the vintage, for the villagers to go into their gardens, and dwell there for days in their leafy cottages. The Feast of Tabernacles, therefore, commemorates a very ancient custom; for it is the great harvest and thanksgiving festival. See TABERNACLES, FEAST OF, and FEASTS.

**BORCHARD, MARC:** German physician and author; born in Mecklenburg, 1808; died at Paris June 21, 1872. He graduated as M.D. at Halle, later going to France, where he became hospital and forensic physician at Bordeaux. In that city he was a member of several societies for the promotion of the public good. The last years of his life were spent at Paris. Borchard's published works are: "Commentaires Historiques, Critiques et Pratiques sur la Suette." Paris, 1856; "L'Hygiène Publique chez les Juifs, son Importance et sa Signification dans l'histoire Générale de la Civilisation," *ib.* 1865; "Etude sur le Mecklenbourg et sur la Question Allemande," *ib.* 1867; "Intolérance et Persécutions Religieuses," *ib.* 1868.

M. K.

**BORCHARDT, BRUNO:** German physicist and author; born at Bromberg Nov. 17, 1859. Educated at Berlin, where he graduated as Ph.D., he was appointed high-school teacher; but on account of his socialistic convictions was compelled to resign his position. He then turned to journalism and became a prolific contributor to the daily press, popularizing physical and chemical problems, and reporting on discoveries, inventions, and the general progress of science. He has published three scientific treatises: "Das Höhenmessen mit der Barometer," "Wahrscheinlichkeitslehre," 1889; "Grundriss der Physik," 1892, second ed., 1900.

**BORCHARDT, KARL WILHELM:** German mathematician; born Feb. 22, 1817, at Berlin; died there June 27, 1889. He studied from 1839 to 1843 at Königsberg, where Jacobi exerted a great influence on him. He passed the winter of 1846-47 at Paris, where he continued his mathematical studies under Lionville; and in 1848 he became privat-docent at the University of Berlin. In 1856 the Berlin Academy of Sciences elected him a member. After the death of Crelles, Borchardt became editor of the "Journal für die Reine und Angewandte Mathematik." A complete edition of his works was published by the Berlin Academy of Sciences under the direction of G. Hettner, Berlin, 1888.

**BORDEAUX:** In medieval times capital of Guenne; to-day, of the department of La Gironde, France. It derives its name from Bourdeois, the district in which it is situated.

According to a legend, the Jews settled at Bordeaux shortly after the destruction of the Second Temple, and it is also said that a considerable number of them settled there in the sixth and seventh centuries, because of the commercial advantages of the city. Under Louis le Débonnaire they were allowed to trade freely (828). They had their own administrative and judicial systems and officials. The slave traffic, however, in which many Jews were concerned, was interdicted by royal decree in 829; and from this period the baptismal records contain no entries of conversions to Christianity made among the slaves of the Jews. In 848 the Jews were accused of having delivered Bordeaux to the Normans to be pillaged and destroyed. The Normans were said to have entered the city by means of the "Rue Juive," a street which was not in the Jewish quarter. Again the bigoted populace opposed the Jews, and accused them of appealing to the Saracens for the purpose of laying waste the cities and lands of the south. There is no proof to sustain either of these charges.

The first definite evidence of Jews in Bordeaux is found in a deed of 1077, where mention is made of the "Montemque Judaicum," residence of the Jews in the suburb of Saint-Seurin, with the church of Saint Martin as center. There was also a "Porta Judaica," a "Rue du Petit Judas," or "Puits des Juifs," and a "Rue Judaïque," the last still existing. The dwellings of the Jews were *extra muros* at this period. A chronicle of the year 1273 mentions them as continuing their residence in Saint-Seurin. "Rue Caphernam" was then the main street in the Jewish quarter.

In this early period the Jews enjoyed comparative freedom, though the practise of usury was on several occasions (1214, 1219) forbidden. The city of Bordeaux was under English (Angevin) dominion; hence the decree of expulsion promulgated by the king of France in 1082, and the permission accorded Christians to repudiate debts due to the Jewish merchants (1182), did not affect the Jews of Bordeaux. Certain taxes were imposed. Thus, about 1150 the Jews paid the archbishop of Bordeaux a

poll-tax of eight livres, being considered an estate in mortmain. The English kings sought to confirm the Jews in their ancient privileges; but the persecutions instituted by royal agents were indeed cruel.

Persecution of the Jews was interdicted by Edward I. of England May 23, 1275, but broke out anew under Edward II. The repressive measures of Philip Augustus of France (1198) had, of course, no application to the Jews of Bordeaux. It is claimed that the persecutions at-

tempted in 1316 and 1318 aroused the Pastoureaux, who committed outrages all over southern France and northern Spain. Edward III. granted the Jews complete freedom of travel and trade in the beginning of his reign. Several Jewish merchants, however, were banished at this time owing to the jealousy and hatred displayed by Christian merchants toward their Jewish competitors. The Jewish community was recognized as such and had been incorporated as "Communitas Jude-

Plan of the Northwest Section of the City of Bordeaux, About 1450, Showing the "Rue Judaica" and the Jewish Quarters Outside the City Walls.

(After Leo Drouyn's "Plan de Bordeaux.")

orum Vasconie." When the edict of Charles VI. was promulgated (Sept. 17, 1394), expelling all Jews from France, the Bordelais were not yet under French dominion; and when these came within the purview of Charles VII.'s enactments (1454), their position remained unchanged, although the Jews completely lost their identity as such. They were legally accepted as residents of Bordeaux, but not as Jews. Louis XI. (1462), recognizing the value of Jewish enterprise, but disregarding what was an open violation of the decree of expulsion, ameliorated the condition of the Jewish merchants.

When the Jews were banished from Spain (1492) and Portugal (1496), the Jewish population at Bordeaux increased, for the refugees fled to the cities of southern France. No taxes had been paid by Jews as foreigners for some years, by virtue of their position as "Christian" residents. They continued to reside at Saint-Seurin, and the cemetery was known from early times as "Plantey deus Judius." The Maranos, or New Christians, who came at various times from the Iberian peninsula (1496 to 1525), did not, as at Amsterdam, discard the forms of Christianity at once and return to Judaism. Ancient statutes and more recent decrees forced

**Secret Jews.** the Portuguese Jews of Bordeaux into an anomalous position. As strangers, they had the right to settle and reside

in the city. They lived as Christians, were baptized, married, and buried in accordance with the rites of the Catholic Church, and were Jewish only within the four walls of their homes. Among the Jewish families ("Portuguese merchants," as they were officially designated) who settled at Bordeaux at this time were those of Granollas, Ram, Tarrégua, Milanges, Lisana, and Lopès, or Louppes. As physicians, lawyers, and scholars these settlers exerted such an influence on the life of the community that the "jurats" and Parliament advocated enrolling them as residents and often defended them from attack. They also influenced French life and letters; the mother of the celebrated Michel de MONTAIGNE was a member of the Lopès family.

From the beginning of the sixteenth century the Jews of Bordeaux were in reality a Marano community, the leaders of which were the members of the Govea family, so often mentioned in the annals of the city. Until the middle of the century the existence of the colony was dependent on the king's will. The letters patent granted by Henry II. of France Aug., 1550, established the community on a firm

**Letters Patent of 1550.** basis. The Portuguese of Bordeaux, called "New Christians," were given rights of residence and naturalization, of property and traffic, in line with similar grants to other foreigners in

the kingdom. In this connection the rich and learned Goveas rendered eminent services to their coreligionists. However, the Maranos aroused the envy of the Christians, and the populace treated them as secret Jews ("Juifs déguisés"), threatening to procure the withdrawal of their privileges and to have them banished from France.

Despite these manifestations of ill will, the Maranos secured, Nov. 12, 1574, a confirmation of the

privileges of 1550 from Henry III. This decree, registered April 19, 1580, was procured through the instrumentality of the Marano merchants Diego Mendes Dias and Simon (Meir) Lameira. Notwithstanding these safeguards, the Parliament of Bordeaux often came to the assistance of the Maranos, who were accused of Judaizing, to prevent their trading ventures from being restricted and their privileges from being curtailed.

At the beginning of the sixteenth century the well-known Gradis family came to Bordeaux, and within one hundred years from that time the Marano community comprised fifty to sixty families. The merchants, however, continued to molest the Jews, and in 1604 the earlier letters patent were again confirmed and royal protection of Jewish rights and liberties (*i.e.*, of the Spanish and Portuguese settled at Bordeaux) decreed. This measure proved to be of no avail, and by chance only did the Jews at Bordeaux escape the effects of the decree of expulsion of Louis XIII. (May 23, 1615), ordering all Jews to leave France within one month. The Bordelais Parliament came to the rescue of the Jews in 1625, when an embargo had been laid on all vessels in port. The Jews of this period enjoyed not only the protection of the Parliament and "jurats," but the favor of the queen, whose Italian physician, De Montalte, was professedly a Jew and interested particularly in the welfare of the Maranos at Bordeaux.

On Dec. 4, 1636, a census was taken at Bordeaux, which enumerated 36 families and 167 individuals, together with 93 paupers, resident in the Portuguese community and "faithful Catholics at the time." Of the heads of families five had been born in France and six naturalized. By an order of the council, Aug. 9, 1662, many of these were admitted to full rights as citizens of Bordeaux. The most prominent Portuguese families were those of Alvares, Cardozo, De Cisneros, Da Costa, Dias, Lacoste-Furtado, Lopès, Machado, Mendes, De Moura, Oliveira, and Sasportas.

In 1675, in consequence of the hatred of the other merchants, the Portuguese sought to leave Bordeaux, and Nov. 20, 1684, many poor Jews (comprising twenty-one families, the Lombrosso, Campos, and Monsanto, among others) were expelled from Bordeaux on the ground of treat-

**Under Louis XIV.** son to the king. This decree was annulled Jan. 11, 1686, and from that

date the French government tacitly accepted the Jews as residents of Bordeaux. The Jews of Bordeaux could not avoid paying the tax levied by the government of Louis XIV., and hence from 1686 were recognized as Jews. In 1656 there was one family of professing Jews there; in 1666, two; in 1676, nine; and in 1686, seventeen. They continued to live outwardly as Catholics. In 1710 the Jews were interred in the cemetery of the Franciscans. Although numbering one hundred families, they had no public synagogues. The baptism of Jewish children ceased in 1727, as the rabbis openly performed the rite of circumcision, celebrated the Jewish festivals, etc. After 1730, the Jews were not considered as "New Christians," but were permitted to live openly as Jews, to own their ceme-

tery, and to proselytize. In 1734 there were about 350 Jewish (Portuguese and Avignonese) families at Bordeaux, numbering nearly two thousand individuals. In 1731 David Gradis had been made a citizen. Louis XV. granted the Jews new letters patent (June, 1723), and shortly thereafter seven synagogues existed (the public, the Avignonese, and five private; *e.g.*, those of the Gradis and the Peixotto).

Many of the Jews, however, were converted to Christianity, and whenever privileges were granted, a heavy tax had to be paid. On various occasions the patriotic Jews lent large sums to the city. About 1735 Falcon and Attias were rabbis of the community. Jews from Avignon had settled at Bordeaux as early as 1722. The letters patent of 1723 did not apply to them, and the Portuguese Jews looked upon the Avignonese as enemies whom they accordingly felt bound to suppress. They procured a decree of

**Avignon** ing the Jews of Avignon to leave the  
**Jews** city within three days. Many pro-  
**Expelled.** cured a respite and were permitted to return. Certain occupations were closed to them; their position and commerce were regulated by enactments in 1739, 1740, and 1749, and the Dalpuget, Astrue, and Lange families were granted rights of residence. In 1752 another census of the Jews of Bordeaux showed that 1,598 Portuguese Jews (327 families with 5 Jewish servants and 147 Catholic servants) and 348 Avignonese Jews (81 families with 11 Catholic servants) had settled there. The Jews from Avignon were simply "tolerated." The Portuguese Jews taxed all the Bordeaux wines used in the ritual, and, in order to extend the sale of wines, established many agencies in foreign cities. In Germany this tax was strenuously resisted, and in 1751 Rabbi Jonathan Eybeschütz, who had come to Hamburg from Metz in 1750, declared the Bordeaux "kosher" wines to be ritually impure. The tax had amounted to four francs per barrel; in consequence of the rabbi's opinion this very profitable source of revenue to the Jews of Bordeaux was cut off, much bitter feeling between Germans and Portuguese was engendered, and the foreign agencies were discontinued.

Meanwhile the trouble with the Jews from Avignon continued, and the various measures adopted by them to secure their rights and to regulate their commerce were opposed by the Portuguese Jews. The Avignonese Jews sought to gain representation on the council of elders; this was strongly combated by the Portuguese majority; and Isaac Pinto, who replied to Voltaire's anti-Jewish pamphlets and opinions, and Jacob Rodrigues Pereire, the first scientific instructor of deaf-mutes in France, were deputed to lay the grievances of the Portuguese Jews before the king. In 1760 a congregational order decreed the expulsion of the German and Avignonese Jews from Bordeaux, since by the act of 1394 no Jews could settle in France, the Portuguese still being designated as New Christians. The foreign Jews were reduced to beggary and ordered to leave within three days. The royal assent to this measure was obtained by Pereire May 13, 1763, although its provisions were never executed. The control of the community was vested exclusively in the Portuguese, the

most prominent of the syndics of this period being members of the Peixotto, Gradis, Brandon, Furtado, and Pereire families.

At various times during the period from 1720 to 1775, the Jews of Bordeaux gave abundant proofs of their loyalty to the ruling house. Whenever the king or queen was sick the Jews publicly prayed for his or her speedy restoration to health. Money was often subscribed for public use. In 1766 the Jews gave 1,000 livres for the rescue of the French Christians enslaved in Morocco, and in 1773 they served as soldiers on the Sabbath, by the special dispensation of two rabbis from Jerusalem, to quell riots in the city. In June, 1776, Jacob Rodrigues Pereire received letters patent from Louis XVI. for the Jews of Bordeaux, giving them the right to settle not only in Guienne, but in any part of France, and to trade throughout the kingdom. Moreover, all previous grants were confirmed.

At this time the difficulties existing between the French and the Jewish laws of divorce and inheritance were obliterated by an adjudication reconciling divergent views. On June 9, 1782, the Jews of Bordeaux subscribed 60,140 livres for a ship of the line, which they presented to the king. They also paid 100,000 livres into the royal treasury for each series of letters patent granted them from 1550 to 1776.

At the time of the French Revolution five hundred Portuguese Jews resided at Bordeaux. These sought to be free and equal politically and socially. They asked for the recognition by the state of the Jewish religion, rites, and usages; and their deputies to the National Assembly, Lopès-Dubec, Furtado, Rodrigues, and David Gradis, labored actively in behalf of these petitions. Louis XVI. had repealed (1787) the Edict of Nantes; the National Assembly drew up Aug. 4, 1789, an elaborate program of equal rights for all, which, however, refused to extend social and political equality to Jews, vouchsafing such only to non-Catholics "other than Jews" (Dec. 24, 1789). The Portuguese of Bordeaux protested; they sought to unite all Jews in France in a firm union in order to obtain equal rights and privileges. This concert did not subsist for any length of time, and the Jews of Bordeaux appealed to the Christian deputies of the city to retain the privileges accorded them as New Christians. They pointed to the protracted duration of their residence in France, to the privileges of 1550, etc. Talleyrand, before whom they appeared, reported their cause favorably to the Assembly, which decided that the rights of the Jews as New Christians and as Frenchmen should not be curtailed (Jan. 28, 1790). The Jews of Bordeaux were thus the first to be admitted by law to the rights of French citizenship. From the privileges granted by the decree, the German and other French Jews were particularly excluded.

From this time many Jews were elected to national or municipal positions. David Gradis was a member of the third estate from Bordeaux. During the Reign of Terror the Jews fared well, though many of their number, notably members of the Astruc, Azevedo, Erréra, Lange, Lopès, Pereire,

#### Letters Patent of 1776.

Perpignan, Peixotto, and Raba families, were heavily fined and amerced of their goods. At Bordeaux only a single Jew, Jean Mendes, was guillotined, and Abraham Furtado was the only one proscribed. In 1806 the number of Jews at Bordeaux was 2,131, and the Bordelais took an active part in the several councils and the Grand Sanhedrin of Napoleon. There were nine synagogues at this time, the chief families of the community being those of Gradis, Furtado, Raba, Fonseca, Peynado, and Cardozo. Abraham Furtado and Isaac Rodrigues represented the Jews of Bordeaux at the Sanhedrin.

Napoleon promulgated several restrictive measures (March 17, 1808), but the Jews of Bordeaux were especially exempted, as there had been no complaints concerning them. In 1809, by the new laws relating to the Jews, Abraham Furtado was made chief rabbi of Bordeaux, and in 1814 Abraham Andrade succeeded him. The new synagogue, consecrated in 1812, was destroyed in 1872, and the present synagogue was erected, being inaugurated Sept. 5, 1882. The community numbered such men of letters as Jacob Rodrigues Monsanto and Furtado among its citizens. Many of its members have been active in public life, in commerce, and in industry. The brothers Emile and Isaac Pereire were well-known financiers during the second empire. David Marx was chief rabbi from 1835 to 1864; he was followed by Simon Lévy and Isaac Lévy, the present incumbent. The following charitable societies are to be found to-day (1902): Société de Guémilhouth-Ilassadim, Société de Bienfaisance, Société des Dames de l'Humanité, Société des Dames de la Largesse, and Ecole Consistoriale de Garçons. The community now (1902) numbers about three thousand individuals. Henri Gradis is president of the local consistory, and Baron Alphonse de Rothschild delegate to the central consistory in Paris.

A. M. F.

**BORDERS:** Ornamental designs surrounding printed pages. The first ornaments for title-pages consisted of arabesque borders with white figures. They are found in books printed at Lisbon, 1489-92, the plates of which, together with Eliezer Toledano's types, were subsequently taken to Salonica, where they were used in the printing-establishment of Don Judah Gedaliah, who had previously worked in Lisbon. A border of flowers and animals, similar to the border used in many of the

Naples prints, is found as early as the *Tur Orah Hayyim* published at Leiria, 1495. The borders in some editions of the Soncino press are artistically executed, as are those produced by the Gersonides at Prague; those of the prayer-book, Prague, 1527, and of the Pentateuch, Prague, 1530, are remarkable for their beauty. On the top of the title-page of the *Tur Orah Hayyim*, Prague, 1540, Moses is represented with the tablets of the Law; below are two lions, a crown over a city gate (the coat of arms of Prague), and to the right and left winged men with shields; in addition, a "David's shield" on the right side and a ewer on the left. The same design is found in the Prague editions of the seventeenth century.

The style of printing current at Prague was taken as a model by the wandering printer Hayyim Schwarz in his editions made at Augsburg, 1533-43, and Heddernheim, 1546. Thus, the title-page of the Heddernheim Selihah is similar to the border of the Prague Haggadah of 1526; Adam and Eve suggest Dürer's female figures, but are not nearly so well modeled. The influence of this Haggadah may also be seen in some editions printed at Cracow by Halez in 1534. The title-page of Isserlein's "Sh'are Dura" has a white arabesque border, and two angels with flute and drum at the top. Portals are most frequently used, being found on the first Bonberg editions at Venice, and occurring as late as the nineteenth century, sometimes with straight, sometimes with twisted, pillars. Hans Holbein, the younger, cut the title-border for Münster's Chaldean Lexicon, Basel, 1527, which resembles the border of the "Abkat Rokel," Augsburg, 1540. The border to Boeschstein's Hebrew grammar, Augsburg, 1514, was formerly erroneously ascribed to Dürer. The title-borders of the Midrash Tanhuma (Verona, 1595) and of some of Foa's publications at Sabbionetta—for example, "Mirkebet ha-Mishneh"—deserve special mention among those produced in the sixteenth century. Some editions made at Amsterdam, Frankfurt-on-the-Oder, and Prague during the seventeenth century have as an ornament on the title-page an eagle, on the wings of which Jacob's entry into Egypt and his meeting with Joseph are represented. The book "Bet Levi" and some others printed at Zolkiev in 1732 have a border surprisingly elaborate for that establishment. Sulzbach editions of the Mahzor frequently have rich title-page ornaments. Moses and Aaron with two angels above them are seen in the editions of Zolkiev, 1764, and in many from Frankfurt-on-the-Oder and Amsterdam.

Borders from non-Hebraic books were frequently borrowed for editions produced at Frankfurt-on-the-Main in the eighteenth as well as in the nineteenth century and at the present time.

SONCINO BORDER.

(From the title-page of "Sefer Yehoshua," printed by Soncino. In the collection of Hon. Mayer Sulzberger.)

year 1793, when Prussia took possession of Borek, there were already 448 Jews there, who maintained a synagogue—which was replaced by a new one in 1857—as well as a cemetery. At the present time (1902) the Jewish population of Borek numbers only 150 souls, out of a total population of 2,000.

Borek is the birthplace of Elias Guttmacher, known by the name "Grätzer Raw."

M. L. B.

**BORERIM**: Name of electors of a congregation, and applied particularly to the five distinguished representatives of the community in the old "kahals" (governing boards) of the Jews in Poland and Lithuania. The borerim were chosen by nine sworn mandatories, who were elected by ballot from among the tax-paying members of the community. The function of the borerim was to elect and appoint the aldermen of the kahal.

H. R.

**BORGER** or **BURGER, SOLOMON BEN DAVID COHEN**: Cabalist; lived at Zülz, Prussia, in the seventeenth century; corrector of the press in the printing-house of Shabbethai Bass at Dyhernfurth. He published (Amsterdam, 1688), with additions of his own, the ebalistic commentaries on the Pentateuch, "Pa'aneah Raza" (The Revealer of the Secret), compiled in the thirteenth century by Isaac ha-Levi ben Judah.

I. BR.

**BORIS, MOSES**: French colonel; born in the department of Meurthe in 1808; died in Paris June 13, 1884. At the age of twenty-six he entered the military school of Saint-Cyr, and upon his graduation was appointed tutor, gradually rising to the rank of captain. He so distinguished himself in the suppression of the Paris riots, June, 1848, that he was appointed chief of battalion. In the Crimean and Italian wars he took an active part, and was promoted to the rank of colonel in 1861. He later became officer of the Legion of Honor, and was placed on the retired list in 1868. Boris always took a lively interest in everything relating to Judaism.

M. K.

**BORISOV**: Town and district in the government of Minsk, Russia; situated on a peninsula on the left bank of the Beresina, about fifty miles from the capital. The Jewish population (1900) of the town was over 10,000 in a total of 18,348; of the district it was 14,802 in a total of 158,662.

The Jewish community of Borisov dates from the sixteenth century, and was at one time considered one of the important communities of Lithuania. The Jewish merchants of the city carried on a large trade with Riga in grain and lumber by way of the Düna river, and with South Russia by the Dnieper. In 1812, during the disastrous passage of the Beresina by the French army, the Jews showed their patriotism toward the Russian government by voluntarily building a bridge, which was of great

service to the Russian army, and by erecting at their own expense a hospital for wounded and sick soldiers. For this they received the grateful acknowledgment of Emperor Alexander I. Since the construction of the Moscow-Brest railroad the business of Borisov has declined rapidly, and the Jewish community is becoming impoverished. The city contains nine houses of prayer, two for Mitnagdim and seven for Hasidim; two public and seven private Hebrew schools, a Talmud Torah, a free loan association, a hospital, a home for the poor, and an elementary trade-school.

**BORISPOL**: A village in the district of Pereyaslav, government of Poltava. Its population of 10,000 embraces about 1,000 Jews. Of the latter, 157 are artisans. Instruction in the Talmud Torah is imparted to 114 Jewish children, the remainder attending five elementary schools. From 1648 to 1649 many Jewish families were killed in Borispol by the Cossacks under Chmielnicki.

**BORKUM, KALMAN BEN PHINEAS SELIGMAN**: Court Jew of Duke Peter Biron of Courland; born in the middle of the eighteenth century; died at Mitau in 1828, on the same day that his brother Simson died. Owing to the influence of the Borkum brothers, Jews were permitted to settle permanently in Mitau, to organize themselves into a community, and to engage in trade and handicrafts within the dukedom of Courland. In 1775 the Jews of Mitau were permitted to send their children to a gymnasium called the Academic High School. In 1784 Kalman Borkum erected, at his own expense, a synagogue and all the other buildings necessary for the Jewish community. See **COURLAND**; **MITAU**.

**BIBLIOGRAPHY**: R. Wunderbar, *Gesch. der Juden in Liv- und Kurland*, p. 26, Mitau, 1853.

H. R.

**BORN, GUSTAV JACOB**: German histologist and medical author; born at Kempen, province of Posen, Prussia, April 22, 1851. He received his education first at the gymnasium of Görlitz, Prussian Silesia—where his father practised as a physician and held the position of *Kreisphysicus* (district physician)—and afterward at the universities of Breslau, Bonn, Strasburg, and Berlin, graduating as physician from Breslau in 1876. In the same year he was appointed assistant prosector and privat-docent at the University of Breslau, and in 1877 prosector. In 1886 he was elected assistant professor, and in 1898 professor of histology and comparative anatomy, at the same university, receiving the Prussian Order of the Red Eagle of the fourth class in the latter year.

Several technical inventions, as well as new methods in the field of microscopy and embryology, have made Born's name prominent. Well known among these is a method for reproducing and plastically

enlarging small anatomical and embryological objects, which was described in "Zeitschrift für Wissenschaftliche Mikroskopie," vol. v.

Börne has written about fifty essays and works pertaining to his specialty, among which are: "Ueber das Extremitätenskelett der Amphibien und Reptilien"; "Ueber die Nasenhöhle und den Thränenanengang bei Allen Wirbelthieren von den Amphibien Aufwärts" (this series of articles is published in Gegenbauer's "Morphologisches Jahrbuch," vols. i.-vii.); "Beiträge zur Entwicklungsgeschichte des Säugethierherzens," in "Archiv für Mikroskopische Anatomie," vol. xxxii.; "Ueber die Derivate der Embryologischen Schlundbögen und Schlundspalten bei Säugethieren," *ib.* 1883; "Beiträge zur Bastardirung Zwischen den Einheimischen Ameisenarten," in Pflüger's "Archiv für die Gesammte Physiologie," 1883; "Biologische Untersuchungen," part 1: "Ueber den Einfluss der Schwere auf das Froschei," in "Archiv für Mikroskopische Anatomie," 1885; "Biologische Untersuchungen," part 2; "Weitere Beiträge zur Bastardirung Zwischen den Einheimischen Ameisen," *ib.* 1886; "Ueber Druckversuche an Froscheiern," in "Anatomischer Anzeiger," 1893, viii., Nos. 18, 19. His most important work, however, is "Ueber Verwachsungs-Verse mit Amphibienlarven," Leipsic, 1897.

s. F. T. H.

**BÖRNE, KARL LUDWIG:** German political and literary writer; born May 6, 1786, at Frankfort-on-the-Main; died in Paris Feb. 12, 1837. The family name was Baruch, and he received the name of Loeb, both of which he afterward changed. Both his grandfather and his father, Jacob Baruch, were engaged in business, and employed as fiscal and purchasing agents for the government. Loeb and his two brothers were taught at home by a private tutor, one Jacob Sachs. When Sachs had done what he could for young Börne, the latter came directly under the private tuition of Rector Mosche of the gymnasium.

At fourteen years of age Börne went to the newly established institute of Professor Hetzel in Giessen, with the idea of preparing for a medical

**Early** ical course, and remained there about  
**Years.** a year. His father arranged with Dr.

Marcus Herz, the celebrated physician in Berlin, whose home was an intellectual center that attracted such men as Humboldt and Schlegel, to receive Börne as a resident pupil, and to guide him in his studies at the clinics. The youth of sixteen fell in love with Henriette Herz, then in her thirty-eighth year, in the fulness of her beauty and the ripeness of her intellectual power. When her husband, the doctor, died in 1803, Börne told her the story of his love; but, with the wisdom that was characteristic of her, she quieted his passion and soothed his anguish, and soon after he went to the University of Halle, where she secured for him a home in the household of Professor Reil, whose lectures he attended, as well as those of F. A. Wolf, Steffens, and notably Schleiermacher. The letters which Börne wrote from Halle to Henriette Herz, together with selections from his diary relating to his association with her, were published as "Briefe

des Jungen Börne an Henriette Herz," 1861. The insight into the higher intellectual life of Berlin and Halle diverted him from his medical studies, and as the loss of its rights as a free city by Frankfort and its domination by the French had resulted in securing civil rights for the Jews, Börne announced (1807) his intention to follow a public career.

Therefore he entered upon a course of legal, political, financial, and administrative studies at the University of Heidelberg. The result of his labors was that he secured in 1811 a clerical position in the

Dr. Börne

police bureau in his native city, but not before he had gone once again to Giessen to secure his degree as doctor of philosophy (Aug. 8, 1809); his dissertation, "Ueber die Geometrische Vertheilung der Staatsgebiete," being published shortly afterward in Professor Crome's "Germanien" (vol. iii.). In Hart's periodical, "Der Cameral-Correspondent," there appeared in 1809 an article by Börne, entitled "Von dem Gelde."

During the period of his service in the ducal police bureau, he delivered a course of lectures in the Jewish lodge of Freemasons at Frankfort, under the title "Zur Aufgehenden Morgenröthe," and began his journalistic career, in its political phase, by contributing a series of short anonymous articles to the "Frankfurter Journal," in which he sought to arouse the Germans to a sense of the ignominy of submitting to the French invasion, and by this means helped in awakening the old Teutonic spirit. In 1815, after the downfall of Napoleon, there set in that long night of political reaction in Germany,

which continued until dawn began to break in 1848—which that epochal year ushered in by “Young Germany” which was the fruit of the toils of Börne and Heine.

These thirty-three years were indeed years of political torpor and of domination of bureaucratic tyranny. Patriots like Moritz Arndt and Otto Jahm were indicted for high treason; those who had most capably labored for the reorganization of Prussia were no longer heeded or needed in the service of the state; university students were imprisoned en masse for the most trivial offenses; all of the writings of Heine were interdicted; scholars like the brothers Grimm, Gervinus, and Dahlmann were dismissed from their chairs in the university; and the censor was the most potent influence in literature.

When the Jews of Frankfort were relegated to the “Judengasse,” the difficult problem was presented of what was to be done with Börne, the only Jewish official in the service. Every trick and device was resorted to in order to induce him to resign, but he refused; so at last but one course remained open, and he was dismissed. What Börne felt at this time can be well discerned from a perusal of the satirical sketch “Jews in the Free City of Frankfort” in “Fragmente und Aphorismen” (“Gesammelte Schriften,” ed. 1840, vol. iii.). At the request of the Frankfort congregation he prepared a monograph entitled “Aktenmässige Darstellung des Bürgerrechts der Israeliten in Frankfort,” and two pamphlets, “Für die Juden” and “Die Juden und Ihre Gegner,” the latter of which was written at the suggestion of his father, by whom, however, it was suppressed on account of its bitterness.

And yet on June 5, 1818, Loeb Baruch went to Rödelheim and was baptized by Pastor Bertuch as a convert to the Lutheran Church; assuming the name of “Karl Ludwig Börne.” That he had become estranged from the ceremonial observance of Judaism was generally known, but nothing of his previous career, nor indeed anything in his life after baptism, would have led any one to believe that he had become a Christian.

In 1816 he began the publication of the periodical “Die Wage,” which at once elicited wide-spread attention and admiration. He contributed articles of the most diversified character on literature, art, society, the drama, and, of course, politics. His dramatic criticisms, however, created the greatest sensation. An echo of the consideration given to the magazine by the learned circles is recorded in a letter by Rachel, in which the writer can hardly find adequate terms in which to express her appreciation. She afterward became a contributor to “Die Wage.” In 1819 Börne also assumed editorial charge of the “Zeitung der Freien Stadt Frankfurt.” His experiences with the censor were, however, of such a constantly unpleasant nature that he gave up the struggle after four months of endurance. He took his revenge, however, on his antagonist by writing his “Denkwürdigkeiten der Frankfurter Censur.”

It was about this period that there began the platonic relations of Börne with Madame Wohl, with whom he had become acquainted several years

before, which continued until his death. She aided, encouraged, and inspired him in his work; nursed and tended him during the years preceding his death.

In 1840 Heine, in his post-mortem criticism “Ueber Ludwig Börne,” referred insinuatingly to the relations that subsisted between the departed and Madame Wohl, who in the mean time had married one Solomon Strauss. The latter challenged the poet, and after the duel Heine sent a letter to Dr. Wertheim, which was published in the “Augsburger Allgemeine Zeitung,” in which he retracted the insinuations and declared them to be based on erroneous and groundless assumptions. This letter is to be found as a prefatory note to the Börne monograph in Heine’s works.

Before leaving Frankfort for Paris in 1821, Börne wrote his celebrated “Monographie der Deutschen Postschnecke.” This is one of the finest specimens of sustained humor in the German language, and with his “Esskünstler” indicates the high-water mark of his work in this direction. The letters which he wrote during this period (1819 to 1822) constitute the bulk of the publication “Nachgelassene Schriften,” Mannheim, 1844-50.

It was at about this time that his father, solicitous as ever for his son’s welfare, used his influence with the high officials in Vienna to secure for Börne the appointment as imperial counselor, a sinecure without conditions or obligations, but with reasonable emoluments. Börne, however, would not accept the position. It is probable that the unpleasantness occasioned by this refusal led to his trip to Paris, where he remained but a short time, leaving there in the summer of 1822 to go to Heidelberg. At the latter place occurred the first of the hemorrhages that marked the beginning of the disease that was so soon to cut short his career.

It was not until 1826 that he was actively at work again in Frankfort. He was now a regular contributor to Menzel’s “Literatur-Blatt” and Berty’s “Iris.” To this time belongs his splendid eulogium upon Henriette Sontag, the great opera singer, and the magnificent memorial address on Jean Paul Richter, delivered by Börne in the Museum in Frankfort Dec. 2, 1825, and which is considered by many to be his masterpiece: it is certainly the ablest of his contributions to serious literary criticism.

The winter of 1827 was spent in Berlin. In the following year Börne went to Hamburg, and while there arranged with Campe for the publication of a collected edition of his writings, which thereafter appeared in eight volumes (1829-34).

All this time, however, Börne was gradually getting worse in health. Trying one after another of the various resorts, he finally spent the summer of 1830 in Bad Soden, where there came to him the tidings from Paris of the Revolution of July. This fired his heart, and nothing would do but he must go to Paris himself to witness the realization of his dreams of liberty and republicanism.

Here, besides his articles in French contributed to the “Reformateur,” edited by Raspail, and editing

#### Relations with Jeanne Wohl.

#### His Peregrina- tions.

a periodical of his own, "La Balance," he began the publication of his famous "Briefe aus Paris." Like almost everything that Börne wrote, these letters are still of vital interest, even though they are almost exclusively political. They are dominated, however, by the main object of preaching the doctrine of human liberty, the theory of human equality before the law, and the divine right of the republican form of government. In

"Briefe aus Paris." In these letters, though they bristle with wit and teem with humorous touches, his powers of invective, of pathos, of persuasion, are at their very highest.
