

A NEW PHASE IN ELECTRIC TRACTION—THE TRAM ON RAILS PASSED BY THE TRACKLESS CAR

This is a photograph showing a trackless car (left) and a tram on rails (right) on a city street. The trackless car is a single-deck, open-sided vehicle with a license plate 'A-8-DC'. The tram is a two-deck vehicle with the number '114' on its front. Both vehicles are powered by overhead trolley wires. A group of men in suits and hats stands on the sidewalk to the left, watching the vehicles. The street is paved, and utility poles with wires are visible in the background.
