## **ISA Tool**

## ISA tool is a mobile-first tool for adding structured data to images on Wikimedia.

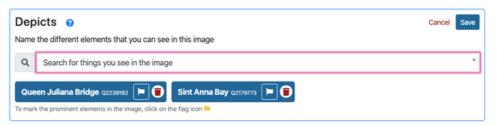

It enriches the database with valuable information and metadata for better accessibility and searchability.

Anyone who wants to contribute to Wikimedia Commons can benefit from using the ISA tool.

The tool works in conjunction with Wikimedia Commons to add valuable information to images.

ISA tool allows for detailed descriptions, captions, and tags to accurately represent and make images easily discoverable.

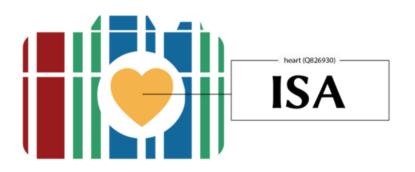

The ISA tool encourages users to start contributing to Wikimedia Commons.
