New Champion Late Flat
Dutch Cabbage

We know this to be the finest strain of Late Flat Dutch Cabbage Seed ever offered, and we have gone to much trouble and expense to bring it to the present high standard. It is all head, always sure to head, and will produce a greater weight of cabbage from a given space than any other sort. The heads have scarcely any outer leaves, are remarkably uniform, solid, of fine texture, have a short stem, and usually weigh from ten to thirteen pounds. It is very sweet flavored, keeps well, is an excellent shipper withstands drought well, and is without doubt the finest late cabbage for the Market Gardener and consumer that we ever saw during our thirty years experience. No variety can approach it for fine quality and uniform reliability to produce solid, firm heads of good size during the most unfavorable weather.

From all parts of the country we have received expressions of unanimous praise, and we could fill many pages with testimonials from thousands of Market Gardeners who grew it the past two seasons. If you haven't had it, don't fail to get it.

Pkt. 10c., oz. 35c., ¼ lb. \$1.00, 1 lb. \$3.75,
2 lbs. \$7.00.

STINSON'S EXTRA EARLY GEM RED TURNIP BEET

Seed grown by William Stinson, Esq. It seldom falls to the happy lot of any seedman to have the honor to introduce a novelty of such great merit as this. Mr. Stinson's success and fame as an early beet grower for the Philadelphia market has extended over a long period of years, and the giving of this grand new early beet to the public through us—we have purchased his entire stock—he considers the crowning effort of his life. His neighbors have frequently offered him fabulous sums for this seed so highly do they prize it for its extreme earliness and quality.

Its special valuable features consist in its being two weeks earlier than the Bastian, Lentz or Mitchell strain together with its being much better adapted to growing under sash, owing to its very few and small leaves, thus rendering it very profitable to the Market Gardener. For a general out-door early crop, or for sowing in July for a late autumn or winter sales it is unsurpassed, and far more profitable than the Perfection Half Long. The quality is the highest, being very tender, sweet and juicy, even when the leaves die off from age. It does not become tasteless, "woody," nor stringy when fully grown as many other sorts do. Market Gardeners will find it the ideal extra early red beet. Oz. 10c., ¼ lb. 30c., 1 lb. \$1.00, 5 lbs. \$4.00, 10 lbs. \$7.50.

Improved Extra Early Eclipse Beet. This very early dark red variety has many points in its favor. The top is somewhat too large for growing under sash, but for open ground planting it will be found the finest dark red extra early sort obtainable, much superior to the Egyptian in quality and much more salable. The roots are perfectly smooth, of beautiful round shape, intense blood red skin and flesh, fine grained and very sweet, either young or old. It is as early as the latter name, and will be found valuable for sowing in place of the Perfection Half Long for an autumn or winter sort. Oz. 10c., ¼ lb. 20c., lb. 60c.

Lentz Extra Early Red Turnip. As early as the Egyptian, fine red color, small top, tender and sweet, extra fine stock, oz. 10c., ¼ lb. 20c., per lb. 50c., per peck \$2.00.

ONION (Philadelphia-Grown Seed)

Philadelphia Yellow **Strasburg or Dutch Onion** **Philadelphia - Grown Seed,** or such raised in that portion of Pennsylvania, is unquestionably earlier than New England seed, and still more so as compared with Western seed. No one can appreciate the value of reliable seeds better than those who have been once disappointed, and too much care cannot be exercised in selecting your supply. There is no vegetable where the quality of the seed exerts a greater influence upon the crop than in onions. Our stock is all grown from choice bulbs, selected carefully by hand, and is unsurpassed in this country.

PEAS (Extra Early Varieties)

Moore & Simon's Prime Extra Early Peas. In earliness and yield our selection of this important seed is not surpassed, and in fact its equal cannot be had elsewhere, since we control the entire stock. In height it ranges from 20 to 24 inches.

The pods are large, of a beautiful shade of green, and well filled with large smooth peas of splendid flavor, very sugary and tender. From the fact that they are grown 89 miles farther north than any other stock insures them to be the hardest, earlier, more productive and less vine than those grown in New York or Lower Canada.

They will be found of equal value for late summer or autumn sowing, or where a pea-crop is required to come off in the shortest possible time. The entire crop can be gathered in two pickings, and in some instances even in one. The illustration, which is from nature, will give a very correct idea of their habit of growth and productiveness, pkt. 10c., pt. 15c., qt. 25c., ½ pk. 60c., pk. \$1.10, bus. \$4.00.

IMPROVED STRASBURG RADISH.

New Scarlet Olive Radish

Felton's Early White Box Radish

Felton's Model White Box. (Grown by Felton.)

This is the best early white variety for growing under glass, on early borders or on squares. It is likewise a great favorite with many Philadelphia market gardeners for sowing throughout the summer or early autumn months. It is much superior and entirely distinct from any other white turnip variety. Its points of superiority are remarkably short top and rapid growth, perfect globe turnip shape, extra fine quality, and showing no disposition whatever to become pithy with age, remaining solid and juicy long after fully grown. Owing to its very new short leaves it can be grown very closely in the row without causing the leaves to "draw". Pkt. 5c., oz. 10c., ¼ lb. 25c., lb. \$1.00.

New Fireball. For forcing in the greenhouse, hotbeds or cold frames, and for sowing on open borders early in the spring there is no other red variety more desirable. It is one of the earliest; in flavor it is mild, crisp, juicy and tender. It forms a small top and will stand a great amount of heat without becoming pithy. It always commands a much higher price and will sell "three to one" compared with any ordinary red sort, pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 75c.

Rosy Gem (White Tipped Scarlet Ball). It is one of the very earliest in cultivation. Their shape is perfectly globular, with rich deep scarlet top, blending into pure white at the bottom, exceedingly tender, crisp and delicious, never becoming hollow or pithy, pkt. 5c., oz. 10c., ¼ lb. 25c., lb. 75c.

Cardinal Globe. Color bright scarlet, small top, of quick growth, mild and crisp, pkt. 5c., oz. 10c., ¼ lb. 20c., lb. 60c.

Scarlet Turnip White Tipped. Very handsome, pkt. 5c., oz. 10c., ¼ lb. 20c., lb. 50c.

Early French Breakfast. Oval shape, scarlet, tipped white, pkt. 5c., oz. 10c., ¼ lb. 15c., lb. 50c.

Wood's Early Frame. Handsome long scarlet sort, oz. 5c., ¼ lb. 15c., lb. 50c.

Philadelphia Early White Box. True, pkt. 5c., oz. 10c., ¼ lb. 20c., lb. 60c.

Improved White Lady Finger. Very handsome long white early sort, very crisp, brittle and tender, pkt. 5c., oz. 10c., ¼ lb. 20c., lb. 60c.

Beckert's Chartier. A variety of the long scarlet, oz. 10c., ¼ lb. 20c., lb. 50c.

Improved White Strasburg. Our stock of this excellent summer sort is better than ever before, the skin and flesh are of an almost transparent white, very tender and a delightful pungent taste, remains in a tender condition unusually long. Can be pulled in thirty-five days from time of sowing. The top being small it can be grown very close, this making it very productive and profitable, pkt. 5c., oz. 10c., ¼ lb. 20c., lb. 70c.

Perfection China Rose Radish

New Red Strasburg Radish

SEED SWEET POTATOES

We make a specialty of seed sweet potatoes, growing our stock exclusively in New Jersey and Virginia, about seven miles from our Philadelphia warehouse, where we have the best facilities for handling and storing. We pack them for shipment in boxes and barrels, with the greatest care; but as they are very susceptible to climatic changes, we cannot hold ourselves responsible for their condition on arrival after long journeys of several hundred miles.

Worth, of Accomac County, which is located on the Eastern Shore of Virginia, the finest section in the United States for growing this fine esculent to its greatest perfection, far superior to all other varieties in earliness, productiveness and quality. PLANT BED CLOTH

As Substitute for Glass Sash on Hot Beds and Cold Frames

This will be found an excellent substitute for glass (at one-tenth the cost) in protecting all kinds of seeds and plants on which glass sashes are used in *early spring*. It is safer in fact than glass, as it protects at night, while the temperature is not raised too high during the day—as is the case with glass sashes unless great care is given in ventilating—and being light and portable, it can be sent into sections where it would be difficult to get sash. The patent treatment given the cloth fills the threads and fibres and preserves them from decay, and also renders it tougher, heavier and stronger, and prevents it from shrinking after getting wet, and, to some extent, sheds rain. We furnish this cloth in one-yard widths, and in any number of yards desired, as follows: **LIGHT GRADE**, mostly used in the South for tobacco beds and in the North for shading green-houses. Per yard, 4½ cents; by the piece of 68 yards, 3½ cents per yard. **MEDIUM GRADE**, the best for general purposes, per yard, 8 cents; by the piece of 50 yards, 7½ cents per yard. **HEAVY GRADE**, water-proof and advised for States north of Pennsylvania; per yard, 10 cents; by the piece of 40 yards, 8 cents per yard.
