

SUDAN

Parts of South Kordofan and Darfur's Jebel Marra are expected to be in Crisis (IPC Phase 3) between February and September and will likely deteriorate to Emergency (IPC Phase 4) as newly displaced people missed the cultivation season, insecurity has disrupted trade, and staple food prices remain higher than normal. Additionally, in several locations (parts of South Kordofan and North Darfur states) there is limited production due to erratic rainfall resulting in dry spells. Without ongoing assistance to protracted and new displaced populations, the situation is likely to get worst.

Fews-net

ETHIOPIA

Many poor households in south-eastern Ethiopia will face food consumption gaps and Crisis (IPC Phase 3) with acute food insecurity between February and September 2017, in the absence of humanitarian assistance.

Some worst-affected households in Warder and Korahe zones in Somali Region are expected to be in Emergency (IPC Phase 4) and face increased acute malnutrition between June and September 2017, in the absence of assistance.

Fews-net

Acute Food Insecurity Phase February-May 2017

- IPC 1 - Minimal
 - IPC 2 - Stressed
 - IPC 3 - Crisis
 - IPC 4 - Emergency
 - IPC 5 - Famine
 - Would likely be at least one phase worse without humanitarian assistance
 - Elevated risk of famine
- Fews-net

SOUTH SUDAN

From February to July 2017, Leer and Mayendit are classified in Famine, while Koch county has an elevated risk of famine.

Fews-net, TWG (South Sudan IPC Technical Working Group), ERC (IPC's Emergency Review Committee)

DJIBOUTI

The majority of poor households are expected to remain Stressed (IPC Phase 2) through May 2017, ahead of the lean season.

Fews-net

SOMALIA

The food security situation is deteriorating and there is a risk of Famine (IPC Phase 5) in a worst-case scenario in which the April to June 2017 Gu season performs very poorly, purchasing power declines to levels seen in 2010/11, and humanitarian assistance is struggling to reach populations in need.

Fews-net, FSNAU (Food Security and Nutrition Analysis Unit – Somalia)

UGANDA

During the lean season (February to June), very poor households in Moroto and Napak are expected to face food consumption gaps and be in Crisis (IPC Phase 3).

Fews-net

KENYA

Large areas of Kenya are facing Crisis (IPC Phase 3) acute food security outcomes and atypical high food assistance needs, mainly in the pastoral and marginal agricultural areas, following the poor October–December 2016 rainy season.

Fews-net, KFSSG (Kenya Food Security Steering Group)
