

Tisk Report

S. S. "TENNESSEAN".

Rule Dimensions:- 402' x 54.5' x 34.5' to upper deck.
Scantling Nos:- 89 and 35800 (1919-20 Rules)
Proportions:- L = 11.67 depths .

This vessel was built in 1919 by the Skinner & Eddy Corporation, Seattle, and classed with American Bureau, has now been acquired by the Ministry of Shipping and it is desired that the vessel be classed with Lloyds Register.

The New York Surveyors have carried out a Condition Survey and issued a provisional certificate pending the carrying out of the requirements of the 2nd Special Survey for classification, which will be completed at a future date. They also forward plans of Midship Section and Deck Plan so that the scantlings may be examined.

On examining the plans it is found that although the lower deck is designated shelter deck, the watertight bulkhead opening to the weather deck, no tonnage is fitted, as indicated on the deadweight scale to an extreme draught of 26'7", which, as far as ascertained from the particulars available, is the maximum permissible on her dimensions. (A poop and foremast are fitted).

The scantlings and arrangements have, therefore, been considered on this basis and compared with the requirements of the Rules in force when the vessel was built in accordance with the practice of the Committee for vessels framed in accordance with the longitudinal system, and it is found that they are in accordance hereto, and, subject to the scantlings being in accordance with the particulars of which should be completed in the Survey Report Form, the Surveyors satisfy themselves in regard to the scantlings of the bulkheads, exposed machinery casings, hatchway, coamings and webs, and

strengthening of bottom forward, on receipt of a satisfactory report on completion of the Special Survey the vessel can be recommended for the class 100A- with the notation "Longitudinal framing".

This figure 1 will be considered when particulars of the equipment on board are supplied.

If a freeboard is desired the usual particulars on Form C.11 should be forwarded.
