Quantity of Seed in a Packet. Customers will please note my **NEW DEPARTURE** in stating the number of seeds in a packet, a rule not practiced by any other seed house until last season, which will enable those wishing to plant borders and beds of a certain length or size to calculate the number of packages required—**FULL COUNT GUARANTEED. NO LESS QUANTITY THAN A PACKAGE CAN BE SOLD.** This innovation of stating the number of seeds in a packet, I introduced four years ago, and from the number of commending letters received from patrons, it appears to fill a **long-felt want.**

FLORAL CULTURE. Revised Edition, by Miss Lippincott, containing full cultural directions and points **HOW TO GROW FLOWERS** from seed, **FREE**, as a premium **ON ALL ORDERS**, if you **REQUEST IT ON THE ORDER.** Contains more useful information than other works of a more pretentious nature that sell from \$1.00 to \$1.50 per copy.

SWEET SCENTED PANSIES.

The Perfume of the Violet. The Beauty of the Pansy.

This new class is the result of crossing the Pansy (*viola tricolor*) with the Sweet Violet (*viola cornuta*); the resulting hybrids, in addition to retaining the delightful Violet Perfume, produce the most beautiful Pansy-like blossoms, 2 to 2 1/2 inches across, of great substance and of an endless variety of colors. They are not all equally fragrant, though the majority are as highly scented as the sweetest Violet, and the other high merits of this new strain, aside from their perfume, destine them to wide popularity. Mixed colors. Pkt., 100 seeds, 6 cts.

Mrs. F. E. Hoover, Croton, Ohio, January, 1897, writes:—I have used your seeds several years and they have always given general satisfaction, especially the Pansies and Sweet Peas.

FIRE KING PANSY.

This novelty comes almost absolutely true, scarcely a plant bearing flowers at variance from the type, which is very distinct and striking. The three lower petals each have a large blotch of deep brown-red or magenta margined with yellow, while the upper petals are of a bright reddish brown, of a *real fiery shade*, warranting the name FIRE KING. Pkt., 100 seeds, 4 cts.

SNOW QUEEN PANSY.

Pure satiny white with yellow dot in center of flower, sometimes marked near center with faint blue or purple lines; altogether the least picturesque of any of the different classes of Pansies; it is very highly prized by a great many pansy lovers for just that reason. Pkt., 100 seeds, 4 cts.

METEOR PANSY.

Color bright canary-yellow; the three lower petals are variously spotted with mahogany-brown, while the two upper petals vary from reddish-brown to dark purple, narrowly margined with gold or silver. Pkt., 100 seeds, 4 cts.

PEACOCK PANSY.

A beautiful variety of ultramarine blue in the upper petals of the flower, edged with a thin white line, within which is a space of purplish-crimson, passing into a rich central blotch of deep blue, shading to black, named "Peacock" because the blending colors resemble the feathers of a peacock. Pkt., 100 seeds, 4 cts.

NEW IMPERIAL GERMAN PANSY.

This mixture embraces seed of over fifty colors and markings, and is **guaranteed** to equal any strain offered as Imperial German. Pkt., 100 seeds, 5 cts.

NEW GIANT TRIMARDEAU PANSY.

In the *Starred Phloxes* the pointed central teeth of the petals are five to six times as long as the lateral ones and project beyond them like little spines, giving the flowers a *star-like form*. Pkt., 100 seeds, 4 cts.

PHLOX, HORTENSIA FLOWERED.

A great variety of colors mixed. Pkt., 300 seeds, 3 cts.

PRIMULA SINENSIS.
(CHINESE PRIMROSE.)

Many persons seem to think Primulas are successfully propagated only in a greenhouse, hence we find amateurs often reluctant to attempt their culture. They are unequalled as winter bloomers, easily grown, if the right conditions are observed, and give a succession of flowers throughout the season, and are prized for both the beauty and their delicate fragrance. **Single fringed, finest mixed, pkt., 40 seeds, 8 cts. CHINESE LANTERN PLANT.

(*PHYSALIS FRANCHETTI.*)

The plant produces numerous, large, inflated husks, much the shape of Chinese lanterns, at first a beautiful green color, changing to a yellowish hue and then to brightest scarlet, and as they hang suspended among the green foliage they present a most novel and strikingly beautiful appearance. Branches cut and dried retain their rich and brilliant color, and make most beautiful winter bouquets when used with dried grasses or leaves. The plant grows from one and one-half to two feet in height. Treated like a Tomato it grows and fruits freely from seed the first season, yet the plants are perennial and may be wintered in the cellar or grown in pots as a window plant. **Pkt., 30 seeds, 6 cts.**

Wm. Bennet, Manager J. C. Wilson & Co., Montreal, Canada, writes:—I received your catalogue and seeds in due course and was very pleased with both, and congratulate you especially on the catalogue. I think it well and artistically got up, comparing it with your competitors of which I have an array—some 26 before me, yours certainly is the most interesting, although not by far the largest.

Mrs. Anna Richards, 225 S. High St., Steubenville, O., March, 1897, writes:—Your seeds have always given me great satisfaction.
