SUBJECT: Registry of Ocean-Going Vessels

THRU: Commanding Officer
Kyushu Military Government Region
APO 24-5

TO: Commanding General
Headquarters I Corps
APO 301
ATTN: Military Government Section

1. In compliance with I Corps letter, subject: "Registry of Small Craft," dtd 15 June 1949, a listing of vessels registered in Kagoshima is attached.

2. Since opinions varied as to which vessels were capable of going 100 miles to sea, all of more than 10 tons have been included arbitrarily.

3. Kagoshima's experience has been that most smuggling boats caught have been between 12 and 25 tons although some as small as 7 and 8 tons have made their way up from the nearby Ryukyus.

4. This listing includes 298 fishing boats, 123 cargo vessels, 21 ferry boats, nine tugs, eight patrol boats, six tankers, two fishery training ships and one self propelled barge. Unpowered barges and lighters are not registered.

INSTRUCTIONS

These instructions will be utilized in completing report on reverse side of page. This monthly status Report of Small Craft and Floating Equipment (Reports Control Symbol J-4) is due in I Corps Headquarters on the 8th of month following month of report.

At the top of page, opposite side, will be found the words "FOR PERIOD ENDING". Enter date of last day in month of report in blank space following.

After "FROM" enter full title of unit compiling report.

After "TO" enter full title of Division or Military Government Region, etc.

In first column on left enter bow number of boat, if any.

In second column from left margin, enter name of boat, if any. If craft has no assigned bow number or name, insert length and beam of subject vessel in first two left-hand columns.

In third column from left margin insert type of craft; i.e., cruiser, cabin; launch, power; boat, rescue, etc.

In fourth column from left insert location of craft giving name of port and dock number or name of body of water, town, and/or dock number.

In fifth column from left state number and nationality of crew, i.e., 7 Japanese, or 3 U.S. soldiers and 1 Japanese, or 2 U.S. soldiers and 1 U.S. civilian, etc.

In sixth column from left-hand margin insert total time engines were operated. In other words, from the time engines are started until the time they are stopped is considered operation time. This time should be logged and totaled at the month's end for this report.

In seventh column from left insert number of hours craft is idle. This is the time engines are not operated during the working day. This, too, is logged then totaled at month's end.

In eighth column from left, enter number of hours utilized for repair of craft. Add total days boat is deadlined while actually being repaired and multiply by length of working day. If under repair for less than a working day, then actual hours repair only need be logged for month's compilation of report.

In last column from left margin enter reasons why boat is deadlined for an undue length of time. Include, also, if boat is a Special Service craft or any other pertinent facts relating to craft.

In lower left hand corner will be found the words "BASIS for Working Day". Enter here the number of hours a standby crew is maintained per day. If the crew is on duty 8 hrs per day then the entry would be "8". If, however, a crew is on duty 24 hours a day, then the entry would be "24". If there is no regularly assigned crew, enter number of hours constituting the unit's work day during which a crew could be alerted for sailing.

If craft is transferred, lost, or disposed of in any way, that fact will be reported on the monthly report for the month in which the incident occurred and also on the monthly report of the succeeding month with a short explanation of disposal.
